

A Bunch 851

Chapter 851 the training model of the third city (Part One)

“So, the purpose of him personally receiving Cindy Is?”Smith asked in surprise.

“Of course, it’s because of Cindy’s reputation in the Third World...” . “...”song said with a smile,
“Nowadays, many people are complaining that it’s hard to arrange for too many people. In fact, the more people there are, the more important the population is. This is especially true for the structure designed by Abe!”

“After all... The more sheep you raise, the stronger the wolf will be!”

Smith:” ...”

“Dear citizens, are you here to register and learn life skills?”

In the Life Registration Hall of the third city, a holographic projection was being used to serve hundreds of registrants. Chen Shanshan was one of them.

To be honest, she did not expect her luck to be so good that she was chosen to be the first batch of public beta citizens. Moreover, it seemed that their entire dormitory’s luck was pretty good. The Hainan girl who planted corn was accepted into the second city ahead of time, guo Xiaoyun, that lazy girl, seemed to have been accepted as well. Immediately after that, she appeared on the list of the third city.

Therefore, the three girls in the dormitory added each other’s contact information. However, Ya Xin’s luck seemed to be a little worse, and she didn’t appear on the first list of the fifth city. Fortunately, America had a high preferential treatment. Even if she couldn’t enter Xing Hai, she still had an annual salary of over a million yuan and a hardcover villa in California, America... ..

“Ms. Chen Shanshan, May I know what kind of life skills do you want to register for further study?”On the virtual screen, a female voice transformed from an AI asked with an extremely gentle voice.

“What... What Choices do you have?”Chen Shanshan asked a little nervously.

“Yes, there are a lot of choices. They are mainly divided into three types: collection, production, and operation. We recommend the collection category first. The collection category includes ore collection for further study, plant collection for further study, and sea resources collection for further study.”

“If you learn ore collection, the master of ore we hired will teach you vein survey, energy identification, ore type identification, and the location and collection of high-grade energy ores, including the later stage of refining. This is a highly recommended mining skill. High-grade rare ores are worth a lot of money. Many miners can become rich in a single step by locating energy veins. Even if they only rely on collecting some rare alchemy ores, they can sell them at a high price. It is an excellent skill for adventuring in the wild. The fees for the early stage of the skill were cheap. The tuition fee for a beginner miner was a total of 50,000 points... “...”

couldn't afford it. Most students needed to borrow money to go to school, and Cindy was the same back then.

The American school environment was the world's first. It had independent dormitories, exquisite canteens, and a high-class campus environment. However, the tuition fees were also becoming more and more expensive, and the student loan amount was also becoming larger and larger, in fact, many majors in the school did not have employment rates, and the graduation rate of popular majors was very strict. As a result, many students either lost their jobs upon graduation, or they could not graduate. Moreover, they still owed a large amount of loans!

Cindy had many friends who had to drop out of college to pay off their loans after failing to graduate. They had been paying off their loans for more than ten years, so she did not have a good impression of this model in the beginning!

But from the introduction just now, the professional choices here seemed to be very practical. There weren't many fancy majors, and for marine resources collection, which had no market at the moment, there was also a government-backed model...

This was equivalent to a guaranteed job...

And the price wasn't serious. It wasn't like the United States didn't have such a model. For example, pilots were the type who received high-priced free training and a guaranteed job, but the years were usually very long, many Airlines signed for a lifetime, but here, it only took ten years?

It was more humane than expected...

After thinking for a while, Cindy decided to help this cute little girl ask a question, so she said, "Excuse me, what if a student chooses this major, but later finds out that he is not suitable for this major?"

This question was also the biggest common problem in American universities today. You chose a popular major, but later you found out that you are not suitable for this major, but because of the loan, there was no turning back, you could only brace yourself and try to graduate, but most of them died on the threshold of not being able to graduate. In the end, you did not get a degree, did not learn the major, but you owe a lot of debt.

"Please rest assured, citizens...". "The third city has a very humane pre-trial service. The first two months of study will be used to test whether you are suitable for this major. When you find that you are not suitable, you will take the initiative to remind you to change your major. Moreover, the two-month trial period does not calculate the interest on the loan "... "..."

Cindy was stunned. This sounded quite humane.

Ai: "Our goal is to train enough competitive citizens to bring prosperity to the city. We do not want a large number of people to live a difficult life of not being able to pay back their loans. Please believe in the city Lord and also the city you have chosen..."

Chen Shanshan was stunned for a moment before she looked at Cindy.

Cindy looked at her eyes, nodded and asked, "Other than the gathering class, are there any other options?"

Chapter 852 Enlightenment!

“In addition to the gathering class, we also have the production class and the Operation Class. The production class includes: weapon forger, defensive equipment forger, leather master, tailor master, Herb Alchemist, sculptor, Gem Alchemist, and so on. The Operation Class includes mechanic, enchantment expert, cooking master, Magic Beast Trainer, and so on...”. “...”

“However, the tuition fees for the other two majors are more expensive than that of the gathering class. Moreover, the treatment of the profession will also change as the market changes. The risks are greater. Generally, it is recommended to study a gathering class first. Later on, after becoming an adventurer and having a stable income, citizens who decide not to follow the lord’s path will go back to study the other two classes...”. “... “...”

Cindy was stunned and thought to herself, “Not only is the loan system humane, the recommendations are also the more rational type...”. ...

“In America, no one tells you that this major doesn’t have any prospects. They are all trying to cheat you into taking a loan. Although this place seems to restrict you, it is actually very considerate for the citizens...”. ...

“Then, if you choose to major in marine resources collection, what will your treatment be like after you become a city citizen?”Cindy asked again.

“AH, yes, yes, what will your treatment be like?”Chen Shanshan asked excitedly. Obviously, she had just thought of this question. This made Cindy’s face Twitch. She couldn’t help but think to herself, what a silly girl...

Ai: “We will adopt a base salary plus a commission system for city workers. The commission will be divided according to the 20% of the value of the items you collect on the market. Of course, you can also choose not to have a base salary, so the commission will be increased to 50% of the value of the items you collect. You can choose either of the two models according to your own circumstances every month. However, if you choose the base salary system, there will be a task standard. Otherwise, the base salary will be deducted.”

Chen Shanshan: “This salary system sounds so familiar... it’s quite similar to my dad’s salary system...”

Cindy: “What Does Your Dad Do?”

Chen Shanshan: “He sells second-hand houses!”

Cindy:” ...”

If you don’t say it, it really does sound similar...

However, Cindy felt that this system was quite good in Xing Hai world. After all, there were great opportunities here. This kind of flexible salary system would actually make people more motivated.

“Cindy, what do you think?”Chen Shanshan looked at her pitifully.

Cindy looked at the silly girl and hesitated for a moment. As a bystander, it was okay to give some advice, but it must not be too subjective to influence the other party. Otherwise, if the other party chose the wrong direction, you would be the scapegoat.

Just as she was thinking about how to phrase it, a cold voice sounded, "How come when you're out in the world, your character of always asking people questions can't be changed?"

Cindy was stunned. She turned around and saw a young girl who looked like Huazhong.

"Xiaoyun! !"Chen Shanshan was pleasantly surprised. She pounced over with an excited expression, "Why are you here?"

Guo Xiaoyun looked at her with disdain. "I'm here to see if you've been sold..."

"Who is this?"Cindy asked curiously.

"My roommate!"Chen Shanshan quickly introduced, "She's a new player who was accepted with me, but she's in Huaxia City...". Then, she said to Guo Xiaoyun, "Xiaoyun, this is Cindy, a war reporter. It's My Dream Job!"

Guo Xiaoyun: "Isn't your dream job a food blogger?"

"That's my second dream job. My real dream job is to be a war reporter!"Chen Shanshan said confidently.

Guo Xiaoyun: "Hehe..."

Cindy looked at the other party curiously. She didn't think that this girl was a new player. How could a new player come to another city in the early stages?

"Xiaoyun, what do you think I should choose... let me tell you, this place is so domineering..."as she said a lot of things, Xiaoyun directly interrupted her, "It's good to choose the ocean resources collection..."

"Eh? Really?"

Cindy glanced at him. How could he give such subjective advice? His friend seemed to be not afraid of being blamed at all... ..

Guo Xiaoyun said, "It's obvious that you can't be a Lord with your simple character. If you go to work, you might be sold by others. You might as well be a civil servant. At least you won't starve to death..."

"Xiao Yun, you're bad. I'm not that simple!"Chen Shanshan protested.

"I saw black sister when I came here just now..."Xiao Yun changed the topic.

Chen Shanshan was immediately successfully changed. She asked curiously, "Hey, Xiao Yun went to black sister's place? What is she doing?"

Guo Xiaoyun: "Planting corn. Don't you know that the second city is full of farmers?"

Chen Shanshan:"..."

Cindy frowned and couldn't help but interrupt, "I just went to the second city yesterday. I think it's pretty good there..."

"It is pretty good..." Guo Xiaoyun glanced at her indifferently. "If you just want to be a farmer..."

"Um..." Cindy frowned slightly. She was about to refute something, but she suddenly found that she didn't know how to refute... ..

The second city was indeed pretty good. The atmosphere was relaxed and the quality of life of the citizens was high. However, it didn't have an advantage in the previous lord competition or other areas. The flower spirit of the elf civilization was a very excellent producer., the City Lord Lord Qingming's policies could also easily give birth to flower spirits, but what about other than the flower spirits?

Cindy instantly fell into deep thought. That's right... .. If she only wanted to quietly become a flower spirit, that would be a good choice. However, not everyone would choose this kind of life. ...

Yesterday, because of the beautiful display by Qingming, she was prepared to mainly promote the second city in the Third World!

But now that she thought about it, did her actions count as subjectively making decisions for others? Would those who yearned for a hard-working life blame her if they chose the second city?

Thinking of this, Cindy took a deep breath...

She had just blamed the other party for being too subjective in helping her friend, and she had actually made the same mistake. As a media person, she couldn't even maintain the neutrality of the most important guest. It was really a failure!

At the thought of this, Cindy's forehead actually started to sweat with guilt.

Guo Xiaoyun looked at her deeply and thought to herself, what a smart person, he can see through everything with just a little bit... ..

As the number one developer of Huaxia City, of course, she would not be so free to come and visit her roommates...

The third world had a large population, and it was also a very valuable resource in the later stages. Whether it was from the perspective of Huaxia City or the Seer Lord's position, she would not let Qingming bind this wave of resources in advance. After all, the city Lord System was... It was all about balance... ..

After seeing that she had successfully given her advice, she turned around and pinched Chen Shanshan's cheek. "This place is actually not bad. Although it's a little stressful in the early stages, it can spur a lazy girl like you to choose a path with an official job guarantee. HMM, perfect, it's perfect for you!"

"Xiao Yun! !" Chen Shanshan was immediately disgruntled. "How can I say that? I'm at least better than black sister."

"She knows how to grow corn. What else can you do besides sobbing?"

"I'll fight you to the death! !"Chen Shanshan immediately pounced on Guo Xiaoyun with bared fangs and brandished claws.

Cindy looked at the two people who were fooling around and instantly felt much more relaxed. There was a faint trace of gratitude in her eyes when she looked at rainy girl and melon-less. She also decided to properly understand the other cities, it would be easier to do an objective and fair publicity when she went back!

Chapter 853 coercion...

"Who is this girl?"In the third city, song Zai looked at the image sent by AI and asked with narrowed eyes.

AI: "Guo Xiaoyun, screen name: Rain Girl Without Melon, the first batch of players to enter the galaxy, level 5 developer, the only all-rounder developer, and also the only mecha operator..."

"Mech Pilot..."song Zai narrowed his eyes and said, "So Luo Fu is indeed related to the alien forces?"

Logically speaking, if they were still in the exploration period, it would be impossible to develop such a pure combat space weapon. That was something only a mature space civilization would have.

Ai didn't reply.

Song Zai didn't mind and smiled. "This woman saved me a lot of trouble..."

The other party through the roommate approach is very clever, there is no unnatural, if his identity, I am afraid to put more thought into the layout, after all, if the other party directly tell the relationship. I'm afraid the effect is not obvious when the other party is wary of you...

Even if what you say is true...

"The developer is also the key..."song Zaiyi knocked on the table and asked, "How many people in the current third city registration are willing to choose the developer automatically?"

"Not many..."the AI replied, "Currently, there are 84,311 people in the city's population, and less than 1,000 of them are willing to choose developers..."

"As expected..."song zaiyi smiled bitterly.

However, he also expected it. After all, people were all romantic. In this strange world that only appeared in novels, who would not want to become a hot-blooded adventurer?

"After 100,000 people have been recorded, it will be announced that our third city will admit an additional 3,000 people, but only the developers, who require at least a doctorate from a world-class university, and those with scientific research experience can lower their educational requirements and select the best candidates... <per_0> . ."

"Yes, my Lord..."

“Send an invitation, I want to meet this all-around developer...” song at the screen of rain woman no Melon Way.

Before ai could reply, Rainy Wugua, who was playing with Chen Shanshan on the screen, suddenly turned her head and said to the screen, “I’m not free for the time being...”

Song Zaixin:”...”

“She... can hear me?” Song Zaixin was a little uneasy...

AI: “A level five developer’s spiritual power can already be transmitted through a medium like an electric current. A non-specially encrypted electric current can not be hidden from the other party. The equipment in the base is a beginner-level equipment. Naturally, it is impossible to secretly monitor such a high-level developer...” . “...”

Song was concerned. “Why didn’t you say so earlier? I was embarrassed, Alright?”

AI: “You’ll get used to it...”

Song was concerned.”...”

This... ? Was It really an AI? Could it be a human masquerading as one?

Speaking of which, the developer race actually had such an advantage. Looks like I’ll have to arrange some time to improve myself... “...”.

“...”

“Who are you talking to?” On the other side Chen Shanshan looked at the rain woman without Melon Road.

“Oh, nothing... ...” rain woman no melon pinched each other’s face: “I rarely come, you do not treat me to eat something?”

“How can I have money? These days are all drink nutrient fluid good?” Chen Shanshan Pouted Mouth Way.

“I’ve got some black corn here. Would you like some fresh corn?”

“Okay, okay, I know a place that’s very remote. Where should we go to grill it...” then, Chen Shanshan turned to Cindy and said, “Cindy, you’re in luck. Let me tell you, black sister’s corn is really delicious!”

“Right?” Cindy looked at the kind girl and smiled. Then, she looked at rainless melon and said, “I’m still in a hurry to go to the next city, so I won’t go with you guys...”

“Ah... you’re leaving already?” Chen Shanshan looked reluctant.

“There are only five days...” Cindy also looked regretful. “There’s not much time. I have to hurry up and see all five cities. After all, this is the purpose of this trip.”

“Then... then... When will you come again?”

“It’s hard to say. I haven’t chosen a city yet...” Cindy smiled.

“AH? You haven’t chosen a city yet? Cindy, aren’t You American? Why Don’t you have a choice? It’s already expired...”

“My situation is different...”Cindy smiled bitterly and said, “I plan to advance and retreat with my compatriots!”

“Oh...”Chen Shanshan nodded seriously as if she could understand.

Rainy girl saw this and exposed her mercilessly. “Oh my ass, can you understand what she said?”

“I... Why Can’t I Understand?”

“What is she talking about?”

“Anyway... it’s a very serious matter!”

Rainy Girl:” ...”

Cindy burst into laughter and could not help but pinch Chen Shanshan’s face. She said to rainy girl, “Your friend is very cute. If you have the ability, you should take care of her more.”

Rainy Girl looked at her. “My friend, I can naturally take care of her...”

Cindy narrowed her eyes. Her many years of career had allowed her to judge that this woman was definitely not an ordinary student. She felt that she might even be someone on the same level as Qing Ming... ..

She didn’t know if it was a good thing or a bad thing for such an innocent little girl like Shanshan to have such a friend...

After returning to the main base of the third city and carefully recording the life and occupation training schedule of the third city, Cindy packed her things and walked toward the teleportation point, intending to head to the fourth city.

When she was walking to the teleportation point, a bright light flashed past, and a group of familiar people appeared in front of her.

Cindy frowned. These people were the group of reporters who had come with her.

“Cindy, where have you been? It’s easy for you to cause trouble for us if you leave the team without permission, do you understand?”One of the reporters scolded Cindy the moment he saw her.

“Mr. Voss, please watch your words. I’m an independent reporter now and I don’t work for the world times. Where did this saying come from?”Cindy looked at him with a frown.

“Funny, do you think that you are the only war reporter that no one knows about? Who would invite you? “You wild reporters are all hitching a ride with us. If it weren’t for the pressure from the big newspapers, do you think there would be an invitation? “Put your attitude in the right place, Cindy. If you run around and cause any trouble, the ones who will bear the responsibility in the end will be the big mainstream media! “!”

Cindy looked at the other party speechlessly. Pressure? Where did these people get such confidence from? Haven't they been slapped enough in Huaxia City?

"Cindy..." a blonde woman with blue eyes said with a serious face, "I heard that the Second City Lord, Abe Qingming, personally received you?"

Cindy looked at the chief editor who had fired her and said mockingly, "The chief editor is still as well-informed as ever."

"What did he tell you?"

"Why should I tell you?"

"It seems that you still don't understand the situation..." "..."the woman said coldly, "The reason why you can still wander outside as an American reporter is that I didn't pursue the matter with you. If I wanted to, you could lose your legal identity at any time. You have to understand that the reason why you can wander around in such a chaotic place safely is because you are an American war reporter. With the protection of the powerful American army and the federal law, those third world warlords don't dare to make things difficult for you. Do you really think that it's because of your charm? Without this identity, you'll end up worse than a pheasant!"

Cindy's face turned pale with anger.

"Now, Tell Me, what did Abe Qingming say to you?"The woman took a step forward and pressed down.

Cindy's aura was exhausted and she kept retreating. Just as she was about to lose, a cold voice suddenly sounded, interrupting the woman's aura.

"It's quite lively..."

Chapter 854 the sharp-tongued song zaiyi...

"You... You Are..."

Looking at the person who had suddenly appeared, everyone was shocked. This face was very famous in the world. Anyone who had seen some international news would be able to recognize the identity of this person...

The man who had single-handedly challenged the country's plutocrats, the man who had descended from the heavens among politicians, and the winner of his life who had returned after four years of settling down in legend.

"Mr. Song Zaiyi..."the female reporter who was in the lead immediately put away her cold smile and saluted respectfully.

Song Zaiyi coldly glanced at him, but he couldn't be bothered to respond to him. Instead, he looked at Cindy, who had been forced to retreat step by step.

"You want to do such a great thing, but in the end, you only have this little bit of ambition?"

Cindy was stunned and looked at Song Zaiyi in a daze. Was he talking to her?

Why did such a person come to talk to her about this?

“What? Are you so scared that you can’t even speak?” Song Zaiyi said coldly.

“I . . .” Cindy was a little embarrassed and annoyed. “Isn’t it because you big shots are powerful enough? I . . . Isn’t it normal for small reporters like me to be scared?”

“Big Shots? Them?” Song Zaiyi had a funny expression.

The faces of the reporters tightened. They felt that the other party didn’t come with good intentions... ..

“If their power is really as useful as they say, why would Qingming meet you alone instead of inviting them?” Song Zaiyi coldly glanced at the arrogant reporters and said, “Don’t tell me you don’t even know why Qingming values you so much?”

“Why... Why?” Cindy stuttered.

“Of course it’s because you’re very important...” Song Zaiyi sighed and looked at the other party. “Your position is very important. The reputation that you’ve gained through so many years in the third world is more important, and they, the so-called mainstream media, are nothing here. That’s why Qingming met you alone, but he didn’t even send them a receptionist. Can’t you see such an obvious thing? And you’re scared to this extent by these farts?”

Cindy: “...”

“Mr. Song Zaiyi! ” The group of reporters was so angry that their faces turned pale. The other party had deliberately said it in English for them to hear. The female reporter in the lead was so angry that her whole body was trembling. She angrily scolded, “Please Watch Your Words!”

However, Song Zaiyi seemed to be too lazy to pay attention to the other party. He waved his hand impatiently, then, he heard Ai’s voice, “Mary. Colvin, Issa. Tifasci, Wall. Mace... ..” “You have been permanently blocked by the third city. Please leave the country within five minutes. Otherwise, your safety here will not be guaranteed!”

“Are you crazy?” The female reporter screamed, “Expel us? Do you know the consequences?”

“Is there something wrong with your brains?” Song Zaiyi said speechlessly, “What consequences can there be? You guys go back and spread rumors that this place is a terrorist city? The population of the forty-six countries has been divided, and there is no way to change it. Why do you still think that your control of public opinion is useful? Don’t you know what situation you are in now?”

Then, she looked at Cindy. “A group of people with such IQ can scare you? It seems that I have to reevaluate your value!”

Cindy’s face turned red when she heard that. Then, she looked at Colvin and the others’ incompetent and furious look. She suddenly found it funny in her heart.

Yes... .. She was actually scared by such a group of people just now. It was really... .. It was really a failure... ..

“You will definitely regret it! !” Colvin said angrily.

“You still have three minutes to leave this place...” . “...” song said lazily, “After this time, I will have to forcibly expel you. However, if I were to personally expel you, I can’t guarantee where you will be transported to in the end “...” . “... it might be the war zone of the Third World, but it’s not bad. It’s a good opportunity to test whether your so-called identity as an American citizen and a great reporter of the world times is really useful there.” “...”

“You...” Colvin suddenly choked. The people behind him hurriedly pulled him back. “Chief editor, Let’s withdraw first. This guy is crazy!”

Colvin heard this and coldly glanced at Cindy and song. He coldly snorted and said, “Let’s Go!”

Song cared and directly didn’t look at them. For this group of clowns, wasting time to pay attention to them was simply stupid...

He looked at Cindy and said calmly, “Find a place to chat for a while?”

Colvin and the others froze and stared at Cindy from the corner of their eyes. They did not understand what this guy was capable of? He was able to make a series of big shots think so highly of her!

“Uh... oh...” Cindy nodded in confusion.

— — — —

Song zaiyi directly led Cindy into the city Lord’s room. Cindy could not help but feel uneasy when she faced this legendary political strongman.

There were not many politicians in the world that she could admire. The Man in front of her was definitely the leader among them. He was able to challenge the capitalist class and almost succeeded. It was not an exaggeration to say that he was her idol.

“Did the mayor come specifically to look for me?” Cindy asked curiously.

“I didn’t want to take the initiative to look for you...” . Song zaiyi quickly poured a cup of tea for the other party and sat down across from her. “Previously, after Guo Xiaoyun pointed out to you, we actually didn’t have much meaning to meet. The main reason was that you were too weak just now I could only come to clean up your mess

“I. . .” Cindy pursed her lips. has this guy always been so poisonous?

After taking a breath, Cindy decided to change the topic. She smiled and said, “Is that Guo Xiaoyun your subordinate?”

“You overestimate me. I can’t afford to have such a subordinate now...” song Zaiyi said indifferently as she took a sip of the tea.

Cindy was stunned when she heard this, but her heart skipped a beat. She had guessed that the girl was not simple, but she had not expected her to be so. Song zaiyi would never belittle or belittle someone like her, if he said that, it meant that he really could not afford to hire her...

Who Was She? Could she be one of the first great lords of Huazhong?

That was not right. She had also read Grandpa Lu's Guide to the Big Shots, but Guo Xiaoyun had not been mentioned... ..

Song Shangyi seemed to have seen through her thoughts, she said slowly, "That Grandpa Lu is only one of the first batch of players. If he dares to reveal the information of those top players, it means that he is either popular and those people won't blame him, or his status isn't low. Even if he reveals the information of others, they won't make things difficult for him. But you have to know that there are definitely some people in this world that he doesn't dare to reveal!"

"This... this powerful?" Cindy was stunned for a moment as she recalled the plain girl's face.

Song Zaiyi also sighed slightly. He wasn't exaggerating. As the city lord, he had the right to investigate some information, including information about people. He could even investigate the first Lord's information in detail, but that Guo Xiaoyun.., the system only gave basic information. What exactly did the other party do in the past, and what he was responsible for, he couldn't find out. Asking the system for a reply was just that he didn't have enough authority.

The city Lord's authority wasn't enough... "...". What kind of existence was that guy?

"Let's get back to business..." song Zaiyi pulled the topic back. "You should know why I called you here, right?"

Cindy:" ..."

Chapter 855 What are your plans for the future?

Cindy stared blankly at the class antagonist whom she had once worshiped and asked cautiously, "Are you willing to accept them too?"

"Understand your position as a young lady..." . Song zaiyi sighed. "Don't act like you're praying. The population of the Third World is also an excellent resource. Other than Huaxia City, which has an unclear attitude, the five major cities will not refuse this resource. It should be said that they all want to occupy this resource!"

"Huh?" Cindy was stunned. "Is that so? But... until now, no city is willing to accept people from other than the 46 countries on the surface."

"Of course..." song zaiyi shrugged and said, "Galaxy has just begun to develop, and each city has 200,000 slots. How can it accept people from outside?"

"So you're still discriminating against them, aren't you?" Cindy frowned and said, "You think that the status of people in the 46 countries is higher than that of outsiders."

"It's not discrimination, it's the truth..." . Song zaiyi sighed. "Idealization has never been able to solve the root of the problem. The people in the 46 countries are in a period of peace, and most of them are not extreme. They are relatively easy to govern, and they have a certain level of cultural background. There are more high-quality people. Not to mention just based on cultural quality, how many phds can you find in the population of the Third World?" ? How many scientists?"

“In order to develop the competitiveness of the city, even if we don’t care about our national feelings, it’s normal to choose a higher quality population based on the pros and Cons...”

Cindy bit her lip. Although she didn’t want to admit it, it was obvious that she couldn’t refute it. What the other party said was true.

Many people in the third world were constantly in war. Most of them had extreme personalities, and their cultural quality wasn’t high. Many people couldn’t even read...

“If that’s the case, then why did you say that the five major cities would need them?”Cindy bit her lip and asked.

“Because this is a platform that is thousands of times bigger than sphere D. there is enough space to accommodate everyone, and from the gene sequence, they are more worth nurturing than the indigenous people in the new territories. Therefore, in the future, when their population is not enough, the five major cities will definitely target the population of the third world. Qingming values you because she wants to lock down that batch of resources in advance...”. “...”. “...”

Cindy was stunned. Her heart was complicated. She didn’t have to do anything at all and the result would be the same... ..

“Then... how long do we have to wait?”Cindy asked carefully.

“I don’t know...”. Song shook his head. “Maybe a year, maybe a few years, or even longer. It depends on the speed of development. But you have to believe that that day is not far away because I can feel that the speed of development of the later platform will far exceed everyone’s imagination.”

“Then what should I do?”Cindy quickly asked.

“Continue to give hope...”. “Tell them that they can’t escape from suffering for the time being, but the days of suffering won’t be long. And as a media person, you have to learn to observe what kind of place is more suitable to become their new home, so that you can rationally and objectively publicize it.”Song Yi said “... “..

“Your influence over there is very great, especially after you were invited for an interview this time. The people of the Third World will definitely be eager to get hope from you. This will make your influence grow bigger and bigger, but the more it is like this, the more you have to know what your influence represents... “Song showed a rare serious expression. “I really hope that you can never forget your original intention!”

Cindy’s heart skipped a beat when she heard this. She stared blankly at song Zaiyi and couldn’t help but think to herself, ‘after so many years, has this person never forgotten his original intention?’

At this thought, Cindy stood up and bowed deeply to song zaiyi... ..

“These damn monkeys...”on the other side, the expression of the exiled reporters was extremely ugly, especially Colvin, who was in the lead. His expression was even more ferocious.

They were just lucky. Did they really think that this world was their world?

Just wait and see. Time will prove that those who can rule the world will always be noble white people!

“Chief editor... Are We still going to continue?” A reporter beside him asked carefully.

“Why aren’t we continuing?” Colvin glared at the other party and said, “We were just targeted previously. Soon, it will be our home turf...”

She opened the report and said, “The lord of the fourth city, Elizabeth, is a white aristocrat with a noble bloodline. Do you think she’ll be like those vulgar barbarians? “More than 80% of the residents of the fourth city are Westerners. That’s where the times will live in the future!”

Everyone nodded in unison.

“But... Master Angor is also white...” one of the female reporters said in a low voice.

“Angor?” Colvin snorted. “He’s just a coward traitor, a disgrace to white people!”

Everyone:” ...”

Just as they stepped into the fourth city, they heard a gentle female voice. “Welcome, reporters. Lord Elizabeth has prepared dinner for us. Please follow me...”

The reporters looked up and saw a few tall and beautiful women, like angels in the wind, elegantly sending out invitations to them.

Everyone immediately became excited. Ever since they had entered Huaxia City, they had always felt that they were not well-received. This was the first time they had enjoyed such a reception, and it made them feel extremely flattered.

Colvin also gradually warm face, before the loss of face finally recovered some, sure enough, or Elizabeth such a traditional aristocrat, is really worthy of holding power.

— — — —

“Well... . Really Fragrant... . .” In the evening, in a corner of the third city, Chen Shanshan picked up the freshly roasted corn and fiercely poked it!

Next to her, rain girl, Wugua, nodded slightly after taking a bite. The plants in the D sphere were all lower-middle-class plant varieties. In Huaxia City, there weren’t many agricultural forces that developed these varieties, however, the current policy of the second city was to cast a wide net. Facts proved that there were indeed many good products that could be dug out from it.

Corn was one of the varieties that had recently been discovered to have good potential. After using the latest flower-green technology to modify the grafting genes, its malleability had reached a class, and it had already been widely tested in the second city.

It had to be said that black sister’s luck was really good. It just so happened that the second city was short of corn varieties... ..

And reality proved that black sister was indeed suitable for this line of work. She had not even transformed yet, but she was already very good at cultivating new varieties. She was one of the few

excellent farmers who could successfully grow a finished product. She believed that she would be an outstanding flower spirit in the future.

Although that fellow was also silly, his luck was good. He had also chosen a good path. It seemed that she did not need to worry about him. But this fellow... ..

Rainy girl looked at Chen Shanshan, whose cheeks were full from eating, and couldn't help but sigh. "What are your plans for the future?"

Chapter 856 Suspicious Cloud...

"Eh?" Chen Shanshan chewed the corn in her mouth like a squirrel. She tilted her head and looked at Guo Xiaoyun curiously. "Why are you so serious all of a sudden? Besides, didn't you help me choose it just now?"

Rain Girl Wu Guagua couldn't help but cover her head and look at this silly girl. "I was just saying it casually. Are you really going to follow the path I told you?"

"I think what you said makes sense...". Chen Shanshan smiled and said, "I'm not that smart, and I didn't expect to be successful. The route you arranged is very good. As a collector of resources in the sea, you can drift in the sea and get a stable salary. How Wonderful!"

"What about in the future? Do you want to spend your whole life searching for gold in the sea?" Guo Xiaoyun laughed.

"Let's talk about it in the future...". Chen Shanshan smiled and said, "It's already very good now. A new place, a new world. It's much more interesting than working. If it's possible, I should go learn some cooking and then go on a trip to the sea while collecting delicious ingredients. Ah, this is my dream!"

"Isn't your dream a war reporter?" Rainy Girl Wugua teased.

"D * mn, you believe my casual words? Do you think I can endure that kind of hardship?"

Rain Girl, Wugua: "..."

Chen Shanshan looked at the sand and stretched lazily, looking at the brilliant starry sky, she said, "I heard many people in the Tieba Forum say that the technology here is very likely to go into the universe. To be honest, I'm looking forward to it. After I tour this planet, I'll be able to go to a wider place. Every day will be a different scenery. This kind of life should be very beautiful, right? I just don't know if I can live until then...". "..."

Rainy girl was about to mock him, but when she heard his last sentence, she was stunned, she looked at him in a daze. "Why do you say that? Nowadays, genetic bodies can extend life. Even a guy like you who doesn't strive for progress can live for hundreds of years. Why Can't you live until then?"

"I don't know..." Chen Shanshan looked at the starry sky and said in confusion, "After choosing a genetic body these past few days, I always have an inexplicable sense of unease. Especially after I fall asleep, I always have the same nightmare..."

“The same nightmare?” Rainy looked at him curiously.

“There’s a pair of eyes, very big... staring at this place...” Chen Shanshan looked at the sky, her eyes were blurry. “That pair of eyes kept getting closer and closer, and the closer they got, the bigger they got. In the end, when they got closer, they were even bigger than the sky. It was terrifying... do you think the heavens are hinting that my good days are coming to an end?”

Rainy Girl, Wu Gua:” ...”

“When did this feeling start?”

“A few days ago...” Chen Shanshan’s eyelids became heavier and heavier. As she spoke, she actually fell asleep on the sand. ...

“Shanshan?” Rainy Wugua frowned. This guy was really... ..

Suddenly, Rainy Wugua was stunned. After carefully sensing, she suddenly realized that something was not right. She realized that Chen Shanshan was very tired, and even seemed to be mentally exhausted...

How could this be?

Theoretically speaking, a body that had just been strengthened should have very strong mental strength... . .

Then think of Chen Shanshan just said a nightmare, rain woman no melon heart also rose a trace of ineffable uneasiness.

Thought she gently tapped Chen Shanshan, and then saw Chen Shanshan’s body suddenly as light as a feather, rain woman with Chen Shanshan light floating up, quickly to the base of the third city.

“My Lord, Guo Xiaoyun of Huaxia is here to see you...”

On the other side, in song care to send Cindy left, the intelligent then rang rain woman no melon face request.

Song care frowned, the other party just refused to meet with him, and now to see what I mean?

After thinking about it, he didn’t care about being rejected, and asked curiously, “Where is she now?”

Intelligence: “In the gene storage room...”

Song in care to hear the words frown deeper: “That position is not allowed to outsiders to get close to it? Even I, the city lord, need to apply to get close.”

SMART: “She has the right to...”

Song Cares:” ...”

In the storage room, rain woman Wu Guagua carefully observed Chen Shanshan’s genome. The other party disliked the sea spirit’s too Q version. In addition, they had not started work yet, so they rarely

used it on weekdays and kept it in the storage room all the time, on the other hand, she was using her strengthened body to wander around the third city.

Logically speaking, she should not have used up much of her genetic body. However, reality proved that the consumption was greater than expected. It looked like a lychee that had lost its moisture. ...

“What’s going on?” Rainmaiden Wugua asked Ai with a frown.

“Excessive use of spiritual power...”. “Elves are half-spirits. Although they have a form, they are actually formed by absorbing the elements with their spiritual cores. If too much spiritual energy is consumed, the gathered elements will be drained accordingly, and the current situation will occur,” ai replied

“But why is it consuming too much spiritual energy? What did she do?”

Ai replied, “According to the consumption, this elf body used some kind of spell, which resulted in excessive consumption.”

“Spell?” Rainmaiden’s face twitched. Was this a joke? She was a level 5 developer and a professional spiritual power class, but even now, she could not fully cast a spell. How could a Level 1 elf cast a spell?

Ai: “Elves are different from normal genetic bodies. Their genes are ancient, and their DNA is very special. Many skills are passed down from ancient times, so it’s not strange that they can activate anything. There was once a Level 1 elf body that inadvertently triggered the talent of the ancestral summoning spell, and directly sacrificed itself to summon a demon... “... Therefore, the growth of elves is very unstable. They always need professional elven instructors to guide them.”

“What kind of spell do you think she triggered?” A rare look of worry appeared on Rainy’s melon-less face.

“From what you just described, it could be a nightmare spell, or... it could be a prophecy spell...”

“Prophecy spell?” Rainy’s melon-less was stunned. “Isn’t this something that only level-7 and above spiritual class attire can touch?”

She was actually very interested in this course, but even now, she could only learn theoretical knowledge and had never tried to put it into practice. Her mentor had also warned her to use prophecy before her spiritual power reached level-7, the backlash was very great, and it was even greater than the backlash from summoning.

Ai: “The possibility is not small, that’s why its spiritual power will be exhausted...”

“Prophecy...” rainy melon narrowed her eyes as she recalled what Chen Shanshan had said in a daze.

Her huge eyes were getting closer and closer, an uneasy fear... ...

What did this mean?

“Does her prophecy mean that something bad is about to happen?”

Ai: “It’s hard to say. The accuracy of the prophecy has never been guaranteed. Many advanced seers might have a deviation in their systematic casting, not to mention the elves who occasionally activate their ancestral talent. The accuracy is not high.”

“But why would it be activated for no reason?” Raingirl, WUGUA, said solemnly, “Even if Shanshan has such a talent, she should have been stimulated to activate it, right?”

AI was silent for a moment, and finally said, “Yes...”

“When will the Lord Return?”

AI said, “I’m not sure. This time, the Lord has gone to the federation to do quite a lot of things. He has to pay taxes and sell the existing energy ores, and then he has to buy a large number of materials and hire a large number of teachers... I’m afraid he won’t be able to return in about a month...”

“A month...” rainy girl’s eyelid twitched. For some reason, she felt more and more uneasy... ..

“Song Zai’s City Lord is here...” while rainy girl was deep in thought, AI reminded her.

“Alright...” rainy girl returned to her senses and nodded. “Bring me to him...”

Chapter 857 Unknown Terror (Part One)

“You said that you want to take away Chen Shanshan’s main body and genetic body?” Song Zaiyi frowned as he looked at Guo Xiaoyun.

“Yes...” Guo Xiaoyun nodded.

Song zaiyi frowned. With Guo Xiaoyun’s power, if he really wanted to take care of his good friend, he could have directly arranged for him to go to Huaxia City. However, from the way Chen Shanshan came into contact with Guo Xiaoyun, it seemed that Guo Xiaoyun didn’t want to interfere with his good friend’s life in the New World. It seemed that he didn’t know that his friend was so powerful, and he didn’t seem to want to interfere with his friend’s life in the New World... ..

If that was the case, why did he make such a request at this time?

“Did something happen?” Song Zaiyi asked.

“Well...” Guo Xiaoyun hesitated for a moment, but in the end, he decided to reveal something. “Chen Shanshan’s genes have awakened the talent of a prophet, and she predicted something. I have to bring it back to investigate.”

“Prophecy?” Song Zaiyi was surprised. “There’s such a Thing?”

It was already ridiculous enough that there were Arcana and magic in this civilization, but now there was even a prophecy... ..

“Just because you don’t know some things doesn’t mean that they don’t exist...” Guo Xiaoyun replied calmly.

“May I ask what the prophecy is about?” Song Zaiyi asked curiously.

To be able to make such an arrogant person directly request him, it was obvious that the matter was not small.

"I can't reveal it until I've investigated it thoroughly..." Rainmaid Wugua refused to reveal further. Chen Shanshan's prophecy was not a good thing. If it was not accurate, there was indeed no need to reveal it to create panic.

Especially for a castellan like her. If she knew that something bad was going to happen and prepared something in secret, it would not be good for the stability of the faction.

Hence, he said, "Furthermore, Shanshan's activation-type divination talent does not have a high accuracy rate. The main reason why I took her away was because I was worried that she would not be able to control her own talent, causing her to consume too much and cause her body to fail irreversibly. At that time, even if she were to be reborn, she would still be affected."

Hearing that, song Zaiyi glanced at the other party. Although the other party's reason was very reasonable, he still felt that something seemed to have happened...

After thinking for a while, he finally nodded. "Alright, I'll have to Trouble You Then. I'm curious, with her innate prophecy talent, will it affect her later transformation?"

"Generally speaking, it won't..." the AI interjected. "If she activates this talent ahead of time, there's a high probability that she will evolve into a sea priestess, and her growth rate will be better. She can be trained to become a specialized prophet."

"Prophet..." song Zaiyi pondered for a moment before saying, "Chen Shanshan is a citizen of our third city. I hope that after you treat her body, you can bring her back in one piece."

The meaning in his words was naturally that he did not want to lose talent.

"Don't worry about that..." Guo Xiaoyun smiled and said, "The city planning is fixed at the highest level. Once different citizens choose their city, they can not change it for life without the permission of the city Lord."

Song zaiyi smiled and said, "Then, I'll leave this child to you..."

"You're too kind. I still have to thank the city lord for being reasonable..." Guo Xiaoyun said politely. Then, she directly activated the teleportation and disappeared into the city lord's room with Chen Shanshan's genetic body and main body.

After the other party disappeared, song zaiyi could not help but ask, "Can a prophet really predict the future?"

Intelligence: "Yes, but not entirely accurate, but highly valuable, because advanced seers not only predict certain things, but also calculate risks, and are the best wind controllers..."

"High-level seers?" Song said with a half-smile. "Do they exist? In the upper echelons of Luofu or some other force?"

Intelligent did not reply, some smart people have obviously guessed some inside information, but the surface is now not good to directly expose.

On the other side, rain woman no melon will Chen Shanshan back to the Huaxia City General Base, the first time called the base in charge of prophecy teaching instructors.

The seer in the base is a level five life form, similar to rain girl without melon, but in the Federation study for 100 years, the theoretical knowledge is far better than rain girl without melon.

“Mentor, can you determine if she has the talent of a divination?” Raina and WUGUA asked directly.

“This...” the mentor was from Wastru. His skin was light blue, and he looked a little like the avatar in the movies.

He frowned and looked at Chen Shanshan, who was already somewhat dry. “Its symptoms can only mean that it has used too much of its spiritual power. It’s hard to say whether it’s a divination or not. Did it tell you any other symptoms?”

Rainy girl, Wu Gua, told him about Chen Shanshan’s nightmare.

“Nightmare...” the teacher pondered for a moment, then, he nodded and said, “The possibility of this is higher. Usually, if you have the same nightmare continuously, it will also cause your spiritual power to be exhausted. Either you were hit by the Nightmare Clan’s spell, or you activated the prophecy spell...”. TSK TSK, the talent of the people of Planet D is really incredible. The genes of the ancient sea elves, which cost a few dollars each, can actually activate the ancient inheritance. TSK TSK

However, it wasn’t too surprising. Ever since he arrived here, the talent displayed by these D-ball natives had been giving him critical hits every single day. He had already gotten used to it.

For example, the one before him had become a level-5 lifeform in a few years. This kind of progress was something that even the direct descendants of his family who had inherited the ancestor’s purified genes might not be able to achieve. Moreover, it was the gene of the developer...

Sometimes, he really wondered what kind of turmoil would happen if such a group of people entered the federation in the future?

Just as he was thinking, Chen Shanshan, who had suddenly fallen asleep, clearly showed a struggle on her face. A large amount of sweat appeared on her forehead.

Rainy Girl Wu Gua’s pupils constricted, and she hurriedly approached. After sensing for a moment, she immediately discovered that the other party’s spiritual power was rapidly depleting again.

“What situation is intelligence?”

Intelligence: “It should be that her talent has been activated again, and she can let the instructor who is proficient in spiritual power to forcefully shut down the opponent’s casting state.”

“Unbelievable...”. The instructor at the side suddenly interrupted, “What pure spiritual power. Her spiritual power communication state is a spiritual medium mode that can only be used by a level nine seer. The gene body that this child uses is very likely to have part of the genes of the ancient almighty seer.”

“Ancient powerful seers?” Rain girl said blankly, “But you just said that this gene body is several yuan per...”

"It's hard to say..." The instructor shook his head and said, "Ancient gene bodies such as the Green Titan, Wood Elves, and Moon Elves, which have been extinct for countless centuries, are all extracted from some ancient fossils. It's impossible to analyze the composition of the gene body. Moreover, even the genes of powerful seers are difficult to activate, so these ancient gene bodies are all sold at a low price." "...". "..."

Rainless melon:"..."

"But there is a certain accuracy rate in her state of prediction..."the mentor said solemnly.

"There is a certain accuracy rate?"Rainless Melon's heart jumped when she heard that, and that sense of uneasiness appeared once again, so she hurriedly asked, "Can you make a judgment?"

"I can try..."the mentor nodded. When I graduated, my mentor gave me some equipment that could materialize the image of the prediction. At least we could see what her dream looked like.

"Where is the equipment?"

"It's in my room. Wait a moment, I'll bring it over right away..."after a pause, she played with rainy without melon and said, "If we want to observe her, we have to maintain her condition for a certain time. She needs to be transferred with spiritual power."

"I understand... instructor, please come back as soon as possible..."rainy without melon nodded.

After the other party left, rainless melon used the spiritual power transmission method that she had learned before to gently press on Chen Shanshan's forehead with both hands. She began to prepare to transmit her spiritual power, but the moment her spiritual power surged into the other party., an extremely terrifying cold feeling assaulted her heart!

Chapter 858 Unknown Terror (Part Two)

"This is... what is it?"Rainy girl pulled her hand back as if she had been electrocuted, her face pale.

Ai: "What Happened?"

Rainy girl was silent for a moment, not knowing how to describe it. She did not actually see anything, but she felt a kind of malice, an extremely terrifying malice!

Most importantly, this malice seemed familiar. It was as if she had seen it before, but the key was that there was no such thing in her memory.

This was very strange!

In the past, it could be said that she had forgotten about it. But after becoming a developer, her memory had long been activated by her powerful spiritual power, she even remembered the face of the doctor she saw when she was born. How could she forget such a deep impression of fear?

Rainless melon tried her best to describe the feeling to AI.

AI was silent for a while before replying, "For living beings, some emotions are engraved in their genes. For example, one day when you see an ordinary object, other living beings will turn a blind eye to it. However, you will experience extreme emotions such as fear, excitement, and so on. That means that this object has made your life-type genes remember it in ancient times, resulting in a conditioned reflex."

"Are you saying that there is something that terrifies the developer or the human gene that caused me to have a conditioned reflex?" Rainy girl Wugua frowned as she looked at the unconscious Chen Shanshan.

Could it be that the gene in Chen Shanshan's body had some kind of connection with the developer?

AI seemed to have seen through Guo Xiaoyun's thoughts, it said directly, "It's unlikely that it's a normal gene from the federation. This kind of thing that can cause fear memory to be passed down is a very dangerous thing. This kind of thing is prohibited by the federation from being used in the gene market. Even if there is an experiment, it will not be used on a federal citizen. Therefore, any gene that is sold is safe."

"Then what's the situation?" Guo Xiaoyun frowned.

Ai: "It might be the thing that your friend dreamt of..."

Guo Xiaoyun: "..."

Ai: "Your Friend's spiritual energy is severely depleted. Now, either you cut off her spiritual connection or provide her with spiritual energy."

Hearing that, Guo Xiaoyun hesitated for a moment. In the end, she decided to figure out the situation. Therefore, she gritted her teeth and placed her hands on Chen Shanshan's head.

This time, the cold terror did not strike. However, after opening the link, Guo Xiaoyun found that the flow of her spiritual power was quite fast.

She immediately frowned.

She had studied the course of spiritual power overload and knew that a strong spiritual power required a very high level of carrier. As a level five life form, her spiritual power was ten thousand times stronger than Chen Shanshan's, however, under such circumstances, her loss was very abnormal. She felt that she could only hold on for half an hour at most.

This kind of powerful overload definitely could not last for too long. After a long time, Chen Shanshan might be directly torn into pieces!

Thinking of this, she tried her best to control the speed of the flow, but the suction force produced by the prophecy spell was stronger than she had imagined.

The teacher of the prophecy department who had just left in the midst of a dilemma hurried back, holding a transparent crystal ball in his hand...

Guo Xiaoyun's expression turned strange when he saw the crystal ball. He asked with difficulty, "This... this is the divination equipment you mentioned?"

“This is it!”The teacher nodded.

Guo Xiaoyun’s face twitched when he got the affirmative answer. Divination and crystal ball... this equipment really matched each other... ..

So the western YY stories were not fake?

“This is Krum microcrystal, one of the most suitable conductive materials for divination dream interpretation. Under normal strength, divination dreams can be illustrated!”Seeing the doubtful expression on the other party’s face, the mentor hurriedly explained.

Guo Xiaoyun nodded. “Then please start quickly, mentor. Shanshan’s condition is very dangerous. If we delay any longer, I’m afraid that her body won’t be able to withstand it!”

“Okay...”after getting permission, the mentor quickly brought the crystal ball to Chen Shanshan’s side, then, his gray silver pupils began to emit a gentle silver light. The Crystal Ball that corresponded with it began to react and emit waves of light. Then, the entire crystal ball suddenly turned into something like a pupil and opened abruptly.

The shape and color of the pupil were exactly the same as the mentor’s!

As the pupil that the Crystal Ball had turned into opened, a light image appeared on the other side of Chen Shanshan. The image was very clear.

In the image, Chen Shanshan stood on a grassland with an expression like she had lost her soul, looking at the brilliant starry sky.

Guo Xiaoyun’s pupils shrank when she saw this scene because she realized that the grassland that Chen Shanshan was on looked very familiar. After taking a closer look, she immediately confirmed that it was the golden soil of the northern grassland of the new territories, because the purple-blue heart planted next to it was one of the magic plants that the cabbage tribe had recently tried planting!

Chen Shanshan had never been to the new territories. How could the New Territories appear in her dream?

Could This prophecy be true?

Thinking of this, Guo Xiaoyun’s heart suddenly tightened.

Then, an even more frightening scene appeared.

As the screen changed, the scene gradually changed from Chen Shanshan’s third view to her first view!

And in her view, it was something behind the starry sky!

Behind the starry sky, who knew how far away, there was a pair of eyes staring at her in the brilliant galaxy!

The moment she saw these eyes, Guo Xiaoyun felt her entire body turn cold, as if her blood had been frozen. This feeling was very familiar. It was obviously the feeling she had when she first came into contact with Chen Shanshan’s spiritual power, but this time, it was even more intense!

What the hell was this?

At this moment, Guo Xiaoyun truly experienced what it meant to be afraid from the depths of one's bones! !

"Quick, cut it off! !"The instructor beside him shouted in fear.

In an instant, Guo Xiaoyun reacted and directly cut off his spiritual power. The light of the crystal instantly dimmed like a power cut, turning into an ordinary crystal ball that fell to the ground.

However, the mentor, who had treated the crystal ball as a treasure, didn't even look at the crystal ball. He sat on the ground with sweat all over his face and panted heavily.

"What is that?"Guo Xiaoyun also sat on the ground and asked after a long time.

"I don't know..."the mentor shook his head directly.

"You don't know?"Guo Xiaoyun was stunned. The other party was so nervous just now. She thought that he knew the details.

"But it must be a very terrifying existence!"The instructor said with a lingering fear, "In the universe, there are many such terrifying creatures. Even now, such things exist. They drift in the universe like meteorites. Once they feel the fluctuation of life, they will directly go toward that planet. Many life galaxies in the universe have been attacked by this kind of drifting material. Most of the results are extinction-like!"

Guo Xiaoyun frowned. "But why did it feel like it could see us just now?"

The teacher said, "That's why I told you to cut the link. Divination is not one-sided. It's equivalent to spying on certain situations. However, for some powerful creatures, even if you can spy on them, they can spy on you!"

Guo Xiaoyun immediately felt goosebumps rise on her skin.

"Can we contact the Seer Lord?"

The first thing that came to her mind was the seer Lord, who seemed to be able to solve everything in the base.

"No...". Al replied coldly, "A deity lord like master will not reveal the coordinates of his faction. Therefore, when he goes to the federation, he will cut off the network here. In other words, we won't be able to contact him before he returns." "... .."

Guo Xiaoyun:"..."

Chapter 859 Drifting Materials...

"Ocean resources are divided into four main categories: mineral resources, biological resources, chemical resources, and power resources. The first two of these four types are the most commonly used, but the latter two are also necessary to learn. A normal living galaxy's ocean area is usually very vast, which leads to a very different distribution of resources. Take mineral resources as an example. You would think that this is a low-level magic region that doesn't have high-level magic ores, but in

some corners, due to the unique natural environment, it can form such minerals. And to judge these, you have to learn ocean chemical element recognition. By identifying the distribution of elements in the ocean area, you can judge what might be born in that location.”

“Perhaps there is nothing in the previous sea area, but the next sea area may give birth to high-level minerals or high-level creatures because of its different elemental composition. This is very important, so the ocean element class will be the first basic knowledge class that we collectors will learn. Next, I will tell you about the nine basic knowledge between low-level and high-level demons...”. “...”

In the classroom of the third city, a group of students were listening to the teacher’s explanation with a serious expression. They were even more serious than before the college entrance exam.

The reason for their seriousness was simple. Life skills classes were expensive, and the basic tuition fees were tens of thousands. In the field of gathering, marine resources gathering was the most expensive. Just think about the high amount of loans they had, most people wouldn’t be able to afford it.

However, there were exceptions. Our comrade Chen Shanshan appeared to be very dispirited, as if she was about to fall asleep at any moment.

When the lecturer occasionally looked over, the corners of his eyes couldn’t help but twitch.

“That’s all for today. Everyone, go back and carefully read through the information I’ve distributed. There isn’t much information, only seventy to eighty gigabytes. Although you aren’t developers, your spiritual power is average at 1.2. As long as you work hard, you will be able to grasp dozens of gigabytes of information in less than two days. ... Don’t waste your time. There’s a lot of competition, and it’s prescient of you to choose this major, but the more prescient you are, the better . . .”

Everyone repeatedly said yes, the tutor again stressed the potential of his course, this is satisfied to leave, before leaving also did not forget to glare at Chen Shanshan.

Chen Shanshan’s head shrunk and her face was filled with guilt.

After class, the group of students began to chat. The population of the third city was quickly accepted, but there were still not many who chose the marine resource gathering course. At a glance, there were only forty to fifty of them... ..

“By the way, there are so many things to learn in this course. If I had known earlier, I would have learned to mine...” a student beside him could not help but complain.

“Who says so? Mining Collection class only has three months to graduate and obtain the qualification certificate of a junior miner. Ocean resources class actually needs thirteen months to learn. F * ck, this cycle, when we graduate, will we still have soup to drink? “The tuition fee is also expensive, 150,000 points!”

“You paid for it yourself?”

“Nonsense, if I didn’t pay for it myself, would I be working for the imperial court? Did I come here to be an eagle or a dog of the imperial court?”

“F * ck, Big Shot. If you can afford to pay 150,000 points for the course, which Lord’s relative?”

“TCH, what are you pretending for? We’re all from the Huazhong region. How many of us who came to learn this course don’t have connections?”

“Hehe...”

Everyone laughed in tacit understanding. Currently, only the third city was open to the ocean resources course. However, due to the long duration of the course and the high tuition fees, as well as the fact that there was no need to use it for the time being after graduation, basically no one was willing to choose this course, and those who chose it had the support of a Lord behind them. Clearly, many lords had set their sights on the ocean.

Upon hearing this, Chen Shanshan shrank back with some inferiority complex. She thought to herself, could it be that I’m the only loser in the class?

“Chen Shanshan, someone is looking for you!”

Chen Shanshan’s eyes immediately lit up and she bounced out.

“Xiao Yun, you came to see me again? Did you bring any corn?” Chen Shanshan leaned forward and said coquettishly.

Guo Xiaoyun looked at her with disdain, then pushed her away and said, “How have you been recently? Is there anything unusual in your body?”

“Not for the time being...” Chen Shanshan quickly said, “I haven’t had nightmares for a few days.”

“Is that so?” Guo Xiaoyun looked at her. At this time, Chen Shanshan’s genetic body had recovered a lot, becoming round and elastic. The luster was also very good. Apparently, the advanced nutrient solution that he had secretly given her in the past few days was still somewhat effective.

“I told you to listen to the class carefully. Your job is not completely stable. When you fail the graduation test, you will have to spend more money to re-study, and you will have to work for the city for two more years.”

“I’m very serious!” Chen Shanshan said seriously, “I’m very serious...”

Guo Xiaoyun pursed her lips. “Wipe the drool from the corner of your mouth before you say that...”

“Oh...”

“By the way, Xiaoyun, did the doctor say anything about my condition?”

“Oh, the Doctor said that you’ve been reading too many YY novels and developed a hallucination syndrome, so he told you to study more and read less bossy CEO novels...”

“I didn’t, you backstabbing, backstabbing me again...”

In the distance, Song Zaiyi looked at the two girls who were fooling around. He narrowed his eyes slightly and asked, “Can you really not reveal Chen Shanshan’s condition?”

Ai: “Not for the time being...”

“Can you at least tell me if it’s a good thing or a bad thing?”

Ai: “It’s probably a bad thing...”

Song Zaiyi narrowed his eyes when he heard that and said faintly, “Is that so...”

Ai was also silent.

It actually agreed with what the teacher of the prophecy department said. The guy that Chen Shanshan saw in her dream should be a drifting seed...

Damn it... how could it be a coincidence to encounter such a thing?

There were many ancient creatures in the universe. Some of them grew too fast and exceeded the planet’s endurance. When they destroyed the planet’s ecological chain and ate up all the edible things.., when the planet could no longer meet its daily needs and evolution, this kind of creature would leave the planet it was born on and turn into a meteorite, entering a deep sleep and drifting in the universe.

However, these things were extremely vicious. Every planet would be a catastrophic disaster. For many high-level lords, especially biology lords, they would like these things very much, this was because these drifting creatures were rare creatures with potential. If they could successfully capture them, they could be made into powerful biological weapons.

However, for some new lords, it was not a good thing... . .

Not to mention that the Lord is out of phase, I really hope not in this period of time, after all these D ball people are extremely valuable seedlings... . .

— — — —

At the same time, in the vast sea, a huge whale is floating on the surface of the water, emitting a rotten smell.

And on the whale’s back, an old wizard-like guy sat in the middle, and Li Goudan they parted ways with the mysterious wizard.

At this moment, the transmigrators he had brought with him had turned into dried corpses. Their expressions were ferocious as they scattered around. Their bodies were twitching, and they were still being drained of their last bit of life force.

At this moment, the old mage suddenly sensed something and looked at the sky. Inside his emerald-colored pupils, the reflection was not the blue sky and white clouds, but the endless starry sky beyond the sky.

“Oh... is it finally here?”The old mage’s thin face revealed a trace of a horrified smile.

Chapter 860 Approaching Danger...

“Welcome back, master. Your loyal servant prays for your return every day!”

In the Dark Hall, Kersu’s voice was trembling with excitement. His face was pale like a ghost, and his body was like a skull wrapped in skin. He was clearly extremely weak.

The returning undead saw the mages under his command that were once highly valued. A hint of a smile flashed across his eyes, but he no longer cherished them as much as before.

Kersu was a genius. At least among the aborigines, he was a top-notch talent. After coming into contact with the knowledge of the higher dimensions, he could absorb it as quickly as a sponge and become a good assistant for his own development of civilization.

But now, he had seen even more powerful geniuses. The undead thought of the few outsiders he had met on the island, the wind demon who was so talented that even the members of the Elven Council could not help but coexist with him... "...". And there was not only one such genius, but a group of them.

What an extremely tempting resource...

Kersu knelt on the ground, trembling. The other party did not say anything, and he did not even have the courage to raise his head.

"Tell me about the situation..."the undead Lord said in a low voice, "Where did everyone go?"

Kersu quickly replied, "While you were away, the map of the Black Goat could not be controlled, but the mysterious forces from outside were exploring day by day. In the long run, I was afraid that master's efforts would become the fruit of others, so I ordered people to pay close attention to the movements of those outsiders. Of course, in order to let you return to preside over the situation as soon as possible, Marina and Bengal Goode used the ship of the dead that you once left for me to find your tracks... "...".
"..."

"Marina..."the undead Lord had a faint smile on his face. From the moment he subdued that woman, he knew that she was quite ambitious. However, he did not expect that she actually had the ability to hook up with those existences on the Crystal Island. This really surprised him.

She was a very capable woman, but it was a pity that she followed the wrong person... ..

"How's the evolution of the map of the Black Goat?"

"It's faster than I expected!"Kersu quickly said, "In some areas, mutated creatures above level-4 have already appeared. Many of the former generals in the steel martial imperial capital have already evolved into very powerful species. In order to visit them, we've lost quite a few of the people we sent..." ..

"Level-4..."the undead lord nodded. He had disappeared for less than two years. With the foundation of this world's species, evolving to level-4 was already a very frightening speed.

Kersu continued, "But recently, creatures have begun to reproduce with each other. The rate of growth is extremely fast, especially for the things in the water. The rate of growth has clearly broken the biological chain. If this continues..."

"It's fine... don't worry about this..."the undead Lord waved his hand. "Things like feed, the more the better."

"Feed?"Kersu was stunned.

“You’ll understand soon enough...”the undead Lord smiled but didn’t say much.

Marina wasn’t the only undead that came into contact with the Crystal Island. There were at least seven people, including Alice and Kersu. Marina could collude with outsiders to betray him, and so could the others.

And those people on the Crystal Island could all be very dangerous and terrifying existences.

He had to be vigilant.

Of course, he wouldn’t reveal the true secret of the map of the Black Goat.

Now that he thought about it, the situation here was really strange. A low-level Lord with a mysterious trump card and a group of people with unimaginable talent, a precious disciple who was rushing towards him from the stars in the universe... Those unknown existences who might have escaped from Iceland... ..

It was really not an easy thing to take down this world safely... ..

However, fortunately, the things that he had prepared in advance were not unexpected... ..

At the thought of this, the undead Lord once again looked up, looking out of the sky through the hall...

..

At this time, in the vast eastern sea, countless westerners who had taken out the bounty to open up a route to the eastern sea were in an endless stream. The newly built large ships represented their country as they continuously headed towards this direction.

Of course, exploring the unknown sea area often had unexpected risks. There were very few ships that could safely find the correct coordinates near the steel weapon continent.

At this time, a huge steam engine ship was sailing on the sea after the storm. The crew members on the ship were lying on the deck with exhausted faces, enjoying the calm after the storm.

The storm yesterday was too violent, and even a ship of their tonnage was almost washed away yesterday. It had to be said that no matter how human craftsmanship evolved, it seemed that it would never be able to withstand the roar of nature.

“First mate, look, there... there... There’s a harbor! !”

The bearded middle-aged man who was resting with his eyes closed suddenly opened his eyes when he heard that. A carp stood up and walked quickly to the position of the dragon head.

He took the binoculars from the sailor and through the binoculars, he could clearly see the harbor that his subordinate had mentioned in the distance.

It was an extremely beautiful harbor. The scale was not small, and it was definitely the handiwork of a first-rate empire’s artisans!

And their ship had already left the Western Archipelago’s border a year ago. At this time, it was needless to say that only the east main road’s steel arms empire could have such a large-scale harbor!

Did that mean they had succeeded?

They had successfully opened up a new East Coast Route?

The sailors who realized this situation immediately cheered!

After more than two years of drifting on the sea and several near-death experiences, they finally saw the real rainbow!

“It seems that the coordinates that guy named Henry pointed out are correct!”The second mate said while patting the first mate’s shoulder.

“Quick, go and inform the Captain! !”The first mate said excitedly.

— — —

In the cabin, the captain of the flying Minos was sitting quietly in the dining room, enjoying his lunch elegantly. The scare yesterday made him cherish this peace even more.

Sitting opposite the captain was a thin, pale-faced middle-aged man. If Li Goudan and the others were here, they would definitely recognize that this guy was the captain Henry whom they had saved in the ship?

At this moment, Captain Henry was still as humble as before. He seemed to be flattered that the captain had personally invited him for lunch...

The captain looked at this humble man with a smile and couldn’t help but sigh.

They were both poor nobles, and they were both men who had gone bankrupt and decided to gamble on the sea. The other party’s experience made him feel a little sad.

Especially after the storm yesterday, he was more and more in awe of the sea. Compared to the sea, no matter how big the ship was, it was like a speck of dust, and it could be shattered into pieces at any time, if one day he was reduced to such a state, who could save him?

“Captain!”

Just as the captain was sighing, the sailor outside stumbled in with an excited expression.

“What’s Wrong?”Looking at the excited expression of the sailor, the captain was stunned, and a trace of anticipation rose in his heart...

Could it be...

No Way...

God above, could it be that he was really blessed this time?

“Sir, we’re here, we’re here!”

Hearing this, the captain froze on the spot, and he didn’t even dare to pinch himself, afraid that he would find out that he was actually still in a beautiful dream.

Even if it was a dream, it should at least last a little longer...

While the captain was worrying about gains and losses, Henry on the other side looked calm. A faint green light flashed in his eyes...
