

A Bunch 931

Chapter 931: The Leica ELF system!

By midnight, more than 100 people had started live streaming in the first city, but Nie xiaoying's live stream was still the most popular, the reason was not only because she started early, but also because she wanted to write a post from the beginning, so she did a lot of detailed data research on the city, including the area of the dormitory, the cost of race and occupation, and so on, none of these things could be compared to some people who suddenly wanted to start a live broadcast.

After a few comparisons, her live broadcast naturally became more and more popular. By midnight, she had accumulated tens of millions of viewers, which encouraged Nie xiaoying greatly. She always felt that her efforts over the past few days had not been in vain, so, she excitedly continued to talk about her occupation and science popularization.

"It's getting late. Let Me Talk About Our Leica Elves first. Unlike the wood elves that Grandpa Lu talked about before, our Leica elves have a fixed template when choosing their form. It Won't be like the Wood Elves where you would become a wind demon if you wanted to become a flower spirit. However, this also causes many people to always want to choose the ideal template, but in fact, this template may not be suitable for you. Today, I'll give everyone a brief introduction of the Leica Elves' main templates and their shortcomings, so as to prevent everyone from stepping into a trap..." "..."

[Big Brother, please have a conscience. This kind of live broadcast is more meaningful. The people next door are either showing off their food or simply showing off their genetic strength. I don't know what's so good about showing off.]

[that's right, that's right. Big Brother, I also want to choose the Leica elf. That body shape and appearance are too beautiful. Although it's not as beautiful as the wood elf after transforming, it looks more wild. I love it so much. Big Brother, please tell me more.]

Nie xiaoying responded to the live broadcast and began to explain the Leica elf inheritance template.

"Leica Elves are currently divided into three major factions: agility, sacrifice, and mystery. First, let's talk about the agility faction. This is currently the hot category because it looks more normal. Moreover, many people who choose elves hope to become a high-agility and elegant assassin. Then, I'll first explain the first point. The assassin faction is not included in the agility faction!"

"I'll repeat the important thing again. Assassins are not in the agility system. Those who want to be free from the mortal world and escape from the white swallows, don't make the wrong choice. The classes in the agility system are ranger, Swordsman, sword dancer, Monk, Archer, and other classes, but there are no assassins because assassins are in the secret system!"

"First, let's talk about your class choice. After you choose a major class, an elven instructor will perform basic molding and physical training on you. You have to report to the instructor about the class you want to become. After that, the instructor will perform different molding exercises according to the class you choose. Remember, once you choose a class template, it will be very difficult to turn back. This is because the molding of different classes is very big. Take height as an example. Among the Leica Elves,

Rangers are at most 1.7 meters, while sword maidens and martial monks are mostly at least 2 meters. Their skeletons are all different. If you want to turn back, you have to do it all over again after you die!”

“That’s why everyone must choose carefully. Currently, the Ranger class is the most popular class in the base. Relatively speaking, this class is the most reliable. The things you learn are very balanced. It involves close combat, light weapons training, archery training, Beast Taming, and tracking in the wild. However, it’s not specialized. It belongs to the all-gold class. Moreover, the New World is currently in high demand for Ranger players. Therefore, as long as you reach level 2 and possess the above-mentioned level 1 specialized skill, you will be able to head to the New World. It is currently the fastest class known to be able to head to the New World!”

“After that, there are sword girls, swordsmen, archers, and other specialized weapons professions. They are different from weapon warriors. Elves have higher requirements in weapon specialization, and weapon warriors generally require proficiency in two or even multiple weapons. However, we elves are different. Swordsmen only specialize in swordsmanship, while archers specialize in archery. We belong to the group of highly specialized people. Of course, the conditions for us to go out are also quite difficult. We require a level-two life form and a weapon specialization of level-three. What is the concept of a weapon specialization of level-three? Let me put it this way. Currently, on the warrior list of Huaxia City, Cold Star, who has the strongest specialization in the field, is only at level-four in each weapon specialization. The other big shots in the top 100 or below are only at level-three in their specialization. So, do you know how difficult it is to choose these weapons specialization Elves to graduate?”

“Lastly, there’s the martial monk. This is a new class. As there are no examples of seniors, the number of people who choose this class is rather small. With the word ‘monk’ in it, many people think that they might shave their heads. However, that’s not the case. Martial monks specialize in close combat and qigong cultivation. However, there aren’t many teachers in this field. Previously, there weren’t any teachers like us in the sacrificial class. Recently, the city Lord has only brought in two. If you want to try out a unique class, you can consider trying it out. Actually, I’m quite optimistic about it. Hehe, that’s because I’m an explorer of an unpopular class.”

“Now let’s talk about the sacrificial type, which is the template I have chosen. The sacrificial type elves are about two meters tall after being molded. Their proportions are very good, and they have long legs and slim waists. They won’t turn into radish legs to strengthen their legs like Rangers.”

“The Laika elf sacrificial class is more random. You Can’t choose by yourself. You need to conduct a test to test what your totem spirit is. If your totem spirit is an element, then congratulations. You will receive a large amount of subsidies and special treatment from the city lord. Because the Laika elf’s elemental sacrifice is very similar to the Wood Elf’s flower spirit, they can cultivate high-level elemental bodies. Their value is extremely high. Even for an industrial civilization, high-level elements represent an improvement in the field of energy shaping. Therefore, those who draw elemental totems are all upper-class talents who enjoy higher treatment than the Maines. TSK TSK, I’m envious...”. “...”

“If your totem is a plant spirit, then the treatment is not bad. You will be assigned to the Ministry of Agriculture or the Ministry of biology to cultivate magic plants or high-level farming. This is a choice that you can make. The former’s treatment is average, while the latter has a special subsidy. The specific choice will depend on you. However, if you want to take the personal adventure route, I suggest the

former because high-level magic plants have a very high combat ability, and if you take the agricultural route, you can only be a civil servant. I don't recommend it because our city doesn't pay much attention to agriculture...". "..."

"If your totem is a beast spirit, then I'm sorry. Like Me, you can only become a beast tamer. Part-time jobs are either raising livestock or raising magical beasts. Like before, the former is better paid, but in the later stages of that path, you'll most likely become a civil servant. The latter has the ability to train magical beasts and take risks alone. My totem is a wolf spirit. Among the magical beasts I train, there are three different types of canine magical beasts. However, the cost of our job is higher than that of a magical planter, especially for those who are randomly assigned to a meat-eating totem. The magical beasts that we train are all meat eaters. Now that the price of meat in the base is so high, I feel like I'm under a mountain of pressure. Hahaha...". "..."

"Finally, let's talk about the mysterious class. Many people are looking forward to the assassin class. Other than the assassin class, there are also the shadow master, Nightmare Master, spatial assassin, and other inexplicable classes. It sounds very grand and grand, but I strongly advise against ordinary people choosing this class. This class requires a lot of difficulty in molding, and the pain during molding is very high. Many people simply can't endure it, and will directly have a mental breakdown. Even if they manage to endure it, more than half of them won't be able to endure the later training because the pain during the mysterious class training is even higher!"

"According to the current statistics, there are a total of 571 players who have chosen the secret system, but only 11 have successfully persisted. The others have all chosen to start over."

"Let me say this. The price of starting over is very high. First of all, you can only start over once in the first city, which means that you are allowed to commit suicide once. After you start over, you can only change your class and not your race. In other words, you must also be a Leica Elf after you choose to start over. However, it will be more difficult for you to start over because your genes are already used to the reaction of the previous model. Therefore, there will be a certain impact. I've heard that the impact will even affect the future. I'm not sure how big the impact will be. Also, in terms of benefits, because you will waste resources if you start over again, it will reduce your benefits. Many of the free meal and model benefits that you received before will have to be canceled. You will have to pay for your own model, and the price will not be low. As a result, you will be burdened with an official debt during the model period

"Therefore, I solemnly advise you, friends who are about to enter the Sea of stars, to choose carefully and not to take the path of regret because of some unrealistic fantasies, especially those who want to take the path of mystery. You must consider it carefully

"Alright, that's it for today. I have to go to work now. I will update it one after another in the future. I hope that you will continue to support me when the time comes. Thank you, everyone. I'm Leaving Now!"

[very detailed. Thank you, Boss!]

[F * ck, so there are so many paths. Now that I think about it, it's not a bad thing that we're not the first batch to enter. At least, we'll have some seniors to help us out.]

[wow, the assassin class is actually so difficult? Even I'm a little hesitant.]

[hesitating my A * S. If you're a man, you have to face the difficulties head on!]

[sounds like elves are quite interesting. I'm thinking of choosing the priest class to get lucky. Who's with me?]

[cheh... This kind of job that relies on luck is quite a scam. Be careful that you don't turn into an inexplicable job. Refer to the soap bro in Huaxia City!]

[you can't be that unlucky, right?]

Chapter 932 Man-made Dragons!

Seer had found the principal in the first city. To be honest, he didn't expect the principal to do something like stealthily stealing students, which gave him a headache, at this moment, a group of instructors in Huaxia City who had their spiritual power sealed were protesting.

"The Lord is here?" The principal looked at the data on the handbook with a smile. When he thought of the students' aptitude test in the past two days, he couldn't help but smile. The Manin clan's quality was so high.., he had never seen such a thing in his many years of work.

From the perspective of an alchemist of the transformation department, these children were like a Heavenly Treasure Trove. The things that he had accumulated for so many years finally had a successor...

Perhaps these children would be able to establish a school of thought by themselves?

Haha...

At the thought of this, the principal could not help but drool.

"Principal?" Xi Ye looked at the principal, who was still giggling foolishly, and tilted his head in puzzlement.

"Cough... cough..." the principal sucked in his drool. "Why is the Liege looking for me?"

"Principal, that notebook of yours is..." Xi Ye asked with black lines all over his face.

"AH? This One?" When the principal heard this, he kept the notebook without batting an eyelid. Inside it were dozens of students with the best qualifications that he valued. These students had already been labeled by him and were prepared to be his last disciples.

Of course, when facing Xi Ye, he naturally couldn't shamelessly say that he was here to seize the outstanding students, thus, he coughed lightly and said, "This... .. Mm... .. I came this time mainly to select a group of students with special qualities for observation, mm.. right, observation. I wanted

to see if their stability and learning ability could match the aptitude that they displayed, mm.. ... So I plan to teach them personally... ..”

Xi Ye: “Is That So? Then what is the meaning of the headmaster sealing the spirit of the teachers under his feet?”

To be honest, he had already tried his best to overestimate this headmaster’s ability. However, he realized that he was still being conservative. Among the teachers under his feet, the Dean of the department was at least at the dragon rank. A few of them already had the strength of a star rank.., to actually seal them just like that, this principal’s strength was probably not inferior to that of the principal of Xandar Academy!

One had to know that casually sealing someone else’s spiritual power was a level higher than that of a dimensional level. The key was that there were so many of them!

When the principal heard this, his smile did not change, with a serious expression, he said, “The main reason is that I’m afraid that they will be too noisy. The average talent of your place is so high that it’s very easy for them to be dazzled. I have to be responsible for the teachers. Therefore, I have to first screen them to see if these children’s talent is overrated!”

“Then how does the principal feel after looking at them for a few days?”Xi Ye said indifferently.

“I’ll just make do with it...”the principal said incoherently.

Xi Ye rolled his eyes. He was too lazy to argue with the other party and directly said, “Now, there might be an unprecedented crisis in the base. I hope that the principal can help...”

“Crisis? What Crisis?”The principal immediately narrowed his eyes. “Back then, we agreed that our academy would not participate in Your Liege’s personal affairs.”

“Are you sure, Principal?”Xi Ye said lazily, “All the natives here have signed lifelong contracts with this liege. If my influence is gone, so are they...”

“You...”the principal immediately exploded. “How can you be so selfish? These children are so talented, yet you’re actually using your influence to bind all of them?”

“Do I have to leave some for others?”Xi Ye looked at the other party speechlessly.

The principal immediately glared at Xi Ye when he heard that. Xi Ye also glared back at the principal, unwilling to be outdone. The two of them were silent for about a quarter of an hour before the principal finally could not help but compromise. “What Crisis?”

“Principal, please take a look...”Xi ye said as he used his intelligence to play the scene of the prophecy.

When the principal saw the scene of the prophecy, he frowned slightly. Then, he carefully observed the video. “Where is this?”

Xi ye replied, “This is another world that my planet is connected to through the dimensional fissure. I don’t know the location yet, but it should be a place in the Material Plane.”

“Dimensional fissure?” The principal was stunned. This kid’s luck was heaven-defying. As a lord of drifting, he first found a grade-8 planet filled with energy mines, and then had a group of natives with such heaven-defying talent., in the end, he could actually connect to another life planet that was not below Grade-7 through space fissure.

However, it seemed that his luck had come to an end...

The principal looked carefully at the huge pair of pupils that appeared at the end of the prophecy video and said faintly, “Although I’m not a pure biology department, I’ve explored this area for some time. The outline of this monster’s pupils and the aura it gives off are very unusual. It has the aura of a dragon!”

“Dragon?” Xi Ye’s pupils constricted. “Are you sure?”

“I wouldn’t be mistaken about the unique dragon pattern!” The principal said faintly, “And this prophecy scene should have been accidentally predicted by an immature child, right?”

Xi Ye nodded when she heard that.

The principal said, “What a talent, to be able to gather the aura of a monster. If it wasn’t for the fact that his mental state was extremely unstable, I would have thought that he was a veteran seer. This aura can’t be wrong, it’s just dragon pressure...”

“Dragon...” Xi ye lowered her head and muttered. This creature was one of the top food chains in the universe. It had the same ancient bloodline as the Titans. Even though it didn’t have a civilization, the strength of its individual was undeniable.

However, if it was a dragon, it would be a bit more interesting. If it could be designed to be a planet guardian spirit... ..

“Don’t think too much...” the principal coldly interrupted Xi Ye’s train of thought. “This dragon isn’t natural, it should be an alchemy product!”

“An alchemy product’s Dragon?” Xi Ye was stunned. “That can’t be right?”

There were some things in the universe that couldn’t be deciphered by the biological field. For example, Titan had never been able to decipher Titan’s sequence in genetic engineering, making Titan one of the most difficult races to optimize in the federation.

As for dragons, they were one of the most unsolvable mysteries in the biological field. Had they used alchemy to create dragons? Did he really think that he had no knowledge at all?

Xi ye frowned and said, “President, as far as I know, creatures like dragons don’t even have a basic model of genetic engineering, right? How can someone use alchemy to create such a thing?”

“I don’t know because you don’t have much knowledge...”. The president shook his head. “The Federation doesn’t publicize many academic matters. The deity students, including the federation’s publicly released civilization vault, actually use products that are no less than an era behind in actual technology!”

Xi Ye:” ...”

The principal ignored Xi Ye's speechlessness and continued, "The dragon's genetic model has been available for a long time, but it is only in the hands of a few top biology faculties. One of them is the theory of Chaos!"

"The Theory of Chaos? The school where the ten great liches teach?" Xi Ye was stunned for a moment, of course, he knew this name. The number one school in the Northern Star Field, with the fourth overlord, Sylvanas, personally serving as the honorary principal, with the ten great liches under his command overseeing the teaching of the school, it was the number one holy land in the hearts of many biology students.

"The term 'top ten liches' is already history...". The principal said in a deep tone, "Four million years ago, Sandro was ranked seventh among the top ten liches Wilma suddenly rebelled. It was said that he broke through the taboo of life and mastered the method of artificial dragons "... "... at this point, he looked at seer. "In the entire federation, he is the only one who has mastered the technology of artificial dragons. If this matter is related to him, then I can only say that you are not far from being finished!"

Seer: "..."

Chapter 933: Is That Little Doll You're talking about?

"Is this information accurate?" Xi Ye's eyelids twitched slightly as she asked.

"You're asking me that?" The principal looked at Xi Ye in amusement. "Where did you get the prophecy information? I'm only analyzing the information based on the content of your prophecy. Shouldn't we first see if there's a problem with your prophet's Prophecy?"

"Is the principal proficient in this area?" Xi Ye asked directly.

"Yes... ... I'm not really interested in this area" the principal smiled awkwardly. "Among the nine departments, The Prophecy Department is the most metaphysical department in my opinion. However, we have a very good prophet in our school. I can ask him to help take a look."

"Okay, then I'll ask the principal to help me remove the spiritual seal on that teacher. It's also a good opportunity to ask him to help me see if my citizen's talent status can be turned off... now that she can't control her talent, it's a little troublesome..."

"..."

"Shanshan, how have you been recently? Do you still have nightmares?" In the Second City, Guo Xiaoyun asked the pale-faced Chen Shanshan with concern.

"Yeah... I still have..." Chen Shanshan pouted with a depressed expression. I didn't even dare to sleep anymore. "...".

"Really? I saw that you slept quite well during class."

"That's mainly because I was too tired..."

"It's mainly because I didn't want to listen to class, right?"

“Yeah... that’s not true... by the way, where’s Xiao Hei? We’ve been here for half an hour. Why hasn’t that guy come to receive us yet? He promised to treat us to a big meal.”

Guo Xiaoyun pursed her lips when she heard that. “He must be broadcasting live...”

“Broadcasting live?”

Guo Xiaoyun said, “I don’t know why Xiao Hei is so simple-minded. The live broadcast seems to be going very smoothly. I heard that he has a million fans. He’s very enthusiastic about this aspect every day...”

Chen Shanshan’s eyes lit up when she heard that. “Let’s go and take a look!”

At this moment, just as Raingirl Wugua had said, Blackie was addicted to live broadcasting and was enjoying the attention of thousands of fans in front of the camera.

“Hehe, Hello, grandfathers of the audience. I’m here to do a live broadcast for you again...” Blackie smiled foolishly and said, “As usual, put the questions you want to ask the most on the screen, and I’ll answer you according to the number of people.”

[Blackie, this nickname was given to you temporarily after you became an elf, right? Why is it getting darker and darker?]

This question seemed to resonate with the audience, and everyone liked the question.

When Blackie saw this question, his face instantly fell. At this time, Blackie was still a sphere, but unlike the other cute colored elf spheres, Blackie’s sphere had started to gradually turn black. Recently, he had become like a black pearl...

“I didn’t want to. I’m from the South China Sea. When I was young, I was very tanned, so the people around me called me Blackie. I thought that after I had the gene, I would be as white and beautiful as those elven ladies on the Internet. I didn’t think that I would become darker and darker recently. Didn’t they say that the transformation of elves was based on Will? “Could it be that I subconsciously want to be a black girl?”

“Haha, the upperclassman is so cute...”

“I’m cramping up from laughing, really...”

“It has been proven that the black bloodline is unrivaled, and even a gene transfer won’t be able to solve it. I advise those who want to marry a black brother to think carefully about how powerful the gene is. The child they give birth to will definitely be black.”

[the topic above has gone off topic...]

[little black, little black, are all the Elves in the Second City? What do you all do on a daily basis?]

Little black: “The Elves in the second city are all elves. There are no examples of transformation at the moment, but some of the elves have already shown signs of transformation. I should be a flower spirit...”. “...”. “Although it’s a little black, as for what I do on a daily basis, because I can’t do many things

without transformation, I can only rely on doing things that don't rely on physical strength, such as sowing seeds, cultivating plants, cultivating farmland, cultivating livestock, and so on."

[it really is a country of farmers, oh my God...]

[I heard that the treatment is very ordinary? Is that true?]

Blackie: "The treatment is not bad, but the difference is very big. Because the individual talents of the elves vary greatly, the efficiency of their work is completely different. Although they haven't transformed yet, like me and other species that can transform into flower spirits, we have a very strong affinity with the elements. We can already command the elements to do some things, such as using the earth elements to improve the soil quality, or communicating with the insects in the soil to help loosen the soil. These things are not something that ordinary elves can do, so our treatment is much higher. They can only do some miscellaneous work...". "..."

"Wow, this really depends on one's looks... Dog Head..."

"D * mn, isn't that the lower class of the flower spirit? It's so easy to be born..."

"Speaking of which, I want to be an assassin who comes and goes like the wind. Little Black, is it possible for the second city to be formed in this aspect?"

Little black: "It's not to the extent of being a lower class, right? It's just that the flower spirit does indeed have an advantage in terms of production. It's very popular everywhere. Grandpa Lu had mentioned it in a post before, but many players don't want to be producers either. They want to become sirens, Rangers, assassins, and so on. They just need to get through the early stages. I heard that our elves are very popular at Gondolin's place."

"As for assassins, I'm not too sure. I've heard that very few are suitable for this aspect. However, the base has reserved a few. There's a guy whose body can automatically change color (I'm so envious) . It's said that he can control the distortion and refraction of light. He's the material of a top-notch shadow assassin. However, this is a bit of luck, unlike the Leica Elves in the first city who can directly choose the template."

[I don't think it's good to be next door. Although the Leica Elves in the first city can be chosen subjectively, there are many times when the class that you imagine isn't suitable for you. That uploader called Nie xiaoying has already made it very clear that many people who choose the assassin class have been reincarnated and chosen again. As for us, we can directly evolve according to your most suitable class. It's all UP to Fate!]

[that's right, that's right... This is actually very interesting. I can slowly look forward to what I will become. I wonder if I will be a ranger that competes in martial arts? Or an assassin that comes and goes like the wind!]

[don't be so optimistic upstairs. Perhaps I will become something very strange? For example, brother soap from Huaxia City.]

[shut up!]

“Oh right, Upperclassman, is there no dormitory in the second city? Why haven’t I seen your introduction before?”

Blackie pursed his lips when he saw this question. “No, I heard that we have to transform before we are assigned. The city Lord’s reason is that we are not sure about the shape of our transformation, so it is very difficult to determine the dormitory before we transform. If we turn into a pile as big as Grandpa Lu, then the dormitory will be meaningless, right?”

[then where do you usually stay?]

Blackie said, “Usually, we go back to the training base to sleep. There’s air conditioning there, but there are also many citizens who are tired from work and directly lie in the fields. To prevent us from catching a cold, every day, there are staff members who pick up balls everywhere and stuff us into the training base to find a Garda to pile together. Oh, and, usually, outsiders will be warned to watch their feet and strictly forbid them from stepping on the elf balls...” . “...”

[PFFT... what a shameful scene.]

[I think so too. It’s so strange to think of myself being picked up and thrown away like a pile of junk.]

[but fortunately, the second city doesn’t have a titan. At least it won’t worry about being secretly eaten by Titan players like Huaxia City...]

Blackie was watching happily. Just as he was about to join the chat, a white and tender hand suddenly blocked the screen.

“Hey, are you going to livestream for a whole day and then forget about us?” Guo Xiaoyun said coldly.

“Eh?” Xiao Hei was stunned. He suddenly remembered that it was supposed to be the three sisters’ gathering today. He immediately smiled sheepishly... ..

Guo Xiaoyun looked at the silly smile and was momentarily angry. He quickly said to Chen Shanshan beside him, “What Did I say? If you don’t take the initiative to look for her, this silly girl will definitely look at us. Aren’t you going to look down on her with me?”

Xiao Hei looked at Guo Xiaoyun in a daze. “Who are you talking to?”

“Huh?” Guo Xiaoyun was stunned. He quickly looked back and found that Chen Shanshan, who had been following behind him, had disappeared without him knowing.

“What’s the situation?”

Guo Xiaoyun quickly spread out his spiritual power to check. A second later, his spiritual power found that he was 500 meters away from the corner of the farm. At this time, a sloppy old man was grabbing Chen Shanshan with one hand like he was grabbing a chicken.

“Oh... is the child with the gift of Prophecy You?”

Chapter 934: Deadly...

“Who is it?” Rainless melon was shocked. Her body blurred and she appeared in front of the old man!

The onlookers on Blackie's screen cried out in surprise.

"F * ck, what is that? A thief's disappearing spell?"

"I don't think it's an invisibility spell. I saw the space blurred just now. It looks like someone jumped into a hole in the air. Is He a magician?"

[hey, Hey, Xiao Hei, what's your friend's occupation?]

Xiao Hei was also dumbfounded. According to what she knew now, it should be very difficult for a newbie to master such a special technique, right?

On the other side, Chen Shanshan saw Guo Xiaoyun rush over and immediately sobbed, "Xiaoyun..."

The old man looked at him curiously. "Child, where did you learn this spatial jump from? Is the technique so crude? Don't use it carelessly. It's good that the elemental structure of this planet is simple. If you change it to something more complicated, there might be a big problem!"

Guo Xiaoyun was stunned, but she immediately heaved a sigh of relief. Judging from the other party's words, she did not seem to be a person with malicious intentions. After two seconds of silence, she asked directly, "Is he a teacher from the Academy?"

"This child's reaction is quite fast..." another aged voice sounded, and the principal and Xiye appeared in the open space.

Seeing that Xiye had also finally let go of the last bit of doubt in Guo Xiaoyun's heart, this should be the teacher from the Footstep Academy.

"Child, did you learn that space jump from a textbook?" The principal looked at rainy girl with a smile and asked.

Xi Ye frowned. "How many times have I told you not to experiment without professional guidance? Things in the Space Department are very dangerous. Being torn into pieces is still a small matter. At the very least, you can be reborn. If you accidentally enter some strange space and don't come back, I don't think you have anywhere to cry!"

"It can't be..." Guo Xiaoyun stuck out her tongue. As long as she remembered the fluctuation of the space variable, it would be fine?

Hearing that, the principal narrowed his eyes slightly. The other party was able to use blink so calmly. So it was actually done by calculating variables? This calculation ability was a little exaggerated.

"Oh right, Lord, did you personally bring the principal here for Shanshan's Prophecy?" Guo Xiaoyun went straight to the point.

"En..." Xi ye nodded.

Guo Xiaoyun: "Is it serious?"

Xi ye replied, "It's not that serious..."

The principal rolled his eyes. This kid really dared to say that!

Chen Shanshan was confused. She felt that Xiaoyun was so powerful that she could not understand what he was saying... ..

"Old Buddy, how is the Kid?"The principal turned to look at the old man who was grabbing Chen Shanshan.

"Who's Your Old Buddy?"The old man was furious when he saw the principal. This old man was shameless. He was already so old, and he would even resort to such underhanded methods to snatch students!

At least he would be able to take part in one wave. He wouldn't be able to get many seedlings... ..

His days in Huaxia City couldn't be any more miserable. Due to his spiritual power being sealed, many instructors were only able to promote their own subjects in Huaxia City. Their competitiveness was extraordinary!

It had already been three days, yet no one was interested in his course! !

He knew that his prophecy department was an unpopular course. The people who were interested in it were definitely not as good as those in the transformation department or the Plastic Energy Department. However, three days without anyone interested in it was a little too miserable, right?

Looking at the pile of developers whose qualifications were comparable to those of the royal family happily immersing themselves into other subjects, his heart was bleeding every second! !

In the past, he could still console himself that what the other party collected was all junk, but now, he even wanted to die. If it wasn't for the fact that the Lord promised to give a preferential policy to their prophecy department, he wouldn't have come to help... ..

However, this trip wasn't a loss. He actually met a gifted prophet, and it was an elf department. It was rare to meet someone who was born with this job, even if one appeared in the universe school, it would be snatched by those prophecy teachers!

Furthermore, his mental energy was extremely pure. Even though he didn't have the calculation ability of a developer, an elf department prophet had an advantage when it came to sensing everything.

"Ahem..."seer saw that the other party did not want to sell the principal's account and coughed lightly to curry favor. "Well, old Mister Bilosi, what do you think about the accuracy of this child's prophecy? If it's not too bad, she can directly enter your school."

"HMM... it's not too bad..."the old man felt happy after hearing this promise, however, he still tried his best to restrain his expression and said, "Her talent comes from the ancient genetic inheritance. It should be very coincidental that this genetic source of hers comes from the ancient seer. I just sensed it. This child's continuous uncontrollable prophecy these few days is because her body instinctively sensed danger...". "..."

"Oh?"Xi Ye's pupils constricted. "You mean, this prophecy is very close?"

“Yes...”. The old man said seriously, “Usually, biological potential is stimulated under a crisis. Seers are very special and are more sensitive to future crises, so many talented seers are very accurate in predicting dangers. From the frequency of this child, the accuracy of this prophecy is very high, which means that this crisis is not far away.” “... “...”

“I see...” seer lowered his head slightly.

The principal frowned when he heard that. To be honest, he did not want to help under normal circumstances, but the resources in the hands of this overlord were too tempting. It was impossible for him to be determined to protect himself from the very beginning!

“Do you know the situation or not?” The principal could not help but ask as he looked at seer who seemed to be very calm.

“A little...” seer narrowed her eyes and looked at the principal. “Can you tell me more about that Sandro Wilma?”

— — —

At this moment, the huge battleship in space was rushing towards the new territories. As they were close to their destination, many mecha operators and combat personnel in the base woke up from their hibernation and started warming up, they were checking if their equipment was working properly.

In the main control room, the flower spirit with seaweed-colored hair was reporting today’s data as usual.

“The last batch of combat personnel has been awakened. They are undergoing muscle recovery and equipment testing. They are expected to report all the results within 10 hours. The temporary combat personnel have already entered their resting period. Master Mal will personally help them recover from their mental exhaustion.”

“Mm...” the tall lord nodded slightly. “What’s the time of the destination?”

Flower spirit: “Two days and eleven hours!”

“Alright, Get Master Ugarte to prepare his new weapon...”

Flower spirit frowned slightly. Ugarte was the strongest bioweapon master in the faction. As a nature-loving elf, she did not like this person very much.

“Sir, is there a need to be so cautious? He’s just an undead...”

“Undead?” The Lord smiled. “You’ll never know how many tricks a lich like teacher has up his sleeve, but I know that the things in his hands are deadly!”

Chapter 935: Sandro Wilma

“Sandro Wilma...” the principal looked at rainy, who was standing next to him, however, he found that seer had no intention of letting him go, so the principal didn’t ask any more questions. He sighed and said, “Let’s start with the war of the ancient catastrophes.”

“That year, a terrifying person appeared in the world of death. For the first time, he opened a passage between the material world and the world of death. The world of the dead, which countless alchemists had been looking forward to, was officially connected to the real world. Of course, the price was that countless dead people crawled out of that passage!

“That year, not only did the god alliance have to face the undead that had accumulated in the world of death for countless years, but they also had to face those fanatical alchemists who secretly believed that the world of death was immortal

“This war had been fought for a very long time. It had been fought for tens of millions of years. Other than the Void War, it was the war that caused the universe federation to suffer the most casualties. That was because you were facing dead people, and in the war, there would be endless deaths. This meant that the comrades who could be relied on on the battlefield a moment ago might be turned into your enemies in the next second!”

Seer nodded slightly. “I’ve heard of that period of history. The few great lords who worked together couldn’t do anything to the Lich King for a while. In the end, it was the fourth Lord who found the flaw, right?”

“Yes...”. “...”. “It’s Sylvanas!” The principal said softly. “She’s a ruthless person and a military genius. She once used 400,000 high elf troops to forcibly resist the death realm for more than 80 days, buying precious time for the Federation. This was also the reason why the Lich King used her after she was undead. I didn’t expect that she could use her personality to incite the ten great liches and the Four Horsemen of the Apocalypse, changing the battle situation in one fell swoop! To this day, even historical scholars could not figure out how she did it... “... “..

Xi Ye’s body trembled when she heard that. “Did the top ten liches exist at that time?”

“Do you know how powerful they are now?” The principal rolled his eyes at him. “I thought you were so calm that you didn’t put them in your eyes...”

Xi Ye: “...”

The principal: “The ten liches were the most highly regarded alchemists under the lich king in the beginning. They were also the first alchemists to use the spiritual passage to lure the Material Plane. They spread the talk of immortality. Each of them was a monster that had existed for God knows how long. Even Sylvanas herself was only a junior in their eyes!”

“After the natural disaster ended, Sylvanas and her group of ancient undead mighty figures were feared by all living people. In the end, the principal of the Sky God Alliance personally came out to carve out a space zone for Sylvanas and her group. After Sylvanas obtained the territory, in order to waste the potential of those ancient mighty figures, she began to imitate the system of the sky god Lords of the Federation and established a small federation of undead lords...”. The headmaster took a glance at the seer and said, “It’s very similar to the way you run the business now . . .”

The corner of Seer’s mouth twitched, and she hastened to say, “You must focus on Sandro.”

President: "Among the top ten liches, Sandro is ranked seventh. In the academic world, he has two of the most impressive skills. One of them, you must have heard of, is the activation spell that almost paralyzed the mechanical civilization!"

"Hiss..." seer took a deep breath when he heard that. "Activation technique? He created it?"

The activation technique that allowed the machinery to be directly activated and turned into the biological system, and almost destroyed the second Overlord's strongest mechanical army, was actually created by him. He was truly a big shot!

The principal nodded. "That guy is very talented. Although he is not as experienced as the other liches, I admire him very much in the academic field."

Seer asked, "Then what is the second technique?"

The principal narrowed his eyes and said, "Ancient model decomposition!"

"This? Isn't it a very common field?" Seer asked curiously.

Ancient model decomposition was a topic that the biology department had never given up on, even though there had been no progress.

"It's different...". The principal shook his head. "In order to understand the mystery of ancient genes, that guy also learned mechanical knowledge. He used divine arts, mechanical engineering, genetic engineering, occult engineering, and other fields to combine them. Finally, he started the creation of an ancient species that was simulated by artificial mechanical cells, which was the creation of life that many theology departments strongly opposed."

"He wanted to use this template to unlock the secret code of the ancient creatures, including the genetic code of the gods. This experiment was opposed by everyone, including the Academy of the Gods Union. He also warned Sylvanas severely, forbidding Sandro from using the genes of the gods as an experiment."

"What happened after that?" Rainy girl could not help but interrupt.

This was the first time she heard about the secrets of the universe. She felt extremely excited. It turned out that there was such a Wonderful World and history in the vast starry sky!

Suddenly, she really wanted to explore it.

The principal said, "Later on, that guy was naturally kept hidden for a period of time, but he did not completely give up on the experiment. Under the circumstances where he could not study the gods, he chose some ancient life forms that were as ancient as the gods, including Titan and the ancient Dragon System!"

"Did the federation not stop him this time?" Xi Ye asked doubtfully.

"No...". The principal shook his head. "The internal department of Sylvanas hoped that Sandro would succeed. Cracking the life code would not only give them a chance to resurrect the undead, but also create more powerful biological weapons. The Northern Star area has always been disliked by people."

Naturally, they also wanted to control more powerful forces. Thus, the experiment began slowly while Sylvanas turned a blind eye to it.”

“What happened after that?” Xi Ye and rainy girl asked in unison.

“That guy was sealed by force...”. The principal smiled and said, “The specific reason is unknown. I only know that Guan had a disagreement with this experiment in the North Star Field. Sylvanas personally expelled that guy to the death realm and erased all the experimental data. Even some of the data recorded by my teacher was forcefully destroyed by Sylvanas. Although this matter was not made public, many elders in the advanced academic world knew about it.”

“Personally...” seer lowered her head slightly. “He created the activation technique, so he should be highly regarded, right? What kind of thing could make Empress XI so merciless as to directly expel him?”

Seer knew very well that for the undead, returning to the world of death was the cruelest way to do it, because those who had experienced death would never want to experience it a second time.

“I don’t know...” the principal shook his head and said, “But my teacher once warned me not to try to join in the fun. What that guy created is a taboo!”

“Such a powerful person...” seer touched his metal helmet chin. “It’s a bit troublesome...”

“A bit troublesome?” The principal’s eyelids twitched as he thought to himself, ‘this guy isn’t afraid of the wind blowing his tongue out.’

“Principal, can you do this lord a favor?”

“What favor?” The principal said warily, “If you’re asking me if I can directly talk to this old man, I’ll tell you that it’s impossible... this old man still wants to live a few more years...”

“Of course not...” Xi ye smiled. “Principal, can you help cover up the spatial traces?”

Chapter 936: Attitude Change...

New Territories:

The two TIA sisters and Bertrand had been in Gondorin for more than ten days. As usual, they had been arranging classes until the night before they had a chance to rest. The three of them were waiting for their dinner in the dog egg restaurant with tired faces.

“Sister, why are there only the three of us here?” Emma leaned on the table and said weakly, “It’s been a tiring day. There are so many people in class...”

“It’s only right to work hard with so much salary...” Tia took a sip of the sour plum soup given by the boss and revealed a satisfied expression.

“Actually, it’s not that hard, right?” Burlens, who had been looking at seer the most displeased, suddenly said gloomily, “These students are easier to teach than I thought. Although there’s a lot of them, it’s really not that tiring to teach them...”

The two sisters fell silent.

What was the most tiring situation for a teacher? Naturally, it was when a cow would pull a ditch after teaching it three times, but when a person taught it ten times, it would be useless!

In this situation, they interned at the secondary and primary schools affiliated to the school. When they taught those students with lower aptitude, they experienced it firsthand. Sometimes, they really had the urge to slap them to death.

However, it was completely different here. Basically, all the students would not let them teach them a second time, especially those elves. They could learn almost all the movements in one go, and their efficiency was much higher than when they learned it with their own group.

This made them feel that they would lose their jobs if they did not teach them for two years...

Where did seer get such a bunch of freaks?

After being embarrassed for a while, TIA was the first to sigh and say softly, "To be honest, I originally thought that cousin seer would deliberately invite us over to make things difficult for us. In the end, whether it was the working environment or the content of the job, it was not as difficult as I imagined. By the way, how many planets does cousin have? Isn't it rumored that he's doing very badly?"

Once these words came out, Emma and Bailuns instantly fell silent.

Back then, Seer had used a large amount of the family's resources during her 10,000 years of schooling at the deity academy, causing many of her children's resources to be diluted and causing him to become notorious, in the end, when the old patriarch wanted to buy seer a grade-9 planet, the entire family openly opposed it. In the end, she successfully made seer become a wandering deity and also became a laughingstock in the surrounding noble circles.

As the various branches that had personally forced Xi ye into becoming a wandering overlord, they naturally hoped that Xi Ye would live as miserably as possible. Hence, when Xi ye first came back and applied to find a planet to become an official overlord., a group of clan disciples continued to mock him, thinking that he must have found a useless level 9 trash planet to come back and pretend to be proud!

However, they did not expect that the other party had applied for a level 8 planet with an energy mine, and had even obtained a bank investment of tens of billions in loans.

Many people also thought that seer was just lucky for the time being and found a mineral planet. It would not be able to develop any power at all, and it would not benefit the family at all.

In the end, someone later revealed that seer was hiring all sorts of tutors in the high-level talent market. It was obvious that there was quite a number of indigenous people within the territory of Seer's power.

Hence, various conspiracy theories started spreading in the family. Some said that Seer's power had the corrosion of the void, and the environment was harsh. Some also said that seer had made contact with the undead in the Northern Star region and was doing illegal outsourcing.

The reason was that since seer was developing so well, why didn't he come back to the family every time. It was obvious that Seer was feeling guilty...

However, everything that seer had come into contact with in the past few days was completely different from what the family was saying... ..

Seer truly had its own planet and was not doing outsourcing for the undead. Mars was an extremely well-modified grade-8 planet with rich energy ores, they had seen with their own eyes the production of the sophisticated mining equipment in Huaxia City base.

The planet that Mars was connected to was a high-quality grade-7 life star. It was said that it had a population of more than ten billion natives, and the local civilization was an iron civilization that was very easy to conquer... ..

They did not know how the people in their family would feel if they forced seer to travel in poverty and ended up with such a heaven-chosen opening?

Anyway, their mood is quite complicated now!

"I heard there is a planet next to Mars, also a Class 7 planet, there are more than seven billion people on it..." Bertrand also opened his mouth to say.

"What... Are you two trying to say?" Emma finally couldn't help asking.

"Ahem... . I mean, the seer seems to be doing well here, not as badly as the folks at home say... "Of course, he's just lucky. It's completely different from brother Ryan's results, which are achieved purely through his own efforts. It's still the right choice for the old patriarch to pass on his bloodline to brother Ryan!"

Emma: "..."

So, what are you trying to say?

Tia, on the other hand, saw through Bertrand and smiled. She knew that her cousin was being a little arrogant. Her family had always been hostile towards seer, and Bertrand was also one of the people who opposed seer.

But now, he was receiving a high salary and enjoying treatment that normal graduates could not enjoy...

At first, they thought that seer was trying to trick them. Just as brother Ryan had guessed, the environment here had been corroded by the void.

However, that was not the case. The environment and climate were quite good. At least, there were no side effects to the body, and there were no side effects at work.

After coming here for more than ten days, the work rhythm was very simple. In the morning, there was a unified public training class, and in the afternoon, there was a private body-building class for wealthy students. There was also a special commission for private classes. According to the amount of time spent in the class and the training results, there would be a performance score, according to the managers, if the performance points were high, they would be given a certain amount of bonuses.

At first, Emma thought that seer would do something to them, making it very difficult and deliberately finding excuses to deduct their performance points so as to lower their wages.

In the end, these students were surprisingly well-qualified and easy to teach. They could be taught almost once, and it was easy to teach them. Naturally, the training results were not bad. They would be given excellent grades every five days, although they did not know how much the bonuses would be, at least, in their eyes, the fact that their salary was not reduced was already considered a very good treatment.

Tia glanced at the proud bailence, she smiled and followed his words. "Although all of this is due to good luck, it is indeed a good thing for our family. At least the resources invested by the family for so many years have not been wasted. Oh, of course, they are definitely not as good as brother Ryan, but at least they will have a new place for the younger generation of the family in the future. When we go back, we can also mention it to the elders of the family."

"Yes..."blanc nodded reluctantly.

"Oh..."Emma nodded. "I understand now that cousin said so. isn't cousin Blanc just trying to praise cousin seer, and at the same time, he also wants to go to the family to correct cousin Seer's name?"

"Ahem..."blanc coughed violently, he quickly retorted, "Correct what name? That guy was just lucky. What's there to praise? I just think that since he has a foothold, it's a good thing for the family. There's no need to keep fighting..." "..."

"Yes, yes, yes, cousin is right!" Seeing that Emma still wanted to argue, Tia quickly covered her mouth and smiled at bailence.

"HMPH..."bailence snorted coldly and turned his head away, not saying another word.

Tia looked at her prideful cousin and could not help but shake her head in amusement. However, a trace of worry rose in her heart. Cousin bailence's personality was more straightforward. If he really went to the family to face seer head-on, it might not be a good thing... ..

Chapter 937: Seer's Plan -PartpOne one)

Tia was a girl with a delicate mind. When she was young, her peers hated seer. However, she did not feel much because she was born too late, she did not enjoy the life that her elder brother had told her about before seer went to the Heavenly God Academy. Therefore, she did not feel much at that time.

However, as her elder brothers often complained about seer, blaming him for causing harm to everyone and making life more difficult for the many disciples, Tia went to find out about it out of curiosity. She wanted to know what kind of treatment seer received as a child of the branch family before entering the heavenly deity academy... ..

And the result of her secret investigation had shocked her greatly...

Because there was actually no difference at all!

Seer had indeed taken away nearly half of the family's resources back then, but the ones who were truly affected were the direct descendants other than Rennes, such as Cousin Bick, cousin Warren, and other core disciples who should have been heavily nurtured.

Unless the descendants of the branch families were very talented, they would be affected by the special allowance, but the ordinary branch family's descendants had always received the same basic treatment from the beginning to the end.

In other words, what her elder brother yearned for, how the descendants of the branch families received such good treatment before seer entered the Heavenly God Academy, did not exist at all. They had always been like that Bird...

But why did it become like this later on?

She secretly probed her foolish elder brother and discovered that his elder brother had also heard other people's words, so he was filled with righteous indignation... ..

Thinking about it, it made sense. Her elder brother was not much older than her. She had never experienced that era, so he definitely had not experienced it either. To put it bluntly, he was following the wind. After obtaining this truth, TIA did not know whether to laugh or cry at that time... ..

However, she got better later on. Since ancient times, when there was no wind, there would not be waves. To be able to dress so neatly, she must have been in the limelight. The key point was, where did this wind come from?

At that time, TIA was very curious and investigated again. Then, she was surprised to find that the core disciples who had really suffered from the loss of resources had never said anything about seer in public, on the contrary, it was the children of the branch families and the younger generation who did not have any conflict of interest who hated seer the most. They wanted to eat its meat and drink its blood!

She was so curious that she went to ask her father. At that time, her father was shocked and lectured her. He also sternly told her not to spread this idea around.

From then on, she understood that this matter was not that simple. As she grew up and became more sensible, she began to understand why her father was so nervous at that time, she also began to guess the origin of this seer hatred theory.

Now, the atmosphere in the family had been hyped up by people who were very hostile towards seer. The legitimate children who used to be the second uncle of the patriarch had been publicly isolated. If Cousin Bailens went back to clear seer's name, there might not be any good results...

Thinking of this, Tia decided to remind Bailens of this simple-minded fellow, thus, she said in a low voice, "Cousin, we have been entrusted by Big Brother Ryan to investigate whether Seer's forces have any unfavorable conditions for the family. What does Big Brother Ryan Think?"

"What's there to worry about?" Bertrand immediately frowned. "Big Brother Ryan's worries are reasonable. Seer's development speed is already abnormal. He is also thinking for the family, not against seer. Now that we have confirmed that seer is indeed fine, the truth is that Seer's establishment is a good thing for the Ardia family. As the next head of the family, Big Brother Ryan should also be happy!"

Emma said, "That's right!"

Tia frowned slightly and didn't know what to say. If she went any further, she would be questioning Ryan's character.

“That makes sense...”

Just as Tia didn't know how to persuade him, a familiar voice sounded behind her. They felt their scalps go numb when they heard the voice...

Why was this guy so elusive?

“Xi... My Lord...” Emma carefully turned around and looked at the armored man behind her. “When did you come?”

“Oh, since you ordered the black rhinoceros tenderloin, I actually wanted to say that the tenderloin of our black rhinoceros tenderloin is thicker, and it would be best if we ordered it medium-rare. However, I was very interested in the topic you guys talked about later, so I forgot to remind you about it for a moment...” . “...”

Hearing this, the scalps of TIA and the other two became even more numb. It could be said that it was the most embarrassing thing to gossip about people behind their backs and be exposed on the spot... “...” .

“I. . . What did I say wrong?” Being stared at by seer the whole time., finally, bailens could not help but raise his head and retort, “You were lucky in the first place. You Can't be compared to Big Brother Ryan. Don't think that you're amazing just because you have this luck. You owe the family a lot!”

Owe the family? Seer could not help but shake his head in amusement.

This Byron should be from third uncle's bloodline, right. As a direct descendant, he had indeed been dragged down by him. He could understand the resentment of these people, but he did not feel guilty...

Because he had not chosen this decision in the first place. This generation of the Aldia family had produced two extremely talented juniors, namely himself and Ryan. Under such circumstances, in order to make full use of their talents., old Man Chu and Old Man Long Jue had decided on a diversion plan together!

The plan was to use half of the resources to let him open up a path for the family to become a deity overlord, and use Ryan as the family's insurance to stabilize the foundation.

To put it bluntly, old man Chu had ambitions. He wanted to take advantage of the bonus of having two highly talented juniors in this wave to gamble on the opportunity for the Aldia family to become a deity clan, he had chosen to let the more highly-qualified old man take the risk.

However, the result was not satisfactory. The old man had obviously overestimated the Eldia family's wealth reserves and underestimated the extent to which the deity academy had cheated them out of money.

The final choice he faced was either to bet on seer with the resources that had stabilized his foundation (which was also Rennes' resources) , or to quickly stop the losses and preserve his foundation.

The old man chose the latter, but the huge financial losses naturally had to be taken care of by someone, so he became the scapegoat!

And after he was abandoned, Rennes became the future of the Eldia family. He, who had been suppressed by him all this time, was almost vicious in his counterattack. He had been slandering himself in all sorts of ways, very quickly, he became a waste of the Eldia family's huge amount of resources, and the main culprit that caused the treatment of many children to be reduced.

His father had been chased out of the position of patriarch, and his uncle's family had forced him to sell his genes. The old man could have stopped all of this, but he did not... ..

Seer naturally knew what the old man was thinking. After his investment in the path of a deity had failed, Rennes had become the future of the family. As long as his actions were not too excessive, he would turn a blind eye.

He could understand the old man's actions. It was to take into account the overall situation. But to say that he owed the family. He chuckled... ..

His aptitude had originally far surpassed Rennes. He had a bright future following the path of the Thunder Warrior. For the sake of the old man's ambition, he had gone to the deity academy. But now, he had become a sinner of the family?

What kind of joke was this?

Thinking of this, Seer looked at bailens with a smile. "Did you guys just say that Rennes sent you?"

The three of them immediately felt their scalps tighten. Tia took the lead and said, "Cousin, let me explain..."

"There's no need to explain. You've already made it very clear just now..." seer smiled and said, "It's normal for big brother to have such concerns. I can understand."

The three of them were stunned when they heard that. Bailence was also surprised at Seer's magnanimity. He stuttered, "Really... Really?"

"Why would I lie to You?" Seer smiled and said.

Bailence immediately had a good impression of seer. He quickly said, "Good bearing, brother. It seems that the family has a deep misunderstanding of you. Cousin, don't worry. When I go back, I will wash you with my brothers and sisters..."

Tia:" ..."

How could you talk like that?

"That's good..." seer smiled and said, "Well, I have something to ask you..."

"What is it? Cousin, just ask!" Byron said casually.

Seer: "Did Ryan give you anything before you came?"

As soon as he said that, the three people's faces immediately stiffened...

Chapter 938: Seer's plan (Part Two)

"What do you mean?" Bailun replied stiffly.

“Did I not make myself clear enough?” Seer smiled. “Since you are here to test me, Ryan must have given you something before you came, right?”

These words made the three of them look even more unsightly, bailun gritted his teeth and said, “What kind of person do you think brother Ryan is? “He just wants us to send in our resumes to test you. He doesn’t really intend to let us join your faction. He didn’t expect that you would accept us, Alright?”? “Do you think someone like Big Brother Ryan would make us betray the Liege?”

In the Federation’s Divine Law, betraying the Liege was a serious crime. Once there was evidence of this, the liege could be killed with just cause, no matter which family you came from, even if it was the royal family!

Tia’s face was also pale. When Seer appeared just now, she was actually very afraid, afraid that seer would use what she said just now as evidence to say that they had betrayed the Liege.

Once this crime was covered, even if they were not executed, their lives would be over!

“Cousin, i... We didn’t do anything...” Emma said with a sobbing tone.

Seer looked at Little Emma Gently. “I didn’t say what you did, so don’t be nervous. The answer to my question is, did Ryan give you anything?”

“It’s just some supplies...” Emma looked like she was about to cry. “Brother Ryan was afraid that we would be wronged here and affect our cultivation, so he gave us some supplies...”

“Oh? Is That So?” Seer looked at the other two.

Behance looked at seer with a livid expression. “Then what did you think it was? We signed a contract with the gods. How could we betray you?”

“Mm...” seer nodded. “Show it to me...”

These words made the faces of the three of them turn extremely ugly.

Among them, the ugliest one was Tia. Emma was simply aggrieved, Bertrand was angry, but she was the only one who was afraid.

Because Seer’s suspicion was acknowledged deep in her heart... ..

The wind that had formed in the family for so many years had long proved that Ryan was not as open and aboveboard as everyone appeared to be. This could be seen from the fact that they had deliberately sent Seer’s resume this time.

It was possible for Ryan to do such a thing.

Tia took a deep breath and calmly said, “Cousin, even if big brother Ryan wants to use us to do something, he can’t avoid the space station’s detection, right?”

Seer heard this and glanced at the other party. She smiled slightly. This cousin’s words were very shrewd.

It seemed like she was refuting her own suspicions with normal logic, but in reality, she was distancing herself from Ryan. Even if there was really something going on, it was Ryan who used them. They were ignorant... ..

“That’s right!” Bertrand became confident when he heard this. “The space station has conducted a full-scale inspection of us. Cousin, do you think there’s something wrong with the federal space station’s inspection as well?”

Seer was speechless as she looked at this blockhead. If the federal space station’s inspection was so foolproof, there wouldn’t have been so many accidents over the years!

“We’ll know if there are any problems after we see it. What are you guys so nervous about? I’m not going to snatch your stuff...” seer shrugged.

When bailens heard that, he directly slammed the high-grade nutrient fluids and various potions that Rennes gave him onto the table!

“Yo, the nutrient supplements produced by Galen company, the compressed canned Earth Dragon, the maintenance oil made from flan-type fruits...” seer looked at the things inside and couldn’t help but sigh. “Rennes is really willing to part with it...”

“HMPH!” Bertrand immediately snorted coldly. “Do you think that Big Brother Rennes is as Petty as you?”

“Old Mister Bilosi, do you see the problem?” Seer suddenly asked.

Bertrand was stunned. Who Was Bilosi?

Just as he was thinking, the surrounding space suddenly shook. Two old men appeared at the dining table without any warning, causing the hearts of Tia and the others to tense up.

They had seen these two people before. They seemed to be the principal of some footstep academy. Why was he here?

Bilosi carefully observed the pile of things belonging to Bertrand. His pupils contracted slightly as he reached out his hand that was full of wrinkles and gently brushed it. Following that, the few of them saw.., a sticky thread suddenly appeared on the originally very normal maintenance product. Upon closer inspection, one would discover that the thread connected to the sky, and one could not see the end of it at a glance.

Although they did not know what it was, their hearts sank.

“What a clever trick!” Bilosi narrowed his eyes and said, “Using the Karma Thread as a link is indeed not easy to be detected by the space station. However, to use this to calculate the coordinates here, the other party must have a top-notch prophet. What Force did you offend?”

“It’s hard to say...” Xi ye shook her head and then said to the two of them, “Both of you, take out your things too...”

“Wow! ! !” Emma cried out and rushed toward Xi ye to hug her feet. “Cousin, I really didn’t do anything. I didn’t know that there was such a thing on it! !”

Xi Ye looked at Emma. Emma looked very similar to her younger sister whom she had only met once. Her pupils were purplish-blue and her baby fat face could not be lost.

Seer's heart softened when she saw the girl cry. She gently picked Emma up, she pinched her red nose. "I didn't say it was your fault. You're all so silly. How could you have such tricks? Be Good, stop crying. Just take out the things..."

"You Really Don't blame us?" Emma choked.

"Why would I Blame You Kids?" Seer rolled his eyes at her. Although these dolls were of the same age as him, the difference in age was not small. In his eyes, they were no different from the younger generation, how could he blame them for being dissatisfied with Rennes?

Only then did Emma carefully take out the care products that Rennes had given her. Beside her, TIA also heaved a sigh of relief and took out the items.

Bilos waved his hand, and several transparent shards appeared on the care products at the same time. Countless threads intertwined on the shards and connected to the sky, giving people the feeling that the other end of the threads seemed to be pulling something.

Bilos gently placed his hand on the thread and closed his eyes to feel it. A few seconds later, he suddenly opened his eyes. "Kid, how did you offend the Burton Faction?"

Tia and the other two turned pale when they heard that. If the other party's words were not meant to scare them, then it proved that Rennes was really using them.

Seer frowned. "Can you calculate how long it will take for him to come over?"

Bilos: "Less than two days..."

"I see..." Xi ye pursed her lips.

The principal looked at Xi Ye, who still seemed calm, and could not help but ask curiously, "You seemed to have expected this?"

"Sort of..." Xi ye rubbed the uneasy little Emma's head and said calmly, "Principal, you saw the space passage we came from just now. Can you cut it off?"

The headmaster shook his head. "We need professional equipment to cut it off. Our School doesn't have it. I'm sure you don't have the level of civilization here..."

Seer nodded. He did not want to cut off the link directly because he did not want to give up on the new world completely.

"Then can you help hide this space link?"

The principal said, "That's not a problem, but it won't be hidden for long. The Bolton Force is a first-rate force, so it'll take some time to find you..."

"Don't worry..." Xi ye smiled. "He doesn't have the time..."

Chapter 939: Danger of infiltration...

“All players in the New World, please pay attention. All players in the New World, please pay attention. Due to special circumstances, the Lords will evacuate everyone within the next 24 hours. All adventure gamemode players, please stop your work as soon as possible and gather at the designated location. The Lords, please gather your population, resources, and property as soon as possible. Gather at the designated location. There will be no waiting!”

In the calm afternoon, such a piece of news was as shocking as a clap of thunder. The group of advanced players were stunned, especially the lord-class players who were developing rapidly. They were even more baffled, suddenly, they were asked to move? What was going on?

The cabbage tribe:

The cabbage tribe had a good meal as usual. She planned to go back to her tent and continue sleeping. Before she could get into the most comfortable sleeping position.., Alice rushed in and lifted her up like a puppy.

“Still sleeping? Didn’t you hear such a big thing?”

“Huh?” Little cabbage looked confused.

After hearing the news, the shareholders who rushed over couldn’t help but drool when they saw little cabbage hanging up. Was their lord really an auspicious treasure?

Wang Goudan was the first to cry. “What’s the situation? My family just spent a lot of money to build a few new shops. How can we just leave like that? Don’t we have some rules?”

“No, no, no...” little cabbage immediately stroked his head and comforted him. “If you go bankrupt, I’ll just take care of you...”

The emperor of the liver was also confused. “Why do we have to go back like everyone else? What if we move back to the territory we just conquered? If we leave, those wandering tribes will definitely take it back.”

Little cabbage: “Is that so... HMM, it’s fine. We can fight back then. It’ll just take some time...”

Goode si: “Did you say that this move is temporary or what does it mean? If it’s temporary, how many days will it take? The newly developed high-grade land has over ten thousand acres, and they all use high-grade soil. They all need a large number of people to manage and maintain it. If it’s more than ten days, these high-grade soil will be wasted!”

Bai Cai: “Er... F * ck, this is a little...”

Alice also sighed. “Not only that, our materials orders are also the same. They are all signed contracts. We have bought a large amount of new equipment to prepare for this. If all of us move back, many of the Lords will definitely reduce the demand. Then, we will suffer a huge loss in buying these equipment. You have to know that these equipment were bought with four times the leverage loan. Once this chain is broken, I’m afraid that we...” “...”

Little Cabbage:“(*) B * Wow! ! !”

Looking at little cabbage who was crying out loud, everyone rolled their eyes. Now they knew how powerful it was...

Little cabbage: "Dog Lord, this chief and you are irreconcilable enemies! !!"

Everyone: "..."

The Gondolin faction:

"It's a little troublesome..." on the conference table, Isabelle frowned.

"Is it that serious?" Pu Yunchuan said carefully, "Didn't they say that we should retreat for a while? If we want to come back, we should come back together. We can just restart it."

"You think so simply...". "...". Isabelle rolled her eyes at Pu Yunchuan and said, "The reason why our position has so much traffic is because of the strategic significance of the current situation. We can directly connect to the mutant forest. If the strategic significance is no longer there, the traffic will definitely be vastly different from the current situation "...". "..."

"Why wouldn't It Be There?" Pu Yunchuan was stunned.

"Sigh..." looking at the dumbfounded Pu Yunchuan, Isabelle sighed and explained, "Why do you think the Liege wants us to suddenly retreat back to the main base?"

"Uh..." Pu Yunchuan was stunned when he heard that, "Why?"

"Of course, there's a huge change!" Isabelle rolled her eyes at him. "Mars has such a large area of Lords, but they didn't let the players expand. Instead, they encouraged the players to come to the new world. Naturally, it's because the resources here are more abundant. Under such circumstances, they suddenly stopped the development of all the lords and directly called people back. Naturally, there's a huge change that can not be controlled. Under such a huge change, it's hard to say if our city's strategic position can be preserved...". "...". "..."

"AH..." Pu Yunchuan's expression turned bitter. "Then... then is there any hope of saving it?"

"You're the leader and you're asking me?" Isabelle said unhappily.

Pu Yunchuan said, "You're the leader, you're the leader..."

"I say, the two of you..." chief justice su changyun frowned. "This is a power conference, can the two of you be more serious..."

"Cough..." Isabelle's face was slightly red. She coughed lightly and said, "In short, we have to be prepared for the risk of losing our strategic location."

"Actually, it's not that bad...". "...". The leader of the developer team, ran Xiaojuan, said, "Our pillar industry is biochemical genetic surgery. This area is already far ahead of the market. Even if we change places, we can still rely on this to gain a foothold. It's just that our advantage is not as big as it is now. Strategic cities are things that can not be eaten for a lifetime. In the future, the star map will still have to rely on the progress of civilization!"

“That’s true...” Isabelle sighed. She had thought that the bonus would run out one day, but she didn’t expect it to come so soon.

“Make the announcement. Withdraw all the troops that are adventuring in the forest and gather all the Gondolin soldiers, including the newly-defected orcs. Ask them to organize their families and pack up their supplies. Sleeping bags and tents are necessary. There will be a lot of people going back. Huaxia City can’t hold them. We have to be ready to station them in the wild...” “...”

“You want to bring back the newly defected orcs?” Ran Xiaojuan frowned. “Didn’t they say that there was a huge change? Aren’t these newly defected orcs going to be inspected?”

They had noticed that there was something strange about the native forces of the new territories many days ago. The originally weak native Orcs had recently become more and more difficult to deal with, and their evolution speed had also started to increase, they were even able to catch up to the soldiers of a normal lord.

This made ran Xiaojuan, who had been studying first-line organisms, extremely sensitive.

Normal Beastmen would evolve quickly after being eroded by the black goat’s energy. However, most of them would turn into zombies due to the erosion of energy too quickly. This was the reason why Pu Yunchuan’s biochemical surgery was so popular, only after the surgery was strengthened could they withstand more black goat’s energy.

But how did those native beastmen withstand it?

Obviously, the problem behind this was not simple. Ran Xiaojuan had raised this question half a month ago, and Isabelle had reported it to the higher-ups as soon as possible, but the higher-ups had not given any feedback.

And this time, the large-scale retreat was actually so lax in accepting the new beastmen back to the main base? Was it really a good idea to casually accept some unknown people from the base camp?

Ran Xiaojuan’s vigilance was not unreasonable, because what she was worried about was actually happening in the new orc team they had accepted. A unique green-eyed troll secretly sneered when it heard the instructions from the higher-ups to pack up and retreat... ..

Chapter 940 the precise Li Goudan!

The Ice Crown faction:

“Goudan is back?” The Ice Crown faction, Lei Xue, and the others heaved a long sigh of relief when they saw the familiar warship at the dock. After the sudden attack last time, they were most worried about Li Goudan, who was still wandering outside.

“Wahahahaha, I said my status is very high, right? Look at so many people welcoming this Goudan!” Li Goudan stood at the dock with a smug look on her face. The first mate and the others who were familiar with her couldn’t help but curl their lips slightly.

“Finally back...” Wang ye floated in the air and looked at the familiar people at the dock. He was a little excited and felt a little eager to return home.

Actually, it was not that the sea exploration was not good. On the contrary, other than the strange Iceland incident, everything else on the exploration route was very interesting, especially after they arrived at the western islands.

The local customs and the charm of different cultures on different islands made him enjoy it very much. He even liked the life of exploration, but that didn't stop him from wanting to come back.

There were two reasons. The first was that he had reached the bottleneck of transformation. Because he didn't have the guidance of an elven teacher, he hadn't been able to successfully transform. He had long wanted to have an equal body like Eggface, so he desperately wanted to transform, he did not want to be treated like a mascot on the ship every day.

This was especially true for the mages who had just boarded the ship. Every one of them was filled with curiosity when they saw him. They wished that they could help him dissect the structure so that he would be careful while he slept.

The second reason was that they heard that elder long had taken over Huaxia City, and it was said that many of his comrades had been arranged by Elder Long to go to the Sea of stars!

This news made him very excited, and he couldn't wait to meet his old comrades.

Exploring a new world was wonderful, but if he could have a group of comrades who were close to him, it would be the most wonderful thing in the world, right?

“Yo-ho! !”

When the ship was still more than ten nautical miles away from the port, Goudan couldn't wait to jump off the mast and glide all the way, which made Wang Ye very envious.

The ability to fly was something that any human would yearn for, especially a soldier like Wang Ye.

He didn't know what he would transform into... .. Wang Ye looked at himself. Compared to the beginning, he grew out small limbs from a pure sphere, but he didn't have wings. Obviously, he wasn't fated to be a wind demon.

“Little Xue, did you miss me? ! You escaped halfway!” Li Goudan grabbed Lei Xue's black dot and said.

Xue Lei smiled embarrassedly, “Sorry, Boss, I won't do it again...”

“I hope not!” Goudan Li glared at her.

“Goudan, you're finally back...” icicle quickly said, “I almost thought you wouldn't make it in time...”

“What?” Goudan Li was stunned, “Is a small cabbage holding a large banquet again? What a luxurious guy...”

“No...”Xue lei also said seriously, “The Lord asked all the players to evacuate from the New World. The deadline is 12 o’clock tonight...”

“All the players are evacuated? Is that true?”Goudan was stunned. “Did something happen?”

When she said this, Goudan Li had a strange feeling in her heart because she remembered what the guy in her body said two days ago.

“There’s a high chance that your lord is going to die...”

Initially, she had not taken this mysterious guy seriously. How Awesome was her lord? What did she know? As one of the first players to encounter a void monster on Mars., she was also one of the few players who had personally witnessed the void monster tearing space apart. She did not believe that there was anything that could stump her lord.

Even such a powerful thing had been suppressed by a Lord, and you’re telling me that the Lord is finished?

Yet another scaremonger...

However, the moment he heard the news that everyone had withdrawn, Goudan Li suddenly felt uncertain... ..

“It’s useless...”just as Goudan Li felt a chill run down his spine., the voice that had not spoken for the past few days appeared again. “The Lord of the biology class is very good at tracking. Even if it’s spatial teleportation, they can still find traces of you. You want to leave after being targeted? Your Lord is a little naive...”

“Shut Up!”Goudan could not help but have black lines on his face.

Ice Cap:“? ? ?”

“Uh... I’m not talking about you...”Li Goudan hurriedly said.

Lei Xue:“...”

When Li Goudan saw this, he knew that he could not explain for a moment. Hence, he changed the topic and said, “Then wouldn’t this have a huge impact on our faction?”

“It’s Alright...” . “...”. Bing Guan shook his head and said, “We haven’t done much in terms of exporting to the outside world, and we only rely on exporting a little seafood to earn pocket money. Moreover, we have already mastered the technology of sea water cultivation, so we can still cultivate and sell fresh seafood to Wang Goudan when we return to Mars. On the other hand, the lords with large assets are slightly injured this time, especially the cabbage with the largest plate. If the Lords don’t cut her interest rate, she might even go bankrupt...” . “...”

“That bad?”Li Goudan said with a smile.

Ice Cap: “Why are you gloating?”

Li Goudan: “Who told her to flaunt her wealth every day? Isn’t it natural for poor people to dislike rich people?”

Ice Cap was silent for a few seconds, then nodded and said, "That makes sense, but... you're also a rich person, right?"

Candy bean finally interrupted, "How was the harvest this time?"

"Not bad!" Li Goudan grinned, "I used the small products you guys gave me to trick a lot of wild wizards and some declining wizard families. There are at least a thousand people in total, and it can be sold for a lot of money!"

"Sell my ass!" Sugar pea immediately stomped his feet, "Only a thousand people? We don't even have enough for ourselves. Leave all of them for me, and I can train some people to help with the experiment..."

Ice Cap twitched his mouth when he heard that. In the current situation, he estimated that he would have to sell some of them. Taking responsibility would definitely make people jealous.

"Let's go back first..." ice cap said, "I've moved the population and equipment back. I'll wait for you here."

Li Goudan: "Okay..."

"Listen to me..." just as Li Goudan agreed with a smile, that voice appeared again: "It's very dangerous here, hurry up and leave. I know a way to teleport to a new place. With your talent, you'll have a better life in the star-ranked federation. You Don't have to worry about the issue of the deity's contract on you. The Moment Your Lord is done for, I'll help you eliminate the influence of the contract first. When that time comes, you'll be able to leap like a fish in the sea. You'll have achievements that you can't Imagine!"

"Shut the F * ck up! !" Li Goudan roared angrily.

Everyone stared at Li Goudan in shock. Even candy bean couldn't help but ask, "What's wrong with you, Goudan? Are you out of your mind?"

Li Goudan looked at everyone's expression and stomped his feet in frustration. "You guys can come from behind. I'll go back and check on my mother first..."

With that, he spread his wings in frustration and flew toward the teleportation point in Cloud City.
