

## A Bunch 291

### Chapter 291: A Conversation with Daddy Dog...

Inside the base, under the guidance of the Little Fairy, Daddy Dog was touring the interior of the base. As he had not undergone any surgery and had not signed any agreements, Daddy Dog was not allowed to leave the main base like the players who had queued up before.

Although the magnetic field outside had already been set up by seer, the gravity was set at five times the gravity of the new world. Ordinary people would definitely not be able to withstand it. Moreover, the outside of the base was the pasture land. If that star rhinoceros suddenly went crazy... It would be impossible to resurrect the brain of the dog father without backup... ..

"Hey, Big Sister? Is there a new player?" The Green Titan, who was passing by, greeted the little fairy.

"UH... Hehe, you can say that..." the little fairy smiled.

"Is that so?" The player hurriedly ran to his dorm. "Then I have to go offline and tell my cousin that the game is starting to line up again. There are only 150,000 people in front of him..."

The Little Fairy:"..."

"Wow..." Yang Renjie looked around in amazement as he walked over, he looked at the sophisticated equipment and clicked his tongue in wonder. "This is really the same as the screenshots on the forum. Brother, you're really amazing. You're really an alien force..."

The dog father looked at the excited man speechlessly. He didn't know what the man was excited about. This was obviously a disguised colonization, okay? Was he not worried at all?

"How did the players become like this?" The dog father pointed at the green men around him.

"They became like this after the surgery..." the little fairy said.

It was indeed genetic modification... "...". The dog father touched his chin and then asked curiously, "But... how did you maintain your human appearance before?"

"About that..." "...". In the game, it was said that we had a backup brain, and our consciousness could be transferred to other backup bodies at any time. Our D Ball's body had been preserved, so players had to switch back their bodies before logging off. In the past, they thought that the game was doing this for the sake of realism, but in the end... .. They didn't expect it to be true ... .." the little fairy said weakly.

"Wow, it can be like this?" The dog father was stunned. This system that could preserve his previous body made him feel inexplicably relieved. If his daughter became like this, how could he marry her in the future. It was good that it could be preserved...

Just as he was thinking about it, a familiar voice suddenly sounded, "Dad! !"

Hearing that, the dog father's body shook. He felt that he had turned around to look and saw Wang Goudan running over with a green sprout on his head and hugging the dog father.

"Xiao Jia?" The dog father hugged his crying daughter and looked at the other party with a surprised expression. Only then did he remember that there seemed to be several races in that game called Galaxy, and it was not just the green rough man.

Looking at it this way... .. then did his previous body... .. seem... .. It didn't have much of an impact...

Damn, his daughter had become so beautiful, and he wouldn't accept a betrothal gift of four or five million yuan... ..

"Doggie?" The little fairy was stunned. She pointed at the dog father and said, "This... This is your father?"

"You two know each other?" The dog father was instantly stunned.

"It's just a game. What's so strange about knowing him?" The little fairy curled her lips and thought to herself, my daughter is already so old... ..

"What's this on your head?" The father stretched out his hand and tugged.

"Aiya, don't pull... It Hurts..." Gou Dan immediately cried out in pain.

"D \* mn, this grows in meat?" The dog had to frown. He felt that it was a little tarnishing his image. Forget it, it seemed that he only needed three million in betrothal gifts...

"By the way... What name did you get?" The dog father looked at Wang Goudan's name on Goudan's head and frowned even more.

Yang Renjie also asked curiously, "Are all of you here... with names on your heads?"

"It's a game... isn't that how it is?" Wang Goudan chuckled... ..

"Cool... Then I have to think about what cool name I should get later..." Yang Renjie touched his chin and said.

Director Zhang frowned when he heard that. "Are you crazy? You still want to do that surgery after knowing the truth?"

"What else?" Yang Renjie was stunned. "Why not such a good thing? Look at those giants around you. Their hair is so thick. Old Zhang, why don't you choose this race to do it? After the surgery, maybe your hair will grow back..." "..."

"Is that so?" Director Zhang's eyes lit up, but he immediately reacted and glared at the other party. "Stop bullshitting. This isn't a game. This is real. Aren't you afraid of any side effects if you just casually perform surgery?"

Dog Dad touched his chin and said, "Xiao Jia, are there any conditions for performing these surgeries?" He was not worried about the side effects. Tens of thousands of players had yet to report any accidents. This proved that this surgical technique was very mature... ..

"I want to sign the agreement..." dog dad curled his lips and said.

"What agreement? Let Me See..." dog dad quickly said.

Dog Dad immediately pointed out the agreement for his dad to look at. After the group of people looked at it, they immediately exclaimed, "D \* mn, what a shameless contract..."

"You even signed it?" Dog Dad was speechless.

"I, Lang Kai, know..." when Doggie said this, he looked aggrieved. "At first, we all thought it was a game. Who would care about that... in the end... sob, sob, sob, dad, this base Lord is a black-hearted dog Lord..."

Doggie father: "..."

He felt that this alien's image was a little like a black-hearted boss who swindled people into the factory... It was a little different from those guys in the movies who would rule D ball violently at any time. ...

But it was still okay. The image was a little vulgar, but it didn't give people the feeling that it was that scary... ... It was better than meeting a tyrant... ...

"How can you talk like that?" Just as Doggie was complaining, a faint voice suddenly sounded from behind. Doggie looked over and hurriedly stuck out his tongue to hide behind his father.

"You are the Lord?" The dog father looked at each other curiously, feeling that this dress is not right...

At this time the night has not changed back to the mighty armor, still the xianxia dress, and the surrounding high-tech scene out of place.

"Don't mind these details Mr. Wang, inside talk..." Xi ye nodded, then led everyone into his lord's room.

----

"Lord, right?" After entering the room, Old Zhang was the first to speak, "This contract of yours is a fraud, it's illegal!"

"No, no, no... This contract of ours is completely legal..." Xi Ye sat on the chair and smiled, "We follow the laws of the Universe Federation, the laws of Your D ball are useless to us..."

"Then according to what you said, Don't you think we can disapprove of the laws of your so-called Universe Federation?" Director Zhang frowned.

"About that..." xi ye smiled, "This thing depends on strength, right?"

Director Zhang's expression turned ugly when he heard that, however, the dog father beside him suddenly said, "Lord, are you serious? Even though your technology is indeed very new, if you really have the strength, why would you use such methods to deceive us?"

"Haha..." Seer Laughed Awkwardly. To be honest, what he disliked the most was dealing with people who were very smart.

“You’re very smart, d-ball man...”. Seer spread his hands and said, “You’re right. This lord is currently at the stage of development and indeed doesn’t have the ability. However, it’s only limited to me. To the Federation, your plane is as tiny as an ant.”

“To be honest, you should be glad that I’m not strong enough. As a native planet, being discovered by a new lord is definitely much better than being discovered by a powerful lord. Although I’m using this method to deceive you, I’m trying my best to train you to become my first batch of basic citizens. I believe that from the game’s information, you can see that as the first batch of basic citizens, you enjoy the best genetic modification and education. Almost all the citizens of the Federation don’t have the same treatment. If you were to encounter a powerful great Lord...”. “...”

Xi ye paused and said, “Think about the consequences yourself.”

Father Dog lowered his head in silence. If he had the strength, he would have colonized directly. Why would he use such a troublesome method?

Xi Ye saw that the other party knew how powerful he was and immediately nodded, he continued, “Our Federation’s god-level colonization has always been like a ladder. The earlier the citizens are treated, the better. Once we have a certain power, the resources for external colonization will be tightened, and the treatment will be vastly different... “...”pausing for a moment, he said faintly, “Moreover, in order to pursue efficiency, the majority of them use slavery... “...”

Dog Father:” ...”

Chapter 292: the double-marked Dog Daddy

“This is the basement. Most of the slaves caught in the new world used to be here... Now, a lot of them have been taken away...”the little fairy led the group of Dog Daddy in the Gravity Suit to tour the basement.

Compared to the instability outside, the basement was relatively safer. Moreover, it was within the range of the Lord’s laws. If anything happened, the situation could be stabilized at any time.

Hence, after the fairy’s request, Seer allowed them to visit the underground base.

Among the people captured in the New World, most of the production-type humans had been taken away by the players. Needless to say, the farmers and gnolls were the most valuable in the market. Naturally, they were fully utilized by the players, currently, most of them had already integrated into the lifestyle of the base.

As for the ordinary people who had other skills, such as tailors, blacksmiths, spice masters, chefs, and so on, most of them were taken away. Some were used to assist in farming, players who had enough points sent them to the tailors’shops, blacksmiths’shops, cafeterias, and other places in the base to learn new skills for later use.

Meanwhile, in the underground base, aside from the engineers who were honing their skills, there were also some empire generals who did not know how to arrange them...

“What are Empire Generals?” Dog father asked curiously on the way.

“That... a high-ranking military officer from a new territories country. It seems that he has to be very strong to be qualified for a martial position...” the little fairy replied. Not only was she depressed, but she had also failed to capture any of her subordinates.

Although it was temporarily useless, the system had said before that these empire generals who had trained their bodies well had good potential in the later stages. As long as they were willing to spend points, they would definitely be nurtured into capable assistants.

Currently, most players did not have the points to nurture them, which was why they were temporarily put on hold. However, it did not mean that these guys were not worth anything in the later stages...

Thinking of this, the little fairy was secretly depressed. She thought to herself whether she should use Gray Egg's group of scammers to exchange for a great general in the future...

Eh... This business was not bad...

“These are?” Walking to the underground base's Hall, Yang Renjie saw a large group of engineers grinding stone in the hall. He asked curiously.

“These are the engineers of that empire. They are usually used to help build construction equipment or military defense equipment in war...” . “...” . The Lord meant to use them to build a city... The little fairy pointed at the large cubicle on the half of the base proudly and said, “This area is my slave!”

“Wow...” Goudan's eyes suddenly lit up. He shook the green sprout on his head and hugged the little fairy's thick arm. “Sister fairy, can you sell some to me?”

The little fairy glanced at her. “What do you want to buy?”

“Can I trade you for the farmland?”

“I'll think about it...”

Goudan and director Zhang looked at each other. Their feelings were complicated. When they came to the new world, they had heard from the little fairy that it was a planet similar to a medieval civilization. Its essence was the same as Earth, it was also the aborigines that the Lord had mentioned.

It would have been understandable if dogball and the little fairy had thought that this was a game, but now they knew... ..

They knew the truth, but they were still like this... ? What did this mean?

It meant that these players... .. Were already used to it... . .

Even if they knew that these people were real people, they probably wouldn't really treat them as human beings. Although it sounded bad, it was the truth. The soaring strength had changed the minds of these players a lot. Not to mention these alien natives, even the people of this planet, whether they will be treated with the same attitude as before, I'm afraid it's another matter...

At the thought of this, the dog father and director Zhang were at their wits' end, especially the dog father... ..

His own daughter, Goudan, was a kind child. He had raised her for so many years and knew this very well, but even his own daughter was used to the rules of the difference in status under such a system.

The dog father believed that when she captured these people, she had most likely killed them, but looking at her current appearance, it was obvious that she didn't seem to care at all... ..

A kind slave master was also a slave master...

At the thought of this, a trace of fear flashed through the dog father and old Zhang's hearts... ..

If it was a powerful galactic lord who had colonized planet D and already had a basic population, would the people under him treat the people of Planet D the same way that dog egg and the others treated these natives?

Perhaps it would be even worse. If it was someone with a violent personality, the outcome would be even worse!

Thinking of this, Doggie dad sighed. He didn't know if he should be like what the Lord had said and secretly rejoiced?

But from the actual situation, that guy might be right. It wasn't the worst thing to be discovered by a new lord...

"Sir, sir..." a group of engineering soldiers hurriedly put down their work and saluted when they saw the little fairy bringing people over.

"Wow... cool..." Yang Renjie could not help but exclaim in admiration.

"Do your work, don't mind us..." the little fairy waved her hand in a dignified manner, feeling extremely smug in her heart... ..

"Look at her, she's doing so well..." doggy dad knocked his dog egg's head and said.

"No Way..." "..." "I'm not bad either..." "..." the dog egg immediately covered his head and said discontentedly, "This dog egg has several farms outside the base. When the harvest comes, I'll build a large manor, the kind of noble castle, and bring you here to enjoy your life." "..."

"Yo... Are you serious?" The dog father suddenly laughed. An alien villa, TSK tsk, this group of old geezers would die of envy in his wechat moments...

However, they were taking the agricultural route... "...". The dog father could not help but sigh to himself that his daughter was still not smart enough. How good could agriculture be. Look at our country, the tycoons are all real estate companies...

"Father..." just as he was thinking of a familiar voice coming from afar, the dog father was stunned. He looked up and saw a group of people who were also wearing gravity suits in the distance. The one leading them was his dog son. He immediately heaved a sigh of relief.

Although Dog Egg had said that his brother was fine, he was completely relieved when he saw the two siblings. Now, the whole family was neat and tidy...

“Dad, I heard that you were wanted. I was scared to death...”Wang Chengbo hugged his father and said excitedly.

“Look at your potential...”the dog father glared at him, but he felt comforted in his heart. His son’s performance this time was commendable ... Although it was useless...

“Hello, uncle...”Yun Mu Ji greeted him from the side.

“Aiyo, Little Mu is here too?”The dog father immediately beamed. “Good, good, good. This time, it’s all thanks to Little Mu taking care of my good-for-nothing son. I’ve Troubled You.”

“No... Chengbo is still very brave. Uncle and his children are very powerful...”Yun Mu Ji smiled and bowed.

“Hahaha...”seeing that the other party had directly called him Chengbo, the dog father laughed even more happily... ..

“Dad, this is Leng Xing, Xiaoja’s friend... This time, it’s all thanks to him...”Wang Chengbo hurriedly introduced.

“Hello, uncle...”for the first time, Leng Xing showed a nervous expression and greeted him with a guilty conscience.

“Oh? is that so? Hello...”as soon as the dog father heard Leng Xing’s introduction, the smile on his face instantly disappeared, and his tone was very cold and polite... ..

Chapter 293: Why Do You Need Daddy’s help for a divorce?

At night, because Daddy and the others had not undergone surgery, they could not leave the base. Naturally, they could not follow Goudan to live on her farm, even though Goudan really wanted Daddy to visit her farm.

In the end, the Lord could only arrange for them to live in a separate room.

“Dad... did you know Leng Xing before?”At night, Wang Chengbo asked curiously as one of the four of them was making a soft bed.

During the day, Leng Xing obviously wanted to please father Wang, but he didn’t know why his father was always cold to him.

“I don’t know him. Didn’t you just introduce him to me?”Father Dog curled his lips.

Wang Chengbo said, “Then why do you have that attitude? It feels like he owes you money.”

“Did you say it the other way around?”The dog father rolled his eyes at his silly son and said, “Isn’t he the one who pretends to be a grandson when he owes me money?”

Chengbo:”...”

“Then why is it like this?” Yang Renjie was also attracted by the topic between the father and son and asked curiously.

“How would I know?” His father curled his lips and said, “Anyway, it’s either evil or theft to be solicitous for no reason...”

“It seems that you don’t know what the other party has done, so you just guessed blindly?” Yang Renjie laughed and said, “With your personality, you’re not very strict when you’re a policeman, right?”

“How is it not strict?” His father retorted, “I rely on my intuition when I handle cases. If you don’t rely on your subjectivity to lock down the criminals first, how can you narrow down the scope to find evidence?”

“Why are you talking about the criminals?” Wang Chengbo suddenly complained weakly, “What kind of case does father think Leng Xing will commit?”

“I don’t know... But he’s definitely a villain!” Dog father warned Wang Chengbo very seriously, “Don’t associate with him in the future... especially Xiao Jia. Remember to remind her to stay away from that stinky brat...”

The last sentence was the main point, right? The two of them complained in their hearts.

“Old Wang... What do you plan to do next?”

Just as everyone was immersed in the discussion of the character setting of cold star, director Zhang, who had been silent all this while, suddenly spoke up. Unlike Yang Renjie, who was always curious and excited, director Zhang was also very surprised by everything he knew today, however, he was clearly thinking more, and his expression was a little heavy at this moment.

As soon as Old Zhang opened his mouth, Wang Chengbo and Yang Renjie immediately stopped talking. In fact, they had been avoiding this topic since the beginning. Now that old Zhang brought it up, they fell silent. It was obvious that they wanted to see how the two of them would choose.

Wang Chengbo would definitely listen to his father. As for Yang Renjie, although he was very interested in this place, it was still a big choice in life after all. He always wanted to see someone else make the first move.

Old Wang touched the table. After a moment of silence, he slapped the table. “Go to sleep, then sign the contract for the Operation Tomorrow...”

“You surrendered so quickly?” Director Zhang was stunned.

“Is it too neat? HMM... that’s true... then, let’s discuss how to get some human rights back in the contract later?” The dog father hesitated for a moment.

“That’s not what I meant...” director Zhang’s face suddenly darkened. “Are we really going to... surrender to the enemy like this?”

“What do you mean by go to the enemy? It sounds terrible. At most, we’ll just change jobs...” the dog father shrugged. “Besides, do we have a choice? Do you think you can go back if you don’t sign the contract?”

“That’s true... but the other party has no intention of getting rid of us. We can wait for an opportunity. When we find an opportunity to go back, we’ll report it to the organization. You’ve seen this contract. As long as we sign it, we won’t have a chance to turn things around...”

“There’s a problem with your words...” Old Wang suddenly interrupted the other party.

“What’s the problem?” Old Zhang frowned.

“Don’t you realize that you’ve already admitted the effect of that contract?” Dog father said faintly, “That contract is used to guarantee that the Overlord won’t be betrayed by us. He has that confidence because he believes that the so-called universe federation behind him has the strength to do so. And what you said just now is equivalent to admitting the other party’s ideology...” “...”

Director Zhang: “...”

“Old tie... we’re not kids anymore... can’t you see the situation clearly?” The dog father sighed and sat at the side. “In Your Heart, you also know that d-ball can’t resist...”

“Bullsh \* T! I don’t think like that!” Old Zhang retorted in anger and embarrassment.

“Okay, okay, okay. You didn’t think like that. Can I think like that?” The dog father rolled his eyes.

“You didn’t even try. How do you know that you can’t resist?” Director Zhang still rebutted unwillingly.

“The key is that no one will resist...” dog dad laughed and said, “This is not a violent colonization. It’s a sugar-coated cannonball. Look at those players outside. which side do you think they will stand on when they know the truth?”

Director Zhang was silent for a moment and finally said, “There will always be some people who will choose righteousness...”

“Are you F \* cking still asleep?” Dog Dad could not help but scold him jokingly, “I won’t even mention those players who have already fallen into the pit. Just those who have not fallen into the pit outside. When this matter is exposed, would you believe me if I said that 90% of them will stand on this side?”

“90% ... isn’t that a little exaggerated...” director Zhang said weakly.

“I’m just being Conservative, Alright?” Dog father rolled his eyes. “Ask yourself, if someone were to tell you one day that if you were to change places, you would become a Superman and your lifespan would increase by a few times. You would also be able to have a platform that was countless times wider. You would be able to roam the galaxy and colonize the outside world. The territory you conquered would still have a chance to become your personal property. How many people do you think would still be numb to living on their pitiful salaries? “Do you believe that once this news comes out, the president of North America will resign and come here the next day?”

Director Zhang: “...”

“Don’t you want to live a few hundred years longer? To see the outside world?” Old Wang continued to bewitch him. “Your daughter, your wife... Don’t you want to stay with them a little longer?”

"I don't want to! !!" Old Zhang immediately shook his head in horror when he heard this. He mumbled, "Old Wang, you must help me. This time when I go back... I must get a divorce! !!"

Old Wang: "..."

Cheng Bo was stunned. He didn't understand why uncle Zhang would think of getting a divorce the moment he heard that he could live a few hundred years longer, and... "...". Why did he need his father's help to get a divorce?

"..."

"Have you decided?" In the Lord's room, Xi Ye asked with narrowed eyes as he looked at Yunji Mu who had come over before dawn.

"Yes!" Yun Ji Mu nodded. "I want to join this place!"

After learning that Wang Xiaojia and the others had achieved that level of cultivation after joining this game for only a few months, Yun Ji Mu decided to stay.

Cultivators cultivated themselves. With better opportunities for growth, she would not be as conflicted as her neighbor, Old Zhang.

"Can you betray your own sect so soon?" Xi Ye said with a smile.

"I've learned about your rules..." Yun ji mu said seriously, "I don't think joining you is betraying your sect!"

"Oh? What do you mean?" Xi Ye looked curiously at the first little guy who had figured it out... ...

Chapter 294: Hermione's ideas

"To betray is to harm the collective good... "However, I don't see any harm to you using the people of Planet D as Your Foundation to expand your people. On the contrary, it's a win-win situation. Whether it's the ordinary people or US cultivators, there will only be opportunities. I feel that the only ones who might be harmed are neither the ordinary people nor the sects, but the officials who are in power now... "...". "..."

"Haha..." Xi Ye laughed when he heard that. According to the information, this girl called Mu Yunji had been cultivating in the mountains all year round and had the least contact with human affairs. However, he did not expect that she would be the first one to see through it. ...

Indeed, with the rise of Xi Ye's power, the only thing that was threatened was the political power of the various countries.

He had put people first and adopted an investment strategy for the people of Planet D, investment in genetics, investment in training, and investment in education. Although he was using them to clear his name, such a request was obviously reasonable. For countless ordinary people, this was a rare opportunity. For successful people, this was also a brand new stage.

However, it was very unfriendly to political forces...

This was because if Seer's forces grew stronger, even if they did not choose to forcefully recruit the people of D and chose to go public, the vast majority of people would probably choose to rush to this place that could give them a bigger stage.

At that time, those politicians who held great power would be very embarrassed. Without anyone, what use would his power be?

Yunji mu: "Moreover, I think that regardless of whether it's the sect or the politicians, the ones who are crazily rejecting the opposition are most likely those old-fashioned conservatives. After all, joining you is equivalent to reshuffling the cards. You have to abandon the heights that you have already reached and compete with everyone again... "...". "Therefore, I don't think that joining you is a betrayal of the sect. Instead, I think that this is a chance for the sect to break out of the blockade of Kunlun. If you insist on saying that it's a betrayal, then it's a betrayal of those who are unwilling to give up their advantages and want to maintain the status quo..." "..."

"Interesting girl doll..." Xi Ye looked at her. It was rare for him to see such a calm and objective girl. This point couldn't even be seen on rainy girl Wu Gua. This girl Doll's future was boundless... "...".

"Lord... can I ask you a question?"

Xi Ye was stunned and asked curiously, "What?"

"I just learned about the advantages of those races through cold star. The battle-type races only have Titans and elves. However, regardless of whether it is the elves or the Green Titans, their training method is to give up their inner qi cultivation to strengthen their physical bodies. May I ask..." "... In your faction.. "... Or is it possible that the universe federation behind you doesn't have a training method suitable for people like us?"

After asking this question, Yunji looked at the other party with some longing. Clearly, she did not want to give up the advantage of being a cultivator...

What a clever child...

Seer sighed again. While the others were still discussing about betraying humanity, this girl was already thinking about how to preserve her advantage...

In the universe, only such a person could go further.

Xi ye nodded and said, "There is..."

"Is that so?" Yun Mu Ji's eyes lit up when she heard that.

Xi Ye said, "In the universe, the evolution method of absorbing energy to strengthen the veins and vessels to store energy is not unique to your D Sphere..." as he said that, he pointed out the gene pool, he said to Yun Mu ji, "The three-eyed immortal race, the Fioria race, the star spirit race, and the dark descendant race are all similar to your type, but..."

"But what?" Yun Ji swallowed her saliva, feeling a little uneasy. There must be a reason why the other party did not choose to nurture people in this field right away.

“This kind of person has a very high requirement for aptitude...” Xi ye sighed. “It’s not just genetic requirements, but also requires comprehension ability. This is because when this kind of person reaches a certain level, they need a kind of sublimation and comprehension in their thoughts in order to advance further. In other words, the path of evolution is not as pure as the strengthening of the physical body. This is also the reason why many lords are unwilling to nurture people in this field. This is because you never know if the person you spend a lot of effort to nurture will be stuck at a certain checkpoint and be stuck for life!”

Yun Mu Ji was stunned and asked, “Lord, are you saying that there are no bottlenecks in the later stages of the body strengthening school?”

“That’s not the case...” Xi Ye shook her head. “There are, but when you encounter bottlenecks, you usually rely on willpower. To put it bluntly, it’s a dead end. As long as you can withstand the Starfire calamity or the greater body tempering later on, you’ll be able to advance. You rely more on willpower’s tenacity and toughness. However, yours is different. The things you encounter when you advance to the advanced level are more complicated “... “...”

Xi Ye hesitated for a moment and did not know what to say. After thinking for a while, she made an analogy. “You know about the inner demons, right?”

Mu Yun Ji nodded. Those who practiced internal cultivation were extremely afraid of Qi deviation and would usually die suddenly.

Seer said, “Qi deviation is usually caused by the desire for quick success and instant benefits. However, it’s more complicated for people like you. Sometimes, a single thought that doesn’t make sense will have a huge impact on your cultivation. This is very similar to mages. However, mages’ beliefs were obtained through countless studies. To put it bluntly, it’s very scientific. As long as you didn’t lose your head because you couldn’t make sense of it, you could start all over again. However, you’re different. Your beliefs are the embodiment of individual willpower. In your words, it’s the DAO. This thing is very mysterious. Everyone is different, and there’s nothing that can be proven. Once you fall into self-denial, your life might be over...” “...”

Yun Ji was silent for a moment. Although she had not cultivated to a very high realm, she could understand what Xi Ye was saying. What he said made a lot of sense. This kind of problem tested one’s state of mind too much...

“So... are you sure you want to continue on your path?” Xi Ye asked, she emphasized, “You should know that everyone here starts from scratch. Even if you give up your identity as a cultivator, you can still grow quickly... you don’t have to hold on to your previous advantages...”

Hearing this, Mu Yunji shook her head and said without any hesitation, “I’m willing to accept a new challenge, but I’m not willing to give up the dao that I’ve cultivated for more than thirty years!”

What a pure will... Xi Ye not only praised her in his heart. During his studies at Heavenly God Academy, he had understood the characteristics of each cultivation system. Clearly, this girl in front of him was a top-notch immortal seedling of the cultivation system, regardless of whether it was comprehension or temperament...

Thinking of this, Xi Ye nodded in satisfaction. He actually did not wish for her to give up on her own path. He had chosen to let Mu Yunji come because he wanted to test if she could nurture a group of cultivators.

Not only were these people extremely strong in individual combat, they also had more diverse methods than ordinary physical enhancers!

In addition to the special training method of the d-sphere, he had a great desire to test it out.

Hence, he said, "Then you can choose..."

Seer listed out the genes of the previous races and said, "These are the four genes that have the most perfect internal cultivation system in this Lord's gene pool, and they have the best racial advantages. Take a look..."

"I recommend dark-type and star spirits..." seer reminded.

Hearing this, Yunji picked up the introduction of the two genes that seer recommended and looked at it curiously.

After reading it, she was stunned. She felt that these two races were very extreme, and they were two completely opposite types...

Chapter 295: Dark Ones and star spirits

Seer was filled with anticipation as she tried to induce the other party to choose between these two races. The main reason was that there were too few special cases of these two races on the market.

They had extremely low tolerance and were also a race that cultivated inner qi. This resulted in their rarity being much lower than even the Green Titan. Of course, this also resulted in a terrifyingly low price. It was said that when the price was at its lowest, no one would buy a single one for 40 cents. Occasionally, they would buy materials that were used by some students who studied genetic biology to do research and purchase... ..

As for why seer had it, it was also an accident. When he bought the gene bank, it was because the two genes had been sealed for too long in the hands of that merchant, so he decided to package them as a gift, seer bought over a hundred genes from the bronze race, and then someone gave him 30,000 star spirits and dark descendants...

At that time, the same batch of gods in the group had even mocked him, saying that it was better to give him 30,000 catties of organic fertilizer... ..

Now that there was an opportunity, Seer thought that in the future, he would definitely nurture a batch of dark descendants or star spirits. When the gathering was held, he would bring these players and ruthlessly slap those idiots in the face.

Meanwhile, Yun Ji was currently struggling with the attributes of the two races. Seer did not rush her, because the characteristics of these two races were indeed very extreme.

The two races were both archaic creatures with a long history, comparable to the ancient Titans. The star spirits were known as the spirits of the stars, and the archaic language was the meaning of the gods of the stars.

According to the records of the Archaic era, the people of their races believed in the stars. They would often give the stars the ideal attributes, such as war, wisdom, life, twilight, protection, and so on. After the people of their races became adults., they were required to choose a faction's star fate to cultivate. Those who chose wisdom had to inherit the knowledge of those wise men, and those who chose war had to hone their martial arts.

Like many belief civilizations, those things were created by their own imagination. However, the strangeness lay in this point. When these star spirits and some cultivators cultivated to a certain level, they would actually be attracted by the star they believed in, then, they would achieve ascension, becoming ascenders and ascending to the star of their belief.

Then... that star would come to life! !

Yes, you were not wrong. Originally, most stars did not have Gaia's consciousness. However, after these star spirits ascended, those planets would have it. Moreover, they would begin to undergo an incredible transformation according to the form of the star spirits' belief.

For example, the brightmoon sect that believed in the Moon. Many people knew that the moon itself wasn't a star and couldn't emit light. The bright moonlight that they saw at night was a reflection of the Sun's light, because the atmosphere was thin and the location was relatively close to the planet, less than 7% of the light could be reflected to illuminate the planet's night.

In many people's hearts, the moon that could emit such a gentle light was definitely a beautiful planet, but in reality, it was just a bumpy earth ball. It was ugly, but in reality, in the Universe Federation, there were many high-grade moons., their bodies were made of exquisite white jade, giving off a beautiful and gentle light that illuminated the starry sky. It was exactly the same as what most people thought of the Moon.

These natural moons were extremely expensive. Each of them was equivalent to the price of a level 6 planet. However, these moons naturally couldn't be natural. In reality, they were raised by the star spirits...

After the star spirits ascended, the planets they believed in would slowly change according to their will. Eventually, they would evolve into the ideal appearance of the star spirits. The star spirits were also known by the people of the Federation as the starkeepers. There were all sorts of strange planets in the universe., the moon that could emit light and was filled with white jade, the Sun that could replenish its own fuel everywhere, the terrifying planet that could devour living things, and even the mechanized cybertitan-type mechanical planet., these were all basically products left behind after the star spirits dissipated.

They were also known as functional stars, and they sold extremely well in the Universe Federation... ..

Therefore, the star spirits were also known as an archaic race that was closest to the deity race. However, the problem was that they were unable to flexibly use the laws, and would be bound to their own planet for the rest of their lives. Even powerful star spirits could only slowly travel with their own stars while traveling in the universe...

When Yun Ji saw this race characteristic, she was stunned. It had to be said that it was too f \* cking unique. It was truly an example of faith changing everything, she could imagine how many star spirits who had ascended would feel despair when they saw stars that weren't what they had imagined, she could also imagine how much determination and indomitable will they had to rely on to forcefully change reality after experiencing this kind of despair!

If there was no way out, they would create their own way out. They were truly the role models of the cultivators of their generation... ..

As for the Dark Ones, they were the complete opposite type. They were an even more extreme type of faction that was split out from the star spirits. Originally, the god of forging that this group of people believed in believed that the Crimson planet in the sky was a star of forging, the iron from outer space that fell from the sky was from that star.

When the first ascendant who believed in the god of forging successfully ascended to that crimson planet, he did not collapse like many others, nor did he fuse with the activated Gaia consciousness like the ordinary star spirits did, instead, he chose to forge that planet into a weapon!

If the universe federation had blacksmiths that surpassed the bronze race, it would be the dark descendants. Until now, many corners of the universe had been sealed with many star-grade artifacts left behind by the dark descendants, all of which were secret treasures. Many great lords might not even have one...

However, the Dark Ones did not have a very good reputation. This was because the materials they used to forge secret treasures were the planets that gave birth to Gaia's consciousness. Such things were not easy to find. Hence, many star spirits that had fused with the planets became their targets., when they could not find or defeat the star spirits, they would sometimes even choose the life star systems that had life as the materials.

However, once a planet was forged, billions of lives would suffer. Some dark descendants might be apprehensive, but most dark descendants would not be apprehensive. This also caused their reputation to be publicized as extremely vicious. Many of the Great Devils that appeared in the myths and legends of civilizations that wanted to destroy the world were mostly based on them...

Therefore, don't think that those villains who would jump out and say that they wanted to destroy the world were fools. Many times... .. They had motives...

Looking at the characteristics of the two races, Yun ji thought to herself, "This is simply a copy of the immortals and devils...". ...

To transform the immortals into the heaven and earth, bestowing the spirit or life of the Heaven and earth, becoming a god of a region, to nourish oneself with all things for the devils, and to not hesitate to destroy the Heaven and earth... ..

What should she choose? Yun Ji was instantly at a loss.

To be honest, according to what she thought in her heart, she wanted to choose the latter... However, her worldview was against this kind of self-preservation, so she was at a loss... ..

“Do you want to watch something else?” Xi Ye reminded her in a friendly manner.

Yun Ji shook her head. She was completely attracted by the dark-skinned Xing Xing. She could not bear to watch anything else...

“If you like it, why not?” Xi Ye smiled.

“I cultivate... not to become a butcher...” Yunji Mu’s expression was a little conflicted.

“Who says that becoming a dark-skinned means becoming a butcher?” Xi Ye said with a laugh.

“Eh?” Yunji mu looked at Xi Ye and thought to herself, ‘If you move, you will destroy the place where billions of lives depend on. If that isn’t called a butcher, then what is?’?

Looking at the other party’s puzzled expression.., xi Ye slowly explained, “According to the Federation’s research, the star spirits and dark descendants are actually good at discovering planets that are about to give birth to Gaia’s consciousness, and they weren’t the ones who created Gaia’s consciousness.”

“Eh? But... it says...” Yun Mu Ji was stunned...

“That’s the product promotion...” Xi ye rolled his eyes and said, “If it’s so powerful, why can’t it create a second one?”

Cloud Herder: “...”

Seer: “After these star spirits realized that the planet was about to give birth to life, they couldn’t explain their own unique senses, so they gave the planets all kinds of imaginary meanings. After Gaia received faith, it was born for the first time, and it didn’t know how to evolve, so it would develop an imitation consciousness. When there were no examples around, it would start to consciously change its formation according to the beliefs of these beliefs... “... but every planet basically has a large number of star spirit believers. Everyone’s imagination is different. Without knowing who to believe, Gaia naturally believes in the strongest “... “... so it will choose the most qualified person to ascend and become its star spirit.”

Cloud herder: “This... so that’s how it is... then the Dark Ones...”

“Dark Ones are naturally the same...” Xi ye smiled. “Dark Ones are also born with star spirits, so they naturally have the talent to discover Gaia life. The universe is vast and infinite, so how could we not find a suitable planet to forge?”

“Then why would they say that dark ones would attack star spirits or other planets?” Cloud Herder was stunned.

“Of course, they couldn’t help it...” Seer shrugged and said, “It takes a long time for Gaia’s consciousness to form. If Dark Ones want to obtain it, they have to wait by the side for tens of millions

or even hundreds of millions of years. It's an extremely boring process. How can it be faster than directly plundering planets that have already formed?"

Yunji: "..."

"But actually..." "...". The newborn Gaia was the most suitable material for forging because its mind was blank. As the first life that had been waiting for it, it was just like a mother to it. If it wanted to forge it into a divine artifact, it would just change its form and still have some use. Many Gaia would not resist, and those that were not formed would change into the most suitable material according to their star spirit talent, such as the Moon, the sun, or other types of planets. This was something that those formed Gaia could not compare to. Of course... The only drawback is that it takes a lot of time "..."

Xi Ye patted Yunji on the shoulder and said, "There is no such thing as good or evil in this world. Whether you are an immortal or a demon, it's all because of your choice..."

Chapter 296: Did the Liege forget something?

"Sigh..." Xi ye looked at Yun Ji Mu, who had been satisfied with her explanation and had decided to go ahead with the surgery.

When she heard that she could find her own path without plundering, Xi ye gladly accepted the dark-skinned genes. However, the truth was not as simple as it seemed?

Seer certainly did not lie. However, the truth was not taken for granted. Otherwise, why would the Dark Ones' reputation be so bad? The fundamental reason was not because too many people had chosen another path?

All the Dark Ones who had ascended knew how bad the effect of the molded Gaia was. Not to mention that many Gaia would rebel against them, which could easily lead to the collapse of the forging. However, why did so many dark ones choose to take the shortcut?

In the end, how could it be so easy to guard a planet for tens of millions of years?

Seer did not care about who she grew up to be. Many of the dark descendants under the great lord factions had taken shortcuts, and they had also secretly committed massacres. This was not a rare thing, as long as they did not do such things to the citizens of the Federation, who would care about an indigenous planet?

Lord of the Sky... ... He was never a good man... . .

-----

After Cloud Herder left, about a few hours later, the dog father gang came to the door, let Xi Ye not disappointed, the dog father this smart man made a smart decision, sure enough... ... Dealing with smart people is a relief... . .

"My Lord... . I want to talk about salary before signing the contract... ." Father Wang said very seriously.

Xi Ye was stunned for a moment, then coughed lightly. "Our base uses the mission points system. We will reward you with a large number of points based on your performance..."

As they were talking, father Wang interrupted them. "I've heard what you said from my girl, but my Lord, I'm talking about salary..."

Xi Ye's eyelids twitched. "Aren't we talking about... salary?"

"Of course not!" Father Wang said seriously: "Your points are their own currency, right? They're only useful in their own right? If you have so much power behind you, surely there must be a common currency of that power? That kind of thing... . Shouldn't that be a salary?"

Xi Ye's little hand trembled, and suddenly felt that dealing with smart people is really a nuisance...

A newcomer actually wanted a salary?

How ridiculous was this?

Seer, of course, sternly refused. He gave examples of how much he had paid to train them, the cost of genetic surgery, and the cost of later training. (of course, the data was definitely exaggerated.)

Then, he advised them to think long-term and not take advantage of the moment. However, this set of words could be used to say that some young people were okay, but how could it be used to say that some old and shrewd people who were over 50 years old were okay?

Dog father was not moved at all. He was determined not to comply. He insisted that the Lord specify when he would receive treatment in the contract. The training fees or genetic surgery fees could be listed out and used to pay them back, in any case, it could not be the current passive contract.

Seeing how crafty and greedy this person was, seer was very angry. However, in the end, for the sake of the overall situation, he still changed the contract for them.

The contract stated that they would have to work for free for 20 years to compensate for the genetic surgery fees and the training fees of the base. During these 20 years, like other players, they would have to rely on their mission points to spend on the base. After 20 years, they would have to reformulate their salary standards based on their abilities, the specific salary could be referenced to the level of the federal citizens.

Of course, the contract was a lifetime contract. Naturally, Seer would not let a D ball out of her territory. This was a matter of principle.

After both parties signed the contract, Seer Chased Dog Dad and the others out of the Lord's room with an unfriendly tone, on the way, Wang Chengbo looked at his father with admiration. "Dad, you're really amazing. You can even bargain with such a big shot, and you can really change the contract. It's really awesome..."

"Tsk... So what if he's a big shot?" Dog Dad looked disdainful. "It's only right and proper to work to earn money. No matter how fancy your words are, you can't fool me into working for free..."

"Good job, brother! !" Yang Renjie clapped from the side.

Director Zhang frowned as he looked at the contract. "But why do I feel like... We're still being cheated?"

The few of them were stunned when they heard this. Father Wang said faintly, "You can feel it too?"

"Eh? I thought you didn't feel it?" Director Zhang said in surprise.

"Of course. How could I not feel it when a goof like you, who has been suppressed by your wife for 30 years and only has a few tens of thousands of dollars in your pocket money, could feel it?" 1

Director Zhang: "..."

"A few tens of thousands of dollars in 30 years?" Yang Renjie and Wang Chengbo were stunned. They couldn't help but think to themselves, what a shame for men... "...". Was this F \* cking money saved from the change for groceries?

"Ahem... The information is not equal... Director Zhang naturally changed the subject and said, "The other party said that this genetic surgery is very expensive, but we don't know exactly how much it is worth. It's still up to him to decide. What if that gene is actually only worth tens of thousands of dollars?"

"Yes... "father Wang nodded and said, "So I tried to shorten the time I worked for free, twenty years... "... Just think of it as buying another house... "... during the years when my wife passed away, didn't I live a life where I couldn't even afford the red double happiness in order to pay off the mortgage?"

Everyone: "..."

"And it's still alright...". "...father Wang smiled and said, "I took a look. Even if the genes for a few surgeries aren't upgraded, they can still live for more than 500 years. Compared to the situation where we have to pay off the mortgage for half of our lives, these twenty years aren't too exaggerated "...". "Moreover, even if we can only earn points in these 20 years, we can still spend them in the base. It's not too bad." "...". "..."

"That makes sense..." director Zhang rubbed his chin and nodded. Then, he asked, "By the way, what kind of surgery did you choose?"

"Green Titan..." father Wang said directly.

"Why Green Titan?" Wang Chengbo was stunned. In his eyes, wouldn't it be better to turn into such a beautiful elf like his little sister?

As soon as he said this, the other three middle-aged men looked at him with an expression that said, "You haven't grown up yet."

"Child..." the dog father said earnestly, "Listen to your father's advice. Although it's important to have a gorgeous appearance, compared to some tangible things, it's worthless..."

"Tangible things? What... Are You referring to?" Wang Chengbo was a little confused.

The dog father immediately covered his head: "You Say You Ah, father my handsome appearance you did not inherit it, how even father my wit you did not learn a few points? In the end is not my son?"

Wang Chengbo: "..."

-----  
On the other side, seer stretched a little after sending off Dogdad and the others, and then said, "Well, the troublesome things are finally settled... next is..."

"Lord!"

Just as Xi Ye was about to relax and start the Alliance's Glory, the system suddenly asked, "Did you forget something?"

"What is it?" Xi Ye frowned.

The system said, "You promised Kunlun to share the secret realm with each other, and the Kunlun martial arts show will be the final result. But when we enter the Kunlun secret realm, what if they come to find you to enter our secret realm?"

Chapter 297: Knight's trial begins

"It's not a big deal..." Xi ye rolled his eyes, he immediately opened the ranking board and chose the middle and upper ranks. He then slowly said, "Isn't the secret realm just a dungeon? If we don't build one..."

The system was stunned. "How?"

"Use the death realm to create one..." "..." Xi ye said faintly, "The atmosphere in that place is perfect. One look and you can tell that it's a high-level dungeon. The items inside are indeed priceless. This lord can't be considered to be fooling them? As long as they can walk out alive, the rewards will be bountiful ... .."

The system: "..."

"But... haven't we not found the entrance to the death realm yet?"

"Isn't it still half a year before the martial arts demonstration?" Xi Ye said nonchalantly, "You have to believe in the abilities of our chief AI. That girl will definitely be able to find some clues within a few months..." "..." "Aiyō, why did it randomly become a support?" Xi Ye immediately sat up straight with a frown, she typed into the game, "I'm Looking for a solo player on the fourth floor, master level male blade, battle record is available..."

No one cared about him...

Seeing that no one was paying attention to him, seer was silent for a while before he typed again, "Give me a chance. My roommate has a terminal illness called Ebola, and he doesn't have many days left to live. His dying wish is to watch me play a male blade..."

"Then if you lose this, won't your roommate die with a grievance?" The solo player on the fifth floor could not help but mock.

“I won’t lose with a male blade!” Seer typed confidently.

“Actually, you can assist male blade. I don’t mind...” ADC typed on the second floor.

Xi Ye: “Then won’t my roommate die with a grievance?”

Everyone: “...”

The system was silent for a while before it directly turned its view and cut off Xi Ye’s side of the screen. It felt that if it continued to watch this silly overlord for a while longer, it would be unable to help but go crazy...

After cutting off seer’s view, the system turned to the new territories. Ever since the new territories had established a signal station, it could barely transmit its consciousness over, but its weakness was that it could not follow the two dimensions at the same time, as long as it teleported over here, the base would temporarily lose control.

A normal intelligence would not do such a thing because there were many precision instruments working in the base. This intelligence would take on the responsibility of overall supervision and would not normally go out for a stroll.

Moreover, normal intelligence would not be in the mood to go out for a stroll, but it was different. Their race was different...

Moreover, if someone discovered it, they would be extremely surprised to see that the intelligence had actually transformed into a tiny particle, floating in a form in the new territories.

Normal intelligence was just a pile of code written with data. It was impossible to have a physical body. It needed a certain amount of equipment to circulate. obviously... .. It was not a proper intelligence.

It was extremely fast, moving at a speed that surpassed light. It quickly swept through all of Molendon’s forces.

Then, he was surprised to find that even after rainless melon left, Molendon was still methodically restoring order. Rainless melon relied on the fake nobles and her social circle to quickly stabilize the situation, even if she was far away in the capital, she could still control everything remotely and take care of everything properly.

After the war, the movement of the population, the consideration of the New Territories’ titles, and the recruitment of people were all carried out in an extremely orderly manner. Although some nobles had some complaints and were unwilling to be inferior to a widow, they were tightly restricted, at least for the time being, they were unable to make any waves. Moreover, the movements of these people were closely watched by the intelligence elves arranged by rainless melon.

It has to be said that this woman is extremely talented in management. Although the developer’s brain has greatly improved her computational ability, the fact that she is able to highlight both human and logical achievements proves that this woman is indeed very talented.

It could not help but sigh in the heart of this silly lord good luck, can break into this kind of people...

Thinking of this intelligence slightly shook his head and flew towards the imperial capital.

-----  
At this time of the imperial capital is very lively, because it is the Triennial Knight Academy Test Day!

Many people in the imperial city, including some nobles, were watching outside the academy.

Most of the people are just watching the show, of course, there are some because their children take the test to see the results of the heart.

Aristocrats, on the other hand, are here to see if there are any seeds to invest in.

Although most of the people who came to take the test were illegitimate children, the imperial city was different from other cities. There were also many commoner families here that could afford a child to practice martial arts. If these seedlings with a clean family background had good aptitude., many nobles or wealthy merchants would consider investing in them.

For example, they would support some tuition fees or supplies. First, they would gain some popularity. If they could earn military merits on the battlefield, then they could even consider marrying a daughter or something...

Of course, even if he was an illegitimate child, he could still invest in it. If his aptitude was good, he could first find out which family the other party belonged to. He could be a subordinate of the younger generation in the family. He could contact them and buy them for a certain price.

Of course, this investment was relatively risky. The price to buy out an illegitimate child was not small. Many aristocratic children were very shrewd. Most of them would raise the price from the ground up, and after you paid a certain price to buy this person, he might not necessarily be able to create profits for you.

There was a very big risk, such as not graduating, or dying on the battlefield, then you would lose everything.

Therefore, this thing was very discerning, and also somewhat dependent on luck.

Especially the first wave of tests...

If all the tests were completed, and others were certain to be able to enter the academy, and the results were also out, then you might not be able to buy it even if you wanted to. Even if you could buy it, the price would definitely be much higher than before.

The test was divided into four steps, which were the physical fitness test, the skill test, the actual combat test, and the battle Aura Test!

Many sharp-eyed nobles would place bets on people in the first wave because the further you went, the more transparent their abilities would be, and the harder it would be for you to buy it. This thing was just like gambling on stones. The further you cut, the more obvious the value of the stone would be. But if you waited until the end to place your order, then there would be basically nothing to do... ..

Moreover, the results of the college's test were always open to the public. Nobles who were far away would also be able to know the results at the first moment. Placing bets on people was an activity that

almost all the nobles in the country participated in... The locals simply could not use the information gap to cheat.

At this moment, in the school's internal hall, some famous wealthy businessmen and nobles gathered together and looked at the information that their subordinates had obtained through the intelligence agencies.

Due to the large number of people, most of them first looked through the information and locked onto the testing area. They mainly observed the seeds that they valued at the beginning, and then temporarily looked at the competition area to see if they could touch some fish.

Ai came to the venue and scanned around, trying to find rainy girl's melon-less position. However, after scanning, rainy girl could not find melon-less, but she suddenly discovered the energy of the undead!

Shocked, Ai quickly looked over and saw a corner where a woman in a black cloak was staring at the crowd.

Ai followed her gaze and saw Brother Dog's ugly face...

Chapter 298: Villains

"Oh, Lady Isabelle, it's really rare to see you..." a middle-aged man who was as fat as a hill, with a huge belly, approached a woman dressed in luxurious clothes and laughed.

Ai was hiding in this man's collar, because he was at the blind spot of the undead woman from this angle...

The three-dimensional and exquisite features of the woman named Isabelle wrinkled slightly. She turned to look at the fat man and sighed slightly, "Paul, if you continue to lose control of your body, it will really become useless..."

Ai scanned the two of them briefly. Both of them were wearing the noble seal of a marquis, which was a little strange. This empire was a warrior. Other than the Mage family, there were very few women who could inherit the title of nobility. However, it was certain that this woman was definitely not a mage.

Although this woman looked noble and graceful at this moment, her muscles under her luxurious clothes were very solid. It was obvious that she was a warrior who had been training frequently. From the level of this world, this woman was at least at the level of a Gold Knight, it was also the level of a general that the empire often talked about.

Out of curiosity, Ai immediately checked the database and quickly obtained the information that rainy girl had uploaded without a melon,

isabelle. Vichy, 58 years old, one of the retired generals of the empire. She was a rare female gold knight. Due to her outstanding military achievements in the north, she was awarded the title of City Lord of the Red Dragon City in the Southwest River loop, as well as the position of Marquis, she was one of the rising nobles of the empire in this generation.

The man called Paul who was talking to her at this time was one of the retired generals of the same period as her. They were both born commoners and had achieved great military achievements by themselves.

However, it was clear that after retiring, this guy did not maintain his training like the marquess. His body was putting on weight very quickly.

“Hahaha... .. There’s nothing I can do about it ...” Paul laughed and patted his fat belly. “The south is really too comfortable. Now that I think about it, I should have been like you in the past. I should have chosen a city to the north. It’s so decadent “... Hahaha!”

Isabelle rolled her eyes and did not continue to talk about this topic. It was true that retired soldiers could not keep up with their training. There were not many who did not put on weight like her old comrades, the main reason was that at their level, their bodies needed a large amount of food every day. However, if they did not continue to train to stimulate their internal organs, their muscles would become fat very quickly. It was not that everyone did not understand this principle, however, it was not easy for them to enjoy their lives. How many of them could maintain the self-discipline that they had when they were in the military?

“Are there any people that you value?” Isabelle changed the topic.

Upon mentioning this, Paul’s eyes immediately lit up. He rubbed his hands together and said, “There are quite a number of good seedlings this year... according to the intelligence agency’s prediction, there are quite a few people who came from the arena and have the potential of the butcher Ganzer!”

“You believe that?” Isabelle rolled her eyes at him again.

Ever since the butcher Ganzer of the Empire. Ever since the rise of the skull crusher, many people in the empire had invested in those barbaric warriors who came from the arenas. However, reality proved that not all of the Gladiators were Ganzer. Ganzer’s learning ability was extremely strong. He had graduated from the academy to train on the battlefield.., in just a short span of more than ten years, he had advanced to become a Gold Knight. How could such a talent be easily caught?

The people in the arena were indeed much better at physical training and combat skills than the average illegitimate child, but their potential was far inferior. The environment they lived in caused them to develop their physical bodies too much, and their meridians had already become rigid. In addition, they had not gone through the systematic training of combat aura, so it was extremely troublesome to teach them. It was rare for them to graduate from the basic recruitment..

However, just like how an actor had a star Lord and brother Baoqiang, most people were more enthusiastic about such a small number of legends, but they often overlooked the fact that the correct path was to be born in a professional class.

Just as they were thinking about it, a horn sounded, and the nobles who were still chatting on the stage immediately shifted their gazes onto the stage.

“They’re coming, they’re coming!” Paul said excitedly as he rubbed his hands. His expression was like that of a fanatical gambler.

Isabelle looked at him in amusement. During the same period, Paul was the most enthusiastic gambler...

“Name?”

On the stone platform of the test, the instructor in charge of recording the data asked seriously.

“SSENMING Odolan!” SSENMING shouted in full force!

In fact, the name and information had already been recorded when he signed up. The reason why he was asked to say it again was actually for the surrounding nobles to listen to. It was also to make it convenient for those nobles to quickly check their information.

It was obvious that Shi Sen also knew this, so he shouted very loudly, afraid that the nobles around him could not hear him.

This test was not only a test for them to enter the academy, but also an important moment for them to show their value to the nobles around them.

As long as they performed well, they might be able to break away from their status as illegitimate children now, and they would also receive some important training from the nobles!

It was like a second chance to change his life...

“The first round is a physical fitness test!” The instructor read out the rules for everyone: the Physical Fitness Test included a strength test, an endurance test, and an explosive strength test!

“Which group are you testing first?” The instructor pointed at the pile of equipment in front and asked.

The equipment in front was used to test bench press, supine force, lift force, and various kinds of local muscles. Obviously, in order to satisfy the gambling psychology of the nobles, the officials had made the test scientific enough, they tried their best to show the most detailed data of the test personnel to the public nobles.

“Let’s follow the procedure...” as he said this, he took off his leather armor and revealed his strong muscles, which made the eyes of the nobles light up slightly.

Although he was not big, he had trained his body exceptionally well. His muscles were neither bloated nor weak, which was very beautiful.

“Your body is well-trained...” Paul looked around and could not help but praise, “Every part of your body is just right. Moreover, according to the characteristics of your long arms and short legs, you have deepened the training of your calf muscles, which gives you an explosive advantage in speed. Obviously, you have been carefully trained by professionals “...”. He did not expect that the first one would be such a good seedling... Then, he quickly said to the attendant beside him, “Quick, help me check this guy’s information.”

“Yes, Sir!” A dwarf beside him quickly flipped through a large stack of information scrolls. His speed was extremely fast, showing the high-efficiency filtering ability of the dwarf race’s brain.

“I found sir...” in less than ten seconds, the dwarf found the materials of Shi senming.

Name: Shi Senming, 17 years old, 1.72 meters tall, arm span...

She was the third miss of the Odolan family: Jenny. She was selected as the Guardian Knight of the Odolan family.

“Guardian Knight?” Sam’s eyes lit up. Female Guardian knights were usually easier to sell than men. Unlike men who trained their direct descendants, female guardian knights were more of a facade. If they had money, they could... Many women would be more practical and buy ready-made knights. After all, many women might not even be able to wait for their Guardian Knights to graduate after they got married...

“Huh? This person has a bad track record?” The sharp-eyed Isabelle saw the information recorded in the intelligence report.

“Betray the Old Master?” Isabelle sneered. “You dare to want such a person?”

“What’s The Big Deal?” Sam shrugged nonchalantly. “People go higher. Isn’t that how the World Works?”

“It’s different...” Isabelle shook her head and pointed at the information. “The information clearly said that this guy followed the old master, Sunny, for seven years, and only joined the new master at the end. What does that mean?”

“What does it mean?” Sam was stunned...

“You... I really don’t know how you manage your territory...” Isabelle sighed and shook her head. Then she looked at Shisenming and said, “This means that this is a complete villain!”

Chapter 299: No. 298: Shh! !

“It can’t be...” “...”. Sam disapproved of the judgment. “We have often come into contact with the illegitimate children of the family, especially the Guardian Knights of the female side. Most of them are traded as goods. The illegitimate children use the resources of the other side, and the direct descendants use them. There is no friendship between them. If there is a better way, there is nothing wrong with leaving...” “...”

“That’s a normal situation...” Isabelle sighed. “His body is obviously not...”

She pointed at the other party and said, “Look at his body. Generally speaking, women raising knights are amateurs. Very few people can raise a knight candidate with such a good body. This kid’s body and muscles have been trained so meticulously. It’s obvious that he has received special guidance and spent a lot of effort to get this result...” “...”

After pausing for a moment, Isabelle’s tone became even gloomier as she said, “According to the information, this person has been with the old master for seven years. Judging from his physical condition, the old master must have put in a lot of effort during these seven years. However, he defected to someone else just before the assessment. What does that mean?”

Sam was stunned for a moment when he heard that. Then, he lowered his head and seemed to be deep in thought...

Soon, the results were out. 71 points in the strength test, 85 points in the endurance test, 93 points in the explosive force test, overall: 83 points!

Once the results were out, there was another round of discussion around. Obviously, this result could be considered as an excellent seed.

At this moment, the other illegitimate children of the Odolan family below the stage all had a change in expression. They didn't expect that this guy, who looked short and thin, actually had such a good physique. He usually didn't show it at all, but he hid it quite well!

Schisenming was slightly proud. This body of his was carefully trained by the old Knight Instructor of the second miss, although his strength was relatively small due to the bone problem, however, the old knight instructor had strengthened other exercises according to his own characteristics, so that his body could get the best balance, endurance, and explosive power!

"TSK TSK... ouch..." far in the south, the Odolan family was also watching the live broadcast with the arcane mirror. When Jenny saw this scene, she immediately smiled like a flower.

"You guys raised my knight really well!" Jenny smiled and deliberately poked Sunny who was in the other corner.

Hearing this, many of the children immediately burst into laughter. Meanwhile, David, who was guarding Miss Sunny, said, "Texas looked gloomy and angry, while Sunny pouted her lips with some grievance..."

Looking at the smug look on Shisenming's face, Sunny really couldn't feel happy. She thought that she could be magnanimous and sincerely wish him a better life, but in fact, she only found out after she came... She was indeed not as magnanimous as she thought...

Looking at Sunny's increasingly aggrieved face, the corners of Jenny's mouth curled up, and her heart became more and more happy, on the other side, David said coldly, "That kid can betray his master once and he can betray his master twice. Do you really expect him to obediently come back and Be Your Guardian Knight?"

Hearing that, Jenny laughed. "If he doesn't come back, then he won't come back. At worst, he can just sell it now. I won't lose out... anyway, I wasn't the one who groomed him for seven years..."

Most of the people around couldn't help but burst out laughing. They couldn't help but think to themselves, 'third miss's words really hurt my heart...'. .

"Alright, don't go too far, Jenny!" In the middle, a tall man wearing a blue gown immediately frowned. It was the eldest son of the current generation of the Odolan family, Ge Fen.

"Tsk..." seeing her eldest brother speak, Jenny snorted and didn't continue to say anything more ... With the current situation of the family, it was already a foregone conclusion that her elder brother, Goffin, would become a noble. As the future city lord of Oddo City and the future head of her own family, even if she was doted on by her father now, she still had to give face to him...

"Eh? Why isn't anyone calling names?" The butler beside suddenly asked.

Hearing this, everyone was stunned. They raised their heads and looked up, only to find that the nobles on the crystal screen had actually remained silent after discussing for a while. No one was willing to call names... ..

Name-calling was a way for the nobles to bid. In order to increase the atmosphere, the nobles would name names on the spot when they thought highly of a young man and state the price they were willing to pay. At this time, if the knight did not resist, the subsequent masters could use the crystal to bargain with the nobles.

And at this time, if there were nobles willing to bid higher, they would also bid accordingly, forming an image of an auction...

This was to let the atmosphere of the gamblers rise to the highest level. Secondly, it was also to maximize the benefits of the few parties... After all, there was no easier way to raise the price than an auction.

However, it was clear that no one was willing to bid in the first round...

Instantly, the expression on Shi senming's face turned from complacency to stiffness... ..

How could this be?

Shi senming was particularly puzzled. His physical ability was considered excellent in all the previous rounds, right? How could there not be a single bidder?

"Alright, you can go down now. Get ready for the next round of the Test!" Seeing that no one called out a bid, the instructor did not waste time and said directly.

"This..." Shi senming was obviously still a little unwilling, but when he saw the instructor's cold eyes, his heart suddenly trembled. In the end, he did not dare to say anything more. He picked up his clothes from the ground and ran down from the stage dejectedly.

Shhh...

When he returned to the back, a bunch of illegitimate children from Odolan were booing him. Sassen's face turned livid. In the end, he lowered his head and went to the back to change his clothes without saying a word...

"Hehe..." in the distance, David sneered when he saw this scene. "It seems that the aristocrats still know the good from the bad. They know what to buy and what not to buy..."

Jenny frowned. To be honest, she did not want to spend money to train this guy. At first, she wanted to sell him, but she did not expect... ..

In the corner, Sunny's lips curled up slightly. She was actually gloating in her heart, and then she felt a little guilty. She thought to herself, I really am a bad girl... .. But who cares, I'm just happy now... ..

At the thought of this, sunny finally smiled.

"A guy without a knight, why are you smiling like a Fool?" Jenny looked at Sunny's smile and immediately sneered.

Hearing this, sunny said angrily, "I have..."

"Don't tell me you're referring to that good-for-nothing sim?" Hearing this, Jenny was amused. "Do you really think he can become a Knight?"

"Why not? SIM works very hard!" Sunny looked at him angrily.

"Hehe..." Jenny sneered. "Then I'm looking forward to his performance..." she suddenly paused at this point, and then the sneer on her face deepened. "It's really about who comes and who goes..."

Hearing this, everyone looked up and immediately found that the second person who went on stage was really the tall and thin sim... ..

"Damn Fatty... why isn't he online yet?" At this moment, brother dog frowned as he walked onto the stone platform. He was secretly worried. He was the one after him. He didn't know what this guy was doing. He hadn't gone online for two days in a row. This wasn't like him...

"Which one do you want to test first?" The instructor looked at the tall and thin brother dog who was like a bamboo stick and immediately frowned.

"Follow the procedure..." brother dog imitated Shi Senming's words and took off the leather armor on his body, revealing a fierce look. ... ! Pork ribs! ! !

"Shhh..."

A series of hisses sounded on the field...

Chapter 300: men, take him down for a urine test!

"PFFT! !" When Jenny saw that brother dog had exposed his pork ribs, she could not help but spit out the red wine in her mouth. After choking for a long time, she laughed and said, "Didn't you feed him?"

David's face was dull. He remembered that although Sim's body was not very well trained, it was not to the extent of being this kind of pork ribs spirit?

Sunny was worried. She pulled David's sleeve and said, "Uncle David, why did sim become like this?"

Could it be that SIM had found a cheating guy to replace him?

David rubbed his chin and thought about it, but then he was even more confused. wasn't this F \* cking professional body too touching? Could he pass?

At this moment, marquis Sam couldn't help but laugh, "This F \* cking guy dares to take the test? What a talent..."

Marquis Isabelle slightly narrowed her eyes. She noticed that amidst the boos and jeers of the crowd, that skinny guy's mood was unusually stable, and there was no fluctuation in his eyes...

This guy might not be simple... .. Isabelle muttered.

“No Way? Are you sure?” Sam said in surprise... ..

“Then do the bench press first. But the bench press test should be at least 200 kilograms. Are you sure you want to do it?” The instructor was speechless when he saw this unconscious guy. As long as the other party said that he could not do it, he would immediately tell him to get lost...

What was the situation with the examiners now? Could such a person also sign up?

“Oh...” brother dog nodded, but then he suddenly thought of something and turned around to look at the other party. “You didn’t seem to ask my name...”

The instructor’s face darkened when he heard that, and then he waved his hand impatiently. “No need. Your Name was already recorded when you signed up...”

“Really? But why did you ask for that F \* cking name just now?” Brother Dog pointed at Shisen in the distance.

The instructor was stunned for a moment and thought to himself, does this guy really not know what he’s doing? Then, he became even more impatient. “It’s useless even if you said your name...”

Brother Dog: “How do you know it’s useless even if you didn’t say it?”

Everyone:” ...”

“I. . .” The instructor immediately covered his head and resisted the urge to slap him to death. In the end, in order not to waste time, he compromised and said, “Okay, what’s Your Name?”

“My Name is SIM, Sim o’dolan!” Brother Dog proudly placed his hands on his waist and said, “I’m the second miss of the o’dolan family: Sunny’s future Guardian Knight! !”

PFFT!

Sam couldn’t help but laugh out loud. The audience couldn’t help but snicker, thinking, “Where did he come from?”?

Even Sunny, who was far away in Odolan Castle, covered her face in embarrassment. Sunny, on the other hand, covered her stomach and laughed, “Oh, I now believe that he’s Your Knight. hahahaha, I’m dying of laughter...”

Goffin wanted to scold Jenny, but the ribs in the arcane mirror were too funny. He couldn’t help but laugh, and he couldn’t be serious...

At the scene, Sam patted his old comrade’s shoulder with a smile. “I believe you now. This guy is indeed not simple... hahahaha!”

Isabelle:” ...”

“What are you laughing at?” Brother Dog frowned and looked around, obviously dissatisfied. He thought to himself, how could I Be So Serious?

“Okay...” the usually serious instructor could not help but laugh for a while. Then he rolled his eyes and said, “Don’t waste time. Do you want to lift or not?”

“Lift... of course I want to lift. Why Can't a man not lift?” Brother dog quickly said, “Give me 600 pounds like the hair before!”

“Are you sure?” The instructor was stunned...

600 pounds was actually not a very exaggerated weight in the test. Otherwise, Shisen would not have only scored 70 points in strength. However, it was obvious that the weight was too exaggerated for a rib like this...

“Young man, there are some things that you should not push yourself too hard... the medical treatment of our school is not free if you are injured...” the instructor kindly reminded him.

“If he can lift me, why can't he?” Brother Dog was very stubborn.

“Alright then...” the instructor didn't say much. After all, there were still so many people waiting behind him. At most, he could help to keep an eye out for them... ..

Just as he was thinking, Brother Dog had already walked to the bench pusher and laid down. Then, he pretended to take a deep breath and directly pulled off the lever, causing the instructor to be stunned.

The other party's movements were so smooth that he did not react in time. He thought that it was terrible, but in the next second, the action that he originally wanted to rescue froze. He saw that the other party very naturally raised the lever.

“A very perfect action!” Isabel narrowed her eyes and said.

She could see at a glance that brother dog's action of raising the lever was very standard. The few remaining muscles in his body and his breathing had reached an astonishing consistency. He was obviously a person who was proficient in training and had a famous teacher to guide him.

“Eh?” Sam also looked over curiously. He could also tell that this guy seemed to have some tricks up his sleeves.

One... Two... Three... .. Nineteen... .. Twenty-seven... ..

As the numbers on the counter kept jumping, the surrounding people fell silent. It was hard to believe that this skinny girl actually had such strength and endurance... ..

Then, the instructor did a strength and endurance test on every part of his muscles. The results were all above 90. Many nobles on the field couldn't help but look at each other. The instructor also had an incredulous look on his face.

“Let's try the explosive force...” thinking of this, the instructor pointed at the force measuring device.

Brother Dog nodded. He walked to the force measuring device and took a deep breath. Suddenly, all the muscles in his body... Ugh. ... all the ribs in his body tensed up.

“Good!” Outside the arena, Sim's eyes lit up and he couldn't help but exclaim.

The dwarf at the side was stunned for a moment. He didn't understand why the opponent hadn't even thrown a punch yet?

Sam ignored the dwarf who had a puzzled look on his face and continued to observe the kid with great interest. As a former general of the empire, he naturally could see how high the degree of completion of Brother Dog's posture of exerting force was!

His tensed posture was like a longbow with a full bowstring. The strength was as one. Regardless of the final strength, this posture was clearly in place. It was at least at the level of a Master!

Bang! !

With a crisp sound of metal, the force measuring device displayed a strength of 1,500 jin, causing the nobles on the field to suck in a breath of cold air.

This explosive strength was obviously a little exaggerated...

Brother Dog looked at the figure and sighed slightly. He was clearly a little dissatisfied. He thought to himself, "Isn't this weakening curse a little too powerful?"?

Obviously, the strength that he was using now was not something that he was faking. Instead, it was a genuine all-out attack from him!

The reason was very simple. The main reason was that rainy melon was afraid that he would be exposed during the test, so she had the instructors in the base cast the weakening curse on him to prevent others from seeing through it during the test.

This also caused his muscles to atrophy, turning him into a sparerib demon.

"Instructor... is this okay?" Brother Dog asked weakly.

The instructor gave him a deep look, then nodded and said, "Yes!" Then he turned to the staff member below the stage and shouted, "Pull him off the stage and have him Pee Again!"

"Hey Old Man, this is too much! !" Brother Dog said with a dark face...

"Wait!" Just as the instructor was shouting for someone to carry brother dog down for a urine test, a gentle male voice came from afar.

"I'll offer 500 pure gold. Miss Odolan, can you part with it?"

The nobles were shocked when they heard that. Pure gold was the highest currency in the alliance. Not only was it circulated in the empire, but it was also a common currency among the overseas alliances. Its purchasing power was extremely high. 100 pure gold could buy an adult griffin. For a newbie, this price was obviously a bit exaggerated...

On the other side of Dolan Castle, everyone looked at Sunny in a daze. Sunny was also dumbfounded. Apparently, she couldn't react in time.

On the field, Sam was also stunned. He couldn't help but look at who was fighting with him in anger?

"It's a bid, it's a bid. It's Marquis Arthur of Black Iron City!" Someone in the crowd hurriedly said. Immediately, the surrounding people started to discuss.

“Damn, it’s that dog...”hearing this, Sam became angry. He was about to raise the price, but before he could say anything, a cold female voice came from behind him, “1,000 gold!”
