

## A Bunch 1101

Chapter 1101: See Through, the real identity of Sha!

“You don’t believe me?” Brother Dog looked at David.

David was stunned for a moment and looked at him strangely. Isn’t it normal to not believe you?

However, as he said, this orc had been quite reliable so far...

In the end, David Sighed and did not continue to question him. Instead, he said, “I heard from my subordinates that you promised the countess that you would cure the crippled Jenny when she arrived at the Sanctuary?”

“Yes...”

“You didn’t lie to her, did you?”

“No...”

“Why didn’t you tell me this earlier?” David looked at Brother Dog. “If you had told me earlier, Miss Sunny wouldn’t have...”

“Sunny will be fine!” Brother dog said with certainty, “She will definitely be fine!”

David was stunned. Looking at Brother Dog’s resolute face, his heart felt warm for some reason. Finally, he nodded. “You’re right. Miss Sunny will definitely be fine!”

“Rest early...” David stood up and patted Brother Dog’s shoulder. “A lot of things will happen tomorrow, right?”

“Why do you say that?” Brother Dog looked at David Curiously.

“I feel that the past few days have been too peaceful...” David smiled and said, “Nothing happened, not even a monster attack. This is too peaceful. I feel that something big is brewing.”

“Is it peaceful?” Brother Dog looked around and felt that the past few days had indeed been peaceful. However, he felt that the surroundings might not be as peaceful as they seemed, he felt that a lot of things had actually happened in the dark these past few days.

-----

Brother Dog’s perception was not wrong. While he was drinking with David, something big was happening a hundred kilometers away!

Seer, who was protecting them in the dark, was in trouble.

A figure wearing a scarlet cloak quietly appeared beside seer. They were all blood demons with extremely powerful and terrifying auras.

In the face of this, Seer still sat quietly on a granite rock and looked at the sky as if she did not notice the arrival of these terrifying creatures.

Sophia, who had sensed the arrival of the blood demon army, immediately ran out of the operating theater. She looked at the blood demon army excitedly and said, "Lord Vera!"

When the surrounding blood demons saw that Sophia was safe and sound, a hint of joy flashed in their eyes. At least their efforts were not wasted.

However, a hint of bafflement flashed in Vera's eyes.

She slowly approached the little deity who was sitting calmly on the rock and bowed elegantly. "Are You Lord Seer?"

Upon hearing this greeting, seer retracted her gaze and looked at the other party. "You are?"

"I am Vera Mica, the Deputy Commander of the Fifth Legion under Lord Bolton. Greetings, Lord Seer..."

The surrounding blood demons looked curiously at the little deity and thought to themselves, 'is this the deity cousin that Rennes mentioned?'

'is he the one who has been protecting Rennes these past few days?'

'but he only looks like a level-six little deity. Why is Lord Vilafa speaking so courteously?'' 'although in the federation law, all races have to respectfully address deities as 'Lord', isn't there a difference in status?'

Xi Ye carefully observed Vera Fa, and after being stunned for a few seconds, she said, "Deputy leader, you're really young!"

"Thank you for your praise, Sir..." vera fa very politely bowed once more.

Xi Ye's lips curled. This wasn't a compliment, it was just the truth.

Accurately speaking, the other party was definitely older than her. From the patterns on her pupils, she was about a million years old, but this age compared to her identity and strength, she was still too young...

A million year old star level warrior was definitely a top genius!

One had to know that his eldia family had been passed down for hundreds of generations. Even in his grandfather's generation, the Dragon Lord had yet to give birth to a dragon level warrior.

"Lord Bolton said that if we were lucky enough to meet you, we would definitely invite you to be a guest..."

"Ha..." Xi ye rolled her eyes. "Senior, you really flattered me by thinking of me so much..."

"What did you say, sir?" Vera looked at seer with a smile.

"I can't go now..." seer shook her head decisively. "I'm very busy. After I'm done, I'll visit Lord Bolton in person."

"That's a pity..." vera sighed slightly, but her face was full of regret. She didn't look like she was faking it, but the next second, she looked behind her. "Where are you going, Master Evil?"

At this moment, SAB was not in the team. Evil Extreme, who was the highest level in the team, did not seem to be interested in seer. Instead, he slowly walked towards Sophia.

Evil extreme paused slightly when he heard Villafa's voice, and Sophia, who was far away, turned pale when she heard evil extreme's name. She kept retreating!

When Ryan said that she had reached an agreement with master evil extreme in her dream, she was very curious. When did evil extreme become such a person in the force?

At this moment, when she saw such a person appearing openly in the team, Sophia felt even stranger.

"As expected..."after seeing Sophia's reaction, Vera said coldly, "There is indeed something wrong with you!"

"What are you talking about?"

An extremely hoarse voice came out from the cloak, seemingly with a hint of dissatisfaction.

"In my memories, you are a very reliable guy. You have very strong abilities, are proficient in the nightmare technique, and have mastered many secret techniques of the nightmare clan. You are one of the hidden powerhouses in the faction. However, this memory always gives me a strange feeling, because the things that you have in your memories are not enough to make Lord Sab say that you are a reliable guy. In my memories, SAB has never felt that anyone is reliable, including Lord Bolton..." "..."

"Your words are really despicable..."baleful said coldly, "So Saab is this arrogant? He doesn't even put Lord Bolton in his eyes?"

"I don't like Lord Saab's view, but that's the truth. He's that kind of person, so..." "..." "Lord Saab shouldn't have said to me that you're reliable. Those words were either sarcastic or hypnotized..." "..."

"Are you sure that I'm fake just because of those words?"The husky voice sounded cold.

Then she looked at Sofia. "Of course, I was only suspicious at first. I Can't be sure, but Sofia's expression just now has confirmed it. As the first batch of people to be sent here, she wasn't hypnotized by you. That's why she doesn't remember a character like you. Your sudden appearance caused her to have such a reaction."

After hearing this conversation, all the members of the blood clan army were shocked and stared at Sha Ji.

"Interesting..."Sha ji smiled and said, "Do you mean that I used hypnosis on all of you? Including Sab?"

Hearing this, the surrounding blood clan officers were also puzzled. After all, wasn't it a little too exaggerated to hypnotize an entire blood demon army, including Lord Sab?

"To be precise, it's not hypnosis. It should be a secret technique that can directly change memories. In my memory, there's someone who can do it..."Vera took off her cloak, revealing a head of silver-white hair, she bowed respectfully towards Sha Ji. "Is that right? Fairy Lulu, sir?"

Chapter 1102: the power of Fairy Lulu!

Within the Bolton faction...

In this battle, eight of the nine great activation stars of Bolton had arrived. Due to the huge consumption of such planet-grade life forms, they were basically all in a frozen hibernation state. Originally, the internal departments of the activation stars had already withdrawn in advance, however, there was only one exception. From start to finish, this planet was in a conscious state, and the internal departments of the planet were operating as usual.

Everyone in the Department of Energy knew that among the nine major planets, this planet was the one that consumed the most energy. Therefore, many people found it hard to understand why this planet alone did not require the freezing and hibernation technology, resulting in the consumption of at least one-third of the energy for this star journey.

Regarding this, there were many speculations from the people below. Some people said that it was because this activated planet was different from the others and was Lord Bolton's trump card. The planet's genes were extremely special and could not be frozen at all.

Some also said that it was because there was a person living on this planet. If they changed the environment rashly, it would be difficult to keep this person... ..

Many people agreed with the first statement because it sounded more reliable. They would not imagine spending so many resources just to keep a person.

However, those who worked on the planet knew that the truth was in favor of the second statement... ..

"Be careful..." inside the planet, in the Palace of the capital, a group of beautiful succubi were heading to the checkpoint at the northwest palace to count their equipment.

"Are you a newcomer? Do you have all the equipment?"

The leader of the succubi looked at a strange face and asked seriously.

"Yes..." the newcomer nodded repeatedly. "The isolation suit, the energy isolation device, the automatic circulation ventilator..."

"Yes...". The leader nodded slightly. "Be careful when you're inside. Don't touch anything, because everything may not be real. Do you think it's a stone or a sharp knife? If you cut the isolation suit, the consequences will be very serious!"

"Got it, sir..." the newcomer promised repeatedly.

It was not until the leader who warned her walked to the front that she cautiously asked her companion, "Is it that exaggerated?"

"You, take it easy... His Excellency is doing this for your own good!" A female succubus who seemed to be familiar with her next to her said, "His Excellency is not exaggerating at all. The one inside must be constantly careful."

"Who is that person inside? Why do we have to be so cautious?"

"I don't know who that person is, but it's true that it's very dangerous..."that person said in a low voice, "That person can change your memory!"

"Change Your Memory?"The newcomer's expression was shocked.

"Yes... completely and seamlessly change your memory..."that person said in a low voice, "There have been a few accidents in the past. The soldiers who were loyal to Lord Bolton had all betrayed Lord Bolton because of that person's changed memory!"

"This... How did you do it?"The newcomer was stunned.

"For example, that person changed your memory. In your new memory, she would be an existence more important than your parents. What would you do?"

"UH..."the rookie's face revealed a trace of horror when he heard that. "Is it that scary? Don't you feel that it's against the rules?"

"No..."that person shook his head. "I have a sister whose memory has been changed. It's completely seamless. You Don't have any conflicts at all. It's as if a person who is very important to you appeared out of thin air in your memory."

"Hiss..."the newcomer immediately took a deep breath. "That's really scary!"

"So you must be careful when you go in. Don't touch the things inside, don't look into that Lord's eyes, and don't get too close. She only needs an instant to change your memory. A direct touch, some small movements, spiritual hints, and even some gas can make you fall for it, so you must be extremely careful!"

"I got it..."the newcomer nodded his head, looking frightened.

While they were talking, a group of black figures jumped over them from the back, rushing towards the palace they were about to enter.

"Stop, in front of us is Lord Lulu's Immortal Palace, you... Lord Bolton?"The succubus leader was stunned when she saw the leader, she quickly brought everyone to bow, but Bolton's expression was gloomy. He didn't even bother to reply, leading the group into the palace.

After entering the palace, the group quickly arrived at Lulu's bedroom. Lulu was still sleeping on the jade bed without a care in the world. Beside her, hualing was carefully lighting incense for her, looking beautiful and harmonious.

Burton directly punched out. In an instant, the harmonious scene turned into pieces. Where was the little fairy who had fallen asleep. The key point was that other than the person who had disappeared, all the things in the palace had also disappeared. Even the bed had been moved away at some point in time... ..

Seeing this, the corners of Burton and the others' eyes twitched...

"Sir..."beside them, a female demon whose entire body was emitting a purple glow said calmly, "Now it seems that the little fairy has infiltrated Saab's troops. What should we do?"

Burton took a deep breath and finally said, "We can only take it one step at a time. Saab is a careful person, and there's that little guy in the team. Lulu might not be able to disguise herself in front of them..."

"Little guy..."the female demon narrowed her eyes. "You Mean Vera, right?"

"Mm..."Burton nodded. "Now that I think about it, letting her go with us is really the right decision..."

----

"Tsk..."

On the other side, in the New Territories, Lulu, who had been seen through, frowned as she looked at the blood demon who was much younger than her. However, her expression did not relax.

Opposite her, Vera was also standing quietly. He did not move at all, as if he was waiting for the other party to make the first move. His expression was terrifyingly calm.

Lulu looked at the distance between her and Sofia. It was not more than ten meters, but with that silver-haired girl around, these ten meters were like a natural chasm that could not be crossed!

"Sigh..."Lulu sighed and finally looked at seer. "Sure enough, you can't take it all for yourself. That... We'll do as you say, cooperate..."

Seer smiled slightly when he heard that. He snapped his fingers lightly, and the entire space suddenly changed. Sofia, who was originally 10 meters away, suddenly appeared beside Lulu, and seer had also appeared beside Lulu at some point in time. This sudden change made all the blood demons stunned.

Phase shift! !

Villafa opened his blood eye and immediately saw the spatial rune array that flashed by. Clearly, there was an extremely profound spatial technique here!

Villafa did not hesitate any longer and directly pounced towards Xi Ye's group.

However, just as his body moved, hundreds of blood red figures blocked VILLAFA and the others. They formed a blood demon battle formation and blocked their way!

"What are you doing?"A few high-ranking officers beside Vera shouted angrily.

"I'm sorry, sir!"Hundreds of high-ranking blood demons said with a conflicted look, "Lord Lulu has done us a great favor, I'm Sorry!"

Vera:"..."

Chapter 1103: The Strongest of the 5th Legion!

Vera FA was expressionless in the face of this scene, while the blood demon high ranking officers were so angry that their faces turned ashen. When they saw seer and Lulu using the spatial technique to pull apart the distance., a few officers immediately shouted coldly, "Get out of the way! !"

A group of blood demons stood in their original positions with resolute expressions.

“Are you stupid?”The officers looked at these children that they had nurtured for tens of thousands of years, yet they were helping an outsider to face them in this manner, they were so angry that they were trembling. “Didn’t you hear what Lord Vera Said? That fellow can change your memories. Your memories of her are all fake! !”

However, these cold words still could not move the blood demons. Their expressions were still firm. It was hard to imagine how these people’s memories had been changed back then. In any case, they were completely unable to listen to their officers’ words. They were still standing in front of them like statues, causing the expressions of the few officers to become even more unsightly... ..

Vera fell silent for a few seconds. She looked at Seer, who was fleeing with Lulu. From her vision, the two of them did not seem to have escaped far. However, through her blood eyes, she could see clearly.., this was merely the vision created by the folding of the spatial array. In reality, the two of them had already been tens of thousands of kilometers away in these few seconds!

She did not choose to continue persuading like the other officers beside her. Instead, she took a slight step forward and a pair of huge black wings rose behind her.

The few officers who saw this scene were shocked and quickly said, “Sir? ?”

The blood demons on the other side were stunned. They did not understand why the blood demon lord Villafa had fallen angel wings behind him.

The few officers who were familiar with this lord knew that villafa rarely revealed his form. Once he revealed it, there would be no leeway!

This was also the reason why they were frightened.

As expected... “...”. In the next second, Villafa’s figure turned into a black and red blood light. It instantly swept through the battle formation of the hundreds of high-level blood demons and chased in the direction that seer and the rest had escaped.

The blood demons who were determined to stop Villafa just now were frozen on the spot like puppets.

The few officers looked at each other and took a step forward. The movement broke the balance and the hundreds of high-level blood demons turned into countless tiny blood clots on the ground...

Gulp...

The officers swallowed their saliva in unison and fell into silence.

They Say Saab is Lord Bolton’s most decisive commander, but the truth is, the Blood Demon Army knows that the sharpest knife in their army has never been Saab... . .

— — —

In the distance, Seer and Sofia are both wrapped in a bubble, traveling at speeds measured to be hundreds of times faster than the speed of light!

In theory, they could already go around this planet a few times, but they were still within the boundary of South Sea city. This could only mean that in this space matrix, the small shipwreck city.., had been folded several times larger than this planet!

Seer looked behind him and saw that the distance had been pulled apart. He was slightly relieved in his heart.

According to the principal, in this matrix, the entire shipwreck city had been folded into billions of dimensions. The area that was spread out was equivalent to ten Milky Way galaxies. It was one of the principal's trump cards.

She and Lulu were using the known coordinates of the space system to jump. It was equivalent to taking a shortcut. If the other party wanted to catch up to her, other than the fact that the distance might be more than a hundred times that of the two of them, the prerequisite was that they did not lose their direction, this was because the sense of direction of the folded space was very chaotic, an existence that was even more difficult to deal with than a maze.

In other words, the other party could not stop them at the first moment. Unless there was the help of a top-notch master of the space element, otherwise, it would be very difficult to catch up to them.

Thinking of this, Seer also slightly relaxed his mood. He looked at the cute version of the little fairy and smiled, "How did Senior Notice Me?"

He had wanted to ask this question for a long time...

When he came into contact with Rennes, Seer had triggered the spiritual connection with Lulu. Apparently, the other party had set up such a spiritual channel on Rennes before he arrived on the planet.

Seer was not very interested in how the other party had set up Rennes, but when it came to his own problems, he really wanted to know the details. First of all, why would the other party notice him?

Also, why was she so sure that Ryan would be able to see her?

Lulu looked at seer and smiled, but she didn't answer this question.

She had planned for Ryan when the other party had asked her to predict seer's position. She had predicted that Ryan would meet seer, and also predicted the importance of seer, that was why she had planned for Ryan to have a spiritual secret technique unique to the fairy race.

Of course, she would not tell seer about her prophecy. The prophecy only said that seer would have a great effect on the revival of the fairy race, however, she was not sure if the other party would have a good effect or a bad effect.

In other words, whether they were enemies or friends depended on the situation. Under such circumstances, it was naturally best not to reveal her trump card... ..

However, Lulu was still a little curious about such a level-5 or level-6 little god.

This spatial array was extremely brilliant. It was clearly the work of a top-tier star-ranked spatial warlock. A level-6 little lord actually had such a helper?

Moreover, Lulu was very curious about how such a person could become the key point of this matter for the fairy race? Wasn't his weight a little too light?

Just as she was thinking about it, she suddenly sensed something, and her expression became a little heavy. "You're using this matrix to trap SAB's blood demon army, and then use it at other critical moments, right?"

Xi Ye nodded and did not demonstrate. "It's probably like this..."

"That's a good idea... but first, you have to be able to do it..." Lulu looked behind her and said.

"HM?" Seer saw that the other party was hinting at something and quickly turned around. He was shocked because he saw that in the layers of spatial mirrors, a blurry figure was approaching quickly. Judging from the figure.., it seemed to be that young silver-haired blood demon.

Seer did not expect that the other party would be able to catch up to him. He did not expect that the other party would be able to catch up to him in such a manner!

In a normal folded space, if seer did not have any coordinates, he would need to be at least a thousand times faster than seer and the others in order to catch up to them. After all, Seer would have to go a thousand times faster than seer if seer were to take a shortcut.

However, Seer did not rely on his speed. Instead, he relied on his strength, a type of strength that could directly break the folded space. It was just like how one could take a shortcut to fly across a winding mountain path at the same time, but seer could not fly.., directly punching a hole in the mountain, the effect was the same!

"What the Hell Is This?" Xi Ye was shocked. "Even a deputy commander is this strong?"

"It seems that you don't understand the Bolton Legion..." Lulu said faintly, "In the fifth Legion, although SAB is the commander, he is not the strongest of the Blood Demon Legion. The one chasing us is!"

Chapter 1104: Cheater!

The Strongest?

Seer was instantly stunned...

It wasn't that he was completely ignorant of the situation regarding Bolton's faction. On the contrary, it could be said that he knew it very well. Previously, when he was attending a gathering at the deity academy, Wine God had told him to pay attention to Bolton, at that time, he had already felt that he was being targeted.

Later on at Xandar Academy, Seer had actually seen through Rennes's scheme. At that time, Seer actually had two choices. The first was to ignore it and directly play a trick on the other side, projecting the thing that was being tracked to a place that was completely out of the ordinary, to disgust Rennes.

If the situation in the new world was not as complicated as the one in the New World, Seer would have done the same.

However, the extremely complicated situation in the new world had caused Seer to have some thoughts. After much deliberation, he decided to make a big move. He might as well take this opportunity to lure Bolton over. It would be best if he could take advantage of this situation.., to get rid of the demon lord who had been keeping an eye on him.

After all, he was being targeted by a high-level lord who had dozens of star systems and an abyss demon. If he had the opportunity to get rid of him, it would be best to do so. Otherwise, if the other party continued to watch him, he would definitely be plotted against one day.., after all, there were too many ways for a character like that to target a small lord like him.

However, since he had decided to plot against Bolton, he naturally had to get to know him better.

Hence, during the last purchase, Seer had spent a lot of money and bought a lot of intel on Bolton from the private intelligence agency. He had a complete understanding of Bolton's nine legions and the activation star's technology.

In particular, he had bought a lot of intel on the upper echelons of the nine legions. After all, the activation star was a large-scale biological weapon. It was definitely a battle between the upper echelons. A small lord like him would be able to come into contact with it, it was most likely the upper echelons of the nine legions.

The information that he had bought at a high price was indeed useful. According to the information, the fifth blood demon Legion might appear to be a high-end flank force in Bolton's nine legions, but in fact, according to the various battle reports from Bolton.., they were mostly used as vanguards and scouts. On the surface, Commander Saab appeared to be a battlefield butcher, but in reality, he was a top scout.

The truth was the same as the intelligence. With Andrew guarding the New Territories, Bolton had indeed sent Saab to scout the intelligence.

However, in all the intelligence reports, there was very little mention of this silver-haired girl-like deputy commander... ..

It was not completely absent, but it was a pity that the other party's performance on other battlefields did not have any outstanding battle records. In addition, he was extremely young, and the intelligence reports only said that he was a rising star with great potential, Seer himself thought so too. After all, he was so young, and the evaluation of him having great potential was already very fair.

Yet, the other party said that this girl was the strongest?

Was he joking?

That was Saab, the ancient demon who had performed the most outstanding in the Bolton faction. In the intelligence evaluation of the nine great army commanders, this Saab's combat strength was at least in the top three, and he might not even be the third...

How could this little guy who was only a million years old be stronger than Saab?

Seer felt that it was a little subversive.

However, the truth seemed to be getting closer and closer to the situation that Lulu had described so lightly. The blurry figure in the distance was getting closer and closer, and it was also getting clearer and clearer. Seer was very clear that this meant that the spatial folds between them were rapidly decreasing.

The Matrix was also hinting that in less than a few minutes, the other party had broken through 140 million layers of spatial folds, and had almost broken through more than half of the distance between them!

Xi Ye was shocked and immediately used the matrix's eye to observe the situation.

The matrix eye designed by the principal had very clearly projected out Vera's situation. Through the array eye, the two of them could clearly see that Vera's entire body was burning red from the high-speed spatial friction!

This was also very normal. If one wanted to break through such a level of spatial folds, one had to have sufficient acceleration force to produce it. To break through more than 100 million layers consecutively, the acceleration force of such a terrifying force was naturally terrifying, the key was how did the opponent's body withstand it?

According to the playback of the formation's core, in the first million layers, the opponent's defensive equipment had already been completely worn out. He had been relying on his body to withstand the attacks from behind! !

"What kind of monster is this?"

Xi Ye immediately sucked in a breath of cold air. Even Lulu, who was at the side, could not help but click her tongue, "This hybrid is a little powerful..."

"Hybrid?" Xi Ye was stunned. He looked over and only then did he see clearly that in the red flames, there was a pair of black wings that did not belong to the blood demon. And in the Red Flames, there was a layer of dark flames that belonged to the fallen angel that covered his entire body, the burning power that resisted the friction of the high temperature!

"This is? Fallen Angel? What's going on?" Xi Ye was stunned.

He remembered that the other party should be the blood demon. That scarlet red pupil represented the other party's extremely pure bloodline!

"You can't even understand this?" Lulu pouted. "A hybrid, a hybrid, a fallen angel and a blood demon each have half of their bloodline..."

Xi Ye's mouth twitched when he heard that. "Bullsh \* t, how is this possible? Treating everyone as if they're not a hybrid..."

Seer himself was a half-blood of the night demon and the Thunder Warrior. His physical appearance also had the characteristics of his mother, Night Demon. This was also the reason why he was so handsome.

However, if seer wanted to use any of the Night Demon Clan's talents, he would not be able to do so.

This was because in the later stages of growth, one could only choose one type of bloodline to purify. If one could mix and play with both, who would not want to have more talents in their own race? Who would still pursue pureblood. It had long been a universal string of strings...

Just like the principal, as a top-tier space warlock, it already had enough resources to buy a good pureblood gene, but why didn't it do so? It was because it was reluctant to give up its star-level slime bloodline. To be able to mix blood, didn't the other party want to have a more noble bloodline mixed in the gene?

Life growth required gene purification. During evolution, one could only choose one gene to purify. This was a biological rule that even gods could not violate, after Seer became a god, it was impossible for him to use any high-level talent related to the Thunder Warrior.

In the end, there was a guy who could use the high-level blood demon and fallen angel talent at the same time. Just like those heaven-defying main characters in old novels, everyone else was considering whether to be a mage or a warrior. He was the only one who could cultivate both magic and martial arts. He was simply shameless...

"Are you cheating?" Xi Ye could not help but ask.

"About this..." Lulu smiled. "It involves a secret in the abyss. I Can't tell you this easily."

"At this time, you still want to keep it a secret?" Xi Ye could not help but retort.

"This secret has nothing to do with the current situation..." Lulu said with a straight face, "You just need to know that you are facing such a cheater!"

Xi Ye: "..."

"So... .. What's next?" Lulu squinted at Xi Ye. "You promised me that you would help me out of this predicament. That's why I agreed to share the secret. That's what the contract says, right ? Lord Xi Ye ? If you can't do it now, our contract will be nullified!"

Chapter 1105: a small fry who has been schemed against...

"If you can't do what you said, our contract will be voided..."

Seer looked at this cute version of the fairy and frowned. He looked at the person who was getting closer and closer to Vera and fell into silence.

This person who had suddenly appeared had indeed exceeded his expectations. However, he did not have any fear in seer. If it was a face-to-face situation, there were not many people in this world who could scare him... ..

However, that trump card could not be used carelessly. It was one thing to expend one's physical strength, but the most important thing was that there was a fellow beside him who was unknown whether he was a friend or foe.

Seer suspected that the predicament that they were facing now was a deliberate ploy by this fairy. After all, he would not think that this fellow was harmless just because he had a cartoon image that resembled a two-dimensional world.

The fairy race came from another dimension. Although they interacted with the federation many times and had basically never heard of any misdeeds, it did not mean that they were not dangerous. Because in essence, they were... They were not much different from the evil gods that often caused chaos in the region. It was just that the dimension they came from was different... ..

He could not use his trump card. At the very least, he could not use it in front of the other party. That was his final trump card... ..

But he had to abide by the contract...

According to the contract between the two parties, as long as the other party could reunite with him, he could guarantee that she and the embrace of death would be able to safely leave the blood demon army. This was his obligation under the contract, and the condition that the other party gave was that after she completed her obligation, she would tell her what the real secret of this planet was!

When the other party had thrown out this bait back then, Seer did not think much about it and decided to accept it. After all, this was a rare opportunity.

As for whether the news was true or false, Seer was not worried. No one could lie in the contract between the gods. Star-level powerhouses could not, and neither could the legendary fate-level powerhouses. This was the reason why the gods were able to manage the core of the federation.

However, it was clear that the other party had a plan. Xi Ye naturally wouldn't believe that this fellow could only rely on himself to escape from Vera Fa's pursuit. However, it was clear that the other party didn't intend to reveal his trump card, and was purely trying to test him... ..

It was a little troublesome. Looking at the constantly approaching Vera Fa, Xi Ye sighed to herself.

Lu Lu, who was at the side, looked at Xi Ye with a faint smile. She didn't seem to be anxious at all, as though she didn't care about being caught up by that terrifying hybrid Vera Fa!

Just as Seer had thought, she indeed had a way to completely avoid Vera. However, that method was also her trump card. She could not use it easily. Even if she had to use it, she could not use it in front of this partner.

The two of them actually had the same idea. However, because of the content of the contract, she had the advantage. Either, this little lord would use his trump card to let her see what exactly this little lord was up to.

Or, if the other party was unable to fulfill the contract, she could at most use her trump card to bring Sofia away, but the other party was unable to complete the contract. According to the rules, she could unconditionally bring Sofia away, and the other party could not stop her!

Then, she would not have to analyze the final information with the other party, and she could also bring away the death embrace that could search for the core of the ley lines.

No matter how she calculated it, it wouldn't be a loss! !

However, compared to the second situation, Lulu was still looking forward to the first one. Right now, she really wanted to know what this little overlord was up to... ..

-----

On the other side, Rennes carefully approached the place where the blood essence stone was stored in the contract. He was very cautious, but his actions were also very swift, because he knew that time couldn't be wasted.

The distance between the two places was close to a thousand kilometers. This distance was obviously far for the Aborigines, but for the high-level blood demons of the Fifth Legion, it would only take a few minutes at most, especially those few officers-level powerhouses. Without considering the space friction and the dangers they might encounter on the road, it would probably only take one or two seconds.

Quickly digging through the soil, Rennes quickly found the box that contained the blood essence stone. After opening the box with the password in the agreement, a scarlet light soared into the sky, the terrifying energy caused the surrounding space to be distorted. Ryan took a quick glance and closed the box excitedly after confirming the quality.

The red light in the sky disappeared, but Ryan's smile froze.

Because when he came out of the box, he saw a figure wearing a scarlet cloak ten meters away!

"Lord Saab..." Ryan swallowed his saliva, his expression extremely ugly!

The worst situation... had happened...

"Yo, I thought you would pee in your pants when you see me..." Saab sneered and slowly approached him. His steps were light, but each step made Ryan feel extremely heavy, as if he was stepping on his own heart.

However, Ryan didn't show any despair.

"Why are you here, Lord Sab?" Ryan asked coldly.

"Of course, I'm here to beat up some arrogant rats..." Sab looked at him mockingly and approached him step by step.

Ryan subconsciously took a step back, but he still maintained a calm expression. "Aren't you supposed to be captured alive?"

"So you should be satisfied, Kid. For You, I came out of the Abyss, and this is the first time I've been captured Alive! !"

Ryan took a deep breath when he heard that. The other party had really planned it, and not escaped from the hands of the enemy at the last minute.

"Then I'm really honored. For a small figure like me, I made you go through so much trouble!"

"Well... I should be honored..." Sab smiled. After walking three steps, he fixed his eyes on the other party. "So, are these your last words?"

Ryan: "Did you forget that we have a contract?"

These words made SAB stop in his tracks. His scarlet eyes looked at the other party.

Ryan sneered. "It's useless to glare at me. This contract was personally made by Lord Shaji. Don't judge me by my boorish appearance. I'm actually a cautious person. I made a clear agreement in the contract that the subordinates of Bolton's forces can not attack me on this planet!"

Ryan was not worried that the contract would be invalid. After all, the contract they had agreed on was the exclusive contract between the Gods of Lord Bolton. Once it was made, even Bolton himself would not be able to break the contract.

Sab stared at him for a few seconds before finally smiling. "That's it? There's nothing else?"

Raine frowned. "What do you mean?"

"What I mean is... you're so calm. Just because of this, you don't have any other cards?"

Raine:" ..."

What did the other party mean?

No, according to the rules, the other party shouldn't be able to hurt him. This guy was just bluffing! !

Raine comforted himself, but for some reason, seeing the other party's inexplicable smile, Raine felt a chill run down his spine.

"That's true..."sab nodded, "Why would I expect you to have other trump cards? You're just a inferior race being used."

Raine: "Lord Sab, don't bluff. It's useless..."

"Bluff? To You?"SAB sneered. "Are you worthy?"

"You..."Rennes was shocked and angry, he was about to retort, but a sharp pain hit him in the next second. The terrifying force made him fly backward without any resistance. When he tried to stand up to resist, he found that he couldn't feel his limbs. But when he looked carefully, he found that he couldn't feel anything, he had lost his limbs!

Unable to stand up, Rennes looked at the slowly approaching figure in horror. The figure held a severed arm in his hand, and the blue severed arm was holding the blood essence stone device.

"You..."Rennes looked at the figure in disbelief. "How could you?"

Chapter 1106: collapsed Rennes!

"How could you?"

Rennes, who was lying in a pool of blood, still widened his eyes in disbelief. Clearly, he could not understand what was happening in front of him.

Sab could actually ignore the god's contract?

“Self-righteous fellow...” Sab carefully removed the blood essence stone device from the other party’s severed arm, then, he threw the other party’s arm to the side in disdain and sneered, “You’re already familiar with the rules yourself. Do you really think you can scheme against others so steadily?”

Rennes stared at the other party, clearly wanting an answer.

“Forget it...” looking at the other party’s manner, SAB smiled and said, “At least you’ve served Lord Bolton for so long. I’ll let you die with a clear conscience.”

As he spoke, SAB found a quick rock and sat down, he said slowly, “Let’s talk about this problem that you’re concerned about first. Why can I ignore the contract and deal with you? This problem is very simple, because I didn’t sign the deity contract with Lord Bolton at all!”

“What? ?” Rennes looked at him in surprise, his eyes filled with disbelief.

“Impossible!” Rennes retorted, “Even if you’re a purebred demon, if you didn’t sign the contract, how could Bolton allow you to control so much power and resources?”

The other party was the commander. As far as he knew, every commander of Bolton’s forces controlled the resources of a star system, and it was a superior star system, this didn’t include all sorts of military secrets and authority that couldn’t be taken over by outsiders.

“Because of Velafa...” Sab said slowly.

“VELAFA?” Rennes was stunned. His mind recalled the usually dull silver-haired blood demon.

“There are some things that you won’t understand even if I tell you. I can only tell you that Vera is a very important person. She is very important to me and the blood demon clan. Back then, Burton let me work for him because he controlled Vera and signed a contract with her before I had any reaction, forcing me to join Burton...” . “...”

Rennes: “...”

“Do you understand now?” SAB laughed. “The reason why I came to Bolton Force in the first place was just to protect her!”

‘so that’s how it is...’.

Rennes immediately felt a wave of anger surge up in his heart. For a moment, he didn’t know what to sigh about. He had actually encountered such an extremely small probability.

Who would have thought that the commander of a Lord’s force, the head of a star system’s resources, would actually be a guy who hadn’t signed a contract?

Who would believe an ordinary person?

To be able to meet him like this, his fall was really not unjustified!

Seeing the other party's vexed expression, Sab suddenly thought of something, then, he looked at the other party mockingly. "Since you want to say it, I'll tell you everything you want to know. Are you wondering why Lord Bolton would value you so much and abandon you so easily?"

Hearing this, Ryan's eyes widened as he stared at the other side!

Seeing this, the mockery on SAB's face became even more intense, he smiled and said, "Lord Bolton has a special thing in his hands. That thing can see some great luck. A long time ago, Lord Bolton had already seen through the amazing luck of your Aldia family. As the future successor of the family, you are naturally valued by Lord Bolton...". "..."

So that's how it is! !

Rennes suddenly understood. The mystery that had been troubling him for a long time had finally been solved!

No wonder the other party valued him so much. In fact, he was also puzzled at that time. Why would a pure demon-born deity value him so much when he didn't have a demon bloodline?

He had also thought about what the other party might be plotting, but he couldn't figure it out. To put it bluntly, his family was just a small middle-class family in the East Star Field. A small family that hadn't even had a dragon-level powerhouse yet..., a small family that had not even entered the noble class yet.

A lord of that level, what was he up to?

"Luck? But why..."

"Why did he abandon you later on, right?" SAB interrupted the other party coldly. "Because after coming into contact with your deity cousin, his lordship was very certain that the Eldia family's great luck did not come from you, but from him!"

\* Clang! \* !

This answer caused Ryan's mind to go blank for a moment. His mind was filled with Seer's childhood face, and he could not hear anything else.

It's him again...

It's him again! !

Why is it always him! ! ! !

Looking at Ryan's eyes filled with jealousy, Sab smiled in satisfaction, he continued, "The interesting thing is that Lord Bolton wasn't able to confirm this matter in the short term. If you don't plot against your cousin, Lord Bolton will continue to value you, nurture you, help you break through to the dragon or even star level, or even open a tenth Legion for you. Even if your cousin rises up due to fate and the Lord knows that the lord of fate isn't you, since he has already invested a large amount of resources in you, he probably won't do anything to you. Perhaps he will continue to value you and use your family to bind your cousin, allowing the other party's fate to be used by US!"

Rennes:"..."

“Interesting, isn’t it?” SAB sneered. “In the end, you personally led your Lord and found that little divine cousin of yours before he rose to power. This made it entirely possible for Lord Bolton to devour the things on his body when he was still a child. Then, your existence would be dispensable. After all, putting aside that unknown importance, you’re Only a thunder warrior who’s not even a dragon-level...” “...”

“I don’t believe you... you’re talking nonsense, aren’t you?” Ryan said with red eyes!

“Nonsense? To You?” SAB sneered. “Are you worthy?”

Cough! Cough!

Ryan was so angry that he spat out a mouthful of black blood. This vomiting and the twitching of his wound only made his whole body twitch in pain. However, no matter how painful his physical body was, it couldn’t overcome the frustration in his heart. An emotion that he had never felt before surged into his heart, it made him so depressed that for the first time, he wanted to take the initiative to die!

“Alright...” looking at the other party’s expression, Sab smiled in satisfaction. What he liked the most was to tease others. Compared to torturing and killing, this was more pleasurable.

“I’ve said what I should say. It’s not a loss for you. I’ll send you on your way now...” Sab slowly stood up and walked to the other party’s side, taking out the bloody blade on his body.

The power of Lord Bolton’s laws could prevent Rennes from being reborn. He naturally wouldn’t let Rennes return alive. Letting outsiders know that Bolton’s forces would harm his subordinates wasn’t a good thing, even a great lord wouldn’t be able to resist the resistance from the entire federation’s families.

Just as he was about to do something, the space suddenly blurred. SAB’s gaze turned cold as he stabbed towards Rennes without hesitation. However, he discovered that Rennes, who was just a short distance away, couldn’t even be touched by his blade, it was as if there was an infinite distance between them.

“Who is it?” Sab said with a gloomy face.

“What an interesting story...” a gentle voice came from the forest behind SAB, and then a golden slime slowly floated out... ..

Chapter 1107: Battle Royale (Part One)

“What a wonderful story...”

The principal looked at him with a smile. His golden face was narrowed into a line, making him look extremely comical. However, Sab didn’t dare to be careless. On the contrary, a rare trace of respect appeared on Sab’s face.

“Sab nuhaste greets senior!”

“Oh, hehehe...” the principal accepted the bow calmly. He squinted his eyes and carefully felt the surging energy in the other party’s body. He chuckled and said, “The younger generation is really awesome!”

Sab wasn’t angry that the other party was really talking to him like an elder. On the contrary, he felt it was very normal, because in terms of seniority, the other party could indeed be considered as his senior,

but in terms of strength., sAB also did not think that the other party was just a rotten old man. On the contrary, he thought that the other party might be a more troublesome existence than the Demon Hunter Ranger Wayne.

After all, this was a super ruthless person who had reached the star-level domain with the lowest level of slimes bloodline... ..

In this world, the existence that could advance to a star-level life form would not be that simple, especially this kind of ruthless person who had achieved this step with low-level life gene.

SAB was not a direct descendant who did not have the resources of his family. To be able to reach this stage, apart from his own unremitting efforts, he also relied on some extremely coincidental opportunities. He had a deep understanding of how difficult it was during this period of time, however, even so, he still had a higher starting point than this fellow in front of him. After all, he was born as a blood demon aristocrat. He had brought along the genes that his parents had worked hard to purify for tens of millions of years, yet, this guy in front of him had gone from the lowest level slime to this level.

The difficulty during this period was completely different from his own era.

“Since you call me senior, this old man will take advantage of my seniority for a while. Can you give me some face and let me take this person away?”The principal laughed.

“Sorry...”sab shook his head, “This person can not be taken away by senior!”

To be honest, Sab didn’t want to clash with such an experienced star level warrior. After all, the main mission this time was to probe Andrew’s intelligence.

However, under Rennes’s situation, he absolutely couldn’t let him survive. Otherwise, if news of the Bolton Force releasing blood sacrifices to the children of the external family spread out, it would be a huge matter that would damage their foundation!

“Then there’s nothing we can do...”the principal smiled. “Originally, it was said that old people can’t do it because they’re old, but who asked this old man to be entrusted by someone else? I can only risk my old life to try...”

Entrusted by someone else?

SAB narrowed his scarlet eyes. “That Little Lord named Seer?”

The principal smiled and didn’t say anything, but he didn’t deny it either.

“After being schemed against by his own cousin, he is actually willing to send someone like you to save him. Interesting...”Sab looked at Ryan, who was lying in a pool of blood, with a faint smile.

Ryan’s expression immediately became complicated, but a glimmer of hope was also ignited. Although he knew that Seer was definitely not simply saving him, as long as he could survive, everything was negotiable!

SAB looked at the hopeful Ryan, and a cold smile flashed across his face, then, he looked at the principal. "I'm very curious. With your knowledge, you should know the value of Sofia. For Ryan to send you here, what does that Little Lord Think?"

"I'm not sure about this old man..."the principal smiled. "Maybe he thinks that he can handle it without you..."

"So Confident?"Sab suddenly laughed. "But unfortunately, there are people in the fifth legion who are stronger than me!"

The principal asked, "The rumored child of Lilith?"

As soon as he said that, the entire space around them suddenly changed. SAB's expression instantly became extremely terrifying. His scarlet eyes were cold and filled with killing intent as he looked at the principal. "You know?"

"Oh Hehehehe..."the principal grinned and said, "This old man can't live so many years in vain. His stamina can't keep up with you young people. At the very least, his experience has to keep up. Otherwise, how would he compete with you young people for Food?"

Sab did not continue speaking. He turned around and turned into a streak of blood light as he charged out. Under his explosive speed, it was even more exaggerated than when he was escaping from Vienne. However, the strange thing was that after a few seconds., the old man came back like he was taking a detour!

"Zigzag?"Sab said coldly with a gloomy face.

Ryan, who was on the ground, was happy to hear that. Zigzag was one of the top-level space spells. It could distort space and remake it according to the Caster's own will. The masters were all top-notch Space Warlocks., it seemed that this old man was not just a scholar. To be able to perform the warp jump that even SAB could not escape from, he must be an experienced space fighter.

There was hope for his own little life!

"I'll give you the person. Let Me Leave!"SAB compromised.

"I'm sorry..."the principal shook his head and said, "This old man came to take this junior away as a side trip. Trapping you is the main task!"

"Do you think you can do it?"SAB's expression became colder and colder. "Senior, don't look down on others!"

"Hehe... it's indeed a bit difficult..."the principal seemed to be intimidated by the other party's astonishing killing intent, he took two steps back. "Only those heartless gods and bosses would let me, an old skeleton, stop a star-level blood demon with full life. So, this old man, I think it's better to take it easy..."

SAB paused for a second and looked at the old man. If it was possible, he really didn't want to clash with such a top-tier space warlock, especially when Villafa might be schemed against.

If the old man didn't make things difficult for him, it would be for the best...

“What do you mean, senior?”

“I mean, this kind of fighting and killing should be done by young people...”

Young People?

SAB was stunned, and an inexplicable sense of unease rose in his heart. Then, he saw the corner of the other party’s mouth curl up into a cunning smile. With a slight movement of his hand, the surrounding space instantly blurred! The space between the two sides suddenly split apart like a torn picture!

How could sab dare to let the other party disappear from his sight? He hurriedly turned into a streak of blood-red light and pounced at the other party, directly grabbing the space in front of him and shattering it into pieces!

However, after the space was shattered, there was no sign of the principal on the other side of the vacuum. It was clearly a different scene.

SAB quickly looked around. He wanted to confirm the location of the slime through the traces. Since he had decided to start fighting, he had to find him in the opponent’s space matrix. He had to end the battle quickly against the Space Warlocks, the longer he dragged on, the easier it would be for him to get lost in his various spatial matrices!

“This place... why does it look familiar?”

SAB looked around and suddenly realized that he seemed to have seen the surrounding scene somewhere before?

Wait a minute... “...”. Wasn’t this the forest that he had passed by when he came here? What did the other party mean by moving him here?

Suddenly, SAB seemed to remember something. He was shocked and wanted to retreat, but in the next second, he felt an extremely sharp aura coming towards him.

SAB quickly looked over, and what he saw was the pair of dark purple eyes!

-----

Chapter 1108: free-for-all (middle)

“Damn it! !”

Looking at the familiar figure, Sab retreated rapidly. However, no matter how much he retreated, the figure was like a maggot that could not be shaken off!

This was troublesome!

“Vienne, stop, I don’t want to fight with you!”

SAB tried to use conversation to solve the problem.

“I want to...”Vivian said with a smile.

SAB was much stronger than the other day. It was supposed to be tricky, but she noticed that SAB was very anxious. Vivian was very experienced in hunting such anxious beasts!

---

On the other side, Billy's group, who was tracking the traces of the Aborigines, was much calmer. The biggest threats they encountered along the way were only some creatures affected by the energy mutation. They were not very strong, only level four or five, to their unit, they were no different from ants.

The threat was not big, and the natives were easy to track. Why would Billy need to worry about everything? It gave her more time to recuperate. With nothing to do, she suddenly had an idea, after the medical staff changed her medicine, she went to the two little elves alone.

She wanted to see what was so special about the little ones that Vaughn and Goron had taken good care of.

Passing through a pile of temporary mechanical tents, Billy quickly found the two little ones. At this moment, the two elves were meditating under the guidance of Lord Goron. The moment they got close to Billy, they could feel an extremely pure spiritual power... ..

Billy was slightly stunned. As the top spiritual race in the federation, their blue spirits were definitely in the top ten of the ten thousand races in terms of spiritual power. There were only a few royal races that could compare to them.., she felt that even when she was young, she did not have such pure spirit energy at their level!

This was not her boast. In her own family, she was definitely one of the top geniuses in her family's history. In just four billion years, she had already stepped into the star-level threshold. Among the younger generation in the southern star field.., she was also considered an outstanding existence.

Using her as a comparison was definitely not arrogant, because she herself was a model specimen of the Blue Spirit clan.

However, the most surprising thing wasn't that these two children's spiritual power was purer than hers, but that these two children were wood elves!

Wood Elves were a comprehensive race, and they were different from their pure spiritual power blue spirits. A pure spiritual race had lost their advantage over a comprehensive race, which made her unable to accept it for a moment.

Especially since she knew that one of the two children was a wind demon...

Wind Demons, the main growth factors in their genes were agility and bones, right?

A mage being outclassed by a ranger in terms of spiritual talent, no one would be able to accept it.

Just as he was about to take a closer look, a gentle force field gently pushed him away. Billy staggered back a few steps, then looked at the two old men behind the elves in confusion. "Master Goron?"

"Shh..." Goron made a silent gesture to Billy and shook his head.

Billy was stunned, and then he took a few steps back. Goron slowly stood up and walked out.

“Lord Goron, their meditation technique seems to be...”

“Well...”Goron nodded. “Void meditation technique...”

Billy’s expression tightened as he thought to himself, ‘it’s really this!’!

Void meditation technique was a top-tier meditation technique invented by those top alchemists when they were communicating with the spiritual world. This meditation technique could open the barrier of another dimension and come into contact with the energy particles of another dimension.

It was precisely because of this meditation technique that the void noticed their universe and launched the later void invasion. Now that the Federation universe was constantly being invaded by the void, this meditation technique could be said to be the main culprit.

However, the federation did not prohibit this meditation technique, because the growth it brought was indeed powerful enough.

Ever since the doors to the spiritual and physical worlds were opened, apart from the void, every other dimensional space was opening up towards the real world, continuously absorbing the energy of this universe, during this process, some energy would naturally be fed back, achieving the balance of the two worlds coming into contact.

The creatures in the other dimension had plundered the energy here, so there was no reason for them to give up on the meditation that could absorb the energy particles from the other dimension!

However, this kind of meditation was very dangerous. If one was not careful, they would be easily corroded by the unknown lifeforms in other dimensions!

Generally, this kind of meditation was only used by arcanists above level-14, and they could only use it under the guidance of their mentors!

Therefore, after hearing Goron’s reply, Billy suddenly frowned, “Isn’t this a bit too ridiculous?”

Goron nodded, “If you have the talent to use this kind of meditation technique at this level and age, it is indeed a bit ridiculous, but they are different...”

Billy:” ...”

He didn’t seem to notice that Billy had been stabbed in the heart, gerald rubbed his hands together and said, “These two little guys have an incredible affinity with the elements. They’re exactly the same as the ancient wood elves in the historical records. So I gave them a little try and let them come into contact with the particles in the alternate dimension. Guess what happened?”

Billy: “I don’t want to guess...”

“It’s still 100% compatible! !”Gerald didn’t care at all about the unwilling expression on the other party’s face, he said excitedly, “The elements in the alternate dimension also have a very good affinity with the wood elves. I even feel that the alternate dimension was not opened during the invasion of the Void.

Perhaps it was opened during the ancient Elf era. I even feel that creatures like elves are very likely from the alternate dimension...". "...". "..."

"Sir, you..." Billy was stunned for a moment before he finally said, "What a big imagination!"

"Tsk..." Gerald rolled his eyes at her. "He really doesn't have any spiritual essence. He's only a spiritual master in this life!"

Billy: "..."

If not for the fact that the other party was old enough, she would have scolded him.

Just as she was about to ask something, Gerald's expression suddenly changed. He suddenly looked to the other side. Seeing this, Billy's expression tensed up. He felt as if he was using his spiritual energy to probe over and instantly felt an extremely terrifying energy, in his shock, he hurriedly activated his spiritual link and shouted, "Defend! !"

In an instant, with a bang, the space within a radius of tens of kilometers suddenly shattered, completely sinking into a vacuum zone!

The many blue spirit mecha operators who had not been able to activate their defenses in time were instantly smashed into smithereens. Geron could only use his spiritual force field to protect Goudan and little cabbage. Even Billy was directly sent flying by this terrifying energy!

Countless mecha soared into the sky and densely surrounded this area. Billy had also activated his own mecha to float in the air. At this moment, through the mecha's detection, she could clearly see the source of that energy.

It was a figure with pale blue flames all over his body, as well as the six gigantic black wings on his back.

"Six-winged fallen angel? ?" Billy was stunned. Then, he looked around vigilantly and thought to himself, could it be that the large forces of the Bolton faction have arrived?

However, after a quick scan, he did not see the so-called demon army. Other than this incomparably powerful fallen angel, there seemed to be only three figures that did not have strong life force that had appeared.

One of them... ... seemed to be... ... ! ... An Emyrean God!

What was going on?

Chapter 1109: Free-for-all -Partpart 2) !

"This is bad! !"

As soon as Vera stepped out of the space, she looked at the mechas that filled the sky. She was stunned at first, but then she realized that this was bad!

This little god Lord was actually colluding with those people from Vogu's faction?

No wonder... "...". Such a little god would have such a high-level space warlocks to support him. No wonder such a little god could survive on Andrew's Planet. So that was the case?

Thinking about it, everything seemed to make sense.

Perhaps it was not a coincidence that their forces were lured here, but they had already planned it. They used this small lord as bait, using that Idiot Rennes as a push to lure them over step by step, using them as the cost of Andrew's confrontation!

And this time, everything on this planet was the same.

First, they used Rennes and Sofia as bait, dispersing their high-level battle strength, and destroying them one by one! ! !

"Good... very good! ! !"

Vera FA looked around coldly. His scarlet pupils were as cold as ice. The ash flames around his body expanded once again, directly swallowing the flames created by the high-speed friction just now. His six wings were fully extended, the powerful pressure caused all creatures below level 10 to be unable to resist kneeling on the ground, unable to move at all!

As they floated in the air, the mecha operators above level-13 were also trembling from the terrifying pressure. Their minds were being suppressed to the limit. Even if they could still barely control their mecha, under the powerful mental pressure.., their clarity was probably not half as good as before!

Only high-ranking officers above level-15 could barely maintain normal mental strength.

Who Was This?

As the commander-in-chief, Billy Sucked in a breath of cold air. Such terrifying life force was probably a first-class existence in the star level, possessing both the fallen angel Hellfire and the high-level Blood Fiend's blood fiend power.., there was actually such an existence in the Bolton faction?

"Your faction has such a big appetite, have you considered your own weight?" Vera had locked onto Billy, who had star-level spiritual power, with a slight search. She looked at her coldly and said, "Take me down, do you think you're Worthy?"

Billy:"? ? ?"

---

Down below, Alice, like every other life form below level 10, was trembling on her knees, unable to look up at the battle. The pressure was so strong that she couldn't even lift a finger...

That's... That's what you call a strong man?

Alice's heart was complicated to the extreme, and she recalled in her mind the times when she had been a slave. At that time, she had also been so powerless, at the mercy of others, that she could not even make the basic escape and resistance, every time she looked at those high-level knights, it was as if she was looking up at the sky!

And now... she did not even have the right to look up at them!

This... was a powerhouse from beyond the stars?

A familiar sense of unwillingness and envy surged into her heart, causing her entire body to tremble uncontrollably. There was fear, fear, and excitement... ..

“Interesting...”the Minotaur at the side was also lying on the ground like Alice. However, he had used the eye of blood demon to clearly detect the situation around him.

“The composite gene of the fallen angel and the blood demon, that Madman actually succeeded? Hehe...”the Minotaur muttered softly, Alice was curious when she heard this. She wanted to ask, but she realized that she could not communicate with either her tongue or her spiritual power.

The Minotaur did not pay attention to Alice. Instead, he was attracted by another scene and let out a “Eh” sound.

In one of the scenes seen by the eye of the blood demon, two sneaky figures were sneaking out under the intense battle in the sky... ..

The Minotaur’s eyes twitched. Why was that Guy Here?

“Focus fire! !”

In mid-air, Billy gave the order without hesitation while he activated the space jump and jumped backwards!

She could clearly feel that the other party had locked onto her!

She was a spirit commander, and the mecha she was carrying was not purely a battle mecha. Most of its functions were used to expand her spiritual power, the true purpose of this type of command-type mecha was to use a powerful spiritual power to communicate with the army, achieving the strongest command effect.

A spirit master of her level would be equipped with an exclusive mecha, and could command a multi-billion level army to carry out detailed battles at the same time, so detailed that every link could be arranged reasonably, they were talents that many large factions were very demanding of.

However, it would be very troublesome if such talents were to be approached by high-level battle prowess. If they were too focused and commanded, their own battle prowess would be very weak when faced with experts of the same level!

The other party had clearly realized this. What Billy needed to do now was to widen the distance!

How could willa let the other party succeed?

Now that she was surrounded by the enemy, even someone as strong as her would not be able to fight against a mecha army with a complete set of systems. The only way to break through the enemy was to behead the opponent’s high-level commander!

The other party was so careless that she did not immediately widen the distance. Of course, she would not let go of this opportunity!

Seeing that the other party had activated space jump, Willa sneered and instantly turned into a streak of blood light as she stepped forward and directly crushed the wormhole that the other party had opened. This terrifying speed made everyone present suck in a breath of cold air.

Billy was even more scared out of his wits. Without hesitation, he poured all of his energy into the Mech's defense. The highly efficient performance of the mech instantly absorbed Billy's energy and activated an ice-blue Shield!

Bang!

But in the next second, a clear sound like glass shattering rang out. The ice-blue Shield was as weak as paper under Villafa's blood-red claws, instantly turning into fragments!

"What monster??"

Billy's heart was filled with shock. As both of them were star ranks, even though he was not good at fighting, the strength of his energy should not be too far off. He was using the latest advanced mecha from the faction, with the most advanced equipment., the energy usage of the various parts of the mecha was definitely at the top level of the federation.

The shield that he had used almost all of his energy to transform was actually unable to withstand even one move? She could not even stall for time?

This crushing stance made Billy feel a sense of despair. For the first time, he was suddenly envious of existences like Vaughn and the others, who had superior individual combat strength!

He... was it over just like that?

In that moment of despair, the claw that represented death suddenly stopped before it crushed his head. The terrifying ashen flames energy also froze in front of him in that instant, as if time had stopped.

However, she could clearly see that this was not a time-stop, but because of a person... ..

At some point in time, an extremely short figure came in front of her. His hand that was as old as a withered tree lightly grabbed the other party's terrifying claw. His extremely weak aura could be seen with the naked eye., however, it made the terrifying fallen angel blood demon unable to enter even a single inch!

"Oh Hehehe..." an old and gentle laughter rang out in front of everyone's horrified gazes. "The younger generation is really formidable... are all the little fellows nowadays that powerful?"

Vera looked at this old man who seemed as though he would choke to death if he were to take a single breath. However, his eyes were filled with a solemn expression. "Who are you?"

Chapter 1110: Run Away!

"I said, if you don't show up, I'm going to bring a dog..." Billy let out a long sigh and said weakly, "Lord Goron! !"

"Oh Hehehe..." Goron laughed like an old man as usual. "There's nothing I can do. Who asked the young people nowadays to be so scary? This old man needs to warm up..."

“Is that so?” Billy looked at Gerald’s skinny figure. He was as surprised as when he was attacked. She knew Gerald was very strong, but she didn’t expect him to be so strong. As a blue spirit.., he could actually use his body to receive such a terrifying attack!

At this moment, Vera was just as surprised as Billy. She couldn’t understand how a blue spirit with spiritual attributes could use her body to receive her energy?

“Who are you?”

Vera looked at the old man cautiously. This old man was a bit strange...

“Who am I?” Gerald’s smile suddenly became strange. He turned around stiffly and looked at the old man. “You’re right. I’m afraid few young people nowadays know who I am...”

As he said this, the surrounding temperature suddenly dropped, and a terrible chill invaded people’s hearts.

“Thinking back to that era... “...”. The old man was also a genius that everyone had been paying attention to... ... He was on the same level as those guys who were currently shining with Starlight “...”. Oh, no, there were even many little old men that I hadn’t even taken a fancy to back then... “...”. In the end? Now, all of them had either become great lords or supreme existences that had surpassed the fate level, enjoying the support of hundreds of millions of descendants. Only I... ... Had become an old man that no one remembered... ... ..”

This tone, which carried an incomparable unwillingness and resentment, made people feel uncomfortable listening to it. The key point was that the chill became stronger and stronger, causing many of the surrounding advanced mecha operators to tremble involuntarily.

However, after trembling for a moment, they suddenly realized that this chill did not seem to come from the mind, but perhaps from the physical aspect. This was because when they came back to their senses, they realized that their mecha cabin had been filled with frost! It was already covered with frost!

Villafa also realized this. At this moment, she also saw that the arm that she had been grabbed by had actually started to form white frost.

This scene made her unable to hold it in any longer, and she revealed a surprised expression!

She, who possessed the ashen flames of hell, had actually been frozen by frost? What kind of joke was this?

This strange scene made Villafa subconsciously want to pull back her arm. However, in an instant, she realized that she was actually unable to do this. Even after exerting her strength, her arm was still firmly grabbed by the other party. She did not move at all!

What was going on?

The incomprehensible situation made Vera panic a little. The wings on her back flapped, and the pale blue flames increased by three times. The terrifying energy caused the surrounding mecha operators to control their mecha and retreat.

But the old man in front of her who was holding her arm still did not move at all. What was even stranger was that the frost on her hand did not change at all because she had activated the ashen flames. It even began to spread throughout her entire body!

In an instant, Vila's eyes flashed with a hint of viciousness. A blood-red light lit up, and a monstrous flame suddenly erupted. The terrifying energy once again shattered the surrounding space, and a huge black hole appeared!

The two figures quickly pulled apart, and Billy fell from the sky like a plane crash, crashing heavily onto the ground. He immediately let out a muffled groan, and with a cold expression, he said, "The Lord is right, this is an old pervert!"

The terrifying frost just now was not just affecting her subordinates. She had also been affected. A large amount of equipment in the cabin had been frozen, and she could not even slow down and land. She had been forcefully jolted to death by that energy!

This old thing had not cared about her allies at all just now. She had even seen quite a number of advanced mecha operators who had not been able to leave the energy circle because they had been frozen, and had been directly blown to smithereens!

Those were all advanced mecha operators above level 13. The forces had spent many years nurturing them, alright? They weren't cannon fodder!

It was basically difficult to recruit ready-made mecha operators on the market. Most mecha operators were nurtured from the beginning by the forces, especially those who needed to be familiar with their own forces' exclusive mecha. It was extremely difficult to nurture them, every one of them needed to spend a huge amount of resources. The resources needed to nurture a level 13 mecha operator, excluding the expensive mecha equipment, were three times that of an arcane mage of the same level!

The explosion just now had lost at least a hundred of such outstanding mecha operators, especially a few of them who had been personally nurtured by him. They had a lot of growth value... ..

She would definitely seek an explanation from him in the future!

However, as the smoke dispersed and Billy saw the battle situation clearly, his thoughts of wanting an explanation were instantly dispelled.

She saw that the domineering silver-haired blood demon earlier was now weakly clutching his wound, blood flowing like a pillar. Meanwhile, Gerald, who was a hundred feet away, was floating in the air with an indifferent expression on his face. In his hand was Vera's severed arm!

In that instant, he had chopped off one of his opponent's arms?

Billy immediately sucked in a breath of cold air. Because he had personally experienced the power of that silver-haired blood demon, she was very clear on how powerful and terrifying his opponent was. In terms of direct combat strength.., probably in the entire Vogu faction, only the commander-in-chief, the operator of the divine martial mecha, could firmly suppress his opponent. The other commanders would probably be slightly inferior.

And this sort of fellow actually lost an arm in a single exchange?

Was this old pervert so fierce?

At this moment, Vera Fa, who was covering the wound on his broken arm, had a pale face. He glanced at the mecha battle formation that had already surrounded him and not only thought to himself, "Today... .. I'm afraid I've Fallen...". ...

-----

The battle above was in full swing, but an extremely strange scene had appeared below.

A group of low-level lifeforms were shivering on the ground, and two hooligans were sneakily moving through them.

"Hey, where did you hide Sofia?" Lulu asked in a low voice.

"In the matrix, it's not convenient to open it now. It'll attract attention. Let's sneak out first and talk about it later, okay?"

"Tch..." Lulu said disdainfully, "I thought you had some trump card, so you're just a fish in troubled waters?"

"What do you care about this lord?" Xi Ye rolled his eyes at the other party. Such a low-level provocation, would the great Xi Ye Lord fall for it? It made him feel as if he had been humiliated less in the past. Compared to how his family members rolled their eyes at him, this bit of disdain was nothing?

Seeing the other party's pale face, Lulu immediately puffed up her face and looked at the battle situation in the sky. Her eyes were dark as she said, "I didn't expect that old fellow to be here too."

"You Know Him?"

"Sort of... HMM?" Just as Lulu was hesitating on how to answer, she suddenly froze and looked at the ground.

She saw two meat balls on the ground, shivering.

"Eh?" Lulu stopped walking, "These two meat balls..."

"Are you crazy?" Xi Ye pulled the other side and continued to walk out, "At this time, why do you care about the meat balls? Let's Go! Let's Go!"

Little cabbage: "Blood..."

Dog Egg: "Blood..."
