

A Bunch 1661

Chapter 1661: "The newcomer is quite arrogant..."

Ergou Dan...

Even though Alice usually kept a straight face, her face couldn't help but twitch... ..

Ever since the fifth city incident, Wang Gou Dan had become completely famous in galaxy. The name of Gou Dan had not only spread across Mars, but also the entire d-ball network. Many netizens only knew that there were two Gou Dan after inquiring about it.

So, how was the distinction made. There was the distinction between Big Goudan and Little Goudan. After Wang Goudan switched to the Black Dragon bloodline, he was obviously much bigger. Compared to the elegant Li Goudan, he could indeed be considered a big goudan... ..

"By the way... How is Li Goudan doing now?"Feng Doudou was suddenly curious.

Li Goudan and her relationship was actually relatively good. There was a time when that guy suddenly wanted to become an adventurer, so he trained hard and often looked for Feng Doudou to practice.

Is in addition to cold star, a few can and oneself sparring player...

"She lives..."Alice rolled her eyes at Bean. "You should be better than you..."

Feng Dou Dou:"..."

As far away as the eastern Starfield, the Zephyr Academy had already started classes ten days ago. Unlike the Starry Sky Academy and the Bronze Academy, which focused on ceremonies and numerous families, the Zephyr Academy was also a university with a long history, however, it had always maintained the demeanor of an ancient hunter and paid more attention to efficiency. It rarely wasted time on useless etiquette meetings.

Li Goudan was extremely satisfied with the atmosphere of this school. The only thing that he was slightly dissatisfied with was the fact that he rarely interacted with the students around him.

The reason was also because of his mentor. Although his mentor, Tia, was a well-known mentor in the school and was also the leading figure of the school's Ming Zhou faction, due to the fact that the students who were previously in charge had not graduated, there were still quite a number of them, she was not in the group of mentors set up by the new students.

In other words, she was accidentally forced into her group by teacher Tia...

Most of the students under teacher Tia were high-level students in the senior year. She was the only novice. Moreover, teacher Tia seemed to be intentionally hiding information about her. Usually, she would teach the class one-on-one, most of the time, she practiced alone, and there were very few students she could get in touch with.

However, the students here were all full of vigor, and they seemed to have the exploration characteristic of Rangers. It was common to see groups of three to five students together exploring the ancient forest within the academy.

This forest dog egg also had an exploration. Although it felt quite good to be alone, it didn't seem lonely to be in groups of three to five.

Suddenly, he missed big doggie...

Li Doggie stretched and pouted. Did Big Doggie Miss Him?

However, that guy was heartless. In the base, he was second only to little cabbages. He probably had some fun somewhere... ..

Forget it, let's not think about it. Let's think about what the instructor will teach me today?

Li Goudan began to have a faint sense of anticipation in her heart. Everything here was very novel, especially in terms of classes. The Ranger classes that the instructor specialized in teaching were both interesting and practical, compared to the novice instructors in the base, they were completely different dimensions.

However, when she entered the moonlight forest that the instructor usually trained her in, she was stunned for a moment. This time... .. It seemed that she was not the only one. There were also quite a number of people... ..

"Oh?" In the forest, the few figures gathered under the bright moon were sizing up the newly arrived doggie. Their eyes were filled with a sense of scrutiny... ..

Doggie's heart tightened. She was not used to being sized up like this.

"You are teacher Tia's new disciple?" From the tree trunk, a lazy voice sounded. It was full of laziness. Doggie looked up and saw a man dressed in blue sequoia... ..

The surrounding people frowned slightly, as if they were not very interested in this maverick fellow.

Indeed, everyone who came here was wearing regular ranger equipment. Although this new girl was wearing the novice equipment given out by the academy, she still had a proper attitude. Unlike this guy, who went out in plain clothes... ..

"Eh? It's a Wood Elf?" The Blue Sequoia Man on the tree trunk suddenly let out a curious exclamation. He stood up smoothly and stepped forward, instantly arriving in front of Doggie.

Eggface widened his eyes in curiosity. Her master had used this step before. It was the instant step, one of the advanced steps of the School of light. No matter if it was master Wayne or Grandmaster Tia, they hadn't taught him yet. According to what they said., this step required a certain foundation.

"Oh?" Looking at Eggface's eyes, the man slightly put away the lazy expression on his face and carefully sized him up.

Because he realized that when he used instant steps to approach from high up in the sky, this girl's line of sight could actually follow him all the time... ..

A new student, interesting...

“Wood Elf?” The group of people also looked over curiously and immediately reacted, a female elf rubbed her chin and said, “I mean, I haven’t seen this pupil shape before. So it’s a wood elf. Junior sister is a native with a high bloodline, it’s rare...”

“Hehe...” Goudan smiled at the female Elf who called her little junior sister in a friendly manner. ...

The female elf felt an inexplicable warmth in her heart. She thought to herself, ‘an ancient elf. She’s really good-looking...’. ...

Just as she was about to say something, she suddenly saw a cold light speeding toward her. The female elf’s pupils constricted, and she suddenly stretched out her hand to block the cold light!

Both of them were astonishingly fast, and in an instant, that cold light turned into a stationary flying knife that was firmly grasped in the female elf’s hand.

“Are you sick, Bi Lan?” The female Elf said angrily to the owner of the flying knife.

The surrounding people also looked at the owner of the flying knife with dissatisfaction. It was the Blue Sequoia Elf who had jumped down from the tree earlier.

Although they were not very satisfied with the teacher suddenly taking in a new disciple to distribute resources, they did not have the face to really target a new person.

The flying dagger owner chuckled. “I saw that this girl was not simple, so I decided to give it a try...”

As he said that, he looked at eggface. “Girl, why didn’t you Dodge Just Now?”

Eggface smiled and said, “Didn’t you have this elder sister to help you catch it?”

These words stunned everyone. When the Blue Sequoia Elf heard this, her eyes narrowed and she smiled like a fox. “You trust her so much? What if she didn’t catch it?”

Eggface: “She can catch it...”

“How do you know?”

“I can see it clearly...”

Everyone: “...”

Hearing this, not only were everyone stunned, even the female elf who had just caught the flying dagger was a little surprised. She looked at eggface. What did he mean by this? Not only could she see Piran’s flying dagger clearly, but she could also see her own movement technique?

“Oh?” The man named Bilan narrowed his eyes. “What if she can’t catch it?”

“UH...” Eggface felt that the other party was very persistent, so he said helplessly, “Then we can hide when the time comes...”

Bilan: “Is it in time?”

Eggface: “It should be... in time, right?”

Bilan immediately smiled. "The little girl is quite arrogant..."

Everyone's expressions turned cold, especially the female elf from before. She had also put away her originally gentle expression.

Piran's words represented what they were thinking. This newcomer was indeed a little arrogant...

Chapter 1662: Li Goudan's team...

Eh... Did I say something wrong?

Goudan looked at the cold atmosphere around him and thought in a daze.

"Have you had enough fun?"

A cold voice sounded, and everyone's expression changed. Even the most casual-looking blue sequoia youth's expression became more serious...

"Lord Tia..."

The group of people respectfully performed a hunter's salute unique to Zephyr...

Doggie also imitated it. She liked Hunter's salute very much, and she felt that it was much more elegant than traditional elf etiquette. It was elegant and had the aura of an adventurer... ..

"A group of bastards who don't make people feel at ease..."Tia pursed her lips and rolled her eyes at the group. Then, she directly looked at the Blue Sequoia Youth. "Pielan, how many times have I told you? You have to wear a ranger outfit when you assemble..."

"Sigh... Don't be so strict, my lord..."Bi Lan looked lazy again. "Didn't you say that today is just a mission? You Don't have to train. Wearing that is uncomfortable..."

The surrounding people rolled their eyes at him and thought to themselves, "Didn't you often not wear it when you do missions?"?

However, although they did not agree with him, they had known each other for a long time, so few people said anything about him.

Bi Lan was an inner disciple of teacher Tia's family. Furthermore, he was a direct descendant. In terms of relationship, he was teacher Tia's junior. In terms of talent, he was almost the best among this group of disciples.

Although he had entered the sect the latest, his strength had increased the fastest. Currently, other than the person who was about to graduate, Dutton, there was almost no one who was his match... ..

Many times, when the teacher assigned a mission, the other party did not bring any ranger equipment. He could only rely on his bare hands to solve it. This had also resulted in the unique style that he had now. He often carried out missions with his bare hands.

According to him, it was not a good thing for a Ranger class to rely too much on equipment. Once they had trained themselves well, they would be the best weapon... ..

In the face of her junior's maverick behavior, Tia had reprimanded him, but it seemed like... .. She did not forcefully correct him. It seemed like she was indulging him... ..

As expected, seeing the other party's lazy response, although TIA's expression was cold, she did not say anything. This caused Li Goudan, who was standing at the back, to be slightly stunned.

She did not really like wearing such complicated ranger equipment before. The structure of the equipment was complicated. Although they were all high-end leather armors, and she had tried her best to take into account the air permeability and comfort, with so many pieces of equipment on her... It was still a little uncomfortable...

Moreover, she had to be careful not to trigger certain hidden weapons and equipment on her body at all times. She also had to memorize how to use the equipment on her body. It was not too troublesome... ..

She had also checked her information. Ranger equipment was the most complicated among all classes. Although assassins also ate equipment, they only brought small and nimble pieces. Many times, Rangers needed to explode, and they needed to have extremely high firepower, they had to bring very sharp and large pieces of equipment.

For example, the one that sad puppy was carrying was the wind walking crossbow that the academy's Ranger equipment provided. It weighed up to 16 tons, and that wasn't even counting. The main thing was the firepower ammunition that they had prepared beforehand... ..

The mechanical rangers had to carry high-level ammunition clips, while the traditional rangers had to carry high-strength arrows. Most of these arrows contained very strong energy, and their quality wasn't low. Not only did they weigh a lot, but they also had to be maintained with spiritual energy at all times, to prevent the elements from going berserk inside.

As for why they didn't put them in the space?

Actually, Eggface had wanted to ask this question a long time ago...

However, according to Tia's answer, taking a weapon out of a dimensional pocket during the mission period was courting death. Not only would the dimensional fluctuations reveal your location, but your spiritual power would also be used to open the dimensional pocket for a short period of time, if you met an expert of the same level, it was highly likely that you would be killed in one go.

If you met a strange warlock, you would be able to open the dimensional pocket and secretly release some spell in your dimensional pocket... ..

A Ranger had to get used to wearing a ranger costume. When he went out, he had to maintain the habits of a hunter. If he was relaxed now, he would regret it in the future when he reached a critical moment... ..

Such an explanation made sense. At that time, Gou Dan was also stunned. In the past ten days, as long as he got up to participate in training, he would be equipped with this tired and troublesome ranger costume...

Even when he quietly took it off during dinner, he would be severely reprimanded by Tia, causing Gou Dan to tremble in fear. But why was it different here?

Gou Dan immediately looked at the other party with envy. Was this the legendary privilege of a good student?

This reminded her of when she was young. When she was in primary school, there were also boys who often sat sideways in class for the sake of bragging to their classmates behind them. But because they were the top students in the class., therefore, the teacher basically pretended not to see it.

At that time, she had just transferred to another school and felt that the other party was very cool, so she followed suit. In the end, the teacher dragged her down the corridor and made her kneel down, making a fool of herself the whole morning... ..

With his previous experience, Doggie did not have the idea of imitating the other party for the time being... ..

“Let me introduce to you...”Tia looked at Doggie, her voice was slightly gentler. “Four seniors, Darden Bickx, level 91 senior, the one with the highest academic age in the team, Ranger windwalk. The last person to participate in this year’s social gathering will be your team leader...”

As soon as she said this, the tall and somewhat rough black iron elf hurriedly greeted Eggface with a smile in his eyes.

As the oldest student of his mentor, Dutton’s aptitude was not the best. In the past, his fellow disciples were much stronger than him. As for the new batch, although they had yet to surpass him., each of them had great potential and were obviously more valuable than him.

This was especially so for Pielan. She had a high chance of surpassing him in the next ten years, but his mentor had still given him the position of team leader in advance to show his recognition. Moreover, as a team leader, most of the time, when it came to the rewards and rankings... It would give her an advantage. It was obvious that her mentor wanted to give her a chance to study in the ancient lands before she graduated... ..

Thinking of this, the commoner-born Dutton felt even more grateful. He was also kinder to the New Dog Egg.

“Miller Hathaway, God Hunter Ranger. The backup in the team responsible for setting up traps and optimizing equipment. Level 31...”

Eggface looked over. It was the one who had taken the throwing knives for him earlier... ..

The other party smiled and nodded at him. It was obvious that he was perfunctory. It was obvious that he was dissatisfied with Eggface’s words from the start.

“Rollin Nieke, Beast King Ranger. Scout and frontal fighter in the party. Level 45. Rich experience. You can ask him if you don’t know anything...”

Rollin nodded slightly at Eggface. He tried to soften his eagle-like sharp eyes. Eggface immediately greeted him with a smile.

“That slob is called Pielan. He’s a descendant of our family. He’s 20 years old and is the youngest one in the team besides you. His class is...”

“All-rounded Ranger!” Pielan quickly said!

“It’s not decided yet...” Tia coldly denied the other party’s own fabricated class... ..

Pielan instantly lowered his head like a frost eggplant, while Dogball revealed a strange expression...

Chapter 1663: Quest (Part One)

She really is an unconventional person...

The corners of Li Goudan’s eyes twitched slightly. She had been taking classes for 20 years, but she did not even choose a direction. The instructor was not usually indulgent. Perhaps she was really very good?

She had heard about these job classes when she was choosing classes. She had not chosen a direction yet, but she had roughly understood it in advance. There were many types of rangers, such as Divine Shot Rangers, Beast King Rangers, Divine Hunter Rangers, and so on, each of them had their own specialties. Shooting god Rangers were proficient in all kinds of long-range weapons and were nimble firepower masters. Beast King Rangers were more comprehensive, but they had magical pets. Because they had to communicate with magical pets, they would learn the lessons of taming magical beasts.

Different from Magical Beast Masters, Magical Beast Masters mainly cultivated magical beasts. Beast King Rangers directly used high-level magical beasts to cooperate with them. They had many secret skills to strengthen the temporary combat strength of magical beasts.

It was also the main customer of a magical Beast Master, as a beast King Ranger would often bring three to five magical beasts to carry out missions. Moreover, the frequent missions had a very high rate of magical beast losses, so they would often change. However, as Rangers, most of their daily activities were to train themselves, which was why there was a market for Magical Beast Masters... ..

A Divine Hunter Ranger was more behind the scenes, specializing in mechanisms, traps, as well as mechanical and magical deciphering. It was somewhat similar to a scout, and was a comprehensive job.

Lastly, there was wind ranger. It was a unique ranger series in the Zephyr Academy. Only students with wind element affinity could choose it. It belonged to the Elemental Fire Ranger class.

Many people felt that Rangers were a balanced class and knew a little about everything. That was because there was no subdivision among them. In reality, most Rangers specialized in one element. After all, their energy was limited. If they learned too much, it would hinder their growth.

After all, life force growth was the way, and these killing skills were only techniques. It was a very foolish choice to focus on techniques while neglecting the way... ..

As for which direction dog egg wanted to go, he had yet to figure it out. She was a wind demon, and in theory, a wind ranger was more reliable. However, she had recently been quite interested in beast taming techniques. And recently, she had also been quite interested in the dismantling of machinery and magic arrays in class... ..

As expected, after getting rid of the boring exam-oriented education, learning was actually a very interesting thing many times... ..

After introducing her senior brothers and sisters, TIA introduced Goudan again. "This is Li Jiayi, a personal disciple recommended by Vien to enter the school!"

"Oh?"

This introduction immediately caused everyone to once again size up Li Goudan... ..

Vaughn was the only personal disciple that teacher Tia had taken in ever since she entered the Zephyr Academy. She was a top-notch genius who had stepped into the star rank in the new age. Currently, she was well-known in the mercenary world.

No wonder teacher Tia had clearly said that she would not take in any disciples this year. In the end, she still made an exception and accepted them. So there was actually such a relationship... ..

Immediately, her expression became complicated.

In this way, this little girl could be considered as teacher's grand-disciple... ..

One had to know that a disciple and a direct disciple were two different things. The former had a master-disciple relationship, but it wasn't the traditional father-son relationship. The latter was different. Most of the time, in the federation, the importance of a direct disciple wasn't inferior to that of a direct disciple, it was the existence of a legacy!

If such a little fellow joined, it would probably take away a lot of resources...

"Oh, so it's the little junior niece..." Pielan suddenly laughed. "Quick, call her junior uncle?"

"Uh..." Goudan's face twitched as he looked at Tia. Tia snorted coldly. "Ignore him, he's not qualified enough..."

"It's not a matter of time..." Pielan was still smiling mischievously.

He did not care much about Goudan's identity. So what if he was Vaughn's disciple? Their relationship had been separated for generations. He was the direct descendant of Tia's sister's bloodline. Blood was thicker than water. Moreover, his goal was to become TIA's disciple. In the future, he would not only be the family leader, he would also inherit Tia's position in the Ranger Association.

How could his status be the same as that of a wild disciple?

Tia glanced at him. She was expressionless, but she did not say anything. The surrounding people looked at each other when they saw this, because it gave people the feeling that she had tacitly agreed.

However, thinking about it, it was understandable. Bi Lan's talent was extremely high. The last time she participated in the Fellowship Party, she had obtained very good results. Moreover, she was a direct descendant of teacher Tia's family. In the end, if the inheritance was not given to him, who else would it be?

"Stand properly, let's get down to business..." Tia casually skipped over the topic just now. She directly tapped on the air, and a huge screen appeared in the middle of the crowd.

"I'm sure you all know what's going on. The new students are starting school, and a new batch of ancient lands is about to be released. I also happen to have a batch of slots..."

“My Sea of Gazing?” Pielan’s interest was immediately piqued, and everyone frowned slightly when they heard this question.

The Sea of gazing was one of the high-grade plots, and was the birthplace of the ancient Ice Naga civilization. It was an extremely cold place, and there were actually not many direct descendants suitable for Rangers in it.

There were three things that the Sea of hope produced. One was an ice crystal, which was a top-grade natural ice elemental magic crystal. Until now, there was no technology that could be artificial, so it was a very rare material, for people who had an ice elemental constitution, it was a dream come true. After all, an ice weapon was like adding wings to a tiger for people with an ice elemental constitution.

However, no one here had such a constitution.

Secondly, there were rare sea beasts in the Sea of hope. However, most of the sea beasts in the Sea of hope were ice-type, and sea beasts were the most difficult to tame among the magical beast species. Generally, the non-naga race., very few Rangers could perfectly interact with the sea beasts, so it was of little significance to the only Beast King Hunter in the team, Rollin.

The third was the excellent flame seed there: Frost Fire Heart!

This was a very unique flame seed. It was a special flame seed that was specially made for the Ice Naga to improve their ice weapons. It was a strange flame that was compatible with extreme cold and high temperature.

This was what Pielan wanted, and this was why everyone frowned.

Pielan was curious, so he wanted to collect this special flame seed. He already had the main flame seed that his family had prepared for him, yet he actually disregarded everyone’s collective interests in order to collect the strange flame seed, this kind of behavior that completely ignored everyone’s interests was also the reason why many people did not like him.

However, he obviously did not care. He looked at Tia with eager eyes... ..

Tia said expressionlessly, “I also have a spot in the Sea of endless hope, but there is only one. If you can be the first to complete the mission I issued and come out early, I will give you the spot!”

“Good, good, good!” Pielan immediately clapped happily. “Teacher, you have to keep your word...”

The people around sighed slightly. As expected, they were related by blood, so the treatment was different...

“The same goes for all of you...” Tia looked at the crowd. “Whoever is the first to complete the mission and come out, will have a limited right to choose one of the spots in my hands. There will be a spot for those who come out later, but there are two points. First, I have a limited number of spots. If you come out late and the good spot is taken by others, don’t blame me. Second, if you can’t complete the mission, then I’m sorry. Not only will there be no spots after you come back, but I will also have a discount on the credits!”

“Oh?” Everyone’s eyes lit up. They looked at their mentor with fervor and thought to themselves, this is a huge sum of money...

“Mentor, do you mean a solo mission?” Goudan Li asked about the mission itself.

TIA’s gaze was gentle as she looked at Goudan with a smile. “It can be a solo mission or a cooperative mission. It’s up to you to choose.”

Everyone looked at each other and roughly understood what their mentor meant. Pielan anxiously asked, “Where is the location?”

“Hemlock Forest! !”

Chapter 1664: Quest (Part Two)

Hemlock Forest?

Everyone was stunned, including Bi Lan!

Hemlock Forest was an ancient land with a high value for money. There were many things that Rangers could use, such as high-grade synthetic metals or reactive metals. For divine shot Rangers, they could make firepower equipment, especially for firearms, there were many rare metals that could be used. For Divine Hunter Rangers, high-grade metals could make excellent traps, they could also be used to make high-grade magic-breaking weapons and high-grade living metal tools that could be used to dismantle machinery. For Beast King Rangers, they could collect materials to make armor for their companions.

There were also mechanical lifeforms that could be collected and used to be nurtured by magical beast masters to grow into high-grade war beasts. Mechanical War beasts were all-rounded and had strong combat strength. They were the type of war beasts that many Beast King Rangers liked very much.

Finally, there was the unique fire of Seth. Although the students here basically had their own fire seed, the fire of Seth was a high-quality fire seed. Moreover, it had all-rounded functions. It was very suitable to be nurtured as a second fire seed.

In short, it was a place that was much more cost-effective than the Sea of Bullsh * T Hope!

“Isn’t hemlock forest a plot of land for the Bronze Academy?” As the captain, Dutton was happy, but he did not forget to ask, “Is it a trading quota?”

Between the various universities, there were many times when they would trade high-grade plots of land to enrich the resources that their students could obtain. Normally, it would be very difficult to obtain such a quota... ..

“Mm...” Tia nodded. “This year is the year of the crown prince. We have already started an official cooperation with the Bronze Academy. In order to improve the overall combat strength, we have exchanged several plots of land quota...”

Collaboration with the Bronze Academy?

A few of the students looked at each other and felt that it was a little strange. According to tradition, they would usually collaborate with the Starry Sky Academy. Moreover, from the momentum, Tyrande,

who had just caused the birth of the water lord a few days ago, was clearly more likely to be the champion.

Under such circumstances, instead of clinging onto the thigh of the Starry Sky Academy, they went to collaborate with the bronze academy, which they had never collaborated with before. This immediately caused all the students to feel a little surprised... ..

Faced with the doubts of the students, TIA smiled wryly. She did not know what the principal was thinking. This year, the Zephyr Academy, which had fallen to the tenth place, was already at the edge of the cliff. If they did not seek stability at this time... They had actually changed their previous strategy. She did not know what they were thinking... ..

Of course, she did not really like the Star Academy personally. After all, those star Elves were famous for their arrogance. Every time they collaborated, they would use the people from the Zephyr Academy as cannon fodder. In fact, she had already been displeased since a long time ago.

However, every time they cooperated, the results weren't too bad. The Starry Sky Academy didn't forget to give them a portion of their points. After so many eras, there hadn't been too many problems with their cooperation. In the end, they had found another partner at such a crucial time... It indeed gave people a rather strange feeling...

"You don't have to worry about such a big strategy..."after calming herself down, Tia said in a serious tone, "Do what you're supposed to do. Tell me about the situation and mission this time..."

As she said that, Tia tapped on the screen, and the video of the Hemlock Forest appeared on the screen!

Goudan stared at the screen with his eyes wide open. As an adventurer who was motivated to travel across the galaxy, he was always passionate about strange places.

In the screen, there were numerous towering trees that towered into the clouds. However, the strange thing was that these giant trees were metalized, like a steel forest... ..

The entire plot of land was almost metalized. The grass, flowers, and wild beasts that passed by from time to time were all filled with a thick metallic wind!

Goudan's eyes immediately lit up. Such a unique place was obviously worth going to. He could write it in his adventure log. Hehe, it would definitely be very popular on the base's official website, it was possible for him to surpass Grandpa Lu and become a new generation Internet celebrity!

Just as Goudan was about to make his big wish, Tia's voice interrupted her, she continued, "This is a multi-academy joint exploration mission. There are quite a number of academies participating in it. Among them, there are four of the top ten academies. Other than us, there is also the owner of the land: The Bronze Academy, as well as our old friend, Starry Academy. Lastly, there is still Tyree Fasson Academy!"

"Tyree Fasson Academy?"Pielan's interest was immediately piqued. "Is demonstar here?"

Tia gave him a scrutinizing look. "Are you looking forward to meeting him?"

"Of course!"Pielan immediately smiled. "Although he is a lowly native, he is a good opponent..."

The surrounding people secretly pursed their lips. A good opponent, and you are worthy of it?

They were both newcomers who had just entered the academy, but Demon Star was the dark horse who almost won the last fellowship. Where were you?

Li Goudan tilted his nose and thought to himself, what is a lowly native?

Tia glanced at him and said indifferently, "You will get what you want..."

"That is really something to look forward to!" Pilan rubbed his hands in excitement.

Everyone was silent. They didn't understand what he was excited about. Was he looking forward to being beaten up after meeting the other party?

They understood almost without the need for the instructor to say it. This joint exploration mission of multiple schools was said to be a joint effort, but in reality, each school had their own competition. After all, the first to discover something like this would be the first to discover it. How could it be a cooperation?

Under this mode, the stronger the opponent, the harder the mission was. No wonder the instructor was so generous. It turned out that there were top-notch experts from other universities. Even Demon Star was here. This mission was probably going to be a little tricky... ..

"Then... are there any royal disciples present?" Dalton asked carefully.

For him, who was about to graduate, every opportunity to cultivate in the ancient lands was very precious. Of course, he hoped that the mission would go more smoothly.

When this question came out, Bi Lan also became obedient. After all, he was not so arrogant as to think that he could contend against the royal disciples in the ancient lands.

"Not this time..." Tia said lightly, "In this cooperation, all the forces have tacitly excluded the royal disciples. After all, the royal disciples are the main part of the alliance, so it's impossible to expose their strength in advance..."

"Oh..." everyone immediately heaved a sigh of relief and thought, that's good!

Unlike the others, when Dogball heard that it was a multi-school alliance, his heart jumped, especially when he heard the names of several schools.

She secretly took note of the list of schools that would be participating in this event on the teacher's virtual screen.

Tyree Fassion Academy, Starry Sky Academy, Bronze Academy, and below that, Night Shade Academy, Spark Academy... ..

So many familiar names...

If she didn't remember wrongly, Wang Goudan seemed to have gone to Tyree Fassion, right? Then, in Starry Sky Academy, the cabbages seemed to be in there, right?

She had heard from boss raindrop that Feng Doudou had gone to the nearest bronze academy in order to take care of the cabbages... ..

Finally... .. If it was Spark Academy, F * ck, wasn't that where Grandpa Lu was at?

As soon as she thought of this, Goudan became excited. Although she hadn't been separated from everyone for long, to be honest, she still missed her acquaintances in this unfamiliar environment... ..

She didn't know if these guys would have the chance to participate in this mission. If they did... .. That would be interesting... ..

Chapter 1665: Gathering (I)

Starry Sky Academy:

"Wow, mother, it's still so early. Let me have a good rest..."

In the dormitory, little cabbage was like a dead dog. She stuck her butt out on the bed and looked as if she wouldn't get up even if she was beaten to death. Seeing this, Ni Lan was speechless... ..

This Lass's personality was like the morning sun, making people like her. She was exceptionally talented, almost catching up to the younger generation of the royal family. Ni Lan was satisfied with almost everything, but the only thing she wasn't satisfied with was her lazy and gluttonous personality.

Forget about the delicious food, her lazy personality really made her speechless. This guy wasn't an ordinary lazy person. He was the type of person who could give her a day off to rest at home. Ni Lan felt that if no one urged him... This guy probably slept like a dead pig every day... ..

This made her very curious about how he lived when he was on the Aboriginal planet. If the Aboriginal mother treated him harshly and had a good upbringing, he shouldn't have such a lazy personality. But if the Aboriginal mother spoiled her.., how had her life level increased?

After all, no matter how good her aptitude was, without hard training, it was impossible for her to grow to such a level, right? Moreover, most aboriginal planets were barren in resources, and their energy density was far from that of high-grade planets. Even if the other party was born on a higher-grade Aboriginal planet, even if it was a grade 1 planet, it wouldn't be possible for her to sleep until Grade 10, right?

Ni Lan did not know why, but when she looked at the cabbage that was about to fall asleep, the corners of her mouth curled up slightly. Could it really be that she had fallen asleep?

Once this idea popped up, she immediately dismissed it with a laugh. Haha... .. How could it be? It was not grass. Could it be that growth depended entirely on photosynthesis?

"I'm not training today. I'll give you a day off..."ni Lan said helplessly.

"Ah, really?" Bai Cai was suddenly energized and got up. "I knew it. Mother isn't that heartless. You've been training for half a month already. I feel like you're going to be crippled..."

Ni Lan rolled her eyes and said it as if she was being abused. Where was this? In the higher-class families, most of the children of the direct line of descent practiced three volts in winter, nine in summer, and three volts in summer. The intensity of the training was far more intense than what Bai Cai could compare with now. No one had ever complained. Since Young, they had been competing for the first place. On this point.., bai Cai appeared to be a lot more salted fish.

“From today on, your training will temporarily come to an end. You Don’t need to train for the next two months...”ni lan sighed and smoothed out Bai Cai’s messy hair.

“Eh?”Bai Cai’s eyes suddenly lit up. “Is it a long vacation?”

“Leave your head!”Ni Lan couldn’t help but Pat Bai Cai’s dog head. “How long has it been since school started, and you’re taking a long vacation? Do You Think You’re studying in Kindergarten?”

“Uh... HEHE...”bai cai immediately smiled brightly and felt embarrassed. However, those days where he would sleep for dozens of days seemed to be gone forever. ...

“Two months is used to complete the credit missions. You must complete these missions according to my plan within two months. Only when you have enough credit points will I be able to place you on the list this time!”

“List?”Bai Cai was stunned. “What List?”

“The trial list of Hemlock Forest!”Ni Lan narrowed her eyes and said, “This is a plot of land with a very high cost-effectiveness ratio. Most importantly, the environment of this trial is very good. There are no royal members participating in it. It’s a good opportunity for you...” . “...”

“Uh... it sounds so troublesome...”

“We’ll provide all the food and accommodation for this trial, and we can provide unlimited high-level ingredients...”

“Ah, is that so?”Dogball suddenly sat up straight. “Don’t worry, mother. I Won’t let you down. I’ll try my best to win this opportunity!”

Ni Lan:”...”

She suddenly felt that it was not a good idea to put this guy in...

“Mentor!”

Dawn Academy, a large-scale iron castle, a pair of ordinary-looking young man and woman slowly walked to the center of the Iron Castle, respectfully saluted.

In the center of the Iron Castle, a tall man with metal skin was forging something in front of a huge furnace. When he heard the arrival of the two men, he took a deep breath. The huge suction force was even stronger than the wind force of the furnace, in the end, the flame in the furnace, which was as hot as the sun, was slowly extinguished by his breath. The red walls of the furnace also cooled down.

The faces of the man and the woman twitched slightly. After watching the furnace so many times, they were still not used to the unique lung capacity of the Divine Ao clan... ..

This Tall Divine Ao clan man was the familiar alchemist Master of Dawn Academy, Gulidan. The ordinary-looking man and woman were Wang Chengbo and Yunji Mu, who had joined Gulidan's school!

"You're here? Have a seat..."Gulidan chuckled, he looked at the two with a very gentle gaze. If a former student of the Shen ao academy had seen him, he would have been dumbfounded. This was because this strict tutor had always kept a straight face towards his students, many students had never seen him smile even after they had graduated from his school.

The two seemed to be completely used to each other's smiling faces. They naturally sat on two chairs made of unknown metal beside them. They sat up straight and looked at Gulidan, obediently waiting for the other party to explain the reason for their visit.

Looking at the two obedient children, Gulidan couldn't stop smiling.

These two children were even more outstanding than he had imagined. He even suspected that the two of them relied on freezing technology to hibernate their true ancient bloodlines. Their talent was simply too incredible.

Regardless of whether it was the Starsoul Boy or the dark-skinned girl, the characteristics of their bloodlines were too close to the ancient records, just like what was written in the book.

If the plan was well-planned, there was a lot of potential for this gathering to become famous!

One had to know that with such a high salary, there was actually a lot of pressure on him. If he could help Dawn Academy enter the top 100, not only would he be worthy of the value offered by the principal, but he would also become famous, he would let those sneering fellows from the Divine Arcana Academy slap his face!

"Cough..."Gulidan said in a low voice, "I've called you here this time because I have something important to tell you..."

"Something important?"The two looked at each other and then looked at each other. "Teacher, is it about our flame seed?"

Both of them had studied the forging of divine craftsmen, so it was necessary for them to train their heart flame. However, the heart flame that was prepared in the academy was not satisfactory to teacher Gulidan, so he kept them waiting.

"It's about that!"Gulidan chuckled and said, "With the help of an old friend, I asked for two spots in the hemlock forest in the bronze academy. This is a rare opportunity, and it's also a chance for you two to obtain a high-level heart flame!"

When the two of them heard about the hemlock forest, their eyes immediately lit up. These days, they had been learning about the heart flame and had some understanding of many kindling. Naturally, they knew that there was a high-grade kindling in the hemlock forest!

Gulidan looked at the two of them and said in a low voice, "Go over there. Don't be in a hurry to find the fire of Seth. Priority Task!"

“Eh?” The two of them were stunned. Then, it was Yun Ji who asked curiously, “Teacher, what is the task this time?”

“To find the flame created by Viktor Binos: the fire of Titan!”

Chapter 1666: Gathering (middle)

“UH...”

Hearing this name, both of them were stunned. Yun Ji Mu and Wang Chengbo actually had very different personalities, but they had one thing in common: both of them were very eager to learn, the fire of Titan that they had mentioned to their teacher was something that they had read in advance in the Tinder textbook.

It was one of the seven legendary tinders, and it was rumored that it was once the leader of the glorious sect, Viktor. Binos spent billions of eras to create the greatest alchemy product. It was also because of this tinder that the sect of glory was able to rise rapidly for a period of time. It almost swept through the star field, including many places today, there were still traces and inheritances left behind by the sect of Glory from that era.

The Sikh Titan symbolized the new soul of Titan, the new creator of all things. It was a magical tinder that could completely mechanize a planet. Most of the popular methods to mechanize a planet were learned from that era.

The two of them were stunned. Wang Chengbo was the first to speak. “Teacher, why are we students here when we’re searching for a legendary creature of this level?”

Yunji nodded as well. A genius earthly treasure of this level, regardless of its value or its historical significance, wasn’t it not something that a bunch of kids like them were qualified to participate in?

“Heh...” “...”. Old Man Gulidan rubbed his hands and smiled. “Naturally, it’s not the complete fire of Seke Titan. That thing has long been broken into many pieces. However, if you can find a scattered spark, it will be better than the ordinary fire of Seke. Cheng Bo has the highest priority. As a star spirit, he needs to forge the star core as soon as possible. If he can find two, it will naturally be better for you...” “...”

Cheng Bo immediately said, “Yun Ji needs it more, right? Don’t the Dark Ones need a good heart flame to forge their first star weapon?”

According to Wang Cheng Bo’s understanding during this period of time, the star spirits and Dark Ones were the most extreme blacksmiths in the ancient times. One used the planet as the core and oneself as the cauldron, forging oneself as the strongest weapon, the latter was a more convenient path, which was to directly plunder the star core and forge it into a top-grade star weapon.

Therefore, in the end, the star spirit became the dark descendant’s highest priority material...

“Only one?” Yunji mu asked.

“That shouldn’t be...” Gulidan narrowed his eyes and said, “It’s said that the reaction this time was very big. It’s estimated that a large-scale flame fragment exploded, forming some kindling. I don’t know how many there are...”

“Then isn’t it settled?” Mu Yunji smiled and said, “I’ll help Cheng Bo snatch another portion, isn’t that enough?”

“Uh...” Cheng Bo looked at the other party and smiled foolishly at first, but then he said worriedly, “Can we snatch it? Aren’t there many students from other universities over there?”

Especially when he heard that this piece of land belonged to the Bronze Academy. The Bronze Academy was a top university. There must be many experts, right? To snatch two portions of Tinder from them. It sounded a little too idealistic...

“Whether we can snatch it or not, won’t we know after we give it a try?” Yun Mu Ji smiled, her eyes filled with eagerness to give it a try.

“Well said...” Gu Li Dan clapped his hands and praised, “Whether we can snatch it or not, won’t we know after we give it a try?”

“We have to pay attention to our safety...” Cheng Bo covered his head. He felt that Yun Ji was becoming more and more careless after hanging out with this big guy for a while... ..

“You...” Gulidan looked at the worried Wang Cheng Bo and shook his head in amusement... ..

These two children were equally talented and terrifying, but there was a big difference in their personalities. Wang Cheng Bo was gentle and conservative. Whether it was academic work or self-training, he paid attention to rigor and stability. He never rushed forward and was extremely patient., however, there were times when he was too conservative.

On the contrary, Yunji was different. She was like a sharp sword. When she first arrived, she was a little cautious. However, after she gradually let go, her nature was slowly released. As a dark descendant, her sharp personality was gradually revealed. She was brave and aggressive, in just a few short months, regardless of whether it was her basic academic or combat skills, Yunji had greatly increased. Her life-level training speed had also improved at an exaggerated rate!

To be honest, as a divine craftsman, Wang Chengbo was young and had a steady character. It was a good thing for a high-precision profession like forging, but as an individual., he preferred a kid like Yunji Mu who was full of vigor.

Young people... .. If he was too steady, he wouldn’t be like a young person, right?

“Cough... ..” Gulidan coughed lightly. “I only have two spots, and I can’t go personally. But don’t worry. This is a multi-school alliance, and seniors aren’t allowed to enter. There are juniors inside, and there’s no royal present. This is a very good opportunity for you

As he spoke, he opened the screen, and a lot of names and images appeared on it...

“Although there are no royal disciples on this trip, there are some people you have to be very careful of. In terms of combat strength, many of them are not weaker than royal disciples of the same level. My old friend gave me some information, so I’ll give you a few highlights first... “...”. “...”

As Gulidan spoke, he opened the screen. "The first one is demon star of Tirefarson Academy, the biggest Dark Horse of the previous year's fellowship. He's A level ten top genius who almost won the first year's fellowship. If you meet this person, try to avoid him."

"Okay, okay!" Wang Chengbo nodded repeatedly.

"Mm..." Yunji mu nodded lightly. In her heart, she firmly memorized the image of demon star. As for whether she was trying to avoid him or something else, it was unknown... ..

"Helan Nana..." Gulidan pointed at the screen again. "This is also an important character. She is the most outstanding descendant of the Helan family in this generation. I have seen her once and she is indeed stunning. Her combat strength far surpasses that of her peers. Especially her unique shadow-type magical pet, it is very troublesome. If you meet her, try to avoid her as much as possible...""

"Oh! !" Wang Chengbo took the small notebook and carefully recorded it down.

Gulidan nodded in satisfaction. Chengbo had a steady personality, but he seemed to be able to control Yunji. With him around, it shouldn't be a big problem.

Then, he emphasized on a few more people, and Wang Chengbo recorded them down one by one.

"Other than the people on the list, there are actually some other things you need to pay attention to... Gulidan said seriously, "The people in the intelligence report are only on the surface. This year is the year of the crown prince. All the top aristocratic families will take out their direct descendants that they have nurtured for many years to take sides. These descendants were deliberately concealed by the big families before, so you need to pay very close attention to them. For example, Star Sky Academy. I have information that on that day, Helan Nana met a summoner who was on par with her. However, I don't have any further information on who it was. It is likely that it was a genius secretly nurtured by a top family."

"So, when you face each opponent, you must not be careless..."

"Yes, Sir Mentor!"

Gu Lidan was like an old mother to the two who were about to travel for the first time. Wang Chengbo patiently recorded Gu Lidan's exhortations while Mu Yunji listened quietly.

A faint warmth flashed through her sharp eyes. Looking at this big man who was extremely concerned about them, she thought of the former sect master of Yunshan. She wondered how her master and the others were doing after entering the Sea of stars... ..

Chapter 1667: Gathering (Part 2)

D ball...

In a remote district in C City, a young man who had just returned from work and rented a room took off his suit and casually threw his socks to the bedside. He couldn't wait to turn on his computer... ..

As for why he looked young. From his face, he looked young, but his loose hair and haggard face didn't match up with the youthful young man...

After the young man took off his suit and turned on the computer, he first stretched his muscles and did some stretching and squats. Then, he drank a cup of hot water and slowly sat in front of the computer.

Just as he was about to open the forum that he had been looking forward to, his phone rang... ..

The young man's bald eyebrows furrowed. He picked up his phone and turned on the speaker. As he opened the web page, he asked, "Manager, what's Up?"

"Where have you been?"

"I'm off work..."

"Who told you I'm off Work?" The other side said angrily.

"Who needs to say that?" The young man twitched the corner of his mouth and said, "Isn't it the company's rule to leave work at six o'clock?"

"That's when the work is done! Do you think you're done?"

"I'm done..." the young man said in amusement, "I submitted it at three o'clock..."

"Is it done when you submitted it? Did I review and sign it?"

"Then why didn't you sign it, manager?" The young man said casually while browsing the web. "If there's a BUG, you should have told me earlier. You submitted it at three o'clock..."

"You submitted it at three o'clock and I had to review it for you at three o'clock? I still have to focus on that one thing of yours, right?"

"Yes...". The young man said softly, "The manager is busy. I went over to check at three o'clock. The manager seemed to be playing mobile games, so I didn't feel like disturbing you. I thought that you would help to review it after you had fun. In the end, after work, I saw that you hadn't gone through the review yet, so I asked the front desk where you had gone. In the end, the beautiful woman at the front desk said that you had gone to an event for dinner "... "..."

Then, the young man looked at the time and said, "It's 8:30 now. You've had enough to eat and drink. I have to go home to eat and rest. Do I have to wait for you at the office all the time? What if the manager is drunk and I have to wait all night?"

"What kind of attitude is that?" The person on the other end said angrily!

"F * ck your attitude..." the young man spat, "Do whatever you want, idiot!"

With that, he hung up the phone without hesitation.

"Hey! !"

On the other side of the phone, a middle-aged man with a big belly was hopping mad. When he called again, he heard a mechanical female voice: the phone you have dialed is turned off!

The manager was stunned, then he walked to the front desk to pick up the landline phone and dialed the number according to the phone records.

It was the number of the employee just now.

A few seconds later, the phone rang and was quickly picked up. "Hello?"

"You dare to block me?" The middle-aged man's voice was full of anger and questioning. Of course, there was also a hint of incredulity in it.

"Idiot..." the other side hung up the phone!

"Okay, okay, okay!" The manager was so angry that he laughed. He picked up the landline and dialed another number.

"Hello?"

"Xiao Zhang? It's Mu Hua..."

"Oh, manager Mu? What's the matter?"

"Fire Yuan Hailin directly and deduct his salary. Then, send a notice saying that he stole company secrets. Ask the legal department to draft a charter and sue him directly!"

"Um... manager Mu, did something happen?" The other side asked carefully.

"Why do you ask so many questions? Just do as you're told!" Manager Mu sneered. "Didn't he just think that he was on the queue to go to Huaxia City and that I couldn't do anything to him? "I want to see it today. With a stain, how can he still be on the queue?" ? ?"

On the other end of the phone, Xiao Zhang was sitting in front of the computer, Reading Grandpa Lu's log that had just come out of the forum today.

Hearing his boss's words, Xiao Zhang, as the personnel director, obviously twitched his face... ..

This guy... thought it was in the past?

In the past, people couldn't afford to offend big companies because not only could they deduct your salary, but they could also use the legal department to directly exhaust you. As long as you were involved in a lawsuit, other companies basically wouldn't dare to hire you.

What? You said that you were wronged? Hehe, then you can slowly defend yourself. The resources of the court were notoriously tight. A case could easily be fought for one or two years. Could the company afford to exhaust you?

However, it was different now. Since the exposure of the Mars base, the six major cities began to line up. Many young people who were selected to line up had a new future. Many people were not willing to swallow their anger.

After all, if it was not for the sake of living, who would be willing to be tortured by those dog bosses every day for no reason?

All kinds of overtime work, full attendance, being oppressed and mutilated at the wine table, drinking until they were battered and bruised. All these stupid things were done to satisfy the sense of control that came with being a manager.

Now that there was a new choice, only a fool would be willing to continue to be bullied?

“Did you hear what I Said?”

On the other end of the phone, when he saw that there was no response for a long time, he suddenly became a little dissatisfied.

Xiao Zhang sighed slightly. For a moment, he did not know how to say it... ..

Many times, the boss was not better than you, but it was true that he was just luckier than you. This bloated guy was a living example. Xiao Zhang did not even need to guess to be sure that the other party had a little understanding of the current migration method. He thought of this trick to deal with a small employee like Yuan Hailin...

However, it was clear that this idiot did not understand clearly and thought of these dirty tricks. Did he really think that it was in the past?

The current Court was different from the past. Huaxia city had sent many spiritual masters to assist. These spiritual masters were proficient in hypnosis. If the other party had committed any of the things you said, you could directly hypnotize them to find out the result.

As for you, as the person who falsely accused you, the consequences would be different. There was a high probability that you would be permanently blacklisted by galaxy... ..

Should I tell him about this?

“Okay manager, I’ll get someone to do it right away!” Little Zhang quickly returned to his previous respectful tone!

The manager on the other side nodded his head in satisfaction when he heard that. Obviously, he had also sensed the change in the other party’s tone, and he immediately became a little smug.

He knew that Xiao Zhang was also lining up. He was targeting Yuan Hailin in order to intimidate the other employees of the company. Don’t think that just because you got a spot, you’re amazing!

He had 10,000 ways to kill you!

“Well, I can rest assured that you’ll do your job well. The company will not mistreat you. Believe me, even if you go to that Xing Hai, the company will develop rapidly. It will definitely have a better future than working alone!”

“Yes, yes, yes!” Xiao Zhang quickly agreed.

Then, he immediately gave a few more instructions in satisfaction before hanging up the phone.

“Idiot...” Xiao Zhang sneered after hanging up the phone. He directly threw the phone on the bed behind him, and then began to read the strategy seriously.

It was better to make more preparations for going to galaxy. What bullsh * T company transferring to Galaxy? When you get there, it would be weird if anyone cared about you... .. Oh, that's not right. There was a high probability that these higher-ups would not be accepted. It was likely that they would not be seen again in the future... ..

Xiao Zhang shook his head and continued to look at the log.

On the log, there was a big headline: brothers, the first batch of players in galaxy is going to gather in some ancient land. What kind of sparks will our first batch of players encounter here, grandpa will show the whole process, please look forward to it!

Next, the trailer for this trip!

Chapter 1668: Grandpa's declaration

Ever since the New World line-up, everyone had new expectations, and the atmosphere had changed a lot. Except for a few people like manager Mu who couldn't tell the form of cerebral palsy, the atmosphere in many large enterprises had changed.

The atmosphere of all kinds of pressure on alcohol, withholding wages, and making things difficult for subordinates had suddenly changed. The entire process had become very harmonious, especially in many large enterprises with deep roots.

The reason was actually very simple. Many people in large companies were also planning how to start their businesses in the New World. Many people instantly saw the potential of the new generation of young people.

According to the latest data released by Galaxy, regardless of the acceptance rate or the growth rate after reaching that side, young people were not people that middle-aged and old people could compare to. If they wanted to establish a firm foothold there., it was the first choice to rope in more young people with potential.

Many companies had already begun to contact secretly after knowing that you had a ranking, hoping that the other party would continue to follow the company's goal after they arrived there. However, the effect of roping them in was limited. Many young people were all like, "Good, good..." They looked like there was no problem, but in fact, very few people were willing to continue following the company's goal after they arrived there.

The reason was very simple. The capital in sphere D could provide them with too few benefits. More and more people understood that no matter how much money was given here, it would be useless there. Finance was completely cut off, so the money was useless. The so-called capital was just like that... ..

In the end, many lobbyists appeared in the end. Every day, they showed some employees all kinds of projects, such as how to develop there, how to operate there., how to establish a new force there in a short time, and how high the returns were.

In the past, these story-telling entrepreneurs in the company were used to tell stories to the capital shareholders to attract investment. Now, they had all changed their targets and used them to fool the young people who were about to enter galaxy... ..

Many people enjoyed the feeling of being an investor for the first time since they graduated. A group of entrepreneurs spent all their efforts to get your recognition and let you cooperate with them. Their identities were only one or two years ago, it was still a big shot that you couldn't even meet. It made many people high-spirited, and at the same time, they looked forward to entering galaxy even more.

However, Yuan Hailin didn't enjoy this kind of treatment. Not only did his boss with cerebral palsy not receive special treatment, but he also acted as if he didn't think that he could turn the world upside down just because he had the qualifications to line up. Seeing this, he only wanted to curse the idiot.

Since he couldn't pretend to be a b, then he could quit. Anyway, he still had a few hundred thousand in savings. This savings was definitely far from enough to buy a house, but as long as he didn't use it recklessly, it wouldn't be a problem for him to use it for a few years, he could totally wait until he was accepted by Huaxia City.

He could just take it as giving himself a long vacation...

Yuan hailin stretched lazily. Thinking that he didn't have to go to work the next day, he slowly looked at the various posts in the Xing Hai Forum.

The Xing Hai Forum was now almost contracted by the Morning Light Studio. Whether it was official news, the Five City lords, or famous players, they all updated on it, resulting in a small forum of the Morning Light Studio, now, it had become the most popular place in the world.

In it, there were tens of thousands of daily life posts and science posts updated by Xing Hai players, and the traffic was often in the tens of millions.

Yuan hailin clicked on a few of the most popular big shots in the board, including Xing Hai's official announcement, Huaxia City's official announcement, as well as the official announcements of the six major cities, as well as the personal accounts of the city lords, from time to time, the environment and development situation in the city would be updated to attract new people's expectations.

Yuan hailin directly clicked on Huaxia City Board. After all, he had already lined up in Huaxia City, so he couldn't go back on his word even if he wanted to. Moreover, ever since the incident with Wang Goudan causing a ruckus in the fifth city, Huaxia City had become more and more popular, it had become the best place in the hearts of many Huaxia players.

Yuan hailin also hoped that one day he could become that kind of person, so he was especially interested in Grandpa Lu's updates in the federation's interstellar realm.

Like him, he had many thoughts, causing Grandpa Lu's posts to have hundreds of millions of views. Many times, clicking on it would become very slow. After buffering for nearly 15 minutes, Yuan Hailin finally saw Grandpa Lu's latest updates.

Dear Compatriots, Grandpa is updating his log again, but before he updates it, I have to say that this may be my last time updating my log. This is not an alarmist, it's really possible..

Netizen A: Damn, is it true? What happened to Grandpa. Don't stop updating, you are now the only way for US players to know about the situation in the federation... ..

Netizen b: That's right, Grandpa, how can you end it just like that? Don't scare me, at least hold on until I arrive, right? (dog head comical...)

Grandpa used the video recording method. Just as he said that, a barrage of bullet comments flooded the web page, almost completely covering the screen, causing Yuan Hailin's computer to freeze for a moment again. He hurriedly ended the bullet comments... ..

He was also very worried. After all, although Grandpa Lu was quite good at pretending, the things he shared were what many players wanted to see, especially after entering the federation. Both players and non-players liked to watch his updates. He wanted to learn about the mysterious interstellar world outside in advance... ..

"Grandpa, I'm about to call the first dungeon after the interstellar world...". ... Haha, it could be considered as the first instance dungeon in my life? I once accidentally fell into a teleportation array in the sewer with the liver emperor and Pu Yunchuan, and mistakenly entered South Africa. I thought it was a instance dungeon, but it turned out to be the real South Africa

[this time, it's truly a checkpoint, but this time, it's a instance dungeon without a resurrection point...].
... .. here is a crucial question for everyone. In the interstellar federation, there are two types of places that can not be resurrected. The first is a place that is covered by other great lord domains. Therefore, if players can become interstellar adventurers in the future, they must remember to be more careful when entering the other heavenly Lord Domains.]

[the second place is the ancient lands. It is said that this place has a barrier that principal skygod personally sealed, isolating all external forces. Therefore, although there are abundant resources inside, once something happens, there is no way to revive. Although my teacher told me that it is forbidden to take people's lives inside, there will always be accidents, right?]

[alright, let's not talk about these frightening words. Let's talk about Grandpa's dungeon situation. First, let's talk about some good news. This dungeon is very likely to be the first time that our first batch of players will gather together.]

[according to the information our teacher gave Grandpa, there are nine schools that have entered this dungeon. They are starry sky academy, Bronze Academy, Night Shade Academy, Divine Arcana Academy, Tyree Fasson Academy, Spark Academy, Windwalk Academy, and Autran Elven Royal Academy. They are all top-ranked academies in the federation. The only exception is the last Dawn Academy!]

[however, I heard that there are only two spots in the Morning Light Academy. A certain big shot asked for them through a friend. Everyone guessed correctly. These two spots are our first batch of players, the immortal cultivation girl, Yunji Mu, and the dog-licking king Chengbo. Haha...]. [...]

[Grandpa didn't expect to meet the two of them in the vast galaxy. Haha, when they entered the non-top 100 universities, I thought that they wouldn't be on the same level as me anymore. I didn't expect that they would be able to get close to me. It seems like I have a chance to barely touch grandpa's thumb...]. ..

[other than Yunji Mu, Wang Goudan from the Tyree Fasson Academy and Li Goudan from the Zephyr Academy have basically sent me a message confirming my quota. The remaining cabbages from the starry sky academy and Feng Doudou from the Bronze Academy haven't been sent yet. However, I feel that they should be fine. After all, they are the headers of galaxy, hahahaha...]. [...]

[it is said that the participants of this dungeon are all ace students of various universities. There are many senior students. There is competition between the universities for this mission. When the time comes, they will be competitors with Goudan and the others. It is still very exciting to think about it. Grandpa Lu can finally prove that I am not a mascot who writes guides for a living. I want to prove that the hidden big boss among the galaxy players is actually me!]! !]

Chapter 1669: Grandpa's farewell...

[first of all, let's talk about the characteristics of this dungeon. Everyone Should Cherish Grandpa's strategy, because every strategy for the ancient lands series might be the last one...]

[alright, let's not waste any more time. Let's talk about the situation of this dungeon first. The dungeon is called Hemlock Forest, and it is one of the high-level ancient lands. According to the teacher, in the first-level land, Hemlock Forest is ranked at the top, and its position is close to the top-level land. Here, let's do some science. The ancient lands land is currently divided into five levels. Most of the academies that are ranked below 50th are allocated fifth-level or fourth-level land. To be able to continuously have a first-level high-level land is the confidence of a top 100 university to attract students.]

[however, there are very limited spots in the first-class land. Many students may not even have the chance to go in and take a look, especially freshmen like me. It was originally very difficult to have a chance, but who asked me to be so outstanding?]

[hemlock forest is the birthplace of a sect of the ancient developer civilization. It is the sect that the base's stupid developer, who calls for glorious evolution every day, worships. It is a cult with a long history. Yes, it is a cult. That sect advocates that all living things evolve into mechanical life, away from the various diseases caused by biological structures and waste of resources in the universe. It is a completely crazy sect...]. "..."

[according to that religion, whether it's carbon-based life forms, silicon-based life forms, or other living life forms formed from other elements, they all have all sorts of disadvantages. Many times, they don't contribute much to the consumption of resources in the universe, so they can't accurately control the supply and release of energy. This is different for machinery. Mechanical Energy uses every bit of energy meticulously and is far away from the burden of living things. It's the most effective way to develop the universe, and mass mechanization is a near-perfect way to evolve.]

[I've heard that this civilization has swept through almost half of the universe, and half of the universe has been mechanised. It can be imagined that ugly country's film about intelligent robots destroying humans may not be an alarmist. This fear of machines may very well be brought about by our ancestors'genes...]. [...]

[and the dungeon that we're going to this time is the birthplace of this cult. It's said that the entire plot of land is almost the size of ten Suns, and it's a completely mechanised planet mode. Even the plants

inside are mechanised, and the level of danger is very high. It's said that there are many high-level mechanical life forms with system mutations, high-level mechanical weapons that were once sealed, and many underground laboratory systems. It's said that there will be terrifying top-tier puppets like tianyuan-level mechanical golems.]

[not only that, there are also many mechanical formations that will cause the land to undergo a system change. This will make the previous information about the land useless because once the system changes, what used to be a forest of iron will probably turn into a huge reservoir. It might also turn into an underground world or something. Anyway, the entire mechanized land will change at any time. It is the most difficult place for the seniors to use in dungeons.]

[of course, there are many benefits. If you find an advanced laboratory, any information, research samples, advanced materials, or even finished products will be priceless. I'm an Arcanist, and mechanical alchemy is one of the Arcana subjects. Although I majored in elements, I'm determined to become an alchemist master, so I won't be biased!]

[of course, I have to go there this time, and I have to get a lot of results. If I can get a laboratory inheritance, I will take off immediately, Haha...]

[it is said that there is a high-grade mechanical tinder inside, called the fire of Seth. It is a magical tinder that can directly activate metals and mechanize other natural materials. Doesn't it sound familiar?]? [it is a bit like the fire seed of a transformer, right?]? In fact, Grandpa was very suspicious. The inspiration of the Transformers story came from our ancestors' fear of these mechanical cult madmen.]

[but this fire seed is very useful. Grandpa, as an alchemist, if you encounter it, it is necessary to snatch a piece.]

[there is no high-grade instructor leading the team, no royal members participating in this operation. Only elite students will go. The team will be formed by the school. The school will have a total of seven people. My Grandpa will have three subordinates, and another top instructor will have three subordinates. Here is the staffing of my Grandpa's team.]

[first of all, let's talk about the three seniors on my grandfather's side. Other than my grandfather, the other two seniors are all seniors in the 50s and 60s. One of them is called Jane. It is said that she was born in a big family of the Red Lotus clan. She majored in the Plastic Energy Department and is a star figure in the academy. She is a great beauty and her fighting strength is intrepid. It is said that she obtained the 31st place in the last social gathering. It is very exaggerated for an alchemist to obtain such a result...]. [...]. [...]

[the other one is called Amanda, a senior who specializes in mechanical alchemy. She is a very old-fashioned and serious fellow. Several times when I went to ask for materials, she would always put on a sour face, but her results were very good. Her academic results are ranked first in Spark Academy. Although her ranking in the fellowship is not high, she is a very powerful support staff. It is said that many high-ranking fighters gave her very high evaluations at that time.]

[the other three slots come from the fighters of the fire school next door. Let's learn about the style of our school here. Our school has many branches, mainly the star school, Fire School, and other schools...]. [...]. [hahaha, I'm sure everyone can see that our school is promoting the two schools of Spark.]

[the full name of the Star School is the Star Alchemy Secret School. It is the signature specialty of our school, including all alchemy specialties!]

[the full name of the Fire Academy is Divine Fire Warrior Academy. It is our academy's Specialty Combat School. Our Academy specializes in arcane magic. However, in order to obtain a fellowship ranking, we have also established a specialty combat school. Divine Fire is our academy's main combat specialty, also known as Starfire warrior. It is a combat class that is derived from the divine craftsman system. It uses fire seeds to train the heart. However, it is not for forging, but to temper oneself. It uses alchemy and forging methods to forge oneself into a high-intensity combat lifeform.]

[this method was actually used a long time ago. It's called Xingling. That's right, it's Wang Da's dog-licking race!]

[the three students from the Divine Fire Department are Lukar, Diss, and Carmen. They are the three students with the strongest comprehensive combat strength in our academy. All three of them have obtained excellent results in the top 50 in the single-player ranking. This is especially so for Carmen. It's said that this fellow was ranked eighth last time and is the number one combat strength in our academy. He is also my strongest thigh this time...]. :: (I think so... :: ...)

[alright, that's the general situation of the trailer. If Grandpa can come back alive, he will share the experience of this adventure and the real strategy of this dungeon with everyone. Please look forward to the update. Let's not talk about it anymore, Grandpa has to go to bed early. We have to leave for the Bronze Academy tomorrow. Everyone, Please Wish Grandpa a safe return and scatter the flowers...]. .

Chapter 1670: The Backbone Grandpa Lu!

On the interstellar train, Grandpa Lu flapped his wings and looked at the scene outside with a curious expression.

Was that the legendary Normorrigan?

On the sightseeing liquid crystal of the train, Grandpa Lu's fat bird face was almost pressed against the window, looking at the magnificent scene.

To be honest, the magnificent elemental scene formed by the countless alchemy arrays of the spark academy had already shocked him for half a month without him regaining his senses. He did not expect that the planet in front of him was even more shocking!

The huge planet was connected by countless huge machines to all sorts of enormous energy projects. Compared to this, the mechanical system within the Overlord force that soap had stolen was like child's Play!

It was too spectacular!

No Wonder Eggface wanted to be a tourist adventurer. wasn't such a grand view of the universe something that could only be seen when one traveled around?

Grandpa suddenly decided that he had to be a tourist as well. Yes, a great alchemist, a noble Phoenix, a great adventurer, Grandpa Lu... ..

Hehe...

At the thought of this, Grandpa couldn't help but drool from the corner of his mouth... ..

Not far away, two of his fellow teammates glanced at Grandpa with disdain. The one they despised the most was that beauty with red hair!

Her beautiful ruby-red pupils revealed her noble bloodline. She was obviously a descendant of a red lotus noble with an extremely pure bloodline.

It was one of his grandfather's two fellow disciples on this trip: Jane.

Starfire Academy's STAR student. She had extremely beautiful looks and extremely strong strength. Many of them even had the title of the Queen of Starfire!

However, as an alchemist, he was able to get 31 points in the Fellowship, which was worthy of his reputation. It was said that he was the direct descendant of Mr. Jian, one of the four sword leaders of the Red Lotus, whether it was his bloodline, family background, or his own strength, he was one of the best. Naturally, he would be able to become a star student.

"Why is this silly bird smiling so foolishly?" Jian asked a girl next to him who was wearing thick glasses.

A white-haired girl was sitting next to her. Judging from her pupils and physiological characteristics, she was obviously a member of a high-level spiritual race: the white spirit race.

The girl was one of Grandpa Lu's two fellow disciples: Amanda. Bernice was a direct descendant of a famous alchemist family. He was also one of the students with the highest academic credits among the current spark students... ..

The girl was touched by Jane, and her beautiful eyebrows slightly furrowed. She took off her thick glasses, revealing a pair of eyes as beautiful as white crystals. It was obvious that such bright pupils., naturally, they were not short-sighted.

The glasses were just a multi-functional tool that was convenient for her to read.

Amanda glanced at Grandpa Lu, who was smiling foolishly, and a trace of disdain flashed through her cold eyes. As a noble child, she had never really approved of this kind of native who was born with a wild background.

In her opinion, these natives were tarnishing the noble bloodline. The Phoenix was a beautiful and elegant existence, and it was precisely because the one with the genes was an uneducated native that he ended up looking no different from a silly bird... ..

"Why Are You So Free? Do you have to pay attention to such a thing?" Amanda's voice was ice-cold, obviously very dissatisfied with the reason why the other party was disturbing her... ..

"Aren't we almost there?" Jane smiled. She did not care about the other party's complaining tone at all. When she smiled, it was bright and Valiant. It made Jane, who was initially a little dissatisfied, curl the corner of her mouth slightly and turn her head away.

It was really eye-piercing as usual...

“Hey Silly Bird, get ready. We’re almost at the station!” Jane shouted at Grandpa Lu.

“You’re the Silly Bird!” Grandpa Lu jumped up like an angry rooster. However, due to his own image being too beautiful, his funny actions also attracted the attention of the people around him!

He couldn’t help but think to himself, what a beautiful Phoenix!

“Heh, what a silly look. If it’s not a stupid bird, then what is it?” Jane seemed to like teasing Grandpa Lu.

Grandpa Lu was so angry that his face was red and his neck was thick. However, the feathers on his body became even more beautiful because of his anger. Many people’s eyes lit up when they saw this. It was rare to see a phoenix, and it was even rarer to see such a beautiful phoenix...

Amanda, who was next to Jane, immediately avoided her eyes when she saw this. Her eyes were extremely complicated. It was really ironic that such a lowly native had such a high-quality Phoenix bloodline...

“Alright, stop fooling around...” just as Jane was teasing Grandpa Lu, a muffled voice came from not far away.

The two of them and a bird immediately looked over. The person who spoke was a tall man.

In terms of body size, the tall man was even taller and stronger than Titan. The breathing between his nostrils was like a furnace, causing those who were close to him to feel a stifling heat.

The burly man opened his eyes. There seemed to be something burning in his bright red pupils. The divine light was threatening!

His grandfather was stunned. He looked at the other party and thought to himself, ‘is this the number one thigh of our spark students?’?

The burly man was the spark students’ number one high-level battle: Carmen!

A level 90 student, an experienced spark warrior. It was said that he had participated in a total of nine social gatherings. Each time, his results had made great progress. As of last time, he was already in the top 10 and had become a popular figure among the younger generation of the Federation!

“Everyone, be quiet!” The burly man’s voice was deep and heavy, carrying a hint of a commanding tone. “In a while, the instructors of the bronze students will come to welcome you. Don’t make a fool of yourself and embarrass the students!”

“Cheh...” Jane glared at the other party, but in the end, she did not refute him. Whether it was reputation or experience, she was far inferior to the other party. The academy was a small jianghu, so if she encountered someone stronger than her, she would have to endure it.

“Senior is right...” unlike the somewhat unconvinced Jane, Amanda changed her icy aura from before and smiled gently. Her smile was incomparably sweet, completely different from her previous icy cold appearance.

Seeing this, Grandpa Lu was stunned and could not help but secretly slander her. He thought that this woman was a facial paralysis, but it turned out that she could also smile. SH * T... ...

“Okay...” Amanda’s obedience made the burly man’s expression soften a little, but when he looked at Grandpa Lu, his expression turned serious again. “Stand at the back later, don’t show off, and don’t Be Rude!”

This customary commanding tone made Grandpa Lu’s chest tighten, and he instantly raised his head and puffed out his chest, glaring at him angrily!

“Yes, Boss! ! !”

‘hmph, one look and I can tell that he’s not someone to be trifled with. This grandfather will first give in strategically. When I find an opportunity, HMPH HMPH...’. ...

“Boss?” Carmen was taken aback, and his expression revealed a trace of uneasiness. Although he was very used to using his high seniority to rule others, and was also used to others being obedient, he had never met such a straightforward person before.

After all, he usually came into contact with the sons of noble families. Their statuses were all the same. Even if you were strong, there were very few who would submit to you. At the very least, they would not submit to you so thoroughly like the other party... ..

He simply rolled his eyes and glared at his grandfather with dissatisfaction. This dog who bullied the weak and feared the strong. If I teased you a little, you would act like a cockfight. Carmen came and was as obedient as a dog. F * ck, are you looking down on me?

Amanda glanced at him with disgust and could not help but think to herself, as expected of a native, his character is despicable... ..

“Cough...” Carmen looked at the Phoenix which obviously had a pure bloodline and said in a low voice, “How about this, you should stand behind me later. If there is anything rude, I will correct you immediately...”

“Yes, Boss!” Grandpa Lu eagerly leaned over and looked like a lackey, which made the other two spark warriors behind Carmen speechless.

“Cough... Let’s go...” Carmen coughed again and said to everyone.

He seemed a little embarrassed by Grandpa Lu’s straightforward flattery, but if one thought about it carefully, they would realize that something was wrong, because... .. From the beginning to the end, Carmen didn’t seem to have any intention of correcting the other party for calling him that...
