

A Bunch 641

Chapter 641 Intelligence

May 28th: Weather: Sunny...

This was the second day I arrived at the Luofu mystical realm. The amount of intelligence I received on this day was even greater than I had imagined. Firstly, I confirmed that this place possessed advanced technology that far surpassed the world. Judging from the firepower displayed by that [dog egg], I'm afraid that even if we mobilize an entire fleet, we might not be able to take it down...

When she wrote this, Lei Xue wanted to try her best to make the atmosphere more serious, but... .. the name of this warship really could not make this sentence more serious.

Perhaps this was lieutenant general Li's intention? Did that seemingly unreliable guy actually have such a scheme?

Just as she was thinking about it, there was another knock on the door. Lei Xue placed the diary in a secret place as usual and quickly walked to the door.

"Who is it?"

"The 14th Legion, the former captain of the second team of the Flood Dragon, Wang Ye!"

Lei Xue's heart tightened when she heard this. She quickly opened the wooden door. The cute hairy ball was floating outside.

Lei Xue looked at him and then looked outside.

Wang ye sighed, "There's no one else. Let's talk inside..."

Lei Xue nodded and waited for Wang Ye to enter before slowly closing the door.

Lei Xue was not pleasantly surprised by Wang Ye's sudden arrival. On the contrary, she was full of suspicion. After all, he had come directly to her in broad daylight. It did not seem like he was here to provide information.

"Captain Wang, right?" Lei Xue sat down and smiled. "May I ask why you are looking for me?"

Wang Ye: "To provide information..."

Lei Xue: "..."

This guy... doesn't play by the rules...

But should I trust him?

It was definitely not right to directly suspect a comrade. Lei Xue took a breath and looked at him suspiciously. "Captain Wang, shouldn't this kind of thing be more secretive?"

Wang Ye: "Here... I don't know how to be secretive..."

“What do you mean?” Lei Xue frowned.

Wang ye said, “The management here is very different from what you think. For example, the Neptune Group we’re in now is called a group, but there are less than ten high-level core members. With You and me...”

Lei Xue was stunned. I’m actually a high-level core member?

“Don’t be surprised...” Wang Ye looked at her faintly and said, “You’ll know when you get familiar with this place. Your authority is greater than you think. As far as I know, you can now read all the technical information of this group!”

Lei Xue’s heart skipped a beat when she heard that. She clenched the cloth on the sofa tightly with both hands and asked in disbelief, “Why?”

“I don’t know either...” Wang Ye shook his head and said, “It’s as if... This place is not guarded against outsiders like us...”

“How is this possible...” Lei Xue muttered. Then, she looked at the other party with puzzlement, “What did you say just now that you don’t know how to hide it?”

“Because on the surface, it’s very lax here!” Wang ye sighed. “As I said just now, there are less than ten core members of the Neptune Group, and although the surrounding aborigines are under the jurisdiction of the group, they don’t seem to know anything about us outsiders. Many of them don’t even speak the language of our world, and I don’t usually see these people monitoring and protecting me.”

“Then... What about those core members?” Lei Xue asked.

“Those people?” Wang ye sighed. “They are very busy. Except for Li Jiayi who is relatively free, the other core members are usually very busy, especially those developers. They are basically busy with research all day long.”

“Developers? Is it a kind of occupation?” Lei Xue quickly asked.

“It’s a profession, but it’s also a kind of bloodline!” Wang ye lowered his voice and said, “This is one of the basic information I brought to you today.”

“Bloodline?” Lei Xue squinted her eyes, and her entire person became nervous. “Is it related to that genetic surgery?”

“It seems like you’ve realized it...”. “That’s right. Bloodlines are obtained through genetic surgery. The so-called developer is a kind of bloodline. After receiving this kind of surgery, the part of the brain’s nerves will be greatly developed, and their analytical ability will far exceed that of an ordinary person. They can even drive their spiritual power to affect the material outside, and you’re undergoing this kind of surgery!”

When Lei Xue heard this, she was shocked and thought to herself, as expected, this surgery is not purely for adapting to the environment.

“Then... then what about you?” Lei Xue asked with concern.

“Me Too...”. Wang ye nodded and said, “The surgery I performed is also a type of bloodline surgery. It’s different from developing your brain. Our kind of surgery develops the body’s hard attribute abilities. At the beginning, there were some Green Giants at the place where we came from. Did you see them “? That’s also one of the bloodline surgeries!”

“Then... are those people really modified by humans?” Lei Xue looked horrified. “Is there no one who resists this kind of anti-human thing?”

“No one resists...”. Wang ye shook his head solemnly and said, “Because all the people who have undergone the surgery have received benefits and obtained supernatural powers. It’s the same for you. When you get used to the power your body has obtained, you won’t have any aversion to this surgery.”

“But...”. Lei Xue stood up and said, “My situation is still fine. At least my body is still there. You guys.. ... Do you really not mind that you have become like this ? Even if you have obtained power, you can still become such an ugly monster “ ...”. “ ...”

“What Part of Me is ugly?” Wang Ye immediately interrupted the other party.

“Uh...” Lei Xue looked at Wang Ye’s silly and cute appearance and was stunned for a moment. Then, she said, “But... but this, are you willing to be like this? Don’t you want to change back at all?”

“I can change back at any time...”. “...” Wang Ye sighed. “This is also the amazing part of the genetic surgery here. While they created a new genetic body for you, they also retained your previous body. You can return to your previous appearance at any time.”

“AH? What... Do You Mean?” Lei Xue was stunned.

“Have you seen the Avatar?” Wang ye sighed. “It’s just like there. Our spiritual bodies can be switched between two bodies at any time. Now, I can also return to my human form at any time.”

“This... is that so?” Lei Xue instantly understood what Wang Ye meant. If it was really as Wang Ye said, then the negative emotional effects caused by the genetic surgery might really be negligible.

After all, most people wouldn’t object to having a body with special powers if they could keep their previous body, right?

“No... no side effects?” Lei Xue quickly asked.

“I haven’t found anything yet...” Wang Ye shook his head. “Maybe, but at least I don’t know now...”

Lei Xue took a deep breath and slowly sat down. She looked at him seriously. “Captain Wang Ye, what other information can you provide?”

Wang ye nodded and said, “I came not long before you. The most I know now is the basic information about genetic surgery. I’ll explain it to you in detail. You record it and report everything to the higher-ups when you go back.”

When Lei Xue heard this, she hurriedly asked, “Why don’t you go back and report this yourself?”

“I can’t go back...” Wang Ye shook his head. “But you can. After Tomorrow, that woman called Qin Xuanji will take your group of technical soldiers home once...”

“You can go back tomorrow?” When Lei Xue heard this, she was pleasantly surprised, but at the same time, she was full of doubts. “Why? Does this Luo Fu really not care about information leaking?”

“I don’t know either...” Wang Ye looked around. “I don’t even know if I’m being monitored right now, but this is all we can do now...”

Lei Xue nodded when she heard this, but she didn’t feel relieved. Wang Ye’s visit today was probably tacitly approved by the higher-ups, which meant that Luo Fu wasn’t worried about Wang Ye leaking out the information.

In other words, this was most likely information that the higher-ups of Luo Fu were willing to release.

They... what exactly were they planning?

Chapter 642 did he not take any precautions?

On the third day, after Lei Xue had familiarized herself with the environment of the research base, sweet pea informed her to look for Li Goudan in the afternoon, saying that he would arrange for them to return to the modern world for a vacation.

When Lei Xue heard this, her heart skipped a beat. Although she had heard from Wang Ye yesterday that they would be released today, she still could not quite believe it. Would Luo Fu really release them, who knew so much information?

With a skeptical heart, Lei Xue immediately chose to look for Li Goudan as soon as she came out of the laboratory.

Although Cloud City was exquisite, it wasn’t big. It wasn’t even as big as a county town in central China. Moreover, almost everyone in the city knew lieutenant general Li, so they could easily find out where he was.

It only took lei xue half an hour to find lieutenant general Li in a restaurant called Goudan seafood.

Lei Xue had heard from sugar pea that this restaurant was opened by another big shot called Goudan, who was a partner of the Neptune Group.

However, Lei Xue was very confused. was the word Goudan very famous in Luofu? Why was it called that?

The restaurant’s decor was very similar to the style outside the city. It was filled with an elegant and dreamy sense of beauty. Due to the exorbitant prices here, only a few core members would come to visit, the local Aborigines rarely came here, which led Lei Xue to find Li Goudan who was eating the moment she entered the restaurant.

Although Li Goudan was a person, he ordered a lot of things, but they were all things that Lei Xue couldn’t recognize.

Blue transparent crystal-like shellfish, light purple fish fillets that were as thin as paper, and blue prawns that were as beautiful as works of art looked even more exquisite than some colorful pastries.

At this moment, Li Goudan was using a small knife to pry open an amber-colored oyster. She skillfully pried open the oyster shell, revealing the sparkling milky white meat. She squeezed a bit of juice that looked like lemon fruit, and then took a beautiful sip, immediately, a satisfied happiness appeared on her face.

Lei Xue was slightly stunned by this expression, but she immediately reacted and said, "Lieutenant general Li, they said that they can go back to the modern world for a vacation today, and they asked me to come find you..."

"Oh..." Li Goudan nodded. "There is such a thing..." then, he smiled and looked at the other party. "Have you eaten?"

Lei Xue originally wanted to say that she had eaten before, but her stomach let out a disappointing growl. Then, her face turned slightly red.

It wasn't that she was really that hungry. It was just that her body was simply too weak to resist the ingredients here.

At first, she felt a little bit of pressure eating those strange seafood species, but after tasting them once, she found that she was a little lost!

As a scion of a noble family, it wasn't that she hadn't eaten those high-grade ingredients, such as Kobe beef, Italian alba white truffles, amas caviar, bluefin tuna, ... The article described how delicious these things were, but when she really ate them, she felt that they weren't as delicious as a plate of pan-fried salted meat covered rice...

The ingredients here really let her experience the so-called high-class delicacies. The texture of the meat made her fall in love with seafood for the first time... ..

"Have a taste?" Li Goudan pried open another amber-colored oyster and handed it to Lei Xue.

Lei Xue hesitated slightly. Although she had eaten a lot of seafood here, it was her first time eating it raw. The main reason was that her eating habits did not like this kind of raw meat cooking.

"Try it!" Li Goudan bewitched her, "I'm not used to eating raw food in the beginning, but it's really different here. You'll know after you try it."

Lei Xue nodded when she heard that. She did not want to lose face, so she gently picked up the oyster and took a sip.

At first, she only wanted to taste the meat, but she did not expect that once the tip of her tongue touched the milky white meat, she could no longer control herself. That faint sweet taste made her completely addicted to it, unknowingly, she had sucked the oyster meat in the oyster clean.

After eating it for half a day, she didn't recover from the natural and delicious taste.

Knowing that Li Goudan asked with a smile, "How was it? I didn't ignore you, right?" As he said that, he passed another one over.

Lei Xue smiled embarrassedly and conveniently took the oyster.

“Have you gotten used to it these two days?” Li Goudan asked with a smile.

Lei Xue, who was eating delicious food, was stunned when she heard that. She immediately nodded, “Yes, it’s very good... the working environment is much better than I imagined.”

Actually, before she came here, she had thought that she might encounter a very tough environment, but the reality was completely different. The room that was decorated like a work of art, the high-quality air, and the mild climate that made people happy... And the delicious food that she couldn’t stop eating... ..

To be honest, if it weren’t for the mission, she would have wanted to stay here forever.

“That’s good...” Li Goudan stretched and then said seriously, “But Colonel Lei can’t be too addicted to the excellent environment now. When we get on the ship and start sailing, the conditions will be tough.”
“...”. “...”

“Is that so...” lei xue’s eyelids twitched slightly.

She had seen the situation on the ship. The rooms prepared for the core members were extremely luxurious, and they were even better than where she was living now. There was an automatic circulation of fresh water in the cabin, not only was there a huge freezer that could store all kinds of seafood and meat, but there was also an ecological cultivation system that kept fresh sea creatures and sea plants in circulation at all times to ensure that fresh ingredients could be provided.

Moreover, there was also a theater, a bar, and various entertainment facilities on the ship. This kind of configuration... .. If they did not encounter a shipwreck, would it really be very difficult?

However, a certain dog egg did not seem to feel it at all, he said seriously as usual, “Opening up a route is an extremely difficult task, but I believe that with the tenacity that Colonel Lei has developed over the years in the army, he will definitely be able to overcome all of this!”

“I think so...” Lei Xue looked at the other party’s serious look and replied with a strange expression.

But opening up the Sea Route? It was actually a pretty good job...

Lei Xue’s eyes revealed a trace of yearning. The unknown domain, the exploration of the sea route... This kind of thing, she thought that she had already missed that era. She did not expect that she would still have the fortune to experience it in her lifetime.

“Oh right, lieutenant general Li, when will our mission to open up a shipping route set off?” Lei Xue asked curiously.

“Soon...” Li Goudan said as he peeled the shrimp, “The sailors’ training is almost coming to an end. The selection of the boatswain should be confirmed today. I have borrowed two chefs from Wang Goudan. I also have a direction for the selection of doctors and pharmacists. The rest is to wait for you to come back and learn the basic techniques before you can set off.”

Lei Xue: “So that big shot is called Wang Goudan...”

Li Goudan: “What?”

“Oh, no...” Lei Xue quickly changed the topic and asked, “It will take me quite some time to fully understand the technology of this ship, right?”

“It won’t take long... you developers learn things very quickly...” Li Goudan said as he handed the peeled shrimp to Lei Xue’s mouth. “Come, open your mouth...”

“Uh...” Lei Xue was stunned. Looking at Li Goudan’s white fingers holding the shrimp, and that angelic sweet smile, her heart suddenly jumped, and she subconsciously opened her mouth...

The Lei family’s style was solemn. In her memory, it seemed that only when she was very young did her mother feed her like this... ..

“Is it delicious?” Li Goudan continued to ask with a smile.

Lei Xue’s face turned slightly red. Then, she lowered her head and picked up a peeler.

“Eat quickly, eat quickly. After eating, I’ll bring you to the teacher’s place to gather. In the afternoon, you can go back...”

Hearing this, Lei Xue’s body paused for a moment. Then, she raised her head and looked at Li Goudan, who was smiling so brightly. She thought to herself, “These people... are they really not on guard at all? Towards us...”

Chapter 643 Return!

“Big Hairy, I, Goudan, officially appoint you today to temporarily assume the position of the boatswain of the Goudan. You will be responsible for...”. Goudan looked at the duty sheet and coughed lightly. “Under the leadership of First Mate Wang Ye, you will be specifically responsible for the work of the Carpenters and sailors. You will be responsible for the maintenance and repair of the anchors, cables, and loading and unloading equipment. You will lead the sailors to do the work of painting, sailing, high altitude, outboard, lifting, steering, and other craft work. The salary will be 4,000 points per day for one month. If you go out to sea, you will receive a subsidy of 200 points per day.”

The points here naturally referred to the points shared by the players’ Alliance. It was a point system that everyone imitated how Gondolin had built up together in the end.

“Yes, Sir Captain!” The simple and honest man nodded and bowed in response. However, he immediately put on a bitter face and said, “Sir Captain, can we not use this name? Just Call Me John.”

“John...”. “...” Goudan immediately frowned. “Your names are all the same here. If it’s not John, it’s just jack. There are already several John’s on the ship, how can I share them? If you’re not satisfied with being called Big Mao, then I’ll Call You Big Dog from now on!”

“Then... It’s better to be called Big Mao...” the big man cried.

Goudan nodded in satisfaction. “Next is er Mao. You’ll be the No. 1 sailor. You’ll be responsible for steering, the sailor’s duty schedule when sailing, and overtime maintenance work. San Mao will be the No. 2 sailor. You’ll be responsible for bringing the cables, retracting the gangway, and all kinds of craft work on the deck...”. “...”

The few sailors behind quickly responded. They did not have any objections to their names like the boatswain. They were afraid that they would become like the boatswain, such as Er Mao and San Mao...

They all said in unison, "Yes, Captain!"

"Mm..." Gou dan nodded in satisfaction, then, he looked at Candy, who was at the side, and said, "The chefs who came from me, Wang Gou Dan, were all meticulously trained by my father, Gou Dan. They are proficient in all kinds of culinary skills. They are also proficient in making pastries and alcoholic beverages. The doctors and pharmacists are high-level shamans and witch doctors who are invited by the cabbages. They are all personally trained in surgical skills by cabbages. The Witch Doctor is also proficient in making all kinds of high-level potions. It cost this Gou Dan a lot of money..." "..."

Candy Bean nodded. "I've helped prepare the other waiters and handymen. Now, all we need is Lei Xue, the chief engineer. Did the instructor say when she will be back?"

"I heard that she will have a three-day holiday..." Li Goudan puffed his cheeks and said, "I really want to leave as soon as possible!"

Meanwhile, Wang Ye, who was floating behind the two of them, had a complicated expression on his face.

From their tone, it seemed that they did not care about what Lei Xue would reveal when she returned...

...

"Wang Ye, are you looking forward to it?" Eggface turned around and looked at him with a smile.

That cute look made Wang Ye's breathing stop for a moment. He subconsciously nodded and said, "I'm looking forward to it..."

"I knew it!" Eggface Li happily grabbed Wang Ye and began to knead him.

Although Wang Ye was already used to being kneaded, his body did not protest as fiercely as before. However, this time, he had an inexplicable feeling in his heart.

If... ... If it were not for the external political factors, perhaps he would have been like Goudan, wholeheartedly looking forward to this voyage, right?

After all, as a free navigator exploring the new world, this was the kind of life that a special forces soldier like him wanted the most after he retired...

"Came back?" The first to come back Lei Xue Leng Leng looked at himself, the May Sunshine on the body let her have a very unreal feeling, unreal let her feel the body some floating.

But then I realized that it was probably a physical sensation caused by the weakening of gravity.

But a few seconds later, she was sensitive to find that her body is quickly starting to adapt to the environment, including gravity and air quality, in just a few seconds, she felt a lot less uncomfortable... ...

"Hey, which unit are you from?"

Just as Lei Xue was in a daze, a loud shout came from afar. Lei Xue heard the shout and looked over, then, she saw an officer with the rank of senior colonel walking over with big strides. "Don't you know that this is a restricted area now? Report your unit and name, Colonel!"

Lei Xue instantly reacted and immediately stood at attention with respect. She saluted and said, "Navy's 4th Corps, 76th Fleet, Black Dragon's chief engineer Lei Xue Reporting!"

"Lei Xue?" The senior colonel heard a slight frown, feeling that the name is familiar ah...

In a flash, come to think of it, Lei Xue? Lei family that Wench?

"You Are..." said the senior Colonel Dully.

"Sir, please inform the higher-ups at once, I have important information to see the Chief!"

"Still nothing?"

In the Yanjing Chinese Academy of Sciences, the leader frowned at academician Li dequn who came to report his work.

Opposite the leader, a bald old man wearing simple reading glasses sighed and shook his head. "The latest equipment has been used, but it hasn't detected the energy fluctuation in the square at all. Since the teleportation space was closed, there hasn't been a single trace..."

The leader also sighed, but he wasn't too surprised.

Although he followed the path of politics, he was actually a university student majoring in science and technology, so he knew some common sense and science. Let alone Huazhong, even North America, which had the most advanced technology, was still in its infancy, even North America, which had the most advanced technology, was still in its infancy.

Although some scientists had already calculated that an energy formula could open a physical plane and open a space passage, according to the formula, the energy required might not be enough even if all the nuclear power plants in the world were added together, this was only the preliminary prediction of opening a space passage.

As for how the space would be used after it was opened, where it would lead to, whether there would be energy disturbances and other problems, they had no idea at all because it was impossible to provide the energy needed to open a space passage with current technology.

Therefore, after the soldier reported that the other party had used a space passage to leave in front of everyone, the leader became unusually envious.

According to the theory, there should be traces left behind after teleporting here. As long as they could find the traces, they would be able to find Luo Fu's real coordinates.

Of course, this was only in theory. Not to mention that they had not found any traces, even if they did, they had no idea how to use the traces to locate the coordinates.

Moreover, even if they found the traces, how could they open the passage? This was an unsolvable problem.

The experts of the research institute had mentioned these difficulties to the leader, and the leader could understand them. However, he was a little unwilling to accept it. He thought that he should at least do something to find traces of them. What if he could use them in the future?

However, he did not expect that even this first step would be so difficult. The people of the research institute had tried their best, but they were still unable to find any traces... ..

“Sir Leader!”

Just as the leader was discouraged, an old man with the rank of general walked in quickly. He said excitedly, “There... there’s someone back there. They said that they have important information to report to you!”

The leader’s heart jumped when he heard that. He quickly asked, “Which one is back?”

“It’s Lei Xue from the 76th Fleet!”

The leader asked, “Is it the one who got first place in the previous examination? That Lass from the Lei Family?”

“Yes, my Lord!”

“Quick, call her over!” The leader immediately said with a face full of pleasant surprise.

“My Lord?” The guard who was responsible for the safety of the leader immediately frowned and said, “She’s the only one who came back. Shouldn’t we be a little more cautious?”

The leader was stunned when he heard that. He instantly understood what the other party meant. Lei Xue had been brought to an unknown place. It was unknown if there would be any changes after she returned. It was even uncertain if she was still Lei Xue.., there was a certain risk in meeting her in person at this time.

However, the leader only hesitated for less than two seconds before shaking his head. “There’s no need...” he then said to the general, “Just call her over!”

He thought very clearly that the central China authorities did not have the protection of transcendents. If they wanted to assassinate him, many sect elders would be able to do so. They did not do so because they did not dare.., after all, the current technological extraordinary force could not beat the army in a head-on fight.

However, Luo Fu did not have such concerns because the army could not find their base. However, it was because the other party had such an advantage that the leader was even more convinced that the other party would not act recklessly.

After all, with their current advantage, if they wanted to act recklessly, they could have done it a long time ago, right?

He was not worried about safety. He was just looking forward to the girl from the Lei family being able to provide him with some useful information...

Chapter 644 Intelligence Analysis (Part One)

“Are you sure about what you just said?”The leader was so excited that his whole body was trembling, with the help of the guards, he barely managed to sit down on the chair. The news was so shocking that he, who had seen countless big scenes, could not even stand still.

The land area that was bigger than the D sphere, the countless resources of the continent, the technology that surpassed the world by several levels., other than space jump, it also included energy compression, the manufacture of advanced machinery, and the incredible genetic modification technology that the other party had just mentioned that could preserve the original body!

It sounded even more ridiculous than a marvel movie...

Lei Xue: “The information on the land area came from Lieutenant General Li and a local insider who goes by the name of candy bean. The information on the genetic surgery came from the captain of the Flood Dragon Team 2, Wang Ye!”

“Wang Ye?”The leader thought for a while. He remembered the name Wang Ye. When Li Jiayi, the No. 1 member of the Dragon Team, went to Ba tie, Wang Ye was the support staff recommended by elder Li.

At that time, he had also read the information about him. He was a top-notch soldier in the army. Whether it was loyalty or individual ability, he was very outstanding. During this period of time in Ba tie, he had also received praise from his old neighbors.

Was the intelligence of such a person reliable?

The leader was somewhat puzzled. This was because Wang Ye’s resignation had been proposed by Li Jiayi. At that time, because the other party had proposed to directly bring Wang Ye back to Luofu, elder Li had judged that this condition was advantageous to us at that time, thus, he agreed to the other party’s request.

However, ever since Wang Ye left, not a single piece of intelligence had been leaked out.

If Wang Ye’s loyalty did not change because of Li Jiayi, then it meant that an outstanding soldier King like Wang Ye would not be able to leak any information out from within the Luofu and would be well controlled.

But at this moment, Lei Xue said that this information came from Wang Ye...

Was it reliable?

According to her, that was another space. It was understandable that Wang Ye was unable to bring back the information without the approval of the general, but if she was so careful that Wang Ye wouldn’t let him come back, why did she let Lei Xue come back so easily this time?

Thinking of this, the leader continued to ask, “Do you think this information is reliable?”

"I'm not sure..." Lei Xue hesitated for a moment and finally said, "It's a bit rushed to and fro. I don't have enough time to understand that place. I haven't even walked out of that small city called Cloud City..."

After pausing for a moment, he continued, "But there are some things that I can confirm. The gravity there is indeed much greater than here, and the density of the matter is also completely different."

"Are you sure that this isn't an illusion caused by your surgery?" The leader narrowed his eyes and asked.

"I've confirmed it over the past two days. It shouldn't be..." Lei Xue shook her head. "These few days, my body has changed a lot. When I look at things, my analysis speed is getting faster and faster. In the past, it would take me a few days to understand the profound knowledge. I could understand it with just one glance, especially those complicated formulas. In the past, those high-level energy formulas required a lot of time to understand with the help of computers, but now.. "...". "... it feels like adding, subtracting, multiplying, and dividing in elementary school. Mental arithmetic can almost solve everything." "..."

"Mental arithmetic..." the leader took a deep breath. He was also born in science and technology, so he naturally knew how exaggerated it was to be able to calculate complex formulas in his mind like memorizing multiplication formulas.

"Could... could it be an illusion? Have you verified it?" The leader asked with some excitement.

If what Lei Xue said was true, she could roughly understand why ROFO technology was so much ahead. A biological surgery that could enhance the utilization rate of the human brain... It could allow the human brain to operate like a supernucleus. The speed of scientific research was naturally faster than normal scientists...

"Not at the moment..." Lei Xue shook her head. "I can try to verify it later, but... on the physical level, I'm sure that this surgery is indeed effective."

"What do you mean?" The leader asked.

Lei Xue Gently waved her hand at the table. Then, she saw the ancient pens floating in the air one by one. This scene was like a superpower. The guards beside the leader almost could not help but draw their guns...

When the leader saw this scene, he was shocked, but at the same time, he became even more excited!

From the looks of it, there was at least a high-level genetic modification surgery over there... ..

However, there was still one suspicious point...

Was this Lei Xue The Real Lei Xue?

The leader started doubting in his heart. Thinking of this, he asked, "Why are you the only one who came back?"

"This... I'm not too sure either..." lei xue frowned and said, "When I came, sect leader Qin said that all the technical troops would come back, but I went earlier. She said that if I was in a hurry, she could send me back first..."

As soon as he finished speaking, the phone in the office rang. The leader's heart moved slightly, and he hurriedly picked up the phone.

"Are you serious? How many came back? All of them?"

"How about this... quickly organize them and call them all over. Then, call elder Li and Academician Peng to organize the analysis team to gather in the main hall!"

After giving his instructions, the leader slowly hung up the phone and took a deep breath again...

Until now, he still felt that it was a little unreal

Meanwhile, Lei Xue was quietly waiting for the leader to calm down. She could understand this feeling because when she first received the information, she was just as incredulous as the leader.

Anyone who heard these sci-fi stories would probably have this kind of reaction.

Just like that, the office was silent for about 15 minutes, only then did the leader slowly raise his head to look at lei xue and said, "Colonel Lei Xue, go wait in the conference room first and sort out the information. Wait for the soldiers who went with you to come back and analyze the statistics together!"

Lei Xue: "Yes!"

"Also..."the leader looked at Lei Xue Seriously. "These things are all first-class state secrets. Without permission, they are not allowed to be revealed in any form. Do you understand?"

The Thunder Snow listens to say a leng, immediately understand each other to point to what... .

When they say outward, they mean... ! Of course it's the Lui family! ! !

After Lei Xue walked out, that close old guard also just slowly from the shock, carefully asked: "Boss... . You believe what she said?"

The leader looked at this iron brother who had once blocked bullets for him and did not hide anything, he said bluntly, "If she is the real person, these words should not be false. As for which parts are deceived, we can analyze it through the team later."

"You suspect that she is not the real person?"The guard said in horror.

A creature called a brain worm in an interstellar sci-fi movie suddenly appeared in his mind, and his whole body shivered...

"At first, I suspected..."the leader sighed, "But when elder Li called and said that everyone was back, I didn't suspect anything..."

"Why?"The guard was stunned, "If they can disguise themselves, they can disguise themselves as the second one!"

"That's a hundred!"The leader rolled his eyes, "With this kind of large-scale replacement technology, why do we need to do so much? Wouldn't it be better to just replace US Old Men?"

Chapter 645 Intelligence Analysis (middle)

“What do you guys think?”

In the conference hall, other than the current big shots, there were also experts in various fields, including the sociology of scientific research and professional political analysts.

They were all real experts, and each of them was an academician of various disciplines, not the type who played around on the internet...

There were also a few technical soldiers like Lei Xue who provided more comprehensive information that stayed in the conference hall to help with the analysis.

“According to the information transmitted by many soldiers, other than Colonel Lei Xue who was at the port, most of the people are in the grassland area. There are also some people with high rankings who are gathered in a newly built big city.”

Academician Hong Shishan, who was in charge of geography, pointed at the virtual screen and analyzed, “Although they are all in the grassland area, the topographic photos of the grassland forces provided by each soldier are very different. Some are close to the hills, some are close to the sandy land, and some are in the Special Valley area. The belt, climate, and the surrounding detailed environment all indicate that these soldiers are not in the same place, and they are not close to each other. Although this does not prove that this is a space of billions of square kilometers, it can at least prove that this grassland is not small. However, we need more information on how big it is...” “...”

At this point, he paused for a moment and said, “Our Geological Institute’s suggestion is: the specific size can be focused on Colonel Lei Xue’s intelligence, because her work over there is a chief engineer who has opened up a new route. This kind of work is the best way to test whether that place is really that big.”

Everyone nodded.

Then, another old man wearing a gray sweater also stood up and cut to a few photos on the virtual screen.

This gray-clothed old man was called Fang Nanguo, and he was currently the person in charge of the general analysis department. Furthermore, the few photos he had taken were photos of the city in the main base!

Fang Nanguo pointed at the virtual screen and said, “After describing the environment that the soldiers encountered, we will now focus on the city of the so-called main base

“Based on the photos sent back by the soldiers who ranked higher, we can see that the so-called main base should still be in a newly built state. There are unfinished projects everywhere. However, the soldiers described that even in the newly built state, the scale and infrastructure of this city far exceeds the scale of any country in the world... “...”

As he spoke, he enlarged some of the city photos of the main base. When some of the old men saw those photos, their faces immediately turned strange.

Are these really city photos. Not... ? ... game photos? They must have added special effects, right? So Beautiful?

"I'm sure everyone can see that these photos look a little like a model from a sci-fi movie, right?" Fang Nanguo laughed.

Everyone nodded repeatedly.

"But in fact, these are the real photos. The soldiers took them with Huawei phones, and they didn't use any photoshop software except for the pixels..."

"Hiss..." everyone gasped. "If this is true... doesn't that mean..."

"Yes..." Fang Nanguo narrowed his eyes and said, "That Luofu already has enough manpower and material resources to build a city that is larger than any national capital in a short period of time!"

"I have a question!" One of them raised his hand and said, "Academician Fang, even if this city is real, how can you determine that it was built out of thin air? And how can you determine that it was built in a short period of time? You have to know that the history revealed by Luofu can reach up to a thousand years!"

"But the other party also said that it has only recently begun to appear on a large scale. In the past, they were all living in seclusion."

"You Believe This?" A group of people looked at him strangely.

"I believe..." academician Fang nodded and said.

"Academician Fang!" A woman in her sixties frowned and said, "We scientists can't rely on subjective things, right? We have to rely on evidence!"

"This is the evidence!" Academician Fang tapped on the screen and saw many pictures that were very similar to the city photos taken by the soldiers just now, but they were bigger and higher definition.

"This is?" Everybody looked at those big picture to Frown Way.

"These... is a call star sea the player in the game photograph comes out!" Hong Academician You You Way!

"Game?"

"A game?" A middle-aged man in a vacation suit at a suburban villa in San Francisco, North America, laughs. "A game that teleports people away? Are You Kidding Me, Yang?"

"I'm not kidding!" The man was officer Yang Rui, who had fled to North America. He did not look at the white man, but at the other Chinese man who was holding a red wine glass. "Is grandfather Huo Here?"

The Chinese man held the wine glass and looked at Yang Rui, frowning slightly.

The man said that grandfather Huo was his father and the current leader of the Huo Corporation. Although this was a Chinese power, it had accumulated over hundreds of years after the founding of the Federation and became an important financial group in North America.

The Huo Corporation had connections with many important political figures. Their investments ranged from IT, finance, pharmaceutical industry, and even shipbuilding. Other than firearms, they had reached their limits.

If it wasn't for the white people's exclusion, the Huo Corporation would have been able to become one of the sponsors of the *extraordinaire* corps!

It was a coincidence that the father and son knew Yang Rui. That time when they went to central China, their father went to the ancestral hall of the family head and met with a *extraordinaire* incident. That time, they almost lost their lives there.

It was thanks to Yang Rui's extraordinary logical ability that he brought the local experts to save the father and son. It was also because of that time that their father valued this young man named Yang Rui very much, he had wanted to invite him to work in North America several times.

Because he had experienced that extraordinary incident at that time, as one of the people saved, he also recognized Yang Rui's ability. He was also very happy that the other party came to look for them, however, he did not expect the other party to bring such a ridiculous matter.

"Brother Yang... regarding this matter... are you sure you want to tell the old man?" The Chinese asked in Standard Chinese.

"The old man will believe me!" Yang Rui said stubbornly.

Old Man Huo was the most intelligent and discerning old man that Yang Rui had ever come into contact with. If it was not for the old man's decisiveness, he would not have been able to save the father and son.

Based on his understanding of grandfather Huo, as long as the old man listened to everything he said, he would definitely believe him.

"Okay..." Huo shrugged helplessly. "Grandfather Huo is on vacation in Miami. If you want to see him, I will help you contact him..."

"Wow... Are You Sure?" The white man next to him was stunned. "Huo, Are you really going to use this reason to alarm the chairman?"

"I don't think so..." Huo sighed. "I'm sure the old man would be very happy to see Yang Rui, but...". He looked at Yang Rui and said, "Brother, the old man thinks very highly of you. Whether you want to join our consortium, start your own business, or even try to be a politician, we can help you. There's no need to use these reasons."

Yang Rui sighed helplessly, but he could understand. Normal people would have this kind of reaction when they heard these words.

"Alright, I'm here to start my own business. Help me contact the old man!"

“That’s right!”Huo Shao laughed. “Our relationship doesn’t need to use these things to trick children, but your story is pretty good!”

Yang Rui:” ...”

Chapter 646 Intelligence Analysis (Part Two)

“Game?”A group of important officials looked at the explanation of the game and asked in surprise, “Academician Fang? You Mean... This game on the market is actually the Luofu arcane realm?”

Academician Fang nodded. “Combining the content of the game revealed on the Internet and the intelligence collected by the soldiers, we have come to the conclusion that this game is actually a lie. It’s a trick used by Luofu to collect talented children!”

“What do you mean?”One of the bespectacled ministers of state could not help but ask.

“This game was released last year. Since it was released, it has gained a great reputation by relying on the novel game method revealed on the Internet. Many senior industry insiders even believe that this game has the ability to change the current game market. However, until now, the game has no intention of developing a large-scale test, nor does it sell activation codes at a high price like other games. Instead, it uses a random method to select players. This does not make sense from the motive!”

Academician Fang paused for a moment and continued, “As a simple game, it must be for profit. This game obviously has no intention of doing that. Even the operator it hired is a third-rate studio. Therefore, we infer that Luo Fu is using this game to collect high-quality candidates!”

“How can we determine that Luo Fu is using this method to select high-quality candidates?”The minister frowned. “How do they know who is high-quality?”

“We don’t know about this method for the time being...”. Academician Fang shook his head. “However, it is understandable from the analysis of motives. This method of using the game to conceal themselves, in a situation that no one could have thought of at the beginning, they actually had a lot of candidates to choose from. However, they did not start with the scions of aristocratic families or the scions of wealthy families who had more resources. Instead, they used a random mode. If we exclude the situation where there is no motive, the only possibility is that the people they recruited were actually carefully selected in secret. They are suitable candidates for the so-called genetic surgery!”

“Is genetic surgery also classified according to Aptitude?”An old man who looked to be in his seventies asked with a frown.

“Of course!”Academician Fang said seriously, “Although our Huazhong doesn’t have the technology in this area, we can get the information that the same surgery has a huge difference in the effects of different physiques. Take the North American Extraordinary Corps as an example. The second team leader that the Extraordinary Corps lost last time, the gene in his body called the blade empress, has yet to find a second person who can inherit it. This means that the effects of the same genetic surgery will definitely be different for different people!”

Everyone nodded in agreement.

“But why use the game method?”The old man asked in puzzlement.

“Of course it’s to hide!”Academician Fang said seriously, “If they openly took away so many people, it would definitely cause a commotion in the beginning. But now, the appearance of the virtual reality game has given them a very good cover. Using this method, the players have unknowingly become genetic test subjects. Not only were they unknowingly modified, I even guessed that many players even thought that it was a virtual world, doing things for Luo Fu without realizing it.”

“There’s such a Thing?”The Secretary of state rubbed his hands and said, “Genius, who came up with this idea?”

The leader rolled his eyes at him, then he asked curiously, “But according to the game’s information, there are also loopholes, right? For example, the game once mentioned that everyone was on a model similar to Mars in the beginning, and then there were a few players who followed that so-called lord to an alien civilization. Does this prove that Luofu is actually an alien force?”

“Uh...”everyone was dumbfounded. Why were they talking about extraterrestrials? Did they dare to talk a little more?

“This conclusion has been overturned by our team!”Academician Fang shook his head. “First of all, logically speaking, if Luofu is an extraterrestrial force with such a level of civilization, why would they use such a roundabout method?”

The leader nodded slightly. Even though the environment was peaceful, the natural principle of the law of the jungle had never dissipated, what would happen if an absolutely powerful civilization encountered a civilization that was far inferior to yours?

Academician Fang continued, “Moreover, from the beginning of this conclusion, we had already sent the MARS satellites of the astronomical observatory for a scan. If the other party really established such a large city on Mars, it would be impossible for us not to discover it... “Therefore, we came to the conclusion that the so-called alien background was a sci-fi background that Luo Fu deliberately created to make the players believe that this was a game.”

“How did he do it?”

“A virtual combination!”Academician Fang said seriously, “According to our analysis team’s analysis based on the available information, only a few players actually saw the alien civilization’s background that time. Since then, it has never appeared in the mission. Therefore, we concluded that the alien civilization city in the eyes of those players is most likely a virtual world!”

“Ah?”Everyone was stunned. “But didn’t you just say that this isn’t a game?”

“Not in general...”. “But that trick is!”Academician Fang laughed. “I’ve looked through all the strategies in the game. There were only a few players who went on that alien mission. They could have used a method to make the few players fall into an illusion, or even a virtual game scene. Then, Luo Fu could create a few large maps based on the images the players saw in the virtual world to show the background. Otherwise, why would there be no related missions after that?”

“That makes sense...”everyone nodded. Then, the leader asked, “What about the environment outside the base that is similar to Mars?”

“That environment might not be unique to Mars. We believe that it is probably a space between Luo Fu and the secret realm. However, we don’t know the coordinates. Furthermore, we think that it might be a key location that connects this new world to Planet D. It is also where Luo Fu’s base camp is located!”

The leader nodded. Even though it was a complicated statement, the general direction was not a problem. Just as the other party had said, if Luo Fu was really an alien force with such a large civilization.., there was no need to create so much mess. This was not a movie!

“Does that mean that what Qin Xuanji said is most likely true?”The leader asked.

“Yes, but not all of it is true!”Academician Fang said with a smile, “There must be a lot of details that they have not revealed.”

“In what specific areas?”The leader narrowed his eyes and asked seriously.

“For example, internal conflicts!”! Academician Fang also said seriously, “Has the leader ever thought about why Luo Fu wants to cooperate with us? “They can clearly rule that new world with their own ability and technology, so why do they want to share it with the rest of us?”

“This...”the leader was stunned, and then looked at the other party in confusion. This was the question he wanted to know the most.

From the Soldiers’intelligence, it seemed that Luofu had a rather terrifying technology. With their abilities, they didn’t seem to need to cooperate. could they completely rule that side? After all, the natives there were all ancient people, right?

“Your analysis department also has a conclusion on this?”The leader asked curiously.

“No, there isn’t. There is too little information. It is still too early to say a conclusion...”academician fang shook his head and said, “But there is a hypothesis!”

The leader immediately sat up and said, “Let’s hear it!”

Chapter 647 Academician Fang’s speculation (I)

In the conference room, the conference that decided the national policy was still going on, and Academician Fang, as the chief analyst, was speaking with confidence!

“Based on the information we have now, our analysis group has temporarily come to the conclusion that the reason why Luo Fu chose to cooperate with us is because Luo Fu’s higher-ups are fighting among themselves! !”

“Oh?”This statement made everyone, especially those high-level political figures, look surprised. The leader was also stunned. “Why did you come to such a conclusion?”

“This has to start from the moment sect leader Qin Xuanji revealed the cooperation this time!”Academician Fang enlarged the virtual screen, he said seriously, “First of all, according to sect leader Qin Xuanji, Luo Fu is not highly unified internally. There are quite a number of factions. As far as we know, there are those who do not support Luo Fu’s appearance, the Xuanji sect that supports Luo Fu’s appearance, and the Xing Hai sect that has an unknown attitude... “...”

“From the game’s information, there are only three races that players can choose to be part of. Moreover, the abilities of each race are very different. For example, the ELF class in the game is very similar to the Xuanji sect’s disciples that have appeared today. The wings that lieutenant general Li revealed that day are exactly the same as the wind demon in the game’s information. The surgery that Colonel Lei Xue and the other technical soldiers perform is called the developer’s surgery. It also corresponds to a race in the game. The main ability to improve is the utilization of the brain. From all of this, we infer that these three races in the game should correspond to the three main factions in the sect!”

When the leader heard this, he nodded. This deduction was a little logical... ! He had also seen the game’s information. The one in it was called the Green Titan as a race. He was tall and strong, like a hulk. It was very suitable for the name of the mountain moving sect!

When Academician Fang saw that his statement was accepted., he smiled and continued, “And according to the information from sect leader Qin, the mountain moving sect is against Luo Fu entering the world. The STARSEA gate is in a wait-and-see state, and the Xuanji Gate absolutely supports him. However, when we later investigated the game’s data, we discovered that the Green Titan that represented the mountain moving sect was the one with the most numbers. This is somewhat contradictory to the information provided by sect leader Qin Xuanji.”

“Are you saying that this information is fake?”The Secretary of State asked with a frown.

“It might not be completely fake...”academician fang shook his head. “Based on our analysis, we have found a reasonable explanation.”

“What explanation?”

“Then the mountain-moving genetic surgery shouldn’t be so popular. From the looks of it, many people wouldn’t be willing to accept it in the modern world. I think this is also the reason why the mountain-moving sect isn’t willing to enter the real world. Once they enter the real world, there will be a large increase in the number of people. If the number of people from the other two sects increases, no one will be interested in their mountain-moving sect. In the future, their status and the balance of power in all aspects will be broken!”

When everyone heard that, they all had a look of realization. Indeed, with the appearance of these Green Giants at the Mountain Gate, would you choose the beautiful elves or the Hulk in real life?

“But it’s different in the game!”Academician Fang said with a smile, “If it’s not in the modern world, this kind of powerful appearance will instead become a choice for many male players to pursue novelty. We studied the two games that rainstorm group has been popular all over the world as examples. One of them is the current Titan, and the other is the former World of Warcraft. In these two games, the Alliance or the Titan’s order side, whose appearance is in line with normal aesthetic standards, are not very popular. On the contrary, the tribes with powerful appearances or the chaos faction in the Titan games are very marketable!”

“Therefore, we have reason to believe that all of this was designed by the sect leader. He used the game as a way to trick the players, one to make the process of absorbing the population gentler, and the other

to make the players willing to view the moving mountain gate as a game. In this way, more and more people will choose to move the mountain gate, and the resistance to the birth of the moving mountain gate should also become smaller and smaller...". "..."

"I see!" Everyone nodded. However, the leader looked at him curiously and said, "But if that's the case, what about the high-level faction competition that Academician Fang mentioned just now?"

"It's like this, leader..." academician Fang smiled smugly and said, "After analyzing the situation of the mountain moving gate, we made a deduction based on this train of thought and have a conjecture about Luo Fu's unreasonable actions now..."

"Don't keep us in suspense. Hurry up and say it!" The leader Glared at the other party.

"Cough..." elder Fang didn't dare to be long-winded when he heard this, he hurriedly said, "If Luo Fu really is a hermit sect, he only feels that he is about to appear in the world now. The purpose of recruiting people on such a large scale is definitely to cultivate the core strength. This can be deduced from the various small force groups led by players that Colonel Lei Xue and the others went to. Luo Fu wants to use the additional manpower to bring out the technological advantages that they have accumulated for many years as soon as possible. However, there is a hidden danger...". "Yes. "With a large number of newcomers joining the faction and the rapid expansion of their influence, the original framework of their influence will definitely undergo a huge change!"

Hearing this, the leader nodded and immediately understood what the other party meant. This was just like a company going public. A large amount of foreign capital would flood in, diluting the stock rights of the original shareholders, and the structure of their influence would be reshuffled!

Academician Fang: "Therefore, Luo Fu chose to cooperate with our government. What he wants is an absolutely centralized power that will fully support his stable position! !"

As soon as these words were said, all the important officials looked at each other in shock and took a deep breath. Although this deduction was more speculative, it was very logical and very likely!

"Then, according to your speculation, since sect leader Luo Fu wants to rope in the foreign forces and tie them to his boat, he must have a competitor?" The leader narrowed his eyes and said.

"That's right!" Academician Fang hurriedly nodded and said, "Just like what sect leader Qin said, in order to break through space technology, Luo Fu secretly invited many western scientists. These foreigners are very likely to have gathered some ambitious local powerful elders to form a new force. Or perhaps those western scientists themselves are independent forces, which is what sect leader Qin said about the Starry Sea Gate Force...". "..."

"Hiss! !" The leader took a deep breath and rubbed his head. He felt that the amount of information was a little too much. Then, he asked in puzzlement, "If that's the case, then why didn't the other forces of Luofu try to rope us in?"

"Our analysis department has two speculations regarding this!" Academician Fang replied.

"What speculations?"

Academician Fang: "The first one is that the forces other than the sect leader have yet to react to the sect leader's arrangements..."

"Are they that slow to react?" The surrounding people frowned.

They had already analyzed the situation when they lacked so much information, but the other party had yet to react?

Academician Fang: "According to the information, Luofu is a reclusive sect. The political environment in the past might not have been complicated. Under such circumstances, it's not impossible for other forces to react slower..."

The leader rolled his eyes. "What about the second guess?"

"The second guess. Our analysis team guessed that it might be because of nationality!"

"Nationality? ?"

Chapter 648: Academician Fang's speculation (Part Two)

"Nationality? What do you mean?" Everyone frowned and asked.

"We also said just now..." Academician Fang explained, "Most of the STARSEA gate in charge of the scientific research forces in the Luofu sect might have been formed by those famous scientists in the west. If we are not wrong, the sect leader and Qin Xuanji's faction should be mostly composed of Huazhong people. It is easier to get support from the Huazhong government with the same nationality!"

"This is also a good explanation as to why sect leader Luo Fu has given high priority to recruiting technical officers to cooperate with US this time. Presumably, he wants to cultivate talents who can contend with the scientific research forces of the galaxy and dilute the influence of the Galaxy Sect."

"This..." everyone looked at each other. This assumption was indeed more reasonable than the first one.

"Then according to what you said..." the leader suddenly frowned and said, "Aren't those Western forces..."

"Yes..." academician fang nodded solemnly and said, "According to this line of analysis, those Western forces in the Luofu sect should imitate the sect leader's methods in a short period of time and obtain support from other countries' governments! !"

Everyone: "!!!"

Once these words were said, everyone was shocked. The leader's face was also filled with shock. After being stunned for a long time, he finally reacted and quickly said, "If... If this deduction is successfully established, is there any way we can stop this matter?"

In his heart, he naturally wanted the Luofu to be completely owned by Central China. A life continent that surpassed sphere D, a technology that was completely ahead of the world, and this miraculous genetic surgery. How could he let a foreign country participate in it?

“I’m afraid that’s not realistic...”. Academician Fang sighed and said, “Right now, we know too little about Luo Fu’s internal structure. For example, we don’t even know the size, number, and influence of the Xing Hai sect in Luo Fu. We also don’t know which members are the ones who really hold power in Luo Fu. Under such circumstances, if we want to interfere in the internal disputes of Luo Fu, with the degree of cooperation between US and Luo Fu, we can’t even buy time to maximize the advantage of Huazhong in Luo Fu, let alone stop foreign forces from joining us!”

“This...” everyone looked at each other before looking at their leader. All of them were top political figures and their political skills were extremely high. Naturally, they understood each other’s meaning.

If they wanted to change this possibility, the officials of central China had to speed up their cooperation and assimilate into Luofu as soon as possible. Only then would they have a chance to do something before the other countries moved in.

Not to mention completely stopping the other countries’ forces from sharing the cake, at the very least, they had to ensure that central China got the biggest piece of the cake!

However, this was also very risky because they were still in the process of detecting the Luofu’s strength. No one knew what was going on inside. What if this was all a conspiracy?

No one could make a decision on this matter, so they all turned to look at the leader!

The leader was stunned on the spot.

It was not unusual for a hypothesis to be the conclusion of the meeting due to insufficient information. The premise was that the analysis was reasonable enough... ..

However, under such circumstances, how to make a decision, whether to believe this hypothesis and what countermeasures to implement was something that he, as the leader, should take on. After all, in this position, he had to take on this responsibility.

Even though he knew this logic, the leader, who had always been full of boldness, was still somewhat hesitant. This was practically a decision that could determine the fate of the country. If it wasn’t good... ! ... He would have to take the blame!

“What... Do you all think?” The leader subconsciously kicked the ball back and asked.

Everyone was stunned when they heard this. This leader was practically the strongest one since the establishment of the Federation. It was almost the first time they had seen the other party hesitate like this. However, everyone could understand that this incident was too big, even if the Qin emperor and Han Wu came, they probably wouldn’t have the decisiveness to make a decision in an instant!

“I feel that we should observe a little more!” The deputy leader, Elder Song, said, “Currently, there is too little information. Although Academician Fang’s team’s deduction seems to be very logical, this is only a deduction. Just this alone is too risky to gamble the fate of the entire country!”

“Elder Song is too conservative!” The state secretary shook his head and objected. “Academician Fang was also very clear just now. If we want Huazhong to gain a sufficient advantage in the new world of Luofu, we must race against time. To cower like this, we are missing out on a good opportunity!”

“How do you know that a good opportunity is not a pit?” The only female secretary of state in the room sneered.

“The opportunity itself comes with great risks. Everything in the world needs to be safe. How can there be so many safe opportunities?” In the meeting, a middle-aged man who was relatively younger than everyone else frowned and said.

“It’s easy to say. This time, the bet is on the fate of the country. From the performance of the Luofu faction, it seems that the risk factor is very high. If they have bad intentions from the beginning, who will bear the responsibility? Who can bear the responsibility?”

“It’s as if we don’t bet on this time, others won’t make a move. With their temptation, it’s highly likely that they’ll be able to get the support of foreign forces. When other countries start to cooperate, how can we, Huazhong, Be On Our Own?” “Rather than that, we might as well join them earlier and take a shot at them!”

Just like that, a dispute broke out in the meeting hall based on the concept of the radical faction and the conservative faction. The leader looked at the dispute between the two sides and felt that it was reasonable. For a moment, even someone as bold as him could not make a decision.

Helpless, he looked at academician Fang, who seemed to be staying out of the matter. Then, he frowned and asked the culprit who had caused the argument, “Academician Fang, what do you think?”

Academician Fang heard this and said seriously, “Sir Leader, I’m an analyst. I’m not responsible for making decisions...”

The Leader: “...”

This old fellow was still as sneaky as before!

Others had already analyzed the item, so whether or not to accept it was up to you. If you failed after accepting it, you would be the scapegoat. If you succeeded, as an analyst, he would also have a share of the credit. Now that he thought about it, sometimes it wasn’t easy to be the leader... ..

Thinking of this, the leader laughed bitterly. “Then let’s call it a day. This matter is too big. I have to think about it. Everyone, go back and think about it more. See if you have any better suggestions... meeting adjourned!”

When everyone heard this, the high-ranking officials who had been quarreling earlier instantly fell silent. They stood up and began to collect their information. It was obvious that they had expected this result.

At this moment, they also wanted to hurry back. The information this time was very important. Most of the political figures present were from aristocratic families. They had to hurry back and share this matter with their old man!

After the meeting, Fang Nanguo, who was in charge of the overall intelligence analysis, calmly walked toward the section of the analysis team. However, when he walked into the temporary intelligence section, he did not disturb the people in the team who were still working on the data model, he walked right into his office.

After entering only saw his hand gently waved, a transparent energy shield immediately covered the room, invisible magnetic field moment the entire analysis room covered.

In the surveillance video, academician Fang turned on his computer as soon as he entered the office and continued working on the intelligence data model. It seemed like he was completely doing his job as an analyst.

However, in the real world, academician Fang was completely different from the scene in the surveillance video. He opened a virtual screen out of thin air, and on the other end of the screen was the seer Lord himself.

“Did it go well?” Seer asked in a low voice on the other end of the screen.

“Half of it went well...” academician Fang replied in a low voice. However, this time, the voice that came out of the mouth of this old man who looked to be in his seventies was that of a young girl.

“Thank you for your hard work, rain woman without melon...”

Chapter 649 Old Thunder with principles!

“By the way, why don’t you just get someone to replace all the political figures? It’ll save you a lot of trouble,” Rainmaiden Wugua said lazily.

“I’ve thought about this before...”. Seer yawned and said, “Didn’t you ask the players to play the role of nobles in the first quest “Unfortunately, you’re the only one who can completely adapt to the role in the whole quest. Even if the others have the developer’s bloodline, they don’t seem to be good at this kind of acting.”

“In that case, does that mean that I have the talent of an actor?” Rainy girl smiled happily. However, at this moment, she looked like an old man, and her smug smile gave people a strange feeling.

“But why don’t you let me play the role of the leader?”

“It’s not suitable...”. “...” Xi ye shook her head and said, “If you replace the leader of a country, then you’ll have to act for the rest of your life. After all, the people on Planet D are not as important as the others, so it’s very important that they don’t develop any resistance toward me. If you don’t act well and you’re exposed, the backlash will be too great, and we might be considered a terrifying alien force.”

“Aren’t you?” Rain Girl rolled her eyes at him, and then she said, “Besides, do I know how to act badly? Why Do You Want Me to act like an old man? You Do it on purpose!”

“You’re not really in the acting department. If you act for a long time, the chances of being seen through are very high. Moreover, you don’t have that much time. You have a lot of things to be responsible for here...”

Xi Ye looked at rainy girl’s mischievous look and shook her head helplessly. She continued, “If the leader can’t be replaced, then academician Fang, who is in charge of intelligence analysis, will be the one who will decide the direction of the meeting to the greatest extent. Moreover, he’s almost 80 years old and has a history of serious heart disease. Arrange it in two days, and you won’t have to continue acting!”

“Lord, what you’re saying is so social. Can you even do something to an 80-year-old man?”

“Are you addicted to acting cute?” Xi Ye glared at her and said, “If you don’t like me assigning him to other people, I think the other members of the group would fight over this kind of veteran expert academician.”

“Hey, Hey, Hey... I’m just kidding...” Rain girl, Wugua, quickly said.

“Let’s get down to business...” facing this guy, Xi Ye said weakly, “What do you think will be the final decision after today’s meeting?”

“It’s hard to say. There are quite a number of people in the conference room who suggest that we wait and see...” rain girl said thoughtlessly.

“Then, what do you think... We should do next?”

“Go Abroad!” Rain Girl said with a smile, “I’ve already contacted the testing company outside. They will be launching our game soon. In addition, Yang Rui’s lead in North America will soon attract the attention of the large financial groups in North America. Once this news is released, I believe that the leader will make a decision as soon as possible...” . “...”

“Mm...” Xi Ye nodded in satisfaction, this kind of hesitation required external pressure, and it was also time to start absorbing players from other places on a large scale. He also had to test the difference between the tolerance of foreigners and the Huazhong People!

“Old Man, it’s already so late. You should rest first. When Snowy comes back, she’ll report the situation to you tomorrow!”

Old Lei looked at the time and comforted old lei who was still waiting in the hall.

“What do you know?” Old Lei rolled his eyes at his eldest son and said, “The girl’s holiday is only three days in total. It’s very likely that she will be kept at the chief’s place. If she can be let back, it will probably only be for one night...”

As soon as he finished speaking, he heard a burst of noise from outside. Then, he saw a 40-year-old madam walking into the hall with a smile. “Grandpa, Xiaoxue is back!”

“Good, good!” Grandpa Lei hurriedly stood up in excitement. “Hurry up and heat up the dishes and bring them over. Xiaoxue reported that she worked so late. She must be starving...”

“Okay, Grandpa...”

Seeing his grandpa like this, Boss Lei was amused. Even if that girl Xiaoxue was successful, wasn’t this change a little too much?

Just as he was thinking about it, he heard a commotion outside the courtyard. The boss was stunned and looked up. He immediately saw a group of people from the Lei family surrounding Lei Xue like stars surrounding the Moon. They were asking about her well-being, causing his eyelids to twitch.

They didn’t sleep at all?

“What are you doing?” Old Man Lei looked at the group of people surrounding Lei Xue and said with a straight face, “Isn’t it tiring for Xiaoxue to come back so late from work? Everyone, go back to what you should be doing. Don’t delay Xiaoxue’s Rest! !”

Everyone immediately quieted down after hearing old man Lei’s words. They looked at each other with a look of unwillingness on their faces.

In fact, they just wanted to ask for information about the next cooperation so that their children could prepare accordingly.

However, at this moment, Old Man Lei had spoken, and no matter how eager they were, they didn’t dare to disobey him. In the end, they all slowly dispersed with a look of unwillingness on their faces.

“Big Sister...” Lei Xue’s younger brother hugged his own sister and pouted with an aggrieved expression.

Lei Xue’s father was honest. He walked over and hugged his younger son, “Grandfather is right. Big Sister is tired after coming back so late. Don’t disturb her. Big sister needs to rest after eating...”

“Oh...” Lei Xue’s younger brother suddenly felt even more aggrieved.

Lei Xue smiled when she saw this. She pinched her younger brother’s cheeks and said, “Be good. Go to sleep quickly. You Still Have School Tomorrow...”

“Oh... Then... elder sister, you must come back early tomorrow...”

“Okay!” Lei Xue replied with a smile.

After bidding farewell to her father and younger brother, Lei Xue walked over to grandfather and said respectfully, “Grandfather...”

Old Man lei smiled and nodded, “You must be starving, right? I’ve asked your aunt to heat up some food for you. Come in and sit down, it’s cold outside...”

Lei Xue obediently came in and sat down. In less than fifteen minutes, her aunt brought the food in.

Four happiness meatballs, braised mutton and snow peach puree were all her favorite dishes...

However, at first glance, she did not have the slightest appetite. Although she was indeed hungry, her body was instinctively rejecting these low-grade food in front of her...

“What’s wrong? Don’t You Like It?” Old Man Lei asked.

“No, no!” Lei Xue picked up the bowl and chopsticks and Wolfed down the food.

“Eat slowly. No one is fighting with you!” Old Man Lei said with a kind smile.

He smiled as he watched the big girl eat two bowls of rice. He hurriedly asked someone to serve her hot tea and then asked with a smile, “Are you still going over tomorrow?”

“Yes...” Lei Xue nodded. “The analysis department still needs to ask questions. I estimate that the possibility of coming back in the next two days is very small.”

Hearing this, old master lei nodded. “You have to take care of your body...”

“Grandpa...” Lei Xue hesitated for a moment before finally saying, “About Luo Fu’s side...”

“Eh...” Old Master Lei waved his hand. “Those things are classified as state secrets. Now that you’re in your position, there’s no need to tell your family everything...”

Lei Xue was stunned. Her grandfather was so considerate of the Big Picture?

At the same time, the leader in the office more than ten kilometers away nodded and thought to himself, this elder Lei hasn’t changed. He’s still the same old stubborn man with principles as before. It’s better this way, so that I won’t be in a difficult situation...

However, in the other part of the scene, Lei Xue’s expression changed from the initial admiration to a strange one.

Because she sees her grandfather, in a moment of awe, slip her a note that says, “You have a wire, write with a pen...”

Chapter 650 side effects

What should I do?

That night, the leader sat in his office and looked at a pile of documents. He had no intention of resting at all. It was said that old people did not rely on their muscles and bones for power. However, given the current situation, he probably would not be able to sleep even if he was given a big bed...

Less than half an hour after the meeting ended, the analysis department presented him with a benefit analysis and a risk assessment. In terms of benefits, increasing the level of cooperation would allow him to quickly integrate into Luofu and gain the upper hand!

If academician Fang’s analysis was correct, if he increased the output of his researchers, he would be able to grasp Luo Fu’s technology to the greatest extent possible. Thus, he would be able to take advantage of this period of time to quickly lead other countries, if he did a good job, he could even completely cut off the possibility of other countries entering Luo Fu!

Similarly, the risk assessment was also very high, and they were all unknown predictions. For example, what were the side effects of a large number of soldiers using genetic surgery? Would their loyalty continue to be maintained after the modification? Would there even be the possibility of the parasitic brain of the Zerg race in the star power struggle?

Moreover, he had a faint feeling that once he agreed to Luo Fu’s expansion, the risk would definitely not be limited to the immediate concern. As for what it was, he could not figure it out for a moment. He had decided that even if old Fang’s conjecture was correct., agreeing to Luo Fu’s full expansion also had a huge hidden danger!

While he was hesitating, there was a knock on the door of the office.

The leader frowned slightly. At this time, what else could disturb him?

“Come in!”

The door opened, and the person who came in was naturally the guard he had been with day and night.

“Boss!”The guard still used the previous address, but at this moment, he looked a little anxious.

“I told you not to call me boss. It’s been so many years, why can’t you change it...”the leader’s tone paused when he said this, because when he saw the other party’s pale face, he immediately lost the mood to pay attention to the address of that society. Instead, his heart skipped a beat, and then he asked solemnly, “What happened?”

“Academician Fang had a heart attack and is in the midst of emergency treatment at the hospital. His condition is very critical!”

“What? ?”

The leader suddenly stood up and his expression instantly darkened.

He had long been prepared for old Fang’s poor health, but it had to be at this moment...

“Prepare the car and go to the hospital! !”

When the leader arrived at the hospital, the leader, who was far away, saw a group of health care specialists discussing something with a solemn expression.

Following them were a group of other important figures.

“How’s the situation?”The leader walked up to the experts and asked directly.

The experts looked at each other, and in the end, one of them was the shortest, the oldest old man stood up and replied, “Leader, elder Fang’s situation is not optimistic. He is already on the verge of heart failure. He has been working all night for the past few days and has already caused irreversible damage. Now, he can only try to change his electronic heart, but for this operation at his age...” “...”

“Continuously staying up all night?”The leader was stunned. He glared at the staff member wearing the analysis team’s clothes and asked, “Didn’t you say that elder Fang was resting on time?”

When the staff member heard this, he quickly lowered his head. In just a moment, the leader reacted. At elder Fang’s level, no one could pressure him to work so hard that he would suddenly die, then, elder Fang could only arrange for his subordinates to report this.

“How High is the success rate of the heart transplant surgery?”asked the leader.

The short expert hesitated for a moment before he finally said honestly, “If it was a middle-aged man who performed this surgery, there is a 40% chance... As for elder Fang... I reckon that even 10% is not possible!”

The leader’s heart instantly thumped. These words were basically no different from a death sentence...

...

In the midst of his anxiety, a nurse suddenly walked out from the ICU and whispered something to the doctor who was guarding the door. The doctor’s expression changed and he quickly walked over.

“What’s the situation?”The leader asked first.

“Elder Fang is awake. After hearing our surgical plan, he refused the surgery and requested for a heart-strengthening shot. He said that he wanted to report his work!”

When he said this, everyone fell silent. They looked at the leader, who was also stunned. Then, his expression became complicated!

To be honest, it was a bit pretentious for him to say that reporting was not important at this time. If he wanted to save people with all his strength, it would be a first-class discovery for old Fang to desperately report... ..

The leader was silent for a second or two before he asked, “Where are old Fang’s family members? Are they in position?”

“Leader...”the deputy leader of the analysis team immediately said, “Old Fang’s children are all overseas and have been notified, but I don’t think we can wait for them to come over...”

Hearing this, the leader lowered his head and made up his mind within a few seconds. “Since his family members aren’t around and old Fang has made up his mind, we’ll do as he says!”

The experts were stunned when they heard this, but they all heaved a sigh of relief. This decision was definitely better than letting them perform the surgery, because no one was confident that they could perform the surgery, if the surgery failed, they would have to bear some responsibility.

Now that this decision was made, this matter had nothing to do with them!

Just like that, after the nurse received the order, she quickly went in to inform the people inside to prepare the medicine...

After about 15 minutes, the nurse walked out and said, “Elder Fang said that he wants to see the chief...”

The chief nodded and did not hesitate any longer. He quickly walked inside. Elder Fang could pass away at any moment. Since he had made up his mind, he could not waste this precious time.

After entering the ICU, the chief saw elder Fang’s flushed face from afar. He knew that this was the effect of the heart-strengthening needle. In the words of the Huazhong ancient times, it was like a flash in the pan.

“You Old Fellow, why are you trying to be so strong at such an age? Don’t you know your own body?”The leader stepped forward and grabbed the other party’s hand as he scolded.

Elder Fang smiled and shook the leader’s hand. He replied, “There’s no time to argue. Let’s get down to business. Lord leader, what are you thinking now?”

When the leader heard this, he sighed. “How can you make a decision so quickly on such a big matter? Moreover, I feel that even if your deduction is correct, a full-scale cooperation is also very risky!”

“Yes...”elder Fang nodded.

“What are you hiding, Old Man?”The leader Glared at him.

“That’s not it…”elder Fang said with a wry smile, “Didn’t we just come to a conclusion and get so excited that we ended up in the hospital?”

“You…”the leader rolled his eyes at him and immediately smiled bitterly. “Tell me, what’s the conclusion?”

“As you think, even if my deduction is correct and we cooperate fully, once the Luofu mystic realm is revealed, there will be a huge risk. No… We can’t say that it’s a huge risk. There will definitely be some negative situations!”

“What is it?”The leader immediately asked.

“If we cooperate fully, it will cause our central China… No, it should be said that the influence of all the governments of the World Federation will become weaker and weaker. It might even completely collapse!”

The Leader:”!!!”
