

## A Bunch 1907

Chapter 1907: earth-shattering secret PartpOne one)

Thunder crystals were one of the nine top-tier elemental crystals. Their status was even higher than that of cloud crystals. They were the specialty crystals of the elemental outer realms, a type of super crystal that could naturally seal elements!

If such an item were placed in the technologically advanced federation universe, it would be an excellent alchemy and forging material!

This was especially true for the production of battle armors, which could stimulate energy activity. Thunder scale armors with extremely high explosive power could be said to be extremely popular on the market. Normally, only the high-level legions under the banner of a great Lord would have the opportunity to load ten tons of thunder crystals, an army that could equip up to ten thousand people would definitely have a combat strength that was against the rules in a plane that was filled with thunder crystals!

Luke's rapid breathing did not calm down after seeing the ten tons of thunder crystals. His mind was filled with thoughts, and an extremely surreal feeling welled up in his heart. If he was not afraid of being too embarrassed.., he might even try to slap himself to see if he was dreaming!

This time, he almost completely believed what the other party said...

Because the other party would not use ten tons of thunder crystals to trick a mere major general like him. This kind of resource could even cause a fight between legions!

One had to know that although Bolton's force was currently at least in the trillions a year, liquidity and GDP were two different things. If you asked Bolton to take out trillions of cash to buy things, he might not be able to do it all at once, at the very least, he would need to pledge a considerable portion of his assets to borrow. Only then would he be able to take out this capital.

And ten tons of thunder crystals. Even if you had a trillion dollars in cash to give to you, you would not be able to receive so much in one go on the black market. Being able to buy the last meal in the black market was already considered a good source of resources for you. For a demon lord like Lord

Bolton who had been ostracized, it was a problem whether he could buy it or not... ..

With such a large quantity, any priest sent by Vera would be able to bring so much. They were like a pile of mineral water bottles. This could only be explained by the outer passage!

"This... "after a long while, Luke swallowed his saliva and asked untruthfully, "These... are you giving me full authority to deal with them?"

Although it felt a little unrealistic, Luke could not help but ask. After all, the other Dartv's carefree manner of throwing materials was a little too generous! "You are the main commander that Lord Saab placed here. If you don't handle this kind of military material, who will?" Guo Xiaoyun looked at the other party with a strange expression.

"UH... HAHA... This..." Luke rubbed his hands and didn't know what to say for a moment. ...

"Are there enough people?" Guo Xiaoyun asked casually.

"Yes, yes, yes!" Luke quickly nodded. "All these years, we haven't wasted the power of faith. More than 50,000 blood clan warriors have descended. Among them, more than 1,000 are pure-blooded and above rank 7!"

"Is it enough?" Guo Xiaoyun tilted her head. "How are the other forces doing?"

"It's definitely enough!" Luke said excitedly. "We have been testing the level of the other forces all these years. Although the large-scale war hasn't started yet, there are still many small-scale conflicts. Our forces are definitely among the top three in terms of military resources. If we have a batch of thunder crystal equipment, we can definitely sweep through them!" "!"

His words were not an exaggeration. Although the heavenly gods participating in this plane were all on the same level as Lord Bolton, before the laws of the vipralopa plane, they could only descend to accumulate troops on the battlefield.

In reality, most of the battlefields had their defensive mechanisms activated in this plane. The various major factions could only use this kind of gradual and circular method. By slowly infiltrating the operation and secretly sending troops, many battlefields would often last for a very long time, battlefields that lasted for tens of millions of years were everywhere!

And in this plane, to be able to maintain the balance for such a long time, the strength of several deity's forces was not much different from each other. At this time, a sudden batch of thunder crystal equipment was definitely the key to breaking the balance!

Especially in this plane where both machinery and Arcana were limited to the greatest extent, the equipment made of high-quality outer-realm elemental crystals was very useful, because the material in the outer-realm was the least affected by the laws!

In fact, it was not necessary to use all of them. Mike felt that as long as he could equip the Thunder crystal equipment with the 1,000-man troops of his direct line of descent, he was confident that he could sweep the battlefield. As long as he commanded the high-level army with all-thunder crystal equipment well..., dragon-level creatures could be easily suppressed, and the highest-level powerhouses on the battlefield were only dragon-level. They were all nuclear bomb characters, and each force only had one or two.

Thinking of this, Luke became even more excited. With this batch of weapons, once he was armed, as long as he started a war, he would definitely be able to destroy everything!

However, he had to seize the opportunity and take the opportunity to attack. He had to strive to break through the empires of the other deity factions in one go, destroy the faith they had set up, and expel them to the greatest extent!

At that time, with such a huge contribution, it was only natural for the blood demon army to take over this grade 3 planet. As for himself...”.

...!”! He was very likely to become the administrator of this third-grade planet!

Luke’s heart was burning, and his attitude was much more respectful than before. He answered Guo Xiaoyun’s questions almost immediately!

“You mean to say that the magnetic field is fluctuating in Stormwind City?

Where the fallen angels are in charge?”

“Yes! “Luke quickly said, “But sir, don’t worry. Those places are all marginal villages and towns. We can also intervene! ”

Guo Xiaoyun nodded. “Send an excellent scout team to me and follow me there to take a look. Now, if we want to conquer this plane, the local God is the bigger obstacle! ”

“Sir is right... “Luke nodded in agreement.

With this batch of thunder crystals, as long as they were used properly, it would not be a big problem to destroy the strongholds of other forces. However, to conquer this plane, the local god was indeed a big problem. After all... .. This was still a grade 3 planet. The strong native gods had a high probability of being above star rank!

“However, sir, don’t worry. The recovery of this plane’s ancient gods is very slow. We should have enough time to arrange everything! ”

Luke was also confident in this. During the age of Chaos, the ancient gods couldn’t be awakened just because they wanted to. As long as they destroyed the other factions and established enough altars of faith., then, they could summon Lord Bolton to descend directly and suppress the native gods with the special law talent of the sky gods!

In the past, this was how battles were played. The subordinates would determine the victor, the sky gods would descend and suppress the natives, and then turn the planet into the administrative planet of their forces... ..

“Well, that’s for the best. But to be on the safe side, I still have to go over and take a look! “Guo Xiaoyun said with a cautious look.

(‘My Lord, you do things flawlessly... “Luke smiled and said, “I’ll immediately arrange for an excellent scout to follow you. You’ve had a long journey, do you want to take a rest?”

“No...”Guo Xiaoyun shook her head. “I have a lot of things to do. I still have to collect samples to go back. Hurry up and arrange the queue... ”

Luke: “Yes!”

In this way, Guo Xiaoyun under the lead of the scout team, all the way to Kadar village, and then after sampling around, Guo Xiaoyun found this matter is not simple... . .

And in the sampling, she secretly discovered a shocking secret!
