

Read I Have A City In An Alternate World Chapter 2401 - 2401 The cause and effect (1)

2401 The cause and effect (1)

The system's video ended, but Tang Zhen was still immersed in shock and was unable to extricate himself for a long time.

"Is this really me?"

His heart was full of questions. He felt like he had a dream, which was so real that he couldn't wake up.

In this dream, he could trust the horse's reins, even if he imagined himself as a God.

However, a dream was still a dream and not reality.

At this moment, Tang Zhen still did not dare to believe the answer he had obtained. This was because this was too unbelievable.

At this moment, the system sent him another message.

[are you still not going to wake up?]

"Wake up? how?"

Tang Zhen's face was at a loss. I am me. How can I wake up?

Everything in the video seemed like a story. Was it really related to him?

A series of question marks kept appearing in his mind, and the more he thought about it, the more confused he became.

The mystery of the mission was here. Tang Zhen had indeed found it, but it made him fall into an even bigger mystery.

In fact, the system had already explained everything clearly, but just like a person who had forgotten everything in the past, even if he told him his experience, he would not be able to recall any relevant information.

Tang Zhen was in such a state. The damage caused by the God slaying virus was far more terrifying than he had imagined.

However, compared to the clueless past, the current Tang Zhen already knew the truth of the matter. Moreover, a seed of doubt had been planted in his heart.

As the seed continued to grow, and the influence of the Godkiller virus gradually weakened, he would remember what he should remember sooner or later.

It didn't take long for Tang Zhen to turn around and leave, taking the diary with him.

He wanted to find the original owner of the diary to see who this guy was and whether the truth was as magical as he had written.

Tang Zhen walked through the wilderness that was covered with bones and embarked on his search.

When the other party left, he didn't leave behind any clues, and the system didn't give him any prompts in this regard.

This was a rather difficult task. The success rate was very low, but Tang Zhen still chose to search slowly.

The days passed, and he had no idea how far he had walked or how many ruins he had passed.

Whenever he encountered a monster blocking his way, he would kill it in passing and then turn around and leave without looking.

To the current Tang Zhen, cultivation resources were of no use. This was because he could feel his strength increasing at every moment.

The power that originally belonged to him had now been unsealed and was constantly returning and awakening.

Tang Zhen did not really like this feeling. This was because he had already started to feel a faint sense of rejection. It seemed that he would leave this world after waiting for a certain degree.

This method of being forced to leave was not the result that Tang Zhen wanted. Moreover, he had yet to think about the things that he should be thinking about.

If possible, he hoped that he could stay longer and find the answer he wanted.

Just like how he could not remember who he was, Tang Zhen was similarly unable to control the growth of his strength. He did not know what kind of changes would happen next.

His path of exploration continued, like a persistent seeker, fearless of the wind and rain, burying his head and moving forward.

During this period, he had also encountered survivors. If he could help them, he would do his best. After all, there were only a few humans left.

Billions of living beings turned into bones, but they were not conspicuous after being scattered on the ground. However, it also caused the probability of encountering survivors to become smaller and smaller.

However, there were times when Tang Zhen would directly take action and eliminate some evil fellows.

They had already lost their humanity and were no longer worthy of being called humans. Keeping them would only be a waste of precious living resources.

Throughout the entire process, Tang Zhen did not find any traces of the diary's owner. However, he had a feeling in his heart that faintly pointed out the direction to go.

Just like this, they walked for nearly half a year before Tang Zhen arrived at the shore of the ocean. There was no longer any path ahead.

If he wanted to continue, he had to find a way to cross the sea.

A thought emerged in Tang Zhen's heart as he looked at the vast and boundless ocean. Perhaps, he could fly across this vast ocean.

As soon as this thought appeared in his mind, he realized that his body had really left the ground and was slowly floating towards the sky.

It was as if he could fly to a higher place and even leave this world if he wanted to.

Unknowingly, Tang Zhen had already been reborn and possessed an even more powerful strength.

Tang Zhen still did not leave. This was because he had yet to find the answer he wanted. He did not know where he could go after leaving.

After entering the ocean, the feeling in his heart became stronger and stronger. The goal he was pursuing should be in the ocean.

So he followed that feeling and continued to move deeper into the ocean until an Island appeared in front of him.

There was something strange on the island. It looked like the remains of a building, but the mysterious runes on the stone pillars proved that it was definitely not an ordinary building.

Tang Zhen had a feeling that he was a step too late.

Then, he saw a line of familiar otherworldly words carved on a stone. It was a sentence left for him.

“Sir Tang Zhen, goodbye, or I won’t see you again!”

Tang Zhen felt a very special emotion from this line of words. The diary’s owner must have had very complicated feelings when he wrote this line of words after class.

Tang Zhen was silent as he watched for a moment. Suddenly, he shook his head and revealed a faint smile.

The dust-covered memories kept emerging, and his temperament was also constantly changing, as if he had suddenly become another person.

The ocean, the island, and everything around him disappeared in an instant.

In the entire world, he seemed to be the only one who existed, and he seemed extremely lonely.

“So that’s how it is, hehe.”

A slightly cold voice rang out. There was a hint of laziness in the tone, as if he had just woken up from a dream.

the Godkiller virus, huh? interesting. Even I was almost hit by it.

“No, you’ve already been tricked.”

A figure appeared. It was the clone that had been following someone along the way. He spoke in a calm tone.

“Yeah, we almost ruined the big thing, Yingluo.”

Tang Zhen shook his head and sighed. There was a faint fear in his heart. In the face of something like the Godkiller virus, even a God would fall.

fortunately, we are different from the native gods and can solve the problem from the root. We don’t need to sleep like him and watch ourselves being devoured.

But I really didn’t expect that the divine source he used to trade would have so many problems, almost killing me!

This matter isn’t over yet. If there’s an opportunity in the future, I must have a good chat with him.”

Tang Zhen's expression was calm, but his tone was as cold as ice. Killing intent flashed in his eyes.

This guy must know that the Godkiller virus can spread, but he still made a deal and hid the hidden danger. It's obvious that he wants to trick us.

What we can be sure of now is that this guy has definitely guessed our actions and knows that the God Kingdom can not be preserved. He will definitely be brought into the world of loucheng.

"Thus, I took advantage of the opportunity to make a deal with you and played the Golden Cicada shedding its shell. Then, I used your divine source to recover my strength.

After all, every wisp of the world's energy in this world comes from you. If he wants to recover his previous strength, he'll probably have to suck you dry.

If I'm not wrong, if we hadn't acted in time, this guy would've very likely obtained enough power to further snatch your divine source, or even take over your divine source like a dove occupying a magpie's nest.

Compared to the deicidal disease, this fellow is actually more dangerous and more difficult to deal with!"

The clone couldn't help but sneer, " "This guy is cunning and sly. After he sensed my existence, he immediately fled from his original lair and acted very decisively.

When he realized that you were chasing after him, he simply ran away from this world. He really ran faster than a rabbit!"

2402 Departure (1)

"Since you've woken up, should we leave immediately?"

From the beginning until now, his main body had already gone through three cold and summer days in this strange world.

In the past three years, the world had undergone earth-shaking changes, from the very beginning of a technological world to what it was today.

There were less than 100 million humans left who once ruled the entire world, scattered in all corners of the world.

They struggled at death's door, living in fear every day, afraid that they would become the monster's delicious meal.

Among these survivors, there were many cultivators. They became the Guardians of the remaining humans, ensuring that the last spark would not be extinguished.

In addition to the heavy losses suffered by humans, the same was true for plants and animals. More than 90% of the species had been completely extinct.

From time to time, he could see withered trees and yellow weeds, which carried a strong aura of death.

However, they were replaced by a variety of new plants. Compared to the original plants, they had an additional ability to absorb energy.

This was actually a kind of evolution. It represented the complete transformation from a scientific and technological civilization to a cultivation civilization. Whether it was the surviving humans or the new species, they were all adapting to this new environment.

As for what the future would be like, no one could be sure unless they were the master of this world.

A true master could control the entire world, like a creator, and not the self-righteous master of humans.

Tang Zhen shook his head after hearing the clone's words.

"Don't worry, I still have some things to deal with. It won't be too late to leave after that.

If you have something to do, you can leave first and leave the rest to me. "

Tang Zhen spoke in a faint voice. His gaze seemed to have penetrated through the empty space and looked at some unknown region.

He didn't have to do his things, but he didn't want to leave just like that. It was better to finish what he started.

"Are you sure you're really fine?"

The clone asked Tang Zhen. He was worried that his main body had yet to completely wake up and would once again fall into a state of deep sleep.

Of course, the possibility of such a thing happening was very low. When the main body was in deep sleep, he was an ordinary person. However, when he woke up, he was a true God.

The powerful part of the Godkiller virus was that it could make the infected fall into a deep sleep and then harm them without restraint.

However, when the infected woke up and knew the danger they were facing, the threat of the Godkiller virus was almost negligible.

At this moment, Tang Zhen could clean up the Godkiller virus at any time if he wanted to.

"I said, no problem."

Tang Zhen nodded. His tone was very firm.

that's good. I'll take my leave first. Be careful.

As soon as the clone finished speaking, he had already left this world and returned to the tower world.

Several years had passed in the blink of an eye, but there were some things that he had to deal with personally. However, because he could not get away, some things had been squeezed out for a long time.

He left in a hurry because he planned to deal with the matter first and then return.

Tang Zhen was silent for a moment before his figure disappeared. When he reappeared, he had already returned to his base in this world.

The huge fortress had been modified and was now like an iron wall, strong enough to resist any monster attack.

All kinds of weapons were firmly controlled within a radius of dozens of kilometers. Even the slightest movement could not be hidden from the survivors in the fortress.

Tang Zhen looked down from above and watched everything in the fortress. His eyes were as calm as water.

Those who were familiar with him would understand the meaning of this look. It was obvious that he still had something in his heart.

Even if it was just a parallel world, those familiar figures were still things that Tang Zhen was unable to casually give up.

Therefore, before he left, he had to settle things properly so that he could leave with peace of mind.

Tang Zhen's figure instantly appeared in the heavily guarded fortress, causing sun Daquan and the others, who had gathered together, to be stunned.

After not hearing any news from Tang Zhen for a long time, they thought that he had met with a mishap. However, it seemed that this was not the case.

He was just busy and had not returned, not because he had encountered an accident. Otherwise, how could they be safe and sound?

The relationship between master and servant made it impossible for them to live alone after leaving Tang Zhen, because the controller would take their lives at the first moment.

At the same time, they were certain that Tang Zhen did not use a smokescreen to appear. Instead, he had used a teleportation technique.

To them, this was a true God of the land. With a single thought, he could travel ten thousand miles in an instant.

so master's strength has already reached such a powerful level!

Sun Daquan and the others secretly rejoiced in their hearts. They had been following Tang Zhen all day long, so they naturally hoped that he would become stronger.

In this way, no one would dare to provoke them easily, and they could take advantage of the Tiger's might.

In fact, after the construction of the fortress, they had encountered threats more than once, but each time they had successfully defeated the enemy.

This was partly due to the efforts of the survivors, but the main reason was the various supplies that Tang Zhen had prepared for them.

It was because of these extremely precious survival and training resources that the survivors in the fortress were able to survive crisis after crisis and become the safest sanctuary in the hearts of the survivors.

If it wasn't for Tang Zhen, it would have been impossible for them to last until now. They might have already turned into bones.

When they saw Tang Zhen, everyone's faces were filled with excitement as they came over to pay their respects.

"His Excellency Tang Zhen has returned!"

hahaha, with Sir Tang Zhen, we won't have to be afraid of the monster's attack.

where is he? hurry up and pay your respects. Don't be rude.

As the group of survivors spoke, they continuously swarmed toward Tang Zhen's position with faces full of excitement.

Without Tang Zhen, the survivors always felt guilty, afraid that their nest would be attacked by monsters.

After experiencing those painful days of survival, a safe fortress was like heaven to them.

Tang Zhen was the guarantee to maintain heaven's existence. His position in the survivors' hearts was extraordinary, which was why the group of survivors were so excited after his return.

Looking at the surrounding survivors, Tang Zhen gently nodded his head in response to everyone.

At this moment, a piercing alarm sounded in the fortress, and the survivors on the wall screamed in fear.

monsters are attacking. Countless moans.

The joy on the survivors' faces faded and a trace of panic appeared, but they still rushed to the top of the wall without hesitation to prepare for battle.

Then, everyone saw that among the ruins, countless monsters were like waves, surrounding the fortress.

There were also some monsters that were the size of small mountains. They were twenty to thirty meters tall and looked extremely terrifying.

After seeing these monsters, the survivors could no longer remain calm because they knew the strength of these giant monsters. They were simply a terrifying existence.

"What do we do?"

The survivors were frightened and uneasy. They thought about how to solve the crisis, and then they all thought of Tang Zhen.

"That's right, he should be able to solve the crisis!"

When the survivors thought of this, they all looked at Tang Zhen's position and saw that he was already flying towards the monsters.

Compared to those terrifying monsters, Tang Zhen's body was extremely small, as if he would be swallowed at any time.

However, as he waved his hand, the monsters were all enveloped in flames and turned into ashes in an instant.

The survivors were dumbfounded, and then they burst into cheers. They never dreamed that a disaster would be so easily resolved.

At this moment, Tang Zhen suddenly turned around and waved his hand at the fortress. After which, a semi-circular energy shield covered the fortress and the nearby ground.

“With this protective circle, you don’t have to worry about monster attacks. But if you want to become stronger, you need to keep hunting monsters.

This is the last help I can give you. It’s all up to you to resist the monster’s attack and let mankind rise again.”

After Tang Zhen finished speaking, he glanced at this world that was filled with scars. After which, he disappeared from the world.

2403 The unknown land (1)

After Tang Zhen returned to the cracked territory, he started to cultivate in seclusion. No one knew where he went.

With the abilities of the Masters of creation, if they wanted to hide, it would be impossible to be easily discovered.

Therefore, when invading other worlds, encountering a creator-level cultivator was the most troublesome thing.

If he couldn’t kill the other party immediately, then it was almost impossible to kill the other party again.

Even if they could really kill it, they would have to pay a great amount of manpower and material resources, which was not worth it.

Therefore, every assassination attempt on the Masters of creation had to be done with all their might and carefully planned in advance.

The slightest mistake could lead to the failure of the operation.

As for the Aboriginal gods, they were only a special case.

Because he was in a deep sleep, he was at the mercy of the cultivators in Lou Cheng. Otherwise, how could a middle-rank deity be at the mercy of others?

On this matter, Tang Zhen and the others had gained a huge advantage.

Otherwise, how could cultivators like them destroy a God Kingdom and bring a mid-level deity to the world of loucheng?

Therefore, sometimes, luck was just as important.

Tang Zhen did not inform anyone about his closed-door cultivation because there was no need to.

Now that the Holy Dragon War zone and the cracked territory were on the right track, there was no need for Tang Zhen to appear in many matters. His greatest role now was to deter those who had bad intentions.

Regardless of whether he appeared or not, as long as he existed, no one would dare to have any evil thoughts about his territory.

In fact, there were very few internal disputes in the world of loucheng. For these Lords, land was the least valuable thing. They might not want it even if they were given it for free.

On the contrary, the lower-ranked battlefields were extremely chaotic internally, just like the wilderness battlefields back then, with endless infighting all year round.

Time passed slowly. Unknowingly, two years had already passed.

The war zone ranking battle in the world of loucheng had finally begun under the anticipation of everyone!

When this day arrived, the entire world of loucheng was in an uproar, as if it was a festive Festival.

For all battlefields, this was a very important matter that had to be closely watched.

One had to know that the ranking of the Warzone was related to the benefits that the tower and the cornerstone platform could enjoy. The higher the ranking, the more abundant the benefits.

They had to fight for this kind of benefit. Therefore, they had made sufficient preparations no matter which battle zone they were in.

Many of the original invasion plans were put aside for the time being. All the cultivators in loucheng city who were qualified to participate in the ranking competition of the war zone had already started to make preparations.

Tang Zhen had only received the notice at the last moment, so he only had a few years to prepare. Some cultivators in loucheng city had already started preparing for it decades ago.

If they could get a good result in the ranking battle, it would be very beneficial to the cultivators in the battle zone and Lou Cheng.

As for the specific rewards, they were different each time, but they were all extremely generous.

In particular, one thing was certain. This was a chance to reach the sky in one step.

Although the rules of the tower world seemed fair, the rule that the strong would become stronger still existed. The upper-level forces were always controlled by the strongest.

It was almost as difficult as ascending to the heavens to enter.

The opening of the war zone ranking station was equivalent to opening another window for the cultivators in loucheng. As long as they had enough ability, they would certainly get the corresponding reward.

Tang Zhen could be said to have achieved success and fame. His anticipation in this aspect was definitely not as strong as the other cultivators in the city.

This kind of indifferent attitude was actually a good thing. It was not a good thing to be bound by the heart of fame and fortune.

No matter what, the war zone ranking battle was a grand event that everyone would pay attention to. It was a Festival for the cultivators in loucheng.

On the day of the ranking battle, the cornerstone platforms of all the major battle zones all opened transmission channels to receive the cultivators of loucheng who were participating in the competition.

Pillars of light shot up into the sky, each pillar representing a foundation stone platform. These pillars of light penetrated deep into the clouds and finally disappeared into an unknown region.

The entire world of loucheng was filled with such a scene. In total, it was probably over a hundred million!

Such a magnificent scene only appeared once in a few thousand years. It was the first time for most cultivators to see it, so they were extremely excited.

all Lou Cheng cultivators who are participating in the battle zone ranking battle, please enter the teleportation channel immediately. You may not return this time. Those who are afraid should not enter!

The old and emotionless voice once again reminded the cultivators of Loucheng city who were participating in the ranking station of the war zone that this was not a game.

However, at this moment, no one would choose to retreat.

To the cultivators of Loucheng, the moment they chose their target, they were destined to never turn back!

After the warning, the teleportation channel began to flash, which meant that the teleportation had officially begun.

The cultivators of Lou city had been waiting for a long time. Without any hesitation, he stepped in and followed the slowly rising light pillar, completely leaving the floor world.

The cracked territory.

Tang Zhen looked at the transmission channel that had appeared in front of the foundation stone platform. His face carried a trace of curiosity as he walked in.

During these two years of waiting, Tang Zhen was not idle. Instead, he was constantly collecting information about the ranking battle.

In the end, he was surprised to find that there were no records of the war zone ranking battle. The participants' memories might have been erased, or the cornerstone platform might have banned the dissemination of related information.

What was the reason for such a situation to occur?

Tang Zhen was puzzled. Therefore, he had long been looking forward to starting the ranking battle as soon as possible to figure out what was going on.

After entering the portal, the familiar feeling came again. The scene in front of him was grotesque and variegated. His body was also twisted and disintegrated because of the teleportation.

With Tang Zhen's current strength, he was completely able to observe the teleportation process. Unfortunately, that feeling was extremely uncomfortable.

Sometimes, a simple thought seemed to take a century to complete. The feeling of being extremely slow but unable to get rid of it was simply devastating.

At times, in an instant, countless thoughts would pop up in his mind, almost causing his head to explode.

After an unknown period of time, the teleportation finally ended.

Tang Zhen immediately observed his surroundings. However, he discovered that he was in a huge underground space. The environment was extremely chaotic.

There were countless wooden coffins here, some of which had already been opened, and the rotten bodies were thrown everywhere.

The air was filled with a thick rancid smell, and from time to time, eerie will-o-wisps could be seen Dancing in the Dark.

“What is this place?”

A look of surprise flashed across Tang Zhen’s eyes. He did not expect to appear in such a place. Could it be that the battlefield of the war zone ranking battle was here?

What was the competition about? where were the other cultivators from Lou Cheng?

While many questions arose in his heart, Tang Zhen checked the condition of his body and discovered that his strength had been sealed once again.

His storage equipment and divine Kingdom in his mind were blocked, and many of his abilities could not be used. However, his energy body was still preserved.

this again? what’s the cornerstone platform doing? ”

Tang Zhen had experienced similar things many times. Therefore, he didn’t panic at all. Instead, he reached out and touched his belt lightly.

“Swish!”

A Black Balloon-like object suddenly popped out from his belt and wrapped around Tang Zhen’s body.

Soon after, the balloon appeared to have been pumped into a vacuum as it rapidly shriveled and wrapped around Tang Zhen’s body. It looked like a black tights with mysterious and profound symbols on its surface.

“Swish!”

Another clear ring sounded. A purple colored longsword appeared in Tang Zhen’s hand. It flickered with a light that caused one’s heart to palpitate.

2404 Back to the airship (1)

Seeing that the elemental spirit cultivators ‘leader was summoning reinforcements, Tang Zhen immediately withdrew from the crowd and decided to temporarily avoid the sharp edge.

The group of elemental spirit cultivators had the advantage in numbers. There were probably four to five thousand of them in total. He did not need to fight them head-on, as he would not be able to win either.

In addition, the leader of the elemental spirit cultivators was being held back and would no longer pose a threat to his retreat. If he did not leave now, when would he?

After circling around the camp a few times and avoiding the monsters that surrounded them, Tang Zhen chose a safe spot.

He took out a wooden stick-like object from his arms, broke it, and threw it on the ground. Soon, a flame appeared.

Immediately after, thick red smoke rose, forming a smoke pillar that could not be dispersed. It could also be clearly seen from a distance.

The elemental spirit cultivator called for his companions, while Tang Zhen also called for Gou to leave this increasingly dangerous place.

The leader of the elemental spirit cultivators in the distance naturally guessed that Tang Zhen was going to leave when he saw this. His face was full of unwillingness.

He could only watch Tang Zhen leave. However, he did not have any solution because he could not even protect himself.

“Don’t let me see you again, or else ...”

The leader of the primordial spirit cultivators thought hatefully. It could be said that he had suffered losses in all aspects during the confrontation with Tang Zhen.

He had never encountered such a situation before, so he couldn’t help but feel a sense of frustration.

During the process of observation, he unintentionally met Tang Zhen’s eyes. In the end, he saw the coldness in Tang Zhen’s eyes and the killing intent that he did not hide.

The enmity between the two sides had reached a point where they would not rest until one of them was dead. If there was a chance, they would definitely think of ways to kill the other party!

Other than killing intent, there was also a trace of a smile on Tang Zhen’s face. Only the victor had the qualifications to possess such a smile.

Clearly, Tang Zhen did not flee in a miserable state. Instead, he had shifted his position while he was at it. Moreover, he had even caused the enemy to pay a heavy price before he left.

It could be said that when facing an elemental spirit cultivator, Tang Zhen was completely a proud Victor and not a loser who fled in defeat.

When he realized that the leader of the elemental spirit cultivators was looking at him, Tang Zhen suddenly stretched out his hand and made a contemptuous gesture.

Although the cultural heritage was different, the leader of the elemental spirits could clearly see that Tang Zhen was scolding him.

Looking at the gloomy expression of the leader of the elemental spirit cultivators, Tang Zhen laughed out loud. He felt extremely happy in his heart.

The runic airship in the sky flew above their heads, and then a black shadow fell. It was a long rope.

For a cultivator like Tang Zhen, it was completely possible for him to cross the river on a Reed. Naturally, he could also rely on a rope to return to the runic dirigible.

Tang Zhen's body leaped up when he saw the rope sweep over his head. He directly grabbed the stone ring on the rope while he was in mid-air.

Stepping on the stone ring, Tang Zhen wrapped his body around the rope and quickly rose up with the rope.

The runic airship had a capstan-like device that could quickly lift the rope and let Tang Zhen return to the runic airship.

Tang Zhen, who was floating in midair, immediately became the focus of attention of all the cultivators on the ground. Their expressions were all different, and no one knew what they were thinking about.

It didn't take long for Tang Zhen to return to the runic dirigible and see the nervous Ergou.

"Your Excellency, you're finally back!"

Ergou's voice was trembling. The runic airship had been struck by lightning and he had almost fainted.

In the end, he was just an ordinary person. He had never seen such a battle before. However, ever since he met Tang Zhen, the things he encountered were more dangerous than the previous ones.

"You've done well, thank you for your hard work."

Tang Zhen nodded his head. No matter what Er Gou did, it wasn't an easy task for him to last until now.

"It's not hard, hehe hehe hehe."

Er Gou hurriedly replied. Being able to receive Tang Zhen's praise made him feel as if he had just eaten honey.

In fact, he had some regrets in his heart. He was unable to go down with Tang Zhen to hunt monsters and verify whether his cultivation was effective or not.

However, this thought only flashed through his mind. He was very clear about his own abilities. He knew that if he entered a group of monsters, it would be no different from actively seeking death.

If you want to live longer, you must understand your own strength and not take risks easily.

Tang Zhen removed the flight suit on his body and walked to the observation platform in front. He raised his head and looked at the sky that was covered with dark clouds.

Due to the influence of the yin energy, the dark clouds in the sky grew thicker and thicker, and lightning would appear out of thin air from time to time.

As it had been struck by lightning several times, it had subconsciously lowered its flying altitude. This way, it could indeed effectively avoid being struck by lightning.

However, from Tang Zhen's point of view, such a method was not suitable. If he could use this function to kill monsters, wouldn't it be killing two birds with one stone?

Not only could it charge the runic airship, but it could also be used to kill monsters and enemies. It was simply an excellent ground-fighting weapon that was delivered to the door.

"Get ready, I'm going to continue drawing lightning."

After hearing Tang Zhen's words, Er Gou was startled. He didn't want to experience that feeling of making people collapse again.

However, since Tang Zhen had given the order, he had no choice but to agree.

Tang Zhen didn't pay attention to Er Gou. Since he wanted to embark on the path of cultivation, how could he be unable to endure this little bit of pain?

If he really couldn't take it, then it was better to quit as soon as possible. Otherwise, he would face even more brutal situations in the future.

Tang Zhen walked to the control panel and controlled the runic airship, making it quickly fly towards the dark clouds in the sky.

“BOOM!”

Hearing the dense thunderclaps, ergou was so scared that he trembled, but he forced himself to stand still.

He seemed to have realized that this was the only path he had to take to become a cultivator, and he absolutely couldn't cower and run away.

As the runic airship continued to approach, the frequency of lightning appearing in the dark clouds became more and more dense. Especially when Tang Zhen took the initiative to activate the energy absorption device, the lightning immediately surged in succession.

The rune airships that were struck by lightning constantly emitted a piercing light, as if they could explode at any time.

Once again, dog two experienced the numbing feeling of collapse. It was as if there were countless ants crawling in his body, but he didn't know where they were.

This was actually the free energy running around in his body. If ergou became a real cultivator, he could gather and absorb the free energy, and then release it through special means.

Tang Zhen's expression did not change from the beginning until the end. It was as if he was not affected in the slightest. In fact, this was the case.

He focused his attention on the control panel, and after confirming that it was fully charged, he immediately locked onto a certain position on the ground.

A beam of light shot out from the runic airship and landed on the ground, hitting the ten-thousand head Marshal.

“Aooo!”

arghh! the ten-thousand head Marshal let out a blood-curdling screech. A large area of his body was charred. The eyes of the heads looked up at the sky at the same time, locking onto the runic airship that was floating.

It was a pity that the runic airship was in the air, and it could not attack it at all. It could only let out a depressed roar.

When the leader of the elemental spirit cultivators saw this, his expression changed. He did not expect Tang Zhen to attack the ten-thousand head general instead of him.

This meant that Tang Zhen wanted to kill steal and try to obtain the greatest benefits.

The ten-thousand-head general was also their target. Once it was snatched away by Tang Sanzang, they would have come here for nothing.

The problem was that they were being surrounded by the ten thousand head general and the headless Army. They were already struggling to protect themselves, so how could they kill them?

Tang Zhen's current actions could even be considered as helping them out of their predicament. As long as they killed the ten thousand head general, all the dangers would be solved.

2405 Leveling up and the battle ranking (1)

The eyes of the elemental spirit cultivator leader flickered when he saw the ten-thousand head general being struck by lightning. He wondered if he should snatch the monster.

If an elemental spirit cultivator participated in the snatching, he would definitely be attacked by Tang Zhen. He would never let others snatch his prey.

With the advantage of the runic airships, as long as he launched an attack from above, he would cause huge losses to the elemental spirit cultivators.

It would be a disaster for the elemental spirit cultivators if more than a hundred people were killed by Tang Zhen.

When the leader of the elemental spirits thought of this, he suddenly felt a headache.

This was because he had discovered that Tang Zhen was a jinx. It was best not to provoke him easily. Otherwise, he would be covered in dust.

forget it, there's no need to get tangled up in this kind of thing. If there's a chance in the future, Yingluo.

In the end, the leader chose to give up, but he was full of helplessness, because he was the one who was afraid this time.

He subconsciously wanted to be ruthless, but a strong sense of powerlessness rose in his heart. It would be ridiculous to say such ruthless words at this time.

The elemental spirit leader also thought of another thing. Even if Tang Zhen killed the ten-thousand head general, he would only get the energy to level up. He would definitely not get the spoils of war that dropped after killing the monster.

Tang Zhen definitely wouldn't dare to come down, so the reward would naturally belong to them. This meant that they would get half of the benefits from killing the ten-thousand head general, and they wouldn't have to do anything.

In addition, after the ten-thousand head general was attracted, the pressure on the elemental spirit cultivators was greatly reduced. If one were to calculate carefully, they actually had an advantage.

A smile appeared on the face of the leader of the elemental spirits. Indeed, when thinking from a different perspective, bad things could become good things.

everyone, listen up! Ignore the monsters that are being attacked by the lightning and focus on clearing the low-level monsters!

Upon hearing their leader's order, the elemental spirit cultivators immediately stayed away from the ten-thousand head general so that they would not be affected by its attack.

In fact, with their current level, it was extremely difficult for them to deal with the general of ten thousand heads. Now that they could avoid the battle, it was naturally what they wanted.

A wave of battle cries could be heard. It was the reinforcements from the entrance, with a total of more than 3000 people.

This was not all of their members, but a portion of them. If the elemental spirit cultivators in the nearby areas were added up, the total number had already exceeded 10000!

To be able to quickly gather more than ten thousand cultivators in loucheng, it meant that the elemental spirit battle zone was well prepared and was determined to get a high ranking.

While they were killing monsters to level up, they were also constantly collecting information and thinking of ways to improve their own strength.

They had even sent out a large number of people to seize the nearby cities and make them their base.

Compared to these stragglers, the elemental spirit war zone had a greater advantage. Once their plan succeeded, the nearby area would be completely controlled by the elemental spirit cultivators.

The loucheng cultivators, who had stayed in the headless Army's camp, had already fled in all directions to avoid being surrounded by the elemental spirit cultivators.

Within a short period of time, only the elemental spirit cultivators and the monsters were left in the headless Army's camp.

With the arrival of the reinforcements and no one causing trouble, the leader of the elemental spirits regained his calm and began to clear the monsters at a steady pace.

.....

Tang Zhen locked onto the position of the elemental spirit leader and did not launch an attack for a long time. Instead, he observed the other party's reaction.

He knew very well that even the lightning might not be able to kill the leader.

The biggest disadvantage of the lightning was that it could not attack continuously. Otherwise, it could kill all the elemental spirit cultivators and monsters with its eyes closed.

However, he couldn't do that now. Even though he had the advantage in the air, he still had to move carefully.

If he really angered the other party, even if he was in the sky, the other party would definitely be able to find a way to deal with him.

Tang Zhen knew very well how powerful the cultivators of Lou Cheng were. After all, he was one of them.

Even if the enemy couldn't fly in the air, they could also wait for the runic airships on the ground until they landed

At that time, Tang Zhen would suffer the crazy revenge of the elemental spirit cultivator. Tang Zhen, who had lost his air advantage, might not be the opponent of the elemental spirit cultivator.

Therefore, Tang Zhen would wait for the other party's reaction. If the elemental spirit cultivator tried to fight for it, then even if he did not want the benefits, he would still harm the other party.

The leader of the elemental spirits gave up fighting for it, which made Tang Zhen heave a sigh of relief.

He was basically snatching food from a Tiger's mouth. He had already succeeded halfway. The next thing he had to do was to kill the ten-thousand head general.

As for the spoils of war from killing the monsters, Tang Zhen no longer had any extravagant hopes. The thousands of elemental spirit cultivators in the severed head Ridge would definitely not let him obtain them.

Since he couldn't get the reward, he might as well give it up. It wouldn't be worth it if he put himself in danger because of it.

Apart from that, there was another reason. The dark clouds above severed head Ridge had appeared mainly because of the myriad head general.

After Tang Zhen killed the ten-thousand-head general, the dark clouds would most likely dissipate on their own. At that time, he would not be able to attack the elemental spirit cultivator even if he wanted to.

In a burst of lightning and thunder, the runic airship was fully charged and once again struck the ground with lightning.

With a deafening explosion, the ten-thousand head Marshal was hit again. The heads on the surface of his body flew everywhere.

The charred heads rolled around the camp and were picked up by the headless soldiers, who immediately placed them on their heads.

An unexpected scene occurred. The headless soldiers' combat power suddenly doubled.

Originally, they could only gather together and move under the command of the commander with the head. However, with the head, they could even move alone without any problems.

If it was just one headless soldier, it would not have affected the overall situation. However, all the headless soldiers who picked up their heads were like this, which greatly increased the pressure on the elemental spirit cultivator.

The helpless elemental spirit cultivators could only continuously pass the ball around, kicking away all the charred heads on the ground.

When the elemental spirit leader saw this, he deliberately pretended not to see it to avoid being angered by Tang Zhen again.

Tang Zhen had inadvertently caused trouble for the elemental spirit cultivators again. He did not know that in the heart of the elemental spirit leader, he had already been upgraded to the level of a jinx.

Tang Zhen couldn't be bothered with anything else. He controlled the runic airship to be struck by lightning continuously. When the energy was full, he would launch an attack on the ten-thousand head Marshal.

During this process, he kept an eye on the ten-thousand head General's health bar and looked at the dark clouds in the sky from time to time. He was afraid that the dark clouds would suddenly disperse before he killed the monster.

If that was the case, Tang Zhen would either be forced to leave and give the benefits to others.

He could either take the risk and return to the surface again, kill the general, and then face the pursuit of the elemental spirit cultivators.

Fortunately, the dark clouds in the sky did not dissipate even after the ten-thousand head General's health bar was emptied. This made Tang Zhen feel a sense of relief.

Tang Zhen suddenly felt as though he had broken free of his shackles after the huge and ugly figure fell to the ground. His entire body felt indescribably relaxed.

In fact, it was because he had broken several seals at once that he had such an illusion. Especially when his strength was sealed, this feeling was even more obvious.

However, the more this was the case, the more Tang Zhen could feel how great the gap was before and after his cultivation was sealed.

The feeling of being completely confined and only being able to move one's little finger was enough to drive an impatient person crazy.

Fortunately, the cultivators of Lou Cheng had gone through rigorous training and had super strong endurance. Therefore, even if their strength was sealed, they could still persist.

The moment Tang Zhen completed his advancement, a scene suddenly appeared in his mind. It was something similar to a list.

The first one was the overall ranking list of all 3000 battle zones participating in the competition. The ranking list was constantly changing.

The first place on the comprehensive list was the mysterious 1st battle District. Even though the competition had just begun, the 1st battle District still had the strength to suppress everyone.

Following them were the second and third Battle groups. Just like their names, they were ranked second and third.

Starting from the fourth place, the ranking was slightly chaotic, but it was still dominated by the battle zone with the "first" prefix.

Tang Zhen's 5th battle region was currently ranked 7th. They were suppressed by three other battle regions, and the situation was not looking good.

2406 There's a problem as expected _1

As the voice rang out, everyone's attention was focused on the person who spoke.

It was a teenager in a short gray robe. He had a loose appearance and many places were damaged and patched.

Other than that, there were also some dark-colored dyes that were firmly stuck to the clothes, like animal scales.

He wasn't very tall, and his skin was as pale as the other residents of the Heaven's Wall city. His fluffy and messy hair was tied up with a leather rope, which showed that he hadn't had a haircut for a long time.

He was different from his neighbor. He was a human, but not a pure human.

Humans were one of the human races, but the human race was not limited to humans. Many races in the great thousand world actually belonged to the human race.

"I was sleeping soundly, why did you wake me up?"

A lazy voice sounded, as if he had not woken up yet. There was a trace of impatience in his tone.

"Litt, this gentleman wants to see you!"

Allie said in a bad mood when she saw the lazy young man. The two of them had quarreled more than once, so their relationship was not good.

This was especially the case after he heard that his younger brother was being threatened. He became even more unhappy. If Tang Zhen wasn't here, he might have already gone to find the other party to judge.

"Yingluo?"

The young man named litt looked at Tang Zhen and yawned at the same time. He had a drowsy appearance.

The gaze he used to look at Tang Zhen was no different from the others.

However, Tang Zhen had already noticed that when li te saw him clearly, his pupils slightly contracted. This was a conditioned reflex when he was surprised.

If it was an energy life form, this would not happen. But a body of flesh and blood?

Some of his instinctive reactions were simply uncontrollable and could only be concealed as much as possible.

Litt concealed it very well, but his opponent was Tang Zhen. No change could escape his eyes.

“There’s indeed a problem!”

Tang Zhen discovered the abnormality of the young man and a trace of excitement flashed across his heart.

Competing with countless cultivators in the city had aroused a strong desire for battle in his heart. As his cultivation level continued to improve, he had not felt this feeling for a long time.

Only opponents of the same level could truly stimulate the desire to fight and try to prove that they were not weaker than others.

He believed that every cultivator from Lou Cheng who participated in the competition had the same idea. Obviously, in their eyes, only cultivator Lou Cheng was worthy of being their opponent.

Tang Zhen had discovered the abnormality of the young man. The other party had also clearly sensed that something was wrong with Tang Zhen. However, in such an environment, no one would take the initiative to open their mouths and expose him.

Hence, the young man turned around and complained to Allie’s mother, ” “I don’t even know them. Why would they see me? they’re disturbing my sleep, Yingluo.”

When Ritt spoke, he had already shrunk back and threw out a sentence in the dark.

“In the future, if such a situation occurs again, remember not to disturb me. You Must Remember This!”

Clang! Clang!

The sound of the door closing was very clear on the quiet street. It could be heard from far away.

“This bastard!”

Allie’s expression was very bad. She felt like she had been slapped in the face.

He had brought the honored guest here, but Litt had turned him away like this. It was simply impolite.

now you know why I hate him. This guy is so annoying. He has done similar things more than once and doesn't care about other people's feelings at all!

Ellie said in a hateful tone, but there was a trace of guilt in her eyes, as if she had failed in her duty.

"Why don't I go and call him again? let's see if he dares to refuse to open the door!"

Allie's fists were clenched tightly as she spoke, and she had the urge to punch out.

"It doesn't matter,"

Tang Zhen smiled. He appeared to be unconcerned, but he had already made up his mind in his heart.

There was a secret on this kid, and he had to figure it out later.

Of course, there was no need to rush this matter. They had to wait for a while. After all, this was the territory of the Heaven's Wall city, and there would be patrols passing by from time to time.

If the matter was blown up, Tang Zhen could forget about having a foothold in the Heaven's Wall city. He could only think of ways to escape from this place so as to avoid the fate of being hunted down by the entire city.

Although the process was a little troublesome, it was also limited by the conditions. Thinking about it from another perspective, it was even more fun.

"Sir, why don't I take you to other places first, such as finding a place to stay?"

Allie asked in a low voice, fulfilling her duty as a tour guide.

that's good too. After you help us find a place to stay, you can go home.

Tang Zhen nodded and bid farewell to Allie's mother. Then, Allie led him into the distance.

Although he didn't turn around, Tang Zhen could clearly feel that there seemed to be a pair of eyes peeking at him from behind Allie's neighbor's door.

This time, the three of them didn't take the 'elevator'. Instead, they walked along the street until they reached the end.

Suddenly, a cool breeze blew over, making people feel refreshed. Then, they saw the front suddenly open up.

The street had stopped at this point, and a wide platform had been opened up, covering an area of several acres.

Many residents of the Heaven's Wall city were here. Some were enjoying the sun and the breeze, while others were selling goods at stalls. There were shops all around the cliff.

this is the most prosperous area in the entire Street, and the same goes for the other streets. As long as it's close to the edge, it's basically a place where merchants gather.

While Allie introduced them, she also led Tang Zhen and the other two to a shop, saying that this was the best hotel on the entire Street.

Since Tang Zhen wasn't lacking in money, he naturally had to pick the best place.

Tang Zhen did not have any place to choose. Regardless of whether it was in the wilderness or other places, it did not affect his rest.

After rewarding Ai Li with a few small coins and telling her to come again tomorrow, Tang Zhen and ER Gou entered the hotel room.

"Your Excellency, are we just going to sit here and do nothing?"

Er Gou asked Tang Zhen. He could tell that Tang Zhen was very interested in litt and suspected that the other party was a wise man who hid his name.

of course not. I'm going to wait until night time to find out what chullet is doing.

Although his primary task was to kill monsters and level up, Tang Zhen felt that it was better to collect more information than to look for monsters everywhere.

At the same time, he had a feeling that it might not take long for the monsters to be so numerous that they would be endless.

Otherwise, why would he ask Lou Cheng to do it? Playing puzzle games, traveling in a group, and fighting with the air?

The monster would come out sooner or later, but before it did, he still had to work hard to accumulate his strength.

After Tang Zhen thought for a moment, he instructed ergou,"Here are 20 gold coins. Take them and walk around the city. See if you can find any information about the map and monsters.

If you come across a map for sale, just buy it. If you don't have enough money, come back and find me. ”

Ergou nodded. He kept the money bag close to his body and left the inn quietly.

Er Gou was actually very satisfied with the task that Tang Zhen had arranged. Not only could he help Tang Zhen, but he could also tour the Heaven's Wall city. It was simply killing two birds with one stone.

Although he had experienced some soul-shaking things with Tang Zhen, er Gou still hadn't adapted to this kind of life. He was very eager for fame and fortune.

If he had to choose, he would still prefer to live in the market, rather than the boring cultivation.

This was the difficulty of cultivation. To embark on the path of cultivation, one needed enough perseverance and perseverance. 90% of the Dao-seekers would eventually be eliminated.

Tang Zhen didn't mind er Gou's attitude. How many people could resist it when they first saw the world of flowers?

2407 Slowly becoming stronger (1)

The hundred beast garden of the city Lord's mansion was unusually lively today, and roars constantly spread out.

The residents of the Heaven's Wall city who passed by all had strange expressions on their faces. Then, they revealed perverted smiles.

After an entire day, the effects of the medicine finally dissipated. The diligent Black Dragon stopped working and then collapsed in the beast cage.

The Black Dragon, who had always been known for its strength, was now like a pool of mud, so weak that it seemed to be dying.

He was like a wild dog in the middle of the night, lying on the ground with his tongue hanging out and panting heavily.

“Good job!”

The Black Dragon was startled by the sudden voice. To the Black Dragon, the person who spoke was a complete demon.

It was because of this human that the Black Dragon understood one thing. Lust was like a steel knife that could cut through bones. Sex could really take a Dragon's life!

If it had a choice, it would definitely not want to experience this feeling, because the Black Dragon had already realized that Yu Sheng might not even be interested in female dragons.

At this moment, when he heard Tang Zhen's voice, the Black Dragon had a feeling that a great disaster was imminent. He wanted to get up and escape, but his legs were so soft that he did not have the slightest strength.

In the end, he could only helplessly accept his fate and close his eyes tightly.

Tang Zhen laughed softly when he saw the Black Dragon's hopeless expression. He did not continue to provoke this fellow.

The next step would be to see the results of his labor. If he couldn't satisfy Tang Zhen, then the Black Dragon would definitely have to continue to work hard in the following days.

The Black dragon's fate had already been decided the moment Tang Zhen had captured it. Although it would not lose its life, it would still need to put in a lot of effort.

Tang Zhen walked around the cage and checked the fertility of the wild beasts. He nodded his head in satisfaction and confirmed that the Black Dragon had done its best.

The Black Dragon didn't see this scene, or it would have burst into tears and rejoiced that it had escaped.

Soon after, Tang Zhen summoned a group of believers and directed them to move the beast cage. He was prepared to start the next step of the work.

Although they didn't understand Tang Zhen's purpose in transporting these beasts, the believers obediently followed his orders. This was because Tang Zhen had quite a high authority in the Heaven's Wall city.

With his frequent appearances during this period of time, almost all the residents of the Heaven's Wall city knew Tang Zhen. At the same time, they also knew that he was a person with real power in the Heaven's Wall city.

In such a chaotic situation, such a Big Shot would often hold the power to kill, making people feel both respect and fear.

Offending a figure like him was simply courting death. If Tang Zhen was willing, he could take a person's life in many ways.

Tang Zhen was very satisfied with this. He didn't care if he was good or evil in the eyes of the Heaven's Wall city's residents. It was fine as long as they were obedient.

After bringing the unconscious beast back to the laboratory, Tang Zhen continued to be busy to the extent that he forgot to eat and sleep.

Tang Zhen was the only one who could do the rest of the work. After all, he was the only one in the Heaven's Wall city who had mastered the artisan skill.

Due to his strength being sealed, Tang Zhen's work was slightly strenuous. However, it was fortunate that his energy was almost infinite, which made up for the disadvantage of his lack of strength.

You Jiu had come once during this period. His original intention was to ask Tang Zhen to rush the runic airship. However, when he saw that Tang Zhen was so busy that his feet were smoking, he quietly retreated.

Tang Zhen is working so hard. The two of us won't be able to watch the show. We'll work hard later and strive to finish it within a day!

Upon hearing Tang Zhen's words, the cultivator from loucheng who followed you Jiu nodded his head with a matter-of-fact expression.

In the process of seizing the Heaven's Wall city, Tang Zhen was the main participant. However, the next beneficiary would be all the cultivators in the loucheng of the fifth battle area.

It could be said that every cultivator in the building city of the fifth battle area was the owner of the Heaven's Wall city. After entering the city, they had the obligation to run and build this place.

Their efforts would not be in vain. After the competition ended, the cornerstone platform would definitely give the cultivators in loucheng corresponding rewards.

However, if they slacked off, the cornerstone platform would also punish them. The slots to participate in the competition were so precious, and every participant should do their best.

However, you Jiu was an exception. From the beginning to the end, he had a perfunctory attitude, as if he did not care about the results of the fifth battle group at all.

He had followed Tang Zhen to the Heaven's Wall city because Tang Zhen had saved him, not for the glory of the fifth battle area.

However, at this moment, you Jiu's expression became very serious. Those who knew him knew that this meant that he was starting to get serious.

You Jiu's strength wasn't weaker than Tang Zhen's, and she was a member of a special race. When she got serious, you Jiu would definitely be very terrifying.

Of course, this was a good thing. At the very least, he could share some of Tang Zhen's burden and no longer need to shoulder the entire plan.

Tang Zhen didn't know that you Jiu had come, but he was focused on his own work. By the time he finished all his work, another day and night had passed.

When he walked out of the laboratory, Tang Zhen found that the sunlight was a little glaring and slightly different from usual.

Abnormal weather often meant the beginning of a change, or perhaps a new wave of calamity was brewing.

Tang Zhen didn't mind. In any case, the situation would only become worse and worse until he couldn't even breathe.

Because of the full preparation for the war, the Heaven's Wall city had become very noisy, completely without the quiet atmosphere of the past.

Yet, Tang Zhen felt extremely good. He could sense a kind of persistence and struggle towards life from this noisy atmosphere.

The arrival of the catastrophe made the residents of the Heaven's Wall city at a loss, afraid that they would encounter a disaster.

The timely appearance of the church of the alarm bell and Tang Zhen allowed the bewildered and helpless residents of the Heaven's Wall city to see hope. Anyone who wanted to live would subconsciously obey orders.

Even if there were some people who did not obey the management, they could not cause much trouble. The moment they jumped out was often their last public appearance.

Don't ever feel the darkness. If you don't do this, you'll be the one dying.

Just as Tang Zhen was looking around, a runic airship slowly approached the forest outside tianxu city.

However, this time, it was not one but three runic airships. Two of them were obviously just completed.

As expected, there was strength in numbers. The runic airships, which originally needed some time to be completed, were put into use so quickly.

Compared to the runic airships made by Tang Zhen, these two runic airships were larger in size and had more firepower. They could be called armed airships.

One didn't need to look closely to know that this was the patrol team led by you Jiu. After completing their patrol of the Heaven's Wall city, they were returning to the Heaven's Wall city to rest.

This type of patrol might not be effective, but it was a very powerful deterrent to the enemy.

In addition to the patrol airships, the Heaven's Wall city's cannons were also aimed at the dense forest.

Don't think that the quality of the cannons in the manufacturing factory was poor. In fact, special rune cannons had been deployed, which could fire dozens of miles.

As long as the runic airship gave a signal, the artillery fire would arrive and send the enemy to hell.

This was also the reason why the enemy did not dare to act rashly. After the transformation, the Heaven's Wall city was an indestructible war fortress.

Launching an attack rashly was bound to be the outcome of being smashed to pieces.

Tang Zhen only took a few glances before retracting his attention. With you Jiu in charge of this matter, there should not be any problems.

Tang Zhen couldn't see through you Jiu, but he definitely had great abilities.

Tang Zhen sat on the platform of the attic to rest for a while before returning to the laboratory and preparing to continue his experiment.

Unexpectedly, just as he turned around, he saw a tall woman in a purple-red leather armor in the spacious garden below, staring at him.

When her eyes met with Tang Zhen's, that lady faintly smiled, causing the flowers in the surroundings to lose their luster.

2408 Tang Zhen's request (1)

The valley behind Holy Dragon City.

Tang Zhen opened his eyes and sized up his surroundings. After which, he stood up from the car.

As he stood up, there was a slight commotion in the surroundings. Several spiritual powers swept over quickly, but they quickly retreated.

They didn't dare to investigate too much in order to avoid attracting Tang Zhen's anger. They only needed to confirm that he had already woken up.

"Sir Tang Zhen, congratulations on waking up from your deep sleep. May I know what instructions you have?"

The intelligent system's voice sounded. There was a trace of excitement in its tone. Clearly, it also knew that Tang Zhen had encountered danger. Otherwise, it would not have been in a deep sleep for such a long time.

However, now that he had woken up, it meant that the danger was gone. It was definitely something to be happy about.

"It's nothing. You've worked hard."

Tang Zhen laughed. His tone was very gentle, even though the other party was not a real living being.

The Holy Dragon city's intelligent system was almost no different from a normal creature, and it also had emotions.

The world of loucheng contained all kinds of races, and it was definitely not as narrow as the humans in the original world. They could live in peace.

"Are you really okay, Yingluo?"

The intelligent system wanted to say something but stopped. It could clearly sense that Tang Zhen, who had just woken up from his deep sleep, was not in a very good state.

"Don't worry, I'm fine."

Tang Zhen glanced at the cultivators guarding Lou Cheng in the distance. He gently nodded and disappeared in the next instant.

the alarm has been lifted. Everyone, retreat!

The cultivators in charge of guarding the gate all heaved a sigh of relief at the same time, and then a touch of joy appeared on their faces.

The city Lord was finally awake. This was great news!

While they were in charge of guarding him, they were also naturally paying attention to Tang Zhen's condition. There was always a trace of worry in their hearts.

Tang Zhen was the Lord of the sacred Dragon Warzone. There must not be any mishaps, or the consequences would be unimaginable.

Fortunately, everything had already passed. Along with Tang Zhen's awakening, all the danger had already disappeared.

The area that had been sealed off for a long time could finally be freely passed through, unlike in the past where no one was strictly prohibited from passing through.

It didn't take long for the news of Tang Zhen's awakening to spread. Those who knew the news were secretly happy, but they had a tacit understanding not to discuss this matter.

The majority of the Holy Dragon city's residents didn't know that in the past, their city Lord had experienced a crisis, and had almost died in his sleep.

At this time, the clouds were light and the wind was light. Everything was as usual.

.....

Ten thousand miles away from the Holy Dragon City, there was a huge mountain. It was covered in five-colored vegetation, and with the beautiful scenery, it looked exceptionally magnificent.

There was a Pavilion at the top of the mountain. It was nearly 10000 feet high and was built on the precipice, suspended in the sea of clouds.

There was a spacious platform in the attic, from which one could overlook the mountains and feel the biting cold Mountain wind.

In the distance, there was also unfreezing water. It formed a waterfall after falling from the sky, like a white silk that was gently dancing.

Because the environment was quiet and the energy here was rich and stable, this place had become the best place for cultivation and health. From time to time, cultivators and mortals would come here to cultivate and recuperate.

At this moment, on the peak of the mountain, a figure was sitting cross-legged on the platform made of giant purple golden-threaded trees. A dense seven-colored fog was rising around him.

There was no one around him, only him. As for the exit, there were cultivators from Lou Cheng guarding it.

This person was Tang Zhen. The purpose of him coming here was to heal his injuries.

After an unknown amount of time, Tang Zhen slowly opened his eyes and gently shook his head.

“I didn’t think that this unremarkable thing could cause such great damage, hehe.”

His original plan was to stabilize his realm as much as possible before the battle zone ranking battle began, and then think of ways to continue improving his strength.

In the end, the Godkiller virus broke out and put him in a deep sleep for several years, which almost delayed his original plan.

Delaying the plan was a small matter. If his cultivation was damaged or he died because of this, that would be a real big deal.

Fortunately, his clone had participated in the entire process. This had prevented the tragedy from happening. He had even used a short period of time to wake Tang Zhen up. This could be considered as a great fortune in the midst of misfortune.

&Nbsp; but even so, Tang Zhen was still heavily injured, and his divine Kingdom in his mind was in chaos.

As for the divine source, one-third of it was lost, all stolen by the God-killing virus.

The hateful thing about this thing was that not only did it steal divine source, but it also squandered it without restraint. Only one-tenth of it could be used.

The remaining 90% were scattered between heaven and earth, nourishing all living things.

This was a good thing for the living beings of the parallel world. However, it was a great loss for Tang Zhen.

It would probably take a long time for it to recover normally.

The situation was extremely disadvantageous to Tang Zhen. After all, he would have to participate in the war zone ranking battle soon.

Since it had already happened, he could only try his best to make up for it and restore himself to his original state.

This matter was very difficult to handle. Tang Zhen did not dare to guarantee whether it would succeed or not.

In fact, the problem was that time was limited. As long as there was enough time, no matter how much divine source he lost, he could make up for it.

“Encountering this kind of thing has something to do with my negligence, but the indigenous gods can’t escape the blame either.

I should return to the fifth battle area first and see if I can see the Aboriginal gods and figure out what's going on. ”

Tang Zhen made up his mind and immediately took action.

In the blink of an eye, they had arrived at the teleportation formation and were teleported to the fifth battle area.

Light and shadow flickered in front of his eyes. When his vision returned to normal, Tang Zhen had already returned to the cracked territory.

After seeing Tang Zhen, the cultivators guarding the teleportation array immediately came to pay their respects. It was a very lucky thing to be able to see the Lord Himself.

Tang Zhen smiled and greeted the group of cultivators. Then, he returned to the tower in the cracked territory and directly connected to the foundation stone platform.

It didn't take long for the foundation stone platform to respond.

“Sir Tang Zhen, your condition is very bad. Could it be that you've encountered some unforeseen event?”

The voice from the foundation stone platform sounded. There was a trace of doubt in his tone. The battle zone ranking competition was about to begin. He did not wish for any accidents to happen to Tang Zhen.

“Indeed. I was ambushed by the Godkiller virus and almost lost my life, hehe.”

Tang Zhen explained everything that had happened to him. He did not leave out any details.

After hearing Tang Zhen's explanation, the attitude of the cornerstone platform became more and more solemn. It didn't expect that there would be such a dangerous existence in the body of a native God.

Before Tang Zhen had made a deal with the Aboriginal deities, the fifth battle area had obtained a large portion of divine source and had already brought it back to the fifth battle area.

After testing that there were no problems, the divine source had been distributed and used by the cultivators from the fifth battle area.

He had thought that this matter was over, but who would have thought that such a hidden danger still existed? If this matter was true, it would be a disaster.

No one would have thought that such a terrible virus that targeted gods existed. It was unheard of in the past!

"I'll contact the cultivator who used the divine source and do a thorough examination. I believe there will be results soon."

The cornerstone platform gave a reply and immediately began to act, contacting the towers where those cultivators were located.

"Thank you, sir Tang Zhen, for your timely notice. May I know if there is anything else that you need my help to deal with?"

For cultivators, the cornerstone platform was a special auxiliary system. Everything was in consideration of Lou Cheng's cultivators.

Tang Zhen smiled when he heard this. After which, he softly said, "If possible, I would like to meet the Aboriginal deities and clarify some things."

2409 The treasure from the death universe (1)

The cornerstone platform had to give an answer to Tang Zhen's request. This was one of its obligations.

No matter how powerful it was and how it controlled the operations of the entire war zone, it would still answer the questions of a level 1 cultivator seriously.

Of course, if there was a problem of paying, the cornerstone platform would be very principled and would not care if they did not pay.

However, when it came to Tang Zhen's questions, even if the value of the answer was high, the cornerstone platform would rarely charge.

Firstly, Tang Zhen's identity was extraordinary. He had a higher level and special treatment. He could enjoy free consultation services.

Secondly, he had enough merit points, but the rewards he received were limited. If the cornerstone platform was too stingy, Tang Zhen could also be more calculative.

The main reason was that the target of the charging system was low-level cultivators. It was also to encourage them to keep improving.

For the high-level cultivators of loucheng, this method was not very meaningful. On the contrary, it would only increase the pressure.

Therefore, the higher the level of the cultivator, the more benefits they could enjoy, and the fewer points they needed to spend.

The cornerstone platform continued, "that native God is imprisoned in a secret place. There are people in charge of treating and keeping him safe. He is not allowed to come into contact with the outside world without permission.

The purpose of this was to obtain information about the Supreme plane, and then launch an invasion when the opportunity was right.

So, leave this matter to me. You don't have to worry too much. I'll inform you immediately when I have a result!"

Although the information provided by Tang Zhen was very important, the cornerstone platform had its own plans. It didn't want Tang Zhen to be too involved in this matter.

Perhaps there was something in the Supreme plane that the cornerstone platform was so important to them, which was why they were so cautious.

Even though Tang Zhen had been involved in this matter from the beginning to the end and was very clear about many things, he was still not the best candidate.

Perhaps it was because his strength was insufficient, or perhaps it was because he wanted to participate in the battle zone ranking competition, or perhaps it was because of other reasons that Tang Zhen did not know.

In short, the cornerstone platform didn't want Tang Zhen to participate in this matter.

Tang Zhen had seen through this point. However, he did not mind it in his heart because he clearly knew that this was a huge pit.

If the Godkiller virus was already so terrifying, wouldn't they lose their lives if they encountered something more powerful?

Therefore, Tang Zhen made up his mind. If it was not necessary, he would definitely not participate in this matter.

Even if the cornerstone platform strongly requested it, he would still have to consider it carefully and would definitely not take the initiative to send it to the door.

"In addition to the Godkiller virus, the indigenous God also used special means to breed a clone.

This avatar was hidden in the divine source and would appear in the Dreamworld of the infected, then grow by stealing the source power.

The ultimate goal was to restore the power of the creator or occupy the body of the infected.

I don't have much information on the avatar of the indigenous God, but I suspect that he is related to the Godslayer virus, and has even been modified to be the same as the Godslayer virus.

Only under such circumstances would he be able to avoid detection and sneak into the divine Kingdom while the cultivator was absorbing the divine source."

The information provided by Tang Zhen was equivalent to another heavy bomb, making the cornerstone platform feel the seriousness of the matter.

"Sir Tang Zhen, are your words true?"

The cornerstone platform asked with a hint of shock in its tone. It didn't expect things to become so complicated.

Since the avatar of the Aboriginal deity could steal the divine source, it might be able to take over the body of the cultivator in the building by force.

Don't underestimate the temptation of improving your strength. In order to obtain more power, some cultivators would do anything!

If the indigenous gods really succeeded, it would be a great hidden danger for the fifth battle area, and it must be completely resolved.

I've already understood the situation. I wonder if you have any other information to provide? "

The cornerstone platform asked once again. It was already very concerned about the information provided by Tang Zhen.

if there is, I will report it immediately. I will not hide anything.

Tang Zhen spoke in a soft voice. This matter wasn't simple. He would naturally actively cooperate.

"This is good."

The cornerstone platform didn't mention this and instead started another topic."I was originally planning to contact you to discuss the matter of the war zone ranking battle. According to my calculations, it will start in about a year's time.

Due to the unforeseen event, your cultivation has been severely affected. You will definitely suffer losses when you participate in the competition.

This matter is related to the glory and benefits of the battle zone, so there must be no mistakes. Therefore, I suggest that you find a way to recover your strength before the war.”

Tang Zhen slightly frowned and asked the cornerstone platform, “Do we have to fight in the battle zone ranking competition?”

If that’s the case, then why didn’t they just send a top-tier expert to participate in the battle, but instead sent a newbie like me?

The cornerstone platform explained, “ the content of the battle zone ranking battle is strange and unpredictable. It’s highly random. It’s very rare for cultivators in loucheng to fight each other.

However, this is a battle between Masters of creation, after all. Anything can happen, so it’s naturally best to maintain my peak condition.”

Tang Zhen nodded. This was indeed the case.

“The problem is that it’s impossible for me to recover my strength in such a short time. Otherwise, why would I waste my time here?”

Tang Zhen spoke the truth. This was also the matter that he found the most difficult to handle.

“In the core area of the fifth battle area, there is a bottomless abyss filled with violent chaotic energy.

It came from a dead universe and was brought back to the fifth battle area by several Masters of creation. The reason was that the bottomless abyss was erupting with rich heaven and earth energy at all times.

Therefore, the vicinity of the bottomless abyss has always been a Holy Land for cultivators in Lou Cheng. As a benefit of the fifth battle area, any cultivator can go there to cultivate.”

“I really didn’t expect that the fifth battle area would have such a place!” Tang Zhen sighed when he heard this.

He had joined the fifth battle area for a short time and did not have such a need, so it was the first time he heard about the bottomless abyss.

He was secretly envious. No wonder the fifth battle area was so powerful and had such rich free benefits.

He had heard that in the death universe, there were existences similar to white holes that could spit out all kinds of substances.

The bottomless abyss came from the death universe, but it didn't mean that it would bring disaster and disappointment. Instead, it represented the power of life.

It turned out that the matter erupting from the bottomless abyss was the most basic element to form a planet. After a long time, it was likely to become a new planet.

The bottomless abyss mentioned by the cornerstone platform should be this type. Once a cultivator entered, they would be able to obtain great benefits as long as they could resist the impact of the chaotic energy.

That was why the cornerstone platform said that it was the most suitable place for Tang Zhen to recuperate. Furthermore, the effects would definitely be very good.

"In that case, I'll head there as soon as possible. After all, there's not much time left."

Tang Zhen had already made up his mind to no longer be entangled with the matter of the Aboriginal deities. Instead, he would prioritize the problem of recovering his strength.

"This is a passage title plate. Without it, you won't be able to get close to that place."

At the same time the cornerstone platform reminded Tang Zhen, a purple-gold token appeared and fell into his hand.

Tang Zhen picked it up and took a look. After which, he disconnected the connection with the foundation stone platform and headed straight to the location of the transmission array.

2410 On the road (1)

As for how big the fifth battle area was, there was no accurate answer so far. Even the cornerstone platform had not deliberately calculated it.

This was because the world of loucheng was different from other planes. It was changing all the time, whether it was the area or the terrain.

As long as there was a need, whether it was a Warzone Lord or a cornerstone platform, they could expand their land limitlessly.

The land of pellets yesterday had probably only taken one night to cover thousands of miles.

Under such special circumstances, it was obviously boring and meaningless to calculate the specific area of the entire Theater of Operations.

If others knew about it, they would probably be ridiculed, because it was indeed a waste of time.

The cultivators in loucheng were not very interested in the outside world, even in their own territories.

Their true battlefields existed in the various Great Planes of the vast void. That was the place they needed to pay attention to.

Some cultivators in loucheng had never been to other territories in their entire lives, and they were not even familiar with their own homes.

In the entire 5th battle area, it was the same for the territories. There was not much competition between the territories.

Fortunately, that was the case. Otherwise, if the territories fought, it would be like the end of the world.

Although there was not much communication between the territories, it did not affect the development of the 5th battle area. At the same time, the territories were also secretly competing to get a higher ranking in the battle area.

Among all the territories, the cracked territory was considered the last, and it could not be compared to the other territories in all aspects.

Fortunately, not many people looked down on the cracked territory. After all, everyone knew that the cracked territory had only been established for a short time, and it was not because they were weak.

The Lord of the cracked territory, Tang Zhen, was also the Lord of a Warzone. Even though he was ranked at the bottom, he was still a legitimate Warzone.

Compared to the other territories, the chasm territory was one level lower. Furthermore, if one were to analyze it carefully, the chasm territory had more potential.

Perhaps after thousands of years, the cracked territory would catch up and become famous in the entire fifth battle area.

.....

After receiving the purple-gold token given by the cornerstone platform, Tang Zhen didn't waste any time and directly went to other domains through the teleportation certificate.

The area of the fifth battle area was too large, and there was a natural isolation zone between the territories. If one wanted to go far, they would basically have to use the teleportation array.

The teleportation formations in the fifth battle area were criss-crossed, and almost every tower had a teleportation square, which was convenient for the cultivators in the towers to travel to and from other places.

The fees for teleportation arrays were different. It didn't cost much within the territory, but if one were to teleport across territories, it would cost a lot.

If the destination was too far away and needed to cross multiple territories, the teleportation fee alone would be a huge expense.

It was the same for cultivators.

However, in the 5th battle area, most of the teleportation arrays were from within the battle area. For example, the teleportation array that crossed the battle area in the cracked territory was a rare exception.

It required the approval of both battle zones "Foundation platforms before it could be built, and the cost was also far higher than ordinary teleportation arrays, so it was not easy to build.

Due to Tang Zhen's special identity, he had the qualifications to build it, which allowed the sacred dragon battle zone to benefit a lot.

This time around, Tang Zhen was going to travel far away.

The cracked territory was on the edge of the fifth battle area, and the bottomless abyss was located in the central area of the fifth battle area.

The distance between the two was extremely far and impossible to measure. Even if they took the teleportation array, it would still take a long time.

The journey was full of twists and turns, no different from a mortal hurrying on their journey.

After leaving the cracked territory, Tang Zhen appeared in the nearby territory. This was a large teleportation square.

Although the square was not small, it only had a teleportation array that connected to the cracked territory. If they wanted to go to other territories, they had to go to another teleportation square.

Tang Zhen did not waste any time. After inquiring about the route from a roadside vendor, he prepared to head straight to his destination.

When the young cultivator who was guiding the way saw this, he immediately recommended Tang Zhen to use a kind of magical treasure that could find the way. As long as he entered his destination, this magical treasure would be responsible for leading the way.

When Tang Zhen saw the young cultivator bring the item in front of him, he didn't refuse and casually paid for it.

As a result, when he held it in his hand, he didn't know whether to laugh or cry. It turned out that this thing was actually produced in the cracked territory.

As the relationship between the cracked territory and the Holy Dragon Warzone grew closer, many items originally produced in the Holy Dragon Warzone had now appeared in the cracked territory.

There were even merchants from the Holy Dragon War zone who came to the cracked territory and spent a huge sum of money to set up factories to produce all kinds of items for sale.

Compared to the Holy Dragon battle area, the fifth battle area's market was much wider and larger. If they could promote it, the profits they would reap would be unimaginable.

Due to proper management, in a short time, the products of the Holy Dragon War zone had already opened the market in the cracked territory.

However, the merchants in the Holy Dragon War zone had a big goal, and they were not satisfied with this. Instead, they wanted to further explore the market.

These places that were adjacent to the cracked territory naturally became the merchants' primary targets of development, and more and more goods poured into them.

This move was actually a little risky, because the cultivators of Lou Cheng had invaded the myriad world and seen all kinds of things, so they had a very broad vision.

These strange goods might not be able to enter their eyes, and it was very likely that they would lose everything.

The problem was that the production and creativity of the world of Loucheng were very poor. Many rich war zones had terrible living conditions.

The cultivators in Loucheng didn't care about these things, and they never deliberately created things that could provide convenience and enjoyment. Therefore, even if they guarded a mountain of gold and silver, their days were extremely monotonous.

The products from the Holy Dragon War zone brought a sense of convenience to the cultivators in Lou Cheng, whether it was the daily department store or the battle auxiliary equipment.

When the cultivators of Lou Cheng got used to these items, they actually developed a faint sense of reliance. They didn't know when it started, but they began to shop in the mall and supermarket in their spare time.

The young cultivator in front of him wasn't as strong as the Lord, but he had a shrewd look on his face. One look and one could tell that he was a good seedling for a business.

He stood guard near the teleportation square and sold small magical artifacts that could show directions to the teleporters, as well as a variety of other products, in order to earn money for his own cultivation.

Tang Zhen faintly smiled at the young cultivator before activating the direction-indicating magical treasure and quickly followed behind.

The young man looked at Tang Zhen's back as he left. He felt that Tang Zhen was a little familiar, but he could not recall where he had seen him before.

He weighed the energy coin in his hand. The young man knew that it was the special currency used in the cracked territory, but it could also be used here.

The cultivators in Loucheng didn't care who issued the coins, only their weight and value. Even the energy blocks they cut out with their own knives could be used as currency.

However, when his eyes fell on the head of the coin, the young cultivator's body trembled slightly and he immediately understood why he felt that it was familiar.

This was because the portrait on the coin looked exactly the same as the previous customer, or rather, it was obviously the same person.

"Tang Zhen Qian Qian Qian"

Although the young man wasn't from the cracked territory, he still had a deep respect and yearning for a legendary figure like Tang Zhen.

Now that he had the opportunity to meet him and have a brief conversation with him, it was an exciting thing.
