

## **Read I Have A City In An Alternate World Chapter 2411 - 2411 Sky cover territory (1)**

2411 Sky cover territory (1)

In the following period of time, Tang Zhen was on his way.

Even though the cultivators of the Masters of creation had their own ways of traveling and could travel ten thousand miles in an instant, they still had to follow the local rules when they entered other territories.

One of the general rules was that the powers of the creator were not allowed, or else it would be regarded as a provocation.

Not only the Masters of creation, but even the divine emperors were also restricted.

The cornerstone platform also had a similar rule. When Lou Cheng's cultivators reached a certain level, they had to seal their strength before they could move.

It wasn't strange to make such a rule, as the destructive power of the Masters of creation was extremely terrifying, comparable to a mobile natural disaster. A little carelessness would cause a disaster.

Although the world of the city was strong, it could not withstand the continuous destruction and had to restrict the cultivators in the city.

Otherwise, this group of extremely powerful guys who could easily destroy the world would probably tear down the world of loucheng.

Under such circumstances, Tang Zhen could only use the method he was allowed to use. It was not slow to travel through the mountains and seas.

On the way, they passed by many places with excellent scenery. Even in the tower world, it was rare. Even if Tang Zhen was knowledgeable, he was still shocked by these scenic spots.

If he had free time, he would definitely go out and play, or even build a hut and live in peace for a period of time.

However, time was of the essence. He only took a quick glance and continued on his journey.

In the blink of an eye, more than a month had passed.

Tang Zhen finally arrived at his destination. In the center of the territory called sky cover territory, there was a bottomless abyss.

When they arrived at the sky cover territory, Tang Zhen discovered the wonders of this place. It was far more exciting than the rumors.

The sky canopy territory got its name from a huge rainbow canopy above it.

The area of this lid was extremely large, about a thousand meters above the ground, and it completely covered the entire sky lid territory.

Under normal circumstances, the sky covering territory should have been completely black.

However, only those who had come to the heaven cover territory knew that this was definitely a misunderstanding. Because the big cover above their heads was always projecting colorful brilliance.

That was how the sky cover territory got its name. Even in the middle of the night, the entire territory was still bathed in the seven-colored light.

If the residents of the territory wanted to enjoy the night, they only needed to get out of the hole in the cover and reach the top of the cover.

But even so, it was not Pure Night that they could enjoy, because the sky under their feet was like land, flashing with colorful fluorescent lights.

Together with some strange plankton, it was extremely beautiful, making people intoxicated and unable to extricate themselves.

This special situation appeared in sky cover territory because of the existence of the bottomless abyss, which caused such a huge change in the territory.

It turned out that the fifth battle area had accidentally discovered a death universe back then, and a large-scale search and exploration had begun.

At that time, sky cover territory wasn't called this name because the cornerstone platform had arranged for them to participate in this mission.

Although it was a dead universe, some planets still had the world origin, which cultivator Lou Cheng could collect without any effort.

Compared to a plane invasion, this method of searching was boring, but it was more rewarding.

If Lou Cheng was lucky enough to encounter such a giant planet and successfully harvest the world's origin, he wouldn't have to worry about being empty-handed even if he didn't accept any missions for hundreds of years.

In this exploration, the cultivators of Lou Cheng had accidentally discovered a strange area that was constantly erupting with terrifying heaven and earth energy.

Due to the eruption of Too Much Heaven and earth energy, it had actually formed a River of energy in the vast universe, spreading towards the depths of the universe.

After the cultivators of Lou Cheng explored the place, they realized that this place was not simple. However, their strength was limited and they could not continue exploring.

The news was sent back to the fifth battle area, and soon, Masters of creation arrived and began to explore further.

The results of the exploration were not announced, and no one knew what benefits they had obtained. However, all the elites of the territory were deployed and began to set up runic magic circles in this area.

It took a lot of effort to cut this area down. Then, he applied for the cornerstone platform to build a teleportation channel to bring it to the tower world.

After getting it into the world of loucheng, this thing was placed in the territory. The purpose was to make use of the heaven and earth energy that it constantly erupted to increase the heaven and earth energy concentration in the territory.

This was the bottomless abyss. It was said that it had the appearance of a funnel and was buried underground.

However, the part that was exposed to the ground still covered an area of dozens of square kilometers. It looked like a huge crater.

After all this, the density of heaven and earth energy had increased rapidly, and the cultivators in the territory had benefited a lot from this. However, the side effects had also appeared.

When the bottomless abyss erupted with heaven and earth energy, it would also erupt with other materials, which were not harmful to cultivators. They just floated in the sky.

As time passed, this material would condense into something similar to rainbow glass and float in the sky.

Since it was not harmful, no one cared about these things. On the contrary, they felt that they were very beautiful.

Until one day, when the cultivators in Loucheng were exploring the bottomless abyss, they did something that led to an unprecedented energy eruption.

Countless energy crystals fell from the sky, smashing onto the ground like hailstones. The scene was extremely spectacular.

The plants near the bottomless abyss were affected and turned into transparent crystals, as if they were carved out of energy crystals.

At an altitude of about a thousand meters, the seven-colored gas that erupted from the bottomless abyss spread in all directions.

Soon, some cultivators discovered that the seven-colored gas was spreading at an extremely fast speed and was gradually turning into a solid state.

Almost overnight, the entire territory was covered in a seven-colored gas. If not for the invisible barrier between the territories, it might have spread to other territories.

The sky above them made the cultivators in Loucheng a little flustered. They were used to the bright view and were not used to the gloomy and depressing environment.

Even though the sky looked beautiful, it still gave people an uncomfortable feeling, as if the thick seven-colored clouds would fall at any time.

Some people tried to collect and drive them away to restore the sky above them, but they found that they couldn't do it at all.

As soon as the seven-colored gas left the sky, it would instantly turn into stone-like things, and its weight and hardness were quite astonishing.

As if they were magnetic, they would immediately float to the sky after being freed from the restraints, always maintaining a height of a thousand meters.

The most troublesome thing was that this gas could not be cleaned up at all. No matter how much was taken away, more gas would come in.

The cultivators of Lou Cheng gave up trying to clean up the gas and pretended that they didn't see it.

In fact, everyone knew in their hearts that if this gas was really dangerous, the cornerstone platform would have already given a warning. It would not have been so silent until now.

In just three days, the gas in the sky began to condense, turning into a rainbow-colored translucent state, completely covering the entire territory like a Jade lid.

After the seven-colored lid appeared, it didn't disappear, and the territory's residents slowly got used to the lid above their heads.

In the end, the territory changed its name to sky cover territory, which was still in use until now.

As for the bottomless abyss, it had also become a Holy Land for cultivation, attracting countless cultivators to try to break through to a higher realm.

## 2412 The guide (1)

Because of the special geographical environment, the buildings in the sky lid territory were also very unique. Many of the buildings on the ground were connected to the sky lid.

It was either something similar to a Chain Bridge or a ladder that fell from a high altitude, or it simply pulled the building higher and higher, directly connecting it to the seven-colored lid above.

In this way, the height of the building reached a thousand meters, and it could be considered to be connected to the ground and the sky.

On some higher peaks, this kind of trouble was avoided, and they could just climb up along the peak.

The height of a thousand meters was not too high. Mortals could use various means to reach it, and it was naturally easier for cultivators.

In addition to these buildings, there were many vine-like plants growing on the canopy of the sky, all hanging down.

It was like an inverted forest or a bead curtain. It looked very beautiful whether it was day or night.

There were also things like jellyfish and electric eels living between these vines. There were even giant beasts that were dozens of meters long, swimming around these vines.

It gave people the illusion that heaven and earth had turned upside down and the ocean had run over their heads.

In the sky cover territory, the concept of day and night had long disappeared. No matter when, it gave people the feeling that they were under the starry sky.

After Tang Zhen arrived at the sky cover territory, he asked around and found out the specific location of the bottomless abyss.

The reputation of the bottomless abyss was too great. Almost everyone in the sky cover territory knew about it. Many strange things about the bottomless abyss could be casually mentioned by even a child.

Outsiders like Tang Zhen could often be seen in the sky cover territory. The purpose of their visit was to head to the bottomless abyss.

Therefore, the moment Tang Zhen opened his mouth, he immediately received an answer. However, the other party then recommended himself and asked Tang Zhen if he needed a guide.

Near the teleportation square, there were many cultivators in charge of guiding the way. They only needed to pay a fee and they would help arrange everything.

To be able to form a business model was enough to prove that the number of cultivators coming and going was extremely high. The scene that Tang Zhen saw also proved this point.

As far as the eye could see, a group of guides could be seen standing together. They were wearing specially made robes to indicate their identity.

After Tang Zhen understood the other party's identity, he similarly did as the Romans do and hired a guide. This would more or less save him some trouble.

There was a saying that a strong Dragon could not suppress a local snake. This was the case in both the mortal world and the cultivation world. With the help of these local cultivators, Tang Zhen was naturally happy and relaxed.

As for whether it was safe or not, there was no need to worry about that. There were no problems with the security of sky cover territory.

If someone had ill intentions and dared to scheme against a creator, that person was truly seeking death.

In fact, with Tang Zhen's identity, he could have informed the officials of sky cover territory and let them be in charge of receiving them.

Although the fifth battle area was big, the number of territories had not changed much. Every Lord was a person to be valued.

If they knew that Tang Zhen had arrived, even if sky cover territory did not put out a Grand formation to welcome him, they would still send someone to be in charge of greeting him until Tang Zhen left sky cover territory.

Firstly, it was to show respect, and secondly, it was to monitor the other party and prevent them from causing trouble in their territory.

Although the group leader respected his status and the possibility of doing such a thing was very low, he still had to be more vigilant.

Once such a thing really happened, he would definitely be caught off guard, and he had to be on guard.

Tang Zhen didn't inform the cultivators of sky cover territory, mainly because he was afraid that it would be too troublesome. Moreover, he didn't want others to know about his situation.

Not to mention whether there would be enemies who would take the opportunity to scheme against him, just the reason why Tang Zhen was injured was enough to pique the interest of many.

If he continued to dig deeper into this matter, even more secrets would be exposed. This was definitely not the result that Tang Zhen wanted.

The value of a super plane was extremely great, and one might not be able to find one even if they wanted to. Even the top three battlefields would be extremely interested.

The relationship between the various battlefields in the world of towers wasn't as harmonious as one would imagine. They competed with each other and there were even cases of fighting over a plane.

With 3,000 battlefields exploring the plane at the same time, it was normal for accidents to happen occasionally.

That being said, if it was not handled well, there was a possibility of an even bigger dispute.

Therefore, it was best to keep the information about the Super plane a secret. This way, he could avoid more trouble.

The foundation stone platform was the same. Although he didn't say it clearly, Tang Zhen had already thought of it.

Hence, after coming to sky cover territory, he would try to keep a low profile to avoid attracting the attention of people with ulterior motives.

At this moment, the guide was conversing with Tang Zhen. Sir, this is your first time in the sky cover territory. I believe there are many places you are unfamiliar with. As long as you request it, I will find a way to bring you there.

The most famous place in the sky cover territory was naturally the bottomless abyss. However, there were also some other places that were very famous in the entire territory.

For example, there was a market for all kinds of items, a cultivation Academy for cultivators to study and seek Dao, and some special super wild buildings.

These things appeared because of the bottomless abyss, and as time passed, their fame in the sky cover territory grew.

In addition, there were also some good places that were not well-known. Newcomers could not find them at all. Only the guides knew how to find them.

Of course, after providing additional services, a corresponding fee had to be paid, and the guide could also earn more money from it.

there's no need for that. Just go straight to the bottomless abyss.

Tang Zhen shook his head as he spoke to the guide. He did not have much time to waste.

The guide was not disappointed. After all, the vast majority of outsiders who came to the sky cover territory would choose the bottomless abyss as their first destination. There were very few who went to other places.

However, they could make an appointment with the guest and provide the service of guiding the way again when the guest needed it.

It was rare for them to come to sky cover territory. If they didn't have anything urgent to do, they would take the opportunity to tour around before leaving.

At that time, it would be the best time for them to make money. If they could take a trip around the sky cover territory, they would definitely make a lot of money.

in that case, please pay the fee first. Please don't take offense. This is the rule of our guide.

The guide was afraid that Tang Zhen would misunderstand, so he explained the reason for this.

no problem, this is a very normal request. How much do I need to pay to Sue me? "

As Tang Zhen spoke, he took out a gold strip-like energy crystal. This was the currency used in all the major territories.

As for why it was in this shape, it was because he had cut it himself. If there was a need, Tang Zhen could take out an even larger energy block.

The guide reported a number. Tang Zhen did not care too much and gave him more.

To him, this kind of thing was like a stone. He could get as many as he wanted.

After the guide identified and counted the items, he repeatedly thanked Tang Zhen. It wasn't every day that he would encounter such a generous customer.

While they were talking, the two of them had already arrived in front of a flat, round, black vehicle and invited Tang Zhen to sit inside.

2413 Holy Land for cultivation, bottomless abyss (1)

This flat round vehicle looked like a flattened orange, but its main material was the same as the rainbow cloud cover.

Tang Zhen sat inside and discovered that the decorations were extremely comfortable. Moreover, there was not the slightest bit of unusual smell.

After seeing Tang Zhen sit down, the guide sat on the chair opposite him and closed the cover of the vehicle.

As the runes glowed one after another, the vehicle slowly floated up and quickly arrived under the colorful lid. Then, it rapidly moved forward.

"This kind of transportation is interesting."

Through his observation, Tang Zhen discovered that there was always a similar distance between the vehicle and the seven-colored cloud cover.

A type of magnetic energy was connected to the vehicle and drove it forward.

From the ground, it looked like a vehicle was sticking to the colorful clouds and moving like a bug.

When they encountered obstacles, they would automatically avoid them, making them look very agile.

"I walk this path every day. Even if I close my eyes, I can still reach my destination.

Not to mention that this route has been marked, so no one will occupy it without permission. Those plankton won't approach Yingluo either."

Hearing the guide's explanation, Tang Zhen smiled but did not speak.

The driving skills of cultivators were by no means comparable to that of mortals. Unless it was deliberately done, it was impossible for a collision to happen under the constant scanning of mental power.

There was no need to worry about safety.

would you like to enjoy the beautiful scenery along the way, Sir? if not, I'll speed up.

The guide asked. After seeing Tang Zhen shake his head and refuse, he suddenly began to increase his speed.

The scenery outside the window instantly blurred and finally disappeared completely, proving that the vehicle had reached an extremely fast speed.

Tang Zhen thought that they would continue to fly in this manner. However, he did not expect that the vehicle would rush into a tunnel-like hole after only a few minutes.

Then, it charged forward and flew above the rainbow cloud like a cannonball.

At this moment, the vehicle suddenly slowed down. Tang Zhen also took the opportunity to see the scenery outside. He saw a resplendent Galaxy in the sky and fluorescent plants and animals on the ground that were reflecting each other.

After a brief deceleration, the vehicle accelerated again, just like before.

It looked like a shooting star with a long tail of light.

Tang Zhen noticed that there were actually many similar 'meteors' in this Galaxy. They must be cultivators who were heading to the bottomless abyss.

While the guide was driving the vehicle, he would occasionally exchange a few words with Tang Zhen. He appeared to be at ease.

Tang Zhen had nothing to do so he started to chat with the guide.

the sky cover territory has a unique advantage, so it should be easier to cultivate. I heard that from time to time, there will be a rain of energy crystals, which are piled up like a small mountain.

The guide smiled and shook his head after hearing Tang Zhen's words.

"You don't understand the situation in sky cover territory. Although the energy concentration here is higher than in other territories, it is only beneficial to low-level cultivators.

When one's cultivation reached the Lord level, their speed would be similar to that of other territories. If there were conditions, most cultivators would choose to go to the bottomless abyss to improve their strength.

The energy crystals that fell from the sky originated from the explosion of the bottomless abyss. They had often appeared in the early years.

However, with the transformation and control of the territory, the bottomless abyss rarely erupted. Now, it only erupted continuously.

There were also cultivators in loucheng who specialized in mining in the territory. They formed teams to enter the bottomless abyss in order to collect condensed energy crystals.

In this case, even if the bottomless abyss erupts, there will be very few energy crystals falling from the sky.”

Tang Zhen nodded. This was considered normal. If they allowed the bottomless abyss to erupt without care, then the Lord of this place would be too negligent.

“Since there are so many cultivators going to the bottomless abyss, why don’t they build a teleportation array? is there something to say?”

Tang Zhen thought for a moment and asked another question.

“That’s a good question. In fact, many people don’t understand why the heavencover territory didn’t build a teleportation array near the bottomless abyss.

In fact, a long time ago, many teleportation arrays had been built near the bottomless abyss, but they would not run for long before there were constant changes.

Many cultivators would mysteriously appear in an abandoned universe after being teleported and would not be able to return to the world of loucheng.

In the beginning, this matter didn’t attract much attention. However, as more and more loucheng cultivators disappeared for no reason, the territory finally sent people to investigate the matter.

After some investigation, we found out that the teleportation formation would suck air from time to time and send Lou Cheng to the death universe where the bottomless abyss was discovered.”

The guide had a strange expression on his face when he said this. He smiled and talked about the unlucky cultivators who had been mistakenly transported to the death universe.

If it wasn’t for the Overlord of sky lid territory giving the order to search for the missing loucheng cultivators, those unlucky people wouldn’t have been able to return to the loucheng world.

Although they were found in the end, their situation was extremely miserable. In the abandoned universe where there was no heaven and earth energy, their days were extremely difficult.

Although some planets had the origin of a world, it was almost impossible to find such a planet after being selected by the creator.

so after this incident, all the teleportation formations were canceled, and they couldn't be built within ten thousand miles.

Tang Zhen smiled. He did not expect that the influence of the bottomless abyss would be so large. However, it was nothing compared to the benefits he had obtained.

As the two of them conversed, the vehicle maintained its high speed, moving as fast as lightning.

About an hour later, a bright light screen appeared in the night sky.

In the center of this light curtain, there was something like a giant fountain. It gushed out from the hole under the rainbow cloud cover, and the liquefied energy spread in all directions like waves.

Tang Zhen had yet to see clearly when the vehicle suddenly dove down and headed straight for the seven-colored cloud cover.

It turned out that there were tunnel-like holes on the rainbow cloud cover, and light was constantly flowing inside.

“Whoosh!”

It wasn't just the vehicle that Tang Zhen was on. The other “meteors” that were flying over had also entered the tunnel.

After sliding for a while, the vehicle rushed out of the tunnel, and a magnificent giant city appeared in front of them.

The city was ring-shaped and spread out in all directions. Many buildings towered into the clouds and had all kinds of strange shapes.

The surface of the skyscraper-like building was decorated with all kinds of light-emitting objects, colorful advertising light boxes, and giant screens, dazzling people.

Coupled with the fluorescent vines hanging down from the rainbow clouds, the entire city had become a city that never slept. The streets were full of people.

Perhaps due to the restrictions, there were no cultivators flying in the air. Instead, they were all walking on the ground.

As for the central area of the city, it was a giant landscape that was dozens of kilometers in area and looked like a volcanic crater.

Above the volcano's mouth, near the seven-colored cloud cover, an energy fountain in the form of flames appeared. It looked like a huge flamethrower.

The energy fountain that Tang Zhen had seen earlier was the upper half of this thing. It was just that the shape of the inside and outside were different.

There was no need to guess to know that this volcano was the bottomless abyss, the Holy Land of cultivation in the fifth battle area.

The vehicle suddenly slowed down, and then as if it was gliding, it slowly flew over the city.

The final stop was a huge square, where many similar vehicles were parked.

Tang Zhen jumped down from the vehicle. After bidding farewell to the guide, he followed the road and walked towards the volcano's mouth.

After walking for a short distance, he saw a huge stone tablet in front of him. It was filled with runes that shone with golden light.

As long as the reader paid attention to the stone tablet, the Golden runes would be converted into words that the reader could understand, explaining all the things to take note of when entering the bottomless abyss.

2414 Special authority token (1)

The main race of the sky cover territory looked very similar to humans, but the difference was that their facial edges were too prominent.

His cheekbones were especially prominent, as if his cheeks had been pierced by sharp teeth, adding a bit of ferocity to his appearance.

The world of loucheng contained all kinds of races, and the same was true for the sky cover territory. There were also humans.

Tang Zhen ignored the crowd that was moving back and forth. Instead, he quietly looked at the words on the stone tablet and did not miss out on a single one.

According to the stone tablet's instructions, cultivating in the bottomless abyss could indeed improve one's strength, but it would also be dangerous.

The closer one was to the depths of the bottomless abyss, the more dangerous the environment was. If a cultivator rashly entered, it was likely that he would never return.

Therefore, the sky cover territory gave a warning to cultivators. Whoever entered the bottomless abyss, no matter if they lived or died, they would not be responsible.

The road of cultivation was difficult and tortuous, and encountering danger was just a common occurrence, so there was no need to remind him too much.

Sky cover territory's actions were enough to prove the danger of the bottomless abyss, which was why they gave special hints.

In addition, according to the stone tablet's records, the bottomless abyss lived up to its name. It was truly bottomless.

The current record for the deepest exploration was twelve million seconds. If it was converted to kilometers, it would definitely be an astronomical figure.

The instant mentioned in the stone tablet was the maximum distance a creator could teleport once. It was already close to the speed of light or sub-light speed.

But even so, they still had not reached the end of the bottomless abyss. They wanted to continue exploring, but they could not take another step forward.

The person who had created the record was the lord of the sky cover territory, and his cultivation was close to that of a high-level deity.

This outstanding achievement was engraved on the giant steles at the major entrances of the bottomless abyss. There were 999 people behind it, all of whom were records left by other cultivators after exploring.

The record on the stone tablet could be changed, but only those who had surpassed the top 1000 were qualified to leave their names on the list.

Those who left their names would not only be rewarded, but they would also be famous. This made many cultivators in Lou city come to try to prove themselves.

The problem was that it was not an easy task to leave one's name on the stone tablet. Only a truly powerful person could stay for a period of time after the top 100.

As for the top 100, it had not changed for many years. Many cultivators had sworn to be among them, but in the end, none of them had not failed.

Therefore, there was a saying in the sky cover territory that if one wanted to determine whether a Lou Cheng cultivator was truly powerful, one only needed to see if he was ranked in the top 100 of the stone steles.

Without a ranking in the top 100 or top 1000, no one would acknowledge his strength.

Of course, this was only the custom of the sky cover territory. In fact, the loucheng world was huge, and there were countless strong people in the fifth battle area. Many cultivators did not have a ranking on the stone tablet, but their strength was not much worse than those on the list.

After Tang Zhen finished reading the inscription on the tablet, he walked along the wide street towards the mountain-like entrance of the bottomless abyss.

On the circular slope of the bottomless abyss, there were streets with the same distance. The streets were 50 meters wide, and there were two-story buildings on the side of the road.

Standing in the middle of the street, one could see that the street continued to extend forward, and then it was as steep as if it had been erected.

The trees and buildings on the side of the road were the same. They seemed to be slanted and stuck to the ground, giving off a strange visual impact.

Tang Zhen had heard from the guide before he came that there were thousands of roads at the foot of the bottomless abyss alone and millions of cultivators lived here.

On both sides of the road, in addition to the residences of cultivators, there were also shops that sold all kinds of items.

Although the cornerstone platform sold a wide range of items, the prices were not cheap, and there was no possibility of bargaining.

Furthermore, to trade on the cornerstone platform, one had to have enough Battle Points. Many cultivators would not waste battle Points easily because it was not easy to obtain them.

The points saved could be used to exchange for the most urgently needed items when needed.

In addition, there were also some rare items from other planes that were collected by the cultivators in loucheng to exchange for greater benefits or something they wanted.

There were many cultivators in the bottomless abyss, so it was obviously the most suitable place to sell and trade. Therefore, there were many strange items here.

Other than that, there were also taverns, inns, and weapon shops, which looked like a market in the mortal world.

Tang Zhen slowly walked along the street. However, his speed was not slow. It did not take long before he arrived at the edge of the bottomless abyss.

Just as he approached the edge of the abyss, Tang Zhen felt a repulsive force that seemed to want to push away all those who were approaching.

In the sky above the abyss, there was a circle of huge runes floating in the air, forming a Halo in an orderly manner, blocking all the violent energy leaking out.

At the end of each road, there was a building that looked like a bronze gate. It was more than ten meters tall and was filled with ferocious exotic beasts.

There was a passage in the middle of the gate, which looked like a sparkling water surface. Cultivators went in and out of the bottomless abyss through this gate.

At this moment, there was a group of cultivators waiting in line in front of the gate. There were about four to five hundred people.

They didn't enter but waited at the side because there were cultivators coming out of the abyss.

Tang Zhen heard the conversation of the other cultivators and found out that the bronze door would change its mode of entry and exit every half an hour.

At this time, it was just time to switch to leaving mode. The cultivators who had been waiting inside for a long time came out of the door one after another.

Every cultivator who walked out looked relieved, as if a huge mountain had been lifted off their shoulders.

Although Tang Zhen had never entered the bottomless abyss, he had also heard of the situation inside. There was an indescribable terrifying pressure.

At the same time, he was also suffering from pain all the time. It was not something that ordinary people could endure.

After all the cultivators left, the bronze gate would not change its mode immediately. Instead, it would change at the specified time.

The entrance and exit of the entire bottomless abyss were controlled by the runic magic circle, and it was absolutely not easy to enter.

When the cultivators waiting to enter saw this, they could only wait patiently. After all, the rules were there, and the guards were definitely not deliberately making things difficult for them.

Suddenly, he heard footsteps behind him and saw a large group of cultivators walking over.

They were all wearing the same battle armor, and they walked straight to the entrance without looking sideways.

“Do you know the rules? why don’t you line up and wait?”

After seeing what the cultivators were doing, some cultivators in the queue immediately expressed their dissatisfaction. They didn’t care about the time, but they couldn’t bear to see someone not following the rules.

The other cultivators were also the same. Their faces were full of dissatisfaction, and their eyes were also very unfriendly when they saw the group of cultivators.

“What do you guys know? They were all the elites of sky cover territory and had high-level tokens to enter the bottomless abyss.

If you have one too, you’ll have the priority to enter, and no one will say that you’re playing with special privileges!”

The cultivator guarding the bronze gate snorted and said in a dissatisfied tone. It was obvious that he had seen this kind of thing before, so he immediately explained.

“What special authority token? why have I never heard of it?”

One of the cultivators from Lou Cheng asked with a puzzled expression.

different levels of tokens have different privileges, and also determine the depth of the bottomless abyss.

The guard at the bronze gate pointed at the cultivators in line and said in a calm voice, “The tokens on your waists are of the lowest grade. The purple gold tokens on their waists are of the highest grade.”

The cultivators looked over and saw that the elite cultivators had a purple sign on their waists with a golden pattern on it.

The difference between the two was obvious.

Tang Zhen looked in the direction of the voice. His brows were gently knitted when he saw the appearance of those waist tokens.

Although his token was also purple-gold in color, the patterns on it were more complicated and compact, and it was also larger.

It was obvious that the token given to him by the cornerstone platform was definitely not an ordinary item. It was very likely to have a higher level and authority.

#### 2415 Provocation (1)

we have a high-grade token because we have the corresponding strength. If you are not convinced, you can have a competition on the spot!

After hearing the doubts of the cultivators in line, a slightly arrogant voice came from the group of cultivators from the sky cover territory.

There was a strong sense of confidence in his arrogant tone, giving people a feeling of superiority.

Then, a tall young man slowly walked out of the crowd. He was wearing a set of golden beast-patterned armor, which was obviously not ordinary.

The weapons he used were two strange giant axes shaped like wings, hanging on his back like shields.

Although his aura was obscure and no one could judge his true strength, as an elite cultivator of the sky cover territory, he definitely wouldn't be weak.

After he walked out of the crowd, he looked around with a cold gaze. There was no emotion in his eyes, but the arrogance could not be hidden.

"I know you're not convinced, so I'll give you a chance to prove yourself. At the same time, we'll see if we're worthy of having a special token!"

The Golden-armored youth pointed to the front and shouted to a cultivator, "you were the first one to speak. If you have the guts, then fight with me, or go to the bottomless abyss!"

The cultivator's face turned pale. Although he was unhappy with the other party for cutting the queue, he didn't dare to continue to challenge him.

If the Golden-armored cultivator were to attack him after he entered the abyss, he would definitely die.

The Golden-armored cultivator laughed coldly when he saw the person who was called cowering. The contempt in his eyes grew stronger.

"This token seems to represent special privileges, but in fact, it means even greater danger, because the areas it allows to enter are almost full of deadly dangers.

in my opinion, this is actually an affirmation of one's strength. If one doesn't have the corresponding strength, they don't deserve to have this item!

I can put my words here, each and every one of you is counted. If anyone can be stronger than me, then I will take the initiative to give the token to him!

If you don't have it, then just wait behind me obediently, because the weak have no right to speak to me!"

The Golden armored youth's cold eyes swept the surroundings as he spoke, as if he was looking for a true expert.

However, in the blink of an eye, his eyes revealed disappointment, as if none of the cultivators present could satisfy him.

Seeing this, the cultivators in the line all showed an annoyed and angry expression, feeling humiliated.

It was a fact that they were not as good as him, but the attitude of this golden armored youth was really infuriating. He was clearly deliberately humiliating everyone.

Tang Zhen, who was at the back of the group, softly laughed. Earlier, the Golden armored young man's gaze had swept past his body, but did not stop at all. This was sufficient to show that the other party's eyesight was not good.

He was a master of creation, yet he couldn't see through it. It wasn't an exaggeration to say that he was blind.

The problem was that although the Golden-armored cultivator's attitude was arrogant, he didn't go too far. Moreover, this matter was started by the cultivators in line.

From the looks of the Golden armored youth, it seemed like this was not the first time he had been questioned like this. That was why he had said such words to humiliate and teach the doubters a lesson.

However, if there were cultivators who were hot-headed and dared to follow the Golden-armored cultivator into the bottomless abyss, there was an 80 to 90 percent chance that they would not be able to return.

The reason for this was that the strength of the Golden-armored cultivators far exceeded the ordinary cultivators in the queue.

They had to go deeper into the bottomless abyss to get effective cultivation enhancement. But for low-level cultivators, those places were absolutely forbidden for life.

He would probably die on the way before he even reached his destination.

All the cultivators present understood this, so they pretended not to hear the Golden-armored cultivator's words.

Although cultivators had to be brave and fearless, it did not mean that they had to act rashly. If they knew that it was a fire pit and still jumped in, that was not courage but stupidity.

"Hehe, trash will always be trash. They're all cowards.

In fact, in my opinion, no matter how much you guys cultivate, you don't have the qualifications to obtain such a token."

The Golden-armored cultivator said in a cold voice. This time, he didn't hide the fact that he was slapping his face.

After hearing this, the hot-tempered cultivators couldn't hold back and exploded like a barrel of gunpowder.

"Bastard, what kind of bullshit are you saying!"

damn it, so what if they are the elite cultivators of the sky cover territory? I'm not convinced!

"Hehe, I don't believe that these so-called elites can be strong."

If the Golden-armored cultivator didn't say that, this small conflict would be nothing. It was normal for cultivators to have some friction.

However, the Golden-armored cultivator clearly didn't think so. That was why he kept provoking them in order to anger them.

The Golden-armored Youth's Companion frowned at the group of angry cultivators, but he didn't say anything.

There were even some who sneered and glanced at the agitated cultivators, as if they agreed with what the Golden-armored cultivator said.

The cultivators guarding the bronze gate looked a little upset, as if they regretted adding fuel to the fire just now.

If he hadn't explained the difference between the different tokens to show his superiority, things wouldn't have developed to this extent.

However, on second thought, just by looking at the Golden-armored cultivator's overbearing manner, he knew that even if he didn't state the difference, the other party would still deliberately cause trouble.

Looking at the group of angry cultivators, the Golden-armored young man smiled smugly, but the mockery in his eyes only increased.

At this moment, Tang Zhen, who was standing at the back of the group, was expressionless as he watched this scene. Originally, it was just a small dispute that was basically nothing.

However, the Golden-armored cultivator's actions were a little too much, especially his last sentence, which clearly included Tang Zhen.

Tang Zhen had always kept a low profile and rarely took the initiative to provoke others. However, if others dared to provoke him, he would definitely not let the matter rest.

Alright, the conversion time is up. Please prepare to enter.

The Guardian of the bronze door suddenly said to the crowd. His tone was relaxed.

He was afraid that if the dispute continued, the two sides would start fighting. If they pursued the matter later, he would also be unable to escape the blame.

"Everyone, please be prepared. According to the rules, you have the right to enter first."

The guard said to the Golden-armored cultivator and the others. At the same time, he was telling the angry people in the queue that he was doing things according to the rules.

"Al, what a bummer. I actually met a group of cowards."

The Golden-armored cultivator shook his head regretfully and spoke loudly on purpose.

Even at this moment, he was still provoking the cultivators in the queue, trying to anger them.

Whether it was in terms of strength or experience, he was far superior to these cultivators in the queue. It was really too much for him to be so persistent over such a small matter.

"Alright, the door is open. Please come in!"

The guard of the bronze gate saw this and loudly warned again.

The companions of the Golden-armored cultivator walked towards the bronze door, ready to step in.

The Golden-armored cultivator sneered. Just as he turned to leave, he heard a voice behind him.

“Wait a minute, didn’t you want to have a competition? How about I enter with you?”

After hearing this, the cultivators in golden armor and the cultivators who were waiting in line were all stunned.

The Golden-armored cultivator had provoked them earlier, but no one dared to step forward. Clearly, everyone knew the consequences of acting tough.

In the end, just as everyone was holding back their anger and preparing to calm down, someone suddenly took the initiative to fight. How could they not be surprised?

The Golden armored cultivator’s eyes narrowed as he watched Tang Zhen walk out from the crowd and chuckled.

“You have a backbone, but you’re very stupid. Since you want to die, I’ll naturally fulfill your wish.

Now, you can follow me and enter first, and all the fees will be waived. Aren’t you happy?”

2416 Who’s the one courting death?

At this moment, the gazes of everyone present had landed on Tang Zhen. They wondered what he was planning.

There was no doubt about the strength of the Golden-armored cultivator. To be able to enter the ranks of the elite cultivators of the sky cover territory, he was definitely not a simple person.

It would be an exaggeration to say that it was invincible among its peers, but ordinary cultivators would basically be killed in seconds if they fought it.

Tang Zhen had taken the initiative to step forward and compete with the other party under such circumstances. Either there was something wrong with his head or he was truly confident.

The Golden-armored cultivator squinted his eyes and sized up Tang Zhen. He seemed to want to find out his origin but he did not get the answer he wanted.

Although the Golden-armored cultivator didn't know Tang Zhen's background, he still didn't put Tang Zhen in his eyes. How could he be some Big Shot if he could wait in line in front of the bronze door?

"I'll ask you one more time. Have you really made up your mind to enter the bottomless abyss with me?"

If you're afraid or regretful, there's still time. I definitely won't mind."

The Golden armored young man's words seemed to be thinking for Tang Zhen's sake. However, it was likely that only he himself knew what he was actually thinking.

Tang Zhen looked at the Golden-armored cultivator and smiled as he shook his head.

"Al, good words can't persuade a damned ghost. Since you're so overconfident, then come with me."

The Golden-armored cultivator turned around and walked towards the bronze gate.

His companions looked at Tang Zhen. Their eyes were filled with coldness. There were also people who had mocking expressions on their faces.

In their eyes, Tang Zhen was overestimating his own ability.

As for the cultivators who were queuing up earlier, all of them were silent. Since this matter was Tang Zhen's choice, they naturally wouldn't continue to interfere in order to avoid trouble.

In the end, Tang Zhen suddenly spoke at this moment.

"Wait a moment."

When the Golden-armored cultivator at the front heard this, he suddenly turned his head around and stared at Tang Zhen.

One could clearly feel the deep dissatisfaction in his eyes, as if his dignity had been violated.

what are you doing? what are you doing? don't be so shameless.

The Golden-armored cultivator's tone was unusually cold as if he was suppressing the anger in his heart.

The Golden-armored cultivator snorted coldly and turned his head to the side without saying a word.

On the other hand, the cultivator guarding the bronze door at the side took the initiative to answer Tang Zhen's question and explained in a loud voice, "Every cultivator who enters the bottomless abyss must apply for a pass and pay enough fees.

The initial passes were all of the lowest level, and there were very few exceptions.

In order to obtain a higher grade pass, one would need to verify the information recorded in the pass token to determine the strength of the holder and whether he had the qualifications to apply for a higher grade pass.

Compared to the low-grade token, the high-grade token has some special privileges, such as bringing people into the bottomless abyss. The person who is brought in does not need to show the token."

The guard of the bronze door explained very clearly. It wasn't only directed at Tang Zhen, but also at the cultivators who were queuing.

At the same time, he was cursing in his heart. Why couldn't these damned guys take a good look at the rules on the stone tablet?

He always gave him trouble every now and then, and he had to be the peacemaker, constantly explaining the reasons.

"I see!"

Tang Zhen had long since memorized the rules in his heart. At this moment, he deliberately acted as if he had suddenly come to a realization. After which, he turned his head and swept a glance at the Golden-armored cultivator.

since that's the case, then use my token to enter. You can come with me.

After hearing Tang Zhen's words, the Golden-armored cultivator and his companion were stunned at the same time. Then, someone sneered.

"Is there something wrong with this guy's head?"

you don't understand. He used his own token, so he can only reach the maximum depth specified by the token. He can't follow us to the deeper parts.

so that's the case. I didn't expect this guy to be so cunning. No wonder he dared to take the initiative to jump out and accept the battle. It turns out that he had this idea!

hehe, who said that these guys are honest? I'll be the first to disagree. The situation before you is the best example.

When the elite cultivators of sky cover territory spoke up to this point, they looked at Tang Zhen with a hint of disdain.

In the beginning, although they looked down on Tang Zhen's actions and felt that he was overestimating his own ability, they still admired his courage.

However, at this moment, Tang Zhen had become a treacherous villain in their eyes. He was trying to use despicable means to scheme against them.

The Golden-armored cultivator seemed to have thought of this point as well. The gaze he used to look at Tang Zhen became increasingly unkind. A faint trace of killing intent flashed within.

However, in the blink of an eye, he revealed a smile and nodded to Tang Zhen.

"Alright, you can also use your passage title plate, I'll go with you!"

His tone was so cold that it sent chills down one's spine.

Anyone who was familiar with the metal cultivator's character could tell that he was in a state of anger. Tang Zhen, who had started this, would definitely suffer his wrath.

"I'm afraid this guy is going to be in big trouble!"

One of the Golden-armored cultivator's companions said in a calm tone. There was a trace of anticipation in his eyes.

He wanted to see how the Golden-armored cultivator would deal with Tang Zhen after entering the bottomless abyss.

He would definitely not kill him directly, because that was not the style of the Golden-armored cultivator. The most likely way was to torture and tease him, and then deal with him in the cruelest way.

It was not strange for him to do so. One must know that under the brightest sunlight, there were also shadows.

Fights between cultivators were inevitable. However, under the restrictions of the cornerstone platform, most of the cultivators in Lou Cheng were used to it. They trusted and tolerated their companions.

However, in the face of cultivators from other battlefields or territories, this restriction would be sharply reduced, especially in places like the bottomless abyss, where fighting and killing happened from time to time.

It should be known that the bottomless abyss was not only a Holy Land for cultivation, but also a huge treasure. If one had enough strength and good luck, it was very likely to find good things that people coveted.

If it could be hidden well, there would naturally be no problem. However, if it was discovered by others, it was very likely to trigger a battle.

According to the statistics of the sky cover territory, among the cultivators who entered the bottomless abyss, one percent of them would never return for various reasons.

It didn't sound like a lot, but if the number of cultivators who entered the bottomless abyss was added up, then the number was slightly terrifying.

It was precisely because of these reasons that everyone was certain that Tang Zhen was seeking his own death.

However, Tang Zhen seemed to be unaware of it. After hearing the Golden-armored cultivator's reply, he immediately walked past the crowd and walked to the front of the guards of the bronze door.

"Take out your pass token and don't waste time."

The guard spoke with an expressionless face. It was as if Tang Zhen had already become a dead man in his eyes.

It would be a miracle if he could walk out of this alive after offending the Golden-armored cultivator and seeking death so crazily.

Tang Zhen smiled. He took out the purple gold token and placed it on the table in front of the guard.

When the originally expressionless gatekeeper saw the purple-gold color on the table, his eyes suddenly widened, and his face was full of disbelief.

His body began to tremble slightly. After staring at the purple-gold token for a few seconds, he slowly raised his head and looked at Tang Zhen with shock and fear.

"Your Excellency, please"

The overseer's voice trembled as he wanted to say something. However, he was stopped by Tang Zhen who raised his hand. Tang Zhen continued to ask with a smile, "There's no problem with my token, right? if not, then I'll have to bring some people in."

2417 Are you scared silly?

what's going on? are we still going in or not? ”

The Golden-armored cultivator didn't say anything, but his companion was a little impatient. He stepped forward and asked in a similarly unfriendly tone.

Just like the Golden-armored cultivator, he looked down on the cultivators in the queue. He felt that it was a waste of time to talk to them.

However, when he glanced at the passage token on the table, he was slightly stunned at first, and then his eyes widened.

Of course, he recognized this item and knew what it represented.

“This is an ...”

He opened his mouth, wanting to say something. In the end, he only managed to say a single word. Under Tang Zhen's gaze, he swallowed the words that followed.

At this moment, he suddenly felt that he and the Golden-armored cultivator were both fools.

A dog's eyes look down on people, self-righteous, looking at the sky from the bottom of a well

He had originally thought that he was high and mighty, but in the end, he suddenly realized that he was actually nothing.

This kind of psychological gap was simply unbearable.

However, as an onlooker, he only felt shocked and embarrassed, as well as a little gloating.

The usually arrogant golden-armored cultivator had offended someone he shouldn't have. How was he going to end this?

After realizing this, the cultivator quickly retreated and looked at the Golden-armored cultivator with a strange look.

Although he wanted to warn his companions, he didn't know how to say it. Moreover, at this moment, there was no point in saying anything.

The Golden-armored cultivator had been staring at Tang Zhen. When he saw the strange behavior of the guard and his companion, he immediately realized that something was wrong.

“What are you guys doing? what's going on?”

The Golden-armored cultivator looked at the overseer and asked in an indifferent tone. However, he did not bother about Tang Zhen.

He had already sensed that something was amiss. At this moment, he subconsciously avoided Tang Zhen and was unwilling to have too much interaction with him.

The overseer's body trembled slightly when he heard this. He subconsciously looked at Tang Zhen.

Tang Zhen smiled and didn't say anything as if everything had nothing to do with him. However, his gaze was still fixed on the Golden-armored cultivator.

For some reason, the Golden-armored cultivator suddenly felt a chill down his spine, as if he was being stared at by a ferocious beast.

"Tell me, what happened?"

"This bi an, Your Excellency's pass token is bi an"

When the overseer spoke, his voice was a little stammering, as if he had not recovered from the shock.

"What is it? say it quickly!"

The Golden-armored cultivator was angry and anxious. He asked again, but the uneasiness in his heart was getting stronger.

"It's, it's a forbidden zone token!"

The overseer loudly shouted. Soon after, he bowed to Tang Zhen and retreated to the side without saying anything.

It was just like what he had said earlier. The token of different ranks possessed different authority. The token that Tang Zhen held belonged to the highest rank.

Only the top 100 cultivators on the stone tablet or the Masters of creation were qualified to hold such a token.

The guard had been on duty here for hundreds of years and had seen countless cultivators enter and leave, but this was the first time he had seen such a token.

As long as it was an expert who held this kind of token, one must not provoke them easily. Otherwise, if the other party was angered, one would definitely not even have a corpse left.

The overseer was on tenterhooks as he pondered whether his actions earlier had gone overboard. Would it cause Tang Zhen to feel dissatisfaction in his heart? if it was, how could he remedy this?

The Golden-armored cultivator standing at the side had already fallen into a daze, as if he had been struck by lightning.

He was dumbstruck as he looked at Tang Zhen. His mind was in a mess as the words "forbidden zone command token" kept reverberating in his mind.

At this moment, he had the urge to cry.

No wonder Tang Zhen would take the initiative to step forward and let him follow him into the bottomless abyss. It turned out that he was actually the holder of the Forbidden Zone's token!

If he followed him to the forbidden area of the bottomless abyss, he would definitely not be able to return.

The word "restricted area" was enough to explain everything. Only the true powerhouses were qualified to explore that area.

The Golden-armored cultivator knew that he was not weak, but he did not dare to touch the Forbidden Zone. That would be courting death.

As he looked at the smiling Tang Zhen, endless resentment rose in the heart of the Golden-armored cultivator. He kept feeling that Tang Zhen was deliberately setting him up.

You're a Supreme expert who holds the token of the Forbidden Zone. Why don't you respect your status and hide among a group of low-level cultivators?

Waiting in line at the back of the line, is this something you should do?

If this had not happened, he would not have fallen into such an awkward situation, as if he was being roasted on a stove.

He wanted to beg for mercy from Tang Zhen, but the Golden armored cultivator had always been conceited. In front of everyone, he really couldn't bring himself to speak.

This caused him to shut his mouth tighter and tighter in his agitation, but his body was constantly trembling.

"What's going on?"

Seeing this unusual scene, the companion of the Golden-armored cultivator immediately realized that something was wrong. He immediately turned to the cultivator who had seen the Forbidden Zone token.

The cultivator's mouth twitched as he told everyone what he had just seen. When they learned the truth, all the cultivators were shocked.

They had never dreamed that they would encounter such a situation at the entrance of the bottomless abyss.

Even though Tang Zhen had intentionally set a trap, ultimately, the blame for this matter was still on the Golden-armored cultivator.

If it wasn't for the fact that he was so insistent on humiliating the cultivators in the queue and even wanted to bully them, things wouldn't have come to this.

To put it bluntly, the Golden-armored cultivator had sought his own death by provoking someone he could not afford to offend.

It was useless to say anything now. As the companions of the Golden armored youth, the most important thing for them was to find a way to solve this problem.

Cultivators in loucheng city kept their promises. Just now, in front of everyone, Tang Zhen and the Golden-armored cultivator had already made an agreement to enter the bottomless abyss together.

If the Golden-armored cultivator was afraid and didn't dare to follow Tang Zhen, then things would become very troublesome.

Tang Zhen could follow the agreement and forcefully take the Golden-armored cultivator away. The others would not be able to say anything.

After all, the Golden-armored cultivator had broken his promise first. It was only natural for Tang Zhen to punish him.

However, if he really followed Tang Zhen, the Golden-armored cultivator was destined to never return. As his companions, they naturally couldn't allow such a thing to happen.

They understood the Golden-armored cultivator's personality and knew that he would never admit defeat. Even if he did beg for mercy, it might not be effective.

The only solution now was for them to plead for mercy. Not only could this solve the crisis, but it could also save the face of the Golden-armored cultivator.

After all, this was the sky cover territory. They were all elites of loucheng, and each of them had an extraordinary background.

Looking at Tang Zhen's appearance, it was obvious that he was not a local cultivator. As the saying goes, a strong Dragon can not suppress a snake in its own territory. Tang Zhen would more or less give some face if they opened their mouths to plead for mercy.

As long as the Golden-armored cultivator's life was preserved for the time being, the next step would be to let a higher-ranked cultivator come forward and deal with this matter properly.

Soon, two cultivators slowly walked out from the group of elite cultivators and saluted Tang Zhen.

"Sir, may I know your name and where are you from?"

Tang Zhen faintly smiled when he heard this. He cupped his hands towards the two cultivators but did not directly reveal his origin.

"I'm just a nobody. If the two of you want to say something, please just say it!"

After hearing Tang Zhen's reply, the two sky cover territory cultivators secretly curled their lips. How could a cultivator who had a forbidden zone token be a nobody?

The problem was that Tang Zhen didn't want to say it. They had no way to force him. They could only brace themselves and continue to communicate.

"I hope that you can be magnanimous and not take my companion's recklessness to heart. In fact, he doesn't have any malicious intentions. He just wants to punish those unreasonable guys.

You probably don't know that we can meet such people every time. The rules are clearly written on the stone tablet, but they just don't want to take a second look.

When he saw that someone else had entered first, he immediately made irresponsible remarks as if he had suffered a great injustice. It's really abominable!"

2418 Refusing to admit your mistake (1)

Everyone present could see that the Golden-armored cultivator's companion was pleading for mercy, hoping that this matter could be let go.

It was not a serious matter. Although the Golden-armored cultivator did not have good intentions, he did not really do it.

Since he didn't cause any trouble, his punishment would naturally be reduced. According to the thoughts of the Golden armored cultivator's companion, even if Tang Zhen wanted to pursue the matter, he wouldn't go too far.

In the end, this was just a small matter. As the saying goes, when it's possible to forgive someone, one should forgive them. Tang Zhen was an outsider. Logically speaking, there was no need to be too calculative.

Tang Zhen should be able to see this matter clearly and know how to deal with it.

He was afraid that things would get out of hand after they got out of hand. As for whether it could be resolved smoothly, Tang Zhen's attitude was very crucial.

When the two cultivators spoke up to this point, they looked at Tang Zhen with anticipation, hoping that he would give a reply.

Tang Zhen merely smiled and did not say anything in the face of the expectant gazes of the two cultivators. At the same time, his gaze landed on the Golden-armored cultivator. His attitude was already very clear.

This matter was caused by the Golden-armored cultivator, so naturally, he had to be the one to end it. It was not good to hide and pretend to be mute.

It wasn't like he didn't have a mouth, so why was he able to speak so confidently just now, but now he was silent?

If the Golden-armored cultivator performed well, this matter could be completely forgotten. Tang Zhen wasn't the kind of person who wouldn't let go of others after gaining power.

However, if he refused to apologize from the beginning to the end, then it would be a different story.

After seeing Tang Zhen's attitude, how could the crowd not know what he was thinking? they hurriedly gave the Golden-armored cultivator a look.

apologize quickly and let this matter go. You're the one who'll be at a disadvantage after this!

Someone said in a low voice, but the Golden-armored cultivator didn't seem to hear it. He stood still.

The cultivators in line not far away all looked at the Golden-armored cultivator with anticipation, ridicule, and undisguised ridicule.

After witnessing the entire process, they felt extremely carefree and felt that they had vented their anger.

This elite cultivator from the sky canopy territory had previously put on a high and mighty appearance, as if he didn't put anyone in his eyes.

In the end, in the blink of an eye, he was already like a frosted eggplant, no longer in that arrogant posture.

Comparing the two, it made people want to laugh uncontrollably. This was a real face-smacking.

The Golden-armored cultivator trembled more intensely and looked down at the ground.

His twisted face had become as dark as water, and there was a flame burning in his eyes.

Looking at the strength of his clenched fist, even if a piece of iron was placed in his hand, it would probably be smashed into iron slag.

At this moment, his heart was definitely filled with endless resentment. He hated Tang Zhen for causing him to be unable to step down from the stage.

After waiting for a dozen breaths, the Golden-armored cultivator still didn't respond. He was like a clay statue.

The smile on Tang Zhen's face was still there as he stared at the Golden-armored cultivator. However, his companion was a little anxious.

"A muka, what are you doing?"

A cultivator who was talking to Tang Zhen lowered his voice and roared. His tone was filled with dissatisfaction.

'This damned guy is still so willful even now. Who does he think he is?'

Everyone had stepped forward to help, but the Golden-armored cultivator remained unmoved. How could they not be angry?

After seeing this scene, his companions were dissatisfied and felt that the Golden-armored cultivator was irresponsible.

A cultivator with such a personality was not worth being friends with.

Especially on the battlefield, such a teammate had to be even more careful. It was very likely that he would make a mistake at the critical moment, because he only cared about himself.

"Your Excellency, look at him."

The other cultivator said. At the same time, he looked at Tang Zhen and revealed an awkward smile.

The Golden-armored cultivator's actions made them extremely embarrassed and they didn't know what to do.

At this moment, something happened.

you don't have to beg him. This is the sky cover territory. Since this is our own home, why should we give in to an outsider? ”

The Golden-armored cultivator, who had not responded for a long time, suddenly opened his mouth and said. He stared at Tang Zhen without blinking. His eyes were somewhat ferocious and crazy.

The Golden-armored cultivator felt that he had been humiliated. He couldn't accept it and his thoughts became more extreme.

As soon as he said that, everyone was shocked.

The Golden-armored cultivator's words were far beyond everyone's expectations. When his companions were helping to solve the problem, he actually jumped out to disrupt it. Did he really think that the matter was not big enough?

Looking at the Golden-armored cultivator, everyone cursed in their hearts, ” “This damn guy, what is he trying to do?”

At the same time that he was cursing in his heart, he once again looked at Tang Zhen who was standing opposite him. He discovered that although Tang Zhen was still lightly smiling, his smile had already become ice-cold.

Everyone's heart trembled when they saw this scene. No matter how good Tang Zhen's temper was, it was impossible for him to tolerate such a provocation.

It was originally a small matter, but after the Golden-armored cultivator's actions, it became more complicated.

He flew into a rage out of humiliation and was determined not to lower his head and admit his mistake.

Shouldn't you take the main responsibility for this matter? why do you still look like you've been wronged?

If the participant today was not Tang Zhen but some other low-level cultivator, who knew what the final outcome would be?

In the face of an extreme person like the Golden-armored cultivator, there was an 80 to 90 percent chance that he would lose his life. After all, the bottomless abyss was not a place to play.

In this matter, the Golden-armored cultivator was in the wrong to begin with, and now his attitude was even worse, as if he would not admit his mistake even if he was beaten to death.

Perhaps Tang Zhen originally did not intend to look into this matter. However, based on the attitude of the Golden-armored cultivator, he would not let this matter rest.

The current situation had completely exceeded everyone's expectations. Fortunately, the cultivators had been tempered for a long time and knew that they couldn't let things continue like this.

"Please don't misunderstand, Sir. My companion is also young and impetuous. He doesn't mean to look down on you.

When I return, I will definitely discipline him well and make him realize his mistakes. Do you like this?

In addition, Amuka's grandfather is the city Lord of the ninth city. When we return, he will definitely be severely punished."

As his companion spoke, he kept winking at the Golden-armored cultivator. At the same time, someone rushed in front of him to prevent him from doing anything reckless.

He had deliberately revealed the identity and background of the Golden-armored cultivator in the hope that Tang Zhen would give him some face and not continue to argue with the Golden-armored cultivator.

After all, he still had an elder who was an expert on the same level as Tang Zhen. They had to give each other some face.

Who would have thought that the Golden-armored cultivator would speak again, but this time, his tone was hysterical.

"You don't have to say anymore. This person is deliberately trying to frame me. Otherwise, how could things be so coincidental?

Even if I really apologize today, he won't let me off. In that case, why should I ruin the face of my sky cover territory?

So what if he has the Forbidden Zone token? I don't believe that he would dare to bring me into the Forbidden Zone of the bottomless abyss under the watchful eyes of so many people.

If that's the case, whether it's my grandfather or my master, they'll definitely not let this go!"

When the Golden-armored cultivator spoke, he had a fearless attitude as he looked at Tang Zhen without blinking.

He had a look of righteousness on his face, but it angered his companions who had interceded for him. They didn't expect the Golden-armored cultivator to be so stupid. He was simply hopeless.

2419 Take a trip with me (1)

Tang Zhen looked at the Golden-armored cultivator as his eyes became increasingly cold.

The joy, anger, sorrow, and joy that the creator had modified were enough to affect the changes in the surrounding environment, just like the changes in the natural world.

In an instant, the surroundings became extremely cold, and frost even began to appear on the ground and the grass.

This sudden change shocked everyone. They knew that the situation was developing in the worst direction.

The surroundings were silent, and the atmosphere became more and more tense.

The matter had actually exceeded Tang Zhen's expectations by reaching such a stage. His original goal was merely to scare the Golden-armored cultivator.

Who asked this fellow to have such a vicious mouth? when he was humiliating the cultivators in the queue, he had also cursed Tang Zhen.

Tang Zhen felt displeased. He naturally wanted to teach this fellow a lesson in exchange for his thoughts to be clear.

In the end, the Golden-armored cultivator refused to admit his mistake and instead used his identity as the landlord to warn Tang Zhen with an overbearing appearance.

This is my territory. If you don't appreciate my kindness, then don't blame me for being impolite.

Tang Zhen was so angry that he laughed instead. There was actually such a fellow. He had truly gained some knowledge.

If the Golden-armored cultivator was a master of creation, he might have the right to say such words. However, his true strength was there, and he was just a Fox using the Tiger's might.

He had done something wrong, yet he refused to admit his mistake and even tried to use his identity to warn a creator.

It would be strange if Tang Zhen let go of such a fellow after encountering him!

He took a step forward, but the Golden-armored cultivator was so scared that he kept stepping back. When he came back to his senses, he immediately showed an embarrassed and angry expression.

Tang Zhen could not help but sneer when he saw the flustered expression of the Golden-armored cultivator, who was obviously feeling guilty and fearful.

“Originally, I didn’t intend to look into it. At most, I’ll teach you a lesson and let this matter go.

I didn’t expect you to be so unbearable. You were clearly in the wrong first, but you refused to admit it no matter what. You even turned the tables and made bogus accusations.

Perhaps your teacher doted on you so much that you didn’t know what humility was, and that’s why you developed a wild and conceited character.

Since that’s the case, I’ll let you know what it means to keep your word and what it’s too late to regret!”

Tang Zhen’s voice had just sounded when the Golden-armored cultivator’s expression stiffened. Soon after, his entire body uncontrollably moved forward.

From an outsider’s point of view, it was him taking the initiative to float toward Tang Zhen, which was the same as walking right into a trap.

“What’s going on? what do you want?”

The Golden-armored cultivator’s expression changed drastically. He struggled desperately to break free, but he found that he couldn’t resist the pulling force at all.

Seeing that he was getting closer and closer to Tang Zhen, the expression on his face became more and more frightened. The calm expression that he had deliberately put on had already disappeared at this moment.

“Bastard, what do you want to do? let me go immediately!

If I get hurt, my grandfather, my father, and my master will never let you go!”

The Golden-armored cultivator's tone was flustered and exasperated. He knew that he was already under Tang Zhen's control. At this moment, he was completely out of control.

Originally, he wanted to rely on his background to make Tang Zhen retreat, but he did not expect things to reach such a stage.

This made the Golden-armored cultivator extremely depressed. His identity and background, which had worked so well in the past, suddenly had no effect. What was the reason?

The Golden-armored cultivator didn't know that because of his powerful elders, everyone gave him some face and never made a fuss.

Of course, his own strength was not weak, so he had always been smooth-sailing and had never encountered any setbacks.

However, Tang Zhen didn't care about who he was and actually took action to capture him. This also shattered the last trace of support that the Golden-armored cultivator had.

Panic completely erupted. He was afraid that Tang Zhen would directly kill him in a fit of anger.

Seeing that he was getting closer and closer to Tang Zhen, the Golden-armored cultivator was completely desolated. He looked around and immediately asked for help from his companions.

"Hurry up! Help me! Stop him!"

Seeing the Golden-armored cultivator, the cultivators' eyes lit up and they felt relieved.

You deserve it, you brat!

However, as the companions of the Golden-armored cultivator, they could not just sit by and do nothing.

"Your Excellency, please stop. Let's talk this out!"

As those cultivators spoke, they quickly approached Tang Zhen in an attempt to stop this from happening.

"Get lost!"

Following Tang Zhen's low roar, the sky cover territory cultivators who tried to get close to him were instantly sent flying.

The Golden armored cultivator's companions were all sector Lord level experts. However, at this moment, they were like rootless grass, blown all over the sky.

They wanted to control their bodies, but they found that they couldn't resist the terrifying power at all. The more they tried to resist, the more they were suppressed.

Dozens of sector Lord cultivators working together couldn't do anything to Tang Zhen alone. This situation could only mean one thing.

Tang Zhen, who possessed the Forbidden Zone's token, was definitely a genuine divine level expert. Regardless of how many people they had, they might not be able to gain an advantage.

If they were to fight without restraint, there would definitely be casualties. The difference between a realm Lord and a creator couldn't be made up with numbers.

After realizing this, the group of sector Lords were anxious and angry, cursing the Golden armor cultivator for finding trouble.

"Hurry up and contact Master and a 'MUGA's grandfather. Tell them about the situation here and ask them to come to help as soon as possible!

With just the few of us, it's impossible for us to be a match for them. We'll need a God-grade powerhouse to take action."

The cultivator in charge of leading the team made a prompt decision and immediately ordered someone to contact the elders of the Golden-armored cultivator. At present, only they could solve the problem.

Although it would take a lot of time, there was no other way.

The only thing they could do was to stall for time as much as possible. They would definitely not dare to step forward and fight with Tang Zhen.

To challenge a creator with the strength of a sector Lord, if he really did that, it was no different from courting death.

In the blink of an eye, the Golden-armored cultivator had already floated in front of Tang Zhen. Then, he was grabbed by Tang Zhen.

Tang Zhen turned around and looked at the Golden-armored cultivator's companion. The smile on his face had already disappeared, leaving behind a cold and indifferent expression.

"I'm sure you've all seen what this guy has done. From the beginning to the end, he brought it on himself.

Now, I will follow our previous agreement and enter the bottomless abyss with him. If you want to find me, then go to the bottom!"

Tang Zhen's voice had just fallen when he grabbed the Golden-armored cultivator's shoulder and walked toward the bronze door.

"Stop him!"

Seeing this scene, the companion of the Golden-armored cultivator shouted loudly. If Tang Zhen brought a Mujia into the bottomless abyss, things would become more and more troublesome.

However, at this moment, they were all far away and were unable to catch up in time. Even if they were able to make it, they might not be Tang Zhen's match.

As for the guard of the bronze door, his duty was only to check the people entering and leaving. He did not have the authority to control the opening and closing of the bronze door.

Seeing Tang Zhen forcing back dozens of sector Lords with a single move, the guard was already dumbstruck. How would he still dare to step forward and stop him?

If he really charged forward recklessly, Tang Zhen only needed to wave his hand and he would instantly turn into dust!

As for the low-level cultivators who had lined up earlier, they were already dumbfounded. Even though they were very close to the bronze door, none of them dared to approach it.

Putting aside the fact that they were too weak to be of any use, the cultivators were happy to see the Golden-armored cultivator in trouble because of his poor performance.

2420 How to deal with it (1)

Seeing Tang Zhen's figure disappear, all the cultivators revealed bitter smiles. The thing they were most worried about had finally happened.

Once they entered the abyss, Tang Zhen would most likely bring a muka into the Forbidden Zone. After all, this was the initial agreement between the two sides.

He might have been joking at the beginning, or perhaps he was just trying to scare a MUGA, but it was very likely that he was really going to do it now.

Although a 'MUGA wasn't weak, a restricted area was still a restricted area. Without a master of creation's cultivation, one simply had no right to come into contact with it.

If it were any other day, a muka would not be able to enter even if he wanted to without a forbidden zone token.

However, it was different now. With Tang Zhen leading the way, he had no choice but to enter!

Al, that idiot, Amuka. This time, he's really screwed himself over!

One of the cultivators sighed and shook his head gently. He didn't have a good relationship with a MUGA, so his tone carried a hint of gloating.

when he did this kind of thing in the past, I felt that something would happen sooner or later, and now it really happened.

Another cultivator said. He didn't have a good relationship with Amuka, or rather, he didn't like the way he did things.

At this moment, he was only using this as an excuse to make a big fuss. He wasn't really fighting for the injustice of those low-level cultivators.

"Don't say such things. No matter what, Amuka is still our companion. Moreover, it's very likely that we'll be participating in the battle zone ranking battle together.

Now that such a thing had happened, he had to deal with it as soon as possible to prevent more changes from happening.

By the way, I said I wanted to contact his family, I wonder if anyone did it?"

The leader of the team spoke up to stop these negative comments to avoid discussing the morale of the Army.

"I've already contacted him and he's currently rushing here. However, because he can't use the teleportation formation, he'll need some time.

In addition, his grandfather has spoken and hopes that we can help. He will definitely repay Qianqian generously."

The cultivator in charge of communication said with a strange expression.

"Help? We've already tried our best. What else do you want? to fight that God-ranked cultivator?

If that's the case, we'll probably be killed by that God-level cultivator of unknown origin if we're still talking here!"

The cultivator who was on bad terms with a MUGA said in a cold tone, a trace of disdain flashing in his eyes.

“Yes, it was originally a very simple matter, but it immediately became serious after a MUGA’s actions. Who can you blame?”

After all, the one holding a muka hostage isn’t an ordinary person, but a God-ranked cultivator. If this matter isn’t handled properly, it’s very likely to lead to even greater trouble.”

“In fact, the matter isn’t as serious as you think. Although it was a muka’s fault, that cultivator wasn’t an irrational person.

It’s not worth it to offend sky cover territory over a small matter.

Thus, in my opinion, Amuka would at most be frightened, but not necessarily in life-threatening danger.

I only hope that after this incident, he can turn over a new leaf and stop relying on his own strength to do such boring things.”

One of the two cultivators who had been negotiating with Tang Zhen earlier suddenly spoke. His words had also obtained the approval of everyone.

“That’s right. That senior’s initial appearance was clearly to wait for a MUGA’s apology so that this matter could be resolved.

It was just that a MUGA refused to give in, which angered the senior and then led him into the bottomless abyss.

I just don’t know if I can find out the background of this senior on the cornerstone platform. If I can understand his style of doing things, it will be much easier to negotiate.”

Another cultivator made a suggestion. He wanted to dig deep into Tang Zhen’s roots and figure out who he was.

“Don’t even think about it. Every God-ranked cultivator has an extraordinary identity. How could they possibly let you know their whereabouts?”

If that’s the case, who can bear the responsibility if the enemy ambushes and blocks us?”

Another cultivator shook his head. The cornerstone platform was indeed omnipotent, but the prerequisite was that one had to have enough authority.

This was also the reason why many cultivators in Loucheng worked hard to level up. If they couldn't reach the corresponding level, it would be useless no matter how many battle merits they had.

"Things will become a lot more difficult if we don't know the origin of this cultivator. If he really kills Amuka, where are we going to find him for revenge?"

All the cultivators fell silent again.

When entering the bottomless abyss, one needed to use a passage token, but when leaving, one didn't need to use it. One could leave freely.

If they wanted to stop Tang Zhen, they would have to send enough people in front of each bronze gate. Then, they would have to check the cultivator's pass token one by one.

Not only was this method time-consuming and laborious, but it could also easily arouse the dissatisfaction of cultivators, which might lead to greater contradictions.

Moreover, this method was not safe. It must be known that in the bottomless abyss, there were many remains of cultivators, and it was easy to pick up the passage token.

If he realized that something was wrong, Tang Zhen could use someone else's token to cover his identity.

By then, even if someone were to intercept and inspect them, it would be of no use. This was because if the Masters of Creation wanted to change their appearances, low-level cultivators wouldn't be able to discover them at all.

They would only have a chance of success if they mobilized more Masters of Creation to guard different areas.

However, if Tang Zhen made up his mind to stay in the bottomless abyss for eight to ten years, no one would be able to afford it.

Moreover, what did a MUGA do to mobilize so many masters of creation to participate in his matter?

When everyone thought of this, they couldn't help but curse in their hearts. If a MUGA had apologized and admitted defeat, there wouldn't have been so much trouble.

The original plan was to enter the bottomless abyss to participate in the training, but because of this incident, they had to temporarily terminate the plan.

Now, they had to wait for the arrival of a MUGA's elders to deal with this matter before they could enter the bottomless abyss again.

If he didn't want to pay attention to a MUGA's Affairs, he could enter the bottomless abyss and go to the designated area to cultivate.

However, the problem was that after angering Tang Zhen, would he vent his anger on everyone because of a MUGA and attack each other after they encountered each other?

They were no match for a God-grade cultivator of unknown origin. If they were to encounter such a situation, the consequences would be unimaginable.

Therefore, they could only wait in silence for the time being. They absolutely couldn't act on their own.

The scene was silent. As for the low-level cultivators who had lined up earlier, most of them had already left quietly.

What was originally just a small dispute had now become more and more serious. The participants were at least at the sector Lord level.

Under such circumstances, if they were to get involved rashly, they would probably die without even knowing how they died.

In fact, if they were to look into it seriously, this incident started because of them. If they had not expressed their dissatisfaction when they saw someone cutting the queue, things would not have gotten to this point.

However, the problem was that the rules had already been made public and were also displayed on the stone tablet. It was just that the cultivators who were questioning him didn't look at it.

They had their own responsibilities, and under the circumstances where they were well aware of it, how could they continue to stay?

How could these cultivators know that a MUGA's companions had already set their eyes on them? anyone who tried to leave this place would be silently captured and imprisoned.

If necessary, they were likely to be used as sacrifices to calm this disputes.
