The moment he saw the Emperor Jiexin appearing, the Realm Beast King's first thought was to run away.

Don't look at him in his lair now.

The strength has reached the invincible level, and the strength needs to be improved? The price is too high! Emperor Xia, the ancestor of Yongye, etc. are all very powerful in their lair, but the increase in strength will not be too exaggerated, because they cannot be unlimited

"Is that Jiujiang God King outside the universe?"

"What? The God King of Jiujiang dare to appear?"

Originating in the mainland, with the fall of the strongest force in the past, the "Infernal Building", another behemoth rose.

It is the Tianhuang Mountain founded by the current invincible powerhouse "King of the Nine Rivers" in the Origin Continent.

Tianhuang Mountain, who endured for many years, was finally born, and as soon as he was born, he shocked countless people as the most powerful force in the Origin Continent.

Everyone knows that there is Jiujiang Shenwang, the invincible powerhouse who swept the entire continent of origin, in Tianhuang Mountain, and he is destined to become one of the other gods.

The day Wu State was officially founded.

It can be called the most solemn scene in the history of Origin Continent!

Because not only the \*\*\*\* kings from the cultivator camp gathered together!

That is, the ancient indigenous peoples, the primitive life groups have all come here.

When they saw the appearance of ancient indigenous people and primitive life, those \*\*\*\* kings almost doubted their eyes.

But then it was said that this was invited by the owner of Tianhuang Mountain, the "Jiujiang God King".

Broken Tooth Mountains, Shiva Island.

Many floating islands are very primitive, and only the clan lands are slightly more special!

However, Supreme Shiva made some constructions on the floating island, paved with stone roads, and the stone roads criss-crossed all over the entire island, making it look less primitive and different.

"Emperor Jiexin is here again?" Supreme Master Shi Fa was a little puzzled when he saw the young man in the fiery red robe.

This time, Wang Yi lived alone.

#### [Chapter 1307: Fight Supreme!](#)

"Thousand-eyed water bead!" Shi Fa Supreme, who was watching all this on the shore, had such amazing eyes that he could clearly see the bead in the center of the stamen.

Shi Fa Zhizun never expected that there is a thousand-eyed water drop hidden in the center of his Black Leaf Lake.

When the black leaf flower fully bloomed, revealing the thousand-eyed water drop, the terrifying oppression that permeated everywhere suddenly disappeared.

The moment he disappeared, Wang Yi, who had already been prepared, was already lightning-fast

#### [Chapter 1308: Snake Tooth Corridor](#)

The ups and downs of life are unexpected.

It turned out that Emperor Jiexin walked to the center of Heiye Lake, and the thousand-eyed water beads appeared.

At that time, Shi Fa Supreme was shocked first, and then ecstatic.

In his opinion, this is the treasure sent to him by God through the hand of Emperor Jiexin. In his own territory, Emperor Jiexin is alone. Isn't this most precious thousand-eyed water bead in his pocket!

But later, Emperor Jiexin broke out with a terrifying soul move,

[Chapter 1309: Hey hey hey!](#)

The other four supreme beings all envied Wang Yi's good luck, and actually got a treasure certificate.

Of course Shi Fa Zhizun didn't tell anyone about his losses, and he didn't allow his subordinates to spread the word.

They didn't know that Wang Yi had two thousand-eyed drops of water on his body.

Snake Tooth Corridor.

The vicinity of the terrifying dark vortex in the Snake Tooth Corridor. The tearing power of the vortex was too strong, and the roar and fluctuations made Wang Yi tremble slightly, but the sound alone was not enough.

[Chapter 1310: no one can understand my happiness](#)

Wang Yi continued to fly, going to the first light group first.

The vein channel of Consciousness Sea is even more slender. Although he flew the thickest channel, it was only a million miles wide. There are also staggered nodes in the vein channel, but at the 'nodes' it is very quiet, without any 'black wind' invasion!

Yes, in the Sea of Consciousness, there is still a black wind howling, attacking Wang Yi's body. Only at the node can the power consumption of the thousand-eyed water bead be avoided.
