

A Bunch 1281

Chapter 1281: Old Grudges!

“As expected...”

A hint of understanding appeared in the dragon’s eyes...

After it decided to take the risk of contracting a higher-level infection, it had already figured out the threat inside. The biggest threat in a direct confrontation was the sea of life-level Titan in front of it.

Therefore, in the beginning, it had the intention of letting the other party go on its own accord...

It was not afraid that the other party would go back and request for reinforcements. As long as it could completely infect the dreamscape, it would not be a big problem for it to move to another location.

However, the other party had no intention of leaving at all!

It even took the initiative to choose to restrict its own side’s greatest combat strength. In the eyes of many people, this seemed to be a little too much of a sacrifice... ..

A Titan that had not fully recovered its strength. Previously, it had a huge battle with Andrew. Its consumption was abnormal, but it was willing to resist the greatest threat at the first moment... ..

This was obviously inconceivable in a temporary alliance army. Although the Titan was real, it was definitely not a saint. It was very illogical for it to take the initiative to suffer losses.

A normal person should be able to preserve their strength like Vogu.

The other party’s abnormal behavior was either because there was something wrong with their brain, or... .. There was a reason for everything... ..

And coincidentally, there was indeed a cause and effect between him and this titan. However, logically speaking, she should not be able to recognize him... ..

Thinking of this, the Dragon decided to test it out.

“I have indeed offended many people over the long years, but I don’t remember a little girl like you...”

The term ‘little girl’ was obviously a little strange when used on Ionelle. After all, Ionelle was the former commander of the Titan Army of the third suzerain. She was a well-known figure in the federation, in terms of age, many of the older generation of scholars had to address her as their ancestor.

However, her tone was very natural. It was obvious that in front of her, Ionelle could only be considered as a junior... ..

“Do you not remember, or are you just playing dumb?” Ionelle’s expression did not change in the face of her deliberately confused tone. Her tone was cold as she said, “Rhea No. 1?”

The Dragon:”...”

As soon as these words were said, the dragon's relaxed expression slowly disappeared, and its eyes began to turn cold... ..

"Rhea No. 1..." a trace of reminiscence flashed through the dragon's cold eyes. This name... .. had not been called for a long time... ..

Rhea implied the mother of the Earth. It was one of the earliest mother gods in Titan mythology. It was rumored that it had once nurtured the bloodline of the twelve royal families of Titan. And that fellow had named it this way back then in the hope that its power... Could be like the mother of the Earth, giving birth to the most ancient glory of the Titan race...

"How did you recognize me?"

Once these words were said, it was clear that she had admitted something. It was also clear that this Yimo had an old grudge with this Titan Corps commander!

Ionelle did not reply. As the other party answered honestly, a trace of reminiscence flashed across her eyes. That was the most beautiful memory that belonged to many Titans.

The former third Lord: gognath, also known as Black Baron, the direct descendant of the king of the heavens and raging waves. He was the first high-level Titan to join the sky gods with the Titan bloodline. He was also the first great lord of the Titan lineage.

During the countless eras, he persuaded one stubborn Titan family after another, allowing countless young and Outstanding Titan juniors to join his subordinates. He also did not disappoint many of his compatriots, and his influence grew larger and larger, his influence grew stronger and stronger. Countless great suzerains who were one step ahead of him were slowly surpassed by him. Very soon, his influence grew stronger and stronger, to the extent that he could stand shoulder to shoulder with the first few peak sky gods.

In the end, he obtained the recognition of the Federation during the first void invasion battle. The name of the 13 Titan Legions spread throughout the world. It was also because of the powerful military strength displayed during that battle that he was publicly recognized as one of the ten strongest suzerains, after the federation's assessment, he was ranked third!

As the Titan army became well-known, more and more Titan families came because of their fame. More and more outstanding Titan descendants went to serve. As long as they had outstanding bloodlines, they would be highly valued and nurtured by the third Lord's forces. At that time, the goal of all Titan descendants when they debuted was to join the third Lord's forces and become a member of the 13th Titan Army. and at that time... .. All the Titans believed that under the leadership of gognath, the Titans would eventually regain the glory of the ancient times!

But all of this was destroyed in an instant!

As memories flashed past, Ionelle's gaze towards the giant dragon became colder and colder!

Even now, there were many older Titans who did not dare to believe that such a huge Titan dynasty would fall so quickly!

And as one of the thirteen legions at that time, the new commander of the radiance of dawn, Ionar had personally witnessed this dynasty from its peak to its demise.

Many people in the outside world believed that the biggest reason for Gognath's fall was the sudden rise of the war god Cang Yue!

Indeed, that half-human half-void monster that crawled out from the Void was indeed the key figure that destroyed the third force, but Ionar knew that the key figure was not her!

If not for that incident, if not for this fellow's bewitchment, if the Lord had not been bewitched to come into contact with that monster, everything that had happened after that would not have happened!

The third Lord was a recognized legitimate faction of the Federation. It was one of the orders of the universe. With Cang Yue alone, no matter how strong she was, it would be impossible for her to take them down. The other nine great lords would not remain unmoved.

No... .. It could not be said that they were indifferent. It should be said that they had not had the time to act yet. At that time, the matter had already been exposed. Even if Cang Yue did not rise, the suzerain would still face the wrath of the nine suzerains. It would still be difficult for him to escape death!

And all of this was caused by this guy in front of her! !

As the memories replayed, the Fury in Ionar's eyes surged to the sky. The powerful energy was like a volcano that was about to erupt, as if it was going to shatter the entire space!

Facing this female Titan who wanted nothing more than to be torn into pieces, the giant dragon's eyes had a hint of a smile... ..

"You hate me very much?"

"Shouldn't I hate you?" Eonar held back the anger that was about to erupt. Her tone was icy cold...

The Blue Moon Rose. The war god Corps and the Titan Corps fought fiercely. It was rumored that at that time, billions of stars in the east star field were dyed red. The 13 Titan Corps were almost completely wiped out. Since the ancient Titan era., the most glorious golden era had been completely destroyed. She still remembered those star fields that had been dyed red, those star fields that had been dyed red by the blood of her own people!

She had never expected that she would meet the biggest culprit of the fall of their forces when she was out on a mission!

The Giant Dragon looked at the Titan that was simmering with anger. After both sides had torn off their identities, it appeared unusually calm. Looking at this stubborn and stubborn little girl, the corner of its mouth actually curled up into a smile.

"You really look alike..."

"What did you say?" Ionelle stared at the other party coldly. If she did not know that this was just a possession, she would have torn the other party apart at all costs, even if it was a dragon king in front of her!

"I mean..."the giant dragon smiled at her. "You... Shouldn't hate me!"

Chapter 1282: The Past -PartpOne one)

"You Shouldn't hate me..."

Facing this female Titan who was filled with resentment, the tone of the Yimo that possessed the dragon was unusually calm... ..

"Shouldn't hate you?"lonelle stared at the other party coldly. The killing intent in her eyes was even more obvious, but she did not lose her rationality. At this moment, both she and lonelle did not want to directly erupt into a conflict, because both sides still missed her.

The YIMO had lost half of its emerald dream, but it still had a chance to turn the tables. A normal core was enough for it to do many things. lonelle did not want to recklessly go all out.

First of all, she could not directly kill the other party. She was well aware of her remaining strength. She could intimidate them, but if they really fought, she would most likely lose.

If it was in the past, when she was aimless and confused, she might have been reckless this time. But this time was different...

This time... The Titan race had hope...

Even in the most glorious era of the Liege, they had not nurtured the bloodline of an emperor. But this time, it had appeared. This was the opportunity given by the Titan Mother. She had to safely bring the child away from here!

With this thought in mind, she was willing to accept the fact that the other party was willing to stand in a stalemate with her. However, this sentence almost made her unable to hold herself back... ..

The YIMO raised its head and looked at the female Titan whose veins were bulging. She looked as if she had reached the limit of her patience. It shook its head slightly. "Your temper is really similar to that of the previous generation's radiance of dawn. Should I say that you are indeed worthy of being a mother and daughter?"

The veins on lonelle's forehead throbbed violently. Finally, she took a long breath and suppressed her anger, she sneered, "You might not have a good ending either. Look at you now, how weak are you? "If you hadn't tried to bewitch the horde leader to do such a thing in the past, you would still be absorbing the nutrients from the third largest horde leader in the universe. You should also be the strongest Yimo in the universe...". "..."

"You Think It's My Fault?"The YIMO asked.

"Could it be ours?"lonelle retorted with a cold smile...

"Do you know?"The YIMO sighed, his tone suddenly becoming emotional. "When I first met gognath, he was still a fragile little guy..."

lonelle:" ..."

She ignored Lonelle's strange expression, the dragon continued, "Probably... "...". He was just like the little guy you met. He returned to his ancestor's bloodline, but the family thought that his bloodline was impure. He was also attacked by his stepmother and was directly exiled to a waste planet. When I met him, he was thinking of selling himself to a goblin boss to become a Gladiator...". "..."

Lonelle was stunned for a moment. This was the first time she had heard about the Lord's past. The Lord they knew was already a life sea level Titan before he joined the deity. He was very famous in the Universe Federation, he had even defeated the strongest Golden Titan at that time. Many people believed that he had the bloodline of the king of the heavens and the raging waves. He was the Titan who had the highest possibility of awakening the emperor's bloodline!

At that time, he was already looking forward to it. However, he did not expect that such a person would be so down and out at the very beginning?

He did not know whether it was true or not, but this time, Lonelle chose to listen in quietly... ..

Seeing that the other party was listening quietly, the Yimo continued to speak excitedly. Its eyes were filled with reminiscence as it recalled the past in its mind.

"At that time, the Wild Titans without family support mostly chose the path of the Colosseum, Um... . It seems to be the case in the federation today, but more so then, leading many to believe that Titans were born gladiators, and that the once noble bloodline of the universe had become a recognized circus... ."

"At that time, he was very conflicted. On one hand, he wanted to protect the dignity of the Titans. On the other hand, he had to sell his body for a living. I still remember when I happened to pass by and saw him signing a contract to sell his body while boasting shamelessly that he wanted to change the status quo of the Titans. He made a lot of people laugh at him, and most of the people who laughed at him came from his fellow Titans... "...". "..."

Lonelle:" ..."

She did not doubt the other party's description. She had heard many elders mention that in that period of history, before the rise of the Lord, the Titan clan had fallen into the lowest point in history. More than 80% of the Titans had sold themselves to the goblins as gladiators, it was an extremely shameful past.

But there was nothing she could do. The Titan clan had extremely high requirements for resources, and their bloodline acceptance rate was low. Moreover, they were scattered and without a central leader, the huge clan actually did not have any influential forces at that time, only a few families with ancient inheritances kept them to themselves.

In the wilderness, the Titan race had no resources and no goals. In the end, they could only rely on selling their foolish strength. Other than serving as soldiers for other forces, they were also the most profitable as gladiators. However, the mortality rate of these two professions was extremely high... In addition, some of the large clans were deliberately suppressing them in the dark, causing the status of the Titan race to become lower and lower for a long period of time...

"I entered the material universe from the time of the elf civilization...". The YIMO smiled. "You have some foresight. You quickly noticed that the blood of the ancient Titan was flowing through that guy's body ... "At that time, I couldn't find a better host, so I thought I would just make do with it. I didn't expect that it would take such a long time to use it... "...". "..."

Upon hearing that, Ionar sneered, "Is it too easy to use?"

"It is indeed very easy to use!" The YIMO nodded very seriously, "He isn't my first host. When I was an elf, I even parasitized an extremely excellent moon elf, but in terms of potential and aptitude, I was far inferior to him. Every time at a critical moment, in terms of decision-making, he had a very clear judgment and execution ability, which allowed me to obtain a perfect result for every extremely risky opportunity. I remember that for a long time, when I was looking for luck, I didn't consider his safety, because in my subconscious mind, he has always been a temporary product. I don't need to worry too much, because I can always find a more outstanding person to replace him."

"You've always treated the Liege as a temporary item? Then why haven't you replaced him?" Ionelle asked curiously.

The YIMO laughed. "Because every time I thought there was a better substitute to replace him, he would quickly let me realize that he was better. The new substitute always seemed to be a little inferior to him, which resulted in him getting a perfect result every time he took an adventure...". "..."

Ionelle: "..."

The YIMO: "Time after time, time after time, he did it perfectly. In the weakest position, in the hands of someone far stronger than him, he forcefully snatched what was rightfully his. I only provided him with a little hope, but he always did his best. In a short period of time, he surpassed my initial expectations... "... "..."

After pausing for a moment, she continued, "Especially the decision to become an Empyrean God in the end, to give up the eternal life of the life sea, and to start all over again with courage and determination. It made me instantly determine that he would be my most perfect host!"

Ionelle was stunned. As she spoke, her tone became a little agitated. Although she understood that such creatures were always very cunning, she did not know why, but she felt that his emotions seemed to be real...

That sentence about him being my most perfect host seemed to be true...

"What a pity..." in the next second, the dragon's originally agitated tone instantly calmed down and became incomparably cold. "If... He could always be so perfect, if... He didn't make a fool of himself at the last moment!"

Chapter 1283: The Past -Partpart 2)

Many people said that the Yimo had no emotions...

The Emotions in their tone were all simulated other creatures, and they carefully calculated when and what tone they should use. If you thought that your words touched their emotions, then you were too self-righteous. Many times, their emotions were cooperating with you...

This recording came from the report of a xenobiologist who was the first to study the YIMO. At that time, Ionelle remembered that it was the top university official of the faction who had personally quoted this passage to make the Lord wary of that thing.

She remembered that the lord was very indifferent to the contents of the report at that time, and she still remembered his answer to this day.

“I believe that some of his judgments are correct. For example, the emotions of joy, sadness, and anger are imitating us. After all, they come from a different world. The spiritual emotions of their world are different from ours many times, but to say that all of their emotions are cooperating with you is obviously one-sided. It should be said that many times, their tone and emotions seem to be cooperating with you, but it can't be said that they don't have emotions themselves. Please note that they are creatures, not machines. They have their own desires. If they have desires, they will have emotions. However, it's up to you to determine when it's true and when it's false!”

Ionelle raised her head to look at the dragon whose voice had suddenly turned cold. A strange look appeared in her eyes. Was that fellow's emotions just now real or fake?

When she was recalling the Liege, the emotions in her eyes were very rich. There was nostalgia, surprise, and pride. Especially when she said that the Liege was the most perfect host for her, those emotions seemed very real.

But in the next second, everything suddenly disappeared. Its cold eyes were even colder than cold-blooded creatures. It was like a machine without any warmth, as if all the emotions just now were rehearsed... ..

If this was the simulation that the scholar said, this simulation was too similar... ..

So... .. Was the Liege's words right or wrong at the beginning?

Thinking of this, Ionelle sneered and asked, “At the last moment? Is it referring to the time when you dug a hole? The time when you set up the Liege to fall into that Abyss step by step?”

The giant dragon looked over with an ice-cold gaze, its tone was calm as it said, “Most of the cooperation between me and it was like this. I always did this every time, but it always made the right decision in the past. The last time it was wrong, so it failed!”

“Does that mean that everything is the Lord's Fault?” Ionelle sneered.

“No...” the dragon said faintly, “It's my fault. I overestimated him. Because of his previous performance, I made a mistake in estimating his true level. The last opportunity is obviously not within his ability range!”

“Bullsh * T!” Ionelle said angrily, “Is that a problem of ability range?”

The dragon tilted its head and said, “What is that problem?”

“It's a bottom line problem!” Ionelle said coldly. “You violated the principles. You asked the Lord to touch the taboo of everyone in the universe. The Void is everyone's natural enemy in both the spiritual and

physical universes. This is common knowledge. You asked the Lord to touch that, but you said it was his problem?”

“Is that so?” This time, the dragon didn’t tilt its head. Instead, it stood up and looked at Lonelle seriously. “Violated the rules? The Void is not tolerated by the universe. Do you think so?”

Lonelle: “Isn’t it?”

“Then why...” the dragon’s lips curled into a cold smile that was exactly the same as Lonelle’s. “Cang Yue is still alive?”

Lonelle: “...”

The dragon: “Your Lord has infected the void, so the federation can’t tolerate him? Cang Yue has infected the void as well. She’s not the only one infected. The four legions under her have void bloodlines, so why can they tolerate her?”

Lonelle was stunned. Facing this question that many people knew, she didn’t know how to refute for a moment. In fact, she had been thinking about it since a long time ago. Cang Yue was practically a void in human skin, but why was she living so well? Why was she so righteously replacing the suzerain?

“Let me tell you why!” The dragon’s eyes said faintly. “Because she succeeded. She had enough power to intimidate others. The Federation couldn’t touch her, so they couldn’t do anything, so they could only choose to tolerate it. Your suzerain failed, so the federation could touch him. That’s why he’s dead and his influence is gone. It’s that simple!”

“Nonsense!” Lonelle said with a cold face.

“Nonsense?” The corner of the Giant Dragon’s mouth curled up into a smile, appearing extremely mocking, he said slowly, “The route that I designed for your clan leader is exactly the same as Cang Yue’s current route. If he had not been stupid in the beginning, he would be the first clan leader now. He might even have the chance to replace the Heavenly Gods Academy and turn Titan into the strongest race in the universe, realizing his dream!”

Lonelle: “And then? become enemies with the entire universe?”

“Cang Yue became enemies with the entire universe?” The dragon asked back.

“She was not willing!” Lonelle said coldly. “She was forced into it. It was not her own will to seize the power of that thing. She cut off the passage to the void at the first moment and personally sealed the invading void master at that time!”

“Your Lord can do it too!” The Dragon said faintly. “He can announce to the outside world that it was an accident, or he can announce to the outside world that he came to a sudden realization. As long as he can also seal the Void Master, who would dare to say anything? Isn’t it just like Cang Yue Now? Shouldn’t she take the sequence and split the resources? Would the federation have less? In the end, it was still because he didn’t do it. He failed, failed... “... Everything was wrong! “!”

“You really know how to talk...” Lonelle was so angry that her whole body was trembling. “It was as if you were planning everything for him, and he let you down!”

“That’s the truth...”the dragon said seriously, “I was indeed planning for him at that time. In order to realize his dream, his beautiful dream of making Titan the number one race in the Universe!”

“That’s not what the Lord wants! The Lord wants our race to regain the glory of our ancestors, to have a bloodline as powerful as our ancestors, not to become a void monster!”

“Foolish!”The dragon retorted with a cold smile. “Everyone knows that the Titan bloodline is regressing, this is the will of the universe. The failure of the Titan civilization had already made the consciousness of this universe understand that these creatures are not suitable for the universe, which is why your bloodline regressed. Under such a large rule, it is impossible to return to your ancestors. Even if your liege did not join the deity, he would not have been able to restore your ancestors’bloodline. He chose the deity because there is no more path ahead. Only the void, the void can evolve bloodlines. Moreover, it is a creature outside the physical universe and is not affected by the rules. This is the only way, the only way for the Titan race to recover the Imperial Bloodline!”

At this point, the dragon suddenly became irritable. “But that stupid fellow, his brain is one-track, and he insisted on the traditional way. If the traditional way could work, would you guys have been cowards for so long? Why Can’t he turn the corner? He just changed the method, just changed the method, but he is calculative, calculative! He is so stupid beyond redemption. Don’t I know that the Void is very dangerous? “Don’t I know that this method is not what he wants? “But if there was another way, would I let him go this way?”

“There is...”

Ionelle suddenly interrupted him coldly...

Chapter 1284: Anomaly!

“There is...”

The faint voice was not loud. Instead, it seemed to be muttering to itself. However, it somehow overshadowed the dragon’s somewhat irritable voice... ..

In an instant, the entire space fell silent. The dragon instantly calmed down from its earlier agitated look. It lowered its body and stared straight at the other party.

After a long while, it asked faintly, “You mean that little guy?”

Ionelle raised her head and looked at the other party coldly. If it was any other threat, she would definitely not have drawn the little guy’s attention too early. However, this guy in front of her was different. She knew that even if she did not mention anything.., the other party would definitely have noticed it long ago.

Therefore, she did not hide it. Instead, she resolutely replied, “The facts have proven that the Lord is right. We will have the imperial bloodline. It is only because of you that he was unable to see this day!”

The dragon was silent. After a while, he said, “That little guy is not right...”

“Not Right?” Ionelle sneered. “What? If I break your words, it means that he is not right?”

“My words can not be broken...”. The dragon shook his head. “The Titan civilization has failed. The life span of an Imperial Titan is too long, and it consumes a lot of energy. It does not conform to the laws of the universe. Your universe does not need such a creature. It needs creatures that consume less energy, grow faster, and die faster. Look at the myriad races in the universe now. Are they all like this template? This is the will of your universe, which is why your Titan bloodline will degenerate. It’s impossible for a species that goes against the will to appear, at least not within your universe ... That’s why I used the void infection and took a roundabout route... ..

“But it appeared!” Ionelle said coldly, “The facts have proven that your messy theories don’t make sense, it’s just your conjecture...”

“No... .. that’s not right ... “...”the dragon shook his head. “This isn’t my reasoning. It’s the original law of the universe. It’s a fact. From the start of the elven civilization, it was impossible for an Emperor’s bloodline to appear. Hence, when the void invaded, the universe was threatened. It was the gods that were born, not another powerful race

“No Royalty?” Ionelle laughed, “Are you joking? First, Titan couldn’t give birth to royalty, and now there’s no royalty in the universe? Then what are the royalty that appear now?”

“They’re defective!” The dragon replied seriously, “None of them are pure existences, they’re all defective!”

Ionelle: “Defective?”

The dragon: “Look at the history yourself, which of those ancient royal bloodlines didn’t have long lifespans? Especially your Titan race, unless you encounter a calamity, otherwise you wouldn’t have died of old age. In truth, I even think that the fall of those Titan royalty back then was the work of the universe system, purposely creating a calamity, causing them to die in an accident!”

Ionar: “...”

The dragon: “But the later the Titan royalty gets stronger, the harder it is to kill them, hence the decline of their bloodline. The current royal family in the universe is completely different from the real royal family in the past. Take the space elves as an example, every time their emperor inherits a gene, his level rises rapidly, most of them can grow to life sea level within a single era, but most of them die of old age in the second era, a royal family with a lifespan of two eras? “Do you think it’s Normal?”

Ionelle was silent. Many scholars in the faction had done research on this point, and they all agreed that the so-called royal bloodline of those races was flawed... ..

But even if it was a flawed royal, Titan did not have it... ..

“But that little guy is normal!” The dragon suddenly said.

Ionelle: “! !”

“You... What did you say?” Ionelle was a little stunned.

“Oh? It seems that you still don’t know?” The dragon looked at her with a funny expression. “How boring. So your plan is to be satisfied just by raising a defective product? Is this the ambition of your Titan Race?”

Facing the ridicule, Lonelle did not care at all. Instead, she continued to ask, “You just said... that he is normal?”

“Yes...”. The dragon said faintly, “Normal, extremely pure imperial bloodline. It is exactly the same as those elven royalty that I met in the elven civilization. Moreover, he is not the only one. Those little fellows who followed behind are also similar. This was originally impossible”

Lonelle was stunned on the spot when she heard this. Her body was trembling slightly... ..

She originally thought that the Little Titan was a test subject of a certain force. Although she did not know who was behind the Little Lord to be able to do such an experiment, this was probably the most reasonable guess.

Back then, the third force had also been gathering high-level biologists everywhere in an attempt to imitate the space elves and create a royal bloodline. However, the Titan bloodline had been greatly hindered in the experiment., they had spent a lot of resources, but there was no progress at all.

But at first, it was just as the YIMO had said. They only wanted a royal gene like the space elves, one that could place the Titan race in the royal family’s name.

However, they did not expect that this thing would appear after the Lord was gone, and it was far better than they had expected!

It had no flaws... pure, ancient royal bloodline?

Lonelle muttered to herself, “Is it possible...”

“Impossible!”The dragon quickly interrupted Lonelle, who was a little confused, “Don’t you find it strange? “The thing that you spent so much time looking for suddenly appeared? “A pile of royal bloodline that all races dream of appearing for free, don’t you feel that something is wrong?”

Lonelle:” ...”

The dragon looked in the direction that another yimo had just left and said in a faint tone, “They... are outliers! ! !”

Alice, who was walking outside, suddenly shivered and goosebumps appeared on her skin. She couldn’t help looking behind her. “This senior is really... how can he speak ill of others behind their backs?”

“I thought you left Pu Yunchuan behind and they rushed here to solve it...”Alice’s original voice came out of her mouth

“Fix it?”The mechanical voice came out of Alice’s mouth again. “Are you kidding? Do you know who that is?”

“I’m a native, how should I know?”Alice said naturally.

“That’s true...” . “...”. The AI said, “Although you’re smarter than our Silly Lord, you don’t have his knowledge. Let me tell you, this guy is incredible. In our race, it’s the one with the highest achievements. It’s not too much to say that it’s the number one Yimo in the Galaxy!”

"It's number one? Then What's Your Number?" Alice asked curiously.

"Me?" AI controlled Alice's face and smiled stiffly. "I. . . Am an anomaly!"

Chapter 1285: this time, I'll listen to You!

"AH... the expected collision didn't happen..."

Andrew looked at the blue and black ends of the sky that were actually retreating from each other, and there was a hint of surprise in his voice, "This new guy is really unpredictable..."

"Uh... Really?" Andrew frowned, "Maybe it's just testing that it doesn't think it can take it down..."

"Then it has to have the capital..." Andrew smiled. "That's an injured dragon. Can you test it if you want to? Can you leave if you test it?"

Diana was silent. She understood what the other party meant. This dragon was at least quite big. To be able to retreat after testing it proved that it had sufficient strength.

She suddenly felt more and more confused. There were too many things that had happened this time. Could the emerald dream really exist?

"What should we do now?" Diana looked at him. "Where should we go?"

"Two places..." in the black fog, Andrew stretched out a pair of pale fingers. "Which do you think we should go?"

"Two places?" Diana was stunned. "What do you mean?"

"Sigh..." Andrew sighed slightly. "What did Ysera teach us?"

Diana: "..."

Andrew: "The original plan was that we would split up into five divisions and destroy the five main cores. If we achieve our goal, we would take down all five of them. The emerald dream would temporarily stagnate due to the destruction of the main core, and the infected Yimo would definitely have side effects. In other words, whether it was the emerald dream itself or the Yimo, they would not be considered for the time being. We would see each other through the truth and decide the winner internally. The winner would be able to enjoy the final fruits of victory..." "...". "..."

"Is the situation different now?" Diana frowned and said, "Although we can't completely eliminate it, the Yimo must be greatly weakened. At this time, its threat is obviously not as great as before. At that time, wouldn't we still have to fight internally?"

"It's different..." Andrew shook his head, "This Yimo is more important than you think. Even if it only controls half of the core, it's still not a small matter. Our Loose Alliance might not be a match for it..."

Diana was stunned when she heard that. So Powerful?

But it made sense when she thought about it carefully. For an Yimo to be able to infect the emerald dream in such a short period of time and infect it without Ysera's awareness, this Yimo must be extraordinary... ..

"Then there's the difference in the point of deciding the victory..." Andrew smiled and said, "In the previous situation, we just had to see the truth. But now, it's different. There are two unsolved cores that will become the point of contention."

Diana asked, "You mean the two infected cores?"

"Yes..." Andrew nodded. "The damaged cores need to be repaired and can not be completed in a short period of time. Even in the future, to restart the Emerald Dream, we will need to temporarily cultivate other star dots to replace the damaged cores to restart. This is a big project. Even for me, with a professional team, it will take millions of years. But the remaining two are different. Although these two cores are infected, they can temporarily control the emerald dream. As long as we control them, we can take the initiative in the future "... "..."

As he said that, his pale fingers drew a star map in mid-air. The huge emerald dream was actually completed in an instant by his hand. Looking at the entire star map, Diana pursed her lips.

"The emerald dream was created by imitating the federation star map. It is mainly based on the five cores at the center, South, east, west, and north. The cores that we destroyed represent the central star field, South Star Field, and North Star Field respectively. The remaining two star fields happen to be in a straight line opposite each other, and they are not close to each other. Therefore, we can only go to one place, and we only have time to try to snatch one of them..." "..."

"Uh... then which one is more confident?" Diana was a little confused.

"I'm not sure..." Andrew shook his head. "The one in the western star field is my disciple, Vogu. I don't know if he didn't take down the one who wasn't allowed or if he deliberately didn't take down the one who wanted to create this situation..."

"You don't know what kind of strength your disciple has?" Diana immediately found a point to complain. "It seems that you're a very ordinary teacher..."

"I have been dead for a long time..." Andrew said faintly, "And my disciple is very talented. There are many people who are better than him in this world. After not seeing him for so long, I'm not sure what's wrong with his strength?"

"You really have your own fallacies..." Diana not only ridiculed, "No matter what, he is still your disciple, so his chances are higher, right?"

Andrew: "It should be higher, but he's not the only one..."

Diana: "Who else?"

"Those two fairies..." Andrew pointed to the sky. "One of them... is the guy who slashed out that sword just now..."

Hearing that, Diana looked over as well. Looking at the sky that was still cut open and had yet to recover, the corner of her mouth twitched slightly. "Are they together?"

"I think so..."Andrew said faintly, "If my apprentice hadn't provided the coordinates, how could it keep up with me every time I opened the entrance to the world of Death?"

"Is that so?"Diana looked at the sky which had been cut into two again. "Well... What about the other one?"

"The other one is also quite troublesome..." . "...". Andrew said faintly, "The two high-level mercenaries are both agility-type, which is very effective against undead like me. There is also a master who is proficient in Space Arcana who can do something at any time, most importantly, the Little Lord..." . . ."

"You mean the little guy with the helmet?"Said Diana with a frown.

"Well..."Andrew nodded. "A very troublesome guy. He has a trump card. Although I don't know what it is, it's enough to kill me..."he paused for a moment and then said in a more serious tone, "The kind that won't let me come back!"

As soon as these words came out, Diana suddenly startled, the facial expression becomes some horror...
...

The kind that couldn't be returned?

She had never been out of the Emerald Dream Realm, nor had she seen any undead before. However, she knew the meaning of this sentence. Normally, undead wouldn't die, so she could only forcefully dispel them and force them to return to the death realm.

However, if she could cause the opponent's soul to suffer a heavy blow, so heavy that she wouldn't be able to regain her consciousness even if she returned to the death realm, then even if she was truly dead, the undead would be directly absorbed by the death realm, becoming a part of the death realm in advance!

If he died... Then he would naturally not be able to return...

This was usually very difficult to do. At the very least, it had to be a level higher than the power of the undead!

But he was Andrew, one of the ten great liches. What was a level higher than him? Ten great lords? Or those top life sea level powerhouses behind the Royal Family?

"You're not joking, right?"Diana frowned.

Andrew: "I never make such low-level jokes..."

Diana:"..."

What kind of monsters were these people?

"Don't be in a Daze..."looking at the confused Diana, Andrew urged, "Hurry up and choose. This time... I'll listen to you!"

Chapter 1286: choose...

"Listen to me?"Diana stared at him blankly. "Why?"

“Because I don’t know where to go either!” In the Black Fog., Andrew shrugged helplessly. “Things have completely gone out of my expectations. Everything will have to start from the beginning. Since it started, I want to make a good start. I heard that the Moon Elves have always been lucky...” “...”

Diana:” ...”

“I suddenly feel that it was Ysera’s mistake to help me choose you at the last moment...”

At that time, the situation was urgent. The moment Ysera was infected, he quickly activated the last teleportation channel to take her away. When he was teleported, he gave her the jade crystal that belonged to him and a message to Andrew.

Although she did not know what the message was for Andrew, judging from Andrew’s attitude towards her, Ysera seemed to have chosen to cooperate with Andrew.

Diana felt that she had no choice. At that time, she did not have enough time to make better arrangements, so she could only settle for the next best option, which was to cooperate with an undead.

Even if it was an undead, if they wanted to grasp the secrets of the entire Moon Elves, they would need assistance. The Moon Elves would open their secrets and let Andrew obtain the resources he wanted, while Andrew would become the Guardian God of the Moon Elves...

This type of cooperation was very common in the Universe Federation. However, in most races, the Guardian God was a member of their own race, but there were exceptions. For example, the Succubus Race’s guardian God was the bronze race’s guardian God. The price was that every succubus queen would have to marry this bronze race’s old fool...

There was actually a possibility of cooperation between them and Andrew. Andrew was alone, an undead that was wanted by Queen XI. If he wanted to rise to power, he would be at the level of the ten great lords, and the Moon Elves could help him., it could also help the Moon Elves realize their dream of becoming stronger. In fact, there was no conflict between them.

The reason why they didn’t cooperate in the beginning was because Ysera didn’t want the Moon Elves to come out of the federation and get involved with the undead...

The Undead... Although they were accepted on the surface, they were actually isolated in the federation. If they cooperated with the undead, they could only go to the northern star field to live with the monsters. This wasn’t a good thing for a member of the Elves.

It was also not good for the Moon Elves to become the leader of the elves. They might even be used by the space elves to attack them and isolate them.

There were too many disadvantages to cooperating...

However, at that time, there was no other way. Everything had happened too quickly. Ysera could only make this choice when she sensed the Yimo. After all, from the initial observation., Andrew should be the one who had the best chance of winning in the end.

But... ... Now, it seemed that Ysera’s judgment was too early... ..

“There are always risks in investing...” Andrew said indifferently, “Just like gambling, it may not necessarily win the championship if it’s the favorite at the beginning. Do I have to say this?”

“You are so confident...”

“I am telling the truth...”

“Phew...”

Diana took a deep breath and did not say anything else. Her whole body suddenly began to emit a purple light. Soon, her whole body became crystal clear, looking like a star from afar!

The other party said that she chose not to use her subjective consciousness to judge what to choose. After all, from the beginning, the other party had despised her ignorance.

Letting her choose was another meaning...

The so-called luck was naturally not the luck that many people thought it was, but talent!

As a Moon Elf, a unique talent of the moon worshipper lineage: auspicious image!

The Moon Elves were once the number one spiritual race in the universe. The top moon worshipers had the ability to communicate with fate, and through special sacrificial secret arts, they could judge the bad luck!

This was very similar to the divination arts of the fairy race, but there were some differences. Divination was to predict certain things, but it could not accurately predict the specific attributes of certain things, such as the success rate, such as... ! Bad Luck!

For example, a fairy race could predict that there was a treasure somewhere, but it could not predict whether you would get the treasure or not, and it could not predict what risks you would face if you went, whether it was good to go or not was naturally something that couldn’t be predicted.

Because it predicted a fixed cause and effect, and if you listened to the prediction, you were a variable. What would happen if the variable entered was something that the prophet couldn’t predict.

But a moon priest could. Although it couldn’t be completely predicted, but it could be known whether it was good or bad, especially when deciding on a certain path.

Therefore, at that time, the fairy race was almost invincible when they cooperated with the Moon Elves. The fairy race could predict where the benefits would come from, and the moon priest could predict whether the benefits were worth it or not. Therefore, the fairy race almost monopolized all the benefits in the universe!

“How is it?”

After a moment, Andrew looked at Diana, whose starlight was gradually dimming, and hurriedly asked.

Diana slowly opened her eyes, and the bright moonlight in her eyes slowly disappeared. She looked at Andrew and said solemnly, “Fierce!”

“Oh?”

“Looks like the teacher won’t be coming...”

Located in the core of the western star field, outside the rock, Vogu looked at the side of the Lulu drinking wine.

“Like This?” Lulu lazily dumb drink way: “That looks like I can live for a period of time...”

“Thank you, Senior...” Vogu saluted respectfully.

“It’s not hard, it’s not hard...” Lulu lazily waved her hand. “Since that’s the case, then I’ll sleep first. If there’s no need, it’s better not to wake me up. After all... It’s better to die than to live. I still hope to live on...” “...”

“I believe that senior can get what you want...” Vogu solemnly said.

“Mm...” Lulu casually laid on the ground and lazily replied. She looked like she had eaten and drunk, looking extremely adorable.

Who would have thought that it was this guy who had just destroyed the strongest guardian of the Central Region with a single sword strike...

“Sir?”

Billy looked at Lulu who seemed to have really fallen asleep and said anxiously, “This...”

“Shhh...” Vogu softly shushed and shook his head at Billy, as if afraid that she would disturb the little fairy’s sleep.

Billy held back his words and followed Vogu for a long distance. Then, he couldn’t help but send a voice transmission, “Sir... This is a great opportunity!”

The Fairy Clan’s Jade Sword Immortal Palace Master was once the number one warrior immortal. With her here, it was very likely that she would kill Andrew. Once Andrew died, their greatest opponent would be gone!

“I know what you’re thinking...” vogu smiled and said, “But I said from the beginning that teacher is not so easy to deal with...”

“Did he predict something?” Billy said unwillingly.

According to their thinking, in choosing the path, compared to the mysterious little lord, Andrew was more likely to choose the ones they were more familiar with, but they did not expect...

— — —
“So... you came to our place?”

Li Goudan chewed on the star rhino steak Wang Goudan brought over and looked at Andrew with his mouth full of oil.

Chapter 1287: the original intention of the Emerald Dream

Everyone, including seer and the principal, did not expect Andrew's arrival. After all, in the beginning, this guy was the final BOSS in everyone's hearts.

The BOSS should be alone, fighting against all by himself. The LOW-level operation of cooperating with others was what they, as minor actors, should do... ..

So when he suddenly ran over and said that he wanted to form an alliance, the group of people were very surprised and began to guess secretly.

Vivian: what exactly is this guy planning?

Ranaya: So Vogu has hidden himself deep enough that even a character like Andrew has to come here to avoid his sharp edge and seek an alliance. This looks a little troublesome... ..

Principal: so this little lord of mine can already be on the same level as Andrew. It's really unbelievable... ..

Everyone guessed until they finally looked at a certain little lord. This guy had not made a move since the beginning of the incident, but he had been safe until now. Not only that, he had gathered a lot of extraordinary combat power around him, now, he had become the center of the strongest forces, and even Andrew had come to seek refuge with him.

It gave people a feeling of disbelief...

Seer, who had been commented by everyone, was still unable to see through his thoughts. That strange helmet still isolated everyone's spiritual power.

His dull eyes made people completely unable to understand what he was thinking.

"You guys chat. This lord will go over there and sit for a while..."

Seer slowly stood up under everyone's comments. Under everyone's watchful eyes, she walked straight into the distance. No one knew what she was going to do, but no one asked. Although they were very curious, everyone else had already said so., if she continued to follow, something was not quite right.

"What is that guy going to do?" Diana asked directly after seer had walked far away.

These words made Eggface and the others look over as well. In fact, they were also very curious about the role of their own lord in this big event, so they all sat on the ground silently, their eyes wide open as they listened to the group of big shots.

Andrew looked at Seer's back in the distance and said in a low voice, "He should be preparing for the next thing. After all, it's impossible for him not to take action all the time..."

"Next?" Vivian was stunned. "What do you want to Do?"

"Didn't that Guy tell you?" Andrew looked at Vivian and said.

That guy?

Vivian raised her eyebrows. who was Andrew talking about? Was it the Little Lord?

Vivian really wanted to ask if he would know about this. But she didn't say it in the end. First of all, she didn't know what the Little Lord meant. Secondly, Andrew thought so highly of him. It was a bit ignorant of her to say so... ..

But she was very curious. In the eyes of this big boss, what was the status of the Little Lord?

After thinking for a while, Vaughn finally shook her head and said, "He didn't tell us..."

The principal slightly twitched the corner of his mouth and thought to himself, "He didn't tell me either..."

"I see..." Andrew paused for a moment and said softly, "Then let me tell you..."

"Sorry to trouble you, Sir..." Vaughn quickly said.

"A grasshopper on a rope, what's the trouble?"

A grasshopper on a rope? Lanaya's mouth twitched slightly. These big shots really opened their mouths.

But she didn't say anything. At this time, being able to join such a powerful figure was more reassuring than joining another force.

Andrew gently waved his hand, and a star map instantly appeared in the air, he pointed at the eastern and western parts of the star field and said, "Now that the three cores have been destroyed, they can't be used for the time being. The other two cores are the key points!"

"Can't be used for sure?" Lanaya was the first to ask.

They had just signed an alliance contract, and the contract clearly stated that they could not lie to each other. When she asked this question, Andrew either did not answer, or he had to tell the truth... ..

"It can't be used!" Andrew said with certainty, "The damaged core can't be repaired in a short time. Even if other star cores were used to replace it, it would still be a huge project. Even a great lord-level force would not be able to do this project for a million years...""

Diana nodded and said, "I can testify that the core replacement project is very complicated. Even if the master, Ysera, was conscious, she would not be able to do it in a short time."

"Well..." Lanaya nodded and didn't say anything else... ..

Andrew continued, "The other two cores are infected and will be fully utilized. If I'm not wrong, the other party should wake up that..."

"Wake up?" The principal and the others were stunned. "Wake up what?"

Andrew didn't say anything but looked at Diana... ..

Diana glanced at Andrew and pursed her lips. Ysera was right. This Andrew Guy had already thoroughly studied their emerald dream... ..

"Titan!"

"Titan?" Everyone was stunned.

Diana took a deep breath and said slowly, "The original Titan, the most primitive type, the ancient Titan that was awakened from the core of the Planet!"

As soon as these words were said, the scene immediately fell silent. Other than the little guys who looked baffled, everyone else had shocked expressions on their faces... ..

"This... how is this possible?" Wayne was the first to mutter.

Even if she was not an academic, she knew that it was impossible for those ancient lifeforms to appear again. This point had already been tested by many people. The most popular experimental project was the third suzerain's force that was at its peak back then... ..

Seeing everyone's expression, Diana took a deep breath, she explained, "The purpose of our emerald dream realm is to simulate the first physical universe. The artificial universe environment is also to create those lifeforms that were born in the first universe. The purpose is to create such a primitive ecology and create lifeforms that match our Moon Elves' Genes!"

As soon as he said this, everyone came to a sudden realization. In their hearts, they somewhat understood what the Moon Elves were trying to do by hiding for so long.

Although the theory of the royal family's degeneration was not announced, it was already common knowledge in the academic world. The Moon Elves belonged to the royal family, and there was no suitable carrier in this world that could accommodate their genes.

Therefore, they might as well create their own universe and create a race to inherit their Moon Elves' genes?

What a crazy and Bold Idea...

"I see..." the principal was the first to react, he said, "Among the life forms that were initially simulated, the data template of Titan was the simplest because it was the first batch of the highest-level life forms formed by Gaia's consciousness and planet material. First, it experimented on Titan and then the elves, right?"

Diana nodded. It was easy to talk to advanced scholars. With just one or two sentences, they could completely understand one's train of thought.

"Then did you succeed?" The principal asked excitedly.

If they succeeded, it could be considered a great miracle in the academic world. The Moon Elves actually conducted such a great experiment in secret. They were indeed worthy of being one of the rulers of the past universe... ..

Diana looked at the eager-looking slime and pursed her lips. "Half of the success..."

Chapter 1288: in fact, it's right in front of us?

"Half of success?"

The principal was stunned as he stared at the other party. As a scholar, he had always been very strict with academic issues. Success was success, failure was failure. What the hell was half of success?

Diana: "Everything is being simulated according to the previous method. Even under complicated calculations, Gaia's consciousness has been successfully transmitted through the intelligent simulation, but it can't be combined..."

"Can't be combined?" The principal was stunned. "What do you mean?"

Andrew directly said, "That is... their artificial Gaia consciousness can't be combined with the Titan body formed by the artificial world to produce complete life. Is that what you mean?"

Diana was silent for a moment, then nodded lightly.

The principal was stunned for a moment before he immediately reacted. He immediately understood the crux of the matter... ..

The artificial soul had failed! !

An artificial world required a huge amount of calculations, while an artificial universe was even more exaggerated. The principal believed that the other party must have used an extremely excellent intelligent algorithm to simulate everything that was born in the universe.

However, it was clear that there was no breakthrough point in the birth of the soul consciousness... ..

This was also the federation's academic problem in this aspect. The federation's highest level of intelligence was already not much different from ordinary living beings, but it could never replace real living beings. No matter how exquisite the algorithm was, it could not simulate the complex emotions of living beings, this was a difficult problem that could not be solved.

There were also masters of Soul Science who had been trying to simulate the creation of souls, but whether it was the current top-notch research technology or the once brilliant civilization, there was no record of conquering this point.

It was just that they did not expect this difficult problem to affect the Titan of the Emerald Dream.

"Is artificial consciousness a high level of intelligence?" The principal asked.

"It can be considered... .. But there are differences ... "... Diana said seriously, "We used the mental and emotional simulation of observing all races to create a huge amount of data. We used the most advanced algorithm in the civilization at that time to create Gaia's consciousness bodies. These consciousness bodies are almost infinitely close to biological consciousness. Almost all of them have their own emotional consciousness. They might even go against our programmed commands because of their emotions. Therefore, we initially thought that the soul creation was a success..." . "..."

"Disobeying the program's orders?" The principal took a deep breath.

Intelligence, intelligence, and even simulating humans were all different from the origin lifeforms. They were obedient!

All of their anthropomorphism was based on the program, so they would never disobey the program. This was also the reason why the gods were so confident in their intelligence. This was also the flaw of

intelligence. Under the program's mode, they could only live in a fixed framework forever, unable to achieve the unique creativity of living creatures...

Therefore, intelligence had powerful computing power, but intelligence could not invent new things, because the inherent train of thought was the most unbreakable.

And the other party said that it went against the program?

If this could be achieved, there was not much difference between intelligence and life... ..

"Then why..."

The principal swallowed a mouthful of saliva. He almost wanted to ask how this could be done, but he knew that this question would really be a digression. He suppressed his desire to know, the principal still asked a question that was more relevant to the current situation, "Since this is the case, what's the situation if we can't Fuse?"

"It's pure rejection..." Diana sighed, her gaze became a little complicated, she said softly, "The original situation was that those Titan bodies were formed according to the normal structure of the world. They were almost exactly the same as the original Titan bodies in the past universe. and Gaia's consciousness, under our algorithmic calculation, was also the same as the original consciousness that was formed. They all woke up from the haze and thought that they were the titan... "...". But that was where the problem arose... "..."

"What?" The principal quickly asked.

"Perhaps it was because it was too similar, too close to the original model of the life form, but this consciousness body encountered rejection during the final fusion. As soon as this situation appeared, we began to make mistakes. Initially, we thought that this Titan body had a special rejection mechanism towards the spiritual consciousness body, so we tried to transplant another spiritual body in to try, but the result was... .. but it is possible"

The principal was stunned and immediately asked, "You mean to say that the original Titan body did not repel the spirit body, but the Gaia consciousness that you created?"

"Yes..." Diana said with a bitter face.

Because of this experiment, a few elders used resources to remove the spirit body for the experiment, which made the already thin moon elves even worse. If the transplanted spirit body could not be completely fused, it would be no different from the undead...

"What's the reason?" The principal was stunned. As a top-tier scholar, he could not think of a reason at the moment.

"Because it's too similar..." Andrew continued faintly, "The consciousness bodies they created are too similar to the Titan's soul, so every part of the connection must be perfect. Only then can it be completely fused. Once it's fused, it's different from the body. It's a complete fusion of the soul and the body. But because of this, the connection needs to be more perfect. You should have experienced this yourself "... "..."

The principal was stunned when he heard this. He nodded with a complicated expression on his face.

It was a slime. Due to its genes, it had always been locked in the star rank and was unable to advance. If it wanted to break through, it could only change its genes!

Changing genes and genetic modification were two different things. Ordinary Aborigines or people with low bloodlines at the bottom of the federation, due to their weak genetic strength, could be grafted with other powerful genes to undergo modification, by relying on high-containment technology, they could transform their own bloodlines.

However, it was different for powerhouses like them. The star-ranked slime gene had already reached its peak. At this time, any gene injected into it would be directly repelled or devoured by the slime's original gene. As a result, it would be unable to replicate a different Earthling's gene like seer duplicating planet D. ...

For example, Seer used the Green Titan gene and brother dog's Gene to create a new gene body. As it contained Brother Dog's own gene, it was very compatible with the soul's storage. This was also the foundation of the Federation's Gene Body Modification, only the body created by his original gene replication could completely fuse with the soul. Meanwhile, the Green Titan gene was stronger than the human gene. Therefore, under the condition of retaining a certain human gene prototype, there were some things that could accommodate the Green Titan gene.

As for how much it could accommodate, it would depend on the capacity of the main body's gene... ...

However, the principal could not do it. His own gene was too strong. Any gene injected into it would only be devoured, and there was no way to replicate a gene body that was suitable for him.

In this world, other than the deity gene, no other gene could be converted.

However, changing genes was different. It meant completely abandoning the current body, not using the body as a template to copy, and directly grafting the soul onto another gene. However, the prerequisite was to find a gene body that was very compatible with its soul. Otherwise, there would be rejection. After so many years of being a slime, his soul and the shape of the slime had already been very compatible. The shape of the soul came from the habit of the consciousness, and it could not be changed.

For example, if a tiger's soul was forcefully grafted onto a person's genes, the physiological structure would be very different and there would be rejection. If it was grafted onto a cat, it would be much better... ...

The principal thought for a while and still frowned. "But since it is man-made, it should have been designed according to the Titan model at the very beginning. Why would there be rejection?"

Andrew said faintly, "The souls they created lack the most crucial thing. Even if it looks like it, it's fake. But the consciousness is real. When it's fused, it's transplanted in the way of the soul grafting. Naturally, it will be repelled."

"What Key Thing?" The principal and Diana asked at the same time.

"How would I know?" Andrew said faintly, "If I knew how to create a soul, I wouldn't want to take your things..."

Diana: "..."

"What's the difference?" Raingirl, WUGUA, who had just woken up, asked with a pale and weak face, "Just now, I said that the spirit of an ordinary elder can be transplanted into it, so we can directly transplant the soul of the older generation of elves into it. After creating a template suitable for the Moon Elves, we can also do this, right?"

"It's not the same..." faced with Raingirl's ignorant question, Andrew patiently explained in a low voice, "Fusion is a soul, it's a new life. Forcefully transplanting it into it would be a body. This is no different from US undead. They imitate the original life to evolve the Moon Elf genes. This is something that a body can't do. It's already good enough for the undead to enter the body without spending money to maintain it. How can they evolve with a genetic body?"

So that was how it was...

Rain girl nodded her head, but a complicated look flashed across her eyes. The Moon Elves had been searching for a suitable gene carrier, and for this reason, they didn't hesitate to create a simulated universe, but they... . These d-ball humans could almost completely fuse with the ancient genes... .

She was different from the other players. She had read the introduction of the genes. According to the records, the Wood Elves and Moon Elves were both ancient elves, right?

So... . What these Moon Elves were looking for was actually right now . . Right in front of their eyes?

Chapter 1289: a reliable ally...

So... did she know?

Rainmaiden Wugua secretly glanced at Diana...

As a star-grade lifeform, it was impossible for Diana to not notice the secret gaze of such a low-level figure.

On the surface, Diana did not move. She continued to tell the others about the rest of the matter, but in her heart, she was secretly calculative.

Just as RAINGIRL had thought, their existence had indeed perfectly solved the problem of the emerald dream. When Ysera first saw Brother Dog, she had guided it over to use him as an experiment.

And the experiment was very successful!

Gaia's consciousness was extremely close to it, and the star nucleus was also extremely satisfied with it as a carrier. Then Brother Dog had perfectly become a bridge between consciousness and the star, successfully linking the two together. This was why he could use the laws of this world without Ysera's permission...

If there was no invasion of the Yimo, Ysera would probably try to fuse the Little Guy Next, right?

If he succeeded, then the next step would be the flower spirit of the imperial bloodline...

At the thought of this, Diana suppressed the excitement in her heart and told the principal and the others about the star core as if nothing had happened... ..

“What will the other party do after infecting the core?”

Vaughn was the first to ask the question.

“The first thing is to master a part of the law...” Diana said in a deep voice, “I’m not sure which part, space, elements, or even time. If it’s the first two, it’s fine, but if it’s the last one, it’ll be troublesome...”

“You don’t even know which core represents which one?” The principal frowned.

“It’s flexible...” Diana sighed. “Because the ecosystem is going to change at any time, the core will change its functions due to complex algorithms. It’s not fixed. After Ysera merged into the Emerald Dream, it was in charge of controlling it. I don’t know the details”

It was really bad...

Vaughn frowned when she heard that. Originally, it was a good thing to have an insider join them. At least, it would give them a lead in intelligence, but this insider seemed to be just a passerby... ..

“What about other than the law?” Andrew asked faintly.

Diana glanced at Andrew, after hesitating for a moment, she finally said, “Other than the law, there is the original Titan. It is the original Titan that evolved from the highest-level galaxy. Although its body has not started to transform into the later-stage human-shaped battle model of the Emperor Titan, it is still composed of elements and star material. However, its body is very huge and its mass is extremely high.”

“Sea of life level?” Andrew asked, “Which level?”

“Tian Yuan...”

“Tian Yuan...” everyone’s face suddenly turned solemn.

The people here were either excellent children born in big families or former top leaders. They were not as ignorant as commoners about the sea of life level, and they generally knew about it...

Tian Yuan... It was the watershed of life sea-level. When a star-level entered life sea and became the other shore, it belonged to the accumulation period. Although the level of life had risen by a dimension, the huge amount of energy was still in the process of transformation. It often needed dozens of eras to be transformed and accumulated.

Tian Yuan represented the beginning of all things, the center of the universe, which was equivalent to the first step of the formation of life sea. It did not sound very powerful, but it felt different when it came to data. The ten lichens under Queen XI., other than the top three, the rest, including Andrew, were only Tian Yuan. The former third Lord, the thirteen Titan Legions under him were famous throughout the universe, but there were only three people who surpassed Tian Yuan!

Now, the Federation had registered a total of 93 royal forces, but other than the star elves, the bronze clan, the Blue Spirit clan, the nine-tailed clan, and other top ten forces’ guardian powerhouses., the Guardians of the other royal forces were only Tianyuan!

In other words, when you stepped into Tianyuan in the life sea, you could already become the top marshal under the 10 great lords, or the guardian of the Royal Family!

Although the awe-inspiring female Titan had amazing talent, because of the growth rings, she had to endure for at least 10 eras before she had a chance to step into Tianyuan. Not only did she need time, but she also needed a huge amount of resources!

"I think... You can find us a way to escape..."Vaughn said directly.

Diana bit her lips, "It's not that there's no chance..."

"There's a chance?"Lanaya sneered unceremoniously, "A heaven's origin level creature, we're gone just by blowing air, where's the chance?"

"You can't say that..."Andrew laughed sinisterly at the side, "I'm also a heaven's origin level creature, aren't I surrounded and beaten by you guys?"

"That's not the same..."Lanaya frowned.

"What's the difference?"Andrew smiled and said, "They are all flawed. I have a tianyuan-level spiritual body, but I don't have a suitable body. That's why you guys can force me into such a sorry state. It's the same for those native Titans. They have a tianyuan-level body, but they don't have a spiritual body that can be used. The only spiritual bodies left of the Yimo are the two in the formation's eye. Two star-level spiritual bodies forcefully grafted into the tianyuan-level Titans'bodies will not last long...". "..."

"It shouldn't take long to kill us..."Vivian said coldly.

"You're too modest..."Andrew laughed, "Don't you still have me? Oh... not only me, there's another reliable ally..."

"Reliable ally?"Everyone was stunned. Which One?

Andrew smiled and did not say anything. The green eyes in the black fog looked in another direction, which was the direction that seer left... . .

Rain woman without melon suddenly confused...

A reliable ally is the Lord of Your House?

Are you serious?

The Dog Egg is to whisper to the dog elder brother: "You See, I say our family Lord is Awesome?"

"er... . ."Brother Dog was stunned for a moment, and then nodded blankly. . .

How did it come to this...

Seer sat alone on a rock covered with sand and wind, staring at the sky that had been cut in two.

I just want to quietly find a colonial planet, safe and sound through the novice period, so simple a wish, how do I feel things are getting more and more complicated.

It was one thing for a top-level undead to appear, but he tolerated the fact that there was a god-level big boss who was targeting this undead. After all, it was normal for powerful people to have other powerful people targeting them. In the end, why did one of them appear?

Seer could not even count how many powerful people this was.

As expected, it was better for him to make up his mind to move the location back then...

Actually, it was also very easy to operate. He would sell Mars to the outside world and roughly measure the energy ore stock. He would get the evaluation company to make a price. If he lowered the price by three levels, there would definitely be a bunch of people fighting over it. He would find a rich boss who could pay the full price.., he would quickly sign the contract and take the money. After that, he would bring the people on Planet D and run away. He would go to a faraway place and buy a level seven planet. If he immigrated there, wouldn't his development be different?

Although without the energy ore, the initial development would definitely be slower... .. However, as long as these key people were around, time would always be on his side...

As for what would happen to the people who bought Mars?

Should he die?

"As expected, I shouldn't have listened to that guy's words..." seer muttered and sighed.

"My Liege..." suddenly, a mechanical electronic voice sounded faintly, "It's not good to speak ill of others behind their backs..."

Seer turned around in a daze. The one who spoke was Alice, and behind her was an overwhelming blue tip... . .

Chapter 1290: Enough with the Cup!

The noise around Alice was not small, but it came quietly. Not to mention seer, even Andrew and the others not far away did not notice that a yimo had come to their headquarters openly...

But seer was not surprised at all. She stared at Alice blankly for a long time before she said faintly, "Why did you come so late?"

"I have to confirm some things..." The AI saluted seer respectfully and said, "That senior is an incredible existence. I have to confirm if it is really that weak. If something is wrong, I think we can follow your previous plan and escape as soon as possible. We can sell Mars before the battle is over

"I think this plan can be carried out right now..." Seer said seriously, "Since you can come in, you should be able to bring me out, right ? How about we sell the planets right now ? Hurry up and don't give me a 30% discount. Give me a 50% discount, senior liquor immortal

Alice was silent for a while and said faintly, "It's really convenient for the lord to scam his acquaintances..."

“How can this be called a scam?” Xi Ye immediately frowned. “This is called repayment. Immortal wine is different from me. He has the right to compete for this great opportunity. I gave him such a good opportunity to repay him for taking care of me before.”

“I think the Liege is still a bit promising. Let’s fight for a bit more? After all, we’ve come so far...”

“How do we fight for it?” Xi Ye waited for her dead fish eyes and said, “How long has it been? You told another big shot? From your tone, that Yimo’s background must be very impressive, right?”

Alice thought for a moment but did not say anything in the end. She was afraid that if she said it out loud, this good-for-nothing liege in front of her might directly run away... ..

Xi Ye looked at Alice who was pretending to be dead and suddenly felt a wave of anger in his heart. He knew that the other party was not willing to follow him on the most despicable path... Ptui, the safest route.

So why did it say that most of these yimo would not succeed? They were all keen on taking dangerous routes, but if they walked by the shore often, how could they not get their shoes wet. Being a little more frivolous... Ah, no ... What was wrong with being a little more frivolous?

If they did not understand the principle of gradual progress, it was no wonder that this race could not become great... ..

However, she was already on the boat of thieves. It looked like Alice was going to drag her down with her...

Sighing, Seer looked at the other party and asked, “How’s The Harvest?”

“It’s a pretty good start!” At the mention of the key question, Alice immediately smiled and gently opened her palm, a Ray of light faintly appeared in the palm of her hand. “To greet you, senior still gave me something. I casually grabbed it, but I didn’t expect my luck to be quite good. I caught a pretty good thing...”

Xi Ye turned to look at the ray of light.

The first thing the other party did was not simply to greet the YIMO. The main purpose was to see how weak the other party was. If the other party was too weak, Xi Ye would naturally devour the other party and snatch its fruits., then she would become the big boss of this incident.

Unfortunately... .. Things were not that good, but she still managed to snatch some things back... ..

Seer felt the light and her pupils contracted. She could not help but say, “It’s really good stuff!”

“Is that so?” Alice smiled, looking pleased with herself. However, her voice was mechanical, which made it look fake.

“I’ve said it before, the Liege’s luck is unparalleled. No matter how bad the situation is, he will get the most favorable conditions!”

“Hehe...” Seer did not buy it at all. He sneered and said, “Do you always say that to every host?”

“How can that be?” Alice quickly said, “The liege is definitely the one with the most chance among all the hosts I’ve Met!”

The corner of Seer’s mouth twitched slightly when he heard that. The other party’s words were the same as not saying anything. The previous hosts had all died, so he naturally had the most chance... ..

Sighing, Seer looked at Alice’s face. “Is it alright for you to occupy her like this?”

Alice replied, “It’s fine. She’s also an undead, and her body was never hers to begin with. One body occupies two souls, and I occupy a larger area. What can happen?”

Seer replied, “I’m just afraid that you occupy too much area...”

Alice replied, “Don’t worry, My Liege. After all, she has obtained something important. If she wants to win this round, what she has on her is extremely important. I’ll naturally protect her well...”

Seer asked, “When did you start working with her?”

Alice replied, “In the beginning...”

Seer asked, “Do you believe that she’ll stand on your side?”

Alice: “I believe that she will make the most advantageous choice for herself, and the Liege and I are the most advantageous choice...”

Seer: “I didn’t see it at all...”

ALICE: “Liege, it’s not convenient for me to appear next. It’s up to you...” as she said that, she handed the light in her hand to seer.

After Seer finished the results, the face in the helmet was filled with a complicated expression.

“How long can this thing last?”

Alice said, “I’ve tried my best to optimize it, but my liege is too small. You can only use it for three minutes at most!”

Seer said, “You know how small my body is. Why did you pull me into such a dangerous game...”

Alice said, “My Liege, do you think it’s not appropriate? Do you need me to improve it?”

“Is it troublesome?”

“It’s a little troublesome. It’ll consume a lot of energy...”

“Then there’s no need...” seer waved her hand. “Save your energy to deal with that senior of yours. You Don’t need to waste your energy on this. After all... three minutes is enough to fill a cup...”

Alice: “...”

“Andrew isn’t coming...”

Outside the rock demon territory, Vogu walked toward Anya, the undead God who had been guarding outside the territory.

“There’s a high probability that he won’t come...” Anya didn’t turn around, as if she had expected it, she kept her eyes on the rock demon territory and said softly, “That’s good too. Although senior is sloppy, he’s the one who has given the most to the clan. It’s best if he can live...”

Vogu said, “But Andrew is also alive. If Andrew doesn’t die, it will be troublesome later...”

Anya said, “It won’t be troublesome. Even if it wants to seize the Titan, it can’t keep its trump card. It will use whatever it needs to use. As long as I have seen it once, it can’t be used against me...”

“What if he doesn’t reveal his trump card?” Vogu asked.

“Don’t reveal his trump card?” An Ya laughed. “Against a tianyuan-level Titan? Even if it’s just a physical body, are you sure?”

Vogu replied, “He’s not the only one who’s powerful over there...”

“Those two mercenaries?” An Ya smiled. “They’re indeed very outstanding, but they’re only outstanding. They’re still too young and can’t stir up any waves. Besides, aren’t you the Lord who knows the strength of the two of them the best?”

Vogu said, “Naturally, I’m not talking about the two of them...”

“That old man?” Anya shook her head. “He’s indeed a decent junior. It’s the first time I’ve seen slime reach this point in my life, but he can’t do much...”

“I’m talking about that Little Liege...”

“Oh?” Anya narrowed her eyes. “Him?”
