

## A Bunch 631

Chapter 631 SNATCHING PEOPLE -Partpart 2) !

It was not a matter of one or two days for the base to lack researchers. These days, in order to snatch the market and develop the technology tree, every faction's research and development personnel wished they could be split up and used as two people. This was the same for the main base!

Although the Seer Lord had delegated the authority of the technology tree, it did not mean that the main base's research institute had nothing to do. On the contrary, because of the delegated authority of the technology tree, it increased the motivation of the players' research, making the main base's research institute even busier.

As the main research institute, it needed to fully absorb all the forces' new research results, integrate them, and conduct research on the most cutting-edge items to create a comprehensive product that could guarantee the main base's ability to profit from the outside world, although it had yet to start exporting its products to the outside world, it still needed to get used to this model.

It was the same for the military. It needed to integrate the strengths of all the players to maintain the lead of the highest military technology.

In the past, there was no concept of it. It was all done by the developers and the players themselves. Not only was the efficiency usually unplanned, but now, with so many forces providing their latest research data every day., this caused the total academy of Science and technology to have a huge increase in its business volume. Rainy no melon had already complained several times about not having enough manpower to hire seer!

It just so happened that Li Goudan's story this time made seer pat his head and decide to speed up the cooperation with the central China authorities. That was why there was this large-scale technical soldier test!

And when Rainy Wugua heard the news, how could she miss it? In her busy schedule, she personally came to supervise the test and even came up with the questions herself. Otherwise, how could Li Goudan have the face to call the current president of the General Science and Technology Academy?

The results of this test made rainy wugua very satisfied. The technical officers in the army had a solid foundation, and their manual skills were very strong. They far surpassed university students who did not have enough project experience. In addition, they had the obedience of the army, they could greatly fill the gap in the number of second-tier research assistants in the general base!

Initially, Li Goudan had made up some good lies in this matter. Rainy without melon did not mind that she would choose one or two to use for personal gain. However, she could not tolerate choosing the best!

The workload of the general base was not only huge, but it was also unlike the other forces who did the same thing. Other than needing second-tier assistants to help them summarize the data provided by the players, they also needed a group of top-notch talents to carry out cutting-edge research and

development, this required a very high individual's ability to accept and innovate. This was an individual's talent. Even if some people used the developer's bloodline, they would still not have it!

Therefore, Rainy no melon spent a lot of effort on the third assessment content for the technical soldier!

This was a test question that she had carefully designed according to the level of knowledge in D ball. It was specifically designed to test the ability to create and accept. It was in order to select as many outstanding people as possible to come to the main base's research institute. and among the many examinees.., this Lei Xue was practically the most outstanding in the third test question, especially some of the sharp insights in the defense question, which made Rainy eyes admire her greatly. She was already so outstanding even without using the developer's bloodline, she was simply a natural research embryo!

How could she let Goudan cut her off? She quickly rejected with a straight face, "Pick something else, this won't do!"

"But this one is the most suitable..." Li Goudan said coquettishly.

Rainy Girl, Wu Gua, did not even look at him and said coldly, "There are more than twenty people in charge of the ship's machinery, and all of them are qualified for your job! !"

Seeing that it was useless to act coquettishly, Li Goudan immediately widened his eyes and said, "Hmph... The Lord promised him that I would help him act and pick the people he wants. Did he just fart?"

Rain Maiden Wu Gua looked up and said directly, "Just treat it as fart..."

Li Goudan: "You..."

"Are You Picky?" Rain Maiden Wu gua said impatiently, "If not, I'll take them all away!"

"Wu Wu..." Li Goudan was so angry that his face turned red. However, he did not flare up in the end. Just as he was about to compromise, a light suddenly came from behind him. Then, he saw several developers appear out of thin air.

Rainy girl, Wu Gua, frowned. "Who told you to come over just like that? What if you're discovered?"

"Hey Boss!" One of the developers rubbed his hands together and laughed. "I heard that there's a large group of developers moving in. I'm in a hurry. Let me explain first. My Machinery Department needs at least fifty..."

"Ah Pui!" Behind him, a player wearing a black robe with a faint black aura said with a dark expression, "There's a total of a hundred. You want fifty? You're so Shameless! !"

"I'm busy over there, aren't I?" The player at the beginning glanced at him and said, "Our machinery department is a hot topic. More than 100 of the player forces have chosen to develop the pure machinery civilization. The rest of the magic power forces are mostly related to us. Naturally, there are more people with a large business volume. Do you think it's your undead department? "It's so unpopular that there are only a few players who have chosen. By the way, why are you following us? Is your department also lacking people?"

"I. . ."The black-robed player's face darkened, before he could refute., one of the players who came along said, "Brother Lin's words are a little harsh, but it's not harsh. Brother Cong, that unpopular specialty of yours only has three factions to choose from, and they're still in the early stages of development. Why are you here to join in the fun? But brother Lin, that number is too much. Brother Cong doesn't need any men we need men. I need 20 men from the plastic and Energy Department. This is non-negotiable. Boss, I'm not leaving until you give me men today!"

"What's wrong with the unpopular?"The black-robed man suddenly said angrily: "The unpopular has no human rights?"? You guys have a couple of guys in your department, and I'm the only one in the whole damn department who can handle this? I'm not doing it. I need at least five. You guys... ."

At this point, he suddenly froze for a moment. He inadvertently saw the results on the virtual screen, then his eyes lit up. "Wow Boss, who is this Lei Xue? How did you get such a high score in the third exam? He looks pretty good. Well, I don't want five either. Just give me this..."

"Ah!"! The developer from the machinery department pulled him away. "You are so beautiful. She is a ship design major. Why are you trying to kill her?"? Boss, are you going to leave her with me?"

They had seen Rainie's exam question before they came. It was because they had seen it that they were shocked by the person who could get such a high score. Boss was a harsh person. To get such a high score in her defense, he must be a top talent, they couldn't miss it.

"What You Said is wrong!"One of the players wearing khaki long-distance running said, "Who said that the mechanical major has to go to your mechanical department? "The third exam mainly tests creativity and the ability to receive new technology. If this ability is outstanding, what kind of classification should we choose?"Then he smiled at rainy without melon and said, "Boss, this kind of creative seedling should come to our alchemy department. She can best unleash her potential!"

"F \* ck off!"The people around him pushed him away.

Rainy girl and Wugua suddenly had a headache. She intended to stay by her side and be her assistant. Their reactions were too slow. They should have turned off the screen when they felt the teleportation fluctuation just now...

"I say..."just when everyone was in a heated discussion, Li Goudan couldn't help but interrupt, "Can I choose first? I want one..."

These words stunned everyone. They turned to look at Li Goudan, "Where did you come from?"

Li Goudan:"..."

I should be the one to say this, right?

"Why would a wind demon like you pick someone? Did you go to the wrong place, Little Sister?"

"I... I'm the person in charge of this assessment. The Lord promised to let me choose a ship engineer First!"

"Oh... I remember now..."one of the white-robed players frowned and said, "Li Goudan, right? Isn't it just to find someone to repair the ship? An engineer... What a waste of space..."

Li Goudan: "I..."

"That's right!" The developer of the necromancy department quickly said, "Why is it so easy for you to hire someone to repair the ship? Just pick someone close to the passing line among those eliminated..."

As a necromancy department that researched souls, it was already an unpopular department. There were probably only a few people who could be selected today. How could he tolerate letting Li Goudan pick two more people to leave?

"That's right! That's right!" The surrounding people quickly echoed!

"You guys! !!" Goudan was immediately fuming with anger, it was one thing for this group of people to come and snatch people, but they actually wanted to directly kick her out. He was just asking for the first place, why did he say that he could only go to the elimination group to pick trash?

"Just wait and see, HMPH! !!" Li Goudan glared at them and spread his wings without saying a word. Rain Girl, Wu Gua, who was at the side, suddenly reacted when she saw the situation and hurriedly said, "Stop her! !!"

Chapter 632 The World is getting worse!

Rainy girl had little contact with the players due to her busy schedule, so she didn't know Li Goudan's personality. If she had known earlier, she wouldn't have let the developers around her provoke her.

Rainy girl didn't realize what Li Goudan was going to do until Li Goudan spread his wings. She quickly shouted, "Stop her!"

The shout was so sudden that some players did not even have the time to react. Only the mechanic had a flash of blue light in his eyes. A few huge mechanical arms suddenly reached out from his backpack and grabbed at Li Goudan who was about to leave!

The mechanical arms were extremely fast. It took less than 0.000 seconds for them to lock onto Li Goudan's position. In the eyes of the surrounding players, they could only see a few flashes of silver light.

However, the mechanical arm was faster than Li Goudan. When it spread its wings, the person behind it was like a flash of light. In an instant, he nimbly evaded the lock of the mechanical arm and disappeared before everyone's eyes!

"DAMN!" The player from the machinery department was stunned. "Is the speed of a level 4 wind demon that fast?" He adjusted the mechanical glasses that he had put on at some point in time. "This set of equipment of mine is more than enough to catch a level 5 flying creature. I didn't even touch a single strand of hair!"

Rainless frowned slightly. She had discovered this problem over the past few days. The abilities of the players after fusing with the genes did not seem to match the traditional data of the federation. Moreover, the difference was huge!

Under normal data, the attributes of the players should be slightly lower than the attributes of high-level creatures of the same level due to the fusion of genes.

However, from the recent data of the players' individual attributes, the attributes of the players seemed to be far higher than those of creatures of the same level. Was the federation's database too conservative?

"Boss, what is she doing?" One of the players said.

"Still can do?" Rain woman has no melon to roll his eyes a way: "Of course is to snatch a person to go!"

-----

Outside the playground, a group of technical officers walked out of the examination room and gathered at the scoreboard to wait for the results.

As there were more and more people, the people of the Liu and Lei families appeared to be very anxious. Of course, the other aristocratic families were not idle either, although because they had been tricked by the chief once, many juniors of the aristocratic families were not able to get on this train, it did not mean that they had no chance at all.

The leader could rope in these commoners without any background, but couldn't they?

The leader could provide them with convenience on the road, so could they. Moreover, they could give more... ..

Elder Li looked at the group of Old Fellows who were eagerly looking at the roll of Honor. He was speechless. This scene was very similar to those rich aristocratic families' roll of Honor during the ancient scientific examination. As long as one saw a high school scholar... They would immediately try to win him over. They might even directly shove their daughter's name card into the arms of others... ..

Wait a minute...

Thinking of this, elder Li was momentarily stunned. He thought to himself, don't tell me this group of old men are planning to do this?

Thinking of this, he moved closer. He wanted to hear what these old men were saying.

As expected.., as he moved closer, he heard someone say, "Elder Huang, how old is your granddaughter who isn't married? She just went to university this year and is not even 18 years old, right? The young cadres here are at least almost 30 years old. Do you think it's appropriate?"

"What's not appropriate?" Elder Huang stared at his small eyes and said, "When a man is 30 years old, he has to find a mature and steady partner. I'm doing this for the good of my granddaughter!"

"But... you have to see if she is willing!" An old man with a goatee sneered.

"What's there to be unwilling about?" Elder Huang sneered and replied, "If you don't like an eighteen-year-old girl, do you still like that thirty-year-old girl of yours who hasn't Married?"

"Hey... You!"

Elder Li's face darkened when he saw the group of people shamelessly arguing about selling their granddaughters. He sighed softly and said, "Such a refined and refined person!"

"That's right!" Elder lei chimed in, "What a bunch of shameless old men. They have no moral integrity at all!"

Elder li nodded repeatedly when he heard that.

While he was nodding, he suddenly saw the eldest son of the Lei family running over hurriedly. He held his phone and said to elder lei, "Old man, Tingting and Kexin's photos have been sent over. Take a look..."

Elder Lei took a look and immediately frowned. "Who told them to go without makeup?"

"But... they work in the army and don't usually put on makeup..."

Elder lei: "Is your brain filled with paste? If they don't know how to put on makeup, how can they not know how to use a beauty camera? Hurry up, the results will be out soon!"

Elder Li: "..."

The world was really going downhill. Even the integrity of the old leader had fallen. Moreover, he didn't know that the old leader, who was usually so inflexible, actually knew how to use beauty cameras... ..

Lei jiaming suddenly paused, and then his eyes lit up as he thought to himself, right, why didn't I think of that? I can't find anyone who can get in. Those technical officers just now seemed to have a few female military doctors... .. Although they looked average, that wasn't important... ..

"Hey, Xiaoxue is out!"

Just as Lei Jiaming was thinking about how to tell his grandfather, elder Tian suddenly said.

Upon hearing this name, Lei Jiaming's face instantly darkened!

Hearing this, elder Lei couldn't care less about the photo. He hurriedly walked up and grabbed Lei Xue's hands. "My good granddaughter, how was the exam? Did it go smoothly?"

Lei Xue was stunned. She didn't know what to say for a moment. She was very confident about the results of the first and second exam, but the third exam was a little lacking. The exam questions were extremely imaginative, and she had never heard of some of the theories in it before, it simply broke her usual understanding, but it seemed to be very logical and logical, especially some of the formulas in it!

It also caused her to be completely uncertain about the third question, because when faced with that kind of question, she answered it based on her feelings. As for whether or not she could get a high score, she was a little weak...

Seeing Lei Xue Stammering, elder Lei's heart suddenly thumped, on the side, Lei Jia Ming's eyes lit up. "Grandfather, don't worry. Fourth Cousin has a good chance. Didn't you say before? You must get a quota for my lei family!"

At the end of his speech, Lei Jia Ming paused almost word by word, as if he was afraid that the others didn't hear him clearly!

When the Lei family heard this, they immediately frowned.

Lei Xue also lowered her head in embarrassment. Back then, if she dared to brag like this, she knew that she might be targeted...

But if she didn't brag, where would the opportunity come from?

Let's hope the heavens bless her...

At the side, elder Tian's heart thumped when he saw Lei Xue's guilty look. His footsteps, which were originally prepared to go forward to show his concern, suddenly froze on the spot. Then, elder Tian looked around. He wondered if he should take advantage of the fact that no one was paying attention to him right now? Should he slip away first?

It just so happened that the old master of the Li family in City C had invited him to stay for a while. He might as well take the opportunity to go over and wait for him for half a year. After a long time, no one would think about letting him eat the door board anymore...

"Hey, the results are out!"

Someone shouted in the crowd, and a group of people immediately rushed over. Elder lei and snowy also looked over, but because there were too many people, they couldn't squeeze in for the time being., elder lei immediately patted his robust eldest son, "What are you waiting for? Hurry up and squeeze in to see the results!"

"Oh Oh!"The honest eldest son immediately bulged his muscles when he heard that and opened up a path for the Lei family like a wild buffalo.

Brother Dog, who saw this scene from behind, was slightly stunned and thought to himself, "This guy is definitely suitable to play Green Titan in the game!"!

A group of people followed behind the other party and squeezed to the front. As soon as they reached the front, the eldest son shouted, "Snowy is hit! !"

The Lei family members were stunned and looked up in surprise!

Chapter 633: What's there to clean up?

The Lei family almost looked up and instantly found Lei Xue's name. As for why they found it in an instant, it was because it was too conspicuous. The first item on the screen was Lei Xue!

Name: Lei Xue. Age: 29. Height: 1.71 meters. Weight: 55KG. Test type: technical channel!

Test result 1: Basic Knowledge Test, including advanced mathematics, basic physics, basic chemistry, basic biology and other basic subjects, comprehensive result A + , total score 10 points.

2: professional knowledge test: according to Candidates'own expertise in the field test: theoretical mechanics, material mechanics, fluid mechanics, structural mechanics, ship principles (statics, ship resistance, ship propulsion, ship seakeeping, ship maneuverability, etc.) , ship drawings, ship materials and welding, ship structure and strength, ship vibration, etc. , overall Score A + , total score 30 points!

3: Creative Thinking test: Tests the examinee's ability to accept new technologies and creative thinking.  
Overall Score A + , total score 38 points! !

Overall score 78 points, ranking No1!

When the Lei family members saw this glittering result, their hearts immediately jumped to their throats, and they all revealed ecstatic expressions. Even Lei Hao and Lei Ming, who usually did not have a good relationship with Lei Xue, had faces full of excitement!

After all, no matter how normal their relationship was, they were still a family. If one person achieved the dao, the chickens and dogs would rise to the sky. In the future, with their own cousin in the family, they would definitely be able to take care of them if they had the chance.

Just like the Liu family...

Only Lei Jiaming's face was gloomy. Looking at the few a + words and the NO1 ranking, he felt that it was extremely eye-piercing, especially when compared to his own results... ..

"Good, good, good! !"Elder lei excitedly grabbed Lei Xue's hand and said, "Good child, good child, you didn't disgrace my lei family! !"

This time, he finally got back his previous disgrace. Elder lei was so excited that his entire face turned red!

Lei Xue, who was caught by the side, looked at her grandfather's excited expression and was slightly stunned. His expression immediately became a little dull...

How long had it been... ? ... since she had made her grandfather so happy?

"How is it? What did I say?"Elder Tian, who had followed behind, immediately felt proud when he saw this result. "Your Lei family owes this old man a good lesson this time, right?"

"Owe owe owe owe owe owe!"The Happy Elder Lei did not care about the other party's smug face. He smiled and said, "How about I specially prepare a table for you when I go back?"

"That's more like it!"

Elder Li could not help but say when he saw the smug look on old Tian's face, "I think I saw someone trying to sneak away just now..."

"Bullsh \* T! !"Old Tian immediately said anxiously, "Who wants to sneak away? Am I someone who is afraid of eating the door? At that time, if I dared to swear that kind of poison oath, it means that I can protect you!"

"Yes, yes, yes..."elder Li rolled his eyes at him, "You're right! You're right!"

"Hey, what do you mean by 'You're right'? Let me see if you're right!"

Elder lei watched the two argue happily. He was in a good mood now and did not think that elder Tian's face was annoying anymore.

Elder Lei asked elder Lei in a low voice, "Old Man, do you want me to go and greet general Huo who is in charge of the political review?"? Xiaoxue was a technical soldier, and her chances of meritorious service were not better than those commanders. I will try my best to let her score a little higher in this aspect of character evaluation... "..."

"Good, good!" Elder lei looked at his son with satisfaction. This kid seemed to be simple and honest, but his considerations were quite thorough...

However, he was not particularly worried. At the thought of this, he looked at Lei Xue's results again and compared it with the results of the other people on the list. He felt as if he had eaten a piece of reassurance and smiled, xiao Xue's result was a full 20 points ahead of the second place!

Even if the results of the political examination were slightly worse, the first place would still be stable!

With this result, he reckoned that after entering Luofu, he would also be valued... ..

Just as he was thinking about it, he saw some old men that he was familiar with on a daily basis come over. "Yo, elder Lei, Congratulations!"

"Eh, I was just lucky!" Elder lei cupped his fists in return with a glowing red face.

"Aiyo, this Xiaoxue is really becoming more and more iconic..." an old woman beside him suddenly asked, "Oh right, I remember that Xiaoxue isn't married yet, right? Do you have someone you like?"

"Cough Cough!" Lei Xue immediately choked. Why did these elders change the topic so quickly?

"Eh, it's good that she isn't!" One of the gray-clothed old men hurriedly said, "My little grandson doesn't have one either. He is very compatible with your Xiaoxue!"

"Perfect match, my ass!" Elder Huang said from the side, "How old is your little grandson? He's in his early twenties and a little brat. How dare you say that he's a perfect match?" Then, he smiled at elder lei and said, "My eldest grandson is still the best. You've seen him before. He's 33 years old this year. He's already a deputy commander in the army. His age is just right..." "..."

"Hey, you old man, weren't you just selling your eighteen-year-old granddaughter?"

"Huh? Are you an idiot? Can Men and women be the same?" Elder Huang rolled his eyes at the other party.

Elder lei smiled as he watched the group of people struggle until their faces turned red. He said cheerfully, "Hey, it's alright. It's not convenient for us to talk about this today. Let's slowly discuss this topic later..."

"Grandpa!" Lei Xue instantly squeezed elder Lei's hand.

"Eh, don't be afraid, girl..." Elder lei said softly, "In your current situation, you're in a rush. When the time comes, you can slowly choose..." "If you don't like being too old and want to have a younger one, there's no problem. I know that elder Hong's little grandson is very beautiful, similar to Li Yifeng." "..."

"Who's Li Yifeng?"

"He's a young hunk from our era. He's very handsome, even though i rather admire gu Tianle's style..."

"I. . ."Lei Xue Didn't know whether to laugh or cry.

Of course... ! ... some people were happy, while others were sad. For example, Lei Jiaming, who was pushed out by a group of old men!

Looking at Lei Xue, who was surrounded by a group of people like stars surrounding the Moon, Lei Jiaming's expression became increasingly ugly!

What a bunch of brainless things. With so many technical soldiers like this, they must be doing odd jobs? Did they really think it was some fragrant bun?

While they were sneering in secret, a strong wind suddenly blew in mid-air, and some old men were immediately blown back.

A clear and beautiful voice suddenly came from mid-air, "Which one is Lei Xue?"

Everyone subconsciously looked up when they heard the voice. It was Li Goudan who was flying over. Everyone was stunned for a moment and thought to themselves, damn, this Luofu immortal cultivator still has wings?

"Here!"Lei Xue saw that it was Li Goudan and hurriedly saluted to report.

Li Goudan instantly appeared in front of Lei Xue when he heard the voice. He sized her up and said, "You are Lei Xue?"

"UH... Yes, sir!"Lei Xue replied respectfully.

The eldest son of the Lei family, who was supporting old master lei, hurriedly asked, "Lieutenant general Li, did something happen?"

"Yes, she's very outstanding and has been accepted!"Li Goudan quickly said, "Come with me now, back to Luofu!"

"Now... Now?"Lei Xue stuttered and asked.

The others were also stunned. Elder li frowned and asked, "Isn't there still a political review?"

"AH...". "About that, there's no need!"Li Goudan waved his hand. "I see that this child has a delicate face, big round eyes, a round nose, and two big cheekbones. One look and you can tell that she's a good person. An excellent soldier, there's no need for a political review. Come with Me Now!"

Everyone:"..."

"Then... Then I'll go back and tidy up a bit?"Lei Xue asked carefully.

Li Goudan looked at the shadow that had rushed over not far away and directly grabbed Lei Xue's hand. "Tidy up my A \* s, there's food, accommodation, and clothes over there! !"

As soon as he finished speaking, without waiting for Lei Xue's reaction, he directly grabbed her and flew out. Under everyone's stunned expressions, he quickly turned into a black dot and disappeared into the distance!

What was going on?

Everyone was stunned. However, before they could react, another figure suddenly appeared in the sky. This time, it was even more exaggerated. It was like a transformer that was suspended in mid-air, everyone's eyes almost popped out of their sockets.

What was that? Gundam?

The Huge Gundam opened up in front of them and revealed rainy girl's figure. She looked at the stunned people below and asked, "Where's Lei Xue?"

"UH..."

After being stunned for a long time, the eldest son of the Lei family was the first to respond, "She was... taken away by Lieutenant General Li..." he pointed to the place where Li Goudan disappeared.

Rainy melon-less frowned and looked into the distance. She asked AI, "Can you catch up?"

AI said, "You can change the power source and upgrade the engine. There's still some hope..."

"F \* ck!" Rain Girl Wu Guagua immediately cursed. Then she looked at the list again. After looking at the second name, she quickly said, "Who is he Xiao Xin?"

Chapter 634: "Do you still want those ten?"?

"What... is going on?"?

In the sky, Lei Xue stared blankly at her surroundings. The surrounding air currents were flying backward, visible to the naked eye. She could see that the countless buildings on the ground had become as small as ants, but because of this, she could almost see half of the scenery of Yanjing. Looking down from such a high altitude, it felt like looking down at all the small mountains. It was very dreamy...

The only time she could look at the mountains and land like this was when she was parachuting. Although she had never jumped before, she probably could not enjoy the scenery as quietly as she did now, right?

After all, when she was parachuting, the adverse airflow and the thrilling feeling of falling down had long made it impossible for her to focus her attention on the scenery...

But that was not right. Why was she able to calm down now?

Lei Xue was slightly stunned. When she came back to her senses, she realized that although the airflow around her was moving very fast, she did not seem to be affected. She did not even feel the strong wind of the negative airflow at all., on the contrary, it was as if she was protected by something. It was more peaceful than the wind that she faced on the road. Moreover, it was extremely quiet. There was no sound of the wind that came from the parachuting at all.

That silent feeling... It was as if she had entered [ Lexus ]'s car. There was no noise at all. It was no wonder that she was attracted to the scenery at the first moment. ...

How much did Lexus give you? I'll give you ten times more! !

Suddenly, a comment that sounded like an extraterrestrial key immortal exploded in Lei Xue's mind. It made her come back to her senses. Then, she looked at Li Goudan who was holding her back.

Only then did she clearly see that under Li Goudan's wings, there seemed to be a visible airflow enveloping the two of them. She immediately reacted. This should be the reason why she was not affected by the romantic atmosphere, right?

Was this the magical ability of a cultivator?

A trace of envy flashed in Lei Xue's heart. To be able to fly freely in the sky like this, it was really not bad...

"Lieutenant General Li, are we going to Luofu?"

"Yes!" Li Goudan nodded, and then directly handed over a piece of paper with a very nice color. "Quickly sign the contract!"

Lei Xue was stunned. He still wanted to sign the contract?

Then, after taking it in a daze, she looked at the literal agreement.

The contract stated: Party B: Wang Ye, brought into galaxy by party a: Li Jiayi on XX year XX, XX month XX Day. All the value created by Wang Ye in galaxy will be 100% given to Li Jiayi as a reward, the corresponding reward for Wang Ye will be provided by party a: Li Jiayi. As for how much the reward will be, it will be up to Li Jiayi to decide!

Lei Xue was stunned. What kind of slavery treaty was this? And who was Wang Ye?

"Oh, sorry, I took the wrong one!"

Li Goudan immediately grabbed the contract back and handed it over again... ..

The contract stated: Party B: Lei Xue, brought into galaxy by party a: Li Jiayi, brought into galaxy on The XX day of XX year XX year XX year. In return, Lei Xue Will officially join the Neptune Group in galaxy, the position of first-class ocean engineer and vice-captain of the dog egg will be appointed. Service period: life. Party a will have Li Jiayi pay 5% of the shares and a generous annual salary on behalf of the Neptune Group as compensation!

Lei Xue was stunned again. What was going on? Wasn't it the cooperation between the military and Luo Fu? Why was there a Neptune Group all of a sudden? And they still had to sign this ridiculous contract?

Moreover, although this contract wasn't as brutal as before, it still looked like a trap contract. For example, in terms of remuneration, she didn't even know the size of the other company, that 5% of the shares looked beautiful, but what was the use of it if it was just a shell company? And that generous remuneration, how generous was it. Why Don't you write down a number...

You're willing to work for your whole life, and you're trying to trick her into working for your whole life with this condition? What the hell?

"Lieutenant General Li, are you joking?" Lei Xue said with a black face.

"I'm not joking..." Li Goudan said with a smile, "Hurry up and sign it, or I'll throw you down!"

Lei Xue: "..."

It should be... a joke, right?

Lei Xue glanced up with some uncertainty. Looking at the other party's smiling eyes, she didn't know why, but after looking at it, she felt that it wasn't a joke... ..

She wouldn't really dare to throw me down, right?

Hiss... .. Emmm, she probably wouldn't dare... ..

Lei Xue looked at the contract. After hesitating for a moment, she finally looked at the position of the handprint, she thought to herself, "So be it. It's most likely a prank. Even if it's true, would such a forceful and forceful signing of the contract be useful? I'm an officer. Are you barking up the wrong tree? You Think You're one of those people who can't stand up to a bully treaty?"

Thinking of this in order not to take that 1 in 10,000 risk, snow finally decided to press the handprint... . .

-----

"So it is like this, Trouble Qin Gate Master personally came to visit..." Old Li listened to Qin Xuanji after the explanation nodded... ..

The leaders and old men from the various aristocratic families who were listening to the situation behind them secretly heaved a sigh of relief.

Due to Li Goudan's despicable act of snatching people away, a bunch of developers behind him, including Rain Maiden, who was originally in charge of recruiting people, imitated him one after another. A group of people displayed their supernatural powers and ran away after snatching people away. As a result, those who didn't manage to snatch people away in the end simply snatched the top fifty who had failed... ..

If not for the fact that they were officially cooperating with Immortal Master Luofu, many guards would have already opened fire!

Faced with these scammers, Seer from the main base had no choice but to send Virien to deal with the aftermath personally...

"Is your sect really short of people in this aspect? To the point of snatching people?" The leader could not help but ask.

Vivian smiled embarrassedly. "It is indeed short of people. This STARSEA gate is a descendant of the Mo family. With the resources of the arcane realm, its scientific research ability has greatly developed. It is also the foundation of our sect. In the past, due to the seclusion of the world, although it has absorbed some top scientists, in order not to arouse the suspicion of the outside world, it has very strict restrictions. This time, it is not easy to allow a large-scale absorption of talents in this field. The elders who are short of people have long been unable to hold back. To cause such a commotion, you must have seen it as a joke..." "..."

"AH... not at all!" The group of people shook their heads repeatedly, the leader also smiled and said, "The Elders of your sect are really straightforward... I heard from my subordinates that the elders of

your sect even opened a Gundam. is that also one of your sect's many years of scientific research results?"

"AH... it's just an immature product..." Vivian did not deny it and replied with a smile.

The leader nodded, but he was thinking about it in his heart... ..

Space Technology, Gundam. If not for so many people seeing him, they might not believe a single punctuation mark. This should be something from a sci-fi movie, right?

However, this lack of manpower did not seem to be fake...

The leader thought for a few seconds and then smiled. "May I ask when our soldiers will be able to return?"

"It won't be long... Once we get familiar with the basic environment, we can let them come back and report to you first. I think it should be about a week..."

"UH... "...". "Haha, no Rush, no rush...". The leader was directly pointed out his thoughts and smiled awkwardly. "Getting familiar with the environment and getting into work as soon as possible can help your sect. Reporting can be done anytime." "...". "..."

Vivian smiled and did not continue poking him. She bowed and said, "I've troubled you all this time..."

"What are you saying, sect leader Qin? With your sect's cooperative attitude, we should be the ones thanking you. I hope that this cooperation will be pleasant and that we can achieve a win-win situation for both sides..."

"I think so too..."

"Oh right, do you still want the ten people who passed the combat-type soldiers this time? I saw that the examiners of your sect did not seem to have any intention of taking them away when they left..." the leader asked with a smile.

The ten qualified soldiers:"..."

Chapter 635 Being able to annex, is naturally the best... ..

After virien left, the people who stayed behind dispelled their previous shock and uncertainty, but all sorts of emotions rose up again.

First was the leader...

The technological power that Luo Fu revealed this time made the leader even more wary of Luo Fu, but he was also more enthusiastic. Compared to the pure extraordinary immortal cultivation forces, the level of technology that Luo Fu grasped was also very important, it might even be more important than the cultivation qualifications of a pure sect.

As a modern person, he had experienced the importance of technology in his heart. The space technology and mecha technology that Luo Fu had displayed were existences that could change the military structure of this world. It would be a lie to say that he was not tempted!

Thinking of this, he lowered his head and began to think deeply...

Most of the elders of the aristocratic families did not think so deeply. Instead, they were somewhat annoyed when they knew that technical officers were so popular. If they had known earlier, they would have been like the Lei and Liu families, nurturing them in many ways. They should not have only put eggs in one basket...

However, this was not their fault. The system of the aristocratic families had led to a lack of enthusiasm in nurturing technical officers.

For ordinary children, technical officers might be a good choice. This was because it was very difficult for an ordinary commander to be promoted after reaching a certain rank without background and opportunities. When they reached an age, they would have no choice but to change careers or retire, however, most technical officers could stay in the army until they retired. Moreover, their military ranks would not be hindered. Once they reached a certain age, they would be promoted. This was relatively stable.

However, this problem did not exist in aristocratic families. The line of command was almost unimpeded. Compared to actual command and personnel rights, it was difficult to nurture a scientist. It was useless to aristocratic families. Which one was more cost-effective?

However, they never thought that they would encounter such a thing one day...

Therefore, the group of old men thought that they would quickly investigate these people who were on the list in secret. When they returned, they would try to rope them in. Perhaps, they would not have to wait for them to return and they could directly investigate their family background. They would first try to curry favor with their parents and try to rope them in...

However, the leader had probably already done the corresponding work from the beginning. The probability of them being able to rope them in was not high... ..

At the thought of this, the faces of the elders from the aristocratic families became even more unsightly. They couldn't help but sigh: this time, they had really been plotted against by the leader! ! !

Of course, the aristocratic families weren't unhappy either. The Lei and Liu families appeared to be satisfied.

Especially elder lei. He originally had the same concerns as lei jiaming. He thought that the other party had recruited so many technical officers to do odd jobs and that their status in Luofu city wouldn't be too high. However, after this incident of the recruitment., this concern was completely dispelled. He did not expect that the technical officers in Luofu city would be so popular. It seemed that as the first place, his little snow should be valued there!

Thinking of this, he was in a good mood. He whispered to elder Liu beside him, "Congratulations, elder Liu. Your Liu family has gotten another one."

Elder Liu was so happy that he could not close his mouth. He thought to himself, Shiyu's intelligence was indeed correct. Fortunately, he had given a spot to the national sage. Otherwise, he would have missed it again this time.

Elder Liu was also smiling at this time. Although he usually put his family first in everything, who would not want the real benefits to fall on their own son?

Although his son was not as promising as that girl from the Lei family, and he got the first place and was fought over by so many immortal masters, he did not lose face. At the very least, he was directly admitted into the top 100!

This was just like the release of the rankings in ancient times. Although his son wasn't able to get into the top scorer and didn't have that kind of prestige, he was still qualified to become an official after becoming a jinshi. That was also to glorify his ancestors... ..

"Congratulations!" Elder Liu chuckled in response to elder lei, he cupped his hands and said, "Oh right, old leader, I heard that you still have two granddaughters who are military doctors in the army. One of them even has a doctorate degree. You can properly nurture them! "I just looked at the exam directory. Military doctors are also one of the technical channels. Quite a few of them have won. If this collaboration goes well, there will definitely be a second time. Old Leader, you have to get ready early...". "..."

"Really?" Elder Lei's eyes lit up when he heard that. He immediately rubbed his hands together and laughed, "Okay, okay, okay. I'll let Kexin prepare well when we get back!"

When he thought about the possibility of his lei family getting a second spot, he instantly laughed even more happily.

When the surrounding members of the aristocratic families heard this, they immediately reacted and began to make plans in their hearts.

Elder Liu was right. Looking at the way Luo Fu was acting, it was likely that the second wave of cooperation would require a large number of talents in this area. This time, they had been schemed against by their leader. They could not miss this opportunity again next time... ! When he went back, he had to pay great attention to those disciples who took the technical route!

The Lei family's junior behind him heard this and his face twitched. It seemed that if there was a second exam later, his two cousins who studied medicine would be given priority. F \* ck, if the number of slots were small, we might not have anything to do with it...

Lei jiaming, in particular, lowered his head with a gloomy face and thought, I did not perform well this time and wasted the slots. If Luo Fu had a second round of cooperation, his grandfather would not give me another chance! I have to think of a way before that!

Luo Fu was able to compete with the sects of Kunlun, and he was very good at training his disciples. With this best choice, he had no interest in emei, Yunshan, and so on. He racked his brains thinking that he had to enter this platform! !

In this way, a group of old people in this happy and sad atmosphere slowly dispersed, each to prepare for the following things to go... . .

-----  
After the crowd dispersed, the leader gathered a few confidants to the base for a meeting.

Two of them are the combat officers who passed the test. . .

After gathering at the base, the leader looked at the two soldiers and sighed slightly. Half of the top ten places in this battle were from aristocratic families, and the rest were more or less related to aristocratic families. The only ones whose backgrounds were confirmed were the two in front of him...

It had to be said that the aristocratic families were powerful. They had abundant resources since they were young, and the children they nurtured were indeed outstanding. In this kind of fair competition, even with ten times the number of people, he was only able to get two spots. One of them was someone he had managed to squeeze in through the administrative division...

It was fortunate that Luo Fu had mainly recruited technical soldiers to set up a trap for the aristocratic families. Otherwise, most of the spots would have fallen into the hands of the aristocratic families.

After gaining the upper hand against the aristocratic families, the key was to deal with Luo Fu's situation...

The leader narrowed his eyes slightly, with a serious expression, he said to the two young officers who had squeezed into the slots with great difficulty, "Little Cui, Little Wang, you two remember to meet up with our technical officers as soon as you arrive there. Share the information and investigate the situation there in the shortest amount of time!"

"Yes, Sir Leader!" The two officers stood up straight and saluted.

The leader nodded. Previously, he had received some sensitive information from Qin Xuanji's words. Firstly, the other party had said that they had invited many outstanding western scientists over the past thousand years. This meant that this sect had the influence of foreigners, moreover, although the other party had chosen to cooperate with the Chinese authorities at the first instance, every time he mentioned the reason, he would say that he had entered the human world to make the secret realm open and benefit the humans!

The words "Open" and "Human" made him realize that the other party might not only want to cooperate with the Chinese authorities!

In this situation, it was not good for him to turn hostile and stop the other party from directly escaping to cooperate with other countries. He would first use this opportunity to probe the other party's background.

Of course... ... Being able to annex the other party was naturally the best...

Chapter 636: Lei Xue (1)

"Just like that... He snatched it away?"

Outside the operating theater of the base, Bing Guan asked in a daze, "Is it so casual?"

“How is it casual?” Li Goudan placed his hands on his waist and said, “This Goudan has long been prepared, Alright?” As he spoke, he took out a stack of contracts. “Look, my contracts are all prepared in advance...”

“So Many?” Bing Guan was stunned.

“Eh... .. It’s better to be prepared... .. this Goudan has prepared for everything from the harsh conditions to the contract where party a will lose their capital. If the other party has a fiery personality, I still have an unlimited contract. After all, he is a soldier, so I have to prepare more. However, this Goudan did not expect this guy to be so arrogant. I just casually scared him and signed the contract!” As he spoke, he sighed. “Sigh, he was born in an aristocratic family, so he has integrity “...”. “...”

“But... isn’t it bad for us to offend Rainy without a melon like this? I heard that guy is quite vengeful?”

“What does that have to do with me?” Li Goudan rolled his eyes. “I’m about to go to sea!”

Bing Guan: “...”

So You’re planning to make me the scapegoat?

“Sigh...” . “Don’t worry. Big Boss Rainy has been so busy all day. Why would she be so bored to care about all this?” Seeing Bing Guan’s ugly expression, Goudan hurriedly patted his shoulder and comforted him. “Isn’t this me doing this for the sake of our faction?” “The few developers in the base are not professional ship builders. Since we have chosen this major route, there should be a main developer in the ship design area, right “If we don’t snatch people, are you really willing for me to randomly pick someone over a hundred?”

“This...” Icicle hesitated for a moment, “After transplanting the developer’s bloodline, it should be about the same, right?”

“Who told you that?” Goudan rolled his eyes at him. “They’re both from Planet D, and some people have a salary of a million a year to move bricks manually. Aren’t they all of human bloodline? Why is the difference so Big?”

Seeing that Icicle was still a little hesitant, Goudan leaned close to him and whispered, “I’ve heard from instructor Virien before that the differences in bloodlines are very big. This point will become more and more obvious as the level increases. In fact, if you observe carefully, you’ll know. For example, among the first batch of developers in the base, Rainy wasn’t the first to come in, but she’s now the leader of the developers. Isn’t it because of her good aptitude?”

“UH...” Icicle was stunned for a moment before he nodded. He felt that what the other party said made sense... ..

“That’s why I helped you snatch such a good person. Tell me, should you take the blame for this?”

“Is... is that so?” Icicle was confused. He felt that the other party seemed to have turned into a strange place as he spoke... ..

Just as his thoughts were in a mess, he saw the operating theater remind him, “Lei Xue’s surgery was completed smoothly...”

“Alright, let’s not talk about it anymore. This Goudan will go and pick her up first. Don’t think about shifting the blame in your head for the rest of the day. You’re the boss. It’s a boss’s responsibility to help the employees wipe their butts. That’s it. Don’t worry about it anymore. Help this Goudan gather the crew quickly. That’s the most important thing right now!”

Li Goudan did not wait for ice cap reaction, directly went to the laboratory, carrying the snow on the first run... . .

-----

“Ah! !”

With a scream, Lei Xue woke up from her panic. When she found herself in a soft bed instead of a cold, scary operating table, her heart relaxed a little.

However, the panic did not disappear. She clutched the blanket tightly and panted heavily. Her back was instantly drenched in cold sweat...

What was going on?

Could it be that she was dreaming?

Lei Xue first thought about it out of reflex. After thinking about it carefully, it seemed that the past few days’ experiences were indeed quite dreamy. For some reason, it was unreasonable for an immortal cultivation sect to recruit technical personnel, perhaps it was a dream that she was unwilling to accept?

At the thought of this, Lei Xue slowly calmed down. Then, she let out a bitter smile and thought to herself, this dream of mine is really creative...

However, just as she wanted to continue lying down, she suddenly felt that something was not right...

This bed... why is it so soft?

At the thought of this, Lei Xue finally reacted and stood up to look around. In the next second, she was attracted by the fairytale-like exquisite decorations around her. However, she also instantly realized that she was definitely not in the Lei family.

“You’re Awake?” A gentle voice sounded not far away. Lei Xue almost jumped up like a frightened cat. Then, she saw a fairy-like beautiful fairy sitting on the balcony of the room, she was seriously reading a book in her hand. With the decorations around her, this beautiful scene made Lei Xue’s breathing stop again.

Could it be that she was still in a dream?

“Wash up when you’re awake. I’ll take you to see the working environment...” Li Goudan looked at her and grinned, together with the sunlight shining behind her, the scene was beautiful and warm, causing Lei Xue to pause again and nod subconsciously.

Then, her gaze shifted slightly and she inadvertently saw the book in Li Goudan’s hand...

Wu Da's Revenge!

Instantly, the entire beautiful scene was shattered. Lei Xue woke up from her fairy-tale-like warm vision and asked coldly, "What's going on here?"

"What do you mean, what's going on?" Li Goudan looked at the other party in confusion.

This innocent look almost made Lei Xue fall for him again. However, she immediately looked at the Wu Da's revenge in the other party's hands and used it to regain her consciousness. She asked cautiously, "What's going on with your Luo Fu?"

"What do you mean, what's going on?" Li Goudan tilted his head and looked at the other party. "Didn't the higher-ups explain the situation here clearly to you?"

"The higher-ups didn't say that they wanted to do any surgery!"

Speaking up to this point, Lei Xue hurriedly touched her own body, wanting to see what exactly she had become. She had seen those green monsters in the base before. She did not want to become like that!

"Didn't I say it before?" Goudan li said lazily, "This Luofu arcane realm is another dimension. After transmigrating, of course, we have to undergo surgery!"

Lei Xue looked at herself carefully, and when she realized that she had not become the monster that she had imagined, she was slightly relieved. But when she saw the innocent look on Goudan Li's face, she immediately sneered and said, "Before transmigrating, you have to undergo surgery? Why haven't I heard of it?"

"You've transmigrated before? How do you know that there's no need for surgery?" Li Goudan retorted.

Lei Xue was stunned and subconsciously retorted, "Those transmigration web novels have never mentioned that there's surgery before transmigration!" As soon as these words left her mouth, she realized that something was wrong. How could she use the web novels as evidence to refute...

As expected, as soon as these words left her mouth.., li Goudan had a strange expression on his face. "To think that you graduated with a phd in science and technology. Do you really believe the words of a web novel author? "The gravity, air density, and various bacterial environments in this foreign world are completely different from the D sphere. Without surgery, do you really rely on your Goldfinger to survive in here?"

Lei Xue:" ..."

Chapter 637 Lei Xue -PartII(ii)

"This place is called Cloud City. It's the first Otherworld outpost of our Neptune Corporation. It has all the advantages of a maritime port that none of the other forces have. It's currently in a period of flourishing development!"

Lei Xue carefully followed behind Li Goudan as she listened attentively to the other party's introduction...

She looked around curiously. The environment here was indeed very good. It was exquisite and had a different urban style. The blue sky was as clear as water, and there was almost no industrial pollution in the air. It was rare in the D sphere nowadays...

Moreover, this place was indeed different from the D sphere. The feeling of gravity was at least three times higher, but for some reason, she walked very naturally, as if her body had completely adapted to it. Could this be the effect of the surgery?

“What about the factions?” Lei Xue asked carefully, “Could it be that there are other factions besides Luo Fu Here?”

“There’s only one main faction!” Li Goudan continued to play with his own imagination, “But after all, Luo Fu has been here for a thousand years. After so many years, there have naturally been many small factions within!”

“This...” lei xue said blankly, “Does the upper echelons of luofu allow it?”

“What’s not allowed?” Li Goudan yawned and said, “Where there are people, there will be jianghu. where isn’t this the case? The formation of our Luofu faction is complicated. Different races, different ideologies, and even different academic factions will have their differences. After so many years, it’s normal for us to form many small factions...” . “...”

“Academic faction?”

Li Goudan: “Didn’t sect leader Qin tell you guys back then?”? Our Luofu has absorbed many outstanding scientists over the years in order to develop this Otherworld. However, after these scientists obtained the resources, they each created their own academic factions. There are fanatics who advocate mechanical evolution or biological evolution, Druids who pursue the return to nature, and many other comprehensive schools. Our Neptune Group is a comprehensive school of comprehensive genetic biology and mechanical magic power. You will understand this after you come into contact with new knowledge...” . “...”

Snow was stunned. Druid? Magic Power? What the hell. It sounded like a fantasy story, but although there were some strange words, the overall feeling was that... .. It was quite logical...

If Luofu had really brought all the famous scientists in history to this place, this kind of faction war might have happened. After all, there would definitely be people who were not convinced by each other!

After thinking for a while, she patted her face to make sure that she was not dreaming. Then, she looked around and asked in a low voice, “Then... are these... People from another world?”

Most of the people around her were a little like western white people, but there were still some differences in their facial features. They were taller, and their facial features were more three-dimensional. In general, they looked somewhat normal, but there were also some abnormal ones. She noticed that some of the people in the crowd had scales on their bodies, and some even had gills. Some of them had lower bodies that looked like snakes... ..

“Um...” Li Goudan nodded. “After the sect leader allowed us to enter the human world on a large scale, many forces began to absorb these people from other worlds as their basic labor force.”

“This...” Lei Xue was stunned. “What’s the difference between this and colonizing?”

“There’s no difference!” Li Goudan looked at her. “Is there a problem?”

“No... no problem...” Lei Xue shook her head and tried her best to suppress the excitement in her heart as she asked carefully, “Then... then how big is this mystical realm? Do you know how many people there are in this foreign world?”

“Very big...” Li Goudan touched his chin, with a very casual expression, he replied, “According to the comprehensive intelligence from the headquarters of the sect, the area of the continent we’re on is about 210 million square kilometers. As for the population... Today, the colonized population is probably in the millions . . .”

“Many... how many?” Lei Xue could not help but cry out, immediately causing a group of aborigines around to cast sidelong glances. Lei Xue looked around and hurriedly lowered her voice, “Lieutenant General Li, are you joking?”

\$210 million... . The entire D-sphere is less than 150 million square kilometers in land area. Did they just say land area? It didn’t include the ocean, right?

Even if it did, wasn’t this a little too exaggerated? Previously, the intelligence had said that the Luofu arcane realm was a fragment world. was this F \* cking called a fragment?

“UH, the temporary data is like this!” Li Goudan smiled and said, “The main reason is that we haven’t tried to leave this continent before. Although we didn’t set up a satellite, we predicted that this place should be much bigger than Planet D!”

Lei Xue was stunned on the spot. Her heart was instantly in turmoil. An otherworld resource that was even bigger than D sphere. The aborigines were ancient civilizations. What the F \* ck...

Did Luo Fu know what they were in control of?

Lei Xue took a few deep breaths before she slowly suppressed the raging waves in her heart. She looked at Li Goudan, who seemed to have noticed nothing, she asked carefully, “Lieutenant general Li, I wonder how long we engineers will be working here?”

“Isn’t it written in the contract?” Li Goudan turned around and looked at her with a frown. “It’s effective for life!”

What the F \* CK, was that contract for real?

“I . . . This... Lieutenant General Li, this... This isn’t appropriate, right?” Lei Xue quickly said.

“You want to breach the contract?” Li Goudan looked at her faintly. “Colonel Lei, you have to think it through!”

“What breach of contract...” Lei Xue Didn’t know whether to laugh or cry. “That was obviously forced by you, okay?”

“You have to speak with evidence, Colonel Lei. When did this Lieutenant General Force You?” Li Goudan said seriously.

Lei Xue: “...”

This is... ? ... acting like a scoundrel? That’s not right. If the other party wanted to force her to stay here, did he need to do this? What was the difference between this and taking off his pants and farting? Or was there something special about that contract?

She suddenly remembered that after signing the contract, she seemed to have seen some strange phenomenon, and... .. She felt as if something was missing from her body...

While she was wondering, Goudan suddenly said, “You want to ask when you can go back on vacation, right?”

“AH? Uh... I. . . Have a vacation?” Lei Xue said blankly.

“Of course!” Li Goudan said seriously, “We are a formal company here. We invited you here to train important people, not to hire old slaves. How can there be no vacation?”

“Is... is that so?” Lei Xue looked at him in a daze. For a moment, she was not sure what he meant. After telling her so much, was he really willing to let her go back?

“Today, I will take you to familiarize yourself with the Environment Here!” Goudan Li said with a smile, “In two days, Sect Master Qin will give all of you scientific researchers a small holiday, but it can’t be too long. You have to come back and start work in three days. How is it? Do you have any questions?”

“No...” lei xue replied blankly, but her heart was filled with doubts... ..

What exactly... was this Luo Fu Planning?

Chapter 638: Vigilance

May 27th: Weather: Sunny... At least it’s sunny here...

This is my first day in the so-called Luofu arcane realm, and more things have happened than I expected. First of all, this place, no one thought that this was almost another world, if lieutenant general Li isn’t lying, this might even be a new world bigger than the D Sphere!

I carefully felt it. The environment here was indeed very different from the D sphere. It had a higher gravity and mass density than the d sphere, but as for whether it belonged to the space outside the D sphere... Whether this place was as big as the other party had made it out to be was still an open question. However, the living habits of the residents here didn’t seem like modern people...

I tried to communicate with the people here. I had not heard their language, but some of them seemed to speak our Huazhong Chinese... ..

When I came here, I was forced to undergo an operation. I heard that this operation was to let us adapt to the environment here. Whether it was true or not, it needed further confirmation, but it was true... I could clearly feel that my body could adapt to the gravity environment here. However, it could also be

an illusion caused by the surgery. Perhaps the gravity here was no different from the D ball. The specific situation needed to be further verified...

Speaking of surgery, I managed to get some information from Lieutenant General Li. Everyone who came here seemed to be subjected to a so-called genetic surgery. The surgical program seemed to be very different, there were many monsters similar to the Hulk in the base. This was very similar to the description of the Green Giant that was rumored to be causing trouble in South Africa under the name of the Dragon Group!

Furthermore, lieutenant general Li's body seemed to have been obtained through surgery. Here, it was speculated that this Luofu wasn't a traditional immortal cultivation force, but a force that possessed high-level genetic technology similar to the North American Extraordinary Corps, moreover, their technology here might far surpass that of North America. This also explained why the few members of the dragon group that were being observed had the strength of a high-level cultivator despite their young age!

I had also undergone the corresponding surgery, but my body didn't have any obvious changes. Perhaps I needed time to slowly evolve, or perhaps after I evolved, my mind would be controlled, or I would be able to transform into those green monsters in the base...

When she wrote this, Lei Xue's hand that was holding the pen trembled, and her eyes blurred slightly. Although she was a soldier, she still found it hard to accept the possibility that she might turn into one of those ugly green monsters in the base...

Just as she was thinking, a gentle knock on the door suddenly sounded in the room...

Lei Xue was slightly stunned. Then, she put away the diary that she always carried with her and quickly walked to the door. "Who is it?"

"Oh, Lord Lei Xue?" A gentle female voice came from outside. "I am the servant responsible for your daily life. My name is Nina. Lord Li Goudan has asked me to wait for her outside the city. Today, I will bring you to the port to familiarize you with the crew and the facilities on the ship!"

When Lei Xue heard the name Li Goudan, she still felt a little out of character...

She had heard this explanation before, saying that everyone had an alias here, but wasn't the alias Goudan a little too casual. It was better to call it cannon...

"I'll be down right away..."

"Alright, I'll wait for You Downstairs!"

After hearing the other party's light footsteps leave, Lei Xue hurriedly took out her diary and quickly wrote down:

May 27th, around 9 am. (I don't know the exact time. After the clock and cell phone arrived here, they seemed to have been affected by an unknown magnetic field, causing them to malfunction.)

Lieutenant General Li called people to let me go to the port to familiarize myself with my work. I remember that very casual contract said that my job was a first-class engineer and the vice-captain of the battleship. I don't know what exactly this job was, but presumably it has something to do with ships, and judging by the wording of the battleship, could it be that Louvre already has a military ship here?

I'll have to check it out before I know it. I hope it doesn't come to that.

After closing the notebook, Lei Xue Thought, in the room to find a secret place to hide, then took a deep breath, then opened the door to go out.

-----

Inside the base...

Xi Ye looked at the rain woman on the opposite side of no melon slightly sighed: "I do have the highest authority to modify the contract, but this kind of precedent can not be opened carelessly, otherwise everyone like you to demand, then what is the meaning of the contract?"

"You those scoundrel contracts originally ought to change good not?" Rain woman has no melon to stare a way.

"Cough...". Xi Ye coughed lightly and sighed. "Didn't you want someone with a better aptitude?" ? There's no need to be anxious. Lei Xue is only one of thousands of outstanding people. There's no need to hurt the peace between her and Li Goudan. I, Xi Ye, will leave the next assessment to you. How about that ? Let's get down to business ... ."

Rainmaiden, WUGUA, snorted coldly and turned on the virtual screen. What appeared on the virtual screen was actually a locust-like insect.

However, this insect was much more ferocious than the locust. Its entire body was pitch-black, and its teeth were serrated. In the video, it kept hitting the equipment that covered it ferociously, appearing extremely irritable!

"This is the creature that attacked the East Sea port last time!" Rainless melon frowned and said, "The creature's strength can't be seen as Level 2. It must have evolved from an insect with weak vitality. It mainly relies on numbers to produce destructive power. It has dissected several of its internal structures. The structure is simple, and there is no external biochemical surgery. It seems to have evolved naturally by relying on the mutated energy of the map of the Black Goat. It can basically be ruled out as a special biological weapon. However, this insect shouldn't have crossed the mutated zone to travel so far on the sea. It's probably man-made...". "..."

"A Level 2 lifeform?" Seer pondered for a moment and whispered, "According to the players in the Gondolin, there are already suspected level 6 lifeforms appearing at the highest level of the mutated map. Isn't this lifeform's level a little too low for human probing?"

Rainmaiden, WUGUA, also frowned and said, "Lord, what do you think?"

Seer said, "Either they're trying to paralyze us, but this kind of paralyzing technique is relatively low-end, or... they can only use this kind of thing to probe!"

Rainless melon's eyes lit up. "Lord, what do you mean?"

“HMM... it seems like that one hasn't come out yet...”seer smiled. “They can't even get in touch with their own forces. Otherwise, the power that the undead can control wouldn't only be at this level...”

“Then... if that's the case, do we need to continue to increase our exploration efforts and find their nest before they come back?”Rainless melon asked.

“We can't rush this...”seer shook his head and said, “Right now, the players'levels can't keep up with the speed of the Black Goat Matrix, and we don't have the strength to explore it either. We can only take it one step at a time. However... we have to tell the players to be careful...”

Rainless melon was stunned when she heard that, but she immediately reacted. Since the undead had already begun to probe, they might even launch an attack. It would be very dangerous if the players with lower levels encountered them.

After all... ... Undead! ... they were existences that could cause players to truly die!

Chapter 639 Wang Ye?

“What a beautiful sea...”

Lei Xue stared blankly at the sea surface of the East China Sea port. After the establishment of the federation, although they had tried their best to maintain the ecology and improve the management of the sea surface, she had rarely seen such a clean and beautiful sea surface...

The sea surface and the blue sky in the distance formed a line, giving people a feeling of emptiness and pure beauty. It made her feel like she wanted to hug it...

“Colonel Lei Xue, right?”A gentle voice rang out, interrupting Lei Xue's longing. She turned around to look, only to see a man wearing strange glasses walking over.

“Hello, I am the chief engineer of the Sea Emperor Group, Candy!”The man's expressionless face forced out a smile and said, “Today, I will mainly bring you to familiarize yourself with the crew and the environment on the ship. After that, I will explain your future work arrangements to you...” . “...”

“Oh...”Lei Xue came back to her senses and quickly took the initiative to shake hands. “Hello, Hello, please give me your guidance!”

But in her heart, she thought to herself, ‘it seems that the people here use traditional aliases. Do I have to use one after that?’? ‘what should I call it?’?

The other party replied with a handshake and nodded. “Please follow me...”

While speaking, Lei Xue followed the other party all the way to the dock.

The dock here seemed very old and did not look like a modern port at all. However, at the very front of the dock, there was a huge shipbuilding workshop that was extremely modern. It was even a little sci-fi...

From Afar, Lei Xue could see that there were all sorts of large and small mechanical arms inside that were meticulously disassembling a small boat. That kind of delicate movements were like manual work

that required a hand to disassemble a model, even some parts the size of a finger were meticulously disassembled and summarized, causing Lei Xue to be slightly stunned.

Although she was not a mechanic, she knew that such a large robotic arm that was more flexible than a human hand was definitely not found on the D ball... At least not on the surface... ..

After that, she was led to Li Goudan's huge warship. Just like Wang Ye, the size of this huge warship also gave her a shock.

As someone who specialized in ship design, she naturally knew the disadvantages of such a huge warship. However, under the technical explanation and demonstration of this expressionless man, Lei Xue's heart became more vigilant.

The incredible firepower, the nimble robotic arms and the combination of the turret technology, the ability shield and large laser weapons that only appeared in sci-fi movies, as well as the exaggerated acceleration function!

It completely made up for the shortcomings of the large ship!

And these military technologies that were not realized on the D sphere were all realized on this ship, causing Lei Xue to be unable to help but ask all sorts of questions throughout the journey!

"How did you guys solve this kind of firepower's firing limit? What metal did you use instead? Won't the muzzle collapse because of this kind of efficiency?"

"So many turrets are folded and compressed in the cabin position?" "But shouldn't the folding and compression be in a fixed position?" "Why can the mechanical arm still fold and compress after moving them?" "Could it be that every place has a receiving port that accepts the folding of the turrets?" "But the size of each turret is different!"

"Are you using electrical energy for laser weapons?" "The energy required for a laser sweep of that level should be very exaggerated, right?" "Can this ship store so much energy? Or have you already broken through the miniaturization technology of the storage equipment?"

"Also, the range and direction of the laser weapon just now were so exaggerated. It didn't weaken at all from the beginning to the end. Logically speaking, the density of the atmosphere here is much higher than the D sphere. Is this laser weapon not affected?"

A series of questions shot out like a barrage of cannons, causing the usually reserved lei xue to start chattering like a little girl.

However, the man with a poker face patiently explained everything to her...

The more Lei Xue heard the answers, the more frightened she became. She was certain that the many technologies displayed on this ship were probably things that did not have a breakthrough on the D Sphere!

For example, the laser technology question she asked just now was also on the D sphere of the laser weapon. However, the shortcomings were very obvious. Firstly, the problem of energy consumption that she raised was a big problem, the miniaturization of energy storage technology had not broken through, so the laser weapon could not be loaded on a large scale.

The second problem was that it could not be used in all-weather operations. It was limited by fog, heavy snow, and heavy rain. Moreover, the laser emission system was a precise optical system, so it was also severely affected by the atmosphere, for example, the absorption of energy by the atmosphere, the energy attenuation caused by atmospheric disturbances, thermal halo effect, turbulence, and the attenuation caused by the beam jitter, and other defects.

However, these defects were completely not seen on the laser weapons that were loaded on the ship in front of them.

The other party explained that this was not entirely a laser technology, but a plastic energy technology. In terms of energy, it was not electric energy that was diverted, but a ray energy wave that could guide and compress the energy of any element.

It could compress the energy of other elements. This made lei xue even more surprised at the level of technology they had mastered. It seemed that lieutenant general Li was not exaggerating. The technology here was really far ahead of the world... ..

This information... had to be brought back!

Just as she was thinking about it, the man named Candy Bean had already brought her to the deck. The many crew members on the deck lined up as if they had been waiting there for a long time.

“Captain Li Goudan, you should have met her before. I Won’t say much about her situation.” Candy bean smiled and said, “Let me introduce you to the current core crew members!”

“Oh...” Lei Xue came back to her senses again and quickly replied with a smile, “Okay...”

Candy Bean said, “Li Goudan assigned you the rank of vice-captain on the ship, but that’s because she doesn’t understand the crew structure. In fact, the job you’re responsible for should be the chief engineer’s job...”

Lei Xue nodded. She was born in the navy, so she naturally knew what a chief engineer was. A chief engineer was equivalent to the technical supervisor on the ship, and was the technical chief of the ship’s machinery, electricity, and electrical equipment. She was fully responsible for the production and administrative management of the engineering department.

Indeed, with her profession, if she wanted to board the ship and sail far away, she should be in charge of this aspect.

“This is Wang Ye, the first mate on the ship!” The other party continued, “He is responsible for the daily work of the deck, assisting the captain in the safe production and navigation of the ship, and being on duty during the voyage. He is in charge of cargo handling, transportation, and the maintenance of the deck department. He is responsible for formulating and organizing the implementation of the various work plans of the deck department. He is responsible for drawing up the cargo stowage plan, maintenance plan, and so on...”. At this point, the sweet pea lowered her voice and said, “If you encounter anything, you should look for him. That captain of yours.. .. He’s actually a complete amateur... ..”

“UH... is that so...” the corner of Lei Xue’s eyes twitched. She did indeed think that lieutenant general Li was not very reliable. She did not expect her colleagues to say so.

But... .. Lieutenant General Li was not reliable, but the ball in front of her was reliable?

Lei Xue looked at the green fur ball called Wang Ye... .. Her face became more and more strange... ..

Wait... Wang Ye?

Suddenly, this name made her heart jump. She suddenly remembered a piece of information that elder Tian had told her before. Lieutenant General Li seemed to have taken a special forces captain to Luofu before organizing this big exam.

This captain's name... seemed to be called Wang Ye!

Chapter 640 So Selfless?

"This is Morsenkin. Gelkki is my mechanical alchemist apprentice. Originally, we were short of assistants in this field, but considering the importance of your task, we assigned him to you as an assistant. Now, he is mainly responsible for the responsibilities of the supervisor wheel. I hope he can help you... .."

Lei Xue, who had not recovered from the name of Wang Ye, was stunned when she heard this introduction...

She knew about the big tube wheel, commonly known as "Second rail". It was a engineer whose position was second only to the chief engineer. Usually, he was responsible for maintaining the normal working order of the engine room. He was generally in charge of the propulsion and additional equipment, boiler and the use and maintenance of lubricating, cooling, fuel oil, starting air, overweight power and emergency equipment.

But what the hell is a mechanical alchemist apprentice. This title: . . Is it a job?

She looked up and saw the man named Morsenkin. He looked very strange. His skin was grayish-brown, like tree bark. His sea-blue eyes were filled with the precipitation and wisdom of time, he looked like a wise man with a lot of knowledge, not an apprentice.

He thought to himself, are they the aborigines here? But are all the aborigines here so strange-looking. Or... ? Was he also a person who had undergone genetic surgery?

Jelly Bean didn't seem to notice the strange expression on Snow's face, and continued to introduce the personnel with the form...

This was second officer Wilson: in charge of the proper use and daily maintenance of the driving equipment, including navigational instruments and rudders; in charge of the navigational book materials, announcements, daily management and correction, and the logging of various records.

This is third officer Johnny: in charge of the routine management and maintenance of the life-saving and fire-fighting equipment.

And second officer Leonard: in charge of the use and maintenance of auxiliary and auxiliary systems, emergency energy systems and fuel tanks, barge pumps, energy separators, air compressors, energy separation equipment and sewage tanks.

Third Officer Howard: in charge of the auxiliary boiler and its auxiliary systems, various water pumps, deck machinery, emergency equipment and various piping works.

Penny: in charge of the technical management of the ship's communication and radio navigation equipment...

Lei Xue listened carefully to the other party's introduction. When she heard the energy separation equipment, she narrowed her eyes slightly and thought to herself, energy equipment? Isn't it an oil separation equipment. Could it be... ? ... that this ship has already separated from oil energy?

Candy said, "The main backbone candidates have already been arranged for you. The sailors are still in training."

"Training?" Lei Xue was stunned.

"AH...". Candy nodded and said, "This East Sea port was originally a place that was not valued by this aboriginal empire. The residents here are mostly fishermen and do not have the experience of steering a large ship. Therefore, it requires a short period of training. It is estimated that there are about ten days left. After that, other essential personnel such as mechanics, waiters, cooks, doctors, and so on are also being recruited "... "..."

Lei Xue's expression became more and more strange. They had even built such a black-tech ship, yet they were still lacking this much?

What was the situation in this place?

Moreover, did she just hear the words 'Aboriginal Empire'? What did it mean? Could it be the Aboriginal forces in this place?

Lei Xue quickly pondered in her heart. It seemed that lieutenant general Li was right. This Luo Fu had been here for a thousand years, and he didn't seem to have tried to interfere with the local forces in the past. Otherwise, he wouldn't have such a technological ability and still have the indigenous forces... ..

This could be seen from the things he had done after North America landed on the American continent... ..

But he still had to ask that guy about the structure of the forces... ..

Thinking of this, Lei Xue sneaked a glance at that green furball...

"That's about the personnel situation..." candy continued mechanically, "Then I'll briefly explain your work arrangements!"

Hearing this, Lei Xue immediately straightened her body and looked at the other party seriously. She was actually very curious as to why Luo Fu wanted to send technical troops over... ..

"First of all, your temporary job is to be the chief engineer of this warship. You will assist Sir Li Goudan in opening up the East China Sea Route and collect information on the specific situation of the countries in the western archipelago, including the topography, national civilization, population distribution, and so on..." "..."

“Opening up... A Route?”Hearing this, Lei Xue was stunned again. “Do you... still have any unexplored routes?”

“Of course not...”. “...”candy looked at her and said, “Our Sea Emperor Group is the first force to choose to explore the sea area. The Western Archipelago has always been in an unknown region to us. The regular routes to that place in the past couldn’t be opened up due to certain reasons, so we need to open up a new route.”

Lei Xue swallowed her saliva, and her breathing immediately became rapid. She carefully asked, “You... still have unexplored areas here?”

“Of course!”Candy said seriously, “According to our predictions, the continent we’re currently on occupies the entire planet... Cough Cough, the entire arcane realm is probably only one-sixteenth...”

“But... previously, lieutenant general Li said that this continent is more than 200 million square kilometers!”

“That’s right...”candy looked at her and said, “Didn’t she tell you that this continent is only a part of the mystical realm?”

Lei Xue:” ...”

Looking at the serious look on the other party’s face, Lei Xue was even more speechless. With such a huge amount of resources, it was hard for her to imagine how much social unrest would be caused if this matter was exposed!

Candy said, “Of course, there are many technologies on the ship that you don’t have there. You Don’t even know some of the basic principles. Therefore, before the ship sails, you have to undergo training and absorb new knowledge. As the chief engineer, not only do you have to learn how to maintain the equipment on the ship, you also have to know the general principles of the ship’s technology!”

“Training... absorbing knowledge?”Lei Xue stared at the other party in a daze. “You... you are willing to teach us this technical knowledge?”

“Of course!”Candy pushed up her glasses. “Otherwise, how can it be called cooperation?”

Lei Xue took a deep breath. For a moment, she didn’t know how to reply.

When she heard about the previous intelligence, she originally planned to hide here and try her best to plot these technologies for the country. However, she also knew that it wasn’t an easy thing to steal the core knowledge of the technology, the other party should have made sufficient preparations to seal off the technology. It should be impossible for her and the others to have access to the core technology.

However, from the tone of the other party, it did not seem to be the case.

They actually planned to impart the knowledge without holding anything back?

What exactly was Luo Fu Thinking?

In order to confirm, lei xue carefully asked, “May I ask, what kind of technical training did you mention just now?”

“All of them!” Candy Bean said slowly, “Lord dog egg hired you with 5% of the shares not to let you be a crew chief forever. Later on, you still have to participate in the design and development of the group’s new ships, so you have to master the existing basic principles and core technologies... .”

Are you serious.

Snow looked at each other in disbelief, thought: this Luofu... . Really ... So Selfless?
