

A Bunch 1341

Chapter 1341: The Awakening of Lei Xue and the return of rain woman without a melon!

“Girl, you... aren’t joking, right?”

Lei Xue’s reply made the two old men suck in a breath of cold air. It took them a long time to react!

“I’m not joking...”. Lei Xue shook her head expressionlessly. “You don’t know what kind of person senior rain woman is. I feel that no matter how meticulous I am, it’s impossible to hide it from her. So as long as I do it, as long as she can come back, there’s no difference between admitting it and not admitting it.”
“... “...”

“Is that so...”elder Li took a deep breath and snapped back to his senses. “...”.

The intelligence department had done research. The computational ability of a developer’s brain was extremely exaggerated. If a person who was already good at calculation obtained this talent, it would definitely be a very scary thing, as the only level 6 developer in the base, Raina’s computational ability had probably already surpassed the artificial intelligence in the level 3 civilization model. In front of such a life form that was superior to machines, it was very disadvantageous to calculate the details.

Therefore, the intelligence department’s advice to them was that it was best not to scheme against that person... ..

Although this result was disapproved by some old politicians, elder Li himself was an engineering student, so he did not reject the idea of such a data stream. He also had a certain degree of agreement, so when he heard the concern of Lei Xue,. He instantly expressed his understanding... ..

“If that’s the case... .. Actually, there’s no need to rush. Take Your Time... .. Elder li quickly said, “Keep your position first. Even if Guo Xiaoyun wants to take back the rights of the main base when she comes back, she won’t completely exclude you. When that time comes, we’ll take our time...

“It can’t be done... .. .”Lei Xue shook her head. “If you don’t get some information before she comes back, you won’t have a chance at all when she comes back. Please don’t doubt this. The shrewdness in your hearts is nothing compared to the level of a new life form... “...”

“Eh...”

Elder li choked. Elder Lei said with a dark face, “Then what do you think?”

“Didn’t I say that?”Lei Xue laughed, “Now, I’ll give you as much information as I can about Huaxia City. When senior comes back, I’ll surrender myself...”

“Why?”Elder lei tried his best to keep his temper.

In his opinion, it was extremely foolish to give up on the long-term for the sake of a momentary gain. The key was to give up on his own future. Right now, the Lei family was almost relying on Lei Xue to gain an advantage among the many competitors. Once Lei Xue was implicated.., this advantage of the Lei family would quickly disappear.

Lei Yong and Lei Ming were indeed very hard-working, but their qualifications were indeed mediocre. If they wanted to have any achievements in the New World in the future, they definitely needed Lei Xue's support from the rear. At this time, if Lei Xue were to sacrifice herself, elder Lei would be the first to be unwilling... ..

"Why did you do this..." Lei Xue narrowed her eyes, revealing a hint of confusion as she muttered, "Perhaps... it was because of selfishness..."

"Selfishness?" The two elders were instantly stunned...

"Actually... .. many times, I really envied senior rain woman ... "..." lei xue smiled and said, "Her personality can really live well. I only understood after I came into contact with the authority of the main base why the Lord would give her such a huge authority. It's because senior rain woman's talent far surpasses ours, and her attitude towards things is also more thorough than ours "... .."

"The feelings of the nation, the righteousness of the country, and even the common blood of humans will not be a burden for senior. She will very rationally choose the path that is best for the overall situation, because she has placed this new faction first. As for the classification of the people within the new faction, she doesn't care whether they are Chinese, Western Europeans, or even not humans... . She doesn't even care... .."

Li:"..."

Looking at the confused Old Li, Lei Xue Smiled, will be the first city after the elven population preferential plan to Old Li, old Li looked at the instant after Red Face!

"Angor... how could she do that?" Lee gnashed his teeth.

Lei Lao in one side sneer way: "Alien, you expect her to do how far?"

Elder Lee:"..."

The two old men were obviously pissed off by the plan, but what made them even more upset was the fact that the plan was approved by the general base!

There was a reason behind it...

Angor's plan was obviously to abandon the Titan players who worked for the first city. Anyone with a bit of political knowledge could see that. Of course, those brainless people who flattered foreigners were the exception...

But Angor submitted the plan directly. What did that mean?

She was trying to test the base's attitude...

It was an inhumane choice, but it made sense. The reason was stated in the application. It was for the future of the first city, which was true.

The first city needed so many strength-type players to complete the first-generation resource collection, but the first city did not need them anymore. That was also a fact... ..

The city Lord had the right to manage the city himself. In principle, he did not need to ask anything from the main base. However, Angor did it anyway. He promised to do his best to accommodate the Titan players who had contributed to the first city. To provide a more feasible path to the first city, but he did not specify what it was...

It was obviously ambiguous...

This was a test of the base...

The manager of the base was Guo Xiaoyun, and Guo Xiaoyun was a Chinese!

As the manager of the base, as the designated manager of the alien forces, could the Chinese players be selfish? This was what Angor was trying to find out.

The approval clearly indicated that the manager of the base, rainless melon, did not show any favoritism, at least in terms of actions... ..

Elder Li looked at the approval written on it with a complicated expression. In fact, they had long sensed that Guo Xiaoyun did not have too many ethnic feelings, but he and elder long had never given up and had still tried to play the emotional card. Now it seemed that it was indeed useless... ..

"I will give you all the information on the other five major cities... .. Lei Xue laughed, "But it can only last until senior returns. After that, there's nothing I can do. However, you don't have to worry about what senior will do to you in Huaxia City. After all, things have already happened. Naturally, she won't go and make things difficult for a city management organization. This will not benefit the entire faction. At most, she will only blame me...". "..."

Elder Li looked at Lei Xue and opened his mouth, but he couldn't say anything. Of course, he knew that he couldn't just blame her. It was very likely that he would ruin Lei Xue's bright future. He might even kill a chicken to warn the other people working in the main base... ..

However, he couldn't say anything to make him ask Lei Xue Not to do this. Not to mention that Lei Xue had already made up her mind, even if he hesitated, he wouldn't give up this opportunity for Huaxia City and the players in Huaxia City in the future. ...

Elder lei was anxious and helpless. He wanted to persuade her, but it was not easy to do so with elder Li here. Once the information was handed over, there was no point in persuading her... ..

Just as the atmosphere was silent, Lei Xue's expression suddenly froze, and her expression became heavy... ..

"Girl?" Elder lei looked at her expression, and his heart skipped a beat. "What's Wrong?"

Could it be that something even worse had happened?

"Senior is back..." Lei Xue smiled bitterly... ..

The faces of the two elders immediately fell...

It was really... the worst case scenario! !

Chapter 1342: unexpected...

Really... .. there was nothing worse than this... ..

The three people in the room, including Lei Xue, all had extremely ugly expressions... ..

One had just made a decision and was ready to give up everything to do something for his ideals when the original base manager came back... ..

The three of them were very clear on what this meant...

Lei Xue must have made preparations to come here, which meant that there should be a backup of the information stolen. Once she did that, Guo Xiaoyun would naturally find out when she returned to the base... ..

Did... .. It was fine if she was found out, but the key was that the information had not been successfully stolen, and she had even lost Lei Xue. That would really be a great loss... ..

Lei Xue also revealed a bitter smile at this moment. She even suspected that this was a trap intentionally set up by senior rainy?

How could it be so coincidental? She had just made a decision and came back?

Sighing, Lei Xue used her spiritual power to probe the backup data. After finding that the data wasn't damaged, she slightly heaved a sigh of relief, she directly passed it to elder Li and said, "Let's not talk too much. I've already sorted out the useful information in this backup. Elder Li, try to see if you can bring it back... although the possibility isn't high..."

Elder Li took the backup silently, feeling complicated...

The data was right in front of him, and this girl from the Lei family had also paid a huge price. However, if this data could not be brought back, what was the meaning of all this. However, Guo Xiaoyun's return basically meant that the probability of this data could not be brought back... ..

The atmosphere in the living room was instantly suppressed to the extreme!

"Alright... Don't delay..." Lei Xue was the first to break the silence. "Senior is summoning me back to the base. Elder Li, you'd better try to bring back the information. If it can be used, at least it won't be a loss..."

Elder Li came back to his senses and quickly nodded. "Okay, okay, okay..." he glanced at Lei Xue and knew that it wasn't the time to be emotional. In the end, he kept a thousand words in his heart and only warned, "You... be careful..."

"I'm fine..." Lei Xue smiled.

Elder Li nodded and didn't say anything else. He brought the backup and quickly walked out of the courtyard, leaving elder lei in the living room staring blankly at Lei Xue... ..

"Girl..."

Elder lei only opened his mouth after a long while and said...

“Grandfather...” Lei Xue smiled. “From now on, I shouldn’t be able to share the responsibility of taking care of the Lei family with you... I’m sorry...”

“You...” elder Lei looked at Lei Xue with a complicated expression. Finally, he sighed, “Why are you so stupid...”

Why didn’t you discuss such a big matter with me. If he knew beforehand, he would never have let her take such a risk... ..

However, he couldn’t blame her at this moment. After all, he had been taught from a young age to put the country first... ..

“Grandpa... I’m leaving first...”

“Little girl...” elder Lei looked at his granddaughter. “Be careful. It doesn’t matter if you lose your future, as long as you’re fine...”

“En...” Lei Xue smiled and looked at elder lei. “I’ll work hard. After all... I haven’t had enough of life in this new world...”

Lei Xue left very quickly. After all, Ai was constantly urging him, so elder Lei didn’t even have much time to talk to his granddaughter... ..

But if he really let Lei Xue stay here for half a day, elder lei actually didn’t know what to say to this most outstanding granddaughter of his...

It was only now that he realized that he actually didn’t know much about this most promising granddaughter of his... ..

It made sense. After all, a long time ago, he hadn’t paid much attention to this granddaughter of his who had always been a top student since she was young. If it wasn’t for the appearance of this new world, Lei Xue’s marriage and children wouldn’t have attracted his attention... ..

Old Lei sat on the sofa in a daze. His emotions were extremely complicated. He recalled that there was a period of time when he would often tell stories to his grandchildren. At that time, the core of his stories were all about his country. Now that the children had grown up... But really put the heart of the story of childhood, but it is usually sitting in the outermost, the quietest girl... ..

Once again came to the main base gate, the mood of snow is extremely complex... . . .

The place where the dream begins, is today the place where I End My Journey?

Any regrets?

Asked his heart, but the next second snow then shook his head... ..

She did not regret it. People were different from each other, just like her and Guo Xiaoyun. She envied Guo Xiaoyun, but she would not become her, because they were fundamentally different people... ..

After taking a deep breath, Lei Xue slowly stepped into the base. The base was not big, but after Mars expanded in size, the base had not been expanded. It had only been moved out of the original surgery warehouse and the newborn site, it had become a pure scientific research center and a management center.

Lei Xue followed the road sign and quickly arrived at the management room. She saw the travel-worn rainy girl without a melon... ..

When she saw the other party, Lei Xue was stunned at first...

Because at that moment, the other party looked rather disheveled...

His entire body was in tatters, as if he had climbed out of a pile of coal. The table was filled with food. At that moment, Guo Xiaoyun looked as if she had been hungry for many days. She ate big chunks of food, and when she was eating the steak, she even grabbed it and stuffed it into the innermost part of the table. It was completely different from the elegant way she used to eat... ..

This way of eating was usually seen only on small cabbages...

“You’re here?”

Guo Xiaoyun saw Lei Xue and hurriedly waved her hand. “Have you eaten?”

“I’ve eaten...” lei xue nodded blankly. She didn’t expect the meeting to start like this, and her face suddenly looked a little strange... ..

“Alright then...” Guo Xiaoyun nodded. “Take a seat. The situation is a little urgent. I’ll tell you one by one. Listen to me first, and you can ask questions after I’m done...”

“Uh...” Lei Xue was stunned for a moment. She felt that... .. The other party’s attitude... .. It seemed like he wasn’t here to cause trouble for her... ..

“Alright...”

Guo Xiaoyun said, “I’m going to leave for a long time. I’m going with a group of high-end players, including Li Goudan, Pu Yunchuan, Leng Xing, and the others. Oh, right... “... and elder Long’s daughter-in-law, Feng Doudou. I’m going to take her with me. You can tell them later.”

“Eh?” Lei Xue was stunned. “You... you’re going to leave?”

“Yes...” Guo Xiaoyun took another bite of the meat, after chewing and swallowing it, she let out a long sigh, then, she continued, “I have to leave, but my schedule is a little rushed, which might cause a lot of things to be a little chaotic. You have to bear with me when the time comes. After I leave, I’ll leave the main base to you!”

Lei Xue:” ...”

What did she mean?

What happened?

This was completely different from what she thought!

“Senpai... . May I ask where you are going?”

“Federation!” Guo Xiaoyun said with a smile: “Go and see what is described in the data, now the largest civilization in the universe!”

This answer, let the Thunder Snow be stunned again...

“You should have been there... . Guo Xiaoyun touched the oil on her mouth and said with a smile, “But we need a person in charge here. The Lord can’t come back for the time being, so I have to leave. Now, I can only let you stay here. But don’t worry, when the opportunity is right, I will arrange for you to come here at once... . .”

“Me?” The Thunder Snow is completely stunned, don’t tell me... . You’re too busy to know you’re leaking information?

She’s staring at each other. If that’s the case... .. Fishing in troubled waters:. ... Maybe... .. We’ll get through this... . .

Because they look like they’re on their way... ..

At the thought of this, Lei Xue’s heart suddenly pounded... ..

After all, if she could, she didn’t want her future to be ruined... ..

But did she really have to hide it?

“Senior...” finally, after hesitating for a long time, Lei Xue smiled bitterly and said, “I may not be... suitable...”

“Why?” Guo Xiaoyun, who was about to take another piece of meat, raised her eyebrows and asked.

“I... AM not an impartial manager...” after taking a deep breath, lei xue said honestly, “I leaked the information...”

“Oh... you mean the matter of you leaking the information of the five major cities to elder Li?”

Lei Xue smiled bitterly. Senior knew it as expected...

“It’s a small matter... you don’t have to worry about it...”

Lei Xue: “Eh?”

Chapter 1343: Who said that?

No... not important... ?

Lei Xue looked at Guo Xiaoyun in a daze. Her simple and honest expression was completely different from her usual capable and capable style... ..

It wasn’t her fault for not being able to react in time. It was mainly because this kind of thing was said to be a small matter. If it were elder Li and the others, they would probably have the same expression...

Guo Xiaoyun frowned and looked at her with disdain. “Don’t look so silly. I almost thought I saw a cabbage...”

Lei Xue: "..."

Ignoring Lei Xue's strange expression, Guo Xiaoyun finished the meat on the table in no time. She exhaled and said, "Time is tight. There are some special people to connect with you for some details. Let me tell you a few main things first..."

"Please tell me..." Lei Xue was stunned for a moment and then quickly replied.

"First, the new world will be reopened after I leave!" Guo Xiaoyun picked up a tissue and wiped his finger that was full of oil as he said, "The rules are almost the same as before, but there is almost no population in the steel martial empire. Players who want to obtain population can only take the overseas route. You can decide how to advertise it..." "..." "..."

"Overseas Route?" Lei Xue was stunned. "Aren't there mutated creatures on the sea that are difficult to pass through?"

"That is something that players have to solve..." Guo Xiaoyun wiped her mouth and said, "When the civilization develops to Level 4, it will be able to leave the planet. When that time comes, it will be even more difficult to obtain new resources and population. All of this needs to be overcome by ourselves. Our main base is only responsible for operations, and the development of the New World is not our responsibility." "..." "..."

Lei Xue: "Yes..."

"In addition, there will be a new dungeon in the New World..."

"Dungeon?" Lei Xue's eyelids twitched. Was this really a game?

"At the South Sea Entrance, there is a dungeon..." rainy girl said in a low voice, "It is an alternate dimension world. There are many resources, including new planets, new species, and new genetic races..."

After hearing this, snow immediately swallowed her saliva...

A New World?

And what the hell was a new planet? It sounded like the new world's power contained planets?

"The new dungeon is open to all players, and its life level has reached level 3. Ordinary players have two weapon specialties, and spirit-type players have one combat-type arcane specialty that they can apply to explore. However, the danger level of this world varies greatly, and there are specific levels. "After the specific situation, you can dock with the manager there, and the Lord is also there. If you have any problems, you can also consult the Lord..." "..." "..."

"The Lord Is There?" Lei Xue was stunned again. "He... won't come back?"

Guo Xiaoyun frowned. "I just said that time is urgent. I'll say it first, and you can ask questions after I'm done..."

"Um... I'm sorry, Senior..." Lei Xue quickly lowered her head... ..

Guo Xiaoyun said, "The new dungeon is a large galaxy. You can understand that it's a galaxy larger than the Milky Way. There are many life stars in this galaxy, and there are all kinds of species and resources that can be exploited. It's also rich in resources. As for how to exploit it later, and what the rules are for each city to enter that place, you can make it yourself..." "..."

"I'll decide?"

Lei Xue looked incredulous...

"Can you not interrupt me?" Guo Xiaoyun looked at her unhappily... ..

"No... I just feel..." Lei Xue started to talk incoherently. ...

It wasn't that she couldn't take it, but the news of Guo Xiaoyun was more and more shocking... ..

Not only was the new world reopened, there was also a new dungeon, and it was at the Milky Way level. Who knew if those old politicians would stare with their eyes wide open when they found out about this... ..

The key was such a big matter, and the rules were decided by her?

"After I leave, you will be the manager of the main base. Seer will be stationed in the New World all year round, if not you, who will decide?"

Xue Lei:"..."

"Every planet in the new world has a different level. The higher the level, the more resources there are. However, the higher the level of the creatures, the more dangerous it will be. You'll need to have a rule on how to apply for the rights of the players and the various rights that the Castellan's forces apply for..." ..

"Also, the New World will open up three new races with very high genetic levels. Those who are dissatisfied with their genes and want to get their genes back can undergo a second genetic modification surgery. Alternatively, very outstanding players can also undergo a second genetic surgery according to their own choices. Note that the newly opened races are not open to newbies. They will only apply for second-time modifiers. They will need to go through trials and pass the assessment in all aspects before they can apply. As for the specifics, you can go and communicate with the manager of the New World..." ..

"That's about it. I've already asked the AI to send the details to your email. After you go back, take a good look. I'll be leaving around midnight. Before that, draw up a rough plan for me to take a look at... .. forget it. Actually, there's no need for that. You can take your time ... "..."

Lei Xue:"..."

I... Am I Dreaming?

Why does it feel like... "...". Senior Rainie is handing over the authority of the entire base to me?

"Do you have any other questions?" Guo Xiaoyun asked Lei Xue after she finished speaking in one breath.

Lei Xue quickly nodded. She wanted to ask too many questions, but she didn't know what to ask. She was stunned for a few seconds and couldn't spit out a word...

"What's Wrong?" Guo Xiaoyun frowned. "Have you been too busy these days?"

"No..." Lei Xue came back to her senses and quickly said, "Senior... you... really want me to take over everything?"

"Yes..." Guo Xiaoyun nodded. "I have considered all the developers in the base. You are the most suitable to be a manager among all the people."

"I... The most suitable?" Lei Xue was still in disbelief... ..

"I have read your management records these days. You have done very well... "... "If it were me, I wouldn't be able to do much optimization. The management base will be very busy, and it will delay some of my growth time. But you don't have to worry. It Won't take you too long. Besides, the brain of US developers is very fast. We can merge many things. You just need to get used to it...". "..."

"No..." Lei Xue finally couldn't help but ask, "Senior, I'm a person who sells information. Do you really want me to take over everything?"

"Didn't I just say that?" Guo Xiaoyun said impatiently, "That's a small matter..."

"Shouldn't the manager be fair?" Lei Xue couldn't help but ask, "Shouldn't he be like you, taking the entire force as the center, not being bound by the selfishness of the nation, and dealing with everything rationally?"

"Who said that?" Guo Xiaoyun looked at the other party in surprise.

Lei Xue was stunned and looked at the other party in surprise. She stuttered, "No... isn't that right?"

"Of course not..." Guo Xiaoyun rolled her eyes. "I'm not a machine, how can I be so rational? I work in the higher-ups to make my life more comfortable. What good is being impartial to me?"

Lei Xue: "..."

"Sigh..." seeing that the other party was still dumbfounded, she sighed, Guo Xiaoyun sighed. "The only difference between you and me is that you like to entrust things to people who you think can solve things, and I like to solve things myself. I think you should learn from me. You're the manager of the base. Why did you choose to hand everything over to politicians like elder long?"

Lei Xue: "! !"

Chapter 1344: Do you really need me to explain such a simple logic to you?

Guo Xiaoyun was not lying. She was really anxious. After she finished explaining everything, she disappeared from the teleportation device again in the wee hours of the morning. The highest level of authority in the base was now open to Lei Xue... ..

Lei Xue Sat in the command center of the base in a daze, looking at a pile of unlocked authority and the latest intelligence. Her mind was a mess, even though her brain's computational ability was comparable to a supercomputer. However, she could not come back to her senses for a long time... ..

“Why did you entrust everything to those politicians?”

Her words made her roar. Something she could not figure out before seemed to be understood now, as if a new window had been opened... ..

Perhaps... .. From the beginning, the senior thought differently from her... ..

She sat up straight and opened the approval report on Angor... ..

The report stated that for the development of the city, foreign players, especially those from central China, would be encouraged to focus on elves and gradually reduce the number of titan-type players... ..

The purpose was obvious. The first city, the Mayin clan, was a special choice made by the West Germans. They directly monopolized the core technology, command, psychic officer, and other professions. They wanted to use their own people as the core and become the elites. The agility-type players were attached to the pyramid structure... ..

To control the most talented players in central China in the middle and lower reaches of the industry, to prevent them from stealing the spotlight... ..

This report was a test of the main base, to see if the main base would object because of favoritism. However, Guo Xiaoyun’s report directly indicated that the city lord would make his own decisions... ..

It seemed that he did not intend to interfere with the mayor’s practice of excluding foreigners...

But was that really the case?

Lei Xue closed her eyes and recalled Guo Xiaoyun’s words...

I’m not a machine, what good does being impartial do me?

Why did you entrust everything to politicians like elder long? Don’t you know how to solve it yourself?

So it’s not that senior didn’t do anything, but that you want to control it in your own hands?

Lei Xue narrowed her eyes, opened up the entire New World’s planning process, and began to think from the beginning...

In the current situation, the players in central China had the highest qualifications. Since the beginning of the Galaxy Era, the players in central China had accounted for more than 70% of the players in each city’s level ranking!

And this was under constant suppression!

Especially in the fifth city. The anti-central China players had almost developed into violent conflicts, but they still could not stop the rapid rise of the players in central China.

To put it bluntly, people with lower qualifications could not change this fact no matter how you targeted them. This thing was not the social hierarchy of the past, and it did not mean that you could unite with a group of people., rejecting, discriminating, and isolating could be restricted. It was like leveling up in a game. I just had a double experience card. What could you do?

That was why smart politicians like Angor wanted to change the structure. They did not discriminate or isolate. On the contrary, they welcomed it. However, they stopped the rise of the players from Huazhong.

To be honest, it was a smart move.

If senior Raina was not impartial and had her own motives, how should she deal with it?

She looked at the report and tried to think quickly. However, she still could not come up with anything...

...

As it turned out, it was not always possible to think quickly... ..

Just as she was in a dilemma, she suddenly received a new email from her intelligence system. Lei Xue immediately came back to her senses and opened her email.

Before senior left, she said that she would sort out the information of the New World and send it to her... ..

The New World was extremely important. Although she didn't know why senior had entrusted such a huge task to her, since she had accepted it, she naturally had to do it properly... ..

Thinking of this, she opened the email and began to quickly browse through it... ..

From Guo Xiaoyun's mouth, she knew that the new world was an extremely exaggerated resource. However, when she saw the actual content, she could not help but be shocked once again... ..

The New World was a non-dimensional galaxy. Its size was about 7.6 times larger than the Milky Way galaxy, and the number of life stars contained in it was currently measured to be no less than 100,000...

Life planets were divided into grades 1 to 9. The lower the grade, the higher the grade. The higher the grade, the richer the planet's resources, the stronger the planet's energy, and the more dangerous the life forms, players needed to meet certain conditions before they could apply to go to a higher-grade planet to explore.

The New World released the genes of the new races into three major categories: Dragon, High Elf, and high rare. The dragon race corresponded to the ancient pentashade dragon race. The high elf species corresponded to the High Moon Elf gene, the High Wood Elf gene, the high elf species, the windwalker, the Templar, and other high rare elf genes. The high rare species corresponded to all kinds of rare special genes. ...

To apply for a new gene, one had to undergo a trial. Only those who were qualified in all aspects and met certain conditions could apply for a second operation. Moreover, if the second operation was successful, the player had to sign a confidentiality agreement and go to a new location to train!

Head to a new location for training?

Lei Xue was stunned. She opened the document and searched for the so-called new location...

She only saw that the document indicated that she needed s-class permission to read it...

Lei Xue's fingers paused for a moment, because... .. Her current self... .. Seemed to be an S-class permission holder...

After hesitating for a few seconds, she finally opened the so-called new location and looked at the contents of the confidentiality agreement... ..

About 10 seconds later, with the developer's brain, she saw more than 10 gigabytes of content. After she finished, Lei Xue took a deep breath and collapsed on the chair. . .

No wonder the old man was unmoved by Angor's actions...

It turns out that...

"How many laps are you going to spin? Didn't I tell you they were rushing me? Do you know how ugly I looked eating just now in a hurry?"

At this moment, Guo Xiaoyun followed a figure in the sky above the D ball for almost four to five rounds before she couldn't help but complain!

Beside Guo Xiaoyun was a slender and beautiful human figure. The figure was wearing a green robe and looked like an elf, but it was filled with an elegant sense of beauty... ..

"You're not lying..."the woman in Green said in a daze, "There are really so many aborigines like you..."

"You circled around a few times just to confirm this?"Guo Xiaoyun's face was full of black lines. "You don't trust me that much?"

"I just want to confirm it again..."the woman smiled and said, "The main thing is that it's too incredible, but you're hiding something, aren't you? At least in terms of the number of people, you didn't tell me the truth in the first place..."

"Did I?"Guo Xiaoyun frowned...

"You said that..."the woman looked at Guo Xiaoyun and said, "There are more than one billion people with your talent..."

"Yes..."

"More than that, right?"The woman looked at the planet under her feet and said.

"There are only so many..."Guo Xiaoyun narrowed his eyes and said, "Just because a place comes out doesn't mean that all people have the same physique. Do you need me to explain such a simple reason to you?"

Chapter 1345: The Magical Fifth City... ..

Not many people knew that rainy girl had returned. However, even if someone knew, it wouldn't cause too much of a stir for the ordinary players. In their minds., they were just a group of Lucky people who had arrived in galaxy before them. Now, there were fewer and fewer interactions between them.

In the past, when new equipment or new training room functions appeared in the base, everyone could still join in the fun. Now, it was under the management of the City Lord. Even the most active master of strategy, Grandpa Lu, had disappeared for almost half a year, the group of old players who were talked about by people gradually faded out of sight.

However, the news that suddenly broke out in the base the next day ignited the enthusiasm of the entire Mars... ..

The New World, which had been closed for a few months, would be reopened within a few days. At the same time, a new space battlefield would be opened. There would be more land and more resources waiting for the new players to explore and conquer. Once the news was out... The entire galaxy, whether it was the old players or the new players, fell into ecstasy...

For the old players, these few months of lockdown were the most depressing months they had ever lived. Although the other new players could not go out to develop, they were still making money in the city. However, they were losing money... ..

A large number of people, accommodation, and food were all money. Apart from a few lords who had received large orders to build the city, most of the Lords were currently idle... ..

The key was that their subordinates needed to eat... .. Especially those farming players who raised high-level orcs and gryphons. After the land was gone, all food had to be bought from the city. This was not even taking into account the cost of some medicine for the soldiers who needed to level up... ..

Every day, they spent money like water. Many lord-tier players felt their hearts ache. They finally understood how the boss felt when he gave his employees paid leave... ..

If they did not go out and let his subordinates do their work, many lord-tier players would go bankrupt... ..

There was no need to mention the new players. They had long yearned for the life of being able to conquer their own territory and become a lord-tier player. They were all rubbing their fists and rubbing their palms. Many players who had reached the standard had long been impatient, but the passage had just closed. They can only continue to mine like other novice players... ..

A lot of times I wonder if this new world tricked them into playing hooky...

At this time to re-open a moment like the new year, the streets of the six major cities are immersed in carnival... ..

Including one of the most divisive parts of the city today... .. Fifth City... ..

Fifth City:

Today, if you want to say which city has the most repulsive attitude towards players in central China, it is the fifth city. The players who were attracted by the free villas and high-paid jobs in beimi can now be said to be miserable.

Unlike the first city, the fifth city does not have an obvious racial protection mechanism, which makes it easy for the players in central China to dominate the market, the players from central China in the open workshop were more efficient, the elven players from central China in the farm were also better in natural talent, the products they grew were better, and the elven players from Central China had a better affinity with the pasture industry, the elements and pastures they cultivated were also better.

Not to mention the handicraft industry, many restaurants, blacksmiths, and industrial land owners were obviously more inclined to recruit more efficient players from central China. This made many foreign players, who were already feeling unbalanced, even more dissatisfied, the racists took the opportunity to stir up trouble, and the shareholders were isolated. This fifth city, which had the largest foreign population, slowly began to completely isolate the central China players.

The mining efficiency was just taking turns to occupy the mines. They agreed on a number of people to continuously occupy the mines, not allowing Central China players the opportunity to work. It was the same for pastures and farms, every time the players in central China got angry and started a fight with some other players, the city's law enforcement officers would also favor the white players.

This caused most of the white players to be more unscrupulous. Nowadays, almost all the mines and pastures were occupied by the white players, and it was becoming more and more exaggerated.

The city's officials favored the white players, and the other races also favored the white players. The situation was that the players of the three races and some other races were now working in the absenteeism occupied by the white players. They had to hand in a certain amount of tribute every day to gain support and completely exclude the players from central China...

Now in the fifth city, if the players from central China wanted to earn points, they could only go to the city's service industry or handicraft industry...

At this time, on the night when the news of the opening of the New Territories broke out, a group of Tall Green Titans gathered in a remote gathering place. They surrounded a bonfire as if they were discussing something.

If one listened closely, they would realize that these Green Titans were speaking Huazhong language...

"Another pay cut. F * cking Tabasco blacksmith shop. If this goes on, when will we be able to gather enough money to go to the New World?" "Now that the New World is about to open, my cousin who lives in Huaxia City said that he is ready to set off at any time. F * ck, I came here three months earlier than him, and now I can't even gather half of the money!" "!"

Among the group of players, one of the Titan players cursed. Veins bulged all over his body, and it seemed that he was so angry that he wanted to find someone to fight with...

"Calm down, Ming..." in the bonfire, a slim elf rolled his eyes at the other party. If Wang Goudan's father was here, he would definitely be able to recognize him from his profile. This was the police officer Yang Rui who had been following him. ...

"How can we calm down?" The Titan named Ah Ming said in a muffled voice, "They are already unbridled!"

“They have already been unbridled for a long time, and you only know about it today?” Yang Rui rolled his eyes and said, “Back then, you guys didn’t unite to cause a ruckus about the city loan financing business, and you already lost your last chance!”

Everyone immediately fell silent upon hearing that...

Yang Rui’s prediction from two months ago had come true, but it was too late now... ..

The city lord of the fifth city had initially promoted the creation of a free economic city, but the result was that the loan would first nurture a portion of the capitalists... ..

Originally, in the early stages of the city, other than the high-level players of Huaxia City, the individual players did not have the capital to open a shop or anything like that. However, in the early stages of the city, the fifth city had already issued loans to support the business, the target of the loans was naturally bei MI’s former high-level capital family!

The city Lord’s reason was very reasonable. He said that the city’s resources were limited, and that the few resources should be given to those who had experience and were more likely to succeed to drive the economy. Lending money to the corporate elite was definitely better in terms of efficiency than lending money to a loser, right? You wouldn’t believe that giving money to a loser could drive the economy, right?

If the elites got a loan, they would first build up a portion of advanced industrial products to build up their competitiveness to the outside world, and provide more jobs that earned points internally. wasn’t it killing many birds with one stone?

It sounded like there was nothing wrong with it, right?

But thinking about it carefully, if the elites of the old world were able to get a loan out of thin air and build an advantage over the other players, then what would be the difference between everything and the past?

It was such an obvious argument that was riddled with loopholes. Back then, it was supported by a group of players, including quite a number of elite American players from Huazhong... ..

But now...

After some of the capital families obtained the loan, they relied on the design drawings in the research and Development Center to produce quite a number of newly built industrial products. They were exported to the other four major cities, and they were even auctioned off on the D ball black market at sky-high prices.

However, what did these profits have to do with ordinary players?

According to the data from the headquarters, out of the 156,445 players that entered the fifth city, 70% of the wealth of the entire city was actually concentrated in the hands of less than 200 players... .. A newly established emerging city and a brand new platform that everyone yearned for. In less than half a year, the gap between the rich and the poor had been widened to such a large extent. One had to say that the fifth city lord was an old capitalist...

However, it was still alright. If most of the ordinary players had been squeezed like this, they could still enjoy their suffering. However, even among the people who had been squeezed, there was a serious internal strife. The Big Fish ate the small fish, and the small fish ate the shrimps. And now, the status of the players from central China in the fifth city was about the same as the shrimps... ..

Under the favoritism of the city's law enforcement officers, the white players had openly occupied the mines and pastures where they could earn points. The three-americans and the other ethnic minorities had turned into lap dogs and handed over their shares to earn a certain chance of survival. Of course, ... There were also some shameless Huazhong players who had turned into dog-lickers to go to the mines to hand over their gifts to others. The key was that even if they had been wronged to such an extent, they would still be bullied by some of the three-ethnic group players...

Of course, it was not to the extent that they did not have a place to live. At the very least, those big capitalists who ran handicraft industries needed more talented Huazhong players. After all, the labor efficiency was higher... ..

However, this didn't make the players from central China feel any better. Because of the discrimination and isolation of the market, factory owners could also unscrupulously squeeze them, constantly deducting their wages. You're efficient and skilled.., but I'm just going to squeeze your wages. Are you going to do it or not. If you don't do it, there will be people doing it...

This was the current situation of the fifth city... It was incredibly magical ... The fifth city, which claimed that every breath it took was free air... ..

And now, Yang Rui and the other central China players had gathered to discuss what would happen after the opening of the New World, because the opening of the new world might be their last chance...

Chapter 1346: it used to be...

There were requirements for players to enter the New World. This had been set since the alien Lord first took power. After the five major cities took over, the requirements would change according to the situation of their own cities.

For example, the city lord of the third city, Song Yi, had clearly raised the requirements for players to enter the New World. Other than a level 2 life form and two weapons specialties, he also required players to master at least one life skill or two gathering skills... ..

There were two reasons given. First, it was to increase the third player's competitiveness outside the city. Second, because the city's infrastructure required a lot of manpower at the time, it had raised the threshold and delayed the players'flight time... ..

Many players were dissatisfied and ridiculed...

In comparison, the fifth city had been the most lenient in this aspect at the time. It had even required players to only master weapons specialties and even provided loans to encourage players to go to the new territories... ..

However, when they informed the new territories in the morning that they were going to reopen, the fifth city added a new condition, which was called the allocation of race quotas... ..

It meant that the quota to go to the new territories would be determined according to the race ratio... ..

What did it mean? It roughly meant that the players in central China were leveling up too quickly and needed to balance to ensure that the citizens of the fifth city competed fairly. Therefore, the quota would be limited according to the ratio... ..

The new policy stipulated that the fifth city would be open to the New Territories once a year. Those who were qualified could sign up for the test. Those who passed the test could also go to the new territories. If they failed the test, they would have to wait for the next year...

Just This alone was not a big deal, but the key was to implement the racial balance system. According to the racial ratio, for example, there would be a fixed quota of 100 qualified players this time. Then, out of the 100 spots, 10 of them had to be white players, and 10 of them had to be from other races. The players from Huazhong could only occupy a certain percentage, no matter how good their results were... ..

No matter how good the overall results of the Huazhong players were, there were only so many spots allocated to them. They could only scroll inside, and could not encroach on the spots of other races...

The most F * cking key was that this so-called balance policy was said to reflect equality, but the quota allocated to the Huazhong players was only 8% !

But white players had 31% ! !

The reason was also very reasonable, because the proportion of white players was the largest, so it should occupy the highest proportion... ..

Wasn't this F * cking nonsense? The city's recruitment of D Ball's population was completely decided by the city lord. You said that you would recruit any population you wanted. In the past, the ones you recruited the most were white players, but now you used this as a reason to gain benefits.., how is this any fucking fairness? ! It's clearly racism!

After learning this news, the Huazhong players were completely enraged. Most of the players who had previously held themselves back immediately started a riot. Today, hundreds of Titan Huazhong players were directly imprisoned.

And now, a group of players had gathered together for today's blatant targeting policy!

"There aren't many opportunities left..." Yang Rui lowered his voice and said, "According to the news, the main base will gather the five city lords to formulate all the policies regarding the New World Tomorrow. The only way now is to make a big fuss and spread the matter to the higher-ups. After all, the only one who can control that dog city lord now is the main base!"

"Alright... We'll listen to you! !" A group of players echoed one after another.

In the fifth city, the Huazhong Player Alliance that the Huo family and Yang Rui had initially formed was actually not that influential. At least, most of the elite players did not respond. Now, at least half of them had been beaten awake. Of course... There was still a portion of them who refused to admit defeat

no matter how badly they were bullied. On the contrary, they even blamed them, saying that it was because of them that the Huazhong players were discriminated against and isolated...

Thinking about that group of people, Yang Rui really felt tired, but there was nothing he could do. However, he couldn't care less about that group of people who wanted to be dogs, but he had to fight for a way out with this group of people who wanted to stay warm!

"Okay..." Yang Rui saw that the group of people were united as one, he smiled comfortingly, "Then we will set off in a while. When we arrive at Huaxia City, we will gather at the location of the main base. We must make sure that we start making a scene at the beginning of the meeting. At that time, not only will the five city lords and the managers of the main base be there, many media from Planet D will also be attending. We have to make a scene there in order to have the higher-ups solve our problems. However, there is a risk because I don't know the consequences either. You have to think carefully!"

"What's there to be afraid of?!" "!" Titan called Ah Ming spat and said, "Back then, I was too afraid to listen to you. I didn't dare to fight with that dog city lord and allowed those shops to open up. What's the result now? If I don't make a fuss, I'm afraid I won't have the chance to make a fuss in the future. What consequences can there be? At worst, I Won't stay here anymore. I didn't come here to be a dog!"

"That's right!"

The group of players echoed. They had all come here with dreams. which one of them didn't want to be a man who conquered the Sea of Stars? But now, they were being ostracized even if they were absent workers. What was the point?

"But how are we going to get there?"

Suddenly, a flower spirit player in the crowd asked carefully.

Everyone was stunned. Many people immediately realized that it was true... "...". The meeting was tomorrow, how were they going to get there?

According to the city planning map, the fifth city was tens of thousands of kilometers away from Huaxia City, and it was almost a province on d-ball. It would take more than ten hours to fly, right?

The city did have a teleportation array, but it was not allowed to be used privately...

"I have prepared for this..." Yang Rui said as he flipped his hand, and a scroll-like item appeared out of thin air, immediately attracting everyone's attention.

"What's This?" The group of players asked in shock.

"Teleportation scroll..." Yang Rui said calmly, "My friend in Huaxia City asked the instructor to make it for him. It can teleport over a thousand level 2 Titans at One Go!"

"Damn, there's such a good thing? If I had known earlier, I would have queued up in Huaxia City. F * ck, I believed that F * cking B * Stard. He even gave me a villa and cash. I knew that the North Americans didn't have good intentions!"

Who Didn't.

The group of people immediately sighed. It was human nature to be greedy for small gains. In addition, many people were also very dissatisfied with the society they lived in. However, they didn't think that they couldn't get a fair deal in their own territory, if you went to other people's territory, would they give you a better deal?

However, it was too late to regret now...

"Alright..." Yang Rui clapped his hands and said, "That's it. Everyone, go back and prepare. This might be a tough battle. Go and rest first. We'll gather here on time at 5 o'clock on Mars..."

"Okay..."

— —

After everyone slowly left, Yang Rui stayed where he was and quietly waited for something. After about half an hour, a figure slowly walked over.

Seeing this, Yang Rui's spirits were lifted and he quickly went up to greet him.

"Elder Li..."

The person who came was the current Vice City Lord of Huaxia City, elder Li...

"Are we done?" Elder Li looked at the remaining bonfire on the ground and asked.

"We're done... We gather at five o'clock, and there are almost a thousand people who have signed up. The scale should be enough..." Yang Rui said, "Thank you for your support, elder Li. If it weren't for you, I really wouldn't know what to do..."

"Sigh..." elder Li sighed. "Mister has gone too far!"

Out of the Five City Lords, other than the third city lord, Song Zai Yi, the other four city lords had policies aimed at the central China players. However, Mister was the only one who had gone too far.

Such a thing could not be allowed to continue. If the other city lords knew that Mister was still doing well by treating the central China players like this, the situation of the central China players would only get worse in the future!

Someone had to break this terrible situation...

"Elder Li..."

"Yes?"

"I heard..." Yang Rui hesitated for a moment, but in the end, he gritted his teeth and said, "The current manager of the base, Lei Xue, is a member of the Lei family, right?"

Elder Li glanced at Yang Rui, then smiled and said, "It seems that you have a lot of friends in Huaxia City. You even know this..."

"Will she stand on our side?" Yang Rui hurriedly asked.

"She did in the past..." elder Li said with a complicated expression.

“She did in the past?” Yang Rui was stunned. What kind of answer was that?

Elder Li saw the other party’s confusion and sighed slightly. He recalled the scene where he saw Lei Xue Yesterday...

Chapter 1347: The changed Lei Xue

The first to be notified of the New World’s opening was naturally the six City lords. The city management center would then announce the news to the public. This news was not only a big surprise to the players, but also to the city management team... ..

Especially the five city lords outside of China. To them, China already had a huge advantage. If they wanted to overtake them, the development of the New World and the fight for resources were especially important... ..

All of them were gearing up, ready to go all out once the new territories were opened up. Their teams even came up with dozens of plans that night, and they argued endlessly about it... ..

However, as the officials of Huaxia City, who had the greatest advantage, they were now more concerned about another matter...

They could clearly see Lei Xue’s signature on the notification... ..

This made them extremely confused. After Lei Xue leaked the information to them, why could they still continue to host the General Base’s announcement?

Moreover, the intelligence showed that the top manager was still Lei Xue and had not been brought back by Guo Xiaoyun. This made elder Li even more confused. Did they not have the time to change it?

But he felt that this kind of mistake should not be made...

With doubt and anticipation, elder Li, under the instruction of elder long, sent a letter to the main base in the name of consulting. He wanted to see the manager personally to ask about some city matters... ..

The result of this probe was very quick. The main base accepted the letter and made an appointment to meet at the main base directly... ..

This made elder Li even more confused. To be cautious, elder Li went to the main base and also brought along elder Lei, who was lamenting about life at home. When elder Lei found out that his granddaughter might still be supervising the main base, he instantly felt as if he had been resurrected... He quickly got up and followed elder Li all the way to the main base...

After arriving at the main base, elder Li became even more confused...

It was obvious that Lei Xue was the only person in the command center of the main base, but Guo Xiaoyun, who was rumored to have returned, was nowhere to be found... ..

“Girl...”

Elder lei looked at the intact Lei Xue and said somewhat excitedly, “You... are you okay?”

Lei Xue, who was sitting on the chair, saw her grandfather's worried expression and a trace of gentleness flashed across her eyes. She got up from the chair and quickly went forward to support elder lei, "I'm Fine, grandfather..."

"Sigh... what support?" After being supported, she realized that the girl in front of her was real, elder lei immediately felt relieved, then, he said with a straight face, "Do you still think I'm that old man from before? My body is very good now. Let me tell you, when I was sparring with those young men in the base, none of them could fight..."

As he said that, he even showed off his muscles, which made elder Li roll his eyes... ..

Isn't that obvious? The ones sparring with you are all the guys in the army, who would dare to fight with you?

"Yes, yes..." Lei Xue smiled and helped elder Lei to sit down on the sofa. "Grandpa, take a rest first. Elder Li should have something to ask me. I'll bring elder Li to the meeting room to talk..."

Elder Lei was stunned when he heard this. What did she mean? She wanted to leave him alone?

He quickly said, "Why is it so troublesome? Let's talk here. What is it that I can't hear? Elder Li, what do you think?"

Elder Li was also stunned and quickly nodded. "Yes... Elder Lei is also our old comrade. Although he has retired..."

However, before he could finish his words, Lei Xue interrupted him. "Grandpa should have a good rest when he retires. It's better not to let him worry about some troublesome things..."

Elder Li: "..."

"Girl..." elder lei's expression changed, "You... What do you mean?"

"Grandpa..." Lei Xue smiled gently as she looked at elder lei, "Listen to me, Okay?"

Elder lei stared at his granddaughter in a daze. She still had the same obedient expression, but there was an unquestionable aura about her. Even when the Lei family begged her the most, she had never been so unyielding... ..

"If you don't want to listen, then don't listen... I'm still happy to be free..." elder Lei suddenly looked angry.

Lei Xue smiled. "Grandpa, don't be angry. I'll bring you to eat something delicious later. I heard that dog dad is going to reopen the new world. Dog Egg restaurant is offering a 40% discount today..."

When he heard about dog egg restaurant, elder Lei couldn't help but swallow his saliva. However, he still said with a straight face, "You're not being sincere when you bring me something that's on sale..."

"We'll order the most expensive..."

"You said it..."

"I said..."

Hong child-like good has always been serious after the old man, Lei Xue turned around and smiled at old li: "Let's Go Old Li?"

Li:" ..."

He felt... The lei girl seems to be the same as before. Something's different. . .

"Girl... Are you all right?"

Two people arrive at the meeting hall, Li Lao cautiously asks a way.

"Thank Li Old Concern, I have nothing... .."thunder snow smiles to say.

Old Li looked at each other's appearance, doubt in the heart, the other side really does not look like something, but why do I feel so against it?

After thinking for a while, he finally decided to ask directly, "Girl, what's Going On?"

"What do you want to ask, elder Li?"

"Girl, why are you still playing tricks on me at this time?"Elder li said anxiously, "Isn't Guo Xiaoyun back? where is she? Why are you still in charge of the general base?"

"Elder Li misses senior rainy a lot?"

I miss her like a hammer...

"Be serious, little girl..."

Hearing this, Lei Xue stopped smiling. "Senior Rainie went on a secret mission assigned by the Lord. When she came back, she just temporarily handed over some authority that she didn't have before to me. She left this morning..."

"She... left?"Elder li suddenly showed an incredulous expression. ...

Not only did she leave, she even allowed Lei Xue to take charge of the base? She even increased her authority?

What was going on?

"This... What's going on?"Elder Li took a deep breath and asked in a low voice, "Did she... not notice that?"

It shouldn't be. Even if it was as Lei Xue said, the other party was in a rush. It was impossible for her to be so careless, right? That was Guo Xiaoyun. He and elder long had interacted with the other party for more than half a year, so he knew very well what kind of flawless person that guy was. How could he make such a mistake?

This was the authority of the main base. How could he be so careless...

"What is it?"Lei Xue tilted her head and asked.

Elder Li was stunned. For a moment, he couldn't figure out what the other party was thinking. Then, he cautiously shook his head and said, "No, maybe I'm wrong..."

"What is the main reason for Li's visit?"

"Ahem... . Lee cleared his throat. "It's mainly about the re-opening of the New Territories. Did you see that Guy Mister's quota restriction plan? That is a blatant suppression and discrimination of our Huazhong players, is simply too much, he... . "..."

"This is the internal affairs of the fifth city..." Lei Xue interrupted elder Li's words indifferently. "It has nothing to do with you, elder Li, right?"

Elder Li was stunned when he heard that. Then, he looked at Lei Xue with an extremely unfamiliar expression. "Girl... What did you say?"

Lei Xue said indifferently, "In the treaty construction of the Sea of stars, the city Lord has the right to operate independently within the city. The main base can not interfere. Wasn't this contract strongly requested by you guys back then?"

Elder Li:"..."

1348 Chapter 1,388: Was He discriminated against?

"Hello, everyone. I, Cindy, AM honored to be invited by Xing Hai again to participate in this new territories reopening ceremony. Today, I can broadcast the entire process live. Those who want to see the true appearance of the six cities in Xing Hai can get what they want today! !"

At this time, at the base's portal, the American reporter Cindy, who had just arrived at Xing Hai, started to warmly greet everyone on the live broadcast platform after adjusting the live broadcast. The live broadcast room was extremely lively, and the room was packed to the brim from the start of the broadcast. The server was disconnected several times in a row...

There were obviously quite a number of Chinese netizens in the link room. This could be seen from the standard Chinese that was filled with a screen full of good wives... ..

The popularity of the live broadcast made Cindy beaming with joy. Her three-dimensional exquisite facial features were now filled with vitality... ..

She also did not expect that her path to becoming an internet celebrity would be so smooth after she retired from the official news agency...

That's right, this beautiful internet celebrity was Cindy, the youngest American journalist who had been invited to cover the development of the six major cities. At that time, Western Europe and North America's first news agency were obviously biased toward the fifth city's system and environment, she wrote a completely different piece of news.

In her writing, she pointed out that the fifth city was a capital trap that would only create a second heaven for the rich. It was definitely not a dream place for ordinary players. She also described the strengths and weaknesses of the other major cities very sincerely... ..

For example, she pointed out that Huaxia City was conservative and a little dull. However, when it came to planning for ordinary players, it was very practical and realistic. Even though it lacked a bit of boldness, it was steady and steady. It was currently the city that was the least likely to collapse out of the six big cities...

For example, she pointed out that even though the city lord of the third city was strict with the players, he was not selfish. He was far-sighted and practical in his plans. As long as he suffered through the early stages., the players of the third city who had many skills would occupy a place in the market in the future.

The fourth city was too wild, and it felt like it had degenerated into a primitive jungle. However, it was not completely useless. The players who could graduate from this city should be very aggressive, and they were suitable for those players who valued strength above all else...

At that time, under the influence of the news environment and various capital, a lot of people praised the fifth city controlled by Mister, describing it as an otherworldly paradise, while the other cities were full of loopholes, especially Huaxia City, which was directly portrayed as a land of demons.

At that time, Cindy's actual report, which was not mixed with politics, was instead met with a wave of criticism from the media. Some people even accused her of accepting bribes from Huazhong...

Just as the senior in the news world had threatened, Cindy had no place in the media anymore. She was fired the first week after she returned, and the news agencies even closed their doors to her. Under the pressure of capital, she couldn't even find a job. At the beginning, she was reduced to working part-time in a supermarket to make a living...

Those days could be said to be very down and out, but she didn't give up. Instead, she continued to try to make her voice heard, publishing diary entries on various social platforms, and recording in detail what she had seen and heard in the six cities of Xing Hai. Suddenly, she attracted a lot of traffic... ..

Xing Hai City was semi-closed. In order not to divulge any information, players were forbidden to return to D ball. Grandpa Lu, who was once the number one strategy master in the Forum, had also gone silent for the past six months. The netizens who were eager to know more about Xing Hai were paying more and more attention to this young reporter who had been there before...

Therefore, many people added private messages to ask for information. Taking advantage of the enthusiasm of the netizens, Cindy began to slowly refine what she had seen and heard. She started her live broadcast career, answering the curiosity of many netizens about xing hai one by one, her image and temperament were already very good, and she quickly became popular. By the time the major media outlets reacted and wanted to ban her, it was already too late. The internet platforms of central China, West Germany, and Red Sun were all opened to Cindy. All of a sudden, Cindy became a well-known online celebrity reporter on an international platform... ..

Her popularity was even higher than some of the top celebrities in recent times. This time, the down-and-out Cindy was given a new life... ..

And this time, her career ushered in a second climax. This time, Galaxy had reopened the New World and held a grand press conference. It had actually invited Cindy for a second time, which even Cindy herself had not expected.

At the same time, most of the well-known reporters who had been invited last time were outside of the list. For a time, it caused a great stir in the media!

One after another, there were people accusing the previous bad media of false reports that had led to being blacklisted by Galaxy's official list. Meanwhile, a few major media outlets had issued the news that the headquarters of galaxy was now under the control of the Huazhong people. They controlled the conspiracy theories of the higher-ups of galaxy... ..

Anyway, the outside world was very noisy about it...

However, all of this had nothing to do with Cindy. She had already thought it through. She only wanted to be an ideal reporter, reporting what she had seen and heard, and showing everyone the real starry world... If she had the ability to come to Xing Hai, she also intended to continue her career as a reporter in the New World, to go to the wider starry sky, and share what she had seen and heard with the people she wanted to see...

"Wow... Cindy World, is this Huaxia City? It's so beautiful! The pictures are already beautiful enough. I didn't expect the video to be even better. You didn't use any special effects, right?"

A group of netizens from various countries in the live broadcast room asked one after another... ..

"Of course not! This is a high-definition live broadcast!" Cindy replied with a smile. "Huaxia City's urban style was established by the first batch of Huaxia players who voted. I heard that it was a simplified version of Starlight Elven city...". "..."

"Wow... This is a simplified version? How Awesome would the official version be?"

"That's right, that's right. To be able to live in such a beautiful city is really a blessing. Unfortunately... Huaxia City doesn't accept foreign players..."

"UH... Excuse me, I'm an American, but my ancestral home is Huazhong. Is it too late to change it back?"

"The person upstairs can consider taking back Central Asia. There might be some hope..."

Cindy watched the heated discussion in the live broadcast room, she smiled and comforted, "Don't be too discouraged. Don't forget that this is a feudal lord system. As long as you can conquer the outside world, you might be able to build a city that's even more beautiful than Huaxia City..."

"Sister Cindy, don't comfort us. It's so hard to line up now. I guess I'll have to wait for my son to fulfill his dream for me..."

"That's right, that's right. Now that the New World is open, will the speed of city admission be faster? F*ck, there are billions of people lining up, but only a few hundred thousand people. I seriously doubt that my grandson will be able to wait..."

Cindy: "It's not that exaggerated. It's just that the initial resources of the city are not enough to accommodate so many players. I've read the official information sent to us. It says that this time, the New World is also open with a space called the emerald dream. According to the information, it's as big as the Milky Way, and there are tens of thousands of life stars. Such a large space is waiting for warriors to conquer, how can we not be able to queue for it?"

“Haha, My Wife Sure knows how to talk...”

“My dear wife is right. I will definitely work hard and conquer a kingdom for you when I get there...”

“The people of Huazhong are really shameless. Who Is Your Wife?”

“Shut up, third... fifth-class gene sequence user...”

“F * ck, what the F * ck are you talking about...”

“Isn’t it?”

Looking at the noisy live broadcast room, Cindy smiled bitterly... ..

The live broadcast platform she had joined was a large international network platform. Her fans came from all over the world. Due to her fair evaluation, she had the most fans from central China, but there were also many from other countries.

When there were more people, there was bound to be a war of words. Without even looking at the netizens from other countries, they would start a regional war. Ah San would provoke her almost every day, and she didn’t know what to do... ..

Just as she was feeling helpless, the private message on the platform suddenly lit up...

Cindy hurriedly opened it, just in time to interrupt...

The private message came from an ID called Wei Xiong. It should be a relatively young user, but the question made Cindy stunned... ..

“Miss Cindy, I heard that the fifth city is currently engaging in racial discrimination. Players from various races have joined forces to isolate the players from central China, and it seems that the city is also helping to isolate us. I even heard from my friends that the city Lord has restricted the number of players from central China who can go to the new world. It’s obvious that he’s suppressing us. Is that true?”

As soon as she said this, Cindy was stunned...

The live stream room was also immediately attracted by the attention...

“Who did you hear it from?”Cindy hurriedly asked...

Little Wei Xiong: “I heard it from my sister. He was lucky enough to be recorded into the fifth city a few months ago. I’m still waiting in line here. Wasn’t there an Internet connection yesterday? “Although the players can’t come back yet, they can already contact their relatives. She was still a flower spirit over there, but in the end, she was ostracized so much that she couldn’t even find a job... ”. “...”

“F * CK, is this for real?”

A group of Huazhong netizens instantly exploded! !

Chapter 1349: five castellans (I)

“No Way?” Cindy was watching the live broadcast, so almost all the netizens on the platform saw it. This content instantly blew up the netizens in Huazhong who were arguing with AH San just now!

Really?

Cindy was also dumbfounded. She had long thought that mister was definitely unreliable, but she did not expect him to go to this extent. After all, back then, he was able to become the fifth castellan. Most of the votes came from overseas Huazhong players...

She spent a lot of time to learn about the election system in order to make a news report. The popular vote was not all about the number of votes, but also the quality of the population. The Best Huazhong players at that time were the ones with the highest number of votes, they were the most outstanding vote holders.

This also caused Angor in West Germany, Sunny in the Red Sun, and even iron-fisted president song to seek support from Huazhong!

Meister did not ask for the government’s support back then. After all, he had always detested the government of Huazhong when he was in power. Without the government’s support, he chose to win over those people who yearned for the United States and were extremely dissatisfied with the society under his control.

They were also known as the white rice people in Huazhong...

It had to be said that Meister was a very crafty person. He put on all kinds of show and tried to trick people. After that, he directly opened a villa and recommended a million-year-salary job as a temptation. He really managed to win over quite a number of Huazhong players.

It provided a huge boost to his campaign for the city lord. Cindy remembered that at that time, the competition in the fifth city was not small. There were quite a number of North American political elites participating in the election, including charming female president, Shermie. Mister did not have much of a vote advantage at that time. If he had not managed to rope in those central China players, he might not have been elected...

In the end, his butt had not even warmed up yet? He had already crossed the river and burned the bridge?

This made Cindy very confused. The central China players were his people in the fifth city. What good would it do him to be isolated and discriminated against like this?

Cindy was puzzled, but the internet had already started arguing...

All the central China players who had chosen the fifth city quickly fell into a frenzy and wailed. All kinds of greetings to Meister’s family came out one after another... ..

Then, there was a mocking laugh from the third player. “Heh, you guys also have this day?”

The Huazhong Players, who were already on the verge of collapse, immediately found a way to vent their anger, they immediately ridiculed, “F * ck you, making it sound like you guys are doing very well?”

Aren't you still being treated like dogs? You sent your own hero, Amir, to prison and chose to Lick America's dad, but in the end? Dogs will always be dogs..."

The third player: "Hehe, you came here to be the owner? You talk as if you didn't help choose Meister. How does it feel to be a prodigal dog now?"

The two groups of players scolded each other, while the other countries around them added fuel to the fire. They didn't think that it was too big of a deal.

What was even stranger was the domestic players. They didn't seem to have much sympathy for the suffering of their compatriots.

"This dog city lord, this dog American, I knew this idiot fatty wasn't a good person. I greeted his wife and daughter, what? I chose Huaxia City? Oh, that's fine then... Dog Head..."

"Aiya, the third city that responded to the country's call, I heard that life is quite tough. I have to complete missions in a day and learn a lot of useless things... hmm... I suddenly feel that it's really fragrant, it's better to listen to the organization's arrangements..."

"That's right. Those who lick your American father are not talking now? Free Country? The air is free. How does it feel? It's also their freedom to bully you. Didn't you all yearn for that in the past? Now, you're whining your head off...". "..."

The hostility was so strong...

Cindy looked at the seething live broadcast room and directly chose to silence it!

"Everyone... .. Please don't get excited!" Cindy quickly composed herself and said to the live broadcast room, "We are here for the interview to understand the current situation of galaxy. As for the specific situation, can you wait for me to show you all the comments when I'm done?"

As soon as she finished her sentence, Cindy found that tens of thousands of private messages immediately flew into her private email box. She opened a few of them and looked at them. Then, her mood became complicated... ..

Most of the people who sent private messages to her were players from central China who had chosen the fifth city. They seemed to want her to help them understand the situation, and their tone was extremely polite, it was completely different from the berserk state in the livestream room.

However, in reality, most of these players who had chosen the fifth city were not her fans, because her article did not look favorably on the fifth city, thinking that it was a capital trap, when she received the approval and support of the players in China, she would naturally meet the anti-fans of the supporters of the fifth city.

This group of players from central China who had invested in the fifth city were particularly fierce. Usually, they would be all kinds of sarcastic and sarcastic in the live broadcast room, and they would even say dirty words, which made her very annoyed. However, she did not expect that one day, they would come to her and beg her like this... ..

The world is a magical place...

“I’ll get to the bottom of this...”Cindy finally promised. “Then at the interview conference, I’ll ask Meester in public and ask the Xing Hai officials about this...”

As soon as these words came out, a pile of private messages suddenly appeared, most of them were words of thanks, which made Cindy feel more and more amused in her heart. A creature like man, as expected, the buttocks decide the brain... . .

Meanwhile, Mister, who was hated by many players, arrived at the base leisurely. The teleportation points of the five major cities were all connected to the interior of the base. As soon as Meister teleported here, he saw several other members of his team... . .

“Looking good, Mr. Meister...”

As soon as he came out of the teleportation, a gentle female voice was heard. However, Mister felt an inexplicable coldness surge into his heart, and Goosebumps rose all over his body subconsciously... ..

Turning his head, he saw a woman in a purple dress, beautifully dressed. It was the Fourth City Lord: Elizabeth!

Mister narrowed his eyes, and a hint of vigilance flashed through his heart... ..

He was very wary of this woman who had suddenly risen without a sound and killed the strongest candidate of Western Europe, Gaia. This kind of woman was like a poisonous snake. If he was not careful, he would not even know how she died.

Moreover, the aura on this woman was clearly very dangerous!

He had heard that the genes of the fourth city were somewhat special. They belonged to the category of barbaric plunderers. It was rumored that the people there were raised like wild beasts. That was fine. According to what he knew, this woman was not only like this to the people. She was also treating him like this. After developing that primitive biological evolution system, she had joined in as well, taking the lead as a soldier... ..

The current number one player in the fourth city was actually Elizabeth herself. She was the only level 3 player in the fourth city!

Level 3...

This piece of information made even mister feel somewhat incredulous. He had accumulated so many resources in his clan and some of the cooperating clans in the early stages, but there were only a few level 2 experts that had been born, in the end, it was said that there were already over a hundred fourth cities, ranking first among the five major cities!

This woman... was a little ruthless...

Chapter 1350: the five castellans (Part Two)

To be honest, Meester did not have a high desire for the biological level itself in the beginning. From what he knew, personal bravery and status and power were often two different things.

It was not that there were no extraordinaires on the D sphere, but after so many years, were those extraordinaires riding on their heads?

It was only the decadent and ancient system of western Europe that allowed the so-called knight family to rule for so many years... ..

But at this moment, when faced with Elizabeth, the thoughts in Mister's heart had some changes... ..

After the evolution, Elizabeth became even more beautiful and moving, but the faint aura on her made it difficult for mister to even look directly at her, especially when they were so close that even breathing became difficult...

At that moment, he suddenly felt very small... ..

Perhaps, after he returned, he should train his genetic body as well?

Just as he was thinking about this, two flashes of light from the teleportation array interrupted his thoughts. He raised his head and looked over. After the light dissipated, the first thing that was imprinted in front of him was an incomparably tall figure!

It was clearly the figure of a Green Titan. On the other side was a tall and slender elf. However, his aura was extremely good. He had an incomparably noble aura. His aura was even more noble than Elizabeth's... ..

"Oh, the two of you came very early..."the elf bowed slightly, a friendly smile on his face.

It was the second city's City Lord, Abe Qingming!

Mister glanced at him and frowned, "You're with Mr. Long?"

The Titan beside him was Huaxia City's City Lord, Elder Long...

"We didn't make an appointment..."qingming smiled, "It's purely a coincidence that I landed with Mr. Long. It's probably fate... er... by the way, elder long, this suit of yours... It's quite unique. Is it made by the Dog Egg Tailor Shop?"

Lung:"..."

To tell the truth, such a tall and strong Titan, wearing such a formal suit, it is very strange, although the suit design has been very in line with his temperament, but... Or does it feel like a thug in a suit... ..

In fact, he also considered, as a manager, should choose the developer bloodline, but... .. Titan smells so good...

Without aging, you will never understand people's desire for a strong body. After the operation, elder Li sighed with emotion almost every day, saying that he felt the surging qi and blood of the body and the continuous energy. It's like a new lease on life... ..

Looking at the strong Old Lee, he hesitated for two months, he finally chose Titan...

“I think it’s not bad...” Elizabeth pursed her lips, she got close to elder long and narrowed her eyes to size him up. “Very strong Qi and blood. It seems that elder long has not forgotten to exercise while he is busy with all kinds of things. He is different from some people...”

These people were naturally referring to mister, who was still at primary level one... ..

When she looked at Mister Again, Elizabeth could not help but twitch her eyelids. Not only did this mister not improve at all in the past six months after undergoing surgery, he even grew a beer belly. How could she believe it?

The initial physical fitness of a genetic player was almost at their best. Each of them had eight-pack ABS, yet they were able to damage their genetic body to such a state in half a year. This was the first time she had seen this... ..

Mister shrugged nonchalantly and said sarcastically, “I’m not a soldier. What do I need to train for?”

“Is that so?” Elizabeth smiled slightly and did not say anything else. This idiot did not understand at all what the future would be dominated by. It was still the mindset of a small businessman in the past. The current model did not have enough individual strength.., even if you were given power, would you be able to take it?

After paying no more attention to this short-sighted fellow, mister, Elizabeth turned her attention to the other two.

This old man from Huaxia City had exceeded her expectations. Looking at his Qi and blood, he was probably already at the peak of level two, right?

She heard that he had performed the genetic surgery two months later than her. Before the surgery, he was also an old man who was about to die. She did not expect him to improve so quickly? Perhaps in terms of talent, he was one level higher among the players in Huazhong.

Elder Long was a politician who was skilled, skilled, and powerful. Huaxia City’s foundation was also better than the fourth city. He would probably be a formidable enemy in the future... ..

Then, he looked at another job...

In the end, Abe Qingming’s shapeshifting job was a priestess. Elizabeth had some understanding of the elf priestess system. Back then, she had also been included in the selection. It was a high-level spirit job and had many magical special abilities.

The reason why she didn’t choose was that the elves were too uncertain, and the transformation class couldn’t be independent at all. Elizabeth couldn’t accept this kind of uncertainty, so she gave up on the elf option...

But what puzzled her was qingming...

Not only did Qingming choose the elves as the main race of the second city, but she also decided on the civilization model of the city from the very beginning. The second city was the traditional elf priestess of the divine civilization.., it was a biological arcane system with the priests building the magic net and the elves of other major types as support.

This was very confusing. According to her information, the priest civilization must be led by the priests. The High Priest building the magic net so that the entire civilization could be accurately controlled by the priests, it was the most arbitrary civilization, and it was not even worse than the system of the Queen of Soul Worms!

However, this system required the leader to be a priestess. After all, Qingming had not transformed when he decided on this model!

How did he know that he would definitely be a priestess?

The Elven civilization model was not just a priestess civilization. There was an elemental civilization that was dominated by flower spirits, an elven mechanical civilization that was dominated by spiritual masters, and there were also many mid-composite civilization models. Qingming could have waited for his transformation to take effect, but he did not. It was as if he knew that he could become a priestess...

This made Elizabeth feel very strange...

Facing Elizabeth's sizing up, Qingming still smiled gently and harmlessly. "Why is City Lord Elizabeth looking at me all the time?"

Elizabeth: "It's too beautiful, so I took a few more glances..."

"Is that so?" Qingming seemed to be very pleased with the other party's words and said with a smile, "I was also attracted by the beauty of the elf form back then, so I thought that if I could come here, I would definitely become an elf..."

"Then, did you think about becoming a priest long ago?" Elizabeth asked with a smile.

"How is that possible?" Qingming replied with a smile, "This thing is not controlled by humans..."

"Is that so?" Elder Long chimed in, "But I see that city Lord Qingming's behavior is as if you already knew that you would become a priest..."

"Elder Long, you must be joking..." Qingming replied with a calm smile, "I decided on this civilization model because I feel that its development model is the most outstanding among the ELF models, and it has nothing to do with whether I can become the leader or not. The city Lord is just a manager, and there will be a rotation in the future. It doesn't mean that the city Lord has to become the leader, what do you think?"

"City Lord Qingming is really broad-minded. I admire you..." elder long said with a smile while squinting his eyes.

He didn't believe half of Qingming's words...

Although he didn't know how this little brat did it, there must be something fishy going on!

"Do you plan to chat here all the time?"

A faint voice interrupted their conversation. Everyone was stunned. When they turned around, they saw a decadent figure in a formal suit... ..

It was literally dispirited. His face was pale, his dark circles under his eyes and his messy hair made him look like an internet addict who had stayed up all night in an internet cafe... ..

“Song Ziyi? What’s wrong with you?”

Elder long asked in surprise...

Obviously, the man who looked like he was about to die was the city lord of the third city, Song Ziyi.

“I didn’t have time to clean up after my official business. Sorry to have embarrassed you, elder long...” song Zaiyi smiled politely at Elder Long... ..

Elizabeth’s pupils constricted slightly...

Although the other party looked like he was about to die, that spiritual energy gave her a faint sense of threat. She was very sure that the other party... .. ! Was a level three developer!
