

A Bunch 1621

Chapter 1621 Grandpa Lu's new strategy...

"Brothers, I think... We have to hurry..."

In the dormitory, Leng Xing looked at Pu Yunchuan and the others and started to talk about this topic with a heavy heart... ..

Pu Yunchuan and Emperor Liver looked at each other and then looked at each other in amusement. "Brother facial paralysis finally knows how to be serious? Are you afraid of being pulled too far away by the dog eggs?"

According to the information that Ah Li had just revealed, only level 10 players had the basic qualifications to enter the ancient lands. They also had to accumulate credits, so time was tight. However, it was not necessary for Pu Yunchuan and the others. At most, they would be slightly weaker in the next round of the social gathering... ..

However, Leng Xing definitely could not stand the gap...

Because in the first batch of players that came out, there were two people who were directly above level 10. One of them was naturally big boss rain girl, and the other one had two high-end bloodlines: Student Wang Gou Dan!

His level was already one level higher than Leng Xing. Now that he had entered the ancient lands one step earlier, the gap would definitely grow larger and larger in the future. On the surface, Leng Xing did not say much, but he clearly had some objections in his heart... ..

Looking coldly at the few players who were teasing him, Leng Xing chuckled. "Do you think that I'm the only one who's being pulled apart?"

Pu Yunchuan picked his nose indecently. "We don't have that kind of self-esteem. So what if Doggie is powerful? It's not like it's the first day that our base's Yin is flourishing and Yang is declining. Aren't the top few in the rankings all those girls? I'm used to it..."

"Ha... what if all the players are ahead of you? For example... Grandpa Lu?"

"How is that possible?" Pu Yunchuan looked at the other party in amusement. "You don't provoke people like that, do you? Grandpa? Are you kidding?"

Grandpa Lu's level was the lowest, and with his lazy personality, Pu Yunchuan didn't believe that the other party would be ahead of him... ..

"It seems that you haven't paid attention to our base forum for a long time..."

"Why would I Follow That Thing?" Pu Yunchuan was stunned... ..

The people gathered in the base's forum were mainly people from Planet D who had not entered Mars. Most of them were basic citizens who were still queuing up to understand the situation in the six major

cities of the base on Mars, generally, players who entered the base's forum rarely wandered around. Of course, there were some players who would update their diaries, videos, and so on to gain attention and traffic in order to share their lives in the six major cities.

However, most of them were new players. Players who had truly entered the game did not have the time to train and earn points every day. How could they have the mood to go to the forum and brag? Did you think that everyone was as free as Grandpa Lu?

"Grandpa Lu has been updating the Galactic Academy's Daily Diary and strategy recently..." Leng Xing said faintly.

"Eh?" The few players were stunned and speechless. This guy was still so free outside? They had been trained like dogs in Xandar. They did not even have enough time to rest, yet grandpa could still update the strategy?

It should be known that the network of the UNICOM base could not use the infinite network. For safety reasons, the undisclosed deity galaxy was only connected to the federal public network, and it was an exclusive channel. No one else could enter.

However, to connect to the public network, one had to go to the federal public network communication station. There were usually a few of them on a planet, but they were rarely set up in universities, because universities were usually located in the suburbs of the city... ..

In other words, if Grandpa Lu wanted to update his strategy, he would have to go outside the school every day, sit in a city's high-speed magnetic levitation, and go to the center of the city to find a communication base to update his strategy. A high-grade planet was usually hundreds or even thousands of times the size of a D sphere. No matter how developed the transportation was, it would still take half a day to travel... ..

This guy actually had the time to spend an entire day just to go to the center of the city to upload his strategy?

At the thought of this, Pu Yunchuan and the others suddenly felt a little envious. Why did this guy always have such a good life wherever he went?

"What's The Big Deal?" Emperor Liver asked curiously, "That guy has always liked to show off his presence. It's normal for him to be willing to brag about his experiences in school. But Old Leng, you actually went to see this..."

"Of course I went to see it..." . . "the cold star said lightly, "At least we can observe the difference between other colleges and our colleges? Grandpa's School is ranked in the top 30, far higher than our school, not to mention a few other top 10 players, I certainly want to see the difference... ."

"Uh..." the words out of a few Titan players suddenly stunned, this... .. They were... .. It seemed like they had never thought of this...

"So... you often go out for nothing, just to Download Grandpa Lu's Guide?" Pu Yunchuan asked in a daze.

Cold star: "Yes..."

“Uh...”the players were stunned. If Grandpa Lu knew that Cold Star was his loyal reader, what would his expression be like?

“Don’t you guys want to see it?”

The players immediately shook their heads. “What am I looking at that for?”

“Don’t you want to see what kind of conditions that guy has at Spark? Don’t you want to see how his school in the ancient lands is different from ours?”

“ER... .”Everybody is a Leng again, after a few seconds of silence, the final decision by the liver emperor: “Look! !”

Leng Xing smiled and opened the download of Grandpa Lu’s guide...

[hello, dear viewers. I have worked hard to educate you about the flourishing interstellar life outside. Today, I will talk about the greatest benefit of the top 100 universities: the question of the ancient land!]

Player A: Big Brother Hard, the stool melon seeds have been placed, please Big Brother began to show off!

Player B: Big Brother, when is the college entrance examination guide coming out. I really want to know the details, even though I’m now:. ... I can’t even go to the new world, but as one of the outstanding new players in Huaxia City, I still have a lot of prospects for the future... ..

Player 3: That’s right, Big Bro, don’t skip the update...

However, the comments of the players were quickly answered...

[many players may ask why I skipped the college entrance exam guide and UPDATED THE COLLEGE ENTRANCE exam guide directly. I have also considered this point. Firstly, the details of the college entrance exam are still being processed in detail, so I’m not in a hurry to update the information. Secondly, I’m currently in the college, so updating the college entrance exam guide is more practical and more accurate. Lastly, it’s a question of outlook. My grandfather thought that only by teaching the players about the benefits of the college entrance exam would everyone be motivated and actively prepare for the exam!]

[today’s topic is the welfare of the top 100 universities in the ancient lands. It is also the information that Grandpa Lu recently obtained. This information is directly related to the growth rate of the players, and even the ceiling of their future strength. If a player wants to become a big shot in the universe, he must not miss it. After knowing the information about the ancient lands, Grandpa Lu understood the importance of the academy’s ranking even more!]

[the higher the ranking of the academy, apart from the different resources and teachers, the quality of the land and the number of slots in the ancient lands are also completely different from the lower ranked academies. There are more opportunities and more opportunities. Today, Grandpa Lu will use Spark Academy as an example to give everyone a tour of the ancient lands!]

Chapter 1622: Grandpa's honest truth...

[first, let's explain what the ancient lands is. Everyone can just imagine it as an advanced dungeon. There are good leveling experience, good equipment, and good skills that can be found there. It's an advanced dungeon that almost all the people in the Universe Federation want to enter. After leaving the Academy, you will only have a chance to enter when you reach the star level (very big boss level) . Moreover, it all depends on your connections and how you are doing. Therefore, it's very, very rare to be able to enter that dungeon when you're still a student. If you don't have the chance to enter even when you're still a student, then you might not have a chance in your entire life after leaving the academy...].

[this isn't just me being alarmist, there are real data. The data comes from the Federal Bureau of Statistics. The most professional statisticians in the entire federation have conducted a comprehensive analysis of the data of nearly a million eras. Those students who have not entered the ancient lands will become star-level powerhouses in the future. Counting the millions of eras, only six people have fallen... ∴ The entire universe, millions of eras, this number, think about it yourself, could it be one of them

[so entering the top 100 universities is definitely a necessary option to get ahead. Players must build a solid foundation and strive to get a recommendation in the base, otherwise, they might not be able to get ahead in this lifetime...]

Player A: damn, there's such a thing. Thank you for your explanation, then the academy in our base doesn't seem to be the top 100 universities, right. Is It... .. Is it the end of your life?

Player B: Yes, Yes... I really want to know this question as well. After all, the instructors in the base seem to like accepting closed-door disciples. ... ? ... could it be that they are bound?

In less than 15 minutes, there were over 10,000 comments on this topic. All of them were questions from Huaxia City players. Apparently, the moment Grandpa Lu's post appeared, the players who were originally not interested in the forum were also attracted by it. It could be seen that his position as the top player in the game was still there...

Seeing this phenomenon, Grandpa Lu was immediately very satisfied. After coming to spark academy, the learning tasks were extremely heavy, and he rarely had time to relax. However, in a new and unfamiliar environment, Grandpa Lu was actually not so easy to fit in. Therefore, he began to do his old job in his rare leisure time. He went to the city center to surf the Internet and continued to update his posts... ..

Fortunately, even though he had left for such a long time, his influence was still there. As soon as he went online, there were so many onlookers... ..

At the thought of this, Grandpa Lu felt a sense of accomplishment. Therefore, in the face of the worries and doubts of the players, he immediately posted his thoughts on the forum...

[don't worry about this. After studying the curriculum of the universities, this grandpa is clear that the education that is now popularized is only the basic curriculum. It is equivalent to sending the players to

primary and secondary schools. Although the system of universities is still maintained, this grandpa feels that the universities should be mainly focused on the key primary and secondary schools. Then, they should supplement the number of university students and try their best to break into the top 100 universities. Because I have checked, the overall ranking of the universities is beyond the top 1,000. It will take a very long time to break into the top 100.]

[so, most of the students that will be recruited will be students who are unable to be recommended for the national examination. To put it bluntly, they are players who have been eliminated. Therefore, everyone can rest assured and accept the guidance of the university instructors. It is beneficial to learn more things under their hands. Only when you have a solid foundation will you have the chance to participate in the national examination...]. [...]. [...]

Player A: I see. No wonder I said that the instructors are not enough to recruit students from our Huaxia City. They are also recruiting students from the five major cities. It turns out that they want to increase the number of students who have not entered the national examination...].

Player B: Oh, the A3 players finally don't have to worry about not accepting them from the academy in the future!

Player C: TCH, the A3 players claim to be the most outstanding players. The academy might not even dare to accept them. They will be the masters of the universe in the future!

[cough, let's get back to the main topic. Previously, it was mentioned that the top 100 universities all have plots of ancient lands. However, every academy's plot of land is different. The choice of plot of land is based on the interstellar fellowship that happens once every ten years. The higher the score, the higher the choice. In other words, the higher the ranking of the university, the better the quality of the ancient land under their hands, and the more choices they have!]

[take Spark College, where I am from, for example. There are four best plots in Spark College: the ancient land of four elements, the Everglades, the forest of consonance, and the white star Plains!]

[these four sites have their own advantages. The ancient land of elements is rich in high-quality elemental crystals. There are also many ancient elemental bodies, as well as the runic imprints of the ancient elemental civilization. It is a place that shapeshifting mages would very much like to visit. The Everglades is the birthplace of the ancient world tree variant, the water vine. There are many excellent ancient magical plants and many high-quality amber preserved bodies. It is a paradise for magical plant mages. If you are lucky, you might be able to directly obtain the ancient source magical plant species here. This is equivalent to a newbie obtaining the dragon slaying saber and going straight to heaven!]

[the land of consonance is even more amazing. I heard that the rain of Tranquility Falls there at any time. It is the origin of the birth of the consonance body of our ancient wood elves. Here, we can enjoy the bath of the high-level rain of tranquility every day. It is a paradise for warrior-type players to cultivate!]! [and there are also a large number of high-quality daemons bred here. There are also many high-quality special crystals. It is also a land that elementalists and Beastmaster students yearn for very much.]

Finally, there is the land of white dawn. It is said that the land of white dawn is rich in fire wood. It is the place where the first White Dawn Phoenix was born. It is very likely that there is the inheritance of an

ancient Phoenix. It is a place that Grandpa will definitely fight for this year. Fortunately, Phoenixes are considered rare. There are not many phoenixes in Starfire Academy. Grandpa's competitiveness is not that great. I reckon that I will be able to enter smoothly... [...]

[of course, there are definitely more ancient plots of land in the entire spark academy that have been taken down over countless eras. However, these are the best ones, and also the ones that reflect the foundation of the academy. It is said that after the end of each era, the academy will continue to preserve them at all costs. After all, they have already spent so much effort on researching the plots of land, so there are very few cases of them being snatched away by other universities.]

[this is also the reason why I recommend everyone to try their best to go to the higher ranked colleges. The higher ranked the college is, the more high-quality land there will be. For example, the ancient Forest of Star Sky College and the divine refining city of bronze college are both the most advanced and top-notch colleges. After entering these colleges, even if you don't manage to get a spot for these top-notch land, the quality of the second-grade land in the hands of the colleges will not be inferior to the signature land of the lower ranked colleges.]

[take cold star and the others in Xandar Academy as an example. Their Academy's front piece of land is the Earth Cold Pool. However, the evaluation and ranking of their land is about the same as white Li Land, which is ranked the lowest out of the four plots of land in our academy. However, the competition for the best plots of land in their academy is naturally intense. Xandar Academy has been in the Academy for a hundred years and has accumulated close to ten million students. All of them want to compete for that spot. It is said that there are hundreds of thousands of senior and senior sisters who are qualified for academic credits, and it is said that there are only a hundred spots. It is hard to imagine how hard it is for cold star and the others to compete for that spot!]

[but our academy is different. There are many plots of land, and there are many directions for teachers to allocate. My opponent is only a few hundred, and this is the difference. My grandfather will definitely be able to enter the ancient lands, but cold star and the others might not be able to make it in time for this issue. As I said before, the ancient lands are rich in resources, and there are all kinds of opportunities. It's equivalent to a high-quality dungeon. The earlier you start a dungeon, the earlier you take the lead. Anyone who has played the game knows this principle. Many plots of land take five years to set a quota, and once every five years, the distance will be greater than you think. Therefore, my grandfather once again reminds everyone that it's very important to enter a higher ranked academy. You must lay a solid foundation before accumulating points!]

Player A: I see...

Player B: Thank You, Big Shot...

Player C: Big Brother, when will you update the ranking of the college?

Next tens of thousands of players message Pu Yunchuan gang is not in the mood to see, all their thoughts are fixed on the last sentence of Grandpa: five years a delay, be pulled apart the distance is bigger than you think!

Chapter 1623: Alert!

“Grandpa... why is his luck so good every time?”

Pu Yunchuan collapsed on the sofa with a helpless expression and was a little speechless...

He didn't think about it before. After all, he and soap had already become the mascots of the base. However, after that, they followed his group to the new world to mingle around. In an instant, they had become existences that could participate in the unified examination with them...

Perhaps you wanted to say that wasn't everyone the same?

Same my ass. When they were in the base, Pu Yunchuan and the others had put in a lot of effort every day to train and earn points. Only then did they become the existence of a top group of players. Back then, the first group of players numbered over a thousand, in the end, there were only a few top players. Could it be that they had relied on luck?

They were all relying on their own hard work behind the scenes that no one knew about... ..

But what had grandpa been doing these past few years. Eating and sleeping... .. After sleeping and eating, he even wrote some strategies in the beginning, but after that, he simply stopped writing strategies and just lay there sleeping. In the end, he was directly on the same level as them. Anyone would feel a little uncomfortable... ..

This was even more exaggerated than little cabbages. Although little cabbages seemed to sleep like pigs every day, they were actually spending huge amounts of spiritual energy to cultivate elemental elf bodies at all times. It was just that their talent was too high. Even when they slept, they could work automatically. They were considered high-level talents... ..

Grandpa this... He was completely lying down and eating benefits, without the slightest bit of effort... ..

It was the same this time. After entering the Spark Academy, the academy only recruited Phoenixes from the white Li Planet. Unfortunately, there were very few phoenixes. Grandpa might not even need to do much, and he could be booked directly...

At the thought of this, Pu Yunchuan and the liver emperor felt their hearts ache.

Seeing the two of them like this, Leng Xing decided to add fuel to the fire. “You only saw Grandpa, but you didn't see the situation behind...”

“What situation behind?” Pu Yunchuan and Emperor Liver said in unison.

“It's the next batch of players!” Leng Xing said in a low voice, “Think about it carefully. The exam is held once every ten years, and the fellowship is also ten years later. According to what instructor Ah Li said just now, we can only enter the earth frost pool for less than three years before we are forced to participate in the fellowship. What will be the consequences if we don't get the ideal result?”

“What consequences?” Pu Yunchuan and the few Titan players behind him asked in shock.

Leng Xing said faintly, "Xandar Academy is ranked 98th this year. It is almost at the back of the cart. It is very likely that it will be directly pulled out of the top 100. I have checked the rules of the Federation. Once the top 100 universities are eliminated, there will be no chance to continue fighting for the ancient lands. In other words, if Xandar Academy falls out of the top 100, no matter how hard we work in the future, the land of the freezing Earth Lake will be our greatest benefit in the future!" "!"

"Think about it, the academic year of university education is basically more than a hundred years. However, the exam is held once every ten years. With the help of the entire academy, the next batch of players who can participate in the exam in ten years will have at least a thousand players. Do you believe that?" Once these thousand players join the exam and choose a higher-level academy, it is very likely that they will be able to obtain the qualifications of the university's signature ancient land, just like what Grandpa said. Then, they will train in a higher-level place for ten years. Putting aside the special opportunities and problems in the ancient land, just the high-quality environment alone will allow them to train much faster than the outside world. Do you think that within ten years, the second batch of players will be able to surpass us?"

All the Titans:"..."

Leng Xing's words were like a bucket of cold water pouring on their heads. That's right, the intensity of the students of the same generation around them these few days made them feel like they were slacking off, because even if they were some noblemen who had been bragged about so much... In their eyes, it seemed like that was how it felt... ..

This caused the emperor of the liver and Pu Yunchuan's group to feel a little slack in their hearts, but they seemed to have forgotten that they were not the only D ball players...

Behind them, there were billions of compatriots! ! !

Pu Yunchuan and the emperor of the liver were just losers who did not do well in D ball. Why were they able to rise to the top now? Was it because of their qualities and abilities?

No, it was because of luck. It was because they had come into contact with seer earlier than many of their outstanding compatriots, and they had started running earlier... ..

Even though Pu Yunchuan and his group were working very hard at the back, and they were among the top players at the same time, it didn't mean that they could always lead.

This point could be deduced from the fact that Feng Doudou was able to catch up from behind. His outstanding compatriots could catch up to this short gap in time!

Now, being one step ahead of them in the Universe Federation was a huge advantage. This advantage came from their first wave of adventures in the New Territories, and they were lucky enough to receive another wave of benefits, which allowed them to pull apart their levels. Being one step ahead of the universe federation... . .

But could such an advantage be maintained for a lifetime?

Just like what Leng Xing had said, they were actually only ten years ahead!

Ten years later, during the next national examination, the base would gather a group of outstanding players to enter the Federation system. The outstanding ones would immediately have the same platform as themselves, or even higher.

Not to mention that their current conditions were actually not very good!

Just as Leng Xing had said, if Xandar fell into the top 100, they would be in an extremely passive position in the future. Right now, they were only competing for the position of a member of the Federation. They still had a chance to increase Xandar's ranking. However, ten years later..., the ones competing with them would be D ball players with the same qualifications as them!

As time passed, more and more players entered. What right did they have to think that they could help Xandar return to the top 100? Especially after the other players had the advantage of the ancient lands in the university, their leveling speed would definitely be faster than theirs. The longer they dragged on, the harder it would be for them to recover from the disadvantage. This would cause them to fall into a cycle of disadvantage! What Leng Xing said about being surpassed by groups of players was definitely not an exaggeration!

Pu Yunchuan and the others sucked in a breath of cold air at the thought of this. They sat up straight, and there was no longer any frivolity on their faces. They hurriedly asked, "Then what should we do?"

"Catch up with this wave!" ! Leng Xing said resolutely, "As instructor Ah Li wishes, we will be included in the list of the underground cold pond two years from now. We must eat all the benefits of the best land in Xandar for the next five years and try our best to increase our strength. Only then can we strive for a higher ranking for Xandar in the Fellowship!"

"According to the rules, the higher the ranking of the Fellowship, the more priority the right to choose the land will have. We are not only ranking for the academy, but also for ourselves. If Xandar can get a better ranking in this fellowship, he will be able to choose a better land. As the students who have contributed the most, we will definitely be able to enter the new land first. If we can get an advanced land, then we will be in the lead for the next ten years. Even if the later batch of players enter the Advanced Academy, they will still need time to advance to level 10 first. There will also be time to earn points and other delays. We can seize the time and lead another wave..." "..."

After saying this, he paused and said, "And in the next social gathering, without the crown prince, we will have a greater chance to get a higher ranking for Xandar and get a better plot of land. At the same time, we will also have a better plot of land. Only in this virtuous circle can we continue to lead..." "..."

"Old Leng is right!" Emperor liver slapped his thigh and nodded in agreement. As the most capable player in the base, he had seen many players slowly surpass him. He knew very well that Leng Xing was right, they... ... They were not the most outstanding among the D Ball Players... ..

Therefore, if they wanted to stay ahead, they had to firmly grasp the opportunity in their hands!

Chapter 1624:10-year advance bets... ..

This year's year of the crown prince was destined to be extraordinary. The five great royal families were all trying to build momentum. They were all announcing to the outside world that this year's crown

prince was the strongest in history, causing many people to feel that this year's gathering would be very lively.

Even though there were still more than 10 years before the gathering, the bets had already been started a long time ago. The galactic gathering was the highest quality competition for the younger generation, so naturally, it attracted a lot of bets, especially in the year of the crown prince...

The federation couldn't help but place bets, because there were no shady deals like the Interstellar Alliance. It was related to the ranking of the academies and the resources of the ancient lands. No power could make the top 100 universities secretly go easy on them, it was also a rare fair bet for the Federation.

The bets were open to the entire universe federation. As long as it wasn't a very remote power, there would basically be large-scale fund groups opening their bets. On a top-tier planet like Teldar Hill, there was naturally no lack of teams opening their bets, and this place was even more prosperous, Teldar Hill was the most expensive planet in the Eastern Star Field. Those who could live here were all nobles with a certain amount of assets. There were many people who could afford to gamble, and the opening of the market was also very profitable.

Almost as soon as the news of the alliance between the Five Great Royal Families was released, there were already no less than ten opening markets on the planet. They were all financial groups from all over the world. These financial groups had different origins, and their winning and losing rates were also different, however, they had one thing in common: they were absolutely qualified!

Those who could afford to do this business were all the big funds of the Federation. They had the support of countless companies, noble families, and even banks that praised the galaxy. Otherwise, they would not be able to take on the trading opening of Teldar Hill.

After all, this business was not a one-way bet. If it was not handled properly, there was a high possibility that it would suffer a huge loss. After all, the bet was on the ranking of the school. Sometimes, a dark horse could turn the entire situation around, this caused the originally planned profit plan to be ruined in an instant. In history, there were countless bets that went bankrupt because of this. If one wanted to take over Teldar Hill's Plate, one would not be able to get in without a certain power backing them!

For example, Galaxy Bole, which was currently open directly outside of the Starry Sky Academy, was a well-known chain market of the Universe Federation. The financial power behind it was strong, and it could be seen on almost all the super stars in the four galaxies. It was said that the two major interstellar banks, the Federation Construction Bank and Starry Sky Bank, stood behind it. There were also many top aristocratic families that had invested in it, and it had survived for millions of eras... ..

Such a reliable market naturally attracted a lot of people. After it opened, it could be said that there was a sea of people. Many familiar faces from the upper echelons of the starry sky elves appeared on the opening day.

And at this time... .. Among the lively crowd, two juniors wearing school badges attracted the attention of many people... ..

Although the auction was open outside the academy, very few students would come in for a stroll. The high-class nobles naturally did not wish for juniors to join in the fun of gambling while they were still in the learning stage. And although the foreign students were not under the control of their elders, most of them did not have the funds... ..

Most importantly... .. It was very rare to see the Thunder clan being able to enter the Starry Sky Academy. The other party even carried the school emblem of the Magical Beast Academy...

“Cabbages...” along the way, facing many scrutinizing gazes, the introverted Chen Ye was even more unaccustomed to it. Lowering his head, he said in a low voice, “The classes will start in the afternoon. What are we doing here?”

“Getting to know each other...” little cabbages chuckled and said, “We’ve been having a hard time recently. It’s rare for us to have such a good way to earn money. Of course, we have to come and join in the fun...”

Chen Ye rolled his eyes. “Who told you that this is a way to earn money?”

“Alice said so!”

“Who is Alice?”

“That’s not important!” Little cabbages said seriously, “What’s important is that I’m going to finish all the points in your card. If this goes on, don’t talk about the slots in the ancient lands. Just your daily life will become a problem!”

Chen Ye: “...”

So... you knew about it too?

But... was the solution a gamble?

Not only did Chen Ye cover her head, she kept feeling that if this guy didn’t have someone to support her, he would starve to death on the streets sooner or later... ..

“Hey, there’s an information desk over there! !” Bai Cai’s eyes lit up, and she dragged Chen Ye, who had yet to react, over.

“Hello, Beautiful Elf lady, how can I Help You?”

Standing on the information desk was a charming white Fox clan from Vasteria. They immediately ignored Chen Ye, who was behind Bai Cai. Any old man who worked here knew that in a place like Teldrassil., those who could afford to pay were elves, especially elves of pure blood like him.

As for those foreign children, they were rarely forthright...

“Well, can I ask how to place a bet here?” Little cabbage asked excitedly.

It was Alice’s idea to come to the gambling den to get information. Little cabbage was very interested in this kind of mission. In the past, when she was on D ball, she could only watch such a large-scale casino on TV. After all, in Da Hua., an existence that could be reported even if the four of them played mahjong. Large-scale casinos were only available on the legendary island of Australia. However, a doctor

like her, who was still in her internship, was definitely a poor person. She did not even dare to order two meat dishes and one vegetable dish while eating fast food, how could she afford to go to the island of Australia?

Now that she heard that there was a large-scale event at the national level here, she naturally had to come and take a look...

White Fox, who was at the information desk, was not surprised by the newbie's question. After all, there were quite a number of young nobles who sneaked out to try new things every year. As the information desk, she already had the business introduction rules for placing bets.

Therefore, with a gentle smile, she softly explained the rules... ..

"The rules for placing bets in the galactic fellowship party are very simple. There are only two directions for placing bets. One is the school ranking, and the other is the individual ranking. The odds of placing bets are different from each other. The specific odds can be seen on the screen in the hall. As time passes, the odds will fluctuate. However, if you have already placed your bets, then your odds will remain unchanged!"

"Eh?" Little cabbage was suddenly curious. "Why would there be a change?"

"Because the information is unclear..." "..." "..." Miss White Fox explained with a smile, "The interstellar fellowship will begin in ten years, especially in this year's year of the Crown Prince. A large number of royal descendants have yet to come out from the ancient lands, so there is almost no information about them. Data analysis is based on guesses based on the strength of the academy in the past and the basic information that the royal descendants have revealed. It is very unstable, so the odds will be the highest at this time, but it is full of instability..." "..." "..."

"Oh..." little bai cai nodded her head with a dumbfounded look on her face and said, "Oh..." "..." Those who were actually familiar with her knew that she didn't understand at all...

Chen Ye couldn't help but roll his eyes when he saw this...

As someone who was more familiar with the situation of the Federation Academy, he understood what the other party was talking about... ..

Currently, all the guesses about the strength of the academy or individuals came from the results of the previous year's fellowship. However, this year was the year of the crown prince. The addition of the royal family members made the overall data analysis board very unstable, because everyone knew that..., after coming out from the ancient lands, the strength of the royal family was vastly different from before!

Some of those who had not performed well before might have been reborn as dark horses after coming out. There were even examples of them surpassing the crown prince. This was also the reason why the year of the Crown Prince was the most lively. This was because the variables this year were the biggest, it was also the most interesting. Many professional analysts would be overturned this year!

After all, gambling was just a game of unknown and exciting. If everything went according to plan and the expected results never changed, then it wouldn't be very interesting, right?

However, Chen Ye was very curious. He knew that the instructor was very strict with cabbage. In order to prevent her from using her points recklessly, he had locked her points directly. Moreover, cabbage itself was poor. Without her points, she could exchange them for cash outside, where did she get the money to place bets?

Chapter 1625: Betting Rules...

Under the guidance of the White Fox lady who was in charge of consulting, Bai Cai and Chen Ye quickly found the betting screen...

On it was the most popular candidate information...

Chen Ye raised his head and looked over. There were many familiar faces on it. They were all famous figures of the younger generation that he had heard of before participating in the national examination. After all, the fellowship was broadcasted across the entire federation, and the ratings for this kind of martial arts competition were high, even many children who did not study could learn about these figures through the competition. Chen Ye was naturally no exception.

The large screen displayed all the popular candidates. Everyone could use the small screen that was activated by the AI in the hall to browse through the slots at the back.

Chen Ye looked over and saw that most of them were those who were ranked at the top of the previous batch. For example, the XENOGENEIC from the Tyree Fassion Academy, Demon Star. As the biggest dark horse last year, after graduating from the previous batch's champion this year.., as the runner-up from the previous batch, he had quite a good approval rating. After all, as a new student back then, he had almost toppled the five-time champion. His talent was astonishing.., this year, he had cultivated in the ancient lands within the Tyree Fassion Academy for ten years. His strength was probably not inferior to the previous batch's champion.

Seeing Chen Ye and Bai Cai looking at demon star.., white Fox smiled as she introduced, "Student Demon Star is one of Tyree Fassen's ACE players this year. The number of people who have chosen to place their bets on him has already reached over ten billion. His pool of funds has already accumulated to 40,000 trillion federation coins. According to our intelligence, the last time he made a move was in the Eastern Star Region, Nomorrigan. The opponent was the Bronze Academy's last year's ace player, Negan. "Black Hammer, the victor was determined in just 30 moves. Moreover, his life level is estimated to be at level 15. According to the analyst's assessment, if he stays in the ancient lands for another 10 years, it is very likely that he will step into the dragon-level. He is one of the few monsters who can challenge the royal family's Disciples!"

"Hiss..." Chen Ye not only gasped when he heard this. He had only entered the academy for 20 years, and he was already level 15? Even with the ancient lands' blessing, wasn't this a little too exaggerated? One had to know that many people were only around level ten after graduation, and they were considered quite outstanding. was this the difference between a genius and a mortal?

Little Bai cai asked curiously, "Isn't this the betting ranking? What does it mean that so many people are betting on him? Are they betting on him to win the championship?"

“That’s not it...”white fox smiled and said, “This year is the year of the Crown Prince after all. It’s naturally impossible for anyone other than a member of the royal family to win the championship. Although there’s a lot of money to bet on him, the betting methods are different...”

“Eh?”Bai Cai was stunned. “Isn’t it just betting on the ranking? What’s the difference?”

“Betting on the ranking is the most basic betting method...”. White fox smiled and said, “Every year, there are a large number of evaluators who do their analysis. There are many times when the individual ranking does not have much of a difference. Unless you bet on a precise ranking, which is a fixed number of the opponent, the odds are not high and it is difficult for people to enjoy themselves. Therefore, such a popular player will usually give rise to many different ways of betting

“Oh?”Bai Cai became more and more interested when he heard that. “Tell me...”

White Fox said, “First of all, it’s the simplest betting method to predict his ranking. Based on the information available, the more accurate the prediction is, the higher the odds will be. For example, if the prediction is for him to be in the 30th to 50th place, the odds are currently 3 to 1. If the prediction is for him to be in the 30th to 20th place, the odds are 4.5 to 1. If the prediction is within the range of five, the odds will usually double. If the prediction is accurate, it’s to accurately determine his exact ranking. The odds will be quite high!”

Bai Cai asked, “How High is it?”

White Fox said, “The exact number will be determined based on the ranking you choose. Currently, the most popular claim is 35th place. The odds have already reached 11 to 1, which is considered a very high odds. There are also some who bet against him. I estimate that he will be able to defeat a portion of the royal family’s disciples and enter the top 20. Demonic star is in the top 20, so the exact odds are all in the 100 to 1 odds...”. “...”. “...”

Bai Cai’s eyes lit up when he heard that. “Then does that mean that the higher the odds go, the higher the odds will be?”

White Fox was taken aback, then, she nodded. “There is such a saying, but the highest opening bid on demon star right now is 20th place, and the odds are 100 to 1, which is already very exaggerated. If we go any further, almost no one would dare to buy, so there will be no opening bid...”

“So... you can’t go any higher?”

“Not really... .”the White Fox shook her head. “If someone is willing to buy, they will also open a new bid. According to the rules of the new bid, if the capital exceeds 100 million, they can open a new bid. However, there are currently no buyers in this area. Demonic Star’s strength is acknowledged, but it is the year of the Crown Prince after all. The top 20 is already a very risky new bid. There aren’t many funds in reserve. If you go any further... “...”. No one was that stupid. Unless there was new information that proved that he had the ability, perhaps there would be a new offer... “...”. “...”

“Oh?”Bai Cai asked curiously, “You can buy it later when there is more information? Then why not buy it after the information is confirmed? After all, it has been ten years. Isn’t it too uncertain to buy it now?”

White Fox said with a smile, “That’s the effect I want. If you buy it now, the shares you buy in the next ten years will increase or decrease in value according to the changes in the information. Take Fiend Star

for example. Everyone now estimates that his ranking is between thirty-five and fifty, and the number of people who buy this ranking is also the highest. If the intelligence officers produce new information in a few years, it proves that his ranking may change. For example, if his strength has improved by leaps and bounds and he shows signs of entering the top twenty, the shares that were previously bought between thirty-five and fifty will decrease in value, and many people can sell them off. As for those who bought twenty places before, their shares will increase in value because the odds they bet on will not change because of the information

“Then he can choose to continue to hold it, or lower the price a little, cash out and leave...”

“What the...” Bai Cai was stunned. “Aren’t these stocks?”

“Yes... This is indeed based on the stock system...” white fox smiled.

“The planner is really a genius!” Bai Cai chuckled and asked, “You just said that the buying ranking is the simplest way to place bets. What else is there?”

White Fox said, “There are many other ways. The most mature way is to bet directly. You have to buy it early. For example, demonic star’s current estimated ranking is thirty-five. Many people believe in his future, so they start from thirty-five and bet up. For every ranking they go up, they have to bet ten times the odds, and for every ranking that goes down, they have to bet ten times the odds. And so on. This is a relatively big way to play. Of course, you can set a maximum limit. For example, you can lose three or five places at most, and then you won’t continue to lose. But at the same time, if you have a limit in the declining ranking, your rising profits will also be limited. For example, if you lose three places, you won’t lose. Similarly, if you rise three or more places, you won’t gain any extra profits!”

“Wow...” Bok choy rubbed his hands and said with an eager expression, “It’s rich...”

Chen Ye:” ...”

Chapter 1626: I heard that there was a very mysterious examinee... ..

Chen Ye didn’t understand. What was that Guy Bok choy up to when he looked so excited? Didn’t he hear what he said? 100 million to start a new game? The betting odds were even 10 times higher. Could these two poor people afford to play such a game?

He really wanted to remind Bok choy about this, but seeing how excited the other party was, he didn’t lose her face in the end. Since he didn’t have any money, he didn’t have to worry that she would squander it on gambling... ..

Eh... .. Thinking about it, he suddenly felt that being poor had its benefits... At least he did not have to worry about this guy squandering because he had no home to Squander. ...

While Chen Ye comforted himself like this, Bai Cai was still excitedly asking about other details... ..

“Do you guys usually say that the information will definitely be released to the public?”

“That might not be the case...”. White fox smiled and said, “There will be specialized intelligence personnel stationed in the various colleges to listen to the timely information of the hot candidates. However, this thing is not necessarily accurate because sometimes when it involves students, they will

hide their strength. There will also be families that will help their children broadcast the news and so on
“...”. “...”

“Moreover, our intelligence personnel only target the hot candidates. For some of the less popular candidates, you will have to spend money to find specialized intelligence personnel to listen to them. This is also the reason why many people with lower rankings also have a lot of openings. This is because when the information is bad, it will give many people a big wave of opportunities...”. “...”

“Oh... there’s such a profession! !” Bai Cai’s eyes lit up. “Does this profession earn money?”

Bai Hu narrowed her eyes slightly. This kind of internal personnel of the Academy was a very good intelligence officer. If they could develop and provide valuable information for the insiders, the people who introduced them would receive a lot of commission... ..

Thinking of this, Bai Hu became even more enthusiastic. “If we can provide reliable information, and the source of the information is accurate, and it is also first-hand information, we will give a very substantial reward, especially for the popular candidates. If we can provide them with the latest strength, we will give them a fair price according to the value of the information!”

“A fair price...” Bai Cai tilted his head. “Is it really fair?”

“Don’t worry about that!” White Fox quickly said, “Our galaxy gaming is a famous market and has a very good reputation. You can ask around about this. In terms of intelligence, the price we offer is absolutely the most fair!”

“Oh...” Bai Cai nodded.

“And once we are confirmed to be our intelligence personnel, we will also have a decent base salary!”

“There is a base salary? ?” Bai Cai’s eyes immediately lit up. “It is indeed a big market. How much is the base salary?”

Chen Ye:” ...”

“The specific amount of the base salary will be evaluated according to your value. May I ask... which college are you a student of?” White Fox asked in a low voice.

“Beast College!” Bai Cai answered honestly.

“Beast College?”

White Fox frowned slightly. It was not easy to arrange an intelligence officer for Starry Sky College. After all, most of the students who could get into the college were from noble families. Very few people would engage in intelligence business. Although there were a few non-noble students.., however, most of them were unable to integrate into the circle of noble children, and very few could obtain reliable information.

The child in front of them was obviously an elf with a high purity bloodline, and most of them were from wealthy families. It was very rare for such a child to be willing to be an intelligence officer, but the other party was from the Magical Beast Academy... ..

The Starry Sky Academy was a large market, and there were many popular candidates produced every year, but there were very few from the magical Beast Academy... ..

After thinking for a while, the white fox said honestly, "The Starry Sky Magical Beast Academy doesn't seem to have any popular candidates this year... are you familiar with the people from other academies? For example, the Divine Guard Academy's Lan Feng, her information has been relatively valuable recently..."

"Uh... I don't know..." Bai Cai also shook his head honestly. ...

"Is that so..." a hint of disappointment flashed in the White Fox's eyes, therefore, she said lightly, "Our star Ocean Gaming Club only collects information about popular candidates. We don't have much interest in information about low-ranked players. You might not be suitable for our job as an intelligence officer..."

"Hot candidate? Why is there no one?" Bai Cai immediately pointed at the big screen. "I saw one just now!"

White Fox was stunned when she heard that. She looked over and immediately reacted when she saw the name Bai Cai pointed at. Oh, damn it, how could she have forgotten that person! !

Helan Nana, the strongest magical beast genius of the Night Demon Helan family. It was rumored that she came to the starry sky academy this time to find Kyle back then. The humiliation muzir had left behind in the academy was a talent that did not lose out to the Royal Family!

Especially the night butterfly in her hands. As a student, with such a dangerous magical beast that only a dragon rank magical beast master would dare to touch, her combat strength evaluation was extraordinary. She was afraid that it would break the assumption that magical beast masters were weak in the early stages... ..

According to reliable sources, on the day of the examination, that girl from the Helan family had almost crippled all the students in the examination hall with just this night butterfly. It was extremely terrifying, but later on, it was said that a mysterious student.., who had stopped that night butterfly!

This news was sealed by the Magical Beast Academy, causing the outside world to not know who the mysterious student who could stop night butterfly was... ..

Just this piece of information alone was worth over a hundred million federation coins!

Not to mention that the magical beast master who had the image of a dark horse like he lan Na indeed had the value of observing information!

At the thought of this, the White Fox's attitude immediately changed and became much more enthusiastic. "You have information on Helan Nana? May I ask what is your relationship with her?"

"Classmate..." Bai Cai said honestly.

Wasn't this nonsense?

The White Fox's face twitched, but she still said patiently, "What I mean is, can you get in touch with her in your daily life? After all, there are quite a number of students in the Magical Beast Academy..."

"I think so..." Bai Cai tilted her head and said, "After all, we are classmates..."

"Classmates?" The White Fox's eyes lit up. "You are a student of the special class of the Magical Beast College?"

"Our class is called Class A..."

"Yes, yes, yes! !" The White Fox's smile became brighter and brighter. "Class A, I should have thought that a pure-blooded elf like you should naturally be a student of class A. I was rude before, May I Ask Your Name?"

"Little cabbage, moon god..." after hesitating for a moment, little cabbage still said his name. This place probably wouldn't do that. ... ? ... Go to his mother and tell on him, right?

Little Cabbage?

The White Fox was stunned. What kind of name was that?

However, after being stunned for a moment, he focused his attention on the other party's surname. The moon god Clan was a large clan of Astral Beasts. With the other party's background, it was very normal for him to be able to enter class a., however, how come she had never heard of such a person from the Moon God clan's descendants?

These large clans usually had intelligence departments that collected relevant information. Little cabbage... ? ... was there such a person?

"Oh right..." white fox finally suppressed the doubts in her heart and asked the question that she was most concerned about. "Previously, I heard that Helan Nana activated the shadow domain on the day of the exam and almost crippled all the students that were taking the exam, right?"

Little cabbage: "Yes..." "I heard that a very mysterious examinee stopped her at that time. Do you know who it was?"

Little Cabbage: "..."

Chapter 1627: an old acquaintance on the gambling table

"This..."

Little Bai Cai stared blankly at the other party. Behind him, Chen Ye also had a strange expression on his face. Seeing their expressions, the White Fox's heart skipped a beat. These two guys must have some kind of information! !

Thinking of this, the White Fox's heart burned even more fervently. What kind of information was the most valuable? Of course, it was exclusive information!

For example, the example in front of her, the mysterious new student who could stop Helana, was most likely a top-notch dark horse. Once they learned of this exclusive information, they could use their own funds to make a bet... Make a prediction of their strength and then wait for the dark horse to show itself. Once it was exposed, it would not be impossible for this bet to be repeated several times...

It was a profitable business, but he had to have accurate information. Dark horses were not common, and it was not easy to predict the strength of a dark horse. He had to have accurate information and a bunch of analysts to make an accurate prediction of his strength... ..

However, that was what would happen next. To White Fox, as long as he could obtain first-hand information, he would not be able to earn the commission from the top even if he worked for a few years!

Looking at White Fox's nervous and expectant expression, Bai Cai chuckled. "This... can also be considered information?"

White Fox immediately choked. Looking at the other party's beautiful and somewhat adorable face, she secretly gritted her teeth!

She was too nave. Although she was a rookie who did not know anything, she was after all from a large family clan. How could she be as adorable and gullible as she appeared on the surface?

"Yes... of course..."the white fox smiled and pressed down on the value of this information. ...

However, he wasn't very disappointed. Even if he couldn't be the main informant, as a referral, he could still get a decent reward... ..

Chen Ye looked at Bai Cai in shock. This guy was clearer than him at critical moments. At least, he didn't immediately realize that this was a valuable piece of information... ..

"Then, how much is this piece of information worth?"Bai Cai chuckled.

The White Fox rolled her eyes. Just as she was about to speak, Bai Cai reminded her in advance, "Pretty sister, you better give me a fair price. Otherwise, I might go to other places to ask around..."

Her words stunned the white fox. She looked at Bai Cai's smiling face again and curled her lips slightly. This little girl... ..

She did not dare to do such a thing. Tedar Hill was a place where nobles gathered. It was okay for a working white Fox like her to be a little clever. if she dared to be interested in the juniors here, she would not even know how she died...

"This... I have to go and ask for instructions. Please wait patiently..."

"Okay, okay, okay..." Bai Cai smiled and waved her hand. "Then you go first. This bai cai is strolling around here, but you have to hurry up. This Bai Cai still has classes in the afternoon. I have to leave in one or two weeks at most..."

When the White Fox heard this, the last trace of doubt in her heart disappeared. According to the information that she had obtained from her own internal sources, the grade-a class of the Magical Beast Academy, which was the Star class, would start classes two days earlier than the other ordinary classes. The time seemed to be this afternoon... The other party did not seem to be lying...

Hence, she hurriedly smiled and said, "Why would I let the distinguished guests wait for so long? You Go ahead and stroll around, I'll be there very soon..."

Bai Cai replied, "Yes, yes..."

After receiving the other party's reply, the White Fox quickly walked towards the inner hall. Bai Cai looked at the other party's back and smiled smugly at Chen Ye. "See, you didn't come in vain, right? Our future food money might be guaranteed..."

When Chen Ye heard the word 'we', his heart jumped slightly, but he still rolled his eyes and said, "That little bit of talent of yours..."

"Hehe..." Little Bai Cai chuckled and pulled Chen ye toward the hall...

"What are you doing?" Chen Ye felt the other party's delicate and soft hands and forcefully suppressed the numbness in his heart, he said with a straight face, "You're not really going to bet, right? Let me tell you, the points on my card can not be used for you to gamble..."

Just now at the entrance, he had seen that there were many peddlers who used their points to exchange for federation coins. The exchange rate was not low, and ten points could be exchanged for hundreds of thousands of federation coins!

In terms of purchasing power, one could buy more than three times the amount of resources in the outside world compared to the academy. However, very few people would choose to exchange for them. One reason was that there were many resources in the academy that were hard to buy outside. The second reason was the quota for the ancient lands. According to the rules of the Starry Sky Academy, even the worst ancient lands had to have 100,000 points to enter the competition... ..

Not to mention the ancient forest, which was a top-grade land that all the students in the academy were struggling for. Any student with a bit of ambition would not sell their points outside, because once these points changed hands... They would actually be multiplied by several times to be sold to those rich aristocratic children... ..

Upon hearing this, Bai Cai looked pitifully at Chen Ye, and Chen Ye's heart instantly softened, he gritted his teeth and said, "At most, 100 points, no more. This is already the welfare points that I got from helping the teacher in the reference room recently. In the future, there won't be many jobs like this..."

No matter how he said it, his points were not easy to come by, but he still gritted his teeth and prepared to bleed... ..

Bai Cai suddenly laughed. The other party's personality was a little like her mother's. She was usually stingy and did not spend a single cent. However, as long as her father put up a pitiful front, he would eventually take out the money he saved... ..

Of course, her father was a scumbag, and he was very handsome...

At that time, her father was the one who had the best life at home. She remembered that when she was young, she could not eat many snacks, but her father was able to get money from the Iron Rooster's mother and lived a very comfortable life.

At that time, she understood that when she found a partner, she had to find an honest person like her mother. Then, she had to be good-looking!

Her mother had suffered for most of her life because of her father's handsome face. She was already better looking than her father. The only thing left was to find an honest person who was willing to spend money for her...

"What are you looking at?" Chen Ye followed Bai Cai's gaze and looked at the big screen curiously. She found that the other party was looking at the most popular candidates at the top.

The next round would be the Crown Prince's year. The most popular candidates would naturally be the descendants of the royal family. When Chen Ye saw Bai Cai's gaze on that area, he immediately reacted and felt slightly relieved.

He had grown up watching social competitions. He had seen many of the competition videos in the past. Whenever the Crown Prince was in his year, the ones who performed the most consistently were the descendants of the royal family. This was also where their value lay. Therefore, in this kind of game... Most people bet on the members of the royal family, but the odds were also the lowest. However, it was more stable... ..

He didn't want the god of gamblers to take over his body, he just wanted to not lose all his points...

"Hey, over there..." Bai Cai narrowed his eyes as if he had locked on to a certain name. ...

Chen Ye became more and more curious, and then he looked over. When he saw the name that Bai Cai had locked on to, he was instantly stunned, and his face turned a little ugly... ..

It was the disciple of the starry sky imperial family that was promoted by the famous Knight family of the Starry Sky clan, the Hui Yang Clan: Ninth Prince Polly. Hui Yang!

Chapter 1628: Betting on him falling...

What was cabbage paying attention to this guy for?

Chen Ye's brows were tightly furrowed. Towards that Bullsh * t prince who had almost caused harm to his family twice, he was of course extremely disgusted and even hated him. If it wasn't for the huge difference in status and strength, he would have long gone to look for trouble... ..

After returning from the accident that day, he had secretly inquired about Prince Polly's actions. The result was terrifying. Looking at some cases on the forum that had been tortured to the point of dehumanization, he recalled that it wasn't little cabbage who was at the scene back then.., he and his mother would also end up like that. At that time, he was extremely afraid!

Now, he couldn't afford to offend him, so he naturally kept a distance from him. However, he didn't expect that cabbage would actually pay special attention to him. This made Chen Ye extremely puzzled...

...

“Cabbage, why are you looking at this guy?”

“Heh... to see if there’s a chance to make money...” cabbage chuckled. Then, he stretched out his hand and swiped. His AI was swiped out, and Polly’s detailed information was displayed on the screen.

Polly! Hui Yang, the ninth Prince of the Starry Sky Royal Family, 71 years old, occupation: Warrior priest, currently estimated to be ranked 25th!

Advantage inventory: Advantage 1: Body of the starry sky! Prince Polly was born with the powerful physique of a body of the starry sky. In the history of the Starry Sky Elves, there were only six geniuses who had a body of the starry sky. Apart from one who died., the other five had a total of three elven dragon knights and two generations of the strongest warrior priests. All of them were extremely famous in history!

Advantage two: excellent potential for backwardness: Prince Polly was the one with the smallest growth ring among all the popular candidates, but his overall strength was estimated to be average. This meant that he had a huge room for improvement, and was very suitable for betting on the state wheel., now that the opening round has already reached 20th place, there is still a tendency to go up!

Advantage 3: Outstanding Background, Prince Bolton’s mother clan is a famous Star Clan Knight clan: The Radiant Sun clan! His clan has occupied the position of the fourth Legion commander and the leader of the Flaming Sun Knight clan all year round, and has a deep heritage. Over the generations, half of the Grand Knights of the Star clan came from this clan, and they are very important in the Star clan’s military!

Such a family had a deep heritage, and they had many battle-related secret skills. With Bolton’s talent and the family’s deep heritage, they formed an astonishing fighting force. When they grew up, they would definitely be a candidate for the crown prince. Their potential was huge, it was highly recommended to place bets on the status of this character. The lowest base set in this game was 20th place, and experts recommended that the highest ranking could reach the top 10!

What were they waiting for? ? Why weren’t they placing their bets? ? ?

“Oh Oh! !” Bai Cai’s face was glowing red, as if he had found the wealth password...

Seeing Bai Cai’s expression, Chen Ye’s brows furrowed even more. “You’re not really thinking of voting for him, are you?”

Even though the introduction was very good, Chen Ye had a knot in his heart when it came to betting on this kind of person to earn money. He whispered, “The higher-ups are just boasting. It’s not like you haven’t seen him in person. How can he be that good?”

“The ninth Prince, Polly, is a very high-quality and popular candidate...”

A gentle and beautiful female voice sounded from behind. It was the consulting waiter who had returned. It was the White Fox clan’s beauty... ..

“Honorable Gentlemen, our manager invites...” Miss White Fox invited them with a smile.

“Oh, Oh, you’re quite efficient...” Bai Cai chuckled. The other party had only been back and forth for less than twenty minutes. As expected, a private organization was faster than an official organization...

“Can I take this guy’s inventory information with me?” Bai Cai tapped on the screen and asked.

“Of course!” White Fox smiled. “As long as you place your bet here, we will provide you with a dynamic service that can be updated at any time, so that you can see the latest information about our inventory through the private network at any time!”

“Oh...” Bai Cai nodded. “Your way of betting can be estimated to decrease as well as increase, right?”

“UH...” White Fox was stunned and nodded subconsciously. “Of course there is. Predicting a decline is also a way to place your bets...”

“I said there is...” Bai Cai was proud. This thing was like a stock. It was impossible for it to be like Huazhong who could only bet on a rise and not a short?

“You... are you going to buy Prince Polly’s decline?” White Fox asked in a daze.

“Mm... I have this plan... I don’t like this guy, so I’ll bet on him falling...”

“UH...”

White Fox was dumbfounded. Unhappy? Was this a reason to throw money into the water?

According to the rules of the predicted bet, the estimated decline quota could not be lower than the current predicted ranking. Polly’s current estimate of 25th place was already a very conservative estimate. With the aptitude he had shown in the intelligence reports..., he had the potential to break into the top 10!

He wanted to bet on the other party’s decline with a ranking of 25th? Was this guy useless because he had too much money?

With this answer, even Chen Ye could not help but roll his eyes behind him. Although he was very pleased that little cabbage did not like that Polly, he could not do it in this way. Should he say... ? ... As expected of a prodigal daughter?

“UH... ahem... that, regarding Prince Polly’s decline, the opening of the opening is temporarily not open. If you want to open a new opening... you need a capital of 100 million federation coins...”

“AH... so expensive...” Bai Cai immediately looked at Chen Ye!

Chen Ye shook his head in fright. “Don’t look at me, even if you sell me, you won’t have that much money!”

What a joke, 100 million federation coins, according to the best exchange rate of those peddlers outside, would require at least 10,000 points. Chen Ye had painstakingly helped that teacher get a week’s worth of information, and only then did he obtain a pitiful amount of 100 points, how could he squeeze out so many points. Even if he did, it was impossible for him to give them to this little prodigal girl...

“Oh...” Bai Cai pouted and turned to look at the White Fox. “Did your manager say? How much can our intelligence be sold for?”

The White Fox rolled her eyes. It couldn't be sold for 100 million...

However, the manager said that the other party was a spy that could work together for a long time. After all, Helana was a good bargaining chip. That dark horse that could stop Helana might also be a good bargaining chip, if such a bet could continue to receive first-hand information, a little manipulation would be an endless stream of money!

After all, this bet would be open for ten years. For ten years, the floating standard was based on information, right? Once one had first-hand information, they would know the news in advance, and they would have a lot of room to control it!

“Sir Manager, please invite the two distinguished guests to the VIP room for a detailed discussion!” White Fox said with a smile. “Please rest assured. The price that we, Xing Hai Bo Le, are willing to offer is the ceiling price in the industry. We won't let you down!”

“Oh, I see. Then, pretty sister, please lead the way!”

Although the “Pretty sister” was obviously flattering, the white fox was still a little happy. It was indeed rare for nobles to be so polite, especially those starlight elven nobles who were too arrogant.

“Please follow me...”

Chapter 1629: Let's talk about what you want to know... ..

“Manager Sukman, he's here...”

In an extremely luxurious private room, a slender space elf had his hands behind his back. Behind him were two very young juniors with obvious growth rings. They were also space elves.

The leader of the elves nodded slightly, indicating for the white fox to invite people in. His attitude was as cold as that of a traditional space elf.

The White Fox saluted respectfully on the surface, but secretly pursed its lips slightly... ..

Sukman was the division manager of Galaxy Blotter in Teldar Hill. He was mainly in charge of all the businesses here. Teldar Hill was a high-quality market, in order to get the recognition of the upper echelons of this region as soon as possible., not only did galaxy blotter give away most of the benefits, it also let many nobles buy shares. Even the division manager it hired was a genuine space elf bloodline. It was obvious that it was trying to curry favor with them.

However, there was nothing they could do. Star Elves had always been arrogant. If they wanted to do business in their territory, they could only flatter them... ..

After bowing, White Fox hurriedly informed Bai Cai and the others to come in.

Soon, Bai Cai and Chen Ye were guided into the room. Both of them were country bumpkins and looked at the luxurious decorations around them with great curiosity...

“This is the general manager of our Galaxy Blotter in Teldrassil, Mr. Sukman!” The White Fox quickly introduced the two of them to each other.

“Oh...” the two of them pretended to nod, as if they had heard of their names for a long time...

The appearance of the two little guys immediately made Sukman frown slightly. However, they were businessmen after all. Although they had the arrogance of a star elf, they were still businessmen to their internal subordinates, and they still had the grace of businessmen to their guests... ..

“Greetings, esteemed guests. Please take your seats...”

Their handsome faces and elegant demeanor made the two little kids feel a great sense of favor in their hearts. They quickly smiled and sat down.

“Ah Wan told me just now that you have high-level information about the Magical Beast Academy?”

After sitting down, Sukman went straight to the main topic. With his status, it was already very flattering for him to be able to welcome the two juniors. Moreover, he was also busy with his schedule. It was unlikely that he would waste too much time on these two children..., even if the other party had very valuable information.

To be honest, if there weren't enough people nearby and he happened to be here, it would be impossible for someone with his status to come here to discuss this small business... ..

“Uh... Ah Wan, are you referring to that beautiful sister?” Bai Cai tilted her head and asked.

Sukman frowned slightly. It was obvious that this child had a pure bloodline. Why did he have such a vulgar taste in beauty? Although the Wasty Fox clan was somewhat charming, how could they compare to the noble and elegant elves?

Wait a minute...

Why did this child's pupils look... A little similar. ...

Wood Elves?

Hiss... This was rare. The starry elf nobles rarely nurtured ancient bloodlines. It should be said that normal nobles rarely nurtured ancient bloodlines. After all, they could not inherit bloodlines, and it was very difficult to find seedlings with high acceptance rates. ...

The moon god family actually had a wood elf with such a pure bloodline? And she even entered the Star class of the Magical Beast Academy. Why hadn't she heard of it before?

“Eh?” Bai Cai looked at the other party. Why didn't the other party reply?

Sukman smiled slightly. “Yes, it's that beautiful young lady...”

White Fox: “...”

Hehe... .. It was a rare opportunity for this smelly boss to put in a good word for her...

“Oh, the beautiful lady said that my information is high-level, very valuable...”

White Fox: "..."

Sukman rolled her eyes at the White Fox, turned around and smiled. "The value of this information is indeed not small. The question is, can you provide it?"

Sukman had secretly inquired about the information of the junior who had stopped Helana. He had even secretly asked people to contact the person involved that day. However, most of the people involved were not nobles. They basically said that they did not know each other... ..

At that time, there were a few nobles present, but they were all direct descendants of the Top Magical Beast Clan. His own intelligence personnel could not get in touch with them at all... ..

Moreover, school was about to start soon. The later it was, the less valuable the information would be... ..

"I can provide it..." little cabbage smiled. "The key is how much money can you give?"

Sukman smiled. She was a straightforward little girl... ..

"If the information is reliable, I can offer fifty million federal coins! !"

Sukman was too lazy to bargain with the younger generation, so he directly gave the highest price in his estimation.

Chen Ye and Bai Cai's eyes lit up at the same time!

Chen Ye: Ah, I've already gathered half of the price that can be used to register for the ancient lands! !

Bai Ci: AH, I've already gathered half of the opening price! !

"It seems like you're quite satisfied with the price, little girl. Can you tell me now?" Sukman smiled.

"En, en..." Bai Cai didn't intend to continue asking for the price. The other party had a strong aura and didn't look like someone who was willing to bargain. Moreover, the price was indeed higher than her expectations!

"Since that's the case, I'll ask directly..." Sukman raised his hand slightly, and the person behind him quickly took out a pen and paper to record the information... ..

"Do you know how much information that person has? Do you know which clan the other party is from?"

"Uh..." Bai Cai rubbed her chin and hesitated for a moment, "Now... he should be from the moon god Clan..."

"Now?" Everyone was stunned. What kind of answer was this?

But Sukman was extremely satisfied with this answer!

As the person in charge of Tedar Hill's business, and with the bloodline of a star elf, he would naturally interact with the higher-ups of the star nobles. Just a few days ago, he heard such a rumor in the circle of nobles!

Dumas of the Muzir family: Kyle brought back an illegitimate child. He was extremely talented, but he did not keep it for himself. Instead, he sold it to the moon god Family!

The news was very vague. Many details had been slowly learned over the past few days. The reason why the Muzir family did not keep the bloodline was that the illegitimate child was a flower spirit, and he walked the path of a magical beast master. As a result, there were quite a few clans that came knocking on the door wanting to succeed, and this matter was very lively in the circle... ..

However, the specific name and other basic characteristics were well protected. He had not been able to find out for a long time, but through analysis, the mysterious child that stopped Helana was most likely the illegitimate child of the Muzir clan!

After all, most of the children of the starry sky nobles were in the intelligence, and very few were missed. The mysterious person was most likely an outsider, and this illegitimate child that suddenly appeared was very similar to that mysterious child... ..

This girl said that she was now considered a member of the moon god family, but her subordinates did not understand her words. As someone who knew some insider information, he naturally understood and instantly confirmed the previous prediction!

It seemed that this intelligence report should be true!

Sukman's expression softened at the thought of this, and he immediately smiled and said, "I heard from Ah Wan that you are also a member of the Moon God family, so you should know more about her, right?"

"Yes, yes!" Little cabbage nodded repeatedly.

Sukman said, "Then tell me what you know..."

Little cabbage asked, "What do you want to know?"

Sukman frowned slightly when he heard that. I told you to tell me what you know and you asked me what I want to know. Do you have all the information I want to know? I just said that I just joined the moon god family. How much information can you have?

"Let's talk about what you know..."

Bai Cai frowned as if he was troubled. He knew too much, so where should he start?

"Let's talk about what you want to know..."

Sukman:"..."

Chapter 1630: Magic Snake Jade Blue...

This child isn't here to tease me, right?

Sukman's expression didn't change, but a trace of doubt rose in his heart. If he wasted his time to receive a mischievous junior and spread the news, it would be a joke...

Behind him, White Fox ah WAN's expression also changed. She made several judgments and felt that this child should be serious. Even if it was fake, it wouldn't have much of an impact. After all, compared to this kind of information that could bring great value., she could not possibly let it slip away, could she?

However, she did not expect that the manager on duty was not here today, but only the person in charge was here. If this was really a farce, she was afraid that she would have to take the blame... ..

"Then tell me her name first..."Sukman said patiently.

If the other party could provide an accurate name, even if it was a farce, it would at least provide a direction. When the school started, the intelligence personnel under them would be able to follow up immediately. It could be considered that she had not been farce for nothing...

"Little cabbage moon goddess..."Bai Cai hurriedly replied, because she was sensitive enough to notice that the atmosphere was not quite right... ..

"Little cabbage?"Sukman's eyelids twitched slightly. was he deliberately playing with her? Even an unreliable Duma like Kyle would not give his junior such a name, right?

On the other hand, Ah Wan, who was standing at the side, had an extremely strange expression on his face. He stared blankly at little cabbage, because she had heard the other party mention his name before. Wasn't it this name?

Before Sukman could flare up, ah wan interrupted, "Are you trying to say that the person who stopped Helana was you?"

When Ah Wan said this, Sukman, who was about to flare up, was stunned. He looked at this guy in front of him in shock...

Bai Cai rubbed her chin and thought for a moment, "It should be me. That guy didn't do anything bad the second time..."

"Oh? ?"

When he said that, everyone's expression changed...

Ah Wan had a complicated expression on her face. She was half afraid that the other party was deliberately teasing them, and half expecting the other party to be telling the truth. Because the former might cause her to bear more anger, and the latter would be a great merit for her! After all, compared to bringing information, the value of bringing the person directly was completely different!

The two juniors behind Sukman raised their eyebrows, as if this little guy was playing with fire. Although the manager was only a businessman, he was also a well-known figure. Even if he was a junior from a noble family., there was a price to pay for playing with the manager like this!

On the other hand, Sukman put away all his emotions and seriously examined this junior in front of him!

Now, he did not think that this young man was toying with him...

Because of what he said, all the clues were connected!

The muzir family had brought an illegitimate child, and the moon god family suddenly had a pure-blooded wood elf. In addition to the previous deal between the moon god family and the Muzir family, didn't all of this make sense?

The sudden appearance of a high-quality wood elf by a space noble who had never nurtured an ancient bloodline was most likely an accident. And what could be more reasonable than the fact that Kyle, Dumas, had gone to sow seeds everywhere?

After all, Dumas' reputation was well-known. It was not impossible for him to suddenly go to a native planet and get a wood elf... ..

If what the other party said was true, then his reception today would definitely be very valuable! !

Since the other party had come, it meant that he was willing to cooperate. The information about the dark horse was valuable, and cooperating with the dark horse was even more valuable! !

After all, there were many situations where information was uncertain, but cooperation was different. Everything was in the palm of one's hand. With the Dark Horse as the center, opening up more than a hundred bets was not a problem. As long as one handled it properly, they would definitely be able to earn a lot of money!

Such cooperation was not unheard of in history. For example, in the previous session, the number one dark horse of the Tirefarson Academy, Demon Star, had cooperated with Red Star Boller. They had opened a total of more than 400 large bets, and each bet was worth billions of dollars! That wave had directly made red star Boller a huge profit!

Of course... .. The prerequisite was that the other party was indeed real...

Sukman clapped his hands and smiled. "Very good, little girl. The information you brought is very valuable. If what you said is true, the reward I promised just now can be doubled immediately!"

"Hey! !" Bai Cai immediately beamed with joy. There was such a good thing? He had actually found the entire amount of money in just a few casual sentences!

"But..." Sukman changed the topic and narrowed his eyes. "It's a deal worth hundreds of millions. It's not too much for us to inspect the goods, right?"

"Inspect the goods?" Bai Cai looked at him in a daze. "How?"

Chen Ye, who was sitting cross-legged, frowned when he heard that. A bad feeling welled up in his heart... ..

Sukman smiled slightly and looked at one of the juniors behind him... ..

After receiving the signal, that junior took a small step forward and walked in front of Bai Cai and the others... ..

“Let me introduce you...” Sukman smiled and said, “Bi Lan Doerweisi is also a graduate of Your Starry Sky Academy’s Magical Beast Institute. During her time in school, she participated in seven social gatherings, and the best result was 95th place!”

Hearing that, Chen Ye looked at the young elven beauty in shock. Social gatherings were a competitive activity that all the universities in the Federation participated in. It gathered all the elite disciples of the entire federation during that period of time. To be able to enter the top 100 in such a scale of competitive competition, one must be a genius among geniuses. Moreover, the other party was a magical beast master who was at a disadvantage in terms of individual combat ability, which was even more rare... ..

No wonder he felt that the other party looked familiar just now. Now he finally remembered... ..

The other party was the top 100 in the social gathering 30 years ago. He was known as the Genius Magical Beast Master: Magical Snake Jade Blue!

Chen Ye had just reacted when the private room was instantly enveloped by a cold aura of succession. A chilling hiss sounded by his ear, instantly causing Chen Ye’s hair to stand on end. His entire body instantly stiffened, and he didn’t dare to move!

Not only did he not dare to move, he was also unable to move. That terrifying cold aura seemed to have seeped into his bones, causing Chen Ye to be completely unable to move from his mind to his body!

Ah Wan and the rest who were standing opposite Chen Ye and the rest tensed up. They could clearly see what that hissing sound was... ..

It was a terrifying black snake that was completely black, as though it was wrapped in a layer of fog!

It was the signature companion of the magical beast Bi Lan from back then: Earth Demon Snake! !

Ah Wan stood in front of him and tried his best to suppress the fear in his heart. His face was pale as well!

Earth demon snake, an ancient land: a Special Magical Beast of the Devil Abyss. It was said that it had the same origin as the Earth demon race in the Abyss. It was one of the extremely rare and dangerous magical beast species and was ranked among the dangerous magical beast species! It was only lower than the Nethernight Butterfly!

“Wu...” Little Bai Cai raised her head and looked at the black snake that had suddenly appeared behind her. With a bitter face, she said, “I hate snakes...”

This reaction caused Bi Lan, who was controlling the demon snake, to be slightly stunned. There were not many people who could still move so naturally at such a close distance from her demon snake... ..

Sukman ye narrowed his eyes slightly. As a star level powerhouse, he could clearly see that although the little girl had a bitter face, her physiological reaction was extremely normal. She was almost completely unaffected by the earth demon snake that had an extremely strong shadow attribute... This spiritual power was probably at the level of the ceiling amongst her peers...

Hiss...

The demon snake seemed to have also become interested in the cabbages that were completely unafraid of it. It slowly crawled over. Seeing that it was about to climb onto Chen Ye's body, Chen Ye's face instantly became extremely pale. He desperately wanted to struggle, however, just like the time when he faced Helana's domain, he was unable to move!

Just as fear filled his heart, a gentle energy suddenly flowed from his palm to his heart, causing the stiff Chen Ye to regain his movement. Subconsciously, Chen Ye clenched the thing that transmitted the warmth... It was Bai Cai's hand that reached out of his own accord... ..

"Hey..." Bai Cai held Chen Ye as she turned around to look at Bi Lan. Her expression became a little cold. "Get that thing of yours away quickly. If you dare to climb on Chen Ye's body, I'll stew it into soup to drink!"

As Bai Cai spoke, a golden energy appeared!

Bi Lan smiled coldly in the face of this direct warning. However, she didn't see Sukman, who was her leader, become stunned...

Telepathy!
