

## A Bunch 511

### Chapter 511: The change of the black bear (middle)

The next day, the black bear came to the city Lord's mansion as promised to take part in the test. This time, he was not the only one who came. Many soldiers who did not have any missions came to join in the fun. There were some soldiers from both the old and new camps, among them, the ones who came the most were the soldiers who came back with injuries, causing their bodies to be defective.

Little Hans was one of them. The part of his body that was injured was the lower half of his body. Both of his legs were half-absorbed by the monster, and his legs looked like two dried bamboo sticks. He looked extremely strange.

However, compared to the others, Little Hans was considered lucky. Although his legs were thin, he could barely walk. He could help the army with some groceries, and he would not be reduced to being taken care of by others. Therefore, on the surface, he did not seem as depressed as the others. At least, he did not want to commit suicide...

But in fact, the feeling of depression in his heart was no worse than many soldiers with broken limbs. The reason why he did not commit suicide was because he did not want his parents to be sad, because there was an important part of his lower body that was also greatly affected, now, it was as small as a tadpole, which made it easy for him to pee in his pants during normal times.

However, he was naturally too embarrassed to talk about this kind of thing to outsiders... ..

He had also signed up for the last experiment and planned to participate in it. However, because his parents had listened to the surrounding rumors and tried their best to persuade him, he did not participate in the experiment modification like black bear. Now that he heard that black bear had returned safely, ... Half of the disabled had been completely cured. He rushed over early in the morning to take a good look. If it was true, he might still have hope in the future... ..

Hans thought that he had come very early, but when he arrived, he realized that it was not the case. The people around him seemed to be more enthusiastic about this matter than he had imagined. As a result, when he arrived, the square of the mayor's residence was already filled with people.

With his legs, it was naturally difficult for him to squeeze through the group of burly men. He was instantly as anxious as an ant on a hot pot. Just as he was feeling anxious, a gentle voice suddenly came from behind, "Can't get in?"

Hearing this, Hans turned his head, and his body immediately stiffened. He quickly stuttered, "Duke... Duke! !"

The person who came was Isabelle. This was the first time Hans was so close to this legendary figure, and he immediately became nervous.

Isabelle nodded and said to the guard behind her, "Take him to the Special Area at the front. Then you guys take a look around. If there are injured soldiers, take them to the Special Area first."

“Yes, your Grace!”The guard behind quickly replied.

Hans was instantly delighted and quickly saluted. “Thank you, your Grace!”

Isabelle smiled and waved at him. In her heart, she was slightly relieved. Fortunately, those guys didn’t get into trouble...

She was also shocked when she found out that the black bear was the only test subject. Moreover, when she found out that ran Xiaojuan had chosen the higher-risk fourth-sequence plan with only one test subject, she was shocked. Suddenly, she felt terrible. If she failed, she planned to open the guy’s skull...

Fortunately, the result was not bad. This also caused ran Xiaojuan to temporarily preserve her skull... ..

As long as there was a successful case, it would be of great help to the promotion of the following events. It was also because of this that she chose to conduct a public test in order to publicize the effects of the experiment. Only by letting the people see the benefits of the modification... Would they be able to minimize their resistance to the human experiment, and even be enthusiastic about it...

Setting up the special district for Hans and the others was to attract the next batch of experimenters, because they were the audience who were most likely to be moved... ..

The special district was at the front of the testing square. When Hans came to the front, he saw many injured companions, and they all greeted him.

“Hey, Jimmy, did you see the Black Bear at the Camp Last Night? Did he really recover?”Hans asked carefully.

“Okay...”Jimmy was also a little excited. “I saw that guy yesterday. You’ll know when you see him later...”

Hearing his partner say this, Hans’s expectations were even higher.

After about 15 minutes, Adolf the black bear finally slowly entered the inner part of the test square. At this time, he did not know whether it was because of the test requirements or because he wanted to pretend to be a badass. He was not wearing any clothes on his upper body. He didn’t even have a single piece of clothing. His explosive muscles were exposed, making everyone’s eyelids twitch.

His muscles were too firm. His muscles were like small mountains. In the cold weather, he seemed to be unaffected by the wind and snow. His back was straight, and every step he took felt very powerful. It gave people the feeling that the male hormones were off the charts. Some of the women who came to watch the show suddenly felt their hearts race.

“Holy Sh \* T...”Hans was stunned. “Is this a black bear?”

Although he was from the new camp, he was still very familiar with the black bear. After all, he and Jack were the ones who often fought with the city Lord’s personal army.

In the past, although the black bear had strong black fur all over its body, it was no different from a puppy compared to now. However, the outline of its face did not change much. It was truly the person who had deliberately provoked them in the past... ..

Looking at that body of muscles, Hans swallowed a mouthful of saliva, and his face could not help but reveal a look of envy... ..

Its entire body had become bigger, so there should be some parts of it that had become very big, right. Hans secretly guessed... ..

The test method was similar to the Knight's test. It was aimed at strength, agility, and endurance. The first test was the strength issue that everyone was very concerned about, because many people wanted to know... Whether this body of tendons and flesh was good or not... ..

"Bench press test, how much?" Ran Xiaojuan said with a cold tone.

"Um... um... Let's start with 500 kilograms..." black bear hesitated for a moment and said. In fact, he felt that he should be able to lift more weight, but with so many people watching, it would be awkward if he could not lift it. So he still felt that he should stabilize it first.

When he said this, the people around him immediately booed. 500 kilograms of bench press sounded like half a ton. If it was in the D ball, it would be world-class bench press, but in the New Territories Army, this was very common. They imagined that black bear's physique should start at least one ton...

"You're a little promising..." ran Xiaojuan also looked at him with disdain. Black Bear felt embarrassed, so he changed his words, "Then let's start with one ton."

"Two tons... prepare it for him..." ran Xiaojuan was too lazy to discuss with him, so she said to the staff next to her.

The black bear: "..."

Two Tons? The people around were stunned for a moment. This weight was very heavy. At least, ordinary bronze knights would not be able to lift it. The Tauren and mammoth warriors who were famous for their strength on the grassland should be able to do it.

Black Bear took a deep breath and looked at the steel wheel that was about the size of a person. His heart suddenly felt a little weak...

However, since things had come to this, he naturally could not just stand there. Therefore, he lay down obediently. After taking a deep breath, he slowly put his hands on it...

Huh?

Just as black bear mustered his strength to push it, he realized that this so-called two tons of weight was much lighter than he had imagined. He felt that he did not even use much strength to lift it up. He could not help but look at the steel wheels on both sides in shock, he thought to himself, could it be that it was filled with cotton?

"What's Wrong?" Ran Xiaojuan asked coldly as she looked at the blank look on the black bear's face.

"It seems... too light..." the black bear hesitated for a moment before he answered honestly.

"Too Light?" The people around were stunned and thought to themselves, "This fellow is a little inflated. Even if he can lift it, he can't be so pretentious, right?"?

“Then double it!” Ran Xiaojuan said coldly.

“Uh... this...” the black bear’s expression immediately twitched. Was this F \* cking double the weight?

The people around were immediately amused and thought to themselves, I told you to be pretentious!

Chapter 512: Black Bear’s transformation -PartpTwo two)

The surrounding workers very cooperatively brought over iron wheels. Four strong men brought over 500 kilograms of iron wheels from the side. Black bear looked at the few soldiers who were moving with great effort and was instantly puzzled, could it be real?

Just as he thought of this, with a bang, the few strong men put the wheels next to the bench pusher and pressed a clear mark on the bluestone floor of the square. Black Bear was stunned and thought to himself, looks like it’s real...

As the wheel was added, black bear clearly saw the frame of the bench pusher bend. His heart could not help but jump. This bench pusher was obviously used by the Castellan’s residence for those young masters. The weight specification was not set so high in the beginning. Black bear was very doubtful if it would collapse if it was used at the last minute...

“Let’s try lifting it again...” ran Xiaojuan said faintly.

Black bear nodded when he heard that. He took a deep breath and put his hands on it again. The people around him also held their breaths. The weight of four tons was the standard for the physique test of silver knights...

Black Bear took a deep breath again and lifted it with force. However, just like before, he lifted it without much effort. That relaxed look made everyone stunned. If it were not for the laborious look of the staff when they moved the iron wheel just now... They also suspected that the wheel was filled with cotton...

“This...” black bear decided to use a different excuse to appear more modest. However, before he could finish his sentence, ran Xiaojuan continued, “Double it...”

Black Bear: “...”

Eight tons?

You must be joking, right?

This time, even lieutenant general Ned, who had come to watch the show, could not help but frown. Humans were not like beasts, and they had a huge disadvantage in terms of physique. In a single round of strength, if he did not use his battle spirit, he would not even be able to lift an eight-ton horizontal pusher...

Bang, Bang. With the reinforcement of the iron wheel once again, everyone could clearly see that the horizontal pusher looked like it was about to be bent, so they no longer suspected that it was fake...

However, after the black bear lifted the eight-ton lever in one breath, they all sucked in a breath of cold air... ? Looking at the black bear, who was still not using much strength, they thought to themselves, "Isn't this guy a little too fierce?"?

"Again..."

"Hey, no, no, no!" The black bear hurriedly waved his hand and said, "I can't afford to double it, I'll just add another two tons..."

Everyone:"..."

Ten Tons of bench press...

After the final bench press test, everyone was immersed in the data from before and was in disbelief. This included many mid-to high-level generals. This strength was extremely attractive to regular knights like them... ..

After that, the test group tested black bear's explosive fist strength, sprinting strength, explosive leg strength, and agility. Although it wasn't as amazing as bench press, the data was still very exaggerated. It could be said that the black bear was like a different person. Just this data alone could already be compared to the elite beasts of the north...

Ran Xiaojuan took the data and reported to Isabelle, "The bench thrust has basically reached the expected level. It has the standard of a level two creature. Its explosive strength is not very strong. It is slightly different from its own bench thrust, and its agility is also not very good. However, the gene budget for agility is not very high..." . "..."

Upon hearing this, Isabelle nodded. It was fine as long as her strength reached her expectations. It wasn't a big problem for her to have a lower explosive strength. After all, her body had changed so much. It was normal for her to need a period of professional training to fully utilize her body's strength...

She then asked in a low voice, "Since she's a sequence 4, there should be another test, right?"

Ran Xiaojuan nodded with a smile.

"That won't go wrong, right?"

"Of course not!" Ran Xiaojuan said confidently.

On the other hand, Isabelle was secretly a little worried.

She had always been paying close attention to the experimental project. Although she was an amateur, she was very clear about the effects. Sequence 6 was a dominant gene sequence, the method was to merge the human gene and the mutated gene in the black bear's body. This method would stabilize the black bear's gene activity. When it evolved into a new species, it would also cut off its future growth, moreover, after the modification, even in the Black Goat map, it would be difficult to be affected by the mutated energy.

However, this method was more stable. The safety factor would be very high. Once it succeeded, there would be no hidden dangers in the body. Of course, the black bear's current appearance would not be

the same as it was now. It was most likely a half-human, half-bear subspecies, furthermore, its basic attributes would be much higher than it was now...

On the other hand, the fourth sequence genome was completely different...

After Isabelle nodded and agreed to the final test, ran Xiaojuan excitedly waved at the staff member. The staff member then carefully took out an iron box from afar and opened it to take a look. It was filled with ice-blue syringes...

Ran Xiaojuan took out a syringe and looked at the black bear. The originally cold expression on her face showed excitement, which made the black bear's expression slightly dull...

He rarely saw this woman have any expression. She usually looked cold, but when a cold guy showed such a fanatical expression, it gave people a chill...

Most importantly, the other party was holding a syringe. Looking at the medicinal liquid that would occasionally appear on the syringe, black bear swallowed his saliva and shrank back. "You... What are you doing?"

"Testing..." ran Xiaojuan said with a smile, "Don't be nervous, it won't hurt very much..."

I don't believe you... Black bear subconsciously wanted to run away, but ran Xiaojuan faintly stopped him. "There are so many people watching, what are you afraid of? How can I harm you in front of so many people?"

"Uh..." the black bear paused and muttered, "That's right, but you... Don't show such a scary expression, okay..."

"Cough..." the developers at the back could not help but laugh. To be honest, when they saw ran Xiaojuan's expression when they were doing the experiment, they were a little scared. They felt that she was like the perverted doctor in the movies...

"Shut up! !" Ran Xiaojuan's face darkened, and she directly injected a needle into the main artery of the black bear's neck!

The black bear's entire body stiffened. The injection of the icy-cold medicine was like a strong liquor being poured down his throat. Following that, there was a backlash that was like a raging fire. He could only feel a scorching energy spreading from his heart, and his heart thumped like thunder, an unprecedented force seemed to be about to burst his body!

The surrounding people fell into silence. As they listened to the drum-like heartbeat, they looked at each other in dismay. Following that, they saw the blue veins all over the black bear's body pop up. His expression was ferocious like that of an evil ghost, immediately, all of them could not help but take a step back.

"Hey!" Lieutenant General Ned suddenly could not sit still. He shouted at ran Xiaojuan, "What did you do to Adolf?"

Ran Xiaojuan quickly retreated to the outside of the square. She did not want to bother with Ned's question at all. Instead, she looked excitedly at the black bear's transformation!

Compared to sequence 6, sequence 4 was much less stable. The complexity of the calculation formula and the difficulty were simply incomparable. However, ran Xiaojuan still chose this mode because once this mode succeeded., this would allow the experimenter to have an extremely high limit. During this black goat mutation, he had the hope of becoming an expert even stronger than the general, or even higher!

This 4th gene sequence had another title: The Artificial Druid Project!

Chapter 513: The Artificial Druid Project!

The artificial Druid project was a sequence method that mimicked the elf druid profession. It divided the human genes into dominant and recessive genes. Normally, the recessive genes would be locked with a gene lock, this way, the strength of the two genes would not be lowered due to incompatibility, and they could also grow without interfering with each other. It was a sequence model with a very high limit.

Of course, compared to the traditional druid pattern, there were many flaws. Firstly, he couldn't open the gene lock on his own. He needed to use drugs to stimulate his body, which would cause a certain burden on his body. Secondly, it was difficult for him to accept multiple types of gene evolution like a real druid. This would result in a single evolution.

However, even so, the benefits of this pattern were huge. After all, allowing an ordinary native to possess the druid characteristics of a high-level elf was already a luxury!

On the field, everyone held their breaths and looked at the ferocious-looking black bear in shock. At this moment, the veins on his body were bulging, giving people the feeling that his blood vessels were about to burst, and his aura was extremely fierce, like a beast that was about to go berserk, there were at least a thousand soldiers present, but the wild aura of the black bear made so many people tremble in fear!

Then, they heard a beast-like roar coming out of the black bear's mouth. The sound was deafening. Hans and the others in the front row quickly covered their ears. They felt that their eardrums were hurting from the vibration!

Then, everyone saw that white fur grew out of the black bear's body. Its body also grew bigger, and the bones of its entire body made crackling sounds!

"It's here..."ran Xiaojuan looked at the black bear excitedly.

A few seconds later, with the crackling sounds and the roar of the black bear, the black bear really turned into a huge white bear the size of a small hill under everyone's eyes!

Roar! !

With an intense roar, the wind pressure formed by the roar caused the disabled soldiers in the front row to fall to the ground one after another. The guards at the back took their weapons and stepped forward one after another!

Isabelle also secretly channeled her battle spirit. If the other party could not control her, she would immediately subdue the other party to prevent casualties...

"F \* ck!" Just when everyone was nervous, a glass bottle was placed on the eyes of the huge bear from a distance!

Bang!

As the glass bottle shattered, the huge bear's expression was obviously stunned for a moment. Ran Xiaojuan said fiercely, "You almost deafened my ears. If you continue to roar, do you believe that I will have people drag you into the laboratory and Peel Off Your Skin?"

The giant White Bear's expression obviously twitched when it heard that. Then, it sat down obediently under everyone's stunned expression. A fawning expression appeared on its face!

Everyone: "..."

Isabelle was also stunned. She looked at ran Xiaojuan with a strange expression and said in a low voice, "How did you know that he was conscious?"

"Isn't that obvious?" Ran Xiaojuan rolled her eyes and said, "He kept yelling for a long time but didn't go up and bite anyone. You Can't even tell that he's putting on such an obvious show?"

Isabelle: "..."

Adolf, the black bear, also looked at her with a dry smile. Obviously, it was very awkward that he didn't succeed in putting on a show. Everyone looked at the human-like expression of the giant bear with an extremely strange expression...

Ran Xiaojuan took a glance with the pen and said, "Stand up straight!"

Adolf immediately stood up when he heard that.

"Fifteen meters..." ran Xiaojuan nodded. "Its body size is in line with the expectations, but I don't know how it is in other aspects..."

Just as she was about to test it again, the huge white bear suddenly began to shrink visibly. Then, under the watchful eyes of everyone, it returned to its human form.

"Hey, who told you to change back?" Ran Xiaojuan immediately said angrily.

"I. . ." Adolf said with a weak expression, "I don't know what happened either. I just felt that it was very difficult, and then... I changed back..." as he said that, his legs went weak and he actually collapsed on the ground... ..

The veins on ran Xiaojuan's forehead twitched when she heard that, she directly threw the small notebook in her hand to his face. "I called you a F \* cking Bullsh \* T. Don't you think that it's very impressive? "It's quite cool to be pretentious, but once you get down to business, you wither up, right?" As she said that, she seemed to want to put her size 35 shoe print on the other party's face...

Isabelle quickly stopped him. It was obviously not good for him to beat up a soldier in front of so many people. They could fight slowly when they entered the laboratory...

“Does it consume a lot of stamina?” Isabelle asked the key question.

From the aura of the other party just now, he was already at the peak level of a level-2 creature. It would be difficult for an ordinary silver-tier knight to defeat him, to evolve from a high-level soldier who was not even a bronze-tier knight to the peak level of a silver-tier knight in one go, the effect of this level was far beyond her expectations!

If all the soldiers could have this level of standard, think about it. A group of all-silver knight-level soldiers, if they were to be dragged to the grassland to fight against any tribe, wouldn't it be equal?

It was just that this endurance was somewhat unsatisfactory.

“Of course...” Ran Xiaojuan curled her lips and said, “The fourth gene sequence is an invisible gene. It needs to be activated. Normally, it is automatically locked. Once this gene lock is opened, it will accelerate the consumption of the original metabolism by several times. This time, it will cause a huge burden. Under normal circumstances, it would be difficult to sustain it for long when it is opened for the first time. However, I did not expect it to be so short-lived “... “...”

Adolf's face twitched. Although he didn't understand, as a man, he wasn't convinced by the two women's words. However, he didn't have the strength to refute them...

“How do we improve endurance?” Isabelle asked, “Are there any drugs that can improve endurance?”

“Of course, it's to train the body!” Ran Xiaojuan rolled her eyes. “Relying on drugs is very harmful to the body. Temporary endurance is the price of health in the future. It will cause him to become less and less durable in the future...”

Everyone:” ...”

Although they felt that the two adults were discussing serious matters, for some reason, they felt as if the wheels of a car were pressing on their faces... ...

Isabelle didn't notice the strange gazes of the people around her. Instead, she sank into deep thought before asking in a low voice, “Since this experiment has succeeded, can other people use the fourth sequence in their experiments in the future?”

Obviously, although the fourth sequence would need some time to grow in the beginning, she knew that if this high-potential model could be widely used, it would definitely be able to increase the strength of their forces in the future.

Ran Xiaojuan shook her head. “Everyone's situation is different, and the formula for the experiment is also different. For example, the mutated gene that invaded this silly guy's body is mainly from the bear family, and it will be transformed into what it looks like now. In the future, if you want to strengthen it, you have to use the bear family gene as the main gene and carry out additional strengthening. The genes of the soldiers in the city are very different now. If it's the bear family, I'm very confident, but if it's the genes of other families, that's another matter...” . “...”

Isabelle frowned and asked, “How much potential does this model have in the future?”

“It's huge!” Ran Xiaojuan smiled. “Take this big idiot for example. If we can capture even more powerful bear-type lifeforms in the future, we can extract their genes and continuously strengthen and improve

their second genes. Of course, compared to the elven druids who can absorb the genes of ten thousand beasts, our development will be relatively simple, but the upper limit is definitely very high. Let's put it this way. Sequence 6 has a maximum of three levels, but sequence 4 has almost no upper limit. Although it will be more difficult to evolve in the later stages, there is still hope... "... "..."

Isabelle immediately nodded. This was very important. If there was a constant upper limit, this batch of people would have a chance to keep up with the pace of civilization in the future without being eliminated, she knew very well that this force would not only survive on this planet if it continued to develop. The third stage of civilization was to teach how to develop new planets. At that time, they might encounter other aborigines who were becoming more and more outstanding.

However, if the old people were eliminated every time an outstanding new person appeared, it would cause a great disturbance to the original pyramid of the force, which would also be detrimental to its development.

In the long run, the fourth sequence would definitely be better. However, the error tolerance rate of the fourth sequence was relatively high now. Once a large-scale experiment failed, it could instantly turn the heat that had just been raised back to the freezing point...

"Um..." just as Isabelle was deep in thought, Adolf, who was slumped on the ground, couldn't help but interject weakly, "Sir, can... can you put some pants on first?"

Everyone:"..."

Chapter 514: Parliament

After the public test of the black bear, the developers in the Pu Yunchuan base became busy. The next day, the volunteers who had signed up earlier came to their homes and expressed their desire to apply for the experiment. Other than these disabled soldiers, the black bear's test also attracted some other mutated soldiers.

Some of these people envied the black bear's strength, and some envied the black bear's ability to change its form. After all, for mutated soldiers, it was still very attractive to be able to voluntarily change one's appearance, which was neither human nor beast, although the discrimination against mutated soldiers in the city had decreased a lot since Lady Isabelle took over Gondolin, it did not completely disappear. At least, those children looked at them as if they were monsters. Many soldiers still had some inferiority complex... ..

Until yesterday, when they saw that the black bear had not only restored its human appearance, but also displayed the strength of a beast. This kind of method, which was both practical and could solve the appearance problem, was naturally very attractive to them.

Of course, the majority of people were still waiting and hesitating. Other than the injured and disabled soldiers who came to apply for the experiment, only a few of the braver ones were willing to try.

However, the number of people added up was not small. The next day, ran Xiaojuan registered almost a thousand people. Therefore, in response to the new situation, a few shareholders opened a parliament.

In the Parliament, ran Xiaojuan reported the data to everyone. "As of 10 o'clock this morning, a total of 941 people have signed up to participate in the experiment. Adolf's test results have greatly exceeded expectations. However, due to the lack of assistants, it will take at least three months to complete such a large number of modifications. This does not include the budget for the number of people who will join later. The plan to train scientific researchers must be put on the agenda!"

Isabelle nodded and said, "There are still some alchemists in Gondolin city. I will arrange for them to join your laboratory training. Do you have a plan for the training courses and personnel?"

"The training personnel is recommended by Dr. Kyle in the base. She used to be a professor in the Department of Applied Biology at the University of Houston. She has a lot of teaching experience and experience in leading student project teams. It is the best choice for her to make the training plan at the moment."

Isabelle: "Okay. After that, I will contact her as soon as I visit the alchemists who live in the city. What about Adolf? What is his plan for how to extend the transformation time after that?"

Ran Xiaojuan: "This is the responsibility of Professor Elland from the base. He is not only a biologist, but also served as a consultant for the nutritional experts of the rocket team. He has some experience in this area. These days, he is studying the various cases of bear biology training in the library of civilization, preparing to develop a training plan and a nutrition supplement plan."

"Nutrition Supply Plan?" Isabelle was stunned.

"My Lord... didn't you think of that before?" Ran Xiaojuan curled her lips and said.

"Um..." Isabelle was stunned. She had really forgotten about that. After hearing what ran Xiaojuan said, she immediately realized the seriousness of the problem. ...

As a warrior herself, she naturally knew how great the consumption was. Take the Knight System of their empire as an example. The consumption of knights who cultivated combat aura was more than ten times higher than that of ordinary soldiers, not only did they eat a lot, but they also had a high demand for food. Silver-level knights had to eat a high-quality beef bull every day, and the consumption of empire generals was even greater, if they did not rely on the energy potions developed by the Empire's alchemists, and only relied on ordinary food, a general would eat at least nine cows a day!

Of course, this amount was related to the fact that the empire itself did not have high-level livestock. If they had the level 2 star rhinoceros in the main base, even a level 3 titan like Pu Yunchuan and the others would only need two steaks to satisfy the energy and nutrients needed for a meal!

However, it was obvious that this condition did not exist in Gondolin... ...

The city was already short of food for the winter. How could they possibly have high-nutrition food to feed people like Adolf?

Could it be that they had to use their points to go to the main base to buy it?

When Isabelle thought of this, she frowned. The great lord seer of the main base was a very black-hearted person. She had only come into contact with him twice before she could sense the thick profiteering aura on his body., if she went to look for him now, it was very likely that she would receive a large sum of points.

This was something she did not want to see. Moreover, these points from Pu Yunchuan would be of great use to her later on. The main base was currently constructing its first model city, and there was a huge business opportunity there. If she did not have enough points, it would be very difficult to get a foothold there, moreover, it was not just the main base. Their own small base would also have many uses for money in the future. If they wanted to establish a player base market, they would definitely need a lot of money in the early stages.

If they were to use this time to nurture warriors, it would be very disadvantageous to the later stages. This was because in the short term, there might be hundreds of artificial druid warriors like the black bear appearing... .. The price to satisfy these people's nutritional needs was not small... ..

She suddenly felt a little envious of the faction of her ancestors. They definitely did not need to worry about food there... ..

"Let me think about this for a day..."Isabelle sighed.

"What's there to think about?"Ran Xiaojuan was anxious. In her opinion, the training plans and parameters of black bear and the others were of great significance to the future research process. The matter was imminent, so why were you hesitating... ..

Isabelle looked at the almost cannibalistic expression and felt a little helpless, but she could more or less understand it in her heart. In the past, when she was the city lord of Red Dragon City, those alchemists were like this., when they saw you hesitate when asking for funds, they wanted to push your head to the ground.

Because they only cared about the progress of scientific research, after being stuck with the funds, they would often vent their anxiety on the people who allocated the funds, thinking that they were wasting their time. If My project was successful, there would be a lot of money to repay you! Hesitate for a hammer, quickly give the money!

However, it was not that they, the financial backers, did not want to give them the money, but that they had more things to consider... ..

"I'll give you an answer tomorrow..."Isabelle smart braced herself and insisted.

Ran Xiaojuan immediately had an unfriendly look on her face. Just as she was about to persuade them, she was stopped by Su Yunchang with a wry smile, "It's only a day's time. There's no need to be so anxious, right?"

"HMPH!"Ran Xiaojuan was immediately displeased. "You people who engage in politics just don't know how precious time is. You're always dragging things out. You're reincarnated as Mops from your past lives, right?"

Isabelle:"..."

The two of them listened to Ran Xiaojuan's complaints helplessly. It was not until noon that Isabelle interrupted the topic. "Let's discuss the type of experimental project first, shall we?"

Ran Xiaojuan glared at the other party. Although she was irritated, she could not help but feel helpless. Who asked Pu Yunchuan to have all the points in the current team?

Although Ran Xiaojuan was a big shot developer in the past, she did not participate in many missions and did not have many personal points. She could not help but sigh that a penny could not defeat a hero... ..

Seeing that the other party had stopped, Isabelle quickly continued, "Do you have any thoughts on which sequence to use in the current base?"

"Is there a need to hesitate?" Ran Xiaojuan hurriedly said, "Use number four. There are already successful cases, why use other ones?"

As a research maniac, she was naturally more enthusiastic about number four, who had the ability to continue developing and had high technological content. Number Six was rather worthless in her eyes... ..

"But you said before that the genetic problems of number four are different, and the success rate is only half..." Isabelle frowned.

Now that the black bear's example had just ignited a wave of enthusiasm, it would be troublesome if the fire was extinguished because there were too many examples of failure.

"Did I say that?" Ran Xiaojuan asked innocently.

Isabelle and Su Yunchang immediately rolled their eyes. This kind of Scoundrel's attitude was exactly the same as many mages.

Isabelle covered her head and finally said, "Forget it. Since that's the case, let's publicize the pros and cons of both experiments and let the volunteers choose for themselves!"

Hearing that, everyone was stunned and thought to themselves, is this a good idea?

Chapter 515: Difficult Questions

On the afternoon of the end of the meeting, the citizens of the city received an announcement regarding the experiment. This announcement immediately caused everyone to start discussing again.

The announcement said that there were two types of experiments. The first type was just like what the black bear had demonstrated. Once it was successful, the mutated soldier would be able to freely control the changes in his or her body. He or she would be able to hide the parts of his or her body that were mutated and appear in front of others in a normal human form, furthermore, through the control of his beast form, he would be able to obtain strength that was comparable to that of the Silver Knight!

However, the disadvantage was that this type of experiment had a low tolerance for mistakes. The success rate was only 50%. Once the experiment failed, the experimenter would very likely die. It was very risky. Therefore, if he wanted to be like the black bear, he would have to consider it carefully.

The second type of experiment was more stable. The success rate was as high as 90% . It could basically guarantee the survival rate. After the experiment was successful, the strength of the body would also be greatly increased. At the very least, it would be at the level of a Silver Knight. However, the disadvantage was also very obvious. Firstly, it could not change freely like the black bear. Its body would still remain in the state of half-human and half-beast. Moreover, the improvement would be very small in the future. It would not be able to become a powerful general like black star...

When this news was released, everyone was shocked by this information. The first person who felt the most was the black bear itself. In their hearts, they could not help but think to themselves, 'Ge Lao Zi, so I actually took such a big risk before?'

'speaking of which, why didn't I have any options when I did the experiment??' 'what the Hell Is This?'

Although the result was good, when black bear thought about how he almost died, he felt a chill in his heart. He thought to himself, 'it must have been that cold-blooded woman who acted on her own initiative. Fortunately, I have a hard life...'. ...

However, after the fear came a pleasant surprise. 'So I actually have a chance to become a general-level expert?'

At the thought of this, black bear could not help but feel excited. He looked forward to the strengthening exercise in the laboratory even more.

After Black Bear was gone, he would be one of those disabled soldiers. Initially, he thought that he would be like black bear, with a body full of Man-like muscles and a healthy body. There was even hope for him to return to his human appearance. However, he did not expect that he would have to take a risk... ..

For a moment, they were caught in a dilemma. They were hesitating whether they should choose the safer one or the other one with a better life in the future?

At the end of the day, such a choice was not easy. If they could live, no one would be willing to risk their lives. However, the rewards after the adventure were indeed very tempting...

Hence, a group of people gathered outside the black bear tent to discuss.

Soldier a: "I knew it. How can there be such a good thing? To be able to recover the human body and become so powerful, so there is a risk..."

Soldier b: "That's right. To be honest, if there isn't a second option, even if there is only half a chance, those of us who are already crippled will definitely try it. After all, there is no point in living now, right??" But now that they had a choice, they were very conflicted... :"

Soldier C: "Have you all thought about it? Which one do you want to choose?"

The moment this topic was brought up, all the soldiers instantly fell silent. If they had already thought about this question, why did they come here. They had already gone to report it... ..

Soldier a: "According to my own thoughts, I want to choose the first option. You've all heard about it. If the first option succeeds, not only will you be able to return to your human form, you'll also have a chance to become a general. To be honest, if there's such a chance, those knights' grandfathers in the past might not even be able to exchange their lives for it!"

Once these words were said, the surrounding soldiers all nodded their heads. There were only a few dozen general in the empire. There were so many knights graduating from the academy every year, and there might not even be one in ten years. This kind of opportunity was indeed not something that anyone could have.

"Then you want to choose the first option?" A companion beside him asked.

"I actually think so..." soldier a scratched his head, then lowered his head and sighed. "But that woman of mine spent the entire night crying with her baby, and she refused to let me choose the first option no matter what..."

The surrounding soldiers were stunned when they heard that, and then they looked at each other. Most of the soldiers in the new camp had families in the city, and some even had parents who were still alive, under such circumstances, the other party was naturally unwilling to let the pillar of the family take the risk.

Black Bear looked at the other party and sighed in his heart. But how could a soldier not take the risk?

Just as he was thinking, a soldier suddenly looked at black bear curiously and said, "Brother, what were you thinking at that time?"

What the hell was I thinking... "...". Black bear secretly rolled his eyes. He didn't even have the chance to choose, alright?

However, he naturally couldn't say that on the surface, instead, he said with a serious expression, "I didn't think too much at that time. After all, I'm a single person and don't have that many worries. In My Heart, I thought that there was a 90% and 50% chance of failure, so I might as well gamble a little more..."

"You're a good man!" Everyone praised him.

Black bear nodded and laughed foolishly, but then he said, "However, your situations are different, so you don't have to imitate me. Actually, the second plan is quite good. We've been monsters for so long anyway, so we'll get used to it after seeing it..."

Everyone rolled their eyes when they heard that. They thought to themselves, 'you're so good at making sarcastic remarks now. If you really don't care, why do you want to Bet Your Life on it?'

Black bear saw that the crowd did not agree and did not continue to persuade him. After all, this was a major event in life. If he said too much, it would not be good. If it really affected them, then they would regret choosing to blame him. He could not bear the responsibility...

So in this atmosphere, a group of people with the future of confusion, until late into the night... . .

-----

Early the next morning Ran Xiaojuan went into Isabel's office with the application list of volunteers. . .

"All of them answered, 305 out of 941 chose the fourth gene sequence, and the rest chose the second..."

Isabel was not surprised by this result. Although she emphasized the possibility of becoming a general in the future on the option of Gene Sequence 4, it was only a chance. She believed that the smarter soldiers would naturally be able to understand this term.

Compared to this, the cost-benefit ratio of safety was indeed much higher than the one that seemed to have an empty future... ..

Of course, she was rather satisfied with this result. After all, the higher the number of people who chose the second option, the higher the success rate of the experiment. Reducing the number of failed cases would also be beneficial for the promotion in the future...

Looking at Isabelle's somewhat relaxed expression, Ran Xiaojuan curled her lips and said, "Even if there are more people who chose the sixth sequence, the food supply can not be reduced. The consumption of the genetic warriors of the first two sequences is about the same. Furthermore, since the sixth sequence didn't suppress the amount of genetic food it consumed, it would be even greater..." "..."

"Ah, I know..." hearing this, Isabelle shook her head with a bitter smile. She had said that she would consider it for a day, yet this guy had come the next day at the exact same time. Clearly, he didn't want her to continue delaying for even a second.

"Do you have a plan about the Warriors' food list? I can import it..."

Ran Xiaojuan saw that the other party didn't delay any longer, and her stern face immediately relaxed a lot, she hurriedly said, "It's best to have fresh food, high-quality meat, grains, and vegetables. I have consulted the nutrition ingredients of the plants in the general base. You just need to buy more of these things according to my list."

"It must be fresh food. Can't you use nutrient fluids?" Isabelle frowned.

"No...". Ran Xiaojuan shook her head and said, "Although nutrient fluids can also meet energy requirements, it's too easy to absorb and will cause the stomach to become dependent on it. Our soldiers are in a high-speed evolution period after the surgery. During this period, the stomach should start to exercise as soon as possible to digest the high-energy food. Otherwise, it will be difficult to correct the habit of relying on nutrient fluids later on ... ..

Isabelle pursed her lips. The reason was very reasonable, but this sentence had increased the budget by at least five times. Due to the scarcity of land and farmers, the dog players in the base were now making food extremely expensive. It was not worth it to buy food at the peak price now... ..

The only thing that could be discussed about the price was the small cabbages that had a large amount of land to grow. However, she actually did not want to deal with them because she did not really want her ancestor to know the truth about her power...

Moreover, she was sure that if she asked for the price, her ancestor would definitely take advantage of her...

## Chapter 516: I Knew It!

The development of the little cabbage faction could be said to be flourishing these days. As the only level 5 flower spirit in the base, the speed at which the big elves were nurtured was not something that the average player faction could compare to, now, as long as the research staff of the base developed a fusion carrier for the elemental elves, the base would soon be able to produce a level 2 elf body that surpassed the level of the Big Elves!

At that time, the various processes in the cabbage faction would begin to take off, and the products in the base would be far ahead of the others!

Of course, even now, the quality of the crops in her base was far higher than that of ordinary players. With so many earth elves, the quality of the soil in her base had already begun to surpass the quality of the farmland allocated to many players by the main base, Seer, the quality of the crops she produced was obviously a notch higher.

Moreover, she had a large lead in the production of magic plants. Currently, the headquarters' experimental research on magic plants was all based on samples from the cabbage tribe, up until now, she was also the only one who had started to realize the profit model of earning money from the headquarters.

On this day, cabbage, who had already learned to control the mind power switch, was leisurely strolling around her farmland. Looking at the piles of crops that were growing extremely well, a gratified smile appeared on cabbage's face like that of an old farmer.

Wang Goudan had already discussed with the little fairy. When the main base city was completed, they would work together to contract a large number of shops. They would provide the ingredients themselves, while they would open a chain of restaurants and try their best to monopolize a restaurant project in the business district, when that time came, a steady stream of player points would pour into their pockets!

Thinking of this, little cabbage immediately grinned.

As for her competitors, little cabbage was not worried at all. Right now, she was the only player in the base who could grow a level 3 magic plant. When the time came, no one would be able to compete with her for high-end dishes. As for low-end food, she had plenty of land., she could definitely make a small profit but sell more. According to Dogdad's analysis, she would not have any opponents in this aspect for a long period of time in the future!

It seemed that she was getting closer and closer to the little rich lady's goal. hehehe...

While laughing foolishly, the little white deer suddenly ran over in a hurry. It panted and said, "Chief, a human woman has come to visit you..."

Little cabbage looked at the panting Ruth and frowned slightly. He thought to himself, this little fellow's body is still too weak. I have to think of a way to take good care of her...

As a weak level 0 deer human, Ruth had grown very quickly in the past few days. However, she couldn't help it. She was born with a weak gene. Even though she was eating the high-quality fruits in the base, she was still unable to fully absorb them. However, her digestive ability was so weak that she couldn't even completely absorb them...

"Did the visitor sign up?" Bai Cai asked.

She thought to herself, "A human woman?" Wang Goudan's brother and Yunji were the only ones who looked like humans in the base. However, they heard that Yunji went to the Kunlun martial arts competition and didn't come back. Wang Goudan and his brother were guarding Kunlun.

She didn't even come to discuss business with him. He couldn't help but look for them...

"Yes, she said her name is Isabelle..."

"ER... her..." little cabbage suddenly thought of the western woman who liked to wear white...

Indeed, besides Yunji, she should be the most human-like. It was said that she hadn't chosen her own gene yet...

However, she wasn't surprised by her arrival, because Alice seemed to have specifically warned her before she left... . .

"Invite her in..."

"Yes, my Lord!"

-----

Ruth took Isabelle all the way to the cabbages, and Isabelle took a deep breath as she looked at what was before her.

Although I have heard that there are a lot of leading base players, but when it really looked or was a little shocked.

Along the way, there were fertile farmland everywhere, and all kinds of elemental elves danced in the sky. It was as if she could catch a handful of them with just a casual grab as if they were free... ..

Under the nurturing of these elves, the entire tribe was full of vitality. In the middle of winter, the farmland was filled with the color of harvest, and there were high-quality crops everywhere. The sweet aroma of farm plants made her feel slightly intoxicated.

Along the way, she would occasionally see a team of orc soldiers wearing extravagant and mighty armor, training in the open space. The quality of these orcs was far beyond her imagination, she felt that any one of them would be an elite orc of the gold tribe!

This was probably not only sufficient nutrition, but the elemental breathing technique had also played a great role!

Seeing this, Isabelle could not help but sigh. Alice had really found a good starting point... ..

It seemed that her ancestor had never lacked a good boss. The second-generation emperor of the Steelwood Empire, the mysterious undead Lord, and now this little cabbage...

Just as she was thinking about this, the petite deer man beside her said softly, "Dear Guest, the chief's tent is right in front..."

Hearing this, Isabelle nodded and slowly walked in under the other party's guidance.

As soon as she entered, she felt a wave of warm air assaulting her. This feeling was similar to the hot air-conditioning in Pu Yunchuan's house, but it was more refreshing and natural. It did not have the dull feeling of the air-conditioning, and it also did not feel dry...

With just a glance, Isabelle knew that the other party had used the fire essence to create the greenhouse effect. She could not help but exclaim, "What a luxury..."

"Hey, long time no see!" In the tent, cabbage looked at him and smiled.

Hearing this, Isabelle smiled and replied, "Yes, I should have come to visit you long ago..."

She did not expect Alice to be able to catch such a treasure when she was forced into a desperate situation. She had to say that her ancestors never lacked luck... ..

"Are you here to buy food?" Little cabbage said with a smile.

Isabelle's smile froze when she heard that. She thought to herself, as expected... ..

Then, she sat down cross-legged helplessly. "Did Alice tell you that I would come?"

"Yes!" Little cabbage smiled even more happily...

Looking at the other party's silly smile, Isabelle felt even more helpless. She had actually expected such an outcome, so if she had a choice, she really didn't want to come here, but there was nothing she could do.., those base dog players had overpriced the market!

Right now, a bag of black crystal rice was selling for 20 points. According to the market price, Pu Yunchuan's points would not last for half a year even if he used them all to buy food... ..

"We can give you a discount. We can sell it to you at a 10% discount on the market. Moreover, we have more varieties. If it is not available on the market, the price can also be negotiated. As for the quantity, you can rest assured that the food I have stored here will be able to support you for three years in the entire Gondolin!" Little cabbage said with a smile.

Faced with such a great discount, Isabelle could not smile at all. Instead, she asked faintly, "What are Alice's conditions?"

Isabelle could not smile, but little cabbage smiled abnormally happily. He narrowed his eyes and said, "We want to enter your market in Gondor..."

Isabelle immediately sighed, "I knew it..."

Chapter 517: Act Cute when things don't go your way

In the blueprint that Isabelle designed for Pu Yunchuan, once the station was opened, their forces would have the largest temporary market, and they could earn a large number of player points for quests through replenishment.

And because of the transportation costs, it was generally impossible for ordinary players to compete with them in Gondolin, unless they used their technological advantages to create some special products. But that was a small market after all!

However, Isabelle would definitely not let little cabbage and the others in.

The main reason was that little cabbage was too far ahead. The food products that were higher than all the players' levels and the huge amount of logistics could completely offset the transportation costs.

Isabelle looked at little cabbage and shook her head slowly. She could accept any conditions, but not this. Even if she went to the unscrupulous Lord to borrow money to buy food.., she would not create the biggest competitor for herself in the future just because of the small profits in front of her.

Little cabbage seemed to have expected this. Alice had already calculated the other party's attitude. Although she was confused when she left, the other party had written down the steps of the negotiation for her in the form of a silk purse.

Therefore, following the steps, little cabbage continued to bargain, "Don't be in a hurry to refuse. How about this, we can provide free food..."

Hearing this, Isabelle still shook her head. Free sounded tempting, but it was actually the same. It was just adding some weight, and this weight was nothing compared to the benefits in the future...

She directly said, "We are all familiar with each other, so there's no need to waste time. Just tell me the bottom line Alice set for you..."

Bai Cai could not help but smile awkwardly. In fact, Alice had already told her the real transaction details in her letter. She just wanted to see if she could do it better, but obviously... She was indeed not a character who could scare people...

"We only want a part of the market, like food, medicine, accommodation, and even some supplies for daily necessities. We can not touch any of them. How about we only touch weapons and defensive equipment?"

Weapons and defensive equipment?

Hearing this, Isabelle pondered for a moment and instantly understood what Alice was thinking. However, even if it was just weapons and defensive equipment, this market was still very large. When players came to participate in quests, they would most likely bring some subordinates with them, after all, the energy of the map of the Black Goat was not only useful to players. As long as one had some genetic technology, the soldiers under the players' hands would also be useful. Ran Xiaojuan, who was in her own faction, had already told her this point, even if the other players did not choose the Zu'an civilization, as long as there was genetic technology in the civilization technology tree, they could more or less use it.

If that was the case, the wear and tear on the weapons would be very large. Isabelle had already tested it on the way to Gondolin with Pu Yunchuan. After the evolution of those mutated creatures and plants, their shells were much stronger than before, the wear and tear on the weapons during a fight was much more exaggerated than when fighting with the orcs. Moreover, the mutated energy seemed to have a certain effect on the iron itself, causing the equipment to be consumed even more.

If the players came with their underlings, they would naturally not teleport frequently to increase the cost. Then, the consumption of food supplies and equipment would be huge. Not to mention buying weapons, there would be a huge profit in repairing weapons... ..

If it was possible, Isabelle also did not want to let go of this market... .. But...

Although the civilization chosen by Pu Yunchuan's faction could maximize the use of the map of the Black Goat, it was a weakness when it came to weapon evolution!

Every loss has its gain. A large amount of energy was spent on the biological genes, so in terms of external weapons, it naturally could not be compared to other civilizations. Even if they had the geographical advantage..., in the future competition, it would be very difficult for them to gain an advantage over other players.

One had to admit that their ancestor had really studied them to death. The market they wanted was like chicken ribs to them. It would be a pity if they were tasteless and abandoned. It would be the best for them to use it as a trade...

Little cabbage saw that the other party did not reject immediately and immediately heaved a sigh of relief. Alice had repeatedly emphasized in the letter that this market had to be taken down. She was afraid that the other party would be so stubborn that he would not even discuss it...

Isabelle looked at the other party and said faintly, "This market is very big. What Price Do you plan to pay? Just some free food won't do!"

She understood in her heart that although this market was of little value to them, it was completely different for little cabbage and the other factions!

Currently, the weapons and equipment of the little cabbage faction were completely ahead of the market. In the main base, other than the panda man who had mastered runic technology and could only fight a handful of high-quality items a month..., almost no one could surpass the cabbage patch faction in this aspect in a short period of time. Once the players realized the benefits of forging weapons, their market would rapidly expand, the reason why there were still no players buying their weapons in large numbers was because word of mouth had yet to spread. After all, there were very few players in the base who could come into contact with combat right now.

However, once the missions in the mutated zone began to be released in large numbers, the players would quickly realize the benefits of those high-quality weapons in the cabbages. At that time, once word of mouth spread, the market would not only refer to Gondorin alone, once the brand was released, it would probably sell like hot cakes in the base in the future!

And their Gondorin was just a springboard for them... ..

It had to be said that her ancestor was not only a military genius, she was also extremely talented in business strategy. Having such an elder was still a little stressful for her...

Little cabbage looked at her and could not help but feel a headache. This woman was just as Alice had said, very shrewd... ..

Indeed, just as the other party had expected, Alice indeed wanted to use Gondorin as a temporary base to create her own brand of weapons and equipment, thus further expanding the market!

The advantage of their wood elf civilization was the cultivation of elemental elves. Apart from the cultivation of food crops and magical beasts, weapons and equipment were also a big part of it. Of course, long-range firearms definitely could not compare to the mechanical civilization. However, in the field of cold weapons, they had a great advantage. High-quality runic equipment equipped with their own unique breathing technique, as long as they operated well, they could monopolize the market for a long time in the future...

Looking at Isabelle's blue eyes, little cabbage had a feeling that he was completely seen through. He did not know how to continue the conversation, so he quietly took out the last brocade pouch that Alice left behind...

After quietly opening the brocade pouch, little cabbage was stunned for a moment. His entire face suddenly twitched. On the note was written: "When in doubt, act cute..."

What the... ? ... What kind of stupid idea is this? I am the Lord of a region, the chief of the little cabbage tribe. You Want Me to act cute?

After hesitating for almost a second, little cabbage showed a puppy-like expression without hesitation. "We have already provided food for free. What else do you want?"

As a flower spirit, she had a strong affinity with natural creatures. The moment little cabbage showed this expression, Isabelle was stunned. She actually felt a trace of unbearable feeling in her heart, then, she quickly shook her head and thought to herself, what's going on?

Suppressing the inexplicable pity in her heart, Isabelle gritted her teeth and said, "You're also going to provide us with free high-quality equipment! !"

"Ah?" Little cabbage immediately pouted and lay on the ground. She simply rolled on the ground and said, "How can you bully people like this?"

This appearance, coupled with the flower spirit's appearance and characteristics, really made her look like a cute pet that was acting cute. Isabelle suddenly had the illusion that she had really bullied her... ..

Although she had been through a lot, she had never encountered such a pattern before. She actually started to panic for some reason... ..

Chapter 518: Return

The outcome of the negotiations remained unchanged. According to Isabelle's insistence, the agreement reached between the two sides was still concluded with Isabelle's exorbitant demands.

The cabbages were in charge of the more than 20,000 sets of armor and 100 sets of runic weapons custom-made by the current Gondolin soldiers. They provided a fixed amount of food for free until the Gondolin passed its difficult period, they would also provide 10 great elf-level great elemental elves!

Meanwhile, Pu Yunchuan allowed little cabbage to enter the weapons and equipment market of Gondolin. They would provide the best shops with the best geographical location and receive a 30% discount from the market price. Of course, they would have to pay full tax!

All the conditions seemed to be very unequal. Little cabbage's cuteness did not falter at all. This made little cabbage rather depressed.

But in order to promote her own brand, she had to sign this agreement in the end. Before she left, Isabelle looked at little cabbage, who was somewhat depressed, and hesitated for a moment, in the end, she said, "I saw you take out a note from a brocade bag just now..."

Little cabbage heard this and looked up at the other party, thinking to herself, could it be that she saw the words on the note? I see, I was wondering how anyone could resist this chief's act of cuteness?

Isabelle looked at her, she said earnestly, "My great-grandmother, don't think that she's serious just because she usually seems serious. In fact, there are many times when it's meaningless for her to ask you to do strange things. It's just a simple prank..." . "..."

Upon hearing this, little cabbage's expression froze...

Looking at little cabbage's expression, Isabelle sighed in her heart. Suddenly, she had a feeling that they were in the same boat. Back then, her great-grandmother had done something like this when she was grooming her... At that time, she thought that her ancestor, who had calculated everything meticulously, had some deep meaning. When she finally found out that she was just a prank, she was actually very speechless...

I don't understand how Alice's life, from slave to imperial legend, through so many ups and downs, through so many cruel things, could develop such a black-bellied character... . .

-----

After signing the contract, Isabelle got a large amount of food as she wished, but because of the limited space in the cages, she had to rent more cages, and the system prompted her when she was transported, from now on, the teleportation fee would be activated. The price of the teleportation fee was related to the weight of the teleportation and the size of the energy itself.

Upon hearing this news, Isabelle immediately frowned. The weapons and equipment made by little cabbage were not in place yet. After all, many soldiers on her side had not undergone modification surgery, so the size of the data was not clear.., they could not tailor-make it, but if they did, the teleportation fee would probably be a huge sum.

With the spatial cage, Isabelle borrowed two Gardo beasts from little cabbage. Then, she carried the calculated food and teleported back.

As soon as she returned to Gondorin, she heard from her subordinates that Pu Yunchuan and the others had returned and were waiting for him in the living room. Upon hearing this, Isabelle did not even bother with the two Gardo Beasts and hurried over.

Pu Yunchuan's exploration mission this time had been meticulously calculated by her. The degree of mutation in the black stone forest was not high, and the area of the forest was not large. As long as one did not get lost, it would only take four hours to cross the forest, after passing through the black stone forest, there were narrow black stone paths. That location was the same as Gondor Forest. The ecological environment was not good, and there were rocks everywhere, so the possibility of attracting mutated creatures was very low.

After passing through the black stone path, the plains had already left the Black Goat's map. With Pu Yunchuan's strength, whether it was the monsters in the black stone forest or the royal family of the Black Stone tribe on the plains., they should not pose much of a threat to him. Even if he could not protect the soldiers, the probability of him getting into trouble should be very small.

However, this was only a calculation. It would be a lie to say that Isabelle was not worried at all... ..

After walking into the living room, Isabelle saw Pu Yunchuan and his group. According to the rules of the steel martial empire, soldiers were left and mages were right. She noticed that Pu Yunchuan was currently sitting on the first seat on the left, meanwhile, Wesker, who had the highest reputation in the army, was now sitting on the second seat.

Upon seeing this, Isabelle's eyes lit up. It seemed that Pu Yunchuan had completed his mission very well during this three-month trip... ..

In fact, she did not expect Pu Yunchuan to bring back many resources and intelligence. As long as she could get recognition from the army, her goal would be achieved... ..

Isabelle strode into the hall and sat down on the seat of the city Lord as usual. She looked at the travel-worn Pu Yunchuan and smiled gently, "Thank you for your hard work..."

Pu Yunchuan chuckled and said, "It's not hard, it's not hard at all..."

"Tell me, what's the situation outside?" Isabelle looked at Wesker and asked with a smile.

Wesker quickly said, "Sir, as you expected, the mutation level of the black stone forest is not high. Moreover, the closer we go to the black stone path, the lower the degree of mutation. The surrounding grass and plants have also started to return to normal. Relying on Sir Yunchuan's power, we did not suffer many casualties after passing through the stone forest..." "..."

As soon as these words were said, Pu Yunchuan immediately straightened his back, while Isabelle directly rolled her eyes at him.

Seeing this small action, Wesker thought to himself, "As expected, the rumors are true..."

He wasn't as brainless as Millen. After knowing Pu Yunchuan's strength, he instantly realized that Pu Yunchuan's position in Sir Isabelle's place should be extremely high, and Isabelle wanted him to follow the army so that he could take over the position.

After understanding his boss's thoughts, Wesker consciously gave up his position and secretly helped Pu Yunchuan build up his prestige. The current Expeditionary Army had a very high degree of recognition for Pu Yunchuan.

This tactful performance made Isabelle quite satisfied.

"What about outside the stone forest? What's the situation?" Isabelle asked the main topic.

"It's very chaotic...". Wesker said solemnly, "According to the intelligence, the orc city seems to have suffered a large-scale mutation this time. Many of the tribes there escaped. I heard that a large portion escaped to the Kaiser Plains, and many tribes also fled to the Blackrock Plains. There are quite a number of foreign orcs, causing the originally not very rich resources of the Blackrock Forest to become extremely tight. The fighting became more intense, and the situation was very chaotic!"

Isabelle nodded. Everything was within her expectations. Although the Blackrock Plains was one of the three great golden lands in the north, the fertile land was far from the other two, therefore, for thousands of years, only the Blackrock tribe and the Dragon Roar tribe were born here. Moreover, other than the fertile land, the other areas of the Blackrock Forest were actually relatively barren.

In such a situation, it was naturally difficult to accommodate so many refugees. Fighting was inevitable...

...

"I heard from the guards that you brought back thousands of orcs and so many cows and sheep. What did you do there?" Isabelle asked.

Wesker laughed dryly. Bringing back cows and sheep was to bring back supplies. Many people in the city were puzzled... ..

"It all started from the day we walked out of the Black Stone Path..."

Chapter 519: entering the Blackrock Forest for the first time...

That day, Pu Yunchuan and his group decided to continue the exploration mission. The next day, they said goodbye to Mirren and his group and set off on their journey.

After entering the Blackrock Forest, it was not as dangerous as they had imagined. Along the way, they had encountered very few mutated creatures. At most, they had seen some mutated plants. Moreover, the danger level was not very high.

Therefore, according to Pu Yunchuan's analysis, the mutated monsters they had encountered outside the forest should already be at the top of the food in the black stone forest. And because of its existence, many creatures had left this place.

Before coming here, the developers in the base had also analyzed it for him. Because of the explosion of the Black Goat map, many places' ecosystems would be broken. It was very likely that a place would be occupied by a creature!

It was very obvious that Pu Yunchuan and the others had encountered such a situation. As a result, they could not see any larger carnivorous creatures throughout the forest. It was no wonder that the creature would hunt outside the forest...

On the other hand, Pu Yunchuan and the others had attracted a lot of larger piranhas while they were bathing. At that time, they were so scared that they ran around naked. After that, Pu Yunchuan's suggestion to catch some fresh fish was decisively rejected by everyone.

The Blackrock Forest was not big. The few of them walked out of the forest and headed towards the Blackrock Trail before the sky turned dark. Then, they encountered the first unexpected thing... ..

That was the first barrier that the Blackrock Plains faced against the humans: the Blackrock Trail checkpoint had been abandoned... ..

The Blackrock tribe, which had the strongest witch doctor inheritance, was originally the biggest force in the Blackrock Plains. As the strongest tribe in this position, they enjoyed the most resources while also shouldering the heavy responsibility of defending against the humans.

As a result, the Blackrock tribe spent a lot of manpower to set up a checkpoint camp at the entrance of the Blackrock path. They also stationed troops there, using the narrow terrain here as a military defense and early warning.

Firstly, because of the terrain, this place was very difficult to break through. Once the human invaders were discovered, they would use smoke or flying birds to inform the rear, then, it would be convenient for the Blackrock tribe's higher-ups to organize other small and medium-sized tribes to defend against the human invasion!

Wesker was very familiar with this model. He had spent almost his entire military career in the seven cities in the northwest, and this generation of Emperor Jiawen was also a king who was good at conquering, over the years, he had accompanied many generals to attack the Blackstone Plains. Every time he came here, the first thing he did was to calculate how to seize this place at lightning speed, so that the Blackstone tribe would not have time to organize defense!

In history, there were not many people who could do this. There were only three people in total. They were Marshal Rox, the Red Dragon Duke, Lady Isabelle, and one of the ten great legends of the Empire's golden generation, Lady Alice!

Wesker did not know if his group could take down the Blackrock path quickly. However, Lady Isabelle had also said before they came that there was a high possibility of internal strife happening in the Blackrock Plains, the garrison on the Blackrock path might not be as strict as before. Their first mission was to test the authenticity of this conjecture.

If this place was still the same as before, Pu Yunchuan and his group would quickly retreat back to Gondolin...

That night, Wesker had a group of officers discuss tactics with Pu Yunchuan. In the end, they decided that Pu Yunchuan would lead the group and organize the ape-like mutant soldiers who were good at climbing to carry out a lightning raid...

If the gate in the Blackrock path was successfully opened, the signal would be sent out, and Wesker would lead the team to launch a general attack. However, when Pu Yunchuan led the team to break in the next day, they found that the Blackrock camp had no resistance at all... Only a few veterans who were starving to death...

After the interrogation, they found out that just as Isabelle had said, there was a huge internal disturbance in the Blackrock Plains. It was said that because of this huge change, the five gold tribes in the Ogle Plains had left one after another, two of them had come to the Blackrock Plains, and with the addition of the middle-and high-level tribes from outside, the situation in the plains was very intense. Almost three months after the change, the garrison troops here received the call from the higher-ups of the Blackrock Plains and withdrew!

Those who stayed were all veterans who had no connections. According to these veterans, the supplies here had been cut off since the fifth month. They had sent letters to the higher-ups, but there was no reply... ..

It seemed like something big had happened in the tribe!

Faced with such a situation, Pu Yunchuan asked curiously, "Then why didn't you guys escape?"

At this moment, Pu Yunchuan had removed his makeup to make it easier for the battle. He had displayed the posture of a Green Titan, while the soldiers around him were basically mutated. They looked more like subspecies than humans.., in addition, Pu Yunchuan was proficient in the tribal beast language, so the veterans here did not have much resistance. They thought that they were also tribes that had fled from the outside world.

Hence, they told the situation with a bitter smile...

The Blackstone tribe was a rare tribe with a witch doctor culture. The ones who held great power within the tribe were all high-level witch doctors. These witch doctors were good at not only healing but also witchcraft that harmed people. On the prairie.., they were an existence that even brave warriors feared.

In the Blackrock tribe, these warriors were also afraid of the witch doctors of the upper echelons. Once they were caught as deserters, they would face a GU type that was even more terrifying than death. It was said that after being tortured by a Gu.., the beastmen would suffer so much that their souls could not be freed. Sometimes, they would even be created into terrifying gu men!

Under such terrifying oppression, these veterans would rather starve to death than try to become deserters...

Witchcraft?

When Pu Yunchuan heard this, he immediately thought of some old horror movies related to Hong Kong Island and Thailand on the internet, using some inexplicable rituals. Then, worms could grow out of the bellies and heads of people thousands of miles away...

F \* cking creepy...

Therefore, Pu Yunchuan curiously asked Wesker and the others about this.

Wesker heard him and said solemnly, "The witch doctor in the Blackrock tribe is indeed mysterious. Sometimes, people don't even know when they were poisoned, but it's definitely not as mysterious as the outside world thinks. Usually, they use water, food, air, and other factors to make you fall for it, and usually only the witch doctor can operate it from nearby..." "..."

Pu Yunchuan heaved a sigh of relief and thought to himself, "It's good that it's not that strange..." "..." . Then, he asked, "Since there are no defenses here, should we continue to explore?"

As soon as he said this, the surrounding generals started to hesitate. With less than 1,000 people, it would be quite dangerous for them to wander around the Beast Clan's headquarters...

However, this was a rare opportunity. Just as Lady Isabelle had said, the orcs were in a large-scale civil war. This was a great opportunity to fish in troubled waters. If they missed this opportunity, it would be very difficult to have such an opportunity in the future...

Therefore, after discussing for an entire afternoon, everyone finally felt that they should regroup and continue their journey. However, once they reached the Blackstone Plains, their future was a problem.

Just as they were hesitating, Pu Yunchuan suddenly came up with an idea...

Chapter 520: Destruction (Part One)

"You mean, we should go to the Blackstone Tribe?" Everyone was stunned by Pu Yunchuan's idea. ...

"Is that possible?" The officers were stunned.

"I think there's still hope..." Pu Yunchuan spread his hands, he pointed at himself and said, "Look at us. Who dares to say that we're not orcs? Didn't those veterans not recognize us?"

"Uh... this..." everyone was stunned when they heard that. Then, they looked at their half-human and half-beast appearance and fell into silence.

After Pu Yunchuan said that, they felt... ... that seemed to be the case. Those orc veterans didn't think of them as humans at first glance... ...

When they thought of this, everyone's mood instantly darkened. No wonder they were ostracized in the past. It turned out that they didn't look any different from orcs...

Pu Yunchuan did not feel the gloomy atmosphere from everyone. In the past, when he was infatuated with RPG games, the characters he chose were all tall orcs. He did not feel the slightest bit of conflict...

Wesker sighed and calmed himself down. He then replied, "In that case, it's actually a good idea. We'll join the Blackrock tribe and have the protection of a large tribe on the prairie. It'll be easier to fish in troubled waters..."

Everyone nodded in agreement. This strategy was definitely better than rampaging on the plains. That night, Pu Yunchuan found the few orc veterans and gave them some food and water before making this request.

When the few orc veterans heard that it was a foreign tribe that wanted to join the Blackrock tribe, they became enthusiastic. It was not a small feat to bring in a strong medium-sized tribe to join them, moreover, they could also take this opportunity to go back and get supplies for their side!

Therefore, they fought to be guides.

Early the next morning, after Cheng Ruo's contribution was divided equally, one of the buffalo men named Cui Simu led everyone and set off. The rest of them continued to guard the Blackrock Trail. Pu Yunchuan left them more than a month's worth of food supplies before he led everyone on their journey...

With the veteran leading the way, the journey was much smoother. However, the scene along the way was rather shocking... ..

Along the way, there were Beastmen's corpses everywhere. It was not an exaggeration to describe many places as sparkling white bones. Moreover, the more they followed the other party, the more exaggerated the scene around them became, this scene made everyone more or less feel a little pressured.

Pu Yunchuan also asked curiously, "Is it usually like this here?"

The veteran also shook his head solemnly. "This area is already close to our tribe's headquarters. Originally, the tribes that were active outside were all subordinate tribes under our tribe. Each of their grasslands and resources were divided in advance, so there usually wouldn't be any fights..." "..." "..."

"Then could it be an invasion by an outside tribe?" Wesker asked with a frown.

"No one dares to invade our area in the Blackrock Plains..." the veteran said confidently.

Pu Yunchuan and Wesker exchanged a glance when they heard this, but the current situation was very different from what the other party described... "...".

Thus, the group walked for more than half a day in this strange atmosphere, but the surroundings were still filled with an aura of death. The scene of corpses strewn all over the place had never stopped from the start. Facing this scene..., old Trask's expression also became more and more gloomy.

Pu Yunchuan realized that the atmosphere was not right, so he did not continue to take the initiative to ask. All of them followed silently until it was almost midnight. They came to a wide plain. The grassland here was obviously growing much better than the one outside, Trask stopped and said, "This is the end of the Black River. Follow the river and you will reach Ratanasi..."

Wesker nodded. Ratanasi was one of the two golden soils of the black stone plains, and it was also the largest resource area of the black stone plains.

Although he had followed many generals into the black stone plains countless times, he had never set foot in this rumored place. He was inexplicably excited.

"However, it will still take a day's journey from here to Ratanasi. There are no supplies along the way. If you are willing to take a detour, you can consider taking the red soil. There is an affiliated tribe of our tribe at that location. You can supply some fresh meat and milk skin there. It will only take half a day's journey..." "..."

Everyone was slightly stunned when they heard this. They looked at Trask with vigilance. Was there a motive for them to take a detour to another place at this time?

Wesker frowned and was about to reject this suggestion when Pu Yunchuan suddenly asked, "What does the Red Earth tribe that you mentioned have to do with you?"

Most of the troops were wary of the orcs because of the habits of enemies and allies that they had developed over the years. Pu Yunchuan did not have this kind of mentality, so he could easily sense the desire in the other party's eyes... ..

When he saw the other party ask Cui Simu this question, he immediately replied honestly, "The people living there are the red ground bison tribe, my mother tribe..."

When everyone heard this, they paused for a moment. They more or less understood the situation. The other party had seen so many corpses and was worried about the condition of his mother tribe, while the Blackstone tribe had strict rules. His mission was to bring them to the headquarters to serve. If there was no reason for him to leave his post without permission, his end would be very tragic...

But what did this have to do with them?

Just as Wesker was about to refuse, Pu Yunchuan suddenly nodded and said, "Alright... We'll accompany you to take a look..."

As soon as he said this, TRISMME instantly burst into tears of gratitude as he hammered his chest loudly. He promised, "Don't worry, my friends. I'll let the Mother clan entertain you with the highest standards!"

Wesker and the others frowned. They didn't understand why Pu Yunchuan would sympathize with an orc. However, Pu Yunchuan's reputation was already very high in the team, so Wesker didn't plan to publicly refute him, instead, he found an opportunity to ask questions in private on the way.

"Yunchuan, isn't it not good to delay our trip because of such a guy?"

Pu Yunchuan said in a low voice, "I think something big must have happened to that Blackstone tribe... look at the situation outside, we didn't see anyone from the Blackstone tribe along the way..."

Wesker nodded. "What do you mean?"

"It might not be appropriate to go to the Blackstone tribe rashly. Why don't we follow that Guy's instructions and go to that Bison tribe that is close by? We can also get some information..." Pu Yunchuan said in a low voice.

"I see..." Wesker immediately nodded and praised, "Before leaving, Lady Isabelle told me that you mentioned a reliable person. It seems that Lady Is Right..."

"Not at all... Hahaha..." Pu Yunchuan said with a smug smile.

Wesker immediately shook his head in amusement. He felt that this guy sometimes acted so innocent and cute...

-----

In this way, a group of people followed Trisham's footsteps to the so-called Red Earth. This place was really just like its name, there was red earth everywhere, some people not only complain about the orcs' name-giving, they also complain about how simple and crude they are.

But just when Trisham excitedly walked to the door of his tribe, suddenly issued a burst of shrill howl! !

Everyone hurriedly followed him. When they saw trismus kneeling at the entrance of the stronghold, they were stunned for a moment. Then, they followed the gaze of the other party and raised their heads. Immediately, their bodies stiffened. They saw that on the entrance of the stronghold on the Red Earth., the heads of the Buffalo people were hung all over the place. The scene was extremely horrifying!

It was very obvious that just like the scene outside, this tribe did not escape from the vicious hands. They were massacred by the entire tribe... ..

Trishim rushed into the camp crazily and searched for something among the numerous corpses. Finally, he sat beside a pile of corpses in the corner and wailed loudly.

The few of them looked at the sad look on his face as he hugged the corpses and understood that they should be his family members... ..

Everyone looked at each other and felt that something was strange. What should they do next?

While they were wondering, Wesker suddenly said, "I don't think there's a child's body..."

Pu Yunchuan touched his chin and analyzed seriously, "This grassland tribe doesn't usually kill short and tall children. They must have been taken away..."

Everyone was stunned and looked at Pu Yunchuan in a daze. Wesker also looked at him in a daze. After a long while, he asked, "Who told you that?"

"Uh..." Pu Yunchuan immediately felt embarrassed as he thought to himself, the things in TV dramas are indeed unreliable!

Thus, Pu Yunchuan used the tribal language to ask Wesker's doubts. When DRIZM heard this, he immediately stopped crying and frantically rummaged through the corpses, after confirming that there were no children's corpses, his face immediately revealed an excited expression.

As such, he hurriedly ran towards the back of the tribe. Everyone followed him and saw that the other party had opened a cellar from a hidden location.

Seeing this, Wesker said, "As expected, the children have all been hidden..."

The instant the cellar was opened, a cold ray of light suddenly pierced out from within. Pu Yunchuan's eyes were sharp and his hands were quick. He pushed drizam away and grabbed the cold ray of light with his bare hands. With a stern cry, he pulled it up!

Everyone saw a tall bison being pulled out by PU Yunchuan like a radish!

"Bane! !" DRIESME said in surprise, "You're still alive?"

The bison who had been pulled out was in a mess. Just as he was about to stand up and counterattack, he suddenly heard this voice and was stunned. He looked at the other party and said, "You Are... Driesme?"

"It's me, Brother!" Trismus immediately pounced forward with a wail. "What on Earth happened here? Why Is It Like This?"

"It's all those bastards from the Dragon Roar clan! ! ..." that Bain gritted his teeth and said.

Dragon Roar clan? Wesker narrowed his eyes. They often interacted with this tribe. It was the second golden tribe in the Blackrock Plains!

"Where are the people from the Blackrock Tribe? Why didn't they come to protect us?" DRIZM hurriedly asked!

"Blackrock Tribe?" The other party laughed bitterly when he heard that. "There's no Blackrock tribe..."

"What?" Everyone was shocked when they heard that...
