

## **A Bunch 1601**

Chapter 1601: The Interrogated Dog Egg...

Dragon Flame...

As a great lord who had experienced countless storms and waves, one of the top figures in the world, most of the things in the world would not cause any waves in Sylvanas' heart. However, when she heard the other party say the word dragon flame... She almost spat out a mouthful of tea...

Monica's eyelids twitched and her face was filled with black lines...

Logan and the night monarch looked at the two of them in a daze... ..

As the number one region of the Northern Star Field, the night serene land, every household registration was extremely precious. If one wanted to enter, they would have to earn a Viscount's title in the army at the very least!

Although hundreds of millions of eras had passed and many noble families had accumulated, and there were also a small number of foreign races who could compete with the household registration here, it definitely didn't include the Dragon Race!

Those that could spew dragon flames were all high-level pure-blooded dragons, so there was absolutely no such thing as a mixed-blood. The list of applicants for the Youye Academy had to be approved by both Youhuang Ye and vice-principal Logan. If there were pure-blooded dragons that were admitted to the academy, then... It was impossible for them not to remember...

And the only one who had brought the dragon race bloodline here recently was the little girl that Queen XI had brought over yesterday...

At that time, Night Demon Emperor and Logan were still shocked by the purity of her bloodline...

"My Lord..."

The entire scene became extremely strange. The surrounding elemental particles were all frozen by the tense atmosphere, and it seemed as if they were on the verge of erupting...

After a few seconds, Logan probed, "The dragon descendant that you brought with you is now..."

Sylvanas:" ..."

Was it really... Dog Egg's doing?

To be honest, she was confident in many things, but she wasn't sure if that guy had done this scoundrel's doing... ..

After all, that guy had always been unable to control the violent aura of his bloodline. If they really happened to bump into each other in such a large night shade academy, and even had an unfortunate quarrel, it wasn't impossible... .. To kill someone...

However, this possibility should be very small. The Little Lass had obviously improved over the past few days. Monica had also promised herself that the other party seemed to be able to slowly control the tendency of his bloodline to change. His rationality was also much stronger than before... ..

This was also the reason why she had agreed to the other party's request to go out alone today... ..

After all, in her opinion, even if she caused some trouble, it wasn't important. It couldn't possibly be bigger than the trouble she caused on Planet Nomorrigan, right?

However, the truth was that she was too naive...

This fellow was in big trouble this time. Nomorrigan had only beaten up the crown prince, but he had directly killed him here...

This nature was completely different from heaven and earth! !

In the year of the crown prince, he had killed the crown prince. Ever since the era of the Federation, the Five Great Royal families had never had such an accident. This fellow was truly a person who had created history!

Moreover, this generation's crown prince had an extremely special meaning. Naturally, Sylvanas knew about the theory of the ninth underworld eye. She also knew how much this generation's Night Demon wanted to use this crown prince to justify the name of their Night Demon's legitimate royal bloodline... If this was true, it wouldn't be easy to bring this little fellow out in one piece...

"Sir?" Logan narrowed his eyes and looked at the other party. The atmosphere instantly became extremely vigilant!

"Hu..." Queen Xi let out a long breath. She covered her head and said, "Monica, get him over here and ask him about it first!"

"Alright..."

Monica didn't dare to hesitate. After all, this was a matter that could pierce through the heavens. Even if it was the queen, if she didn't give an explanation, she might not be able to escape unscathed...

As Monica waved her hand, a purplish-black spatial rune lit up. Logan and the rest retreated slightly, but when they clearly saw that it was a level-10 summoning spell, they immediately heaved a sigh of relief...

...

Judging from the energy level, it should not be a move against them. It looked like the other party had carved a summoning rune on that Junior's body. They really wanted to get him to understand the situation... ..

As a black light descended, with a plop, a meatball wrapped in a leather jacket fell to the ground from the teleportation array!

"WUUUU..."

Doggie's dissatisfied wuuu came from the leather jacket, and it was twisting and turning. It was obvious that she was trying her best to break free of the leather jacket... ..

Logan and the others' eyelids twitched. They could tell that the girl had obviously changed directions when she was wearing the leather jacket, trapping them and trying to break free of the leather jacket...

Queen XI's eyelids twitched. She raised her hand slightly, and the fur coat instantly evaporated. The clumsy doggie inside felt light all over and sat down on the ground again. He looked like a clumsy and stupid dragon...

Logan and the others' faces darkened. They began to doubt... ..

His Highness the Crown Prince... was he really beaten to death by this guy?

Goudan was stunned. He looked around, and when he saw Queen XI and the group of strangers' serious posture, he instantly understood... .. The incident of him beating someone up just now had happened...

...

"Where did you go just now?" Queen XI asked directly.

"I didn't go anywhere... uh... I was just taking a stroll..."

Faced with Goudan's stammer, Queen XI's heart thumped... With her understanding of this guy, he wouldn't feel guilty. Once he felt guilty, he would definitely do something bad... ..

Thinking of this, Queen XI stopped probing and asked directly, "Did you... kill someone just now?"

"UH..."

These words were like a bolt of lightning, instantly striking eggface hard. His pair of beady eyes stared wide open!

He killed someone...

That guy... was he that weak?

In an instant... Goudan panicked...

Even she knew that there was a fundamental difference between killing someone and injuring someone, especially when the other party's identity was important. It would be meaningless to say that the other party attacked first now... ..

"Are You Mute?" Queen XI narrowed her eyes and sneered.

Wang Goudan: "Abba, ABBA, Abba..."

The corners of the Queen's eyes twitched crazily. She was now basically certain that this wretched girl was the one who had attacked first! !

"This..." the queen was too lazy to continue arguing with that guy who was playing dumb. She directly looked at the night demon priests whose faces were ashen... ..

"That... there should be... some misunderstanding..."

Monica stared at Queen XI in a daze. Ever since she started following her, this was the first time she saw her majesty smile so forcefully... ..

It was even uglier than crying...

“My Lord...” Logan felt extremely complicated when he saw her expression!

Firstly, he could basically confirm that this wasn't some conspiracy before the invasion. Instead, it was most likely an accident that happened when a junior accidentally fired his gun... ..

It could be said to be a great blessing in misfortune!

But... ! ... from an unfortunate point of view, the price of this accident was too heavy!

It was not unheard of for juniors to collide with each other and cause death among the descendants of the large clans, but for the crown prince... .. It was probably the first time in history... ..

When he thought about how Elvis, the crown prince who had been placed with extremely high hopes and who should have given the entire night demon clan a clear name, had not even participated in the interstellar fellowship in the historical records... He was beaten to death because he had quarreled with someone in school... ..

When they thought of such records, he and the Night Demon Emperor felt that the entire world had turned gray...

“My Lord...” while the Night Demon Emperor and Logan were in a state of confusion and collapse, the secret elder Denzel's voice was still extremely cold.

“I'm afraid that this isn't something that can be explained by a misunderstanding... “...”. The other party continued to look at Queen XI warily and icily. “If it's a misunderstanding, my Lord, please urge that junior of yours to at least return his highness the Crown Prince's Netherworld pupil to US First!”

“Netherworld pupil? ?”

Wang Goudan was instantly stunned. What the hell was that?

“Netherworld pupil?” Suddenly, Queen XI, who was originally a little embarrassed, heard this word, and a cold smile flashed across her purple eyes. “If that's the case... Then I'm afraid that the one who murdered the crown prince of a noble family shouldn't be that stupid girl of mine...”

Chapter 1602: analysis...

“The murderer is very smart...”

Monica touched her chin and looked at the corpse of Crown Prince Elvis with an expression of interest...

...

Elvis's death could be said to be very tragic. His body was covered in blood and flesh, and his body was almost deformed from the beating, especially his face. It was obvious that someone had used violent methods to directly knead his skull into the size of a head, and now his eyes had been dug out.., two large bloody holes appeared on the deformed head. It looked like someone had forcefully squeezed out his eyeballs!

Logan had also just seen the corpse. He looked at the proud and lazy student who had become like this. Even though he had lived for millions of eras and experienced countless storms, his face was still slightly twitching...

Goudan, on the other hand, had a guilty look on his face as he shrank back behind Queen Xi...

Oh My God... was it actually so tragic?

The expressions of the night demons were not very good, but Monica did not have any other emotions. For an ancient lich like her, she had experienced too much life and death. Many important people had been cut off and used as experiments by her. Not to mention this junior who had nothing to do with her... ..

She took a closer look and basically confirmed the situation, she said slowly, "The deceased had 47 comminuted fractures on his body, 71 deformities on his bones, 91% of his skin area was burned, and a certain degree of internal debt damage should have been caused by a fight with our girl... ..

Hearing that, Goudan covered his face again. was the injury so serious?

It sounded like he could give up on treatment if he put it on the D ball...

"Master Monica, you mean..." Denzel frowned and asked, "The fatal injury is not due to that junior of yours, but someone else?"

"Do you need me to say that?" Monica laughed. "Haven't you done an autopsy yet?"

Denzel was silent for a few seconds before he finally said in a low voice, "We've only done a simple autopsy. We Can't give up on the autopsy so easily. After all, the body hasn't been inactive for long. If the other side successfully regenerates, we can consider doing a neural link to transplant the spirit body over...". "...". "..."

"Oh?" Monica looked at Denzel with a half-smile.

As the number one biological alchemist in the North Star Region, she naturally knew what he wanted to do.

After rebirth, one would usually use the gene body copied by the younger generation as a reborn body. It would have more than 80% compatibility with the reborn spirit body, and it would be equipped with top-notch soul link technology, under normal circumstances, one could be completely resurrected and reborn.

However, it was not without any side effects. First of all, the cloned gene body was far from being as pure as the original body, and there would be more or less a lack of genes, moreover, if the overly mature gene was copied onto the gene of a young child, it would cause the body to develop too quickly subconsciously, causing the foundation to be unstable.

Under normal circumstances, the direct descendants of the large families would use high-end biotechnology to continuously copy the growth data of the original body for insurance purposes. However, raising such a body would require an extremely expensive price, the higher the grade of the

physique and grade, the harder it was to nurture. After reaching star-grade, it was basically impossible to replicate it.

As the crown prince, Elvis naturally had a high-grade backup body. However, no matter how high-grade the backup body was, it could not be compared to the original body, especially when the other party had the nine serenity eyes.

This talent, which required a coincidental anti-ancestral gene and a clever transformation of the body, was basically impossible to replicate with any current biological technology. Even if the nine serenity eyes that retained the original body were transplanted into the clone body, it was impossible to guarantee that it would be 100% accepted. There was no guarantee that it could be received 100%. And for the current Royal Demon clan, if the crown prince could not guarantee the nine serenities eye, then Elvis's strategic position could not be compared to before... ..

Although the current body was badly damaged, it was an authentic original body. If it could be saved by bioelectricity, it would naturally be better than using a clone. As long as the nine serenities eye was found, it could be reattached., of course, they would not easily destroy the current body. However, the newly reborn spiritual body was extremely fragile. It was very risky to reattach it to the original body, which was on the verge of death. However, it seemed that compared to the crown prince's safety... They seemed to care more about the inheritance of the nine serenities eye...

However, it was also true. Elvis had seen that guy himself. With that character of his, if he did not have good eyes, he would have been treated as trash long ago, okay?

Looking at Monica's half-smiling expression, the secret elder coughed lightly. "Senior Monica just said that the murderer was very smart, but did you find anything?"

"You still need to find out?" Monica mercilessly mocked. "That's true. You guys do indeed need to find out if you don't even know the cause of death..."

As soon as these words were said, the faces of two of the old men in the surrounding night demon group instantly turned red. Those two people were the biology professors who were in charge of the autopsy... ..

However, it wasn't their fault. The two of them weren't professionals in this field. They had been temporarily transferred here by the instructors of the Serene Night Academy. After all, on a top-tier planet like the Serene Night Lotus land, the security was very good, it was basically impossible for a murder case to occur, and there wouldn't be any jobs such as an autopsy officer.

Now that the planet was on level-one alert, the teleportation had all been shut down, and the autopsy officers from the outside world couldn't enter. The two of them were like ducks on a rack. wasn't it very normal for them not to be able to check the details?

"Sorry for making a fool of ourselves, senior. It's our fault..." Denzel admitted defeat. After all, his attitude just now was indeed questioning Queen XI, and the fact that she was still able to hold back until now was already showing them respect... ..

Monica did not make things difficult for them, and continued, "The true cause of death of the deceased was not external injuries, but the acupuncture points of the vagus nerve center..." Monica pointed at the location of Elvis's medulla oblongata.

The group of people quickly looked over and were immediately surprised to find that behind Elvis's deformed brain, there was actually an extremely fine needle hole under the bloody mess! ! !

Due to the severe external injuries and the tragic state of large-scale burns, the group of star-ranked elders actually did not discover that thing at the first moment... ..

Monica continued to speak indifferently, "Originally, although this kid's external injuries were severe, he had the physique of a crown prince after all and did not have any fatal injuries. Even if he did not receive treatment at the first moment, he could temporarily stabilize his injuries with just his breathing technique. If he did not pursue the precise recovery of his bones, he could even completely heal himself. However, it would be different if his vagus nerve was poked once... "..."

At the scene, the instructors who walked the path of biology all nodded slightly. Vagus was the tenth pair of cranial nerves. Its function was to slow down the heartbeat, weaken the heart, dilate the small arteries, contract the coronary arteries, lower blood pressure, bronchoconstriction, and peristalsis, although the secretion of digestive glands was not controlled by the brain, it was extremely useful for the body. Especially for the breathing method, it was actually the main spirit!

At that time, the injury had to be regulated by breathing to stabilize the injury. However, when the vagus nerve was stabbed, the rhythm became chaotic, and the heartbeat and blood pressure could not drop. The problem was very serious... ..

"The murderer was very smart and proficient in the acupoint technique of the martial monks. Not only the vagus nerve, but other key parts of the body, such as the bones, were also pierced by the ACUPOINT technique. Once connected, not only could the consciousness of the deceased not be maintained, even the self-repair function of the body completely collapsed. Under that kind of injury, naturally, he slowly walked toward death... "... and it's a delayed death!"

Monica looked up at the crowd and sneered, "So... "...". When you guys received the notification of his death, the murderer had actually killed him a few hours ago. He had enough time to divert your attention away from the Netherworld pupil! " ! ! !"

Everyone: " ! ! !"

Chapter 1603: the truth...

As soon as Monica's words came out, the faces of all the night demons present darkened!

When they realized that the descendant of Queen XI might not be the murderer, they had been worried that the murderer had come specifically for the Hades' eyes.

And now, if it was as senior Monica had said, the murderer had taken the Hades' eyes and moved to another place a few hours before Elvis' death, it was very likely that he had already left the Hades' land, he had to lock onto the murderer as soon as possible and recover the Netherworld pupil!

Denzel looked at the Night Demon Emperor with this thought in mind...

The Night Demon Emperor, who was originally extremely weak, had an uncertain expression on his face...

The best way to lock onto the murderer was to directly reincarnate Elvis right now, and if he wanted the other party to wake up steadily and point out the murderer, it would be best to reincarnate into a clone. However, this way... Even if the ninth serene eye was found, it might not be 100% able to fuse with the clone. There was a high possibility of an obstruction... ..

This year's year of the crown prince was not a one-of-a-kind event. It was as if the heavens wanted to practice gu. All the geniuses were squeezed into the same era. The bronze crown prince of Nomorrigan was said to be infinitely close to the aptitude of the first bronze emperor, he was personally taken in as a disciple by the great suzerain Muladin. The crown prince of the Red Lotus clan, His Highness Ming, was also extremely talented. It was said that he could already use the 14th form of the Red Lotus sword at such a young age, breaking the record of the strongest fourth-generation crown prince.

The Starry Sky clan's Tyrande was even praised as having regained the glory of the ancient imperial clan. Some time ago, he had incited the birth of the water sovereign, shocking the entire federation!

Faced with this gathering of Heaven's favorites, an incomplete clone would probably find it very difficult to shoulder the responsibility of clearing the name of the Night Demon Imperial clan!

However, if the ninth serene eye was taken out of the night nether planet, once it could not be found, there would be even less of a chance!

For a moment, Night Demon Emperor fell into a dilemma...

"Let me do it..."

Suddenly, Sylvanas, who had been silent all this while, opened her mouth...

Everyone was stunned and immediately looked over. Many people did not understand what Queen XI was planning to do for a moment, but some of the elders knew what the other party was planning to do and immediately looked at each other cautiously.

Denzel was the first to speak. "Sir, if you use your laws, it might cause chaos..."

The entire land of darkness was covered by the Night Demon Guardian God, Lord Eve, using her laws. Once a Lord's law of this level collided, if one was not careful, the consequences would be extremely serious!

"It won't hurt her..." Sylvanas said calmly.

Hearing this, the night demons were stunned again, their eyes filled with dissatisfaction.

In terms of ranking, Sylvanas was the fourth Lord. Of course, she was higher than Lord Eve. However, in the eyes of many night demons, Lord Eve's overall strength was not much weaker than Queen XI's. They should be on the same level... Queen XI's words were too full of herself...

However, Queen Xi no longer had any intention of being modest. With a slight movement of her finger, a powerful ancient law power instantly appeared in space, causing the entire space to tremble!

All the night demons looked at each other. There was a trace of anxiety in their eyes, but they did not act rashly.

Even Denzel, who had been rather domineering towards Queen Xi earlier, could only watch anxiously at this moment. This was because everyone knew that when this woman really used her nomological power, even if the entire Netherworld was pulled together, they might not be able to stop her... ..

Now, they could only hope that the other party's nomological power would not cause a greater backlash...

However, it was clear that everyone's worries were unnecessary. The Clash of the two laws only lasted for less than 0.1 seconds. In an instant, the turbulent space calmed down, queen Xi's law power soon had an effect here.

This scene made all the night demons look at each other. Many who knew what it meant... ..

Crushing!

When the two laws collided, only one side would be able to crush it, causing the space to not tremble...

When they thought of this, whether it was the oldest Denzel or the night demon Emperor who possessed the strongest combat strength, a trace of shock appeared in their eyes!

In the federation, many people felt that Sylvanas' ranking was too high. They believed that the reason she was able to become the fourth suzerain was because of the great contribution of the natural disaster incident back then. It wasn't because her strength was able to surpass Iluweta's and become the fourth suzerain.

However, from the looks of it now... It was most likely not the case. ...

After the laws were covered, Queen Xi's finger gently shook. At the place where Elvis died, a light figure appeared. It was the other Elvis, the other Elvis seemed to have traveled back in time and space from his death to breathing. He displayed everything that had happened in front of everyone like a video recording!

Denzel and Logan's pupils constricted, their faces filled with incomparable shock!

What shocked them was not the ability to retrace time and space. After all, for a great lord, using the laws of time and space to retrace light and shadow using the elemental form was not difficult.

The reason why it did not work in the beginning was mainly because they were worried that the laws would clash. Queen Xi did not act immediately because she was afraid that if she did not have enough trust., if she used it rashly, it would cause a group of Night Devils to reflexively stop her.

The reason why he was shocked was because of the answer presented by the power of the laws after time reversal!

The real culprit... was actually one of his own kind! ! !

“Lorna?” Logan’s face turned purple. He never thought that the person who did such a shocking thing would actually be his usually steady and sensible descendant! !

“Ha, I’ll tell you! !”

When the truth came out, Wang Goudan immediately straightened his back, there was no longer the guilty expression from before. “I’ll tell you, I clearly knew what I was doing, how could I have killed someone? So I was framed. The people here are so sinister, too scary! ! !”

If these words were said under normal circumstances, they would probably cause the night demons to roll their eyes. After all, they had already beaten someone to such a state, and they still had the nerve to say that they knew what they were doing?

However, in the current situation of shock, no one was in the mood to pay attention to this guy... ..

“Interesting...” Sylvanas looked at Lorna in the light and Shadow. The corners of her mouth curled up slightly, revealing an interested expression.

Due to the time reversal, the entire process was very clear. Eggface had triggered Elvis’s nerves, causing him to ignore the safety of Lorna and the others and use the Netherworld pupil. In the end, he was still beaten up by Eggface.

However, after Goudan left, Lorna, who was the only one awake, made a terrifying choice: Dig Out the Netherworld pupil! !

“Logan! !” Denzel’s voice was extremely cold, “You have to give an explanation for this! !”

When Logan heard this, his face immediately turned pale, Wu Xue!

From the situation of the light and shadow, it seemed that Lorna had come up with it on the spur of the moment. There was no premeditated plan, and naturally, it was not instigated by him. However, this would still bring about an extremely terrifying impact on him and his family.

After all, the robbery and killing of the crown prince..! ... had never happened in the history of Night Demon! ! !

“Let’s Go...”

Just as the atmosphere was as cold as ice, Queen Xi’s faint voice broke the silence. “We’ll talk about the blame later. Now, let’s go and see... If that bold little girl can succeed in this gamble...”

Everyone:” ...”

Chapter 1604: the so-called high stakes gamble... .. That was how it was... ..

It was not difficult to track down Lorna after she had identified the murderer. After all, this was a place with the top infrastructure in the entire federation. It was impossible for a level 10 junior to hide from everyone... ..

Lorna was obviously aware of this as well. After successfully using the piercing point technique to delay death and delay time, she swaggered back to her family's base. Obviously, she also knew that this high stakes gamble would either succeed or die... ..

Her strategy had no problems so far. When the Furious Night Demon Elders found her, they still didn't dare to do anything to her for a short period of time. They didn't even dare to disturb her. They could only wait for the result from a distance...

"This junior is really bold..." from a distance, Monica used her spiritual power to check on Lorna's situation. She said with great interest, "He dares to directly put the nine serenity eyes in his eyes. His Way is a bit wild!"

Everyone:"..."

It was not that there were no bodies that could transplant other people's special organs. Some forbidden biological alchemists who were wanted would hunt and transplant the excellent bloodlines of the descendants of high-level families.

For example, the Special Shadow Eyes of the ghost family, the special heart of blood essence condensed by blood magic energy, and so on. By using special biological methods, they could transplant special organs derived from the genes of other creatures.

However, compatibility would be a big problem. In most cases, if it was not compatible, it would have a huge side effect on the body. And this was under the condition that there were many exquisite equipment. This girl directly used the most primitive method to forcibly transplant it, one had to admit that she was quite daring!

However, thinking about it, it made sense. Her little cleverness could only delay for a limited time. It was simply impossible for her to have enough time to find a top-notch biological transplant equipment and a high-level Biological Alchemist's manpower.

Within a few hours, all she could do was take a gamble!

Anyone with some common biological alchemy knowledge would know that this girl's success rate was probably less than 1% !

Although they both had the same night demon imperial bloodline and had a very high gene matching rate, that was the nine serenities eye, a special bloodline organ that had atavism. Such a thing that had not appeared in billions of eras... Even an ancient living alchemist like Monica didn't dare to say that she would be able to successfully transplant it, let alone someone like Lorna, who was gambling with her luck... ..

But even so, no one interrupted the process!

Because no matter how small the probability was, there was still a chance of success. Just This alone was enough for all the big shots to hold back their anger and wait for the result...

The atmosphere was very depressing. The feeling of someone who had made a huge mistake but could only watch the other party succeed was something that all the big shots present had not experienced in many years. Furthermore, the other party was a junior... ..

It had to be said that it was quite depressing, but there was nothing they could do, causing the atmosphere in the hall to be extremely strange.

The person with the most complicated emotions was none other than high priest Logan!

He looked at the youngster whom he had once doted on the most in the distance. His expression was extremely complicated. There was anger, coldness, and anticipation in his eyes... ..

Yes, anticipation...

As the clan's elder, he was naturally very angry that Lorna had disregarded the safety of the clan and done such a shocking thing. However, in this situation, even if he had done it, he could only pray that she would succeed, because if the fusion failed, it would not only be Lorna who would be punished!

"Emmmm, I'm so hungry..."

In the hall, perhaps the most boring thing was doggie. Because she did not have the vision to see Lorna's situation, she could only watch the group of people in the Hall staring at each other. It was extremely boring, so boring that she could only play with her tail... ..

When Sylvanas heard Goudan's hungry cry, she very naturally picked up Goudan who was playing with his tail. She took out a bag of jerky from somewhere, tore it up carefully, and gently fed it to Goudan.

Goudan was happily eating the shredded meat. The energy of the jerky was extremely high. Each time, Sylvanas had to use the power of law to fine divide the energy and remove the excess energy before feeding it to Goudan. This made the group of people stunned.

As a top-tier overlord, using her own law to prepare snacks for the younger generation to eat, if they did not see it with their own eyes, no one would dare to believe it!

Moreover, looking at how the Little Black Dragon was familiar with the rhythm of swallowing things, it was obviously not the first time she had enjoyed this kind of thing... ..

However, when they reacted, they felt that it was normal. After all, everyone had just seen that in the light and shadow of the space-time reversal, this silly little black dragon in front of them was able to push the crown prince who had activated his ninth serene eye to the ground and beat him up!

If it wasn't for her, Logan's junior wouldn't have had the chance at all!

Just as they were thinking about this, there was a sudden disturbance in the distance. Although it wasn't big, there was an extremely pure shadow energy that was erupting uncontrollably!

Everyone, including Sylvanas who was feeding them, all looked in that direction. It was obvious that they were very concerned about the outcome over there... ..

Everyone present was at least a star-grade powerhouse. There were even top-tier Heaven's origin powerhouses like Logan and Denzel. In almost an instant, they had penetrated through the energy barrier and arrived in front of Lorna!

At this moment, the smoke had dispersed. Lorna, whose entire body was corroded by the shadow power, knelt on one knee as if she was trying her best to stand up... ..

Many of the night demon elders looked at her solemnly, but they carefully restrained their own energy and did not dare to rashly disturb her... ..

Finally, after about ten breaths, Rona struggled to get up from the ground. She stood up weakly and slowly opened her eyes!

It was a pair of eyes of the night that was exactly the same as Elvis, with nine overlapping layers!

"Phew..." Rona let out a long breath. The shadow power on her body was quickly absorbed into her body like it had met a sponge. Soon, her pure white body was revealed... ..

"Oh! Oh!" Goudan widened his eyes and looked at her. "Your figure is so good!"

The atmosphere instantly froze. Even Queen XI could not help but Pat Goudan's head... ..

"Greetings, Elders!"

Lorna smiled weakly. She opened her pair of extremely strange and beautiful nine serenity eyes and bowed gently to everyone!

Everyone was instantly stunned, including Denzel, who was the most serious. When he heard these words, he could not help but tremble. "You... can maintain your rationality?"

Elvis had trained her for a hundred years, but she could not do it. This girl in front of him... "...". She actually did it?

"Yeah..." Lorna looked at her arm in a daze. The shadow energy in her hand was as obedient as a puppy. An unprecedented sense of control made her understand that she... .. The Gamble was successful!

"It doesn't seem... difficult..."

Lorna's silly smile gave people a feeling of ecstasy. It was completely different from the beauty of the priestess... ..

The elders looked at each other. Denzel and the Night Demon Emperor were also looking at each other in shock. Obviously, they were in great disbelief, but... More... More... ..! It was joy!

Yes, in front of this heinous person who dared to murder the crown prince, all the night demons, including the Night Demon Emperor who had almost recovered from Elvis' murder, were filled with an unconcealable joy!

Looking at the Elders' eyes, Lorna smiled even more foolishly...

The so-called big gamble... ... Even so, these elders might have wanted to tear themselves into pieces and eat them one second ago, but now... ... After her gamble was successful, who would still remember the Dead Elvis?

Chapter 1605: the forces behind...

The new crown prince was quickly appointed. Hundreds of families that had entered the royal family's forces held a collective meeting and each sent their family representatives. However, after hearing about the situation, the decision on the new crown prince was made... Other than crown prince Yuan: Elvis's mother's family had protested a little, the other families had almost all passed in an instant...

Just like that, Lorna, who had obtained the ninth serene eye by murdering the previous crown prince, had turned from a murderer into the noblest existence among the younger generation of night demons in just one afternoon!

Lying on the sofa, Eggface was enjoying the electromagnetic needle that Monica had cast on her. His tail was wagging as he slowly listened to Monica and Queen XI talk about this matter.

"They passed it pretty fast. It turns out that they have met with a serious matter. Their parliament is quite efficient..." Queen XI was half-lying on a rocking chair, tidying her long nails... ..

Monica slightly smiled, but she knew what the Lord was complaining about. In the past, when they were recruiting night demons, they always called for a meeting of the members of the parliament. The meeting lasted for several days and was often delayed, each night demon Emperor looked very helpless.

However, it was proven that in the case of the real interests, the so-called family dragging the family down didn't exist at all... ..

Just like Elvis's mother clan, who had suffered such a great loss, their protest couldn't even delay for one minute in front of the overall interests...

"That..." the silent dog egg who was lying on the sofa suddenly spoke, "That guy called Elvis, right... that cocky guy, how is he?"

Queen XI and Monica looked at each other in amusement. It was rare for little dog egg to care about these things. When they went to the east star field to explain the situation of the other clans to her, this guy always fell asleep listening to them, this time, it was related to her.

It seemed that he wasn't completely heartless...

"Didn't you see that Guy's body?" Sylvanas asked with a smile.

"Um..." eggface buried his head in the soft sofa and said sullenly, "Didn't they say... that he can be resurrected?"

"He has to be worthy of being resurrected..." "..." Monica continued, "It's very expensive to raise a royal family's child, so the average family wouldn't raise two. Elvis is very talented, but he has a lazy personality. If it weren't for the nine serene eyes, he would have been eliminated a long time ago. His

mother clan has a total of four descendants of the royal bloodline, and all of them are equally talented. Without the nine serene eyes, there's no need to choose him at all..." "..."

"Besides, the new crown prince took his things by force. In order to avoid any unexpected conflicts later, he will definitely give up on him..."

These words made Goudan, who had his head buried in the sofa, silent for dozens of seconds. Finally, he said, "In other words... he could have been saved, but because it was worthless, he was not saved?"

"Is there a problem?" Sylvanas looked at Goudan and smiled.

"But... he's a victim..." Eggface was silent for a long time before he said, "Logically speaking, shouldn't he be the one to be compensated?"

"This logic... is just an ideal situation..." Sylvanas looked at the bright sky reflected by the crystal roof and said faintly, "But this world... has never been ideal..."

Eggface: "..."

The topic fell silent. After about 15 minutes, Eggface's snoring came from the sofa... ..

This made Queen XI, who thought that Eggface would say something, Twitch the corner of her mouth, and then she shook her head in amusement. "This girl should be living well in the future..."

"She's a little soft-hearted..." Monica continued to focus on using the electromagnetic needle to dredge Goudan's bloodline. She faintly replied, "Fortunately, she figured it out very quickly, so there's not much of a problem..."

As she spoke, the needle pierced into the back of Goudan's neck. Goudan's body clearly stiffened for a moment, and then the scales all over his body clearly dispersed... ..

"Alright, she's really asleep..." Monica expressionlessly began to retract the magnetic needle... ..

Queen XI shook her head in amusement. That girl was clearly wild in her genes and looked very much like the most primitive Dragon King bloodline, but there was a bottom line in the depths of her heart that many people did not have. She was really a complicated structure... ..

"My Lord, have you noticed?" After Monica retracted the magnetic needle, her tone became quiet. She did not use voice transmission, but for some reason, her voice did not cause any ripples in this space and only spread at a close distance, it did not spread out at all!

"Mm..." Queen XI looked faintly at the sky and nodded slightly.

She knew what the other party was talking about...

Although the junior of priest Logan was ruthless and decisive in his actions, this ending was a little strange... ..

There was less than a one percent chance of success. Not only did he succeed, he actually had a better rate of harmony than the original owner. He even awakened the shadow power of the nine serenities eye. This kind of coincidence, even the book did not dare to write this...

“My Lord, do you think it’s them?”

“I don’t know...” Sylvanas shook her head. “I can’t sense it, so I can’t judge it. After all... no matter how small the chance is, it’s still possible, isn’t it?”

Monica was silent when she heard that.

The queen was right. They could not determine that it was those guys just because it was too much of a coincidence. However... Compared to coincidences, it was more likely that they were the masterminds behind the scenes. ...

“If that’s the case, my Lord, I’m afraid that what you’re worried about will come earlier than expected...”

-----

“Elder ancestor...”

At this moment, in Logan’s family residence, the new crown prince, Lorna, was standing respectfully behind Logan, obediently listening to his teachings... .

And outside the hall, a black-armored knight Marquis with a heavy breath was outside.

It is one of the two Royal Magic Sword: Lord Ganluo, Night Demon clan in nearly a century, the only goddess sword!

Originally the head of the internal court, responsible for the safety of the Night Demon Emperor, but now, it was assigned to the new Crown Princess Lorna.

After what happened at Elvis, it made everyone realize that even in his own house, the crown prince... ..  
It’s not always safe... .

“It’s Lorna’s fault for worrying you...”

Lorna was as gentle and understanding as ever, and Logan looked at her with mixed feelings.

He really can not imagine, this always gentle and sensible girl, is able to do that kind of crazy things people!

Taking a breath, Logan suppressed the complex emotions in his heart and said lightly, “In terms of outcome, there is nothing wrong with what you have done...”

Lorna lowered her head. There was neither a proud smile nor fear on her face. She just listened indifferently as if she was listening to a common thing... ..

Seeing this expression, Logan sighed in his heart. Perhaps... He had never understood this junior of his. ...

However, it was also good. From the point of view of her temperament, this Lorna was more suitable for the position of crown prince... ..

“However, you have to remember that you can’t win a big bet every time. Right now, you bear the expectations of the entire night demon race. You must never do the same thing as a gambler!”

“What the forefather taught is...”Lorna raised her head and smiled, “Lorna will definitely not be that impulsive anymore!”

‘impulsive?’?

Logan smiled bitterly. Although it was due to his luck that he could complete this task so calmly and ruthlessly, it was hard to believe that it was just a moment of impulsive action... ..

“Lord Ganluo...”Logan looked at the black-armored knight outside. “Do you want to have a drink together?”

Ganluo, who was wearing a helmet, glanced at Logan and nodded slightly... ..

Just like that, the two of them naturally disappeared from the hall... ..

Lorna bowed slightly to the place where the two of them had disappeared before slowly walking towards her original hall.

As a member of the royal family who had been chosen by the family, even if she was not the crown prince, her residence was not considered small. In this land where every inch of land was worth gold, there was an exquisite back garden that belonged to her.

After strolling into the garden, Lorna looked around and muttered in her heart...

“System!”

“Please give your orders, Lord host! !”

Chapter 1606: The Magical System...

“System... is there anyone around?”

“Host, don’t Worry!”A mixed electronic voice sounded in Lorna’s mind, “This system uses a special spiritual sense connection. No matter what environment you are in, your communication with this system will not be known by outsiders, no matter who it is!”

The electronic voice was as cold as a machine, without any emotion, but the meaning of these words was extremely proud...

“Including that Lord?”Rona asked after a few seconds of silence.

The words were naturally referring to the 4th Horde leader who was currently passing by, standing at the pinnacle of the universe!

“The system just said, anyone!”

“Hu...”Lorna let out a long breath and tried her best to calm down the excitement in her heart!

Yes, the reason why she dared to do such a crazy thing was not only because of the emotional fluctuations, but also partly because of the confidence given by the mysterious system that appeared in her body a few months ago.

In these few months, the mysterious system had given her too many magical experiences, allowing her to slowly gain a certain level of trust. And when Elvis was seriously injured, the system had notified her that a top-tier biological organ had been detected: Ninth Nether pupil, it was an extremely rare derivative of an ancient bloodline. Do you wish to extract it?

At that time... .. If not for this notification, if not for the various mystical experiences the system had given her previously, even if she was threatened by Elvis's death, she would not have dared to rashly harass him... ..

"System, check my current physical condition!"

System: "Host Lorna, carbon-based organism. Race is the Night Demon clan, descendant of the Starry Night's pure blood. Purity of bloodline activated by 31% . Life Level 11. Activation of innate bloodline: Netherworld pupil. Fusion rate: 37.6% ..."

In Lorna's mind, like a screen of light, a huge string of data appeared clearly!

"It's only 30% ... but it's still a huge improvement..."

Lorna muttered to herself..

Previously, when she had not fused with the nine serenity eyes, the data she displayed was only 13% . After fusing with the nine serenity eyes, it had more than doubled. The improvement was indeed huge.

However, it also gave her a data fact. That was, the clansmen were thinking about Elvis. They thought that with the ninth underworld eye, he was infinitely close to the bloodline of the ancient night underworld clan, but in reality, he only had about 30% , she did not know what kind of exciting expressions they would have if they knew this fact!

Moreover, Elvis's purity was most likely inferior to hers. After all, after she had successfully fused with the ninth underworld eye, she could control the awakened shadow power. The other party did not have such talent.

Thinking of this, Lorna suddenly asked, "System, is my current ability stronger than Elvis's?"

System: "According to the test, Elvis's bloodline purity is less than 25% , which is far lower than the current host's..."

As expected! !

Lorna's eyes lit up, and she suddenly asked, "Then what if the current me is up against someone else? For example... The guy who defeated Elvis!"

The system:"..."

Lorna: "HM?"

This was the first time she had encountered a situation where the system did not reply...

The system: "I suggest that the host try not to provoke that guy..."

Lorna's heart skipped a beat when she heard that. "Why? Could she be stronger than the current me?"

The system: "The other party has a high barrier protecting her, so she can't detect the real situation. Based on experience, she should have someone like the system on her!"

"Oh?" Lorna took a deep breath. "I see..."

No wonder she was so powerful, so she had...

But it didn't matter, she would be able to catch up soon...

"System, show me the missions I can accept!"

The system replied, "Good host, according to my evaluation, there are five missions that are suitable for you. First: absorb the essence of the netherworld lotus pool, condense the essence of the Netherworld Lotus Pool within the next year, hand in five of them, and you can exchange them for 100,000 points!"

Second: exploration of the ancient land of the Eternal Night Sea, Cold Valley region. Successful exploration of the designated area will earn you 150,000 points

Third: Exploration of the ancient land of the eternal forest, Triangle Valley. Successful exploration will earn you 1,900,000 points!"

"Huh?" Lorna was stunned. "Why is there so many points on this one?"

The system said, "The difficulty is different. The Eternal Forest belongs to the exclusive land of the Star Elves. If you want to take it, you have to give the night demons the priority to choose!"

Lorna nodded. "Open the trade area..."

The system said, "Yes, host!"

As soon as she said that, a huge screen appeared in Lorna's mind. On the screen, there were many lists of goods, materials, energy, finished technology, alchemy items, precious techniques from different races, even lost techniques from ancient times, and some rare materials that could not be bought on the black market. The system had everything!

As long as one had enough points, they could exchange for anything here!

This was also the magical point of this system.

Lorna gently tapped on the technique and opened one of the priest scrolls called Song of the Eternal Night. She said directly

In the next second, the complicated and exquisite priest scroll slowly unfolded in his mind! !

If an elder of the night demon race saw this thing, he would definitely cry out in surprise, because the song of the Eternal Night was one of the secret scrolls of the ancient dark night race's royal priests. It had been lost since the ancient dark night race disappeared... ..

Although she did not know how such a strange thing existed, Lorna knew that this was her chance. It was a chance for her to soar into the sky and get rid of the curse of her bloodline!

If she could, how could she be willing to live for only one era?

“Phew...” after letting out a long breath, Lorna completely memorized the contents of the secret scroll in her mind. Only then did she slowly open her eyes!

The items that she exchanged for wouldn't disappear. They could even be present in the real world. But to be safe, it was better to memorize them. Who knew if the system would suddenly disappear one day... ..

Therefore..! ... she had to earn points as quickly as possible to obtain more benefits for herself!

When she opened her eyes, she realized that more than half a day had passed without her realizing. Looking at the time, another two hours would be the time when she should have gone to school... ..

Lorna stood up and stretched her body. She stretched her muscles and squinted her eyes as she looked outside.

In fact, her current situation was not suitable for her to go to school, but... .. She remembered that after today, the people from Xandar Academy would be leaving... ..

In Lorna's mind, she recalled that heroic figure...

Chapter 1607: the same kind again...

When Lorna came to the school again, countless strange gazes came from all directions...

Yesterday, the meeting of the new Crown Prince's replacement was held, and almost all the top families of Night Demon attended. Naturally, the news of Lorna killing the Crown Prince and ascending to the throne had been exposed.

Although it was only spread among the top families, those who could afford to go to the Nether Night Priestess Academy were mostly the descendants of the top nobles.

It seemed that no one had expected that Lorna, the gentle and generous new priestess, the successor of the next Black Moon priestess, would do such a crazy thing!

So... It could be like this, it could even change fate like this. ...

In the crowd, some of the gazes were cold and gloomy...

However, when their gazes shifted to the black figure behind Lorna, most of them pursed their lips and stepped back... ..

Ganluo, who was standing behind Rona, observed every junior's gaze very carefully. He felt a wave of helplessness towards those rays of light that suddenly carried ambition.

As the first descendant to kill the Emperor and ascend to the throne, Rona had opened a magic box for all the younger generation. This was not a good thing... ..

Hopefully, during the meeting, the new rules of the family rank deprivation would be able to guard against the actions of the elders of the top families. Otherwise, who knew how many times this generation's crown prince would have to be replaced!

Of course, logically speaking, most families would not take the risk. After all, no matter how powerful the crown prince was, he was only an ERA's benefit. There was no need to put the family at risk for thousands of generations. Moreover, even if he had seized the nine serenity eyes... The juniors that he had chosen might not be able to replace him. It was really not worth it... ..

Meanwhile, Rona directly ignored those prying gazes and walked elegantly towards her destination... ..

Her goal wasn't the priest academy, but the outer courtyard next to the priest academy, which was used to receive guests.

Very soon, Lorna found the person she was looking for...

In the empty space of the outer courtyard, the person Lorna was looking for was brandishing a silver long spear and sparring with a slender night demon... ..

The spear shadows and sword lights filled the sky, causing the onlookers to cheer. Among the two people fighting fiercely, besides Leng Xing himself, the other was Edgar from the Divine Sword Moss family. Moss!

Looking at this familiar scene, a smile appeared on Rona's cold face... ..

Ganluo, who was behind her, also looked at the Tall Green Titan with interest... ..

She had heard another Lord Ye Xiu, who had the title of divine sword, mention the new student of Xandar. It was not an easy thing to get that Guy's high evaluation. It also made her a little curious when she first heard about it.

Today, she had seen it with her own eyes. In just a few seconds, she was able to see how stunning this junior was!

What a perfect bone statue!

As the youngest divine sword of the Night Demon Imperial family, she had also lived for more than a hundred eras. Regardless of whether it was her peers or juniors, she had seen countless outstanding geniuses. However, when she saw such a perfect and almost flawless bone statue.., she could not help but secretly sigh in admiration.

Perhaps even the direct descendants of the previous third Lord's subordinates, the Titan Legion Commander's direct descendants, did not have such a good titan bone statue!

And the almost exaggerated lifeblood on the other party's body also proved that this little fellow's bloodline was pure. With a rough estimate, his basic attributes were probably more than ten times that of a titan of the same level!

And not only was this little fellow's lifeblood powerful, his basic attributes were off the charts, and his control was also quite astonishing. When sparring with Edgar, the strength on his body was precisely controlled to a level that could be suppressed just now. It looked like he was in a sorry state, but every time, he was able to parry Edgar's exquisite techniques in his extreme state!

And Edgar was also fighting to his heart's content in front of an opponent who seemed to always be close to victory. He had practically unleashed all of the potential in his body!

While the other party was tempering himself at his limits, he was also allowing his opponent to unleash his greatest potential. This was the first time she had seen such a situation.

"What a rare gem..." ganluo said, "It's a pity that it landed in Xandar..."

"I don't agree with you..."

A faint female voice sounded with a natural charm. Even Rona, who was a woman, couldn't help but feel weak. Ganluo's eyes lit up!

"Long time no see, Ah Li!"

"It's been a long time..." the graceful Ah Li slowly walked over from behind. He glanced at Ganluo, who was dressed in black armor. "It's still the same as before, so inflexible..."

"Warriors don't need to be decorated..." ganluo smiled. "This junior in your school is very good..."

"There are more than one who are pretty good..." Ah Li smiled provocatively. "However, I don't think Lord Godly sword will miss them..."

"To be honest..." Ganluo looked at the Green Tai juniors who looked exactly like Leng Xing in the crowd. Looking at the bone statue and blood essence that were almost as good as Leng Xing's, his eyes flashed with passion. "I have some ideas..."

"Ha..." Ah Li smiled. "Don't think about these few. Think about the others..."

These words made Ganluo slightly shocked. He looked at the other party in surprise. With such astonishing talent, was there more to Xandar Academy than this?

Where did they dig up the treasure?

"Alright Kids!" Ah Li clapped his hands slightly. A gentle spiritual power instantly calmed the two parties who were in the middle of a fierce battle. They quickly withdrew...

"Teacher Ah Li?"

Leng Xing turned his head and looked at Ah Li, bowing respectfully... ..

Ah Li was the teacher of the Earth class. She was mainly in charge of teaching the developers in the academy. However, as an expert who possessed top-tier movement techniques and speed in the universe, she was also in charge of teaching the heaven class on footwork.

In terms of precise control, she had given Leng Xing a lot of guidance over the past few days. In just a few days, Leng Xing had improved by leaps and bounds. Towards such a teacher who had real talent and knowledge, Leng Xing naturally respected him very much... ..

“Alright, let’s Rest for a while. We’re about to set off...” Ah Li looked at Leng Xing gently, a hint of satisfaction in his eyes.

These Titans in the Heaven class were all top-notch seedlings, but the student she was most satisfied with was Leng Xing. Although this child had the heroic Titan bloodline and bone type, he had an incomparably meticulous mind, and he was exceptionally easy to teach.

In comparison, the other few were more pure in eating talent... ..

“Are we going back?” Pu Yunchuan asked with his eyes wide open.

Emperor liver also looked over. To be honest, they had been used to the high-energy air in this place for the past two days, so they suddenly felt a little reluctant to go back... ..

Ah Li saw through the eyes of the little ones at a glance and sighed in his heart. Although Gan Luo’s words were somewhat unpleasant, he was not wrong. It was indeed a pity that these children were in Xandar Academy... ..

“Not really...” Ah Li smiled and said, “We are going to visit a place that might become the address of our new campus...”

“Oh?” These words immediately piqued the interest of the Titans. Since they were out to play, they naturally hoped to visit more... ..

Gan Luo, who was opposite Ah Li, narrowed his eyes slightly...

She had also heard that Sir Sylvanas wanted to bring Xandar Academy into the Northern Star Field. From the quality of these juniors, it was very valuable. She personally preferred the northern star field to bring Xandar in, after all, juniors of such quality would definitely shine in the social gathering ten years later. Even if they were suppressed by the Crown princes this year, they would probably become the main characters of the social gathering in the next few years!

It was just that she did not know what kind of bargaining chip the Queen would bring out...

While everyone’s attention was on the few Green Titan Juniors, many people ignored the sudden silence of Lorna... ..

One had to know that Lorna was originally here to watch cold star, but now her expression had become a little strange... ..

Because just as she was about to go up and greet him, the system in her mind gave a warning voice... ..

“Lord host, please take note, the Green Titan ahead also has my similar aura...”

1608: completely unfamiliar with the same species!

The same species?

This word immediately caused the originally delighted Rona's expression to stiffen. The gaze she used to look at Leng Xing became a little strange... ..

"Why didn't you tell me before?"

Rona was a very cautious person. Even if the system had guaranteed that even Sylvanas wouldn't be able to hear the system's conversation in her mind, when there was a powerful senior in front of her..., she would subconsciously avoid the communication system.

But this time... she couldn't help it!

System: "I noticed that the host had a history of contact with the other party. Two days ago, the system was in the midst of maintenance and upgrading, so I wasn't able to judge in time. I'm very sorry..."

Lorna couldn't help but ask, "You still need to maintain and upgrade?"

System: "Of course... does the host think that the system calls itself the system for fun?"

Rona:"..."

"Then let me ask you, if you continue to maintain and upgrade the system on an irregular basis like last time and miss out on key information, what would you do if something happens to me?"

The system replied, "It's impossible to avoid the situation that the host mentioned. In order to make it easier for the host to be more alert, the system will notify the host of the system's maintenance and upgrade in the future..."

Upon hearing this mechanical reply, Lorna suddenly began to doubt this thing.

This... .. Was It really a support system?

She had always thought that this was a hyperdimensional intelligence left behind by some ancient civilization. In some pure spiritual civilization era, such as the era of the developers, that legendary hyperdimensional intelligence!

The techniques of various families and even some techniques that had been lost in the ancient times had come from the collection of this hyperdimensional intelligence. This was possible. After all, according to some experts who had studied history, the top intelligence of the developer era possessed an extremely powerful ability to crack data.

It had almost reached the level of an intelligence replacing an artificial one. No matter how complex a Warlock's defense was, this intelligence would be able to crack it. This also meant that the top families of the Federation would be able to use whatever means they had to protect their family's secret arts., this intelligence could break through the defense, steal information, and collect the things they wanted!

This wasn't impossible. After all, the gap between civilizations could represent many things.

As for the weapons that could be materialized, it could also be explained. The hyperdimension intelligence had the most advanced alchemy algorithm. As long as the materials collected were sufficient, it could materialize any object!

Although what the experts said was a bit like science fiction, Lorna felt that what she had encountered might be what the experts said!

But now, with just a single sentence about upgrading and maintenance, she had some doubts... ..

After all... .. Upgrading required manual patches. If this system came from the developer civilization, how would the already extinct developer patch it?

Where did it get the data to maintain and upgrade?

Could it be that there was someone behind this system?

Thinking of this, Lorna's heart trembled...

"Please rest assured, host..."

Just as Lorna's thoughts were complicated..., the system's cold mechanical voice replied numbly, "All your guesses about this system are wrong. The existence of this system is far beyond your imagination. It's not something that your knowledge can understand. Please don't make wild guesses..."

Lorna, whose thoughts had been dug out by herself, suddenly had an unsettled expression on her face.

It was the first time she realized that... the other party could actually read her mind! !

It could actually know what she was thinking? ?

But that wasn't right. Anyone who had taken a spiritual lesson would know that... .. ! There was no such thing as mind reading in this world!

To be able to know what the other party was thinking, this kind of technology shouldn't exist either...

Did the other party guess what she was thinking just now... ? Or did he really know what she was thinking?

If he was guessing... .. Then it proved that this so-called system... .. Was not the kind of emotionless intelligence that she thought it was, but if it could directly know what she was thinking, it seemed to be a very terrifying thing... ..

But in the end, Rona calmed down. Now that she was bound by this strange system, rather than worrying about this and that, it was better to make good use of it first and try to slowly understand what the other party was like in the future... ..

After a moment of silence, she asked again, "You said... Leng Xing has the aura of your kind on him. Does that mean that he might have a system like yours?"

The system replied, "Not necessarily, but he has a high-level protection unique to our race. It can prevent him from reading some basic information. This is something that only my kind can do..."

"High-level defense system? Can it hide it from everyone?" Lorna asked curiously.

The system replied, "In theory, yes. Even the ten great lords are unable to read what we're trying to hide..."

Lorna's heart skipped a beat as she continued to ask, "Are there many of you? The Black Dragon from last time, you also said that she has information on her kind..."

System: "Not much, but there is..."

Rona: are your people as good as you? Do they have your people? Does that mean they get everything they want as long as they complete the mission and get points

System: "No!"

Lorna: Huh

System: "Please Rest assured, my kind although have, but are incomplete, you do not need to worry about their threat, because you have the system, is the most perfect sample of the universe! !"

-----

"Complete strangers?"

Far away in the Martian night after receiving intelligent hints slightly stunned, puzzled up: "What do you mean?"

Just intelligence prompt, from Cold Star and Wang Goudan body, all transmitted the same kind of sensing aura... . .

The reason why the first batch of players dare to enter the universe, in addition to the protection of Ysera, the real reason is from the high-level protection of intelligence!

It was a magical protection that could completely cover up the basic information of the players. According to the AI's guarantee, even the ten great lords would not be able to see through their protection... ..

After Ysera's many experiments, Seer finally dared to release the first batch of players to enter a top-tier high school!

The reason was simple. These players were extremely talented. If they entered a high school, they would easily attract the attention of big shots. If they could not cover up some basic information, it would be very dangerous for their entire base...

Of course, the AI had also said that even though this protection could not be broken by a third party, in the universe, if they met other players of the same species, they would be able to detect that the players had this protection... ..

However, the probability of this happening was very small. After all, there were very few Yimo. In the vast universe, the probability of meeting them was extremely small... ..

However, it was a pity that this extremely small possibility was met by two unlucky players... ..

And it was not an ordinary situation...

"What do you mean by a complete stranger?" Seer asked again.

Ai: "We Yimo entered the physical universe at the same time. After being destroyed, we will regenerate. This is our basic talent after corroding the laws here. However, no matter how we regenerate, we will still be the same person from before. Even if we meet the same person, we will still be able to recognize the other party's background with just one look... :. But this one... .

"I can't recognize him! !"

Chapter 1609: Xandar's plans... ..

On the second day of the first-level alarm contact in the Land of darkness, everyone from Xandar Academy followed Queen XI to the station that she had prepared for Xandar!

Faced with the Queen's personal invitation, the principal of Xandar was naturally full of face. However, when it came to the final bargaining chip negotiation, he was a little nervous. He had been staying in an extremely private room, keeping his head down and not coming out., even the instructors under him were all talking and discussing with Ah Li. As the principal who had initially been eager to come to the Northern Star Field, at this moment, he had left with his head down.

This caused some of the instructors to be at a loss. However, Ah Li, who was somewhat familiar with the principal's personality, laughed in his heart...

This old fellow's thoughts were so simple that he could even guess it with his fox fur!

In the Eastern Star region, although Xandar had relied on a solid foundation in the martial arts school to walk step by step, in reality, because of his foundation, it was difficult to walk!

Those who were truly familiar with Xandar knew that Xandar's student foundation had come from two places in the past. The first was the wastya race... ..

This was one of the largest races in the universe, but it was also the universe's most loose and most uncohesive race. Xandar had a deep relationship with several of the royal bloodlines, so from time to time, he could collect some good seedlings from there, however, the wastaya people used the most primitive policy of using force to ascend the throne, causing the clan leader to change his clan from time to time. Often, in this era, one person would be in charge, and in the next era, another new king would be in charge.

Some of the interstellar companies, organizations, deity forces, and other private forces that signed a partnership with the WASTAYA race were likely to change because of the new king's ascension, most of the companies, families, and academies that had suffered losses did not like to deal with the WASTYA race.

The channel of Xandar could be said to be very unstable. Only a small number of the wastya race, such as the nine-tailed race and the few stable branches of the divine ape race, would provide a more stable partnership, however, the number of good students that could be provided was limited. At least, it was not enough to support a top hundred university.

Therefore, the true student foundation of Xandar was actually the Titan force of the previous third Lord, Black Baron. At that time, among the ten corps, three corps were on good terms with Xandar. The military disciples would often be sent to Xandar for training, at that time, Xandar was also nicknamed the Special Military Academy of the third Lord.

At that time, Xandar had a period of glory. Just by relying on the ranking of the Martial School and the ranking that was obtained from every fellowship, Xandar was able to occupy the top fifty ranks all year round! Sometimes, he could even enter the top 30 rankings!

However, after the collapse of the Black Baron's influence, Xandar plummeted. Without a stable number of students, Xandar's ranking deteriorated day by day. Until now, he had basically fallen out of the top 100... ..

After that, two generations of principals tried their best to rope in some traditional warrior families, but their results were limited. In this generation, there were even a few families that had gone too far because of the conditions they had proposed, they were even directly told to scram by this extremely proud principal.

It could be predicted that if this continued, they would fall out of the top 100 and completely become an ordinary martial arts school. It was only a matter of time...

And at this difficult moment, the heavens finally seemed to be unable to watch on any longer. A strange ray of light descended from the sky!

That's right, it was that mysterious little lord, that little warrior family with the surname Eldia. A little lord that had just started had sent over a batch of shockingly talented juniors...

After a period of careful training and observation, it could be concluded that those juniors were definitely not some kind of alchemy product, but a genuine high-quality bloodline. Such a group of high-quality seedlings., would definitely make Xandar Academy Shine in the next few social gatherings and reap many benefits for the academy.

It was not impossible for their rankings to return to their former glory...

But the problem was... what would happen after that?

The juniors sent by this mysterious overlord were indeed stunning, but they all had a common weakness: they all had ancient bloodlines!

If the ancient bloodline had a high capacity, it could indeed crush ordinary bloodlines under the same quality. Even if it was the direct descendants of nobles, many of them would be at a disadvantage if they encountered high-quality ancient bloodlines, but the weakness was... .. They were unable to pass on their genes!

This was the reason why all the families were not interested in nurturing ancient bloodlines. It was the same for the academy. Ancient bloodlines could help the academy gain temporary benefits, but they were unable to work together for a long period of time.

Even if these children had grown to star rank or even life sea rank, they would not be able to pass on their genes to their families. If they could not pass on their genes, they would not be able to provide students for the academy.

Hence, while using a large amount of resources to nurture this batch of juniors, Xandar had to think of a way out!

Ah Li knew that the principal had not come to the northern star field on a whim. Instead, he had considered it... ..

Back then, the old principal had submitted to Lord Black Jue, allowing Xandar Academy to flourish. Now, he had the same idea. With the support of the ten great lords, he was far more reliable than some families.

However, the Northern Star Field had always been isolated, and the risk of submitting was extremely high. Moreover, the Eastern Star Field, where Xandar Academy was located, had the greatest rejection towards the Northern Star Field. Once Xandar submitted to the Northern Star Field., the cooperation between the families that had been carefully accumulated in the past would probably be completely cut off in an instant!

This was equivalent to a huge gamble!

This silly big principal seemed to be willing to go all out, but when it really came to a critical moment, he still knew how to be nervous... ..

Ah Li smiled slightly, but his heart felt a little more at ease. It was good that this guy knew how to worry, but if he was a fool, then that would be troublesome!

She wasn't completely against submitting to Queen XI. The vastaya race wasn't very popular in the universe, and the North Star Field had many Vastaya race students, and she was an example... ..

She only felt that such a huge gamble, relying solely on Queen XI to personally receive these face-to-face skills did not have much meaning. The key was still to see the conditions of the hands.

This was also the reason why she brought Leng Xing and the others here. She wanted to increase the stakes and let the other party see the value of Xandar. At the very least, she had to prove that their Xandar had not joined the North Star Field because they had no other choice!

At the thought of this, Ah Li looked outside the spaceship...

She was not unfamiliar with the map of the Northern Star Field. After all, she had graduated from the Night Shade Academy. In her impression, this direction seemed to be one of the ten great liches of the past: The Ellacia Star Field where Andrew's forces were located... ..

In her impression, there did not seem to be many high-grade planets left in that star field's star field... ..

After Andrew was wanted, his power was quickly divided up by other forces. Most of the planets above level three seemed to have owners, and the location of Andrew's star system was close to the natural disaster crack, it was impossible to continue to develop in that direction. Logically speaking, after so many years, there shouldn't have been any new developments.

Could it be... ? ... that the queen only intended to use a grade 4 star as a bargaining chip? ? ?

Looking at the route that was getting closer and closer to that direction, a trace of worry flashed through Ah Li's eyes... ..

Chapter 1610: Rules...

"Wow..."

Heroic spaceships would usually waste some space to build a stargazing platform that could observe the outer scenes of the starry sky from all angles. However, most spaceships were not so heroic. Just like how small houses usually did not have cloakrooms, but in reality, even if the spaceships were grand, with a stargazing platform, there were actually not many people who came here... ..

Most of the people who were interested in the wonders of the universe were newbies, and the older generation who often traveled were tired of this aspect.

However, for cold star and the others who had just entered the outside world, a different stargazing scene made them feel extremely novel!

"It's really beautiful..." Pu Yun Chuan lay comfortably on a high-quality material sofa on the stargazing platform, looking at the stargazing above the crystal without blinking his eyes...

"That's right..." emperor liver also stretched lazily. "One day, this emperor will also buy a spaceship like this, one that travels the entire universe, the kind that travels by itself, it will definitely be very exciting..."

"It will most likely be very boring..." Leng Xing said indifferently from the side... ..

Pu Yun Chuan rolled his eyes when he heard that. This guy really liked to spoil the fun. These days of drinking fine wine, eating snacks, and looking at the star view, which part of it was boring?

He really wished that his wife was here too...

"Did you guys notice?" Emperor liver suddenly said, "This shouldn't be a major power galaxy. When we passed by, some of the planet's facilities were scattered. It's completely different from the Netherworld realm..."

"Mm..." Pu Yunchuan nodded when he heard that.

In the Netherworld realm, one could still see very spectacular projects outside the galaxy. Some used machinery or some complex large-scale alchemy arrays to connect the entire galaxy, there were also large-scale interstellar high-speed rail stations between the life planets!

And in these ordinary galaxies, there were very few exaggerated transportation hubs and mechanical frames that were bigger than planets between the life planets... ..

There were some scattered equipment on the periphery of the planet. At a glance, one could see the contrast between a large city and a small village... ..

Leng Xing seemed to be interested in this topic as he looked over. "I wonder which level of planet can have such large-scale transportation equipment? Or is it based on the overall level of the forces?"

This topic instantly piqued the interest of Pu Yunchuan and the others. After all, they were all lord-tier players. After returning, they would have to develop their own organizations. They were also very curious about the large-scale transportation equipment that could connect planets, what kind of organization could possess such large-scale transportation equipment? !

"Under normal circumstances... there has to be a level 3 Planet!"

Just as everyone was discussing, a soft and charming female voice sounded. Everyone hurriedly turned their heads to look. It was teacher Ah Li, who had arrived here some time ago.

"A Level 3 Planet?" Emperor liver asked curiously, "Teacher, a level 3 planet already has the qualifications to establish such a large-scale transportation facility? Is this a dead rule?"

Looking at the group of extremely curious titans, Ah Li found it a little funny. It was rare for students of the warrior department to be concerned about this topic. Other than the majority of warrior department students who already had this common sense... It was also because this thing had nothing to do with most students. This was a problem that the deity overlord should be concerned about...

However, a group of students wanted to know. Since they were bored, they could also have a chat.

"It's not a dead rule..." AH li smiled and said, "If the private overlord has a relatively powerful family behind him, it's not impossible for them to be willing to bear the responsibility of these public facilities. However, paying the price is expensive and meaningless..."

"What does that mean?" Cold Star asked curiously.

Ah Li said, "It's expensive to build a passage between a planet and a planet. You have to know that the distance between life planets is sometimes tens of thousands of light years. It's very exaggerated to build a fast transportation passage. Ordinary private forces can't afford it. They have to rely on the ten great lords!"

"Ten Great Lords?" These words immediately made everyone even more curious. The construction of basic transportation facilities was actually related to the ten great lords?

Ah Li laughed. "When a private sky god Lord develops to a certain extent, they have to choose a force to rely on. Otherwise, it will be very difficult for them to take the next step. And this standard is a Grade 3 Planet!"

"With a Grade 3 planet, it means that you have a certain value and potential to nurture. At this time, this deity overlord will be faced with an invitation. If you choose to rely on a certain great overlord, you will receive a generous resource subsidy. The Great Overlord will also send infrastructure experts to pave the most basic transportation facilities for your force. The first thing to ensure is that your governing star, which is the Grade 3 planet that you have just obtained, can connect to a certain major force's trading star. Whether it is shopping or selling your own products, it will save most of the transportation costs. This is something that many private forces can not refuse!"

"Oh, oh!" The group of Titan players nodded. So that was how it was!

However, having played development games before, they could understand. After all, trade was extremely important. If there was infrastructure, it would greatly promote the development of real businesses. It was a huge advantage!

“With a level 3 planet, do we have the right to choose the ten great Lord Factions?” Cold Star asked curiously.

“Yes...”. “...”. Ah Li nodded. “However, it’s divided into different star fields. If you start out in the East Star Field, at that stage, you’ll only have a few great lords in the East Star Field. Currently, the East Star Field has the most choices. There are three great lords to choose from, each with their own advantages. However, the East Star Field is very competitive, and there are many clans. The chances of a private sky god exploring a high-level planet are relatively low. They can only explore the star belt that is very far away from the center. It will be more difficult...”. “...”

“In comparison, the Northern Star Field, as a newly rising galaxy, is much friendlier in this aspect. A large number of star belts closer to the center are in the exploration stage and are very suitable for new gods to take risks. Therefore, many gods who do not have the support of a large family will also choose the Northern Star Field. However, if you choose this place, when a large force stands, you can only stand on the side of Lord Sylvanas...”. “...”. “...”

“Oh...” the Titans looked at each other and heard Ysera say that their forces were located... .. In the Northern Star Field. ...

“That northern star field sounds pretty good...” Leng Xing smiled, “It has a lot of resources and is friendly to non-noble forces. You Don’t have to hesitate to make a choice...”

Ah Li laughed, “The first two are advantages, but there are also relative disadvantages. The Northern Star Field has been ostracized by the other three star fields for a long time. Choosing this place also has its difficulties. As for the third point you mentioned, it doesn’t exist. Although the northern star field can only choose Lord Sylvanas, there are still subdivisions of forces. The ten liches, four Chaos Knights, and the three terror demon kings are all the forces’ choice points. These are the mighty figures who joined Queen XI in the death realm back then. Each of them has the strength of a great lord of the Federation!”

“Oh Oh! !” A group of Titan players suddenly curious: “Then, which one is better?”

“Each has its advantages...”. “Ah Li shook his head and smiled. “Their specialties are different. The armies of the four Chaos Knights are more powerful and can provide better protection and military training. The three Great Terror Demon Kings have occupied quite a lot of outer space, so they can get more resources from the outer space by relying on them. The ten liches are better at scientific research and can provide better civilization technology. It all depends on your choice... “... ...”

“Then how do we choose our Academy?” A group of players asked curiously.

This question immediately stumped Ali...
