Chapter 1231: Enter the hive (Happy New Year's Day)

The underground hive, the mysterious and rigorous atmosphere keeps the lazy cat's family in a tense state.

From being picked up by someone to get off the car.

Automatic and intelligent driving, the cabin is closed all the way, and the fuzzy frosted windows are invisible.

When the car stopped, they were already there.

"Secretary Tang, where are we?" Lan Yue.

Tang Jiaqian smiled politely, slowed down and introduced: "This is the company's most secret core research institute."

"It is also the world's top genetic engineering laboratory. Almost all of the company's most eye-catching scientific research results come from here."

Lanyue looked around curiously, stopped and went, and asked about everything she saw.

Tang Jiaqian did not urge, and patiently explained the principle to her.

However, she is not a researcher, and she has a little knowledge of the laboratory.

You have to ask her about the project reports, data, and things on paper.

She can speak very well, and everything is clear.

But you have to ask about the experimental principle, what are the bottles and cans in the hands of those researchers.

Don't ask, ask is confidential!

"Yue Yue."

Qin Yu, who learned that they had arrived, took the initiative to greet them.

Seeing him coming over in a small train, Lan Yue immediately put his curiosity behind.

happily ran forward and threw himself into his arms, looking at the little train excitedly: "It's so beautiful, I want to take the little train too."

shook her body coquettishly, pouting her mouth, her cute appearance made Qin Yu unable to extricate herself.

bowed his head and kissed affectionately, Lan Yue's eyes were narrowed into a crescent moon, and the person instantly softened.

Following Dad Lan and Ma Lan, they kept coughing.

"Cough cough, cough, huh..."

'S aggravated voice finally awakened the two who had fallen into a deep kiss.

Lanyue buried her head in his arms and couldn't raise her head shyly.

Brother Yu seemed to be okay, "Uncle, Auntie, let's get in the car first, and the laboratory is ready."

"Well, Xiao Qin, trouble you." Dad Lan looked at the son-in-law with deep emotion.

Once upon a time, he still felt that this son-in-law was unreliable.

looked honestly, but in my heart I don't know how many flowers intestines are hidden.

knows to coax a little girl and turn around her daughters...

Later, I gradually came into contact with him, and my impression of him became better and better.

This time he even invited his family to carry out the 'longevity transformation.' Dad Lan is a mixed bag for a while.

In my heart, I can't tell what it's like!

sad? Relieved? awkward? Still a little...a little proud? !

Anyway, only Dad Lan knows what it feels like.

I am more satisfied with this son-in-law...

The news about the "Elixir of Longevity" was spreading.

I don't believe other gossips. The price given by the company is posted on the official website.

As long as you are not blind, you can see it.

Three people, that's 300 million...

just said that there are a few sons-in-laws who can give 300 million to their natal families, or those who are not married.

Don't worry about how much money a son-in-law has, the more money you have these years, the more you need to pick it up.

You have to list the prenuptial agreement clearly when you enter the door, divorce? !

Better to send you millions, and there are a lot of people who go out of the house.

nasty, not only let you go out of the house, but also have to apologize to your in-laws for millions, and a paper-like book will send you to the yamen.

300 million?

Ha ha, you can't escape these three hundred million in bed, let alone the sky and the sun.

Dad Lan can see clearly, this son-in-law!

Reliable~

"Lao Lan, what am I talking about?" Following her daughter, Lan's mother bumped her wife with her elbow.

"Our girl has the same vision as mine, it can't be different!" Ma Lan was proud of her face.

Compared with Dad Lan, Ma Lan is more enlightened.

From the beginning, she was supportive of the relationship between the two.

It's okay if you don't get married now!

will be everywhere in the future, don't you still have a chance?

Besides, not getting married is nothing.

The two of them didn't say anything, except that they didn't have the wedding, there was no certificate, and there was no difference.

The days go by, the baby should be born...

Someone else has it, my daughter has it, what others don't, my daughter has...

Lan's mother thought thoroughly that the marriage these years could not be guaranteed by a single book.

Marriage and divorce are playful to young people.

There are quite a few people who use a notebook to live a life like marrying a wife with nothing but nothing.

In the end, it was a waste of money and wealth, and it was in vain.

Seeing that Xiao Qin is a real man, he bought a car and a house when he fell in love.

My secondary card is handed over to my daughter, you can spend it whatever you want.

It hurts people, and it makes Lan's mother even envious.

Whether the man hurts the other, the woman knows the most.

Ma Lan can see it, this son-in-law really loves her girl...

I changed my person, and I didn't have the ability to say five or six, thinking of myself as a person too much.

I'm going to run into a Puxin man again, it will be blood mold for eight lifetimes.

As for what the old man worries about... Huaxin.

Ha ha, Lan's mother cast a weird look at her old man, "Is there a cat that doesn't steal fishy in this world?" '

drove to the laboratory, and the team in white coats was ready.

Shi Cui, wearing gold-rimmed glasses, walked forward with a smile and joy, "Miss Lan Yue, welcome to Miracle Town. I am the head of the genetic project, Shi Cui."

Shi Cui did not mention 'Fengchao,' to the outside world, under the small town is still an obscure place shrouded in mystery.

"Thank you, Shi Cui..." Lazy Cat looked at Qin Yu asking for help.

smiled and stroked her head, "Leader Shi is the chief scientist of the gene project and one of the company's scientific research leaders."

"Head Shi, hello." Lazy cat greets politely, looked at him more curiously.

This team leader Shi looks so young, he wears glasses and is gentle, he must be a good person, right?

Dad Lan and Mother Lan stepped forward, this time Qin Yu took the initiative to introduce them.

The two sides exchanged greetings. After Shi Cui responded politely, the conversation changed: "Shall we start?"

He is here to check the propriety's favorability, so he has no time to delay with irrelevant personnel.

Dad Lan, Ma Lan also noticed the indifference under the enthusiasm of the other party.

I felt relieved when I thought about it!

The other party is young and takes on important positions, and he is also the chief scientist of Miracle Genetic Engineering.

It should be a little arrogant. To be polite to a girl, there is a son-in-law, Xiao Qin.

The old couple of them are just right.

"Okay, there is Team Leader Laoshi." After the greeting, everyone entered the laboratory together.

There are three independent compartments, with an operating table in the middle, and various emergency and testing equipment neatly placed against the wall.

asked the three of them to put on surgical gowns, and the atmosphere suddenly became tense.

"husband."

Lan Yue, who was lying on the bed, was also very nervous, clutching Qin Yu's hand tightly.

Slightly hard, Qin Yu whispered: "Don't be nervous, the sleep is over, I'll be with you here."

nodded vigorously, and Lan Yue took a deep breath to relax her body.

The injection was pushed into the body, Lan Yue's eyelids grew heavier and he fell asleep soundly under Qin Yu's caress.

Chapter 1232: Host, guest

For 48 hours, Lan Yue opened his eyes again.

Sleeping for a long time caused her thinking to be confused with time, and her consciousness remained before the coma.

The influence of 's absence made her look a little weak: "Where am I?"

"Wake up, I am here." Qin Yu, who had been guarding the bed, immediately held her hand.

At this moment, Lazy Cat no longer asks where it is.

closed her eyes peacefully, and she was not completely awake due to the effects of the medicine.

It wasn't until two hours later that Lan Yue returned to normal: "I slept for 48 hours? Where are my parents?"

"Take a rest next door, rest assured, everything goes well."

With Qin Yu's assurance, Lan Yue certainly believes in one million people.

Sitting in his arms, pressing his head against his chest, listening to his powerful heartbeat, this moment is happiness for Lazy Cat.

Apart from dancing, she has never had any big pursuits, ambitions or dreams.

As long as you can continue to dance, stay with Qin Yu, with his love...

This life is enough!

After being warm for half an hour, the lazy cat stood up reluctantly.

"Take you to eat with your uncle and aunt. Just when you wake up, your body needs nourishment."

Lanyue nodded obediently, leaned her head on his arm, and let him pull herself forward.

"Is that the end?" Lan Yue.

Qin Yu smiled and stretched out her hand to scrape her nose: "There is one last shot. It will take a few days to get the injection. It will be over when the last shot is finished."

Lanyue opened her mouth, "Is it so troublesome?"

"Trouble." Qin Yu couldn't laugh or cry: "You stupid cat, that has a life span of five hundred years, how can it be considered trouble."

Hearing what he said, Lazy Cat felt right, he was too insufficient.

Just sleep, and get another shot every few days.

This way, I can live another five hundred years, but I still feel troubled...

If you let people outside know, you have to drown her with saliva.

put out his tongue mischievously, the lazy cat did not speak, clingingly clinging to his arms with both hands.

Feeling the depth of his arms, Yu Gexin said, 'The stupid cat's body is getting better and better.'

However, this is not good news for Lazy Cat.

Since Shangwei started to be overweight, her distress has come.

All movements have changed their center of gravity, and a simple movement from time to time may cause mistakes.

It's not like falling, but it's no longer elegant, flexible, and not standard enough.

Fortunately, both Zhou Xue and Tang poetry are very experienced in this kind of thing.

Under the guidance of Zhou Xue and Tang Shi, Lazy Cat quickly learned how to adjust the center of gravity of the dance.

At the same time, I also learned how to use the inertia brought by the weight of the upper circumference to make my movements appear more smooth and coherent.

It's just that every time I pull back my strength, my chest will be shocked and uncomfortable.

"By the way, Teacher Zhou and Sister Tang, when will the two of them come over?"

Qin Yu originally meant that the two of them came with Lazy Cat.

Knowing that Lazy Cat's parents are also coming, the two of them tactfully refuse, saying that they will wait until the uncle and aunt are over.

"Ms. Zhou and Sister Tang said, let me call them when it's over." Lazy cat replied heartlessly.

Qin Yu cares about Tang Shi and Zhou Xue. She is not jealous at all. Instead, she feels that they should finish their transformation soon.

My husband has said that the sooner the transformation, the better, and the stronger the body's adaptability.

Moreover, I can fix my appearance at the current grade as soon as possible.

'beauty' is also the best...

This was not what Qin Yu told her, but Mr. Shen called secretly.

Teacher Shen was among the first batch of injections. Last time I was connected to her by video, Lan Yue was taken aback by her changes.

The slight faint lines on the corners of his eyes have now completely disappeared.

The skin is moisturized as if soaked in water, and the ruddy and translucent skin is even more beautiful than the crystal doll.

After all, the most beautiful crystal doll is also fake.

"When will Sister Wanxing, Xuanxuan and Shanshan get the injections?" Compared to outsiders, Lan Yue certainly cares more about her sisters.

The four of them have come to the present. They are not sisters, but they are closer than any sisters.

It can be said that the other person has a look and a word.

can immediately know what she wants to do, just like a roundworm in the other's stomach.

Now I am short of the last shot, and Teacher Shen has also completed the transformation.

Teacher Zhou and Sister Tang have already arranged.

Then, what's the situation with my sister?

Seeing her caring, Qin Yu smiled in her heart, rubbed her head with her hand and said, "Don't worry, I have arranged it all."

"Tomorrow, I will personally go to complete the transformation for them." The three needed potions are ready.

Qin Yu also made an appointment with them, and the three of them will go to the western-style building tomorrow to complete the renovation together.

"I want to go too." Lazy Cat said enthusiastically.

It's been a long time since she saw the sisters. Tomorrow, everyone can meet and get together to chat all night.

"good."

This is exactly the same as Qin Yu's original plan.

took her over, and Teacher Shen should get some wind there too.

I received Dad Lan and Ma Lan and took their family to the cafeteria for a nutritious meal. Qin Yu personally drove them out this time.

Said it was driven by himself, but in fact it was handed over to the automatic system, but the driver sitting in the driver's seat was replaced by Qin Yu himself.

settled Dad Lan and Ma Lan at Lazy Cat's house, and Qin Yu and her stayed.

Tonight, they will rest here.

Lanyue spends no more time with her parents than she spends time with herself. At dinner, it's great to have a family sitting and chatting together.

After dinner, the family sat in the living room watching TV.

Lanyue went to clean up the room, "Dad, Mom, you sleep here at night, and Qin Yu and I sleep over there."

Seeing the quilt in her arms, Qin Yu quickly stepped forward to help.

Lan's mother asked if she had some enlightenment: "Where do you usually sleep?"

"This house is the main house. You and Dad can sleep more comfortably." Lan Yue said, pointing to the room behind him.

As soon as she said this, Lan's mother immediately got up and stopped, holding the quilt and walking to the main house: "There is no reason for guests to sleep in the main house, Yueyue, you can't do that."

"Mom, you are not a guest." Lan Yue followed into the house, hugging her and said coquettishly.

"Why not? You both marry...just like marrying someone, so when your parents come, will they be guests?"

Lan's mother sat cross-legged on the edge of the bed, looking at the layout of the room.

I saw the Totoro that can be seen everywhere, the warm decoration, and the alone photos of Lan Yue hanging on the wall.

Lan's mother felt more satisfied, except for one thing: "Why don't you see a picture of the two of you?"

"Yes, but not magnified." Qin Yu at the door pointed to the dressing table.

The photos on are all photos of him and Lazy Cat.

Refills, hugs, and artistic photos of dance moves.

"Oh, Xiao Qin, you have also learned to dance?" Lan Ma asked somewhat unexpectedly.

Hearing her question, Qin Yu smiled bitterly and pointed to Lan Yue: "Well, I learned from her...it's okay to grind the gun and take a photo."

Lan's mother was taken aback, and then burst into laughter: "Haha, our family Yueyue is really capable."

Seeing this house and these photos, Lan's mother felt more at ease.

This little Qin, to my daughter...

It's not an exaggeration to say that you are compliant and compliant...

Chapter 1233: True and false daughters

The next day.

Arranged Tang Jiaqian to take charge of the itinerary of the two elders. Qin Yu and Lazy Cat went to Teacher Shen's house without having breakfast.

"Teacher, I haven't eaten breakfast yet!" Holding Teacher Shen, Lazy Cat performed a spoiled Dafa.

I was so panicked by her that my bones were crisp, Teacher Shen smiled lightly and said, "Okay, OK, I'll do it for you now."

Seeing Teacher Shen walk into the kitchen, Lazy Cat followed happily.

was left alone in the living room, Qin Yu sat on the sofa with his eyes closed and slumbered.

Consciousness travels through time and space, the dark universe, and landed on the scarlet giant planet.

The giant statue of one kilometer high emits a golden halo afterglow, illuminating the surrounding area.

The believers who were crawling in front of the statue prayed, their bodies trembling, and their bright eyes shouted, "The emperor bless you."

was responsible for guarding the statue. The genetic warrior in power armor turned and stood sideways, bowing his proud head on one knee.

The halo emanating from the statue is getting stronger and stronger, looking at the number marked on the upper right corner of the mall.

Qin Yu decisively chooses "Blessing," the large golden spots of light are scattered.

Like a golden drizzle, it fell on the believers.

Strength, courage, loyalty and faith, the latent pain disappeared under the washing of golden raindrops.

is full of light and vitality, such obvious changes bring a firmer belief.

Amidst the chants of the believers, the statue gradually returned to calm.

Looking at the 200,000 faith value that just disappeared, it rose rapidly at a speed visible to the naked eye.

20,000...50,000...100,000...

The final number stopped at 550,000, and Brother Yu smiled satisfied, "The leeks are fat again."

The number of harvests was only 400,000 when the sage was revealed last time.

In the past half a year, I have increased by 150,000 faith points.

These leeks have a high potential!

550,000 belief value, enough to gather the materials needed to build a light gate.

Open the [Material] area, Brother Yu pulls down, and soon he sees the "Starry Sky Mine" he needs.

This kind of mineral is a necessary material for the construction of the star gate, 1 kilogram = 10,000 belief value.

The price is extremely expensive, and to build a giant light gate that is large enough for the Medusa flagship to pass through, hundreds of kilograms of starry sky mine are required.

Earlier, Qin Yu had already saved 50 kilograms, plus the 55 kilograms he exchanged this time, it should be enough.

"Qin Yu~" Just after changing the required starry sky mine, the lazy cat came out with breakfast.

Fresh and tender steamed eggs, topped with a little sesame oil and soy sauce, the steamed eggs are printed in a beautiful amber color.

"There are also fresh meat buns, which Mr. Shen made by herself." Lazy cat took the buns, oh oh, took a bite.

The smell of meat wafted out, and Qin Yu moved his index finger, picking up the meat bun and biting off half of it.

looked at the bun in his hand, and then watched him solve one by two.

Lazy cat puffed up his mouth, ahh~

there are still two thirds in her hand, her small mouth is stuffed up and swollen.

Teacher Shen, who had cleaned up the stove, came over and sat down, watching her childish performance, and said amusedly: "Eat slowly."

"Mr. Shen, when did you make the buns?" Qin Yu smiled weirdly, as if to imply something.

Shen Bing lifted the hair sideburns with his hands, pretending to be calm, and said: "Xuan Xuan said she wanted to eat, so she wrapped some."

"Oh~" The long and meaningful sound made Shen Bing a little bit unable to sit still.

"I'll see what's in the house, is it enough for noon." Turning back to the kitchen, Qin Yu feasted.

Two steamed buns, one steamed egg, and it was solved in no time.

This time, the buns in Lazy Cat's hand have not finished eating.

She no longer compares with Qin Yu, chewing slowly is good for health.

Hmph, badass!

smashed his mouth, Qin Yu walked to the kitchen carrying the bowl: "Mr. Shen, do you need my help?"

"No, um...you, you wash the seafood!"

"Okay, I'm good at this."

Qin Yu directly washed the seafood, and the corners, inside and out, had to be cleaned.

If the seafood is not clean, it can cause vomiting and diarrhea, and food poisoning.

Maybe you have to go to the hospital, but it's no joke.

Waiting for the lazy cat to eat breakfast, Qin Yu's seafood has been put in the refrigerator.

"Teacher, when will Xuan Xuan come back?" The lazy cat with nothing to do clings to Mr. Shen, unwilling to let it go for a minute.

Shen Bing, who treats her like a daughter, is willing to be stuck by her.

Compared to Xuan Xuan, she is more like Teacher Shen's pro-daughter.

No, Wen Yaxuan mocked as soon as she came back: "Oh, your daughter is here?"

Teacher Shen gave her a sideways glance, and said, "No, it's better to be a girlfriend."

This makes Wen Yaxuan annoyed. The white teeth are important, and the little Huya makes a 'creaking'.

"Xuan Xuan, come on."

Lazy cat eyes and Haoyue waved to her: "My sister will give you some place to get close to your mother."

"Puff~" Li Wanxing, who came in with nutrition, laughed directly.

"The War of the Century?" Jiang Xiaoshan also came.

high-order lapel coat, **** pointed toe and narrow high heels, a typical successful female style.

Qin Yu stepped forward and took the things they were holding. Every woman looked at him differently.

Wen Yaxuan snickered, blowing a few kisses while she was not paying attention.

Li Wanxing's eyes rolled anger, her expression clearly said, 'Bad guy, what bad idea is there anymore?'

Jiang Xiaoshan's gentle concern, whispered, "Sir, I miss you."

That deep tenderness, Qin Yu's heart is made of titanium and rhodium alloy, and it has to be transformed into a stream of spring water.

When the people arrived, the western-style building became lively.

The noise and laughter of twittering shrouded everyone's heart.

Qin Yu also wanted to squeeze into the kitchen to help, but before he could succeed, Li Wanxing and Wen Yaxuan were squeezed out by Li Wanxing and Wen Yaxuan.

"Women's special train, men are forbidden." Li Wanxing said proudly.

Seeing her proud look of hilarious joy, Qin Yu made a few vague moves, and the previous tsundere instantly turned into shyness.

Brother Yu smiled triumphantly and turned to the living room.

Xiaoyanger, I'm not afraid of flashing back when I'm talking to my brother, an old driver.

Since there was nothing to do, Qin Yu sat on the sofa and waited for the meal.

Compared with him, all landlords are weak.

After all, the master of the landlord couldn't find such four beautiful girls.

With the nourishment of brother Yu for so many years, his own experience and the bonus brought by money, the four fairies are full of the confidence and maturity of modern women.

The charm that radiates from the inside to the outside is not comparable to pure appearance.

"Kylin, turn on the projection."

Before the voice of fell, a holographic projection appeared in front of my eyes, with dozens of columns of different categories inside.

I want to see where I want to, just zoom in with my finger to see it.

chose the international real-time news, and Qin Yu lay on the sofa comfortably.

It didn't take long for a piece of news to make him sit up: "Earth veins are shaking in Beizhou, and strange geological structures have broken through the ground and permeated all around. Scientists are currently formulating urgent countermeasures..."

Looking at the knots squirming like thick roots in the projection, isn't it the twisted veins of the land of misery?

Chapter 1234: Occupied Beizhou

Buzzing!

As expected, the terminal sounded immediately.

The speed of the company receiving news is not slower than that of news, and it can be reported to Qin Yu for review and confirmation.

No matter how fast, time will be delayed a lot.

Sometimes, it's not as fast as live news...

"Boss, the situation has been confirmed, and the pollution from the land of suffering has spread to Jeonbukzhou through the earth's crust.

So far, there has been a trend of active pollution in the east and west coasts. "

The ambiguous news in the news was confirmed in Xu Mei's heart.

The company has made a response plan. Currently, the West Coast is fully guarded, and all citizens are not allowed to go out from now on.

Living materials are distributed uniformly, and the community inspects the staff twice a day, and distributes materials by the way.

At the same time, BlackRock is ready to evacuate.

"Ilibela decides on all matters. She is the person on the front line. If there is any problem, communicate in time."

Beizhou has undergone such a big change that no one has expected.

Qin Yu originally thought that there was a monastery, which would prevent the pollution from spreading out, and prevent creatures from entering it and deforming and fleeing.

Unexpectedly, the radiant energy of the earth veins spreads to Jeonbukzhou through the crust.

Isn't the whole continent completely fallen?

Continue to think, since Beizhou has been polluted, will the earth be completely polluted?

In the end, is it still inevitable that there will be a total fall?

Thinking of the "Healing Heart" above the polluted area, Qin Yu suddenly had an idea.

Connected to Ilibera, Qin Yu ordered a large amount of distorted flesh and blood to be collected and transported back to the contaminated area, so that the 'Healing Heart' was forced to upgrade.

Since it improves its ability by purifying pollution, it is forced to provide aberrant flesh and blood, in principle, it can speed up the upgrade speed.

But whether it is effective, we will know afterwards.

With Qin Yu's order, the first batch of distorted flesh and blood was transported to the contaminated area two hours later.

Bury the distorted flesh and blood in a predetermined 'upgrade point', and the 'heart' hung above accelerates beating.

The invisible golden light becomes deeper, and the activity of the aberrant flesh and blood is gradually disappearing.

came to an effective conclusion, more aberrant flesh and blood were sent to the contaminated area continuously.

At the same time, the lunch in the western-style building is over.

Li Wanxing, Wen Yaxuan, Jiang Xiaoshan, the three lie side by side on the big bed in Xuanxuan's bedroom.

"The injection is about to begin, don't be nervous."

Qin Yu opened the three password boxes, verified the activation, and took out the automatic injection.

Under Li Wanxing's nervous gaze, he thrust the injection into her right arm.

呲, Zi...

The medicine was pushed into the body, and Li Wanxing's consciousness quickly sank into darkness.

Before going into a coma, raised his hand and grabbed the corner of his clothes.

Waiting for the hand holding the corner of the clothes to drop naturally, Qin Yu started to inject Wen Yaxuan, and finally Jiang Xiaoshan.

She is the easiest one, closing her eyes, smiling, and her trustful expression warms Yu Ge's heart.

'Fortunately, I took this goblin away, otherwise, the three little ones in the world would have to die.'

After completing the first injection, Qin Yu started the second and third injections in order.

The time is accurate to the second every time, and he observes the changes of the three of them all the time.

When the fifth injection was over, it was confirmed that the three of them were in a stable condition, and Qin Yu was finally able to take a break.

"The next injection is 10 hours later, let's go out first!" Leaving the room with the lazy cat, he went downstairs.

Teacher Shen was sitting on the sofa watching TV, pretending to be calm, and Qin Yu could see through it at a glance: "Mr. Shen, everything goes well."

The big stone in his heart was put down, and the corners of Shen Bing's mouth rose slightly: "I have stewed the soup, this will be just right to drink."

Lazy Cat rubbed her belly. She didn't do much exercise this day, so she just ate.

Qin Yu is not welcome, and will drink soup after he enters the kitchen.

Lazy Cat is attracted by the domestic blockbuster being shown in the projection, it is a new science fiction blockbuster shot by the famous studio.

With the support of Miracle Company, Ming Yang has made several sci-fi masterpieces, all of which are very popular.

Even many foreign works have changed, actively seeking fame.

Naturally, what I want is the technical support of Miracle Company, all-media projection technology plus real exoskeleton, mecha, and starship.

includes a variety of futuristic front-end technology, so that the content of each film is full and almost fortress.

Some unimportant information, even a shot passed.

Some critics even gave such a film review: "Even if you just look at the various technologies in it, without any plot, this is a masterpiece that makes science fiction fans reluctant to blink."

Many sci-fi enthusiasts, DIY and grandma, even study every frame.

What is it that flashes by in the lens, and what new technologies are added to it.

Are those peculiar substances real or special effects? !

To this kind of controversy, there are so many in the film...

Such as a wonderful Star Wars, the reality is beyond the imagination of the audience.

Even famous directors and special effects studios declare, 'if it's real, then it's understandable.

But if it's special effects, Mingyang's technology is at least a century ahead of today's society. '

Therefore, as far as the content is true or false, the audience is polarized, and it is hard to separate online.

Interviewed the actors and smiled to face the camera: "Of course you have to ask the director about this kind of thing."

Director, did I **** ask?

The director of each film is followed by the same two words: Qilin.

Who is the unicorn? !

Miracle Company's artificial intelligence machine, controls the entire Miracle Company's operations, and is currently the world's most advanced AI artificial intelligence.

If I have permission to talk to 'Kirin', I still need to take care of your star?

MMP~

Very angry, but there is nothing to say.

The movie being shown here is a tragic star war.

The beam of light flies randomly, a starship disintegrates in the beam, and the human beings caught in the endless space can be seen instantaneously turned into ice sculptures.

The pupils in the fundus of his eyes instantly dissipated into star points, and plunged into the darkness that determined death with reluctance and recollection of life.

stared at the corpse floating into the deep space in the projection without blinking. The immersive feeling made the lazy cat shudder.

shivered suddenly, the lazy cat trot towards the kitchen: "Qin Yu, I'm afraid..."

Standing in front of the kitchen door, lazy cat's cute eyes are full of "???"

The next moment, a big hand grabbed her in.

"Little Qin..."

The dream turned into silence, and fierce gunfire sounded in the living room: "Da Da Da, for the emperor, kill them all."

"For the emperor, hoo ha!" Amidst the frenzied shouts, the crowd charged forward.

For the faith and loyalty in my heart, give everything...

Ten hours later, only Qin Yu remained awake in the mansion.

After completing the injection for the three people lying on the bed, Qin Yu squeezed down on the side of the bed a little tired, his eyes flashing and falling asleep.

Chapter 1235: Humanitarian aid

While waiting for Li Wanxing's trio to wake up, Lazy Cat showed serious thoughts.

There is morality on one side, and Qin Yu's fallacies on the other.

Break the life limit and live alone for the next five hundred years. This is not luck, but torture!

Lazy Cat agrees with what he said, but...

But he is not the only one in this world, 'so annoying!'

Lazy Cat decided not to think about it anymore.

"婴..."

Wen Yaxuan was the first to wake up.

"Don't worry, just lie down for a while, the injection went well, go to sleep, go to sleep!"

stroked her head and put Wen Yaxuan to sleep.

Qin Yu continued to wait, and it would take a few hours before it was completely over.

The third daughter did not fully recover until before dinner.

one by one squeezed in front of the mirror, constantly comparing the difference with the previous one.

"Look, you see, my smile lines are gone."

"My tease is gone, no more."

"Sister Wanxing, look at sister Wanxing, look at me..."

helped bring the food to the table, Qin Yu yelled amusedly: "Hey, don't look at it, all come to eat."

"Here, here comes." The three women walked out happily, beautiful in their hearts.

"How is it?" Li Wanxing stood at the dining table and turned around to show her beauty.

Qin Yu rubbed his chin with his hands, and commented: "Um... barely able to see."

"Qin Yu... I will kill you."

"Ha ha..."

"Don't, forgive me, it's wrong, ah~"

*

*

Beizhou, the earth pulse is surging, and the high concentration of radiation forces countless people to leave their homes.

The wilderness cannot live anymore and can only flee to the major residential areas.

On the west coast border, the mighty fleeing team was stopped outside the border.

"We want to live, we want to go in, let us in..."

chanted in protest, the soldiers stood still, keeping guard on the border.

"Come on, they don't dare to shoot, they can live if they rush in." Someone fished in troubled waters, inciting the crowd to storm the border.

In the next second, the automatic close-to-the-sky gun was activated, and the muzzle drooped towards the escaped team.

"Warning again, do not rush to the border line, anyone who steps into the line will be regarded as aggression and killed on the spot!"

The electronic composite sound is played, but the person in front has nowhere to go.

The crowded force behind pushed them into the yellow line step by step...

DaDaDa~

Guns and guns blasted, and the team attacking the defense line fell to the ground like leeks.

The blood mist exploded in the air, turning his eyes into Feimi's pink.

The impact was stopped in an instant, and the electronic tone sounded again: "Please step back immediately, please step back immediately...20, 19..."

The countdown started, and those who were lucky enough to survive immediately turned around and faced the rear, digging into the crowd like wind.

No one dared to approach the blood-stained boundary.

Soldiers in individual armor jumped out of the sandbag fortress and started to fill up their guns along the line of defense.

Anyone who was injured but not killed was shot dead.

The cost of treating these people is too high, and the increased radiation value can easily lead to degraded pollution.

To do extraordinary things at extraordinary times, and humanitarianism is no longer applicable to today's complicated situation.

Now, the most important thing is to ensure stability, rules and the possibility of survival.

There are also surging ground veins in the west coast, which cannot be completely removed no matter what methods are used.

If you can't even guarantee your own safety, what can you do to settle and receive the refugees who fled?

A situation of confrontation is formed. One side is a cold-blooded and cruel border warrior, and the other side is a fugitive with nowhere to go.

Although, there is currently no corresponding resettlement plan.

But here, their safety is guaranteed...

Any aberrations and pollutants that dare to approach and appear in the line of sight will be intercepted for the first time.

Border fighters will even take the initiative to shoot the opponent out of the fleeing team.

Therefore, more and more people are gathering here spontaneously.

There are more people, and the corresponding problems have also come.

Fighting and making troubles, stealing things, robbing things, mixed with fish and dragons, everything got in.

At first, the above opinions were ignored, but when some confusion spread to the children, the RRT fighters on the border could not sit still.

"Send a small team to maintain order." Ilibera also had to change the order.

At the same time, he began to consider whether to set up a containment area.

If this continues, it will only become more and more chaotic, but her current life is not easy.

The ground veins that appeared within the territory have caused a lot of casualties.

There will be distortions in the living area from time to time, most of which are completely without warning.

It was okay one second before, but it became a monster in the next second.

In this way, the losses caused are also the most serious.

Now the people who come to the door every day have changed from community workers to RRT, fully armed and always on guard.

Once you find something wrong, you can decide on the spot and fire freely.

The troubles within the territory have not yet subsided, and I am going to appease the outside...

Ilibela is 10,000 unwilling, but there are some things that you can't decide whether you want it or not.

Just as Ilibera was in a dilemma, the good news from the headquarters made her smile.

The company decided to send a group of fanatics to maintain order and stabilize the people's hearts.

At the same time, a large amount of material resources are continuously transported to the west coast.

After the renovation, Qin Yu is not idle. Although he is in a western-style building, he has endless meetings every day.

Ye Jinlan and Bai Ze were present at the same time.

In response to the great changes in Beizhou, how to deal with it is the most beneficial...

Finally, the above agrees to convince people with virtue, helps Beizhou stabilize the situation and deliver materials to protect the basic lives of the people.

The speeding car with the MU logo hovered densely above the border.

The tall genetic warrior jumped out of the car door.

boom~

The ground shook one after another, and the 'slums' formed by the fugitives began to riot.

Later, a large amount of airdropped supplies fell.

Gene warriors turned a blind eye to the fugitive's reaction, and set up temporary camps, receptions, cordon and fortifications on their own.

When everything is over, the leading genetic warrior stepped forward, turned on the terminal and projected a picture forward.

"Hello friends from Beizhou, I am...only representing the Galactic Republic...in humanitarian...please believe..."

(For the safety of this book, please forgive me, please make up your own mind in the middle.)

"All citizens with identity certificates can register here, and those with special skills should register at the green channel.

For the division of special skills, please look at the front rolling projection. We will arrange the corresponding personnel to enter the resettlement area in an orderly manner. Please consciously line up.

Anyone who disrupts order will be expelled and will never enter the resettlement area. "

Corresponding announcements continued to sound over the border, and advanced intelligent drones with no blind spots were responsible for propaganda and maintaining order.

The crowd below consciously lined up into two long dragons, walking towards the new hope that represents 'rebirth'.

Chapter 1236: This is called bargaining

Special talent green channel, each person who fills in his own profession and answers relevant questions is certified.

will get a set of corresponding relief supplies...

quilts, double tents, rations enough for three people a week, brand new clothes, shoes and cleaning supplies.

"Next." The clerical officer in charge of registration shouted.

A white-skinned woman with half-white hair and a beard, holding two children, followed by an unkempt woman walked forward.

"Occupation, employment experience."

"Hopkins Biological Laboratory, one of the human genetic engineering project leaders, PhD in genetics.

White House Top Secret File, Genesis, member of the Senior Science Group..."

The recorder's hand stopped, and he looked up at the other person and said seriously: "Do you know what you are talking about?"

"Yes, I know very well that Michael Franklin is my name."

entered this name into the system, and the recorder immediately saw the 'Priority Recycling' sign marked on it.

"Welcome, Dr. Franklin, please follow me." The registration staff handed over the work to someone else.

personally took the other party and the other party's entourage, and walked towards the border.

Then, under everyone's questioning eyes, boarded a speeding car and disappeared.

On the speeding car, Michelle Franklin, who was frightened and frightened, finally breathed a sigh of relief.

"Where are we going now?" Franklin concealed his new worries.

Now, the safety of him, his wife and children are guaranteed.

But then, what the other party will do with him, Franklin can't be sure.

"We are heading to the City of Angels, where you and your family will receive the best care."

"What am I going to pay?" There is no free lunch in the world. Franklin, who lived in his sixties, knew very well.

"That's someone else's work. My job is to send you to a safe place and make proper arrangements."

The terminal vibrated, and the recorder glanced and smiled and said: "Your place of residence has been confirmed. It is located in a sea view villa on the Gold Coast."

"When we arrive, you and your family can take a good bath, eat something and sleep, and someone will come to you to discuss follow-up questions."

"Can you tell me, who am I?" Franklin.

"You are the third to be eligible for admission, and two PhDs in engineering are also taken care of."

Knowing that he was not the first, Franklin was not so nervous anymore.

Waiting for the speed car to land in front of a beautiful brown stone house, the recorder led Dr. Franklin's family through the gate.

handed them the key and residence permit, turned and left...

Franklin can only believe that this is really his family's new residence.

looked at each other with his unkempt wife, Franklin put down the child and cried with her.

At night, let the child eat, change clothes, put the two little guys to sleep.

took another hot bath together, cleaned, and put on comfortable cotton pajamas.

Franklin and his wife came to the terrace of the living room, sitting on the bamboo and rattan lounge chairs and enjoying the long-lost peace.

At this moment, Mrs. Michelo, who washed away the filth, showed her beautiful face.

Young appearance, tall and **** body, she doesn't belong to Hollywood **** actress at all.

She deliberately made herself that way before, otherwise, how could they come here safely.

With his young wife in his arms, Michelle Franklin looked up at the stars, his eyes lost and lost in thought.

How to go next, he still hesitated...

"My dear, are we going to the Republic?" Mrs. Michelo asked softly.

Mi Cairo Franklin frowned: "Why do you think so?"

"The other party will receive you with such a high salary. It is not because of the knowledge and experience you have. I think in the next step, someone will recruit you to work for them. What do you think?"

She knows her husband better than she knows the current situation.

He just...

is still a little unwilling, unwilling to believe the facts in front of him.

But the reality will not change due to his personal wishes. If they want to live safely, they have no other choice.

"There is no safer place in the world than there, where we can restart our lives and the children can go to school.

I will study lingua franca seriously, and you can also use your talents and knowledge in valuable places. "

"But I am a bald eagle." Michelo Franklin has shaken his heart, he just needs more reasons to convince himself.

"The bald eagle is gone, it's a thing of the past..." Mrs. Michelo pointed to the east, "The whole Beizhou is falling. It's impossible."

"For your family...for us...Franklin, please."

Holding his cheeks in both hands, Mrs. Michelo pressed it on, with the tip of her nose close together, and her hot breath intertwined.

Franklin's persistence fell completely, "Okay, I promise you."

woo woo~

Affectionately kiss, Yue, quietly hiding behind the dark clouds.

City of Angels, an amazing exploratory spacecraft landed beside the coastline.

The scientific researchers gathered in the same place silently stared at the "Life" ahead. '

turned his gaze, looked at the strange companion on both sides of him, smiled politely and nodded to say hello to him.

People with the same skin color here may become their own colleagues in the future.

Even if they are not, they are all fair-skinned, so they can help and take care of each other.

Go to a strange country and live on someone else's land.

After all, my heart is a little unreliable...

There are thirty-nine families in all. There are hundreds of people in , only two Nicos.

Standing at the top of the Bald Eagle Pyramid, even at the end of the collapse, it is still white.

Hu~

A terrible pressure suddenly appeared in the air, and everyone felt their bodies tremble, as if they were about to be overwhelmed to the ground.

Instinctively bent over and lowered his head, looking up, a huge starship broke through the clouds and sailed towards the ground.

"Ou Mai Karma~" Everyone who saw this scene exclaimed.

"Doctors, it's time to board the ship." The genetic warrior in charge of this operation invited them to board the Vita.

The frightened doctors boarded the Life, and the spacecraft took off smoothly.

Through the window, you can clearly see that the starship is passing by.

"Excuse me, what happened?" someone asked.

"Sorry, the action of the Starship is top secret, please keep quiet, we are about to set off."

The Life was heading towards the far eastern continent, while the starship ran in the opposite direction, heading towards the depths of the North Continent.

company headquarters, starship command center.

"The Eagle Falcon has arrived at the designated location."

"Start recycling."

"Recovery begins, place the containment chamber...the containment chamber has been placed..."

"Rocket recovery complete...Warhead recovery complete..."

"Recovery went well, go to the second coordinate."

"Continue execution!"

Chapter 1237: Subvert the new life

This time, Miracle Company not only bought all the talents of Beizhou.

Together with the controlled nuclear arsenal and missile wells, all were evacuated.

All nuclear bombs were concentrated on the Eagle Falcon, which was brought to the moon for secondary use.

Remove all warheads and extract the nuclear energy inside.

Use the company's technology to put nuclear energy into use in a safer and more effective way.

The company gets the talents of Beizhou and the 'existing' nuclear energy, and what it wants is the advanced technology of the giants in the fields of technology, biology, energy and so on.

The company doesn't care about these technologies, it doesn't mean it doesn't care about the above.

Because there is a clear fault in their technology.

It is like a leap from the 'primitive society' to the 'industrial society'.

The fractured fault in the middle prevents them from forming a complete industrial chain.

Relying too much on the technical support and core industries provided by the company is a taboo for the above.

If you want to get out of your own way, you have to bend down and work hard.

Just like building a road, push forward a little bit...

You can't get a hammer from the east and a mallet to the west. In the end, you can't connect one piece. You can only ask others to connect the dots into a line for yourself.'

In the end, the 'point' that you have cultivated becomes someone else's.

Because without the 'convergence' in the middle, your 'point' is worthless.

Qin Yu didn't have any comments on this.

The formation of a complete industrial chain above, so that the overall social industrial progress, is also beneficial to the company.

Now, the company's outsourcing projects must be taught hand in hand.

Whether it is equipment, technology, talents, or the arrangement of the entire process.

It's not an exaggeration to say it's a nanny...

The company is also tired, and the foundry workers are also tired. Every day, they are reprimanded by others, pointing out their shortcomings and mistakes.

Who can be happy to be trained like a grandson every day?

Things that can be profitable cannot be extrapolated.

Therefore, I can only learn energetically while being a grandson scolding.

Strive to be promoted from grandson to become a son as soon as possible...

That azure, now the hoverboarding project has not become.

Earnings are full of money, and they have won countless honors and reputations.

Actually, it's not just hugging the golden thighs!

I don't envy, I don't envy... sizzle...

A large number of talents continue to gather in the miracle town, making the town more and more people.

At the same time, it also adds different colors to the town.

The big blue-eyed and blond waves formed a beautiful landscape in the town.

The elevator rose rapidly, and Franklin, dressed in casual clothes, was smiling, looking forward to the meeting with his wife.

This is the third week that he has joined the hive. Today, he has just finished his first injection of "Elixir of Longevity".

When the last shot is over, he will apply for a quota for his wife and invite her to join the "Longevity" club.

As for children, they have to wait until they reach adulthood.

The three places are just in line with the number of people in their family.

Ding!

Stepping out of the elevator, Franklin glanced at the janitor who was sitting aside.

Still nodded and smiled as usual, and left the building along the passage.

"Franklin." The wife, who was waiting at the door, ran towards him with the child.

"Dad." Bend down to hug the children, Franklin greeted his wife and kissed her affectionately.

The eyes were facing each other, and the family members walked home along the pedestrian area.

Franklin has three days off, so he can spend time with his wife and family.

"Fortunately you made the right choice. Compared to Beizhou, this place is heaven."

Franklin was also full of emotion when he heard his wife's feelings.

Before joining the town, Franklin stubbornly believed that Beizhou's technology was the strongest.

It's just that they are too unfortunate.

As for the news on the other side of the ocean, there are too many exaggerated elements in Franklin's mind.

And as one of the leaders, the 'Genesis' project carried out by him can also achieve corresponding results.

There may be deviations in some places, but the created 'superhuman' is the most perfect.

Temporary strength does not mean correctness. Only the corresponding potential and future is the right way.

The changes in those genetic warriors must have extremely serious side effects and risks.

They have also created a powerful warrior, he can smash the double-layer thick bulletproof glass in the observation room with one punch.

He was impenetrable, and bullets couldn't get in.

It is more powerful, violent, and ferocious than the genetic warrior seen in the video.

But his life is only a short 47 seconds...

Next, his cognition was madly ravaged in the hive.

The so-called side effects are just confusion of will? !

Is this also called a side effect? This is simply a perfect artificial creation.

How did they do it to perfectly combine human genes with aberrant flesh and blood?

What is that kind of magical fusion substance?

It can strengthen itself and suppress human genes and aberrant genes while completing multiple abnormal combinations.

At just a glance, Franklin was bewildered by its perfect 'posture'.

At that moment, the charm of the super **** gene in his heart was more seductive than the tall, bumpy wife.

If it is not for the relationship foundation, if he is allowed to see these before meeting his wife.

He will never remarry at all. What woman can be as strong and perfect as 'it'?

"Franklin, Franklin? What's the matter with you?" Seeing him absent-mindedly, Mrs. Caimiro was a little worried.

Did he encounter any difficulties in the laboratory, or he was obsessed with a certain woman. She knows very well that her husband, even if he has reached his current age, still does not change his romantic style and romance.

Wasn't it just because he was attracted by his romance and unruly to marry him who was thirty years older than him?

"It's okay, just thinking of the experiment." Franklin responded with blinking eyes.

He regretted a little and left the laboratory.

After three short days, it suddenly became longer.

Hive, an analysis report for new recruits is being generated.

Several scientific researchers with obvious hostility were divided into the 'abandon' area.

These selfish, not pure scientists.

Having lost their due value, they will be sent to the moon later to participate in other projects.

Those who are assigned to the 'safe zone' will receive a higher level of confidentiality and formally join the genetic engineering project team.

Seeing Camilo Franklin's name in the green area, Shi Cui's pen turning in his hand stopped.

"I like his dedication to science very much. The new research assistant is him." Shi Cui slid his finger upwards.

Michelo Franklin's name was turned into a light spot and dragged into the team's list.

The titles marked later have also become 'core engineering assistants.'

The same scene happened in other branches and organizations of the company.

The talents taken away this time are not just biological ones.

A full range of talents such as construction machinery, artificial intelligence, aerodynamics, etc., fill the talent gap required by all aspects of the company.

Also let the company's overall strength to a new level!

Chapter 1238: Two billion simultaneous online

After finishing the last stitch, Qin Yu accompanied Lazy Cat and his parents to stroll around the entire Hudu scenic spot.

After four consecutive days of playing, the vacation was over.

Qin Yu put her in the car, Lazy Cat reluctantly took his hand with tears hanging in the corner of his eyes.

The longer you get along, the happier you are.

The more sad the parting!

Qin Yu didn't say anything, but just hugged her into his arms and let her vent as much as possible.

Suddenly, there was a pain in the lower abdomen.

It was the lazy cat who bit his abdominal muscles, but fortunately, he didn't activate the Nanoworms, or she would have to break her tooth.

"Bad guy, see how you explain to Xuan Xuan, huh..."

Pretending to be a proud snort, Lazy Cat pushed him away, "Close the door."

The moment the car door closed, the lazy cat pouted and covered his face with his hands and sobbed silently.

She was really reluctant to leave, but she knew that if she showed a fragile side.

It will only strengthen his impulse to interfere in his own business.

Therefore, she could only hold back and vent out silently by herself.

Watching the speeding car go away, Qin Yu drove towards Liancheng on the east coast...

Today, the town has expanded to only two stops away from Liancheng on the east coast.

When the little anchor and the four fairies were away, he basically lived here and rarely went back to Lujiazui.

Although the air network has landed, there is no need to consider the problem of traffic jams!

But a person is alone in guarding the vacant room, and there is still someone waiting, and normal people know how to choose.

Not only can I take care of Yalan, but also play with Tongtong and relax.

There is Xu Wanwan waiting, wearing and wearing from time to time to beat the autumn breeze, driving, refreshing...

Brother Yu originally wanted JK to move over and live in a place to take care of him.

Finally, considering the daily needs of the town is more convenient.

This made people arrange a house for her in the town...

I forgot to mention that JK is now studying for a Ph.D. and has officially become a member of Hive's "Genetic Engineering Team".

Work and study, and fall in love with the boss by the way.

The little life is the most moisturizing of all...

After all, the next month comes first.

Except for the three personal secretaries, who is closer than her.

Besides, the secretary is the secretary.

Even if she steals fishy, she is also a secretary and cannot be a climate.

In the town, JK is most hostile to his immediate boss.

"boss."

A reduced projection appeared on the helmet cover, and Watson, dressed in a mature and **** professional suit, smiled.

"What's the good news?" Qin Yu responded to her call after activating Nanoworms and handing over the driving to the body's 'instinct'.

"Just got the news that the number of simultaneous online monsters exceeded 2 billion, and the Network Department hopes to hold a celebration on this."

"Any thoughts?"

"Mr Tang meant to start the next expansion of the Great Expedition."

"Stalker?" Qin Yu thoughtfully.

Fifteen years have passed since the monsters, and in these fifteen years, the interstellar fleet has formed a huge number.

Established his own secret starship base, and the number of starships reached an astonishing six figures.

Up to now, the Church of Miracle Science is a behemoth that rules a river system.

The number of people under his rule has reached an astonishing number of more than 24.6 billion.

This number is calculated after the tragic 'Exorcism War'.

Originally, the number of people was at least five times as many as now...

This also allows everyone to correctly realize the cruelty of the interstellar age, and human lives are like weeds.

For interstellar warfare based on starships, life is like dust floating in the universe, meaningless!

Since the start of the evil demon, the "Heavenly Favored One" has gradually risen to a high position.

The occupied position and importance are not the same!

After all, its special identity is destined to have unlimited development potential.

Indigenous inhabitants cannot make mistakes, and a small mistake in a war will never again have a chance.

The 'Bonus of Heaven' has countless regret medicines, growing up from mistakes and trials time after time.

Summing up successful experience in failure is an absolute advantage that indigenous inhabitants will never have.

It's like one is tall, rich and handsome, and the other is ordinary people.

At the same time graduating, Gao Fushuai's family gave 500 million yuan, "Go, take it and practice hands."

Gao Fushuai lost five hundred million yuan, summed up successful experience, took over the family's hundreds of billions of enterprises, and instantly became a top-class successful person in society.

Looking at ordinary children, they finally made up 200,000 yuan and invested in business opportunities with enthusiasm.

Grilled chicken~

After a fall, come to the factory to pay off the debt!

The players are also finding the meaning of existence, mission, responsibility and belief in the evil spirits, and completely integrate themselves into it.

Not only wealth, but also the feeling of being needed is the key reason why more and more people enter the evil spirits.

Even if it is just to be a cannon fodder, there are times when it is needed.

Whenever someone chants his name and says the phrase 'I need you here'.

The blood spurted, and the whole body trembled like an electric shock.

It is more intuitive than the steadiness and satisfaction that money brings...

It feels fascinating, even willing to give up everything for it.

The fifth-generation VR game pod launched by the company is also the best-selling generation.

And its biggest improvement is 'game duration.'

One year...

Just buy a household robot, follow the instructions for 'fool,' and have enough funds.

Then, the domestic robot will take care of everything.

Regularly turn on the biological electric shock massage function of the game cabin to ensure the player's physical function and prevent muscle atrophy.

Replace the "Almighty Nutrient Solution" as needed to ensure the nutrients needed by the body.

24-hour monitoring of the game cabin and the player's live situation, once the robot or game cabin sounds an alarm, or the connection is disconnected for more than 5 seconds.

The company will dispatch robots to the scene within 2 minutes to ensure the safety of players.

The full set of strict standards makes more and more people choose it.

At the same time, it also makes the fifth-generation game cabin the company's best-selling product, not one of them.

With 2 billion players online at the same time, such a big event should indeed be celebrated.

It's not impossible to open the next chapter expansion.

"Have all relevant preparations been made?"

"It is ready, and the church has the confidence to lead the course of the next war."

Hearing Watson's affirmative answer, Qin Yu nodded in agreement: "Okay, just follow Mr. Tang's wishes and open a new expansion."

"Okay, boss, good journey."

After hanging up the line, Qin Yu took over driving again, and the locomotive drove towards the ring road with a buzzing sound.

Two hours later, Fei Mo's official website issued a new announcement.

Demon Hunting Expedition Tracker:

With the joint efforts of all peace-loving races, the monster army that invaded the river system was wiped out across the board.

However, compared to the main army that has left the river system and the entire demons behind, the monsters that are being wiped out are just the tip of the iceberg.

Therefore, the Church of Miracle Science issued a new announcement to the whole river system: brave ones, find the trace of the Burning Legion.

This time, we will take the initiative to wipe out the evil monsters outside the river system and defend our dignity and home.

Chapter 1239: Rockefeller's vote

East Coast, the bustling Big Apple City is in chaos.

The city that is out of order is full of violence and crime...

Beating, smashing and looting, there are people in panic like fleeing everywhere, and the crisp gunshots can be heard from time to time.

This city has completely lost control.

Rockefeller Plaza, heavily armed soldiers set up a defensive line to surround the square to prevent anyone from attacking the building.

Now, the consortium has no flaws to worry about the chaos of the outside world, and the first thing that needs to be considered is its own survival.

Losing the nuclear arsenal is like a tortoise with its shell peeled off.

is exposed to the air, anyone wants to take a bite, try it!

The troops belonging to the West Coast were once again pushed into the White House Special Zone.

across New Jersey, is the Big Apple City.

Now, the enemy is close at hand, staring at him, who is still in the mood to manage the life and death of the 'leeks' in the city.

"We should immediately withdraw to the north, where there is enough power to resist BlackRock's malicious invasion."

"To seek help from corrupt countries, I think we should withdraw across the board and go to the European Union to seek opportunities."

"I don't want to run away anymore..."

"Little John, don't forget your surname Rockefeller."

"What about Rockefeller, Rockefeller is only a man, not a god."

"I'm tired."

"No, Rockefeller represents more than a surname. We will not allow you to mess around."

"Why, are you going to kill me?" Little John got up and looked at a group of old men with mockery on his face.

By this time, they are still fighting each other.

Only one's own interests are considered, 'this country is no longer saved.'

Little John is tired. He is 72 years old and can live for a few more years.

fled to the European Union, and then?

So, he didn't want to run away anymore, even if he died here, he didn't want to run away again.

But he still has to plan for the family and his heirs.

If you can use your own life to trade for the Rockefeller family with brand new vitality...

"What do you want to do?" Seeing him leave his position, all the big guys present stood up.

"Don't be nervous." Little John came to the table and poured himself a glass of wine.

It's just that no one noticed that when he picked up the crystal bottle filled with whiskey, he pressed the button in the tray at the bottom of the bottle.

"I just want to have a drink, relax..."

Dry the wine in the glass, little John toasted to everyone with a smile: "Does anyone want to have a glass?"

Everyone looked at each other, wondering what he was doing?

Is it self-defeating, or determined to die.

But no matter what, he can't fall into the enemy's hands...

The four words Rockefeller are too deep, and they have been circulated in the hearts of the world for a long time.

The Statue of Liberty can fall, but Morgan and Rockefeller...

can't fall!

Seeing that no one responded, Little John put down the cup, chuckled and returned to his seat to sit down.

picked up the cane hanging on the edge of the table, put it on the ground, pressed his hands on it and said wearily: "I'm tired, I'm really tired!"

Since the great changes, the problems that need to be dealt with every day have increased exponentially.

His life has come to an end, and he can clearly feel the emptiness of the vitality drawn from his body.

"This country is over, before I leave..." Little John looked out the window: "I should think about the family and the family more."

Everyone was shocked when he heard his remarks that seemed to confess his last words.

What did he do?

When? !

"Boss, please leave with me." Suddenly, a bodyguard broke into the meeting room.

I completely ignored the wealth and status of the big bosses present, and pulled his own boss to leave.

"Wait, what happened?" someone pressed.

"A few minutes ago, the guarding team outside evacuated. Now, the mob has the possibility of attacking the building at all times, and we lose our protection."

"John~" Little John leaned weakly on the back of the chair in the angry shout.

"It's too late, goodbye, old friends." Little John closed his eyes contentedly, and the corners of his mouth rose slightly.

In the next second, the entire building vibrated violently, the floor burst, and the skyrocketing fire flooded everything in the explosion.

History reappears...

The Rockefeller Building, which rose from the ruins, ended its mission with a loud noise.

4 hours later, BlackRock's armed forces entered the Big Apple City.

All the mobs stranded outside were suppressed by force and were killed on the spot without following orders.

Some ignorant people still cling to the old-time concept and want to use a Molotov cocktail made by stones and wine bottles to protest against the 'enemy'.

Anyway, they have the 'white' logo, so what if they are enemies?

So they gathered in a group and swaggered from the street towards the RRT armed forces.

The moment the 'lead' was lit, the automatic rifle above the multifunctional armored vehicle made a cruel roar.

buzzing~

The barrel shook, and the pungent gunpowder poured into the nasal cavity.

The team continued to advance, running over the stump and broken arm on the ground.

In the small speaker on the roof of the car, a cold electronic tone is still playing: "Please stay at home, everyone, and wait for further instructions."

"Please stop all actions, any malicious behavior will be regarded as reactionary..."

squeak~

There are red tire prints on the street, and the city seems to be paused by pressing it wherever it passes.

Only endless dead silence and billowing smoke rushing to the sky...

To solve the troubles on the east coast, BlackRock took over the entire Beizhou line, but the practical significance is no longer significant.

Because the frequency of pollution ground veins is getting faster and faster, and the land occupied is getting bigger and bigger.

Radiation value content in the air, has exceeded the normal value by 50 times.

Ordinary people can only go out with special 'radiation protective clothing', and every minute there are people who are distorted by radiation pollution.

For Rockefeller to help him solve the subsequent hidden dangers, Qin Yu accepted this kindness.

So, when the other party's second son got in touch with BlackRock and was willing to merge the family wealth and property into BlackRock.

Qin Yu cast a key 'yes vote,' which frustrated Ilibela's little calculation.

In her vision, Rockefeller should become a thing of the past like the bald eagle.

They are only worth living in historical records.

It's a pity that Qin Yu doesn't think so...

Fink's authority in the BlackRock group is more powerful, and now Jing Yuan is holding it down.

But her value is far more important than a BlackRock.

After she leaves, the over-inflated rights will sooner or later get out of control.

Setting up an opponent for Ilibela and creating a balance within BlackRock is a key part of Qin Yu's plan.

Rockefeller appeared at the right time, and the opponent's decisiveness and sincerity showed him the ability and ambition of the opponent.

Ambitious and not afraid, as long as he has the ability to match it, Qin Yu will use it boldly.

This is also the reason why Ilibera can always be in charge of BlackRock, and Yang Chengjun is in charge of the Mars Committee.

The ability to match ambition is one of the company's criteria for selecting talents.

Chapter 1240: Wild recovery

"The appointment of William Rockefeller as the COO of BlackRock Group will take effect immediately. Let us invite William."

Wow~

Amid the applause, only Ilibera was playing with her fingers absently.

Putting his feet on the desk, shaking his feet, he didn't take this high-level meeting seriously.

COO, so what?

The whole group is his own person, when will it be his turn to speak.

Just be a puppet honestly!

But the following developments made Ilibera realize that everything was out of control.

Of the 21 real power vice presidents and directors, 7 of them took the initiative to contact William.

At this critical moment, in a situation where they have a clear attitude, these people take the initiative to contact him, which means they support him.

No one is stupid, just to say hello to the stupid!

That kind of nasty criticism has long since left the market under the crush of the previous rights, and it can't get where it is today.

Therefore, he has one-third of his power as soon as he comes.

This gave Ilibera a bad association, after careful investigation and confirmation of the list.

The inner guess was confirmed, and they really were the ones who walked closer to Jing Yuan.

With the answer, Ilibera was relieved.

There were more than this people who got close to Jingyuan, but only seven of them showed their support for William.

It shows that the boss's support for him is limited, and in his mind he still tends to dominate BlackRock-related affairs.

As long as he can win his heart again, what is a little John worth?

*

*

"Captain Jing, thank you for your hard work."

In the central square of the town, Qin Yu personally came to welcome Jing Yuan, who had returned home.

Seeing her 'frozen' face, Qin Yu suddenly felt a sense of absurdity of going back to the past.

"Teacher." The corners of Jing Yuan's mouth rose suddenly, and in the next second, no one had expected it.

Opened his arms and threw into his arms.

Perceiving the force of the tongs on his waist, Qin Yu suddenly held his breath, his muscles tightened, for fear that someone would accidentally let her hug and kill her.

When Jing Yuan's emotions calmed down again, she calmly left his embrace.

Qin Yu let out a sigh of relief: "Is this a surprise or revenge?"

"Guess?" Jing Yuan tilted her head mischievously.

After four years in Beizhou, her personality has changed a lot.

The open mind and the concept of love over there changed her mind.

The time spent alone also allows her to see her heart clearly.

She likes Qin Yu, this cannot be denied.

But let Jingyuan accept his love, she can't do it...

Therefore, this hug is not only to satisfy one's long-term miss, but also to punish and retaliate against him.

If he wasn't so carefree, maybe he would throw himself into his arms desperately.

Hateful, there are too many good sisters in his arms.

Jing Yuan regrets that the perfection of the 'Almighty Gene' is so weak at this moment.

If the transformation she has gone through is a 'first generation fanatic.'

You can find an opportunity to kill those women on the grounds of depravity.

...

Qin Yu, who thinks he knows women well, can never guess what Jing Yuan is thinking.

He just noticed a cold wind, and suddenly his neck was numb.

"Strange, has my physique deteriorated?" Thinking of being immersed in the gentle countryside recently, Brother Yu felt that he should cheer up.

From now on, eat two more 'higher energy crystals' every day.

Come to the hive, the central meeting room side by side.

The door was closed from the outside, the meeting room was completely closed, and everyone took their seats one after another.

"Okay, please report to us the latest results of Beizhou Laboratory, the wild project." Qin Yu raised his hand to signal Jing Yuan to start.

The projection appeared in the center of the round table, Jing Yuan stood up, and the daylight above her head hit her to illuminate it.

"Everyone, the plan for the release of the wild, from the initial proof of the existence of the wild, to how to control the proportion of the release of the wild, and then to maintain the rationality and use the power..."

The release of the wild, to be controlled, gradually increasing in percentage.

At first, it just activated the wild.

Later, in the case of releasing 10%, stay sane.

With long-term 'meditation' and 'belief,' adapt to the negative effects of 'wildness'.

Then strengthen the release ratio and try to enter the 20% state.

"We call this process wild recovery, and at the same time, divide the proportion of wild release from 1-10."

Wild resurrection, level 1-10, level 1 = 10%, gradually increasing!

"What about the effect?" Shi Cui knocked on the table, reminding everyone to focus on.

With a flick of your finger, the projection in front of you becomes a video record.

Among them, a genetic warrior stood there hunched over, and his body undulated like a sea wave as he panted vigorously.

As time went by, the muscles all over his body began to bulge, his arms moved forward with force, and his mouth roared furiously.

In the next second, his body swelled as if inflated.

Originally only two meters tall, he grew to two meters two, two meters five, two meters seven, two meters nine...

The tight rolling muscles didn't stop until it broke three meters.

'Huh~huh~'

The white mist in the breath is like a heat wave, causing faint ripples in the air.

"This is the level 5 effect of wild resuscitation, and it is also the most successful experimental body so far."

"As of today, he can stay in this state for 2 hours, and the combat power has increased 10 times.

When the effect disappears, it will enter a period of weakness, and it will take 10 hours for the body of the genetic warrior to recover. "

This is equivalent to an explosive technique, which cannot be used casually when it is not necessary.

Once used, there is either a force around you that you can rely on to ensure your own safety.

Either have absolute confidence and be able to end the battle within 2 hours.

Or... desperately desperate.

Otherwise, don't use it casually.

"According to the law of increasing, it is speculated that when someone masters a level 10 wild recovery, his height will exceed 8 meters, and his strength will be 25 to 30 times the original."

"The duration...Because of the heavy load on the body and will, it is about 15-20 minutes.

Beyond this time, it will cause irreversible damage to the body. "

"What kind of injury?" Shi Cui's eyes flickered.

He is so interested in 'Wild Resurrection', maybe he should try it first.

"Degenerate, distortion, gene breakdown, you can choose any one you like." Jing Yuan said in a bad tone.

Always interrupted by him, Jing Yuan felt offended.

It's because he hasn't come back for too long, so he has the illusion of 'I'm the master here'.

Or does the increase in strength make him feel swelled?

A faint breath of danger spread outward, and in the next second, Jing Yuan's wrist was grabbed.

"Well, that's all for today's report."

Qin Yu got up with a smile on his face and said, "The three team leaders stay for a while and the others can leave."
