

A Bunch 1291

Chapter 1291: the beginning of the collision!

“What a lucky guy... or maybe it’s not luck?”

In the distance, when Alice handed the light in her hand to seer, the dragon sitting at the console opened his eyes slightly and muttered to himself.

“If it’s not luck, then what is it? Could it be a method to intercept luck? Impossible...”the dragon shook his head slightly, “There shouldn’t be any race in this universe that can intercept luck with me...”

“What are you talking to yourself about?”Ionelle looked at her coldly.

“No... It’s just a small matter...”the dragon stood up and looked down at ionelle, saying calmly, “You don’t have to pay attention to this, anyway... what happens next has nothing to do with you...”

As soon as these words came out, Ionelle’s eyelids twitched, and her right hand gripped tightly onto the huge sword beside her, her veins bulging. She could feel that the other party was about to make a move!

At this moment, she actually did not wish for this to happen. After all, what she wished for the most was for those fellows to be able to directly destroy the core of the YIMO and cause it to suffer a backlash. However, as expected, such an ideal good thing would not come... ..

“It’s still better to rely on oneself than relying on others...”

Ionelle took a deep breath, pulled out the huge sword beside her, and slowly stood up. The aura around her instantly surged, and the entire space of the main control console began to tremble. The ground around her started to crumble, a powerful aura spread out rapidly, spreading out at an astonishing speed.

Nearly ten thousand kilometers away, the aborigines that Brother Dog had brought in were lying on the ground like ostriches, burying their heads. Their bodies were trembling, and their faces were pale. Facing the sudden pressure., they couldn’t even muster the courage to escape.

A Ray of dawn light rose from the ground, illuminating the entire sky from the angle of reflection. However, most people on this planet couldn’t see it, and the powerful pressure made it impossible for them to lift their heads... ..

Ionelle held the dazzling dawn sword and looked at the enormous black dragon in awe during the battle.

She did not want to fight because she wanted to take the little guy away alive. However, the Titan race was never afraid of battle. This was the proud bloodline in their bones!

“Really...”the giant dragon sighed faintly. “I dislike this thing about you titans the most. You’re too hot-blooded...”

As he spoke, the sharp dragon claw gently tapped on the ground. The moment his fingernails landed on the ground, they folded in all directions like mirrors!

“Spatial Laws?” Ionelle’s expression changed. Without hesitation, she slashed out with her sword!

Unlike Lulu’s sudden sword intent, Ionelle’s sword was calm from the moment it gathered power to the moment it was unleashed. One could clearly feel its power. Before it was unleashed, the surface of the planet where the main control console was located.., it was as if a crack had appeared on the surface of the planet!

They could only feel that the recoil from this sword was enough to instantly shatter the planet!

The dragon looked at the exploding energy and sighed deeply again. Titan creatures were like this. They were able to use their massive energy so boldly. For Yimo who were proficient in calculations like them.., after staying with them for so long, it did not know how it survived.

Its thoughts were blurred and filled with memories, but it had no reaction to the shocking sword in front of it... ..

Such an attitude caused anger to rise in Ionar’s eyes, but an inexplicable uneasiness rose in her heart... ..

Boom!

A powerful force exploded rapidly, but the explosion scene that she had imagined did not happen!

The terrifying slash began to fold the moment Ionar struck out. The incomparably powerful force was quickly folded and refined, and at an extremely exaggerated speed, it was folded into countless tiny pieces, it appeared on the billions of planets in the Emerald Starfield!

Boom! Boom! Boom!

In the folded image, Ionelle’s power was folded and received by the planets. With a boom, each planet left a huge crack, but the power was divided by one-millionth, the damage caused to the planets was insignificant. It looked scary, but it only left a mark on the surface.

Ionelle’s face immediately darkened. She understood that the other party had completely mastered the spatial law of the Emerald Dream!

Even though so many cores had been destroyed, could she still master such a crucial law?

“You can stay here peacefully...”the dragon slowly stood up, flapped its huge wings, and its huge body floated in the air. “Wait for the result. I will let you know that what I did back then was not wrong!”

“Aren’t you speaking too soon?” Ionelle sneered. The muscles all over her body bulged, and the veins bulged like insects. The reason why her blood vessels bulged was because of the overloading of the powerful energy. Under the terrifying energy... Ionelle’s entire body was covered in a light like the dawn. Her skin became transparent, and people could even clearly see her blood vessels, bones, and fibers... ..

However, upon closer inspection, one would discover that every cell in her blood vessels contained explosive energy. If an expert of the plastic energy department were here, they would discover that Ionelle at this moment was like a huge energy accumulator.., the energy contained in every cell in her body was equivalent to a nuclear bomb. If it exploded, it could destroy a city on a planet above grade-6!

“Stop...”the dragon looked at her coldly and said, “Your body can’t withstand this power now!”

As a parasitic yimo that used to be the third lord, she was the one who built the entire third force. The Thirteenth Corps' leader had passed down dozens of generations of inheritance, and he knew every corps' inheritance power like the back of his hand.

The radiance of Dawn was the most explosive force in the thirteenth corps. Ionelle used this secret technique from an ancient Titan family. After hundreds of eras of modification, it was the trump card of the previous corps' leaders, the outside world called it the Sun God mode!

The implication was that a living creature could withstand the peak of positive energy. It was like a divine body!

Back then, the previous generation Ionelle used this move to fight head-on. She defeated the famous queen of Blades of the Void clan and was famous throughout the universe!

However, this move placed a huge burden on the body. It required an extremely powerful body to guarantee it. Therefore, the Titan of the Dawn Legion was stronger than the other legions in terms of the strength of bones and meridians. The commander had even trained the strength of meridians since young.

However, this move was definitely not something that a little guy who had not even reached the Heaven's origin realm could use!

"What a joke!" Ionelle held back her energy that was about to burst. She looked at the other party with a cold smile. "You sound like you're worried about my elder..."

"Am I not?" The Dragon said coldly.

"F * ck!" Ionelle roared angrily. All the power in her body suddenly erupted. In an instant, her body shone with a dazzling light like the sun. The terrifying power caused the surrounding folded space to crack like a spiderweb... ..

Looking at this extremely terrifying power, the giant dragon sighed faintly. "What a troublesome little fellow..."

Chapter 1292: Seal and War -Partpart 1)

"What is this?"

In the distance, the people on the other planet could feel the energy fluctuation and looked over.

"WA, WA, wa... an earthquake!" The two dogs jumped up and down like monkeys.

Brother Dog stumbled and fell to the ground. He carefully held rainy, who was weak, and looked around in confusion.

It didn't feel like an earthquake, but like a crash, but the body of the car was the planet they were on...

...

So what the hell could crash this kind of car?

“This is...” Lanaya looked at Vivian, her eyes full of surprise.

“Slash...” Vivian narrowed her eyes and said, “A slash that was folded by space and weakened countless times. This power... as expected of the heir of the glory of Dawn...”

As a top ranger, she could naturally recognize the owner of this power from its aura... ..

“I’m afraid it’s more than that...” Lanaya looked at the starry sky, in the distant starry sky, a dazzling radiance of dawn was extremely dazzling. It was ten thousand times more dazzling than a self-ignited star. Across the starry sky, it made her muscles tense up. She felt extremely dangerous!

And this was even when this power was not targeted at her.

“Life Sea... is it that strong?”

Lanaya could not help but mutter to herself...

She had already accumulated for two eras. As the blazing sun among the star-level powerhouses, although she was young, she had also reached the peak. She was only one step away from stepping into the life sea realm. It was not that she had never seen a life sea-level powerhouse before..., it was just that she did not expect the gap to be so big!

“She should be stronger...” vien sighed, “After all, she is the commander of the Titan Army. Even though she is still young and has not reached the Heaven’s origin realm, she is not someone that ordinary people can compare to... However, this energy is a little too strong...”

To be honest, even if a heaven’s origin-level powerhouse was present, she did not feel that there was such energy... ..

“I didn’t expect...” just as the two of them were surprised, Andrew, who had been silent all this time, finally spoke. His face was full of emotion. “To be able to see such a thing...”

“Senior, do you know what this is?” Vaughn asked curiously.

“The Sun God mode!” Andrew took a deep breath and said, “It’s the top secret technique of the Dawn Corps leader. The previous corps leader used this move when he defeated the Queen of Blades.”

“The previous lonar?”

Vaughn’s pupils constricted, and a hint of respect flashed across her face. Although the third force was reviled by all races for infecting the Void, and many people regarded it as a traitor, the previous generation’s lonar was still respected by most people, even now, there was still a statue of that guy in the federation’s Heroic Spirit Hall!

“But it’s also...” Andrew Sighed. “It’s normal for her descendants to have her secret skill...”

He was a little relieved. If there were no Yimo, he wouldn’t have any chance of winning if he stood on Ysera’s side alone...

“Wow...” Maya couldn’t help but hold her chest when she saw this scene, “This is really...”

It seemed that it wasn't a wise choice to scheme against her. If something happened, this guy would probably hammer her to death, and even Lord Evelyn wouldn't be able to stop him, right?

It seemed that he had to think of a way out. If she was still alive after the matter was over, he had to stay far away from her... ..

Vogu stared blankly at that power and couldn't help but take a deep breath in his heart. It was fortunate that such power wasn't directed at them. He didn't know what his teacher was thinking when he saw this scene...

"It's really brilliant..." a few dozen miles away from Vogu, the undead Anya sighed as she looked at the dazzling light.

Lulu, who was pretending to be asleep, also opened her eyes. At this moment, she was almost on the verge of falling asleep. Seeing this scene, she perked up slightly. "Yeah, the light of young people is so dazzling..."

"Not every young person can be so dazzling..." Anya smiled.

"That's why it's such a pity..." lulu sighed and said, "Such an outstanding young man shouldn't have died so early..."

"In this world, how can there be so many shoulds and shoulds?" An YA said faintly, "If we're talking about shoulds and shoulds, there are so many juniors in our fairy tribe, and they shouldn't have died in front of us old men..."

"That's true..." Lulu drank a mouthful of wine, and then she narrowed her eyes and said, "You really don't need my help?"

"Senior, rest... If you can't hold it in anymore, I'll Wake You Up..."

Lulu: "..."

"So..." Xi ye also looked at the sky. "Why do I have to face such a powerful thing here..."

"Lord, stop complaining..." Alice urged from the side. "It's time for you to leave. The battle over there won't last long..."

Xi Ye was stunned when he heard that and said in disbelief, "This kind of power... won't be able to hold it off for long? is your senior that powerful?"

"If it weren't for the injury, it would be worse than you think..." Alice sighed. "You'll see soon enough..."

"What a nuisance..."

At this time, as the face of that let people fear the power of the dragon, but the face is a helpless expression... .

Lonelle Heart Jump, this is his last card, but the other side of the face is not even serious expression, could it be expected?

As if completely understanding Lonelle's thoughts, the dragon said faintly, "You are her daughter. Since you have inherited her mantle, you will naturally be able to think of what you know about her..."

Lonelle's expression turned heavy upon hearing those words. Being able to think and not being afraid were two different things. Titan's power was rarely concealed from the outside world, so most of the people who clashed with the third faction knew what they knew. However, every time they clashed... The other party's expression was one of full strength... ..

Instead of the one in front of her with a helpless expression, like a father looking at a rebellious child... ..

However, even so, Lonelle's sword still did not hesitate. The Titans were never afraid of facing a strong enemy, just like how their own mother would never hesitate to draw her sword when facing the renowned queen of Blades!

Clang!

Under the support of the enormous power, the radiance of the sword of dawn shone brightly, as if it was about to devour the giant dragon in the next second.

But just a second ago, a pair of huge and transparent hands suddenly appeared out of thin air, completely enveloping Lonelle and her dazzling radiance!

That transparent hand was as soft as water, but also as tough as water. It gently wrapped around Lonelle, yet it was tough enough not to be shattered by the enormous power on Lonelle's body... ..

On the contrary, the vigorous fighting spirit on Lonelle's body began to quickly dissipate the moment it was wrapped!

There was even a strong sense of fatigue in her consciousness... ..

Lonelle's entire body was weak, but her heart was incomparably shocked. She recognized the hands that wrapped around her. It should be said that every Titan should be able to recognize them.

This was the Second Corps'top secret skill: Gaia's phase!

Lonelle raised her head in disbelief. As expected, she saw that on those huge hands, there was a transparent giant that was countless times larger than a planet. That Giant's entire body was covered in blooming flowers, flowing with the spring water of life, anyone who saw it would be able to lose themselves in that beautiful and huge life force!

Chapter 1293: Seal and WAR -PartpTwo two)

"How is this possible?"

Looking at the giant statue, Lonelle's eyes widened...

The universe had experienced so many eras, but some titles had not changed. For example, the awakening of a world's core consciousness was known as Gaia's consciousness... ..

This point was unified in many civilizations. Even if these civilizations had never come into contact with each other, in their history, the first life was a giant, a symbol of the godhood of the Earth, she was the first true God of creation, and also one of the primitive forces of nature (the earth) that could create life. Her appearance marked the beginning of chaos from disorder to order, and also marked the beginning of all things.

And in the Titan civilization, Gaia was the mother of Titan.

Among the thirteen legions, seven legions were inherited by the Titan family that initially supported Gognath. They were nicknamed the noble legions internally. The secret techniques passed down by these legions were all ancient inheritances passed down from the ancient Titan civilization, they were passed down from generation to generation and were never passed down to outsiders. They were different from the Dawn Legion.

The secret techniques of the Dawn Legion could be learned once they had a certain amount of military merits. They could even accumulate a certain amount of military merits. As long as they could promise their descendants to join the Legion, they could also exchange it for their descendants. For example, EONAR's sun god mode. In an ordinary era., the military officers in the Legion who had sufficient military merits would exchange for this secret technique and then let their children prepare it from a young age.

This kind of secret art did not have high requirements for bloodlines, but it had very high requirements for physical fitness and comprehension. Whoever trained the best had a high probability of becoming the next commander of the Corps. They would train their muscles and bones since they were young, they had suffered a lot that ordinary people could not understand before they were barely able to defeat their peers and inherit their mother's mantle. The advantage of this model was that it could allow the corps to see the hope of rising, using pure strength as the basis to decide who would rise to the top, the fairness of the system was easier to stimulate people's ambition. Of course, it also caused the secret techniques that the army was researching to be easily leaked out.

Therefore, it was common for some warrior families to secretly keep Titan's secret techniques. As time passed, there would always be some greedy people who betrayed the interests of their compatriots.

In contrast, although the noble army emphasized on bloodline, they could learn more advanced secret techniques from a young age if they were born well. If they were born poorly, no matter how talented they were, they could only become vassals. This was very criticized by people, however, the secret techniques were rarely leaked under the strict protection of the family.

This secret technique was one of the top secret techniques that could not be leaked. It came from the famous Titan family, the Hera family. It was rumored that this family's Titan inherited the bloodline of the mother of the ancient Titans, it inherited the Earth and life techniques.

Although the bloodline had deteriorated, with that top secret technique, no one dared to provoke it in countless eras... ..

After joining the third faction, this secret skill had given the faction even more outstanding battle merits!

“How is this possible?”

Ionelle muttered to herself in disbelief. She was one of the commanders of the 13th Legion, and she was very clear about the importance the Hera clan placed on this secret skill. The inheritance was sealed within the clan leader’s genes, and only the inheritor could learn it, it was simply impossible for it to be exposed.

“Why are you so surprised?”The dragon looked at ionelle, who was being held by the giant hand, and smiled. “The ability of a sky god to use contracted people is a basic law, don’t you know that?”

“Are you a sky god?”Ionelle stared at him coldly.

“I’m a parasite... I’m half...”the dragon said faintly.

“That’s not right!”Ionelle tried to stand up, but that huge peaceful force made her whole body weak. The berserk blood triggered by the sun god mode had completely stopped at this moment. Her whole body could not muster any fighting spirit or strength... ..

The Sun God was a secret skill that could be triggered. It belonged to the category of Berserk Blood Warriors, and this category was the most restrained by the secret skills of the second Legion!

It was rumored that among the twelve Titans that the mother of Gaia gave birth to, there were two very special descendants. One was a hundred-armed giant. His physical strength was the weakest among his siblings, but his brain nerves were very developed, he could control a hundred different weapons with a hundred hands at the same time and multitask. In order to catch up to his brothers’ strength, he practiced hard and practiced the methods of using the hundred weapons to the extreme, it was also the initial template for the future generations of weapon warriors.

The other one had abnormally developed bones and meridians and was gifted. Once he was angry, his blood would boil and he would be able to stimulate several times his usual strength. However, his weakness was that when he stimulated his blood, he would easily lose control of himself and fall into madness.

That was the original ancestor of the berserkers. It was rumored that the uncontrollable mode of this berserker ancestor was very troublesome to the mother of Gaia. In order to prevent him from hurting his compatriots, and also to ensure that there would be people in the future who could restrain this irritable brother.., so, they created a secret method to appease him. They used a huge amount of life force to extinguish his battle intent, forcing his body into a dormant state.

In other words, the secret technique of the second legion was the nemesis of the Berserkers!

At this moment, under the appeasing of the giant hand, a thick tiredness quickly eroded Ionelle’s will. The restraint from her bloodline made her unable to resist at all, especially after she used the Yang God mode. The dependence of this gene also allowed her body to become quiet without being controlled by her will, enjoying the appeasement of life force... ..

Yes... .. this secret skill could not only dispel her fighting spirit, it could also rely on her strong life force to replenish her qi and blood. This was also the reason why the body of the Berserker’s ancestor could not resist. From the initial design, this move had no malice towards him. On the contrary, it was for the sake of the origin of his body...

This came from the initial maternal love. No matter how naughty a child was, they could not resist... ..

“That’s not right...”holding back her drowsiness, Ionelle struggled to speak, “You betrayed the Liege. You shouldn’t be able to use the Liege’s laws...”

Although she was not a research master of the YIMO, she knew that the host could forcefully break the connection. Naturally, the liege could do the same. It was impossible for her to preserve the Liege’s power after such a long time...

“What if...”the dragon said faintly, “Your liege did not break the connection with me?”

Ionar:“...”

“What if... He pardoned me?”

“I don’t believe it! !”Ionar roared with all her strength!

“I know you don’t believe it...”the dragon laughed. “That’s why I didn’t plan to use this to convince you in the beginning...”

As it spoke, it gently waved its claws, and the giant Gaia form pressed its palms together, completely sealing off Ionelle...

And Ionelle slowly closed her eyes under this power... ..

Was It True?

The Liege Lord pardoned it?

In the end, the Liege Lord didn’t think that it had betrayed us?

Was that so?

“Phew...”the dragon took a deep breath. “What a troublesome girl...”

Absorbed the core, barely able to use some of their own power... ..

The Dragon Rose slowly and arrived at the top of the Emerald Sky in a few seconds at a seemingly slow speed.

The dragon’s eyes grew cold as he gazed into the depths of Seer’s planet.

Here we go, dealing with the last of the Troubles...

Chapter 1294: probing (part one)

“Oh... I was wondering where the Yimo came from to be so powerful. Just by relying on the body of a star-level demon god, he was able to infect a dragon king-level life form like Ysera and such a huge refining array. So it’s him! !”

In the Black Fog, Andrew’s pair of eerie green eyes became extremely serious, and his tone became much heavier than before... ..

The principal looked up at the sky with a complicated expression on his face. At the time of the incident, he was still a silver slime struggling to survive. He earned his tuition fees by cleaning the feces of high-level companions.

I never thought I'd be able to stand up to such a man in my life... . .

I don't know whether to be flattered or insulted...

"What is that?" Vaughn opened her extreme vision and saw clearly that the energy that had previously shocked them was covered by the hands of a giant larger than a planet, and then... .. And then nothing... . .

Such a strong energy, almost lit up the entire jade star energy, was the pair of giant hands forcibly covered.

The strange thing was that although the giant looked enormous, but it did not give a very sharp feeling, but gave a very gentle feeling... . Incredibly gentle. . .

The body is the most primitive land mountains, with the blood-like rivers converging at the navel to form a blue sea, like a beautiful planet full of vitality.

It even made people feel infatuated. From Afar, Vaughn felt that her fighting spirit had subsided a lot, and when she woke up, she immediately felt cold sweat all over her body... ..

From such a distance in the starry sky, the power of the radiation actually almost made her addicted. If she encountered it head-on, she..? Was there any possibility of resistance?

"Gaia's phase..." Andrew said faintly, "To be honest, this is the first time I've seen the true form of the secret skill!"

Queen XI's forsaken force during the Void Gate battle was one of the main forces. The reputation of the ten great liches had been built up during that battle, and they had cooperated with the third force that was also the main force.

The second Legion's Gaia's prime had naturally heard of it many times, but seeing it with their own eyes was the first time... ..

The third force had already been destroyed, and all the Hera family members had died in battle. The Hera family's genes had also been personally collected by the deity academy, so it was impossible for them to leak out.

Then, there was only one Yimo in this world that could use such a secret skill... ..

In the Black Fog, Andrew's expression was incomparably solemn. From the first time the other party had made a move, he knew that this was definitely a tough bone to chew on, but he had not expected it to be so tough... ..

Sure enough, things would not go so smoothly...

Just as he was hesitating, a voice suddenly rang out, "What are you all looking at?"

Andrew and Vaughn looked over at the same time. It was seer who had rushed back.

He said that he was going to prepare something, but it did not look any different from before.

“We are talking about the one in the sky...” Lanaya looked at seer coldly and pointed in the direction of the star giant.

Seer followed the direction that the other party was looking at and suddenly fell into silence... ..

Everyone immediately looked at him, wanting to know what he would say in the face of such power.

After a long while, seeing Xi ye not speaking, Lanaya could not help but ask, “What do you think?”

“I can’t see...” Xi ye replied honestly. ...

Everyone:” ...”

From a practical point of view, what Xi Ye said was actually very normal...

A Level 7 life form naturally couldn’t see so far into the starry skies like star level experts like them, but...

...

Was this the reliable teammate that Andrew spoke of?

“It’s here...” Andrew suddenly said out of the blue.

Everyone’s hearts instantly tightened, looking over, they saw a black dot rapidly growing larger and larger, quickly enveloping the entire sky!

In the starry sky, the Giant Dragon’s huge body was displayed to the extreme. It hovered in the sky, and the entire planet was under its wings!

As it arrived, the blood domain not far away from seer and the others suddenly began to move.

Vaughn looked over and quickly saw that the high-quality blood molecules in the domain were boiling like magma erupting. They began to rapidly split and fuse. The energy intensity multiplied by the geometry of the expansion!

If there were plastic energy experts here, they would definitely think that this mutation was crazy.

The energy of this domain came from the activation star, and the transformation was not very controllable. It required the support of extremely high biological science technology to be able to carry out such an exaggerated evolution. The algorithm was so complicated that even the slightest deviation could cause the structure to collapse, domain explosion!

However, the energy of these blood molecules was constantly expanding at such a rapid and precise speed. They were constantly expanding and undergoing fission in the form of fusion!

Vienne and Lanaya could not help but protect the little guys as they retreated. If this level of energy were to explode right next to them, a small galaxy would probably be destroyed. Of course... As highly sensitive characters, they still had the ability to protect themselves in the face of such a huge explosion. However, it would be a little troublesome if they had to protect the little guys at the same time. ...

However, just as they were worried, the explosion came very suddenly!

The violent explosion of energy shocked Wayne and Lanaya to the extreme in an instant. They quickly pulled the little guys back. However, the huge energy came too quickly. In the blink of an eye, it seemed like it was going to devour them!

Li Goudan was so scared that his face turned pale. This huge energy was on a completely different level from the energy that the female knight had exploded from the sky. She had a feeling that if she was slightly rubbed by the flame, she might be blown to pieces... ..

This feeling was not wrong. With such a high density of energy explosion, not to mention Goudan, even Vaughn's life would be in danger if she was affected by the energy wave!

Making a prompt decision, Vaughn held the two Goudan and retreated!

This batch of little fellows all had extraordinary talents, especially that Feng Doudou, who was a rare elf alien. If she were to send him to the Elf Academy, she was afraid that a bunch of instructors would go crazy for him.

However, she didn't have to.

As a ranger, Li Goudan, a wind demon, and Wang Goudan, a pure human elf, were more suitable. If she could only choose one side, she would naturally give up on the others!

Lanaya grabbed Yunji MU and quickly retreated. The assassins of the Holy Church didn't have such high requirements for bloodlines. They weren't necessarily elves. As assassins, dark descendants were very good seedlings, especially these dark descendants who had yet to take shape.

As long as she cultivated her starcraft and walked in the direction of a weapon suitable for assassination, she would be a top-notch assassin seedling!

Of course, Vaughn's subordinate, Wang Goudan, could also fight for himself... ..

As for the others, she was not very interested!

Andrew frowned and stretched out his hand, wrapping rainmaiden Wugua and little cabbage in the black fog. He did not expect that the other party would actually detonate the domain!

He did not believe that the parasitic Yimo of the former third Lord would not be able to control the energy of a mere small activation star!

Under the situation where most of the developers and elves were protected by the big shots, only brother dog, Pu Yunchuan and the other Titans were left trembling on the spot...

And just as they were in despair, a tall figure blocked in front of them!

Chapter 1295: probing (part two)

The lord's figure had never changed. As an old player, everyone vaguely remembered that year when they first entered the Sea of stars, this guy, who was pretending to be an NPC, greeted the group of newbies warmly and said, "Welcome to the Sea of stars and become my subjects. This must be the most correct choice in your life!"

To most Titan players, Seer's figure was no longer particularly tall. In fact, he was a little thin and weak. However, standing in front of him was just like standing alone in front of the giant void. It made people feel a sense of security... ..

At that time, everyone thought that the void invasion was just a plot of a dungeon. As the base guardian, it was natural for seer to win.

But now, they all knew that this was not a game, so could the current guardian still win?

Looking at the massive energy that was about to devour them, Brother Dog, Pu Yunchuan, and the others stood rooted to the ground, staring at seer. It was just like that time, when they were helpless before the massive void eye. All hope was placed on that one npc...

But could this NPC still be so powerful? Could it still turn the tide like it was back then?

As low-level lifeforms that were not even level 10, they could not tell if the energy before them was powerful or if the Void was once powerful. In any case, it was an existence that could crush them.

Now, they could only count on this fellow who had made them fall into the pit. That saying from back then, "Your choice is the most correct choice in your life," was true...

Not only did everyone look at seer, the isolated Titans like Pu Yunchuan, but also the powerhouses who were rapidly retreating... ..

While Vivian and Lanaya were retreating, they were also staring at seer who dared to take the initiative to block at the front!

They knew that this seemingly low-level little lord was not ordinary, but they could not measure how he was not ordinary. This was a good opportunity... ..

Andrew was also thinking the same thing.

He was the one who was the clearest about Xi Ye's trump card. However, there was a big difference between being able to use that trump card at any time or being able to use it only once. Moreover, apart from that trump card, did he have any other trump cards?

This was also the point that Andrew was most concerned about. Although the situation before him was sudden, it was indeed as Vivian and the others had thought. It was very suitable...

So... how would he solve it?

With such a huge amount of energy suddenly erupting, even if he wanted to stop it, he would have to pay a huge price. The two star-level juniors could not even protect themselves. The result of Seer's attack at this time.., was almost going to be the appraisal of his true position in the future!

Everyone's gaze carried various emotions as they looked at seer. There was anticipation, there was scrutiny. Seer could feel all of this. However, in the face of the expectations of his people and the scrutiny of his new allies, his back was straight, he was clearly very confident!

In the distance, in the starry sky, the giant dragon that created all of this was also looking at Xi Ye with burning eyes.

This was an unstable factor. It could be said that it was the one with the greatest number of variables. As a YIMO, it could feel this very clearly!

Hence, it did not hesitate to use the energy of the entire domain to test the other party!

Boom! !

Under everyone's gazes, the explosive energy instantly engulfed Xi Ye. However, facing this monstrous energy, Xi Ye's body did not have the slightest energy fluctuation, causing the group of people to immediately feel puzzled.

Pu Yunchuan and the others were even more anxious...

They hoped for a boss who could withstand the wind and rain, not a boss who would throw his life away... ..

However, this worry froze on their faces in the next second.

That was because they discovered that the shocking explosive energy suddenly stopped just as it was about to pounce on Seer's face...

Yes, it stopped just like that. It was like a special effect in a movie. When it was about to pounce on Seer's face, it pressed the pause button!

And this pause button seemed to only be targeted at that terrifying energy. Although Brother Dog and Pu Yunchuan were frightened to the point that they were paralyzed, they still felt that they could move. Their gasps were proof of that... ..

The explosion that instantly stopped caused the entire space to become quiet. It also made Pu Yunchuan and the others' embarrassing gasps become extremely obvious.

Wayne and the others, who were still retreating, instantly stopped and looked in front of them in shock!

Including the principal who was also running away...

This... was...

"Reverse!" Xi Ye used the language of the gods to speak spiritually. In an instant, that enormous energy was like a replay of a movie. The naked eye could see it retracting, and the fusion energy rapidly collapsed and degenerated, it was as if it had been reconstructed back to its previous state. In just a few seconds, a huge blood demon domain appeared on the spot again!

The space that had been destroyed by the explosion also quickly recovered. It was as if everything that had happened was an illusion. Everyone watching from behind was dumbfounded!

"F * ck..." Pu Yunchuan could not help but pat his stomach. "I told you our boss was reliable!"

Brother Dog rolled his eyes at this hindsight. He had always been by this guy's side. He swore that this guy had never said anything!

However... It was really as reliable as before... ..

The Law of space and time! !

Unlike PU Yunchuan and the others who only knew that their lord was awesome, Vaughn and the others were even clearer on what this power represented!

In this scene, other than the Law of space and time, there was no other power that could do this!

But How was that possible?

It was normal for an Emphyrean God to possess laws. However, this was in someone else's space. What did using spacetime laws in someone else's space mean?

This meant that this Emphyrean god was crushing the master of this space!

Using his own power to forcefully crush the Master of this space, using the spacetime laws in his own power to forcefully reverse the spacetime here!

But... was this possible?

This emerald dream wasn't small. As an alchemy space, it was considered huge in the entire federation. It was probably at the level of the ten great lords.

Only the ten great lords would be able to suppress the laws here! !

"He... could it be..." Vaughn felt a sense of disbelief rise in his heart.

"Impossible..." Lanaya, who was at the side, instantly understood Vaughn's thoughts and shook her head. "It's not that kind of book. Do you think that people of that level would go undercover? If they really came, we wouldn't be qualified to participate..."

"That's true..." Vaughn stared at Seer. "But this..."

"I see..." Andrew stared at the other party. "It seems that those juniors are right. The new YIMO parasite is this guy in front of us!"

Hearing that, Vivian's eyelids twitched. New Yimo? Parasite! !

"You should have known about it, right?" Andrew looked at the headmaster who had a blank expression. "Why do you look like that?"

"I'm just an employee... I don't know as much as you think..." the headmaster put away the blank expression on his face, he forced a smile. "I know about the existence of that Yimo, but I don't know how powerful it is to be able to snatch such a powerful law from that one!"

Chapter 1296: Each of you has your own thoughts!

Andrew stared at the principal with undisguised scrutiny in his green eyes. He seemed to have some doubts about the principal's words...

Although the principal had not stepped into the sea of life, his position in the academic circle was not low. Otherwise, he would not have been hired by the White Dragon Sacred Academy as the Dean of a department... ..

Such a figure was also an honored guest in the great Lord's forces. It was not a problem for him to be the chief academic officer. Even among the ten great Lord's forces, he was someone who could obtain a considerable position. If he was under Empress Xi., even if he was not at the level of the ten great liches, he was at least the chief academic officer of the Space Department!

As a small lord of several levels, it was normal for seer to be too small to directly sign the principal's contract. However, to attract such a figure to join him, he was actually able to keep the core secret a secret. Andrew did not believe it at all... ..

Facing Andrew's naked gaze, the principal pursed his lips slightly. It was not easy for him to explain.

He could not say that his later life had been too miserable and that he had been attracted by a small lord showing off a group of genius students, right?

It was too embarrassing...

Forget it, let the other party misunderstand him...

Seeing the principal's stern face and not saying anything, Andrew did not continue to ask. Instead, he turned to look at Seer.

This guy was indeed more interesting than he had imagined. He had the power of a seal left behind by a big shot. That power was estimated to be the work of a top figure in the universe.

It was either the ten great lords, the few vice principals of the deity academy, or a top-notch Sea of life expert like the royal guardian of the Star Elves, only such a figure could seal a low-level life form with a power seal that could almost instantly kill his soul.

Andrew did not dare to test the specific person. When he was face to face with seer, he could clearly feel that once the mask was removed, he would definitely die!

No backup plan on his body could save him!

Therefore, at that time, he did not hesitate to retreat back to the death realm, wasting a lot of time and spending a lot of effort to come back from the death realm. If not for that period of time, to be honest., there wouldn't have been so much trouble later.

But even so, if he returned to the scene at that time, Andrew would still do it. Because if he escaped back, he would still have a chance to come back. If he didn't escape back, he definitely wouldn't be able to survive!

Other than that sealing power, it was the Yimo that was parasitizing his body... ..

It wasn't that a small lord couldn't be parasitized by the Yimo. Most of the YIMO targeted the small lord when they chose the parasitical body. The Yimo used the unique talent of their race to see certain

fates., it was easy to choose small lords as investment targets to parasitize their bodies and grow steadily.

If Seer's Luck was amazing, it was not impossible for it to be parasitized by a YIMO. However, it was a huge problem for it to be parasitized by such a powerful Yimo.

Different from the newborn yimo, there would still be some experienced yimo in the universe. When the host lord could not satisfy them, they would not hesitate to jump ship, or even kill the previous host Lord, when they looked for the next lord, they would choose someone with a more basic foundation.

This was similar to working in the workplace. With a veteran's resume, they would naturally have higher standards when choosing a company.

And this Yimo that possessed seer was definitely not a newbie!

To be able to snatch the most crucial space-time law from the third Lord's previous parasitic Yimo, this was definitely a powerhouse of the same level! ! !

That's right, the first thing he saw was that the space-time law XI ye was using was snatched from this Yimo!

Otherwise, with his size, how could he use such a level of space-time law power?

A Yimo that could snatch a law power from the third Lord had actually joined such a small lord... ..

So... who was this little guy?

"Interesting..."

In the distance, a hint of surprise flashed across an YA's face when she saw this scene. "It seems that senior is right. This little guy isn't simple..."

"I've long felt that this little guy isn't simple..."Vogu said faintly.

If he was simple, he would have killed him when they were together earlier... ..

"It's getting more and more troublesome..."an ya sighed and looked at the sky. "It's about to start. Are You Ready?"

Vogu nodded. "I'm waiting for you to give the order at any time..."

"You don't have to talk like that..."an YA smiled. "We're allies. In the future, the fairy tribe will need a guardian of the Sky God!"

Hearing this, Vogu took a deep breath. His eyes, which had always been simple and unsophisticated, revealed a trace of excitement!

The Guardian of the fairy race!

The fairy race was not a royal family, but their status in the federation was higher than many royal families!

Being able to become the guardian of their race was equivalent to standing at the top of the Pyramid of the federation... ..

As for the Blue Spirit Race?

Hehe...

The Blue Spirit race already had their own guardian. Even though that undying old man was weak, he wasn't that bad. If he wanted to succeed him as the guardian of the Blue Spirit race, he would probably have to endure until he started to doubt his own life...

Furthermore, there were quite a few competitors. The blue spirit race was a large race in the universe, and there were quite a few outstanding juniors. Just the number of candidates he knew was over a hundred, and all of them were born with legitimate bloodlines. It was a completely different matter compared to a race like him who was despised... ..

Unless he had a crushing advantage, he wouldn't have a chance at all. On the contrary... .. The Fairy Race's side was very pure... ..

Other than an YA in front of him, the fairy race had never had a second god. And even if an YA returned to the federation, according to the law of the undead, she could only go to Queen XI's side. It was impossible for her to become the guardian of the fairy race... ..

The environment was simple, and there were almost no competitors. This promise was very reliable...

Once he became the guardian of the fairy race, he would directly take over the diplomatic resources of the fairy race over the years. Not to say that his status was on par with the Blue Spirit Guardian, but at least he was on equal footing!

He would continue to compete with the descendants of the large families who discriminated against him. He would endure their discriminatory attitude and take advantage of the situation. Or should he find another way and overtake them at a bend, directly sitting on the same level as the leader of the Blue Spirit clan, so that those big families who discriminated against him would instead try to rope him in.

Even a fool would know what to do!

Taking a deep breath, Vogu suppressed the excitement in his heart and said with a smile, "I naturally believe in your character, senior, but... can you completely represent the fairy clan?"

Such a huge matter was naturally not something that could be trusted with just a casual promise from the other party. Although the other party had never broken a promise ever since the start of the collaboration, it did not mean that the other party was worthy of trust at times! After all, the previous sincerity could be used as a foreshadowing for the subsequent betrayal! ! !

In the Black Fog, an YA's eerie green eyes looked at the other party, but she was not angered by the other party's straightforward suspicion. In the black fog, her pale hand gently stretched out, and a contract instantly formed outside.

"A deal?"

Sky God contract! ! !

Vogu could no longer suppress the excitement in his heart. His voice began to tremble, "Alright... a deal! ! !"

Chapter 1297: just like before!

When the deity contract was drawn up, it meant that the other party could not go back on their word. Even if the fairy tribe did not admit to it, Anya would have to pay a huge price for breaking the contract!

Vogu did not think that the fairy tribe would sacrifice Anya. After all, it was better to have two great lords to rely on than to sacrifice one for enmity... ..

The Guardian of the fairy tribe...

Vogu took a deep breath. This had already exceeded his expectations. Originally, he had been looking forward to this adventure as long as he had the resources to become a great lord... ..

"What should we do next?"

After signing the contract, Vogu acted like an ally and asked directly what to do next.

An Ya looked at the sky and said, "Of course, we have to get the results first!"

At this moment, the giant dragon was circling in the sky, and the rock demon territory in front of them was also changing rapidly. However, it was different from Seer's territory. Under the precise control of the territory, although the energy was expanding rapidly.., it passed through a black hole in the sky very smoothly.

Through the black hole, Vogu felt a huge amount of vitality. something..! It was being activated!

He instantly understood what an ya was talking about... ..

The damaged core could not be repaired in a short period of time. However, once the infected core could be snatched away, it would be a huge battle force. Other than the laws, there was also the powerful Primordial Titan. To a deity, they could all be controlled...

Vogu looked at the giant dragon circling in the sky and said faintly, "I'm afraid it's not that simple to snatch food from its hands..."

"We still have to snatch it. Are we going to wait for Death?" An Ya smiled. "It's starting..."

As soon as she finished speaking, a huge amount of black rock elements soared into the sky. The Rock Demon in the domain began to slowly disintegrate. Its huge soul was absorbed into the black hole along with the huge amount of energy.

Vogu followed the energy and looked inside. The powerful suction force of the black hole completely distorted space and time. The soul of the Rock Demon became abstract in this huge suction force. Vogu lost his vision because of the distortion!

However, it was impossible to defeat a mechanical overlord of a large faction. As the domain law was slightly activated, the light energy in Vogu's vision underwent an extremely subtle change. In the huge and complicated energy vortex., it remained unimaginably stable.

The plastic energy domain was one of his faction's technology trees that had developed the best. Vogu was obviously adept at adapting to changes in energy... ..

Through the distorted black hole, Vogu could clearly see where the energy was going.

The massive black rock elements, after evolving through complex calculations, turned into very stable energy and arrived on a massive lifeform sleeping in the starry sky.

It was an incomparably massive Titan, which was equivalent to a level eight or nine planet in size... ..

And it was a rather primitive form of Titan...

Research had shown that the Titan was initially born from the blazing core of some rare worlds, the soul of the world. After several years of slumber, it finally awakened into a living individual.

The original Titan body was a life form that had been activated by the planet itself, and was the first attempt of the universe's consciousness reincarnation organisms.

"It was quite successful..."vogu muttered to himself when he saw the giant Titan body.

"If it didn't succeed, we wouldn't have been attracted here..."Anya narrowed her eyes and said.

To be honest, she was quite excited. The Moon Elves were indeed worthy of being the masters of their race. Even though they had declined, they could still find hope in desperate situations and develop the crazy idea of the universe., perhaps only a former universe ruler would dare to think and do such a thing!

While they were talking, the huge black rock elements gathered on the sleeping Titan, causing the huge Titan that was covered in mountains and rivers to be covered in a thick layer of armor. In just a moment., the black metal formed by the Black Rock elements armed the huge Titan to its teeth!

Black and red flames covered its entire body. A Titan that was peaceful and full of vitality instantly turned into a giant steel beast. Its entire body was filled with a dangerous aura!

Sizzle sizzle...

After successfully equipping, the sleeping Titan opened its eyes. Its golden pupils flickered with a confused light, but it instantly became pleasantly surprised. It was obvious that this consciousness did not come from a pure Titan living soul, it came from the rock demon in the Black Rock Domain: Bogus!

"I thought that guy was talking nonsense!"Stretching his body and accompanied by a simple and honest voice, the giant slowly stood up. With just a slight movement, the huge airflow formed distorted the space where he was!

"I'm not used to it..."bogus touched his head honestly.

"Just for now... I'll get used to it in the future..."a mechanical voice sounded in bogus'ear.

Bogus looked around, but he still couldn't find the owner of the voice.

"After I help you fight this battle, will this body really belong to me?" Bogus tilted his head and asked.

Although bogus' personality was the most simple among Bolton's subordinates, he was still a legion commander and had experienced many things. He still had some basic knowledge of the universe.

If the undead wanted to survive in the physical universe, a good body was the most crucial. The highest consumption of an undead in the universe came from the replacement and maintenance of the body.

Obviously, this heavenly fate sea-level original Titan body could be said to be the most advanced body in the universe. It was a unique existence. With it, he probably wouldn't have to worry about the replacement of the body for the rest of his life.

As for maintenance?

That wasn't a problem he should be concerned about. After returning to the abyss, he would naturally have the clan's big shots help him with maintenance... ..

Even if the clan didn't accept him as he was now, he could still seek refuge with that Queen XI. He heard that as long as it was an undead, she would be willing to accept it without any major crimes...

He... Should... ..? ... Not commit any major crimes, right?

Bogus tilted his head and thought about it...

Fighting and slaughtering balls should not be considered major crimes, right. After all, it was a war... .. and he was only following orders... ..

"The contract has been established, you don't have to worry..." the mechanical voice replied bogus with certainty.

"But there are loopholes in the contract..."

A faint voice interrupted the mechanical voice. Bogus immediately turned around to look and was pleasantly surprised. "Sab?"

Behind him, a huge ball of blood energy gathered in the air and hovered around a native Titan of the same size. Unlike the undead bogus, Sab was alive and had a certain level of self-awareness. He had a certain degree of control over the energy of the blood demon domain...

Sab stared coldly at a certain spot in the void, not sure if he could see the YIMO itself., his voice was cold as he said, "For example... the contract said that if we helped you, we would be able to obtain anything, but there was no guarantee that you would not attack us on the way to help you, just like just now! !"

Chapter 1298: I'll do it myself!

"Just like what you did just now!"

Bogus could hear Saab's voice clearly. It was extremely cold!

The mechanical voice did not answer immediately. Instead, it fell into silence. It was indeed difficult to refute what the other party had accused just now.

In order to test that little overlord, it had directly detonated the blood demon domain. Of course, it had also detonated Saab within the domain, detonating Saab. Saab's soul could still be used after it died, but it was also really dead.

If seer had not used the space-time law to trace back to the blood demon domain, Saab's body would have been reduced to dregs by now... ..

The reason why he did not resist after Nefer ambushed him and obediently went against Vaughn and the others was because this guy had promised him a way to live.

He guaranteed that he could graft the soul onto the original Titan.

The original Titan was the most primitive life form created in the universe. It was older than the Dragons and was the most similar to the original form of life in the material universe. It had a high tolerance for everything and the success rate of grafting was not small... ..

And SAB's body had already entered an irreversible decline. This might be his only way to live...

Who would want to die if he could live?

Therefore, SAB did not hesitate at all and fell to the other party, but... "...". In the end, he was betrayed very quickly.

"It doesn't affect you, does it?"

The Yimo's faint voice sounded, "In the initial plan, your blood demon body was originally meant to be abandoned. I only let it be earlier..."

"I never said that I would abandon it...". SAB said coldly, "Although it's close to exhaustion, it can still be used. If the grafting doesn't succeed, at least there's a way out. And you casually prepared to cut off my escape route. You didn't even need to inform me. How would I know that in the future cooperation, you won't do anything to us outside of the contract?"

As soon as he said this, bogus immediately revealed a vicious expression. He naturally trusted SAB!

"So What? Do you have any other choice?"

Facing the questioning, the Yimo no longer tried to hide it and asked straightforwardly.

Saab immediately choked and his expression became extremely ugly.

To be honest, the reason why he did not make a move at the first moment and instead spoke in a complaining manner was because he could not do anything at all.

The other party was right. He had no other choice!

The situation instantly became deadlocked. Sab's face was extremely gloomy, and the majestic blood molecules began to boil along with his emotions...

Bogus was silent, but his eyes were firm. If he had a choice, he naturally didn't want to go to the death realm. Being able to stay in the material universe was another way to live.

But back then, he could stand at the front for his teammates, and now he could too. Sab only needed to say a word, and he was willing to fight back with all his strength. The result wouldn't be that bad anyway.

As for whether it was worth it or not?

Bogus didn't think too much about it. Its logic was very simple. Saab was smarter than it. If it compromised, then it would compromise. If it resisted, then it meant that it was useless to compromise. Then, bogus would resist along with it.

It sounded a little brainless, but bogus had followed Saab for so many years, and he had never suffered a loss. He had even made it all the way to the commander. His father had a very strong back in the clan, especially those who wanted their juniors to enter the Bolton force and needed his care. After hearing his father say that he had received gifts with soft hands, the elders who were ranked higher than him were now being polite to him.

Unfortunately... .. He could not make his father continue to be strong-willed. He did not know if his father would scold him for being stupid like before after knowing the news of his death... ..

But it was not wrong to believe in Saab!

In the end, SAB sighed and did not choose to go through with it.

The majestic blood molecular energy quickly gathered on the Titan's body and wrapped around its huge body!

The powerful blood energy formed countless blood-colored fibers on the huge Titan's body. The dense fibers gathered and finally wrapped into a thick biological armor. The Majestic Blood Qi continued to pour in, it made the Titan's life force characteristics become abnormally strong.

Slowly standing up, the two towering Titans successfully armed themselves... ..

"My promise is still valid..."the Yimo saw that SAB did not insist after his compromise, instead, it tried to speak as gently as possible, "This alchemy world has enough resources to accommodate the two of you. The background behind you also makes you very useful. If it is not necessary, I will not abandon you!"

These words were realistic, but they were actually more convincing...

"I hope it's as you said..."Sab replied coldly.

Without saying anything else, a huge teleportation beam descended from the sky in front of the two Titans.

SAB did not hesitate and walked into the teleportation array. Bogus glanced at SAB and silently followed him. Sab did not say anything to him, but it was not wrong to follow SAB. He had done the same thing in the past...

“There are really such simple-minded people everywhere...”the low voice of the YIMO sounded after bogus obediently disappeared into the teleportation portal.

It had watched the Bolton force and these demon juniors grow up. Among these juniors, it actually liked bogus more. This could be seen from the fact that bogus was able to successfully become the commander of the army, if it had not helped in the dark, how could a stick like bogus be able to get to where he was today so smoothly?

To be honest, if it was not for Bolton’s narrow-mindedness and the fact that bogus had followed Saab to explore the planet back then, Saab would not have been so severely injured.

It was not bad, right? Compared to other demon descendants, these two fellows were indeed easier to subdue and become his subordinates. After all, one of them did not have any opinions, and the other did not have any sense of belonging to the traditional family factions...

If it was successful, it indeed wanted to leave them at the end...

Thinking of this, the Yimo’s vision once again returned to the planetary battlefield, the huge Dragon King’s body...

Hovering in the starry sky, looking down at those who had already united to fight against it, the huge dragon’s mouth revealed a hint of a smile. “Success or failure depends on this one move...”

“That’s...”

Soon, a huge teleportation array appeared, and two incomparably huge giants appeared in the sky. Huge Shadows instantly covered the sky, and the entire continent was covered in them!

Before they could do anything, the huge pressure made Eggface and the others obediently lie on the ground, unable to even raise their heads.

“It’s so uncomfortable...”Eggface’s face was almost stuck to the ground, as if he had encountered a heavy pressure. Half of his face was deformed, and his speech was indistinct. ...

“I’m used to it...”brother dog pursed his lips. They were all big shots with Dragon Balls, and their status was no different from those cameos who watched the number one martial arts tournament in the world. ...

However, if they died from an unknown AOE, would there be a divine artifact like Dragon Balls to resurrect these small cameos... ...

And the one with the most complicated expression was none other than Vera...

She looked at the blood-red giant in the sky in a daze, and no one knew what she was thinking.

Sab, who was in the sky, also saw Vera. He nodded slightly, but he didn’t avoid her. Instead, he walked straight towards them.

“SAB!”Bogus said in a muffled voice, “Shall I fight over here?”

Sab didn't even turn his head. He directly shook his head and refused, "I'll do it myself!"

Chapter 1299: the beginning of an intense battle

"Saab..."

Looking at the blood-red giant, who was approaching from the sky with heavy steps, Villafa couldn't help but ask... ..

Even though it had changed greatly, that familiar feeling told her that it was Saab... ..

"Is that you, Saab?"

Villafa asked again.

Her voice was filled with anticipation and anxiety, which made Grandpa Lu's heart ache...

SAB stopped in the air, facing Vera through the air. A pair of blood-red pupils replaced the Titan's golden pupils, and the cold eyes that looked at Vera had a gentle expression.

"This guy has consciousness?"

The principal and seer could not help but ask.

"He has always had it..." Lanaya replied coldly from the side. "When he was in the blood demon region, he had actually kept his consciousness. If he was a marionette that was purely controlled, he would have been killed by US long ago!"

As soon as these words came out, the principal immediately reacted...

Perhaps... They were wrong at the beginning...

Indeed, Vaughn and Lanaya were both top-notch agility experts. An assassin and a Ranger were definitely top-notch in terms of seizing opportunities. If SAB had been purely controlled from the start when facing these two people., without the ability to control himself, even the blood demon region would not be able to deal with the combined attacks of these two people.

When Lanaya came out to describe the battle situation, she had also said that SAB had extremely experienced battle experience and did not leave any opportunities for them.

However... Experienced experience was impossible to display when he was completely controlled... ..

In other words, although shadeling NEFAL had forced Sab to join the Yimo's camp at the beginning, SAB had been willing to serve in the end. At the very least, he had not resisted...

"Something's not right..."

The principal frowned...

He had played a part in designing SAB before. He had personally witnessed sab risking his life for villafa, but why was it this time... ..

“Could it be that the Yimo has a profound spell that can potentially affect the mind?”The principal muttered, “If it is... then it will be more troublesome...”

Seer, who was at the side, was stunned when he heard that. “Is there such a thing?”

“There is...”the principal’s gaze was deep as he said.

Changing a person’s personality required a long period of psychological influence. It required a large amount of time or some stimulating things to produce a huge impact before it could be done. This kind of thing was very difficult to control artificially.

However, it wasn’t impossible for the creatures of the spirit system universe.

During the principal’s research on the creatures of the spirit system universe, he had seen that those outer-realm demons that had broken through the barriers from the outer realms could form special brainwaves through some whispers, they could affect a person’s personality in an extremely short period of time.

The originally kind and honest commoners would become dark, extreme, and fanatical. Very quickly, they would be developed into loyal believers!

However, most of the people who could be influenced were natives. It was rare to see people who could directly influence high-level life forms in the federation...

However, it was hard to say. At that time, a professor in the project team had proposed an idea. Perhaps it had already been influenced or even infiltrated, but we just didn’t know... ..

When these words were said, people couldn’t help but break out in cold sweat. The vice principal who led the team directly rebuked the professor who had a high status.

After all, this statement was too much of a conspiracy theory. Without evidence, one could not simply say it... ..

But thinking about it was extremely terrifying...

If it was really as the professor said, it was not that there was no evidence, but that we did not know, it meant that many of the higher-ups of the federation might have been affected. It was just that when facing high-level figures, they acted more discreetly... ..

Otherwise... .. Why would the third overlord, who had originally made a significant contribution in the Battle of the Void Gate, collude with the Void?

It was said that the professor who had initially raised the question had met with an accident outside a few months after that project... ..

At the thought of this, the principal vigilantly looked at his few allies.

If that Yimo had such an ability, then he would have to be careful of some of his allies, because these people who seemed to be on the same side as him might suddenly turn around and stab him...

“I think maybe that’s not the case...”after listening to the principal’s analysis, Seer shook her head and looked at SAB.

“Eh?”The principal was stunned.

“I think... maybe he hasn’t changed...”Seer looked at SAB and said.

“Sab...”villafa took a step forward with a blank look on his face.

SAB looked at villafa indifferently. His pair of blood-red eyes made it impossible to see what he was thinking... ..

“Retreat!”Vaughn suddenly took a step forward and pulled villafa back!

In the next second, the blood-red domain enveloped over. The life force in the surrounding space was rapidly transformed by the domain, turning into countless blood molecules surrounding the area. The entire space was instantly filled with a layer of blood-red color and a thick bloody smell... ..

“This is even more troublesome!”

Lanaya followed behind and said in a deep voice, “Previously, the domain was fixed, and the blood molecules were also in a fixed form that gradually weakened from the center to the periphery. There was at least some chance, but now...”

Vaughn took the opportunity to nod his head. Not to mention this huge and terrifying Titan body, but the change in the domain had raised the difficulty by several levels!

In the past, the domain was fixed at the core. The blood molecular energy was fixed from the inside out, and every part of the strength was fixed. And once the blood molecular energy was used up, the opponent had to change the location to collect it again, in other words, as long as one’s positioning was correct, it could be predicted.

But now, it was different. The entire domain revolved around people. The blood molecular energy of the entire domain was wrapped around the enemy’s body. Wherever they went, the biological energy would be converted into blood molecular energy to feed on the blood-colored armor, it had almost completely strengthened the entire domain to the body of a living creature.

If it was said that they had a chance to deal a fatal blow to Saab before, now... ..

Thinking of this, Wayne and Lanaya looked at Andrew and seer as they retreated.

The two of them couldn’t see how to fight anyway. If they wanted to fight the enemy, they could only see what the two big bosses behind them would say...

“I’m not very lucky...”Andrew also retreated quickly. Looking at the huge blood giant, he sounded a little helpless. ...

“If it’s possible, I’d rather fight the other one...”

Vaughn and Lanaya looked at the other Titan in the sky.

It was a huge Titan that was covered in black rock armor. The solid black rock elements had covered the Titan with a layer of airtight armor. With just a glance, Vaughn could tell that the strength of the armor was definitely legendary. His most powerful armor-piercing equipment probably could not even pierce through the basic skin... ..

Compared to that, it was obvious that the one in front of him had a better chance, right?

Facing Vaughn's doubtful gaze, Andrew did not reply. Instead, he looked at the giant dragon that had not moved in the sky.

He did not think that that guy would keep watching.

Now, the problem was not these two Super Titans with domains, but the Dragon King himself who was going to pin down... . .

Chapter 1300: Fusion!

"My Luck is pretty good..."

Vogu looked at the Black Titan that was slowly approaching and took a deep breath as he laughed.

Billy, who was by the side, frowned. She could not tell which part of his luck was pretty good at all. Even without scanning it, she could tell that the strength of this black rock element was extremely exaggerated. It was probably not inferior to a complete set of legendary armor.

Originally, it was not realistic for such a huge creature to have a complete set of legendary armor. However, if the other party was able to do this with his domain, it would be even more troublesome.

The problem now was not to find the weakness of the native Titan, but to worry about whether it could break through the defense first... ..

Comparatively speaking, the creature armor on the blood giant was much easier to target. If it did not have any special functions...

Boom! !

Just as he was thinking about it, the giant Titan had already walked over. Its momentum was extremely great. Each step it took was clearly stepping on the sky formed by gas, but it gave off a dull feeling as if the earth was shaking. The entire planet trembled because of it, one could even see that the sky was shaking until cracks appeared!

There was only one reason for this scene that did not conform to the laws of physics, and that was the domain!

In the next second, the sky shattered like a mirror. Countless pieces of debris fell like snowflakes, but when they landed on the ground, they formed black dust. And these dust particles were obviously extremely dense black rock particles!

Obviously, as the domain was activated, the entire space had already started to become elemental!

"Sir! !"Billy urged.

The opponent's domain had already spread out. If they did not respond, they would fall into a passive state!

The mecha troops behind them all subconsciously retreated.

Billy immediately used the psychic link to appease everyone to line up, but in his heart, he did not blame them for their reactions. If he were in their shoes, he would definitely have retreated the moment he encountered such a large energy reaction... ..

Billy looked at the notification of the energy prediction in his mecha. It showed that it was impossible to predict!

Impossible to predict...

These four words made Billy's heart skip a beat!

Her mech was the top god-chosen mech of the Federation. Every part of it was a cutting-edge technology of the federation. The energy prediction device had been meticulously designed by several energy shaping masters within the faction, it could detect the energy index of a level nine star-ranked storm within a few seconds.

But now it showed that it was impossible to predict?

If it wasn't because of the interference, then it was because the opponent's energy was too large, causing it to exceed the testing range of the testing device!

The former would cause the next commander to be in an extremely passive position, because it was impossible to test the precise data. Many times, the opponent's attack strength needed to be guessed by oneself, and it was very easy for mistakes to occur, which required the soldiers to use their lives to test.

If it was the latter...

There was basically no need to fight...

"It really is a life sea level domain!" Vogu said in a deep voice, "Just as you said, the guy lurking on Bolton's body is not a simple Yimo. Could it really be that guy?"

"Is it all up..." Anya retreated to Vogu's side and said, "Are you ready?"

Vogu's eyes flashed with hesitation, but he eventually nodded. "Yes!"

As he spoke, he opened his arms, and his entire body emitted a faint white light...

Billy, who was at the side, was stunned. As a blue spirit, she naturally knew what the Overlord was doing. The overlord was activating the ethereal mode!

The ethereal mode was a secret technique developed by the Blue Spirit clan. It could compress one's soul to the limit in the body, making room for other souls!

This method was usually used in war. Blue Spirits were rich in spirit masters and mecha operators, but their bodies were weak. Most of the time, they would use biological shells to carry their powerful spirit bodies. In war, they were very easy to destroy.

Once the biological shells were destroyed, if they could not find a new body for a period of time, they would be guided by the laws of the death realm. Once they were contaminated by the laws of the death realm, the Blue Spirit's spirit body would be turned into a spirit of the dead, after becoming an undead,

it would be an undead if it entered the body again. It would be summoned by the death realm at any time.

In order to avoid the risk as much as possible, this secret technique appeared within the Blue Spirit. It was used to save its compatriots. On the battlefield, if its compatriots' bodies were destroyed, its compatriots could use the Void Spirit mode to compress their spirit bodies, then, it would absorb its compatriots' spirit bodies into its own body and temporarily share the body.

There were even people in the logistics department who specialized in this. They controlled thick and hard large shells to save their compatriots whose shells had been destroyed. A single shell could usually hold hundreds of their compatriots of the same level...

However, it was not a good thing to use this kind of secret technique in front of a top-tier undead... ..

It was equivalent to making room for the other party...

"My Liege?" Billy was instantly shocked...

Before he could stop her, Anya had turned into a green light and directly entered Vogu's body!

This scene made Billy and the mechanical legion behind her freeze on the spot...

They had never thought that such a thing would happen...

"Phew..."

After the green light entered Vogu's body, Vogu started to tremble. Clearly, the powerful spirit body was somewhat unbearable for this star-grade astral body... ..

At the first moment, it felt as if he had been struck by a leprosy...

Billy, who was watching from the side, did not know what to do...

It was obvious that Lord Vogu was willing to stop it. As a subordinate, he naturally would not take the initiative to expel it. However, was it really alright to just let it be?

While he was hesitating, the trembling vogu quickly calmed down. His bones made cracking sounds as he stretched out. When he raised his head again, Vogu's originally purple God's eye was covered in a strange green color...

It was obvious that he had been possessed by an undead...

"Sir?"

Billy cautiously called out from the side...

"Your sir no longer exists..." Anya's faint voice was heard... ..

Billy's hair immediately stood on end. He was so vigilant that he wanted to retreat.

But in the next second, another voice sounded again, "Don't scare them..."

Vogu's voice sounded a little weak, as if he was overdrawn... ..

“Sir?” Billy heard his own Sir’s voice and quickly asked, “How are you?”

“I’m fine... Don’t worry...” Vogu replied weakly, “Organize a mecha team and prepare to cooperate in battle...”

As he spoke, he asked with a questioning tone, “Can you use it?”

“Yes...”. “As expected of a mutant. You have extraordinary talent. If it were any other species, it would definitely be difficult for their bodies to withstand my spiritual power. The one that can accommodate my spirit body can also accommodate your own body. You are indeed a freak among the elves.”

Freak?

Billy was stunned when he heard that. Then, he took a deep look at Voku.

This guy... knew the real body of the Liege!

As if he had seen through Billy’s thoughts, the corner of Vogu’s mouth slightly curled up after being possessed by Anya, there was a strange smile on his face. “I knew it earlier than you. Your Liege was able to reach this stage today because I had put in a lot of effort...”

Billy:“!!!”

Facing Billy’s shocked expression, Anya didn’t say anything more. She slowly walked forward and faced the giant Titan that was slowly walking towards her in the sky.

“It’s a familiar feeling that I haven’t felt for a long time...” facing the domain that was coming at her, Anya’s expression was calm. “The body of a god is really different...”

Domain... Open!
