

A Bunch 1851

Chapter 1851: Daily (4)

There was a very strange phenomenon in the fifth city...

The white players who occupied the most resources and could earn a lot of points without any Labor had a much weaker competition outside. On the contrary, the players from central China who were squeezed the most and were restricted the most severely... If they could break out of the strict policy blockade under the pressure and reach the new world, they would show considerable comprehensive ability. Although there were not many of them, they had made a good reputation in the New World in just a year... ..

He was at the opposite end of the spectrum from the white players!

This incident had caused the various human bodies in the fifth city to become even more hostile towards the players from central China...

In the conference room, a group of staff members looked at that staff member strangely. It had to be said that in such a situation, it was very sensitive for a staff member with the identity of a player from central China to suddenly make such a suggestion...

However, Mister's eyes lit up as he carefully looked at the other party...

Perhaps... This was his only chance!

Many people might think that Mister was a racist, but in reality, he was not. After all, many times, the image of a politician was just a packaging, a label that was changed in order to gain support, there had never been a shortage of politicians who jumped from side to side in history. One day, they were loyal believers of a certain religion, and the next day, they might be atheists.

And now... ! ... thinking about it carefully, what this aide said was actually true. Compared to the group of white players who had been raised to be useless, those citizens who still displayed outstanding competitiveness under the high-pressure policies seemed to be more valuable!

Mister's mind quickly worked...

He was afraid that he did not have much time now. If he could not come up with some good data in the new law, he was afraid that before the five-year period, he would be spurned by all the townsfolk and step down early...

And now, the white people who had originally supported him the most began to gradually vent their grudges against him under the influence of the external media. More and more white players began to curse at him.

It was actually very difficult to salvage the situation. Mister was the one who started the media campaign. He knew very well how immoral the media was and would never blame himself. In any case,

whenever there was a problem, he would try his best to focus on profit, he would shift the blame for all the failures to a certain focus point.

Of course, Mister could not be considered to be the scapegoat. After all, there was a reason why the fifth city was so competitive. However, he did not let anyone down. He did not let those people who supported him down.

Thinking about it carefully, were the points and resources that those people received inferior to those of other cities? Not bad. Moreover, they didn't need to waste time on work. They only needed to suck the blood of those discriminated third and central China races to receive the treatment of most middle-level players in other cities, they had enough time to train and train themselves.

However, in reality, they did not. They indulged in enjoyment and unrestrained squandering of their newly obtained bodies. This was the reason why their competitiveness was low.

On the other hand, the Huazhong players, under their extreme restrictions and repressive policies, were still able to turn the world upside down. The gap between them could be seen at a glance.

Sure enough, Andrew Saxon 's genes were inferior. Although he was of the same bloodline, it did not stop him from looking down on them.

It really didn't make much sense to support them now. Even if they were to use city policies again to give them more preferential resources, under the bombardment of the media, most of those people would probably not be grateful to him. Most importantly, those trash who took the resources probably couldn't compete with the players from other cities... ..

Then what else could the fifth city have to offer if they abandoned the white players?

Those bunch of nobodies who flattered the higher ones and trampled on the lower ones. Heh. ... They were qualified to be dogs, but they still couldn't be used... ..

The Latino players and some other minority players didn't hate themselves too much, but they were too flat-footed and didn't have the so-called competitiveness.

In other words, the only ones who could offer anything were those yellow-skinned monkeys who hadn't given up on climbing up despite the high-pressure policies...

Tsk...

"Tell me about your plan... "Mister's uncertain expression instantly froze on a sunny day as he looked at the other party with a smile... ..

"This... "the expressions of the other white staff members instantly froze as they looked at each other in shock. Meanwhile, the elegant female staff member let out a relieved smile... ..

"Hey, Cindy is here? Do you want to have a drink?"

The most famous street in the fifth city was the Texas Street in the center of the city. The entire street was built with the Western Cowboy Style that the North American men dreamed of. It was surrounded by pubs, nightclubs, and the brightly lit central battle arena!

Early in the morning, the entire street was filled with beer and some strange smells. Cindy could not help but frown every time she passed by.

The person who greeted her was the fat boss of a tavern. He had chosen the Green Titan gene, but other than the green skin, she could not see the proper appearance of a titan. He had a fat head and big ears, and his belly was as big as a beer barrel. He was more like a green-skinned wild boar... ..

"No..." Cindy bowed politely and slightly avoided the beer that spread from the soles of her feet. Her frown deepened.

The other party did not care. He waved his hand and actually lay down on the street. A thunderous voice suddenly sounded, so casual that it made people speechless... .

In fact, there were such drunk big men everywhere on this street. This was also what made Cindy disappointed... .

Following the change in the direction of the media in the latter half of the year, after they began to criticize Mister, Cindy, who had once dared to expose the shortcomings of the fifth city, suddenly became a reporter hero. The reversal made her feel somewhat inexplicable. Now, she was all on the street., there were no more taunts and curses from her compatriots. They were all enthusiastic, and their attitudes had changed unusually quickly.

But Cindy was not happy...

Because even after the change in the direction of the wind, the corruption here still had not changed!

Relying on their powerful bodies, her compatriots had abused her in various ways. At the beginning, the group of people seemed to have gone mad with joy because they found that their new bodies could not get drunk at all, it was the same even if they poured beer into their stomachs. All kinds of mental stimulants could be eaten like candy. Men and women could have unbridled intercourse for a few days, the decadent life made this street the craziest paradise.

How could such a person be competitive outside?

Cindy sighed helplessly...

Everyone blamed their bad luck on mister, but was that really the case?

After spending half a year in and out of the fifth city, Cindy slowly began to feel that it wasn't so... ..

In fact, if she thought about it carefully, she knew that although Mister was a selfish capitalist, he was definitely not the main reason for the white players to be corrupted. What caused them to be corrupted... .. Had always been their innate bad nature... . . .

If most white players who had sufficient points and did not need to work as hard as the citizens of other cities, their growth would not be bad. However, 99% of the white players did not do so.

When others were carefully taking care of their bodies for the sake of their growth, what were they doing? They were using high-grade food to brew stronger alcohol to numb themselves. They were using various alchemy techniques to create drugs that could stimulate the nerves and pursue stimulation. On

the streets, men and women were more open to seeking pleasure and letting go of themselves. They even named this place the paradise of freedom... .

How did this place look like paradise?

Cindy covered her nose and quickly wanted to leave this place. The men and women on the ground, one by one, revealed their ugliness. This group of people... Who were they to say that it was mister who had delayed them?

Chapter 1852: daily life of the base (5)

The meeting in the third city was much more relaxed. Song Zaiyi's city Lord's aides were all speaking with confidence and expressing their opinions.

Compared to the anxious city Lord's aides in the fifth city, the city Lord's aides in the third city were in high spirits and full of energy. The appearance of the new bill gave them a great attitude.

The reason was naturally due to the strength of the city. The third city was now recognized as a rising sun city. Regardless of industry development, player competitiveness, and market reputation, it was almost the best!

In the New Territories, the players born in the third city were very popular. The city Lord's strict compulsory learning missions had a very good effect. Every player had at least two or more life skill specialties when they went out, in particular, there were a lot of players in the gathering category. This made both private forces and small teams very fond of these versatile players.

After all, with a player who was proficient in gathering in a team, the income from field exploration would often be twice or even twice as high. Not to mention, players who were proficient in medicine, forging, and leather making could even monetize a lot of resources, as a result, the small-scale market was filled with players from the third city.

With the high competitiveness of the players, the development of the city would be quite smooth. Many players would report back to the city when they had a small scale, and they would take the initiative to return to the city to establish a trade market. They would even directly recruit new citizens for internships, by giving players the opportunity to earn points other than working, the productivity of the players would gradually increase, making the industry of the third city even richer. Such a virtuous cycle caused the third city to flourish. It was almost the city with the best momentum of development outside of Huaxia City... ..

Looking at the intense discussions of his subordinates, song Zaiyi, who was sitting at the head of the table, inadvertently curled the corners of his mouth, and a faint smile began to appear in his eyes.

He was different from the veteran politicians of other cities. When he first took charge of the third city, he did not have his own team. Now, the government employees were basically selected from the city's players, including the staff in front of him.

Compared to the veteran politicians, although these new seedlings were less cunning and cunning, they had more pure political ideals. Song Zaiyi felt that this atmosphere was very good.

Perhaps one day, the political arena in this city would also become dark and decadent, but at least for now... .. It was filled with beautiful vitality... .

“Ahem... “Old John next to him coughed lightly and interrupted the discussion to look at song Zaiyi. “City Lord, what do you think?”

“They all make sense... “song Zaiyi smiled.

Everyone was stunned. It was rare to see the city lord praise them like that.

After all, as young politicians, they were like students most of the time.

Studying in the government hall was more important than paying attention.

Under song Zaiyi’s encouraging gaze, some of the young people became bolder. One of the girls said, “The advantage of our citizens is not in individual combat strength, but in overall quality. The path of the Emerald Star Field is more suitable for us. ”

“But the income of the Emerald Starfield is not stable...” . ” One of the elven men frowned and said, “The rewards of the Abyssal Passage’s army route are more direct, and it is easier for people to grow. When players go there, the speed of leveling up is definitely not something the emerald starfield can compare to. If we focus on the Emerald Starfield, in a few years, the overall level of the players will definitely be completely pulled down! ”

These words actually made sense. The Jade Star Field’s rewards came from the planet’s resources, but those planets were unknown. You didn’t even know what kind of resources there were. The current players were no longer completely ignorant of the universe, the lecturers under their feet had done some scientific research on the outside world.

A planet of the same level did not mean that it would have the same benefits. The difference would be very big. For example, although Mars, where they were located, was a level 8 planet, due to its abundant production of Cordell Energy Crystals.., its value was even higher than a normal level 7 life planet.

The ores, elements, plants, and animals of a planet had different values. The difference was huge. Exploring a planet required a lot of time. If one made the wrong choice, the player would be greatly delayed!

On the contrary, the income of the army was stable. No matter what mission they carried out, the reward was worth the effort. Moreover, under the tempering of the flames of war, the player’s level would definitely surpass that of the planet exploration players... ..

“It’s foolish to compare one’s strength with one’s own weakness! “A bespectacled spirit system player retorted, “Encouraging players to develop in the army is just to serve as a foil to others. Whether it’s the players from Huaxia City who have the highest quality or the players from the fourth city who have the best training in combat techniques, they all have a competitive edge that we can’t compare to. The life

skills that we city players spend a lot of time on are not very useful in the army, the gains don't make up for the losses!

"I agree with that too! "Another woman said, "More than 70% of the players in our city have mastered the gathering skill and spent a lot of time on it. If they can't make full use of it, why should they learn it?" "Moreover, it's also in the city's interest to encourage players to go to the Emerald Starfield. According to the bill, the resources discovered by the players can be given priority to her. This means that not only can the players use the resources themselves, but they can also mine and refine the resources first, and then replenish the resources of our city! "

These words made more than half of the people at the meeting table nod their heads.

The rich resources had a great effect on the trade of the city. In this year, the players from the third city went out to sea to collect new species and excavated many useful resources in the new territories, among them were ores that were extremely cost-effective, magical plants that had extremely high nurturing value, and many marine species that could be upgraded.

After players found new species that were useful, they would cooperate with the city and establish a development team to collect these resources in large quantities. Then, the city's research team could develop new market products, which not only enriched the city's resources, but also increased the competitiveness of the city's market, it also made the city's market competitiveness stronger.

Among the six major cities, the third city's foreign trade volume almost crushed the remaining four cities outside of Huaxia City, bringing extremely high profits to the city.

Meanwhile, the rich resources had also promoted the city's scientific research atmosphere. A large number of scientific research positions had been vacated, causing the employment rate of the third city to be extremely high!

Meanwhile, the Emerald Starfield was at least a level 6 planet. There were definitely a lot of useful resources within it. Encouraging players to explore and exploit it was obviously beneficial to the city!

"But this way, the players will start to lag behind the other cities in the single-player level competition. Moreover, we can't guarantee the players' profits. The Emerald Starfield is an unfamiliar planet. The players may spend a lot of time but gain nothing..." "

"It's precisely because of this that we need a large number of pioneer players to step on the mines! "The female player from earlier said, Someone has to sacrifice in order to bring prosperity. "

"Ha... "the man from earlier suddenly laughed coldly, "You're quite handy at being generous to others. You're willing to sacrifice just because you say so? On what basis?"

Why was there a dispute?

Old John saw that the atmosphere was not good and was about to stop him, but song Zaiyi secretly reached out to stop him.

Old John looked at her in confusion, while song Zaiyi smiled and shook her head.

Where there were people, there would be arguments. This was inevitable, and...

There was indeed something wrong with the girl's statement. As the first batch of politicians that she had trained, some of her worldviews had to stand at attention....

Chapter 1853: Daily Life of the base (6)

"What is the purpose of your visit?"

Song's question suddenly interrupted the heated discussion. Everyone was stunned. They did not understand why the city Lord asked this question?

"You tell me... "City Lord song pointed at the man who refuted the other party's sacrifice and smiled. "Tell me the truth... "

The man hesitated for a moment, but in the end, he said honestly, "In the beginning... I wanted to live a better life. After all, according to the rumors, this place can give us a better body, a better future, and a broader world... "

"HMM..."song zai nodded. "Then do you think this place meets your expectations?"

"It's not bad for the time being... "the man immediately smiled and said, "First of all, it has indeed given us a healthy and strong body. Just this point alone is worth it to come here..."

These words made all the men and women in the meeting room subconsciously nod their heads.

Most of them were social animals who fought hard in society. Nowadays, society was highly introverted. Not to mention that the upward passage was shrinking, the competition among the lower classes was increasingly fierce. Most of the young people had just left society not long ago, and their bodies were already half broken.

High School had three years of high-intensity examination study, and university four years were not as easy as before. Those who studied accounting had to take the ACCA and CPA exams, study law had to pass the judicial exam, and study computer had to learn the old school courses, they also had to pay attention to the market and learn the latest programming structure skillfully. Almost every person in first-tier cities took the postgraduate entrance exam, and most of them even had to study for a Phd.

They finally managed to get out and enter the big factory. They also had to work hard in the internal exam overtime culture. After this kind of training, even the physically fit young men were almost ruined, not to mention many ordinary people who did not have the habit of fitness.

Most of them were sick before they reached thirty. The biggest benefit of coming to galaxy was to regain the feeling of health. The boundless energy that they had when they were young, only those who had lost it would feel extremely precious, therefore, most of the people who entered galaxy now paid special attention to the maintenance of their bodies.

No one wanted to lose this precious health again after this second chance at rebirth...

“And then, everything else was also in line with expectations... .. The man smiled and said, “Although the pressure here is quite great, it’s not like the past, where there is no end to hope. Everyone knows that the more effort you put in here, the greater the rewards will be.”

Song zaiyi nodded and said, “This is the benefit of the New World. There are endless opportunities, and there are no monopolized channels. Everyone has the chance to become the best, and everyone has the chance to live the life of their dreams. The people who come here have different ambitions and dreams. Some want to become government tourists, some want to become the king of the land, and some want to realize their political ambitions on the platform of the New Order. There are all kinds of things, but no one wants to sacrifice themselves, right?”

These words immediately caused the face of the girl who had just said the words of sacrifice to turn red. She immediately said, “There will always be someone who has to sacrifice for the construction...”

“You say it in such a grand manner... “. “. ” The man rolled his eyes at the other party. “Those who have benefited from it all wish for others to sacrifice themselves. They are all raised by their biological parents. Why should they sacrifice themselves for your construction? “What’s the difference between your words and those unscrupulous bosses who tell young people to stop looking at their salaries?”

“How can it be the same?”The girl frowned. “This is our common home...”

“If you say so, then so be it?”The man interrupted her impatiently. “Everyone comes here to live a better life. When this place can really make people live a better life, only then will people treat this place as their home. It’s not like you can shout that this is their home, this is their home! ”

The girl: “ ... ”

“Well said! “Song Zaiyi looked at the boy with a face full of admiration, then, she looked at the girl and said, “You all come from all over the world. Different countries, different nationalities. Everyone came here to have a future. All of you came here to have a better life. Only when you have a better life will you treat this place as your home. You Don’t just rely on saying that the city belongs to everyone and make people righteously sacrifice their own interests. ”

The girl bit her lip and her face turned red.

At this moment, she also felt that she had gone too far. After thinking about it, it made sense. Those company bosses kept shouting that the company belonged to everyone and that they could do whatever they wanted to others, but did the company really belong to everyone?

I’m just here to do a part-time job. Why are you talking nonsense with me?

Didn’t I come here to escape from those shameless capitalists? Now he suddenly realized why he was the same as those people?

“Your view of the big picture is not wrong... “song zai looked at the Girl Gently, he did not completely deny her because of her wrong words, he said gently, “It is foolish to compare our strengths with our weaknesses. Our City’s big strategy is definitely to focus on the emerald star field. The emerald star field can provide more abundant resources, which is of great benefit to the city. However, how to make up for the risks and losses of the individual players and ensure the interests of the children is what we

should do. Since we want to build this place as our home, we must treat all the people as family. It is what a normal parent should do, isn't it?"

The girl's eyes reddened as she bit her lip and lowered her head. "I was wrong, castellan... "

Song Zaiyi gave her a gentle look, then, she brought the topic back to the main topic. "Firstly, we can't force our children to choose the abyssal passage. We have to use guidance. Furthermore, we can't cut off the children's right to choose the abyssal passage. First, we have to make it clear that our children won't necessarily be at a disadvantage if they go to the abyss. They have indeed spent a lot of time on gathering or other life skills, causing their individual combat strength to be inferior to that of players from other cities. However, this disadvantage will only be reflected in the initial stages. If children with strong wills can persevere, then their rich comprehensive qualities will definitely allow them to have their own advantages..." "

When the others heard this, they fell into deep thought. The city Lord's words were not wrong. The military was more focused on individual combat power, but their city's citizens' combat power was slightly lower. It was not because they were not as talented as others, it was because they had not completely focused on combat power at the start. However, the truth was that the third city had a large number of central China players, and their talent was definitely not inferior to other cities.

At the beginning, their individual combat strength might be slightly lacking. However, in a place like the army, once they were able to survive the initial phase of elimination and grow rapidly, they would definitely not be much inferior to other cities. However, once the distance between them was shortened..., their other comprehensive advantages would slowly manifest themselves.

For example, those who were proficient in gathering could earn a little extra money for themselves when they were out on missions. Perhaps they could collect decent materials to subsidize themselves. Those who were proficient in first aid could help themselves and their teammates in many missions, they could increase their recognition and value.

It was the same for players who were proficient in forging and leather making. Their skills could omit most of their equipment money. They could even become a side job to help increase their income. When the difference in combat strength was not big., these additional skills could increase their advantage.

As long as they could pass the initial screening, the advantage of the players in the third city would become more and more obvious as time passed.

However, the prerequisite was that they had to be talented enough to quickly familiarize themselves with the military environment and improve themselves. The people in the meeting room immediately understood the strategy that the city lord was going to execute... ..

Chapter 1854: Insurance System -PartpOne one)

The announcement of the opening of the new channel in the third city was soon released...

Announcement 1: anyone who has reached level 5 and has reached the basic requirements of a Level 5 life form can apply for the new channel. The treatment, subsidies, and conditions of each channel are different.

The Emerald Starfield channel requires a level 5 life form to be proficient in at least one gathering specialty, if the player was only proficient in production-type life skills such as forging, leather making, tailoring, enchantment, or first aid, they would have to have a team of teammates who were proficient in gathering before they could apply together!

The income of the Emerald Starfield pathway exploration and gathering quest was not stable. Other than the 1,000 points that the faction would subsidize, the city would also have additional subsidies, including basic subsidies, scientific research support, market guidance, and the city's preferential purchase policy!

Among them, the basic subsidies were the bottom-line subsidies. If the player was unlucky and the harvest was difficult in the emerald star field, the city would subsidize the corresponding cultivation resources according to the player's situation, moreover, priority would be given to ensuring that the training instructors arranged for the players to explore the emerald star field.

Scientific Research Support: all the resources that the players collected in the new planet, such as elemental minerals, high-level magical beasts, magical plants, including some rare elemental bodies and naturally formed composite resources, can send samples to the city for free scientific analysis, we will have a professional team for the people to judge the scientific value of the article and market value!

Market Value Guidance: the third city will set up a professional team to evaluate the market value of the materials sent by the players, and give corresponding guidance, such as a certain advanced magic plant, its use analysis, whether it is suitable for the production of alchemy potions or a certain special medicine, or if it is suitable for the production of magical beast feed or excellent agricultural products, they will give the players professional advice as much as possible, and the production cost will also be analyzed as much as possible., the players can cooperate with the city to mine and produce, or they can start their own business, but the products produced must first be imported to the city!

City preferential purchase policy: if a player discovers a place that produces a certain type of high-quality resources and does not want to spend their energy on mining, then the city can purchase it at a high-quality price, whether it's a one-time buyout or a split-rate system, they can be discussed at the last minute!

The second policy was regarding the abyssal passage.

The abyssal passage was a battlefield passage. It required players to meet the basic requirements of a Lord. Moreover, it strongly recommended that players who were confident in their own combat strength go there.

As the Abyss Passage had a relatively stable income, the city did not provide additional basic security. In addition, it was strongly recommended that players who went to the Abyss Passage buy the new rebirth insurance set up by the city, because once they were reborn... You had to start from the beginning. The

rebirth insurance could provide you with a sum of money to start up after rebirth, as well as the priority to queue for each training room...

Finally, I wish every player in the third city a bright future and become the most brilliant stars in the universe!

On the street, always busy inner volume of the third city, today the pedestrians become more than ever, everywhere in the discussion of the new announcement!

“We’re finally out. I thought we were going to be stuck here forever. The Emerald Starfield was supposed to be closed to the outside world, except for a few lord ranked players...”

“That’s right. More and more people are flooding into the new world, and there are fewer and fewer opportunities to earn money. Pve only just reached Level 4, and I already feel that resources can’t keep up with my body’s needs.”

“That’s right. When I first came here, I could eat a star Rhino steak for a long time. Now, even if I were given half a star Rhino, I might not be able to eat to my heart’s content. In order to control my body, I have to buy more advanced ingredients or advanced alchemy potions. I don’t have enough money at all. Right now, my consumption is more than ten times higher than before I reached level 3. However, my income in the New World is getting lower and lower. I feel that I won’t be able to support myself after reaching level 5.

Fortunately, Pve come to the New Passage!”

“What do you think? Brother, where are you planning to go?” A tall and skinny elf asked.

(‘I have two collection specialties. I learned this to make money. Of course, I can’t give up now. I plan to go to the Emerald Star Field. What About You?’

(‘I learned first aid. My main job is ranger. I feel that my combat strength is not bad. I plan to go to the Abyss army to try my luck...’

The crowd was full of discussions about the future. However, many people did not notice that there were two special people in the crowd.

“Song’s strategy fits his style...” said a beautiful woman, if anyone looked closely, they would see that it was the lord of the fourth city, Elizabeth. Beside her was the lord of the first city, Angor!

Angor nodded slightly in response to Elizabeth’s comment. The two had been in constant contact recently. Although the four major cities had formed an alliance, and there would be occasional visits between the lords... However, the two most frequent visitors were the two old politicians from Western Europe...

Songyi is indeed a very talented guy...”

Huaxia city was prosperous because they had the upper hand. With the highest quality population, their natural conditions were far better than theirs, so naturally, they would develop well. However, Songyi’s conditions were similar to theirs. Now that they were developing so well, it had to be said that the guy had a very good strategic vision... ..

This time was the same...

He did not hesitate to spend a large sum of money to encourage players to go to the Emerald Starfield. He also used an insurance method to obtain a certain amount of profit from the players who went to the Abyss Army. It could not be said that his calculations were not bad!

The Emerald Starfield was very similar to the attributes of the players from the third city. Most of the players who specialized in gathering items were like fish in water there. It was believed that they would be able to provide a large amount of new resources to the third city in a short period of time.

Although the city government's subsidies seemed to be very large, the returns would clearly be much higher than the subsidies.

Meanwhile, in the abyssal battlefield, players who could travel to the third city would not lack money. Meanwhile, as a high-ranking class, buying insurance would allow them to buy a reboot insurance policy. Most people would probably spend this money.., as players reached higher levels outside the city, the insurance policy they bought in the third city would also become heavier. Moreover, not only would they be giving money to the third city, but they would also be giving their own insurance policy to the third city.., they would also have a better relationship with each other. Although they were far away, the first thought that came to the players'minds was to consider the third city as their home.

This was an ingenious design...

"This insurance system suits you... "Angor looked at the man with a smile.

The fourth city was governed by the law of the jungle. The players who could walk out of the city were much better than the other cities in terms of fighting skills and fighting mentality. It was a good choice for them to take the military route. However, how would the players contribute to the city, however, this was a problem. The insurance system that song cared about gave them a reminder.

Players could only be reborn back into the city. As a high-risk job, the treatment after dying could indeed be used as a bargaining chip to pin down the players.

"You say it like you don't want to copy it! "Elizabeth rolled her eyes at the other party.

Although the first city proclaimed itself to be a city of technology, only one-third of the city belonged to the West Germans. The remaining two-thirds were mostly Chinese players with extremely high overall qualities, most of the Chinese players who were cut off from the spirit class were warriors in the first city. There must be many who chose the Abyss battlefield this time.

She did not believe Angor would not sell insurance!

Chapter 1855: Insurance System -PartpTwo two)

After the third city issued the policy, the fourth city and the first city also issued their own response announcements.

The fourth city fully encouraged players to go to the Abyss battlefield. It also established a regeneration center and spent a lot of money to buy Replicator equipment from the Lord...

When players went to the battlefield, they could choose to buy different levels of insurance from the fourth city. The insurance was subdivided but very perfect. It was almost the most perfect city in several cities.

According to the law, insurance was divided into three categories, including life and Property Insurance, life and duplicate insurance, and regeneration activation insurance. There were many subcategories among the three categories... ..

It was a dazzling sight. Life and property insurance includes all your assets, including high-level but equipment maintenance and compensation, storage and maintenance of valuable items, and insurance against purchase and damage of equipment, depending on the value of your equipment, the insurance premium will be higher and higher.

Life copy insurance naturally refers to life insurance. When you fall outside, what level of components do you need for your rebirth? The lowest level but everything will naturally return to zero, and you will become human again, then, you would choose your previous level one gene and slowly start from scratch.

This type of insurance was the cheapest, but it also had the lowest guarantee. Once you died, it was almost the same as starting from scratch. The higher level was to replicate your existing but high-level gene. Based on your life level and the difficulty of replicating a life form., there would be a relevant but insurance fee. As long as you could afford it, you could even completely rebirth into the best state!

However, the price was very expensive. Moreover, in order to maintain your expensive gene pool, you had to pay a high maintenance fee every month!

Lastly, there was the activation insurance after rebirth. Once you were reborn, you would need to quickly recover your state. In that case, it seemed that you would need to give priority to resource requirements after rebirth? Obtaining a portion of the activation resources?

After all, if one were to die outside, there would be many times where one would lose their equipment and many other things. After restarting, they would compensate you with a portion of the high amount of the activation funds. However, the exact amount of the activation funds would mainly depend on how much insurance you had, moreover, if you have not died, you will have to pay the insurance all the time.

This is similar to the life accident insurance in reality...

Moreover, whether it is the fourth city or the first city, after the introduction of the insurance policy, they also introduced the civil service system. That is, if you join the city but the civil service system before going to the battlefield, becoming the city but the official personnel, then the city will buy you a high amount of insurance, and bear the high insurance costs for you.

But after joining the city, you have to pay half of the resources that you get in the army to the city, and you have to obey the city's arrangements, to lay down certain resources for the city, and so on... ..

After the introduction of a series of insurance policies, it caused a huge uproar. Some people agreed with this insurance system, and some didn't. But fortunately, several cities were free to choose, whether

you were willing to join the government or buy high-priced insurance, it was your choice. You could even choose not to join the government or buy insurance. However, you had to bear the consequences yourself.

Although some people were dissatisfied, it was still okay. After all, they were free to make their own choices. However, the policies introduced by the fifth city were a bit excessive... .

After the policies of all the cities, the fifth city also introduced its own policies.

Policy changes can be said to be a big surprise!

“Yang, look at this! I”

At this time, a newly established small tribe in the new territories, a physically strong black player in the tent to come into Yang Rui waved!

Tents, around the table a row of players, most are Huazhong, but also the fifth city Huazhong players.

Due to the mistral high-pressure policy, there were very few players from central China who could walk out of the city. However, Yang Rui and the others had managed to gather a group of friends. This year, they had gathered together and developed within the new territories, and the momentum was quite good.

However, as more and more people entered the new territories, fewer and fewer resources were available. Everyone’s levels were higher and higher, and they clearly felt that they did not have enough resources, not to mention helping their compatriots who had yet to come out of the city.

When they had first established the fifth Huazhong Alliance, they had been determined to help their compatriots who were in trouble in the city. Over the years, more than half of their resources had been used to help their new compatriots who had a more upright outlook on life, causing their respective economies to be very tight. Now that they had finally come out of the new passage, they were just about to show off their skills. Their only concern was the hindering mistral... .

Yang Rui walked over and looked at the newly released bill. He was a little stunned. He did not expect that MISST would actually do this!

According to the information above, the fifth city still had a restriction on central China players this time. However, there was only one restriction:

non-official central China players participating in the passage. They did not go through the official special training and perfect insurance system, considering the safety factor and the high level requirement, they had to be level 6 before they could register for the passage!

This restriction immediately made everyone’s faces turn as black as coal. Currently, there was a shortage of resources. Players could barely reach level 5 in the New World. Level 6. Then, they basically did not need to think about going out in the next few years... ..

This was practically locking down the players from central China. They were trying to force the players to rebel... ..

However, the last few words made the anger of the group of players dissipate. They were a little dumbfounded... ..

Second: all official players will enjoy the highest insurance benefits in the city. All-free gene duplication, high-cost regeneration insurance, and all sorts of benefits in the city, each player will receive a fixed daily allowance of 500 points and enjoy the preferential tax reduction of the territory!

Moreover, players only needed to pay 30% of the military income to the city. If they performed well, the city would also receive a high amount of resources as rewards!

Third: in order to strengthen the competitiveness of the players and quickly take up the quota, the city will open a special training channel. Players who have not reached level 5(only Huazhong Players!) will be accepted as candidates for city official duties, they will enjoy the unlimited resources subsidy of the city. All training resources will be arranged by the city government. The city will also hire an excellent instructor team to conduct fixed-point free training for the training class!

However, the prerequisite was that they had to join the city's official system!

The last two announcements directly stunned the group of people... ..

"Rico, what do you... What does this mean?" One of the female players from Huazhong said in a daze.

"What else can it mean?" Yang Rui sneered, "That Guy Mister Can't hold on any longer, and now he's finally starting to rope us in..."

This bastard was quite capable of spending a lot of money!

The unlimited resource subsidy meant that all the training resources of the players before they reached level 5 would be provided, right?

This kind of discount was not afraid of provoking his own white fans to rebel!

However, it made sense when he thought about it. In the current situation, there were not many of his white fans left. Rather than waiting for death, he might as well jump across the board and drag the players from central China to his camp!

His methods were simple and crude. He had a big stick in one hand and a big sweet date in the other!

If he did not join him, he would almost be locked in the city. However, if he joined him, he would have to contribute to the GDP of his city. He was really an old dog-like figure... ..

"Rico... "a male elf from Huazhong beside him said carefully, "This sounds a little tempting. Shall We... join?"

"Add it! Why Not?" Yang Rui immediately smiled and said, ("I was worried about not having the resources, but you don't want the free lunch that they came for. Are You Stupid?"

"But... "someone hesitated and said, "Does this count as submitting to those white dogs again?"

"Submit?" Yang Rui laughed and said, "With this policy, I'm afraid that the white dogs will really become dogs soon! "

Chapter 1856: What to do in the future?

“Meister seems to have gone crazy...”

In the conference room of Huaxia City, elder Li looked at the announcement made by the fifth city with a smile and said to the city lord beside him.

The city lord shook his head with a smile, “This is in line with his personality as a small businessman. Only bei mi can choose such a person to become the city Lord...”

The administrative staff at the side also laughed when they heard this.

Endlessly subsidizing the Huazhong players. It was a good thing that he dared to play this way. The other cities were wary of the Huazhong players taking the lead in order to prevent their own race from being completely devoured by the resource space. In the end, Meister completely disregarded it... .

Without a doubt, once the other party did this, the Huazhong Players of the fifth city would swiftly pull away from the levels of the other races. Especially at this juncture, the new channel represented a huge amount of resources and opportunities, the players of central China who were the most qualified in the first place were pushed forward with all their might. The white players who had already been raised and crippled would have even less of a chance. Mister had completely given up on his compatriots this time!

As for the benefits of doing this? Of course, it was to extend the life of the castellan!

In the castellan’s vote that was held once every five years, the citizens only took up one-third of the votes. One-third of the votes were from the outer d players, and one-third of the votes were from the higher-ups based on their political achievements!

According to the previous situation, the players from central China hated him to the core. The third-ranked players looked like they were licking dogs on the surface, but they were also secretly very dissatisfied. In addition, the white players were not able to compete in the outside world, so the media blamed Mister, he had almost lost all of his voting positions.

And because the city’s competitiveness was extremely low and development was extremely low, the higher-ups who voted according to the city’s development were also likely to vote down.

As for the humans on the D Ball? Hehe, the media’s current trend had already blasted Meister into a sinner of North America. Other than a few die-hard fans, most of them probably hoped that the other party would quickly step down.

Under such circumstances, if they wanted to survive in the face of death, jumping across a wave and completely guiding the central China players was indeed a method.

If the central China players who gathered their resources and pushed out performed significantly and could bring about a certain amount of GDP, the upper-level votes would at least be stabilized.

Meanwhile, within the city, the central China players gained benefits. Although they hated him to the

bone in the past., however, for their own protection, they would probably vote for him. After all, if another politician came to power, they might not have such a crazy support policy.

After a few reversals, it was not that there was no chance for him to be re-elected. As long as he was re-elected, Mister would be able to think of a way out. If he were to step down in less than five years, there might not even be any bones left after the liquidation!

“This old dog... “elder Lei had a look of disdain on his face. “To be able to choose such a strange person to take the stage, I really don’t know if it counts as the democratic freedom they speak of... ”

“Elder Lei, your progress is not bad? “City Lord Elder Long looked at elder Lei with a smile. In the entire conference room, of all the old fellows, only elder Lei was a level four lifeform. The few of them were still lingering at level three... ..

(‘I’m old... no matter how good my progress is, it’s only compared to you old fellows... ” elder Lei shook his head with a bitter smile.

At the beginning, he did have the thought of going back to the past and competing with the young people outside. After all, when he had just converted his genes, that Green Titan body gave him a feeling of being reborn!

But he was still old...

With Lei Xue’s help, he did not lack resources. Moreover, he did not have to work like the young players. He could use all his time to train. Moreover, he could use the backdoor when choosing a coach. But even so., he still found himself being overtaken by more and more young players. A feeling of powerlessness that belonged to the passage of time surged in his heart once again.

He had to admit in his heart that he was no longer at an age where he could fight...

Looking at elder Lei’s somewhat dejected expression, the other old men also felt an inexplicable sense of regret...

Everyone knew that this world was ultimately the world of young people. This was not like the previous slogans. This time, it was a real and fitting feeling. The coaches had once estimated their lifespans.

When they were still human, their bodies had already aged to a certain extent. This degree of weakening of the soul was irreversible. Even if the players in central China had outstanding talent, with their level., their lifespans were limited.

According to the rumors, it was almost impossible to evolve into a dragon-like body and live as long as the stars... ..

“What’s there to be sentimental about?”Elder long smiled and said, “We’re old. If we should die, so be it. Let’s build up the foundation of this city and abdicate when the time comes. Then, we old geezers will buy an airship and go outside to take a look. We’ll experience the Sea of stars that young people often roar at!”

“It sounds pretty good...” . . . Elder lei smiled and said, “It’s a pity that we won’t be able to travel for long. According to Lei Xue, many tourists will drift in the galaxy for millions of years without even seeing a living shadow. We Old Geezers better not suffocate to death on the airship... “ . ”

“What are you afraid of?” Elder Li laughed and said, “Bring a deputy mahjong player and you’ll be able to play for years!”

“Hahaha...”

The group of old fellows were chatting like this. Lei Xue, who was holding the documents and preparing to come to the meeting with them, heard this scene outside the door and paused slightly. It was rare for her, who had always been business-like, not to disturb the group of old men who were fantasizing about the future.

The New World gave many people a chance to start over, but it did not give these old men much choice. Back then, the Lord had made this group of people become politicians. Firstly, it was to use their identity and appeal. Secondly, it was also to appease some people. After all... ... This world had never been fair to everyone.

It was believed that many middle-aged and old men would feel an imbalance in their hearts. They would complain about why this world did not come when they were young and strong. Why did they have to let them see the beautiful scenery and then tell them that it was not suitable for them to go?

There were no answers to these questions. To put it bluntly, one could only say that one was unlucky. This world had never been fair. Before the New World came out, all the young people were complaining that the older generation had snatched away the era’s dividends, there were fewer and fewer things left for the young people. However, the progress of the general trend would never stop because of individual wishes.

It used to be like this, and now it was also like this. In view of the unwillingness of the old people, especially the city’s higher-ups who held great power, the higher-ups actually had a set of special countermeasures. Now, it seemed that these strategies were no longer needed...

This result made Lei Xue Happy. After all, if it wasn’t necessary, she didn’t want to become enemies with these former elders... ...

Thinking of this, Lei Xue stood quietly outside the door, listening to the elders talk about what to prepare before retiring and traveling. Apart from mahjong, shouldn’t there be some other items?

Being so comfortable, Lei Xue suddenly began to think about her future. She should directly participate in the next national examination. At that time, she could really experience Goudan and the others’ lives.

What would her future be like? What kind of school should she choose? What should she do in the future? Or become an adventurer like Li Goudan? She didn’t know if she would be able to catch up with Li Goudan’s boat.

Speaking of which, she had gone on an adventure with Li Goudan before. Although that experience was quite thrilling, in hindsight, it was really a journey worth reminiscing about...

As she thought about it, Lei Xue’s face, which had always been formulaic, suddenly smiled foolishly...

Chapter 1857: Xiao Hei’s complaints!

The new law was introduced. Compared to the other cities, the second city was much calmer. This place was rich in flower spirits, and many people responded with an “OH” after hearing the news. They were still lazily doing what they were supposed to do, it was very much in line with the style of flower spirits.

If Pu Yunchuan and the others came to see this place, they would definitely think that it was a pile of cabbage...

When Chen Shanshan came here, she was also affected by the relaxed atmosphere here. She could not help but feel much more relaxed. Looking at the beautiful idyllic scenery around her, she could not help but sigh, “This place is really a paradise...”.

Compared to the relaxed atmosphere in the second city, the third city was in a high-intensity rhythm every day. Pedestrians could be seen in a hurry at any time, unlike here...

Soon, Chen Shanshan arrived at Blackie’s house.

To be honest, the city lord of the second city indeed treated the players too well, especially the players in central China. Almost every high-level flower spirit like Blackie lived in a manor-level house. If it were her, she would probably lie flat on her back every day, what else was there to pursue on this day?

Under the guidance of the wind element, Shanshan sped up and walked for at least half an hour before she finally met Blackie, who had gained a lot of weight...

It was true that flower spirits could easily become flower spirit pigs...

Shanshan could not help but twitch her lips. She went up to Pat Blackie’s round belly and sighed. “Why do I feel like you’re giving up on treatment? In the past, when we were in the dormitory, at least you knew how to maintain your body shape...”

“At that time, I wanted to find a boyfriend... “Blackie climbed up with difficulty and stuffed a lump of cream cake made of an unknown material into his mouth. He said happily, “Now that I think about it, a man can only affect the speed at which I draw my sword...”

“Affect the speed at which you eat, right?” Shanshan rolled her eyes at him.

“Where’s Xinya?”

“She’s making a scene, I don’t know where she went... “Blackie looked very helpless.

“Why is she making a scene?” Shanshan was stunned.

After all, she had not been here for a year and did not know many things.

“It’s nothing... “blackie smiled and said, “She often makes a scene and will come back to look for me after some time...”

“Why?” Shanshan was stunned.

“Because without me to raise her, she might starve to death! “Blackie pouted.

Shanshan. ” ... ”

"It can't be that serious... "Chen Shanshan was immediately embarrassed.

"It's very serious! "Blackie dragged his thick chin and said, "You don't know how difficult it is to make do with that person. In the beginning, I found her some jobs that were very cost-effective, such as helping to take care of those light magical beasts or helping to take care of other people's magical plantations. They were all very easy jobs, but the points were not lower than mining. "

"That's great... "Chen Shanshan laughed.

"What a hammer... ". Blackie rolled his eyes and said, "I can send a few elemental elves to do such a simple task better than her, and she can often mess it up, especially when she has lost her magical beast or damaged her magical plant sample several times, and I have to pay for it... ". "

"Uh... haha..."Chen Shanshan carefully said, "It's just the beginning. There will always be some unfamiliarity. It'll be fine as long as she's familiar with it..."

"The key is that she can't calm down. After a few days, she feels that her income is too low and wants to go to the new world to explore..."

"Oh, it's a good thing to be ambitious..." "

"Of course it's a good thing to be ambitious, but it's not a good thing if she just wants to reach the sky in one step! "Blackie said angrily, She said that she's many days behind the others in the fifth city, and she needs to make up for her time as soon as possible. She can't waste her time like this, so she hopes that I can support her! "

"How... How can I support her?"Chen Shanshan suddenly felt that something was wrong.

"Of course it's material support. Could it be spiritual support? "Blackie stared at her and said, "She started to ask for my resources to support her and said that she would return it to me in the future. I couldn't refuse, so I just supported her to advance to level 3..." damn it, Pm angry when I talk about this. She's a Ranger, and the resources she needs to advance to level 3 are several times more than mine. One moment, she needs special training equipment, and the next moment, she needs good weapons. Come on, you're a novice ranger. What enchanted weapons do you need for training?"

"Ugh... "Chen Shanshan swallowed her saliva. Enchanted weapons. She really dared to ask for them..."

The elves of the third city could be considered quite profitable in the new world. However, many of the elves that had reached level 4 still used the new hand bows that they had used during their initial training. How tight were their resources right now? After leveling up, they needed money for advanced ingredients, training courses, and all kinds of advanced training rooms to rent.

It was already considered a luxury to even have a high-quality weapon. Enchanted Weapons? Only some lord-tier players who had established their own forces could afford that thing, right?

"You gave it to me?"

('I made some money selling corn... "Blackie pursed his lips, obviously meaning to give it to her.

Chen Shanshan's breath froze. "You make so much money selling corn?"

“That depends on who grows the corn! ! “The mention of corn cheered Blackie up immediately.

“Cough... “Chen Shanshan quickly interrupted him. “Let’s talk about Xinya...”

She knew little black well. In the past, when she was in the dormitory, she could talk about planting corn in the South China Sea for an entire day. Now that she had planted high-grade corn, the topic would probably be many times more interesting than before. She still had to go back and register earlier in the evening... ..

“What does she have to say? “Blackie immediately lay down again. “I gave her a lot of SH * t and Pee and raised her to level three. I originally thought that I had finally sent this daughter of mine to graduate, but in the end...” “In the end? “Chen Shanshan asked curiously, “Didn’t I return you the

“Return the money? “Blackie was immediately amused. “Oh my God, you actually dared to think that she would return the money? At that time, I only wanted her to get lost quickly so that she wouldn’t have to come and get me again. Oh My God! ”

Chen Shanshan. ” ... ”

“In the end, I was naive! “Blackie said angrily. “In order to make her go to the new territories smoothly, I not only gave her a good set of equipment, but also let her go to a Lord Friend of mine to do a mission. ”

“You have friends of the Barons?”

“I know him from selling corn! “Blackie smiled smugly. “Let me tell you, my corn is now selling like fire in the new territories. Several lord-level players have cooperated with me. Of course, not only did they cooperate with me on corn, but they also sent me a lot of new crop products for me to try growing...

“Oh... “Chen Shanshan nodded. “Then she should be doing very well...”

Damn, Blackie actually had such connections. If he had known that he would come to Blackie first when he went to the New World, he would not have been tricked by the evil lord-tier players... ”

“I thought so too... “Blackie sighed. “In the end, she came back dejectedly in less than two months...”

“Is it... not going well?”

“It’s not going well at all! “! ! Blackie sighed and said, “I introduced her to four lord-tier players. The seniors arranged at least four or five missions for her, and every time, she made mistakes. It’s said that all the teams that have worked with her despised her. As a ranger, she doesn’t know anything about gathering and first aid. She’s not even qualified to be a ranger, whether it’s combat support or scouting. Yet, she wants a share of the money for no reason. Who would be willing to do that?”

“After being ostracized by everyone, she didn’t even think about improving herself and went home in a huff, continuing to eat and drink for free at my place... ”

Chen Shanshan. ” ... ”

All of a sudden... she was so envious of Xinya...

“Then why did you guys get into a fight this time?”Chen Shanshan asked curiously.

“Isn’t the new bill out?” Blackie sighed. “She couldn’t sit still anymore and came to me to discuss...”

“Don’t tell me... She wants you to support her up to level five?” Chen Shanshan stared at him.

Most people wouldn’t talk about this kind of thing, but Xinya couldn’t say for sure.

“That’s a small matter... ” Blackie waved his hand... ..

Small matter... “Chen Shanshan swallowed her saliva again... ..

It seemed... .. Blackie, the corn seller, was doing exceptionally well. Supporting A level five life form was actually a small matter?

“These are all small matters... then what is a big matter?” Chen Shanshan was getting more and more curious.

“Of course it’s My Corn! “Xiao Hei was so angry that he sat up again. “That guy noticed my corn! ”

Chen Shanshan. ” “

Chapter 1858: Xinya’s resentment (part one)

“Corn fields...

Chen Shanshan was speechless. She never thought that she would be able to bring up the topic of corn fields in the end. She could not help but ask, “What’s wrong with corn fields? Why would she fancy your corn fields?”

“Of course it’s to earn money! “Blackie pursed his lips and said, “After I became a flower spirit, I specialized in genetics and agriculture. In the second city’s experimental fields, my project is the best. My corn grafting genes are extremely good. The finished product is top-notch in terms of genetic stability, texture, and energy supply. Right now, my corn is the hottest-selling level 2 food. Several lord-tier players have signed supply agreements with

me... “. “ ...”

“Then... how much money did you earn from your corn field?”

“I don’t earn much now. It’s just a few million points. The main reason is that the cost is high, and there aren’t many people who can afford my corn...”

“A few million...” Chen Shanshan immediately felt her mouth go dry. My mother, I always heard this guy in the dorm saying that he wanted to go back to Hainan to grow corn to earn a lot of money. It turns out that he wasn’t joking... ..

F * ck, a few million? It’s only been a year, right? A few million a year? Is farming so profitable?

No wonder he boasted that it was a small matter to provide a level five life form...

It really was a small matter!

"I remember the law of the second city. Land and other things are common, right? Can your land be transferred?" Chen Shanshan put away her shameful envy and changed the topic.

"Of course not... <per_o> . "Blackie rolled his eyes and said, "Besides, it's useless to transfer it. She doesn't know how to grow it. She thinks that I've made the business small and wants to be the spokesperson for my agricultural products. She'll talk to the players of the lords and share some of the profits with her... <per_o> .

"Sounds... good..." Chen Shan Shan Shan hesitates way.

"Good my ass... "... Blackie glared at her. "I don't know how to negotiate on my own." "It's not a large-scale business. The market price is so transparent now, and there's no fluctuation in the transaction price. There's no financial market now, and we can't speculate on Futures, so why should she negotiate?" "She wants to split the profits with just two sentences. Isn't she overthinking it?"

"It seems like... that's true..." Chen Shanshan smiled embarrassedly.

"Then she wants me to expand the scale. She wants me to take out the formula, hire more flower spirits to expand the scale, and seize the agricultural market..."

"This..." Chen Shanshan said carefully, "Isn't it good?"

"Of course not..." ". Blackie sighed and said, "I'm not an influential lord-tier player like cabbage. How can I manage to expand the scale? How are the teams going to do it? How are they going to market it to the public? Putting all that aside, just my technology alone can not be replicated. What I'm making is a high-end, low-volume product, which is an active agricultural product. It requires the high-level flower spirits to take care of it at all times. Even with my recipe, the quality and attributes of the elemental spirits that can be cultivated are different. If the details are not in place, the product will be different in taste and quality."

"This kind of thing can't be mass-produced, but she didn't believe me when I told her. She thought that I had a secret recipe and said that I didn't trust her. If she didn't believe me, how could I believe her? I was annoyed by her, so I told her to get lost..."

"Ah?" Chen Shanshan was stunned. "Then... she left?"

"Temporarily..." Blackie seemed to understand the other party very well. He looked at the time and said, "She has been gone for three days. She should be back soon..."

Chen Shanshan: "...'

She was just about to say that she might have hurt the other party a little this time. Should she go and look for her?

In the end, before she could finish her sentence, she heard an intelligent notification in the house saying that someone had come to visit her... Blackie sighed and opened the intelligent screen. On the screen, he saw Xinya standing at the entrance of the manor with a pale and aggrieved face. She looked even more pitiful when she saw how the beautiful genes of elves made her feel lonely.

Although she did not say anything, just standing there made people want to comfort her!

It was the first time Chen Shanshan saw Xinya like this. Instantly, she felt both difference and heartache. After all, how prideful was Xinya in the past? Why would she show such a little daughter attitude to them? She immediately looked at Blackie.

“Blackie, Xinya has already admitted her mistake. Don’t fuss about it...”

“Which ear did you hear her admit her mistake?” Blackie stared at him.

“Besides, she was wrong to begin with, shouldn’t she admit her mistake?”

This made Chen Shanshan choke. She laughed and said, “You, Xinya is such a prideful person. If you can put down your attitude, don’t be so unreasonable...”

“Proud?” Blackie pursed his lips and said, “That’s because you don’t know her, including me. Now that I think about it, it’s actually true. In the past, when we were in the dormitory, we couldn’t help her, and she didn’t need to ask us for anything. She was always bringing back luxury goods and luxuries. She was full of a sense of superiority. Of course she was proud. But in fact, when she was outside, would she be so proud when she was dealing with those men who kept

“Er... how can you say that?” Chen Shanshan did not know whether to laugh or cry. “If you say that, don’t you think of yourself as the man who keeps her?”

“Isn’t That So?” Blackie sneered. “Even her father doesn’t have to work as hard as I do...”

“You...”

Chen Shanshan looked at Blackie helplessly, but she did not continue because she keenly heard that Xinya was already walking in quickly from afar.

“Eh? Shanshan, when did you come?” Very soon, a familiar surprised voice came from not far away.

“Not long ago...” Chen Shanshan raised her head with a smile.

At this moment, Xinya’s face was glowing, completely different from the Haggard and weak appearance she had in the fifth city previously. Coupled with her clothes that were obviously of high-level craftsmanship, she looked like a fairy from a fairy tale.

It seemed like... Xinya was indeed living a good life with Blackie. .

“Why did you think of looking for us?” Xinya came over and sat down, stuffing a piece of cake into Chen Shanshan’s Plate.

Chen Shanshan smiled. “Isn’t the new tunnel out? I just wanted to come over and have a chat with you guys. I just wanted to ask you guys how to get back. Do you want to sign up together?”

“Sign up?” Xinya looked at Chen Shanshan in surprise. “Doesn’t that require level five to sign up...” at this point, she suddenly paused, then looked at the other party in surprise. “You... You met the requirements?”

“Uh... haha...” Chen Shanshan scratched her head and said in embarrassment, “Our place is more closed-ended, and the average level-up is faster...”

“Is that so...” Xinya swallowed her saliva.

A hint of regret flashed in her eyes. Back then, Guo Xiaoyun had once advised her to follow Chen Shanshan to the third city. She had wanted to relax back then and stayed with Blackie. Now that she thought about it, it was indeed a wrong choice.

The second city generally paid attention to flower spirits and priests, and gave various subsidies to jobs like Blackie and the others. However, it was not so friendly to Rangers like them, whether it was the teachers hired or the money spent on the training grounds. As a result, the training fees here were very expensive, and it was very difficult to get training instructors. Even with Blackie’s subsidies, it was very difficult for him to level up, and he often could not get into the training room... ..

When he was outside, his comprehensive ability could not compare to the third city, his combat ability could not compare to the fourth city and Huaxia City players, and it was even more difficult to get resources... ..

If he had known earlier, he would not have made such a decision so easily.. For someone like Chen Shanshan to reach level 5 so quickly, it could be seen just how important it was to choose the right path!

Chapter 1859: Xinya’s resentment (part two)

The expression in Xinya’s eyes stunned Chen Shanshan. Her observational ability was one of the best among her peers. This was mainly due to her talent in observational skills. Of course, it was also related to her profession as a collector.., there had always been strict training in observational skills.

She could clearly see the trace of regret in Xinya’s eyes. She could not help but sigh in her heart. Back then, everyone had advised her to either go to the third city or go to the first city to take the route of a mecha operator. In fact, Xiao Yun was indeed very farsighted.., in the new territories market now, the most popular place was the third city, which brought along Rangers who specialized in gathering, followed by the first city’s Mecha Rangers!

With the help of machinery, the Rangers’ error tolerance rate and combat ability were higher than those of the same level. Moreover, the first city gave priority to supporting mecha operators, allowing them to rent low-level mecha in advance, which not only increased the competitiveness of the players in the new territories.., they also used the rental method to collect a considerable amount of rent, allowing the economy of the first city to closely follow the economy of their third city.

Both cities were more suitable for the scattered central China players. However, Xinya did not listen to them. She had her eyes set on the excellent living environment on Little Black’s side.

Actually, this choice was not wrong. Some people had their eyes set on the future. Choosing the present was a little bitter, while some people had their eyes set on the present and wanted to live a little more comfortably. Actually, both were not wrong. It was just their respective attitudes towards life. However, there was a problem with regretting the choice... ..

Chen Shanshan believed that Blackie definitely didn't mistreat Xinya. It definitely allowed her to live the comfortable life that she had previously wanted. However, under the comfortable life, she was now regretting it. This...

It was all due to greed.

Actually, many people were like this, having this and wanting that. However, in this world, there were many things that one could give and take. There were very few situations where one could reap all the benefits... ..

"So you're saying that the third city's registration competition should be very strong?" Xinya suddenly thought of something and asked curiously.

If it was like what Shanshan said, the internal volume was serious, and many people had broken through level five, the registration competition should be very strong. Thinking about it, it seemed to be much better.

"Haha... It's Alright..." Shanshan touched her head and giggled foolishly, while little black, who was at the side, curled his lips.

Only Xinya, who seemed smart but was actually brainless, would believe these words. The third city indeed had a serious internal turnover, but the players in this city spent half of their time on life skills., even in the New World, due to the popularity of the comprehensive quality of the players and their strong gold-digging ability, they still needed to spend a large amount of time to make up for the missing combat skills. Therefore, although most players in the third city earned a lot of money,. Their leveling speed was slow... ..

It was rare to see a new batch of players who could reach level 5 so quickly, including those from Huaxia City. If they were to sign up now, they would be directly accepted one by one... ..

Of course, Blackie would not say such a thing out loud to prevent Xinya from causing any trouble. After all, Chen Shanshan had left after putting on a show today. If Xinya wanted to cause trouble after being provoked, she would be causing trouble for herself... ..

However, there was one thing he said. Shanshan's aptitude was good. The priestess profession was almost the most difficult profession to level up. To think that she could reach level five so quickly. One had to know., many players who were born with combat professions were still suppressed by level four.

"Blackie, where do you plan to go?" Shanshan asked the question that she was most concerned about.

In the past, her relationship with Blackie was almost the best in the dormitory. Xinya was often taken out by those luxury cars to play, and the days of returning to the dormitory could be counted on one's fingers. As for Xiao Yun, he was addicted to online games... In the dormitory, Blackie was the one who was the best at playing with her...

"Me?" Blackie smiled and said, "I should be staying here as a civil servant. The Academy of Science established by the Castellan intends to make me the director of the Agricultural Research Institute... "

"AH? When did this happen?" Xinya looked at Blackie in surprise.

“Well... “Blackie suddenly felt that he had said something... ..

“Why didn’t you tell me about such a big matter?”Xinya did not let him go and questioned him.

Shanshan frowned at the side. No Wonder Blackie’s good temper was getting more and more unbearable for Xinya. His questioning tone was baffling. What was Blackie doing? Why did he have to report to you?

“I just received it... “Blackie could only fool her. “I haven’t had the chance to tell you... ”

“Is that so?”Xinya instantly bit her lip. “You have to tell me about this as soon as possible. Oh right, what are you going to be in charge of when you become the Dean of the Academy of Science?”

Chen Shanshan. ” ... ”

“This... Ah... Ah, I’m not sure yet... .. After all, I haven’t taken up the post yet . “But I heard that you’ll be traveling frequently. After all, the biggest project right now is to study the new species in the emerald starfield the fastest. When that time comes, I might often go to the emerald starfield to observe the environment on the spot ”

“Is that so... “Xinya suddenly rubbed her chin as if she was still thinking about the benefits that Blackie’s new job could bring her. However, Chen Shanshan, who was standing at the side, could tell that Blackie was planning to slip away and get rid of Xinya...

“Cough... “seeing the strange look in Shanshan’s eyes, Blackie coughed lightly and changed the topic. “Shanshan, have you decided on your direction?”

“Yes... “Chen Shanshan nodded. “I should have decided. I plan to go back and register for the Abyss...”

“The Abyss? “Blackie was stunned. “You want to join the Army?”

These words made Xinya, who was plotting Blackie’s new job, stunned. She looked over in surprise. “No Way? Why do you want to join the Army?”

The Abyss passage clearly said that there would be risks on the battlefield. Things like war could be lost if one was not careful. Even if one could be reborn, it was equivalent to losing a year’s worth of effort!

That was not all. It was said that under some special circumstances, he could not even be reborn. He might even die outside. Why would a girl like Shanshan want to join such a job?

Seeing the stunned expressions of the two of them.., chen Shanshan stuck out her tongue and said embarrassedly, “It was not a spur of the moment. I had considered it. I was not born as a ranger. Even if I had a gathering specialty, it would be very inefficient to go to the emerald star field. In addition, I learned ocean gathering. However, the newest dozen or so planets in the emerald star field are basically continental planets. The ocean area is limited. I feel that I am not suitable...” . ” ... ”

“On the other hand, the army lacks the support of priests. Furthermore, I know a little prophecy, which is very useful on the battlefield, so I want to give it a

try..”

“Even so... isn’t it too risky?”Xinya frowned. “Is there a need to work so

“About that...” How should I put it... ” ... “Chen Shanshan scratched her head. “Yes.” . I have a feeling that the pace of this place is getting faster and faster, and the gap between people is getting bigger and bigger. If I neglect it a little, Pm afraid that I won’t even be able to see the shadow of others in the future... “.

“The other person you’re talking about... are you referring to Xiao Yun?”Xiao Hei grinned.

“Yes! “This time, Chen Shanshan did not deny it. “Xiao Yun has already gone to high school, and Pm afraid he’s already over level 10. At first, I thought it sounded like nothing much, but after he slowly leveled up, I increasingly don’t think so...” . “.

“Every time I upgrade, I feel like I am on a completely different level from the person I was yesterday. This kind of obvious upgrade makes me feel the importance of stepping forward. I have recently looked at the life expectancy of living things. The average life expectancy of us wood elves is relatively high. A level-5 life form has a lifespan of 1,000 years, but a level-10 life form has a lifespan of 1,000,000 years! ”

“What is the concept of a life span of a thousand years or a million years? “Chen Shanshan stared at Xiao Hei. “In other words, if I don’t make any progress now, then my existence is just a person that Xiao Yun has known for less than a thousand years in her life journey. Perhaps after a million years, ten million years, or even longer, after seeing countless sceneries and experiencing countless scenes, we would probably be as small as dust in her memories. She might not even remember us... “. <per_0> .

“So I want to go for it. I don’t want to be pulled too far by Xiao Yun...”

“ER... “Blackie revealed a kind of ineffable expression for the first time: “This... has... . Has So Exaggerated?”

“What do you think?”

“It’s... <per_0> . I don’t know... <per_0> . Xiaoyun is really quite powerful, want to keep up with her footsteps, Shanshan is quite ambitious... <per_0> . “Blackie suddenly laughed and said: “But don’t worry too much, we did not hold you back, at least the first batch of new players to level five is not it? Not to the point where she forgets... <per_0> . .”

“You ‘re level five?”

In the small black comfort Shanshan, a faint voice suddenly sounded, let the small black body hit a quiver.

“When did this happen? “The faint voice continued to ask.

“UH...”

Chapter 1860: Young ... Cherish your time!

“When did this happen...”

Xinya’s voice sounded cold. The beautiful weather made people feel cold for no reason. Blackie subconsciously shrunk his head, but the next second, he reacted...

Why the F * ck Am I feeling guilty?

“Ahem... “Blackie sighed. “You’ve already reached level five long ago. It’s been almost two months and you haven’t felt anything? That’s right, you haven’t gone to exercise since you came back. Now that you haven’t even reached level four, it’s normal that you don’t feel anything...”

“I...”Xinya’s breathing suddenly stopped. She bit her lips and said, “But... you didn’t do anything. Normally, I saw that you didn’t do anything. Why did you level up so quickly?”

“Who said I didn’t do anything?”Blackie was instantly amused. “Look at those fields outside. They’re taken care of so well. Those are active plants that need to be taken care of like babies. They also need to be replenished with trace elements at any time. Who Do you think is doing it?” “And this manor is so well taken care of. Who Do you think is doing it?”

“Aren’t they elemental elves?”Xinya was stunned.

“Big Sister... “Blackie covered his head and said, “Then who is controlling these elemental elves?”

“There’s still a need to control them?”

“Do you think they’re robot sweepers?”Blackie laughed. “Do you think they don’t need to care after charging? Moreover, even robot sweepers need to be charged. Where do you think the energy of the elemental elves comes from?”

“There’s a reason why flower spirits get tired easily... “. . . Chen Shanshan also explained at the side. “A large amount of mental strength needs to be used to maintain the stability of the elemental spirits. Then, if you want them to do things, you’ll need to spend a large amount of mental strength to carefully control them. Hundreds or even thousands of elemental spirits, it’s very taxing to subdivide and control them. You see, most flower spirits are gluttonous and sleep-deprived. That’s because mental strength and mental strength are consumed greatly, and the body will need a large amount of sleep and sugar to replenish... ..

“That also very relaxed?”Xinya pursed her lips and said, “Lie on the spot to direct, like playing a game, which is like us?” Every day like a dead dog, the body did not increase much energy, and our training instructors to spend money, training room to spend money, especially the advanced training room, is simply unfair, I do not know why I am a Ranger department... ”

“UH... ”

Shanshan and Blackie looked at each other, not knowing what to say for a moment.

Indeed, the cost of a melee lifeform was indeed higher than that of a spirit-type player in the beginning, but in terms of difficulty, a spirit-type player wasn’t low. Meditation required the ability to calm one’s mind, and a

slight lapse in concentration might cause the meditation to be interrupted, it also required a large amount of time to enter the state of mind, and controlling the elven elements was definitely not as simple as it seemed to outsiders.

This was just like how many people felt that it was easy for a white-collar worker to work in an office, or that it was tiring to carry bricks. In fact, everyone had their own burdens, and no one was much more relaxed than the other.

As for the cost, the spirit-type players did indeed take advantage of it in the beginning, but that was only now. They knew that after reaching a higher level, the consumption of spirit-type life forms would increase exponentially!

When meditation was insufficient to restore one's spiritual power, expensive spirit potions were often needed. When making a specialty, expensive equipment was required, and a large amount of trial and error costs were required. The consumption would often be several times more than that of close-combat life forms, so why was it said that the mage was the master?

Furthermore, the consumption pressure that Xinya mentioned did not exist to her at all, because now she was obviously lying on Blackie's body for free... ..

She did not have to worry about financial problems, and basically did not have to go to work to distract herself. She had a lot of time to train her body every day, yet she did not grasp such a good opportunity. She was still at level three until now... Many rookies who came half a year later than her had probably already run ahead of her... ..

At the thought of this, Shanshan sighed. Earlier, when she mentioned about Xiao Yun and the difference in life levels, other than feeling deeply moved, she was also indirectly reminding Xinya, because if she continued like this., it was very likely that no one would be able to help her in the future even if they wanted to.

Now was really not the time to slack off, because once you slack off, it was very likely that you would not be able to make up for the lost time in your lifetime. This was not an alarmist Shanshan had consulted many instructors on this aspect.

After a life form leveled up, its lifespan would increase tremendously, but there were some things that could not be made up for. For example, if you leveled up to level 10 before the age of 20, and leveled up to level 10 after the age of a few hundred, you would have a lifespan of a million years., however, the meaning was completely different!

A 20-year-old's Qi and blood would be exuberant. After level 10, it would maintain this qi and blood momentum. However, it would be different after the age of a few hundred. With a weakened qi and blood, it would be extremely difficult for you to advance any further in the future!

The training instructor had once said that these people from Planet D had extremely good aptitudes. However, the more they did this, the more they could not waste their aptitudes. They had to enter a higher level as soon as possible.

For example, before level 10, the evolved body's energy would be evenly distributed to all parts of the body, including muscles, bones, organs, qi and blood, etc. . However, after level 10., the training

methods would be greatly different. According to the federation's most popular dragon body forging method, in order to allow ordinary life forms to catch up to the strength of the dragon race, they would concentrate their life energy at a certain point to strengthen each level, this would increase their efficiency.

For example, level 11 was the visceral forging stage. The energy would be concentrated on the five internal organs, allowing you to have a heart similar to a giant dragon and other supporting organs, thus strengthening the quality of your qi and blood. Level 12 was the bone forging stage, the strengthened five internal organs would stimulate the production of Qi and blood, improving the quality of the blood. After that, they would use a special training method to nourish the bones. After the bones were strengthened, they would return to the red bone marrow state of a baby's body. They would undergo a high-quality blood exchange, thus replenishing the five internal organs, it would become a virtuous cycle. At level 14, the strengthened blood would become the quality of the Golden Blood of the Dragon Race!

At level 15, the body's organs and flesh would reach the strength of the dragon level. Then, it would break through the threshold of the dragon level, allowing its life to completely transcend and become one of the strongest beings in the universe!

And this process of transforming into a dragon was something that more than 99% of the living beings in the universe could not do. This was because all of the above processes required the living beings to cross over at the age when their blood flow was strong. If they entered the period when their blood flow was weak., then regardless of whether it was bone or dirty, it would be very incomplete. It would not reach the true level of evolution. In the evolution cycle of the life of the universe, there was no such thing as an old steed lying in wait. There were only brave and vigorous improvements!

According to the life cycle table of the mentors, the best age for the vital energy and blood of the people of Planet D was 16 to 32 years old. Therefore, it was best to directly cross over to the threshold of the dragon level at this age.

Of course, it was not to ask you to reach that level in a few years, but to let you cross the threshold in this ratio.

For example, Xinya was now at level three, and her lifespan was around 300 years. According to the life cycle line of human health, she was at the peak of her Qi and blood before the age of 90, and after level 10, there were hundreds of thousands of years of peak.

It seemed to be a lot, but in fact, it was not calculated in this way. When the level was lower, wasting a year was equivalent to wasting tens of thousands of years or even hundreds of thousands of years for a higher level because the body cycle ratio would become more and more relaxed as you leveled up.

For example, if you were a 31-year-old D ball person, then your peak blood Qi would only last for a year on the D ball. After becoming an elf, your lifespan would double, then it would become two years, and after reaching level 10., it would even last for tens of thousands of years. However, if you were a 16-year-old young man, after level 10, your peak period would be dozens of times that of the other party!

Many people had been stuck at the threshold of the dragon level for tens of millions of years and still could not enter. According to the teacher's words, no matter how many years one had prepared for the peak period, one should not waste a year if possible!

The time that Xinya wasted now did not seem to be much. However, the further she went, the greater the gap would be, to the point that she would lose the opportunity to compete in the future... ..

Looking at Xinya who was still not alert, Chen Shanshan took a deep breath, and her determination to go to the battlefield grew stronger. She could not waste a second. She wanted to see the scenery depicted by the instructors, and she wanted to keep up with Xiao Yun's pace. She... .. Wanted to be the eternal existence that the instructors envied...
