

Chapter 981

After Omi stayed at the Martial Arts Academy, that night, he went to Professor Lin Han's house as a guest, and everyone had a meal.

At this moment, in the Yanhuang Empire, the Imperial Palace.

"Big brother, it's been more than twenty days, and Omi hasn't been found inside or outside Wangjing City at all, and he hasn't shown up again, so I'm afraid he's already run away."

"Son of a bitch." Wang Qi gritted his teeth.

"Big brother, you can't delay any longer, don't forget, you but over a month ago, you gave a letter of war to the Martial Forest Island Master, you should hurry up and get ready, if you defeat the Martial Forest Island Master, then, big brother's fame will really be a sensation all over the world, big brother, come on, I'm sure you can do it. You are the protagonist of this world."

Wang Qi just remembered that indeed, he had already issued a letter of war with the mysterious island master of Wulin Island.

The reason why Wang Qi wanted to challenge the Martial Island Master was because, he felt that the old master of the Famous Sword Villa was also at the peak of the Unity Realm Grand Perfection, and so was the Martial Island Master, he was definitely not far behind in strength, moreover, he had refined his martial arts a lot in the past two years, and most importantly, he desperately needed a peak battle, thus helping him to step into the peak of the Unity Realm Grand Perfection, so Wang Qi had issued a letter of war to the Martial Island Master, and this had also sensationalized the world.

Omi temporarily resided at the Martial Academy.

Half a month passed in the blink of an eye, and the foreign population of Martial Forest Island was growing, and almost all of them were strong in the upper echelons of the world. Those at the innate realm might not have such a profound feeling, but for those at the unity realm, the battle of the Martial Forest Island Master was something that could not be missed.

Wang Qi had also arrived at Martialwood Island early, but no one knew where he was, and the location of his duel with the Martialwood Island Lord was at the Martialwood Academy.

The Martial Forest Academy also had many, many strong fighters coming early, Omi was hidden in one of the hillside villas, cultivating his martial dao while silently waiting for the duel to begin. A second to remember to read the book

The day of the duel had arrived.

At nine o'clock in the morning, the Martial Arts Academy was suddenly cheering and someone shouted, "The Island Master is here."

"So that's the mysterious Martial Forest Island Master."

Omi also looked up, and sure enough, in mid-air from afar, a pale old man, dressed in a grey cloth, flew in from afar, and with him, there was also the village head of the novice village, Lin Bai, the village head of the world village, Jin Daofu, and the old president of the Martial Forest Academy. Of course, there was also a good number of late Unity Realm and complete powerhouses who were the old heads of the four major island-protecting families, and this group of people was the peak power of the entire Martial Island. It was no wonder that no one had rushed to compete for dominance on this scenic island of Martialwood Island.

Many many people on the ground cheered as they watched a group of people flying in the sky. Many people had only heard of the Martial Forest Island Lord, but had never seen him before.

The Martial Island Lord flew off the roof of one of the highest buildings in the Martial Academy, and the group of people following him fell to the ground behind him.

All eyes gazed at the Martial Forest Island Lord.

Then, there was silence.

Only the Martial Forest Island Lord said, "Who is Wang Qi? Please come out quickly."

The crowd was talking.

Not long after, a loud laugh came from somewhere on the ground, and a man laughed and flew into the air.

Omi saw the man with a glance and clenched his fists, seeing his enemy appear with his own eyes, Omi could not wait to rush up.

>

However, Omi wasn't impulsive, Omi's eyes looked into the crowd that Wang Qi had just rushed up to, and immediately saw many familiar faces, these dozen familiar faces were the members of the King's Mercenary Group, they had seen them when they were in the Forest of Ten Thousand Beasts, and Omi would never forget them.

"Die." Omi clenched his teeth and said, "Since everyone from the King's Mercenary Group has arrived, although the person who is dueling today is not me, I, Omi, can't not do something, so let's take this opportunity today to kill the remaining dozen or so brothers of Wang Qi."

That's right, Omi couldn't resist seeing the King's Mercenaries, so let's take the opportunity to kill them today.

Thus, Omi immediately darted towards a certain group of people in the distance.

On the ground now, everyone's eyes were focused on the sky, so no one paid attention to Omi, not even the King's Mercenaries themselves.

And right now in the sky.

The Martial Forest Island Lord was also standing in mid-air, face to face with Wang Qi and the two of them.

The Wulin Island Lord looked at Wang Qi and said, "You are the one who wants to challenge me, Wang Qi?"

"Exactly."

"Rumor has it that you defeated the Words Cliff of the Famous Sword Villa, and you killed him."

"Right."

"Then, what are you going to do today."

"Of course I'm here to beat you up today, if you lose to me, then from now on, Martial Island will belong to me and become a subsidiary island of my Yanhuang Empire."

"Hahaha, hahaha, what an arrogant fanatic, I wish you had the strength."

"If I didn't have the strength, how would I challenge you, you and the old master of the Famous Sword Villa are also both at the peak of the Unity Realm, I don't believe that you can still be far apart, today, I will show everyone how I can defeat you. I, Wang Qi, am the king of this world, and if this world were a book, then, without a doubt, I, Wang Qi, would be the main character of this book." Wang Qi said loudly.

In fact, Wang Qi didn't have any confidence within him, instead of facing the Martial Island Master, he felt a great oppressive force, it was completely different from facing the old master of the Famous Sword Villa, and his Heaven Breaking Sword always felt like it didn't have the slightest bit of killing intent against the Martial Island Master. However, it didn't matter, when he was dueling with the Old Villa Master of the Famous Sword Villa, he also had the same lack of must-kill intent, and after fighting for two hours later, he occupied the top, and then he had the feeling of must-kill, and then he sliced the Old Villa Master with a sudden slash. He believed that this time too, as well, he would fight him for a few hours first. And right now, his momentum must not be weak, so it was not a bad psychological battle to mouth off and say that he was the protagonist, overwhelming the Wulin Island Master from his momentum.

The Martial Island Lord, who was now watching Wang Qi didn't say anything else, he saw Wang Qi so confident, instead, he was internally wondering if Wang Qi really had some cards to play.

The Martial Forest Island Lord looked at Wang Qi and always felt like he could easily pinch him, but Wang Qi was so arrogant, he should have some kind of card.

Wang Qi's momentum really suppressed the Martial Forest Island Lord.

The Wulin Island Lord said, "Since that's the case, let the old man see if the young people today are really so powerful, if they are, then it's no less than a blessing to this world, the old man is nearing the end of his life and is happy to see such young people."

Wang Qi snorted, "Since your big day has arrived, it's even better, let me give you an early ride."

982

"Boom." Wang Qi ton chopped at the Martial Forest Islander with an axe.

The Wulin Island Lord moved and avoided the axe very easily.

Wang Qi's axe also created a huge force field in the sky, causing a crooked wind to swirl on the ground close to it.

The Wulin Island Lord felt that the other Wang Qi was too easy and could defeat him completely in one move, but he wasn't in such a hurry because he wanted to see if Wang Qi really had any tricks up his sleeve for being so wild, so the two of them were in the sky, one attacking and the other dodging.

At this time, on the ground, Omi had already rushed behind the members of the King's Mercenary Group.

The dozen or so people from the King's Mercenary Group were watching the battle in the sky with burning eyes and were shouting, "Brother, come on."

"Captain, cheer up."

Tang Zidun grabbed a few tiles of the roof

"Swoosh." In an instant, Omi sent out five tiles.

These five tiles went towards the dozen or so people, five of them at the Unity Realm Perfection level to kill.

Yes, there were five that Omi intended to kill first, five of them, and with Omi's Unity Realm Perfection strength, he was very confident that he would kill five lower level ones in an instant. The first website m.kanshu8.net

"Puff." In the blink of an eye, five tiles split those five Unity Realm completers in two.

“Ah.”The remaining seven people, reacted and looked to the people standing around them, shocked, who had just been standing around and shouting together to cheer, but at this moment, they were split in half, and they were also split by the tiles.

The remaining seven people, immediately turned their heads and looked towards the place where the tiles were sent, but, they saw nothing, because Omi had already flashed and went in front of them.

These remaining seven people were all Unity Realm Perfection, first level, second level, so it wasn't so easy for Omi to deal with them, which was why he first took care of those five Unity Realm Perfection in an instant.

At this moment, Omi flashed in front of them in an instant, and as they all turned their heads to look behind, Omi sent out four more tiles in an instant.

These four tiles each killed the four Unity Realm Great Perfection First Levels, as the same realm as Omi, Omi killing four of them in an instant, with a must-kill intent, was not a difficult task for him.

“Puff.”In an instant, those four Unity Realm Great Perfection First Levels were also split in two by the tiles, Omi's tiles were completely like blades in his hands, if he dealt with the powerful ones, the tiles would indeed not work, but against the weaker tiles, the leaves could be a sharp weapon.

Up to this point, Omi had killed the other 5 + 4, nine people, only three were left, and the nine people he killed were all done in the blink of an eye.However, the remaining three, all of them were at the second level of the Unity Realm Great Perfection, one level higher than Omi, they were no weaker than Tuo Lei, plus there were three more of them, and they had thoroughly reacted to the fact that it would be difficult, if not impossible, for Omi to kill them again.

Those three looked at Omi, their eyes filled with incredulity.

“Ahhh.”One of them looked at his side, the bodies of his nine brothers split into two, and shrieked in pain.

Omi no longer had a head start on sneaking up on the three, so he stepped back a few meters and watched the three men vigilantly.

Omi looked at the fiery eyes of the three of them, and felt very much enjoying himself at once

This is revenge.

“Brother, woo-hoo.”

“Oh my brother.” The three men roared at the corpses all over the ground, all but happening for a moment.

The ground also caused quite a stir, but what, the entire Martial Arts Academy, every place was filled with people, everyone was looking at the sky, so no matter how much of a stir it was, it wouldn't make much of a stir.

In the sky, Wang Qi didn't pay any attention to the ground, he was now going all out to kill the Martial Islander, but no matter how much he went all out, the Martial Islander easily dodged, and the Martial Islander only dodged and didn't make any attacks at all.

Gradually, Wang Qi had lost his confidence, and he was beginning to doubt that he was not an opponent at all, this wasn't even a duel on the same level.

The Martial Island Lord said, “Wang Qi, don't waste your energy, if you have any pressurized skills, please use them immediately, I don't have the patience to dawdle with you here.”

Wang Qi's face was extremely ugly, the Martial Forest Island Lord was not exerting any effort at all, he was just waiting for his bottom-pressing technique.

However, Wang Qi's crushing power was the Sure Kill Intent, which was his Heaven Breaking Knife, but he didn't have any confidence to split the Martial Forest Islander in half right now, this was not the right situation to issue his knife.

On the ground, Omi had killed nine, and was in great delight.

"Omi."The remaining three looked at Omi with red eyes.

Omi snorted, "How?How does it feel to lose a brother?"

"Omi, you killed my brother, I don't share the same fate as you."

Omi snorted, "I'm sorry, back in the Forest of Ten Thousand Beasts, I've been at odds with you, I swear I'll kill all of your brothers, and then finally kill your leader.Hahaha, now, I've finally killed fifteen of you, hahaha, hahaha."

"Omi, today I want you to pay with your life."

The three of them suddenly came to kill Omi.

Omi exerted his Herculean power.

"Boom."The power of Omi's punch collided with the other three's attack, and both sides retreated several meters, indicating that Omi's Herculean Power had no chance of winning against these three.

Moreover, Omi's Herculean Power was too consumed.

Omi decided not to fight with them today, save some for next time, anyway, there was no point in killing them all at once, leave three alive and let them give a message to Wang Qi.

Omi said, "I'll let you guys off the hook today, and bring a message to Wang Qi later, and say that I, Omi, will kill all of his brothers, and then kill him at the end, so that he can clean his neck and wait for me, hahaha."

Omi blinked and cast the Ghost Wheel Resolve and disappeared in the same place.

The three of them immediately went after him with red eyes, but Omi's Herculean strength was no slouch just now, even though it was a single punch against the three of them, they didn't have the upper hand, their blood was still boiling and flowing backwards at the moment, if they had just faced Omi instead of the three of them, they would have lost to Omi, and Omi's terrifying strength also made them tremble.

Omi soon returned to the hillside villa in a great mood.

In the sky, Wang Qi was still bitterly killing the Martial Islander, the Martial Islander still only dodged and didn't attack, Wang Qi already felt like collapsing, he had discovered that he wasn't even on the same level, he was being played like a fool.

"Where have you been?" Moe asked.
