

## **A Bunch 1431**

### Chapter 1431: the back door of cabbages (Part 1)

The Star Academy was a top-tier university founded by the Star Elves themselves. After a long period of operation, its current status had gone from being lofty to being only second to the federation's Interstellar Academy in overall rankings. It was the ideal academy in the hearts of countless people.

Of course, the ideal university was not only because of its ranking, but also because of its resources and geography. The Star Academy's Geography was considered top-tier among all the academies, this was because the planet that the academy occupied was one of the top ten superstars in the federation: The Star of Teldrasil!

The star of Teldrasil was a top-tier planet that had been nurtured since the ancient era of the great elves. It was the first planet to nurture the world tree until today. The soil of this planet had a huge value, and in many black markets..., a gram of soil could be bought for a sky-high price of ten billion!

One could imagine the energy environment inside such a planet. Ever since the end of the chaos in the Sky God Alliance, it had been occupied by the Sky Elves who had supported the sky gods. Fortunately..., the Sky Elves did not completely seal off this enviable soil from the outside world. The establishment of this place as a place of learning had greatly reduced the dissatisfaction of the other races'elves.

Of course, if one wanted to enjoy the resources and environment of this planet, one would need to be extremely talented. At this moment, in the conference hall of the campus headquarters... There was a confrontation against those who were not so outstanding who wanted to forcefully enter this place... ..

"380 points? What do you think this place is, a Cesspool? What kind of nonsense are you sending here! !"

In the hall, an elven woman wearing a silver robe and a badge that looked like a moon grass on her chest roared viciously!

The woman looked like a very pure star elf at first glance, and her pretty face was even more mesmerizing. However, at this moment, this beautiful face was so twisted that it was frightening. Her vicious expression was as if she wanted to eat people..., this caused the other elven teachers to lower their heads, not daring to look at her!

The female Elf was called Dylan. She was the first elder of the moon god Clan and was ranked 41st among the sky elf elders. She was currently the Chief Magical Beast Master of the Starry Sky Academy and also the Vice Dean of the Starry Sky Academy's Secret Law Academy!

"Instructor Dylan, calm down..."

The Elf who was sitting at the head of the table had an elegant temperament, but it was obvious that he had experienced the vicissitudes of time. He smiled bitterly.

"Calm down? "How can I calm down?"The instructor named Dylan became more and more excited. "In last year's evaluation, our school's Magical Beast Department's Comprehensive Evaluation dropped by a full ten points, and our ranking dropped from seventh to eleventh. Why? "It's all because of you, the

accomplices who use the back door, constantly sending trash into our school. Once your reputation stinks, the good seedlings almost don't come anymore!"

"Instructor Dylan's words are a little biased...". "...". One of the Elven instructors on the conference table said slowly, "In this world, there are gains and losses. You only said that those families use the back door, but have you forgotten how many outstanding seedlings that those families have also sent to you?"

"Stop Bullsh \* tting!" Dylan said rudely, "How many direct descendants would choose the path of a magical beast trainer? "This is nothing compared to the trash they sent in. The instructors of the other departments in your secret court have taken advantage of this. Every year, a large number of direct descendants send them to you, and the ones that send me are trash who use the back door!"

The other Vice Presidents of the Secret Court lowered their heads and drank their tea without saying a word. The shrew in front of them was quite fierce. It would be unwise for people like them, who had taken advantage of the situation, to still pretend to be obedient if they angered the other party again...

...

As one of the three great courts of the Starry Sky Academy that could remain on the star of Tedar Hill, the secret court had naturally collected many young talents from top families over the years, including many members of the royal family.

After all, in the Starry Sky Elf System, the position of the flower spirit was only second to that of the priestess... ..

But that also depended on the profession. Among the flower spirits, the most popular was naturally the elemental master who could directly change the planet's environment. As an existence that could directly strengthen the elements and nurture the great elemental elves., the elemental master flower spirit was very popular both within the elves and among the Heavenly God lords. Strictly speaking, to outsiders, especially to the Heavenly God lords, the flower spirit's status was even higher than that of the priestess.

This was because a good flower spirit elemental master could directly improve the quality of the planet. Whether it was the mechanical civilization or the alchemy civilization, they all needed high-quality energy. Currently, in the universe, they could directly improve the planet's origin., only the flower spirit elementalists could optimize energy. This major also resulted in the elves' status in the entire universe being extremely high.

This major was the face of the elves, and it was also the most sought after major in the starry sky academy other than the priestess' academy. Naturally, they could not allow the noble children to act Rashly, which was why the path of using the backdoor as an elemental master had always been sealed.

Next was the secret treasure master. In the alchemy world, only flowers and psionic energy could create living weapons. The so-called living weapons were living alchemical weapons. No race, or even the previous developers, had been able to replicate this, therefore, although the secret treasure master originated from alchemy, it was a major that was independent of the alchemist.

Many people put in a lot of effort in order to obtain a secret treasure. After all, alchemical weapons required a certain level to be used. However, secret treasures were different because secret treasures

were alive, therefore, many times, the secret treasure itself could be self-adjusted to reduce the use requirements, allowing the low-level people to borrow some of their own power. It was the most popular type of alchemy among outsiders. Many times, the secret treasure was used as a family heirloom... ..

An excellent secret treasure master was extremely popular wherever he went.

However, the threshold for Secret Treasure Masters was very high. Those who wanted to walk this path not only had to be highly talented in the flower spirit itself, but also had a strong talent in alchemy. It was known that alchemy was the most complicated and difficult subject to test in the Arcana Department, the written exam in the academy could not be faked, so many people could not go through the back door.

Compared to the previous two majors, Magic Plant Master and Magic Pet Master were different. Because of the special content of the exam, the two majors were very suitable to be exploited. In addition, magic pet master and Magic Plant Master were far inferior to the former two in terms of status, therefore, it became a good place for many nobles to get their diplomas.

“Forget about the past!” In front of the conference table., instructor Dylan said aggressively, “Although the gifts are all junk, it’s still an item. At least it has some face and has reached the interstellar control line. But what the hell is this guy? 380 points? You Don’t even want your face anymore, do you? “If this gets out, I won’t have the face to be the dean. You can call someone to replace me. I’ll resign tomorrow...”. “...”

“It’s not, it’s not...” the elf at the head of the table quickly comforted, “Instructor Dylan, don’t be so agitated. If you want to resign, it’s already here...”

What a joke. The chief instructor of Magical Beasts resigned because he refused to admit a profligate student with a score of 380. If this news were to get out, the spotlight of Divine Arcana Academy being ridiculed by others would soon shift to them... ..

“I really have no choice... mentor Dylan, you have to measure yourself. This little fellow has an extraordinary background. It’s really not easy for me to reject him...”

“Oh?” Dylan raised his eyebrows and sneered, “Who is so thick-skinned that you can’t even reject the Dean?”

Chapter 1432: the back door of cabbages (Part 2)

Although Dylan was angry, he was also very curious about who had forced the dean to agree to this matter.

One had to know that the secret court held a very high position in the Starry Sky Academy. Outsiders had said that the Starry Sky Academy was established on the star of Tedar Hill, but in reality, there were only three major academies that could be stationed on the star of Tedar Hill, they were the star Priest Academy, The Guardian Academy, and the Secret Law Academy!

There was no need to mention the priest academy. The Star clan was the priestess’ royal authority. The royal elves themselves had to have the status of priestess in order to compete for the highest position, so their status in the Star Academy was naturally the highest.

The Guardian Academy was a famous exclusive academy for nobles. It was a place that specialized in training the top warriors of the Guardian High Priestess. It was equivalent to the Elven Knight Academy. Moreover, this academy did not recruit outsiders, only the star elves themselves, moreover, only noble families were allowed to enter the academy. Their status was also extremely high.

However, in terms of resource allocation, even the position of the Guardian Academy's Dean was inferior to that of the secret court!

Don't look at the gentle and gentle appearance of this elf in front of you. Those who were familiar with him knew exactly what kind of existence he was... ..

The third elder of the starry elves, the Seventh Elder of the elven parliament, the former chief secret mage of the royal family, the former secret mage teacher of the Empress, the former Secretary of State of the Starry Elf Royal Family, and the Patriarch of the Stormwind family!

Among all the space elves, this person in front of him was one of the top figures, and he couldn't refuse him. Could it be the elven empress?

Didn't she just die?

"It's Lord Tooth Spirit!"

"What the hell?" Dylan was stunned, and then his face was full of astonishment. The managers of the other two houses at the meeting table were also shocked...

Tooth Spirit. Tataya, the number one ranger in the space, the personal guard of Iluweta, and the founder of the Guardian Academy. He was an ancient elder, and it was said that he had followed ILUWETA since the founding of the federation., his Excellency had followed the legendary figure of Iluweta when he joined the branch of the gods.

"Watch your words, Dylan!" A cold light flashed in the Dean's eyes. "Please maintain the due respect for Lord Tooth Spirit!"

Dylan was immediately choked, but she did not dare to retort with her fiery temper... ..

Having been with the dean for many years, she knew very well what she could and could not say. In any case, Lord Tooth Spirit's bad words were definitely unspeakable. According to rumors, this Dean's Lord Tooth Spirit's admirer, whether this rumor was true or not, Dylan did not know. But the Dean definitely had special feelings for Lord Tooth Spirit, she was certain of it... ..

Seeing that the other party silently admitted to being a coward, the Dean sighed slightly, in a gentle voice, he said, "This child's situation is special, and his origins are all confidential. He has already contacted the MUZIR family, and from now on, this child will be Kyle. "The daughter of Muzir's illegitimate daughter was just brought back a few days ago, and because of her outstanding aptitude, she was sent to my courtyard... .."

"Kyle Muzir?" Dylan's face twitched. That Dumas who had spread his spirit?

The disgrace of the MUZIR family. Almost every once in a while, there would be a woman bringing her illegitimate children to the house to demand an explanation. From the royal family of the starry skies to the Mother Titan of the outside world, the other party had a wide range of tastes, in these past few years, his magical Beast Academy had taken in at least eight hundred illegitimate children from the other party. He was one of the people who gave him the greatest headache!

However, this fellow had a high status. He was one of the four great sword saints of the starry elves and the commander of the Royal Guards. She had no choice but to give him face!

Dylan looked at the name on the list. It was little cabbage:. Muzir... ..

Previously, because of the other party's very casual name, she had subconsciously neglected to look at the last surname. However, it was not that she had deliberately neglected it. After all, Muzir was a common surname in the starry elves...

"Wait..." Dylan put down the name list and his expression became strange, "Dean, you mean that this guy who scored 380 is using Kyle as a cover? In reality, he's not his child?"

"Of course not..." the dean covered his head, "Even though that guy is unreliable and has illegitimate children all over the universe, he wouldn't be so crazy as to give his child this name..."

"Er..." Dylan was stunned, "Then what's her background?"

The dean shook his head, "Lord Tooth Spirit didn't say..."

"Lord Dean..." beside him, another elf opened his mouth, it was the person in charge of the Secret Treasure Department. He said with a serious expression, "Lord Tooth Spirit asked Lord Kyle to cover for us, and you personally came to tell us, who are you trying to hide it from?"

When he said this, everyone in the meeting hall, including Dylan, had solemn expressions on their faces.

That's right. She had gone through so many twists and turns. She must be trying to hide this child's true identity so that no one would notice her. But with master tooth spirit's identity, who was worth her concealing?

The principal was silent. He did not speak. Instead, he looked at an empty chair to the side.

Everyone was stunned for a moment before their expressions changed drastically! ! !

The empty chair belonged to Umma Yufeng, the President of the Magical Plant Department!

The few teachers looked at each other with tensed faces. They could see the shock in each other's eyes.

The Yufeng Family?

Lord Tooth Spirit wanted to hide it from the Royal Family! ! !

After receiving the answer, the hearts of the few teachers surged like a tidal wave. Their brains almost froze on the spot!

Lord Tooth Spirit herself did not have any family or influence, because she had never had a family, nor did she have any descendants since countless eras. She belonged to Lord Iluweta's lonely subject!

Most of his actions were instigated by the Lord at the back, which meant... "...". Lord Iluweta wanted to hide from the Royal Family?

The few of them instantly felt a chill all over their bodies, including Dylan, who had a face full of hostility just now. At this moment, he sat back on his chair with a guilty conscience, silently looking at his surroundings.

At this moment, the Dean was smiling as he held his cup and drank his tea, as if he had just talked about an insignificant topic. However, the few teachers knew that if they didn't give an answer, they wouldn't be able to walk out of this place today... ..

How was this a backdoor? This was clearly to make them stand on the same side! !

In an instant, the few of them felt a chill run down their spines!

"Sir..."the courtyard of the secret treasure courtyard suddenly smiled wryly and said, "Isn't this a little too sudden?"

The dean smiled and took a sip of tea. "If it wasn't sudden, we might not even be able to see you here, right?"

"Sir Dean..."Dylan couldn't help but ask, "What's the background of this little baby? What exactly does that Sir Want to do?"

"I don't know..." The Dean shook his head. "Even now, I still don't know why that Sir wanted to hide information about this child and even be so wary of the royal family. However, my family and I have always stood on that Sir's side. Even if there is no reason, we will still do it!"

"If that's the case, sir, why do you need to Drag US along?"The dean of the Elemental Master Department smiled bitterly. "Isn't it better for fewer people to know about this kind of concealment?"

"This is also what that Sir Meant..."the dean was also puzzled. "What that Sir meant was that I alone can't hide this child's talent..."

"Talent?"Dylan's eyelids twitched as he mocked, "380 points of talent? I think we really can't hide it..."

"380 points is because the time is too short..."the dean smiled bitterly. "That child's foundation is too poor. In just a short span of ten days, she started learning the Federation's BASIC courses. To be able to achieve such results with zero foundation, I feel that I have already done my best..."

"Uh..."everyone's faces twitched. After all this time, this child was personally groomed by the Dean?

Wait? Ten Days? ZERO foundation?

Chapter 1433: The Exotic Little Flower Spirit (part one)

"Hey, why is there a test in the afternoon? I thought I could sleep for the whole day. After sitting on the spaceship for so long, I'm so tired..."

Under the bright and beautiful starry sky, little cabbage, who was in the waiting area, immediately complained. Steamed Bun's face swelled up.

Chen Ye turned around and looked at him in shock. "Don't you know that the first phase of the test is a mental quality test?"

Xiao Bai Cai widened his eyes and said, "That's why you need to sleep well and rest up. What the hell is there to test in such a tired state?"

"Who told you that?" Chen Ye was completely shocked.

The mental strength test mainly tested two points. One was the quality of the mental strength secreted by the brain's inner core, and the other was the limit of the brain's inner core under this level!

Both required you to maintain a certain level of activity, just like the physical fitness test required you to warm up. It was the same for the mental strength test. After sleeping for a while, although the brain was rested, it was still in a full state. If you forcefully turned it on to the maximum power, it would be extremely strained, and it would affect your results... ..

Since yesterday morning and night, he had been maintaining the mental strength activity to maintain a warm-up state. It was the same for many people on the spaceship. Just now, he had felt that the other party's mental state seemed to have been stagnant, he had thought that it was some kind of secret technique, but in the end, she did not understand it at all?

Oh My God, this kind of common sense should be known by the Federation citizens, right. He also knew that the descendants of these nobles who used the back door were not reliable, but he did not expect them to be so unreliable. Now, he even suspected that the 380 points was her real score... ..

"Only when you sleep will you be energetic. This is common sense, okay?" Little cabbage looked at Chen Ye with a silly look on her face.

Chen Ye: "..."

"Forget it... just make do with it..." little cabbage said as she opened the compressed bag.

Chen Ye was puzzled. Just when he did not understand what the other party was going to do, he saw the other party take out a furry soft shed from the compressed bag. The shape was quite q, and it looked like a pet's nest... ..

Chen Ye had been a magical pet apprentice for more than a hundred years. With a glance, he could tell that this was a special nest specially prepared for the bright moon rabbit. He thought to himself, as expected of an aristocrat... ..

Things like magical pets were very dependent on family strength. A good family economy could equip their children with very high-quality magical beast species. The Bright Moon rabbit was one of them. It was a high-agility a-grade magical beast species, and it also had an innate space-type talent.., after it was formed, its combat strength was extremely strong.

It was just that its life was more delicate, and it was very picky about its diet and living environment, especially when it came to living. There was a saying among magical beast masters that the Phoenix only rested on the parasol tree, and the Moon Rabbit only slept in the parasol nest.., the parasol nest could only be produced by mammals that had the essence of the Sun. It was expensive, and the parasol nest

that could be made only needed the fleece of a young creature, which was even more expensive, a soft nest like this would cost at least tens of millions of federal dollars, which was equivalent to ten years of college tuition!

However, morning and night sighed at the same time with some doubts. They did not understand why the other party would bring a pet nest at this time? Space packs were not allowed in the examination room. Magical Pets were prepared in the summoning space in advance. Why would they put a magical beast nest in a compressed bag?

Then, the next scene saw the other party crawl into it, curled up like a puppy, and then closed his eyes in satisfaction... ..

"I say..."Chen Ye didn't know how to retort.

"Oh, right..."Bai Cai stuck his head out. "Call me when it's time for the exam..."

"Are you serious?"Chen Ye almost jumped up!

"Um... I'm tired..."Bai Cai said aggrievedly.

"But you can't sleep here. What would it look like if the instructor saw you?"Chen Ye covered his head.

"By the way, are you deliberately joking? You even prepared this in advance?"

"Hehe..." "..." "..."Bai Cai scratched her head embarrassedly. "I thought that the conditions of the temporary dormitory arranged by the school might be very ordinary. It might be a room for eight or sixteen people. If you can't get a seat, you have to sleep on the floor, so I prepared this in advance. I didn't expect the school to be so SH \* TTY. There's no room for rest at all. Fortunately, I, Bai Cai, am wise enough to bring this..." "..."

Wise my ass... Chen Ye held his head, feeling the pain of talking to this guy. ...

"Call me later, I'll treat you to delicious food after the exam!"Little cabbage smiled and enticed him.

Looking at the other party's big round eyes filled with anticipation, Chen Ye's thousands of complaints finally turned into a "Good" word.

Just as he said that, he subconsciously wanted to slap himself. This was obviously something that he couldn't agree to, okay?

"Thank you, you're really a good person! !"Little cabbage happily shrank back. In less than a few seconds, a soft sound came from his nest...

Chen Ye:"..."

What a magical guy...

Forget it, let's just leave it at that. This kind of silly guy would also waste his position if he was admitted into the academy. It would be a good opportunity for him to have another position!

When Chen Ye thought of this, he suddenly felt that it made a lot of sense. He had subconsciously said that it was definitely based on this kind of thinking. Although it was a little utilitarian, it was still reality, wasn't it?

Just like that, after Chen Ye had a reason, he sat cross-legged on the side and carefully guarded this little fellow who did not have any guard.

The examinees who passed by frequently looked at him with strange eyes from time to time, making him feel a little pressured. However, it could also be considered as compensation, Chen Ye thought.

-----

On the other side, many invigilators in the examination hall were doing their preparations. Apart from testing the equipment, they were also confirming the examinees' information over and over again.

The main reason was that there were too many types of examinations. Different examinations had different assessment standards. Some races specialized in the cultivation of a certain type of magical beast, and this kind of score had to be calculated separately. The main consideration was the strength of the other party's specific attribute, naturally, they could not use the same score to enroll. In order to accurately test, they naturally had to record the data in advance.

Just as they were preparing, a familiar figure walked into the examination hall. A group of instructors hurriedly stood up and saluted. The person who came was none other than the Dean of their Magical Beast Department: Dylan!

"Hello, Dean!"

"All of you are busy with your own things..." Dylan waved his hand expressionlessly, all the instructors continued to sit down and continue with their work as usual. Dylan had been doing this for many years, and all the instructors who had worked here for a long time knew that he was capable and capable without any ceremony.

Dylan walked all the way to the innermost control room of the examination hall. There was only one person sitting inside. It was the first-level professor who was responsible for the evaluation of the total score of the Examination Hall.

What was surprising was that this first-level professor of the Starry Sky Academy was actually a snow elf... ..

One had to know that the snow elves and the Starry Sky Elves didn't really get along well with each other. Although the relationship between them had eased up under the mediation of the Federation over the past few years, it hadn't reached the level of being in love with each other, it was hard to imagine that the top academy of the Starry Sky Elves would hire a snow elf.

"How many times have I told you to take care of yourself? You're ruining the image of the Academy..." Dylan said with a frown the moment he saw Dylan.

The Snow Elf in front of him had not taken care of him for many days. The fluffy snow fur made his face look like a big snowball.

"I'm the Chief Examiner. I don't see anyone in the control room. What image do I Need?" The other party waved his hand impatiently. "But you, how come you have the time to come here?"

"Nothing much, I just came to take a look..." Dylan said calmly.

“I’m afraid it’s fake... is it true that you help people through the back door?”

Dylan:” ...”

Chapter 1434: factions

“How’s the quality this year?”

Professor Snow Fairy raised his head and glanced at the other party. His expression became a little strange. wasn’t this change of topic a little too stiff?

However, he wasn’t too interested in poking the other party’s heart. He flipped through the information in his hand, and a large virtual electronic watch appeared beside him.

“The quality is very average. This year, there are very few disciples from the genuine magical beast master families who have signed up. Even if they have signed up, they are all disciples from the branch families, and their aptitude is very average...” . ... well, inside the watch is the little guy that I have sorted out who might have some results. However, the quality is still incomparable to the previous batch ... ..

Dylan looked at the form and frowned. In the form was the top 100 outstanding disciples who had passed the combined selection of the initial racial characteristics, purity of bloodline, initial spiritual power assessment, and the basic score assessment.

But at a glance, the overall score of the first place was even worse than the top 50 of the previous batch. Although he had expected that this year’s batch would be more hip-slapping, he had not expected it to be so hip-slapping!

But thinking about it, it made sense. Normally, who would come to compete with the crown prince in the same batch?

The resources on the campus were limited, and it was also in the shape of a pyramid. The higher up one went, the more resources the school would allocate. If it was not for the fact that they came with a diploma, most of the outstanding students would naturally hope to climb higher.

However, this year’s competition was very big. Starry Sky Academy was the Royal Academy, and the Crown Prince did not come out of retirement alone. The outstanding candidates in the Royal Family would all choose to fight for it, even though the crown prince had already been appointed, however, if one could perform well in the academy, sometimes the principal, Lord Iluweta, could overturn the appointment of the crown prince. The previous queen was a living example.

Therefore, other than Crown Prince Tyrande, the other outstanding candidates such as the first prince, the third princess, months of demons, and the ninth prince, Boris, would all enter the Priestly Academy this year.

This year, most of the resources were expected to be snatched away by the Priestly Academy. The other academies, even their secret court, would find it difficult to get anything out of them.

Other than the royal family, there were also many royal families and the direct descendants of the first-class great nobles who would participate.

The reason was very simple. It was a competition between factions!

After the Crown Prince ascended the throne, he would naturally have his own set of people to reserve the important seats of the elven royal family.

For example, the chief dean of the Star Elf War Secret Court, the chief commander of the Royal Guards, and the position of the commander of the nine legions in the outer space.

The noble children who supported the various princes would enter the school in this year and fight for their chosen masters at the last moment.

There were naturally some in the School of Warcraft as well...

Although the overall competition was not as intense as the knight-ranked regiments in the Overwatch Council and the major elemental master academies in the Secret Court, the competition for the School of Warcraft was not small either.

Among the nine legions, the eighth-ranked commander of the Starry Night Magical Beast Army had always been from the School of Warcraft. There were also the Chairman of the Royal Magical Beast Association and the Chairman of the Magical Beast Chamber of Commerce who were all highly sought-after positions, all of them had to be selected from the Outstanding Masters of Magical Beast Taming.

According to what Dylan knew, Whisper, sunstrider, Starlight, Night Walker, and their own moon god family had all sent their most talented magical beast master disciples over, and all of them had stood on their own sides.

It could be said that every time the crown prince entered the school, Starlight would gather, but it was only limited to the head. The disciples of these large families would enter one after another, causing the resources to be compressed to the limit. On the other hand, the upper and middle-class nobles would avoid this conflict far away, firstly, they did not want to get involved in the conflict. Secondly, they knew that their descendants would not be able to snatch the resources from the hands of the direct descendants of the top nobles.

Not to mention the families, any commoner who had some knowledge would wait for the next batch for ten years. The ones who still dared to enter the Starry Sky Academy this year were either here to earn a diploma, or they were the kind of ignorant people who were fearless... ..

Therefore, every year, the Starry Sky Academy would lower the admission criteria. Otherwise, they might not even be able to meet the number of applicants. But no matter what, this was too much of a stretch... ..

Dylan sighed. She had taken over the School of Warcraft for less than a century. She had not experienced it when the last crown prince had entered the school, but after seeing the results, she still could not accept it... ..

"You didn't miss anything, did you?" Dylan could not help but ask.

"Please don't question my professionalism..." professor snow fairy rolled her eyes at him. "And please accept reality, because in the next assessment, you might find that the result will be even worse..."

Dylan:" ..."

It was really not a pleasant thing to talk to such a practical person. Why did the previous dean urge her to keep him?

“I’ve read the information about the child of the moon god family. To be honest, he’s very talented. The fourth prince has good taste. He should be the most powerful magical beast master in the younger generation...”

“Is that so?” Speaking of his own junior, Dylan seemed a little cold. “Then I wish him to go further and further away...”

The Snow Elf professor was silent and did not continue the topic. It was rumored that Dylan and the head of the Moon God family were at odds with each other. It seemed that it was true... ..

The atmosphere was tense for almost half an hour. Snow elf said dryly, “It’s starting...”

“I see it...” Dylan rolled his eyes at her. “Go do your thing. I’ll just watch from the side...”

-----

“Candidate number 174, Morning Night Eldia, please enter the venue!”

In the waiting hall, a gentle female voice came from the speaker. Morning night quickly recovered from her meditation and took a deep breath before standing up. However, she did not enter the venue immediately. Instead, she shook the rabbit’s nest beside her... ..

“Hey, hey... that... little cabbage? Wake Up!”

“Oh?” Little cabbage stuck her head out from the rabbit nest unwillingly. “Is it my turn?”

“Not yet...” Chen Ye rolled his eyes, but he still said patiently, “I’m going to take the exam soon. While I’m not here, I might call for you. Hurry up and get up, don’t miss the exam later! !”

“Oh...” little bai cai nodded obediently, “I got it, then you go, good luck!”

“Will you really get up?” Chen Ye looked at him with extreme doubt, because the other party didn’t even open his eyes when he spoke... ..

When the school began to let the examinees in, he had already called this guy once, but this guy insisted on sleeping for another two minutes, and one hour passed after that. He really suspected that this fellow would continue to sleep with him in the end after he entered the examination grounds...

However, logically speaking, it shouldn’t be possible, right? This was the Starry Sky Academy’s examination. No matter how related it was, wasn’t this too much of a matter?

“I will... . Hurry up and go, don’t delay... .” Xiao Bai Cai revealed her small hand and waved her hand.

Chen Ye glanced at her. Although she was extremely worried, seeing that the wide net had already urged her three times, she could only helplessly exhort him once more, “Then I’ll be leaving. You must not fall asleep again!”

“Yes, yes...”

Just like that, Chen Ye entered the examination room with mixed feelings. She turned around and curled up into a ball, muttering, "Two more minutes, just two more minutes..."

Chapter 1435: Exam (1)

"Thunderbolt Clan?"

In the main control room, Dylan, who had been yawning, slightly perked up. His face became even gloomier. "Is this year really a place where everyone comes?"

Looking at the assessment of nearly a hundred examinees, Dylan felt even more disappointed. At first, he had hoped for some unexpected miracle, but the truth was that he had thought too much...

Thinking about it, it made sense. Even if it was an outstanding commoner, as long as they had a little ambition, they would choose a school that was easier to obtain resources, right. Even if they really wanted to enter Starry Sky Academy, there was a high probability that they would choose to wait one more year. Those who could come at this stage were mostly people who had seen starry sky academy lower its numerical control line, and those who were useless and wanted to get a university diploma... ..

"You're wrong about this..." Professor Snow Elf corrected the overall evaluation sent by the instructors below. Without raising his head, he said, "In this year's toilet-like environment, this little guy might be one of the few gold pieces in the feces..."

Dylan's eyelids twitched. What kind of stupid analogy was this?

But then he looked at the screen of the 60 screens that belonged to the little guy called morning and night. After all, although this snow elf was vicious, it was rare for him to say one or two good words... ..

-----

The examination hall was a special layer of space. Each examination hall had at least three or more instructors. It was hard to imagine that the magical Beast Academy, which was the easiest to use the backdoor, would have such a high allocation when invigilating the examination, each space actually had three star-ranked instructors invigilating the examination!

It was clear that it had exceeded the specifications of the Magical Beast Academy itself by quite a bit. To be able to do this, it must have transferred external resources. But this just showed how much importance the magical Beast Academy placed on the examination.

Many people might be curious, but in reality, everyone in the school knew that the school had always been strict. The reason was simple. There were too many people who used the back door, so they had to be even stricter with the basics, only then could they ensure that their reputation was not bad. Even if they used the back door, they had to be able to pass the exams under the watchful eyes of the teachers of the Outer Court. Otherwise, even if they had a great background, they would still be unable to pass the exams.

"Chenye Eldia?"

Among the three teachers, the tall space elf in the lead frowned as he looked at the other party, then looked at the information in his hands.

The information clearly stated the bloodline of the Night Demon Race!

“Yes!” Chenye took a deep breath and suppressed the anxiety in his heart. He was already used to such suspicious gazes. Ever since he was young, he had encountered such strange gazes when he entered Planet High School.

“Teacher, when I was born, the Thunder Warrior bloodline in my body was purer, and its characteristics were more obvious. After that, although the elders helped me purify the night demon bloodline, because I walked the spirit path, I did not spend more resources to adjust my physical characteristics...”

..

The three teachers narrowed their eyes and looked at each other, nodding slightly.

The other party’s pupils were indeed the night demon race’s unique eyes of eternal night. Looking at the pupil patterns, their bloodlines were also very pure, and their levels were not low. Moreover, the other party’s answers were appropriate, and under the pressure of their aura, he could still reply so naturally and calmly, whether it was the purity of their spiritual power or their calm and collected attitude, they were much more outstanding than the children who had come for the interview previously.

A tutor on the left who was in charge of detailed background information flipped through the virtual screen in his hand and slightly raised his eyebrows. “Your Night Demon bloodline comes from the Zolina Family?”

The eyes of the other few tutors lit up when they heard this. It was one of the nine great royal families of Night Demon, a family that had always produced the most queens.

“Mother is only a branch of the family, and she is also an illegitimate child in the branch. Plus, she is not married to a member of Night Demon’s inner family, so the blood of Night Demon in my body is actually not pure...”

The three teachers looked at each other and exchanged glances. He was really a little guy...

“Alright... Let’s start the first item first... come to the crystal!”

Chen Ye obediently walked to a huge crystal in the center of the Examination Hall. It was a crystal that was almost transparent, so clean that there seemed to be no impurities, Chen Ye, who was familiar with the process, knew that this was a Wilma crystal that was specially used by the Federation to test the attributes of one’s mental strength. It was a high-grade alchemy product produced by a large clan of the mental faculty, the Ma Yin Clan!

“Place your hand on it and activate your mental strength output. During the process, try to eliminate all distracting thoughts. When you can’t hold on any longer, don’t forcefully hold on. Immediately stop your mental strength output. Once there’s a problem with your overloading, the academy will not be responsible!” The leading instructor coldly warned.

Chen ye nodded. He took another breath to adjust his condition and placed his hand on the crystal.

As he placed his hand on the crystal, the part of the crystal that he touched began to be infected like ink. It infected the crystal at a very fast speed. Very quickly, one-third of the huge crystal started to be dyed a light black color... ..

The few instructors observed the crystal and nodded secretly. They all wrote down their evaluation records in their evaluation books.

A-IN terms of spiritual power, the quality of the crystal showed that the foundation was very solid. Although the bloodline was not pure, the meditation technique used was obviously of high quality. Moreover, to be able to lay such a foundation, the aptitude for learning should be pretty good

The other instructor who was responsible for evaluating the path of the magical beast cultivation recorded: spiritual attribute: Shadow element, single attribute, consistent with the characteristics of the night demon bloodline. Although the purity of the bloodline was average, there were no impurities in the spiritual power attribute, moreover, the control was very pure. As a single Shadow Element Magical Beast Apprentice, the basic conditions could be given a B +

The leading instructor did not move. She was in charge of the quality assessment of the magical beast, and the three instructors were all giving reference points. In the end, the final decision was given to Professor Davis in the main control room.

After about fifteen minutes, Chen Ye's face became increasingly pale. It was obvious that her spirit energy was almost exhausted. After a few more breaths, Chen Ye decisively stopped and sat cross-legged to meditate.

The ink on the crystal was quickly absorbed, and in a few seconds, it turned into a crystal that was transparent without any impurities... ..

Not Bad...

The few instructors nodded again. The few instructors were experienced examiners and saw very clearly that the other party had grasped the opportunity to retreat very well. If they were two more breaths later, they would have fallen into short-term shock, and if they were two breaths earlier, it would have caused an awkward situation where they did not maximize their output.

It was obvious that the other party had practiced many times in the aspect of control. Putting everything else aside, just his control was very commendable...

Finally, a decent fellow had arrived...

It had already been an hour since the exam started. Although the mental strength of the previous students were mostly higher than the child in front of them, their overall quality was quite poor. Even if this child was not from the Crown Prince's class, he could still be considered as a middle-level student.

Moreover, he still had a lot of potential. If he did not pull his crotch in the later stages, he might even have the chance to raise the standard of a high-class student... ..

After another 15 minutes or so, Chen Ye woke up from his meditation. He slowly stood up and bowed respectfully. "Sorry to have kept the instructors waiting..."

“Not bad...”. The leading instructor nodded. “Go to the summoning room. There will be spirit recovery medicine prepared for you there. After you recover, Summon the magical beast that you used for the exam and warm up in advance. After I inform you that you are coming, I will not give you any more time to Warm Up Your Magical Beast!”

“Yes, teacher!” Chen Ye bowed again in excitement.

Although the other party said that it was not bad, it was a great affirmation. It made Chen Ye’s nervous heart become much more excited.

“Next, number 311, Little Cabbage Muzir!”

This broadcast made Chen Ye, who was originally excited, stumble and almost fall to the ground.

“Be careful...” the leader of the teachers said with a rare concern, “Now is not the time to care about others.”

Chen Ye was stunned for a moment, and then he quickly bowed again, “Thank you for your guidance, teacher...”

As he said that, he quickly left the examination room, but after he walked into the back passage, he could not help but turn around and take a look. He thought to himself, ‘that guy, is he still lying in the rabbit nest?’?

Chapter 1436: Examination (2)

“Candidate No. 311, Little Cabbage Muzir, please enter the Examination Room!”

The announcement sounded for the third time, but there was still no response at the entrance. The manager at the entrance frowned as he looked at the waiting room. He could not help but ask, “Is little cabbage here?”

The candidates in the waiting room looked at each other. Although everyone was in a meditative state, they were still very focused. It was not common for them not to hear the announcement.

“Who is it? The person is not here at this moment?”

“Maybe he’s in a hurry? ...”

“Are you in a hurry? It depends on the number. The numbers are in order. I guess when it’s your turn, you can’t leave even if you want to shit your pants...”

“That’s true...”

“I suddenly remembered something. When I entered the waiting room just now, there seemed to be a soft canopy for magical beasts there. I was curious to see if there was a person sleeping inside. Could it be that little cabbage?”

“Are you kidding me? Sleeping in the waiting room before the exam?”

“I don’t know either, but there was a person sleeping there. A lot of people saw it...”

The people around nodded. After all, that position was not very hidden. There were indeed a lot of people who saw it.

“Is there really such a person? Really?”

“By the way, what was the name of the announcement just now?”

“Little cabbage. By the way, this name is quite casual. Did you pick it up at home?” Someone complained in a low voice.

“Maybe she did. Look at her surname. Muzir’s surname is very common, but if it’s muzir from the royal court, then it’s different...”

“Oh? You mean the one with all the illegitimate children?”

“Sh... Don’t talk about it here...”

“TSK TSK... This is really... are all illegitimate children so arrogant now?”

The hall was abuzz with discussion. The three instructors in the examination hall were also frowning. It had already been fifteen minutes since the start of the examination. Normally, an examinee would have finished the examination, but this guy had not even arrived yet. He really had some cards up his sleeve...

“What’s the situation?” The leading instructor used his spirit to connect to the administrator outside and asked.

“No one agreed...” the administrator outside hurriedly said.

“No one agreed?” The three instructors’ faces turned cold when they heard that. Most of the instructors who came here to supervise the exam were temporarily transferred. They had a lot of unfinished business and came here to supervise the exam, yet they met such a waste of time, naturally, they were not in a good mood.

“Doesn’t anyone know to call the next one?” The instructor said coldly.

The administrator was stunned when he heard this. He immediately understood that this meant that he was going to disqualify this examinee. His heart jumped, and he hurriedly said, “Yes... Yes, Sir Ni Lan!”

But just as he was about to call someone, he realized that another voice sounded in his mind. “There’s no need. Perhaps there was something that delayed me. You can go to the hall and look for him...”

The administrator was stunned again. He instantly recognized that this was the voice of the Dean of the Magical Beast Academy, Dylan. For the Dean to personally come and greet him, this guy called little cabbage probably had quite a background., he immediately replied, “Alright, Alright, I’ll go look for him right away...”

In the Examination Hall, the three instructors had also heard Dean Dylan’s words. Their brows instantly furrowed even deeper, but they didn’t say anything. Every year, the Magical Beast Academy would use a backdoor, and this wasn’t the first time they had seen it., sometimes, their own family members would also do the same. They were also people who had benefited from it, so naturally, they wouldn’t say much.

However, even if they used a backdoor, it would be too unorthodox... ..

“Muzir? It Can’t be that Guy’s illegitimate child again, right?” One of the teachers said in a low voice.

“Who else can have the dean personally greet someone with the surname Muzir?” The leading teacher ni Lan sneered. “This guy wastes an unknown amount of resources on his illegitimate child every year. He’s really a responsible father.”

The two teachers immediately smiled brightly when they heard this. There were not many people who dared to diss the Imperial Family’s internal chief commander like this. However, teacher Ni Lan was qualified. After all, her sister was Lord Muzir’s legitimate wife.

The atmosphere instantly became awkward and quiet.

On the other side, the manager who received the order hurriedly ran to the hall, preparing to go to the toilet and other places to look for that fellow called little cabbage.

However, as soon as she walked out, she saw a large group of people gathered at the back of the waiting hall. She did not know what they were looking at.

The manager walked over curiously. In the end, she saw a soft shed used by magical beasts. A little flower spirit was sleeping soundly inside. The hundreds of onlookers did not affect her sleeping soundly. This scene made the manager’s heart jump, he thought to himself, “It can’t be this guy, right?”

With a doubtful mood, he still walked over and shook the soft tent. “Classmate? Classmate?”

“Uh Huh?” Little Cabbage, who was woken up by the shaking, sucked in her drool and popped her head out. “What’s wrong? Is it time to eat?”

Everyone:” ...”

The administrator’s face was full of black lines. If it was not for the fact that the other party might be someone that the Dean wanted to take care of, he might not have been able to resist throwing her out together with the soft tent!

“Student, are you one of the candidates for the Hou Exam?”

“Eh?” Little cabbage was stunned for a moment before he suddenly remembered that this wasn’t the base’s grassland tent, nor was it Alice who had asked him to wake up for dinner. He had come here today to take the exam... ..

“Oh, right, right, I’m an examinee. Is It My Turn?”

The administrator took a deep breath and calmed his emotions. He tried his best to speak in a gentle voice, “Student, please state your exam number.”

“Exam number? There’s such a Thing?”

Everyone:” ...”

“Oh, that’s right!” Little cabbage suddenly remembered something and quickly touched his chest. He took out a paper exam card, but it was clearly blurred by his dream drool.

“It seems to be... 30... what number is it?”

“Is it little cabbage?” The administrator asked directly. If the other party said no, he would throw him out of here in the next second!

“Yes, yes, yes, I Am...” Bai Cai hurriedly climbed out from the inside. ...

The manager’s eyelids twitched. He stood up and walked towards the exam passage. “Hurry up and come over. The invigilator has been waiting for you for a long time...”

“Oh, Oh, OH, I’m Sorry!” Bai Cai seemed to know that he had been negligent. He quickly apologized without sincerity. He hurriedly stuffed the soft dream into his mechanical bag and followed the other party... ...

“See? A soft shed made of velvet, the exclusive nest of the bright moon rabbit. I told you this was a backdoor, right?”

“Although this nest is comfortable, it’s not for people to sleep in, right? Is this guy joking?”

“How many of that bastard’s children are reliable?”

“That’s true...”

The people around were talking about it, and that strange look in their eyes made little cabbage feel that something was not right. He quickly lowered his head and hurried forward.

In the heart can not help but say: arrange to oneself that cheap father does not seem to have a very good reputation model paper...

— — —

“Candidate 311: reporting for Cabbage!”

The access manager called it in.

The three instructors looked at each other coldly, sizing each other up with scrutinizing eyes, and soon noticed each other’s half-asleep face. ...

The three teachers’ faces twitched at the same time. Could this guy have been sleeping just now?

Chapter 1437: Examination (3)

Although it sounded a little unbelievable, the little fellow before them gave off such a feeling. It was not just his facial expression, but also the laziness that was revealed from his spiritual power. Everyone present was a star-ranked instructor, naturally, they could sense it clearly.

At the thought of this, the faces of the three instructors became a little stiff. Although they were using the back door, this was a little too unreliable. Did they really think that the Secret Court’s Magical Beast Academy was a garbage dump?

Ni Lan’s face was extremely cold. She was already very dissatisfied with her brother-in-law. Now that the illegitimate child was so unreliable, don’t blame her for being official later.

“Let’s test your spiritual power first...”

The instructor responsible for the quality of the spiritual power attribute coughed lightly to break the strange silence.

“Come to the front!” Ni Lan stared at little cabbage coldly.

Little cabbage had goosebumps from the other party’s cold stare. She hurriedly walked to the crystal in front.

“Do you know how to use it?” Ni Lan said coldly.

“Yes, yes, yes...” little cabbage said sensibly.

This instructor seemed to dislike her very much. It was most likely the fault of that cheapskate father. She was so likable, so it was definitely not because of her.

“Let the meeting begin...”

The two instructors behind Ni Lan glanced at her. This little doll had just woken up and her spiritual power was clearly not switched on. Without a warm-up, her results would definitely be greatly affected, Ni Lan obviously did not plan to give the other party face and give them time to prepare.

But it was normal. Anyone would be angry at a weirdo who dared to sleep before an exam.

Bai Cai obediently stretched out her hand.

Dylan, who was at the control desk, frowned slightly. However, even she could not thicken her face and ask the instructors to give her some face. Lord Tooth Spirit sending this guy in was too unreliable.

Professor Snow Elf shook her head helplessly. Most of Muzir’s illegitimate children were unreliable. However, this was the first time she had seen such a weirdo. It was no wonder that the other party did not give her face.

Most importantly, Ni Lan was Muzir’s sister-in-law. If the other party did not give Muzir face, no one could say anything... ..

However, in the next second, when a beam of light appeared on the screen, both of them were shocked. They looked at the crystal that little cabbage touched in disbelief... ..

“This is...”

In the examination hall, the three impatient teachers were also shocked. They looked at the crystal in disbelief.

The transparent crystal did not change color at all. It was clear that the other party’s spiritual power belonged to the unique attributes of the flower spirit. In the industry, it was known as the most primitive spiritual power of the natural attribute.

However, although there was no change in color, the commotion was not small. The entire crystal glowed the moment the other party placed his hand on it. The entire edge of the crystal emitted a faint halo!

This was not only because the other party had sufficient spiritual power, but also because his spiritual power and the original stone's compatibility had reached an extremely high level!

The few teachers looked at each other in shock. Not to mention anything else, just the quality and volume of his spiritual power was at least at the level of the royal family...

Since that fellow Muzir had an illegitimate daughter of such a standard?

The three teachers watched quietly with incredulous expressions on their faces. Meanwhile, when little cabbage saw that the other party was staring at her and did not dare to do the same thing as she did in the beginning, she could only helplessly keep her hand on the crystal

Just like that, a quarter of an hour passed, and there was no sound at all in the Examination Hall...

Xiao Bai Cai was a person who could not stay idle. A quarter of an hour in a daze was a very tiring thing for her. Her eyelids quickly narrowed uncontrollably, and her little head shook... ..

This little action naturally could not escape the eyes of the instructors who had been staring at her. The three instructors were shocked. Could it be that she had exhausted her energy? They quickly reminded her, "Classmate?"

"Eh?" Little cabbage suddenly shivered and looked up guiltily. "What's wrong? What's Wrong?"

The three instructors' eyelids twitched at the same time. Ni Lan was the first to react. She swallowed her saliva and said, "Can you still hold on?"

"Oh, OH... Aiya... I can't... I can't..." little cabbage immediately reacted and pulled her hand back, looking very tired...

The instructors: "..."

In the main control room, Dylan and Professor Snow Fairy also rolled their eyes. Was this little girl naturally dumb or something?

Ni Lan couldn't help but glare at the other party. This girl's eyes were full of light, how could she not be able to hold on? But how much mental strength did this little girl have. This crystal was set at the level of a level eight life form...

Wait! !

Ni Lan suddenly felt something and her heart skipped a beat. She said in a doubtful voice, "Classmate, please raise your head for a moment."

Little Bai Cai's heart skipped a beat. She thought to herself, could I have been discovered for slacking off?

"Classmate?"

Little Bai Cai carefully raised her head and tried her best to pretend to be very tired.

Ni Lan ignored the other party's clumsy acting and carefully looked at the pupil lines in the other party's pupils...

"You're a Wood Elf?"

"Eh?" The other two instructors were stunned and looked over as well. Only then did they look shocked.

The emerald pupils were the color of most elves' pupils, and they could only be distinguished by the pupil lines. They had noticed just now that this little guy's pupil lines were not very common.

At that time, they did not pay too much attention to it. After all, that guy in the Muzir family was someone who could even kill a female gnome, so it was not unusual for him to give birth to any species.

But she didn't expect it to be a wood elf...

And what was the situation with that growth ring?

It looked like... he was only 80 years old, right?

His life level was obviously already at level-eight... ..

A level-eight wood elf at 80 years old? Who did that Guy Muzir do it with? This was F \* cking top-notch among the direct descendants of the Royal Family, right? To become a magical beast master? Was Muzir's brain damaged?

Ni Lan took a deep breath and fell into deep thought... ..

The purity of her spiritual power could not be faked. It was definitely not the product of a drug. In other words..? ... was it a rare wood elf that had returned to its roots?

What was brother-in-law doing? Why had such a powerful seedling never told his family? Could it be that he was afraid that his sister would be jealous?

What kind of joke was this? With such a child's talent, if his sister dared to be jealous and let him wander about outside, wouldn't the Muzir family peel off his sister's skin?

Moreover, his brother-in-law's legitimate son, Karen, was an elven knight and had entered the Overwatch Council Academy. There was no conflict between her and this child. If the Muzir family could produce a top-tier flower spirit, that would be a great thing.

With this child's talent, if she were to be sent to the Elementalist Academy, she would definitely be a strong contender for the next principal of the Elementalist Academy. Even if she could not become the principal and become an elder, it would still bring great benefits to the Muzir clan, she was actually sent to the Beast Academy?

"Teacher? I. . . Do I need to do anything else?"

Little cabbage looked at the three teachers who were in a daze uneasily. Her heart was perturbed. She was just slacking off. There was no need for her to hit herself, right?

"Master ni Lan?" The two teachers hurried her after they came back to their senses.

Ni Lan also came back to her senses. She looked at little cabbage and her eyes became as gentle as water. She comforted him in a low voice, "Don't be afraid. It's okay. You did well..."

"Oh..." little cabbage lowered his head.

Was he being sarcastic?

"Go wait in the summoning room first..." ni Lan tried her best to be friendly.

"Oh, oh..." little cabbage acted as if he had been pardoned. After giving a distorted elf salute, he ran away happily. ...

The teachers were speechless at his appearance.

Ni Lan secretly made up her mind that she would go to the royal court at night and ask her sister what was going on...

Chapter 1438: Where Is My Moon Rabbit?

The Summoning Hall was a special ceremonial courtyard used by the star Sky University's School of Warcraft to summon creatures from other worlds. There were many levels of summoning arrays here, ranging from level 1 infant creatures to top-tier monsters in the Star Sea of life..., all of them had corresponding alchemy summoning arrays.

There were even some special summoning arrays that were refined to a specific space-time. After all, it was the second largest school in the federation. The equipment was so well-equipped that it was far from what ordinary forces could compare to.

Students who were admitted into the Starry Skies Magical Beast Academy would be able to receive at least one grade B + Magical Beast in the Summoning Hall after graduating as a bachelor. However, that was a matter for the future. As for the students who came today for reference, they could only enter the ordinary ritual hall, they could summon the magical beast that they had long prepared to participate in the test.

The instructor would assess the actual score of your work based on the quality of your magical beast itself and the growth points that you had obtained after nurturing it. It would be divided into three to seven parts compared to the previous foundation. The final result would be the overall average score to assess whether you could enter the Star Magical Beast Academy... ...

After entering the hall in the morning and night, the instructor first arranged for him to drink a bottle of green spirit potion.

The potion had a fresh vanilla flavor, a faint sweetness, and a primitive taste of nature that made people indulge in it. This was very different from the alchemy products of other races.

The alchemy of the elf race emphasized on the purity of nature. At most, it would change the attributes of the plants through energy, and it would rarely add some industrialized energy. It was easy to absorb and had no side effects, the Alchemy Potions produced by the Elf race were definitely top-tier existences in the universe.

Of course, the weakness was that their efficacy was slightly weaker than the excellent alchemy potions of other races.

After sitting in the stream for nearly half an hour, the efficacy of the medicine slowly restored his spiritual power to 40-50% . This was already a high-grade moonlight herb medicine worth 10,000 federal coins. The recovery speed was indeed not satisfactory... ..

However, the advantage of the elven medicine without side effects was that it was a very important competitive force in the market.

Seeing that he had recovered about 50-60% , Chen Ye slowly opened his eyes. The fatigue in his eyes had dissipated a lot.

He looked at the time and frowned. He looked outside again... ..

“Distraction during recovery will affect the efficacy of the medicine. Do you still need me to teach you this little bit of common sense?” A cold voice sounded beside his ear.

Morning Night Alliance stood up and bowed. “I’m very sorry, sir. I’ve Troubled You...”

His attitude was very sincere, and his tone was full of sincere gratitude. This made the expression of the alchemy mentor in the gray robe ease a lot.

“Your spirit quality is not bad. Although it is not as high as the flower spirit’s spirit, a single attribute magical beast master is still very popular in the market. As long as you can do the best with a single attribute...”

“Thank you for your encouragement, sir. I have always thought so...” Chen ye smiled sincerely.

He had been relatively cold to outsiders since he was young, but he was very respectful to the instructors who taught him. It was also because the instructors he had met since he was young that they had taken extra care of him.

He did not remember every single detail in his heart, so he had always had sufficient respect for the instructor, Chen Ye.

“From the looks of it, you should have recovered by fifty to sixty percent. Our Elven potion takes a little longer to take effect, so it will take at least one to two hours for you to fully recover. If you feel that you are fine, you can try to summon your magical beast now and do the warm-up that you should do. After all, the exams in the future are not aimed at you. There is no need to deliberately recover to your best state. On the contrary, letting your magical pets familiarize themselves with the environment will help you perform better in the future...” . “...”

Chen Ye’s eyes lit up when he heard that. He quickly bowed again and said, “Thank you for your guidance, sir!”

“Mm...” the instructor nodded slightly and walked inside. He began to observe the mental states of the other examinees.

Chen Ye took a deep breath and closed his eyes. He began to use the summoning matrix to communicate with the mental space where he stored his magical pets.

The so-called magical beast was a unique creature that could completely integrate into the mental space of its master. Not all creatures could become magical beasts. This was also the reason why magical beasts were suitable for fighting together. This was because no matter how large a magical beast was., as long as its master stored it in the spiritual space in advance, it could be summoned at any place through the matrix.

When summoning the magical beast, Chen Ye could not help but look outside...

It had already been more than an hour, and that little girl still had not come over. Most likely, she had been eliminated, right? That guy looked like he was heartless. He should not be too sad, right?

I wonder if he'll be waiting for me outside...

Focus, focus!

Chen Ye woke up in shock and once again secretly despised himself. He couldn't even protect himself, yet he still had the mood to worry about others!

Forcing himself to focus, he injected his spiritual energy into the school's unique matrix. The excellent matrix quickly began to operate. Chen Ye felt that he didn't spend much energy, and the teleportation array instantly formed in midair.

Meow...

Then, a familiar cry was heard, and a black furry fox-type magical beast with a unique, elegant, and beautiful aura came out from the matrix.

Chen Ye was slightly stunned, and thought to himself, as expected of the summoning array of a top-tier school. Its efficiency was extraordinary.

"Meow, Meow!" The little black fellow seemed to be particularly happy when it saw its master. It walked over and gently rubbed its master's calf.

Chen Ye also smiled and stroked its head. Then, he carried it up.

"Wow... What a beautiful Fox. Black Fox? What kind of breed is this?"

A familiar voice suddenly sounded, and Chen Ye and the Fox in his hand almost jumped up in shock!

"When did you come?" Chen Ye turned around and asked when he saw the familiar steamed bun face.

It was the same last time on the train. This guy hadn't shown any signs of getting close to him. Logically speaking, spirit-type creatures were very perceptive. This shouldn't happen when they were at the same level... Unless the other party wasn't at the same level as him... ..

Or perhaps the other party had some special item on him.

It should be the latter... With this thought in mind, Chen Ye sighed once again at how extravagant the aristocrats were. There was no telling how many treasures such a child had on him. It was very likely that any one of them would cost an ordinary person half of their life savings... ..

"I just came. I saw you fiddling with something, so I didn't call you. So You're summoning a pet..." little cabbage chuckled.

"Magical pets aren't pets..." Chen Ye looked at him seriously. "A lot of girls treat them like pets. The consequences are very serious. By the way, why did you come so late?"

"Hehe..." Bai Cai smiled embarrassedly. "I overslept and delayed some time..."

[ did I oversleep? ]? Chen Ye rolled his eyes, but then he was puzzled. How big was the face of the elder behind this guy?

"But why do I feel that you don't look very tired?" Chen Ye looked at Bai Cai and asked curiously.

"Eh? Is That So?" Bai Cai was stunned for a moment, then he immediately covered his head. "Actually... I'm very tired..."

Chen Ye: "..."

"Forget it... you guys usually go through the formalities of the relationship test. It's only natural that you don't feel tired..."

"Hehe..." little cabbage saw that he couldn't pretend anymore, so he smiled embarrassedly.

"Enough!" Chen Ye rolled his eyes at him and said, "Quickly summon your moon rabbit to adapt to the environment and do a warm-up. The magical pet project is a public evaluation, and all the students are present. If Your Moon Rabbit doesn't perform well later, forcing a high score will be criticized by others...". "...". "..."

"It won't!" Little cabbage said proudly, "My moon rabbit has been trained by others for dozens of years, but it's a professional. It will do whatever I say. It's much more obedient than the rhubarb that I raised myself!"

Chen Ye's eyelids twitched. This guy really used someone else's magical beast... ..

And he was still so confident. He didn't know what he was so proud of. were the children of noble families all so unscrupulous. As expected, my Aldia family isn't of the upper class... ..

"But you're right. What if the environment changes? HMM... I have to summon them to find out..." Bai Cai said cautiously.

Chen Ye looked up at the sky and didn't want to complain.

"Let me try the new summoning formation!" Bai Cai said excitedly.

Just as he finished speaking, a white light suddenly lit up. Chen Ye, who was looking at the sky, was stunned, then, he helplessly looked at the other party. "The school has a summoning array, there's no need to open a path by yourself..." as he said this, he realized that the other party's array had already been completely drawn.

Clearly, a high-level secret array. The runes were so complex that even Chen Ye, who had a solid foundation of knowledge, was dazzled. Moreover, the other party had opened it extremely naturally, and not a single bit of spiritual power overflowed. Clearly, he was very familiar with the use of the array.

Chen Ye was startled. Such a complex summoning array was used so naturally. This fellow's foundation was not just ordinary... ..

He slightly narrowed his eyes. It seemed that he was thinking too much. How could this kind of noble be born an ignorant idiot?

But in the next second, this thought instantly vanished into thin air...

Because after the light faded, what ran out of the array was not a noble and elegant bright moon rabbit, but a fat head and big ears. It was obvious that its diet was irregular, and it was an overly fat canid creature... ..

And it did not look like any kind of precious canine magical beast that he knew. Judging from its appearance... .. It even looked a little like a serial dog that was raised on a local planet...

"Rhubarb?" Little cabbage was obviously very shocked that this dead dog had appeared. He was very surprised and said, "Why is it you?"

Rhubarb looked at little cabbage with a wronged look. This heartless little guy, I came to look for you from billions of miles away. Is it easy for me? Shouldn't he be so touched that he hugged my head?

"No..." little cabbage looked like he had a bad premonition. "Where's My Moon Rabbit?"

"BURP..." rhubarb burped, and a mouthful of white moon white fur floated onto little cabbage's face. ...

Chapter 1439: Do you think this dog is normal?

Actually, the moment rhubarb appeared, Bai Cai had a bad premonition. After all, she knew very well what kind of person this dog had been for so many years. This group of dead dogs had become the fifth disaster of the base before the big dog trainer appeared, it was not unreasonable for them to become the fifth disaster of the base.

But how did this dead dog sneak into her summoning space?

That wasn't the main point... .. The main point was that he had borrowed the Moon Rabbit!

Bai Cai clearly remembered that when he had borrowed the rabbit, that cute little elf had repeatedly reminded him to take good care of the Moon Rabbit called Bai Ling. He had even made a list of his eating habits, he was afraid that he would be negligent, so he had personally prepared all sorts of homemade rations.

She had looked through all the rations, and the ingredients were all ingredients that she had never heard of, but she could tell at a glance that they were very noble ingredients. The manufacturing process was so complicated that it made one's hair stand on end. She had even secretly eaten a few of them, the taste was even better than the dishes of some high-class restaurants.

This made her so envious that she wanted to ask if the other party still lacked pets. She could actually do it...

No matter what, this showed that the owner of the rabbit attached great importance to this magical pet. It could be said that he had been taking care of it carefully since it was young. Although she had secretly stolen half of the rabbit food along the way, she still did not dare to mistreat the other party on the whole... But now...

Looking at the fluffy fur floating in the sky, Bai Cai's mood dropped to the freezing point!

"Damn Dog..."bai cai said expressionlessly, "Where's the rabbit in My Space?"

Big Huang raised his head to look at the other party, full of disappointment...

I've traveled hundreds of millions of miles to look for you. The Moment You Meet Me, you don't care about me at all. Not to mention asking about my well-being, you've lost so much weight. What's wrong with eating a rabbit like you. And you even look like you want to kill someone... ? UGH, PAH, you look like you want to slaughter a dog. Who are you trying to scare?

"Wu..."Big Huang looked up at the sky with an innocent expression. ...

"How does it taste?"Little cabbage asked out of the blue.

"HMM..."Big Huang nodded in satisfaction.

As he said, the rabbit tasted really good. It was much better than the star rhinos in the Kiri, except that it was too small and didn't last long. If there was a second one... .. It wasn't that he couldn't forgive this heartless little guy in front of him... ..

Just as he was thinking about this, he saw the other party open the compression bag and take out two large, shiny knives!

Rhubarb's expression instantly froze...

Most people who were not familiar with little cabbage only knew that this fellow was addicted to sleeping and eating, but they did not know that this fellow was also a top-notch doctor. His surgical standards had always been ranked first in the base, a few developers who specialized in this area were not as good as her.

The reason was that she would carry out dissecting experiments on many types of creatures. The various species in the base, from small animals to some special species, including the meat spider that was currently giving many newcomers in the base a headache, she dissected all of them.

Then, in the Emerald Star Field, in order to digest the secret technique that a certain big shot had passed down to her, bai cai dissected many high-level species in the emerald star field and received Ysera's support...

Ysera had even specially made a set of knives for her. The two knives in Bai Cai's hands were specially used to open the shells of hard-armored creatures, big Huang had personally seen the other party use these two knives to cut open a steel-armored beetle-type high-level creature like it was cutting tofu!

"Damn dog... come here..."bai cai sharpened her knife and said... ..

"WUUUUU..."rhubarb shook its head desperately, continuously shrinking back... ..

“Is that so?” Little cabbage waved its two blades and charged over. “Then you can go to hell! !”

..

At this moment, on the other side of the star of Tydhill, an incomparably huge mechanical star that was more than a thousand times larger than the other stars was staring at the star of Tydhill... ..

This was the main star of the current bronze race: Planet Nomorrigan!

The bronze race was a demigod bloodline that had been passed down from the ancient lands. During the era of the great elves, they were one of the exclusive royal families of the Space Elves. They were one of the five royal families of the Wood Elves, The Guardian God race.

After the collapse of the elf civilization, as a former royal family, although the Elves were independent, they did not bring out the TELDRISIL star system.

Furthermore, as Old Ministers of the Great Elven civilization, the bronze race did not agree with the status of the royal family of the space elves, and they were extremely dissatisfied with the other party's occupation of the Teldrasil Star!

This point almost caused a war between the two races!

Later on, the Federation mediated, and the space elves, who were the direct successors of the elves, were allowed to inherit the Teldrasil Star by the fifth Lord, Iluweta, but they had to take out a portion of it as public resources, thus, the Star Academy was born.

Iluweta's status was high, and even in the bronze race, she had an extremely high reputation. Thus, the bronze king at that time gave her face.

However, he requested that he establish a planet by the side as a surveillance, to prevent the royal family of the stars from abusing the resources of this planet!

This request was also agreed by ILUWETA, and thus, the federation's top pure mechanized planet was born outside the star of Tedar Hill!

Yes, the star of Nomorrigan was a man-made star. The bronze dwarves used their top forging skills to forge the most perfect mechanical star in the world. It was also the federation's only super-grade man-made planet!

And now, the bronze university set up by the bronze race was on this giant mechanical star... ..

At this time, Feng Doudou was registering for the Academy on the planet... ..

In the waiting hall, Feng Doudou was accompanied by a woman dressed in a long black robe. Judging from her body features, she was a night elf. However, her eerie green eyes made it clear that she was an undead... ..

The Eastern Star region was rather resistant to undead, but the bronze race was still relatively good. Other than producing top-tier weapons masters, the Bronze Dwarves also produced divine smiths, the knowledge of ancient alchemy that high-level undead knew was very much needed by many bronze dwarves.

The bronze dwarves had always maintained a certain level of respect for the knowledgeable undead, which was different from the elves.

However, it wasn't a dwarf who brought this undead, but an elf. This was rare in the east star region, so along the way, some people looked at Feng Doudou and Alice with Strange Gazes.

Feng Doudou wasn't used to those strange gazes either. While waiting for the procedures, he and Alice hid in a remote corner.

Alice didn't seem to mind. Her expression was very calm, and no one could see her emotions.

"Speaking of which..." Feng Doudou looked around. After making sure that no one was around, he lowered his voice and said, "That dead dog really disappeared?"

"Yes..." Alice nodded slightly. "It was very well-behaved on the way, but it suddenly disappeared on the night of the planet of Nomorrigan."

"Could it be that it's in heat?" Feng Doudou asked curiously.

Alice's face twitched slightly, which was rare. She looked at him and asked, "Why do you think so?"

"Because my father's dog used to be like this. It was usually well-trained and never dared to refute its owner. However, when it was in heat, other female dogs would leave its owner and run away."

The corner of Alice's mouth twitched, she looked up at the sky. "First of all... "... I'm not its master...". "...". Second, it didn't run away on impulse. It was premeditated. The traces I left on its body were all erased by it, and there was no trace of it running away... "..."

"Premeditated?" Feng Doudou was stunned. "That Dead Dog? It Can't be?"

"Do you still think that dog is a normal dog?" Alice looked at him with a strange look. "Did you forget that dog... can run to the emerald star field to look for people!"

Chapter 1440: Alice's worries

Now that I think about it... ... That dead dog seemed a little different... ...

Feng Doudou suddenly remembered something...

It was said... ... That the big yellow dog had followed little cabbage to the new territories the moment she disappeared. It had even saved the noble Aboriginal that brother dog liked...

It seemed quite different...

Hearing Feng Doudou's words, Alice didn't continue to speak. She thought more than Feng Doudou.

After the battle ended, the Big Yellow Dog was finally found in the Jade Star Field. Although it didn't participate in the later events, the dog did enter the jade star field with its own ability.

This was something that even Ysera felt strange about. He didn't know how the other party did it... ...

Alice had always felt that it wasn't just that little cabbage dog, but the group of dogs in the base... .. They were all abnormal. The Lord had said that he had spent a large sum of money to buy high-quality goods, but after asking him in detail, he kept looking at him and saying that there was something fishy going on... ..

"Student Feng Doudou, please come to the front hall to register..."

Just as the two of them were still thinking about Rhubarb's oddness, the hall rang with a wide range of instructions for Feng Doudou to register. Feng Doudou hurriedly stood up, and Alice followed behind him.

According to the rules of the bronze academy, all examinees who were admitted to the academy would be allocated a separate high-class apartment. If they needed to bring along an attendant, they would have to register in advance. After all, the bronze academy had very strict regulations regarding the entry of people...

After walking to the front hall and entering the spatial passage, Feng Doudou arrived at the Registration Hall. The person in charge of registering her was a petite dwarf.

He was about one-third the size of a D ball adult, and looked like a child in kindergarten.

However, those who were familiar with him knew that this was the Nomorrigan dwarf race that the bronze dwarves had always protected. This race was rich in top-notch mechanical alchemy masters, and was an extremely important part of the bronze dwarf civilization, this huge Nomorrigan star came from this race.

"Hello, teacher..." Feng Doudou walked forward and bowed politely.

The gnome sitting across from him revealed an amiable smile, and his expression looked extremely amiable.

Of course, there was a reason for the amiability, because the information on the other party's resume and results were extremely shocking!

Feng Doudou was an elf native introduced by the only God of the Abyss, the Bolton Force. His race was Wood Elves, and he was 80 years old. His life level: 8!

Due to his perfect bone structure and bloodline, he was recommended by the instructor of the Bronze Academy to enter the academy without taking any tests.

Although he was exempted from taking any tests, he was still given a basic assessment before he entered the academy so that he could be recorded in his records. In the end, his performance could not be described as anything other than amazing!

The assessment of his combat, dagger, and Moonblade specialties were all rated as S + , especially in the actual practice of his dagger specialties. The intern in charge of the assessment, Regan, was a level 10 Night Elf and a graduate of a famous academy! To think that she would actually lose to her opponent!

Of course, Regan had lost to her opponent due to many other factors, including her attitude of not underestimating her opponent due to her carelessness, and her ignorance of her opponent's special talent.

However, this could not conceal her opponent's astonishing combat standards. One had to know that this was a challenge two levels higher than her opponent's. Furthermore, one of them was a native born who used extremely ordinary federation standard combat techniques, while the other was a graduate of Gale Academy, a graduate from a famous academy who had mastered many secret techniques!

Of course, the other party's unique talent in changing the attributes of her weapon was the key to her victory over her opponent... ..

Speaking of this talent, it was also a major reason why many of the instructors were envious... ..

This native was not only a wood elf with an extremely pure bloodline, she was also a mutant. Furthermore, she was a very rare mutant. In the list of mutant elves, she was known as a weapon spirit!

The status of this species was no less than that of an elf Phoenix, especially in the combat department. Weapon Spirits were definitely more popular than phoenixes!

Weapon Spirits could change the attributes of objects, and they could make all matter come alive. In biological alchemy, it was called "Inorganic Reincarnation"!

This was different from secret treasures made by Secret Treasure Masters. The activation granted by weapon spirits was temporary, but it could be used against all weapons, including top-grade alchemy weapons. For example, a dagger, as long as the weapon spirit was willing.., the dagger could be as soft as a snake, and it could even turn into something like liquid to attack under special circumstances.

This time, the intern mentor lost because the other party had mixed the dagger into liquid at the critical moment and mixed it with his own blood. After it was scattered on the other party's body, it turned into countless iron particles that penetrated into the other party's pores, this caused Regan's blood to go into shock on the spot due to the change in lead!

The weapon spirits' strange attacks were recognized by the industry. Top-notch weapon spirits could even change the shape of long-range weapons. The arrows and bullets that they shot could turn into gas, liquid, or even other organic matter to carry out even more mysterious invasions, it was one of the most troublesome existences for all fighters.

Despite his young age, the other party had already grasped the essence of the weapon spirits. His fighting style was strange, and his timing was extremely good. That evaluation video was still widely spread among the various instructors, and before he had even entered the academy, there were already many academies fighting over this student.

Among them were the strongest academies in the Bronze Academy, the Divine Guard Academy, the Warrior Academy, and the Zongshi Academy!

A few principal of top academies managed to get their hands on the principal, and this caused quite a commotion.

Facing this star student who had already attracted the attention of the teachers before he had even entered the academy, the teacher in charge of the registration naturally had a warm smile on his face...

...

After waiting for a few minutes, the teacher received the form that the other party had filled in, and the dwarf teacher picked up the form and started reading it carefully.

Grandmaster Academy?

It seemed like Dean Dimore was the one who managed to snatch this seedling. However, this was normal. The Grandmaster Academy nurtured the Weapons Grandmaster Academy, and it was also the Academy's ace specialty. Not only did the students have to learn all kinds of weapon specialized techniques from the weapons grandmaster, they also had to learn the grandmaster secret arts. Furthermore, they would impart the forging secret arts that were unique to the bronze race.

Good weapons were all forged by oneself. This was the motto of the bronze race's weapons grandmaster. A good weapons grandmaster would personally design their own weapons. This Little Elf was the weapon spirit, her unique ability to change the physical attributes was more suitable for the path of a weapon grandmaster. After all, she could forge a weapon that was more suitable for her own characteristics according to her own fighting style. It was simply a combination of strong and strong.

Moreover, the Grandmaster Academy had always treated weapon spirits very well, not to mention such a top-notch weapon spirit.

In her opinion, it was a wise choice for the other party to choose the Grandmaster Academy... ..

"The butler who wants to register is the one behind you, right?" The teacher asked with a smile.

"Yes..." Feng Doudou nodded with a smile. "The Academy said that there is a life tutor who is responsible for taking care of the students' bodies, but I have been used to using this guy, so..."

Alice's expressionless face slightly twitched the corner of her mouth as she quietly watched the conversation between the two...

Why was the role assigned to her as a nanny?

"Ah, it's okay, it's okay..." The dwarf teacher said amiably, "Many children of families will bring their own personal housekeeper here. After all, every student's habits are different from when they were young. The Life Tutor of the academy can't cover everything. This is very normal. Just ask her to fill in a form "...". "..."

"Alice, Hurry up and fill in the form..." Doudou grinned.

Alice quietly walked over and picked up the form... ..

"Ah, right, isn't the star opposite our planet the legendary Teldrasil Star? "I heard that it's the star of the elves with the best scenery in the federation. Can the students of our bronze academy go there on a daily basis?" Doudou asked with a look of anticipation.

"Of course!" The instructor smiled as if he understood. "Many elves from other places would like to visit the place where the elves once originated. However, if you want to visit it, you'll have to wait a few days. The Starry Sky Academy is currently organizing an entrance examination for the students. They don't accept outsiders during special times..." "..."

"I see..." Doudou smiled when he heard that. "Thank you for your reminder, instructor..."

Alice narrowed her eyes slightly.

Before she came, she had communicated with rainy girl and analyzed that if the cabbage was taken away by iluvita, there was a high chance that it would be placed in the Starry Sky Academy. If the other party didn't want to attract the attention of certain existences... It wouldn't be as high-profile as Feng Doudou's exemption from entrance exams. Instead, it would specially mix her with the other examinees to enroll in the academy...

Rhubarb must have found a way to find its master before it left me, right. After all, that fellow had always been on guard against me ever since I was hired by little cabbage... ..

No matter how powerful a magical beast was, it was basically impossible for it to run from the heavily guarded Bronze Star to the sealed star of Teda Hill. After all, regardless of the technology and scale of this place.., it was far from being comparable to the Emerald Starfield. Just because that dead dog could enter the Emerald Starfield silently did not mean that it could invade a planet of this level.

However, it still mysteriously disappeared without a trace...

At this moment, when Alice heard that the Starry Sky Academy was taking the examination, she immediately made a deduction... ..

The closest connection between a magical beast and its master was the spiritual space. The Planet of Teldrasil and the planet of nomorrigan were so close to each other, so that big yellow should be able to sense the spiritual space summoning of cabbage, right?

Cabbage would not summon rhubarb for no reason, so it was very likely... .. Cabbage did not summon rhubarb, but something else. However, the moment the space was opened, rhubarb took advantage of it...

Was it the school of Magical Beasts?

This result was pretty much the same as what he and rainy girl had deduced...

According to the information, the Secret Law School of Starry Sky Academy was the gathering place of flower spirits, and among the four major schools of the secret law school, the school of Magical Beasts and the school of magical plants were the easiest to use the backdoor. Cabbage's foundation was extremely poor.., the best way to conceal her identity was to give her the identity of a noble descendant who used the backdoor.

Thus, the probability was that she would use these two schools, and cabbage did not have the foundation of a magical plant master, so she would most likely use the magical beast master route...

Of course... .. This was only a guess, and now that rhubarb had disappeared, this guess was more than half confirmed...

However...

Thinking of this, Alice frowned slightly.

Rhubarb was a very special master, so it was a problem whether it would attract too much attention if it went to little cabbages. Iluweta was the fifth Lord of the federation, yet she chose to keep a low profile

and hide the identity of little cabbages. This meant that if little cabbages were exposed, it could be dangerous... ..

He didn't know if this damn dog would notice this, but he didn't want to disrupt the Lord's original plan... ..
