

Read I Have A City In An Alternate World Chapter 2431 - 2431 Killing our way out of the Zerg ocean (1)

2431 Killing our way out of the Zerg ocean (1)

The giant worm was as big as a mountain. It covered the sky when it flew in the air, and it dragged a black gas when it moved.

Within a radius of a thousand miles, these strange insects were everywhere. Who knew how many more strange insects were inside this strange planet?

Tang Zhen secretly guessed that the strange insect's food should be death energy. Otherwise, it would definitely be impossible for it to survive in such an extreme environment.

Cultivators absorbed death energy to improve their strength. Was it the same for the strange insect? the more death energy it absorbed, the bigger its size would be?

Although no one answered, Tang Zhen could basically confirm that this was the correct answer.

However, the devouring ability of these strange insects could not be compared to that of cultivators. They only grew in size, not in their brains.

Perhaps this was the restriction of the rules. It allowed the strange insect to have a strong life force, but at the same time, it could not think like an intelligent creature.

Otherwise, these terrifying creatures from the Forbidden Zone would have long formed a climate and even attacked the world of loucheng.

Since the sky cover territory dared to keep them, it proved that these strange insects were not a cause for concern. Otherwise, they would have been cleaned up long ago.

Although the sky cover territory didn't care about these strange insects, they were a big problem for Tang Zhen.

These insects of different sizes gathered together. They were so densely packed that they were uncountable. They surrounded Tang Zhen and clearly treated him as food.

The vitality emitted by Tang Zhen was like a bright light in the dark night. To these strange insects, it was simply a Supreme delicacy.

There was only one thought in their pure minds at this moment, and that was to devour Tang Zhen.

Tang Zhen's expression became unusually serious as he saw the increasing number of strange insects. His earlier probing attack had already proved that these strange insects were extremely difficult to deal with.

Even though it was just a casual strike, even a world Overlord wouldn't be able to withstand it.

However, these terrifying strange insects that lived in the Forbidden Zone were able to withstand his attacks. Only a small number of strange insects were killed.

Such a terrifying life force was simply unheard of. He wondered what it was.

Tang Zhen felt a sense of danger. If he was surrounded by these terrifying insects, he might not be able to withstand it even if he was a creator.

If they weren't confident and worried that they couldn't win, they would temporarily retreat!

Tang Zhen wasn't a pedantic person. He was hot-blooded when he needed to be, and he must be calm when he needed to be.

On the battlefield, one needed to adapt to the situation. If one blindly fought and charged, this kind of behavior could only be regarded as a reckless move.

"Since that's the case, let's avoid it for now."

When Tang Zhen thought up to this point, he immediately launched an attack on the insect swarm in front of him. The rolling sea of fire spread out for a distance of several dozen li.

The strange insects were enveloped by the sea of fire and immediately became a mess. Some were burned to ashes, but most of them were safe and sound. They only turned into fireballs and ran around.

After seeing this scene, Tang Zhen was even more certain that the strange insects would be difficult to deal with. One must know that this sea of fire had a temperature of over ten thousand degrees. Yet, it was still unable to kill these strange insects on a large scale.

Tang Zhen took advantage of the opportunity when the strange insects were in a mess to find a gap and shuttled through it with lightning speed.

These strange insects seemed to have been enraged when they saw Tang Zhen escape from the encirclement. They emitted a sharp cry that caused one's soul to tremble.

In particular, those giant strange insects blocked Tang Zhen's path as they kept spurting out strange liquid.

Some of the small insects were sprayed, and as if they had fallen into glue, they instantly lost their ability to move.

A giant strange insect was extremely fast. It aimed at Tang Zhen's position and bit fiercely.

It was several thousand meters in size. Tang Zhen was simply like an ant in front of this giant strange insect.

However, in the world of cultivation, size did not represent strength. No matter how many huge monsters there were, they were ultimately just prey for cultivators.

a bunch of extremely ugly insects actually want to eat me. Of course it's wishful thinking!

Tang Zhen coldly snorted. A battle blade suddenly appeared in his hand as he hacked at the strange insect blocking his way.

The seemingly thin saber burst out a cold light that was thousands of meters long and fell on the body of the giant insect.

"Aooo!"

The strange insect let out a painful roar. A thin line suddenly appeared on its body, and then black gas spewed out from the wound.

Then, the body of this strange insect that was as big as a mountain suddenly split into two and fell to the ground.

When the strange insects nearby saw that their companion had died, they immediately changed directions and rushed toward the monster's corpse.

Tang Zhen's eyes narrowed slightly when he saw this scene. He felt that something was amiss.

what are these strange insects doing? could there be something good in the corpse of the giant strange insect? "

When Tang Zhen thought up to this point, he immediately looked at the strange insect's corpse and quickly discovered an abnormality.

At this moment, it could be clearly seen that there were no internal organs in the strange insect's body. Its structure was so simple that it made one's hair stand on end.

Although its stomach was empty and it looked like a cockroach, it was clearly in a half-energized state.

Tang Zhen quickly discovered that the thing that these strange insects were fighting for was actually a crystal core within the body of the giant strange insect.

This alone was enough to prove that the crystal core in the strange insect's body was definitely not an ordinary item.

Tang Zhen's heart jerked slightly. He subconsciously rushed forward and snatched it back from the mouths of a group of strange insects.

As a result, as soon as the crystal core touched his hand, he felt a strange feeling, indicating that this crystal core was extraordinary.

If he could absorb it, it would be very helpful for his cultivation. After all, this was the life-force essence accumulated by the giant strange worm.

After discovering this situation, Tang Zhen, who was originally prepared to quickly retreat, immediately had a new plan.

They still had to retreat to avoid being outnumbered. However, before they retreated, they had to reap some harvest.

If it was proven that this crystal core was indeed helpful in improving one's strength, so what if they had to fight?

When Tang Zhen thought up to this point, he first dodged the attacks of a large group of strange insects. After which, he quickly turned back and locked onto another giant strange insect before launching an attack.

Tang Zhen did not dare to face a group of strange insects head-on. However, he did not have the slightest fear if he were to face one or two strange insects.

As expected, the strange insect that he had locked onto was killed, and the crystal core within its body was once again obtained by Tang Zhen.

After killing a strange insect, Tang Zhen locked onto the next target and launched another attack.

This was because Tang Zhen's speed was extremely fast. Every time he attacked, he would kill with a single move. This caused the strange insects to immediately become a mess.

Tang Zhen took advantage of the chaos and killed a few more giant strange insects, snatching the crystal cores in their bodies.

Unfortunately, time was limited, so he could not verify the effects of the crystal cores. As such, there was no need to collect too many.

If there was no effect, wouldn't it be a waste of effort?

Although he had successfully killed a few giant strange insects, Tang Zhen's situation had become more and more dangerous. This was because the strange insects had already formed an encirclement.

If he continued to kill the strange insects, he might be trapped to death, and it would not be easy to leave.

"It's time to go!"

Tang Zhen made a prompt decision. He once again locked onto the direction of the retreat and continuously launched attacks.

The insect swarm was ferocious but Tang Zhen was even more ruthless. He forcefully killed his way through the flesh.

After charging out of the insect swarm's encirclement, Tang Zhen did not continue to stay any longer. He directly flew towards the position of the red little bird.

2432 Another encounter (1)

When they saw Tang Zhen turn around and fly away, those strange insects immediately followed closely behind him.

From their appearance, it was obvious that they did not want to give up on Tang Zhen so easily and wanted to devour him.

Tang Zhen tried to teleport away, only to discover that there was a special force field present in this space.

Due to the influence of this force field, even a creator-level powerhouse wouldn't be able to move instantly.

Tang Zhen had no other choice. He could only increase his speed and try his best to avoid the strange insect's pursuit.

Fortunately, although the strange insects were ferocious, their flying speed was far inferior to that of the Masters of creation.

In the chaos, the distance between the two sides grew further and further.

It didn't take long for Tang Zhen to shake off the group of strange insects behind him. He let out a long sigh of relief.

These strange insects were indeed powerful. If he had not run fast enough, who knew if he would have been trapped by them?

Tang Zhen wasn't afraid of one strange insect, but when thousands of them gathered together, even Tang Zhen couldn't afford to provoke them.

From this, it could be confirmed that none of the creatures in the Forbidden Zone were to be trifled with. It was best to avoid them if possible.

The remaining time would be to find the little red bird and head deeper into the restricted area.

This item was of great significance to Tang Zhen. He definitely could not give it up easily.

He once again sensed the little red bird's aura. It seemed to be even clearer than before. However, the distance between it and Tang Zhen was still not very close.

After locking onto the position of the small red Bird, Tang Zhen buried his head and hurried on his way. This time around, he did not encounter any strange insect-like creatures.

Clearly, monsters were not omnipresent in this forbidden zone, but only in certain special areas.

After crossing the distance of around three planets, there was still no trace of the little red bird. This caused a trace of doubt to flash in Tang Zhen's heart.

He tried to sense its location, but it was still in the area ahead, no different from before.

Clearly, while Tang Zhen was chasing after the small red Bird, the other party was also continuously moving. Moreover, he was heading straight into the depths of the restricted area.

Tang Zhen was a little confused. What exactly was this fellow trying to do by running so far away?

He recalled the Red Bird's appearance when it left. It seemed to be very anxious, and as soon as it left the divine Kingdom in his mind, it impatiently ran into the distance.

Tang Zhen was faintly curious in his heart. He wanted to see what this restless little fellow was up to.

The little red bird's background was extraordinary. Anything that could interest it would definitely not be simple. Tang Zhen also wanted to get to the bottom of this.

Next, they continued forward. However, the road was quickly blocked again, causing Tang Zhen to have no choice but to stop.

Compared to the chaotic region they had passed through earlier, the planet that appeared in front of Tang Zhen had completely turned into a Crystal World.

The colorful broken crystals gathered together under the immense pressure and turned into a Bright Crystal ball.

The crystal ball looked very beautiful, but the light refracted from the crystal had a rather terrifying destructive power.

With just a glance, he could feel the sense of danger, which made people feel shocked.

The temperature of the rays was extremely high. As they criss-crossed, they formed an airtight net of light.

As it connected to the ocean of light around the planet, it also completely sealed off the path forward, leaving no gap at all.

Because of the existence of the terrifying light, the planet had become a pure Dead zone. Even monsters with strong survival abilities like the strange insect might not be able to survive here.

"How did the little red bird manage to fly in such a dangerous place?"

A question appeared in Tang Zhen's heart. However, when he thought about the origin of the small red Bird, he felt that it was only natural.

A super plane was terrifying. Although the environment in front of him was dangerous, it might not be comparable.

However, just because the little red bird was able to go over, it did not mean that Tang Zhen would be able to go over. Although the little red bird's strength was inferior to Tang Zhen's, it was a special high-grade life form.

Just like a fish that could swim in water but not fly in the sky, the Red Bird was naturally able to adapt to this special environment.

With a thought, the white-colored flame covered the surroundings of Tang Zhen's body. After which, it attempted to walk toward the light net in front of him.

"Shua shua shua"

Tang Zhen felt as if he had turned into charcoal the instant he came into contact with the light net. It was as if he could smell the smell of his soul being burned.

It was an extremely uncomfortable feeling, as if an ordinary person was being roasted in the desert, and the discomfort was magnified a hundred times.

After feeling that something was wrong, Tang Zhen immediately retreated. He then looked at his arm.

From his left elbow forward, it had completely disappeared. Even if he had an energy-formed body, he could not withstand the burning of the light net.

The powerful Origin Energy took effect, and the missing arm rapidly grew back, looking no different from before it disappeared.

“No, Yingluo.”

Tang Zhen faintly sensed that there seemed to be a trace of strange scorching energy within his newly grown arm. It was just that it was hidden extremely deeply.

When he tried to drive it away, the energy suddenly exploded and tried to burn his body to ashes.

Tang Zhen was startled. He did not hesitate to cut off the arm and throw it far away.

After the arm flew out, it suddenly exploded and turned into a huge fireball.

Tang Zhen was speechless as he looked at the cluster of exaggerated flames. He did not expect that after the strange energy merged with his body, it could actually erupt with such a terrifying strength!

If it was used to harm the enemy, it could have an unexpected effect, and even the Masters of creation would find it hard to bear.

His missing arm recovered once again. After Tang Zhen took a look, he actually once again extended his arm into the light net.

The pain came again, and his forearm disappeared. Everything was no different from before.

However, Tang Zhen clearly felt that the time it took for his forearm to be burned this time around seemed to be a little slower.

Tang Zhen looked at the light net in front of him after he retracted his arm. He estimated that the area it covered was likely several tens of thousands of kilometers.

It would take some time to cross this area, but his body couldn't hold on for that long.

this should be the only passage. I have to find a way to get through!

Tang Zhen sensed his arm. After confirming the existence of the strange energy, he once again extended his arm into the light net.

After his arm was destroyed, it immediately grew back. Tang Zhen endured the pain and kept repeating the same action.

After a period of time, something magical happened. After Tang Zhen's arm was placed into the light net, it didn't disappear for a long time.

If one were to look closely, they would discover that the arm was glowing, as transparent as flawless glass.

The terrifying energy from the web of light filled his forearm, and its concentration was more than a hundred times higher than before.

It was precisely because of this change that when his arm reached into the light net, it was not destroyed like it was at the beginning. Instead, it fused with the light net.

His own guess had been verified. The corner of Tang Zhen's mouth was lifted into a smile. Soon after, he simply extended his entire arm into the hole.

The previous scene was repeated again and again.

As time flowed by, the area that Tang Zhen's body could reach into the light net became larger and larger. Finally, his entire person had already entered the light net.

Tang Zhen's body was transparent and flawless under the light net's calcination, as if he was sculpted from crystal.

"It should be about time."

Tang Zhen sensed the changes in his body. After he confirmed that he would not be burned by the rays, he increased his speed to the extreme and passed through the light net.

2433 Giant bird vs Giant snake (1)

In the sea of light that was as glaring as the sun, a figure wrapped in flames suddenly rushed out.

As the flames gradually extinguished, the figure wrapped inside was revealed. It looked like a glass statue that was burned red by the flames.

Perhaps it was because the heat was too strong, but the figure's face was already blurry, like a wax figure that was about to melt.

“Crack!”

A cracking sound rang out as the lava Shell on the surface of his body shattered, revealing Tang Zhen who was wrapped within.

However, he was not in a good state at the moment. His brows were tightly knitted, as if he was enduring some kind of pain.

This was indeed the case. In the process of passing through the ocean of light, he had been enduring immense pain and could not shield himself from it.

By right, life forms made of energy had long abandoned the low-end sensory ability of touch. It was even less possible for them to feel pain, which would bring negative effects to themselves.

However, the strange energy that was contained within the rays was able to cause Tang Zhen to feel pain. This situation was indeed a little strange.

If it was used on the battlefield, it was likely to have an unexpected effect, catching the enemy off guard.

At this moment, Tang Zhen's body was already filled with this strange energy. It was currently in a restless state.

Under such circumstances, Tang Zhen had already become a mobile bomb. Moreover, it was the kind without a safety and could be detonated at any time.

Tang Zhen did not dare to store this substance in his body for too long. Otherwise, if he was the slightest bit careless, he would blow himself up into pieces.

However, he could not casually release it as that would be too wasteful. Moreover, Tang Zhen had also discovered that this kind of energy actually had the effect of aiding one's cultivation.

Even though it wasn't particularly obvious, to a creator, every bit of increase in strength was very difficult.

To have a method to increase one's strength at any time was a rare opportunity, and no creator would give it up.

Tang Zhen was the same. He was currently thinking of ways to raise his strength. Naturally, he had to properly make use of this opportunity.

After thinking of a way to suppress the violent energy in his body, Tang Zhen no longer wasted time and continued to fly toward the Red Bird's aura.

"I hope I won't encounter any more messy things, Yingluo."

Tang Zhen was secretly praying in his heart. The two accidents during the journey had wasted a large amount of his time.

Naturally, the fewer unlucky things like this, the better.

Perhaps Tang Zhen's prayers were effective. Tang Zhen did not encounter any other messy situations during the following journey.

could it be that there's a terrifying monster in this forbidden zone? or is it related to the Red Bird? "

Just as this thought appeared in his heart, Tang Zhen immediately thought of something. That was, the red little bird had been constantly moving.

If he didn't guess wrong, the little red bird should be fighting with some kind of monster, which was why it was getting further and further away from Tang Zhen.

Now that he was no longer moving around, he didn't know what kind of situation he had encountered. He had to hurry over and check it out as soon as possible.

.....

At the end of the " string " of chaotic planets, a flat land finally appeared. The area was unbelievably large.

The place seemed to have been deliberately leveled. The ground was as smooth as a mirror, and whether it was stones or other debris, they were all compressed into one.

The ground was the same as the other areas, with Black Death energy flowing and settling on it. The only difference was that there was a feathered snake-like monster inside.

They cruised around in groups, occasionally sticking their heads out to look at the sky, their colors flashing with an ominous glint.

It turned out that an intense battle was taking place in the sky above the sea of death, attracting these strange snakes.

In the dusky sky, hundreds of huge snakes were dancing in the sky.

They had wings that looked like bone wings, and sharp claws on their abdomens. They looked like mosquito legs.

Each of the giant skeletal winged snakes was at least a few hundred meters long. They could definitely be called terrifying giant beasts.

In the process of flying, the giant skelewing snake constantly spat out venom or attacked with its sharp claws and horns.

Their target was a giant red Bird, which was actually an enlarged version of a small red Bird.

At this moment, the giant red Bird had changed greatly. Its feathers were as bright as flames, and it looked extremely majestic.

Its eyes were as sharp as a knife as it stared at the giant snakes around it without any fear.

Even though there were so many of them, the Red Bird was not afraid at all. Instead, it took the initiative to attack and fight with the giant skelewing snakes.

The giant skelewing snake was not to be outdone either. It continued to weave through the foul-smelling poisonous mist, looking for an opportunity to attack.

Although the Red Bird was ferocious, it would still be injured by the large number of giant skeletal winged snakes.

However, the giant red Bird did not seem to care. It continued to chase after the giant skelewing snakes like a predator.

Every time a giant skeletal winged snake was caught, the giant red Bird would let out a cry and use its sharp claws and beak to tear its prey into pieces.

Before the giant skeletal winged snake died, it let out a scream-like spiritual wave, causing its kind to become more and more agitated.

After killing the giant skeletal winged snake, the giant red Bird would take out something from the snake's body and swallow it.

After dropping the giant snake's body, the giant red bird's eyes flickered and it continued to charge towards its next target.

Seeing the giant skelewing snakes getting killed one by one, the other giant skelewing snakes fell into a panic. They didn't expect the giant red Bird to be so fierce.

Just as they were hesitating, a long hiss suddenly came from the ground. The giant skelewing snakes immediately went crazy after hearing it.

Even though the giant skeletal winged snake knew how ferocious the Red Bird was, it still continued to attack, as if it was not afraid of death.

The giant red Bird that had been at ease suddenly felt the pressure increase. Although it had killed a few giant skeletal winged snakes, it had also suffered heavy injuries.

The giant red Bird let out a sharp screech. It seemed to be angry because it was injured. It became even faster and killed a few more giant skeletal winged snakes.

However, it was as if the giant skelewing snakes were being controlled. They continued to attack, not caring if they were killed.

The giant red Bird was already completely enraged after being continuously injured. It raised its head and let out a cry.

A thick blood-red light burst out from its body. Then, the giant red Bird opened its eyes wide and two golden rays of light burst out.

Any of the giant skelewing serpents that were touched by the Golden rays of light immediately lost their ability to move, as if they had been hit by a petrifying spell.

The giant red Bird cried out happily and rushed over like a bolt of lightning. It tore the giant skeletal winged snake apart as if it was venting its anger.

The giant red Bird was extremely ferocious, and the giant skeletal winged snakes were even more so. They swarmed up like a swarm of bees and surrounded the giant red Bird.

The ground was filled with the corpses of the giant skeletal winged snake. The injuries on the giant red Bird also increased, and its movement speed became slower and slower.

At this moment, a huge black shadow rushed into the sky from the place where the scream came from.

It was an indescribably huge snake. Even though its body had shot into the sky, half of it was still on the ground.

The Super giant snake knocked away the other giant skeletal winged snakes and rushed to the front of the giant red Bird. It opened its mouth and bit down.

After the Super giant snake opened its mouth, it looked like a giant volcanic crater. It was filled with magma-like substance.

As it bit at the Red Bird, the lines on the Super giant snake's abdomen suddenly turned red, and then it spat out a mouthful of lava.

The giant red Bird was caught off guard and quickly dodged, but its head was bitten by the Super giant snake, swallowing its head and a part of its neck.

2434 The giant bird of Fury (1)

The giant red Bird that had its head bitten off fell like an out-of-control plane, straight to the ground.

It was as if it had completely died after losing its head.

The Super giant snake, which had succeeded in its attack, immediately turned around and chased after the giant red Bird that had landed on the ground.

It wanted to take this opportunity to kill the giant red Bird.

The giant red Bird that had suddenly barged in had a rather terrifying ability. The Super giant snake had only been able to kill it by relying on its advantage of sneak attacks.

However, for a super creature, a normal attack could not kill it. The Super Snake was afraid that the Red Bird was not dead, so it immediately gave it a second blow.

The rest of the giant skelewing snakes saw this and quickly gathered around, trying to share some of the leftovers.

The Super giant snake was the king, and they did not dare to provoke it at all. Otherwise, they would have swarmed up and fought for it.

To the monsters in the Forbidden Zone, the giant red Bird was an extremely rare tonic that could only be found by chance.

Cultivators used the death energy here to increase their strength, and they also devoured cultivators to advance.

The Super giant snake was extremely fast, and it looked like it was about to swallow the giant red Bird.

But at this moment, the giant red bird's body trembled, as if it had come back to life.

Then, three more heads, the same size as the one that was bitten off, drilled out of the place where the head had been lost.

The giant red Bird that had been killed had already completed its rebirth at this moment, or rather, it had not died at all.

Its body that had yet to land on the ground suddenly flew up and screeched at the Super giant snake. Six golden lights shot out from its three heads and went straight for the Super giant snake.

The giant red Bird used its petrifying ability again.

The Super giant snake saw this and its eyes flashed with fear, quickly dodging the attack.

Many monsters could use skills like petrification, but the effects varied.

This ability of the giant red Bird was so powerful that it was terrifying. Even the Super giant snake was afraid of it.

Because of its huge size, even though the Super giant snake managed to Dodge in time, it was still swept by the golden light.

A large area of its body began to petrify, and pieces of gravel fell down as if it was about to collapse.

From a distance, it looked like a giant mottled stone statue floating in the sky filled with poisonous fog.

“Roar!”

Sensing the impending danger, the Super giant snake let out a furious roar, as if it had been completely enraged.

It aimed at the giant red Bird, opened its mouth, and spewed out rolling lava, dyeing the sky red.

In fact, this was not lava, but a substance similar to lava. Its destructive power was far greater than lava.

The giant red bird's eyes flashed with a touch of mockery, as if it was mocking the Super giant snake for overestimating its own ability.

Or it could be said that it was very confident in its own means and thought that the Super giant snake would not be able to resist.

As for the sneak attack just now, it was just a careless mistake. He definitely couldn't make the same mistake.

The golden light in the red bird's eyes grew brighter and brighter, as if a nuclear bomb had exploded, driving away almost all the darkness.

The Super giant snake was enveloped by the golden light, and its movements became sluggish, as if it had lost its target.

Although it was only for a short time, the sluggishness became more and more obvious. It was obvious that the Super giant snake had been affected.

Seeing this, the giant red Bird increased its attack power again, and the Super giant snake's speed also became slower and slower.

In just a short moment, the giant snake that pounced over was turned into a stone sculpture. Some areas were still flesh and blood, but they were also rapidly turning into stone.

By the time the golden light in the red bird's eyes disappeared, the Super giant snake no longer moved, as if it had become a real stone sculpture.

The stone statue was suspended high in the sky, surrounded by poisonous fog. The scene looked extremely eerie.

As for the giant skeletal winged snakes, they were already in a mess, circling the stone statue and chirping.

Seeing this, the giant red Bird also let out a sharp cry and suddenly flew up from the ground, straight towards the Super giant snake.

Although its petrification ability was powerful, it could only last for a short time when facing a terrifying monster like the Super giant snake.

It wouldn't be long before the Super giant snake returned to its original state, so he had to take this opportunity to kill it.

Who knew that at this moment, from the Black Sea-like ground, another huge figure would burst out and charge at the giant red Bird again.

The previous scene repeated itself. The giant red bird's head was bitten, and even a small part of its body disappeared.

The ambushing enemy revealed himself. It was actually another super giant snake with an extremely ferocious appearance.

However, if one looked closely, they would find that there was something wrong with this super giant snake. When it moved, the giant snake statue in the sky would also shake at any time.

It turned out that the two super giant snakes were one body, with two heads on each end. The giant red Bird used its innate ability to petrify one head, but the other took the opportunity to attack.

The giant red Bird was caught off guard and suffered another heavy blow. In the blink of an eye, only half of its body was left.

The Super giant snake, which seemed to have the upper hand, immediately pursued. After the previous experience, it knew that the giant red Bird would not be killed so easily.

As expected, at this moment, the damaged giant red Bird suddenly exploded and turned into a cloud of red mist.

Within the red mist, one could vaguely see a shadow. It was the Furious red giant bird.

It glared at the Super giant snake as if it had a deep hatred for it. As it flapped its wings, the red mist began to expand rapidly.

A trace of fear appeared in the eyes of the Super giant snake. It had a faint feeling that the giant red Bird, which had changed its form, seemed to have become even more terrifying.

In the next moment, the red mist was like a huge net that completely covered the Super giant snake.

After the red mist wrapped around the giant snake, something similar to blood vessels immediately appeared and attached themselves to the Super giant snake's body.

In the blink of an eye, the Super giant snake's body was covered in red hair, looking extremely strange.

After discovering the abnormality in its body, the Super giant snake immediately panicked because it felt a sense of fatal danger.

The Super giant snake twisted its body, trying to get rid of the red hair, but it was to no avail.

Soon, the red hair burrowed into its skin and flesh, causing the Super giant snake to become even crazier. Its huge body turned around with all its might.

Due to the gigantic snake's size and violent movements, the death energy on the ground was stirred up, forming a scene as if the end of the world had arrived.

No matter how much the Super giant snake struggled, the red mist still wrapped around it. As time passed, the red mist's volume actually began to expand.

On the other hand, the Super giant snake's body was constantly festering, and a kind of energy essence similar to origin power was constantly surging out of its body.

It was like a leaking leather ball that was rapidly drying up, and it wouldn't take long for it to become a corpse.

2435 The escaping red birds.¹

After being trapped by the red mist, the Super giant snake had no chance of turning the tables. In addition to the two successful sneak attacks earlier, it had already sunk to the bottom and angered the giant red Bird.

No matter what, the giant bird would not let the giant snake go.

Seeing that the Super giant snake had turned into a dried corpse, the giant bird in the red mist turned its gaze to the giant skeletal winged snakes.

The giant red Bird had long remembered that these things had been causing trouble. This thing was extremely vengeful, so it naturally would not let go of the accomplices of these super giant snakes.

This included the snake Cubs that were hiding in the liquefied death energy on the ground. He couldn't let any of them go. He had to kill them all!

After making up its mind, the light in the giant red bird's eyes became more and more ferocious.

The red mist trembled violently, and suddenly, countless tentacles extended out, shooting in all directions.

The tentacles were so fast that the giant skelewing snakes had no time to Dodge.

A shocking scene occurred. The giant skeletal winged snakes were unable to break free from the thin red mist tentacles.

It was like a thin thread trying to catch a big fish. It seemed like it would break with a pull, but in reality, it was impossible.

As the red mist tentacle trembled, the giant skelewing snake also trembled as if it had been struck by lightning.

Their bodies quickly shriveled and festered. Their life force followed the paths in the red mist tentacles and flew to the core of the red mist, which was quickly absorbed by the giant red Bird.

A crisp chirping sound was heard, and it was filled with joy and excitement. The red tentacles flickered like neon lights, giving off an extremely dangerous feeling.

To the giant snakes, this was the light of death.

The giant red Bird in the red mist looked around proudly. At this moment, it was an invincible existence.

But at this moment, the giant red Bird looked into the distance and seemed to have discovered something.

“Swish!”

The giant red bird’s chirping sounded again. It seemed to be a little annoyed and unwilling at the same time.

In just a few short breaths, the red mist quickly shrank and gathered, turning into something like a crystal.

As the tentacle retracted, dried up snake corpses fell from the sky. There were even some half-dead giant skeletal winged snakes among them. It was a miserable sight.

The giant snake was also released from the red mist and fell heavily to the ground.

This super creature had extremely high endurance. Even though the giant red Bird had focused its attention on it and had almost turned it into a dried corpse, it still did not die.

The red mist quickly condensed and turned into an exquisite bird, which was its form in the divine Kingdom in his mind.

Its eyes were filled with a strong sense of reluctance. It glanced at the corpse of the Super giant snake, then flew away like lightning.

.....

It didn’t take long for a figure to arrive and stop on top of a pile of giant snake corpses.

Surprise flashed across Tang Zhen’s eyes when he saw those giant bone winged snakes that were not completely dead. He had only casually swept his gaze over them and was already certain that this was the work of the little red bird.

However, this fellow had been here just a moment ago. After sensing his arrival, it immediately abandoned its prey and flew deeper into the Forbidden Zone.

The little red bird’s abnormal behavior was clearly not right. Perhaps, it was trying to escape from Tang Zhen’s control.

This thing came from the Super opposite side and was of great significance to Tang Zhen. He absolutely could not give it a chance to succeed.

Tang Zhen wanted to chase after it. However, he temporarily gave up on this thought after sensing the speed of the small red Bird.

Perhaps it was because the little red bird was more adapted to the restricted area's environment, causing its movement speed to far surpass Tang Zhen's. If it were to chase after Tang Zhen now, the distance between the two of them would only grow further and further.

Tang Zhen's time was limited. It was absolutely impossible for him to waste his time doing such a thing. Even if he really wanted to capture the small red Bird, he had to first complete the plan.

Tang Zhen turned his head and glanced at the Super giant snake on the ground. He discovered that although this fellow's appearance was miserable, it was not completely dead.

In order to avoid Tang Zhen, the little red bird had only absorbed half of the energy before it hurriedly fled. Otherwise, the Super giant snake that had appeared in front of Tang Zhen would have been reduced to a pile of remains.

Tang Zhen's eyes brightened after he scanned the body of the Super giant snake and discovered that it contained an energy similar to Origin Energy.

Following a thought, a red mist similarly rose around Tang Zhen's body. It was as red as blood.

At first glance, it was no different from the red mist of the Red Bird, and it was even denser.

This ability came from the cornerstone platform and belonged to the innate ability of a devil. It was continuously optimized and strengthened by Tang Zhen and could devour countless living beings with a single thought.

The Super giant snake had already recovered a little and was about to struggle to escape. In the end, it encountered Tang Zhen before it could even take action.

Looking at the blood mist that was coming at it, the Super giant snake let out a sorrowful cry. After a few futile struggles, it completely stopped breathing.

The blood mist that Tang Zhen had released was indeed overbearing. After it had enveloped the Super giant snake, it immediately and completely wrapped around it.

Tang Zhen directly sat cross-legged in midair, guiding the energy extracted from the Super giant snake's body and transforming it into a material that could be fused.

During this period of time, there were some giant skelewing snakes that had recovered and tried to sneak attack or escape. However, they were all easily killed by Tang Zhen.

Their corpses were similarly covered by a blood mist. Tang Zhen, who was anxious to raise his own strength, would definitely not let go of these good "tonics."

Tang Zhen slowly opened his eyes after a few hours.

All of the giant snakes had been refined by the blood mist, allowing Tang Zhen to benefit a lot. If this situation were to happen over a dozen times, it would definitely allow his strength to rise to another level.

For God-ranked cultivators, it was extremely difficult to increase their strength. Not only did it require enough time to increase their realm, but it also required enough opportunities.

These giant skeletal wings snakes could be considered a kind of opportunity.

Although they had indeed encountered some danger and unforeseen events in the process of entering the restricted area, the gains similarly made Tang Zhen feel happy.

Not only did he recover from his physical injuries, but his strength also returned to the state it was in before it was damaged. Now, there was even the possibility of an upgrade.

At the same time that he was pleasantly surprised, it also caused Tang Zhen to be filled with curiosity. Just how many rare treasures were there in this restricted area?

There was also another troublesome matter, which was the Red Bird with an unknown motive. What was this guy planning?

Tang Zhen was able to increase his strength by absorbing the giant skelewing snake's energy. The same was true for the giant red Bird. Moreover, these prey were the spoils of war that the giant red Bird had left behind.

&Nbsp; in the time that followed, the Red Bird would most likely kill even more prey and continuously increase its strength.

In a special place like the Forbidden Zone, the giant red Bird was like a fish in water. As long as it was given enough time, its strength would definitely increase rapidly.

If he allowed it to continue hunting, would it pose a threat to Tang Zhen when its strength reached a certain level?

Tang Zhen's heart had always been on guard against this unknown lifeform that came from the Super plane and had once posed a threat to him.

Even if this thing had been modified by the scales of fate and the danger had been eliminated, Tang Zhen still did not dare to take it lightly.

"If I encounter the Red Bird again, I must recall it to avoid any accidents."

However, after thinking about it, Tang Zhen felt that something was amiss. Earlier, the little red bird was in such a hurry to come out. Could it be that it was just to kill monsters?

Tang Zhen shook his head. He felt that it was impossible for the matter to be so simple. There must be a reason that he did not know about.

2436 The core of the dead universe?

Because of the change caused by the little red bird, Tang Zhen's following actions became much more careful. He held this little thing and schemed against him.

From the beginning to the end, Tang Zhen had never treated himself as the little red bird's master. He had only treated it as a tool.

It wasn't that he didn't want to, but he didn't dare to.

Although the little red bird's strength wasn't as strong as Tang Zhen's, because it came from a super plane, it possessed a very strange and powerful ability that was impossible to guard against.

Putting aside the Red Bird's ability, just the God-killing virus that had caused Tang Zhen to suffer a great loss was quite a terrifying thing.

The ability of the Godkiller virus to destroy a God without a sound was simply terrifying.

The Red Bird's ability was far above the Godkiller virus, but after being dealt with by the balance of fate, its ability had been greatly reduced.

But even so, it was still not to be underestimated.

Now that this fellow had become disobedient, it was very likely that he would cause trouble for him. This was indeed bad news for Tang Zhen.

Of course, this was only a guess. Tang Zhen was not very clear about the truth.

"I hope I'm overthinking it, Yingluo."

Tang Zhen shook his head and continued to advance.

After passing through the territory of the giant skeletal winged snake, they had already left the range of the candied gourd-like weird planet. The terrifying sea of light that had covered the entire area suddenly disappeared the moment they left.

When he looked back, there was no trace of it at all, as if it had never existed. If he wanted to return now, he might not be able to find the original path.

The mysterious forbidden zone was indeed mysterious.

After coming to the new area, that suffocating feeling slowly disappeared, but the pressure of death energy began to become more and more intense.

Tang Zhen had a feeling that he was unceasingly approaching the center. Although he was still very far away, this feeling was definitely not wrong.

The vast universe seemed to be boundless, with no directions, but it still had a Center.

It was the end of the universe, and very few creatures could reach it. However, cultivator Lou Cheng had explored it more than once.

The pressure in the outer regions of the universe wasn't great, but the closer one got to the center, the stronger the pressure became. Even Masters of creation found it hard to withstand.

This was probably the reason why the Forbidden Zone got its name.

However, cultivators had such a temperament. The stronger the pressure, the more it could stimulate one's potential.

Therefore, not only was this a forbidden zone for life, but it was also a Holy Land for cultivators to break out of their cocoons and become butterflies. However, whether or not one could achieve their predetermined goal depended on whether one had enough courage.

One must know that after reaching this point, Tang Zhen had to endure the invasion of the death energy that was so dense that it seemed to have substance with every step he took. This was an extreme torment.

Putting aside the pain that came with it, the destruction and rebirth that occurred every second could not be neglected.

If it could not mobilize its Origin Energy to repair itself after it was destroyed, it would only take a blink of an eye for it to be corroded into ashes.

If the energy form was so miserable, one would have to be at least a mid-level deity to enter this place with their physical body and be safe.

If it was an ordinary body of flesh and blood, it would be impossible for it to last until now. It would not even be qualified to enter the Forbidden Zone.

Tang Zhen sensed the change in his surroundings. He knew that he was already close to his limit. Even if he could continue to advance, he would not be able to go far.

Tang Zhen estimated his current position and shook his head quietly. The gap between him and the expert who was ranked first on the stone tablet was not just a little.

It was rumored that the lord of the sky cover territory was extremely powerful. A conservative estimate would be that he had the strength of an upper deity. Tang Zhen had only just entered the God level and could not be compared with him at all.

It wasn't embarrassing to lose.

Tang Zhen was not someone who aimed for something beyond his grasp. He decisively stopped after he confirmed that he had reached his limit. He did not continue to force himself.

In his heart, he was secretly envious of the little red bird. Due to its special racial talent, it was able to traverse in an environment like the Forbidden Zone as if it was flat ground. Currently, it was getting further and further away from Tang Zhen's position.

perhaps it can really surpass sky lid horde leader and reach the center of the death universe? ”

This thought flashed across Tang Zhen's mind. However, it was quickly dispelled. He still gathered his mind and prepared to cultivate.

Due to the constant destruction and rebirth, he could no longer maintain his human form. He looked like a blurry ball of light.

After scanning the surroundings, Tang Zhen flew to a broken planet and landed in a huge abandoned city.

This city, which once belonged to a certain civilization, was now in ruins, and life had long since disappeared.

The liquefied death energy flooded the city, and the broken buildings looked like monsters. No one knew how long they had stayed in this dark world.

The place that Tang Zhen chose to stop at was a Palace Hall that was located in a square. Although it had experienced many years of wind and rain, one could still see the glory and magnificence of the past.

Tang Zhen seemed to have seen some corpses that had fallen in a flash. Due to the special environment, they did not rot and decay.

Tang Zhen had no interest in paying attention to this. Instead, he sat on a platform above the hall and once again crazily absorbed the drifting death energy.

Compared to the cultivation absorption last time, the movement this time was even greater. In just a few breaths, Tang Zhen's body was wrapped in a black light cocoon.

It didn't take long for the light cocoon to turn into a light ball. Purple lines that were like lightning were swimming around inside the light ball.

This was the ultimate power of death, but at this moment, it had become the most powerful help for a creator to improve his strength.

After he started cultivating, Tang Zhen's strength was slowly increasing at every moment.

If one had to fill up the ocean-like pit to become a mid-level deity, then the death energy that he was absorbing at this moment was like a river that flowed into the pit.

It seemed to be far away, but it would eventually be filled.

It was a pity that Tang Zhen lacked time. Otherwise, he would only need to sit here for a few thousand or even ten thousand years and he might have the chance to become a middle order deity.

Tang Zhen did not have the time to think about all of this. At this moment, he was only continuously experiencing death and rebirth. His entire person had entered a special cultivation state.

His original human form had disappeared and was replaced by a constantly changing form. While absorbing death energy, he was also constantly tempering himself.

As for the outside of the black Yuan seal, the world had already been turned upside down. The abandoned city had once again encountered a disaster, and the terrifying tornadoes had destroyed all the remaining buildings.

The current abandoned planet was a hell, a forbidden zone among forbidden zones.

Some of the monsters that were hiding nearby noticed the change, but none of them dared to approach.

They knew very well that this place was extremely dangerous. If they went there rashly, they might not be able to return.

In this way, it saved Tang Zhen a lot of trouble. Otherwise, it was very likely that even his cultivation would be affected.

Time slowly passed. Tang Zhen had already stayed on this abandoned planet for over a year.

During this period of time, the tornadoes that enveloped the abandoned planet did not dissipate because they were extremely destructive. The entire planet had been razed to the ground.

As the remaining death energy decreased, the tornado that reached the sky began to dissipate slowly, revealing the black ball of light in the center of the vortex.

“Crack!”

The light ball shattered and Tang Zhen leaped out. The entire abandoned planet trembled.

2437 Leaving the restricted area (1)

When the storm that had lasted for more than a year subsided, countless torn objects sprinkled down, making the smooth ground dirty and messy once again.

However, this was a dead planet, and there were no living creatures on it, so he could destroy it however he wanted.

The ball of light shattered into pieces. Those energy crystals instantly turned into a mist and flew toward Tang Zhen, who was slowly walking out.

Like a whale sucking in water, he absorbed all the remaining death energy in the surroundings. After carefully sensing the changes in his body, a smile appeared on Tang Zhen’s cold and indifferent face.

“A year’s time was not wasted!”

Compared to a year ago when he was in seclusion, his aura was more and more powerful, giving people a feeling that it was impossible to see through.

In fact, Tang Zhen’s cultivation wasn’t strenuous. In fact, he could even split his attention to manage the divine Kingdom in his mind while he was cultivating.

Ever since he had become a creator, he had been very busy. He had no time to calm down and study the layout and development of the God Kingdom in his mind.

This was something every master of creation had to do. The more detailed the arrangements were, the more beneficial it was for the development of the God nation.

Now that he had the opportunity, he naturally had to make some arrangements.

This was actually a very interesting thing to do. He could plan the mountains and rivers, knead the deep valleys of the continent, and do whatever he wanted!

Then, from the point of view of the creator, he would silently watch all kinds of creatures grow old, get sick, and die. From time to time, he would interfere.

If things didn't go their way, they could even create some disasters, such as floods and earthquakes, to vent their emotions.

Because of his hard work over the past year, the divine Kingdom in his mind was even more complete, and the production of Origin Energy was getting faster and faster.

In the world of green mountains and clear waters, some microorganisms had even appeared, making the entire world no longer desolate.

These microorganisms were not created by Tang Zhen but by himself. From this, it could be seen that the divine Kingdom in his mind was extremely close to the real world.

After he became a middle God, the entire divine Kingdom in his mind would be completely built and then officially run.

At that time, not only would it be able to produce life on its own, but when it reached a higher level, even gods could create it!

This was the true use of the divine Kingdom in his mind. Only when the divine Kingdom in his mind was in operation would it be able to produce enough divine source.

Not only could he use it himself, he could also provide it to sector Lord cultivators, helping them become creators!

In the divine kingdoms built by the indigenous gods, there had been many powerful Masters of creation. This was because the indigenous gods had already surpassed the intermediate level and had the ability to help cultivators become gods.

This was actually a very interesting matter. Only those who had reached the level of a creator would have the qualifications to come into contact with it.

Without the existence of a mid-level deity, everything would be like an illusion. Even if the legacy had been passed down for thousands of years, it would still be at the mortal level and could be interrupted at any time.

Only after having a middle level deity could one share a portion of their Origin Energy with another when they reached the sector Lord pinnacle, helping the other become a new deity.

If the middle-grade God who had a part of the divine source was willing, he could even establish a contract with the lower-grade God he helped and make them his subordinate.

Then, it would gradually develop and become a brand new god system. This way, it could be passed down for tens of thousands of years, or even longer.

Cultivators Lou Cheng called this system the otherworldly God's court, and it was an enemy that they had to take seriously.

Because the cultivation system was not used, situations like the divine court in the other world would only appear in other planes.

There were many masters of creation in the world of loucheng, so even if they had inheritances, they would only happen in the loucheng.

If the cultivators from the other towers wanted the divine source, they would have to pay a sufficient price.

Cultivators who were willing to sell divine source were almost impossible to find. After all, to a mid-level deity, there was basically nothing that they lacked.

When a middle level God took out divine source, it would have a great impact on their own body. If they wanted to become a high level God, they would have to pay more attention to this aspect.

Therefore, if it was not necessary, a middle God would never use divine source as a trade, as that would be equivalent to destroying their own future.

However, for cultivators in the same tower, it was a different matter. As long as there was a middle-level God, they had to do it even if it was risky.

Under such circumstances, many of the God-grade cultivators in the same Tower City all came from the same source and were closely related to each other.

For example, when the time was right, the ninth city Lord would share his divine source with him.

It was not only because a 'MUGA was his descendant, but also because a' MUGA was a cultivator of the ninth tower and the backbone of the ninth tower.

In the matter of becoming a creator, no one could help Amuka except the ninth city Lord.

After Amuka was promoted to a creator, his father became the ninth City Master, which had nothing to do with blood ties.

After a few years, when amuga became a middle God, he could repeat such an inheritance.

However, in any case, he had an unbreakable relationship with the ninth city Lord.

This was the genealogy of gods. It seemed to be very different, but in fact, they all came from the same source.

The divine source that Tang Zhen obtained when he advanced to the creator level came from the Aboriginal deities. Logically speaking, his father God should be an Aboriginal deity.

However, due to a special agreement, the contact with the indigenous gods had been erased during the transaction.

With Tang Zhen's identity, he would definitely not agree to have another god Father. That would be equivalent to asking for trouble.

The divine source that was sent to the fifth battle area had also been checked and processed by the platform in a timely manner to prevent similar incidents from happening.

Even so, they still didn't discover the hidden God slaying virus, which caused Tang Zhen and the other cultivators in loucheng to be deeply hurt.

Tang Zhen's eyes flashed with surprise as he looked at the surrounding environment. Such a sacred training ground was something that one could only come across but not seek.

It was a pity that his time was limited and he could not stay here for a long time. Otherwise, he would have to cultivate for a few hundred years!

"According to my current strength, I should be able to advance another hundred seconds or so deeper into the Forbidden Zone, which is about 100 million kilometers.

It sounded very far away, but compared to the vast forbidden zone, it was nothing.

Compared to the record of the sky lid Lord, he was still far behind. He probably had not even reached half of the record.

It's impossible to track the Red Bird under these circumstances, because it's too far away from me. I can't even reach its location!"

Tang Zhen analyzed the current situation and knew that it was practically impossible to chase after the small red Bird.

He didn't dwell on this matter too much. Since he couldn't get it back, he could only let it go temporarily.

After the battle zone ranking battle, he would return here. First, he would continue to improve his strength, and second, he would find the Red Bird.

After making up his mind, Tang Zhen did not hesitate and flew straight out of the restricted area.

2438 We're blocked

Compared to the difficulty of coming here, the return journey was undoubtedly much easier, and it was getting easier and easier.

Tang Zhen used a few months 'time to arrive at the edge of the Forbidden Zone without stopping. He was travel-worn.

Even though he was a master of creation, he still found the journey extremely difficult.

In fact, if there was an undercurrent of energy flowing in reverse, he would definitely try. Although it was very dangerous, it would at least save him a lot of time.

Unfortunately, there had never been an undercurrent in the bottomless abyss. If it did appear one day, it might be a sign that the bottomless abyss was about to collapse.

Tang Zhen would not deliberately force him. One must know that he was also unceasingly cultivating while he was hurrying on his journey.

The changes in the divine Kingdom in his mind could almost be seen with the naked eye. After more than a year of construction, it was infinitely close to the real world.

The evolution of life in the natural world could easily take millions of years, but in the divine Kingdom of the mind, this process could be shortened infinitely.

If Tang Zhen was willing, he could even complete this process in an instant. The prerequisite was that he had to consume a large amount of Origin Energy.

It was just that the works created using this method were unique, and the potential for development was very limited.

Without the process of evolution, who knew if they could withstand the elimination of time?

If he wanted to develop his own people, he had to let them develop freely with appropriate guidance. This was the most correct way.

The indigenous gods used special means to guide believers from various planes into their divine kingdoms, which was actually a way to train their people quickly.

However, there were many drawbacks to this method. The final result had also proved that the people who were not nurtured by the God's kingdom could not guarantee the loyalty of the indigenous gods.

Even if a huge price was paid to train them to become a creator, in the face of huge benefits, these believers would not hesitate to betray their father.

However, the people nurtured by the divine Kingdom would not have such a situation. There was no problem with their loyalty.

Tang Zhen was only a lower-level deity and was still far away from this step. However, he had to make preparations in advance.

He had to leave behind a sufficiently perfect layout to ensure that there would be no mistakes, so as not to waste too much time.

When the people of the God nation completed their evolution and grew into intelligent life forms, they would slowly understand Tang Zhen's existence and then recognize him as the God of creation.

When the people of the God Kingdom became Masters of creation, the new God system led by the God of creation, Tang Zhen, could be considered to have officially taken shape.

In fact, in the fifth battle, there were such Masters of creation who had already formed their own system.

Not only did he have God-grade cultivators under him, but he also had people from the divine Kingdom who had been nurtured step by step into Masters of creation.

Although the prospects were wonderful, if he really wanted to reach this step, he still needed a long, long way to go.

.....

Unknowingly, Tang Zhen had already left the Forbidden Zone. The influence of the bottomless abyss on him was getting smaller and smaller.

After the pressure was reduced, his movement speed became faster and faster, and there was almost no obstruction when he teleported.

In the vast sea of stars, a figure arrived in an instant and disappeared in the blink of an eye. In the blink of an eye, he was already thousands of miles away.

The exit of the bottomless abyss was a platform that looked like a training platform, and a group of cultivators were waiting in line.

Although some cultivators were expressionless, if one looked closely, they would notice that their eyes were flashing with excitement.

After entering the bottomless abyss, the cultivators more or less got what they wanted. Some cultivators even completed the promotion of their realm, which could be said to be extremely rich harvest.

The reason why they chose to leave was that if they stayed in the endless abyss for a long time, they would be constantly attacked by the death energy. It was very likely that there would be incurable aftereffects.

The best way to cultivate was to take proper rest and relax.

Just as they were conversing, a figure suddenly appeared in the distance and appeared on the platform in an extremely short time.

Feeling the pressure from the other party, the cultivators in line immediately shut their mouths and sized up the newcomer from time to time.

Although he couldn't be sure of the other party's strength, he knew that it was far beyond his own. Naturally, he had to maintain as much respect as possible for such a strong person.

The person who had arrived was Tang Zhen. After a long journey, he had finally arrived at the exit of the bottomless abyss.

At this moment, Tang Zhen had already changed his appearance in order to prevent a 'muka from remaining near the exit to intercept him after he returned.

There was no knowing what was in a man's heart. Even if a 'MUGA would not do this, there was no guarantee that the ninth city Lord would not do so.

Before he officially left sky cover territory, Tang Zhen had to be extra careful. If he encountered any changes, his hard work would be in vain.

They didn't have to wait long before a door of light appeared on the platform in front of them.

The cultivators who were waiting for the door of light immediately swarmed out, eager to return to the outside world.

Tang Zhen walked at the back of the group and stepped into the water curtain-like light. Soon after, the scene before his eyes suddenly brightened up.

The pressure that had been enveloping his body all along disappeared in an instant. He felt extremely relaxed, as if he could fly at any time.

Because of the disappearance of the pressure, many cultivators' bodies began to slowly expand, becoming like balloons.

The death energy hidden in his body also exploded at this moment, adding fuel to the fire.

Fortunately, this only happened to low-level cultivators. High-level cultivators were already bodies of energy, so it was impossible for their bodies to expand.

The cultivators who often entered this place were already used to this strange phenomenon. When they saw the panic of the low-level cultivators, they couldn't help but burst into laughter.

Tang Zhen swept his eyes over the lively crowd. He gently shook his head before turning around and leaving.

But at this moment, he realized that a gaze was locked on him, and there was almost no concealment.

This gaze made him feel frightened.

Tang Zhen followed his gaze and saw that there was someone staring at him unblinkingly from the window of a building not far away from the roadside.

That person waved his hand at Tang Zhen and made an inviting gesture, hoping that Tang Zhen would go upstairs.

"As expected, I still can't hide, Yingluo."

This thought flashed across Tang Zhen's mind. After which, he laughed softly and slowly walked down the building in front.

There were many cultivators in the building, and they were talking loudly at the table. Because of the runic magic circle, it would not affect the other guests at all.

Tang Zhen walked up to the second floor and saw a tall cultivator sitting by the window. At this moment, he was holding a strong wine and drinking it in one gulp.

“Please sit!”

After seeing Tang Zhen, the cultivator motioned for Tang Zhen to sit down and poured him a glass of wine.

“If I’m not wrong, Your Excellency should be from the cracked territory. Am I right?”

Tang Zhen nodded. Since the other party had said this, it was obvious that they had already found out his identity.

In fact, this wasn’t a difficult matter. There were only so many masters of creation in the fifth battle area. As long as they patiently investigated, it wouldn’t be difficult to determine Tang Zhen’s identity.

then Your Excellency should be a family member of a MUGA, the ninth City Master of the sky cover territory. Am I right? ”

The tall cultivator looked at Tang Zhen and nodded with a smile. Then, he shook his head gently.

2439 The ninth city Lord’s intention for coming?

Looking at the ninth city Lord sitting opposite him, Tang Zhen had a trace of doubt in his heart, but he did not show it directly.

Although there was a dispute between him and a muka, it did not cause any serious consequences. Since Tang Zhen took the initiative to let a muka leave, it meant that he was willing to end this grudge.

Tang Zhen took the initiative to give in and did not continue to pursue the matter. This could be considered to have given the other party enough face.

After all, if one were to look into this matter, it was clear that Amuka was not in the right. Even if he had the support of a middle-level deity, he could not distort the truth.

The cornerstone platform of the world of loucheng was very observant, and if one wanted to do something dirty, one had to have great ability.

If it was discovered, the cornerstone platform would take the initiative to deal with it and maintain the fairness of the tower world.

Tang Zhen had chosen to change his appearance just in case. He did not expect the ninth City Master to really be waiting for him at the exit.

For more than two years, to be able to wait silently at the exit, the other party was really patient.

It was hard to understand why a middle God could be so carefree.

Tang Zhen gently smiled when he thought of this. His face was indifferent.

Although he was blocked by the other party, he was unusually calm. If the ninth city Lord was shameless, what could he do if he fell out with him?

Although he wasn't a mid-level deity, he wasn't an existence that the other party could bully. If they really shed all pretenses of cordiality, Tang Zhen didn't mind going all out.

However, the possibility of this happening was very low. The ninth city Lord might not be so narrow-minded. There was a high possibility that he had other reasons for waiting here.

Additionally, Tang Zhen was also extremely curious. Why did the other party first nod his head when he answered his question earlier before shaking his head?

"Sir Tang Zhen, first of all, I would like to thank you for your magnanimity. You were able to take the initiative to let a muka return."

After saying this, the ninth city Lord made a gesture to Tang Zhen. This was a way for the cultivators of loucheng to express their gratitude.

Tang Zhen shook his head, "it's just a small misunderstanding between me and a 'muka. It's not as serious as it looks."

I took him into the bottomless abyss to find a guide for myself. How could I hurt him?"

Tang Zhen explained a few words in order to completely resolve the misunderstanding.

"That's true, but I still have to tell you that this is actually a good thing!

After this incident, Amuka's temperament has become more and more stable. The bad habits that often appeared on him in the past have all disappeared."

When the ninth city Lord said this, he showed a trace of relief, as if he was happy for a MUGA's growth.

"Sir Tang Zhen, do you have something to say?"

The ninth city Lord's perception was extremely sharp. When Tang Zhen frowned, he had already noticed it.

Upon hearing the ninth city Lord's question, Tang Zhen did not deny it. Instead, he asked in a slightly puzzled tone, "actually, there's one thing that I still don't understand.

A muka is already at the pinnacle of sector Lord, so why does he have such a strange character? ”

Tang Zhen wasn't saying that there was something wrong with a MUGA's brain. Instead, he had a strange feeling that his strength and thinking didn't match.

It was as if the soul of a child with an incomplete mind had been stuffed into the body of a strong man, but nothing unusual could be seen on the surface.

It was only when one observed carefully that they would notice something was wrong.

Tang Zhen was puzzled. Now, in front of the ninth city Lord, he raised the question in his heart.

The ninth city Lord was slightly taken aback, and then a smile appeared on his face.

“Since you want to know, then I'll tell you. A MUGA is indeed not an ordinary loucheng cultivator.

This is because before he became the realm Lord, he never came into contact with other cultivators. Even after he became the realm Lord, everything he experienced was completely different from other cultivators.”

Tang Zhen's frown became increasingly tight when he heard this. He had already faintly guessed the answer to the question.

The ninth city Lord looked at Tang Zhen and continued to speak in a faint tone, ” I think you should have already guessed the origin of a MUGA. He is indeed a citizen I created in the divine Kingdom in my mind. The sector Lord has never left the divine Kingdom before, which is why you feel strange.

After hearing this answer, Tang Zhen came to a sudden realization. At the same time, a wisp of envy rose in his heart.

If he was not wrong, Amuka should be one of the people of the God's kingdom trained by the ninth City Master. Because he was not far from becoming a creator, he was released for experience.

This was a very necessary step. The ninth city Lord could not help, so Amuka had to comprehend and cultivate on his own.

When the time was right, he could absorb the divine source and become a creator.

The so-called identity of relatives was just a cover-up. Amuka was not the grandson of the ninth city Lord at all.

Tang Zhen could also confirm that the ninth city Lord had chosen the elite mode and invested all his resources into a fixed number of God's kingdom's citizens.

There couldn't be too many of them, no more than ten at a time. Otherwise, the power of the origin consumed during the cultivation period would be too much for even a middle-level God to afford.

It was a huge gamble, because even a mid-level God could not guarantee that all the people of his divine Kingdom would become creators.

Once the people of the divine Kingdom failed in their advancement, all their investments would go down the drain. Such losses were so great that even a middle God would feel the pain.

If all of the God country's citizens didn't have enough potential and were stuck at the sector Lord level, unable to advance to the creator level, then it simply couldn't be described as unlucky.

A 'MUGA was a citizen of the kingdom of God nurtured by the ninth city Lord. He was also the most promising seedling to become a creator, so he was so valued.

When the ninth city Lord heard that Amuka was in danger, he immediately rushed over without any hesitation.

After figuring out a muka's true identity, Tang Zhen suddenly realized. The original confusion in his heart also disappeared, and he secretly thought that this was the case.

After being promoted to a creator, Tang Zhen had read about this on the cornerstone platform. He knew that most of the creator cultivators would choose the elite mode when cultivating the people of the divine Kingdom.

This way, it would be easier to manage and more targeted. Even the divine Kingdom in his mind would not need to be seriously built.

They were more concerned about the ability to create things. As for the divine Kingdom in their minds, it was at most a portable Super Warehouse.

At the same time, there were also some cultivators in loucheng who chose the normal evolutionary mode, using the means of natural selection to cultivate the people of the divine Kingdom.

The difference between this and the elite mode was that this normal mode was slow and required thousands of times more time.

However, the investment in resources would definitely not be much less. In fact, it might even need to be more.

Whether it was the construction of the divine Kingdom in the mind, the support of evolution, or the cultivation of the people in the divine Kingdom in the later stages, all of these required the support of Origin Energy.

The advantage of this model was in the later stages. Once the various races in the God Country developed, it was possible to produce an endless stream of world Lord level cultivators.

As long as he guided them at the right time and provided them with enough divine source, he would be able to obtain his own God system and have creator-level cultivators loyal to him.

However, if it failed, the losses would far exceed that of elite mode. Fortunately, it was easy to remedy.

The two modes each had their own advantages and disadvantages. It was hard to say which one would reap more benefits, it was only up to one's choice.

Tang Zhen was more inclined to the normal mode. Other than feeling that the gambling nature of the elite mode was too great, he did not want to waste the divine Kingdom in his mind, this magical world.

To Tang Zhen, the greatest benefit of advancing to the creator level wasn't the ability to create things. Instead, it was the fact that he now had a real world that completely belonged to him.

If Tang Zhen had to choose between the creation ability and the divine Kingdom in his mind, he would choose the latter without any hesitation. This was because the creation ability was dispensable, but it was extremely difficult to obtain a world that belonged to him.

However, a new problem had emerged. Why was the ninth city Lord waiting here and telling him the true origin of a MUGA?

2440 Conversation and departure (1)

For the ninth city Lord, there was really no need to wait here for Tang Zhen and tell him the identity and origin of a MUGA.

Therefore, Tang Zhen had a feeling that the ninth city Lord was using this matter to express his sincerity and thus shorten the distance between them.

The reason why he did this must be because he had a request!

However, this also caused Tang Zhen to be even more confused. The other party was a dignified middle-level deity. What matter would he need to ask of him?

Tang Zhen was puzzled. Therefore, he could only quietly wait for the other party to explain his intentions and not take the initiative to ask.

In that case, he would be at a disadvantage.

However, the ninth city Lord did not say it directly. Instead, he talked about other topics, which made Tang Zhen somewhat helpless.

“Sir Tang Zhen, do you know why I was able to immediately notice you the moment you came out?

That’s because I’ve left a mind clone near all the exits, constantly scanning and observing, just waiting for you to appear!”

Tang Zhen was slightly stunned when he heard this. He once again observed the ninth city Lord opposite him, and then a look of realization appeared on his face.

He had been wondering why the ninth city Lord was so leisurely and wasting his precious time here.

Now, after being reminded by the other party, he realized that the person sitting in front of him was not the ninth City Master, but just a consciousness avatar.

Although it was only a consciousness clone, Tang Zhen couldn’t see any difference at all. From this, it could be seen how powerful and terrifying a middle God was.

After the ninth city Lord explained the reason for his appearance, he finally got to the main topic and asked Tang Zhen, ” I think you must be full of doubts and guessing why I’m waiting for you here. Am I right? ”

Tang Zhen nodded when he heard this. He really wanted to know.

&Nbsp; ” I’ve been waiting here for Sir Tang Zhen for two things. The first is to make a deal with Sir!

Tang Zhen’s brows furrowed slightly, and the doubts in his heart grew even stronger. He couldn’t understand what deal the ninth city Lord had with him.

actually, I want a trace of your origin. Then, I’ll fuse it with my divine Kingdom in my mind and use it to nurture new citizens of my divine Kingdom.

After hearing the answer given by the ninth city Lord, Tang Zhen was stunned again, and then a look of realization appeared on his face.

It turned out that the deal that the ninth city Lord was talking about was this.

It wasn't rare in the world of towers for intermediate gods and low-level gods to trade for divine source. Intermediate gods who chose the elite mode would try their best to collect the divine source of low-level creators.

This was because the other party had already become a creator, which was enough to prove that there was no problem with his potential, and the success rate of training him would be higher.

It didn't sound too high, but in fact, it was already frighteningly high. There was a 60% chance, so it was worth a try.

After knowing the ninth city Lord's intentions, Tang Zhen's expression was a little hesitant, as if he was lost in thought.

When the ninth city Lord saw Tang Zhen's awkward expression, he smiled and explained, "You don't have to worry too much. Even if I get your divine source, it won't affect you at all.

"The people of the divine Kingdom that you nurture will have nothing to do with you. They will only replicate your talent and potential."

Tang Zhen nodded. Even without the ninth city Lord's explanation, he knew that this deal would not have much of an impact on him.

In the world of loucheng, many masters of creation had made such a deal before. They would not suffer any losses from this and could even exchange for things they needed.

If Tang Zhen agreed to the deal, the ninth city Lord would definitely not treat him shabbily. After all, he was a creator, and the value of a divine source was not cheap.

Of course, no matter how expensive his divine source was, it still belonged to the category of low-level gods and could not be compared with mid-level gods.

After all, it was a treasure that could help a sector Lord level up. A low-level creator's divine source wouldn't have such an effect.

In fact, using intermediate divine source to nurture the people of the divine Kingdom would have an 80% chance of success. However, it was obvious that no intermediate god would make such a deal.

If he used his own divine source, there would be no effect at all, and it would even be inferior to the people of the God Kingdom that had naturally evolved.

"I wonder if Sir Tang Zhen is willing to trade with me. If you are, I will definitely pay you a price that will satisfy you."

The ninth city Lord asked again, showing his sincerity. However, Tang Zhen gently shook his head.

"I'm sorry, I can't agree to this deal.

As for the reason why I refused, it's because I was injured before, so I came to the bottomless abyss to recover.

Now that he had just recovered from his injuries, if he were to make a deal with you, then all his previous efforts would be in vain, and it might even be worse than before.

This will affect my plans, so I can only choose to refuse. I hope you can understand."

After hearing Tang Zhen's explanation, the ninth city Lord's expression did not change. He nodded his head gently.

Before he investigated Tang Zhen's situation, he had been puzzled. Why did Tang Zhen come to sky cover territory?

After he had analyzed the information he had collected, the ninth city Lord concluded that Tang Zhen was likely to be seriously injured, so he had come to the bottomless abyss to recuperate.

When he was investigating how Tang Zhen was injured, he discovered another thing. This was the main reason why he was waiting for Tang Zhen.

"Since Sir Tang Zhen is not willing to trade, I won't force you. However, I hope you can answer another question of mine.

Is the reason for your injury related to the indigenous gods that were brought to the fifth battle area? is the Super plane involved in this?"

Tang Zhen was very surprised when he heard the ninth city Lord's question. He didn't expect that the secret that the cornerstone platform had tried to keep would eventually be revealed.

The value of a super plane was extremely great. The more powerful a cultivator was, the more they couldn't resist the temptation of a super plane.

Although the ninth city Lord wanted to know, Tang Zhen could not tell him. This was because this matter was not only a secret that the cornerstone platform had requested to be kept, but it also involved Tang Zhen's interests.

I'm sorry, but due to certain reasons, I can't answer your question.

The ninth city Lord did not get angry. He only nodded and said, "It doesn't matter. I know you won't say it, but I know what's going on.

In fact, it doesn't matter if we know about it earlier or later. If the fifth battle area is preparing to invade the Supreme plane, then the related information will be announced sooner or later."

The ninth city Lord was right. With his status and strength, he would definitely not miss such a big operation.

The other party no longer asked, and this prevented Tang Zhen from being put in a difficult position.

"Since it's like this, I won't delay Sir Tang Zhen's time any longer.

Before I leave, I have one more thing to ask of you, and that is the war zone ranking battle is about to begin. I believe you will be participating in it.

At that time, if I meet a MUGA, I'll ask you to take care of him. I'll definitely reward you heavily in the future!"

After the ninth city Lord finished speaking, he smiled and waved at Tang Zhen. The next moment, he disappeared without a trace.

Tang Zhen quietly looked outside the window. He picked up the strong wine on the table and downed it in one gulp. After which, he also turned around and left with a soft smile.

This time, he didn't go to any other place. Instead, he flew straight in the direction of the crack. After so long, the war zone ranking battle should begin soon.

In the remaining time, Tang Zhen had to make good preparations to ensure that there would be no mistakes.
