

A Bunch 681

Chapter 681 Strange Ability!

Li Goudan immediately felt an inexplicable chill. Ever since she entered the ice domain, she had been corroded by an irresistible chill, but with her strong vitality., actually, it wasn't as unbearable as Lei Xue and the others.

But now, the chill had obviously increased a lot after coming up, causing Li Goudan to shiver involuntarily.

However, compared to the physical chill, the chill in her heart was actually even greater, because after she came up, she found that there was no one on the deck...

Thinking of this, she took a breath and prepared to walk into the cabin... ..

"Captain!"

Just as she was about to make a move, Johnny's voice came from behind her, "Why don't you let me lead the way?"

The dog egg hesitated for a moment, finally nodded, now this is not the time to be a hero, someone to play the vanguard is not a bad thing.

So she let Johnny go to the front, and she followed in a position where she could see all the angles behind him...

The two walked slowly into the cabin...

Outside the ship, first mate Wilson frowned at the snow: "Why don't we go up and help the Captain?"

"Because we need protection..."replied Lei Xue Blandly.

Wilson was stunned, the first time to hear someone put their own safety so justified, but sugar bean did come before the order, the key time to protect the chief of the engine!

A voice from the side said, "What she said makes sense. Moreover, we have an uncertain factor here..."

Wilson was stunned. He immediately followed the other party's reminder and looked over. He just happened to see Shawn, who was being controlled behind him. He nodded immediately. This guy had not been cleared of suspicion yet. It was indeed not safe to rush forward and let Lord Snow stay with such a guy.

"You're right, Johnny..."Wilson said to his partner behind him.

Inside the cabin, Li Goudan slowly followed behind Johnny. At this time, Johnny held the enchanted short sword and walked steadily and carefully in front to lead the way. The temperature in the cabin was

even colder than outside. It was really like walking into an ice cellar. But just like the outside, there's hardly anyone inside...

Li Goudan's brows were tightly knitted, and a rarely seen serious expression appeared on her heartless face.

There were at least 200 people on the ship, how could they disappear just like that?

Could a bug kick its legs when it fell into the water? They had only gone out for a short while, and the whole ship was gone?

Moreover, the strange thing was, from the situation on the ship, there was no sign of a fight. The cabin seemed very clean, and it did not look like there was a fierce fight at all...

Could it be that there was something powerful that could kill these 200-odd sailors in an instant? And there was no sound at all?

If that was the case, then it would be a little scary, because Goudan Li believed that he could not do it!

Other than the mechanics in the technical department, most of the sailors on the ship were bronze knights who had undergone genetic surgery. Their strength was comparable to silver, and there was even a hidden corner hidden by jellybean...

That was a high-level combat talent hired from Isabelle. A high-level druid who had undergone a second surgery and had practiced the water elemental breathing technique. His results were excellent in all aspects, his overall strength had already surpassed the legendary level here. It was sugar pea who had spent a large sum of money to hire him to infiltrate the grassroots to gather intelligence and deal with unexpected situations.

With people like him and a group of skilled sailors, Li Goudan asked himself, even if he could kill them, it would be impossible for him to leave no traces behind...

Two hundred people, not two hundred chickens. Even if he killed the chickens, he would have to make some noise, right?

Thinking of this, Li Goudan carefully followed behind Johnny, maintaining a buffer space and ensuring that his vision could observe everything around Johnny and Johnny at all times, of course, she also distributed some of her energy behind her.

She put some feathers on the ground along the way. These feathers were covered with threads that were thinner than spider silk. If there was even the slightest movement behind her, she would be able to react immediately, moreover, she could retrieve these feathers to create a certain attack effect.

This was a racial technique of her wind demon bloodline, which she had just learned a while ago.

The two of them walked slowly in front. When they suddenly reached a corner, Johnny's face lit up and he quickened his pace. Seeing this, Li Goudan was about to quickly follow them, but as soon as he stepped out, he suddenly remembered something. It made her stop her actions and retract her steps...

"Captain, sir, come quickly. There's a situation here!" Johnny's voice came from inside. He seemed very anxious.

“Oh... is that so...” Li Goudan replied indifferently, but he had no intention of leaning over.

“Captain?” The voice paused for a moment, and then asked with puzzlement, “What’s wrong with you?”

“You want to know what’s wrong with me, can’t you just come back and take a look?” Li Goudan replied with the same cold tone.

“Huh?” Johnny gasped, and then a cautious figure came out from the corner, “Captain? What are you doing? Come quickly, the chef and the others are here, the situation seems to be very bad!”

“Really? Then you should bring them out...” Li Goudan tilted his head and looked like he was not going to go over... ..

“Uh...” the other side looked strange. “Captain, What’s Wrong?”

“I remember something...” Li Goudan looked at the other side. “When did you get on the ship?”

“Ah?” The other side was stunned. “I . . . I followed you on the ship...”

“Is that so?” Li Goudan said faintly, “Then why don’t I have any impression of it?”

As soon as he said this, the other party’s expression froze...

Seeing the other party’s expression change, Li Goudan took a step back slightly and thought, there is indeed a problem...

She only remembered it when she was about to turn the corner just now. At that time, an instinctive sense of danger rushed into her heart and made her stop. At that moment, she recalled this suspicious point.

Johnny was not a highly sensitive person. Moreover, even if he was, it was impossible for him to say that he appeared behind her without feeling anything.

This was not because she did not realize this at the beginning, but because the memory had inexplicably disappeared. When Johnny suggested him to lead the way, she subconsciously thought that he came up with her, as for how he had come up, he didn’t think about it in detail. It wasn’t until the inexplicable sense of danger surged into his heart that he thought of this!

Ever since he became a wind demon, Li Goudan’s sensitivity had always been very high. Logically speaking, it was impossible for him to not realize such a big suspicious point at all... ..

This was not his problem, but rather, the guy in front of him had used some kind of method to make his consciousness ignore this point!

Thinking of this, Li Goudan felt a cold sweat run down his back. He could not help but think to himself, “What kind of ability is this?”

After Johnny was seen through, the expression on his face that was pretending to be stunned gradually disappeared and became as cold as a zombie. The pupils in his eyes slowly changed from Johnny’s grayish-brown color to a kind of opal-like emerald...

Chapter 682 Where Is He?

“Interesting...” Li Goudan looked at him, holding the feather of the wind demon in his hand. For the first time, she didn’t dare to make a move rashly.

This was the first time she had encountered such a strange situation. After all, she was just an ordinary college student before she became a player.

In the past, she had been strong and decisive with BA tie, mainly because of her overwhelming strength. However, this time, when she encountered a situation that she couldn’t understand, she was actually not as decisive as she had imagined.

Moreover, the sudden crisis in her heart told her that if she had followed him just now, the other party might have some way to threaten her...

Just like that, the two of them stared at each other, not moving at all...

At this moment, the air seemed to have stopped. Li Goudan patiently observed the other party and was surprised to find that although this guy’s eyes had become like a Persian cat, his other characteristics were exactly the same as Johnny’s.

The habit of subtle movements even included that unique breath of water!

This made Li Goudan puzzled. Could it be that the other party could copy other people’s skills?

No, she could not drag this out any longer. This guy’s unique transformation ability was too terrifying. Later on, if Lei Xue and the others could not wait for her and her people to catch up for a long time, it was very likely that this guy would fish in troubled waters!

Thinking of this, Li Goudan finally decided to strike first. She took a deep breath. The moment she took a breath, the surrounding air was actually drawn over. Her entire aura suddenly changed, like an invisible and formless wind...

It was precisely the breathing of wind that she had already practiced to a high level...

Then, she raised her hand gently. Her movements seemed slow, but they were also extremely fast. From raising her hand to exerting force on her wrist, her entire movement was smooth and smooth. Her movements were incomparably beautiful, but it made people’s nerves completely unable to react to this elegant and dangerous!

Then, the feather in her hand shot out like a streak of light towards the fake Johnny!

The fake Johnny’s expression was stunned. It was as if he didn’t react at all. Without any movement, the light instantly pierced through his brain. Then, he let out a terrifying and abnormal scream and quickly fled towards the corner!

She ran away just like that?

Li Goudan was slightly stunned. Although she didn’t hold back just now, wasn’t it a little too weak for her to run away without even putting up a fight?

It couldn't be said that she was weak. She didn't hold back just now. She had tried it in the base. When she used the breathing technique with all her strength, her feathers were fluttering, even the highest grade of composite steel could be pierced through by her vibrating technique. Her speed was also so fast that ordinary level 3 agility players couldn't react in time. The ones in the base who could withstand her attack were definitely the older batch of players.

However... .. Even so, she still could not accept it. After all, the sense of danger she felt just now was not wrong. If her opponent was only at this level, even if his ability was a little strange, it should not have made her so vigilant just now.

With this thought in mind, she did not directly chase after him. Instead, she spread her wings, and countless feathers turned into streaks of light and flew towards the corner!

Corner of the wall board and composite steel plate was instantly penetrated, and then the dog egg hands gently pull, countless threads linked to the feather was her recycling!

These threads cut the corner of the steel wall like tofu general cut into pieces, the obstacles in front of an instant clear!

Toot-toot!

Just as Li Goudan was wreaking havoc in the cabin, Lei Xue, who was below, was stunned. As the captain of the Goudan, the hull was damaged. She, who was bound to the ship's intelligent system, instantly received information feedback, it indicated that her cabin was being severely damaged!

Lei Xue's expression immediately tensed up, and she thought to herself, is there a fight?

The people below also heard the rumbling sounds from inside. Their expressions changed, and they all pulled out their weapons!

"Sir Captain?" Wilson, who was beside her, said with a serious expression, "Are you really not going up to support the Captain?"

Lei Xue frowned and looked at Xiao En, who was also looking nervous. She could not make up her mind for a moment!

On the other hand, Wang Ye, who was the most nervous dog egg, said seriously, "There's no need to go up. Jiayi is very strong. No one here can compete with her. The cabin is so small. Even if we send people up, it won't be of much help. If she can't beat her, it's useless for us to go up. Don't go up and cause trouble..." "..."

"Is... that so?" Lei Xue looked at Wang Ye in surprise. She thought that Wang Ye should be very nervous about Li Goudan.

However, Wang Ye did not notice Lei Xue's expression at that moment. Instead, he continued to look up nervously, feeling a little powerless in his heart.

It was not that he was not nervous about Li Goudan, but that he had not lost the rationality of a former special forces soldier. As a special forces soldier who had worked with extraordinary people countless

times, he knew that the only thing he could do at this time was to trust the other party, this was because ordinary people could not participate in a battle of this level.

Before coming here, sugar pea had told him that Li Jiayi's combat strength was comparable to everyone on the ship!

Second Officer Wilson and third officer Johnny looked at each other, but in the end, they still obeyed the order and did not go up on their own accord...

At this moment, the noise inside suddenly stopped, and the entire space became quiet again.

Everyone's heart was in their throats, and they stared straight at the ship. Wang Ye was trembling all over, and he kept praying in his heart.

In the next second, a familiar figure flew down from the ship.

Everyone immediately heaved a sigh of relief. The one who came down was Li Goudan... ..

At this moment, her face was a little pale, and there were still traces of blood on her body. When everyone saw this, they quickly surrounded her. Wang Ye directly went over and asked, "How are you?"

Li Goudan raised his head and looked at everyone, he smiled weakly and said, "I'm fine. It's just a small injury..." as he said that, he turned around and looked at the ship that had become even darker. He said solemnly, "Quickly leave... quickly leave this place. It'll be troublesome if that thing comes out!"

Everyone was stunned. This was the first time Wang Ye had seen Li Goudan so serious!

Obviously, there should be something very terrifying on that ship!

Without any hesitation, Wang Ye immediately repeated Li Goudan's order and ordered everyone to quickly retreat!

"Wow..." on the other side, on the undead ship, Marina, who had used her eyes on the biological ship to see Li Goudan's group's movements, clicked her tongue and sighed. "To be able to injure that thing, this is the first time I've seen it..."

Bengal goode nodded and said, "She is indeed powerful. To be honest, this woman is not necessarily a match for those old guys in the temple. Kersu was right to not allow us to easily clash with that force..."

"But it's only temporary..." Marina looked at the escaping Li Goudan and the others. "Soon... the situation will change..."

In the snow below the doggie:

Just about two minutes after the crew left, a white figure flew down from the ship. After landing, the man stared blankly at the empty space.

If they are still in the same place will be scared, because the people who flew down is Li Goudan!

Goudan looked at the footprints on the ground and muttered, "What the... ?" ? ... where is he?

Chapter 683: Shocking Illusion

As Li Goudan was too cautious, he decided to get off the ship and regroup with the others after losing the mysterious object. However, he was stunned when he realized that there was no one on the ship...

...

Looking at the vast ice field in front of him, Li Goudan was finally a little afraid... ..

When they arrived, the team was vast and mighty. There were high-level warriors, witch doctors, and archmages on the ship, including an entire ship made of mechanical alchemy. It was estimated that their combat strength could face the navy of a medium-sized country head-on, facing all kinds of natural disasters, they had predicted the risks. With their infinite armor and Energy Shield, let alone natural disasters, even if they were to face the explosion of a nuclear bomb head-on at sea, they would be able to escape unscathed!

Originally... it should have been foolproof!

However, just like what his mentor had said, the mysteries of the universe were endless. There was no such thing as foolproof. Exploration was full of opportunities, but it was also full of dangers... ..

Doggie had never thought that he would encounter such a desperate situation as soon as he came out...

...

There were 261 people on the ship, and in just a few days, she was the only one left. In the face of the strange situation around her, the powerful alchemy battleship was useless!

"No... No..." doggie shook his head, after a few seconds of confusion, he quickly woke up from the Panic: the crew members had just lost contact, but nothing should have happened. He had come into contact with the monster himself. Although it was strange, its frontal combat strength was mediocre.., it did not have the ability to take out so many crew members at once, and its individual combat ability might not even be as good as the two assistants on the ship!

After she regained her consciousness, she quickly recalled the content of the Ranger class that the instructor had taught her...

Reality was not a horror movie. Natural creatures did not pick on lone prey to create a terrifying atmosphere, but often because it could only do so...

If their strength allowed, their group would not have been deliberately separated like this...

Thinking of this, Li Goudan regained his spirit and began to search for traces of the crew...

The surrounding snow was flying everywhere, and the ice field was covered with a thick layer of snow. Logically speaking, this kind of weather was the most convenient for tracking, but at this moment, Goudan looked at it and found that it was not the case at all...

Other than the footprints left by the place where the Thunder and snow had left, the surroundings were frighteningly clean. There were no traces at all, as if they had disappeared into thin air.

Faced with such a situation, Li Goudan was not at a loss. Instead, she took out a glass bottle from her bosom. Inside the bottle was actually a crystal green flying bug. She gently opened the bottle, the green bug circled around the footprints of Lei Xue and the others before flying in a certain direction.

Seeing this, Goudan first looked at the surrounding environment, then quickly followed...

As a ranger, she had many ways of tracking. After the traces on the surface disappeared, she could track through scent, heat sensing, and energy traces. Among them, she could use a variety of methods. Special Potions, elemental communication, various ranger-type secret tools, and the creature tracking she was using now were all methods...

She was somewhat glad that she had chosen the ranger route instead of the other two...

Wind Demons now had three class routes in the main base. Li Goudan was on the Ranger route, and the other two were phantom dance and Windwalker. The former was proficient in illusions and close-range assassinations. The latter was equivalent to an agility-type magic warrior. It could use wind elemental specialties to increase its long-range damage output, including the wind spear, which had the strongest penetration ability.

Compared to the other two, the Ranger Path was more comprehensive. Although its explosive power could not be compared to some specialty classes, its ability to respond to complex situations was the best.

For example, Li Goudan soon noticed that something was not right around him... ..

After more than a year of ranger training, Li Goudan was very sensitive to things. She quickly noticed that there was something wrong with her surroundings. The scenery, snowflakes, and trees seemed to be fine, and the scenery was constantly changing as she ran, however, she still noticed an unusual detail: there was something wrong with the light here!

The angle of refraction was not right, so she could roughly see the things around her. However, looking at the details, the light did not seem to fit in with the falling snowflakes...

Moreover, with her current speed, she should not have been chasing for so long without being able to see a single shadow. There were so many people like Lei Xue, and she was only a developer with a weak constitution, if she was heading in the right direction, how could she not have caught up?

There was only one possibility. She was heading in the wrong direction, and her vision had been deceived!

She looked at the rapidly flying green bug in front of her and narrowed her eyes slightly. However, the green bug relied on its scent to track people. How could she be going in the wrong direction?

At the thought of this, she narrowed her eyes and gently covered her mouth with her hand, as if she was going to whistle. However, her throat moved slightly, but there was no sound at all...

The green bug in front of her did not stop and continued to fly forward. In the next second, a cold light flashed in Li Goudan's eyes. Without any hesitation, he threw a throwing knife at the Green Bug!

The feather turned into a cold light and instantly pierced through the green bug, followed by a shrill scream!

This scream was exactly the same as when she pierced through the head of the monster that looked like Johnny on the ship!

As expected!

Li Goudan instantly stopped in her tracks. With her high agility attribute, she braked extremely fast. Almost instantly, she was like a speeding sports car that turned into a light snowflake and fell down, coldly looking in front of her...

It was not that she did not make any sound when she whistled just now. It was because this sound could not be heard by ordinary people. It was a type of ultrasonic frequency that only green spirit bugs could hear. This was one of the basic lessons for Rangers to control these creatures.

The bug ignored her whistle and continued to fly. Goudan knew that the green spirit bug flying in front of him had been swapped!

After that tragic scream, the surrounding scene distorted and shattered like glass. Only then did Goudan see clearly that it was not a boundless border in the distance. From Afar, there was actually a huge city after this forest!

When the illusion of the bug disappeared, Goudan finally saw the face of the monster. It was a child of about five or six years old. He was naked in the snow, and his skin was as black as a dead man's, he gave off an extremely cold feeling, and his eyes were like Emerald Cat's eyes. He stared at her with a strange and evil expression!

The boy took a deep look at Li Goudan, then turned around and sank into the ground like a groundhog. When Li Goudan reacted and rushed over, he discovered that there was no hole in the ground where it had been standing just now!

She was instantly stunned again. How the hell did it get into the hole?

Then, she looked around and began to recall the situation at the beginning. When was the Green Spirit Worm switched out?

Could it be that she was observing the traces around her?

She remembered that she did look around when she first released the Green Spirit Worm. She mainly wanted to carefully observe the surrounding terrain. In that short moment, the green spirit worm was switched?

When she thought of this, Doggie shivered all over and thought to himself, "This damn thing's ability is too strange. It's exactly the same as the illusion spell of the Yu Zhibo family in the anime..."

"I need to find Lei Xue and the others as soon as possible..." .

Then, she looked at the huge city that suddenly appeared in front of her. After hesitating for a second or two, she finally chose to continue running in the direction of that city.

“Since this monster tried so hard to lure me into that city, then Lei Xue and the others should have also been tricked into it...”. ...

Chapter 684: The First Way to survive

On the other side, Lei Xue and the others followed Li Goudan, who jumped off the boat first, and quickly fled. Lei Xue and Wang Ye were both physically exhausted. One was carried by Johnny, and the other was carried by Wilson. In the vast snowy land... The group of people just ran aimlessly... ..

“Captain!” Lei Xue Lay on Johnny’s back and looked at Li Goudan, who was running for his life, and hurriedly asked, “What on Earth is that thing?”

“I don’t know...” Li Goudan, who was panting, replied, “I’ve never seen such a strange thing in my life!”

“Really?” Lei Xue frowned. What kind of thing could scare Li Goudan to this extent? She had heard of Lieutenant General Li’s battle record in Ba tie. The officials had secretly assessed that she should have the strength of an elder of Kunlun.

“Jiayi... your condition isn’t quite right. Why Don’t You Bandage Your Wound First?” Wang Ye couldn’t help but ask.

Li Goudan ran in front and shook his head. “It’s just a small wound. Don’t worry about it. The most important thing now is to avoid that damn thing first...” as she said that, she even looked back, as if she wanted to see if there was anything chasing after her.

Seeing this, everyone tensed up and did not dare to look back. Their running footsteps sped up a little...

However, Lei Xue, who was being carried on her back, looked back again.

There was indeed something chasing after them, but she could not see it clearly. That Thing was a little strange, like a black shadow standing up. No matter how hard she tried, she could not see the full picture of that thing.

What was even stranger was that although that guy seemed to be trying his best to chase them, the distance between them was always maintained within a certain range. One had to know... ! ... The speed of her team was not the same!

From the beginning when they were sprinting wildly to now when most of the team members were physically exhausted, the team’s speed was completely different from before. However, the thing chasing them from behind still did not close the distance between them. It gave people the feeling that it was not chasing them. Instead, it felt like they were chasing them, trying to drive them to a certain place... ..

And she kept feeling that there was something strange about it, but she could not quite put her finger on it... ..

At this thought, she looked at Shawn’s position behind her. From the beginning of their escape, Shawn had no one watching him. He was also running with the team, but he was wandering at the back of the team.

This made snow lei feel a bit strange...

Henry's diary had introduced Shawn as a silver samurai. She had a slight understanding of the samurai level of this plane. The main training methods were bronze, silver, and gold, it was similar to some of the competitive games in the country, but the difference was clear. As far as she knew, the difference between each level was actually quite big. Most of the crew members were Bronze Samurai, and Shawn was a silver samurai., his physical strength shouldn't be worse than these low-level samurai. Why was he running at the back?

Either his kidney was weak, and he had an empty level, but his physical strength was actually not good, or he deliberately ran to the back...

If it was the latter, why did he do that? Wasn't he worried that he would be attacked at the back of the team?

Not to mention an outsider like him, even the people in the fleet were trying their best to move forward while fleeing. Everyone was trying their best to run faster than their companions so that they wouldn't be eaten by the bear.

Then why did he deliberately run to the back?

There was obviously a problem!

But under the current situation, she couldn't stop the team to interrogate this guy...

Lei Xue frowned and quickly analyzed the possibilities. If... ? If that guy named Sean deliberately fell behind, what was his motive?

Either it was as Henry's diary said, there was something wrong with this Sean, or... There was nothing wrong with Sean himself, but he knew something, which was why he deliberately fell to the back of the team... ..

But why?

Lei Xue racked her brain, but she still couldn't figure it out. She turned to Sean and said, "Do you know something?"

Sean, who was running at the back, was stunned. He glanced at Lei Xue, looking a little surprised, but after hesitating for a few seconds, he didn't say anything and continued to follow at the back of the team... ..

"Why are you still hiding at a time like this?" Lei Xue couldn't help but shout.

This time, Xiao en acted as if he didn't hear it. He just buried his head and ran... ..

At this time, Johnny couldn't stand it anymore. He said in a low voice, "Don't worry about Lord Lei Xue. Anyway, that kid is at the back. If he doesn't say that he will fall behind, we naturally won't go and save him..."

As soon as he said that, Lei Xue's pupils suddenly constricted!

Fall behind! !

That's right... It's like this...

Lei Xue Mattered in a daze...

Johnny, who was carrying him, was stunned when he heard Lei Xue's words. "Sir Lei Xue, what have you discovered?"

As soon as he said that, Wilson and Wang Ye, who were beside him, also looked at her. Li Goudan, who was in front, also turned around and looked over.

Lei Xue looked at Wang Ye. "Lieutenant General Li, you should have guessed what I've discovered, right?"

Wang Ye was stunned. He was about to say, why did you ask Goudan Li to look at me?

But what happened next stunned him. Because when Lei Xue looked over, Goudan Li also looked at him curiously. "I'm asking you, Lieutenant General Li. Why are you still keeping me in suspense at this time?"

As soon as he said this, everyone was stunned. They looked at Goudan Li inexplicably...

The armament crew here were all personally trained by Goudan Li. At that time, Lei Xue often came to look for Goudan Li. She would verbally address him as lieutenant general Li. It was only after they boarded the ship that she changed her way of addressing him. Ordinary sailors did not know about this, but the armament crew knew about it...

Then, everyone started to slow down and put some distance between them and Li Goudan...

As everyone slowed down, Li Goudan also slowed down and stood still... ..

Everyone stopped and looked at each other in shock. They didn't dare to get close to each other. Then, they pulled out their weapons to guard the front and the back.

However, at this moment, everyone was stunned to find that the shadow that was chasing them had stopped in the distance after they stopped. It had no intention of getting close...

"As expected..."Lei Xue narrowed her eyes and said in a low voice.

"When did you find out?"

Behind them, Xiao En, who had been silent, suddenly asked.

"I just figured it out..."Lei Xue looked at him and replied.

From the moment Johnny said that they were left behind, she immediately found the strange thing that she had felt before!

Yes, they were left behind. From the beginning to the end, not a single person in the team showed any signs of being left behind...

It wasn't that Lei Xue had bad intentions, but that all of this seemed illogical. She had noticed that the team had always maintained a single unit from the start of their escape. This was an escape, not a military drill, and their physiques were different from each other., how could the entire team have maintained such a single unit?

Logically speaking, if everyone was trying their best to escape, the one with the weakest physique should have long fallen behind. The reason why they didn't fall behind was because the entire team had maintained a single limit, and everyone had deliberately maintained a single speed! And this speed coincidentally allowed the person with the weakest physique to keep up with the team!

It was obviously impossible to say that this was the tacit understanding of everyone. and the only person who could maintain the speed of the entire team was Li Goudan!

Because she was at the front, and she was the captain, everyone was running with her, so they would subconsciously follow her speed. The speed of her team was the same as the speed of her team!

Under such circumstances, it would actually be understandable if Li Goudan insisted that no one would be left behind. After all, as the captain of the ship, it was not unreasonable for her crew to not want to give up, but there were many suspicious points, the first one was based on Lei Xue's understanding of Li Goudan. She did not seem like such a delicate person. At such a time, she would be sensitive and considerate to take care of the person with the weakest physical strength. The second one was the monster that followed closely behind. It was too cooperative. If Li Goudan was slowing down to prevent people from being left behind, why would the monster behind also slow down?

If that wasn't the case, the second reason was that she didn't want anyone to fall behind for another reason!

Combining the fact that Shawn didn't seem to be afraid of being caught by the Black Shadow at the end of the line, Lei Xue had a terrifying guess: Goudan Li wasn't afraid of people dying because of falling behind, he was afraid that if someone fell behind, everyone would know that the black shadow behind didn't have the ability to kill people!

"You're very smart!" Xiao en looked at lei xue meaningfully. "Smarter than most of the stupid captains I've met. It seems like there's value in working together..."

Everyone looked at each other in a daze. For a moment, they did not understand what the two of them were saying. Meanwhile, Wang Ye was still in disbelief as he shouted at the shadow in front of him, "Jiayi?"

Goudan Li's body trembled. He stiffly turned his head around. His head turned at a strange angle. His face was still Goudan Li's, but his eyes were emitting a green light like cat's eye stones...

Everyone backed away in fright!

"Jiayi... What happened to Jiayi?" Ye Wang asked in a terrified voice.

"Rookies!" Xiao en stretched his back and slowly walked forward, he said faintly, "The first rule of survival here is never trust someone who has been alone, even if he disappeared in front of you for only a few seconds. Because in a few seconds, you might not see him in person!"

Chapter 685: Sean's intelligence

"The ship... why did the captain become like that?" Under the fading light, the monster in front of them that looked exactly like Li Goudan twisted its neck. Its face was filled with a strange smile that Li Goudan would never be able to smile.

Seeing this, everyone felt a chill run down their spines. In the cold weather, this bone-chilling chill was like adding frost to the snow...

“Nonsense!” Wang Ye said in a cold voice, “That’s not the captain at all!”

Lei Xue looked at Xiao En, but he was still not very nervous, as if he was not worried that the two monsters would attack him.

Seeing Lei Xue looking at him, Xiao en chuckled and raised the sword in his hand, directly slashing at Li Goudan from the front.

A silver-white light streaked across the slowly darkening sky like a ray of light. The monster that looked exactly like Li Goudan let out a shrill cry, after dodging Xiao En’s attack, it crawled on all fours and quickly ran into the distance!

Everyone was stunned. They thought to themselves, “He was scared away just like that?”

Lei Xue nodded secretly. She had already expected that this monster’s methods would be strange. To be able to imitate the captain so much, they did not even have the slightest awareness of it. It was truly terrifying, but because of this, Lei Xue was certain that the monster did not have the ability to directly attack them!

If they could directly attack them, why would they need to do so many fancy things? It was not a horror movie.

She looked behind her, but the shadow that had stood up had disappeared without her knowing...

“Why didn’t you tell us at the beginning?” Lei Xue looked at Shawn and asked quietly.

As soon as he said that, all the crew members looked at him with hostility, especially Wang Ye. This guy knew the inside story, but he didn’t say anything about the group of people being led away by the monster. His heart was to be punished!

Seeing everyone looking at him like that, Shawn didn’t dare to be arrogant. After all, Wilson and Johnny, the two Gold Knights, were really powerful, and the sailors around them were all top-tier bronze-level...

“It’s not that I don’t want to tell you, but most people in your situation won’t believe me...”. Sean shrugged and said, “Ask yourselves. If that monster doesn’t reveal its flaws, who would you believe in a stranger like me?”

Everyone was stunned and looked at each other strangely. Wang Ye held his breath in his throat but could not refute for a moment...

To be honest, the monster that turned into Li Goudan looked and sounded exactly the same. If a stranger said that she was fake, no one would believe it.

“But to be able to guess that something was wrong so quickly... you guys are the first...” Xiao en looked at lei xue with admiration.

Lei Xue frowned slightly. “You mean you met more than one group of people here?”

This woman's reaction was really fast...

Shawn smiled and said, "Before I went in, I met nine ships. You guys... are the tenth..."

Lei Xue asked, "Where are they? Are They all dead?"

"I don't know..." Shawn said honestly, "No one here knows if some of them are really dead. Even I'm not 100% sure that you guys are alive..."

"Lei Xue!" Ye Wang said anxiously, "We have to go back and get the Captain!"

"It's better not to do that..." Sean shook his head.

"Why?" Lei Xue looked at him.

"Because you can't find the captain when you go back..." Sean sighed and said, "As I said, once you're alone, you won't know whether she's real or not. You'll encounter a hundred monsters like that a hundred times when you go back "... ". "..."

"Then what do you mean? You want us to give up on the Captain?" Ye Wang stared at him coldly.

"It's not like we're giving up on each other here..." Sean sighed and said, "Your captain is very good. She's the most powerful person I've ever met. With her skills, I actually hope she's safe, because once a person like her is controlled by the shadow, it's a terrible thing for us." "... ". "..."

"Shadow?" Lei Xue narrowed her eyes. "Is it the one behind us?"

"Yes..." Sean nodded. "Don't think that it is just a thing to scare you. That thing is very scary. Once it gets into your body and breaks your head, your whole body will be replaced by it. At that time, it will not only appear in front of you, but also in front of you." "... ". "..."

"If it has that kind of ability, why doesn't it attack us directly?"

"Because it's also very fragile!" Sean explained, "That thing can only threaten you when its hands touch you, and it's not fast. If it attacks from the front, a bronze knight can kill it, and once it dies, the monsters that can create illusions with it will also die!"

"There's such a Thing?" Snow pondered for a moment, then said, "If the shadow is controlling it, how can you tell?"

"There's no fixed way to tell!" Shawn shook his head. "If it's just imitated, you can still tell by its skills, some habits, or memories it doesn't know, but once it's replaced by the shadow... "... ". "Then they really can't be identified, because they're exactly the same as their original owners!"

Hearing this, everyone's hair stood on end. was there such a weird thing in this world?

"That's why I told you not to look back..." "These monsters are average in strength. Every time they meet a new team, they'll try to divide them. Once they're separated, it's almost impossible for you to find them. And once you find them, most of them won't Be You!"

Everyone: "..."

"But it's not completely impossible..." looking at the gloomy faces of everyone, Shawn pointed forward.

Everyone looked up and saw that under the dim sky, there was actually a light tower in the distance, a light tower that looked like it was made of glass!

When did this thing exist?

"Is it an illusion?" Snow asked.

"No..." Shawn shook his head. "It's a real city. All the survivors are inside now!"

"There are survivors?" Everyone was stunned.

"Of course!" Shawn smiled. "Do you think I'm so excellent that I'm the only one who survived from so many ships?"

Lei Xue looked at him, feeling that he was still hiding information.

"Don't look at me like that. I really want to cooperate with you...". Shawn pointed at the glass tower in front of them and smiled. "Every time a new person comes, these monsters will do everything they can to lure people into the city and then choose the best person to possess. Your captain is very powerful. If he is still alive, he will definitely be lured into the city. Those shadows will not let go of the chance to take your captain. Therefore, you can only find your captain if you go into the city!"

"Really? What else are you hiding from us?" Snow continued.

"Some things... I'll tell you when I need to..." Sean shrugged. "I've already revealed a lot of information. Compared to other malicious people, I'm already very sincere..."

"..."

Chapter 686: Universal Coin!

After some discussion, it was finally decided by Lei Xue that they would go back to the city. Although many people did not trust Sean, it was obvious that they would only be waiting for death if they went back to the ship. It was better to fight for their lives...

On the way, Lei Xue and Wang Ye walked in front while Wilson protected them. At the end of the team, Johnny led three of the best crew members to guard Sean.

"Lei Xue... how much of what that Guy said is true?" Wang Ye, who was floating in front, asked in a low voice.

"I think... most of it is true..." Lei Xue replied.

Wang Ye: "You Trust him so much?"

"He wants to cooperate with us. It's easy to expose all the false information, and it's not good for our team to deal with unexpected situations. If he really needs us, using completely false information is not a motive..." Lei Xue said in a low voice. "... Lei Xue said in a low voice, "But I'm sure that he has some crucial information that he has not revealed to us. For example, the motive of the shadow...". "..."

"The motive of the Shadow?" Wang Ye was stunned. "What motive could that thing have?"

“You’re wrong. This is not a ghost story. Anything that attacks people has a motive...”. “...”lei xue frowned and said, “Even in some horror movies, those monsters would not say that they kill people for the purpose of killing, or for reproduction, or because of a curse. There is always a motive. And what he said is that the shadow likes excellent people. If he wants to invade the body of an excellent person, there must be a reason, right?” “What about after the invasion?”

“Then what do you think is the motive?”Asked Wang Ye.

“I don’t know...”Lei Xue shook her head. “But I have a feeling that the motive of the shadow might be the reason why Henry was able to leave this place!”

Wang Ye:“! !”

“The most important thing is to find the captain first...”. “...”lei xue said seriously, “According to Sean, the captain is very likely to be lured into that city. We have to find her as soon as possible, or as Sean said, a monster with the strength of the captain will appear, and we will have no chance at all!”

“Achoo! ! !”In the city, Li Goudan sneezed a big sneeze, then touched his red nose and looked around: “Who is thinking of this Goudan?”

Li Goudan’s speed is far faster than the crowd, plus she can fly, almost in the pursuit of the green insect has been almost led to the city, so although it is after the departure, but first snow they step into the city.

To be honest, the structure of the city was really extravagant...

Li Goudan looked around. The ground was a clean white stone slab, which was made of a material similar to marble. After that, there were colorful crystal decorations everywhere. The square, the terrace, and the large-scale glazed decorations were everywhere, it was so beautiful that it was like a crystal castle in a fairy tale.

Although it was not as exquisite as the high artistic content of their cloud city, the large number of crystal mats had a different sense of extravagance.

Li Goudan looked at the place with great interest and thought to himself, “Who came up with such a decoration? How interesting!”!

However, if seer was here, he would definitely be shocked. These crystals were not ordinary things, but an extremely rare magic material. The federation’s academics collectively called them: Crystals of all worlds, they were also known as the universal coins of the arcane world!

Why did they say that? Because these crystals could use alchemy arrays to replace any magic material of the same composition. Remember, anything! Including things from other worlds!

In the past, before the Void World and the world of souls were connected, those powerful beings from other worlds could already influence the world through distorted passages. They had their own believers in all parts of the universe.

So long ago, the mages of the top arcane civilizations were aware of the existence of these worlds outside the universe, and before the passage was opened, the alchemists, in order to obtain materials from other worlds, often will use the complex alchemy array to carry on to the Otherworld material summon!

It is well known that the basic principle of alchemy is equivalent exchange, but the medium of equivalent exchange is very difficult to measure, and the formula of what can be exchanged for what is endless, even the slightest mistake would result in a completely different outcome!

However, this crystal was different. It could completely ignore all kinds of terms and directly trade. It only needed the simplest alchemy array and a little medium to be able to use it to exchange for materials of equal value, including materials from death or Void Worlds!

This was also the reason why many alchemists were able to research materials from other worlds before the passage was opened!

However, these crystals were extremely precious, and the number of crystals formed was completely irregular. Many planets had low-level magic conditions, but there were plenty of them. Many places were clearly high-level magic environments, but they couldn't be mined at all.

They were the highest strategic resources of the current Universe Federation, the true hard currency. They were things that had only risen in value and not depreciated in value for trillions of eras! !

If seer knew that there were so many all-purpose crystals in a city, she would have risked her life to rush here.

Of course, Seer did not know about it, and Li Goudan naturally did not know the value of these things either. From time to time, he would try to destroy them to test the hardness of the crystals.

For example, cutting a crystal the size of a human into pieces with silk threads. It felt so high...

If seer saw her playing with these things that were sold in milligrams, she might even knead this itchy Li Goudan into dough...

"Damn, is there no one in such a big city? Hello? ?"Li Goudan tried to call out, but it was empty and there was no response.

However, Li Goudan could clearly feel that there were people in this place, and there was something vaguely observing her.

However, she did not rashly dig out those things. She always kept herself in an empty place, because her instincts told her not to go to a narrow area with complicated terrain, or something terrible might happen...

Just as she was thinking, she suddenly saw many figures. It was a very spacious square, and there was a huge floating crystal in the square. In the dark night, the crystal was like a bright pearl, emitting a beautiful and tiny light... .. A group of people stood there, motionless...

"Hello? What are you doing?"Li Goudan asked carefully as he closed the distance slightly.

However, the figures in the square still didn't move, showing no intention to pay attention to her.

“Anti-pornography, don’t move! ! !”Li Goudan shouted sternly!

Still, no one paid attention to her. The entire square echoed with her anti-pornography warning...

“What’s the situation?”Li Goudan approached those people suspiciously, holding a feather in her hand and keeping her vigilance.

When she got closer, she could clearly see that these people were standing on the square, as if they had been fixed by someone. Their expressions were vivid and lifelike, like statues...

However, she was very sure that these people were not statues. After all, with her vision, she could clearly see the fine pores on other people’s faces. How could a statue carve the pores so carefully?

Thinking of this, she moved closer to one of the fatties and stretched out her hand. “Brother, do you want the Fat Otaku Happy Water? Thirty thousand per bottle?”

Just as her hand was about to touch that person’s body, a hoarse voice suddenly sounded from behind. “I advise you not to do that...”

Chapter 687: Magical Trading Rules

Before the voice from behind appeared, Goudan Li had actually noticed that the other party was approaching her. The reason why he didn’t move was to see what the other party was trying to do, but he didn’t expect that the other party was also very vigilant. He was warning her from a distance of over a hundred meters...

Goudan Li slowly turned his head and looked at the person with the faint light of the crystal in the square. It was a very tall person, at least three meters tall, and his skeleton and body size were almost close to that of a strong orc. His brown beard and tattered clothes looked very sloppy... ..

“Uncle, who are you?”Li Goudan asked in the common language of the alliance in this world.

The person was slightly stunned. He looked at Li Goudan, who was as beautiful as a pearl, and suddenly understood. He shook his head and asked in a low voice, “Who are you?”

“Oh, I am. I am the search and rescue team sent by the Tanzanian Riz Kingdom. I am the captain of the Black Pearl, Elizabeth. May I know who you are, uncle?”Li Goudan displayed his ability to lie through his teeth.

“Captain?”The man narrowed his eyes and looked solemnly at doggerel Li, thinking to himself, female captain? And so young? Elizabeth? Did the Tanzanian Riz have this surname. It sounded very noble... ..

“Where’s Your Crew?”The burly man asked coldly.

“Lost...”doggerel Li shrugged. “I’m also looking for them. Uncle, how long have you been here? Shouldn’t you tell me your background?”

The burly man looked at her and fell silent. He had been here for a long time, and he knew very well that people who were alone were not trustworthy. However, if the newcomer had something that could prove his identity...

However, if the newcomer was really a newcomer, he could not use this method to test him, because many people only had one chance, and they had to use it on the most valuable person!

“My name is Hans, I’m the captain of the Shenwei from Calista Kingdom. I’ve been here for a year!”

“Really?” Li Goudan was excited. “Then where is this place, uncle? Can you introduce it? Also, have you seen my crew?”

“I don’t know where this is either...” the burly man named Hans shook his head. “But from the buildings here, it looks like the Crystal City in historical stories: Mithilina...”

“Oh... I’ve never heard of it...” Goudan Li shook his head honestly.

Hans: “...”

Was this guy really a Captain?

“I didn’t see your crew... ahem... I just said, you’d better not touch those people!” Hans frowned when he saw that Goudan Li was about to touch those statue-like people again.

“Why?” Goudan Li asked curiously.

“Because it’s very precious!” Hans looked at him. “If you use your precious opportunity to exchange for some useless people, it’s not worth it!”

“I don’t understand what you’re saying at all...” Li Goudan frowned.

Hans sighed when he heard that. He was not a person who was good at communication. On the previous ship, he was responsible for military force, and the one responsible for negotiating and managing people was actually the first mate...

After thinking for a while, he organized his words and said in a low voice, “These people, if you touch them, they will come back to life...”

“Really?” Li Goudan was suddenly energized, and he slapped the face of a man next to him!

Hans: “...”

Then, an unbelievable scene happened.

The Man, who was originally like a statue, was touched by Li Goudan, and his expression suddenly became lively. Then, he looked around in fear, as if he really came back to life!

“Wow, really!” Li Goudan excitedly grabbed the man who was trying to run away. “Uncle, what are these people? Why do they move when you touch them?”

Hans couldn’t help but cover his head, but then he stared at Li Goudan closely, as if he was observing something... ..

“Uncle, did I touch all these people and they will come back to life?” Li Goudan said excitedly, but her face suddenly stiffened as soon as she finished speaking.

She realized that half of her left Pinky had turned into a pink crystal!

This time, Li Goudan was shocked. He looked around in horror, then at his own finger. Then he looked at the other person. "Uncle, what's going on?"

"You traded a person for only one Pinky?" Hans looked at him in disbelief. "Who are you?"

"Uncle... Shouldn't you answer my question?" Li Goudan's expression was a little unfriendly. "Were you... deliberately trying to trick me into touching them?"

"I didn't!" Hans took a few steps back warily. He seemed to be very wary of Li Goudan, he quickly explained, "I told you not to touch them just now because I was at a disadvantage!" As he spoke, he unbuttoned his clothes and saw that under his clothes, more than half of his body had turned into crystals. And through that crystal, you can actually see each other's internal organs, and a lot of internal organs have become crystals...

"What is this situation?" Li Goudan slightly Leng.

"That's why I told you not to touch it..." Hans sighed and put on his clothes.

"You mean, your people are still alive?" On the other side, on the huge ship of the dead, Bengal Goode looked around at the statue-like people and said with some amazement.

"They are still alive..." Marina looked at the statue-like people around her and sighed, "But if we want them to come back to life, we need to exchange..."

"How do we exchange?" Bengali Goode asked curiously.

"Equivalent exchange..." marina said faintly, "Exchange with something that is equivalent to that person's value."

"What do you mean?"

"How should I put it..." marina frowned slightly, then, she pointed at a middle-aged man beside a crystal and said, "Take him for example. He is a noble and very rich. The wealth he has can be exchanged for a city. Until now, he has stored a lot of precious materials in many big banks. If you want to save him, you have to use the same materials to exchange, such as gold that corresponds to the amount of his assets, a magic item that is equivalent to those assets, or another excellent living person..." "..."

"Another living person?" Bengal Goode was a little confused, and he could not understand it anymore.

"It's a living person with the same value as him. It can be a politician, a rich businessman, a knight with decent strength..." Marina smiled and said, "This place will have its own calculation method to exchange with you for the same value. I just said that that guy can actually be exchanged for a silver."

"Silver Knight... Equal to a noble?" Bengal Goode asked curiously, "How is this equivalent calculated?"

"According to what you said, that person just now has a lot of wealth in a city. His value shouldn't be just a silver knight, right?"

"Sorry..." marina said faintly, "The trading rules here are not set by you. It's not what you think is equal to what it is, but what it thinks is equal to what it is..."

Bengal Goode: "..."

Marina looked at the sculptures around her and continued, "If a gold knight came to trade and woke him up, he would have to pay the price of a hand or an organ. Because here, a silver knight is almost equal to the value of a Gold Knight's hand..." "..."

"There's... There's such a thing..." Bengal Goode's expression became more and more strange...

Just as he was feeling strange, he suddenly saw something very strange. The buildings in the surrounding cities were originally quite dim, looking like something from a painting. However, suddenly.., a building became lively in front of him, and its color became brighter.

"This is?" Bengal Goode pointed at the building and asked curiously. He could clearly see that it was a bakery. What was strange was that as the bakery regained its color, the fragrance of bread and wheat really came out from it...

"Oh?" Marina looked at the bakery and smiled. "Someone has made a deal. He is quite lucky to have picked a useful one with a small price!"

Bengal Goode: "..."

Chapter 688: Uncle, HOW UNKIND!

"My name is Dahm, I'm the owner of Dahm's bakery on West Bethesda Street..."

On the other side of East Street, the fat middle-aged man who had been activated by Li Goudan was introducing himself with a terrified expression. Li Goudan, on the other hand, was still in a daze, it was obvious that he had yet to wake up from the so-called principle of equivalent exchange.

"You're Lucky!" The burly man named Hans perked up and nodded in satisfaction. "You're actually the owner of a food shop. Quick, where's Your Bakery? Bring me there quickly!"

"Yes... Yes Sir Knight..." Dahm nodded repeatedly.

"I say... Uncle, I regret it now. Can I exchange my fingers back?" Doggerel Li said with a sad face.

Damn it, when he was young, his mother had taught him not to touch things whenever he encountered them. The facts proved that the adults' words were still reasonable!

"Be Content!" Hans said without turning his head. "One little finger for a bakery. Where can you find such a good thing?"

Li Goudan: "..."

Wasn't he a different person? What did this have to do with a bakery?

In less than 15 minutes, they had arrived at the bakery that the other party had mentioned. Eggface Li immediately noticed that this bakery was very different from the surroundings...

To put it in layman terms, the style was different. The surroundings were filled with dark colors, but this bakery was bright, as if the color scale had been changed in Photoshop.

As soon as they entered the bakery, Hans said impatiently, "Give me something to eat. A full hard bread, cream, and chocolate sauce. If there's meat, that would be great!"

"Uh... Okay, Sir Knight..." Hans quickly nodded and bowed as he walked toward the kitchen.

Hans didn't seem to be in a hurry. He directly swept all the styles of bread on the display window and placed them on the table. He tore open the packaging and started eating.

This imposing manner made him look like someone who had moved bricks for five days without eating.

This is a good-for-nothing... Li Goudan thought to himself.

"Uncle, isn't it time to explain what's going on?"

Hans paused. He swallowed the bread and stared at Li Goudan. "If you want information, what can you give me in exchange?"

Li Goudan laughed. "I saved this bakery owner, right? You used it quite smoothly. How dare you ask me what I can give you in exchange for free food? Are you going to tell me? If you don't, I'll turn you into bread later! !"

Hans's face stiffened when he heard that. He frowned and looked at Li Goudan.

If it was an ordinary newbie, he would have long lost his temper after being threatened like this. Free food is free food. What are you going to do?

But this guy was a little different...

He had lived here for a long time and was familiar with the trading rules here. Although the fatty in this bakery was an ordinary person, he had an asset. In the end, the other party had only mortgaged one finger.

This was a pink mortgage with no interest. If it were him, he would at least have to use his palm as a mortgage, the type with black interest, or buy it with two fingers!

This meant that the fatty was either a gold knight or a great mage...

"Yo, I was wondering who was so lucky to get a bakery. So it was you, Hans!"

Just as Hans was thinking about how to reply to Goudan Li, a familiar and annoying voice suddenly rang out. Hans's face instantly darkened!

Goudan Li also looked over and saw a burly man dressed in red. The man was dressed like a pirate, but with this appearance... .. It was a little abnormal...

The word 'abnormal' meant that the man's body was full of bulging veins, including his face and forehead. The bulging veins were exaggerated, as if something was about to burst them. The veins could be seen wriggling like worms...

Looking at that face, Li Goudan felt like he couldn't eat...

"Roger..." Hans stood up with a serious expression, full of vigilance.

“Roger?” Goudan Li was stunned, and then he looked around curiously. Roger was already here, would there be a road flying out later?

“Oh, a newcomer?” The burly man named Roger noticed Goudan Li, and was first shocked by his beauty, but then he saw the pink crystal on his finger. He immediately frowned and looked around the whole bakery, then, when he looked at Li Goudan again, his expression revealed a trace of solemnity.

“How should I address this beautiful lady?” Roger changed into a self-righteous smile and said to Li Goudan.

However, no matter how hard he tried, that face would not be related to gentleness...

Li Goudan looked at him strangely and finally said, “This good man, I’m not judging people by their looks. However, your appearance has indeed affected your appetite. If there’s nothing else... How about we part ways here?”

Roger’s face stiffened, and the next second, the smile on his face disappeared. His expression became gloomy, and his entire face suddenly looked gloomy and terrifying. Even though he didn’t look angry, he still looked terrifying... ..

SH * t! !

Hans’s face instantly turned pale, and he stepped back. Something had happened while he was rubbing the bread. How could this woman be so troublesome. Roger hated it when people used his appearance as a reason to cause trouble. It seemed like he couldn’t be nice to her today...

He looked around and thought about which direction he should run in if there was a fight between the two of them...

HMM... The window seat was not bad. When he left, he could also take some bread with him... ..

As for staying behind to help this girl, he had no thoughts at all. Although this girl was most likely gold-rank based on the trading rules, he still didn’t think that she could beat Roger. This year.., there were more than one gold-tier fighter who had died at Roger’s hands!

At the thought of this, he tensed up his muscles and stared at the two of them, ready to seize the opportunity to escape...

“Hey, the Chocolate Mousse is here! !”

Just as the atmosphere was tense, the fat chef in the kitchen came out with a big piece of Chocolate Mousse.

Hans frowned, and Li Goudan turned his head to look at the bakery owner. He smiled and said, “Wow, this looks pretty good. I need a pastry chef on my ship. Are you interested in joining my Goudan?”

The owner: “? ? ?”

Hans: Idiot! !

Seeing Li Goudan turn his head around in a daze, Hans couldn’t help but curse in his heart.

How dare he turn around at a time like this? What was this guy thinking?

Sure enough, the moment Roger saw Li Goudan turn around, he was stunned at first, then a sinister smile appeared on his face. Without hesitation, he drew the scimitar from his waist, and the battle spirit in his entire body erupted, the scimitar brought with it a gust of wind pressure formed by golden battle spirit as it slashed directly at Li Goudan's head!

The battle spirit that was triggered in a flash was also extremely powerful. If this slash was successful, Li Goudan might be directly crushed into meat paste by the huge wind pressure...

Hans's face was ashen. In an instant, he ran towards the kitchen window without hesitation!

The original plan was that this girl should have some ability. Although she could not be a match for an experienced person like Roger, she should be able to stall for time. However, he did not expect this girl to be so arrogant. She actually dared to turn around at such a close distance?

Which greenhouse raised this glass flower?

It was over. If she died directly, his chance of escaping from Roger's clutches today would be very slim!

However, just as he was trying his best to escape with a pessimistic attitude, he suddenly felt his shoulders tighten. A powerful force directly interrupted his momentum and stabilized him on the spot!

It's over... ? Could it be that I still can't escape the fate of being sacrificed?

Hans thought with a pale face.

But in the next second, the voice behind him stunned him.

"You want to run after eating for free? Uncle, that's not nice!"

Eh?

Hans was stunned. That was the girl's voice. F * ck, she actually had the time to pay attention to him at this time?

At the thought of this, Hans turned his head stiffly and saw an unbelievable scene.

The girl had one hand on his shoulder to control him, and the other hand was holding the machete that Roger had cut down with his bare hands.

Chapter 689: Trading Rules (Part One)

Who the hell is this guy?

Hans was stunned by what he saw. He had never seen a golden battle-qi level attack with his bare hands. What he could do was only in the stories that some bards told him, and the main characters in these stories were all legendary figures who had exaggerated through literary techniques!

This little girl was a legend?

Also surprised was that pirate named Roger. He swore that he didn't hold back. As an experienced martial artist, he used his full strength when fighting with life and death like a lion fighting a rabbit, not to mention in this ghostly place that was filled with danger everywhere.

And just now, not only did the other party catch it with his bare hands, but he was also able to not let out even a little bit of his battle spirit. Originally, if his attack was successful, the power of the attack would at least split this shop in half, but now... Not to mention the momentum, there was no sound at all... ..

Could it be anti-magic? He heard that there were some special people in the church who could seal magic and combat aura energy. Could This girl be a member of the higher-ups of the church?

Ding...

Just as he was thinking about this, a crisp metallic sound suddenly rang out. Then, Roger saw that spider-web-like cracks began to appear on his machete!

In that instant, he immediately understood the reason. His pupils immediately constricted. Without any hesitation, he released the handle of his scimitar and retreated out of the door!

This was not the anti-magic. His combat aura did not disappear just now. Instead, it was counteracted by the other party using something of the same energy!

The two waves of energy were exactly the same. There was not the slightest difference, so there was not the slightest sound. As for why he could instantly guess that it was because of his broken scimitar...

...

His knife was a special enchanted knife, which could absorb and compress the combat chi energy in his body to the maximum, and he had also killed many experts of the same level through the special power of this knife! The blacksmith of this knife had once told him to pay attention to the limit of energy tolerance when using it, and the limit of energy tolerance of this knife was exactly twice as much as the energy he had just used!

After thinking it through, Roger no longer had the slightest bit of courage to fight. He instantly gave up the weapon in his hand and quickly retreated outside. His burly figure was as agile as a rabbit, and he fled in a sorry state. Hans, who was watching from the side, was dumbstruck!

"Quite a thief, this guy..."Goudan's eyes narrowed, and he looked at Hans next to him. In the end, he did not chase after him. The situation here was very strange. Who knew if this Hans would still be Hans after he had chased after him. ...

On the other side, Roger, who was fleeing in a panic, only dared to stop and look behind him after crossing almost half the city from the west of the city. When he saw that no one was chasing after him, he heaved a sigh of relief.

Who exactly was that guy? Was He a legend? When did such a young legend appear in the Western Islands?

“You... who exactly are you?” Hans stuttered and asked.

“Didn’t I just introduce myself?” Goudan li said, “The royal captain of the Tanzanian Riz: Isabelle...”

“Since when did the Tanzanian Riz have a person like you? And you just said your name was Elizabeth!”

“Oh, is that so?” That’s not important, uncle. Let’s continue the topic we were talking about just now...

“Look,” Li Goudan said with a smile ... “You ate quite a lot just now. There’s even chocolate mousse here. You Can’t let this finger of mine go to waste, right? “You’d better tell me quickly. I’m a very impatient person. If you don’t make it clear before the cake comes out, I’ll stuff you into the oven!”

Hans swallowed his saliva and looked at the big oven in the kitchen in horror. To be honest, he was very confident that the other party could do this...

So he sat back down and replied honestly, “What do you want to know?”

“Let’s talk about the trading rules first...” Li Goudan smiled and gave him a thumbs up.

“Didn’t I just say that the exchange is equivalent? This person is a baker who owns a bakery. His assets and his are equal to one of your little thumbs. You triggered the trading conditions, so you made the Exchange!”

“What do the different colors of the crystals mean?” Li Goudan asked with a smile.

She had just noticed that the crystals on Hans’s body were pink, red, and black. She felt that it was not just the color difference...

Hans was silent for a moment and thought to himself, this guy is so powerful, and his observation skills are not bad. He doesn’t seem to be an easy person to fool...

After thinking about it, he still didn’t dare to lie. After all, it was too risky to plot against such a strong person...

“Pink represents no interest and no cost of mortgage. Usually, the crystal acquiesces that it wants something from you, but because the value of the item you exchange for is much higher than the other side, this kind of pink crystal is formed. Red Crystal represents the same value, so if you want to mortgage, you need to pay interest or choose to increase the mortgage price to redeem it. Black Crystal represents that the item you exchange for is lower than the other side’s value, so you need to pay high interest to compensate.”

“Interest?” Goudan laughed. “What happens if you can’t Pay It Back?”

“Then, at a certain time, the things you exchange for will be bought out, and the interest generated will be forcibly taken back from your body!”

“Interesting...” Goudan touched his chin. “Then how do you redeem it?”

“Use something of equal value, bring it under the big crystal, and activate the sacrificial transaction to redeem the things you previously mortgaged!”

“Something of equal value? What do you mean exactly?” Asked Eggface.

Hans said, "Anything of value can be used. It can be wealth, weapons, magic items, living people. Anything of value can be used. That crystal has its own set of value rules..."

"Oh, it still decides the price? How Shameless!" Eggface Li smiled and then asked, "What if I don't have a debt? Can I exchange it for other things?"

Hans's heart tightened. He looked at Li Goudan's half-smile and finally, his teacher said, "Yes..."

"What can I exchange it for?"

"Many things, such as high-grade weapons, magic materials, and so on..."

"Hey, don't say wait... say it clearly, uncle..." Goudan didn't want the other party to be vague at all. He stared at him and smiled. "There are more than these things, right?"

Hearing this, Hans's pupils shrank slightly. He looked at the other party. This guy was more sensitive than he had imagined... ..

Eggface continued, "The ugly man who attacked us just now, his condition was definitely not caused by himself. His strength should have been obtained through exchanging here, right?"

"How do you know?" Hans frowned.

"Uncle, now I'm asking you a question, right?" Eggface Li sneered. "You don't seem to have any self-awareness!"

Hans's heart skipped a beat, and he thought to himself, is she bluffing me, or does she really know something?

Li Goudan looked across with a smile. If the other party dared to lie, she would stuff him into the oven and cook him for half an hour!

As for how to determine whether the other party was lying or not, she had a good idea, because she did know the reason for that burly man's abnormal body condition. It was not the first time she had seen the condition of that ugly burly man. On a fortuitous trip to Gondolin.., she had seen such a situation in the laboratory there!

Chapter 690: Trading Rules (Part Two)

Li Goudan was a person who loved to join in the fun. Naturally, she would not miss out on the exploration of the map of Gondolin. There, she had seen some lords who were reluctant to undergo genetic surgery, causing soldiers to mutate.

This was related to the cost. It was difficult for soldiers to avoid fighting with the local mutated creatures when exploring the map. The more battles they fought, the more alchemy energy they absorbed. And that energy was very complicated, in addition to the pure energy produced by the creatures themselves, there were also the complex mutations of genes and elements. Therefore, the soldiers who stayed there for a long time would mutate.

In response to this situation, the biological surgery launched by Gondolin could basically solve the problem. Whether it was the number six sequence of the strengthened main gene or the number four

sequence of the druid that could co-exist with multiple genes, they could solve the problem of soldier mutation, however, the drawback was that the cost was too high!

The biological gene surgery was a hole that burned gold. It was not something that could be managed with one surgery for the rest of one's life. Especially when it was constantly absorbing high-intensity and complicated energy, the frequency of the need for advanced surgery would increase, in other words, your soldier would need to constantly spend money to carry out the surgery.

For example, a soldier carrying out a druid surgery would cost 50,000 points. After the surgery, after a period of training, he would reach the level of a Gold Knight. After that, he would need to stay in the Black Goat region for about two months before he would reach his limit, you would need to perform another advanced surgery to deal with the complicated energy. The second surgery would allow your soldier to become a legend. The required points would be 100,000 points!

Then, the question was, would you move or not? If you did not move, your soldier would not be able to continue wandering in the map. Otherwise, he might lose control of his mutation. However, if you moved, you would not be able to guarantee that the soldier's income in the map would be able to make up for the cost.

As a result, many players could only brace themselves and invest their money even if their hearts were bleeding... ..

How could a player not be tempted by such a large market? However, the problem was that Gondorin's biological surgery technology was too advanced. Isabelle had initially arranged for Gondorin to let its forces have a large amount of funds for technological development. It was currently the fastest-growing force in the technological tree other than cabbages, moreover, it had already begun to focus on the area of gene surgery.

With a large amount of funds and technological development that was one step ahead of others, it was extremely difficult for other forces to catch up. Hence, there were people who wanted to find a new way to use a new type of surgery to seize the market!

It was the pure energy surgery!

This surgery was a collaborative research project between the players of the energy shaping Lord and the players of the biological lord. It was to purify the energy that the soldiers brought back from the map of the Black Goat. It did not do gene evolution or compatibility, the purified energy would be easier to absorb if there was no genetic mutation in the body. It might even be able to achieve the path of natural evolution.

The most important thing was that the cost was low. After the surgery experiment was successful, they only asked for 5,000 points in order to seize the market. This was almost one-tenth of the price of a beginner surgery in Gondolin. This kind of enticing price naturally attracted many players, in a short time, almost half of Gondolin's share of the surgery was taken away!

At that time, many experts who took advantage of Grandpa Lu's deep sleep came out to comment that this new surgical idea had opened up a new era to break the monopoly of Gondolin's genetic surgery.

Unfortunately, the good times did not last long. This surgery had a fatal flaw, the pure energy input was indeed easier to absorb and the cost was lower. However, without genetic evolution, the body's energy capacity was limited. Moreover, according to the latest research, this pure energy input would cause the body's biological system to become chaotic, as a result, all sorts of problems would arise, eventually leading to the collapse of the biological system!

Later on, the soldiers who had undergone this kind of surgery began to experience all sorts of situations, the soldiers who had their internal organs enlarged and led to the disorder of the body, the soldiers who had their nerve centers broken and turned into human-shaped zombies, and the soldiers who had their bones growing out of control and turned into crawling people like centipedes. However, at most, they would become like Roger from before, with their blood vessels and meridians expanding and their skin and flesh falling off, it would turn into a kind of flesh-and-blood human, and the nerves in the brain would also collapse and eventually turn into something like a bloody corpse.

The players affectionately called it the blood dumpling!

Because the outcome was too miserable, Eggface could not help but find a developer to ask for the reason. The developer of Gondolin, ran Xiaojuan, told her that most of the warriors in this world were Qi practitioners, somewhat similar to the Qi practitioners in central China, they relied on their veins to guide energy to strengthen themselves, which was why their veins had the biggest weakness. They also told themselves many times not to think of taking the wrong path, and that it was the best way to spend money to do regular genetic surgery on them. The two players with strange ideas were too simple-minded, and they would collapse sooner or later... ..

As expected, the rapid evolution method that skipped the genetic modification caused huge losses to many lords. The two player forces that implemented this plan were still embroiled in a huge economic dispute...

Thinking of this, Li Goudan was a little curious. He heard that the two lords had not appeared for some time, so they would not come here to continue experimenting, right?

Otherwise, why would they come up with the same trick?

But that was not important. The key was to understand the situation here.

Hans could not bluff the other party, in the end, he could only say honestly, "Yes, you can get stronger. That Roger came around the same time as me. At that time, he was only silver-tier, but he first discovered the rules here. He sacrificed a lot of people to have a weapon that could unleash terrifying combat aura, and his strength also evolved to gold-tier!"

"I see..." Li Goudan rubbed his chin and nodded, this was interesting. Not only could they change people here, but they could also change weapons and power. Although power harvesting was a very deceptive pure energy input, it was still a high-end technology. She really wanted to know, who was the person who was trading...

It couldn't really be the fast crystal, right?

Hans looked at the person carefully. The reason he didn't reveal the complete information was not because he wanted to set her up, he was afraid that the person would know the allure of the Crystal and wouldn't be able to resist hunting people like Roger.

With her strength, she had almost no resistance against him...

"By the way, before I came here, I met a monster that could transform into my crew. It lured me here. Do you know what that thing is?" Asked Eggface.

Hans: "Pogrel..."

Eggface: "What Line?"

Hans: "Looks like you're not from the Western Isles..."

Eggface: "..."

Hans: "Pogrel is what we call an evil spirit. There was a legend a long time ago that there was a kind of skinned evil spirit in this world. After killing a person, it would eat the flesh and bones of the person. Then, it would peel off his belt and put it on its body. Then, it would return to his hometown and eat his family with his identity!"

Hearing this, Eggface frowned. Was Johnny directly skinned?

"Of course... This is just an example..." Hans said faintly, "That thing is even more powerful. It doesn't need to be skinned. If you're not careful, you can become your partner and deceive you. So, most of the people who can survive here are lone wolves..."

"Is there a way to tell?" Eggface frowned.

"For now, there's only one..." Hans looked at the little finger on Eggface's hand.

Eggface was stunned, and immediately understood what Hans meant. He meant that only normal people could trade, and those monsters couldn't become human... ..

Thinking of this, she frowned. This test method was terrible. You couldn't always test it, because every time you tested it, you would lose something...

Thinking of this, Eggface suddenly thought of something else and quickly asked, "How many of those monsters are there?"

Hans said faintly, "I don't know how many there are, but there must be a lot of them, because I've killed at least thirty of them..."

"Is that a lot?" Eggface's frown deepened. She could more or less guess the reason for her crew's disappearance, which meant that it was very likely that her current crew was alive, but had been mixed with evil spirits... ..
