

A Bunch 761

Chapter 761 Intelligence!

There's an overseas extraordinary in the intelligence department?

This news caused the leader to break out in cold sweat. He was in such a rush that he didn't even bring the few guards who usually protected him...

"Miss Lei... is the news confirmed?" Elder Li asked in a low voice.

Lei Xue nodded with certainty.

Elder Li's face immediately turned pale.

Ever since the rise of the transcendent powers, it wasn't as if the country had never been infiltrated by an overseas transcendent power. After all, the government didn't have a proper transcendent force. There were definitely loopholes if they relied on the sect's power to exclude outsiders. However, wasn't it a little exaggerated to infiltrate the intelligence department directly...

There must be a big figure supporting them from behind! !

At the thought of this, elder Li and the leader's faces turned ashen!

"Elder Li?" Lei Xue tilted her head, clearly wondering what they were waiting for? It was highly likely that the other party would directly assassinate them.

The leader hesitated for a moment, then picked up a pen and wrote a sentence before handing it over to Lei Xue. Lei Xue took it over and was momentarily stunned.

On it was written: are the people from the Dragon Group Reliable?

Lei Xue narrowed her eyes and looked at the leader. She did not expect the leader to think so deeply... ..

It was normal for the other party to be worried. The first batch of members of the Dragon Group did not have an official background. To put it bluntly, they all came from the people. Their loyalty was something that needed to be discussed.

In the leader's heart, those players had probably been controlled by Luo Fu long ago. They were Luo Fu's people and not the officials' people. Although they were cooperating, it was hard to say at such a crucial moment, especially since Luo Fu's attitude had been ambiguous for the past two days...

First, he had opened the overseas passage, and then he had contacted the Rex family. In addition, elder Li hadn't been able to contact anyone in the past two days, so it was normal that the leader didn't trust the People Luo Fu had provided.

So, was Luo Fu trustworthy now?

At first, Lei Xue had actually thought about this issue just like the leader. After all, the sudden announcement of the overseas passage and the preferential treatment of overseas players in "Galaxy" made her somewhat confused about the intentions of Luo Fu's higher-ups.

But now, she was at least certain that the sect master of Luo Fu was biased toward Huazhong... ..

Because she had seen him before she came...

On the ship, she was hesitating on how to kill herself when the sect master of Luo Fu suddenly appeared on the ship. He seemed to have heard the bad idea of Li Goudan killing himself and returning to the city for free, therefore, he fiercely scolded Li Goudan and herself.

In the end, he personally sent her back.

At the thought of this, Lei Xue was very puzzled. The sect master didn't seem to care that she sent the information back immediately. She guessed that at least now, elder Fang's initial guess was right. This sect master of Luo Fu was on the side of Huazhong.

At the thought of this, she wrote down her thoughts on a piece of paper. The leader took it and looked at Lei Xue deeply. In the end, he didn't hesitate anymore and nodded to elder Li.

Elder Li quickly took out his phone and sent a message to a number on it.

After the message was sent, in less than 15 minutes, a black shadow suddenly appeared in the reception room. The Black Shadow was very abrupt, but until everyone saw the Black Shadow, they did not know how it came in.

The Black Shadow disappeared, and a familiar beautiful face appeared in front of elder Li and the others. Lei Xue Glanced at the other party and instantly recognized the other party.

Member number nine of the Dragon Group: Chen Yutong!

Seeing that it was her, Lei Xue Let out a sigh of relief. She knew much more about this lei xue than elder Li and the others. In the ranking list of the players in the base, Chen Yutong was ranked fifth, and among the elf players, he was ranked second, only second to Leng Xing!

What kind of concept was this? When Li Goudan was bored, he had once mentioned to him that any player above level 3 in the base could use their genetic bodies to beat up that twelve golden immortals of Kunlun! Brother Gou had once used his genetic body to beat up three of them by himself, and that was a year ago!

And in the ranking, brother Gou's overall player ranking was only ranked thirteenth!

"Did something happen?" Chen Yutong asked curiously.

Currently, there were three players stationed in Yanjing, and it was her turn to be on duty today. Ever since she had been stationed in Yanjing, she had never received any serious matters. Just now, she had even secretly left her post to find an internet cafe to beat up Lol...

"There are extraordinaires who have infiltrated this place. I hope you can protect the leader and the others!" Lei Xue said directly.

The other party's ranking made her feel extremely at ease. She did not believe that the extraordinaire who had infiltrated this place could be compared to a golden immortal of Kunlun!

"Oh? where is he?" Chen Yu Tong looked around and asked.

Elder Li looked at Lei Xue, indicating that she could tell the identity of the person.

“It’s major general Yan Hai Wei!”

“What? ?” Elder Li and the others were immediately shocked. One had to know that Yan Hai Wei was the head of the Yan family in this generation. Was he an extraordinary person?

“Perhaps it might not be him in person...” Lei Xue pondered for a moment and said a possibility... ..

“Yu Tong...” elder Li said seriously, “How certain are you that you can take him down?”

“Hehe...” Chen Yu Tong laughed coldly and turned into a black shadow and left without saying a word... ..

He was really full of confidence... .. Lei Xue suddenly thought of it with some envy.

“Let’s talk about the information first!” After Chen Yu Tong left, the leader looked at Lei Xue and said seriously, “You came back alone in a hurry this time. You must have something important to tell me, right?”

Lei Xue nodded. First, she gave a rough description of the information she knew.

After listening to Lei Xue’s description, both the leader and elder Li could not come back to their senses for a long time... ..

“You’re saying that the Luofu faction is willing to pass on their latest internal technology and knowledge to the players?” Elder Li asked in shock.

“They’re advanced players! According to the information I’ve gathered, those players can only pass on their knowledge and technology after they reach the level requirement, enter the new world, and accumulate a certain amount of resources. For example, if they have a certain indigenous population or a stable base area, the Luofu higher-ups will pass on their knowledge and technology. Moreover, these knowledge and technology will be classified by the Luofu higher-ups in the name of civilization. Players who meet the requirements can only choose one of them. However, every civilization has incredible technological achievements. Some are good at biotechnology, some are good at machinery, and there are even some who are good at a mysterious alchemy knowledge. I’m guessing that this is a different faction created by the Luofu higher-ups due to their differences. Therefore, they are using the players as experiments to see which faction is more suitable for the development of civilization...” “...”

There was such a thing?

Elder Li and the leader sucked in a breath of cold air. This information was too valuable. Didn’t this mean that as long as their level was high, they would be able to obtain these advanced technologies and technologies?

Wait a moment...

The leader suddenly thought of something. He slapped his thigh and said, “Then doesn’t the opening of the overseas passage mean...”

“Yes...” a trace of admiration flashed across Snow Lei’s heart when she saw that the leader could understand and react so quickly. She replied, “The overseas forces can also obtain the technology and technology of Luofu by nurturing players!”

“How can this be? ?” Elder Li almost jumped up from the side!

“We can’t change this...” . Snow Lei shook her head and said, “Since the overseas passage has been opened, it means that the upper echelons of Luofu don’t want to monopolize central China alone. However...” “...” . We have more advanced players in central China, so we have some advantage, but...” .
“...”

“But what?” The leader’s heart skipped a beat, and he hurriedly asked.

“This city’s election is a variable!”

“City’s election?” The leader and elder Li asked in unison, “What is that?”

Lei Xue hurriedly explained the attributes and situation of the new city in the headquarters. After the leader and elder Li heard it, they were stunned for a long time.

After a long time, the leader finally reacted and said sternly, “This position must not fall into the hands of foreigners! !”

Chapter 762: Happy Cooperation!

“Can any of you tell me where those guys by Mitt’s side came from?” In the Reis family, Mitt’s uncle frowned as he looked at the information on the table. The photo on the table was exactly the same as the one elder Lee received.

In the conference hall, the other two rows were filled with people. On the left were people from the Reis family’s headquarters, all of whom supported Uncle Mitt: the Hoggle faction. On the other side were people from the extraordinary corps led by Deputy Commander Raines.

“These people are not from the extraordinary corps...” a middle-aged man on the right frowned as he looked at the photo, a hint of doubt appeared on his firm and cold face. “Although Jennifer and Reis are not from the top team, they are still old men who have accepted the gene sequence plan for thirty years. Their strength is among the best in the ordinary divisions. They were killed before they could even send out a distress signal. It can be seen that the people around Mitt are not simple. They are at least at the Captain Level!”

“Captain Level?” The members of the Reese family frowned. There were only over thirty captains in the extraordinary corps, and they were all top-tier trump cards backed by the major capital families. Although the Reese family had an extremely high status... However, the Reese family only had one captain level when Raines joined them. It was this strict-looking man in front of them... ..

Mitte was now isolated by his family. Where did he get the resources to recruit a captain-level person? Moreover, it was someone Raines didn’t know?

“Could it be someone from an external force, such as... .. “The Red Sun Country’s Kagura Legion?” One of the Reese family members frowned and asked, “I heard that some of the secret inheritances of the Red Sun country are extremely powerful in disguise! “They can even change the size of their bones.”

“I don’t think so...” . “The captain of the Kagura Legion has always been under our strict surveillance. It’s unlikely that such a powerful figure would suddenly appear behind our back.” “...” . “... on the contrary...” “... There’s a country whose extraordinary forces have always been very mysterious ...”

“You mean... Huazhong?” In the Reis family, a middle-aged lady who was filled with a luxurious aura narrowed her eyes and asked.

“Yes...” Rennes put out another pile of information. Everyone took a look and was immediately attracted by the person in the photo. The person in the photo looked somewhat similar to the man and woman beside Mitt. They were both unbelievably handsome... ..

“Li Jiayi, codenamed Green Sparrow, member of the Dragon Team No. 1. As soon as she arrived at BA tie, she killed two members of the top teams in our division. Then, she defeated four captains of the Kagura Legion in a one-on-four fight and even killed two of them. Her combat strength was terrifying. She was at least at the Legion level. At that time, she was listed as an S-class dangerous figure by us...” . “...”

“This is the No. 1 of the Dragon Group?” Many members of the Reese family took a deep breath when they saw this information for the first time. They didn’t expect that the guy who was rated as an s-rank character would look so young.

The key point was that the guy had almost the same temperament as the two people beside Mitt.

“So that means the people beside Mitt are from the Dragon Group?” The member of the Reese family was furious. “What are they trying to do?”

“Maybe they don’t mean Huazhong...” Rainders suddenly said faintly.

“Oh?” Hogg, who had been silent the whole time, finally spoke. He glanced at Rainders and smiled. “Is it related to the game called ‘Sea of stars’?”

Rainders immediately smiled and glanced at him. It was not tiring to deal with smart people. This was also the reason why he chose to work with this old man.

Hogg said slowly, “The first thing my nephew did after he returned to the family was to announce that he would be the agent for galaxy. When I first received this news, I was actually quite curious. It’s just a game. Is it worth it for the head of the family to announce it personally?”

Everyone nodded slightly when they heard this. Although the virtual gaming market was getting bigger and the Reis family was involved, the Reis family was still a family that focused on energy and heavy industry. It wouldn’t be so grand to have the head of the family appear in order to represent a game. This also caused the popularity of Galaxy in America to become unusually high these two days.

Hogg paused for a moment and continued, “So I carefully studied this Huazhong to come to the game. After studying it, I found that this game doesn’t seem simple...” . Then, he looked at Raines. “Since you took the initiative to mention it today, you should have more information, right?”

“Yes...” Raines nodded, he said seriously, “This game is related to a sect called Luofu in Huazhong. This Luofu is a sect that suddenly appeared in Huazhong recently, and its background is not simple. All the members of the Dragon Group in Huazhong are nurtured by this sect!”

“Oh?” Hogg was stunned, and then he said, “But what does this game have to do with this sect?”

“Reliable information...” “... This game is not an ordinary game.” “...” Raines said faintly, “According to the analysis, it is the key for Luofu to train high-level combat power. Haven’t you noticed that the person in the photo is very similar to the elf race player in the game?”

Hearing this, Hogs’ pupils shrank, and his usually calm expression became a little solemn. In fact, he had already noticed this a day ago. The two people beside Milt looked very similar to the elf players in the game...

However, this guess was too shocking, and for a moment, he could not believe it. Even now, he felt that it was a little ridiculous for the other party to bring it up.

The people around him were stunned for some reason. They did not understand what these two people were talking about. Why did they become more and more mysterious as they talked? What did it mean that they were very similar to game characters? They had transmigrated?

The meeting room instantly fell into silence. After a long while, Hogs finally opened his mouth and asked with some difficulty, “What do you think is the situation?”

“The information is related to the arcane realm...” Raines said faintly, “Huazhong has already sent over a hundred technical experts to enter the arcane realm with Luofu’s people. We still need further information on the specific situation...”

Hearing this, Hogs widened his eyes and said with excitement, “Where did you get this information?”

“Spies who have been hiding for many years...” Raines narrowed his eyes. “We spent a great deal of effort to train them. Their code name is dark star project. It was the work of my previous commander...”

“The previous commander?” Hogg was stunned. He thought to himself, “Wasn’t that two hundred years ago?”

“Just yesterday, our spy sent us a message using a password...” Raines lowered his voice and said, “He said that the force called Luofu is no small matter and has a secret that can change the world. He has already told us to bring him back to China. The commander has already issued a mission. In the afternoon, I will set out to welcome this spy...” “...”

Everyone was stunned and immediately felt shocked. A Spy who had been hiding for more than two hundred years had probably been in the central China for more than four generations. He actually sent a message saying that he was going to return to China. This showed the importance of this news... “...”

“I see...” a fox-like smile appeared on Hogg’s face. “So this is the reason why you are cooperating with me, General!”

Hearing this, Raines also looked at the other party with a smile. It was not tiring to deal with smart people. Indeed, this was the reason why he suddenly decided to work together with the Rex family, after receiving the news about Luofu half a month ago, he understood that this news was an

opportunity to soar to the sky. Therefore, he planned to swallow the fruits of this news, however, he knew that if he did so, he would definitely be pressured by the commander.

Therefore, he needed a powerful family to resist the pressure and buy time for him!

He looked at the other party with a smile and waited for the other party to make a decision. He could see that this old man of the Rex family was just like him. They were both ambitious people who were unwilling to let others down!

"I understand!" Hogg took a deep breath and nodded solemnly, "I won't have any conflicts with my nephew anymore. General, you must bring that information here. My Rex family will bear all the consequences for you!"

Raines smiled again and stood up to extend his hand, "Happy Cooperation!"

Hogarth also smiled and stretched out his hand, "Happy Cooperation! !"

Chapter 763: Complicated Feelings

At this moment, in the domestic intelligence department, many experts from the analysis group gathered once again and began to help analyze the importance of this election. Due to the high transparency of this intelligence, it didn't take long for the analysis group to list out the important relationships.

Elder Fang's son, Fang Jianming, was reporting the situation in the chief's office with a list of reports.

"According to the information provided by Lieutenant Colonel Lei Xue, this Luofu gives these so-called players a lot of power. They have the right to explore, colonize, and build otherworlds. They even provide material and technical assistance after colonizing a certain scale. They are completely treating the players as core forces to nurture. Obviously, this is in line with the information my father deduced. The most important thing that the Luofu faction lacks is population!"

"Population?" The leader and elder Li's hearts skipped a beat. Feeling their tongues dry, they quickly asked, "What do you mean?"

Fang Jianming said, "According to Lieutenant Colonel Lei Xue's intelligence...". Luofu had an extremely rich knowledge base, and its technology was very mature. The player faction that she belonged to had built a super-era warship in just half a year. According to this mature technology, if there were enough people, Luofu would have already ruled the Otherworld "... "

"That makes sense..." the leader and elder Li nodded.

"But there's a contradiction here... Fang Jianming was puzzled. "How did Luofu manage to develop technology to such an extent without enough people "... even if they have been collecting brilliant researchers for so many years, without enough manpower and material resources, it would be difficult to realize some scientific ideas ? How did they form the rich scientific and technological system that Lieutenant Colonel Lei Xue mentioned?"

"Do you think it's fake?" Elder Li asked curiously.

"It's unlikely to be fake..." Fang Jianming shook his head and said, "After all, we have already seen part of the scientific research results. The genetic technology and space teleportation technology are real things. I just feel that they should be hiding deeper secrets."

"This is very normal..." the leader sneered and said, "It would be weird if they didn't hide it..."

After a pause, he asked, "According to Lei Xue's information, have you deduced anything else? According to your predictions, what kind of impact will the opening of a large-scale passage in Luofu cause this time?"

"A huge impact!" Fang Jianming turned on the virtual screen and said, "According to the current game strategy, after players enter the game, they will first be subjected to a genetic surgery. Lieutenant Colonel Lei Xue said that after the surgery, the appearance of the players will change drastically, and they will become a different species. However, many players will be able to retain their previous bodies when they return. Therefore, we speculate that this is a kind of fantasy technology similar to the avatar in the sci-fi movies. The Luofu can transplant people's spirit into multiple bodies!"

As soon as he said this, the two old men were shocked and looked at each other in shock. After a long while, elder Li swallowed his saliva and asked carefully, "Does that mean..." elder Li didn't dare to ask anymore, he felt that science fiction was too much.

"Yes..." Fang Jianming said seriously, "If the information is correct, Luo Fu has the technology of immortality!"

The Leader: "!!!"

"This also explains why lieutenant general Li Jiayi and the others can possess such terrifying combat strength in just a few years. Their bodies can even be changed, so there's nothing impossible about it..." Fang Jianming said faintly, "If the information is true, this technology is really a technology that can completely change the world. Once this game is released on a large scale, the structure of the entire world will change drastically, or even reorganize!"

The two old men looked at each other. At their age, they were already in high positions. Logically speaking, they should have seen all kinds of storms and waves. However, this time, the waves were too big. It was so big that they felt that their life experiences were not worth mentioning.

"That's why I said that the impact is extremely great!" Fang Jianming said seriously, "Sir Leader, once the game is released, do you think that ordinary people would be willing to stay in D Ball or go there?"

The leader and elder Li rolled their eyes. Wasn't this nonsense? Once the game was released to the public, as long as one's brain wasn't damaged, they would definitely choose D ball. Not to mention the allure of the New World and new opportunities, just the gene technology that could extend one's lifespan would be able to dig up the entire world's capital!

"Your previous conclusion was correct. This time, the position of city Lord definitely can not fall into the hands of foreigners!" Fang Jianming said. "According to our bold prediction, once a large-scale announcement is made, all the financial systems in the world will be eliminated in an instant. All the capitalists in the world will desperately bring their capital into that world, and the points system there will be the main currency circulation market in the future. Under such circumstances, a city Lord with

legislative power, management power, and construction power is of great significance. Not to mention that the city has advanced equipment that can improve the physique and genetic strength of the players, it can be said that whichever country gets the position of city Lord will be able to help the citizens gain an advantage!”

The two old men fell silent. After a long while, the old leader said, “You just said... the financial market will move over. What about the government?”

The meeting room fell silent. The atmosphere became very tense. The three men’s breathing became heavy...

About 15 minutes later.., fang Jianming finally said with difficulty, “It’s the same. Luo Fu gives a lot of power to the players. High-level players will have an important social position. On the contrary, the influence of the World Federation government will become smaller and smaller due to the loss of population until it completely disappears! !”

These words made the entire meeting room fall into silence again. After a long time, the chief finally took a deep breath. “What a big game of chess. This Luo Fu is so ambitious! ! !”

Elder Li looked at the leader from the side and opened his mouth, but in the end, he did not say anything. He did not know what to say either. At this moment, Luo Fu had already expanded. He had enough extraordinary players at home, and he had also opened an overseas channel to the outside world, they had already missed the best opportunity to ban him. If they chose to fall out now, there would be plenty of capital abroad willing to cooperate with Luo Fu.

If they missed this opportunity, their compatriots would miss the express train of the great era. This time, they might never be able to turn the tables. However, if they followed Luo Fu’s plan, wouldn’t they be watching Luo Fu replace the world’s federal government?

Thinking of this, the leader sat weakly in his chair. Looking at Fang Jianming’s stern face, he suddenly thought of his father’s words before he died.

Who was more important, the interests of the nation or the rights of a small number of people?

Old Fang, did you already guess this step. Or... ..

Thinking of this, the leader thought of the avatar technology that Fang Jianming had mentioned. His eyes narrowed slightly. Just as he was guessing, a phone rang.

Elder Li and Fang Jianming looked at the leader. The ringtone was obviously coming from him. The leader took out his phone. Suddenly, when he saw the caller ID, he was a little absent-minded.

Elder Li was also stunned and his expression turned weird. Fang Jianming saw the weird expressions on the two elders’ faces and was puzzled. However, he tried his best not to go closer to take a look. After all, his identity was not suitable.

He did not expect the leader to take the initiative to put the phone on the table after a moment of silence. He even pressed the speakerphone button...

At this moment, Fang Jianming saw the caller ID on the phone. However, when he saw the caller ID, his whole body froze. The information in his hand dropped to the ground in shock.

The Caller ID on the phone was actually his father, academician Fang!

“Hello, Sir Chief?” An aged voice came from the other end of the phone, causing Fang Jianming to tremble once again. That voice really belonged to his father!

Wasn't his father already dead. How could it be... .. Could it be... .. Fang Jianming thought of a possibility and his face instantly turned pale.

The leader looked calm, as if he had expected it. In fact, he had already guessed it when Fang Jianming talked about avatar technology...

“Old Fang...” the leader said faintly, “I didn't know that you could act so well!”

Chapter 764: Elder Fang's thoughts

Both elder Li and the leader were stunned when they saw elder Fang again. Elder Fang's son, Fang Jianming, said with a sobbing voice, “Dad... how did you become like this?”

Elder Fang flexed his muscular body and revealed a very satisfied expression. When he saw his son's sad face, he couldn't help but want to give him a kick. However, he still rationally suppressed his impulse. Because he knew that with his current body, his son might be kicked into sauce...

“Why are you doing intelligence analysis? Don't you know the most popular racial model in the galaxy?” Elder Fang glared at his son.

“I know it...” Fang Jianming carefully looked at his father. “But I didn't expect you to choose such a Model...”

He didn't expect his father, who had been in the academic world all his life, to be so wild in his heart...

Being stared at by his son, the veins on elder Fang's forehead twitched. “I'm Willing!”

“Old Fang...” elder Li couldn't help but approach him. He touched elder Fang's rock-hard muscles and swallowed his saliva. “How do you feel, Old Fang?”

“Very good!” Old Fang chuckled and said, “All the old problems of my aching back and back are gone. I feel like my whole body is filled with strength and my teeth are fine. In the past, I didn't have any appetite for anything other than plain porridge. But now, I feel like I can eat an entire cow every day. When I see a pretty girl, I can't help but feel excited. I feel like I'm 20 again. It feels great...” . “...”

“Dad... that last sentence was a little inappropriate...” Fang Jianming reminded him weakly.

Elder Li looked at Old Fang carefully and asked doubtfully, “Old Fang, why do I feel that your outline is still a little old?”

Old Fang smiled. “Because I'm already old...”

Elder Li was stunned. “But... but isn't this... a change of body?”

Elder Fang knew what the other party meant. He looked at the leader who was also eager, he explained with a smile, “It is indeed a new body, but this body didn't appear out of thin air. Instead, it was made

using our own genes. It's a little similar to cloning. My original cells are indeed old, so the ones made naturally can't be compared to the ones made by young people...". "..."

"But... but didn't Jianming say that this is an immortal technique?" Elder Li stammered.

The leader remained silent at the side, but a hint of anxiety flashed in the depths of his eyes. When Fang Jianming heard this, he immediately broke into a sweat. He didn't dare to be blamed, so he hurriedly said, "Ahem... that... that's just a guess..."

"How can there be an immortal technique in this world?" Elder Fang shook his head and said, "In the ancient books, immortals who cultivate and become immortals also have the five decays of heaven and man..."

Elder Li and the leader's faces darkened. It was not that they had not seen the light at this age. The key was that there were signs of this before, and now that they were told that there were no signs of it, they could not help but feel a little upset...

"However, there are techniques to extend life..." elder Fang smiled. "For example, my body has an average lifespan of 300 years. My cells are relatively old, and the gene body that I have produced only has a lifespan of 150 years..."

Old Li and the chief heard the eyes light up, one hundred and fifty years old? Another hundred and fifty years? . It may not sound as good as immortality, but it's pretty good for an old man who's only got ten years to live...

Elder Fang continued, "Of course, this is not the limit. Luo Fu and other genetic bodies have very strong evolutionary abilities. As long as you are willing, whether it is through training or strengthening resources, your lifespan can continue to increase after evolution. However, I don't have much data on how much it can increase... "... "..."

The two old men relaxed after hearing the two pieces of good news. However, they soon turned serious, the leader who had been silent all this time finally spoke, "Old Fang, do you know how much trouble you will cause if you announce what you just said?"

Elder Li, who was initially excited, immediately fell silent. Among Luo Fu's technology, this project could be said to be the most irresistible to all mankind, the other space teleportation technology, advanced mechanical technology, and the alchemy technology from Lei Xue's intelligence reports were tempting, but they were not enough to make those humans in high positions lose their minds completely.

However, this was enough!

What was the biggest purpose of those top Jewish families in America spending huge amounts of money on genetic surgery every year? Wasn't it to extend their lifespan?

After all, for rich people, how to live... .. Was not enough to live...

Old Fang was silent for a while. Finally, he said faintly, "Sir, this has become a set pattern!"

"But if back then... if you had reminded me back then..." the leader said with rare excitement.

“Then what? What does Sir Leader Plan to do?” Old Fang sighed. “A full-scale ban? To let our Huazhong Miss This opportunity for a national evolution?” The leader was stunned, but then he said, “We can act according to the situation, and not be completely passive like now...”

“But the end result will still be the same...”. “No one can refuse Luo Fu. If you refuse, the people below will not listen to you, and the people will not listen to you. This is the general trend. I know what you are thinking. You want to use the power of the country to fight for greater benefits, and you even want to replace it. I know all of this. This is why I am not willing to tell you. Because if you fail, the result may be that the advantage of our Huazhong players will be destroyed. I can not let the interests of the entire Huazhong make a bet for your ambition!”

“But I’m doing this for our fellow countrymen!” The leader couldn’t help but say angrily, “Is it right to hand our entire nation over to a mysterious force that doesn’t even have a clear foundation?”

Elder Li looked at the two of them and didn’t know what to say for a moment. At this moment, it was hard to say who was wrong. One could only say that their political views were different and that they didn’t conspire against each other...

Elder Fang didn’t say anything. He did data, so he was more rational in doing things. It wasn’t that he didn’t agree with the leader’s method, but the hard conditions didn’t allow it. According to the comparison between the two sides, the leader’s chances of winning were too slim.

Luo Fu had a large number of extraordinary players and an incredible teleportation technique. Just these two points alone were enough to make him invincible. If you couldn’t find him, he could teleport advanced players to mess with you at any time, and the players could even resurrect, what could you use to fight him?

In addition to that alluring genetic technique, as long as it was announced, 80% of the world’s major forces would instantly fall in that direction. This was practically without a doubt. The leader wanted to act according to the situation, but once he had that thought, would he be able to stop halfway. Elder Fang deeply knew that the hardest thing to control in this world was the hearts of people...

That was why he did not hesitate to lean towards that side, because he did not dare to bet on whether the leader would be able to control himself when the time came. He was not willing to let the great situation in Huazhong take such a risk!

This was elder Fang’s thought, a thought where reason trumped emotion, and the first thing he chose to do was to protect the interests of the masses!

“Alright...” elder Li Sighed, finally, he interjected, “Now that things have come to this, there’s no point in dwelling on it anymore. What we need to do now is to look into the future. Elder Fang... How much do you know about the current situation of the city’s election?”

Chapter 765: Old Fang’s conjecture!

After regaining his composure, the leader sat on the sofa sullenly. Elder Li’s words were right. Now that the situation was set, it was meaningless to talk about the previous topic... ..

Seeing that the leader had calmed down., only then did elder Fang take a deep breath and take out a blueprint that he had drawn and placed it on the table. “According to my observations over the past few

months, the New World in the Luofu mystical realm and the main base are two completely different places. I even suspect that they are two different planets!”

The other three people’s hearts skipped a beat when they heard this.

Elder Fang continued, “On the side of the main base, other than the cities that are under construction, a large area of land outside is desolate. The radiation is heavy and the foreign air is thin. It’s very similar to the lifeless planets around our planet d. on the contrary, the New World is completely different. There are rich resources, people, and water sources. It’s a life star system that’s much bigger than planet D. high-level players’ main activities are in the New World. There, players can abduct people, build bases, and develop their own private forces. But on the side of the main base, it’s more like a place to build a foundation. Players have to work here to accumulate original capital...”. “...”

“Why?” Fang Jianming was puzzled. “Since the new territories are rich in resources and have so many people, why is the main base located in a desolate place?”

Elder Fang looked at his son with satisfaction. Although this kid’s EQ was a little low, his reaction speed in serious matters still inherited his good genes...

“At first, I was also wondering about this. First of all, it was indeed surprising that Luo Fu had the ability to build a city out of thin air in a desolate area. But even if he had the ability, he shouldn’t have wasted so much manpower and material resources in such a place. But they still did it. So I guessed that the place where the main base is located has a value that the new world doesn’t have!”

Fang Jianming paused for a moment, then suddenly realized something. “Those ores?”

Elder Fang smiled and nodded to himself. This brat didn’t waste his years of teaching.

“Ores?” Elder Li and the leader were confused.

“Leader, do you still remember that all the players recommended mining in the game?” Elder Fang smiled and said, “Many players in the game mocked themselves for living in luxury but coming to the game to carry bricks...”

Elder Li and the leader nodded. They had learned a lot about the game through the analysis team’s report.

“As far as I know, the mining work in the mine is not simple, and the ores inside are very special and contain amazing energy. Therefore, I thought that this might be the reason why Luofu built the main base here. The ores might be comparable to oil... “No, it might be an energy resource that is even more precious than oil!”

“Energy Resource?” The eyes of the leader and elder Li lit up, and they immediately understood what the other party was talking about.

Elder Fang continued, “I hypothesize that the new world doesn’t have these things, but the main base does. Then, the city where the main base is located has extraordinary significance. In a short period of time, at least until the energy is fully extracted, the new attributes of this city might not change. Because according to my observation, the new players are the important manpower to collect these energy

resources. To control this city is to control the new forces. I boldly hypothesize that according to Luofu's layout, this desolate place will be the real administrative center of the New World in the future!"

"Oh?" The leader's heart immediately warmed up. If that was the case... ..

Elder Fang: "The new player's attributes do not change. Before new players enter the new territories, they must be affected by the new cities. Then, the new cities will have a significant political influence. After all, the accumulation of raw capital represents the progress of the players. Once we take control of the city, we can treat our citizens according to the law. This way, the citizens will have better evolutionary conditions, and we will also have a certain degree of political influence..." "..."

"US?" The leader and elder Li were stunned. Then, their hearts skipped a beat. "Why us?"

In their hearts, didn't the new city lord choose one of the players? Would Luo fu be willing to choose an old politician from the D Ball?

Old Fang seemed to have seen through their thoughts. He lowered his voice and said, "This is also the reason why I took the initiative to come back this time. I personally feel that this election is likely to choose either ordinary players or professional political figures..."

"How can that be?" Fang Jianming subconsciously retorted, while elder Li was stunned. "Are you sure?"

"I'm not sure..." elder Fang shook his head and said, "I just guessed this result based on the available information and data..."

Elder Li was about to ask the leader next to him again, but he stopped him and said to elder fang, "Go On..."

Elder Fang said, "First of all, from that announcement, it is clear that the upper echelons of luofu are not planning to use the player level as a condition to conduct the election. Otherwise, they wouldn't say that they are choosing from the players from 40 countries. However, not everyone can participate in this election. Look at the last sentence of the announcement. The game's official announcement will announce the nominees in a few days. This means that only a minority of the game's official nominees will participate in the election. Then, the question is, if the player level and individual strength are not the criteria, then what criteria would the upper echelons of luofu use to select these so-called nominees?"

After pausing for a moment, old fang continued, "So I was thinking, could it be... that the election will be based on their administrative ability?"

As soon as he said this, the two old men's hearts pounded even faster!

Old Fang: "Then the question arises again. If my hypothesis is correct, who will be the other party's candidate? "After all, administrative ability is something that is relatively difficult to identify. It is not as solid as individual strength. Whoever wins will be stronger. And if we really want to talk about criteria, then the political achievements of the politicians around the world are a very good criterion to consider!"

Elder Li: "!!!"

The leader took a deep breath. "You... you mean, the top management of Luofu will choose people from among the world's politicians in the end?"

"How is this possible?" Elder Li said in disbelief.

"The possibility is actually very high...". Elder Fang sighed. "After all, Luofu has this tradition. Didn't they also select people from the world's outstanding scientists to join the Luofu Research Group in the past?"
"? Moreover, by doing so, it can also reduce the psychological disparity of the current politicians to the greatest extent, allowing them to see a new path, thus allowing the entire political world to rebound less violently "...". "..."

The leader instantly fell silent. Elder Fang's idea was indeed correct. If the world's politicians could enter the political field of the new Luofu world and continue to display their political ideals and aspirations., the possibility of the entire federal government rebelling against Luofu would be even lower!

The meeting room fell silent. After a long while, elder Li spoke up. "If... if it really is as you say, I... What should we do?"

"Make sufficient preparations!" Elder Fang said seriously, "Since it's a fair election, there will definitely be a speech. Whoever's policy is approved by the players will become the castellan. First of all, we don't know who Luo Fu's higher-ups will nominate, but if Huazhong is among them, he will definitely be a politician with outstanding political achievements. Now, other than waiting, what we can do is to plan the backup team first, carry out behind-the-scenes analysis and administrative planning, and plan out the policy that will be the easiest to win. This way, no matter who Luo Fu's candidate is, we can pool our resources and support them wholeheartedly!" "!"

"Good, good, good!" "!" The leader slammed the table. "Old Fang, this information of yours is very valuable... "... if Huazhong wins, you will be credited with a great merit!" Then, he immediately said to elder Li, "Old Li, make a trip and call those old fellows from Jade Spring Mountain to the main hall. Time waits for no man. We must start preparing now. This time, we must reach an agreement. When the time comes, no matter who we choose, we must put aside our usual stance and focus our resources to support them. We must face the outside world together!"

"Alright! !" Elder Li was also a resolute and decisive soldier. Hearing this, he responded and walked out in a hurry.

"Old Fang..." the leader turned around and said, "Since you've come here personally to talk about this matter, you must have done an investigation on the basic situation of the city, right? How is the situation? Tell me in detail..."

"Okay..." old Fang nodded. Then, he unfolded his blueprint and began to explain in detail.

However, when he was explaining, a trace of doubt still rose in Old Fang's heart. This was because in the current game, three-quarters of the players in Huazhong were players. According to the rule of one vote per person, wouldn't our Huazhong have too much of an advantage?"

Chapter 766: attitudes of all parties...

“You... want a report on your achievements?” In the Intelligence Bureau’s Archives Room, the military officer surnamed Luo looked at elder Li with a stunned expression. He was somewhat curious about what elder Li was doing with this.

Elder Li naturally didn’t have time to waste with the other party. He frowned and said, “You have all of them, right?”

“Of course...” the military officer quickly turned on his computer and opened the data table. “Elder Li, how old do you want them to be?”

Elder Li thought for a moment. According to what elder Fang had said before, the candidates nominated by Luo Fu should be based on their political achievements. With that genetic technology, their age should not be a problem, thinking of this, he said solemnly, “Bring up the list of those who are over 50 years old and have outstanding political achievements.”

The pace of the domestic official market was much slower than that of the foreign market. Usually, those who were able to hold power and achieve some political achievements would be over 50 years old.

“I’ve already sent it out, elder Li. This information was reviewed by the Ministry of appointments last year. It lists the performance rankings of the leading officials in the provinces in the past thirty years. The rankings are based on the assessment of the GDP, city security, scientific and technological innovation, education and culture, labor and employment, residents’ income, social security, and People’s health conditions. The top 100 names are all here!”

Elder Li nodded and took a look. Most of them were familiar faces. However, most of them were born in big families. Not only were they capable, but they also had a lot of resources.

Elder Li did not like more than half of them, but no matter what, these people were the easiest to be selected on their resumes, thinking of this, he sighed and said, “Little Luo, send their phone data to my phone!”

“Okay...” little Luo quickly replied, but then he thought for a moment and asked, “Elder Li, did something big happen?”

Elder Li looked at him and frowned, “Don’t ask what you shouldn’t ask...”

“Yes, yes...” the general named Luo quickly nodded and agreed.

As soon as he said that, a black shadow suddenly darted in, giving the officer surnamed Luo a fright, after he saw the other party clearly, he immediately frowned and said, “Lieutenant General Chen, even if you are an extraordinary person, it’s not appropriate for you to use your skills in the intelligence department like this, right? What you’re doing...” however, his voice suddenly stopped when he reached this point, it was as if someone was strangling his neck.

He was not really strangled by someone. Instead, he was shocked when he saw the thing in the other party’s hand. It was a ferocious head. If one looked carefully, wasn’t it old Yan who was preparing to draw his gun in the intelligence room earlier?

His heart immediately jumped. Old Yan was the leading figure of this generation of the Yan family. Was he going to be killed just like that?

Even if he felt that this fellow had some problems and wanted to investigate, he had never thought that he would be so violent. As expected... "...". Was something big going to happen?

Chen Yu Tong's expression was cold, but it did not look good. He gently placed the head on the table.

Elder Li heaved a sigh of relief when he saw this. He thought to himself, these players from the dragon group are quite reliable. At the very least, their combat strength is very reliable!

"It's been hard on You!" Elder Li quickly comforted him.

"It hasn't been hard on you..." Chen Yu Tong's expression was a little ugly as he replied, "But I seem to have messed up..."

"What's Wrong?" Elder Li asked in shock.

"When I was chasing after this guy, there were accomplices waiting for me. That accomplice used a very troublesome illusion to delay me for some time. In the end... it seems like this fatty sent something through a telegraph!"

"What??" Elder Li was shocked, he immediately understood something. He did not even need to think to know what kind of information the other party had sent over. To be able to infiltrate the intelligence department, no matter which country it was, it must have cost a huge price.., at this time, he had risked his life to forcefully send it over. It must be the recently cracked Luo Fu's intelligence!

Chen Yu Tong was silent for a moment. In the end, he still said, "Those guys who were protecting him were also killed by me. From the accent, they should be people from Red Sun!"

"Damn it! !" Elder Li's face turned ashen when he heard that.

Xiao Luo hesitated for a moment when he saw that. In the end, he still reported, "Elder Li... There's something I think I still need to report to you."

"Speak!" Elder Li's eyelids twitched as he said sternly.

Xiao Luo trembled from being shouted at, however, he still forced himself to say, "Didn't you ask General Chen to arrest old Yan previously?" "Actually, I already felt that there was something wrong with him this morning. When I received the wanted notice, I thought that if there was something wrong with old Yan, then there would be something wrong with the other colleagues in the intelligence department as well. Hence, I checked the absence records for today and discovered that ever since you announced that Old Yan was wanted, a total of 14 colleagues in the intelligence department had left their posts without permission in less than 10 minutes!"

"What! !" Elder Li's face turned black, and he was on the verge of collapse. Chen Yu Tong immediately stepped forward to support him, and then said to little Luo, "Give me their data!"

"I'm afraid it's too late..." elder Li sighed weakly.

“Maybe it’s too late to intercept the news...” Chen Yu Tong said faintly, “But I can help you keep them all. How can we let them escape unscathed if they dare to be spies here?”

“You Alone?” Elder Li frowned and said, “Girl, these missing people might not be from the same country, and the routes of retreat are all different. How can you all stay?”

“I can contact the players!” Chen Yu Tong smiled and said, “I know some ranger players. They have very strong tracking ability, so they won’t let these people escape.”

“They... aren’t from the Dragon Group, right? Are they willing to help?” Elder Li said in a daze.

“Yes...” Chen Yu Tong said with certainty, “Although they are not civil servants, they grew up with nine years of compulsory education. Although they are far away, they must be punished. They have learned this principle! !”

Elder Li was stunned on the spot. It took him a long time to react. Then, he nodded and saluted solemnly, “Then I’ll leave it to you!”

“Little Luo, give her the data!”

“Okay! !” Officer Luo felt his heart heating up. He felt like he had given the data to the other party.

After receiving the data, Chen Yu Tong said to elder Li, “I’m leaving... Well, and...”

Elder Li: “What?”

Chen Yu Tong: “I’m a boy...”

Elder Li: “...”

After the other party turned into a black shadow and walked for a long time, officer Luo next to him carefully said: “General Chen is actually a man?”

Old Li rolled his eyes at him and ignored him, but his heart was inexplicably complicated. He suddenly felt that old Fang’s idea might be right. Although they had changed places and left the government, the people of Central China had not dispersed, they still remember the blood and glory in their bones!

— — — —

Red Sun:

This generation of Abe Qingming looked at the paper crane from the exchange of information, the calm eyes of the ancient well for the first time appeared surprised, muttering to himself: “There is such a thing in the world?”

Western Europe:

At the Stone Table meeting, twelve tall figures gathered at a table. These figures were a little strange. Each of them was wearing a heavy ancient European knight costume. At first glance, one might think that this was a cosplay show, but those who were familiar with this place all knew that, what did these twelve people represent? They were the twelve strongest representatives of the Western European extraordinary forces!

“You’ve all read the intelligence, right? What do you think?”The Knight in the lead said coldly.

“It’s a little unbelievable. If it wasn’t the news from the professional agents, I would have thought it was science fiction...”one of the Knights said with a smile.

“Make a trip there. If the person is exposed, the central China might send the dragon team to hunt him down. You Go and test the waters and see what the so-called players nurtured by galaxy are like!”

“Okay!”The Knight who answered just now grinned.

America:

“Deputy Commander, aren’t you making a big deal out of it by taking on an intelligence officer personally?”In the Extraordinary Corps, one of the extremely tall and strong men asked with a frown.

The deputy commander of the Army, Raines, who was walking at the front wearing a black windbreaker, grinned and said, “Just in case. Also, it’s a good chance to try it out. Let’s see if the genetic technology of that force in the intelligence report is really better than that of our extraordinary army.”

As he spoke, he clenched his fist, which suddenly shone with a metallic sheen. . .

Chapter 767 What Egg?

“I didn’t expect to come out of seclusion so smoothly...”at the border, the thin air made it difficult for the few people who spoke to breathe. A few of them were obviously westerners, but one of them was a man of pure Asian descent.

If the people from the intelligence department were here, they would definitely recognize this guy. His name was Zhou Hualong, a rare commoner in the intelligence department. He was highly valued and nurtured by a certain general of the he family. In the end, he was brought all the way to the intelligence department, he became a rare major general with real power among the commoners.

However, he did not expect that he was also one of the spies...

“Hey, brother, don’t look so glum. The intelligence you brought back this time is of great value. Your clan’s mission has been completed. When we return, we won’t treat you unfairly!”One of the short white men patted the other person’s shoulder affectionately.

Zhou Hualong smiled kindly when he heard that, but a trace of depression flashed through his eyes...

If he was not born into such a family, he really did not want to betray them...

Since ancient times, central China had always been very strict with the examination of military personnel. Ordinary soldiers had to undergo a political examination for three generations, and they had to have a clean background. Any immediate family member who had a criminal record or even had a criminal dispute would not be allowed to join the army, not to mention entering the intelligence department.

His lineage had been secretly nurtured from the generation of his great-grandfather. It took several generations to completely wash away his background, and he was also brought into the intelligence

department by the He family, who had been bribed outside. It could not be said that he was not well hidden, the plan could not be said to be not far away.

Originally, a chess piece like him, who had spent a lot of money and nearly two hundred years of planning, would not be easily used. He had even fantasized that he would not be used until the day he died, perhaps he would really be able to be a clean soldier for the rest of his life.

But it seemed that the heavens did not intend to give him this opportunity...

However, it was fine. The secret that had been suppressed in his heart for so many years finally had a day where he could finally unburden himself... ..

At this moment, when the few of them walked to the designated location at the border, they saw a tall man dressed in knight armor holding a huge sword sitting on a rock in front of them. The few of them were stunned and quickly went forward to say, "Sir Enzos!"

"Looks like the intelligence report is true. The central China government has really fallen out with those sects and factions!" The man sighed with a bored look on his face. "I have brazenly come here for so long and nothing has happened. Everyone says that this is a forbidden area for extraordinary individuals. I have long wanted to come and have a look. Tsk...". "What a Killjoy!"

As he said that, he gave a middle finger to a place in the distance!

The few of them looked over curiously. Only then did they realize that there was actually a troop lurking not far away!

The group of people were instantly stunned. They had said that although this place was remote, it was not to the extent that there were no people guarding the border. It turned out that they were shocked by this person and did not dare to come over!

On the other side, a soldier who saw this scene through binoculars had a livid expression. "F * ck you, I'll tear you apart today! !"

"Stop, Grizzly Bear!" A middle-aged man beside him pressed down on the man.

"Captain! !" The strong man could not help but say, "Look at how arrogant he is!"

"We can't make a move!" The middle-aged man who was called captain said seriously, "We must wait for reinforcements. This is an order!"

Enzo: Fregel, one of the twelve leaders of the Round Table Knights, the Dragon Knight. He was one of the top figures in the world of extraordinaires overseas. He did not expect to appear here...

The middle-aged man who had the information immediately felt that it was troublesome. Ever since he joined this special force, he had never heard of such a figure appearing at the border of Central China. He did not know if the reinforcements sent by the higher-ups would be able to handle it!

However, with his experience, he was afraid that something would happen this time. The combat strength of such a person was at least the strength of a sect leader. However, this time, he heard that it was only a member of the Dragon Group who came to assist. If it was Green Sparrow No. 1, then... There might be some hope. After all, that Guy's battle record in Ba tie was somewhat eye-catching... .. But this

time, it was a person he had never heard of. His number seemed to be ranked 19th. He felt that this time, he would most likely give it away for nothing. ...

But at the crucial moment, he had to give it away for nothing...

Thinking of this, he looked at his brothers behind him. One of them was only 21 years old, and he was not even married yet...

Why not let him go back and report the news...

Just as he was thinking about this, a soldier beside him suddenly said, "Boss, look, there seems to be an additional person there..."

The captain was stunned. He looked up and saw a figure wearing a black cloak. He did not know when, but he had appeared in front of Enzo's group.

Was it the person who came to pick them up? The captain frowned, but then he felt that something was wrong. Wasn't Enzo here to pick up this spy? There couldn't be two groups of people who came to pick them up, right?

Could It Be... our people?

As he thought about this, he looked over excitedly. He saw that Enzo's group had indeed stopped. They even put on a vigilant stance. He immediately took a deep breath and said, "Brothers, the reinforcements have arrived. Let's go, all of you go over!"

— — —

"Who are you?" At this moment, Enzo put away his initial arrogant attitude and took off the human-like greatsword on his back. He asked solemnly.

He could vaguely sense that the person in front of him was very dangerous. He was more dangerous than anyone he had ever met in his life!

"Dragon Group: Shadow!" Under the Black Cloak, a cold voice was heard. It made the group of people on the opposite side inexplicably shudder, and they felt a sudden drop in temperature.

Zhou Hualong squinted his eyes into a line. In the Analysis Group's intelligence, there was a player ranking list in the game called Galaxy. The first place on the ranking list was a player called Xiao Bai Cai, in the battle ranking list was a player called Shadow, the number one elf. Moreover, he seemed to be working in the Dragon Group, number 19!

When he thought of the other party's identity, Zhou Hualong suddenly felt an inexplicable sense of anticipation in his heart. Enzo was one of the twelve leaders of the Knight Legion. Without a doubt, he was one of the top extraordinaires in Western Europe, and this player named Shadow should be the number one player on the battle rankings. In fact, he also wanted to know how much the so-called Luo Fu's genetic technology could strengthen a person. Since he was known as the number one player.., he shouldn't be defeated so quickly, right?

"Enzo Fregel, please remember this name. The Man with this name will kill you today!" Enzo revealed an excited smile.

It had been a long, long time since he had such a feeling. His blood was boiling, and the pressure made him tremble when he held his sword. This was an opponent worthy of his full strength!

“Are Western Knights also so stupid?” The cloaked player tilted his head and said with a smile, “If you don’t speak English, I would have thought you were a neon man...”

“You will regret underestimating me when I go all out!” Enzos shouted. His voice was like a bomb, making the special forces soldiers who had rushed over feel their ears buzzing as they sat down. They were so shocked that they almost fell to the ground, immediately, they were all secretly shocked!

The captain also looked at the thin figure hidden under the cloak with a worried expression. Could this temporary support really withstand such a strong man?

But in the next second, this worry disappeared...

In a flash, the outcome was clear. One second ago, the imposing Dragon Knight was kneeling on the ground with empty eyes. The sight of a large bloody hole in his chest made one’s heart tremble.

And his opponent had appeared behind him at some point in time. His back was facing him, and he was holding a beating heart in his hand!

Bang, Bang, Bang...

Everyone was so shocked by this scene that they didn’t dare to say anything. In the quiet atmosphere, the beating of the heart was extremely obvious...

“Lieutenant General Feng Doudou!” From Afar, a panting voice was heard, breaking the strange silence.

The captain of the special forces looked over in shock. It was a young man dressed in military attire. He knew this person as well. His name was Li Siming, and he had been selected by elder Li from the Dragon Armor squad back then to be an intelligence officer for the members of the Dragon Group.

“How many times have I said it? Don’t call me by my full name!” The player said coldly. Then, he directly threw the internal organs in his hands onto the other party’s face.

The person who came was caught off guard and was directly pasted on his face by this lump of meat.

“And your intelligence is not reliable at all!” The player said coldly, “You said that the ancestors of the Enzos family had been washed by dragon blood, that their copper skin and iron bones were unharmed, and that the hearts of their direct descendants were three times that of normal adults. You can weigh it yourself. Is it three times?”

Everyone:”...”

The special forces captain came back to his senses and looked deeply at the other party. He had also heard that the combat strength of these members of the Dragon Group was somewhat abnormal, but he did not expect that such an abnormal person was only ranked 19th., he actually killed one of the twelve heads of Western Europe just like that?

Then what kind of abnormal people were ranked higher?

Just as he was in shock and doubt, a distress signal was suddenly transmitted from the walkie-talkie. The captain hurriedly picked it up, and his expression immediately changed. "What did you say? The deputy commander of the Extraordinary Corps: Raines? Please hold on, we will come over immediately!"

After hanging up, he quickly looked at Feng Doudou. "Feng Doudou... Cough Cough, Lieutenant General Feng, the situation over there is urgent. Can I trouble you to make another trip?"

"Which position?" Feng Doudou replied indifferently.

"The northwest position. It's about ten kilometers from here!" The captain quickly said.

"There..." Feng Doudou looked at the position the other party had mentioned. "Wang Goudan has gone over. You Don't have to worry too much."

"What Egg?"

Chapter 768 Reactions from all sides (part one)

"Damn it! What kind of monster is this?"

In the dense forest at the border, a naked burly man was fleeing in panic. Every time he arrived at a place, the burly man's body would change color according to the surrounding environment, and he would quickly blend into the natural environment. In addition to his extraordinary speed.., it was clearly an excellent talent for escaping from the pursuit.

But even so, the burly man could still feel the terrifying pressure behind him. Every cell in his body was telling him that he was not safe!

Why hadn't reinforcements arrived yet?

The burly man roared anxiously in his heart. His name was Stephen, and he was one of the top members of the extraordinary legion. His codename was "Shapeshifter." He was a top rookie who had synthesized many genes and the latest nanobot technology, he had almost reserved a captain-level seat. The purpose of coming to the central China border this time was to take away a chess piece with important intelligence.

The higher-ups were watching the operation abnormally, and their preparations could not be said to be inadequate. The leader was the deputy commander of the Extraordinaire Corps, Rennes. There were four super captains accompanying the team, and they were all top-notch characters with outstanding combat abilities, even the second team leader, Andina, who was also part of the Combat Team, participated in the operation. Then, she selected eight quasi-captains from the top team. The lineup was so luxurious that it was almost the first time such a large-scale organization had existed in a hundred years.

The last time was when they had fought with the Kagura Legion over the Egyptian ruins 130 years ago!

They had thought that it would be foolproof. Even if Huazhong could invite some of the higher-ups of the sects to help, their lineup would be able to bite through any tough bones. They had never expected such an outcome!

Huazhong had only sent one person to chase after their chess piece in this operation. However, it was that one person who had almost wiped out their entire Vanguard team, this included three team leaders, five members of the top team, and over a hundred special auxiliary soldiers equipped with the latest weapons.

He did not expect that there would be such a person with such strong individual combat ability in this world? Even their own commander did not have this ability, right? Who could it be? Could it be the legendary Kunlun sect leader who had lived for more than a thousand years?

He did not know... .. because he did not even get a clear look at the other party's face from start to finish... ..

Water?

All of a sudden, support was delayed. Just as he was in despair, he suddenly heard the sound of water flowing. Instantly, his entire spirit was roused. His body, which had already exhausted its strength, suddenly became excited again because of the sound of water flowing, his running body even increased his running speed!

Because he saw hope, he remembered that there was a river here that could lead to the Pacific Ocean. As long as he entered that river, with his genetic characteristics, he would have a chance to survive!

This sudden hope renewed his body. It had to be said that mental stimulation could really push the physical body beyond its limits sometimes, Stephen, who had completely exhausted himself, burst out with vigorous vitality with this desire to quench his thirst. It really made him run to the river.

Finally... After seeing the river, his heart jumped to his throat. He was both excited and afraid, afraid that he would be chased by the other party before he stepped into the gate of life.

However, it seemed that the heavens had taken care of him, allowing him to jump into the river safely. As soon as his body entered the river, he immediately activated his genetic characteristics. The nano-robot in his body also rapidly began to simulate the environment, his entire body became transparent to the naked eye. Then, it became as soft as water, almost completely merging into the water!

At this moment, his heart that had jumped to his throat finally returned to his stomach. He knew that he had survived. No one under the water could catch him!

Bang!

About ten seconds later, a black figure rushed to the side of the river. Stepping lightly on the river, it was like a feather that would not float up and down. Floating on the river, it was particularly eye-catching.

At this time, Stephen felt relieved after entering the water. He even glanced behind him, wanting to see what the person who had pushed them to the brink looked like!

When he saw it clearly, Stephen was completely stunned. He had never expected that the person who had massacred everyone and forced him to jump into the water to escape was actually a woman... . No . . . By the looks of it, I'd even call her a girl.

Look Alive is really beautiful, but I remember her, he vowed, will revenge, he will one day kill each other, kill each other care about, and personally dismember her beautiful face! !

As Stephen made this oath, the girl who had been looking around on the river's surface suddenly looked at herself and stopped.

Stephen's heart skipped a beat as he thought, 'no way...'. ...

'how could someone see me in this form? 'No Way, no way, it must be a coincidence, it must be a coincidence!'

Stephen comforted himself in his heart as he resisted the urge to run away. He tried his best to remain calm as he allowed his body to slowly flow into the distance with the river...

However, the strange thing was that the other party's gaze never left him. She actually followed the river and stared at his range, causing Stephen's entire body to turn cold!

Could she really see me?

Once he thought of such a terrifying thought, he could no longer control himself. His body also became more and more nervous along with this thought, and he could not help but tremble.

But fortunately, the river was rushing, and his slight tremors were not easily discernible, Stephen consoled himself.

But also seemed to comfort themselves, because the figure moved...

Flying toward him, Stephen saw a delicate white hand magnifying in front of him in less than half a second.

Chi! !

In the distance, the scene of Stephen being monitored by the virtual equipment instantly turned pitch-black. Nearly a dozen people in the temporary tent were silent, and the atmosphere was eerily quiet.

After a long while, a fair-haired, blue-eyed beauty said faintly, "I didn't expect that even Stephen couldn't escape."

And the leader of this group was the leader of the Extraordinary Corps: Rennes!

At this moment, Rennes looked at the black screen. His expression was uncertain. He no longer had the lofty ambition of testing the standard of a player!

It was too f * cking ridiculous. This combat strength...

The strength of the vanguard team was definitely not weaker than the rest of them. How could they be defeated by one person? They didn't even manage to escape. Was this the current combat strength of the Dragon Group?

After a long period of silence, Rennes finally opened his mouth and asked, "What about the other forces? Any News?"

A woman who was staring at two antennas on her head hurriedly replied, "The western European knights of the Round Table have not replied to our messages since half an hour ago. Red Sun also cut off

contact with US 16 minutes ago. Ah San has been contacting us, but he is calling for help. He said that their Russian army has been forced into a desperate situation. He hopes that we can send reinforcements!"

Everyone's lips twitched when they heard the last sentence. Help the Indians? They had just witnessed their comrades being massacred, but no one dared to bring up the matter of helping them.

What a joke. Based on the battle prowess displayed by that guy in the surveillance, the rest of the people here would probably just be food if they went...

"Half an hour ago... didn't the news from Western Europe say that there was only one opponent?" Rennes asked.

"Yes..." the antenna girl quickly said, "The last message was that Dragon Knight, Raines, met a member of the Dragon Group, number 19, Chen Yu Tong."

"19.....Raines muttered and then asked, "Then, do we have any information about this?"

Chapter 769 Reactions from all sides (part two)

"Yes..." the antenna girl quickly said, "According to the last image that Stephen sent, that woman should be Wang Xiaojia, who replaced the Green Sparrow in the subway for a short period of time. According to the intelligence, her number is 3."

"3... so it seems that we still have some cards to play here?" Rennes laughed self-deprecatingly.

Everyone immediately fell silent. They, who had always been proud and arrogant, did not know how to refute. They did not know whether there was a difference between the numbers 3 and 19, but it was an indisputable fact that they were all wiped out by one person, was there really a big difference between being wiped out by a stronger person and a weaker person within the Dragon Group?

The analogy of the deputy leader really did not make people feel comforted... ..

"Let's Go!" Rennes sighed and stood up.

"Leader, are we going back just like that?" Someone beside him could not help but ask?

"Then what else can we do?" Rennes said with a laugh, "That's just one person. Do you know how many members the Dragon Group has in the intelligence report? There are sixty-nine of them! Do you think that we can do anything on this piece of land?"

Everyone:"..."

Sixty-nine... "...". Not to mention that all of these people were so powerful, even if only ten of them had such combat strength, in the future, would their extraordinary corps still have the status they had today?

"Then... What should we do in the future?" In the crowd, the blonde beauty could not help but ask, her tone seemed to be enlightened.

Everyone's faces were gloomy, and the atmosphere was extremely stifling!

"Go back and find the contact person of that Galaxy Game!" Rendez narrowed his eagle-like eyes and said, "Although the person is dead, the information has been sent. The power that Huazhong has built up now comes from that Luofu, that game called Galaxy! Fortunately, that power doesn't stick to Huazhong. We... .. still have a chance"

Everyone's eyes lit up when they heard that. It had only been a year or so since Luofu and central China established their cooperation, but they had already built up such a powerful force for Central China. It could be seen how terrifying this mysterious faction was.

It was the key to central China's current strength. If they could cooperate with it, their Beyonder army might be able to catch up!

A group of people followed behind Rainders, their eyes filled with hope. However, they did not see the cold light that flashed in Rainders' eyes as he walked at the front!

As the deputy commander of such top-tier intelligence, he naturally had the first priority to read it. The companions behind him only knew what he had relayed, so he naturally did not say what was truly valuable in the intelligence.

To be honest, he was also shocked by the intelligence. According to the intelligence sent by the chess piece, the Luofu faction was a mysterious faction that had lurked for thousands of years. Not only did they control a technological civilization that far surpassed the world.., they also had an otherworld continent that was larger than sphere D!

He knew very well what this intelligence represented. This was an intelligence that could change the world's structure. Those who were in the lead would occupy the forefront of the era. He had to seize this opportunity.., he had long been dissatisfied with the unreasonable situation of capital controlling the extraordinaires. This was an opportunity, an opportunity to make a comeback. He... To change the current abnormal situation in the United States, only in this way could he and his country regain their former glory in this great era!

"Enzos is dead?" In one of the aristocratic halls in Western Europe, a handsome blond white man was sitting in his office chair, looking at the pictures sent back by his men with a solemn face.

On the other side, a group of senior officers stood in a row, trembling, standing with their heads down, not daring to make a sound to disturb each other. Their posture was filled with awe.

However, this was also normal. Although the person on the other side was young, he was the most powerful person in Western Europe. He was the leader of the Twelve Knights of the Round Table, the current leader of the Arthur family. He was the leader of the extraordinary forces in the west!

At this moment, the man with such an important status had an incredulous look on his face. He slowed down the video sent by his subordinates over and over again until it was almost 50 times slower. Only then did he manage to see the mysterious woman's movements clearly...

That speed, that skill, if he had not seen it with his own eyes, he would never have believed that humans could be so strong...

No wonder enzoes could not even withstand a single move. Against such a shocking skill, if he were to go personally, would he be able to perform even better?

He was very clear about the result. Enzoes' status was not as high as his, but his strength was not necessarily weaker than his. The title of Dragon Knight was not given for nothing. This generation of enzoes was known as the strongest in history and had the purest dragon blood inheritance...

Then, he looked at the secret information sent by the spy before he died: New World, world-surpassing technology?

"Men!"

Soon, an old man who looked like a butler walked over quickly. The Butler gave a standard aristocratic salute and said respectfully, "Dear Master, what are your orders?"

"Go, gather all the guides and information about the game called Galaxy in central China. Don't Miss Anything!"

The butler frowned slightly. He didn't understand why his master was interested in a game, but he still said respectfully, "Okay..."

Then, he looked at the row of officers opposite him and said coldly, "You... start gathering information about the players who have entered that game for me immediately. Don't leak a single bit!"

After a pause, he said, "Also, don't leak anything about today, including the other eleven giant families. Understand?"

Everyone looked at the other party's gaze that was as cold as ice and nodded one after another.

But then.., one of the officers suddenly opened his mouth and asked, "Sir, this game called 'Sea of Stars' is fully open in Western Europe. The players are all over Western Europe. Other than our country's people, there are also players from West Germany, West Italy, and other countries. Sir, do you think we should bring the players from those countries over?"

Arthur was stunned for a moment, and then he looked at the officer with admiration, "Bring them!"

"What?" The people around were stunned, and they quickly said in surprise, "But sir, this involves the border, isn't it not good?"

"There's nothing bad about it...". The officer who had just proposed said coldly, "If we bring them now, no one will dare to resist. If this information is true, after some time, it won't be so easy for us to control these players!"

"This..." everyone looked at each other and suddenly understood the other party's meaning.

Ever since they entered the extraordinary era, Great Britain had once again become the overlord of the west. The reason was that they had such a terrifying violent organization like the twelve Knight families.

Even a powerful industrial country like Syder had no choice but to bow down to them. They even had to pay a huge amount of protection fees every year.

At this moment, just as that military officer had said, they were forcefully going to capture people. The western countries, who did not understand the reason, might not dare to resist intensely. However, once the news spread., it would not be so easy to let those countries understand the value of players. Especially Syd. He finally had the chance to break away from the twelve knight families. Even if they were to fall out with each other, they would grit their teeth and protect the players!

Therefore, they had to grasp the situation before many countries could react. Only then could they continue to maintain the authority of the Twelve Knights family!

Chapter 770: Treaty (I)

“This time... we’ll be Frank!”

In the Hall of Congress, elder Li was explaining the situation to the old people who had come to attend the meeting.

The more the old people heard, the more shocked they became. They had never thought that Luo Fu was hiding such a big secret!

A New Planet? A new population? A technology that surpassed the world, space technology? And the most alluring genetic longevity technology. They almost drooled when they heard everything.

It was no wonder that they were ignorant. Everyone present was an elder from a top family in Huazhong. They had once stood at the peak of power, including their current status as the first batch of existences in Huazhong. Logically speaking, they should be able to enjoy everything in life. But now, this information seemed to have opened a new door for them. It made them realize that... .. They could enjoy even more!

Immediately, they could not help but breathe heavily...

The leader sat at the head of the meeting. Looking at the wolf-like eyes below the stage, he immediately had mixed feelings!

To be honest, he did not like these old guys from the bottom of his heart. After he came to power, he had been trying his best to weaken the influence of his family. He hoped that in the political arena, there would be a relatively fair environment and a healthy ecosystem, therefore, he had always been more inclined to support commoners without any background.

However, this time, he had no choice but to compromise. According to Old Fang’s speculation, most of the places invited by Luo Fu were politicians with beautiful political achievements. After flipping through the political achievements rankings of the Department of appointments., in the past, most of the people who had outstanding political achievements were these annoying old guys in front of him!

After taking a deep breath, the leader finally opened his mouth and said, “Elder Li has told you all about the situation, right? Tell us your views?”

“Sir Leader!” Among the old men, a bald old man leaned on his walking stick and said with a pained expression, “Why did you only tell us this important news now?”

Hehe...

The leader sneered in his heart. If he didn't have to, he would have kept them in the dark forever...

It was obvious that if any of these old men were elected as the city lord, they would definitely use their power to give preferential treatment to their families...

After all, they had monopolized the political world for hundreds of years!

“It's meaningless to talk about this...” elder lei interrupted from the side, “Leader has gathered us together because he wants to unify the resources and actions, right?”

As soon as he said this, the venue instantly quieted down. The leader glanced at elder Lei and sighed in his heart. The people present were all smart, and they were not easy to manipulate and manipulate. Once they gained power.., it was the most difficult thing to tie them to the collective glory and the country's righteousness.

“You already know the situation. The current situation is like this. In about 20 days, Luo Fu will give them an invitation. According to elder Feng's analysis, it should be a selection of candidates from politicians around the world who have outstanding political achievements. After that, the final candidate for the city Lord will be chosen through popular voting. In our central China, everyone present here is one of the most likely candidates to be invited. This is a very crucial moment for everyone. It concerns the fate of the country. Therefore, I think that no matter who the person invited is, we should all throw our country's strength to support and unite against the outside world!”

After saying that, the leader looked at the crowd. Everyone nodded solemnly in agreement, but no one said anything. It was obvious that they were all determined not to give up until they saw the rabbit... This made him angry again... ..

“First of all, let's talk about the support situation. We will prepare the most professional analysis team for the selected candidates. We will analyze and sort out all the current intelligence in the Sea of stars, and then help the candidates formulate the most likely policy speech

“Secondly, in the high-level forces in the universe, both the Xuanji sect and sect leader Luo Fu are leaning toward Central China. They are in close contact with elder Li and me right now. We will convince them to give their full support to the candidates in central China

“Thirdly, we will use the media advantage to build momentum for the candidates. Seventy percent of the players in star ocean are from Huazhong right now. We have a huge advantage. Although the advantage may be balanced during the election, the players from Huazhong will still be the biggest help to us in this election. First, we will use the media to promote the candidates to all the citizens and try our best to win their support. Then, we will send people to contact the family and friends of the players, including their parents, relatives, friends, and other targets, to persuade them to support us so that they can influence the players and support us as much as possible!”

After this round of three strategies, all the clan elders nodded their heads. That's right, this was the real deal. What was the point of saying so much?

All the support that the leader had just mentioned was very tempting. Whether it was intelligence, internal support, news campaigns, or contacting the players' relatives to persuade them, they would all be able to get a large number of votes for them. They were all sensible people, naturally, they knew that there was no free lunch in the world, so after being happy for a while, someone took the lead and asked, "Leader... the premise of getting support is that what do we have to pay?"

The leader nodded when he heard that and did not waste time, in a deep voice, he said, "Of course, we have to do our best for the welfare of Central China. First of all, we must ensure that we do not forget our roots under the Lihua policy. We must ensure that after taking office, we give priority to increasing the competitiveness of our players in central China. We must also be biased towards our own compatriots in terms of welfare..."

"But...". One of the old men said in puzzlement, "This City Lord election is a global one, right "? If the policies we put forward during the election are too biased towards our own people, will it cause us to be isolated "? If we are unable to pull in foreign votes, will the votes of the players in central China alone be enough to support us to take the city Lord Position?"

Everyone nodded after hearing that. The upper echelons of Luofu were not stupid. Since there was such a global competitive election, they would definitely not allow central China to be the sole leader. It was likely that the players in central China alone would not be able to completely take that position.

The leader said, "The policy slogan definitely can not come out in the open, but in order to ensure that the candidate can not forget his roots after he is elected as the city lord, we must establish a secret treaty. We will invite the current top lord players in the Sea of Stars to be notaries. If you fail to fulfill your promise, we will announce the secret treaty in Central China. Even after you take office, we will call on all the people to boycott you...". "..."

"What?" Many people couldn't take it anymore. Wasn't this the same as having something in the hands of others?

As administrators, they all knew that this was a big taboo!

"What? You Don't want to?" The leader looked at the group of anxious old men and sneered, "If you don't want to, you can leave now. But I promise you that once you leave this gate, even if you are chosen as a candidate, Huazhong will completely draw a clear line with you!"!

"This..." everyone looked at each other, suddenly, their faces turned a little ugly. The leader was simply a blatant threat. Almost everyone could imagine that it was definitely not as simple as drawing a clear line, the three benefits that the leader had just proposed could also be turned into sharp weapons to hurt people.

For example, they could deliberately organize players to hide information in the galaxy, or they could use the media to slander their image, making the players' parents and friends biased against them, thus affecting the votes, and so on... ..

This was very fatal to the competitiveness of the world's outstanding politicians...

The group of people had ugly expressions, but none of them had any intention of leaving. Seeing this scene, the leader smiled slightly and clapped his hands. "Very good. Now, let's talk about the content of the secret treaty in detail..."

"Sir Leader!" Finally, someone in the crowd could not help but say.

The leader glanced at the person who spoke and immediately smiled. "Oh, elder Lin, what do you think..."

The old man who was called Elder Lin took a deep breath and said, "I have no objections to the secret treaty, but isn't it a little too childish to let some players participate?" Most of these players were born ordinary people and did not have the structure and attitude that a politician should have. Is it appropriate to hand such a big piece of evidence to them?"

"Oh, that's right...". The leader suddenly smiled as if he had remembered something. "I forgot to tell you guys. Through elder Feng, we've invited a group of Huazhong Lord Players who are very outstanding in galaxy to participate in this meeting. They should be arriving soon...". "..."

"What? ?" Everyone's expression changed!
