

## A Bunch 1908

### Chapter 1908: Shocking News (Part Two) !

After taking out so many thunder crystals, Luke trusted Guo Xiaoyun 99% of the time. Although he still needed to observe what she said later, at least the thing before him was real. Ten tons of such high-purity thunder crystals., even in some great lord factions, only a commander-level figure had the right to use these resources, right?

Hence, Luke did not hold back and gave all the information on the previous planet to Guo Xiaoyun.

Guo Xiaoyun took the historical information and rushed to the vicinity of Kadar village. According to the magnetic field delineated on the map, as well as many historical documents., she began to carefully and carefully investigate the so-called ancient ruins in the documents.

As for why she suddenly cared so much about the local indigenous miracles, the reason was because of those documents.

Guo Xiaoyun's original purpose was just to remind Goudan and the others and think of a way to get Goudan and the others to complete the so-called gathering mission before the ancient king team arrived, this would allow the evil gods to see their value.

However, after spending a few minutes looking at the documents provided by Luke, the option to quickly complete the mission was put on hold by her!

The historical documents provided by Luke were the historical documents of the ancient civilization that Bolton force had spent a great deal of effort to collect after controlling the kingdom!

These included the official records of the dynasties in history, the records of the new God history of the various sects, and the records of the myths and legends among the people!

These things were originally meant to lock onto the location of the local ancient gods and the information of special effects.

But Guo Xiaoyun found some incredible things inside...

In the latest poktar religion, there were records of the history of the true god Euler and the ancient seven gods.

That continental dispute was almost the biggest religious war in the history of the planet. It represented the high class of nobles and priests at that time in a bitter struggle with a new grassland country called the Poktar Empire.

At that time, the ancient alliance of Seven Nations was the largest seven countries on the continent. They believed in seven ancient gods, including the seven gods of Light, wisdom, power, war, the ocean, death, and the forest, on the other hand, the newly risen God of the Baltar Empire was known as the

most ancient true God, the mother of all gods, and the true creator of the continent: the god of life, Euler!

This historical document originally didn't seem to be much different from the battles of faith on many traditional planets. After all, the so-called battles of the gods were either because the god I believed in was the only true God, or because the god you all believed in was fake. Or... .. The god I believed in was the father you all believed in... ..

It was probably such nonsense, and the plot was basically similar. What really made Guo Xiaoyun feel incredulous was some of the so-called divine words recorded in the document...

It was said that the first high priest of the Pothar cult had received the enlightenment of the true god Euler, and the evidence was the words that belonged to the gods, which conveyed the supreme decree of the true God.

However, Guo Xiaoyun could see clearly that the so-called divine runes were specifically aimed at the ancient hieroglyphs in Huazhong? Pangu! !

When this word, which belonged to the divine history of his ancestors' civilization, appeared on this page, Guo Xiaoyun's eyes almost popped out!

This word was the title of the god of Euler's holy prose in the documents here. The high priest thought that it meant Euler in its translation, which meant the place of life and the beginning of the Earth!

It was really true, not to mention that the translation was well-done...

However, she did not have the energy to tease the so-called first high priest anymore. She was more concerned about why the hieroglyph in Huazhong would appear here?

Transmigrated?

That was not right, right?

The history of Huazhong was less than five thousand years old. According to textual research, the divine history of Pangu only appeared in the Han dynasty. It was said that there was no such thing as the Pangu myth in the pre-qin period, which was less than three thousand years ago... .

And the divine history of this continent was more than a million years old, so it could not be matched no matter what...

But this could not be a coincidence...

After reading the records, Guo Xiaoyun's mind quickly recalled the situation she had encountered during the expedition to the secret realm of Kunlun in Sphere D!

Ysera had also personally seen that secret realm. After being shocked by the power inside, he had clearly determined that the fallen thunder god was at least at the life sea level!

A grade 7 planet, logically speaking, even if the energy of the entire planet was concentrated in one spot, the gods that were born would at most be at the star level. Most second-generation God level

dragons were at the sky level. Many grade 5 or 6 planets.., top-tier gods were only at the dragon level. Life sea level gods would usually only appear on grade 3 planets and above!

Therefore, Ysera was able to deduce that there must be some unknown secrets on this planet.

However, after thinking about it, to be able to give birth to such a group of indigenous individuals, it was naturally not as simple as a level 7 planet.

Perhaps... there might be some answers here?

On the way, in the carriage, Guo Xiaoyun repeatedly looked at the records, and her expression became nervous, which was rarely seen.

To be honest, ever since she first came into contact with the Cosmos Federation and truly entered this super civilization system, she felt that something was wrong... .

With the size of the federation, saying that the D ball was a grain of sand in the desert was already an exaggeration. However, coming from such a small place, they were able to become the cream of the crop among the top universities!

In the past few days at the Blue Spirit Academy, she had seen the so-called noble geniuses, and even the royal geniuses, but her senses were... .. Something was not right... .

Such a large civilization, and the elite disciples that had been selected through layers and layers of screening, that was it?

She felt that, regardless of the resources and knowledge behind her, her individual aptitude and learning ability could not even compare to the stupidest developer in her laboratory on Mars... ..

Perhaps the players who entered the high school at the first opportunity would feel like they were the chosen one. Naturally, Guo Xiaoyun felt the same way.

But as time passed, she slowly felt an inexplicable unease...

She had always believed that nothing in this world was without reason. Everything had its pros and cons. This was a phrase that she agreed with in her ancestors' culture!

The heavens had given them this level of aptitude, but what was the price? What was it?

Guo Xiaoyun didn't believe that there was no price at all. She even had a vague feeling that their fate seemed to be controlled by an invisible hand, but she had no clue.

When she saw the words in the document that were originally billions of light years away, she had a feeling... Maybe I can find something in this... .

"Wow, I really lost him!"

Beyond the stars, on the luxurious black spaceship, the green-haired engineer yawned lazily in his seat. "Looks like we'll have to find out for ourselves!"

"Probably how long?" On the airship, the skyfox frowns at that lazy fellow.

“How can we be sure?” Green hair spread his hands and smiled. “That’s a Grade 3 star with its defense mechanism activated. All long-range signals are ineffective. We can only confirm the approximate location of the galaxy and search bit by bit. If we’re unlucky, it’ll take a few days and half a month. If we’re unlucky...” “Hehe, I’m afraid we can’t find the other teams!” Everyone: “ ..

Three teams from the ancient king team had come this time. They had a special relationship and were one step ahead of the others. The other two teams would need at least a year according to their normal journey. In other words, they might be able to search here for a year?

“It’s best not to drag it out for so long...” the gray-clothed woman beside them shook her head. “That girl isn’t simple. There must be a big faction behind her.

Once she discovers something...”

When Skyfox heard this, her gaze became slightly heavy...

Once the secret of that planet was discovered by a large faction..! .... It was almost impossible for them to complete the mission!
