

Pinnacle 701

Chapter 701: National stocks

September 11, rainy!

The sky was drizzling, and the waves on the sea became strong.

In this weather, playing in the water is definitely not enough. A group of people started to have fun in the cabin.

Watching discs, playing games, singing K, playing cards.

Mini bowling is very popular, Rafa Elkan and Tongtong occupy the entire area.

If other people want to play, they have to line up with them.

The ticket was drawn by Tongtong. The round ball with such small bumps on it is very easy to recognize.

Qin Yu was in the sun room on the top floor, looking at the sea where the mountains and rain were about to come, and kept talking with Lixin.

All funds have been put in place, the total amount: 119.4 billion.

Like Yan Er, Shen Dong, and other family members.

Qin Yu turned all the zeros into the whole and counted them into Lixin's own funds. The specifics are accurate to the detailed figures of 'yuan', which will naturally be seen when the account is finally released.

Now, Qin Yu doesn't have the time and energy to care about the hundreds or hundreds of thousands...

At that time, the volatility of a few tenths of a time has been more than ten times that of the loss.

"Mr. Qin, Bald Eagle Steel just announced the news, and the Sun is broadcasting it..."

"Wait." Qin Yu said calmly.

The Sun, one of these three words can be believed? ? ?

So, we still have to wait!

Although the people who should receive the news have already obtained first-hand information.

But this war requires the public opinion and fanaticism of the people to influence the judgment of those who think they are smart.

When the overwhelming good news comes, it is difficult for someone to remain absolutely calm.

More or less, it will definitely be affected a bit.

This impact is enough for professional players to move their buttocks on the scale of 'good' when actually operating and making judgments.

That's enough!

Time didn't wait too long, and soon new news came from Jiang Luo.

Several mainstream media such as the Bald Eagle, the Wall Street Journal, and the New York Times, all published reports on "New Breakthroughs in the Future of Aerospace, Titanium and Rhodium Metal".

"The time has come." Qin Yu said with a smile.

Hearing his voice, Jiang Luo immediately heard a "cracking" percussion.

The pleasant sound of fingers tapping on the mechanical keyboard, and every note is filled with the ink scent of money.

At the same time, Qin Yu opened the panel and chose to use the "Big Bang Card of Public Opinion."

A line of chat boxes appeared in front of him, and Qin Yu could input content according to the effect he wanted.

"The new discovery of the moon and the breakthrough of aerospace materials indicate that mankind is about to start the cosmic era...

Countries will vigorously develop the aerospace industry, a large number of purchase orders will drive up material prices, and the stock prices of related companies have soared. Investors have expressed optimism about the overall industry development..."

Check it again, after that there is nothing wrong.

Qin Yu clicked to confirm, "Under review..."

I lost it. When did the system add another audit function? ? ?

"Approved, the card has taken effect!"

Looking at the fading frame, Qin Yu said to Jiang Luo on the other end of the phone: "No more scruples, buy with all your strength."

"Understood...buy with all your strength, and grab among Citigroup..."

The speech was over, Qin Yu put the phone on the table and looked at the sea again in deep thought.

...

...

Favorable, favorable, the new materials industry has received general attention and optimism from investors, and many institutions have entered the market successively.

The stock prices of Baosteel, Shougang, Anshan Iron and Steel and other steel companies have risen for several days. Among them, Baosteel has a daily limit for two consecutive days.

Foreign giants such as U.S. Steel and Freeport have gained considerable gains.

Including graphene, gold and silver mining have been affected by the good news, and transaction prices have risen one after another.

Chile, a major copper producer in the world, announced a production cut, and the copper industry went up...

The non-ferrous metal industry is favored by investors, and a large number of funds have poured into the market.

All kinds of good news come one after another, which is overwhelming.

In three days, almost the entire industry was hit by this wave of good news.

The prices of copper, silver, steel and other minerals have soared by as high as 43% in consecutive days, and the trading prices of new materials in the chemical industry have risen by more than 50%.

The price of graphene stocks has risen the most exaggerated, with an increase of 83%...

At this time, no one cares about what "titanium rhodium alloy" is.

Everyone rushed into the market frantically to join this carnival feast.

The effect of the [Public Opinion Explosion Card] is countless times more exaggerated than Qin Yu imagined.

Have you ever seen a house seller and stock marketer?

What, I have seen it!

Have you ever seen a unified mortgage loan for the entire community and a joint stock market?

The madness of the market even triggered the court to come forward, calling on the majority of investors to calm down and be alert to the bursting of the bubble...

At the same time, Xia Guo declared to increase the amount of non-ferrous metals mining, increase the amount of foreign exports, and make a due contribution to stabilizing the international market.

This statement was highly praised by leaders of many countries and praised it in the official media.

By the way, mocking a wave of Chilean state-owned copper companies, "Look at what a great country style is, and then look at you, who deserves to make money... As for you, wait for death!"

Then came the most interesting link. The Chilean spokesperson said the next day that their production cut was for more efficient use of resources.

Reasonable mining is conducive to the continuous and stable development of human society. It is not right to only focus on immediate interests. We must look forward and look into the distance...

Escondida and Chuquicamata seemed to have exploded with two pimples on the face of the earth, and they were still clearly visible at a height of 10,000 meters.

Where did it come from the courage to speak the slogans of "sustainable, effective and stable".

Did Ms. Liang go to Chile for a concert? ? ?

Leaving aside the operation of the opponent's mystery, the hot situation triggered by public opinion continues to heat up.

Some institutions even feel the madness pervading it.

But at this time, no one will burst the bubble, but follow the frantic influx of this financial feast, making a big fish!

Hands are fast, but hands are slow.

Who can accurately predict when the bubble will burst will be able to maximize the benefits.

Under the tacit understanding of how stupid the leeks and investors pretended to be stupid, US stocks continued to rise, and the Dow Jones Index rose, breaking through the 40,000 mark.

The global industrial parks are booming, and investors have opened the still-preserving expensive champagne to celebrate this huge harvest.

The original millionaire is now worth over 100 million.

And the momentum it showed is still sufficient, and there is no decline and limit...

The S&P index rose 362.1, and industrial stocks prioritized gains, closing at 1739 points, creating a new high in history.

Domestic undercurrents were also used in a hurry. A shares rose 406 points to 4131.2 points, and preferred stocks were in the fields of industry, materials and aerospace.

At the same time, other related fields have also been affected by the good news and have risen somewhat.

However, if you study it carefully, you will find that there is chaos inside.

Commodities like daily necessities have also been blended in, indicating that a certain patent developed by oneself is favored by a certain company.

And this company is in the chemical industry, so...

Don't care what you produce Anyway, if you do chemical industry, the increase is right.

Those investors who can't buy high-quality stocks and want to make a fortune in the bull market, don't care what you are doing.

Anyway, the stock market is so hot, you can make money by buying anything.

What's more, if it is a chemical industry, just buy it.

This kind of enthusiasm can't help but remind people of Gangjiang's stock market in the 1960s.

Even those who sell vegetables and open herbal tea shops talk about stocks every day, stock prices...

It was at this time that Ye Jinlan called and said that someone wanted to see him.

Da Da Da~

The ripples caused by the propeller are like dropping a boulder on the surface of the sea, causing the ripples to continuously spread around.

The dolphins, who were still playing and jumping on the bow of the ship, also dived into the water and disappeared.

When the helicopter Jiangluo was on the top of the hull, Bai Ze went along the stairs to enter the ship, and under the guidance of the staff, he saw Qin Yu fishing on the stern deck.

"So in the mood?" Bai Ze sat beside him with his hands on the ground.

"The ancients said: Self-cultivation!" Qin Yu responded with a calm expression.

"Hehe, I'm really interested...but it's about to fry the pot outside." Bai Ze's tone became a little colder.

"What does it have to do with me?" Qin Yu looked at him suspiciously: "I haven't touched A shares since the beginning. You should look for those who trade behind you."

Bai Zeyu choked, what the other party said was really right.

From the beginning, he did not keep his eyes on the three-square acre of A shares.

People make money in the international market, and every time they make money, they are transferred back to China, and there is no idea of "reasonable tax avoidance" overseas.

In terms of taxes alone, tens of billions were paid back and forth, which is not bad!

No matter how you look at it, the other party is a good citizen who obeys the law.

What's wrong with such a good young man in the new era? ? ?

Chapter 702: The mantis catches the cicada, and the oriole is on top?

"No, how did I let him persuade?" Bai Ze shook his head quickly.

When I looked at Qin Yu, I realized that the other party didn't say anything at all.

He felt weird in his heart, "So, I convinced myself???"

Bai Ze people are stupid...

The negotiation surprise training conducted only a few days ago, is this a waste of school?

"Negotiation is not for you!" Qin Yu looked at him and said with a serious face: "Just talk about it!"

Bai Ze felt the same way, he liked to go straight.

That set of psychological, micro-expression, body language analysis...

It's not that I don't want to learn, but I'm not familiar with it!

"Let the heat come down, the method is up to you." Bai Ze said bluntly.

This is the bottom line, he throws it out as soon as he comes up.

Fortunately, the monitoring signal on the body was blocked by Qilin, or let the people in the command headquarters hear...

The head exploded!

The negotiator shut himself down on the spot, "What have I trained?"

"Okay." Qin Yu nodded and just responded.

After the matter, Bai Ze looked a little dazed, and said: "Drink two glasses, good wine."

Take the wine glass and pour it directly into your mouth.

Bai Ze wakes up after drinking it, and his brows are instantly raised.

Looking down at the amber remnant at the bottom of the cup, his eyebrows were tightly furrowed and said: "I'm not used to drinking this foreign stuff, are there any white ones?"

"Moutai, enough care!" Qin Yu smiled and asked people to get Maotai.

Bai Ze didn't rush to go, so he drank two more glasses, and when he was in the state, he could go back for business.

Less than five minutes before and after, the task is complete!

How do you show that you had to persuade each other after a battle of wits and courage?

The task is to be completed, but where you should use your head, you have to move.

Otherwise, why would he climb to the current position and win the beauty that was in contact with Qin Yu.

With a mouthful of aged Maotai, the importance of this beauty is mentioned in Bai Ze's heart.

"You will enjoy doing business." Bai Ze said with admiration and envy when he looked back into the cabin.

"Or come, I'll pay you a double salary." Qin Yu joked.

"Farewell, I am suitable to be a stinky soldier." Bai Ze laughed and joked, but his eyes were full of pride and pride.

That identity for himself is not as disdainful as he said.

They looked at each other and smiled, and the two of them had a tacit understanding when nothing happened, so the topic was skipped.

Both of them knew very well that Bai Ze would not quit, and Qin Yu would not be able to use him with confidence.

The previous conversation was just a joke.

Perhaps with some tentative thoughts, I want to see if the court's attitude towards him has changed. Judging from Bai Ze's unhesitating refusal, the other party did not intend to insert anyone around him. Or, someone has already been inserted.

Think about it, everyone in the Kuafu Institute can be said to be eyeliner.

Although joining the Sanqin Association, it can reveal some insignificant research projects and directions, which can still be achieved by virtue of the charm of the imperial court.

Under this circumstance, why take the risk of offending Ye Lao and betraying Qin Yu and inserting people into Miracle Company.

As long as Miracle Company is still in Xia Guo, he will become bigger and stronger, and it will only become Xia Guo's shining business card, a wall of honor full of medals of merit.

A big country, there is still something like this...

"How long have you been fishing for?" Bai Ze asked in a bit of surprise, seeing Qin Yu holding the pole without moving.

He drank half of the bottle of wine, why didn't he see a fish bait?

"Drunked?" Qin Yu picked up the bottle and shook it. Hearing the "clang" inside, he must have finished drinking.

So he immediately turned his face and said: "Hurry up."

Bai Ze left, with a contented smile, lying on the helicopter seat for a nap.

If there are more such tasks in the future, 996 blessings, he takes the initiative to apply!

Looking at the helicopter going far in the sky, Qin Yu put down the fishing rod in his hand, picked up the phone on the table and dialed Jiang Luo's number.

"The net is closed." After speaking, Qin Yu hung up.

[Public Opinion Explosion Card] The time limit is over, Qin Yu is not sure what changes will occur in the market next.

Even if Bai Ze does not come today, Qin Yu will let Jiang Luo end the transaction.

Lixin Investment's sell-off was a bit too rude, and a large number of small empty orders were placed without disguise.

Once there is a short sale here, a new order will be placed immediately.

In the beginning, people will be swept away as soon as they are hung up, and some people are taking a large number of orders.

From pending orders to cup scanning, it is a seamless connection!

Most retail investors didn't even see it, and the list was wiped out.

Only institutions with sufficient resources and channels can discover the fact that someone is shipping the goods at the first time.

After losing one third, the opponent's sweeping movements slowed down significantly.

"Continue to place the order." Seeing the empty order waiting to be traded on the screen, Jiang Luo asked to continue to place the order.

"Mr. Jiang, the price will fall like this..." Some people want to dissuade, they actually don't need to make all the shots so quickly.

Sell it in two to three days, and the income will remain at the current price, so that you can make more.

"I said continue." Jiang Luo certainly knew that the price would fall by doing this.

But this is Qin Yu's instruction, she just needs to follow it.

Just like the trader in front of him, he only needs to follow her instructions, and there are many things that do not need to be explained to them.

"Understand." Seeing her insistence, although the trader was puzzled, he continued to put up new empty orders as instructed.

In 1 minute, the stock price began to fall.

In 2 minutes, the drop reached 1%.

In 3 minutes, the price rebounded slightly, but soon fell back to 1% again.

In 4 minutes, the price continued to fall by more than 1.7...

5 minutes, brush!

All the selling orders on the screen are cleared, and the buyers who cannot be hidden are scanning the goods.

"President Jiang, someone is sweeping a lot of goods!" Seeing the rising price, the trader said happily.

"Then what are you waiting for?" Jiang Luo replied blankly.

"Yes...sold all." After receiving the confirmation instruction, the sound of the traders tapping the keyboard became a bit faster.

After a while, a layer of rarity appeared on everyone's forehead.

The back of the shirt was even wet with sweat, even if it was air-conditioned, it didn't work.

One after another, the empty orders were hung out, and they were swept away in an instant.

For 3 hours in a row, the two parties are as if they have agreed, one shipment, one sweeping the goods.

In the case of the opponent's large second order, the price did not fall but rose!

"The other party is crazy?" The trader was shocked by the show operation.

Is it the opposite of the wealthy boy who came here to send money to Lixin, or the next family contacted by the boss?

There are any transactions that you don't know about, or how could the other party sweep the goods at the highest level indefinitely.

From the beginning to the present, the other party has invested at least 30 billion in funds that it did not get.

Is this a cool one in a second?

Otherwise, the money can't keep up with the speed of spending, it's too exhausting!

Repeatedly knock, put on sale!

Percussion, put up for sale!

Knock, hang...

"Mr. Jiang, it seems, it's over." The trader said with a dull expression.

It's over, it's over.

I cracked it directly, and I have never seen such an operation.

Apart from being eaten by some following institutions and retail investors, how many orders did the other party sweep?

The trader is about to turn into a paste, and his frozen head is simply too much to count.

The only thing he knows is that the money invested by the other party is huge, which is beyond the scope of his calculation...

One hundred billion, or two hundred billion...or more? ?

What, 100 billion lost.

Oh, sorry, forgot to bring a unit: US dollars.

Thinking of this The trader suddenly took a breath and roared in his heart: "Is it crazy, or the world is crazy?"

Does the other party think that there is still room for this price to rise?

Seeing the curve that continued to jump upwards, he suddenly felt that his home was selling at a loss, and there was clearly room for this price.

Behind the scenes there is still Dazhuang doing the game, this wave of Lixin escaped too fast.

Thinking of this fact, the excitement just now was suddenly suppressed.

The glorious achievements in the past gave them high expectations for every action.

Strive for perfection and maximize benefits.

This is the result that Lixin Investment should have, rather than being the mantis that catches cicadas and being caught up by the oriole.

"Papa Papa~" Jiang Luo stood on the podium, clapping and applauding: "Congratulations, everyone, this transaction is successfully concluded, everyone can rest."

"Papa~" Weak applause sounded.

Everyone's eyes kept sweeping toward the curve on the screen, and every jump was a torture for them.

The bitterness in his expression became heavier and heavier, and he was about to put on a mask of pain.

"What are you doing in a daze? Why don't you rest and wait for sudden death?" Hong Zhong clapped his hands and yelled loudly with his throat: "Hurry up, it's time to eat, rest and rest. Give me a fuck, whoever doesn't move me up is a jo..."

He drove everyone out of the trader's room with a smile, and the smile on Hong Zhongcai's face gradually disappeared.

How could he not see the situation that everyone can understand.

However, looking at Jiang Luo's calmly leaving figure, Hong Zhong glanced again at the curve that fixed a higher level before selling.

Hong Zhongcai sighed softly, turning off the screen with a complicated expression.

squeak!

The door was closed from the outside and clicked, after the sound of a lock.

A few minutes ago, it was still very lively, and the exercise room, which was as intense as a battlefield, returned to tranquility in the dark.

Chapter 703: Reactions from all parties and amazing benefits

Lixin Investment retires, and there is no news from the outside world, but the industry is quietly spreading, causing a storm.

Shangdu, CICC Investment.

"Lixin retired?" The chief financial analyst frowned when he heard the news.

Is it because of any news that Lixin returned at this time?

Looking at the big screen in front of you, new space concept stocks are still skyrocketing.

Almost all related industries have gone crazy.

The worst increase was also 10%.

Looking at the outside world, the tide of public opinion is still extremely inflammatory.

The herd and blind leeks, as always, kept a lot of banknotes in them, wishing to go bankrupt and sell iron.

We must also catch up with this wave of bull market and wait to get rich!

No matter which direction you look at, the market is unlikely to fall. At this time, if you exit, your mind is wobbly?

Ringling~

"Hey... Boss."

"Yes, I think the market will remain hot... Yes, we can wait and see."

"I know Lixin has retired... Boss, I insist... Okay, I see."

Unwillingly hung up the phone. After a moment of silence, the chief picked up the phone again and said in a calm tone: "All, throw away!"

Hudu, Ping An Investment.

"Retired, this time?" Several big men from the Risk Control Department gathered together, with all their faces full of doubts.

Is it to be safe to leave before the peak market value, or if the other party has any private information.

Or in other words, misjudgment?

As the top financial magnates at home and abroad, they will not give any person or institution a myth.

Looking at the essence through the phenomenon, you will find that the so-called "myth" is 90% luck, 9% current situation, and 1% ability.

The most fundamental factor for Lixin Investment to have the achievements that people talked about before is "well-informed."

Grasp the timing of capital entry and exit to the extreme!

It even gives people a sense of absurdity that the entire market is working with his operations.

Of course, let tens of thousands of financial institutions around the world, large and small, and national players cooperate with one institution.

This kind of thing is naturally impossible!

Therefore, there is only one truth: the other party's source of information is more reliable and accurate than anyone else!

So, according to this common sense...

Has Lixin Investment received some negative news through its own channels?

Quit? Not refundable?

After the risk control and investment department met to discuss, they were still a little uncertain.

Judging from various data and market analysis, there is still room for growth in the future.

With just one move by Lixin, he gave up the vested interests that he was about to obtain, and was reconciled to no one else.

However, this did not last long.

Soon news came from above, in conjunction with the actions of Lixin Investment, clearing and exiting the market to restore stability to the market...

Okay!

All the unclear points are now clear. It turns out to be a political task.

So what is there to say? Ping An is already on the cusp of the storm. In recent years, it has been working hard to reverse its reputation and its own opinions.

If he jumps out and blows his hair at this time, he deserves to be pressed to death...

Do it!

The clearance clearance, the summary summary.

In addition, the report is also to be hit upwards, otherwise, how can the noble consciousness of peace be shown.

There is nothing wrong with this wave!

As several leading domestic investment banks have successively cleared and shipped, prices soon fell to their lowest point in recent days.

This caused a wave of panic among investors.

Leek is stupid, but not blind...

I have been cut too much, and the pain is also a bit of experience.

Some people who were not at ease in their hearts also followed off the goods, "Anyway, I have earned enough, and what I put in my pocket is real money."

There are many people who hold this kind of thinking, but more of them are the insatiable general self-confidence.

In such a good bull market, how could I lose money and continue to buy!

In this way, one night was spent in the wind and rain, and huge waves were thrown on the sea, flapping the futuristic Rhapsody Park parked in the East China Sea.

Turn on the intelligent stability system and close the open area.

It has become a paradise of fantasies in a metal shell, standing still as a rock in the waves.

What should everyone do in the cabin.

Just not being able to take a bath in the 'bathroom' made Yan Er a little depressed.

He had just become addicted to soaking in the past two days, and felt that his skin was soaked white.

Suddenly, pop~

The happiness is gone, Gan!

"Brother Yu, have you read the news on the Internet?" After breakfast, a few people sat on the sofa and chatted, and Li Xiao put his mobile phone in front of him.

Lixin Investment liquidation and exit, concept stocks are suspected of generating new volatility.

Compared with the so-called New Volatility, he is more concerned about whether Lixin has already liquidated and exited the market.

Hey, can you just wait for the money?

"Well, I retired yesterday, and the settlement should be completed this afternoon." Qin Yu responded with a smile.

"Why do I suddenly feel a little pain?" Yang Chengjun clutched his chest and frowned and said, "Or, leave the money overseas this time?"

"Small, the pattern is smaller." Li Xiao pointed at him and smiled: "The cow is his own if he is raised in his own land.

If you send samples from other people's homes, you are not afraid of wind and rain. If there is an accident, the cow is gone? "

"Go away, you are gone." Yang Chengjun mocked with a cold face.

"Brother Yu, what is the tax rate?" Shen Dong asked curiously.

"To transfer the money back to China, normally, it is about 29% after a messy calculation." Qin Yu responded.

Citi's service fee has dropped from 7 points to 4 points now.

Otherwise, it is not 29%, but 33%.

When Shen Dong heard this, he shut himself down instantly.

It's not that if you make 200,000, you have to make it 50 thousand less?

My heart hurts inexplicably!

However, when he thought that he could still fall to 142,000, Shen Dong's mood suddenly became clear again.

To be a man, one must know how to be satisfied!

Drinking small wine, playing cards and singing K, the long-awaited call finally came.

"Brother, come out." Jiang Luo's tone was full of excitement, and he spoke with a slight trill.

"Well, I'm listening." Qin Yu said.

"7964, brother, 796.4 billion..." Jiang Luo seemed to be pinched in his throat, sharp and depressed.

She wants to scream, but she has to worry about the image and majesty in front of the employees.

If this is to be heard by the employees outside, her President Jiang's face will not be needed, and she must collapse!

"Goose, goose~" Jiang Luo snickered, covering his mouth with his hand.

The rate of return is 667%, minus Citi's service fee and income tax payable, 230,956,000 yuan.

"Hiss~" Even Qin Yu couldn't help taking a breath.

230 billion, just flew away.

"Fortunately, fortunately, the miracle company belongs to the key support high-tech enterprises, and there are various tax exemptions. The backhand is a wave of subsidies!

Tax exemption, no levy, no need to pay one copy.

Sure enough, it is still a high-tech industry, and the industry has a future. Brother Yu wants to open a few more companies.

However, this is only the part of the company's income, and Li Xiao and others' personal investment must still be paid for the tax.

The funds of the Sanqin Club accounted for 16.248% of the total investment.....

The total revenue is more than 129.3 billion!

According to the temptation of the policy, 15%+4.

Calculated by a total of 19%, the amount that can be obtained is about 104.8 billion.

With principal!

The income of Lixin Investment is $7946-1048-318-500$ =about 608 billion.

After the money is transferred to the account, Qin Yu will distribute it to the subsidiaries as soon as possible.

The server architecture of Miracle Networks has another layer.

Money is so capricious!

There are also high-end business reception vehicles, buy 20 first, and the price is set at 3 to 5 million.

As a 'small and micro enterprise' with a cash flow of 600 billion yuan, it's not too much to buy a few cars to recharge the storefront, isn't it?

"I invested 200,000, 667%... more than 1.3 million?" Shen Dong was stunned and then calculated again.

Then, his expression immediately became excited: "More than one million, just got it?"

Qin Yu smiled and said: "I actually got more than one million points, Dongzi, a full-priced house is available."

Shen Dong nodded happily and said, "Thank you Brother Yu, it turns out that making money is so simple."

Hearing what he said, Li Xiao frowned and said with a smile: "The layman is watching the excitement, and the expert is watching the doorway. The actual operation is not easy at all."

Shen Dong, who noticed that he had said something wrong, smiled sadly, and said, "I know, this is not happy."

"More than one million, I still made so much money for the first time." Shen Dong said, hugging Xuan Xuan and kissed her heavily.

"Wife, let's buy a trolley!" With money, I naturally want to enjoy a better life.

With the support of millions of cash, Shen Dong, who has been pressing down on the car dream in the bottom of his heart, no longer wants to endure it anymore.

Chapter 704: Lingang

Buy a car, what to buy?

It's a topic that can never be circumvented. When Rhapsody Paradise returns to the dock, everyone is still making suggestions for him.

"The lamp field is quite strong, and the overall performance of the A4 is good."

"Which light field to buy, isn't BMW fragrant? How good is the 320li sports version."

"That's too feminine. If you want to go, go to 630i."

"Thinking up, who said that 320li was opened by a girl, besides, people have a girlfriend, it's not just right to buy it."

"...forget it."

"Mercedes-Benz can also be considered, except for oil spills, everything else is good."

"...Black advanced."

Shen Dong is also full of entanglement, not knowing which BBA he should choose.

"Hot models, the more popular, the better. Drive it with confidence. It will be easier to sell if you want to sell in the future, and the price will be sold." This is Qin Yu's suggestion to him.

I don't particularly like it, what YYDS...

Then you have to buy popular models when you buy a car. Don't worry about whether the street is bad or not, it is safe to buy a bad street.

In addition, when you sell it, you can sell it to car dealers at a high price.

There is a real time when you are in a hurry for money, it is convenient to switch hands, and the price will not fall to the point of distressing.

You can buy an unpopular model, a 300,000 car, and it will drop 100,000 when you go out.

The higher the price, the harder the fall!

"I choose... what my wife likes." Shen Dong rolled his eyes and said with a smile while holding Xuan Xuan's waist.

"Lick the dog, the stone hammer." They gave him a look of contempt, and the brothers just wasted their tongue.

Sure enough, a man with a wife is unreliable!

"Spit up~" Yang Chengjun was full of disgust.

Li Xiao was even more direct: "Just talk about it, don't say anything else."

Yan Er also roared next to him, "I use the red envelope as a pillow, and I won't give it to you if it breaks out one day."

Xuan Xuan lowered his head a little bit shyly and didn't speak. When Shen Dong looked up, he smiled and cursed: "You have a steel screw in there, right?"

"What's wrong with the steel, look down on non-ferrous metals?" Yan Er responded.

"Admirable, admirable!" Shen Dong Congxin.

The money for buying a car is made from above, can he look down on it?

"Okay, it's time to leave, let's get together again later." Qin Yu finished the gathering.

Li Xiao approached him and asked, "Brother Yu, return to the abandoned city?"

"Well, I have to go back." The operation ended, and the benefits were amazing.

He, the boss, has to give the employees a whole sentence, give bonuses, and arrange follow-up work.

"Let me tell you something first, have you been there in Lingang?" Li Xiao suddenly mentioned this development zone.

"Free trade zone, I have heard of it, but I haven't been to it." Qin Yu responded.

"There are plans above to join hands with local government offices to fully develop the free trade zone and introduce new technology industries... You have to be interested and find time to check it out."

"Why, this matter has something to do with you?" Qin Yu asked with a smile.

"Well, I may be transferred to the management committee over there recently..." Li Xiao said modestly.

Let him speak in person, and invite Qin Yu to investigate.

This must be a no-brainer, it didn't run away!

Looking at his performance, he should be very optimistic about the future development potential of the free trade zone.

Regarding the Lingang Free Trade Zone, Qin Yu has only seen relevant comments and introductions from the Internet.

It has been developed for more than ten years, and it seems that only the new city at the southeast end can still be seen.

other...

How about it, you have to see it in person before you know it.

"So, if I have time, I will leave after reading it." Since he has this idea, Qin Yu plans to go and see it before leaving.

"Okay, let's go now?" Li Xiao asked.

"Go." Without delay, Qin Yu asked Yan Xue to arrange a car to take Yalan and Tongtong back.

Shen Dong and Xuanxuan followed Yan Er, discussing where to go to see the car first.

Since you want to buy it, don't delay.

Look early, buy early, use early...

Rafa Erkan and Yang Chengjun have become buddies. The two of them now have a structure and match, saying that they are going back to the hotel to play games together.

I don't know if this game is serious, or whether to use soap!

When everyone leaves, sign the name on the handover form.

Qin Yu followed Li Xiao's Land Rover...

"The comfort of this car is nothing to say." Sitting in the co-pilot, wide vision, comfortable and luxurious interior.

There is really nothing to fault in all aspects, the appearance is minimalist, and the square is awkward and streamlined, but it gives people a masculine beauty.

"Brother Yu, who knows who drives this car, it's really fragrant!" Li Xiao patted the steering wheel and said with a smile.

"I'll try it." Qin Yu said voluntarily.

Li Xiao stopped the car directly on the side of the road and changed positions with him.

Sit down and fasten your seat belt!

No matter when, safety comes first.

After adjusting the mode to Sport, Qin Yu shifted gear and stepped on the accelerator.

"Not bad!" After driving for a while, Qin Yu found that the car's sense of control was not weaker than his big handicraft.

"Hey, how about it's really fragrant?" Li Xiao responded with a smile.

Listen to Keyboard Man BB, it's better to just force it!

What is a badly repaired Land Rover? You open a Ferrari and go to the roadside garage to repair it. Can it be repaired?

As for Tata, "That's a gold master, Land Rover's core technology has not changed, and the R&D team has not changed much. I have learned about the money for buying a car."

There are not many people who have money to take advantage of. Just to buy this Range Rover, Li Xiao lacked a lot of information.

I also specifically looked for a friend who has a car for a test drive, and asked about their experience.

Finally, I made up my mind to buy a Land Rover Range Rover.

Multifunctional use, luxurious and comfortable, strong sense of control, and enough power.

Occasionally encountering some complicated roads, passing a pit, running on a dirt road is no problem.

Of course, if you have to compare a luxury SUV with a professional off-road, it can't be compared even if it falls apart.

It's better to go directly to a blaster monster, which can not only cross-country, but also climb mountains, drift in place and take off...

One set of shock absorbers, one suite, one gas station a hundred kilometers away, come on!

Keyboard Man, you talk to him about technology, he talks to you about differences, you talk to him about differences, and he talks about brands to you.

You tell him about the brand, and he tells you about the history. You tell him about history, and he tells you about technology...

Slap over, WKQNMD, it's all done!

"Speaking of enjoyment, this car is really nothing to say." Li Xiao was obviously very happy to get Qin Yu's approval.

It's enough to be teased by the dog thief Yang Chengjun every day.

Looking at the scenery outside the car window, Li Xiao...found something was wrong.

"Brother Yu, did you make a mistake?" Li Xiao's face was dumbfounded.

"Isn't it Lingang?" Qin Yu glanced at the map in his mind, yes!

Li Xiao smiled bitterly, "It's Lingang, but not Nantong New City. Let's go to the industrial area, to the west of the new city."

Li Xiao was a little dazed, and didn't realize how fast the car was. Why was it about to arrive?

After confirming the specific destination, Qin Yu set off again.

"This piece has been said to be built since 2004. UU reading www.uukanshu.com has always been difficult, and it has finally improved in recent years."

Parked the car by the side of the road, Li Xiao pointed to the villages on both sides and said: "This area, as well as the eight villages and towns to the north and northwest, all belong to the new area.

All of these will be demolished, including the eight villages and towns in the west. This is a whole, and it is expected to invite tenders for new technology companies.

To build a future science and technology city, environmental protection is extremely demanding and must meet the highest domestic standards. "

"The highest standard?" Qin Yu was taken aback. Isn't that higher than the international standard.

In recent years, domestic standards have become stricter on environmental issues.

If it were to follow the highest standards, it would be much higher than the requirements of international environmental organizations.

"Yes, the highest standard!"

Li Xiao nodded and said with a solemn expression: "Future Science and Technology City will combine network + technology with nature.

The above targets are technology giants such as Google and Apple, and the requirement is to surpass. "

Xia Guo vigorously developed and fully rejuvenated, and the progress in the field of science and technology was remarkable.

But to catch up with giants like Google, there is still a long way to go.

But if it's just construction, it's really not a big problem!

"What is the planned area?" Qin Yu asked, pointing to the two pieces of land connected together.

"This is the first project area, with a total area of 119.5 square kilometers. There is a comprehensive area, and the east coast is a comprehensive area and a new city..."

Li Xiao pointed at both ends and introduced Qin Yu roughly the entire new district project plan.

With a total area of 873 square kilometers, it will become a new engine for local economic development in the future, driving the overall economic development of the entire Shanghai area.

"How about it, are you interested?" Li Xiao asked with a smile.

"I have some thoughts, but I have to think more about it...I'll talk about it when I come back."

Qin Yu remembered what he saw in his heart, and talked about the others when he came back.

Chapter 705: Boss is great

People who have money tend to go bad.

Especially men...

The most recent Shen Dong is beaming.

Not only did he buy a new car, but his career went smoothly, and he had a great affection with his girlfriend, and he was proud of the spring breeze.

However, his whereabouts in the past two days seems a bit mysterious.

He often laughed silly with his mobile phone in his dorm alone. Yan Eryi asked, and he said he was reading a joke.

But that look of guilty conscience greatly reduced the reliability of his speech!

"This kid must be someone outside." Sitting in the meeting room, Qin Yu, who had a meeting, lowered his head and chatted with Yan Er privately.

At this moment Jiang Luo was speaking on it, and Qin Yu had nothing to do, so he decided to secretly leave.

All account transfers have been completed, and the deducted service fees and margins are all included in this profit.

The Sanqin Club's 19.4 billion, the service fee is 2.5...485 million.

The profit margin is 15%, at 12.9 billion, and the two together bring Lixin Investment more than 13.3 billion in revenue.

The same goes for Shen Dong. The service fee of 200,000 yuan and 5,000 yuan will also be collected.

The profit margin is 15,131,130 yuan, and the final profit is 743,000 yuan.

It was less than what Shen Dong had predicted, and even if the principal was added, it was not enough for one million.

However, this did not affect his mood, the full BMW 330i, it was really nice to drive.

The rest is like the investment made by Yan Er and relatives in his family, and the total service fee + water pumping is less than 10 million.

Adding them all together, the overall income of Lixin Investment eventually exceeded 620 billion.

"Suddenly rich, there must be such an adaptation process." Qin Yu.

People need to grow through experience.

From scratch, there must be a process of mentality from swelling to getting used to it, and then returning to plain.

"I'll talk to him, don't worry about Brother Yu." Yan Er.

"Okay, I have a meeting here." Hearing Jiang Luo starting to make a summary, Qin Yu pressed the phone out.

"Next, please come up and say a few words." Jiang Luo took the lead in applauding, and everyone gave thunderous applause.

Because the boss comes to power, often the representative has to pay bonuses.

"I don't know, how much can I get this time?" Everyone was full of curiosity.

You know, the profit this time is 600 billion+

How many zeros... eleven...

It takes several seconds to count to zero!

The bonuses of several bosses are at least over 10 million, right?

"Cough!" The old rule of going on stage is to clear your throat first, so that everyone can vacate their minds and focus on themselves.

Qin Yu said: "First of all, I want to thank everyone for your contribution. Although President Jiang has already said it, I still have to say it here.

Everyone has worked hard this time..."

Wow~

This attitude makes the employees feel more emotional.

Not afraid of hard work!

I was afraid that I was so busy to vomit blood, only I knew that the boss didn't look at it at all, let alone care about it.

Now, with the words of the boss, one of those present counts as one.

All of them were warm inside, as if they had put a warm water bag directly.

It's really not much to hit workers.

A decent job, a boss who respects himself and the reward he deserves.

As long as he has these three things, he can sell his life to you.

"What I should say, President Jiang has already said." Qin Yu pointed to Jiang Luo, clapped and smiled.

The others also applauded, and when he pressed his hand down, he stopped.

"So, let's not say too much, everyone did a good job, I am proud of you, and Lixin is proud of you.

Then comes our highlight of the day, sending..."

Seeing Qin Yu pause to ask questions, everyone laughed in concert: "Send bonus."

"Yes, bonus."

Qin Yu took out a stack of checks like magic, looked at the crowd and said, "Who can guess his winnings?"

Seeing that Qin Yu wants to liven up the atmosphere, Hong Zhongcai shouted in cooperation: "2 million."

When he finished speaking, he laughed, and Qin Yu waved his hand even more: "Old Hong, you just want to be so prosperous, think bigger, and be ambitious."

"Who wants to guess?" Qin Yu said again.

"5 million, I guess Hong's total bonus is 5 million."

"Small, who else."

"10 million, Mr. Hong."

No one guesses himself, and guessing right or wrong is not appropriate.

It's okay to say less, if too much, it will hurt the boss's face.

As a result, everyone took Hong Zhongcai to make a bet. '

The bravest one shouted 20 million, and no one shouted again.

A bonus of 10 million is already very good, most people think so.

If it is really 20 million, Mr. Hong will have to invite a big meal this time.

"You guys!"

Qin Yu pointed at the check, jokingly said, "Which one doesn't have tens of billions to deal with, just this kind of pattern?"

"Old Hong, come, come up." Qin Yu called Hong Zhong up.

The others all showed expectant gazes, their eyes flickering, and they thought, "Could it be more than 20 million?"

Hong Zhongcai was also up and down, and before he got the check, he kept thinking about how much it would be.

If it is less than 20 million, how can I get the boss down?

If there is more, how much more will there be? ? ?

"This is yours." Qin Yu handed him a check.

After receiving the check, Hong Zhong took a deep breath and opened the check abruptly.

"The first three digits are 100, the next two comma separators, six zeros, two zeros after the decimal point, yes..."

"Boss, this, is this really for me?" Hong Zhongcai was stupid.

He said that his eyes turned red, and he was about to fall into Qin Yu's arms and cry bitterly.

"I'll warn you first, don't cry on my body, don't hug, clothes are expensive." Qin Yu joked and warned.

After that, he nodded and said: "Yes, it's yours, you..."

"Boss." Before he finished speaking, Hong Zhong just hugged him and shouted: "Boss, I love you!"

"Let go, let go quickly..."

Seeing Hong Zhongcai unmoved at all, Qin Yu couldn't laugh or cry: "It's OK, everyone is watching! There are dozens of people, don't make people laugh."

When Hong Zhong finally managed to control his emotions, he turned around, opened the check to the crowd this season, laughed and said, "Bonus...100 million, thank you boss.

Tonight I invite, I invite. All the consumption at the scene will be paid by Mr. Hong, hahaha..."

Hong Zhong just waved the check and walked off the stage beamingly.

Wow~

Deafening applause and screams sounded, and everyone's emotions were instantly ignited and skyrocketed.

That check is like fire, and their own emotions are petrol.

100 million fire, boom~

An instant explosion...

Mr. Hong's bonus is 100 million. What about the other two bosses?

And me? How much bonus can I get? ? ?

Seeing everyone excited, Qin Yu smiled and shook the checkbook in his hand: "Are you waiting in a hurry? Let's not sell it.

Called the name to come up to get the money, you are all satisfied with the safekeeping, more or less go down and have fun on your own. "

"Also, don't forget that the big eater tonight, Master Hong will pay the bill." Qin Yu pointed at Hong Zhongcai again, and the other party clasped his fists and laughed.

The 100 million bonus was something he had never thought of.

Not at all, this is simply too unexpected.

Ordinary people have such a sum of money, UU reading [www. uukanshu. com](http://www.uukanshu.com) can retire directly.

However, for Hong Zhongcai, of course he would not do this.

His professional career has just begun, how could he go home for retirement at this time.

When the material needs of life are met, work is no longer just for life.

It is more of a pursuit and honor.

The expression of one's own value, and the secret to keeping oneself young and smart.

Retirement, pension, impossible...

"Old Zhang..." Hong Zhongcai was followed by Zhang Qili.

Excited heart, shaking hands.

After taking the check and opening it, Zhang Qili also blushed: "Thank you, boss."

From his appearance, he knew that he was definitely not younger than Lao Hong.

In fact, the two have the same bonus, and both are a small goal.

Next is the trading team, the number has expanded from the initial 5 people to the current 10 people.

Ningquewulan, loyal to the company.

Although Lixin Investment has been hiring people, many applicants have come to apply.

But up to the current position, only five new recruits have been recruited, and they have to be recruited later.

"Do it well." Qin Yu didn't say any extra words, and directly handed over the check.

"thank you boss."

Everyone comes up with the same attitude.

He bowed to accept the check, opened it, and bowed again and thanked him happily.

Only then was his footsteps vacant, his body fluttering, and he walked back to his position as if he was jumping.

20 million, how can you not be excited?

Before they felt that such a huge bonus can only be obtained by managers like Hong Zhongcai and Zhang Qili.

Unexpectedly, the boss was more generous than he expected, not only taking everyone to drink soup, but also sharing the meat.

Zhang Qiqi and An Xue also went up, each with 1 million.

The two girls didn't control it, and excitedly hugged Qin Yu and shouted, "The boss is great, I love you to death..."

Chapter 706: Jiang Luo's Discovery

Everyone's bonuses were paid out, but Jiang Luo was the only one left.

The company's biggest hero, the commander of operations, has not yet received her bonus.

But the boss has put away the checkbook, and it ended abruptly!

As everyone looked at each other, Qin Yu stood up and waved to Jiang Luo: "Jiang Luo, come here."

Jiang Luo stood beside him with a smile, and didn't care if he would get a bonus.

For her, the present days are once elusive.

Have a car, have a house, have an income, and have a decent and stable job!

There are also bosses who are kind to themselves...

In fact, in Jiang Luo's heart, he is already his most important family, friend, confidant, and object of love.

It's just that she will hide these things deeply in her heart, unlike anyone confided.

In Jiang Luo's heart, facing him always had a deep inferiority and cowardice.

I don't deserve him, and I don't dare to expect anything.

As long as he could look at him from a distance and stay by his side, Jiang Luo would be satisfied.

"Everyone knows that this operation is under the full command of President Jiang, and we have also made amazing gains and achievements.

All of you... whoever has a check in hand now should thank President Jiang. "

"Thank you, President Jiang."

"President Jiang is the best."

"President Jiang, always support you."

After some booing, Qin Yu smiled and raised his hand and pressed it down: "So, should I give President Jiang a good reward."

"Yes, it must be rewarded."

"Boss, you are the most handsome."

"real man!"

"Boss, I have been looking for a man like you." The little girl in the trader said boldly.

"Haha~" everyone laughed.

Qin Yu also laughed and said jokingly: "That's difficult, I'm afraid you won't be able to marry in this life."

"If you can't marry, you won't marry." The girl is not stage fright at all.

"Okay, okay, don't make a fuss." Qin Yu smiled and pointed at the cheers: "You guys, believe it or not to cancel your vacation."

When everyone was quiet again, Qin Yu stretched out his hand to Xu Meixin.

A contract appeared in his hands and turned to Jiang Luo: "Sign it. From today, you will be a shareholder of Lixin Investment."

In the equity transfer agreement, Lixin invests 1% of the shares, unconditionally transferred to Jiang Luo's name.

Someone in the front row could see the writing clearly and whispered to each other, and soon everyone knew what it was.

Equity!

The bottom of everyone's hearts seemed to have been blown by a tornado storm, and they were blown beyond recognition.

What is the most tempting thing?

Visible, tangible, and the most tempting to truly exist...

You watch the steel suit in the movie, and you pick up 1,000 yuan on the road with a friend, which is more tempting to you?

It must be the 1,000 yuan, because the steel suit does not exist at all, but 1,000 yuan is real.

The other party also used the 1,000 yuan to find two girls, and show them off in front of you every day, "The girls are so beautiful and beautiful, so what..."

MD, after I go out, I stare at my feet every day.

The current situation is the same. Everyone saw, knew, and truly realized that Jiang Luo got the invitation letter to the top of the pyramid.

She entered.

From today onwards, she is more than just a hired executive.

He is also one of the owners of this company and has truly achieved his dream of working for himself.

It's not just the 'big pie that always exists in the boss's mouth.'

Envy, excited for her, congratulations from the heart...

future!

They seem to see their future.

One day, the protagonist on the stage was changed from Jiang Luo to himself, holding the equity transfer agreement in his hand.

The boss smiled and said to himself: "Congratulations, XX."

Energetic, so energetic.

"Boss, this..." Amidst the cheers and applause of everyone, Jiang Luo, who kept smiling, wanted to say something in a low voice.

"Sign!" Qin Yu whispered without changing his face.

Hearing the persistence in his tone, Jiang Luo thought for a moment, and finally signed his name to the applause and screams of the crowd.

Own is his, "Just take it for him to keep it."

Jiang Luo's thoughts were very simple, the shares still belonged to Qin Yu, and he was just taking care of them.

When there is a need or necessity, he will return the shares to him.

Qin Yu didn't know her plan, but for Jiang Luo, he was a hundred at ease.

[Mad believer] At full value, there is no one in this world who can reassure Qin Yu more than her.

Except for parents, the **** and faith of blood and affection are two completely different concepts.

"Okay, get out of here now, go to Mr. Hong and ask him to treat you to a big meal and get drunk.

Sleep until the sun reaches your butt, and then go and enjoy this holiday..."

Qin Yu raised a finger, his expression suddenly serious: "One, pay attention to safety, go and enjoy the fun of spending money!"

"Oh, long live the boss!" Amidst the cheers, Hong Zhong walked out surrounded by the crowd.

They must now find a place to have a good meal, and then drink Hong Zhongcai until they can't even walk.

However, they have to go to the finance room first.

The people from C&D are waiting there, and they are responsible for handling check cashing and transfer issues for them.

After the money is transferred to their account, they can have a drink without worry!

"How about you! Don't you go with them?" Qin Yu asked curiously, seeing Jiang Luo standing still.

"No, I plan to go to the hotel to open a room, take a good bath, then sleep for two days, and then decide how to spend the next holiday."

Jiang Luo said, patted the equity transfer contract in his hand, "In addition, I have to send it to the bank safe. It is now worth 6 billion."

The actual value of this 1% of the shares alone is more than 6 billion.

If you really use it to find a buyer, 10 billion people will want it, at least Qin Yu knows a few.

Li Xiao, Yang Chengjun, Xu Hao...

White Pond!

20 billion, he is not impossible.

It's a pity that even if someone bids higher, Jiang Luo will only indifferently refuse, without even looking at it.

Money is enough to spend.

She is really not interested in money! ! !

"By the way, brother, I want to tell you something alone." Jiang Luo looked at Xu Meixin behind him.

"Secretary Xu, wait for me outside." Qin Yu said.

"Okay, boss." Xu Meixin lowered her head slightly, then smiled at Jiang Luo: "Jiang, goodbye."

"Yeah." Jiang Luo responded calmly.

After she left, Jiang Luo fell into thinking, as if the topic to be discussed next made her embarrassed.

"What's the matter, just speak up." Qin Yu motioned to her to speak up, and there was nothing to hide between them.

Moreover, there seems to be nothing to hide.

"Well, brother...I have played a game launched by the company Golden Demon." Seeing Qin Yu nodded, motioned for her to continue.

"I seem to get something incredible from the game." Jiang Luo hesitated and spread his right hand.

In her palm, a stream of colors flashed by like fish scales.

Then, a strange covering appeared on Jiang Luo's right hand.

Qin Yu's eyes lit up: "This is?"

"Invisible gloves, I made them myself." Jiang Luo responded: "Using the skills I learned in the game."

"Learned in the game." Qin Yu was not surprised at all.

I was just surprised that Jiang Luo's good fortune was able to meet a real technical expert in the game.

With his current insights, he can see the potential value and huge potential of this technology at a glance.

It is not a pure optical deception, but a real bionic camouflage.

Touching it with his hands, Qin Yu could feel a faint smoothness, a little cold.

But it feels very close to the skin, if you don't see it with your own eyes, you just touch it with your hands.

Qin Yu believed that she would not be aware of this...

Well, nanoworms will find the difference, but there are no tens of billions of nanoworms in a normal human body.

"Is there only one glove?" Qin Yu was full of interest in the technology contained in this glove.

"I was too stupid. The materials I bought were enough to make a piece of clothing, but in the end only this succeeded." Jiang Luo lowered his head embarrassedly.

"Can I see it?" Qin Yu wanted to get started by himself.

"Of course." Jiang Luo quickly took off the gloves, as if slowing down a bit would be a heinous crime.

Qin Yu was no stranger to her behavior!

No matter what she said, she would still do her own way.

"It's better to be more tactful in the future." Qin Yu said to himself in his heart, lowering his head and looking at the invisible glove in his hand.

Chapter 707: Priceless and Persistence

So thin!

The first feeling of getting started is that this glove is ultra-thin.

Silky, supple, cold, and thin like an epidermis, the ultimate softness brings steel-like toughness.

The glove deformed under the pull of Qin Yu's two hands. When it reached the maximum value, Qin Yu could not move.

Gradually increase the strength, still not moving!

"Can you still make it?" Looking at the glove, Qin Yu wanted to test its limit.

"Yes." Jiang Luo definitely nodded.

Although not very skilled, the failure rate is about 79%.

But the production methods and proportions are all in her mind, which is deeper than any memory.

"That's good." Qin Yu nodded in satisfaction, and then suddenly pulled both hands to the sides.

boom!

There was a sound from the tight gloves, like a spliced surface of fish scales, revealing a slight gap.

The gap is almost the same as the hair. If it weren't for the help of Nanoworms, Qin Yu couldn't see any changes at all.

This is the greatest damage Qin Yu can cause to the gloves after exerting all his strength.

This is the first time Qin Yu has realized what it means to be incapable of starting since possessing nanoworms.

"The technical content of this glove is priceless!" Jiang Luo waved his hand and refused to return the glove to her.

"I want to give it to brother... and the technology to make it."

Looking at Jiang Luo with a happy face, Qin Yu knew that she was serious and wanted to give this technology to herself.

It's just that Qin Yu won't just accept it in vain, "I have an idea, listen to it."

Using this technology to establish a new company, Jiang Luo invested in technology, accounting for 40% of the shares.

Qin Yu invested 1 billion yuan, accounting for 55 percent, and the remaining 5 percent was put there as a motivation to inspire and reward employees.

"No way, no way." Jiang Luo immediately refused after listening: "I don't want shares..."

Seeing Qin Yu's face instantly sink, he raised his hand to return the glove to her.

Jiang Luo was a little panicked, and his eyes turned wildly and said: "At most...10%. I am only responsible for providing technology. 10% of the shares are already a lot."

"Either, as I said, or you take it back by yourself." Qin Yu put the gloves in her hand with a very firm attitude.

He likes money, and he values the technology and knowledge contained in this technology.

But it doesn't mean that you can take things as your own for no reason, even if it is Jiang Luo's.

There are some precedents that cannot be set, whether they are true or stubborn!

Anyway, if Jiang Luo doesn't accept it, that's it...

Hearing what he said, Jiang Luo was anxious, "I accept, brother...I listen to you."

Seeing her wronged look, Qin Yu picked up the gloves again.

She slipped it into her pocket, smiled and rubbed her head and said, "This is the right thing. You can hold it if you give it to you, because you deserve it."

Jiang Luo nodded with tears in his eyes, and followed her out of the meeting room.

Hearing the sound of the door opening behind her, Xu Meixin turned and turned her head back, she couldn't help but be stunned.

Qin Yu's expression was content, with a joyful smile.

Mr. Jiang, who followed behind him, had tears in his eyes, and his eyes were full of gratitude and obsession, like a brainwashed little girl.

So, what happened in the conference room just now? ? ?

"Do you want me to see you off?" Qin Yu asked Jiang Luo.

"No, I'll leave later, brother, go ahead!" Jiang Luo responded with a smile.

"Okay, let's go first." Waving his hand, Qin Yu walked to the elevator.

Xu Meixin's curiosity stopped there, and quickly followed up and asked: "Boss, will you return to the company next or?"

"Back to the company, are Mr. Xu and Mr. Hua here?" Qin Yu asked.

"I'll call now." Xu Meixin said, picking up the phone and dialing the president's office.

"I'm here."

While talking, the person had already arrived downstairs, and He Wu, who was standing by the car, had already opened the back door.

"Old Ho, how long will it take to get to the company."

"half an hour."

"I heard, I'll be waiting for them in the office then."

He Wu closed the door, and Secretary Xu immediately communicated with the secretary of the President's Office on the phone to confirm the time.

After everything was arranged, the co-pilot was pulled away and sat in.

"Boss, everything is arranged." Xu Meixin said.

"Yeah." Qin Yu snorted, his eyes closed and rested, his fingers leaping on his knees like strumming.

All the precise data about Lingang are all presented in front of him.

This data is the final report made by Kirin after proofreading and verifying all the information that can be found.

Qin Yu can say without exaggeration that in terms of data alone, even the Hudu Yamen does not necessarily know Lingang as much as he does.

Future Technology City, benchmarking Google!

In fact, this is not a requirement at all.

Because in terms of the building itself, it is not difficult to surpass the Google headquarters, as long as you have money.

Its real value is to control the entire management system of the headquarters, as well as those rebellious and talented IT elites.

It's talent.

However, when it comes to AI intelligence, "It just happens to be my strong point!"

Qin Yu felt a teasing sneer in his heart. Looking at the world, even if he gave them hundreds of years, don't even think about developing an AI that can rival Kirin.

Let alone beyond...

So, from this aspect alone, if Miracle wants to build a headquarters in Lingang, there is no problem at all.

Qin Yu also has intentions in this regard. It is true that eggs cannot be placed in a basket.

After a long time, the basket will feel that this egg should be mine.

As the saying goes: There is competition to have motivation!

Not only is the competition within the enterprise, but also a little bit of pressure on the yamen.

So that they can always understand that miracles don't just stay somewhere.

As long as there is money, people, and technology.

If you change places at any time, you can start anew and get the same or even better treatment than before.

According to what Li Xiao said and the conclusion drawn by Qilin's comprehensive summary, production-type factories must not be placed in Lingang.

The slightest contamination or possibility is not allowed to appear.

Therefore, only research and development can be done in Lingang, not production, which coincides with Qin Yu's idea. UU reading www.uuk.com a nshu.com

After all, Hudu is the city of Zhili, and its attractiveness, education, and human resources far surpass that of the Northwest.

It is also on the front line facing the world, and can keep abreast of the latest changes and news at all times.

This is of great benefit to any industry.

With the development of the company, the progress of various R&D projects and the systematic division of powers.

Qin Yu plans to subdivide the R&D department into three categories: cutting-edge, practical and civilian.

Put cutting-edge topics in Hudu, and the other two categories will stay in the abandoned city, and continue to be in charge of the Kuafu Research Institute.

For cutting-edge topics, there is basically no hope in the short term.

But it also needs to invest a lot of talented people, because ordinary people can't even reach the threshold, how can they expect him to break through the subject.

Therefore, this causes "it" to occupy a large number of high-quality talents, but it cannot produce benefits in the short term.

In the Kuafu Institute, frontier fields also occupy a large number of talents.

Especially middle and senior talents!

The difference is that the current topics are all reverse engineering.

Although progress is slow, it is not standing still.

In fact, it is no longer a cutting-edge living room. After completing the reverse push, a new research direction can be found from the results obtained.

This new direction can be regarded as a 'frontier field!'

It was also the problem that caused Jing Yuan to keep scratching her head, and her brain cells went to death generously in batches.

There are not many such projects in Miracle Company, because there are too many things to do.

Without leaders like Xiang Jingyuan and Cui Geng, ordinary people are simply not enough to challenge these "new directions."

This is also an important factor for Qin Yuhui's desire to build a new headquarters in Lingang!

Only by attracting enough top talents can the real potential of Miracle Company be fully exploded and blossomed in all directions!

Chapter 708: It's the European Union

Miracle headquarters, top-level chairman's office.

When Qin Yu came in, Xu Hao and Hua Sen were already waiting at the door: "Come in and sit, we have to talk about some things."

Nodding to the secretary at the door, Qin Yu a little forgot what her name was?

These are not important, we re-seated in the office together, Qin Yu said directly: "How much do you know about Lingang?"

"I don't understand." Watson didn't understand.

"The face project, from the initial decision to develop it, seems to have been more than ten years, and it has been unable to proceed due to various reasons."

Xu Hao knew a little bit more than her, but also heard it from others.

"Before Lingang, the local yamen had been playing by themselves, and all the supporting facilities, funds and policies could not keep up.

In accordance with the 17-year plan, we must continue to promote the metropolitan area and build a world-class urban agglomeration headed by Hudu, which occupies a lot of resources. "

Seeing that both of them are very clear about this, Qin Yu went on to say: "Now, the boss has decided to take Hudu to play together. The funding and resource tilt is affirmative.

Lingang will introduce new technology industries, build a future technology city, and benchmark Google..."

"Penguin Island like a window?" Watson was interested.

"Right or not, if the miracle really wants to settle in Lingang, what I want is not a gimmick." Qin Yu said.

"We can build a fully automated technology city, Monkey Lechette~" Xu Hao slammed the armrest and stood up.

He walked back and forth with excitement, and said excitedly: "Fully automatic driving, automatic cleaning of machines, automatic delivery of drones, all street lights are equipped with infrared sensors, holographic projection billboards, solar power, automatic water circulation..."

These technologies are not high-level black technologies. In fact, they can be done completely with existing technologies.

The only problem is that if you really want to say that they are combined, it will be super troublesome to control.

But this is not a problem for Miracle Company: "Kirin!"

"I'm here." Qilin.

"According to my idea, perfect it and project 3D modeling." Xu Hao rubbed his hands enthusiastically.

Kirin applied to Qin Yu for authorization. Any electronic product in his office needs authorization. Every time...

"Agree to authorize." Qin Yu.

The projector is turned on, and the built D3 model appears on the projection cloth.

A low-density, green, desolate but sci-fi city appeared on the screen.

"65 percent greening rate." Qin Yu took over the command.

The originally desolate city immediately added a lot of greenery.

The green tarmac on the top of the small high-rise building is as beautiful as a small hat!

"Four intra-city monorails, three loop lines, two direct intercity rails to Hudu, the center is reserved..."

Qin Yu's voice suddenly came, and a voice came from the bottom of his heart: "How much space do I need to reserve to use liquid spar to power the entire city?"

The picture on the projection modeling immediately produces new changes.

In the center of the city, a white cylindrical object appeared.

The height is much higher than the standard height of the entire city. According to the label next to it, it is 200 meters high and 80cm in diameter. There is a huge disc-shaped platform on the top.

The top shone with diamond-like luster.

The outside of the column is covered with weird pipes, which are inserted into the underground in all directions, connecting every corner of the city.

"What is this?" Xu Hao was a little dumbfounded, how does this thing look a bit like a nuclear power plant.

However, the nuclear power plant is not so beautiful, the sparkling of Blingbling.

There are diamonds on the outside, right?

"The heart of the city, all energy comes from it, the core of the whole city." Qin Yu responded.

Watson interjected with a weird expression: "Do we have this kind of technology?"

"Yes, liquid spar!" Qin Yu said affirmatively.

But what he didn't say was that with such a large volume, Xi He could bring it back, but he couldn't hide it from everyone.

How to do?

Qin Yu immediately thought of the 'invisible material' provided by Jiang Luo before. '

Thin and hard, it can be invisible.

It is perfect to camouflage the crystal.

Such a large piece of crystal is naturally impossible to be a whole.

Cut into several pieces, set the coordinates, and send them into the atmosphere in batches and fall into the sea.

It is the safest way to do secret recovery after landing.

It's just that it's hard to do this by miracles...if it's difficult, it's natural to find a government office.

Let Lao Bai contact a fleet for help, shouldn't it be a problem?

This can be regarded as a grace to the court and enhance the country's international image.

Such a positive energy, does the court have to express it.

Doesn't mean, I can always pay for the fleet to help, right?

If there is a problem, you can only go the old way, bring back pieces of crystals, connect them in a mosaic way, and then complete the assembly.

The disadvantage of this is that energy will be excessively lost during the energy supply process.

Of course, there is another way to directly let the [creator] dive into the seabed for recovery.

However, the lunar base has been discovered, and more and more probes are flying to the back of the moon.

If you really use the robot army, you have to change their image to be reliable.

In a short time, Qin Yu didn't want to have anything to do with the moon base.

The lunar base is used to attract the attention of countries such as bald eagles and prepare for the opening of the era of ocean navigation.

When the age of interstellar navigation comes, the moon will become a bridgehead and supply base.

All fleets will stop there before leaving the earth and returning to the earth, and then reach the space orbital elevator to enter the earth.

The spacecraft will be repaired, maintained, and supplied at the moon base.

Of course, so far this is just an idea.

If you want to really do it, the lack of technology is not just a little bit.

Qin Yu didn't know when he could really see this scene appearing in reality.

But after all, it was hope, "Maybe good luck one day, let me switch to a real space battleship?"

Brother Yu never doubted his own European spirit!

He is the embodiment of miracles, better than luck...

Are you worthy?

"Will the cost be too high?" Xu Hao not only considered the funding issue, but also had another question: "Do we have so many liquid crystals?"

Why doesn't he know that the company has such a large reserve.

Also, shouldn't it be a crystal the size of a fist, so big, piece by piece?

In short, Xu Hao's head is full of question marks.

He really didn't understand the liquid crystal. UU reading www.uukanshu.com

It should be said that, except for the research and development team in Kuafu Research Institute, no one knows anything about it.

"You don't need to worry about this. Naturally, there are technicians to do it. How about talking about it?" Qin Yu asked, pointing to the final 3D model.

The buildings are scattered and orderly, surrounded by greenery, and they are full of vitality everywhere.

The overall plan includes office areas, research and development areas, leisure areas, parks, wetlands and residential areas. There are also several small commercial areas in the middle.

Public transportation, education, leisure, work and entertainment are not delayed, all of which are considered.

In the direction of the sea, there is an inner canal to introduce seawater into the city, and at the same time, enough space is expanded inside to dock the yacht.

When on vacation, meet up with friends, bring food and beer, get on the boat at the pier, sail along the seaway, and then you can set sail and enjoy the party to your heart's content.

As for whether it will be abandoned, Qin Yu is not worried about this problem at all.

Those who can stay in the Hudu headquarters are the company's senior talents. Is there any problem with per capita yacht?

Can't afford a high-end yacht, can't you still afford a small yacht?

Boxing is its own, and every employee buys it at a 15% discount.

With a self-operated terminal, maintenance and upkeep costs can be reduced by more than half.

You can't afford it like this. Are you worthy of your seven-figure annual salary?

No one really likes going to sea. They are all bookworms, nerds and nerds. They are happy to take a walk in the park and play games at home.

Soak goji berries in a thermos, and live an old life of maintenance in advance...

does not matter!

Expand the sea, and stop in your [Super Silver] and [Futuristic Rhapsody Paradise].

Save at least half of the management fee for a small goal a year!

Qin Yu was afraid that when the time comes, the area is not big enough and will have to continue to expand.

Deserted, impossible!

Chapter 709: Who is Brother Yu

TAXX, clear the door!

Li Xiao sat alone in front of the bar, with a cold and mature temperament, attracting waves of little girls to come forward and strike up a conversation.

It's just that they were indifferently rejected by him, and he was waiting for someone!

If the other party doesn't like noise, let him change the place from TAXX to the most annoying one.

"Traffic jam," he willingly waited here for 40 minutes.

Without the slightest impatience!

This is completely different from him in the past, Li Xiao knows...

But he was willing, and even a sense of happiness overflowed in his heart.

"Li Xiao." The gentle voice was clearly captured in light music.

Looking back, Li Xiao's indifferent face suddenly showed a smile: "Zhuzhu, please sit down."

High neck sleeveless halter dress, a GG quilted mini handbag hung on the shoulder.

A pair of flat sandals, there is no certain brand of treasure.

What I wear on my wrist is a niche brand from Italia, with a strong sense of design and natural discrimination.

This one, except for GG's mini handbag, which is worth more than 10,000 yuan, the other one is the most expensive, about 1,500 yuan.

The hair is **** by a black rubber band, the most popular rubber band, without any decoration.

Simple dress, but it gives people a clean and comfortable pure beauty.

If Jiang Xiaoshan is allowed to see her, she must be called "Master."

This outfit looks simple, but every color is just right.

From color, styling, to makeup...

First love makeup and micro expressions, just this "naked outfit" will cost +30 points.

Dress up the whole suit...

The top tea series is pure lust, a master!

The gentleman helped her pull the chair away, and waited for the other person to sit down before sitting on her bar chair again: "What to drink?"

"Snowball, thank you." Ye Mingzhu smiled at the bartender.

The bartender who was wiping the cup was stunned for an instant, this smile...

In this kind of occasion, the most lacking is beautiful women.

But the girl in front of her, her smile seemed to contain the power to hit the soul.

Just like the sand sculpture netizen said: Every point grows into my heart.

"A cup of snowballs." Seeing the bartender's fascinated expression, Li Xiao patted the other person and reminded him.

"Oh, oh, okay." The bartender came back to his senses, but his eyes kept glancing at Ye Mingzhu.

In this regard, Li Xiao didn't know whether to say that she had a good eye or she was too charming.

It's the kind that arouses a man's desire for protection in an instant, and wants to be responsible for her and spend a lifetime together.

Without hesitating a little bit, even knowing that she is a poison can not stop!

"The environment here is so quiet." Ye Mingzhu put the bag on the table, blinking innocent eyes and looked around.

The corners of his mouth were slightly raised, and his smile was not too much, just to hit people's hearts.

The feeling of first love made Li Xiao's heart beat faster, and his usual special mouth became clumsy now.

"Yes, I chose it for a long time!" Li Xiao smiled a little embarrassed.

In fact, what he hates most is Qing.

Because this place gave him the feeling that it was specially used for petty bourgeois young men and women.

I want to play but I can't let go, drinking and talking seriously gives people an ambiguous temptation to refuse and welcome.

Playing ambiguously is purely a delay!

He is neither a young teenager nor a greasy uncle who can only enjoy mouth and hand addictions.

The eldest brother can't afford to pay, and still can't hold a gun.

I turned on my horse, shooting the world with my gun...

Isn't it fragrant?

But as long as she is with Ye Mingzhu, Li Xiao is willing to do anything with her.

Even if you hate it, you will love it because of her.

Aiwu and Wu, these four words Li Xiao now has a deep understanding! ! !

"Your snowball." The bartender put the mixed wine on the table and slowly pushed it in front of Ye Mingzhu.

The look of smirk made Li Xiao look very upset.

Picking up the wine glass, Li Xiao said to Ye Mingzhu, who blinked blankly: "Let's change positions. It's too noisy here."

"Oh, okay!" Ye Mingzhu smiled sweetly and followed him to the corner.

When he came to the corner deck, Ye Mingzhu sat in different styles, as if inadvertently stretched out his left hand, and gently moved the broken hair in the right ear.

Looking at his feet intently, a gentle and gentle temperament came oncoming.

The charm exuded at that moment made Li Xiao's heartbeat speed up again.

The true goddess, in fact, the difference in appearance and figure is not very big, it is difficult to say who is better than who.

Whoever I like more, I can only say that the other person just grows up to the point of their get, which is more in line with personal aesthetics.

At this time, it is temperament that can really distinguish between superiors and inferior ones.

Different temperaments create a gap like a moat!

Just like some women, they seem to be goddesses, but they become brothers with one mouth.

And some women look bad at first glance.

But over time, you will find out if you touch it.

Her beauty is so glamorous!

The above is not enough to describe Ye Mingzhu.

She is the type that is amazing at a glance, and she will only like it more when getting along.

"Zhuzhu, what happened last time was that I was too abrupt." Li Xiao also mentioned the last meeting.

The process was not very pleasant, because Li Xiao mentioned marriage.

This obviously caused Ye Mingzhu, who was not prepared, to panic. In the end, the two ended their date hastily.

This time, Li Xiao decided to let it go first.

When the feelings arrive, the wedding will be a matter of course.

As for the urge at home, the tide has risen, and now Li Xiao can handle it.

"Li Xiao, we are together, but they haven't considered getting married so far. I hope you can understand."

Ye Mingzhu said softly, she was only 19 years old, and it was the time when she was in her blooming years and had fun.

At this time, Ye Mingzhu thought he was not ready yet.

Furthermore, Li Xiao is not her favorite.

As a post-00, Ye Mingzhu is not a standard dog, but he also has extremely high demands on the other half.

Li Xiao is kind, generous, and generous, and he can see that he is worth a lot.

He seems to be very mature and steady in every word and deed, and he is a reliable man.

The height is not bad, the figure...

Although he hasn't seen it with his own eyes, judging from his words and deeds, it should not be bad.

Only the appearance is a little bit different.

It looks too old.

At Ye Mingzhu's age, he prefers the lively and sunny big boy.

She doesn't mind Xiao Xianrou!

In fact, Ye Mingzhu would not agree to his pursuit if it hadn't just checked the difference in appearance by so much.

There is never a lack of suitors by her side, and I dare not say that she is better than Li Xiao, but she should be no worse.

At least in terms of spending money, they are not merciless.

Hundreds of thousands is as easy for them as buying a few dollars earlier.

Therefore, Ye Mingzhu was not worried about what would happen if he missed Li Xiao.

What she cares more about is that the next one might be better!

Some people say she is greedy, but Ye Mingzhu doesn't think so.

Since God gave her this capital, why not make the most of it?

She was still young, and even if she missed it, she would meet others.

As long as you don't miss the best one, it's not a loss in Ye Mingzhu's eyes.

Being young is her greatest capital.

"Understand, I understand what you mean, we will learn more about it after class and continue..."

Ring!

Li Xiao was interrupted by the sound of the phone, her eyebrows furrowed, and she picked up the phone with an unhappy expression.

Seeing the number on it, his brows were smoothed instantly.

Looking at Ye Mingzhu and smiling, "Zhuzhu, I will answer the call and wait for me."

"Okay." Ye Mingzhu pouted cutely and nodded in response.

"Hey, Brother Yu..." Looking at his back walking outside, Ye Mingzhu couldn't help wondering who was Brother Yu?

On several appointments, Li Xiao's phone rang.

But this was the first time he left himself and ran to answer someone else's call. He just hung up before.

What is the difference between this brother Yu and others, that Li Xiao should take seriously?

There was a hint of curiosity in Ye Mingzhu's heart, and the desire to explore Yu Ge's identity suddenly emerged.

Besides, I learned that Miracle Company is going to build a cutting-edge R&D base in Lingang.

Li Xiao let out a hearty laugh: "Brother Yu, we finally have a chance to rent together. Joining forces will definitely surprise everyone!"

"Farewell, this is my normal business investment, and I am not going to compete with someone. There will be a team over tomorrow, so you first get in touch.

Qin Yu came with a smiling voice, this matter is still only a preliminary intention.

In the end, it depends on the later investigation and research.

From land, to construction, and then to put into use, hundreds of billions of investment before and after.

But it can't be decided by patting the butt, you must be cautious.

"...Well, when you come back, when will your people arrive, give me a detailed time, and I will send someone to pick it up."

After confirming the time and chatting for a few more words, Li Xiao hung up the phone and returned to his seat beamingly.

"Is there anything happy? That brother Yu, who is it?" Ye Mingzhu asked curiously, blinking his big innocent eyes, seeing his brows dancing with joy.

Chapter 710: Kirin Evolution

"Qin Yu, that's my brother!" Downstairs in Miracle Company, Liang Guiqi was explaining his identity.

Cui Jun, who was standing next to him, looked a little embarrassed, rubbing his hands back and forth at a loss, feeling that something was wrong with them.

"I'm sorry, sir, Qin Dong is not in the company. Why don't you call Qin Dong." The little girl at the front desk smiled politely.

Liang Guiqi is depressed. If he can get through, would he say so much here?

"I can't get through, so I came to him?" Liang Guiqi said helplessly.

"Brother, don't forget it, let's find him when the phone can get through." Cui Jun pulled Liang Guiqi.

Although not reconciled, Liang Guiqi nodded helplessly.

"What did you think Qin Yu did? Didn't the second aunt say that he was back at the company?" Liang Guiqi complained depressed.

"You must be busy. Being the boss of a company is not an easy job." Cui Jun said with a smile.

"Wait." The two who were about to leave were suddenly stopped by a woman passing by.

The other party wore a matching professional suit and skirt, and asked softly: "Do you know Qin Dong?"

"Yes, that's my brother." Liang Guiqi said with excitement looking at the beautiful big sister in front of him.

"Liang Guiqi?" Xu Meixin pushed the frame of the glasses.

This spectacle frame was given to her by the boss, saying that it can better set off her temperament. After wearing it, it will be more gentle, weak and helpless, making people negligent.

Although I don't understand why people should be negligent, Xu Meixin can only obey the boss's instructions.

As for meeting Liang Guiqi and Cui Jun, it was purely accidental.

She came down to drink coffee, and when she was about to go back, she heard Qin Yu's name by the two of them, and stopped them.

Seeing Xu Meixin calling out her name, Liang Guiqi asked happily and surprised: "How do you know?"

This elder sister is so beautiful, she is no worse than the stars on TV.

Does she work here too?

When I graduate, I must come to my cousin's company to work.

For nothing else, just want to help your cousin, it doesn't matter if the salary is not open, who is your cousin!

"I heard the boss mentioned you, come with me!" Compare his appearance with the photo in his mind again.

Confirming that there is nothing wrong, Xu Meixin led him to the company.

"Secretary Xu." The front desk stood up to greet her, and opened the gate on the left to let her go.

"Well, give me two temporary passes." Xu Meixin did not go in, but went to the front desk and pointed her work card at the scanner.

In this way, it is she who guarantees the two of them so that they can successfully get the pass and enter the company.

To this day, miracles are not about whoever wants to enter or leave.

Even if Xu Meixin wants to bring a stranger in, he has to register as a guarantee and can only be released after receiving a temporary pass.

"Okay, you can go in now." After getting the temporary pass, the two followed Xu Meixin into the elevator with enthusiasm.

It was just the distance of a gate, but before it seemed to separate two worlds.

"Secretary Xu."

"Hello, Secretary Xu."

After passing the elevator and detouring into the small hall on the left, Xu Meixin stopped.

There are two elevators in the small hall, but there is no one. Xu Meixin presses the up button and the elevator doors open immediately.

"Why don't they take the elevator here?" Standing in the elevator, Liang Guiqi asked curiously.

It was the time to check in at noon. People who were resting were all rushing back, and the elevator outside was full of people in line.

But there are obviously two elevators inside, why don't they use them?

"VIP, the president has direct access to the elevator, and only the president and the president's staff are eligible to use it." Xu Meixin said, swiping the work card under the elevator.

"Welcome, Secretary Xu." The mechanical sound came from the horn.

"So advanced?" Seeing this scene, Cui Jun stuck out his tongue in surprise.

Xu Meixin did not give too much explanation. Although the boss mentioned this cousin, she is not clear to an outsider about the relationship between them.

At this moment, I took two people up because I recognized Liang Guiqi, and the boss mentioned him again.

Since I met as a secretary, it's hard to let the other party be kicked out of the company like this.

As for whether the boss is present or not after going up, we have to ask for instructions before we can be sure.

"By the way, Secretary Xu, is my brother here?" Liang Guiqi asked suddenly when the elevator went up.

"I don't know. It was lunch break just now. I don't know if the boss will come in the afternoon. I need to check the schedule at the President's Office."

Someone who knows about secretarial work will know that this is perfunctory rhetoric.

But Liang Guiqi and Cui Jun are both students, so they can't hear the difference without the world.

"Oh!" He nodded a bit disappointed, and the elevator door opened.

"Sit here first, I'll check it out." Xu Meixin asked the two of them to rest in the waiting room, let them make tea, and then left first.

When they were out of sight, they said alone: "Kirin, contact the boss."

"The signal is connected!" Qin Yu's voice came from the other side: "Secretary Xu."

"Boss, I was downstairs just now..." Xu Meixin briefly described what happened, and told him that they were working at the company.

"Let them wait, I'll be there in a while." Qin Yu said and hung up the signal.

The 118th floor is the intelligent hub area of the Miracle Headquarters.

Qin Yu was standing in front of a row of servers, doing final debugging.

Apart from him on the 118th floor, there are only the flickering light spots of the machine and the faint noise during operation.

"Kirin, are you sure it's okay to do this?" Qin Yu raised his head and asked when he inserted the last transparent motherboard into the server.

This is a habitual action, although the Qilin is not at the top, he is still used to it.

"Yes, with the support of the crystal motherboard, I will use the Genesis source code to complete my own evolution, and the functions of the monsters will also be improved!"

"Yeah." Qin Yu thought for a while, no longer hesitating: "Let's get started!"

Transparent motherboards, also known as crystal motherboards, UU Reading www.uukanshu.com is a new type of motherboard built with [liquid spar].

All designs come from Kirin, which is a motherboard specially designed for its own evolution.

The main function is to provide it with enough energy, share the occupation, strengthen the computing power, and complete the fatal blow to the source code of Aturing Genesis.

According to its calculations, after completely breaking through the barriers of Aturing Genesis.

It will therefore get the opportunity to evolve, and by then the various functions of "Ghost" will be further improved.

In order to complete the installation of the crystal motherboard, he has been busy in the company for two weeks.

From raw materials, to production, to installation, all is done by him alone.

This is tiring for Brother Yu, and he is almost collapsed.

As for mobile phones, in order to ensure the independent security of the server, any electronic device that enters the 110-118 floors will be indiscriminately shielded.

Without exception!

The infinite headset in his ear is connected to the company's intranet controlled by Kirin, and only through it can Qin Yu himself be contacted.

1 minute, 2 minutes, 3 minutes...

The room was quiet, as if nothing happened.

Ten minutes have passed, Qin Yu asked tentatively: "Kirin?"

Without recovery, everything is as quiet as before.

However, the light overhead suddenly flashed.

Not only here, but the voltage of the entire company building seems to be on the verge of overload.

The internal lines immediately became busy, and the ringing phone kept ringing.

The network department even directly called the logistics department, asking them to check the lines immediately to ensure that the power is stable.

"No matter what the problem is, I use a backup line or whatever. In short, the network department must not be powered off..."

According to the network department's perception, the server of "Golden Devil" can be in the company.
