

A Bunch 861

Chapter 861 People Who Shouldn't have appeared!

"Quick, salvage the seawater. Wash your dirty and stinky bodies properly and put on clean sailor clothes. Don't disgrace the Minoan Empire! !"

At this moment, Captain Rove was in high spirits. His face was red, and he looked completely different from the worried expression he had this morning.

The opening of the Eastern Sea and the establishment of a brand new sea route was a great achievement. He, Rove. Kearsy would be recorded in the annals of history. He would become a successful figure in the history of the Empire. The glorious deeds of his life would be recorded in the textbooks!

This was something that made people even more obsessed than wealth and power!

"All of you, be diligent, bastards. I want to see that the deck is spotless. If I smell your feces and urine again later, I'll throw you into the sea!"

"Big Worker, quickly take out the wax and polish the deck. Where's the red carpet? Quickly put it on. Oh, right, and my seal, help me look for it!"

After a flurry of scolding, the ship suddenly became chaotic.

What they did not expect was that their chaotic appearance had already been clearly seen by the people at the port... ..

"D * mn, doesn't this ancient ship have a toilet? They actually poop on the deck?"The little fairy with athlete's foot stared blankly at the image transmitted by the nanorobots.

Candy Bean pursed her lips. "Do you think it's the luxurious cruise ship on D Ball? A private room with a balcony? And a toilet? Then only the captain and the first mate get the treatment, okay? Let me tell you, if the ship swims to some ice regions, you have to be very careful when you poop. Otherwise, you will get hard before you poop out. If you forcefully break it, your anus will be damaged... "..."

"Damn... This scene sounds very exciting!"The little fairy said excitedly.

Candy Bean:"..."

Ice Cap, who was at the side, laughed and said, "I didn't expect that our ship wouldn't come back yet, but we would have to wait for outsiders. If I had known earlier, I wouldn't have been in such a hurry to let Goudan go out to sea. When they come, wouldn't it be much more convenient to use their route?"

"Eh?"

While everyone was chatting and laughing, Lei Xue suddenly stood up!

"What's Wrong?"Ice Cap and the others looked at Lei Xue's abnormal expression and were puzzled.

“That person...” Lei Xue pointed at a thin and weak middle-aged man in the picture nervously. It was Henry.

“What’s wrong with him?” Ice Cap saw Lei Xue so nervous and said with a serious expression.

“How could it be...” lei xue muttered, “How did he get out?”

“What’s going on?” Candy Dou couldn’t help but frown.

“Didn’t we enter a mysterious island by mistake?” Lei Xue quickly explained, “On the way there, we saved a person. Through that person’s diary, we learned about that island. He seemed to have gotten out by luck, but after we entered that mysterious island, he disappeared...” “...”

Everyone:” ...”

“You mean the Iceland where the shadow would kill people?” Candy Bean suddenly became serious.

They remembered that when Li Goudan went missing, the Overlord had personally gone to look for him. Moreover, they still hadn’t found the exact location of the Iceland!

Through Lei Xue’s description of their experience, they felt that it was more exciting than a ghost story.

How could this guy run out of such a strange place twice?

Even with his butt, he knew that this guy was abnormal!

Just as they were thinking, something strange happened...

Henry, who was originally on the ship, suddenly looked at the screen. His eyes slowly turned green, and he looked at them with a strange expression, as if he could see them through the screen!

“Is he... is he looking at us or the robots?” The little fairy stammered.

“No matter which one he looks at, it’s not normal!” Candy Bean frowned. “How can you see with the naked eye like a nanorobot?” The natives here were only level 0 lifeforms, slightly better than the overall quality of the D sphere. Logically speaking, the material eyes of a micron could no longer be seen. How could the nanorobots see clearly without the standard of a level 3 wind demon

Everyone nodded when they heard that. Moreover, no matter how they looked at the other party’s bewitching eye color, they felt that it was abnormal. Even if he had blonde hair and blue eyes, how could his eyes be as green as Opal?

It was terrifying to look at...

As expected, the next second, they saw Henry suddenly reach out and grab the nanobot. The screen instantly turned black, and they lost sight of Henry’s Room!

Ice Cap suddenly stood up when he saw this!

“Dispatch the Weihai and the sunrise to intercept the ship and report to base for backup! !”

Icecrown is not careless, although the other side is a backward steam engine ship, but he did not hesitate to mobilize the force of the only two armed ships, and asked for support.

He was an experienced old Navy man who had served seven ships in the past 40 years. He had been a sailor all the way to become a famous first mate and had seen all kinds of ships, but he had never seen such an exaggerated one.

Looking at the steel behemoth that was slowly approaching, everyone felt their mouths go dry and their legs tremble.

“Boss, the steel arms empire can actually build steel ships?”The boatswain stuttered to the burly man.

“Steel ships?”The first mate’s face twitched. This was a freaking steel ship? It was clearly a castle, alright?

When he was young, it wasn’t as if he had never been to the eastern continent. Their ship skills couldn’t even compare to the red tower kingdom, which was at the lowest end of the Western archipelago. In just a few short years, weren’t their evolutions a little too exaggerated? They could actually create such a monster?

The huge body of the ship and the exaggerated cannon on the deck were like a steel beast armed to the teeth. He had never seen such a ship that made people lose the courage to fight just by looking at it.

“What’s going on?”The captain, who was dressed like a dog, hurried out. When he saw the scene in front of him, his legs went weak and he fell to the ground.

“What... What is this thing?”

Everyone looked at their captain, but no one could give an answer... ..

The ship stopped 50 meters away, and countless steel cannons were aimed at them. The exaggerated cannon barrels made people’s scalps go numb, especially the main cannon barrel. It felt like an elephant could fit into it.

“Raise the white flag, raise the white flag! !”The captain hurriedly shouted.

The first mate and the others were stunned when they heard that, and they quickly moved. Although the captain was so arrogant that he did not have the backbone of a noble, he was extremely glad that his captain was a coward, if he gave the order for the sailors to fire the cannons, he would definitely stuff his entire body into the cannon barrel.

What a joke. He even felt that they did not even need to fire the cannons. If they were directly crushed, they would instantly be crushed into dregs!

“Friends, please stop. We Are Friends of the Steel Arms Empire in the west. We are here to do business with sincerity and goods, not to fight...”

The captain hid behind the deck, raising the white flag and shouting.

However, the ship on the opposite side didn’t move. It didn’t make a move or respond...

Inside the ship, the little fairy looked at the white flag that was flying up and laughed, “You are so fast!”

“Of course...” . “From the surveillance footage just now, other than that Henry, the others are obviously ordinary natives of the west. When they encounter a warship that is beyond their knowledge, this kind of reaction is normal, okay?”

“Not necessarily...”Lei Xue shook her head at the side.

“What do you mean?”The ice cap asked.

Snow said, “That guy named Henry. When we first saved him, his performance was no different from an ordinary person. The monsters on the island are very powerful. When you pretend to be an ordinary person, you can’t tell the difference...”

She thought of the last wizard. Who would have thought that he was that kind of person at the last moment?

“What should we do now?”Ice cap frowned. “It’s not a big deal to keep confronting them like this. Let them surrender and capture that guy named Henry?”

“Don’t!”Lei Xue’s face changed, and she immediately stopped him. “If Henry is up there, it’s very likely that the monsters on the island are also up there. Those monsters are very strange. It’s easy to fish in troubled waters with more people. Once we let them sneak into our ship, or even our city, it’s basically impossible to find them again!”

Everyone:” ...”

Little fairy: “Is it really that mysterious?”

“Then... drive them away directly?”Ice Cap said hesitantly.

If it was possible, she actually didn’t want to do that. This ship from the Western archipelago was obviously here to open up trade, and it was just right for her to get information about the current Western archipelago through them, this would be very useful for opening up trade routes or doing other things later on.

However, if there really was that monster that Lei Xue mentioned, the risk was too great!

“We can’t chase it away...”Lei Xue shook his head. “We can’t guard against it day and night. What if it sneaks up from somewhere? Since we’ve encountered it, I suggest we destroy it directly!”

“This...”everyone was stunned when they heard that. To start a fight without a word, should they say that they were indeed people from the army?

Ice Cap looked at candy bean. Candy Bean was also a little dumbfounded. Although they had grown much more than before, and when they calculated their gains and losses, they were not inferior to some top politicians. After all, they were just ordinary people in the past..., they were still somewhat hesitant to do such a reckless thing like killing their families.

Just as they were hesitating, the intelligent voice suddenly sounded. “Headquarters has sent out a transmission request!”!

Ice cap hurriedly said, “Open the channel!”

Then, a bright light flashed, and a large group of people appeared outside the teleportation device in the cabin.

The leader was naturally Guo Xiaoyun. At this moment, she could not contact the lord, so she brought along all the best fighters in the base, including the Level Seven Green Titan's chief instructor and the only mecha trainer who had a battle mecha.

The top ten players on the battle rankings were basically all in place, and they had even called Isabelle and Alice... ..

Looking at this lineup of Ice Crowns, she did not feel at ease at all. She hurriedly asked, "Where is Lord Leader?"

Ever since the last time when the players in the steel martial empire were almost completely wiped out, they were not that confident in their own combat strength. And in the entire force, only the leader was invincible... ..

Whether it was the terrifying object that tore space apart on Mars or the ancient godly king in the Kunlun mystical realm, the leader seemed to have never lost... ..

Guo Xiaoyun said lightly, "The leader went out and won't come back for a month or two. Now, we can only rely on us here..."

Bing Guan:"..."

"What's the situation now?" Guo Xiaoyun asked.

Hearing that, Lei Xue quickly explained the whole situation briefly.

"From that island?" Guo Xiaoyun's face immediately tensed up after hearing that!

After Lei Xue came back to report the situation, the leader had mentioned it to him. He told him that the island that Lei Xue entered was a very scary place, the monsters in there, especially those shadows, were very troublesome existences. Any one of them probably had the ability to destroy the world.

Although the leader was unreliable on a daily basis, he would not deliberately scare himself with such a thing. If he said it was that serious, it might be that serious.

"Fire!" Rainless melon thought for a few seconds and immediately made a tough decision!

Sugar Pea looked at Icecrown and Icecrown nodded. Rainless melon was the first developer of the base. After the Lord left, the person with the highest authority in the base was the Lord. As far as he knew, the Lord had the right to sign and approve the application for the resources of the civilization, since she had said so, he naturally couldn't object.

After receiving Ice Cap's signal, Sugar Pea immediately opened the virtual screen and unlocked all the firepower, including the most powerful arcane plastic energy cannon on the ship!

Since they decided to exchange fire, then they should try their best to destroy it in one shot... ..

But when she ordered them to aim and fire, something strange happened!

Chapter 863 Inorganic Rebirth!

“What’s Wrong?” Rain girl asked with a frown when she saw that there was no movement.

Candy Bean stood there in a daze, his face full of disbelief. When he saw rain girl ask about it, he immediately switched on the shared view, and everyone saw the situation on the deck.

The countless steel cannons on the deck suddenly softened like melted ice cream, and one by one, they collapsed to the ground like mud. Then, something even stranger happened. These cannons slowly began to squirm.., they slowly turned their heads like snakes. The muzzles turned toward the cabin and suddenly pounced on the crew members on the deck who had not reacted in time!

“F * ck...” Pu Yunchuan was the first to utter uneducated and vulgar words.

“What the Hell Is This?” Wang Goudan was also stunned. Leng Xing, who was beside him, directly shielded Goudan behind him. He could feel that this strange situation was very dangerous!

Those experienced instructors were also shocked. They had never seen such a method of directly converting inorganic substances into organic substances.

“Intelligence?” Guo Xiaoyun saw that the instructors were dumbfounded and immediately asked about intelligence.

However, they didn’t get a response...

“Intelligence?” Guo Xiaoyun frowned. When she opened the system, she found that the system was still working normally, but the intelligence didn’t respond no matter how she called it!

What the hell is going on?

Call a few times did not get a response to Guo Xiaoyun heart a chill to the extreme... . .

On the other side, Henry on the flight looked at the opposite ship with a sneer.

“Yunmu steel arcane system structure, third-class Naga civilization ship, yes, it is really a narrow road enemies...”

At this time, Henry looked even scrawnier. Such a strange sneer was like an evil ghost. If marina was still alive, she would definitely recognize this voice.

It was the guy who had modified Marina’s biological ship and forced Li Goudan and the others into a desperate situation.

Unexpectedly, he also came out with Henry’s body.

“I have to collect some interest...” Henry laughed strangely. Just as he was about to make a move, he suddenly seemed to sense something and looked in the direction of the opposite ship.

In his view, a silver light that was faster than the speed of light flashed and left the ship without hesitation!

“What’s That?” Henry frowned. After taking a look, he realized that he couldn’t recognize what the other party was. It didn’t look like a machine or a creature. It didn’t even have anything to do with the elements.

This small Lord faction really had some secrets... “...”. Henry sneered.

On the other side, the silver light quickly ran toward the Martian base. If one looked carefully, they would discover that this thing was the original body of the intelligent exploration of the New World.

“How can there be such a thing?”

As the mysterious race, it had determined the opponent’s identity the moment the ship’s hull changed. It was at least a top-tier level-16 biological lord!

The opponent’s technique was a complicated technique from a level-15 biological civilization. It was called the inorganic reincarnation project. It was created by the famous necromancer Sandro Perion. The structure of the technique was extremely complicated. At that time, the top-tier biological arcanists in the opponent’s force could easily turn high-level mechs and spaceships into living creatures for their own use. It was a popular technique in the federation for a time, countless level-18 mechanical lords were beaten by this tactic until they could not fight back at all.

It was even listed as one of the forbidden spells, but it was still used by many crazy undead lords. It was not until the seventh Lord, Hasselind, created a counter-arcane device that the disturbance of the universe activation was quelled!

At present, this technology was only passed down in a few top biological academies. The level requirement for the initial learning was level-12...

However, this technique required an extremely complicated array formation. Ordinary Arcanists could only set up an array formation in their mage tower in advance to erode the foreign invasion.

However, it was different just now. AI clearly saw the process. The opponent directly changed the arcane structure of the ship, instantly forming an extremely complicated array formation. Even though it was a basic activation spell.., but this was definitely something that could only be done by a level-16 biological civilization equipped with the realm of gods.

How could such a terrifying guy suddenly appear on such a low-level planet?

Could it be the undead Lord from before?

The intelligence did not dare to delay. It had to quickly contact the lord. If it could not contact him, it had to immediately announce the evacuation of the D Ball Players in the new territories and return to Mars. Then, it had to conceal the space gap and wait for the return of the Lord... ..

As for rainy girl and Wugua...

It could only give up!

..

On the ship, Guo Xiaoyun saw that AI did not respond and immediately turned to candy bean and said, "Manually activate the teleportation device and evacuate immediately!"

She was not a reckless person. There were currently undead in the new territories that could really kill players. In such an incomprehensible situation, the best way was to hide from the situation for now.

Upon hearing this, candy bean hurriedly activated the teleportation device.

However, as she entered the program, she discovered that the teleportation device did not respond at all. In the next second, the teleportation device began to change as well. The metal on the device quickly disintegrated, turning into a centipede-like iron bug, in a short while, it disintegrated into a group of iron bugs that charged towards everyone.

Leng Xing, who was the first to react, shouted coldly. He took out a long spear from his storage space, and his muscles jumped. The long spear in his hand immediately turned into countless silver lights, enveloping the group of insects like a dense cluster of stars, in an instant, countless iron bugs were crushed by him!

"Oh? ?"

Henry, who was watching this scene from afar, was surprised. A hint of excitement appeared in his eyes as he muttered, "What a high-quality Green Titan!"

As a Lord of the biology department, he was extremely sensitive to the level of creatures. He could sense that the Green Titan was only level four. However, the level four Green Titan was actually able to use such a physical skill, regardless of whether it was the function of the body or the proficiency of the gun skill, it could be said to be perfect!

This reminded him of the wood elf wind demon he had met on the island!

They were both cheap ancient genes, yet they both had such high-quality genes. This little lord really had a secret!

At this moment, on the deck, looking at the strange changes on the opposite ship, the crew members of the flying ship were all dumbstruck. They couldn't help but think to themselves, "What's going on?"?

To them, the scene before their eyes was no different from destroying their worldview. The cannon that had been menacing just a moment ago had suddenly turned into something like a snake. It began to devour and bite the crew members on the deck.

The first mate looked at this scene and could not help but mutter, "Oh my god, I must have not woken up!"!

Henry was not interested in the thoughts of the crew members of the flying ship at all. In his eyes, these people were not even qualified to be blood food. He was now completely focused on the Green Titan.

His skinny fingers quickly made some gestures in the air. In the next second, the long spear in Leng Xing's hand suddenly became active, and like a poisonous snake, it turned around and pounced on Leng Xing's Head!

Chapter 864 Is This for real?

When fighting, be wary of anything you can be wary of. Don't trust your weapon too much... ..

This was what Leng Xing had taught his master when he was an assassin. He had taught him that a gun would explode and jam, and a cold weapon would collapse due to external or internal reasons, once this happened, a weapon would turn from a handy tool into a sharp weapon that could hurt you. Although the probability of such a thing happening was very small, once it happened, the chance of getting hit was almost 100% !

However, his master had said that an excellent assassin was not allowed to have accidents!

Therefore, his master would prepare a gun that could explode every day. He would wear gloves and face guards. He had experienced that feeling countless times. When he pulled the trigger, the gun would explode.

When he was familiar with that feeling, his master's test was upgraded. When he was on a mission, he would change a gun that could explode from time to time. This made him develop a habit of not trusting weapons, whether it was cold weapons or hot weapons.

So when the gun in his hand suddenly bit at him like a snake, although it was against common sense, he still reacted immediately!

Within a thousandth of a second, the muscles on Leng Xing's body reacted reflexively. He let go, slid to the back, and jumped!

In one go, without the slightest hesitation!

With a bang, the steel spear was smashed into pieces by his punch!

Leng Xing's advanced fist technique was learned from the martial monk instructor in the base. It was a kind of truth fist technique that used the -LSB- eye] to jump and destroy the structure. This thing was a high-end fist technique, and up until now, he had only learned the rudiments.., however, it did not stop him from breaking his weapon. When he was forging his weapon, he had asked the panda in the base to give him a complete forging blueprint. He had asked for a detailed steel-making structure, he wanted to let him know where the eye of his weapon was.

It was also because of this that his reaction of breaking his weapon caused the faces of the surrounding combat players to Twitch.

Henry, who saw this scene from afar, had a look of amazement on his face as he muttered, "It's simply perfect..."

His functions, skills, alertness, and decisiveness had almost reached the pinnacle of life forms at this level. Even the direct descendants that were nurtured by large clans could not compare to this guy, if it was when he was still a lord, he would definitely spend a lot of effort to nurture this guy!

In just a split second, Henry had placed the other party on the live capture list.

It was too much of a pity to kill such a young seedling...

“Cold star? How are you?” Wang Goudan worriedly rushed forward.

Cold Star looked at his fist, which had been slightly damaged due to his exertion of force. He frowned slightly. This kind of fist technique was indeed not suitable for someone of his level. With just one punch, the flesh on his entire arm had split open!

The few combat players in the surroundings did not look too happy when they saw this. Most of the players here were specialized in weapons. There were very few who were as proficient in weapons and fist techniques as Leng Xing. Although the combat class was a basic class., there were also very few who knew how to use collapsing fist like Leng Xing.

The problem was, how could one fight against these metal bugs without using a weapon? If he used a weapon, would he be able to defend himself if the weapon backfired on him like Leng Xing did?

Just as everyone was in shock, rain girl, Wu Gua, who had been silent the whole time, looked at Leng Xing's wound and suddenly said, “Leng Xing, can you use that fist technique again?”

Leng Xing was stunned for a moment. He looked at her and his eyes lit up. “Have you thought of a way?”

“Maybe...” rainless melon didn't finish her sentence.

“But... Leng Xing, one more punch and you'll be crippled!” Wang Goudan quickly said, “How about someone else...”

“No one here knows collapsing fist...” rainless melon shook her head and said, “Even if they do, no one would like to find out the weakness of their weapons in advance like your man.”

She had always been concerned about the number of high-end players in the base, so she knew about cold star. and in the entire base, he was the only one who knew how to use high-end collapsing fist and deliberately let the designer leave a clear weakness!

She had always thought that this guy was weird and perverted, but it was not until this incident that she changed her mind. Sometimes, this kind of overly careful preparation was not a bad thing!

“But his hand...”

“If his hand is crippled, he can go back to the base to be cured...” rainy girl, Wu Gua, interrupted her, “But if he dies, then there's nothing left. The base's regeneration device might not be useful this time...”

Everyone:“...”

“Don't scare me, Boss!” Wang Goudan immediately put on a sad face.

Hearing this, Leng Xing no longer hesitated and directly pulled out a short sword from his dimensional pocket!

Rainy Girl's eyes turned pure blue the moment the other party took out the sword. At that moment, everything in her field of vision turned into particles.

Eye of truth!

One of the skills that alchemists could learn in the early days was the most basic thing an alchemist could learn. It was a skill used to see through the essence of material changes in the world. It was also a basic skill that alchemists needed to learn when they were carving alchemy arrays.

Henry, who saw this scene from afar, was immediately amused. This little developer was quite interesting... ..

From the very beginning, he had noticed that this little guy had been using the eye of truth to observe the structural changes of his activation skill. At that time, he had been curious about what the other party wanted to do. Could it be that he wanted to solve all of this on his own?

Should he say that those who did not know were fearless?

The threshold for alchemists was extremely high. Level five was only the entry level. Only those who had advanced to level five would have the basic spiritual power to open the eye of truth. They would also have the foundation to independently create alchemy arrays without relying on templates.

However, that was only the entry level. It was equivalent to you only learning addition, subtraction, multiplication, and division in mathematics, and only learning the periodic table of elements in chemistry. The structure of a spell was made up of countless formulas, and this activation spell was even more so.., as a top-tier technique derived from a level-16 biochemical civilization, its complexity was definitely not something a newbie could understand.

In the top Biology University of the Northern Star region, the activation technique course was divided into more than 4,000 classes. The learning period was as long as 30 years. Even the basic activation technique that he was currently using required a year's worth of lessons!

This was under the premise that he had to have a certain level of biological alchemy foundation.

This little kid actually had the thought of cracking his formula in an instant. This made him feel funny, but at the same time, he also had the thought of teasing him.

Thus, without hesitation, after Leng Xing pulled out his long sword, he continued to attack with the original version of the technique without making any changes. He just wanted to see what this little girl had seen.

On the other side, after Henry's technique was used, the sword in Leng Xing's hand suddenly softened, just like before. He turned his head and pounced on Leng Xing.

Just like last time, Leng Xing shattered the sword with one punch. He did not switch hands, afraid that he would not be able to maintain the same strength and the attack would collapse, resulting in an accident. However, because of this, the muscles of his entire hand were completely split open, and a

large amount of blood gushed out, one could even see the exposed bones from the upper part of his mouth.

This scene caused Goudan's heart to ache greatly. Meanwhile, Leng Xing looked at rainy girl, Wugua, with a face full of anticipation.

After rainy girl, WUGUA, watched the entire process, she closed her eyes and pondered for about 20 seconds. Then, she took a deep breath and said, "Cover me and go to the deck! !"

These words made all her companions look happy, but Henry, who was in the distance, had a stunned expression on his face... .

Could it be true?

Chapter 865 The Only Chance!

The deck was now in a mess. Under the original flexible docking and loading structure, there were quite a number of turrets on the ship. After being activated, all of them had become metallic living things, without any warning, many people were bitten to death immediately.

Moreover, the lethality of these mutated cannons was not weak. Although they were not able to release their firepower like thermal weapons, they seemed to be able to convert the firepower into mobility in a strange way. The power was astonishing, with a single collision, one could see some of the crew members being smashed into pieces!

One had to know that many of the sailors on this Weihai warship had been strengthened. Most of them were at level 1. They were top-notch crew members trained by the ice crown. Their physical strength could not be compared to the D ball players, but they were at least at the level of a Silver Knight, on the D Ball, everyone was an existence that could pick off two American captains!

But in front of those mutated metal objects, they could not resist at all!

A group of players escorting rainy girl and melon-less came out and saw this scene. They were all terrified!

In the end, after a short discussion, the players decided to let the elf players carry rainy girl and use their agility to avoid those mutated objects.

Hence, this mission was handed to Chen Yutong, who had the highest agility attribute... ..

As the only phantom assassin in the base, Chen Yutong had the highest basic agility. In terms of techniques, he was on par with Leng Xing several times. He was the best candidate.

Meanwhile, a few agile players followed closely behind and acted as escorts to act as a cover, trying their best to clear the obstacles for Chen Yutong.

The reason why they chose agile players was because they had no choice. Originally, this kind of cover was more suitable for the Green Titan, who had a strong physique and explosive strength. However, the

strength of this strange mutated object was unknown now., it was completely uncertain whether the Green Titan players could withstand it.

According to Rainy's guesses, the opponent's strength clearly did not belong to this world. It was highly likely that they were undead forces. Dying under their hands would not allow them to be reborn.

Under such circumstances, it was necessary to cover their weapons. However, among all the Green Titan players, only cold star's collapsing fist could deal with their weapons the moment their weapons rebelled. The others did not possess such an ability.

In such a situation, they could only go up to the elves. If the elf players rebelled, at least it would not be a big problem for them to dodge the weapons themselves.

Thus, the five-man team of elves stepped onto the deck with everyone's Hope!

"Elves?" Henry narrowed his eyes in the distance. He thought of the wind demon he met in Iceland. His heart moved, and his skinny fingers lightly tapped on the dining table, all the mutated turrets on the deck in the distance instantly stopped their pursuit of the prey in front of them. They turned their heads to look at rainy and melon-less.

The metal turrets twisted into soft bodies and stared straight at them. It made people feel extremely strange and goosebumps appeared on their skin... ..

Boom!

In the next second, all the turrets were like elongated noodles as they pounced on the five of them at an extremely fast speed. Under the conversion of the energy from the turrets, they were even faster than bullets!

The five of them instantly split up, dodging the first wave of pouncing attacks. Following that, their bodies were incomparably light as they dodged the violent attacks. No matter how fast and violent those mutated bodies were, the elf players were like dandelions., facing the barrage of attacks that were as airtight as a bullet rain, they were able to forcefully find a series of air attacks and floated out lightly.

This scene caused the Green Titan players in the distance to cheer in their hearts. They could not help but think to themselves, "F * ck, they are really graceful. If I had known earlier, I would have played the elves as well...".

Henry, who was in the distance, was even more shocked. The movements of these elves did not seem like a group of Level 4 lifeforms. In terms of speed, it was likely that even the fastest assassin clan in the federation could not compare to them, the key point was that they were not as extreme as the assassin clan. When they dodged, they displayed an excellent sense of balance. Clearly, their body attributes were very average. Their basic attributes were at least comparable to the starlight elves who were around Level 6!

This was definitely the highest quality wood elf. It was exactly the same as the wind demon that he had seen back then!

What was the situation with this force? Forget about the Green Titan. Why was even the quality of the elves so high? What secret did that guy have?

In their confusion, the five elves had already brought rainy and melon-less to the main cannon. The process was smoother than expected. They did not even draw their weapons... ..

Henry hesitated for a moment when he saw this scene. He could actually increase the speed and intensity of his attacks. After all, the energy on this ship was sufficient., without considering the consumption of the cloud steel, forcibly increasing the strength and speed of these mutants could more than double.

But in this way, these level three or four elves definitely would not have any chance of survival.

He wanted to see how the little developer planned to break his spell...

Of course, the reluctance was also a major reason. It would be a pity to kill such a high-quality elf. It would be best if they could kill their lord and change their contract, if they couldn't, they could also be made into high-quality undead puppets.

Therefore, after the opponent approached the main battery, Henry didn't choose to change the formula to increase the attack power on the deck. Instead, he looked at them through the view of the main battery with interest, he did not even let the main battery resist the harassment.

If the enemy wanted to turn the tables, the best hope was to let the main battery recover its function, because it was the most powerful single-target weapon on the ship. With Henry's current physical condition, he would not be able to withstand one shot from the arcane cannon, but he still did not stop it, because he did not believe that a level-five developer could do this!

"Yu Tong, watch closely. If that thing tries to pounce on me, remember to pull me away as soon as possible!" Rainy Girl said as she took a deep breath.

Chen Yu Tong was amused when he heard that. "So You're nervous too?"

"Bullsh * T!" Rainy Girl rolled her eyes at him. She was not someone who had been through hundreds of battles. Of course, she would be nervous about such things.

"Don't worry, you're my boss... Who Am I going to hang out with after you're Gone?" Chen Yu Tong said with a grin.

"It's good that you know..." Rainmaiden Wu Gua said coldly.

As a lone wolf player, Chen Yu Tong's talent was the reason why he could remain in the top three. However, if he did not have the resources and money to train, it was impossible for him to keep up with Leng Xing, who had the support of the Goudan family.

And Rainmaiden Wu Gua was Chen Yu Tong's supporter... ..

"Boss, are you confident?" Chen Yutong asked solemnly.

"No..." rainy girl, Wu Gua shook her head. "We'll know once we try..."

She took another deep breath and slowly leaned forward. Gathering her spiritual power, she activated the eye of truth once again. As the eye of truth was activated, she could clearly see the changes in the structure of the main battery.

The countless gear-like structural changes in the past were disrupted. The elemental structure showed a pattern that she could not understand at all. However, she had seen the overall structure of the ice crown force, the mighty sea. With the powerful memory of the developer..., she remembered every detail. This also allowed her to see every detail that had been changed!

However, the more this was the case, the more amazed she was at the other party's handiwork!

Looking at the structure, every place that had been changed looked chaotic and strange, but it was full of details. Every elemental line was extremely exquisite, grafted with a pattern that she could not understand, forming hundreds of millions of different energy circuits, finally, there was a change in the essence of matter, which realized the incredible reality of turning inorganic into organic.

Seeing this scene, she knew that in terms of knowledge, the other party had definitely reached an unimaginable level... ..

Thinking of this, rainy girl closed her eyes and recalled what the alchemy instructor in the base had taught her... ..

Chapter 866 Success...

To be honest, rainy without melon wasn't sure if the words of the teacher in the base were effective. From the structure of the refining array, it was like the difference between multiplication mnemonics and quantum mechanics... ..

Those teachers in the base were probably nothing compared to him!

But at this moment, the words of the alchemy teacher in the base had become her only life-saving leverage, and also her only chance... ..

Rainmaiden wugua closed her eyes and recalled what the alchemy professor had said to her... ..

She remembered that at that time, she had become interested in the energy and substance of the alchemy potion. In the field of alchemy, it seemed that the direction that the potion could change was easier than other substances, because the structure of living things was active, it was more unstable, which was why biological alchemists could often change an object to an exaggerated extent through the alchemy array.

However, this kind of thing was not irreversible, because no matter whether it was living beings or other substances, they all had a fixed structure memory. If you forcefully changed its structure through alchemy, it would be easy for it to collapse, once there was a problem, it was easy for the structure to collapse.

When alchemy collapsed, the attached object only had two choices. The first was to collapse together with alchemy, and the energy contained in the object would be instantly destroyed and scattered, thus volatilizing to the natural world. The other was to go back..., according to the object's memory of its

previous structure, after the spell that controlled it collapsed, the object had a certain probability of returning to its original state!

In order to achieve this effect, some guidance was needed.

And in the alchemy world, the simplest way to guide the essence of an object back was to return the variable to its normal state, returning to its original value!

Thinking of this, Rain Maiden Mugua concentrated her spiritual power. As her eyes lit up, an almost transparent figure slowly floated out of her body, and then plunged into the interior of the main cannon!

The few elven players who saw this scene were stunned. They thought to themselves, what is that? Is it an out-of-body experience? F * ck, a developer has such a skill?

In the distance, Henry's pupils constricted. This was one of the basic alchemist skills: Psychic. Generally, it was not recommended for beginners to use it because of the huge risk. This made Henry think to himself, this little developer is really daring.., such a fragile spiritual body, he actually dared to dive into such a complicated energy domain after just taking shape!

At this time, no one outside could see the risks that rainy without melon was facing. Only Henry knew that rainy without melon was like a butterfly in a storm, ready to be torn to pieces at any time.

Rainy without melon's psychic entered the energy domain and quickly floated toward the destination. At this time, due to the change in the structure of the object itself, although it still looked stable, there was a faint surge of energy, it made her psychic feel a sense of trepidation at any moment!

Suppressing the fear in her heart, raingirl without melon quickly approached the nodes in her memory. After arriving at one of the nodes, raingirl without melon's hands emitted a faint light as she quickly wrote a complicated formula.

As the formula was embedded, the energy of that node was changing visibly with the naked eye. However, although it was changing, the whole thing did not turn violent. This caused Henry, who could see everything from afar, to almost stare with his eyes wide open.

He could clearly see what rainless melon had done. However, it was because he could clearly see and understand that he felt that it was incredible!

The other party was using his own tactic!

No... ! ... It could not be said that it was entirely true. It should be said that the other party had deduced his own formula for calculating variables!

It was true that the overall structure of the activation technique was extremely complicated. However, when using this entire set of formula to change a substance, the first tactic was something that he had temporarily written by hand. It was a tactic for calculating variables. Although it was not complicated.., but how did the other party deduce it?

Just because he had seen the process of changing the structure of the Green Titan weapon twice?

No Way?

Henry's eyelids twitched. This computing ability was a little exaggerated. It was rumored that the developer's computing ability was more than ten times that of a spiritual power professional of the same level, and some were even dozens of times.., this caused the developer civilization to almost reach a limit in terms of technology. Now, the overlapping of multiple planes in the universe was the handiwork of this race back then.

However, fame was not as good as meeting face to face. On the market, those who could activate 40% of the developer's genes were popular students, and many institutions of higher learning were fighting over them, however, even those favored by the heavens should not have this kind of computational ability when they were at level five, right?

Could it be that this force could even activate the developer's quality...

At the thought of this, Henry's heart was burning with passion. He stared straight at Rainy without a word, his face full of anticipation!

Rainy without a word naturally did not know that she was being stared at by a certain dangerous existence fanatically. At this moment, according to the situation in her memory, she quickly flew to different nodes and used the formulas in her hands to change the variables, and as the variables changed, the original structure of the spirit domain began to undergo an earth-shaking change.

And this change made Henry even more excited!

The change of the main cannon was going back to the original unactivated structure!

What did this mean? This meant that the little girl not only deduced her own variable formula, but also remembered the variable values of each node of the main cannon!

When he thought of this, he was both excited and incredulous. Although the main cannon was only the elementary arcane structure of a level three civilization, the energy nodes formed were also in units of hundreds of millions, and the other party actually remembered all of it!

Every variable value was remembered, and this exaggerated memory and memory extraction ability was undoubtedly a genuine developer!

At this time, Rainy's actions were getting faster and faster. In the medium state, she was like the speed of light shuttling through the realm, changing the variables in every node without a single error, without a single variable value error!

This also caused the entire structure to start backtracking smoothly. This scene made Henry so excited that he immediately stood up!

He made a decision in his heart: he definitely had to snatch this developer!

On the other side, on the physical interface, Doggie and the others saw with their naked eyes that the huge turret was slowly returning to its original state, and they were all excited as well.

Although they didn't know what exactly happened, one look and they could tell that big boss Raindrop's actions had taken effect!

After a few seconds, the entire main cannon was completely restored to its original state. The huge cannon barrel was pointed straight at the backward steam engine ship in the distance!

In the crowd, Alice's eyes flashed when she saw all of this. She took a step back slightly, and no one knew what she was thinking about.

In the next second, rain girl, Wugua, who was originally in a daze, recovered her expression. However, she looked very dispirited at this moment.

"Ice Cap, Fire!" Rainy melon shouted as soon as she recovered.

Sugar Pea didn't wait for ice cap's order and immediately started the main cannon program!

In the distance, seeing the arcane energy gathered by the huge cannon tube, Henry, who was excited, froze. He smiled bitterly and said, "F * ck, I was too engrossed in watching that girl..."

Fire!

With Sugar Pea's order to unlock the cannon, a huge arcane beam shot out. In an instant, the light covered the entire sea area. In the next second.., in the distance, the flight disappeared with hundreds of nautical miles of water under the baffled expressions of the crew members!

Chapter 867 There's something wrong with her!

"Did we succeed?" The players looked ahead in shock.

As the ship across the sea evaporated, the turrets around them seemed to have returned to their original state. No one dared to make a sound under the white light.

Rain Girl, Wu Gua, also looked ahead in shock. She could not believe that such a complex alchemy-type existence could be destroyed so easily?

Wasn't it too uncool?

"Captain... Captain..." the first mate was the first to come back to his senses. He pointed at the towering waves in the distance and stammered, "Water, the water is coming!"

Everyone looked up. Because the seawater had evaporated instantly, the seawater in the distance was pouring back. It was like a disaster-level tsunami!

The sky was filled with white light and the seawater poured back. It was like the end of the world...

"What should we do? Jump?" Wang Goudan said with an eager expression.

"Jump into the mud..." everyone immediately rolled their eyes. The seawater was poured back in, and the sea area within a few hundred miles was instantly filled back up. Who could withstand such a scale?

"Let's try activating the energy shield..." rainy girl said weakly.

Candy Bean hurriedly activated the energy shield with his hands. With a Ding Dong Sound, the energy device that had already been activated in the cabin instantly began to operate. A transparent bubble-like barrier instantly spread out, protecting the entire ship!

The high-quality energy field was extremely effective in the face of this terrifying tsunami. The entire ship seemed to have been pulled into it, but the people on the deck did not feel much turbulence under the protection of the force field. A soft magnetic field fixed everyone, making them feel like they were riding a 3D roller coaster. The scene seemed exciting, but the degree of turbulence was far from being comparable to a real roller coaster... ..

The energy shield seemed to have completely recovered...

Rainy girl thought to herself as she played around, "Is it really solved?"?

About an hour later, the sea slowly returned to calm, and the port was not affected too much. The port had a storm release device, so the seawater did not rush into cloud city due to the inertia.

After the recovery, the sea was calm. Coupled with the clear weather, it was as if everything just now was an illusion.

However, the shattered flesh on the deck was a horrifying reminder of what kind of danger they had just experienced.

"Let's leave this place first!" Rainmaiden Wugua looked at the place where the flying ship was just now again. Her powerful mental strength couldn't detect anything, but in the end, she didn't dare to stay here any longer.

Hearing this, sugar pea quickly nodded and tried to open the teleportation device manually.

"The teleportation device is ready..." sugar pea quickly said.

"Let's Go..." Rainmaiden Wugua stood up unsteadily and said.

Chen Yu Tong immediately stood up and helped her up.

"You guys drive the ship back to the port and inform the guards in the city to guard all the positions of the port. Once they discover anything unusual, immediately report it!" Ice Cap commanded the first mate who was still in a daze.

"Eh? Oh... Oh, yes, my Lord!"

"Let's Go..." icecrown also took a deep look at the deck, eyes filled with pity, she suddenly realized that the adventure of the New World seems not only novel and enjoy... .. There are dangers that were not there before... ..

"Welcome back, good players!"

Rain woman no melon wait for a person to come back, hear the voice of that damned intelligence.

"Damn, I thought you were ruined..." Pu Yunchuan couldn't help complaining.

Rain woman no melon also showed a thoughtful expression, she had long suspected that this intelligence is not a simple intelligence... . .

AI looked at these young fellows with mixed feelings. It had never thought that these children would return unscathed from the hands of a great lord that was suspected to hold a level-16 biological civilization.

Although it also suspected that the great lord was either fake or incomplete, a level-16 great lord could instantly activate the entire plane of the New World. Its chances of successfully escaping were extremely low.

When it had escaped, its mysterious spiritual power had clearly noticed it, but it had been unable to stop it. This meant that the great lord's abilities were limited.

But no matter how limited it was, it should not be something that this group of level four or five children could handle, right?

Through reconnecting to the Weihai, AI had also clearly seen rainy without melon's comeback process. Although rainy without melon was indeed outstanding, she could actually retrace the entire refining array by using a variable analysis technique... Her outstanding computational ability and bold decisiveness were beyond people's imagination, but to say that she had won too smoothly...

"Are we really unable to contact the Liege?" After returning to the conference room, Rainy Melon was the first to ask AI the question she was most concerned about.

AI: "If we can contact the Liege, we will definitely contact it immediately. This incident is no longer something that players can solve alone..."

This incident was probably even worse than the previous void invasion. The Liege would be facing a civilization that could crush several of his dimensions.

"Is that so..." rain girl knocked on the table and asked, "If all of us return to Mars, can we guarantee that we won't be discovered?"

AI replied, "We can't... maybe if we're lucky, we can hide for a while, but if we don't mend the Spatial Rift, we'll be discovered sooner or later."

"Understood..." rain girl nodded. "Could you help monitor the situation at Cloud City? If anything goes wrong, please contact us immediately and at least give us a warning before you run, okay?"

AI: "..."

This was obviously mocking it.

It did not want to, but what could it do then?

"Then what should we do now?" Alice asked.

"Let's go back and wait for the notification..." Rainless melon sighed. "I'm sure you won't easily give up on your own achievements." ? If the situation is really bad, then we'll consider the issue of evacuation . . Well, ICECAP, you don't have to go back for a few days, it's better to operate it remotely . . ."

Icecrown heard hesitated for a while, finally shook his head: "I think I better go back for a while."

As soon as he said this, everyone looked at him.

"Don't look at me like that... . "ice cap smiled and said:"I am not not afraid, just... "Now I understand something. There are some storms that we have to go through. After all, we've known since a long time ago that this isn't a game. Since it's not a game, there are risks to it." "...". "..."

Everyone:" ..."

"You're quite enlightened..." Alice smiled. "You're much more enlightened than our boss..."

Isabelle: "You sound like you're treating your boss like a child..."

"He is a child..." Alice looked at Isabelle with a smile. "Just like you..."

Isabelle:" ..."

"Alright..." rain girl spread her hands helplessly. "When did you two not forget to bicker..."

"Keep an eye out, especially Isabel, and if there's any sign of the dead, report here immediately..."

"Well..." said Isabelle quickly.

After the meeting, Isabelle and Pu Yunchuan first went back to Gondolin's side. Pu Yunchuan hesitated for a moment and said, "Daughter-in-law, why don't we pick up mom later?"

Isabelle rolled her eyes at him. Her skin was getting thicker and thicker.

"Go and contact Yunji Mu. See if you can prepare a place for our parents to live on Europa..."

"Huh? Why?" Pu Yunchuan was stunned.

"To prevent being targeted..."

"Who is targeting us?" Pu Yunchuan was stunned. "Even if that mysterious guy is targeting us, he should be targeting raingirl, who performed the best today, right?" "Leng Xing and the other elves are the next best. We're just here for fun."

"Alice..." Yunji said faintly.

"Alice?" Pu Yunchuan's face twitched. "Wife, it's not that I want to criticize you, but don't you have a deep grudge against that person? Actually, right now..."

"There's something wrong with her!" Isabelle interrupted Pu Yunchuan.

"Huh?"

Chapter 868 Spy!

"Problem? What are you referring to, wife?" Pu Yunchuan asked in a daze.

Upon hearing this, Isabelle glanced at Pu Yunchuan. "Isn't it obvious? In the end, you don't want to believe this kind of thing, right?"

Pu Yunchuan: "..."

"Her behavior on the ship was very abnormal..." Isabelle continued, "From the beginning to the end, she was too calm..."

"Um... It's normal for someone like her who has been through a lot... to have a bit of self-control, right?" Pu Yunchuan asked while holding his head.

"It's different..." Isabelle shook her head and said, "My ancestor was indeed a person with a big heart, but she wasn't the kind of person who would be unmoved when her life was in danger. This could be seen from the last time she almost died. She... .. Cherishes her current life very much... .."

"Then... do you think she has something to do with this incident?" Pu Yunchuan immediately frowned. "Then why didn't you bring it up just now?"

"Because I'm not sure..." Isabelle shook her head and said, "There is no evidence, not even a slightly reliable logic. After all, Alice has already gotten what she wants, there is no need to take the risk to collude with outsiders..."

Pu Yunchuan: "Perhaps outsiders can give more?"

Isabelle: "It's just speculation. At least there's no evidence in the current intelligence that outsiders can give her more..."

"Then... . . What should we do?" Pu Yunchuan was a little worried.

"Take it easy... be on your guard at all times..." Isabel said quietly. "To be honest, I don't like her, but she's the last person I want to be my enemy... I hope I'm just being sensitive..."

"Ah, really incredible... .." at this time in the northern plains, a tall troll slowly walked out of the dark jungle, loose bones.

The troll's body looks very strong, but the expression and action is a bit stiff, especially that pair of pupils, green, completely different from the ordinary troll's pupil color.

"So this is the truth?" The troll looked at the moonlight and then looked behind him. "Those high-quality elves, developers, and Green Titans all use genetic bodies?"

"Yes..." a faint voice sounded from behind. If Isabelle was here, she would definitely be able to recognize that it was Alice's voice!

"Genetic body, are you joking?" The troll rubbed his palms, clearly in disbelief.

"Is it very rare?" Alice asked in a low voice.

“Very rare...”. “...”. The troll laughed and said, “You have never been to the federation and don’t know about the market for genetic bodies. Ancient genetic bodies like the wood elves and the Green Titan have very low optimization rates and are usually sold cheaply. Many poor lords will use these cheap genes to strengthen their first batch of people, but they will not spend their energy on nurturing them. This is because the difficulty of nurturing them is extremely high. The low acceptance rate will cause the difficulty of evolving the genes to increase exponentially in the later stages. The price of nurturing a Green Titan is several times or even tens to hundreds of times the price of other high-level genetic bodies. This is still the early stages, and the later stages will become more and more exaggerated.”

“That’s why I was surprised when I saw such a high-quality Green Titan. Logically speaking, no one would spend so much money to cultivate such an uneconomical species. Moreover, the quality was so high that it was almost exaggerated. I thought that the lord here had found a native pureblood species. However, thinking about it, it doesn’t seem right. The wood elves have been extinct for countless eras...”. “...”

“Is that so?” Alice lowered her head, her eyes flashing under her cloak, no one knew what she was thinking about.

“Interesting...” the troll laughed as he rubbed his hands, “That’s called a D ball man right? There’s actually such a talented native in this universe? It’s simply a BUG, this little lord is really lucky...”

“It might not be a little lord...” Alice said faintly.

“Oh?”

Alice said, “The guy you asked me to keep an eye on was sent back to the undead world by that small lord you mentioned!”

“Really?” The trolls were stunned, then they narrowed their eyes.

“That’s not right. Judging from the level of development of the civilization here, he’s just a small lord. If he was a high-level lord and had the resources of Planet D, How could he be at his current level?”

“Would he come back from there like you guys?” Alice asked.

“I don’t think so...” “...”. The troll shook his head. “If he were a great lord that came back from there, he wouldn’t have used such a slow development mode, just like my kind...”. As he spoke, he pointed at the dark forest behind him. “Such a map of the black goat could obviously speed up the progress, why would he use such a stupid method?”

“Map of the Black Goat?” Alice looked at the forest with a complicated expression. “The growth rate of this thing is not as exaggerated as you said. I feel that it is not as fast as those players.”

“That’s because the players you mentioned are too abnormal!” The troll covered his face and said, “A living creature, evolving from level 1 to Level 5. If its bloodline is not pure, it usually takes hundreds of years. Poor families take even longer. Two to three years to transform an ordinary creature into a level 5 creature through energy mutation is completely out of the ordinary speed, but the guys here can follow the speed of the map of the black goat through normal evolution. The abnormal ones are the players you mentioned, okay?”

Alice: "..."

"But it's really a big surprise..." the troll rubbed his hands excitedly again, initially, he thought that rainy without melon's performance was just a small surprise. To be able to harvest developers and green titans of such high quality in the early stages, and to be able to determine the cultivation of core members in the early stages, it was much more valuable than cultivating indigenous people.

However, he did not expect that there would not only be a pile of such high-quality developers, but a huge pile of them. There were actually billions of them!

Oh My God, he would not let a small lord eat this kind of dogshit luck... ..

"What should we do next?" Alice asked faintly.

"Let's observe for a period of time... .." the troll laughed and said, "Just as you said, that small lord seems to have some secrets. To be able to force that fellow to return to Iceland in such a sorry state, he must have a trump card. It's better to avoid it. Let's just sit back and watch the tiger fight."

Alice asked, "After that fellow returns, will there be any big changes to the map of the Black Goat?"

"There will be a little... "...". However, the changes won't be as big as you think... "..." the troll shook his head and said, "The strength of the creatures here is limited. Even if energy is gathered to accelerate the birth, it will still be very difficult to produce overly high-level species. Level five or six is the limit here!"

"Really?" Alice frowned. "If so, are you sure we can just sit back and watch?"

As the military advisor of the first force, she was very clear about the growth rate of the players in her family. If it was only a level 5 or 6 creature, it did not seem to be a threat to these players.

"Of course... ." the troll laughed and said, "Do you think that's all a character like him can do?" The troll laughed as he looked at the starry sky and said, "Just you wait, you'll soon know the difference between those great lords and novices!"

Alice was stunned. She looked at the sky as though she was deep in thought.

Chapter 869 The Fourth City...

As for what happened at the East Sea port, it was still kept a secret for the time being. Under the restriction of rain girl and no melon, none of the major city lords knew what had happened, except for song Zaiyi who was slightly concerned about the contents of Chen Shanshan's prophecy, the people in the city had no awareness at all. They were all working hard in peace.

As an outsider, Cindy naturally would not receive any news. Now that she had said goodbye to Song Yi, she was observing the environment in the fourth city.

The buildings in the fourth city were very gothic. Although there were not many buildings, they were very exquisite. Elizabeth had planted a large-scale forest on the desert sand of Mars, and she seemed to have put a lot of effort into gardening, together with the Gothic style castle buildings, it gave people the feeling of a vampire movie.

It had to be said that the image was quite good...

However, it was not very friendly to media people like her. Of course, this was not referring to the attitude of the staff. On the contrary, the fourth city seemed to attach great importance to media people like her, each reporter placed more than two staff members in charge of accompanying them to introduce the environment and protect safety.

They also did their best to arrange food and accommodation. Although it was not as exaggerated as the Second City, Qingming, meeting them in person, the etiquette was completely different from the indifference of Huaxia City and the first city... ..

The reason why it was said that they were not friendly was mainly due to the degree of danger here...

Yes, it was dangerous because the city forest here was a pure ecological park... .. This meant that you might encounter some unexpected creatures, and most of the time these creatures were aggressive... ..

For example, the four-meter-tall giant bear that she saw in the morning was turned into a giant bear ice sculpture by a butterfly that looked like an ice sculpture... ..

According to her understanding, this setting was also due to the characteristics of the race civilization. The fourth city was a pure biological civilization, and it was a biological alchemy civilization, cultivating biological evolution and mutation.

As for the race, the Vientiane race had a lot of plasticity in the early stages. Observing the various evolution processes of some excellent species could increase one's basic gene route, and using an ecological garden to build a city... It could best match the characteristics of this race... ..

According to Cindy's knowledge, the residents of the fourth city only took a theory class once a week during the transformation period, and most of their time was spent observing the species. The next week, these residents needed to hand in their notes to their instructors, they would ask their own questions to the instructors, and then verify it themselves.

To be honest, Cindy was quite optimistic about this kind of education model, but it was a bit wild, because students often turned into food rations for an unknown creature during the observation process.

As for life occupation, the current fourth city mainly cultivated biological collection, cultivation, and other majors, especially cultivation majors. The pay was very high, but the requirements were also very high, it required you to learn how to find the right environment for the species you wanted to cultivate in a forest city, and how to cultivate the ecosystem that belonged to it.

Cultivating species in a primitive forest would be more difficult than cultivating agricultural and livestock products. However, the fourth city seemed to be cultivating wild species, taking the high-end route.

Of course, the fourth city in the mining industry did not fall behind. It had applied for mineral allocation in the early stages, but it was not open for the time being because it required the citizens to have enough people to form strength-type species before it could start mining, the treatment was also very high, and there was a part of the reduction policy for strength classes. Obviously, it was encouraging a portion of people to choose the evolution of the strength system.

“Madam, please take note that this is the terror spider area...”. The receptionist smiled and pointed at the dark forest not far away and said, “There are 47 types of spider species in there, and it is considered a high-risk area. It is very difficult for us to guarantee our safety in there. After all, spiders are very difficult to deal with hunters”

Cindy:” ...”

“So... Don’t you city lords worry about the safety of the citizens?”Cindy was a little speechless. “It’s easy for citizens to get into trouble in this mode, isn’t it?”

“The accident rate isn’t small...”. ... The receptionist smiled and said, “In the past, there were people who ignored the warnings and entered this place. Then, they were caught by a female spider and used body fluid to melt their internal organs. They were tortured for three to four days before they died. After they were reborn, they had a mental breakdown for a few days...”. “...”. “...”

Cindy:” ...”

“Of course, later on, we strengthened the management and gave every citizen a miniature self-destruct device. If they encountered such a situation, they could at least have the conditions to commit suicide...”

“So, I say... isn’t this environment a little too anti-human?”Cindy could not help but complain.

“Ms. Cindy...”the receptionist sighed and said, “From the moment we stepped into the Sea of stars, we were actually no longer human. Biological evolution is cruel to begin with. Only by adapting to this cruelty will we be able to compete in the future!”

“But isn’t this method of adaptation a little too primitive?”

“Primitive doesn’t mean bad...”the receptionist smiled and said, “Only by not forgetting the primitive nature and embracing the civilization can we cherish the value of the civilization. and the primitive method of evolution is the most natural way, isn’t it?”

Cindy:” ...”

She didn’t agree with this kind of beast theory.

“Won’t that turn all the citizens into beasts?”Cindy frowned.

“Of course not... .”the other man shook his head and said, “Primitive nature does not turn all living things into predators, does it? “This depends on your character. Vientiane will observe the evolution process of an excellent species. First, it will form its initial form. After that, the evolutionary route will slowly narrow down with the initial form and may be reshaped again. It is very malleable. You can become a terrifying predator like a terror spider, or you can become a powerful species like the ice butterfly that relied on its biological characteristics to protect itself. According to our records, the number of citizens who chose extreme carnivores to observe was always a minority. Most of them still chose the more normal route. For example, those who yearned for strength would observe the Bears, rhinoceroses, and other creatures, and those who pursued agility would observe the cats. These are all relatively masculine creatures. It also proves that most people’s heart is towards hot-blooded romance rather than pure predation. This is different from the fierce beast you mentioned...”. “...”

“Um...”

Cindy was stunned. Before she could retort, the receptionist's body slightly changed from a soft jelly-like object to a white deer-like object. It looked very cute.

"This is?" Cindy was stunned. She resisted the urge to touch it and asked.

"This is one of the species I observed. It's called White Swamp. Although its physical strength is weak, it has a good affinity with elemental power. I chose it because it looks good. I've seen the synthetic simulator. If I imitate its evolution pattern and turn into a human, it will become very delicate and beautiful."

Cindy: "..."

So, good-looking is the main point?

However, the other party seemed to have seen through Cindy's thoughts. "Are you thinking that good-looking is the main point?"

"Eh?"

"To me, good-looking is indeed the main point..." "...the white deer smiled. "So this is the style of the fourth city. Everyone's pursuit is different, so the way of evolution is also different. Different personalities have the greatest degree of freedom in their pursuit, evolving into a form that is most suitable for themselves. At least, in my opinion, this is the greatest freedom of living creatures What do you think, Miss Cindy?"

Chapter 870 the fourth castellan, Elizabeth...

"Master... What's the point of pretending to be a subordinate to approach that reporter?"

In the castellan's room, a middle-aged man who looked like a butler poured a cup of black tea for the bubble gum on the table and asked.

"What's The Big Deal?" The bubble gum on the table smiled. "Anyway, the people here all look like bubble gum, and she can't recognize them..."

The Butler sighed and looked at Elizabeth's current mistress. For a moment, he didn't know what to say.

As a noble among the twelve knights, this mistress didn't look like a noble since she was young. Her thoughts were out of control and she didn't follow the traditions. But now, it seemed that it wasn't a bad thing.

For example, as a Knight family, her bloodline was noble and her status was extraordinary. She didn't need to contact those politicians. However, this mistress secretly befriended many politicians. At that time, the elders of the family all thought that they were wasting their efforts, the main force of Great Britain was controlled by Arthur clan. No matter how many politicians you befriended, you couldn't become the head of the country no matter how close you were to the people. Even if you could become the head of the country, you would only be a puppet of Arthur clan, there was no meaning at all. It was the king's way to do the things that a Knight clan should do in peace.

For example, giving birth to a pure-blooded baby...

However, all the elders did not expect to be given such a big piece of cake just because of the useless actions of the mistress in the past!

“When did master start to notice the influence of Galaxy?”The Butler could not help but ask.

He asked this because the time was too coincidental. It seemed that master befriended a politician four years ago, and according to the information, four years ago was the year that this game called Galaxy came online in central China.

“I accidentally noticed it...”Elizabeth licked the boiling hot tea with a smile and said in a soft voice, “When I accidentally went online, I saw a game guide...”

“At that time, did you think that it was not a game?”

“No matter how you look at it, it doesn’t look like a game...” . “...”. “What are the people in the outside world thinking?”Elizabeth said with a laugh? They actually haven’t reacted for a few years. That’s why, you old people, your thoughts are fixed and will never be able to keep up with the times. With a little bit of common sense, you should know that a folk studio wouldn’t be able to create such a cross-generational game? It’s either a scam, or a scam that has a deeper meaning... .. but I saw such a well-made HD picture. No matter how I look at it, it should have a deeper meaning

The butler frowned. “You suspect it just because of this?”

“Of course it’s more than that...”Elizabeth smiled and said, “Do you remember the incident with the Dragon Group in South Africa?”

“Yes... I remember it a little...”the butler nodded. It was also because of that time that the Dragon Group seemed to have officially entered the field of vision of the major organizations in the world.

“I was actually there...” . “...”. Elizabeth smiled and said, “That time, I happened to go to the Southern Union City to discuss a business deal. Then, I happened to see that riot. I saw a fire phoenix catching a missile, and then I saw the Hulk on the game map appear in the real world. To be honest, I was so shocked that my pretty eyes almost flew out...” . “...”

The Butler:”...”

“At that time, I was thinking, why would something that was promoted by a game studio appear in the real world? Therefore, I had been paying attention to that game guide. From the content that the players exposed every time, there were only two possibilities. Either it was the main stream of the system in Huazhong’s YY Novel, or it was an alien force that was beyond human civilization causing trouble. Obviously, the second possibility was slightly more scientific... “...”. “...”

The butler: “What is the main stream?”

Elizabeth: “Something even more ridiculous. It is difficult to explain it clearly to someone like you who doesn’t read novels...”

“Alright...”the butler’s lips twitched, and he said, “Then what does this have to do with you roping in politicians? Could it be that you guessed at that time that this force would use the manager of the D Ball people to manage the D ball people?”

“Yes...”. “...”. “...”Elizabeth said seriously, “At that time, I observed the game for a year and came to a conclusion that this force seemed to be nurturing humans and did not have any thoughts of violent colonization. Hence, I came to a conclusion that this force either did not have the ability to colonize sphere D or valued certain human potential. Regardless of which, I needed a force that belonged to me to fight for this piece of cake. Originally, my plan was to support a portion of people through political relations to gain real power in the Western European countries and then control the power of the army. I did not expect that the other party would use such a method to let us assimilate into them. It was somewhat unexpected. However, fortunately, the political forces and civil reputation that we have befriended over the years have not been in vain.”

The Butler:”...”

He had to admit that this year’s female host was much more impressive than he had imagined. This was not only due to her keen insight, but also the fact that she dared to break through traditional knowledge was shocking. After all, if it was someone else.., unless the evidence was all thrown at her face, who would accept an alien’s settings?

After a moment of silence, the butler asked another question, “Right now, other than Huaxia City, a few major cities are trying to rope in that reporter named Cindy. Why are you using this method today?”

“Because this method is most suitable to tell her about the current situation here naturally...”. “...”. Elizabeth smiled and said, “After being roped in by the previous two city lords, she will definitely have some doubts about the things that the new city Lord deliberately created. I will treat all the media people equally. Instead, I can let her know about this place without any doubts.”

“But the normal people here won’t really accept it, right?”The Butler sighed.

“It’s fine if she doesn’t accept it, as long as she can truthfully narrate the situation here...”

“But if the true situation is revealed, are the people from the third world willing to come?”

“Yes...”Elizabeth smiled and said, “A civilization like ours needs to aim accurately at a specific population. We don’t want to eat them all in one go. We need smart, rational people who advocate freedom...”

“Our setup may seem barbaric, but it is actually the most scientific, and it is also the one that can best unleash the freedom characteristic. This is because every choice you make is in your own hands. What kind of existence you become is entirely up to you. Moreover, our city civilization has a lot of competitiveness. This is something that those who pursue freedom and intelligence will definitely be able to see... “...”. “Although these people are a minority, we only need these minority people!”

“Freedom?”The Butler smiled. “The city next door seems to have the same slogan!”

Hearing this, Elizabeth frowned slightly. The city next door mentioned by the Butler was naturally the fifth city. The two cities were geographically the closest.

“Don’t compare us with that small businessman. He is not the same as me...”. “...”Elizabeth sneered. “I want a group of people who truly pursue freedom to achieve a win-win situation, and he only wants a group of fools who are tricked and crippled under the pretext of freedom!”
