

## Pinnacle 361

### Chapter 361: Public opinion exposure

There is no difference between doing it and not doing it.

In this case, of course, you must make the best choice for yourself.

If it weren't for a number of national players standing behind this time, the Cheng family was just a little shrimp picking up food.

Brother Yu directly lifted the table!

eat?

I don't have to give you any leftovers...

"This time, you completely offend him."

Ye Jinlan embraced her arms, as if waiting for a good show.

Qin Yu raised her head in surprise: "It's not you first?"

"^...^" Ye Jinlan tried to keep smiling: "By the way, how did you know...that?"

Qin Yu got up and walked outside and said, "I have my own source of information, otherwise, how can Lixin make money?"

Ye Jinlan was a little uncomfortable when he took out such things and said directly, "Are you not afraid to spread it?"

"What, news... evidence?"

Qin Yu spread his hands together, "My lord, in the new century, you need to tell evidence when you do things."

"you....."

Some weights of chest undulated violently, and Ye Jinlan was not lightly angry.

How can he be regarded as the lady of heaven, will he die if he doesn't stun others?

However, thinking of the miracle that happened to Grandpa, there is a new change in his heart.

'Ding! '

'Congratulations to the host for developing a believer, with 1 million experience rewards and trigger rewards! '

'Reward: Ten Million Dollars. '

Not bad!

Although it is just a virtual currency of fighting teeth, it is better than nothing.

Coupled with this tens of millions of rewards, there are more than 58 million bucktooth coins on the Wind, Rain and Night Wounds.

Hundreds of thousands of tiger shark wings, the remaining fraction of the annual peak game.

Years ago, the small anchor began to run various interviews and variety shows, and the live broadcast time became unstable.

Now, the advertisers have to be determined.

The team prepares and plans for the second filming, and the live broadcast time is even more uncertain.

Nowadays, old fans call her the anchor of [Fate].

Whether you can see her live, it all depends on what your elder brother means.

However, with the program "Xia Guo on the Bite of the Tongue", the reputation of the small anchor and the foodie team has been established.

In recent years, there are fewer and fewer programs that have a conscience like this and make content with heart.

Especially this kind of need to get out of the room and go deep into the outdoors.

There were no programs to explore local folklore and food.

Food, outdoor, customs and folk customs, plus beautiful anchors and a group of funny friends.

The heat doesn't come right away...

In addition, the center of gravity of the little anchor gradually began to turn to the notes.

There is no alternative.

There is no time for the live broadcast.

But just shoot some short paragraphs and send them to the notes to stay active.

This can still be done.

You can't just rely on replays and previous short video works to tie up fans.

Fans nowadays are not so loyal.

Even if you are a fairy descending to the earth, as long as I continue to scroll down, 1, 2, 3...

Excuse me, who are you? ? ?

Except for the fans of traffic stars, you must know that people have made real money.

Forcibly used his own money to turn those little fresh meat and young ladies into stars.

The more money you put in, the more loyal you are.

However, these fans have their own standards.

If you can't do it well, just press the button...

Hey, people are gone.

"Do you still do the activity you said last time?"

Ye Jinlan didn't want to be arguing with him, and brought the topic to business.

Qin Yu wants to hold a large-scale offline meeting event, and Ye Jinlan is responsible for the matchmaking.

But because Ye Lao was suddenly critically ill, time passed so wrong.

"Is this time period appropriate?"

At the beginning of March, there is no village in front and no shop behind.

People are very nervous just after the new year.

The enthusiasm of the annual peak game has passed. Will there be new activities to connect the traffic later.

In this case, the benefits of drainage cannot be maximized.

No matter how you think about it, it doesn't seem like a good time.

"This time is just right." Ye Jinlan had a different view.

The consumption of fans is extremely irrational and has a strong conformity.

As long as the arrangements are in place, there is no need to worry about a cold scene at the scene.

"What's more, those who can come at this time are all with a certain degree of financial freedom."

Ye Jinlan's so-called financial freedom includes the rich second generation, gnawing the old, exquisite men and women, and so on.

In short, it is a group that has time and money.

As for how their money came from, it has nothing to do with her.

"Then, make an appointment?"

"When things here are over, I will fly to Hudu with you."

It took a week for the land matter to finally be finalized.

The address of Godson Technology finally failed to be close to Kuafu, and the two were separated by more than 30 kilometers.

Originally, they meant to put the two companies together.

There is a road in the middle, so that it will be more convenient for transportation and communication in the future.

In the end, it was discovered that the only suitable type of land nearby was agricultural land.

Seeing that the factory area is under construction, many people are staring eagerly.

Just waiting for a bite of fat on it, compensation for land acquisition has become a big problem.

The increase in cost is one aspect.

There are also changes in the nature of the land, which require various cumbersome review procedures, and several large baskets of documents have to be prepared.

Even if the green light goes all the way, it will take half a year for the entire project to be approved.

As a result, everyone can only look elsewhere.

Finally, the site was chosen to be placed on a wasteland thirty miles westward.

The following procedures will be much simpler, special approval all the way, the documents will soon be passed to the hands of the local government.

Then, it was officially started.

This time, the local government was more active than before.

At the same time, a large number of media blocked the door of Kuafu Technology's construction site, wanting to interview the person in charge.

It is not easy to say that they are.

Thanks to various relationships and channels, I want to find out the office address of Kuafu Technology.

In the end, there was only one sentence: No, the other party is working on the construction site.

After confirming it several times, the reporters dare not believe this is true.

A big project that has invested over tens of billions of dollars, don't even have a tall office address?

Even if all the funds are in the project, rent has to support the facade, right?

All companies on the market, even those small and start-up companies, understand this truth.

Why doesn't it play cards according to the routine?

Report to the editor-in-chief's office, and the editor-in-chief is immediately refreshed.

"Hey, it's not just right, it proves that this company is doing real things, and not going to go public to make money."

"Go, take people to the construction site and focus on reporting. Now there is a lack of entrepreneurs with such positive energy."

The fastest movement is the local station.

As soon as there was a little wind on Kuafu's side, the local station was already moving.

Unlike the self-media that catches the blind, they have a lot of information in their hands.

However, what can and cannot be reported, these people know better than anyone else.

Before seeing the other party so low-key, without Ye Family's approval, the local government was still a little undecided.

Whether this matter can or cannot be exposed, many people are anxious.

Now that the other party takes the initiative to expose it, it proves that there is no problem!

Then do you not step up to report, wait for the end of the term, and leave your political achievements to the latecomers?

As a result, reports about the introduction of tens of billions of large-scale projects in the abandoned city started a wave of vigorous and explosive propaganda on the Internet.

The action of the influencer is not slow with others at all.

Smelling the huge traffic inside, swarms rushed to the gate of the construction site to garrison.

Those who are looking for relationships are looking for relationships, and those who are okay just squat at the door.

I don't believe it and I can't stand a leadership.

Regardless of his position, as long as he is a leader anyway.

Anyway, in the end of the copywriting, he is not the general manager of XX, but he has to be the director of the department, the minister, and the like.

The higher the position, the better, the bigger the name, the more beautiful.

Anyway, netizens just want to have fun, who cares if it's true.

Then, there was a scene before my eyes.

The road leading to the gate of the factory was crowded with people, and all kinds of cars were parked on the side of the road.

The various devices in the hands are even more dazzling for people watching Brother Yu, these people are here every day, and our transport trucks are almost impossible to get in. "

Xu Hao helplessly complained: "It's not a problem to go on like this, should you let them in?"

Qin Yu also knows that these people will not give up unless they get some news, considering that there will be potential partners coming to meet tomorrow.

Qin Yu nodded and said: "Okay, let a part of it in, you come to receive it!"

"???" Xu Hao raised three black lines at the corner of his eyebrows: "It's me again?"

Qin Yu looked at him funny, and said jokingly: "Why, isn't it good for you to be in the limelight?"

Xu Hao smiled awkwardly, and murmured: "Fortunately, it's just that the wind and waves are too big, I'm afraid I can't hold it."

### **Chapter 362: 3 party convergence**

Ten billion-level projects settled in the abandoned capital north.

The waste city newly introduced a lithium battery manufacturing plant, or it will become the largest manufacturing plant in the Northwest.

The bald eagle was shocked by the discovery of a major breakthrough in lithium battery technology...

Why did foreign battery giants wake up late at night?

Tesla's chief technology officer turned his head overnight, the reason is actually...

A major disclosure, there was an amazing breakthrough in lithium battery technology, and the designer's background exposure surprised the world.

BYD and Azure executives gathered in the abandoned capital, just to put a teenager into the house.

shock!!!

Seeing that everyone's eyes were not quite right at him, Xu Hao became anxious.

"This is nonsense, I haven't seen anyone."

Li Xiao smiled ill-intentionally: "Boss Azure was very handsome when he was young."

The corner of Ye Jinlan's mouth raised: "When the chairman of BYD was young, it is said that many girls chased him."

"Mouse, the charm is not small!" Qin Yu concluded.

Xu Hao's hands are shaking, what kind of media is this, I...

UC?

Okay, it's all right.

Seeing everyone laughing, Talitha interrupted, unable to speak, "When will the people from Azure and BYD come?"

Qin Yu raised his wrist and glanced at the time: "This meeting should receive someone."

Maybach and G63 dispatched at the same time to pick up people at the airport.

Not only that, the company has also rented a Maybach specifically, or it doesn't look good.

They are all big bosses, and it's no good to neglect anyone.

"Let me say that we should also consider buying a car first. We can't always use Lixin or rent it every time."

You can wait for the office building. After the factory is completed here, an administrative building will be built to make do with it first.

But the reception vehicles can't wait, and the capital that smells fishy behind must not swarm and smash the threshold.

"Buy 10 first? What do you think of my Maybach?"

Qin Yu felt that Maybach was used for business purposes, no matter from which aspect it was quite suitable.

"The brand is famous, the grade is enough, the price is okay, not bad!"

Maybach, okay?

"Brother, where did you study, I have to report to a class!"

Xu Hao finally caught the opportunity, this \*\*\*\* common school, used superbly.

I vomit!

"Fuck, you are a scholar." Li Xiao scolded with a grinning grin.

Ye Jinlan smiled faintly: "I think it's good too."

"Talisa, how about you?"

Seeing that Ye Jinlan was looking at herself, Talitha smiled innocently and charmingly: "I listen to you."

"..."

Vomit~

Li Xiao and Xu Hao turned their heads and walked outside, they couldn't stay here.

The small smile at the corner of Ye Jinlan's mouth disappeared, and Qin Yu's cold eyes slammed into Qin Yu's eyes.

"Humph." With a cold snort, Ye Jinlan followed out of the room.

I can't live this day!

"Can you stop making trouble?" Looking helplessly at Talitha, she was struggling with Ye Jin.

Standing behind him with a smile, his hands wrapped around his neck, his body leaned forward slightly.

The full elasticity is amazing!

"Uncle, Talisa did nothing."

Poorly coquettishly, the upper body clinging to the back floated slightly to the left and right.

Qin Yu has forgiven her from the bottom of her heart.

Lonely and alone, living in a foreign country, he will be able to single-handedly challenge cheetahs and black bears in fighting and self-defense.

What bad thoughts can such a weak and weak girl have?

"Yeah, they are very gentle!"

Perceiving that the white forearm locked in front of his neck was pulled away, Brother Yu wiped the non-existent cold sweat on his forehead.

This woman is getting smaller and smaller.

She has to find a time to treat her well, otherwise, she really thinks that Brother Yu's killing power is not powerful.

"What bad idea are you making?"

Seeing Qin Yu's twinkling eyes, Talitha rolled her eyes and vomited: "There is still work to be done in the afternoon. Don't mess around!"

Seeing Qin Yu standing up, his eyes were smiling, and he steadily approached him.

Talisa's tone became weaker and weaker: "You, have a meeting...no, oh...F-K."

...

Two Maybachs stopped in front of the simple house on the construction site one after another, and the G63 behind them seemed out of place.

It's like a metal monster breaking into the country of Lilliputian!

The doors opened almost simultaneously, and the two middle-aged men got out of the car in vigor.

Looking at each other, another inexplicable spark exploded in the air.

The two did not come to cooperate this time, but to grab business.

If Kuafu Technology's battery pack is really as powerful as rumors, then who can get the first orders will establish its leading position in the domestic new energy vehicle field.

Although the two have been fighting each other for many years, the relationship is as tense as it is now.

This is the first time.

"Haha, Mr. Wang, long time no see!" Li Yi in the car behind stretched out his hands and walked towards the opponent first.

In the shopping mall, BYD boss Wang Defa is an old senior, he still has to do this.

Wang Defa's eyes flashed, and he opened his hands with a cheerful laugh: "Mr. Li, hahaha..."

He held the opponent and slapped him on the back twice, before Li Yi counterattacked.

Wang Defa grabbed the opponent's shoulder and looked at him with admiration: "Mr. Li looks young again."

Say you are young, is that complimenting him?

It was ironic that he was so young and pretending to be tender, and he only knew how to do superficial skills.

Do things, unreliable!

After suffering a sorrowful loss, Li Yi scolded his mother, "The old fox of the dog day still doesn't suffer at all." '

On the surface, there was a smile: "Where, where, Mr. Wang is absurdly praised, you are always strong and strong."

Subtext: You are immortal, why don't you get into the soil and wait to become refined?

After a wave of commercial exchanges involving guns and sticks ended, Li Yi leaned forward and said, "President Wang, please!"

Everyone can tell that he is polite and professional.

Who knows that Wang Defa is not polite at all: "Haha, then I'll take a step first."

Speaking of that, the person has already taken the lead to walk towards the gate, not very fast, but surprisingly fast.

It looks like an old lady who is walking violently~

'Fuck, you? You're really welcome! Li Yi was taken aback for a moment, then moved on his long legs and quickly chased after him.

When I entered the door, I was already walking side by side with Wang Defa, "President Wang doesn't have long legs, but he walks very fast. He must exercise regularly, right?"

"Hehe, it's not comparable to President Li, his legs are like chopsticks, I'm really worried that a gust of wind will break, and Azure will be in trouble."

"Wei Lan won't bother Mr. Wang to worry about it. BYD has grown bigger and bigger over the years. Beware that the tree attracts the wind and the sky thunders.

"If there really is a thunder, my old man can also be a lightning rod."

The two came to the elevator room without giving way to each other, walked into the elevator, and then walked out of the elevator.

At the same time arrived in front of the meeting room.

When they saw a group of young people waiting in the conference room, the two men finished their somewhat messy suits.

"Cough!" Qin Yu cleared his throat when the two were a little embarrassed standing at the door.

Hearing his reminder, Xu Hao quickly stepped forward and smiled: "Mr. Wang, Ms. Li, I am Xu Hao."

"Haha, Mr. Xu is really young!" He grabbed Xu Hao's hand in front of Wang Defa.

Li Yi moved sideways to block Wang Defa behind him, and gave him a tactical backward + sarcastic face.

With a simple polite sentence, Xu Hao found that the other party seemed to have made a mistake.

Turning back to Qin Yu: "I will introduce you to both of you. This is President Qin, CEO and CTO of Kuafu."

Hearing Xu Hao's introduction, Li Yi was a little confused!

Co-authored for a long time and got the wrong object and worshipped the wrong Buddha?

Li Yi was in a daze, but Wang Defa, who was depressed, was not free.

The calf alternated quickly, and he stood in front of Qin Yu in an instant, grabbing his hand and swaying: "Mr. Qin, it is better to see it for a long time. I have long heard that Kuafu is a vibrant company."

"When I see the young people here, I feel that I am really old..."

"Kuafu is more than vigorous, it should be said that it has a bright future!"

The old predecessor came up with a big compliment, and he was a little embarrassed to say to Li Xiao and Yang Chengjun.

They are actually bastards, they are not that great!

"President Wang is polite, business seniors like Mr. Wang are what we should learn from."

Responding with a smile neither humble nor arrogant, Qin Yu stretched out his hand and pointed at the conference table: "Let's sit down and talk slowly."

Wang Defa and Li Yi understood that calm and steady momentum in an instant.

The other party was not a puppet that was pushed out, let alone a second generation who came to be gilded.

That self-confident calmness, if there is nothing in my stomach, I can't pretend it.

The two parties took their seats, and Wang Defa and Li Yi's companions also sat beside each other.

The briefcase in his hand is at his feet, and various documents are already on the table.

Oppositely, Qin Yu sat in the middle of his duty, facing Wang Defa and Li Yi.

Li Xiao, Xu Hao, and Yang Chengjun sit on the left, and Ye Jinlan and Talisa sit on the right.

The two sides are quite distinct, and both are waiting for a signal!

### **Chapter 363: The pot is smashed for you**

Both sides are waiting for the principal to speak first, but Wang Defa and Li Yi seem to be competing for patience.

The old \*\*\*\* is sitting in the position, smiling silently!

I thought Qin Yu, who was young, couldn't help it, and was the first to break the deadlock.

But both of them were a little misguided, and Qin Yu behaved more naturally.

Tilt his body slightly, press his right elbow against the armrest, and his head against the back of the chair.

His eyes narrowed slightly, as if falling into a false sleep soundly.

Finally, Wang Defa couldn't help being the first to speak: "Mr Qin, my people want to look at the battery data first."

As people grow old, their patience gradually disappears.

Moreover, he didn't have so much time to spend competing with juniors.

Over the years, BYD can be said to have taken the top spot in new energy, and Wang Defa also has his own confidence and self-confidence.

If it weren't for Kuafu Technology's background, the rumors are a bit evil!

Wang Defa really couldn't spare the time to attend such a meeting of cooperation intentions in person.

According to the usual process, he was only needed when the final decision was made.

How can a BOSS end the game at the very beginning, arranging the face, do you understand it?

"No problem, I think this is what President Li is most curious about."

Qin Yu took out two black remote controls from nowhere, and pressed them against the top of his head.

A colorful picture immediately appeared on the curtain of the inner wall, and the calm and composed female voice began to talk about the major breakthrough of the Kuafu battery pack...

The entire video lasted for 40 minutes, but Wang Defa and Li Yi listened with gusto.

The entourage of his men lowered their heads frequently, writing and drawing records in the notebook.

Take a closer look, the above records are all important key data points.

These things do not involve the core technology, but they can best demonstrate the power and advancement of Kuafu battery pack technology.

"The above is all the data of Kuafu's battery pack, thank you." Jing Yuan's voice disappeared and the screen fell into darkness.

Turning off the machine, Qin Yu put the remote control on the table.

Crossed his hands, put his elbows on the table, and leaned forward with a smile, "Is there any problem with the two of you?"

The two said in unison: "Mr Qin..."

With eyes facing each other, sparks and lights burst in the air.

Seeing this scene, Qin Yu smiled slightly: "Don't worry, we have plenty of time."

"President Qin, I would like to personally visit your R&D base."

Li Yi also had no time to compete with Wang Defa, and immediately pointed the goal to the key point.

The R&D base is the best way to see the potential of a company.

But it is also the most taboo place for outsiders to visit. Visits to the R&D base have always been arranged in advance.

All important technologies and drawings will be put away in advance.

It is more appropriate to say that it is a show rather than a visit.

When mentioned suddenly like Li Yi, it will inevitably make people think again and again...

Seeing that the scene was quiet, Li Yi also knew that he was reckless.

An Nai was anxious, and Li Yi explained with a smile: "Don't get me wrong, President Qin, I just want to meet our technical talents and chat with them casually."

"Why, President Li still wants to dig people out?" Wang Defa said abruptly, looking at him without a smile.

Li Yi didn't get angry, he smiled and said, "I just want to have that ability."

Digging, Lao Tzu is impatient, grabbing food from the bowl of the Ye family? ?

You Wang Defa have the courage to come by yourself!

As long as he dared to do it, Li Yi would not say anything in the future, and he would definitely bow before seeing him ninety degrees.

The coffin buys the best for him...

People are gone, so you can't bow and worship ninety degrees.

Li Yi turned his gaze to Qin Yu again: "As the saying goes, doing things depends on people. Compared with cold data, I believe in what I hear and see..."

Li Yi pointed to his eyes and ears, showing a particularly old-fashioned performance.

He is indeed an old-school and conservative person, and his performance in business is completely at two extremes.

Looking around, everyone looked indifferent.

In fact, they are very clear in their hearts.

The key to Kuafu's creation from nothing is Qin Yu, who is sitting opposite them and negotiating with them.

Not to mention those technical talents, do they have the intention of digging people, and they do not dig.

Even if it was actually poached, there is nothing to worry about.

Don't look at Li Xiao, Xu Hao, Yang Chengjun, etc., in front of Qin Yu, they are polite, modest and gentle.

That is because he brings enough benefits and value.

Try another person, Azure?

If you dare to dig people today, you will be unable to do business with Hudu tomorrow.

The three joint inspections every day are to pick the bones in your eggs.

One day's loss can make Li Yixian want to die.

If I come to it for ten days and a half...

I wipe the neck first, and keep up with the back.

Besides, Wang Defa, there are demons who are behind, and he has a very wide network of contacts, and his energy is not small.

Don't forget that there is also a shareholder surnamed Ye.

The Ye Family has always followed the rules for people and things, but that was on the premise that the other party also followed the rules.

If you don't follow the rules, you have to stick your spoon into my pot.

I smashed your pot!

So, there is really nothing to worry about.

"Alright, let's go now." Qin Yu got up and looked at Wang Defa: "Together with Mr. Wang."

"Of course, my old man is also very curious! Haha..."

The group went downstairs, turned a corner to the front of the simple house behind.

"This is Kuafu's temporary R&D base."

Looking at the blue simple room Qin Yu pointed at, the two big men and the entourage were stupid.

Big guy, this is the real big guy!

Everyone says that we don't value technical talents, and every day we want to let them work in vain, talk about dedication and talk about honor.

But at least really capable, it also has a car and a house, and the treatment is favorable!

you.....

How did this simple house survive in the winter? I'm afraid it's not because of air leaks everywhere. Collect cash! Follow vx public. Public number [Book Friends Base Camp You can also get cash!

The technicians wore big cotton-padded jackets, shivering, fighting hard? ? ?

After entering the door, the two found out that they had made a mistake.

Although it is a simple room, it is not simple at all.

The walls, the floor, and the top of the head have thick cold-proof compartments, and there is a light every few steps, which illuminates the entire space like daylight.

Central air-conditioning, massage chair, simple lounge, staff canteen...

Extravagant inside.

Although things are a bit messy, it is limited by hardware conditions.

The internal software collocation couldn't be more extravagant.

Wang Defa calculated the three-piece suit with two goose down per person.

The cost of this item alone will cost between 50,000 and 60,000 per person, which may be more expensive.

Together, these people spent more than three million on the bedding alone.

Damn it, is this money burnt?

If you have this money, you can directly give it to them as the prize money, then you can't directly hit the chicken blood, and do it to you desperately.

Not only can lose fame, but also in exchange for loyalty.

The most important thing is to fall in the bright spot, which can be used for publicity and dissemination.

See, our company has never been stingy with truly capable people.

But if you buy such a two-bed cup, it is comfortable or comfortable. Who can see it?

Even the employees who enjoy it may not understand your feelings.

On the contrary, you might as well exchange it for a bonus and put it in your own pocket.

Li Yi's thoughts are similar, this is simply a prodigal behavior.

The two didn't understand the realm of Brother Yu at all, so how could they understand it.

Does Qin Yu care about money?

I don't care at all, isn't it just money!

Just thinking about making money, tossing in the stock market, playing foreign exchange, how easy is it to make money?

Not counting Flamingo and these friends around him, just the existing capital of Lixin.

I come to the foreign exchange market twice a year, so many times... Sun, there is no need to worry about it.

He values these talents who join Kuafu more than money.

From the physical to the psychological, we must ensure peace and safety.

Eat well, sleep well, and play well. Only when it's time to work can you devote yourself to it.

Bonuses, photos, and other benefits are the company's fringe benefits.

No one needs to have a psychological burden, and Qin Yu didn't expect anyone to be grateful.

As long as you do your own thing well.

We have some of the other companies, and we still have the ones that other companies don't!

It's that wayward.

Qin Yu didn't plan to tell other people and didn't expect them to understand.

Whether you are accustomed to seeing it, or not accustomed to it!

What to do, Qin Yu naturally knows how to do it.

It's not your family's money that you spend, so don't ask.

The question is: Money is self-willed, and money is burnt.

Satisfied?

It was almost time for lunch, and Qin Yu asked the two groups to assemble directly in the cafeteria.

If you have something that will be clear once, don't you want to meet people and communicate in person?

All get one piece, enough to communicate at a time!

If you want to cut the leeks and stalk the wool, you have to add some tips first.

Don't understand?

Understand beheading interest, P2P, online disk, online shopping rebate...

### **Chapter 364: proxy? The highest price is the king**

"Introduction to you, these are our two team leaders, Cui Geng and Jing Yuan."

"This is President Wang... President Li."

With a polite handshake, Cui Geng looked at the dining window: "Mr. Wang, Ms. Li, shall we talk while eating?"

After a busy morning, he is still hungry!

Had it not been for Qin Yu, he would have finished his meal and returned to the office.

What kind of investors, partners, can have the smell of braised pork meat made in the cafeteria?

"Okay, it just so happened that I was hungry too, Mr. Li... Let's try it too." Wang De asked with a smile.

"Okay, I just saw the braised pork with braised pork, and I'm already greedy." Li Yi walked to the dining window as he said, the image of the local atmosphere won Cui Geng's favor.

In front of him, Wang Defa and Li Yi were extremely friendly.

The two talked and laughed, like old friends who hadn't seen each other for many years, rivals who sympathized with each other and respected each other.

The big brother's pattern unfolded all at once.

If they hadn't seen the previous performance of the two with their own eyes, who would have thought that these two bigwigs would scold each other in private? ?

"Shao Qin, the food in your cafeteria is too rich, have you worked hard to find such a chef?"

Two meat and two vegetables, one West Lake beef soup.

The taste is very authentic, the price is not expensive, just like this only 8 yuan.

I just heard from the group leader Cui that the canteen makes up 600 yuan per month.

Doesn't this mean eating for nothing!

There is also a tea bar in the corner, offering hot tea, coffee and freshly squeezed juices.

After eating, take a slap-sized fruit platter with you.

One for each person, free, 5 yuan for the second.

Such conditions are comparable to leading domestic enterprises.

"It's not that hard to find a cook. I used to go to the village to make a running water table. This didn't happen to me."

The cook was found by Xu Hao, and his family lived in a village near the factory.

In the past, the village specialized in making red and white affair running water seats.

Now there are fewer villages, young people are going out, and conditions are better.

No one holds a running water table anymore, and there is nothing to do at home every day.

I happened to see the chef recruitment advertisement posted in the factory, so I didn't catch up with it.

The master's craftsmanship does not say that the work is fast and authentic.

Waiting for the completion of the factory, if he did a good job.

Qin Yu planned to contract out the canteen directly and let the other party do it.

As for whether the quality will decrease, Qin Yu feels that as long as he is fully profitable, there will be no such problem.

There is such a day, just change people directly.

Are you afraid that no one will do something to make money?

In this world, even feelings have a fresh-keeping period, and everything can be eternally unchanged.

Why bother always entangled with what will happen in the future, focusing on the present is the truth.

During the meal, I didn't talk about anything. I just didn't forget to quote from school, work, and life.

After dinner, Cui Geng and Jing Yuan are leaving.

Li Yi asked casually, "Can we have a look at the finished product?"

BYD Han, built on the Kuafu battery pack, controls the system.

It is an experimental model that Kuafu modified by himself to test the performance of the battery pack.

"At the coldest time in February, we tested the battery charging speed, the loss during the process, and the endurance. These are the data obtained from five experiments at that time."

"In the weather of minus 18 degrees at night, the battery still maintains normal wear and tear, and the battery life is only 1% error."

"In addition, here is the data obtained by fast charging!"

Seeing one item of rigorously recorded data, Wang Defa and Li Yi handed it over to their entourage.

Several people discussed the data, and their words were full of incredible exclamation.

Such loss can be said to be negligible in the practical field.

In addition, the breakthroughs made by battery life and low-temperature charging are indeed enough to make all companies ashamed.

How exactly did the other party do this? I really want to see their core technology.

Such thoughts flashed in my mind frequently, but no one came up uninterestingly.

Although he is a technician, he is also an old fried dough stick who has been in large companies for many years.

The basic professionalism and emotional control are still there. It will not be like a stunned head. It depends on the core technical concept of the other party.

Just to satisfy their curiosity, they couldn't do this kind of sand sculpture behavior.

The technical house that can be made will not be brought by Wang Defa and Li Yi to discuss business.

If you focus on technology, then stick to technology.

After all, there is no specialization in surgery.

After visiting the entire R&D base, I had a brief conversation with the technicians.

After seeing the experimental data and the actual operation of the experimental model, everyone returned to the negotiating table again.

"Mr. Qin, BYD wants to be an overseas agent of Kuafu. We have complete sales channels in many overseas countries and maintain friendly relations with local governments and enterprises..."

As soon as Wang Defa came up, he wanted to win overseas agents.

His abacus is very good. Kuafu has just started at Kuafu, and he will definitely not give up the market of his home base.

Even if they cooperate, they can only get agency rights in some areas.

It would be better to directly target overseas, Kuafu wants to expand overseas markets in the future.

Then it will inevitably rely on BYD, whether it is to strengthen cooperation or to take a step closer...

It's all possible.

Li Yi looked at Qin Yu with blinking eyes, wanting to hear his decision.

If Qin Yu agrees to Wang Defa's proposal, and start formal negotiations with the other party.

Then, he will also join in and fight for overseas agency rights.

However, if things really develop to this point.

Li Yi felt that he didn't have the original thoughts, but he can think about it.

Only pay attention to the petty profits in front of you, but can't see the real purpose of BYD.

Such a collaborator will sooner or later die in the crushing of capital.

Azure should also make arrangements in advance, so as not to have soup when eating meat in the future.

"Sorry, Mr. Wang."

Under the gaze of the two men with their small calculations, Qin Yu decisively returned to Absolute Fang's proposal.

"Kuafu currently does not consider the issue of overseas supply, and we do not need overseas agents."

"At the same time, it's the same in China, so don't talk about agency rights anymore."

Qin Yu smiled slightly and set the tone: "Whoever bids high and is sincere, Kuafu will only provide limited supply."

No matter what agency or sales.

There will be no supply in overseas markets for the time being, and Qin Yu's plan is to wait for Kuafu's reputation in China to ferment.

As energy vehicles equipped with Kuafu battery packs are gradually being recognized abroad, let's talk about overseas sales.

Now, let's look at Kuafu's future production output.

It is very difficult to meet domestic demand, let alone exported overseas.

Qin Yu could roughly guess what Wang Defa had calculated in his heart.

But whether he could guess why Kuafu had to contact BYD in the first place.

Qin Yu is also greedy for his auto factory in the abandoned city!

Since Tesla is like Tesla, three non-assembled brands that only understand electronic control can be successful.

Kuafu's advanced breakthrough in lithium batteries, more advanced electronic control management technology.

Solve a series of problems such as difficulty in charging in winter and low power.

Why can't it become the second Tesla, and the newcomers are the top, popular all over the world?

Domestically produced = bad?

Qin Yu really didn't think so, maybe it was a few years ago.

But as the motherland's economy took off, generations of people worked hard.

Technology is changing with each passing day, nothing is impossible.

In the case of Aixia, its mobile phones and other electronic products are widely recognized by consumers all over the world.

As a result, Western countries have to resort to sanctions, threats and other despicable means to curb its development.

Aixia, which lacks the core components of its chips, has lost market share overseas.

This is the sorrow of no core technology!

However, those are before.

Now the situation is about to change, and the emergence of Godson will completely rewrite the missing history of Xia Guoxin.

Qin Yu had already talked to the president of Aixia on the phone.

The two parties will officially meet in a few days to talk about the Godson, lithography machine and the scope of future cooperation.

As for cooperation or not, this is not a question!

At the moment when Kuafu announced that it had a 5-nanometer lithography machine, Aixia had already regarded it as an important strategic partner in the future.

none of them.

Only by personally experiencing the dark moments when they were sanctioned can they understand how precious the appearance of a dawn is to them.

In the production of Godson, Qin Yu also has his own plan and layout.

Chips are only for domestic use, but finished products are vigorously exported overseas.

It is to rely on the reputation and recognition of consumers to break the blockade and despicable market aggression!

However, this point is only his personal opinion, and he has not had time to communicate with the other party.

We have to wait until the day of meeting to discuss how to cooperate.

### **Chapter 365: Opening your mouth is 50 billion**

The brief time for Wang Defa and Li Yi to consider.

Qin Yu's thinking has jumped into the next few years, and Godson has officially put into production and reached a cooperation with Aixia.

Supply a number of domestic independent brands, fight with overseas giants in the global market, and compete for market share.

Qin Yu believes that these will be realized, but it is still only a beautiful vision!

"President Qin, if he can't get the agency right, can he maintain his uniqueness and exclusivity?"

If Kuafu only recognizes money, Wang Defa must consider it carefully.

How to maintain the current market share, suppress domestic competitors, and kick them out of the industry.

As for suppressing and banning Kuafu.

He glanced at Ye Jinlan, who had been sitting beside Qin Yu, with a cold expression on everyone.

Wang Defa felt that he still wanted to do something else, which was more real.

As one of the industry leaders, Wang De's news has always been well-informed!

Since the news that Ye Lao was discharged from the hospital in critical condition, the truth about his recovery has been spreading.

Among them, the name Qin Yu was mentioned several times.

Although it is still uncertain, Ye Lao didn't mention a word about his granddaughter's marriage after he recovered.

As if acquiescing to the existence of this grandson-in-law, but deliberately letting him drift outside of the family's style.

Outsiders can't help but think again and again...

If it is true as the rumors say, Ye Lao is cured by the young man in front of him.

That's a great favor. How can life-saving grace be repaid?

A junior like Ye Jinlan is not terrible, what's terrible is that there is a big Buddha standing behind him.

If it is as Wang Defa thought, this young man Qin Yu.

The future is limitless!

Not to mention that the other party has real materials.

Fong's achievements in the foreign exchange market.

Kuafu's technological innovation is the upcoming Loongson Technology.

Outsiders may just watch the excitement, but they don't know what the news has caused in the industry.

Before this information came, how could Wang Defa not investigate clearly.

"can."

With his thoughts turning, Wang Defa finally heard good news.

Secretly relieved.

The look was startled, unavoidably amused, and full of emotion!

He has been in the business world for most of his life, and now he is also a giant.

Anyone who meets has to be polite, and every move will affect the situation and development of the entire industry.

Today, I feel nervous and uneasy in front of a young man.

As the saying goes: the waves behind the Yangtze River push the waves forward.

But did the waves come too fast, too violently?

"Five regions, central, eastern, western, southern, and northern."

"Demons belong to the southern region. After we reach a cooperation, there will be no second cooperative enterprise in the entire southern region."

Hearing the area planned by Qin Yu, Wang Defa called the good guy directly.

What a big ambition!

"Similarly, if you reach cooperation with President Li, there will only be Azure in the eastern region."

The two of them were already heartbroken at this time, for nothing else.

The function of Kuafu battery pack is too powerful.

It is conceivable that when new energy vehicles equipped with Kuafu battery packs are listed, they will be highly sought after by the data party.

Once Kuafu has withstood the initial test, it is difficult to say how far the subsequent word-of-mouth fermentation will be.

But one thing is certain, Kuafu will inevitably become the most watched technology industry in recent years.

It is not impossible to benchmark Tesla, or even surpass.

When it comes to Tesla, Wang Defa has always looked down upon him.

It's just a piece of cake and gimmick.

Position it high and let foreigners and the media tout it.

Wow~

It became the light of global technology, what a shit!

It's not just the four different things that rely on electronic control, use unknown batteries, unknown manufacturers, and unknown manufacturers.

At first, I circled a wave of money and cut the leeks.

Tesla finally got some serious business, and started to lay the foundation, build momentum, and build reputation.

Just look at the price butcher knife that Tesla raises to understand the effect.

Sometimes big guys like Wang Defa and Li Yi.

It is also a headache for Chinese people's urinary sex.

Knowing that it is a leek, as long as the foreigner blows it hard, he will take the initiative to send it to the door for cutting.

If you switch to a state-owned brand, things can be magnified a hundred times, a thousand times.

Beautifully called by its name: I hate iron but not steel, and I have too high expectations for domestic production.

expect?

Is it that R&D does not require money, production does not require money, development does not require money, or 996 does not require money?

All take their mouths to expect and support.

Is it developing?

But is there any way to mention that foreigners are expensive?

Switching to domestic production is a good conscience, just bad money, cutting leeks.

It's almost a direct rise to become a national traitor.

Wang Defa has a MMP, and he has endured it for many years...

Now that we have decided to cooperate, the next step is naturally to talk about the details.

Price and service life are top priorities.

Kuafu battery pack, the number of one set is more than 7,500, and the whole vehicle is equipped with twelve sets of such battery packs.

After the cost price reaches mass production, it is expected to be 40,000 to 50,000 yuan.

The ex-factory price given by Qin Yu is 100,000 Xia coins.

The price shared on each battery pack is 8333 yuan.

This price is a quarter more expensive than the price of Tesla's battery pack.

"Mr Qin, is this price too high?" Li Yi was a little hard to accept.

If the price is so, then only mid-to-high-end models can afford Kuafu battery packs.

This is completely inconsistent with the plan they had previously thought, and it will also affect the future planning and direction of the enterprise.

"Currently it can only be like this." Qin Yu helplessly spread his hands: "I believe that in the next one to two years, as the technology matures, production costs will be reduced."

"But now, you have seen it too." Qin Yu pointed to the R&D base behind him: "I have so many people to support, and the subsequent R&D investment is a lot of money."

"The cost is 86,000. The ex-factory price I gave you is only 100,000, which is not high!"

There is room for business talks. If Qin Yu tells them directly, the cost price is only RMB 40,000 or 50,000.

The two of them must bring the price to the range of 60,000 to 70,000.

Qin Yu wants to set a higher goal than Tesla, how can he achieve it?

Therefore, there is no talk about the price.

However, in terms of after-sales protection, the conditions can be appropriately relaxed.

"80,000 or 200,000 kilometers, the battery loss does not exceed 20%, this is the promise that Kuafu can give!"

Hearing what he said, Li Yi immediately spoke up: "10 years."

Looking at Qin Yu, the other party said seriously: "Mr Qin, as long as you can guarantee that there will be no problems for 10 years, we can sign this contract today."

"My first batch of Azure will cost 20,000 sets." Li Yi was full of confidence and waited for Qin Yu to speak.

"and many more."

Wang Defa immediately interrupted: "You Azure wants 20,000 sets, what about us?"

"What are you doing here? Set up a stage for you to sing, and let's watch you sing below?"

Wang Defa didn't care about the price at this meeting, and shouted with his right hand open: "Fifty thousand group, Qin, you have to give us priority to guarantee the supply, and the price is as you said."

"Mr. Wang, you would be unkind like this."

Li Yi got anxious, grabbed his chair and moved a different direction, facing Wang Defa, starting to count down the opponent.

Those who don't have him doing business, senior businessmen, just this? ? ?

"Let's discuss the matter, Mr. Qin said, the higher the price will get."

Wang Defa didn't pay any attention to him at all, and his five chubby fingers spread out to the largest extent: "Mr Qin, we want 50,000 sets, should we give priority to this?"

In the absence of market feedback, dare to place an order of 50,000 groups at a time.

represents what?

In terms of price, the most important thing is that it means that it will cost 50 billion to buy batteries.

Just the price of the battery.

At the same time, it also means that 50,000 mid-to-high-end models equipped with Kuafu battery packs are waiting to be produced and sold.

The price of these models must be at least 260,000 or more before they can be said to be profitable.

The sales aspect is also a great test and problem!

Wang Defa dared to make such a big determination and bet, this decisiveness alone is admirable.

Look at Li Yi again At this time, he sat on the spot with embarrassment and remained silent.

Fifty thousand groups...

Twenty thousand teams have already made a lot of determination for him, and also took a lot of risk.

Compared with BYD, Azure still has some gaps.

The other party has a big business, dare to bet!

He Li Yi is not so courageous, and the capital behind it will not allow him to do so.

Today, 20,000 orders were placed, and the 20 billion contract was signed.

When he goes back, he will have to give an explanation to the board of directors.

Wang De issued a 50 billion bill and signed it. When he went back, he just had to drink tea and sleep.

Just let yourself be balanced.

How to fight the gap here? ? ?

### **Chapter 366: Azure is the true warrior**

Kuafu 4680 battery pack, "46" refers to the battery diameter of 46mm, 80 refers to the battery length of 80mm.

In terms of performance, the energy density is 20 times higher and the power is 12 times higher than the same grade products.

Endurance increased by 56%.

Of course, the price is expensive enough.

Before Kuafu appeared, the highest price on the market was Tesla.

Now Kuafu battery packs of the same level are nearly 40,000 more expensive than Tesla.

You don't have to ask to know, after the news gets out.

It will definitely cause a wave of waves at home and abroad, and all kinds of questions will rush in.

Qin Yu's response is only two words: ignore it!

Let the outside world guess and question.

Finally, there will be actual data and real evaluations to give everyone a satisfactory answer!

The factory currently being built by Kuafu Technology has an annual output of 200 million watt-hours.

Kuafu 4680 battery pack is 100 kWh.

Simply put, the current annual output of Kuafu Battery Plant can only supply 20,000 4680 battery packs.

Wang Defa is equivalent to going out of production for two and a half years. This must be truly agreed.

When Kuafu expands production capacity again, it can supply other brands.

BYD has secured the top spot in the industry, and everyone behind will be ashamed!

What competition is there?

"Ms. Qin..." Li Yi's heart was almost mentioned to his throat, and he looked at Qin Yu without blinking.

"such..."

Qin Yu thought about this, and made a decision in her heart: "Currently Kuafu only accepts your two families, and 80% of the annual output is given to Manager Wang, and the remaining 20% is given to Manager Li."

Seeing Wang Defa's excitement about to speak again, Li Yi was also a little unwilling to admit defeat.

Qin Yu raised his hand and said, "Don't worry, you two, listen to my terms."

"Pay 50% in advance, deliver more than half of the product, and pay 30%. When the contract is fulfilled, 10% will be delivered again, and the remaining 10% will be settled in two years!"

Wang Defa and Li Yi were both stunned as soon as these conditions were released.

His request does not comply with industry regulations!

Prepay 30%, follow-up payment 20%, and 30% after full delivery.

The remaining 20% is the pledge deposit, which will not be fully settled until the end of the warranty.

Qin Yu not only asked for an advance payment of 20%, but also settled the balance in full before the end of the warranty.

In the eyes of Wang Defa and Li Yi, Kuafu has promised an eight-year warranty.

The guaranteed time limit is only two years, and all subsequent risks have to be borne by them.

When the time comes, if there is any quality problem with the battery, the responsibility will be 'knocked' on them.

Come to Kuafu, and the other party will recognize it.

If you don't recognize them, there is no means or hole cards to restrain each other.

It is certainly possible to go to court, but the time, manpower, and material resources are troublesome.

The impact on brand reputation and other issues cannot be offset by the compensation won by the lawsuit.

If the risk of using Kuafu 4680 battery pack is 50%.

Then, under Qin Yu's payment method, the risk immediately increased to 80%.

Wang Defa hesitated from the bottom of his heart whether he wanted to take such a big risk?

BYD started as a battery, and their technology is not inferior to mainstream products in the world.

Although Kuafu's products are more advanced and better!

But the price and limitations are also very strong, and it is only a niche high-end product.

Some people buy luxury goods, and popular brands also have no shortage of consumers.

This risk...

"Mr Qin, if this is the case, I need time to go back and think about it."

As soon as Wang De spoke out, there was a faint feeling of regret in his heart.

If you are too impulsive, you should wait for Li Yi to speak first.

But Qin Yu didn't give him this opportunity, "Okay, then please go back and consider it slowly."

As soon as the voice fell, Xu Hao had already stood up: "Mr. Wang, I will send it to you."

Li Yi sat in his seat, bowed his head and said nothing.

When Wang Defa saw this scene, his heart was mixed with mixed feelings, but he smiled without showing any color: "Then, President Qin, President Li, get together another day!"

A spit, a pit, a big guy like him.

How can I take it back casually, no matter how complicated my heart is.

Wang Defa still left with him.

Xu Hao also arranged a car to take people directly to the hotel, and arranged the time for the airport to be sent tomorrow.

Business is not righteous, regardless of future cooperation or not.

Since people are here, the minimum etiquette and respect must be given.

When he returned to the conference room, he found that there was no one inside.

"Eh, what's going on?" Stopping an employee, Xu Hao pointed to the meeting room: "What about people?"

"Mr. Xu, Mr. Qin took someone to the back and said that he would look at the prototype car again."

In the open space behind the R&D base, Li Yi looked at the prototype cars passing by, his expression constantly changing.

Twenty billion is not a small amount in any company.

If you don't see anything, you have to pay 50% in advance, which is 10 billion.

At the same time, the rules of the industry are broken. Are these risk values worth taking?

"Mr Qin, I want to go there in person!"

"No problem, let the driver drive over."

Handing over the key to Li Yi, the other side sat in the cab without expression.

Shift gears to give fuel, and the car flew out like an arrow from the string in an instant.

Wow~

With a violent sharp turn, the tires plowed the road into a fan-shaped depression.

There was a fan-shaped mud wave almost two meters high, and it slapped on the simple board.

Several sprints turned sharply, and the forward-looking car suddenly stopped in the middle of the mudfield.

Through the transparent car window, Li Yizheng grasped the steering wheel and breathed hard.

"Brother Yu, what's the situation?"

Xu Hao, who rushed to see this scene, asked a little surprised: "Why the atmosphere suddenly became serious, like a war?"

Qin Yu glanced at Li Yi in the sample car and chuckled lightly: "For him, this matter is no different from a war!"

Inside the car, Li Yi's hands holding the steering wheel tightened again.

Whether this battle is won or won depends on this time, "MD, bet!"

He slapped the steering wheel fiercely, and the short, piercing horns startled everyone.

Li Yi opened the car door and jumped down and shouted to Qin Yu: "Mr. Qin, I have signed this contract."

...

The Kuafu Technology Plant has not been built yet, and it will take two to three months to start production.

First, it reached a 20 billion order with the domestic energy vehicle giant, Blue Auto.

This news instantly captured all major news sections, and was among the top ten hot searches of the day.

Seeing "Blue New Trends" ranked fourth, is it going to be a strong team, or is it desperate? »

Li Yi smiled triumphantly on the way back to the headquarters.

Open the note and search for the word 'blue'.

Countless short popular science videos swarmed out, "Haha, hahaha..."

"President Li, what is so happy?"

Hearing Li Yi's slightly crazy laugh, the driver asked curiously: "I haven't heard you so happy for a long time."

"Happy, that's right, I am happy now...very happy."

If it were not in the car, considering the image in front of the employees.

Li Yi had to turn on the music, just to dance one in place!

Bang~

Cha Cha, Cha Cha.

Woo~

Cha Cha, Cha Cha.

...

"It is not convenient to disclose the specific details of cooperation here."

"In short, Kuafu's output in the first year has been sold out. We look forward to reaching cooperation with more companies in the future, thank you."

After expressing his final opinion, Xu Hao walked into the factory without looking back.

There were people from behind who kept shouting, "Mr. Xu, do you have any further expansion plans?"

"Mr. Xu, can you talk about why there is no cooperation with BYD?"

"Mr. Xu, please wait a moment, Mr. Xu, when will the legal person of your company come forward?"

"Mr. Xu, since the technology is independently developed, why so far, no technological inventor has come forward."

"Mr. Xu, please answer..."

"Mr. Xu..."

There seemed to be 10,000 flies in his head 'buzzing' and arguing.

Xu Hao understands Wu Kong a little bit, why it is so annoying to have to knock Old Tang to death with a stick.

"Close the doorClose the door, what are you waiting for?" People closed the factory door, and Xu Hao rubbed his temple and went upstairs.

I happened to see Qin Yu who was sitting in the office with a smile on his face and swiping his mobile phone.

I felt helpless, "Brother Yu, should I change you next time?"

Keeping his thumbs in the dots, Qin Yu raised his head and asked, "Why, do you want to change the CEO?"

"Okay, you will be the CEO and spokesperson tomorrow. I just want to go back to Hudu to do other things."

Qin Yu was anxious for someone to come to this position, Xu Hao came at the right time.

Without waiting for the other party to speak, Qin Yu placed him in the position where he was sitting before: "Okay, it's like that, I'll give you a title sign and put it on the table, perfect!"

Snap, pat your hands, Brother Yu is happy to get off work.

Only Xu Hao, with a bewildered face, sat in the president's office, his eyes blurred, and his thoughts dully thinking: Who am I, where am I, why should I enter this door? ? ?

### **Chapter 367: Do you call this a cheongsam?**

One billion is credited, and Kuafu welcomes a good start.

Information about 4680 battery specifications, standards, etc., has gradually formed a search trend on the Internet.

Of course, it is inevitable to be compared with Tesla.

The latest battery specification adopted by Tesla is 4680.

Kuafu launched the same size at this time and claimed to far exceed Tesla in performance.

This has caused many doubts and accusations.

Naturally, the Internet has everything to say, sensationalizing, and taking the opportunity to follow the trend and hype.

I don't know what I can do, I don't know what I can do before bragging.

Azure is just a fool, a group of fools entertain themselves...

What's even more ugly is that Qin Yu ignored it at all.

Netizens are the most forgetful, herd, and vulnerable to influence and manipulation.

If you really want to compete with them, then you will be exhausted in your life.

But Qin Yu doesn't care, someone cares.

Especially after seeing posts and unprovoked speculations about the legal person Qin Yu.

Ye Jinlan's expression was particularly embarrassing.

The Azure side is also very concerned about the direction of public opinion.

Qin Yu and Ye Jinlan arrived at Hudu and just got off the plane.

Li Yi called.

The other side's meaning is very simple. The two sides issued a joint statement.

Another part of the data disclosure of Kuafu 4680 battery pack will lead public opinion on the right track.

Being so slandered by others, I don't say anything.

The brand image of Azure is not good, and investors will not be satisfied.

"Is it necessary to be so troublesome?" Ye Jinlan said straightforwardly, "I will solve it."

After hanging up the phone, Qin Yu looked at her curiously: "How are you going to solve it?"

Ye Jinlan smiled and replied: "Wait to see you will know."

This time, the two went to Hudu together for a meeting with high-level Douya.

At the same time, this is also Qin Yu's first appearance inside Douya.

"Do you have formal attire? It is more appropriate to wear formal attire for this occasion."

Ye Jinlan suggested that he dress more formal.

After all, this is his first appearance, and it is a formal business occasion.

Wearing formal dresses not only shows one's steady maturity, but also shows courtesy to shareholders.

The more you are in a high position, the more you have to know how to take care of the emotions of the people below.

Corporal Rite is the best choice!

"I have ordered a suit, but I haven't had time to get it."

On the tenth day of the Lunar New Year, Master Jenny's little favorite consort called him.

The suit is ready, waiting for him to get it after the festival.

Qin Yu hasn't been free during this period, so he hasn't got it yet.

"That's right, together?" Ye Jinlan looked at him, as if asking for his opinion.

"Good." Qin Yu said.

Although the two were falsely engaged, they are now friends.

There is no need to deliberately pull the distance, but it feels strange.

Besides, what can you do if you take a dress?

The fact is, there are always coincidences in the world that make you feel bad.

"boss??"

Seeing the little anchor running towards him, Brother Yu's expression was wonderful.

This is really horrible!

"It's really you." He jumped forward and stood beside him, naturally holding his arms with both hands.

Cheng Xiyu turned his gaze to Ye Jinlan: "Miss Ye, meet again."

The little anchor's eyes are full of vigilance and hostility.

The last time I met with the other party was not very pleasant.

It can be said that he was unilaterally ignored and crushed by the other party, and the little anchor was still holding his breath.

Encountered again, she deliberately wanted to find the place.

But I'm a little bit undecided, what is the relationship between the boss and her?

"Miss Cheng, I have followed you. Congratulations on the success of your show."

Under her watchful gaze, Ye Jinlan took the initiative to extend her hand to congratulate her.

The little anchor was stunned by her sudden change of attitude.

Under what circumstances, why did you take the initiative to show it?

Congratulations to me.....

Hello, are you talking irony?

No matter how self-indicate the little anchor, the sincerity in the other's eyes cannot be faked.

With his straight shoulders sinking slightly, the little anchor seemed to lose his life goal in an instant and became weak.

She obviously mustered up the courage to give her a chance to get her back.

But before blowing out a breath, he just kept his throat back.

If you can't get up or down, just get stuck there.

It was like a punch, not only didn't hit anyone, but also flashed his waist.

Uncomfortable, too uncomfortable...

"Why are you here?" Looking at the time, according to her normal schedule, she should have just gotten up this time.

Cheng Xiyu pointed to the Richard joint name on his wrist, "This is so beautiful!"

Then I explained that I was here to cooperate with the shooting of the advertising content, and I was going to send it to the notes.

"What advertisement, isn't it a cheongsam?"

At this time, Qin Yu noticed the cheongsam she was wearing.

The background color is black with big dark red flowers on it, which looks \*\*\*\* and coquettish.

There is also a kind of mysterious temptation, which makes people want to go deeper and find out!

"It's cheongsam." The little anchor smiled mysteriously: "Boss, guess who runs the cheongsam shop."

Seeing her triumphant and sly gaze, Qin Yu suddenly said, "It's not you, right?"

Cheng Xiyu nodded vigorously, then looked back at Wang Hong and said, "I said the boss can guess it."

The cheongsam shop is made by the anchor and Wang Hong.

Originally, Wang Hong had studied fashion design before and worked in a design studio for a while.

It was just that the efficiency of the studio was not good, and there were differences between the partners.

Last but not least, close the door!

She ran to do real estate sales, and found that the income was good, so she kept meeting Qin Yu.

After learning this, the little anchor thought about it.

Since they also want to live broadcast the goods, why not make their own brand?

In terms of the current traffic of small anchors, it is not too simple to bring a brand.

There is no need to worry about consumption.

Do not buy male fans?

It doesn't matter, nearly half of her fans are female fans.

Although they didn't come for themselves, the little anchor didn't mind at all now.

"Not only to use the boss to greedy you, but also to make money from your pockets. Are you angry? Are you angry?"

The little anchor akimbo hands on hips, triumphantly pushing up the rear bridge and shaking it back and forth.

Snapped!

"Don't make trouble." Seeing her overly arrogant, Brother Yu appropriately reminded her that there are outsiders there.

Ye Jinlan could see all the small movements between the two.

And all she can do is stand still, when nothing happens, keep a gentle smile.

As a contract fiancée, she is also helpless!

The identity is fake, what can she do?

"Okay, I have something else to go back to at night."

Hearing that Qin Yu was going back to Seaview One in the evening, the little anchor happily kissed his face.

Attached ears whispered: "Boss, the cheongsam at home is here!"

Point your index finger on the waist, and gradually pull up, pull up, pull up...

Up to the armpit position! ! !

Puff~

Looking at the little anchor with wide eyes, Brother Yu just wanted to ask: Do you call this a cheongsam split?

I like!

It seems that I really have to go back tonight, and I can't live up to the little anchor's wishes.

Entering the mall side by side, Ye Jinlan suddenly said, "It seems that your private life is more chic than I thought."

Qin Yu grinned and said, "have you investigated everything clearly?"

Ye Jinlan responded: "Do you think so?"

Nodding thoughtfully, Ye Jinlan said curiously: "Lan Yue, Cheng Xiyu, and the assistant named Wang Hong just now, so there are more, right?"

"??" Qin Yu gave her a weird look.

Now that you know it, who is this posture for now?

"Grandpa told me only Lan Yue."

Ye Jinlan stopped and looked at him with a faint smile, "You exposed the anchor and assistant yourself."

I lost~

Therefore, the investigation was done by Ye Lao and did not tell Ye Jinlan the truth at all.

On the contrary, he exposed himself?

My heart tightened, and Brother Yu was stunned.

its not right!

They are just contracted unmarried couples, not real.

Why be afraid to let her know that you have no intentions against her!

"Yes, my mother took me to Taoist temple when I was young, the Taoist master said, I was guilty of peach blossom."

Qin Yu casually walked into the narrow passage and saw his front desk smile and get up.

This is the fourth time they have met.

"Mr. Qin, your suit is here."

The front desk took him to the cabinet on the corner and opened one of the suit bags.

Taking out the suit inside, Qin Yu walked to the dressing room.

Before the finished product is taken away, it is necessary to try on one last time to ensure that there is no problem with the suit.

Waiting for Qin Yu to come out again, wearing a straight suit.

With confident eyes, slightly raised mouth corners, and a tough and handsome expression, Ye Jinlan stayed in place.

His weird appearance gradually overlapped with the vague shadow in his heart.

The absurdity of illusion moving towards reality made Ye Jinlan unable to distinguish what is true and what is false for a while!

In Qin Yu's eyes, Ye Jinlan's faith value was 1 point, 1 point jumped up.

### **Chapter 368: In front of capital are all younger brothers**

Douya, Hudu branch.

As soon as Qin Yu and Ye Jinlan appeared on the stage, it made people shine.

The golden boy and jade girl look so special.

The two went out, saying that it was not a pair that no one believed!

"I have sent you the general idea, now let's talk about the details!"

In terms of details, the following people are naturally concerned about the details, and shareholders are more concerned about how much benefits they can bring to themselves.

How much does it cost?

To put it bluntly: How much can Fengyulou and the small anchor produce?

The little anchor here is naturally...

No one can tell!

Her own topics and traffic are value.

Didn't find Douya for the appearance fee, that's because Qin Yu led the suggestion of this event.

Or, without a seven-digit number, the little anchors don't bother to participate!

How to say she is now the first major anchor of the year...

"Fengyulou will be responsible for one-third of the expenses and provide 8 anchors to the scene."

"According to current statistics, it is expected to bring 20,000 fans to participate in the event."

Seeing shareholders whispering and discussing, Ye Jinlan stood up abruptly and said: "I think this event is beneficial to the company's development and image. There are no objections, so it's decided."

"Miss Ye." Someone stood up, "Shall we discuss it again?"

To discuss means to hold an objection.

The other party obviously had some other considerations, and didn't want to agree so happily.

Qin Yu looked at the man who got up with some surprise, and said to his heart: Brother, brave enough!

Chen Gai, CEO of Douya United.

It is also the founder of Yuball before the merger of the two platforms.

He is very prestigious in the company, otherwise he would not dare to stand up at this time.

"Mr. Chen." Ye Jinlan smiled slightly: "What do you think, talk about it."

Ye Jinlan still respects Chen Ge.

But respect does not mean that the other party can directly refute his opinions.

He said that he wanted the other party to express his opinions, but in his heart, Ye Jinlan had already sentenced him to death.

She used to have dispensable ideas about these businesses.

As long as there are no mistakes in the big picture and money can be made, Ye Jinlan is almost silent.

Not to mention getting involved in the company's specific operations and management.

To most shareholders, she is more like a mascot who can only be seen from a distance?

Therefore, even if he holds 40% of the shares in his hands, everyone is somewhat disapproving.

When Chen Ge retorted, he had already cast all his eyes on him.

There was a faint smile in his eyes that looked good at the show.

At this time, Chen Gai did not know that his fate had been pronounced.

Seeing the other party boasting, talking about their plans for the company's future.

Ye Jinlan laughed at herself and secretly said: It seems that she is a well-behaved daughter of a family, and the image of the shopkeeper is too popular.

"Ms. Chen finished?"

After Chen Ge finished speaking, Ye Jinlan motioned to the other party to take a seat.

The cold eyes swept to the shareholders present, "Does anyone have any different opinions?"

Everyone, look at me, I look at you, and express your own opinions.

Some people support Ye Jinlan, and some support Chen Gee, thinking that what he said is more reasonable.

It's okay to narrow the distance between the anchor and the fans. It's a bit too much to let the company pay for them, isn't it?

Besides, letting the live broadcast also form the culture of the rice circle, is it good or bad?

Many people are worried about this. You must know that the rice ring is a double-sided blade.

If you don't use it well, it will hurt others and yourself.

If you are kidnapped by the rice circle culture, it will undoubtedly affect the authority and voice of the company.

These are all things that need to be considered.

Chen Gai's proposal is not only to stand on her own stand, but also to let Ye Jinlan continue to be her mascot.

At the same time, there is also a small group of people who stand on the company's standpoint and will stand up when they are worried.

But it doesn't matter anymore, after all the discussions are over.

Ye Jinlan suddenly initiated a proposal: to remove Chen Ge from the joint CEO position.

"Miss Ye, you..."

Chen Ge stood up with a shocked expression, completely unexpected that she would do this. How could she dare to do it?

But he founded Yu Wan by himself, which led to the merger of the two platforms.

Let Douya sit firmly on the top spot on the live broadcast platform and occupy half of the market.

Doesn't she know how important she is to the company, how can Douya develop without him?

"Mr. Chen, you seem to have made a mistake."

Ye Jinlan knocked on the table, raising his eyes with disdain and said, "This market is always controlled by capital."

"What's more, you are not as important as you think."

"Believe me, the most indispensable thing in this world is people, even if he is a genius."

Ye Jinlan didn't have too many geniuses, but how could that be.

In the end, it's not about succumbing to capital, or annihilation and all living beings.

With his status and experience, he should understand this truth.

But now it seems that he still has a bit too idealistic innocence?

"I agree."

When many shareholders were hesitant, Qin Yu raised his hand in agreement.

He didn't know much about Chen Gai, and he didn't know the person and ability of the other party.

Not to mention whether you like this person or not.

He will approve.

The only reason is that the future planned by the other party does not match his inner thoughts!

If you have to go deeper, you can only say that he doesn't like the complacency and pride of the other party's previous speech.

If you think you have merit and ability, you can do thorns?

Uncle, do you have any misunderstandings about capital?

The \*\*\*\* decides the head.

If the current Qin Yu is a famous social animal, he must be anxious to have a boss like Chen Gai who can anger the capital.

But he now represents capital, the boss of the boss.

There is a boss who likes to be arrogant and arrogant.

To beat workers, you must have the consciousness to beat workers.

With the approval of Ye Jinlan and Qin Yu, the removal has become a settlement.

Others also saw Ye Jinlan's determination and change.

So they turned their backs one after another, chose to support the two people's proposal, and dismissed Chen Gai!

"You... can Douya have today without me?"

Chen Ga patted the table angrily, and screamed, "Who made the money for you? Who made you worthy? Who is it..."

"enough."

Ye Jinlan raised his voice and shouted coldly: "Without these people, your fish \*\*\*\* have long been like other platforms, they have been sifted through capital screening, and they have been swept into the garbage dump without anyone interested!"

Chen Ga's face was pale, and he could not breathe as if he had been hammered in the chest.

"Now that your position has been contacted, you can leave, or you can choose to stay as a minority shareholder."

Chen Ge's shares are only 6%.

In front of Ye Jinlan, who holds 40% of the shares, he is a younger brother.

To say that he is a minority shareholder does not have to suffer.

"I..." Chen Ge wanted to say something, but under Ye Jinlan's gaze.

In the end, he waved his hand fiercely and left with anger.

Don't wait for this broken company!

Before leaving, Chen Gee looked at Qin Yu with resentment, as if he had an antagonism with him.

? ? ?

Brother Yu really wished, and he didn't let Ye Jinlan depose him.

Why don't you trouble Ye Jinlan and stare at yourself?

So, the other person has a background that is not easy to mess with, and he looks good to bully?

...

"Proposal in 3 days, on-site layout a week, 15 days..."

Ye Jinlan glanced at the date on the phone and said, "It should be officially opened before the end of the month!"

Qin Yu nodded, looking at her weirdly.

"Why, am I strange?" Ye Jinlan looked down at herself, nothing strange!

Qin Yu shook his head and said with a faint smile: "I just feel that you today are very different from before."

Ye Jin was stunned, and laughed blankly: "Really? It's really different."

She used to have the background and rights, but she didn't know how to use it.

Just want to be alone!

But if you don't understand, you don't even have the ability to climb high and see far.

How can I find my own way out surrounded by these mountains?

"Very good, you are more real now than before."

Qin Yu didn't understand the hypocrisy of the family's children, but he felt that Ye Jinlan's change was quite good.

At least it makes people feel real, and there is no longer a false estrangement with her.

After blinking his eyes, Ye Jinlan suddenly smiled mischievously: "So, do you like me?"

"Cough~"

Turning his head and clearing his throat, Brother Yu reached out and stopped a taxi.

"I still have an appointment, so I won't accompany you anymore. Let's meet by."

Mo slipped into the car.

There is a little rush on the schedule for tonight.

### **Chapter 369: Foresee big events...**

Seaview One, when Qin Yu arrived home.

Wang Hong is cooking delicious food, the main ingredients of the ingredients...the little anchor.

The dark and elegant materials set off the evil blooming blood-red stamens.

"Boss, the cooking is ready, please use it slowly."

After Wang Hong retired, Qin Yu sat tightly and began to enjoy the gluttonous feast in front of him.

...

It took 45 minutes to solve the food.

Naturally, the cook can't forget.

Be a person, be grateful!

The little cook has worked so hard, and naturally needs some reward.

...

The night was deep, and Qin Yu opened the drawer after taking a shower.

I glanced at the watch inside, and finally picked up the RM056 and put it on my wrist.

Waterproof is a good feature!

When I came to the door, I picked up the car key of the big parcel...

Put it down gently, and put the Lamborghini car key in the palm of your hand.

Buzzing~

In the middle of the night, Brother Yu didn't feel embarrassed to hit the accelerator.

The irritable bull still uttered a low roar, and drove out of the basement under the whistle of many luxury car brothers.

The Bund, Waldorf.

This is also a short-term happiness harbor for Brother Yu.

Most of the young ladies who needed to take in for a short time stopped here.

Brother Yu has many happy memories here, as well as the caring assistant Yao Guanjia.

"Shao Qin, people are in your room, do you need to send something over?"

Seeing Qin Yu's old Yao looks like a stalker, he doesn't care about his VIP personal butler's compulsion.

"I'll bring some red wine... By the way, does the hotel have fresh cream?"

Butler Yao asked uncertainly: "Are you talking about cream cake or pure cream!"

"Pure cream, what do you want a cake for?"

Brother Yu is here to engage in art, and the cream is to add artistry.

Why do you want cake?

"Yes, I will deliver it to your room later."

Butler Yao immediately understood that there was a pain in the room cleaning.

After Qin Shao left, the room had to be cleaned up and down again.

"Okay, you bring it here yourself."

Opening the purse, Qin Yu didn't count it, and put a small pile of cash between \*\*\*\* in Yao's hand.

"Thank Shao Qin." Steward Yao stood still, bowing and waiting for him to enter the room.

Then he raised his head again, glanced at the extra thousand yuan in his hand, and walked quickly towards the back kitchen.

He had to arrange the props for Qin Shao first.

This girl came here today, but she did a lot of tricks last time, which opened her eyes to old Yao.

Young people now...

ruthless!

Pushing open the door, the layout of the room has been changed.

The living room was almost half empty, leaving behind a wave-shaped recliner that didn't exist before.

A soft cashmere carpet was thrown on the floor. There were more than 80,000 pieces of this stuff.

It seems that I can't keep it tonight...

It was covered with rose petals, and there were scented candles next to it.

The air is full of good smells, mixing them together to give people an inexplicable feeling of heat.

The soft female voice sang affectionately, and the fascinating sound of water came from the bathroom.

Pop~

The lights were dimmed, and she was wearing a black maid sling.

A pair of slender and sensual straight legs are wrapped in delicate and seductive black stockings.

Li Shuangmeng came with a candle in her hand, walking in a charming and coquettish step.

The slender and skinny feet with crystal water droplets make the entire surface of the feet look like they are glowing.

Click~

The door opened a gap, and the silver dining car slid into the room silently.

The person pushing the cart behind did not show the slightest shadow.

This is called professional!

As the door closed gently, there was a click of a click.

Li Shuangmeng suddenly moved forward very fast, leaping forward like a cheetah.

Kang Dang~

...

Sure enough, the development of things was as expected by Brother Yu, and the expensive carpet was kept.

All kinds of water stains and cream are dotted and sticky everywhere.

Lying in the bathtub full of bubbles, the scent of milk still could not be removed.

Qin Yu decides to switch to more artistic props next time. Butter is good.

The taste is too stubborn and not easy to remove!

If you rush to the market, don't you have to be tasted by latecomers?

"Boss, your wine!"

Li Shuangmeng handed the red wine to his mouth, knelt on both knees, and fed him the drink by himself.

This thoughtful and well-behaved is extremely satisfying!

"Why suddenly think of coming to me again?"

Qin Yu was very impressed with her last time.

Otherwise, they will not go to the banquet in person after receiving the WeChat account.

The key is that this woman is very sensible, and the freshness continues to maintain the "-" mark.

Since she can stand loneliness, Brother Yu doesn't mind enjoying the pleasure of juicing again.

"Lack of money."

Li Shuangmeng's answer was particularly straightforward, and it was a bit unacceptable to be straightforward.

She was the first to directly show her the worship of money in this way.

"The last half a million, is it done?"

It didn't take long since last time, and 500,000 spent a year.

This is true, her expenses are really extravagant.

"I bought a car and paid the rent for two years. Nothing."

Li Shuangmeng got up and sat on the edge of the bathtub, shook his head lightly, putting her long hair on her shoulders.

That \*\*\*\* show/gas from the inside, from the bones, absolutely!

"How much do you want this time?"

Brother Yu was very satisfied with the two exchanges.

And to satisfy him, Brother Yu has always been generous.

Li Shuangmeng didn't open her mouth directly, raised her shoulders and lowered her head. She blinked her right eye and said, "Of course I will take as much as the boss gives."

Honesty goes to honesty, and you shouldn't lose any measure you should have.

Big guys don't like to be passive, I can give it, but you can't take the initiative.

The difference here needs to be clarified!

Even if you want to send it, you have to send it with value.

Otherwise, if you think you look great, it's nothing.

Reaching out and hooking forward, Li Shuangmeng fell into the bathtub along the way: "It depends on how hard you work."

...

'Congratulations to the host for experiencing extreme softness, swinging supreme, and triggering random rewards!'

'Reward: Consumption discount card 3\*.'

Open the door and sit in the cab.

Qin Yu put his thumb on the fingerprint recognition, and the words "payment successful" jumped out on the screen.

Back to Li Shuangmeng's chat box, "Remember, I like clean toys."

Ding!

Li Shuangmeng, who should have been lethargic, immediately replied: "Good boss, they will only make your toys~"

Laughing dumbly, this woman hides herself in front of her!

Did you wake up so quickly when you fainted?

It seems that next time, I need to add two more minutes.

Qin Yu, who was sitting in the car, did not rush to leave, but meditated on the system. '

The transparent panel unfolds in front of the eyes, and as the thinking turns, the frame in the corner gradually enlarges to the extreme.

Internet Events Prediction Card:

On March 11, Douya platform co-CEO, Chen Ga announced his resignation as president.

On March 15th, Douya announced that it would hold its first large-scale offline fan interactive event, a carnival.

On March 18, many countries announced to increase their oil imports and strengthen their strategic reserves. Crude oil prices ushered in a new wave of increases.

On March 20, a new type of lithium battery came out, driving new development of the industry, and the battery industry may come out of a downturn.

On March 21, Loongson Technology officially announced that it did have a 5-nanometer lithography machine in its hands, which shocked the Chinese.

On March 22, the Western countries headed by the Bald Eagle issued a condemnation of Godson, but no positive response was received.

On March 24, crude oil prices rose by over 46%, and Yaoyang Investment became the biggest winner.

On March 25, Douya fans carnival, a five-day countdown.

Yaoyang Investment, a financial investment company wholly owned by the Cheng family.

At the same time, it is also one of Cheng's financial pillar industries in the business world and one of the most important core industries.

If there is no accident, look at it according to the "foreseeable" information.

Yaoyang is following the national players this time, fearing that he will make a big profit in the foreign exchange market.

Solve the problem of tight capital chain in one fell swoop, laying a solid foundation for future expansion.

However, some things are not absolute, even the "predictive card" provided by the system is no exception.

At this time, Qin Yu was a little grateful that "foreseeing" could be changed.

Otherwise, he could only watch the Cheng family make money, reverse the decline, and soar into the sky.

Now, hehehe...

...

Shangdu, Yaoyang Investment.

Cheng Yaojin is talking to someone: "He really didn't do anything?"

"Indeed, I didn't do anything. I've been busy with his battery and the platform of fighting teeth. It seems that I am going to engage in some small activity, which is ridiculous.

"What about other times?"

"Other time..." The other party paused, and said in a sorrowful tone: "They are soaked in women's piles."

"Shao Cheng What magic power do you think this kid has? Those women are so fascinated by him, as if they were fascinated by ghosts."

"Is this what I want you to care about?" Cheng Yaojin's voice fell cold, and the other side shut up immediately.

"I know, I didn't delay the business." The voice on the other side was a little low: "There are also rumors about that matter, but only a few participants know the exact time."

"Unless someone leaks the wind, otherwise, he will never know."

Cheng Yaojin naturally understood this truth, but his heart was still slightly disturbed.

This time, it was too important for the Cheng family or himself.

If something goes wrong...

Cheng Yaojin didn't dare to think about the consequences, he only hoped that everything would end smoothly.

In this way, the situation in Yaoyang was reversed and a new financial avenue was opened for the Cheng family.

Qin Yu, you are not the only one who understands investment in this world.

### **Chapter 370: Disappearing public opinion**

"Boss, small bowl of noodles, multi-faceted and meaty, hurry up!"

Qin Yu, who was eating noodles, didn't give a mouthful of it.

Good guy, so professional?

Looking back, sneakers, ripped trousers, small vest, combing partial points.

He bit his lips upwards, and his face read the four characters 'no one will accept'.

The erratic eyes are fierce, everyone is looking up and down, two words: disdain!

Typical street slut!

Qin Yu didn't plan to be nosy, so he continued to eat noodles.

But soon, he regretted his decision.

"Boss, can you hurry up?"

"Speaking of multi-faceted and fleshy, why is this?"

"That's all for the small bowl!"

"Hey, all right."

He picked up the bowl and walked towards the stove, reached out and grabbed a handful of meat slices in the beef bowl and put it in his bowl.

Against the boss's glaring helpless gaze, he sat back in his position triumphantly.

Snoring~snoring~

The sound of eating is the same as pig feeding.

His voice is all in the small shop.

One foot stepped on the chair next door, and he patrolled his site with great power.

People listen to the fragrance when they eat, which makes people's appetites appetizing.

The sound of his eating...

Ha ha ha ha ha, babble in the mouth, swear words all over the sky, spit stars flying around.

The people who listened are almost throwing up!

Several diners were disgustingly unable to eat, put down their chopsticks, and left.

They are all expressions that dare to be angry and dare not speak!

Qin Yu turned around helplessly, "Hey, friend, can you keep your voice down?"

The other party put his chopsticks into the bowl and said with his chin open: "I am happy!"

Pop~

With a big mouth, the puffy street slipper fell to the ground in circles.

He held the wall with both hands and swayed for a long time without getting up.

People were beaten up.

Shaking his head vigorously, he finally refocused his eyes.

Without waiting for him to open his mouth to speak harshly, a 45-yard big foot stepped on his face and pressed him in the corner of the wall.

Holding Qin Yu's calf with both hands, it took a long time without pulling it down.

The strength was like tickling, but it was crumpled in his pants.

"Who is Lao Tzu now?"

Qin Yu carried the bowl in one hand, and delivered the noodles to his mouth with chopsticks in the other.

Suck, suck, it tastes delicious!

"Are you special..."

The sole of the foot stepped on the face suddenly left, not waiting for the street liu to be happy.

Kang Dang~

His head hit the corner hard, "I didn't hear what I just said!"

"I...you..." Jiezi's head was hurting, and when he touched it with his hand, he bleeds.

Listening to the other party's unrestrained tone again, it seems that killing oneself is like pinching an ant to death.

Fear occupies reason: "I was wrong, you are Lao Tzu, you are..."

"Don't, neither of us are either. If I were you, I'm afraid you won't live so much."

Moving away the soles of his feet, Qin Yu swallowed the last sip of soup.

Turn around and put the bowl on the table.

Behind him, there was a sound of 'chuckling', and the street slipper grabbed the leg of the chair, as if to remember him.

Turning his eyes, his feet lifted off the ground somehow.

The body suddenly rotated 180°, and his back landed on the ground.

A pretty shoulder fell, Jiezi's eyes were in a trance, and he couldn't stand up anymore.

Opening the handbag, Qin Yu counted three cash.

One was placed on the table, "Boss, this is the money for meals."

The remaining two.

Qin Yu bent down and put it in Jie Liuzi's hand: "The brain is a good thing. Go back to the hospital and have a look. I invite you!"

Jie Liuzi tilted his head and looked at his palm, holding the two cash notes tightly.

Laboriously opened his mouth: "Add money...add money..."

...

...

It's impossible to add money. Look at the pig brain, 200 yuan is too much.

Going out and getting in the car, roared and disappeared in the alleys.

When Qin Yu got off the car again, he was already in the basement of the headquarters of Luheng Group.

"Shao Qin." Yan Xue waited in the elevator, just waiting to take him upstairs.

"Well, are you all ready?" Qin Yu handed her the purse and phone in her hand.

After receiving the things, Yan Xue replied: "They are already online, just wait for Qin Shao you."

Walking into the office one after another, Qin Yu sat in front of the computer.

Turn on the screen, "Shao Qin, President Qin..."

Jiang Luo, Hong Zhongcai and Zhang Qili appeared on the screen, "Good afternoon, have you all eaten?"

"Eat, Qin, how is the weather in Hudu? It seems to be raining all the time recently."

The people of Jiangluo are in the abandoned capital, but the weather forecast is based on Hudu.

Quite interesting...

"It's always raining, drizzle, no effect!"

Qin Yu responded, putting the topic on the right track: "You should have already seen things."

"This time, Jiang Luo is in charge of the command. I don't want to ask at all. If you have any questions, go directly to her."

"In addition, making money is not the most important thing, don't forget your purpose."

Jiang Luo's expression became serious, "Understand, President Qin, I will carefully control it."

See her look rigorous and meticulous.

Qin Yu leaned back and said, "Don't be so serious, just relax."

Jiang Luo squeezed a smirk, and Qin Yu shook his head helplessly, "Okay, don't embarrass yourself."

"If you have anything to ask, ask now."

Hearing him say this, Zhang Qili and Hong Zhong in the video looked at each other and stopped talking.

"Lao Hong, come on." Qin Yu called the name directly, wondering what it was like.

Hong Zhongcai answered, thinking briefly: "Mr. Qin, that... the negative public opinion about Kuafu on the Internet has all disappeared. Did you do it?"

Qin Yu thought that what he was asking about was related to this operation, but it was another matter that he did not expect.

The news about Kuafu's new lithium battery was spread on the Internet.

And, gradually began to develop negatively.

Wei Lan also became unlucky and was accused of being taken advantage of.

For this reason, the blue Li Yi could not bear the pressure.

Take the initiative to open the phone, wanting to call a press conference to rectify his name.

In the end, Ye Jinlan took the initiative to take the matter and said that she would solve it.

And then.....

The negative news about Kuafu Technology on the Internet seems to have been suddenly erased.

It disappeared cleanly.

Some people who do not believe in evil still want to continue to hype.

The editable message has just been posted and refreshed in 1 second.

The brand-new text is like being swallowed by the system, sinking into the ocean.

Clicking on the link, you can only see the funny words "page missing".

By now, no one is going to investigate whether Kuafu's technology is truly innovative.

It's still a grandstanding propaganda farce, wanting to make a name for it.

Now, they are more concerned about what kind of background is behind Kuafu?

...

Hong Zhongcai's question did not get an answer, but it can also be said that he got the desired response.

Qin Yu's silence is undoubtedly tacitly acquiescing that this matter is related to him.

As for who did it, and how did it do it.

Those are not what they should care about.

There is a big mountain behind the boss and he is capable of heaven, which is naturally good news for the people below.

Especially the guys like Hong Zhongcai and Zhang Qili, who have no ambitions and just want to pick up leg hair behind their thighs.

The two wanted Qin Yu to reach the heavenly court. The stronger the background, the better.

In this way, they can safely follow the boss to pick up money and spend.

After ending the video call, Qin Yu suddenly relaxed.

Put your legs on the table and lean back on the back of the chair.

He squinted and fell asleep unconsciously.

When I woke up, it was dark outside.

On this floor, only his office was still lit.

Yan Xue was sitting on the small sofa by the door, with a few bottles of beer and some snacks on the small round table in front of him.

"Sorry, I accidentally fell asleep." Qin Yu put down his legs and stood up, stretching his arms out.

Yan Xue, who was thinking about it, stood up suddenly and gave him a weird look.

Then he lowered his head quickly: "No... Boss, I ordered a takeaway, do you want to have some?"

Qin Yu didn't realize the nervousness in Yan Xue's tone. He was indeed a little hungry when he just woke up.

There are no fixed arrangements for tonight, so let's have some food first.

In a small room, the two sat facing each other.

Yan Xue grabbed the beer can and looked directly into his eyes: "Boss, thank you for your care!"

Qin Yu frowned and said amusedly: "Why mention this again? Didn't it mean it's over?"

"I know, but I...thank you anyway, I'll do it first."

Yan Xue raised her head her beautiful neck and collarbone were exposed to her sight.

Gudong, her expression gradually became vivid in the sound of Gudong swallowing.

Yan Xue poured half of a bottle of wine in one breath.

In the end, I couldn't drink any more, and stopped abruptly.

With a bulging cheek, he swallowed the liquid in his mouth with a sigh of relief.

"I was shocked, I thought I was going to be sprayed!"

Watching her panting slightly with her mouth open, Qin Yu jokingly sat upright and lowered the arm in front of him.

"Haha..."

Yan Xue smiled embarrassedly and wiped her mouth with the back of her hand.

Two faint blushes rose on his cheeks, and his eyes gradually became blurred and distracted.

An ambiguous atmosphere gradually permeated this office.
