

Read I Have A City In An Alternate World Chapter 2481

- 2481 The regional ranking

2481 The regional ranking

The eyes of the elemental spirit cultivator leader flickered when he saw the ten-thousand head general being struck by lightning. He wondered if he should snatch the monster.

If an elemental spirit cultivator participated in the snatching, he would definitely be attacked by Tang Zhen. He would never let others snatch his prey.

With the advantage of the runic airships, as long as he launched an attack from above, he would cause huge losses to the elemental spirit cultivators.

It would be a disaster for the elemental spirit cultivators if more than a hundred people were killed by Tang Zhen.

When the leader of the elemental spirits thought of this, he suddenly felt a headache.

This was because he had discovered that Tang Zhen was a jinx. It was best not to provoke him easily. Otherwise, he would be covered in dust.

forget it, there's no need to get tangled up in this kind of thing. If there's a chance in the future, Yingluo.

In the end, the leader chose to give up, but he was full of helplessness, because he was the one who was afraid this time.

He subconsciously wanted to be ruthless, but a strong sense of powerlessness rose in his heart. It would be ridiculous to say such ruthless words at this time.

The elemental spirit leader also thought of another thing. Even if Tang Zhen killed the ten-thousand head general, he would only get the energy to level up. He would definitely not get the spoils of war that dropped after killing the monster.

Tang Zhen definitely wouldn't dare to come down, so the reward would naturally belong to them. This meant that they would get half of the benefits from killing the ten-thousand head general, and they wouldn't have to do anything.

In addition, after the ten-thousand head general was attracted, the pressure on the elemental spirit cultivators was greatly reduced. If one were to calculate carefully, they actually had an advantage.

A smile appeared on the face of the leader of the elemental spirits. Indeed, when thinking from a different perspective, bad things could become good things.

everyone, listen up! Ignore the monsters that are being attacked by the lightning and focus on clearing the low-level monsters!

Upon hearing their leader's order, the elemental spirit cultivators immediately stayed away from the ten-thousand head general so that they would not be affected by its attack.

In fact, with their current level, it was extremely difficult for them to deal with the general of ten thousand heads. Now that they could avoid the battle, it was naturally what they wanted.

A wave of battle cries could be heard. It was the reinforcements from the entrance, with a total of more than 3000 people.

This was not all of their members, but a portion of them. If the elemental spirit cultivators in the nearby areas were added up, the total number had already exceeded 10000!

To be able to quickly gather more than ten thousand cultivators in loucheng, it meant that the elemental spirit battle zone was well prepared and was determined to get a high ranking.

While they were killing monsters to level up, they were also constantly collecting information and thinking of ways to improve their own strength.

They had even sent out a large number of people to seize the nearby cities and make them their base.

Compared to these stragglers, the elemental spirit war zone had a greater advantage. Once their plan succeeded, the nearby area would be completely controlled by the elemental spirit cultivators.

The loucheng cultivators, who had stayed in the headless Army's camp, had already fled in all directions to avoid being surrounded by the elemental spirit cultivators.

Within a short period of time, only the elemental spirit cultivators and the monsters were left in the headless Army's camp.

With the arrival of the reinforcements and no one causing trouble, the leader of the elemental spirits regained his calm and began to clear the monsters at a steady pace.

.....

Tang Zhen locked onto the position of the elemental spirit leader and did not launch an attack for a long time. Instead, he observed the other party's reaction.

He knew very well that even the lightning might not be able to kill the leader.

The biggest disadvantage of the lightning was that it could not attack continuously. Otherwise, it could kill all the elemental spirit cultivators and monsters with its eyes closed.

However, he couldn't do that now. Even though he had the advantage in the air, he still had to move carefully.

If he really angered the other party, even if he was in the sky, the other party would definitely be able to find a way to deal with him.

Tang Zhen knew very well how powerful the cultivators of Lou Cheng were. After all, he was one of them.

Even if the enemy couldn't fly in the air, they could also wait for the runic airships on the ground until they landed.

At that time, Tang Zhen would suffer the crazy revenge of the elemental spirit cultivator. Tang Zhen, who had lost his air advantage, might not be the opponent of the elemental spirit cultivator.

Therefore, Tang Zhen would wait for the other party's reaction. If the elemental spirit cultivator tried to fight for it, then even if he did not want the benefits, he would still harm the other party.

The leader of the elemental spirits gave up fighting for it, which made Tang Zhen heave a sigh of relief.

He was basically snatching food from a Tiger's mouth. He had already succeeded halfway. The next thing he had to do was to kill the ten-thousand head general.

As for the spoils of war from killing the monsters, Tang Zhen no longer had any extravagant hopes. The thousands of elemental spirit cultivators in the severed head Ridge would definitely not let him obtain them.

Since he couldn't get the reward, he might as well give it up. It wouldn't be worth it if he put himself in danger because of it.

Apart from that, there was another reason. The dark clouds above severed head Ridge had appeared mainly because of the myriad head general.

After Tang Zhen killed the ten-thousand-head general, the dark clouds would most likely dissipate on their own. At that time, he would not be able to attack the elemental spirit cultivator even if he wanted to.

In a burst of lightning and thunder, the runic airship was fully charged again, and once again struck the ground with lightning.

With a deafening explosion, the ten-thousand head Marshal was hit again. The heads on the surface of his body flew everywhere.

The charred heads rolled around the camp and were picked up by the headless soldiers, who immediately placed them on their heads.

An unexpected scene occurred. The headless soldiers' combat power suddenly doubled.

Originally, they could only gather together and move under the command of the commander with the head. However, with the head, they could even move alone without any problems.

If it was just one headless soldier, it would not have affected the overall situation. However, all the headless soldiers who picked up their heads were like this, which greatly increased the pressure on the elemental spirit cultivator.

The helpless elemental spirit cultivators could only continuously pass the ball around, kicking away all the charred heads on the ground.

When the elemental spirit leader saw this, he deliberately pretended not to see it to avoid being angered by Tang Zhen again.

Tang Zhen had inadvertently caused trouble for the elemental spirit cultivators again. He did not know that in the heart of the elemental spirit leader, he had already been upgraded to the level of a jinx.

Tang Zhen couldn't be bothered with anything else. He controlled the runic airship to be struck by lightning continuously. When the energy was full, he would launch an attack on the ten-thousand head Marshal.

During this process, he kept an eye on the ten-thousand head General's health bar and looked at the dark clouds in the sky from time to time. He was afraid that the dark clouds would suddenly disperse before he killed the monster.

If that was the case, Tang Zhen would either be forced to leave and give the benefits to others.

He could either take the risk and return to the surface again, kill the general, and then face the pursuit of the elemental spirit cultivators.

Fortunately, the dark clouds in the sky did not dissipate even after the ten-thousand head General's health bar was emptied. This made Tang Zhen feel a sense of relief.

Tang Zhen suddenly felt as though he had broken free of his shackles after the huge and ugly figure fell to the ground. His entire body felt indescribably relaxed.

In fact, it was because he had broken several seals at once that he had such an illusion. Especially when his strength was sealed, this feeling was even more obvious.

However, the more this was the case, the more Tang Zhen could feel how great the gap was before and after his cultivation was sealed.

The feeling of being completely confined and only being able to move one's little finger was enough to drive an impatient person crazy.

Fortunately, the cultivators of Lou Cheng had gone through rigorous training and had super strong endurance. Therefore, even if their strength was sealed, they could still persist.

The moment Tang Zhen completed his advancement, a scene suddenly appeared in his mind. It was something similar to a list.

The first one was the overall ranking list of all 3000 battle zones participating in the competition. The ranking list was constantly changing.

The first place on the comprehensive list was the mysterious 1st battle District. Even though the competition had just begun, the 1st battle District still had the strength to suppress everyone.

Following them were the second and third Battle groups. Just like their names, they were ranked second and third.

Starting from the fourth place, the ranking was slightly chaotic, but it was still dominated by the battle zone with the "first" prefix.

Tang Zhen's 5th battle region was currently ranked 7th. They were suppressed by the other three battle regions, and their situation was not looking good.

2482 The three great leaderboards (1)

The strength of the fifth battle area was very strong. This was something that Tang Zhen had long known. It was definitely an extremely lucky thing for him to be able to join it by accident.

Being able to rank fifth in the 3000 battlefields was a display of strength. It was only natural for him to be in the top ten.

Although it wasn't listed in its original position, it wasn't strange. After all, the competition had just begun.

Even the number one battle zone could not guarantee that their ranking would not change. No one could determine the final ranking until the last moment.

Through the top 100 rankings, it could be discovered that the battle zones with the "number" prefix all had powerful strength, and they controlled the top 100 rankings.

Those who did not have the "first" in their name were not qualified to enter the battle zone. All of them were hovering outside the top 100.

From the description, it can be confirmed that the ranking of the original battle zone is directly related to the strength of the cultivators in the battle zone.

A few cultivators in Loucheng had a higher level, so they couldn't affect the overall situation. Only when most of the cultivators in Loucheng maintained a higher level could they affect the ranking of the battle zone list.

From this, it could be confirmed that Tang Zhen's performance was not bad. The other cultivators in the fifth battle area were not bad either.

The Lou Cheng cultivators who were ranked in the top three battle zones should have performed better than him. After such a long time, their level should have already surpassed Tang Zhen.

Of course, he might not be as good as Tang Zhen. After all, monsters weren't everywhere, and he couldn't level up without killing them.

Tang Zhen was not particularly concerned about this. He was clear of his own strength. He was not even the strongest in the fifth battle area, let alone the elites of the entire tower world.

The battle zone list was a competition of overall strength and not individual strength. Even if Tang Zhen directly advanced to rank-100, he would not be able to change the current ranking.

He was very open-minded about such things and knew how great his ability was. He would definitely not add too much burden to himself.

It could even be said that Tang Zhen's participation wouldn't affect the overall situation too much unless he could do something special that could greatly help in raising the ranking.

At that time, Tang Zhen wouldn't even need to say anything. The cornerstone platform of the fifth battle area would remember it in their hearts and give Tang Zhen an appropriate reward.

"By the way, what's the ranking of the Holy Dragon Warzone?"

In addition to being concerned about the ranking of the fifth battle group, Tang Zhen was also concerned about his own ranking in the sacred dragon battle group. However, he did not have high expectations.

The sacred dragon battle zone had only been established for a short time. By right, they did not have the strength to participate in the competition this time. However, participation was the most important thing. Since they had made it in time, there was no reason to miss it.

Moreover, Tang Zhen's attitude was very good. He did not expect the Holy Dragon battle zone to obtain a high ranking. Therefore, even if he was ranked at the bottom, he would definitely be able to accept it.

As this thought rose in his mind, the sacred Dragon Warzone appeared on the Warzone rankings. It was currently ranked in the 2900s.

This ranking wasn't considered low and had already exceeded Tang Zhen's expectations. After all, it had surpassed dozens of battlefields and was definitely worthy of celebration.

However, the competition had only just begun, and the current rankings didn't mean anything. Those battle regions might not be able to show their strength yet, and could overtake them at any time.

Tang Zhen believed that under the leadership of his clone, the cultivators in the Holy Dragon Warzone would definitely strive hard to compete. The cultivators in Lou Cheng's Warzone were more familiar with this kind of competition.

This was because there were similar training methods in the training grounds of the Holy Dragon Warzone. Moreover, there was no lack of such virtual games in daily life.

The combination of technology and cultivation allowed the cultivators in the Holy Dragon Warzone to adapt to this competition faster. Perhaps they could really obtain an unexpectedly good result.

Before he left the battle zone rankings, Tang Zhen took a look at the ranking of the yuan Ling battle zone and found that it was hovering around 500.

Compared to the original ranking, the elemental spirit battle zone's ranking had risen by more than two hundred. It was obvious that their efforts were not in vain.

If he could maintain this early advantage, it would be very helpful for his later development. Perhaps he could really achieve his expected goal.

Of course, it was still the same saying. The competition had just begun, and no one knew the final result until the last moment.

After exiting the zone rankings, Tang Zhen turned his attention to the second ranking. It was probably a personal combat power ranking.

When Tang Zhen's attention was focused on it, his level ranking immediately appeared. However, the numbers displayed caused Tang Zhen's face to redden.

The 5th battle region was ranked in the 1000s, while the 3000s were ranked extremely high.

It was already past a million, so there was no need to look at the specific numbers, as it was meaningless.

This ranking was a little pathetic. No matter what, he was a creator, but he was ranked below the million. It was a little unreasonable.

The problem was that this competition had nothing to do with one's original strength. It tested the comprehensive strength and luck of the Lou Cheng cultivators, as well as the cooperation ability of the team.

His low ranking was also within Tang Zhen's expectations. After all, he had indeed wasted a lot of time in the process of manufacturing the runic airships.

The other cultivators in Loucheng would not be idle. They would definitely think of ways to improve their strength. It was only natural that they would surpass Tang Zhen.

It was only a gap of a million in the rankings. It was truly a shocking sight, and it even made people feel a trace of despair.

How much effort did he need to put in to close the gap between them?

Tang Zhen wasn't in a hurry because he was very clear in his heart that half of the top one million Loucheng cultivators were from the top 100 battlefields.

Those listed were all elites, and if he wanted to compete with them, he had to find another way.

Soon, Tang Zhen discovered another thing. The individual combat strength ranking couldn't directly display the ranking of the cultivators from other buildings.

Of course, it wasn't that it couldn't be seen, but that one had to pay a certain amount of gold coins. At the same time, the amount wasn't fixed.

Tang Zhen tried to inquire about the ranking of the clone. In the end, a prompt popped up in front of his eyes. It required 100 gold coins.

The gold coins mentioned here were naturally the hexagonal coins that Tang Zhen had picked up. He originally thought that it could only be used to trade with the natives, but he didn't expect it to be used here.

It was just that during the construction of the runic airships, Tang Zhen's gold coins had been consumed by more than half. The current gold coins were only a few dozen, which was simply unable to support his inquiry consumption.

Tang Zhen had originally only intended to test the search function and did not insist on searching for the avatar's ranking. Since he did not have enough gold coins, there was naturally no need to search for it.

After knowing the use of the gold coins, Tang Zhen decided to find a way to collect the gold coins. Maybe it would be of great use at some time.

The individual combat power ranking didn't bring any surprise to Tang Zhen. He was even a little frightened. He knew how big the gap between him and the top ranks was.

Other than these two lists, there was a third list that did not display any information.

Tang Zhen was surprised. After carefully reading the description, he knew that this was actually a special list.

As long as you paid enough gold coins, you could check some special rankings, such as the gold coin ranking list and the ranking list of the number of cultivators who had eliminated Lou Cheng.

These data cornerstone platforms had records. They seemed to be useless, but in fact, they were not.

This competition would determine the battle zone's ranking, and it was also an opportunity to display one's individual strength. The cornerstone platform would arrange suitable missions for the cultivators of Lou Cheng based on their performance.

Every generation has its own talent. The cornerstone platform used this method to give Lou Cheng's cultivators the chance to show their true strength.

2483 Identity exposed? _1

The third list might seem useless, but if used well, it would definitely be of great help to the cultivators in Lou Cheng.

For example, he could check the monster kill list and find out the name of the person who killed the most monsters. Then, he would find a way to figure out the other party's location.

That way, he could determine which area had more monsters and then think of a way to snatch them.

Don't underestimate the ability of Lou Cheng cultivators. They can find any information they want based on the clues.

This was only one of the uses of the third list. If there was a need, he believed that there would be other magical uses.

In addition to the three rankings, a white map also appeared in front of Tang Zhen. There were no patterns on it, but many glowing spots were marked.

There were no hints on the map. Tang Zhen didn't know the use of these light spots at all. It seemed that he had to go there personally.

After confirming that there were no other changes, Tang Zhen exited the space of consciousness and looked at the area below the severed head Ridge.

As the ten thousand-headed general had been killed, the headless soldiers were thrown into chaos. They were no longer as threatening as before.

The elemental spirit cultivators had already gained the upper hand. It would probably not take long for them to clean up the entire Valley.

Although Tang Zhen was a little reluctant, he also knew that this was not a place to stay for long. Therefore, after the dark clouds in the sky dispersed, he turned the runic airship around and slowly left.

What he did not know was that when he turned around and left, the leader of the elemental spirits, who was standing beside the corpse of the ten-thousand head general, was looking at the sky in silence.

Just as Tang Zhen killed the ten-thousand head general and leveled up, the leader of the elemental spirits also killed a high-level monster and crossed the threshold of level 10.

The leader of the elemental spirits also saw the list that Tang Zhen saw. There was almost no difference.

When Tang Zhen was unable to investigate because of his lack of money, the leader of the elemental spirits group locked onto Tang Zhen and wanted to figure out his true identity.

If he allowed Tang Zhen to leave without knowing who he was, the leader of the elemental spirits would probably be aggrieved for a long time and might even have an unsolvable knot in his heart.

The method to do so was very simple. It was to find out the most powerful human cultivator in the severed head Ridge and the specific information about him.

He experimented for a while and confirmed that the query conditions were correct. He couldn't help but feel a little happy.

However, the cost of the inquiry made the leader's heart ache. He didn't expect that just an answer would cost him all his savings.

Although he was a little reluctant, the leader of the elemental spirits sect finally chose to investigate in order to figure out Tang Zhen's background.

However, when the result was shown, the leader fell into silence.

Tang Zhen, creator, Lord of the 5th battle area, bi an

For the elemental spirit Warzone that was ranked around 700, the top 100 warzones were all extremely powerful. They were not existences that they could compare to.

As for the top ten battle zones, they could only be regarded as legends. If it wasn't for the battle zone ranking competition this time, they might not even have the chance to meet them.

However, at this moment, he was facing a cultivator from the fifth fighter plane, and he was a true creator. He even took the initiative to attack him.

Only in a special competitive environment would such a thing happen. Otherwise, his actions would be courting death!

Although the leader of the elemental spirits was not weak, he still had a long way to go before he could become a creator.

Moreover, this was a matter of luck. He might not be able to become a creator in his entire life and would only be stuck at his current realm.

"No wonder he's so strong, he's the Lord of the fifth battle area. Looks like I didn't lose in vain."

It wasn't shameful to lose to Tang Zhen. In fact, it was an honor. After all, Tang Zhen came from the fifth battle District and was a creator!

After figuring out Tang Zhen's background, the leader's depressed mood was swept away, and he felt much more relaxed.

At the same time, a trace of fighting spirit rose in his heart. Why could he only be envious of others and not become the object of others 'envy?

"If I work harder, I might have a chance to obtain more opportunities in this competition.

If you perform well, you'll be recruited by the most mysterious first three battlefields, and that's when you'll truly soar into the sky!"

The leader of the elemental spirits thought of the rumors he had heard and felt a little excited.

If he really had the chance to encounter such a good thing, what was Tang Zhen's identity as the Lord of the fifth battle area?

.....

Tang Zhen was on his way and didn't know that the elemental spirit leader was investigating him. His true identity had been exposed.

Of course, it didn't matter even if he knew. The other party couldn't do anything to him here, and it was even more impossible for him to be his opponent outside.

In fact, if it wasn't for the fact that their cultivation was sealed, none of the cultivators in loucheng in the elemental spirit battle zone could leave skull Ridge alive.

However, Tang Zhen was also clear that since he had participated in this competition, he had to follow the corresponding rules. It was not impossible for a king class cultivator to kill a creator.

Therefore, he absolutely could not underestimate any competitor, especially in a situation where he was alone. The slightest carelessness would lead to him being ganged up on and eliminated.

"It seems that we need to recruit a group of subordinates. Otherwise, as time passes, the cultivators in loucheng will definitely gather and act together.

It's inevitable that we'll have to deal with them, and if there are too few of us, it's very likely that we'll be at a disadvantage."

Moreover, if he wanted to carry out the follow-up plan, he would also need enough manpower. He and Ergou alone would definitely not be able to do it.

Tang Zhen made up his mind. After arriving at the Heaven's Wall city, he must immediately start recruiting subordinates.

At this time, he was piloting the runic airship and heading in the direction of the Heaven's Wall city to collect more information.

Er Gou could only provide him with a general direction. It was almost impossible for him to accurately point out the location of the Heaven's Wall city.

Tang Zhen found an incomplete map in the ghost city's city Lord Manor. He also found a map in the headless Army's camp.

In a world with low productivity, maps were extremely valuable. It could be said that they were difficult to buy with money, and ordinary people were not qualified to have them.

Because it was an incomplete map, its value wasn't too great. However, Tang Zhen's luck was pretty good. The incomplete map actually had the location of the Heaven's Wall city.

Tang Zhen only needed to use the ghost city as the center and then use the other scattered information to successfully lock onto the Heaven's Wall city.

In addition, there was another surprise. After he had advanced to level 10 and could use the skills of a cultivator again, a map prompt immediately popped up in his mind.

After these two maps were analyzed, they could be displayed in the space of consciousness. If he was lucky, Tang Zhen would be able to easily know the specific location of the light spots on the map.

After choosing to agree to the analysis, the incomplete map disappeared in front of Tang Zhen's eyes. Very quickly, a small color appeared on the huge whiteboard in the space of consciousness.

Compared to the entire whiteboard, the color was pitifully small, like a grain of rice on the dining table.

However, Tang Zhen's eyes brightened. He suddenly realized the preciousness of the map. If he was able to fill up the entire white board, he would definitely be able to obtain even more benefits.

Moreover, Tang Zhen had a feeling that perhaps the map would play a rather important role in this competition. It would definitely be better to collect as many as possible.

2484 Encountering a monster on the road (1)

No matter what, the importance of a map was undoubted. When you needed it but couldn't get it, you would know how inconvenient it was.

If it was in the era of technology, it would be very easy to obtain a map. Whether it was a city or a place, or even a map of the entire planet, it could be easily obtained.

If it involved confidential information, the map might not show it, unless it was a special map.

The advantage of technological advancement was that many expensive things had gradually become cheap. Even ordinary people were qualified to enjoy them.

However, in this world, it was not easy to obtain a map. One had to go to a special location, and at the same time, they had to bear huge risks.

For example, there were maps of the government's Yamen and military camps. Moreover, Tang Zhen had indeed obtained some gains before this.

There should be some private maps in the hands of some special professions among the people, but the accuracy could not be guaranteed, and it was more difficult to obtain them.

There were only two ways to get the map from these people. One was to buy it with a lot of money or to Rob it.

He still needed a lot of gold coins.

Tang Zhen secretly sighed. The most useless thing to the creator had now become a necessity.

If he had known earlier, he would have worn a full set of golden armor, which could be exchanged for money. Wouldn't it be much easier that way?

ergou, you control the runic airship. I still have some things to do.

Tang Zhen called out to ergou and gave him the control of the runic airship. He then walked to the airship observation deck.

In his hands was a piece of animal skin and a reddish-brown stone pen that could be used for painting. He was looking down at the scenery and writing and drawing.

His speed was as fast as lightning, and he quickly recorded the terrain he saw and made a map.

After the drawing was completed, the pattern on the animal skin disappeared like steam, as if it had never existed.

However, on the whiteboard map in the space of consciousness, an invisible black dot appeared. When enlarged, it was the pattern that Tang Zhen had just drawn.

“It’s indeed feasible!”

The corner of Tang Zhen’s mouth revealed a trace of a smile. A primitive and crude map had an extremely high margin of error. How could it compare to the accurate map he had drawn?

If he couldn’t even pass this, there was simply no reason.

However, this kind of map also had a drawback. The area it could accommodate was too small. If he continued to draw according to this method, Tang Zhen would only get a “line” in the end.

This “line” map was like chicken ribs, tasteless, and a pity to throw away.

However, until now, the cultivators of Loucheng City who were participating in the competition were still in the state of exploration. Everyone was confused about the future development.

If one could grasp useful information one step ahead of others, they would be able to gain an advantage in the competition. If they could maintain this advantage, they would definitely be able to stand out among the countless competitors.

So in the following journey, I can only continue to paint and will not feel bored.

If only there was a professional painter in charge of drawing the map. That way, it would be easier for me.”

As Tang Zhen thought of this, he turned to look at Er Gou and found that he was seriously controlling the Runic Airship.

The other party was just a ruffian from the village. It was because he met her that he started a completely different life journey.

That’s why there were no disabled people in this world. It was just that they had not found a position that suited them. Once they found it, their Life and Fate would completely change!

Er Gou was like this, and so was Tang Zhen. If he hadn’t become a cultivator of Lou Cheng, he would have long become a skeleton in a grave.

It was even more impossible for him to roam the greater world, witness countless wonders, and control two powerful superpowers.

What is a legend? I am a legend!

.....

In the following time, they continued to rush.

The runic airship was not a high-speed airship. It could not even be compared to an ordinary plane. Its speed was only a few dozen kilometers per hour.

Even so, it was still a high-speed means of transportation for the natives of this world.

The mountains and rivers on the ground were the greatest obstacles for travelers. Sometimes, they even had to take detours and waste a lot of time.

There weren't that many things to do when flying in the air. As long as they didn't encounter particularly bad weather and nothing happened to them, they could move forward.

In the process of moving towards their destination, other than drawing a map, Tang Zhen was also constantly looking for traces of monsters.

The purpose of making the runic airships was to make it easier to find monsters and to have more advantages.

Then, through the method of battle to sustain battle, he would obtain a large number of spoils of war and quickly increase his own strength.

The facts had already proven that Tang Zhen's plan was feasible. It was because of the runic airship that he could fight against thousands of elemental spirit cultivators and even retreat in one piece.

In the early stages of the competition, the runic airship was a rare weapon of war. Tang Zhen, who owned the runic airship, naturally had an advantage over ordinary cultivators.

Even though his cultivation was sealed, Tang Zhen's experience was still present. Just by using his eyes to observe, he was able to see where the problem was.

When they passed by a pile of ruins, Tang Zhen suddenly stopped the brush in his hand and indicated for Ergou to stop moving forward.

Even though he didn't understand what Tang Zhen wanted to do, Buttfacet still controlled the runic dirigible and slowly stopped it above the ruins.

When he arrived at Tang Zhen's location, he immediately saw the scene below and knew why Tang Zhen had stopped.

It turned out that in the ruins that looked like an ancient castle below, there were a few figures trapped on the top of the dilapidated building. Judging from their clothes, they were probably adventurers.

The monsters around them were tall and looked like a combination of monsters and humans. They were armed with armor and looked extremely fierce.

Er Gou had heard more than once about adventurers. They were bold because of their skills, and they wandered in dangerous areas all day long.

If one left and didn't return for a long time, then it was very likely that one would never return and die in the wilderness.

The adventurers in the ruins were in the same situation. They were trapped by a large number of monsters.

Looking at their appearance, it was clear that they couldn't hold on for a long time. They were just barely holding on.

"Your Excellency, are you going to save them?"

Er Gou asked Tang Zhen after taking a look.

I'm going to kill monsters. Saving people is just a bonus. You have to be clear about your priorities.

Tang Zhen slowly said. His tone did not contain any emotion.

"What's the Difference?"

Er Gou didn't understand. However, his brain was very good and he quickly understood Tang Zhen's meaning.

If not for the existence of the monster, Tang Zhen might not have stopped. What did the life and death of a group of adventurers have to do with him?

As the two of them were talking, the adventurers on the ground had also noticed them. At first, they were shocked by the appearance of the runic airships, but then their eyes were filled with hope.

They raised their heads and waved their hands, shouting for help at the sky.

Tang Zhen simply ignored those adventurers. Instead, he simply packed his things and walked to the cabin door.

After estimating the distance to the ground and leaving enough rope, Tang Zhen jumped down from the air.

Just as he was about to fall to the ground, the rope suddenly tightened and pulled the falling Tang Zhen.

If it was a body of flesh and blood, this pull would definitely break a limb. However, for an energy body, it would not have much of an impact.

“Swish!”

A cold light flashed. At the same time Tang Zhen jumped down, the longsword in his hand directly slashed at the monster in front of him.

The monster that was more than three meters tall was split in half by Tang Zhen’s sword. Colorful things lay on the ground.

“Bang!”

Tang Zhen, who had landed on the ground, slowly raised his head. The corner of his mouth revealed a trace of an unexpected smile.

The energy reward for killing monsters was surprisingly rich. It seemed like he had picked up a treasure.

2485 The reward for saving someone (1)

The monsters in the ruins looked like Giants with all kinds of animal heads, and they were emitting a foul smell.

As for the weapons and equipment they used, they were full of an ancient aura, and even had spots of rust, looking like antique relics.

After Tang Zhen killed one of the monsters, the other monsters immediately roared and charged towards him.

Tang Zhen did not Dodge. The longsword in his hand was waved like the wind as it swept across the bodies of those monsters.

The purple sword’s sharpness was beyond the imagination of ordinary people. With enough power, there was almost nothing it couldn’t cut.

After Tang Zhen's upgrade, he was already able to use cultivator skills, causing the purple longsword's might to increase by 30%.

He poured his energy into the purple sword, and a six-foot-long sword light shot out. It looked beautiful, but its power was as terrifying as a crack in space.

The place where the sword ray swept across the monster was not cut by the sharp blade. Instead, it disappeared.

The monsters screamed and fell to the ground one after another, struggling and unable to get up.

Tang Zhen was like a Phantom as he shuttled back and forth within the group of monsters. He killed the monsters one after another as though he was chopping melons and vegetables.

Seeing this, the trapped adventurers immediately let out excited roars, thinking that they had a chance to escape.

During this period, there were also adventurers who used bows and arrows to assist in the attack. However, the monster's skin was thick, and if it was not hit in the vital parts, there was not much effect.

The area of the ruins hidden at the top of the mountain was not large. Tang Zhen only used less than ten minutes to kill all the monsters he saw.

After confirming that there were no monsters, Tang Zhen ignored the adventurers and began to collect the spoils.

A series of footsteps sounded. The adventurers who had just escaped came in front of Tang Zhen. Their faces were filled with gratitude, but at the same time, there was also a trace of uneasiness and fear.

"Thank you, Your Excellency. If it wasn't for your help, we would've finished today."

An adventurer with a full beard looked at Tang Zhen and spoke with a grateful tone. His attitude was very sincere.

Tang Zhen swept his eyes over the other party. He pointed at the monster's corpse and asked, I don't need any thanks. I just want to know one thing. Where did these monsters come from? "

After hearing Tang Zhen's question, these adventurers were slightly stunned. Their expressions became a little unnatural.

the monsters are in the ruins. We entered here by accident and were attacked by the monsters.

The bearded adventurer said. When he answered the question, his eyes flickered.

Tang Zhen's gaze swept past the other party and the faces of the other adventurers. The corner of his mouth revealed a trace of a cold smile.

"There are many traces of underground activity on these monsters, indicating that they have been living in dark and damp places.

Tang Zhen's tone was very calm. However, the few adventurers felt a chill run down their spines. This was because they could sense Tang Zhen's killing intent.

If they had not seen Tang Zhen's method of killing monsters, they might not have cared. However, at this moment, they were all drenched in cold sweat.

The adventurers were very clear in their hearts that if Tang Zhen wanted to kill them, it would be almost effortless.

The way they looked at each other further proved their guilt. At the same time, they knew very well that the secret here could not be hidden.

This human cultivator must have discovered something. If he were to anger him, he would die today!

Your Excellency, the monsters are indeed in the ruins, in the cracks under the tower. They came out from there in the first place.

Knowing that they would infuriate Tang Zhen if they continued to hide, the adventurers hurriedly told him the matter so as not to lose their last chance.

did you go underground before the monster came out? "

Tang Zhen nodded and asked again.

"This Yingluo has been inside."

"Do you see anything? for example, Yingluo."

Tang Zhen's finger gently flicked as he spoke. Immediately after, a coin flew up and emitted a "Weng Weng" sound as it spun.

"Gold coins!"

A few adventurers sighed to themselves. At this point, there was no longer any possibility for them to continue hiding.

I did see gold coins scattered around, but I don't know the exact number. It should be quite a lot.

The adventurer's answer confirmed Tang Zhen's speculation. Not only did the monsters have gold coins, but the place where they occupied should also have gold coins.

He had been thinking about how to collect enough gold coins, but he did not expect to find a clue so soon.

There should be a treasure hidden in these ruins, and those monsters were there to protect the treasure.

He was only killing monsters along the way, but he didn't expect to have such an unexpected harvest. He could only say that his luck was off the charts.

"I'm going down to explore. If you guys want to follow me, I can give you some rewards.

If you're too scared to go, you can leave now. I won't make things difficult for you."

After Tang Zhen finished speaking, he walked towards the tall tower. He didn't care what the adventurers would choose.

The reason why Tang Zhen did this was because he still had the opportunity to use adventurers. Therefore, he gave them some benefits.

The few adventurers looked at each other and finally chose to follow Tang Zhen. This was because they were really reluctant to part with the gold coins they had seen earlier.

Unless Tang Zhen was killed, the gold coins would definitely not belong to them. However, Tang Zhen had also said that they would be able to obtain some rewards if they followed him.

To the adventurers, this was definitely a pleasant surprise.

If Zhen Tang hadn't come to their rescue, they would have been killed by the monster. They would have lost their lives, so how could they have gotten the gold coins?

The adventurers were not worried that Tang Zhen would trick them because it was as easy as turning his hand if he wanted to kill a few adventurers.

Since that was the case, why not follow along?

Tang Zhen did not bother about the adventurers that had followed behind him. Instead, he sized up the broken tall tower. After which, he followed the gap and walked in.

From the traces left behind, it could be confirmed that these adventurers were not lying, and the monster did come from here.

Tang Zhen extended his hand and snapped his fingers as he looked at the dark interior of the tall tower. Soon after, a small and exquisite white fireball suddenly appeared.

Although the White fireball was only the size of a fist, it gave off a bright light that covered a much wider area than a torch.

When the adventurers behind him saw this, they immediately revealed looks of admiration. This was because the methods that Tang Zhen had displayed were definitely not something that ordinary cultivators could do.

When they thought about the runic airship above their heads, the adventurer felt that Tang Zhen's background was extraordinary. The reverence in his heart grew heavier.

In fact, in this world, there were also flying machines similar to the runic airships, but most people did not know or have seen them.

To be able to possess and use it, it was definitely not an ordinary person. At least, with their status, they were not qualified to come into contact with it.

After obtaining a light source, Tang Zhen did not waste any time and directly walked into the tall tower.

The interior of the tower was a mess. There were some remains of wooden equipment and piles of unknown bones.

There was a crack on the ground, from which a cold and damp aura drifted out. It was like the mouth of a monster, as if it could swallow people at any time.

"Is this the crack you were talking about?"

Tang Zhen used his sword to point at the crack and asked the few adventurers.

yes, it's here, but I don't know if there are any monsters down there.

After hearing the adventurer's answer, Tang Zhen controlled the fireball and flew into the crack. After waiting for more than ten seconds, he actually jumped down.

"What should we do?"

After seeing Tang Zhen jump down, the adventurers seemed to be a little hesitant. They were clearly thinking about a problem.

If there were still monsters below, Tang Zhen would be able to relax. However, he might not have the good luck he had last time if he left them.

“What are you hesitating for? have you forgotten that we are all adventurers? if we don’t take a gamble, how can we become rich?”

The big-bearded man who was the first to talk to Tang Zhen said. He then walked to the front of the crack, gritted his teeth, and jumped in.

2486 The temptation of wealth (1)

Hidden in the crack under the tower, the smell of rot was so strong that people would subconsciously cover their noses to prevent vomiting.

The monster’s lair was indeed filthy, no different from a pig’s pen.

The environment was even dirtier, with bones and filth all over the ground, which should be the monster’s feces.

Fortunately, the space was very large, and it was not like this everywhere. Some places were still clean, only covered in dust.

More than a dozen coffin-like objects were rudely overturned on the ground, and their bones were thrown everywhere.

The surrounding walls were painted with strange and eerie patterns. Under the light of the fire, the people in the paintings seemed to be peeking, and a strange smile appeared on their lips.

A few huge rats were frightened by the fireballs and let out screeching screeches. They hid in a dark corner and looked at Tang Zhen and the others with brutal eyes.

The rats looked ferocious, but in fact, they were just food for the monsters. Otherwise, how could the monsters survive?

However, food could also become hunters. A few rats were gnawing on a monster’s corpse, which must have been killed by big beard and his men.

Tang Zhen was too lazy to bother with these rats. Instead, his gaze swept across the ground. As expected, there was a bright golden light flashing at the place where the footprints were left behind.

It was an ancient gold coin, a treasure hidden in the ruins. It was one of Tang Zhen's targets.

The tip of the sword flicked, and a gold coin flew up and landed in his hand.

The simple and ancient design and the familiar texture proved that this was the real gold currency.

The corner of Tang Zhen's mouth revealed a smile. He felt that his luck was pretty good. He had actually encountered such a good thing along the way.

sure enough, there are traces to follow and not a completely unfamiliar world that makes one feel like there's no way to start.

Tang Zhen used a faint tone to speak. He had already faintly guessed the origin of this world and could not help but sigh in his heart.

Compared to true experts, he was still far from being able to do so. Perhaps becoming a creator was just a new beginning?

"Sir, there are still a lot of gold coins in there, but there are also a lot of monsters!"

The bearded adventurer said as he pointed at the dark tunnel in front of him. There was a trace of fear on his face.

"Yes, I can feel it."

Tang Zhen didn't even turn his head as he walked forward. He had to personally go to the place where adventurers were afraid.

if you have nothing else to do, follow me and help me pick up the gold coins on the ground.

The adventurers didn't hesitate. They quickly looked for the gold coins on the ground and put them into their leather bags.

With Tang Zhen clearing the area in front, they didn't need to worry about encountering monsters. They just needed to pick up the gold coins.

At the same time, they had to prick up their ears and listen to the sounds in the passage to prevent any accidents from happening.

It didn't take long for the monster's roar to be heard, causing the bearded man and the others to shiver.

They subconsciously put on a vigilant posture, staring at the entrance of the passage to prevent monsters from rushing out.

However, after waiting for half a day, they still did not see the monster's figure. Instead, the monster's roars became softer and softer.

After a few minutes, all the sounds disappeared, and the surroundings were frighteningly quiet.

"Gulu, Gulu, Gulu."

The bearded man seemed to be able to hear the sound of his own saliva. At this moment, he suddenly felt a little lost. He didn't know whether to continue moving forward or to quickly leave this place.

It was the same for his companions. There were many monsters in the tunnel. Had the human cultivator been killed by the monsters?

If that was the case, they definitely couldn't enter the passageway. What was the difference between that and seeking death?

Just as they were hesitating, light suddenly appeared in the passage ahead like a tide, seemingly driving away all the darkness.

A tall figure appeared in front of them. He held a long sword in his hand, and at this moment, stinky blood was slowly dripping down.

"Hurry up. How long do you want me to wait for you?"

Tang Zhen coldly said before turning around and leaving.

The bearded adventurer's heart beat wildly. He quickly agreed and entered the passage with his companion.

After walking for a short distance, they smelled an indescribable stench. It was the smell of monsters after they were killed.

When he saw the scene in front of him, even though the bearded adventurer had a strong endurance, he still felt like vomiting.

The gourd-shaped passage in front of him was already filled with the remains of the monsters. The ground was covered with broken limbs and flesh, which were squirming in a colorful pattern.

Because they had killed too many monsters, they were more than half a meter above the ground, and the ground was covered with a stinky, sticky liquid.

“Oh, oh, oh, oh.”

In the end, some adventurers couldn't take it anymore and bent over to vomit. They really couldn't bear such a disgusting scene.

The bearded adventurer frowned, but his eyes looked at the walls on both sides of the passage. On the deliberately concave platform above, there were many can-shaped things.

Some of the jars were broken, and colorful gemstones and piles of ancient demonic gold coins flowed out.

“My God, there are so many treasures!”

After seeing the gold coins and gems, the bearded adventurer's eyes lit up. His greed and joy for wealth had dispelled the fear in his heart.

Stepping on the wet and slimy ground, they quickly rushed over and put all the gemstones and gold coins into their leather bags.

if all this wealth belongs to me, it would be the best thing ever. By then, I can buy a lot of land, marry a lot of women, and eat all kinds of delicacies every day.

The adventurers couldn't help but have such a fantasy in their hearts. Only those who crazily pursued wealth knew what this wealth represented.

“Put away your little thoughts. This wealth doesn't belong to us at all. It's a devil that's luring us into hell.

If we can't control our greed, we might lose our lives. That man can save us, but he can also kill us.”

The bearded adventurer's voice rang out, causing the greedy adventurers to be shocked and break out in cold sweat.

They were indeed greedy earlier and wanted to swallow this fortune. However, they had forgotten that they still owed Tang Zhen a life.

If Tang Zhen were to discover what they had done, who would be able to leave the ruins alive, including himself and his companions?

There were still runic airships in the sky above their heads, making it impossible to get them.

No matter how fast they could run, they could not be faster than something with wings. Even if they had two legs, it would be useless.

The adventurers who had struggled out of their greed heaved a sigh of relief at the same time. They looked at each other with a hint of relief.

Fortunately, they realized in time and were not tempted by wealth. Otherwise, the consequences would be unimaginable.

At that moment, wisps of black gas suddenly emerged from the gold coins and gemstones, gathering to form a ferocious Ghost Face.

The ghostly face glanced at the adventurer with a cold gaze and let out a strange laugh. Then, it disappeared into thin air.

damn it, it's actually the curse of greed. Fortunately, we realized it, otherwise, I'm afraid we would have been dead long ago!

The experienced and knowledgeable big bearded immediately exclaimed when he saw this. At the same time, he thought of a trap in the ancient ruins.

Mages would use special methods to cast the curse of greed on treasures. Once an adventurer was blinded by wealth, he would eventually lose his life in confusion.

2487 Killing the tomb owner (1)

Mysterious and strange powers were not rare. They could always hurt people invisibly and cause people to lose their lives inexplicably.

Adventurers were always on guard against such things because they knew very well how serious the consequences would be.

A moment of carelessness might cost him his life.

For example, the ancient curse hidden in the gemstones and gold coins was impossible to guard against. Even if it was infected, one would not know.

However, if one could give up their greed, the curse would be lifted automatically, and they would turn into a Ghost Face and disappear.

At this time, he could take the gold coins away with ease.

It might sound simple, but who could guarantee that they wouldn't be tempted by so many treasures?

But now, it was different.

With what had just happened, the big-bearded man and the others did not dare to have any extra thoughts, lest they really lose their lives.

Their fear of Tang Zhen and the various terrifying legends caused them to become more and more obedient.

At this moment, big beard and the others all had the same thought in their hearts, which was to obey the orders and leave this place safely.

If Tang Zhen was willing to give a reward, it would be considered an unexpected gain. If Tang Zhen was unwilling, then he would treat it as a wasted trip.

To be able to leave this place alive was more important than anything!

Just as the group of adventurers were collecting the spoils of war, Tang Zhen had already killed his way to the end of the passage until an underground hall appeared in front of him.

The main hall was ancient and mottled, the decorations on the building were eerie and strange, and the exaggerated embossed gave people a feeling that they were about to break out of the walls.

In such an environment, it gave people a very depressing feeling, as if they were being watched by countless eyes, trying to find something but finding nothing.

Tang Zhen had already confirmed that this place should be a tomb and a cultivator was buried here.

Judging from the information he had gathered, the other party's strength was not too strong. Otherwise, with his current level, it would be impossible for him to enter this place so easily.

The monsters they had encountered earlier were probably The Guardian monsters of the mausoleum. Their source of food was the giant rats that lived in the caves.

The bearded adventurer had discovered the tomb. When he barged in, he was chased by The Guardian monsters and was later saved by Tang Zhen.

Tang Zhen had entered once again, but he had come for wealth.

Although it would disturb the rest of a dead person, the wealth here was very important to Tang Zhen. Therefore, he had to take it away.

Of course, when he left, Tang Zhen would completely seal off the entrance to the tomb to ensure that no one would enter it in the future.

Based on Tang Zhen's experience, the use of the runic magic formation on the coffin was clearly used to raise corpses.

After a creature died, the body and soul could not continue to merge. After the soul left the body, it would not take long for it to decay.

Cultivators could continue to live in their energy state, but if they were weak, they wouldn't be able to live for long.

As a result, some cultivators had found a strange way to seal the soul and the body together by using some special means to prevent the corpse from decaying.

After that, he would look for the place where the energy gathered, which was also a place with good feng shui in the eyes of the people, build a tomb, and hide in it.

With the nourishment of earth and heaven energy, the corpses in the coffins would slowly change, and the features of demons would appear.

Its ability to contain souls would also become better and better. When it reached a certain level, it would become abnormally powerful.

Such cultivators could be promoted to King level or even higher, but they also had disadvantages.

Because it was a forced fusion, the body of such a cultivator would never be able to turn into energy. If the physical body was destroyed, it would really turn into ashes.

"I'm only here to take away the treasures that are of no use to you. I won't disturb your cultivation.

If you can hear me, then stay here obediently and don't do anything stupid."

Tang Zhen said in an indifferent tone. His eyes seemed to have seen through the coffin and saw the scene inside.

After waiting for a while, there was no movement.

"If that's the case, then it's settled!"

Tang Zhen turned around and smiled at the big-bearded man and the others behind him, whose faces were filled with surprise. After which, he extended his hand and pointed at the two boxes beside him.

Just now, they still felt that the scene of Tang Zhen talking to the coffin was a little terrifying. However, when they saw the gold coins in the box, the fear of big beard and the others was immediately thrown away.

With so many gold coins and a large piece of energy gem, it almost drove them crazy with excitement.

Even if this wealth didn't belong to him, as long as he could look at it and touch it, it would be a happy thing.

Tang Zhen could not help but feel a little worried when he saw so many gold coins. This was because he was unable to carry so many gold coins with him.

It would be great if he had a storage equipment. That way, he could store it and take it out when needed.

It was a pity that after entering this world, he was unable to use his storage equipment or his divine Kingdom in his mind. Otherwise, why would Tang Zhen be so aggrieved?

If it was possible, he could completely equip all his level 0 smurf account with godly equipment and attack the stronger monsters, reaching level 99 with one slash!

However, that would be too unfair to the other cultivators of loucheng, and the competition would lose its original meaning.

It wasn't a good thing for Tang Zhen either. If he could wear Shen equipment, the other Lou Cheng cultivators could do the same and might even be more powerful than him.

If he were to encounter cultivators from the first three battle zones, Tang Zhen might not be a match for them and would most likely be eliminated.

In fact, Tang Zhen had also tried to contact the destiny scale to see if he could get a response. In the end, he discovered that it truly existed. However, his spiritual energy was unable to touch it.

For example, the door was right in front of him, and he could see the scenery behind the door through the crack. Unfortunately, he did not have enough strength to push the door open.

Tang Zhen was unable to determine the specific reason for this situation. After a few attempts, he could only helplessly give up.

Just as he was thinking to himself, a few meters behind him, a trace of black gas suddenly emerged from the huge coffin.

Black liquid seeped out of the cracks and flowed into the ancient runes. In an instant, the entire surface of the coffin was covered with liquid.

The huge coffin suddenly opened by itself. Then, a figure wearing a filthy robe burst out. He held a black sharp awl in his hand and stabbed it toward Tang Zhen.

A pair of green eyes under the bronze mask that was covered in rust was currently staring intently at Tang Zhen.

I knew you wouldn't be satisfied. Since the gold coins are placed here, how can they be easily taken away by others? "

Tang Zhen seemed to have anticipated that this scene would happen. Therefore, he coldly laughed as the longsword in his hand suddenly swept back toward the tomb owner who had launched a sneak attack on him.

"Dang!"

With a not-so-loud collision sound, the metal cone that looked like a staff was cut in half. The sword Qi swept across the mask of the tomb owner and cut it in half.

"Huala"

The mask fell to the ground, revealing a shriveled and hideous face. His mouth and nose were already festering in many places.

why didn't you just lie down? why did you have to jump out and court death? "

The tomb owner's strength was slightly stronger than Tang Zhen's, but his movements were slightly stiff. There was no need to fear him.

Although Tang Zhen's cultivation had been sealed, he was still able to easily deal with the sneak attack of the monster. Killing it was only a matter of time.

Under the gazes of big beard and the other adventurers, the two sides exchanged more than ten rounds of blows. After that, Tang Zhen's sword swept out.

The angle of the sword was very tricky. The tomb owner could not Dodge in time and his head was directly cut off.

"Pfft!"

As if a high-pressure tap had been turned on, the headless corpse of the tomb owner stood still. The foul-smelling blood soared into the sky, and then it fell straight to the ground.

Tang Zhen shook the longsword in his hand. He turned his head to look at the head that had rolled to the side and let out a cold snort.

"You've overestimated yourself,"

Tang Zhen's eyes swept over the corpse of the tomb owner as he spoke. He had unintentionally seen an item that caused him to involuntarily reveal a smile.

2488 The origin of the wise man (1)

The reason why Tang Zhen was happy was naturally because he had encountered something that he wanted. Not only did it resolve his urgent need, it also allowed him to confirm that his luck was not bad.

&Nbsp; he just didn't know if his luck was really good or if he was affected by something else, like the scales of fate in his God Country.

Although he couldn't contact her, he was constantly influenced by her, allowing him to always maintain his good luck that far exceeded others?

A badge the size of a cigarette box was hanging on the waist of the tomb owner. It was made of a special alloy.

The sign was engraved with dense runes, and the exterior decoration was very gorgeous. At the same time, there was an exclusive badge of the tomb owner, indicating that this guy had a distinguished identity when he was alive.

Of course, these were all secondary. The key was that the sign was emitting a faint spatial energy fluctuation, allowing Tang Zhen to easily determine its use.

This was a storage equipment, something that Tang Zhen urgently needed.

It should have been the most precious item of the tomb owner when he was alive. Therefore, he had carried it with him. Originally, Tang Zhen did not have the chance to obtain it, but the tomb owner had to court death and launch a sneak attack.

In the end, not only did he not kill Tang Zhen, but he also lost his own life. He wondered if he would regret it before he died.

From this, it could be seen that at certain times, it was necessary to keep a low profile, especially when one was being warned.

If he couldn't give up some of his worldly possessions, then it was very likely that he would lose his most precious thing as well. Thinking about it carefully, it really wasn't worth it.

After all, this was the cultivation world, and there was no such thing as fairness.

The big-bearded man and the others by the side exclaimed in their hearts. When they saw the tomb owner launch a sneak attack earlier, they thought that Tang Zhen's life would be in danger. In fact, they were even prepared to immediately flee.

A monster that even Tang Zhen couldn't defeat, they definitely couldn't defeat it either. Rather than staying behind to die, they might as well take the opportunity to escape.

In the end, Tang Zhen had killed the tomb owner with a swing of his sword in a short period of time. His speed was truly terrifying.

After Tang Zhen's gaze swept over them, the big-bearded man and the others awkwardly retracted their footsteps. The respect they had for Tang Zhen in their hearts became increasingly dense.

At the same time, he made up his mind not to anger Tang Zhen. Otherwise, he would be seeking his own death.

Tang Zhen did not pay any attention to the adventurers. Instead, he walked to the side of the tomb owner's corpse and carefully examined it from top to bottom.

The tomb owner had a lot of things on him, but they were of no use to Tang Zhen. The only valuable thing was the storage equipment.

With a light flick of his longsword, the metal plate flew up and floated in front of Tang Zhen under the control of his spiritual power.

Wisps of white flames wrapped around it. Then, a faint black gas came out of the card and disappeared without a trace.

This was the spiritual imprint and bad luck left behind by the tomb owner. After being burned by Tang Zhen's spiritual fire, the plate had become as clean as new.

It was just that after checking the token's capacity, Tang Zhen felt a little disappointed. This was because its total capacity was only about one cubic meter and it only contained some miscellaneous items.

Perhaps in the tomb owner's heart, these were all precious treasures that needed to be specially stored in storage equipment.

However, in Tang Zhen's eyes, they were just a pile of broken items that did not have much value.

With different identities, their vision was naturally different.

However, if they were sold to the natives, they could be exchanged for a rich harvest, so they must not waste it easily.

if possible, I can collect materials to increase the capacity of this storage token.

With Tang Zhen's methods, it was completely possible for him to upgrade his storage equipment once again. However, due to the lack of materials, he could only make do with it.

Because their powers were sealed, even Masters of creation had to face the awkward situation of not having anything to cook.

He turned around and walked towards big beard and the others. Then, under their shocked gazes, he put away all the gold coins in the box.

” a spatial item! ”

Seeing the scene in front of them, the adventurers were stunned at first, and then let out a sigh of surprise.

It was obvious that they knew about the existence of space items. From their tone, it could be confirmed that in this world, space items were also very rare and expensive.

“There are still many things here that you can collect as much as you want.

Of course, I suggest that you don’t be too greedy and leave as soon as possible after taking your things. There are a lot of rats here, and they can eat you up until not even your bones are left!”

After hearing Tang Zhen’s reminder, the big-bearded man and the others recovered their senses and hurriedly searched the tomb.

Tang Zhen was not in a hurry to leave. Since the big-bearded man and the others had accompanied him, he would not leave them in such a dangerous environment.

The adventurers saw this and sped up their actions one after another. They did not dare to let Tang Zhen wait for too long.

As an adventurer, he was naturally very good at collecting spoils of war. Even though they were fast, they were absolutely organized and would not miss any location where the treasure might be.

After around 15 minutes, the adventurers once again gathered around Tang Zhen. Each of them was carrying a large bag, and their faces were filled with joy that could not be concealed.

Although they didn’t get any gold coins, the items they collected were more valuable. Some of the items could even be called rare.

In the hearts of these adventurers, they didn’t think that Tang Zhen couldn’t see the value of the item. They just treated it as a reward from Tang Zhen and were naturally grateful in their hearts.

“Alright, let’s leave.”

Tang Zhen glanced at the few adventurers and said in a faint voice. After which, he turned around and left.

On the way back, nothing unexpected happened.

After returning to the ground, Tang Zhen looked at the big-bearded man and the others, indicating that they could leave immediately.

When the few adventurers heard this, they repeatedly thanked Tang Zhen. Their faces were filled with gratitude.

Tang Zhen had first saved them and then cleared the monsters in the underground tomb, allowing them to have a rich harvest.

After selling these gains, they would definitely be able to exchange for a large sum of money, enough for them to live a comfortable life for a few years.

Tang Zhen suddenly thought of a matter and asked the big-bearded man and the others, "How much do you know about the Heaven's Wall city?"

The big-bearded man and the others were startled when they heard Tang Zhen's question.

"I won't hide it from you, Sir. We come from the Heaven's Wall city and have lived here for decades.

If you want to know anything, you can ask us directly. If you know anything, you won't hide it from us."

"Is that so? that's quite a coincidence."

Tang Zhen nodded. Since the big-bearded man and the others were old residents of the Heaven's Wall city, it allowed him to save quite a bit of effort.

I heard that there are wise men in the Heaven's Wall city who know a lot of things. What is going on? "

Hearing this question, big beard and the others laughed and immediately gave an answer.

It turned out that the Heaven's Wall city was known as the land of reincarnation. It was said that the dead would go there to start their life again.

Perhaps it was because of the special environment, but there were some people in the Heaven's Wall city who clearly remembered things from their previous lives and even memories from an even longer time.

These people would undergo special cultivation in an attempt to evoke a deeper level of memory. At the same time, they would also establish special organizations to communicate and explore with each other.

The members of these organizations were the wise ones. They could provide paid services and were one of the most special professionals in the Heaven's Wall city.

The big-bearded man dragged himself into this as he said this. He said that the reason they came to these ruins was that they had bought information from a wise man, which was why they had appeared in the barren mountains.

2489 Giving you a ride (1)

The concept of life and death was common among intelligent races. The more they understood the value of life, the more they feared death.

Life was coming to an end, and everything would eventually vanish into thin air. This was indeed a very terrifying thing.

who would easily give it up after obtaining it with great difficulty?

Therefore, intelligent creatures yearned for immortality, or hoped that their souls would exist forever so that they could have a chance to be reincarnated, or live forever in a better ideal world.

Even if there was no real evidence, ordinary mortals still believed in it without doubt. As a result, many beliefs were born, so that they were no longer confused.

Other plane worlds aside, the cycle of life and death did exist in the divine Kingdom of the creator's mind.

The purpose of doing this was to avoid wasting divine source, and thus, it was a common means of recycling.

The memories of the retrieved soul would be erased and they would start a new life. Very few would escape.

In each cycle, the creator would also benefit, because the mind power of intelligent life would be the nutrients for the formation of divine source.

During this process, some powerful beings would appear one after another. They would become the divine servants of the Masters of creation or lower-level beings.

Tang Zhen suddenly thought of a place. It was the fate Island in the fifth battle area. He had once stirred up a storm there.

It was a very special place. It was a product of a creator using special means to combine the divine Kingdom in his mind with his territory.

The fate Island was completely different from the other territories. Tang Zhen had yet to figure out the true secret of that place.

After the big-bearded man and the others said that the Heaven's Wall city was the land of reincarnation, Tang Zhen did not have any doubts. On the contrary, he felt that it was only natural.

This was because, in his opinion, this place was similar to the island of destiny, and it also hid countless secrets.

While Tang Zhen was thinking, the big-bearded man continued to explain, "Sir, you can get the answer from the wise man after paying a certain amount of gold coins.

But what I want to say is that even a wise man can't guarantee that the answer is completely accurate. Most of the time, it's ambiguous, and even nonsense!

If you have something that you need a wise man to answer, it's best to find those who are famous. They were all extraordinary figures in their previous lives and knew more secrets.

Although the cost will be a bit more expensive, it's definitely worth it, and the realism is guaranteed."

The big-bearded man and the others seemed to have suffered a loss before. Therefore, they had specially warned Tang Zhen to avoid him being taken advantage of.

Tang Zhen nodded his head. He did not expect that there would also be people who made up the numbers among the wise ones.

Of course, the biggest possibility was that those wise men had ordinary identities in their previous lives and didn't have much knowledge.

I want to get a map. The more the better. Do you have any suggestions? "

The big-bearded man and the others conversed for a while before they gave an answer to Tang Zhen's second question.

In some shops in the Heaven's Wall city, there might be maps for sale. However, these privately made maps were very inaccurate, and the same place might have different markings.

You could also buy maps from the wise men, but most of the information on the maps they drew were outdated and not very useful for modern people.

The maps that were bought from them basically had special uses, such as adventurers using them to find ruins.

In addition, there were two other methods. One was to buy a copy of the map from the adventurers, or to find it from the goods they sold.

Although the big-bearded man and the others gave quite a number of answers, Tang Zhen was still unable to be satisfied. This was because he knew that the efficiency of these few methods of collection was very low.

I see. Thank you for telling me. Also, I'd like to remind you to be careful on your way back.

Tang Zhen glanced at the big-bearded man and the others. This group of people had quite a number of treasures on them. It was inevitable that they would be targeted by people with ill intentions on their way back.

There were only five of them in total. If they were robbed by a group of bandits, there was basically no possibility of them surviving.

Big beard and the others nodded in thanks. In fact, they were also worried about this matter and were thinking about how to return to the Heaven's Wall city safely.

The big-bearded man looked at Tang Zhen. He hesitated for a moment before saying, "If I may ask, are you going to the Heaven's Wall city?"

After he said this, he didn't wait for Tang Zhen's reply and quickly explained, "Sir, if you're going to the Heaven's Wall city, can you give us a ride? once we reach our destination, we'll help you collect the items you want.

You're unfamiliar with the Heaven's Wall city, but we know it very well. With us running errands for you, it will definitely make your business more smooth."

The big-mustached man's tone was very sincere. He expressed his value and hoped that Tang Zhen would be able to bring him along.

In fact, big beard and the others were very clear that no matter how good their words were, the success rate was still not very high.

After knowing that Tang Zhen was in possession of a precious treasure, the most rational thing to do was to stay far away and no longer have any contact with him.

This was because once they reached the Heaven's Wall city, they would be in the territory of big beard and the others. The environment was very unfavorable to Tang Zhen.

Tang Zhen brought them back to the Heaven's Wall city. If there were people who harbored evil intentions and forgot their friends for profit, they would be asking for trouble.

"You're coming with me?"

Tang Zhen frowned slightly when he heard this. He swept his eyes over the big-bearded man and the others, who had anticipation on their faces, before gently nodding his head.

"That's good too, then come with me."

After hearing Tang Zhen's words, the bearded man and the others were overjoyed in their hearts. They hurriedly bowed and thanked him.

Originally, he just wanted to give it a try and didn't expect Tang Zhen to agree. However, he didn't expect a surprise to really arrive.

Being able to return with Tang Zhen had increased their safety by countless times. This also allowed their suspended hearts to finally be at ease.

Looking at the runic airship that was slowly descending, the eyes of big beard and the others flashed with a touch of anticipation. They wondered what it would feel like to ride an airship.

It didn't take long for the runic airship to hover in an open space near the top of the mountain. A soft ladder was thrown down by ergou.

After Tang Zhen boarded the runic airship, big beard and the rest also climbed up one after another. They looked at the interior of the runic airship with eyes full of curiosity.

If they had not met Tang Zhen, they would not have had the chance to come into contact with the runic dirigible, let alone become passengers.

Looking down at the mountains and trees from above, they were so excited that their bodies trembled.

"Let's go, we'll head straight for the Heaven's Wall city!"

After Tang Zhen issued the order, he went to the corner of the runic airship and sat down. He entered the space of consciousness to check the list.

Once he had enough gold coins, he would use the search function of the third list to search for information that interested him.

Of course, he wouldn't waste his gold coins on purpose, because there were still many areas in his plan that required gold coins.

After the big-bearded man and the rest saw Tang Zhen's appearance, they subconsciously shut their mouths. At the same time, they continued to size up the scenery below. A wisp of excitement would occasionally flash across their faces.

From time to time, he would look at ergou, watching him fly the runic airship, his eyes full of envy.

Buttface was in charge of piloting the runic airship. He couldn't help but feel proud when he saw the big-bearded man and the others.

Becoming an adventurer was one of ergou's dreams back in the day. Unfortunately, no one had brought him into the sect, so he could only helplessly give up on this idea.

After seeing the envious eyes of the adventurers, dog two suddenly understood one thing. He should be doing something more promising than becoming an adventurer.

As er Gou thought up to this point, his gratitude towards Tang Zhen grew even more intense.

Without him, he would have become a corpse in the ghost city. How would he have the chance to pilot the runic airship?

2490 Arriving at the Heaven's Wall city (1)

Compared to the difficulty of crossing the mountains and ridges, the speed of traveling in the air was astonishing, and there were almost no obstacles.

The excitement of big beard and the others had not yet dissipated, and the Heaven's Wall city was already in sight. This naturally caused them to sigh with emotion.

Sure enough, there was no harm without comparison. Thinking back to the hard work of crossing the mountains in the past, they were even more envious of Tang Zhen who had the runic airship.

This thing was simply the most ideal means of transportation for adventurers. If he had a runic airship, where could he not go in the world?

Tang Zhen, however, stood on the platform and looked at the Heaven's Wall city without blinking. He seemed to be very interested in this city.

This was a city built between two mountains. The foundation of the city was actually a mountain, but it had been forcibly transformed into a city.

The distance between the city's highest and lowest point was more than a thousand meters, and the outermost area was almost vertical.

The street was like a suspended Plank Road, and most of the houses were sculpted and painted with yellow and red paint, looking very strange.

The surface of the Heaven's Wall city was full of potholes. An experienced person could tell at a glance that it had obviously suffered heavy losses from war.

From a distance, the Heaven's Wall city looked like an upright corn cob, and a large piece of its waist had been bitten off.

Newcomers were always frightened when they saw it, afraid that the city would suddenly break in half, and they would have no way to escape.

However, if he really said such words, he would definitely be laughed at by the residents of the Heaven's Wall city, because only outsiders would have such worries.

There were 500000 residents in the Heaven's Wall city. They had lived here for many years, but the entire city had always been safe and sound. It had not even shaken before.

In addition to the unique city, the mountains on both sides of the Heaven's Wall city were also the same.

In addition to the people living on the mountains, the two mountains near the two sides of the city had been carved into two Guardian statues.

The statue was almost a thousand meters tall. It was a miracle, and the carving was very detailed. Every spectator was amazed.

These two Guardian statues were even more famous than the Heaven's Wall city because, according to ancient rumors, these two statues actually had "life."

When certain requirements were met, these two giant statues would come to life and protect the city of tianxu.

It might sound a little ridiculous, but whether it was the old residents of the Heaven's Wall city or the wise men, they all agreed that this was not a lie.

There were even wise men who claimed that they had personally experienced the war in the statue of the Heaven's Wall city.

In that world-destroying battle, the Heaven's Wall city had been besieged and attacked by the demon Army, and the huge gap had been left behind by that battle.

Fortunately, the two giant Guardian statues had made their move and repelled the invader from the demon race. Only then did they manage to protect the Heaven's Wall city.

It was said that the restoration of The Guardian statue had never stopped, but whether it was successful or not had always been a mystery.

"It should be true. The decorative patterns on these two Guardian statues are actually very sophisticated runic magic circles, but many places have been seriously damaged.

Although some of the damaged areas have been repaired, the level of the repairman can not be compared to the original. Even if it can be used, the power will be greatly reduced."

After listening to the big-bearded man's introduction of the Heaven's Wall city, Tang Zhen replied in an indifferent tone. In the eyes of a cultivator of his level, he could see the secret of The Guardian statue with a single glance.

Big beardy and the others nodded. In fact, they had the same idea. After all, they had lived in this city for decades, and they were very concerned about the rumors about The Guardian statue.

In the eyes of these adventurers, Tang Zhen should be an extraordinary Big Shot. Since he had said such words, it seemed that the rumors were most likely true.

Just as the big-bearded man and the others were quietly pondering, Tang Zhen had already shifted his gaze and looked at the entrance of the Heaven's Wall city.

The Masters of creation had extraordinary vision, and they could see everything clearly, even if it was a hundred miles away.

At this moment, there were quite a number of people entering and leaving the entrance of the Heaven's Wall city. This was an extremely ordinary scene. However, it did not seem so in Tang Zhen's eyes.

Among the figures entering and leaving the city, he found traces of cultivators from Lou Cheng, and there were more than one.

The other party had arrived at the Heaven's Wall city first. Judging from the way the cultivators in the tower City did things, they must have a plan.

Tang Zhen did not know what the other party wanted to do. However, he also hoped that there would be peace between them. Otherwise, it was inevitable that a dispute would arise.

Of course, this was only Tang Zhen's wishful thinking. After all, everyone had the same goal. A fight would definitely be unavoidable.

In fact, this situation was already expected. After all, there were too many cultivators participating in the competition this time, so it was normal to meet in the Heaven's Wall city.

Since there were a large number of cultivators gathered in the city, he should be more low-key. If he was targeted by those cultivators, it would cause a lot of trouble.

As Tang Zhen thought up to this point, he turned his head to look at er Gou, who was in charge of driving, and asked him to find a place to land.

A few minutes later, in an open space halfway up the mountain.

Tang Zhen got off the runic airship. After sizing up the surrounding environment, he let big beard and the others leave first.

Both parties agreed on a location. They would meet there three days later. At that time, big beard and the others would bring the things that Tang Zhen wanted to see him.

After thanking Tang Zhen once again, the big-bearded man and the rest left in a hurry, quickly disappearing into the forest.

“Let’s go. We’ll find a hidden place and hide the runic airship before heading to the Heaven’s Wall city.”

It was impossible for Tang Zhen to drive the runic airship into the Heaven’s Wall city. That would be too ostentatious, and it would be difficult not to be noticed.

Buttface didn’t mind. He listened to Tang Zhen’s arrangements. In fact, he also felt that it was inappropriate to fly the runic airship to the Heaven’s Wall city.

If they caused any misunderstandings and were attacked by the city defense crossbows, it would be too late to cry.

The weapons in this world should not be underestimated. The city-guarding crossbows, which had been carefully crafted by skilled craftsmen and added with runic magic circles, could easily shoot up to ten thousand meters.

Even the armored vehicles of the technological civilization I could not withstand the attack of these runic crossbow arrows. They could even penetrate the monster’s shell that was tens of centimeters thick.

Although the power was not weak, it was very complicated to operate, and the cost was quite high. It could not be compared with the weapons mass-produced in the technology plane.

Of course, this information was told by the bearded man and the others. They were afraid that Tang Zhen did not know about it. Therefore, they specially reminded him to avoid flying above the Heaven’s Wall city rashly.

The two of them took the runic airship and circled the mountains twice before finally finding an ideal parking spot.

It was a huge tree, but the center of the crown was unusually flat. When they got closer, they realized that it was covered by dense vines.

These vines were extremely dense and thick, forming a concave platform at the top of the crown of the tree that was dozens of square meters in size. However, the area of the crown of the tree was hundreds of square meters.

When the runic airship landed on it, the surroundings were blocked by the tree crown. Unless one was standing at a higher angle, it was impossible to see the runic airship that had landed on it.

After a simple disguise and making sure that there were no problems, Tang Zhen and ER Gou left the runic airship and headed straight for the Heaven's Wall city.
