

A God 1311

[Chapter 1311: Serpent of the World](#)

The entire Snake Tooth Corridor is very large, even if the snake's 'brain' is extremely broad, the Sea of Consciousness is only relatively special, and its scope is only a small corner.

It's just that Wang Yi thinks this is a relatively important place, and he is relatively familiar with the information. Thousand-eyed water beads have limited power, so they naturally choose to explore here first.

In fact, at this rate of consumption, it is difficult for a thousand-eyed water droplet to thoroughly explore the entire Sea of Consciousness region.

Wang Yi continued to go to the Sea of Consciousness area,

[Chapter 1312: Xintiandi](#)

Wang Yi also discovered that even if he restrained himself to explore the Sea of Consciousness area, the power of the Thousand-Eyed Water Drop still depleted quickly.

If this continues, the light clusters in the Sea of Consciousness area will run out of power without much exploration.

In fact, it takes a long time for those supreme beings to come in and explore, and they cherish this opportunity very carefully. There are also many places inside the Snake Tooth Corridor that are extremely safe, such as the 'nodes' in the corridor, which cannot be affected by strong winds, and for example like light blob

[Chapter 1313: Thunder World Community](#)

The three Snake Tooth Corridor treasure certificates seem to be many, but they are not enough to explore.

No matter how economical Wang Yi was, he could barely explore the Consciousness Sea area in the end.

"However... the harvest is not bad." Wang Yi smiled and stood at a 'node', which could not be affected by the storm.

The last thousand-eyed water drop on his body now has only a trace of power left.

Hundreds of light cluster spaces have all been explored.

The incomparably precious treasures are innumerable

[Chapter 1314: wilderness](#)

The blood-colored blisters had already rushed into the Golden Thunder World, and in a flash, they fell into a certain place and disappeared.

A wilderness.

Standing alone in the wilderness, Wang Yi looked down at his wrist. A **** mark appeared on his wrist. After the mark disappeared, he hid himself.

The power contained in this blood-colored blister can be stimulated twice more. Every time you activate it, you can send yourself to a world.

Three worlds with different civilizations

[Chapter 1315: ascender](#)

The Great Wilderness in the God Realm is vast and boundless, and the wild beasts are the most numerous in the Great Wilderness!

But the strongest wild beast is the peak of the gods, and the gods are almost invisible.

Therefore, those who dare to venture into the wilderness are at least at the level of a god.

And Wang Yi was dealing with a few desolate beasts with no eyes, calmly practicing for half a day, based on many mysteries of the rules of the Void Dao that did not cause conflicts in this world, simplified the "chaotic source body training" method, and barely allowed this physical body to maintain In the ultimate level of combat power

[Chapter 1316: Dongchen couple](#)

"Brother Dong, that person's strength has barely reached the level of a god, but his body is seriously injured, and he is trying to heal his injuries." A woman in colorful clothes next to the man had a strange brilliance in her glazed eyes. After observing Wang Yi opposite, she said to the man Sound channel. "Besides, he didn't condense his mind, and he cultivated to the realm of the gods without condensing his mind. It seems that he is pure body training. I can't feel any blood in him. He is not a citizen born in the gods, but a lower realm. the Ascender."

[Chapter 1317: Eastwood City](#)

The God Realm is vast, and Wang Yi and Dong Chen, who met in the Great Wilderness, walked together. After asking, they learned that it would take more than three months to reach the nearest Dongmu City.

"Dongmu City is also a famous city in the God Realm." Dongchen said with emotion.

Dongmu City Lord is a strong man in the late stage of the **** emperor, and he is also a super strong man ranked in the top 100 in the God Realm.

In a large area around, Dongmu City is the most powerful force!

Looking at the vast and distant land, Wang Yi secretly felt

[Chapter 1318: Ru Lei Zong](#)

"Brother Xia, I have already told the sect about you." Dongchen came to him.

Wang Yi had previously asked whether it is possible to watch classics such as Lei Zongnei.

Dongchen said: "Our elders know about you and have made a decision. If you, brother Xia, are willing to serve as an enshrinement to our Rulei Sect, you can take any practice book from the books below the emperor level in the Tibetan scripture hall."

Although the suzerain of Rulei Sect is "Ru Leizi", in fact Rulei Zi

[Chapter 1319: Middle God Emperor!](#)

The Buddhist scriptures hall is a secret room specially prepared for those who come to watch the secret scriptures.

Wang Yi has patiently read the entire "The Original" of "The Secret Code of Clouds and Space".

'Original' can only be written after mastering the "Secret Code of Clouds and Space".

"This "Yunkong Secret Code" is really unique in its understanding of the mysterious application of the rules of the Dao of the Void." Wang Yi was slightly amazed.

just like

[Chapter 1320: come see your sister in law](#)

On the meandering path in the courtyard, there are lush trees, overgrown flowers and grass, lush greenery, and gurgling streams run through it, fine and clear.

Wang Yi has already come out of the place of retreat, and is currently fishing in an antique pond in the garden, thinking about the next move in his heart.

There is a square table next to it, and a maid stands waiting on it.

"Brother Xia, Brother Xia." A voice came from outside.

Dong Chen, whom he hadn't seen for many years, appeared, and there was still a lot of people around him.
