

A Bunch 1905

Chapter 1905: the situation of the Blood Demon Army...

“Hello, my Lord. I am the local priest, Luke. How May I help you?”

Guo Xiaoyun had arrived in a coastal city called Cui City. It was the only coastal city in the Holy Empire of Olu and the birthplace of the Abyss religion promoted by the Bolton Force, it was the place with the deepest power of faith.

The person in charge of the city altar was a level-15 blood priest named Luke. He was also a descendant of the blood demon army.

At this moment, he was especially warm when he received Guo Xiaoyun... ..

In terms of reason... .. It was naturally because he was an imperial envoy sent by Vera personally. Guo Xiaoyun had expected this attitude...

One had to know that the life of the Blood Demon Army was not easy in Bolton’s faction. Ever since the fall of Lord Saab, everyone in the Blood Demon Army was in a state of Panic!

Saab started out as a mercenary. He made a name for himself in the Federation as a bastard son, causing many of the blood demon disciples who were ostracized but had certain aptitude to seek refuge with him, over time, there was the blood red mercenary group, a mercenary group that mainly consisted of pure-blooded people. It was also the original prototype of Bolton’s Blood Demon Army.

After joining Bolton, Sab led the blood demon army and made great contributions. The disciples that followed him also received dividends during the rising period of Bolton’s influence, the first batch of elders were now either garrisoned on a planet or the administrators of a small galaxy or a high-ranking planet. Naturally, their status and the dividends they received were much higher than when they were descendants of the abyss.

In fact, many of them had even more resources than the descendants of the blood demon family. This also caused the blood demon family’s royal family to be jealous and dissatisfied!

However, Saab was a top-tier star-level powerhouse. Regardless of military merits, combat power, or reputation, he was considered to be at the top of the Bolton faction. Even if he had the status of a young fallen angel like Safilos, who was the head of the first legion... Usually, they had to be polite when they saw SAB. As a result, their positions in the Bolton faction were as stable as Mount Tai... ..

Therefore, after the fall of SAB, the pillar that held up the sky, many of the members of the blood demon army had become very worried these days!

The value of the Bolton faction had become greater and greater. It had already attracted the prying eyes of the various races in the abyss. Naturally, the cake that the blood demon army occupied had also attracted the drool of the direct descendants of the blood demon army, especially now that Bolton’s faction had even obtained the resources of the outer regions!

Right now, the thing that worried them the most was whether VILAFa, who was going to take over Saab's position after Saab's fall, would be able to hold up the banner!

If they couldn't control it and let Lord Bolton suddenly send a descendant from the blood demon royal family over to be the commander, then their good days would probably come to an end.

It was obvious that once the direct descendants of the royal family entered the faction, they would definitely nurture their own direct descendants. As for veterans like them, they would most likely not be able to protect their interests and share the cake. It was not impossible for them to be directly pushed out of the faction in the end... . . .

Therefore, when Luke heard that Vera had sent an imperial envoy over, he instantly became excited!

This battlefield was a high-level battlefield. When it was first established, the various legions wanted a share of the spoils. As an elder, the blood demon army was no exception. Therefore, Luke became one of the seven priests in charge of this kingdom.

Moreover, he was the first priest to be sent. He was in charge of the origin city with the best power of faith and had the best descent channel. This also allowed most of the new recruits of the Blood Demon Army to use this channel to gain experience.

If Bolton's forces could ultimately win this grade-3 star, he had a high chance of being one of the competitors for the planet's administrator. He was at least an adjutant!

However, after the incident with Saab, the rumors of him being transferred had never stopped...

He himself was very concerned about these rumors, but the key was that it was far away on the battlefield. He did not know what the current situation of Bolton's internal forces was like. It was beyond his reach. Now that Vera had finally sent someone over., he naturally had to ask around.

But when the imperial envoy appeared, Luke's heart turned cold... ... Because the other party was very obvious... ... He was not from the blood demon clan!

But on the surface, he was still very enthusiastic. He respectfully asked what the other party wanted.

"Mm... "Guo Xiaoyun was in a hurry to find Goudan and the others, naturally, she did not want to waste any more time here. She directly said, "Hello, Major General Luke. I was sent by Lord Vera. This time, I'm mainly here to investigate the problem of the magnetic field anomaly in this place. Do you have any new information here?"

Very direct, straight up to ask for the latest intelligence, is completely one of our own tone, let Luke slightly pause.

However, he still said cautiously, "Sir, the city where the magnetic field fluctuation occurred is mainly on the other side of Stormwind city, which is relatively remote from my place. The people in charge of that area are also members of the Fallen Angel Army. The information is limited. I only know the approximate location... "

"Is that so?"Guo Xiaoyun frowned slightly, but she still nodded and said, "Give me the specific location, and I'll make a trip there immediately. We can't let the Fallen Angels get there first... "

These words made Luke's heart skip a beat, but his face didn't change. He seemed to ask casually, "Sir Vera is so concerned about this magnetic field problem, do you have any other instructions?"

This sentence was obviously a test...

Guo Xiaoyun glanced at him, her brain quickly thinking about how to answer him.

After getting rid of the ancient king's battleship, she had Mike Park the spaceship at the location of the star near the battlefield. Then, she asked Vera for help from a distance. Only then did she arrive at the interior of this grade-3 star.

The first thing she had to do now was to meet up with Goudan and the others, then tell them about the ancient king's team's early arrival. Next, she had to investigate why the Abyss valued this planet so much.

A grade-3 star was naturally a big deal for a deity's faction like Bolton. However, it was probably nothing to those evil god overlords in the death realm. They had gone to great lengths to get their subordinates to come here, there should be something that was far more valuable than a grade-3 planet.

If they wanted to investigate the root cause, these Bolton forces that had been stationed there for many years were still very useful...

Thinking of this, Guo Xiaoyun raised her head and said, "You also know the current situation of our army. If Lord Villa wants to quickly establish his prestige, he must act swiftly. This grade-3 planet must also belong to our army!"

These words immediately made Luke's heart jump!

After hesitating for a while, Luke finally said carefully, "Is that what Lord Vera wants? Putting aside the fact that this battlefield is still in the competition stage, there are already four internal forces stationed here. Although we have occupied the best city, it's not easy to monopolize this place. After all, the other armies...".

"The other legions don't have the time to take care of this right now..." Guo Xiaoyun said seriously, "They are all worrying about the candidate for the position of the new regimental commander, and this is also an opportunity for our corps!"

"Right..." Luke rubbed his hands together and laughed. "Indeed... if Lord Villafa can stabilize the situation and succeed Lord Saab's position, it's naturally our chance..."

He was only one step away from asking for information.

Guo Xiaoyun looked at him with a half-smile.. "You seem to be very worried, Major General Luke!"
