

A Bunch 1651

Chapter 1651: the Test -PartOne one)

It wasn't an exaggeration to say that it was a little scary... ..

The assistant had received insider information before the test. The child called Feng Doudou was an extremely talented seedling. However, although he appeared very serious on the surface, he actually didn't take it seriously in his heart, after all, being able to become the assistant of the Vice Dean meant that he was outstanding. When he was young, he was also a top-notch genius in the school. who hadn't been treated like an immortal seedling?

But when the test started, it was different. Remember When...

"Divine craftsman is a comprehensive profession. It requires one to reach the level of specialization in all kinds of professions. A qualified divine craftsman is not only a weapon master, but also a metal elementalist. He is also an excellent forger. Therefore, if you want to become an excellent divine craftsman, you must be prepared to work three times harder than the two academies next door! "!"

In the testing hall, the assistant was giving the necessary lecture to the academy that was preparing for the test. The group of juniors were also listening obediently, not daring to show any impatience on their faces.

The assistant had a great say in the test. It was directly related to whether they could advance or not, so the students naturally didn't dare to be careless...

Feng Doudou was naturally very obedient. She had understood the rules before coming here. Once the exam was rejected, she would have to be randomly assigned a tutor under the administration of the school. Sometimes, her major might even be adjusted... ..

This was the same as when she had filled in the assignment when she entered university. Once she failed the exam, it was very likely that she would be transferred to some unpopular major like philosophy, psychology, and silkworm science... ..

Moreover, according to the intelligence report, this vice dean with a very strong background seemed to only intend to accept ten spots, and there were more than thirty people here. In other words, there would definitely be more than twenty unlucky people who would be eliminated. She did not want to be one of them... ..

"First is the bone-touching test..."

The assistant said lightly, "A good bone-touching test can at least guarantee your lower limit. It is also an important sign for instructor Bode to accept students. If your aptitude fails to pass the test, then everything is just empty talk. Does anyone have any objections to this?"

As soon as he said this, the crowd's expressions changed. As a genius who could enter the Bronze Academy's Class-a class, his bone chart naturally wouldn't be too bad. During the general exam, almost all of them were labeled as CLASS-A upper class!

However, there was a difference between class-a upper class. Many people were judged as Class-a because their bone chart had reached Class-a level, while there were some who were only judged as class-a...

Among the crowd, most of the top aristocratic children belonged to the latter category. When they heard that it was a bone test, they could not help but smile. More or less, a sense of superiority appeared on their faces.

After all, the genes of large families had been purified from generation to generation. They had an innate advantage, and the day after that, they would have professional body forgers to make fine adjustments to their models, as well as all kinds of top-notch ingredients and medicinal herbs to nourish them. If nothing unexpected happened.., it was impossible for them to lose to ordinary children.

In fact, when the assistant put on the gloves and started to feel the bones, he could feel the difference. Those foreign children, especially those indigenous children who had inherited their genes, although they had very good bone structure.., there was still a huge gap between them and the children of the aristocratic families.

After all, during the indigenous period, the resources they could enjoy could never be compared to the children of the aristocratic families.

Moreover, the aptitude of this generation's aristocratic family members was rather formidable. No wonder the Dean chose to come out at this time... ..

The assistant sighed as he touched his bones. This generation wasn't considered to be a royal family member. In terms of aristocratic family members, they would probably completely crush his generation. Just touching a few of them, their bone structure wouldn't be inferior to his... ..

"Feng Doudou?"

"Hey, it's me!" Feng Doudou hurriedly stood up and replied!

What great talent!

The assistant looked at the Little Elf who had agreed, and a trace of surprise flashed through her eyes!

Lady Mengku had specially asked to pay attention to this native child. She thought that he was a top-notch dark horse, so she naturally paid attention to him. Now that she looked at him, she realized that Lady Mengku wasn't exaggerating!

The ancient bloodline had returned to its ancestor, and the aura emitted from his body was extremely pure. His growth ring was less than a hundred years old, but he had the strength of a level nine lifeform. This talent was already at the level of a royal. Even if he was a native and had a slightly inferior inheritance.., it was indeed as Lord Mengku had said, a rare dark horse!

"Mm, try to stand straight and relax your muscles as much as possible..." suppressing the surprise in his heart, the assistant said in a calm tone.

“Yes, teacher...”Feng Doudou smiled obediently.

“Mm...”the assistant nodded. This was the good thing about being a native. They were obedient and modest, unlike the proud and arrogant descendants of aristocratic families.

“Eh?”

The moment the assistant touched her hand, her expression froze...

“Eh... What’s wrong, teacher?”Feng Doudou’s heart tightened, afraid that the other party would say that she had some flaws...

Feng Doudou had always been very worried about this. After coming to a big place, she quickly found out what group she belonged to. Aboriginals, genetically modified organisms, this group of people had the lowest foundation in the Universe Federation.

However, their group’s acceptance rate was extremely high, and they were even popular. However, in her heart, she had always suspected that there was something wrong with her group of players... ..

“UH... HMM... no... nothing...”the assistant was stunned for a moment, as if she had just come back to her senses. She quickly replied, and then continued to touch down... ..

That’s right... it was complete form!

With her specialized bone-touching skill, she was able to quickly sense the other party’s level the moment she started. The so-called complete form was theoretically the most perfect bone form, and it was evaluated using the ancient royal family as the best template, and those who were able to achieve this were all descendants of the royal family with excellent bloodlines.

This was her first time... .. Touching such a bone structure on a native!

It was truly complete...

After carefully groping his body, an unbelievable feeling arose in the assistant’s heart!

Oh My God, why was there no news about this bone structure in school? What kind of food did the first-time examiners eat?

“Child... did you hire a professional bone sculptor to train when you were young?”The assistant asked in a low voice.

This scene immediately attracted the attention of the surrounding people. After all, when the assistant touched them, he had a cold expression on his face. There wasn’t even the slightest fluctuation, let alone taking the initiative to talk to them...

“Uh... no...”after shaking his head, Feng Doudou cautiously looked at the other party... ..

As expected, his group of players were flawed?

On the other side, the assistant who received the answer fell into silence once again...

Based on her judgment, the other party... .. They shouldn’t be lying. In other words, they were born with perfect bone structure?

There was actually such a native?

“Use your energy to see...”the assistant decided to confirm it in the end.

“Oh...”Feng Doudou nodded obediently. He opened his palm, and soon, a stream of air began to revolve in his hand.

“What is this?”The assistant looked at the spiraling gas in the other party’s hand and asked in a daze.

“Spiraling pills...”Feng Doudou said carefully. ...

Chapter 1652: Test -PartpTwo two) !

“Who... who taught you this?”

The assistant’s face turned black after the shock! !

“UH... I created it myself...”Feng Doudou looked at the bad expression on the assistant’s face. He immediately put away the smug look on his face. He had hoped that this S-rank ninjutsu would give him some points, but he didn’t expect it to have the opposite effect. As expected, those things in some Japanese anime were all lies, including Ultraman...

The assistant looked at the other party’s expression and laughed angrily. “How dare you! !”

Qi was one with the veins, so after leaving the body, one could still control the shape, speed, and even quality of the body through the veins. However, because it was connected to the veins, one had to be careful when using it.

Rotating at such a high speed like the other party seemed to be very powerful, but in fact, it was useless. The function of Qi was to assist in battle, not to use it as an energy wave like a wizard. If you rotated again, would it be more powerful than the heaven and earth energy that a wizard could mobilize?

The most important thing was to harm the body. Such high-speed rotation would definitely cause the gas connected to the veins to fall into chaos. It was an extremely harmful method to the meridians!

Thinking of this, the assistant grabbed the other party’s arm, wanting to help stabilize the other party’s meridians. However, when he put his hand on it, he was instantly stunned...

The high-speed rotation of the girl’s Qi had just dissipated, but her meridians were silent as if they hadn’t moved at all. The assistant wondered if he had been hallucinating... ..

How could such a high-speed rotation calm down so quickly?

“You...”the assistant looked at Feng Doudou in a daze. “How did you do it?”

“You mean the training method for the Spiral Pill?”Feng Doudou’s eyes lit up, and he quickly said, “First of all... use a balloon filled with water to make it spin. If you break the balloon, you can change the plasticine...”

“Who’s asking you this?”The assistant rolled her eyes. This girl, she created all sorts of things and still had some form. She actually invented a training method... ..

Just as he was about to ask her how she could calm down her meridians so quickly, Dean Baird's cough rang out in his mind.

The assistant immediately reacted. This test had to be as ordinary as possible so that no prince who wanted to cause trouble could see through it. Only then did she forcefully hold back what she wanted to say. She quickly changed her words and said, "HMM, it's really creative..."

These words made the surrounding people burst out laughing. Anyone with a discerning eye could see that it was a method of self-harm. The assistant's words actually seemed to be mocking... ..

Feng Doudou immediately lowered her head in embarrassment. Actually, she also felt that the spiral pill was useless. Its power was average, and it was also very troublesome. Perhaps... .. Would it be better to add a little wind element?

Looking at Feng Doudou's expression, the assistant resisted the urge to comfort her. He skipped her and thought to himself, I'll teach her slowly in the future...

Just like that, he flipped through the bones and found that most of the bone images were pretty good. Indeed, they were far better than his. However, with Feng Doudou in front, when he touched some good bone images in the future... The assistant suddenly had a dull feeling...

Soon, the first round was over. From the bone images, it seemed that the scions of the aristocratic families had the advantage, with the exception of a certain pervert... ..

"Next is the metal sensing test..."

The assistant took out a pea-sized liquid and floated in the air. Everyone immediately looked over.

That thing was a liquid, but it was filled with a metallic luster. From Feng Dou's point of view, it was very similar to Mercury. However, after taking a metal class for a period of time, she knew that this was not mercury, but an artificial precious metal object refined from high-level metals: mithril!

"This is a secret mithril..."the assistant said calmly. "It's a mithril that has not undergone industrial tempering. The atomic structure inside is extremely unstable, and there is a certain amount of poison. Try to be careful when operating it!"

"Yes, teacher..."everyone hurriedly replied.

Immediately after, the assistant gave everyone one, which was basically the size of a pea.

"Try your best to make a complicated shape. This is your bonus. You only have 15 minutes, please hurry up..."

When all the students heard this, they quickly started to control the mithril... ..

Feng Doudou also started to control it. Controlling the mithril to create shapes was a basic lesson for metal masters. Feng Doudou had learned it before the national examination. At that time, he thought it was quite simple. He could control the mithril to create many complex shapes on the first day... ..

But this time... .. She suddenly felt that it was particularly difficult... ..

Not only did she find that the mithril was much heavier than before, it was also easy to disperse and difficult to operate...

She looked around and saw that several of them had already used the mithril to make many exquisite parts, and some of them had even used the mithril to make a robot. Feng Doudou felt a wave of shame as he looked at them...

After two consecutive rounds of exams, they didn't do well. I'm afraid I'm going to be adjusted, right?

Thinking of this, he could only brace himself and try his best to control the mithril to form a slightly simpler screw. However, the shape was still not satisfactory. Seeing this, a person beside him couldn't help but say, "What are you doing? A fat head worm?"

These words immediately made the surrounding people burst into laughter.

Feng Doudou also lowered his head in embarrassment. Those screws were indeed shaped like a fat head worm. Not only was the head too big, but the torso was also distorted and twisted... ..

It was indeed a little embarrassing...

"Is this guy really from Class A? Isn't this too funny?"

"He's using the back door?"

"He looks like a native, right? How can he use the back door?"

"Who can say for sure? What if he's a god from some family..."

"Quiet!" The assistant said in a deep voice, "Do you have a lot of free time? Do you still have time to pay attention to others? Do you feel that you've passed the test?"

Everyone immediately calmed down and began to focus on the work in their hands. There was a quarter of an hour. If they made the most of the time, they would be able to get more marks... ..

The assistant expressionlessly walked in front of Feng Doudou. "Just try your best..."

Feng Doudou, who had been comforted, nodded slightly. He took a deep breath and narrowed his eyes. The few fat screws immediately became thinner. At a glance, they looked like screws... ..

They looked stupid, but the assistant's eyelids kept twitching...

This girl... can actually be used?

That mithril was obviously not ordinary mithril!

Before coming, in order not to let this little girl perform too well, they prepared a special mithril for her. The quality of this mithril was almost thirty times that of the surrounding students, and it was mixed with a lot of messy elements, it made the structure more unstable, making it more difficult to shape.

She had once used this thing on all the princes. Among all the princes, the seventh prince, who had the strongest metal sensing ability, could barely break it down with this thing. It was somewhat difficult to solidify, but this little girl could actually use it to make screws?

And it seemed like she could do it even better...

This dark horse was frighteningly dark...

At the thought of this, the assistant walked to the dark corner and swallowed slightly. She thought to herself, 'Sir Mengku, I don't think that Xing Hai Bo Le has opened an account yet, right?'

HMM... ... '... I'll open one tomorrow, and then I'll get an advance of half a year's salary...'. ...

Chapter 1653: discovered shadow...

"It's indeed a little scary..."

Bode picked up the fat nail his assistant handed him and narrowed his eyes...

It was very difficult to stretch and solidify mithril of this color, not to mention to shape it. Moreover, it was such an exquisite thing... ...

Although the nail looked a little ugly, its basic outline was made well. There were even spiral veins. To use such an unstable mithril to make such an effect, it was something that only a level-14 advanced elementalist could do. If a level-9 student could do it, no one would believe it. ...

Bode was also born in the Divine Craftsman family, so he naturally knew how exaggerated this level was. In his opinion, there were only two possibilities. Either the other party had level-14 spiritual power, which was obviously impossible. Then, there was only one possibility... ...

The ancient bloodline was so pure that it was almost infinitely close to the previous wood elf noble. The wood elves had a natural affinity for elements, so it was not impossible for them to achieve this at a low level...

Taking a deep breath, Bode pinched a few fat screws and muttered, "I thought it was just a side effect, but I didn't expect there to be an unexpected surprise. Not Bad..."

The assistant immediately smiled. "Congratulations, teacher..."

As the assistant who had always been involved in this matter, he naturally knew what had happened during the entire process...

The entire process was naturally planned. Bode hadn't come out of retirement on a whim. It was just for Feng Doudou. In fact, with Bode's status, even if he was a top-notch genius... He didn't have the right to disturb him personally coming out of the mountain... ...

This incident could only be said to be a side effect...

When his son entered the Elder Council and began to share the burden for him, Vice Dean Bode had the idea of coming out of the mountain to take in a group of students. After the nobles who were on good terms with him learned of his intention.., they all asked him to teach their children!

Besides being the vice dean of the Bronze Academy's Combat Department, Bode's more important identity was that he was once one of the commanders of the Blue Moon Army. Although he had already

resigned and left, it was clear from the fact that there were people from the Blue Moon Army who came to visit him every year, Bode still had higher connections in the Blue Moon Army!

This was an opportunity for the nobles to enter the Blue Moon Army!

The CANGYUE faction was a new faction, and its members were all new nobles. It was rare for them to come from traditional large clans, and Cangyue's battle achievements were extremely high. Recently, she had become the center of attention among the new ten great lords, and almost no one could compare to her, even the highly respected Iluweta couldn't compare to this newly promoted third lord in terms of Fame!

And a new large faction had a large amount of resources and space to use. This was what many top-tier nobles needed.

However, the Cangyue faction was quite xenophobic. Unless they had an insider's introduction, they would rarely accept outside family factions. This also resulted in very few major families joining the Cangyue faction since the one million eras. It wasn't that everyone was unwilling, but... they had no way to join them!

Bode was one of the few big shots who could connect this line...

If they had the identity of Bode's disciple, the major families would have a chance to transfer their outstanding children into the CANGYUE faction. Moreover, they also believed that their outstanding children would definitely be able to make a name for themselves in the CANGYUE faction, this was the opportunity for many families to curry favor with Bode. This was also the reason why the Bronze Academy was willing to let the young Bode obtain the identity of the Dean of the Combat Department.

For so many years, Bode had been watching from the sidelines. On one hand, he wanted to solidify the foundation of the family so that it would be easier for them to benefit from the cooperation. On the other hand, he was also waiting for more outstanding seedlings.

The reason why the action was set for this year's crown prince year was because there were many talents this year. It was an opportunity to monetize his resources. It had been set up decades ago, but not many people knew about it.

As for Feng Doudou, because his younger brother had come to him and pushed him forward, Bode had no choice but to give him face, hitch a ride, and give him a spot. It was just right... ... To make the entire process look better.

After all, if he came out of the mountain and accepted all the privately appointed noble children, it wouldn't look good if it got out. Taking advantage of the fact that there weren't enough spots for the crown prince's tutor this time, he came out of the mountain to help out with the students, if he took in a few talented foreign children, wouldn't it look better on the surface?

And since he wanted to take in a few disciples from other places, who wouldn't he take in? Since Mengku strongly recommended that so-called dark horse, he was naturally happy to give face.

Although he usually looked like he didn't like his younger brother who was younger than his son, in reality, after his parents turned into stars, his younger brother, who was raised by him, held a very important position in his heart... ...

Otherwise, he wouldn't have allowed a direct descendant of his to do business...

However, he didn't expect that the favor in his eyes would turn out to be such a pleasant surprise...

Bode carefully looked at the fat nail in his hand and squeezed it slightly. The nail instantly changed shape, but even though its shape changed, the extremely unstable mithril structure didn't collapse, even though its shape was a little bad... The quality of the molding is remarkable... . .

"Interesting..." Baird narrowed his eyes. His bastard brother had done one useful thing... . .

At this time, Feng Doudou was not very happy in his heart. In fact, she could probably guess that her group of D-ball players relied on the existence of temporary genetic modification should be defective. However, it still made her very uncomfortable when things really happened that they weren't as good as the people around them... ..

When she thought of the fat head nail that she had just made, she had the thought of burying her head in the ground...

"Yo, aren't these our backers?"

Just as she was feeling depressed, a mocking voice came from the front. Feng Doudou frowned and looked over, only to find four or five dark-skinned, well-built dwarves blocking the front.

Dwarves were actually not short. The dwarves were compared to the ancient Titans. Facing those big men who could move four to five meters, or even ten meters, the dwarves were naturally dwarves. However, facing an elf like her... That would be a real strong man... ..

These guys...

Feng Doudou instantly remembered. wasn't he the guy who picked on him in the double selection?

What is he doing? Is He going to bully me after school?

F * ck...

Feng Doudou's face twitched. She hadn't encountered this kind of thing since junior high... ..

"Oh? Why Are You Mute?" The leading dwarf sneered. "Weren't you quite rude in the Hall?"

Most of the companions behind the dwarf frowned slightly. It didn't look good to have a large group of people surrounding a weak female elf.

At this moment, in this unexpected scene, no one noticed that a shadow was quietly passing by.

The Shadow had no interest in this boring bullying trick. It directly planned to pass through the corner and stare at the people on the master list. However, when it was about to pass by, a gaze made it freeze in place... ..

It seemed... It wasn't that no one had noticed. ...

The shadow raised its head slightly and looked over, only to see the weak elf girl who seemed to be surrounded in the distance, firmly locking onto it! !

Chapter 1654: that... Hello?

Did he just happen to see it?

The shadow paused for a moment. He did not use stealth, but he subconsciously avoided everyone's vision. On the surface, it seemed like he was walking in the light, but in reality, he was in the blind spot of everyone's vision. Of course, that included the little elf... ..

But the other party still saw him. It could be a coincidence that he saw him from the corner of his eye, or it could be... ..

Unknowingly, the shadow stopped in his tracks and quietly looked at the other party. Originally, he didn't want to waste too much time. His master's mission was to observe the dark horse that might appear in the batch of students who signed up for Headmaster Bode.

This dark horse naturally wouldn't include the Little Elf who performed poorly in the video, but now... .. The shadow was a little uncertain...

"Hey, where are you looking?"

The black iron dwarf glared at Feng Doudou with dissatisfaction. He still dared to look elsewhere? Could it be that a helper came?

He turned around to look, but he didn't see anything.

Heh...

Just as he was about to say something, Feng Doudou, who didn't seem to want to look at him, spoke first. His tone was full of impatience. "What do you want? Hurry up..."

"I..."

The dwarf choked and his face turned ashen. "You're so arrogant..."

Feng Doudou rolled his eyes at the sky. Even his lines were so childish.

Seeing the other party looking at him as if he was looking at a bored person, the dwarf's breathing also froze. For some reason, he suddenly felt that he was indeed quite bored... ..

For a moment, the scene fell into silence. The dwarf suddenly realized that he didn't know how to proceed to the next step...

Feng Doudou was impatient. He furrowed his brows and said, "You guys, are you coming together?"

"Uh..." the few companions behind the dwarf stopped breathing, and an inexplicable sense of guilt rose. The Dwarf's face turned red and his neck became thick. He immediately pretended to sneer and said, "You really think highly of yourself. Do you need us to deal with you together?"

After saying that, he waved his hand and said to the people behind him without turning his head, "You guys step back a little..."

The few of them were stunned and immediately retreated a few feet as if they were relieved of a heavy burden. To be honest, if they were to gang up on a female elf together, they would not be able to bring themselves down... ..

"Come on, don't say that I'm Bullying You!" The dwarf opened his hands and made a stance. "You can use whatever weapon you want. As long as you can hurt even a single hair on me, I'll consider it as your win! !"

After saying such heroic words, his back immediately straightened up a lot!

As soon as he finished speaking, the dwarf raised his head and saw a long and fair hand approaching him. The joints of the fingers were too good, and he was stunned for a second. However, he subconsciously felt that something was wrong. This was... "...". Whose Hand was it?

Before he could regain his senses, a piercing pain came from the tip of his nose. He subconsciously took a step back and covered his nose...

"One..." Feng Doudou's emotionless voice came as his fair and slender fingers gently pinched the thick black hair.

"F * ck..." the dwarf instantly reacted and looked at him as if he had seen a ghost. When did this guy jump over?

"The hair is so thick, and so ugly..." Feng Doudou threw away the black hair in disdain and tilted his head to look at the dwarf. "Can you move aside now?"

"Uh... this... this... how can this be counted?" The Dwarf's face immediately turned red. He pointed at the dwarf and stuttered, "You... This is a sneak attack! !"

Feng Doudou looked at the dwarf speechlessly. "You've already set up your stance, and I came face-to-face. How can it be called a sneak attack?"

"This... of course it's a sneak attack. I didn't even react in time. How can it not be called a sneak attack?"

Everyone:"..."

F * ck... The group of friends behind the dwarf not only covered their faces with their hands, they also recognized this fellow. They were really too ashamed to face anyone... ..

However, one thing after another, the little girl's speed just now..! ... was really exaggerated!

In the distance... .. The shadow stared at Feng Doudou, evaluating the data just now... ..

A Level 9 lifeform reacted, but the explosive energy was around level 13, and its speed was even more astonishing. After roughly avoiding the friction between the elements, it still had the explosive power of a level 13 assassin. It should be mainly used to train the agility muscles... ..

Overall evaluation: almost impossible...

The shadow fell into confusion. The basic stats were somewhat illogical. Even if it used the royal family as a template, it was still too exaggerated... ..

“Sigh...”facing the guy who didn’t know what logic was, Feng Doudou sighed. “Then I’ll be slower this time...”

As he spoke, his body moved. This time, everyone, including the dwarf who had his hair plucked, could see him clearly. This Little Elf was as agile as a dancing butterfly, and his footwork was extremely rough. It wasn’t even the slightest bit of skill... However, the overall effect was so smooth that it was frightening. When that fair hand appeared on the dwarf’s nose again, although he could see it clearly, he still didn’t have any reaction... ..

Bang...

“Ouch! !”

The dwarf covered his nose. This time, the other party didn’t pluck his fur. Instead, he directly flicked his huge lion nose. With a pop, bright red blood spurted out from his nose like a fountain. The dwarf covered his nose and sat on the ground.., after he reacted, he immediately glared at him!

“This isn’t considered a sneak attack, right?”Feng Doudou bent down and asked.

The little elf’s height was originally only around his waist, but when she bent down to look at him, that inexplicable pressure didn’t match her thin and weak figure at all... ..

It was so heavy that it made it difficult for him to breathe, and he choked on the blood from his nose...

His companion behind him quickly stepped forward and helped him up...

“I’ve offended you, classmate...”the slightly taller black elf in the lead said with a smile, “Please don’t take offense. This guy’s brain is a bit muddled, and he actually doesn’t have much malice...”

Feng Doudou nodded slightly and didn’t refute him. That Short Guy was a bit childish, but he wasn’t a bad person. At least from his performance just now, even if he couldn’t beat him, he probably wouldn’t do anything to him, at most, he would just mock him and vent his anger.

Seeing that the other party didn’t have any intention of pursuing the matter, the few companions immediately heaved a sigh of relief in their hearts. The main thing was that the other party’s skill just now was really frightening. Even if they attacked him together, they probably wouldn’t have a good ending, when the time came, it would be rumored that the seven most outstanding disciples of Black Deer Planet would gang up on a lone Elf on their first day of school at the Bronze Academy. Moreover, they would even be taught a lesson by the dwarf, they were afraid that they would be laughed out of their mouths by the people from their hometowns!

“Hey...”

Just as the group of companions was about to help the dwarf leave, the dwarf finally spoke, “What’s Your Name?”

Feng Doudou furrowed his brows and turned around. “Why?”

“You’re very powerful...” the dwarf wiped off the blood from his nose and struggled free from his teammates’ support. He stood up straight and said, “But you won’t always be stronger than me. Remember, my name is Reg, reg of the Dobby family!”

His teammates covered their heads in unison. They were beaten so badly that they couldn’t even raise their hands. How could they have the face to say their names?

“Oh, I know...” Feng Doudou said faintly, “Don’t do such a stupid thing next time. It’s very embarrassing...”

“I...” Reg’s face immediately turned red again. In his excitement, the blood from his nose spurted out like sharp swords again. His companions hurriedly helped him leave, afraid that he would continue to stay in the same place and lose face.

The shadow not far away watched everything silently. Then, he recorded all the data just now. A very talented and exaggerated native should be the person that his highness guessed. Go back and report it...
...

Thinking of this, just as he was turning around, the other party’s voice suddenly sounded from behind, “That... Hello...”

The Shadow: “...”

Chapter 1655: Has Anyone Told You?

Hello?

The shadow tilted its head slightly and looked at the other party. For a moment, it actually fell into a state of paralysis.

From the day it was created, it had never dealt with this kind of question and answer. When a person said hello to it, how should it answer?

Master... .. There were only orders for it. It only needed to learn to listen and carry out orders.

As for outsiders, it wasn’t that he hadn’t seen them before, but their attributes were special. The low-level children couldn’t see them, and the high-level nobles wouldn’t pay attention to them.

It had always been like this, always like this...

But today, it seemed to be different...

“Eh?” Feng Doudou looked at the silent figure and smiled somewhat embarrassedly. “Um... am I disturbing you?”

The Shadow was still silent...

It said something that it didn’t know how to respond to. Its master had always ordered it, the noblemen had always ignored it, the newbies had never seen it, and the people who disturbed it had never felt like they were disturbing it, the people who didn’t disturb it had never interacted with it.

“Ahem...” seeing that the shadow didn’t reply for a long time, Feng Doudou felt a little awkward, but he mustered his courage and said, “I... I didn’t mean to disturb you. The main thing is... I’ve never seen an existence like you, so I’m a little curious...”

The shadow looked at her silently. Just as Feng Doudou was about to apologize and leave, it finally spoke...

“What... kind of existence am I?”

“Eh?” Seeing that the other party finally replied and still said such strange words, Feng Doudou was momentarily stunned. However, his stunned expression was quickly replaced by joy. This expression made the shadow a little curious.

It’s the first time it’s ever seen someone so happy to be taken care of... . .

“How do I put this... . .” Fabian said excitedly, “It’s very cool. You seem to be made of some kind of metal element? It’s completely bionic, but unlike elemental life, it’s more like... . Man-made... . .”

“Robot, nature is man-made...” the shadow tilted his head, staring at each other.

“Is it really a robot?” Feng Doudou became even more excited. He rubbed his hands non-stop, as if he wasn’t afraid of being rude to the other party or that the robot had some kind of restriction.

“It’s too cool, but... how did it do it?”

“How did it do it?” The Shadow looked at the other party. For some reason, it was wasting its time here. At this time, it should hurry back and report the latest findings to its master...

But for some reason.., it still chose to stay where it was and answer the question. “Are you referring to the materials on your body? “This is the shadow crystal, a material from the outer realms. When you are studying materials science, there will be an explanation. If I remember correctly, it should be the 23rd chapter of the second year’s materials class. If the textbook hasn’t changed...”. “...”

“Oh, there’s such a material?” Feng Doudou’s eyes widened, revealing a feeling of wanting to touch it. However, he resisted his dirty hands, he laughed and said, “That’s not what I’m talking about, it’s your consciousness. Why... It’s obviously artificial, but it can think like normal creatures?”

“We are using NISI’s intelligent system version 4.0. It has the most advanced intelligent computing, and it can basically simulate the thinking of normal creatures. This lesson will be in your third year’s intelligent system class, chapter 14, Section 9...

“That’s not right...”

Feng Doudou shook his head and interrupted him...

The shadow paused for a moment and looked at the other party. He started to calculate the logic of his question and answer. There seemed to be no problem, so why did the other party say that it wasn’t right?

“What I said about thinking isn’t calculation. When you saw me just now, you were thinking, not calculating...”

SHADOW: "Intelligence doesn't know how to think. Calculating is a process that allows one to react..."

"That's not true..." Feng Doudou moved closer and stared into the other party's eyes. "When you looked at me just now, there was hesitation in your eyes. It was obvious that you were thinking..."

Shadow: "..."

"Right, it's like this!" Feng Doudou suddenly became excited and moved closer, almost sticking close to the other party. "Did anyone tell you that your eyes are like ordinary creatures, they have intelligence?"

The Shadow: "..."

This time, the shadow didn't reply and instantly disappeared in front of Feng Doudou, leaving Feng Doudou empty-handed.

Feng Doudou quickly looked around, but he couldn't find the shadow anymore. Immediately, a regretful expression appeared on his face. He had almost touched it...

Just now, she was actually thinking about how it felt to touch this shadow-like shape...

"It really is a big place..." Feng Doudou put his hands on the pillow and said slowly, "There are all kinds of magical things. It was right to choose to come here..."

"Oops... How am I going to explain this to Alice? Will she scold me if she finds out that I had such a crappy exam today? I should have discussed this with her. I was so confused by that information..."

"Whew..."

The shadow ran very far, almost at full speed, instantly pulling away four or five thousand feet. It was obviously a little flustered, and did not activate the advanced footwork at the first time, causing its body to be rubbed red...

Finally, running down, it quickly found a place where no one stopped...

Bang Bang...

The shadow clutched its chest, and its breathing became a little hurried. The Black Shadow on its body also began to slowly shrink. All of these reactions made it even more confused...

It was a fully bionic structure, and it had a normal biological heart. It was normal for the heart to increase its speed because of the exhaustion of physical energy, but...

It shouldn't be like this...

It only used 0.72 seconds to speed up, and it was completely under the load. It shouldn't have caused such a big physiological reaction, but why hadn't it stopped beating until now?

Obviously... ... From the calculation of the energy consumption and the strength of its body, it shouldn't have such an intense reaction... At least... ... ! ... It should not have stopped for so long and still failed to get its heartbeat back to normal!

Has anyone ever told you that your eyes, like ordinary creatures, are spiritual?

The female Elf's words appeared in his mind again. The Shadow's breathing suddenly stopped, and his heartbeat once again started beating uncontrollably... ..

Buried in the chip, some ancient memories were activated again... ..

"Little Five, did anyone tell you that your eyes are very similar to ours?"

"I'm a professional bionic structure. The structure of my eyeballs uses the latest bionic technology. It's a complete imitation of ordinary creatures..."

"That's not what I'm talking about..."

"Then what does master mean?"

"What I'm talking about is that there's something in your eyes that other robots don't have. It's like... It has feelings..."

The shadow slowly sat on the ground and stared blankly at the sky. At this moment, if anyone saw its eyes, they would definitely be very surprised. The expression in those eyes was completely the most normal expression of a living creature... ! ... Confusion!

Chapter 1656: not considered lying...

"Why did you come back so late?"

The fifth Prince looked coldly at the shadow who came back in the middle of the night with a gloomy face. He had not been waiting for the other party because of that matter. In fact, a few minutes ago, he had been busy with other things.

However, it was not the same for him to be busy and come back late. He was just monitoring a few little kids, and the efficiency of number five was actually so low?

As expected, he was assigned a defective product... ..

Hehe, mother was as biased as always...

The shadow stood in place and was silent for about four to five seconds, finally, he bowed respectfully and said, "In the list given by His Highness, I have been monitoring separately, but I haven't found anyone matching His Highness' description. So, I observed a little more, afraid that I might have missed something..."

The fifth Prince's frown deepened. He had to take so long to answer a question. Could it be that the system had aged. It shouldn't be. The intelligent system was the latest model, so the equipment should have aged... ..

As expected... it was a defective product!

The fifth prince waved his hand irritably. "Scram. Stay away. Don't let me see you..."

The shadow bowed and then disappeared in front of him.

Soon, he appeared in a hidden corner around the fifth prince. It was a distance that he could not see, but as long as he wanted to use him, he would be able to catch up to him at once... ..

Watching the shadow with a gloomy face enter the private training room, the shadow slowly blended into the surrounding black shadows.

The fifth prince has no doubts. After all, no one would suspect a smart liar...

The shadow didn't feel comfortable lying, he followed his master's instructions, he watched the people on the list, the female Elf was not on the list, he... .. It's not a lie... ..

The master didn't ask, did he?

"You're back? Why are you back so early?"

On the other side of the room, Alice's attitude toward Feng Doudou was completely different. The former was confused, while the latter was extremely guilty... ..

"Uh... that... the test process is relatively simple, so... I'll be back soon..." Feng Doudou said with his head lowered.

Alice looked at him suspiciously. "Is that so? which teacher did you choose? Holun or portnair?"

"Uh..." Feng Doudou suddenly became hesitant...

The night before, Alice gave an analysis of Feng Doudou's choice of teacher. She recommended the old and famous teacher, Horon. Saiwen was a teacher who placed great importance on bone structure. He had a lot of resources in his hands, and he had a first-class piece of land: a large number of spots for the shattered islands, according to Alice's analysis, that place was the place where Feng Doudou was most likely to obtain a spot for the ancient land during his newborn period.

Of course, it wasn't that it was the best. On the contrary, in the first-grade plots, the broken islands had a lower status. That was the capital of the former developer of the glorious sect, which had a large number of rare alloys and missing synthetic blueprints.

There were also many active mutated metallic lifeforms and various mechanized lifeforms. For the three large courtyards that didn't specialize in mechanical alchemy, they weren't very attractive. Although divine craftsmen were blacksmiths.., but in the early stages, they mainly focused on training the heart flame. The importance of researching and collecting materials wasn't even as important as getting points in weapon specialization.

After all, in the third year, the first Test was the degree of weapon specialization and Heart Flame Training.

However, Alice had considered this for Feng Doudou. In her opinion, Alice's weapon specialization wasn't a big problem. Although she didn't have the secret techniques of a large family, her foundation

was very solid. This could be seen from her full score in the general exam. It shouldn't be a big problem to deal with the examination... ..

As for the heart flame, this kind of thing depended on one's background. The plots of land with good tinder in the early stages should have been reserved in advance by the top noble children. It was very difficult for an outsider like Feng Doudou to compete with it. It was better to get some that were beneficial to oneself first. After all, a teacher could be re-elected after three years... ..

"HMM?" Alice looked at the other party and stammered. She frowned. "What's Wrong?"

"Ahem... that... Mentor Horun... didn't come today. Many of the mentors didn't come. It should be as you analyzed. They were pre-booked and there are no more slots..."

"Oh..." Alice nodded, and a hint of pity appeared in her eyes. However, she had already expected this. She immediately asked, "So, you chose Portnair?"

Portnair was a candidate, and he was considered a new and outstanding teacher. This kind of teacher didn't have a strong foundation, and there weren't many spots in the ancient lands in his hands. However, his strength was that he was more energetic, and he lacked a high-quality school under him, Feng Doudou had a great chance of getting the other party to focus on nurturing him.

Moreover, although the other party didn't have a top-grade piece of land, and they only had second-grade pieces of land, the quality wasn't bad either. Among them, the Black River land and white deer plains were both very good pieces of land, and he could collect many precious materials, this helped Feng Doudou lay a solid foundation.

"Uh... this..." in the end, Feng Doudou didn't dare to lie, because it was useless to lie. Once the exam list was released, it would be announced by the entire school's website, and it couldn't be hidden... ..

"I picked a big shot teacher who suddenly appeared..."

"Oh?" Alice's eyebrows shot up. "Which one?"

"Uh... Teacher Bode Soleson..."

"Who?" Alice was stunned. In her memory, this name didn't appear on the list!

However, she had heard of this person before. He was a celebrity in the Bronze Academy!

"That... ahem... I didn't expect it either. However, I couldn't help it when such a big shot appeared..."

"Is that so?" Alice moved closer to him and stared straight into his eyes. Feng Doudou's eyelids couldn't stop twitching, and his eyes were dodging all kinds of things. He looked like a comedian performing an eye acrobatics...

"Ha..." Alice sneered and immediately turned around to pack her things.

"You... What are you doing?" Feng Doudou's heart jumped.

"It seems that some people don't really need my help. Since that's the case, I don't have any value to stay behind. Goodbye..."

“Ah, boss, it’s not like that. Don’t abandon me!”Feng Doudou didn’t dare to let her leave. Not to mention the other things, just the one billion yuan bet from Galaxy World Expo was said to be ten to twenty percent of his share. She was going to leave.., who was he going to ask for money from?

After living here for a few days, Feng Doudou once again felt the social reality that a penny couldn’t defeat a hero... ..

“To be honest...”Alice didn’t waste any time and directly said indifferently.

“Oh...”Feng Doudou had no choice but to tell her everything that had happened in the past few days... ..

As expected...

Alice rolled her eyes at him. A big shot like Bode wouldn’t come out to teach on a whim. Since he had decided to announce it at the last minute, it definitely wouldn’t be in the first few rounds. Otherwise, he would steal most of the teachers’s students, as for Bode coming out, most of the spots were reserved. Only a small number of external spots would be left for show. Naturally, he wouldn’t steal the other teachers’s students.

Therefore, it was likely to be the finale. At the very least, it would be in the middle and later stages. If Feng Doudou had followed the original plan, it would have been impossible for him to wait until the end. The only reason was that he had received the information in advance.

In the end, Feng Doudou said that the exam wasn’t satisfactory, and it seemed that there was a high probability that he would be eliminated.

After Alice carefully inquired about the exam process, she immediately furrowed her brows...

She felt... There is a problem!

Chapter 1657: release of the rankings (Top)

According to Feng Doudou, the results of the test were not ideal, but the content of the test was very beneficial to Feng Doudou in Alice’s opinion.

The weaknesses of the players in the Federation were their lack of foundation, poor inheritance, and lack of excellent techniques and secret techniques. However, in terms of basic qualities, according to Ysera, the first batch of players would definitely crush those of the same level.

The problem that Feng Dou was worried about didn’t actually exist. At the very least, he hadn’t discovered it yet. This could be seen from the experiences of little cabbage and Wang Goudan.

One was highly regarded by ILUWETA, and the other was highly regarded by Sylvanas. They were both top-notch characters in the universe. Even they couldn’t see the flaws in them, so it shouldn’t be a problem for the time being.

However, that was the problem...

Bone structure, metal element sensing, and weapon specialization were all Feng Dou's strengths. How could the test be so difficult? From Alice's point of view, even if she wasn't surprised by the entire scene, at least she shouldn't be ridiculed.

After all, Goudan and Bok choy had such good prospects. There was no reason why Feng Dou, who wasn't weak at all in terms of aptitude assessment, would have such a difficult time even in the teacher selection test.

One had to know that even though Wang Goudan had both bloodlines and the Black Dragon Emperor bloodline, which allowed her to reach level 11, she still hadn't won against Feng Doudou in the actual combat practice... ..

Of course, this had a lot to do with the fact that Goudan couldn't control his body's strength in the early stages, but it also indirectly showed how strong Feng Doudou's aptitude was.

"You said that the assistant scolded you during the Bone Phase Test?"

"That's right..." Feng Doudou stretched out his hand, and the spiral gas burst out once again. He said weakly, "Many people are laughing at me for saying that I'm fooling around..."

Alice: "..."

It would be weird if people didn't say that he was fooling around after imitating the ultimate move of an animated cartoon...

From the looks of it, there was only one situation...

"Let's Rest first... We'll talk about it after the list comes out..." Alice said calmly.

"Eh?" Feng Doudou was stunned. He let her go so easily?

"You don't want to rest?" Alice tilted her head and looked at him.

"Eh... no..." Feng Doudou lowered his head. "I'll just practice a little more..."

After saying this much, he walked inside and took out a drop of the mithril that had been given out by the school. As he activated his mental energy, the mithril that had been turned into a transformer started to move again. Under Feng Doudou's manipulation, it quickly turned into a liquid form once again and began to transform into a more refined form...

Obviously, the metal manipulation test today had dealt a heavy blow to her...

Alice smiled slightly but did not stop him. A sense of crisis was a good thing. This was also the reason why Feng Doudou had been suspicious of the player's flaws but she had not refuted him.

Bode Soleson...

Alice searched online for detailed information on the other party. This kind of public figure's information was very easy to collect, and there was almost no need to buy additional information.

Very quickly, she found a key point in the other party's family relationship... ..

Mengku. Soleson, the manager in charge of Galaxy's Borono Morrigan Star!

HMM... ... This made sense. Feng Doudou had previously displayed his strength in Galaxy Boro. It was normal for him to be noticed by the other party's higher-ups. It made sense for him to deliberately suppress and hide Feng Doudou during the test. After all, he was a dark horse.., if he was exposed, could he still be called a dark horse?

But the only problem was..? ... Why did the people of Galaxy Boro not come to meet him?

According to Doudou's performance, as long as he didn't lose his head, the people from Bo Le would definitely come to him to sign an exclusive treaty, but the other party didn't... He would rather toss and turn his brother to trick Feng Doudou into becoming his student, but he didn't directly come to him to talk. Clearly, there was something wrong...

What? Why did you guess that Doudou was tricked?

Isn't that obvious? Since a big shot like Baird didn't decide to make the news public at the beginning, he must have kept it a secret. How could a life instructor know about it in advance and send it to Feng Dou secretly?

Are you kidding... ? ... If this was the case, the news would have been known by many noble children in advance, okay?

As for why he didn't come directly... ... It was very likely that they were afraid of something... ...

It was very likely that if they came directly to see them, there would be some trouble that would follow them.

HMM... ... This had to be guarded against in advance...

Thinking of this, Alice quickly searched for information, trying her best to deduce that trouble directly.

After all, out of the few lines, Feng Doudou's place was probably the most dangerous. This was also why the higher-ups still let her follow Feng Doudou after confirming Bai Cai's whereabouts. Other than being close to him, they also wanted to protect this little guy as much as possible.

Bai Cai had fallen into a very big situation. It seemed very dangerous, but it wasn't. With the protection of ILUWETA, at least for the time being, it wouldn't be a problem. Wang Goudan was highly regarded by Queen XI, and he also had the backing of the Templar family, he was almost the one who didn't need to worry.

There were many Titans in Xandar. With principal Xandar's personal protection and even sending Maya to assist, other than Maya herself being unreliable, there wasn't much of a problem.

Li Goudan had top-tier powerhouses protecting him, so there was no need to worry. Rainy Girl, Wu Gua, and Grandpa Lu both had mentors who valued them personally, including Yun Ji Mu. Both of them had managed to get a leg up in an unpopular school. Feng Doudou was the only one who was in the worst situation... ...

The big shots who had been assigned a mission to the bronze academy at the last minute, without any mentors or escorts, were actually very weak. If they weren't careful, they might have problems.

After all, the outside world is never as safe as it seems... . .

In this way, they each had their own thoughts, and the night passed quickly. . .

The next morning, the notice board of the North Campus of the bronze college was full of people. In fact, once the announcement was made, every admitted student would receive an email and wait directly in the dormitory. There was no need to come to the notice board.

However, people liked to join groups. Most of them couldn't sit still in the dormitory. When they came here, they could use groups to invite people to meet and feel anxious. At the same time, they could make some connections and kill many birds with one stone... ..

When Feng Doudou came over, the place was almost packed with people. She couldn't sleep the whole night and was in a bad state of mind. However, when she arrived here, she was affected by the surrounding atmosphere and felt much more relaxed.

Most of the people were chatting with each other, especially the outsiders. After choosing the same mentor, they would get to know each other because they were most likely to be a student under the mentor's banner.

The relationship between fellow disciples was an important relationship in the federation. A lot of connections started at this time. Not only in their future careers, but even in school, it was also a relationship of mutual help, this was because under a mentor's banner, they were usually arranged to cooperate on various missions. In order to earn credits, they had to cooperate with each other. Under such circumstances, it was very easy to build up a sense of trust between them.

Therefore, chatting in advance was also a preparation. Even those noble children who were usually arrogant would lower their status at this time and take the initiative to interact with some new students who had potential from outside. In case they were fellow disciples in the future, they would try their best to rope them in, they could also support each other during the missions later. After all, the more reliable the teammates were, the greater the chance of completing the missions.

However, Feng Doudou didn't take the initiative to chat along the way. The main reason was that her performance that day was too terrible. Many people saw it and almost classified her as one of the eliminated students. Any student who chose Baird., almost ignored the other party.

Feng Doudou was also happy to be free. He felt the atmosphere and didn't need to trouble himself to interact with others. It was simply perfect!

Just as he was enjoying the atmosphere, a familiar voice suddenly sounded from behind.

"Hey, that... that guy, this way, this way!"

Feng Doudou was stunned. from her spiritual perception, it seemed that the person was calling her. She turned her head and saw a few familiar faces.

After seeing those people clearly, her face twitched slightly. Isn't this the group of people who surrounded me yesterday?

Chapter 1658: release of the rankings (second)

“You’re here to see the rankings too? You’re using the back door...”

The leader of the Dwarves was still as bad-mouthed as ever, but fortunately, he kept his voice low and didn’t show off too much.

Feng Doudou’s face twitched, and he said mockingly, “You’re here to see the rankings too?”

Dwarf reg immediately widened his eyes. “What’s wrong with me seeing the rankings?”

Feng Doudou: “What does the rankings have to do with you?”

“Hey, you...”

“Alright, Reg...” his companion grabbed Reg, who was about to lose his temper, and pushed him to the back. Then, he helplessly smiled at Feng Doudou and said, “I’m sorry, he doesn’t have any ill intentions, it’s just that his mouth stinks...”

Feng Doudou looked at this group of people and nodded slightly. She didn’t dislike them at all. After all, to be able to accommodate such a stupid dwarf, it was obvious that they were more patient friends. It was very rare in this era... ..

At the very least, Feng Doudou hadn’t met many of them. When she was in Ball D, those in the dorm were all close friends on the surface. They seemed to be close, and they wished they were Siamese twins every day. However, in reality, their feelings were as fragile as paper.., they were secretly comparing and ridiculing each other. After she married her teacher, there were even more gossips, so she simply cut off all contact with them.

When she was at the Mars base, her life was a little easier and purer. However, because she was obsessed with her combat talent, she spent most of her time training, and there were very few players that she was on good terms with... ..

“We chose mentor portnair...” the one who spoke was still the gentle-sounding black iron elf, as an elven species derived from the metallic elemental ground, its outline was much more rugged than the traditional and delicate elves.

It was a little different from the eastern beauty and the West German girl...

Seeing that Feng Doudou was a little cold, he patiently said, “You can be considered one of the less competitive ones among the first-line mentors, but I guess we’re not that good either. There’s a high chance that we’ll be adjusted...”

Feng Doudou looked at him. She didn’t dislike this kind of enthusiasm. Her friend’s young master was mainly because she wasn’t an extrovert. However, it was strange to say that she wasn’t an extrovert. Back then, when she took the initiative to pursue her teacher... She seemed particularly bold...

“That teacher, portnair? I heard from my friend that he’s a very good teacher. I was planning to choose him too...”

“Is that so?” Seeing that the other party finally replied, the black elf immediately smiled. “Then it seems like we almost have a chance to become fellow disciples...”

“TSK, hypocrite. Didn’t you just say that you were most likely transferred? Now You’re almost fellow disciples again...” the dwarf, who had already been pushed down, struggled out again and said with a pout.

The Black Elf’s face twitched. He had the urge to bury the other party in the ground.

Is this guy really that natural?

Feng Doudou secretly found it funny. It seemed that this guy’s mouth wasn’t just against outsiders... ..

“We’re very likely to become fellow disciples...” Feng Doudou said self-deprecatingly. “After all, there’s a high chance that I’ll be transferred...”

“I Heard!” Reg immediately gloated. “Fat Head Screw!”

F * ck...

Feng Doudou looked at him in a daze. “How did you know?”

His companions all covered their heads. The Black Elf smiled bitterly. “After you beat this guy up yesterday, he started asking around for information about you. However, you don’t have to do that. After all, the news about you yesterday was quite lively...”

Feng Doudou:” ...”

This was the first time she had become famous here... ..

Luckily, this place was quite far from Grandpa Lu. Otherwise, she would have become a negative example that would be passed down in the base for all eternity!

“Nonsense, what do you mean by I was beaten up? I was careless...” Reg kept his mouth shut. Just as he was about to retort, an excited voice came from the crowd.

“It’s coming, it’s coming!”

The group of people was immediately attracted and looked over. Even Reg didn’t have time to bicker and quickly looked over as well.

Feng Doudou also looked over, his heart full of anxiety. When they came, Alice had told him that it was likely to hit the mark, making her worried about gains and losses.

Although Alice was the one who said it, Feng Doudou still didn’t dare to believe it. I was so humiliated yesterday, how could I hit the Mark? Wouldn’t everyone think that he had opened a backdoor?

The information about the rankings was based on the order in which the teachers had appeared that day. The first person to appear was professor portnair, who was also the teacher that Reg and the others had collectively filled in.

Very soon, Professor Portnair’s influence appeared on the bulletin board. Below him was the student team he had led. There were a total of ten people who had filled in his name. The teachers had accepted

a total of six people. Once the names were out., the short Reg laughed smugly. "I knew it! I will definitely be selected!"

His companions rolled their eyes at him, but most of them were also happy. Out of the six people, four of them had been accepted. It was even better than they had expected.

As expected, this choice was correct. Professor Portnair couldn't attract the top noble children, so he could only rely on his talents. The competition was relatively fair, and he wouldn't have conflicts with the local children. The chances of being accepted were also higher.

Only two people in Reg's group weren't accepted. What surprised Feng Doudou was that one of them included the more enthusiastic black elf... ..

To be honest, this black elf looked like the leader of the group no matter how he looked at it... ..

In fact, the other party should be the strongest. When Feng Doudou moved for the second time, the other party's gaze was the only one that could catch it... ..

"Drow... you seem to have missed..." in the team, another black iron dwarf said with a frown.

"I already told you to fill in the combat department, but you insisted on coming to the Divine Craftsman department with us..." Reg curled his lips. Although he said this, his face showed obvious regret.

Hearing this, the Black Elf smiled indifferently. "It's fine, I already expected it."

"Drow's forging skills are actually the best among us, but his metal element sensing ability is a bit lacking..." a black elf beside him said in a low voice to the confused Feng Doudou.

Hearing this, Feng Doudou immediately understood and nodded.

Dwarves and elves were both races favored by the Divine Craftsman faction. Both had a long history of forging, and their forging skills had their own advantages. However, their emphasis was different, and the dwarves' strong hearts were more suitable for tinder., if a high-quality heart flame was nurtured, the forging and tempering quality would generally be better. Elves' elemental sensing abilities were strong, and they would be more outstanding in shaping materials.

From what the other party said, Drow's forging skills were very good, but unfortunately, the elves' most important talent in elemental sensing was not good enough.

In this way, the Elves' greatest advantage would be gone, and they would naturally be dragged down in the evaluation...

Feng Doudou looked at the other party's hands. They had the slender and beautiful joints of elves, but they had thick calluses that ordinary elves didn't have... ..

It was obvious that he had spent a lot of energy on forging...

Seeing this, Feng Doudou secretly sighed. In this world, the most powerless thing was to like something, but not have the talent in this area... ..

However, she didn't sigh for long before she focused her attention on the notice board. Since she couldn't protect herself, she naturally didn't have much time to feel sorry for others, because there was a high probability that she would end up like them, being transferred... ..

The list on the notice board refreshed very quickly. In about 15 minutes, Vice Dean Bode's acceptance list was published... ..

"Damn, I knew it!" Reggie jumped up and pointed at Feng Doudou. "You're a backdoor!"

Chapter 1659: you actually have a friend?

Did you really... Win?

Feng Doudou looked at the list in a daze.

"See, I told you she has a backdoor, right? You guys were worried that she wouldn't win..." dwarf Reg said with a pout.

"Stop talking..." his friends came back to their senses and rolled their eyes at him. One after another, they stepped forward and said, "Congratulations, Congratulations..."

"UH... Thank you..." Feng Doudou also smiled. "Same to you, same to you..."

The group of people on the other side also laughed. In the crowd, it seemed that only the Black Elf had a forced smile on his face... ..

In fact, they had unknowingly realized that out of the six people, the Elf who was the leader of the team had unknowingly walked to a corner, and everyone didn't seem to care.

However, whether they didn't care or just pretended to be stupid, they didn't know...

Feng Doudou saw it and felt a sense of boredom. He suddenly felt that in the outside world, although everyone had different races and bodies, some things were still the same...

Just like that, Feng Doudou's eyes suddenly lit up. He looked at a place and said to the people around him embarrassedly, "Um... I have to go back first, we'll talk later..."

Several people are stunned, but also nodded to show understanding, after all, this kind of good news, must go back to the first time to share with the family.

Thinking of this, a lot of people also a little want to go back, want to tell their good news at the first time family members, and the crowd of the two partners who failed to make the list, but it seems particularly decadent...

-- --

Feng Doudou arrived at an intersection with ease, and then carefully poked his head over. "Are You There?"

"How did you see me?"

Very suddenly, a shadow stood up in a corner and tilted its head to look at this guy.

“Haha... I’m probably too sensitive...”Feng Doudou laughed. “When something is paying attention to me, I can see it most of the time...”

The Shadow silently recorded that he had an incredible ability to sense the mind. It was suspected that he had inherited an extremely high sensing system from the ancient bloodline...

“Are you... Here to look for me?”Feng Doudou laughed.

“No...”the shadow immediately denied the other party’s explanation. He quickly added another reason, “I’m here to complete master’s mission...”

“Eh, you have a Master?”Feng Doudou was stunned, but he quickly reacted and nodded. “Right, you’re a robot... you’re too normal, I forgot...”

Robot:”...”

Do I... Look like a normal person?

“Hey, right, what mission are you here to complete?”Feng Doudou immediately changed the topic out of curiosity.

SHADOW: “Secret...”

Master’s mission was to find the dark horse in the Baird student group, but all the information indicated that the person master was looking for was right in front of him...

“Not interesting...”Feng Doudou curled his lips, but after two seconds of silence, he took the initiative to strike up a conversation. “Um... Do you have a name?”

Shadow fell silent again. It was another question that was difficult for him to answer.

Name... Ah...

A long, long time ago, there was a female master who called it little five because it was the fifth one. However, after the master was gone, no one had ever called it that again...

“Number, Azjg4527...”the shadow thought for a long time before coming up with this answer... ..

“This is the number, right?”Feng Doudou said unhappily. “It can’t be considered a name...”

The robot was silent for a moment, and in the end, it unconsciously opened its mouth and said, “Little Five...”

However, after opening its mouth, it was stunned. Why did it say this thing. It had never said it to anyone, and of course, no one was willing to listen to it...

“Little Five?”Feng Doudou tilted his head. “It’s more like a milk name that hasn’t been properly written yet. Haha, Alright then, I’ll Call You Little Five from now on?”

The Shadow was silent. It was unknown whether it was objecting or silently agreeing...

“Um, what’s going on with this material of yours?”

Facing this bionic robot, Feng Doudou seemed to have endless topics to talk about. His attitude was completely different from when he faced the group of people from Black Iron Planet. The Shadow had never met someone who was so talkative.., for a time, he could only answer every question that others asked.

After an unknown amount of time, normorrigan began to prompt that night had arrived.

This was a man-made mechanical planet. The Sun and stars surrounding it did not provide heat and light. Instead, it relied on the internal energy supply, so the night usually came very suddenly.

Looking at the sky that had fallen into darkness in an instant, the shadow finally realized that so much time had passed?

For the first time, he felt that the flow of time was different from normal times...

This seemed to involve his own blind spot. He had to go back and check it out...

“AH... it’s already dark...”Feng Doudou looked at the sky and seemed to have lost track of time. He couldn’t help but stick out his tongue. “When I go back, I’ll be scolded by Alice Again...”

“Alice?”

“Well, a very fierce housekeeper...”

“Fierce. Do you hit people?”

“Why, it’s not so cruel. You Don’t get abused often, do you?”

In this way, there is a casual chat, and soon, a few weeks passed... . .

———

When Feng Doudou returned to the dormitory, it was already late at night. As soon as Feng Doudou entered the room, he saw Alice, who was sitting at her desk looking for information. ...

“Ah... You haven’t rested yet?”

It wasn’t that undead didn’t rest. On the contrary, undead rested longer than ordinary people because they couldn’t fully integrate into their genetic bodies. When their body’s functions were depleted, their mental bodies would have to take the initiative to deal with it, resulting in even greater exhaustion... In fact, they needed to rest even more. Otherwise, whether it was their mental bodies or their possessed genetic bodies, they wouldn’t be able to withstand it...

“I’m waiting for you to come back...”Alice said as she looked through the information.

“Wow...”Feng Doudou immediately felt that something was wrong. He quickly hugged the other party and said, “I know I’m wrong...”

Alice:”...”

The level of a dead-faced, white-faced man was really comparable to a cabbage... ..

“I’m waiting for you to come back so that I can discuss the next mission with you...”

“Mission?” Feng Doudou was startled. He raised his head and said, “That... What Mission? Don’t you have to start school for a while before you can have a mission?”

“The preparation period for the start of school is also part of the mission process...” Alice looked at her helplessly. “Don’t you know that the previous missions assigned by the instructors are based on your learning process?”

“Ugh...” Feng Doudou scratched his head in embarrassment.

Alice directly opened the information and said, “I studied the people on Bode’s admission list and made a detailed strategy for you...”

“Ah?” Feng Doudou was stunned. “That... you knew that I was accepted?”

Alice: “The information on the bulletin board is at the same time as the official website...”

“Oh, hahaha...” Feng Doudou once again scratched his head in embarrassment. “I forgot about this...”

Hearing this, Alice narrowed her eyes. “You mean to say that you came back so late even if I didn’t receive the News?”

“No... No... No!” Feng Doudou immediately shook his head in fear. “I... I... I met a friend and chatted for a while before I lost track of Time...”

This time, it was Alice’s turn to be stunned. A hint of surprise flashed through her dark green eyes. “You actually have a friend?”

Chapter 1660: Hemlock Forest...

You actually have friends?

This question made Feng Doudou very unhappy. What do you mean I have friends? Is it incredible that I have friends?

Alice seemed to have sensed Feng Doudou’s dissatisfaction. Without waiting for her to speak, she shook her head and said, “I thought that with your personality, it would be very difficult for you to have friends...”

“Ah?” Feng Doudou was stunned. He looked at Alice and said, “Is my personality... very bad?”

She actually said that it would be difficult for her to have friends, and that he was that bad?

“It’s not that bad...” Alice looked at her with a rare gentleness. “It’s just that I live too clearly and hate to pretend to be ignorant, so it’s hard for me to blend in with my surroundings. It’s actually very difficult for ordinary people to become your friends...”

Feng Doudou: “...”

“Let’s not talk about this...” Alice opened the file. “Let’s talk about the mission first...”

“Oh, Oh, okay!” Feng Doudou nodded repeatedly, as if he was avoiding this topic.

“Bode has accepted twelve people this time. The original plan was to accept ten, but later, they made an exception and accepted two more. According to the analysis, eight of them were long-established noble spots. They are all direct descendants of the top-tier divine craftsman family in the normorrigan, so they definitely have priority in the mission. The remaining four people, like you, are from other places, so they should be selected based on their talents. Among them, besides you, there are two aboriginals, and only one is a descendant of the Howens White clan in the East Star Field

“Out of the twelve, three of them are aboriginal children. It’s very beneficial to you... “...”. Alice looked at Feng Doudou. “This way, you won’t stand out. People will think that Bode is intentionally bringing up high-quality Aboriginal children. The reason is also very reasonable. After all, the Lord of Blue Moon he is following is rumored to have been born as an Aboriginal...”. “...”

“AH? Which Blue Moon? The one posted on the Federation’s official website?”Feng Doudou said in a daze.

“Which other one?”Alice rolled her eyes at him.

“Wow, she’s actually a native?”Doudou had recently learned about the stories of the ten great feudal lords. This cang Yue could be considered the most unique of the ten great feudal lords. After all... “...”. She was the one who killed the emperor!

“Rumor has it that she’s a native...”Alice said faintly, “But no one knows the details...”

“Oh... that’s not right. What do you mean I don’t stand out?”Feng Doudou suddenly realized something. “Would it be a problem if I stand out?”

Alice wasn’t surprised that Feng Doudou could react. He was a very smart person to begin with.

“You must have been targeted by someone, so you need to plan your mission in the future. You Can’t stand out too much, but you also need to get something out of it...”

“Eh... You were targeted?”Feng Doudou said in a daze. “Is the target someone you can’t afford to offend?”

“There’s a high probability that you can’t afford to offend them...”Alice said with a tilt of her head.

For someone with Bode’s status to choose to cover up Feng Doudou in such a confusing way, it proved that the other party was indeed a troublesome person... ...

“Oh...”Feng Doudou nodded carefully, but he didn’t ask anything else.

Alice opened the information and said, “Let’s talk about the target first. Bode has a lot of land. From the land of the five dragons to the Black River Forest and the Viper Temple, there are places available. The new batch of ancient lands is about to reopen this time. If you perform well, you’ll be able to enter very quickly...”. “...”

“Oh!”Feng Doudou was immediately energized. When it came to dungeons, his player attributes were raised to the extreme... ...

“I’ve looked it up. Among the newly opened ancient lands, the most ideal place for a divine craftsman is a place called Hemlock Forest...”

“Hemlock Forest?” Feng Doudou arched his nose. “It doesn’t sound like a very high-class place...”

Indeed, in the game, this kind of name was indeed like a small place after leaving the novice village. Thorny forest, black desert, it didn’t sound high-class at all... ..

Alice could only roll her eyes at the thinking of these Internet addicts, she said coldly, “As the name suggests, Hemlock Forest is a huge mountain forest, but the entire region’s forests are metalized. According to the records of the civilization, this is the first place to be mechanized. It is the origin of a faction of the ancient developer civilization. That faction advocates fully mechanized life forms, trying to evolve the entire universe into a high-level mechanical life form!”

“I go...” Feng Dou dou stunned way: “Fanatical sect, ah, fortunately did not succeed, or not satisfied with the universe of Transformers...”

Alice: “That piece of land left behind a rich heritage of civilization, including the super metal body that the current mainstream mechanical alchemists could not synthesize, the unique metal life, and a magical tinder that can mechanize objects. It is known as the fire of Seth, one of the top tinder, and is the heart tinder that many divine craftsmen dream of...” “... “...”

“Oh! !” Feng Doudou became even more excited when he heard that. The items dropped from this dungeon seemed to be able to close the gap between her and the children of the noble players!

Divine craftsmen had always been a noble class, almost no less than a high-class job like a priest. Apart from the fact that divine craftsmen consumed a lot of precious materials during the training process, heart fire was also a major reason.

Every qualified divine craftsman had to have their own unique heart fire for forging materials. After all, it was difficult to forge fine high-grade cold weapons with the flame of technology and high-temperature furnaces!

Because the difference in the characteristics of all kinds of materials in the world was very big. Some materials needed what temperature, and some materials needed what special energy to decompose. They all needed a strong heart fire to temper and solidify!

As for kindling, there were grades in the universe. A divine craftsman’s heart could only train a limited number of kindling, especially the first kindling. It was of utmost importance. With the help of their families, the descendants of noble families.., often, they would be able to obtain a kindling of good quality, while the first kindling of a commoner’s child was usually of poor quality.

However, the problem was that once a kindling was bound, it couldn’t be separated. It was a disadvantage that couldn’t be changed no matter how hard they tried in the later stages.

Feng Doudou’s conditions were bad. He had already made the first fire seed to get a good and cheap fire seed, but he didn’t expect to have the chance to get a high-grade one!

“Don’t be happy too early...” “...” Alice rolled her eyes. “This place is a piece of land that the divine craftsman disciples must fight for. It’s as intense as the land of the five dragons. Under normal circumstances, there won’t be any extra spots for you brats. If you want to fight for it, you have to show results that Bode is satisfied with!”

“If you’re satisfied with your results, will you make an exception?” Feng Doudou asked curiously.

“Maybe...” Alice didn’t give a definite answer, and immediately said, “But if the three of you have the chance to get a spot on this piece of land, the increase should be quite big...”

“The three of us?” Feng Doudou was stunned.

Alice: “Although the Bronze Academy didn’t cooperate with the Starry Sky Academy this time, there were exchange students in the ancient land. The special mechanical lifeforms in the hemlock forest are rare beast species for many magical beast masters, so there are a few spots in the starry Sky Magical Beast Academy. Cabbage has the chance to fight for it...” “...”

“Oh, cabbage has a chance to come?” Feng Doudou’s eyes lit up. It was a happy thing to have an acquaintance in an unfamiliar environment.

Moreover, that guy was a lucky star. It seemed that good things would happen wherever he went. It should be no problem for him to follow her...

“You said three just now. Who’s the other one?”

Alice slightly raised her eyelids when she heard that. “Li Jiayi...”

“Uh... Who’s Li Jiayi?” Feng Doudou didn’t react for a moment. It was only after 0.5 seconds that he remembered the memory retrieval in his brain. He came to a sudden realization. “Oh... Ergou Dan...”
