

A God 161

[Chapter 161: The first magic weapon!](#)

"Well, since I have decided to take the road of combining the laws of "time and space", either Yan Shenbing has to give up his training." Wang Yi took a deep breath, "I have to change a mind weapon."

Wang Yi opened the treasure house and searched for the "Nine Great Weapon of the Masters" in the weapon category.

drop.

The result will come out immediately.

Universe magic weapon: 10 points (30% off the original secrets, 20% off the secrets of the beginning, 10% off the secrets of heaven and earth, full price of the secrets of the last days)

This is the last of the nine magic weapons. It is a magic weapon created by fusing the two most esoteric principles of "time" and "space".

The difficulty of mastering is also the hardest among the nine magic weapons!

Known as the first of the nine magic weapons!

The general form of the cosmic warrior is a silver-gray crystal shuttle, 2.7 meters long, with pointed ends and slightly rounded middle, which is perfectly streamlined.

Contains 20162 transparent crystal diamond pieces that are as thin as a cicada's wings, and each diamond piece contains an incomparably mysterious origin law secret pattern.

Divided into seven forms!

What's more amazing is that practitioners can choose three control routes: First, the law of time is the main one, and the law of space is the auxiliary route! Second, a route based on the law of space and supplemented by the law of time!

Third, the laws of time and space are balanced, forming a perfect state, and displaying them at the same time! Also the hardest!

The first and second routes are almost the same in difficulty and power.

After all, it is impossible for everyone to be so against the sky, to achieve the same level of time and space law.

Then, they will make a choice based on their own situation, focusing on a certain aspect of time or space. In order to control the most terrifying magic weapon among the nine magic weapons of the universe in the initial stage!

The third route is the most demanding, the hardest to practice, and the most amazingly powerful!

Yan Shenbing practiced to the end, the ninth renamed "Immortal Can Be Enemy"!

It is said that if the master of the world cultivates successfully this trick, even if it is immortal, it can be matched.

This is already extremely amazing, after all, what a huge leap from the realm master to immortality!

And the seventh cosmic weapon, that is, the name of the last move, is even more terrifying! It's called-Killing the Gods!

The one who can cultivate the cosmic magic weapon to the seventh level at the stage of the realm master is definitely the most terrifying genius in human history. In the stage of the realm master, he can kill immortality!

Match!

beat!

Kill!

These are three different concepts! It also proved the power of the universe magic weapon to reach its peak! It is definitely the most incredible existence among the nine great soldiers!

But to reach this point before immortality, the vast universe, there have been few for countless years.

After all, a world master who possesses that kind of talent and law perception has long since become immortal.

...

Because the casting requirements are different, there are many changes in the form. The universe magic weapon is also the most complicated form of many magic weapons, so although it is roughly divided into seven forms, in fact, there are more changes!

Wang Yi looked at the introduction information about the cosmic warriors, and his heart was surging.

"If I choose the cosmic chaos monument and embark on the road of combining the laws of time and space, this cosmic magic weapon will be my most important weapon before immortality. It looks like it was built for me." Wang Yi was a little excited.

Only 10 points? It's not worth mentioning to Wang Yi, plus the original secret realm member discount, and finally spent 7 points to buy it.

However, because it was a physical object, it was finally agreed to trade at the headquarters of the virtual universe company.

But the problem is not big. The cosmic soldiers can also simulate and practice in the virtual universe first, and the effect is similar.

Time flies, and in a blink of an eye, three years have passed.

Virtual universe, primitive area, in the training ground of Manor 114.

At this moment, Wang Yi is the only person standing in the fully enclosed training field over a thousand kilometers long and wide, and beside him, there is a crystal spindle-shaped object suspended. Thicker.

The length is 2.7 meters, the two ends are extremely sharp, the middle is the widest, and the middle width is 82 cm. Moreover, the whole body still has incomparably complicated mysterious marks, and the stream of light flickers in the marks, adding a luxurious and mysterious atmosphere to it.

"First weight!"

With Wang Yi's soft drink, a series of intense brilliance followed the dense traces to form strange lines, and the light formed by the countless traces unexpectedly formed a strange one.

Afterwards, a stream of silver-gray streamers flew out of the crystal, and an inexplicable and powerful strange force descended into the silver-gray light, and the stream of streamers stagnated in the air. This is 108 crystal diamonds thin as cicada wings. At this moment, these 108 palm-sized crystal diamond pieces are scattered and arranged, and at the same time they have extremely complicated strange silver and gray secret patterns. With the help of law perception, Wang Yi uses his powerful consciousness to force the 108 pieces with difficulty. Crystal lozenge.

Silver and gray silk threads permeate the connection, and the complexity is many times higher than that of the "Yan Shenbing".

"Ning!" Wang Yi gritted his teeth. I saw in that mid-air, 108 crystal diamond pieces connected to each other with complicated silver and gray silk threads. The mysterious connection combination finally made a silver-gray crystal sword gradually take shape. At the same time, there are circles of ripples visible to the naked eye. Sway in the void like ripples.

There was a hint of joy in Wang Yi's eyes, but then his face changed suddenly.

"Peng!" The silver-gray crystal sword collapsed, the silver-gray silk thread was broken, and it was redistributed into 108 crystals.

"Hey..." Wang Yi sighed, "It can only take shape, even the most basic control. It is so difficult for this cosmic warrior to achieve the first form of the perfect combination of the original laws of time and space. ."

If only time and space are the main one, and the other is auxiliary, Wang Yi's three years of cultivation has already mastered the first form of display!

However, I want to perfectly combine time and space to perform the first task-the Aurora Sword! The difficulty is more than ten times greater!

"But... even if it is the first form of the universe magic weapon of the first line or the second line, once it is proficiently used, its power will exceed the second stage of other magic weapons, and it can even be comparable to the third stage! It is incredible!" Wang Yi There is wonder in his eyes!

As the most special of the nine magic weapons of the universe~www.mtlnovel.com~, a thought force weapon formed by the combination of the two most profound original laws of "time and space", it is indeed infinitely powerful!

However, it also has extremely high requirements on the user's original laws of time and space!

Not to mention, you want to cultivate the most perfect third route to succeed in the "time and space" balance, perfection and flawless realm!

If the first level of perfect and flawless form can be successfully displayed, I am afraid that defeating the other third level of the gods will be easy!

"call."

A figure quietly appeared in the closed training ground.

This is a man with long silver hair wearing a plain gray robe and mysterious black lines on his face.

He looks ordinary, but his eyes are extremely deep, as if there is a time and space in it changing.

"Teacher." Seeing this man appear, Wang Yi hurried over to salute.

This is the teacher of Wang Yi's current manor, the immortal god, Fei Fa.

[Chapter 162: Virtual Universe Company Headquarters](#)

In the central hall of the spaceship, two young black-haired young men stood at this moment, and a tall and burly purple-haired ape man stood beside him.

He smiled and said, "Your Majesty, we are about to arrive at the company's global headquarters."

Luo Feng and Wang Yi looked at each other, and smiled at the same time: "It's finally here."

In the past three years, Luo Feng and Wang Yi have been practicing and learning in the virtual universe, and both have improved a lot.

Both of them have clones, and there is more than one, so the speed of improvement is naturally faster than other geniuses.

But Luo Feng still didn't dare to be complacent, because he was still inferior to Wang Yi and Bo Lan, a peerless genius who came out in thousands of years.

But he is also confident that as long as he keeps improving, one day he can catch up and even surpass them.

"Start to travel through the universe and enter the original universe."

"10...9...8...7...6...5...4...3...2...1!"

Wang Yi and Luo Feng felt a slight shock inside the spacecraft at the same time, and it took ten seconds to return to normal. At this time, the immortal **** "Zi Kun" issued a command: "Exterior scene simulation."

In the next moment, the entire hall of the spacecraft became transparent and disappeared, and a dreamy starry sky appeared around it. In the distance of the starry sky, there was a vast supercontinent suspended in the starry sky.

"His Royal Highness Wang Yi, His Royal Highness Luo Feng, that is the headquarters of our Virtual Universe Company." The Purple Haired Ape Man said with a hint of emotion.

The two of them looked at the endless continent floating in the starry sky in the distance, and they were very shocked in their hearts.

Compared with this vast continent, the stars and planets next to them are nothing short of a sesame seed!

"I remember that the diameter of the headquarters of the Virtual Universe Company seemed to be about tens of light-years away, and it was a bit exaggerated." Wang Yi was amazed.

I don't know how the Virtual Universe Company made such a huge piece of land.

It took about 13 hours for their F-class spacecraft to fly at the speed of near light before it flew to one of the entrances of the virtual universe company's global headquarters.

While enjoying the beautiful scenery along the way, Wang Yi did not forget his duty.

He waited for this day, but waited for three years.

"Sign in."

[Ding, congratulations to the host for signing in successfully, and reward 'Time World'.]

['Time World' has been placed in the panel space, please activate it.]

[This reward is the highest reward for the current location, and you can no longer get any rewards here.]

【Number of check-ins available for this place: 0】

"Um!?"

Wang Yi was suddenly excited!

"What's wrong with you?" Luo Feng, who was admiring the magnificent scenery outside, gave him a strange look.

Wang Yi casually dealt with Luo Feng, trying to calm his excitement.

"It's actually the highest reward for the current location?"

In fact, the "sign-in range" of the sign-in panel has always been a bit fascinating.

But it can be roughly guessed.

For example, on the earth, the largest area is the entire earth. If you sign in with the highest reward, you will no longer be able to sign in anywhere on the earth.

It's the same on other planets.

If it is a large and exaggerated land like the headquarters of the Virtual Universe Company, suspended in the starry sky and calculated in "light years", then it should be a whole continent.

And this is the headquarters of the Virtual Universe Company, one of the five giants of the human race. Although it is not necessarily comparable to the "Original Universe" and the "Chaotic City", the holy land of the human race, it is definitely ranked in the entire human territory. The number is a treasure with a deep heritage.

What would be the highest reward for signing in at such a place, Wang Yi was full of curiosity and expectation.

"Time Realm... It's amazing when you hear it." Wang Yi rubbed his hands and thought, and the glittering sign-in panel came out immediately. He immediately focused his attention on the newly-appearing grid under the panel...it seemed like It's something that looks like a gray sphere.

Information about the time world immediately flooded into Wang Yi's mind.

The realm of time is actually an independent plane space, even detached from the original universe.

Its way of existence is very mysterious. It is connected to the real space of the original universe, but it is relatively independent, as if there is another latitude.

Inside, one can still feel the original laws and operating rules of the original universe, but the original universe cannot find its existence.

It's like a special glass, the people inside can see the outside, but the people outside cannot see the people inside looking at you.

Very wretched.

There is also a name in that time world, called-Time Space Bubble.

As for why it is so powerful, you have to ask the sign-in panel, Wang Yi doesn't know anyway.

The role of the time world is actually very simple, that is, to change the internal flow of time.

The host universe level can turn on a hundred times the flow rate of time. One day in the past, the time world will pass one hundred days.

The domain master level can turn on a thousand times the flow rate of time, one day in the past, the time world will pass one thousand days!

The realm master level can open tens of thousands of times the flow rate of time. One day in the past, the realm of time has passed 10,000 days!

This function can be said to be quite against the sky, because the time world is a dimensional space independent of the original universe, so even a great power like the Chaos City Lord cannot be discovered.

But if you open it in front of him and get caught, it's different.

In the time world, only the host or a clone of the host can enter, and other lives, even plant life such as Mo Yun Teng, or the soul servants of the Zerg mother emperor cannot enter.

In addition, if the temporal world maintains a normal time flow rate, it does not need to consume energy, but if acceleration is turned on, it consumes a lot of energy. The higher the time acceleration, the more amazing the energy required.

Moreover, you can only choose the three fixed time flow rates of hundred times, thousand times, and ten thousand times, like 101 times, 1001 times...impossible.

The realm of time seems to be bound to the human deity. To open a hundred times the time flow rate, the host human body's own strength needs to reach the cosmic level, and to maintain a day in reality, it needs to consume energy that is roughly equivalent to a Hunyuan unit resource.

Turning on a thousand times the time flow rate requires the host's own strength to reach the domain master level, and to maintain a day in reality, it needs to consume approximately the equivalent of 30 yuan unit resources.

Turning on the time flow rate of ten thousand times requires the host's own strength to reach the master level, and to maintain a day in reality, it needs to consume approximately the energy of nine hundred mixed yuan unit resources.

That is to say, if Wang Yi's human body reaches the level of the world master and turns on 10,000 times the time flow rate, it will consume about 330,000 yuan of wealth to turn on ~www.mtlnovel.com~ for one year!

He is not cultivating, he is burning money!

After one year of cultivation, more than 30 immortal gods have to go bankrupt!

And even at a time flow rate of one hundred times the cosmic level, one year would have 365 mixed yuan units, which is almost equivalent to a quarter of a poor and immortal net worth!

However, although the cost is staggering, it brings a hundred times, a thousand times, and ten thousand times the speed of cultivation!

And one of its more powerful functions is life-saving!

When the danger comes, even if you drill into the time world, even the strongest in the universe can only stare.

This is also an incomparable trump card, and it can definitely play a vital role at a critical moment.

After understanding the information of the time world, Wang Yi was shocked and speechless for a long time.

"It really deserves to be the highest reward for the headquarters of the Virtual Universe Company, it is abnormal!" Wang Yi sighed.

[Chapter 163: Time world](#)

Like the most powerful treasures, such as the Star Tower, the defense is indeed very powerful, and no one has a way to hide in the primitive universe.

But Wang Yi's "Time Realm" is not bad. Only the host can use it. It can't be discovered by others. It has excellent concealment. At best, they can only guess some from Wang Yi's whereabouts, but they can't even break their heads. I thought that there is still such a peculiar space in the primitive universe.

The real function of the time world can still change the internal time flow!

"Come early is not as good as a coincidence. This time, in the 33 years of Chaos City, with the help of the 'Time Realm', even the clone can accelerate the evolution and growth in it, plus the sign in Chaos

City..." Wang Yi Thinking of this, his whole body couldn't help trembling slightly, and Luo Feng gave him a weird look again.

"Also, this 'Time Realm' contains such a magical time ability, maybe... it will also help me understand the law of the origin of time." Wang Yi muttered in his heart.

...

This is a vast expanse of land, with forests, lakes, mountains, grasslands... and the surrounding void, but gray air currents, without beginning and end, without seeing the edge.

call. call.

A huge dark red beast like a continuous mountain range suddenly appeared here over a hundred kilometers long, and beside it, there was a silver-gray figure, which was the clone of the Void Zerg who had transformed into Wang Yi's appearance.

Wang Yi directly transferred the two avatars from the prokaryotic world to the realm of time.

On this day, this vast and mysterious unknown world welcomed two guests.

They raised their heads at the same time, scanning this magical world, their eyes were full of curiosity and shock.

"It's amazing. You can actually feel the fluctuations of the laws of the primitive universe here." A huge roar like thunder came from the mouth of the terrifying beast that burned like a star, shaking the sky.

The clone of the Void Zerg was suspended in the air, with a smile on his face.

"Very well, here, you can continue to practice and evolve, which is better than expected."

"Moreover, a lot of energy."

The Void Zerg was a little surprised when he felt the incomparable energy permeating the sky and the earth.

"Here, my Flame Star Giant Beast clone and Void Zerg clone can evolve quickly. Originally, the Flame Star Giant Beast clone swallowed treasures to grow, and it still has 17 years to grow to the ninth rank of the domain master, but now there are hundreds of times in the time world. Time is accelerating, and it is estimated that it will only take two months."

"Moreover, the first calamity of the Nine Tribulations Secret Code can also be practiced here." Wang Yi was very satisfied.

Although he didn't know how this "one time space" and the primitive universe got along, Wang Yi didn't plan to find the bottom line, the level is too far away from him now.

Right now, the most important thing is to use the fastest speed to improve your strength!

The avatar of the Void Zerg glanced around and waved his hand, and a square cosmic crystal appeared, like a hill, crashing on the ground, and soon, covering a range of tens of kilometers.

"Now my human body is cosmic grade, and it can open a hundred times the flow rate of time. I have practiced in Chaos City for 33 years. Here, it is 3,300 years." There was a hint of excitement in the eyes of the Void Zerg clone.

"Turn on a hundred times the time flow rate, one day, one mixed yuan unit!"

"One year, it will cost 365 mixed yuan units!"

"Thirty-three years, that's almost 12,000 yuan unit!" Wang Yi sighed.

Ten thousand mixed yuan unit wealth is considered a higher level of immortality.

Ordinary people really can't afford it.

And this is still the universe level, the domain master level, the world master level, it is dozens of times, hundreds of times higher.

"However, all of this is worth it."

...

call! The spacecraft flew at sub-light speed in the entrance passage of the continent for several minutes and finally slowed down until it stopped. Wang Yi and Luo Feng flew out of the hatch together, followed by the immortal guard "Zi Kun" and others.

"His Royal Highness Wang Yi, His Royal Highness Luo Feng, upon orders from your honourable person, please come with me." There were more than a dozen men and women in uniforms waiting outside. Wang Yi and Luo Feng came out. A red-haired woman in a silver tabard who seemed to be headed respectfully stepped forward.

Wang Yi, Luo Feng, and the red-haired woman in silver robe walked together on this dreamy corridor.

"His Royal Highness Wang Yi, His Royal Highness Luo Feng." There seemed to be five people waiting for them in front of the corridor.

"His Royal Highness, this is the item you purchased. According to the original request of the two Highness, the delivery will be carried out at the headquarters." These people even offered the item.

Wang Yi took his suitcase and opened it to see that the cosmic soldier who looked like a silver-gray crystal was lying there quietly, flowing with a dim and mysterious light.

And Luo Feng also received his own items.

Luo Feng bought more than Wang Yi bought a cosmic magic weapon.

... After a while, Wang Yi and Luo Feng were taken into a transparent oval-shaped hall around and above. When you look up, you can see the infinite starry sky and the beautiful scenery of the headquarters outside. In the hall, there are already many geniuses. The geniuses of war gathered here, and when they saw Wang Yi and Luo Feng coming in together, they greeted them enthusiastically.

"Sura, lunatic, you finally came."

"This should be the first time I have really seen you in reality."

"Haha, Shura looks really tender."

"..."

Both Wang Yi and Luo Feng are not too lonely people, so they have been familiar with many geniuses over the years, and some can make jokes.

Both Wang Yi and Luo Feng are members of the Primal Secret Realm, and their strengths are recognized by these geniuses, so there is no difficulty in getting together.

Even a person as cold and arrogant as Buran, who has met with Wang Yi these years, knows that he nodded to say hello.

Wang Yi, Luo Feng, Rong Jun, and Uka sat chatting with some familiar geniuses from Taichu District.

And the 1,000 geniuses in the hall naturally formed a circle.

After about six hours, 1,000 people have gathered.

Then ~www.mtlnovel.com~ They were wrapped in a strange force by a tall, thin man with red eyes shrouded in a plain white robe and flew to a strange spaceship parked on the lawn.

"Everyone, get into the spaceship." The tall and thin red pupil said indifferently.

Wang Yi looked at the faint blue 'big fish' that was nearly a kilometer long in front of him. The tail was still slightly swinging, but there was a hatch on the abdomen of the spacecraft, and the corridor inside could be seen through the hatch.

"This should be regarded as a G-class spaceship that integrates immortal-class lifeforms and surpasses the F-class spacecraft. This spacecraft seems to be the Venerable Nine Swords." Wang Yi followed the others into the cabin door, muttering in his heart.

Soon, Wang Yi and other people came to a vast hall. In the hall, there were already more than ten immortal existences, and the most eye-catching was the purple-scaled man in the cyan shirt. There is a sense of emptiness there, which makes people feel like a virtual projection, not like a real person.

"Venerable Nine Swords!" Wang Yi said inwardly.

The purple scale man looked at Wang Yi and the group of young people, and then ordered: "Go...to the Original Universe!"

[Chapter 164: The Gaze of Chaos City Lord](#)

In the dim void with occasional chaotic air currents, a big blue fish swings its tail and flies in the void like a real fish. Through the outermost layer of transparent glass, everyone inside the spacecraft You can clearly see the distant heaven and earth cracking occasionally, and you can even see a large number of strange secret patterns flowing on the edge of the cracked space.

"This is the outer operating rules of the original universe of the primordial universe." Wang Yi also carefully watched the strange secret patterns flowing through the crystal filaments at the cracks in the distant space. In his mind, the perception of the original laws seemed to be clearer. . He couldn't help

but exclaimed in his heart: "Comprehending the original law here is much easier than the outside world."

The original universe is the small universe of the "primordial ancestor", the first man in the universe, because the "primordial ancestor" was suppressed by the will of the universe's origin. This primordial universe became a new universe in the period of the 'first opening of the universe'.

Here, the laws are exposed, how the various laws are perfectly combined with each other, how the universe is formed, how the rules work, everything can be seen directly, so it is much easier to understand.

The original universe is the holy place for the cultivation of the human race.

...

A group of young people stood in mid-air. Wang Yi looked down at the ancient and majestic city below. As a city built in the original universe that has stood for countless years, it gives people a sense of vicissitudes of life.

"Everyone, I am the reception messenger of Chaos City." A black streamer flew from a distance and turned into a black robe man with cyan scales on his head.

Then, under the leadership of the black-robed man to receive the messenger, a thousand newcomers flew down from a high altitude and landed on the streets of Chaos City. They began to walk while listening to the black-robed messenger leading the way in front of them to explain related matters in Chaos City. .

Chaos City is filled with small buildings, and on the rooftops of many small buildings, people of different looks can be seen sitting cross-legged.

Above the sky, near the furthest crack in the universe, one could vaguely see a figure standing in the volley.

They occasionally lower their heads to pay attention to those newcomers passing by.

"Another group of little guys are here."

"It was received by messenger No. 11, and that is the little guys from the Virtual Universe Company."

"I heard that the Virtual Universe Company has summoned two young people, Wang Yi and Buran, both of them are very good." On the edge of the crack in the universe, some great beings were standing chatting with each other.

There are many small buildings in Chaos City. The rooftop is quite large, nearly 100 meters long and wide, enough to stand for a thousand people. There are many carved pictures and texts on the rooftop and many carvings are faintly magical.

Many of them were left behind by super-powerfuls who had occasionally learned something from cultivating in Chaos City. Among them, there are many precious insights left by the venerable.

"The time ratio between the original universe and the original universe is 1:3.28." The black robe reception envoy smiled, "The time for your enlightenment this time is more than 30 years."

Afterwards, the black robe messenger took them to the city lord's mansion in the center of Chaos City. It was a majestic and rugged building about three hundred meters high. You can see the three most dazzling universal languages in the city lord's mansion from a distance. —— "City Lord's Mansion".

"Chaos City has three treasures." The black robe envoy smiled and said, "The first treasure is naturally the law of the universe that can be seen by the naked eye."

Many geniuses who followed in the team nodded lightly, this was something everyone could see.

"As for this second treasure, it's in the city and in the city lord's mansion." The black robe envoy asked rhetorically: "You have seen the rooftops of the cultivation residences around you before? For hundreds of millions of years, a strong man They used to live, and they often flashed their inspiration when they were practicing, and they even burned on the ground in front of them..."

"Because it is purely random recording, there are no rules, and many recordings are only half-claws, so most of them have only a little reference at most."

"But! For hundreds of millions of years, there are still some of the countless epiphany recordings that have strong and systematic cultivation value." The black robe messenger solemnly said: "In my Chaos City, there are 52 most precious chaotic monuments, each one. The chaotic steles record a large number of mysterious patterns and so on. These 52 chaotic steles are the avenues of 52 kinds of cultivation, which lead directly to the highest avenue!"

"If you understand a chaos monument, it will directly become a real super existence in the universe. Even if you want to open up a universe, it will be easy..."

When the black robe messenger was telling the newcomer geniuses about the benefits of the Chaos City cultivation, in the depths of the Chaos City Lord's Mansion in an unknown time and space, on the vast and uninterrupted land, the Chaos City Lord was sitting cross-legged on the corpses of foreign experts. In the ruins.

His deep and vast gaze, which seemed to contain the universe, gently swept over a thousand geniuses, first paused slightly on Luo Feng, then nodded, and then stopped on one of the black-haired teenagers. This time His brows seemed to be frowned slightly.

"what?"

"It's kind of weird."

And Wang Yi, who was accompanied by other newcomers outside the city lord's mansion, pretended to hold his breath and listened to the story of the 52 Chaos Stele by the black robe messenger. Suddenly, his heart was cold, as if he was being stared at by something terrible in the underworld, and there was a chill lingering behind his neck. .

Wang Yi suddenly stiffened, and a chill rose from his heart.

However, this feeling of being peeped came and went quickly. Wang Yi hadn't reacted yet, and he had disappeared without a trace, making him a little suspicious.

"What was that just now?"

"Is it the Chaos City Lord? Or is it a super existence in other Chaos City?"

But Wang Yi knew well that he was definitely "noted" by some terrible existence just now.

However, in Chaos City, as long as it is not the Chaos City Lord, safety is guaranteed.

Wang Yi murmured a little bit, Chaos City Lord, old man, don't scare me, I am a pure human, but I have a few clones. Don't be confused...

When things came to an end, Wang Yi was really worried. The Chaos City Lord, who controlled this time and space, missed him and pinched him to death as an alien spy who had entered the Chaos City.

However, his worries seem to be a bit redundant ~www.mtlnovel.com~ because nothing has happened since then, as if the feeling just now was just an illusion.

In Wang Yi's anxiety, the black robe envoy had already finished his speech, and brought a large group of geniuses into the spacious gate of the city lord's mansion.

"Each person can only choose a chaos monument for observation and enlightenment, and the time for enlightenment for each person is seven days!" The black robe envoy led Wang Yi and the others, and quickly walked to the entrance of a dreamy corridor.

On the walls on both sides of the corridor, huge pictures are hung with a total of 52 pictures.

This is the greatest human heritage in Chaos City...the rubbing picture of the fifty-two Chaos Stele.

"Each picture corresponds to a chaos stele. You watch it first, and I will give you half an hour to choose which chaos stele to choose."

Following the words of the black robe messenger, a thousand geniuses walked in front of the huge pictures on the walls on both sides of the corridor.

Wang Yi is now less than a day away from the last time he checked in at the headquarters of the Virtual Universe Company, so he also obediently came to the wall and began to look at the pictures that contained great principles...

[Chapter 165: Space Chaos Monument](#)

Although the decision to choose "Universe Chaos Monument" has been made before, Wang Yi still carefully started to look at the first picture at the entrance of the corridor, and before observing, he gave instructions to his intelligent life "Bermuda", each picture His viewing time does not exceed one minute, beyond this time, "Bermuda" will automatically wake him up.

After all, there is only half an hour of observation time in total.

"Maternal Ancestor Chaos Monument"... "Heart Mark Chaos Monument"... "Dragon Walk Chaos Monument"... "Fengying Chaos Monument"... "Jiuyu Chaos Monument"... "Giant Axe Chaos Monument"...

Wang Yi looked at each picture one by one.

There was silence in the corridor, except for him, every genius was watching quietly.

Soon, Wang Yi stopped again in front of a picture, this picture painted a vast sky, and in the sky, nine meteors fell from afar...

"Nine Stars Picture... This should be the first picture in 'The Monument of Universe Chaos'." Wang Yi was surprised and glanced at the name on the picture, and it turned out to be "The Monument of Universe Chaos".

Watching...Wang Yi felt that he had become those nine dazzling meteors, traveling through the boundless space, flying over the cosmic void for a long time, unknowingly, Wang Yi was immersed in the beauty in the vast world...

"Master, time is up!" Bermuda's voice echoed in his mind, awakening Wang Yi.

"This 'Universal Chaos Monument' is a great trigger for me, and it seems to be more suitable for me." Wang Yi was a little delighted in his heart.

However, he did not give up the other pictures, but continued to look at it.

Finally, half an hour passed.

"Okay, half an hour, tell me which chaos monument you choose, I will record it." The black robe messenger shouted.

"I choose 'Maternal Ancestor Chaos Monument'."

"I choose 'Great Axe and Chaos Monument'."

"I choose 'Heartscar Chaos Monument'."

...

Under the enquiry of the black robe messenger one by one, each genius made their own choices, and the black robe messenger instantly recorded these genius choices with the screen on his arm.

Wang Yi also saw that Luo Feng chose "Jiuyu Chaos Stele". It seems that he is closely related to the Jiuyu school.

Wang Yi also discovered that both Wuka and Rong Jun chose "Great Axe and Chaos Stele".

When he arrived at Wang Yi, he replied: "I choose 'The Monument of Chaos in the Universe'."

As soon as the voice fell, he felt a glance from the crowd toward him.

It's Burlan!

He looked at Wang Yi with a strange color in his eyes, which seemed to be wary.

Berran also chose "Universal Chaos Monument"...

The two most outstanding geniuses of this virtual universe company chose the same Chaos Monument!

Wang Yi knew that Buran was ambitious and chose "Universal Chaos Monument". He wanted to use the law of origin of the wind as a pedal to understand the law of origin of time, and to study time and space at the same time...

I have to say that Buran is ambitious, but unfortunately, reality does not depend on the will of man. Either the law of time origin and the law of space origin are extremely profound. If you want to take care of it at the same time, even a peerless genius like Buran can't do it!

He was wrong at the beginning!

Wang Yi shook his head in his heart. Although he wanted to remind Buran, after all, Buran was a good person by nature...Unfortunately, he also knew that at this time, Buran couldn't listen to anyone, even the big figures in the virtual universe couldn't let it be. At this time, Buran changed his mind. What's more, is Wang Yi an opponent with shallow friendship or in a competitive position?

If he really opened his mouth, it would only make Buran more determined to walk the old way.

"Forget it, after a few years, when Buran is severely beaten by the society, he will wake up." Wang Yi didn't bother to take care of it.

"Universal Chaos Stele" is very special. It is the second most profound among 52 Chaos Steles, just below the "Great Axe and Chaos Stele".

Among the many original laws, "time" and "space" are undoubtedly the strongest two. For example, the 27-story Tongtian Bridge "Jiuyu Chaos Monument" is an introduction to the original laws of space, and the 30-story "Universal Chaos Monument" can introduce the original laws of time and space at the same time.

However, the process of cultivation and perception of "Universe Chaos Monument" can be divided into three routes.

Or, the law of time is the main one, and the law of space is the supplement! In the future, we will step into the realm of "Venerable Time" according to the law of time!

Or, the law of space is the main one, and the law of time is the secondary! In the future, we will step into the realm of "Space Lord" according to the law of space!

The most difficult thing is the third...time and space are combined with each other, and at the same time...this practice is undoubtedly far more difficult than the time or space of individual perception...but once you have achieved something, it will also be the most rewarding!

But it is too difficult and too difficult... There have been achievements in time or space alone, and there have been some breakthroughs to the venerable for a long time, but at the same time, time and space have been taken into consideration, and breakthroughs have been made together, but I don't know how many.

Even Wang Yi had hesitated for a long time before choosing "Universe Chaos Monument" before making up his mind.

Wang Yi thought silently, "My human deity has a powerful talent in the law of origin of time, and the avatar of the void zerg has a talent for understanding the law of origin of space and it is also very against the sky. This is also my advantage... If it doesn't work, I can look for it in the future. A talented life for a time to carry out the birth of the third clone..."

"The way of time and space has been my main practice route for a long time."

...

The black robe messenger had already recorded it, and left this corridor with a thousand geniuses who secretly looked forward to, and walked to an empty training ground in the city lord's mansion in a moment.

Empty training ground.

1000 people gathered together, and the black robe messenger stood in front of them.

"The 52 chaotic steles are now in the secret rooms, 12 of which are occupied, and the other 40 are empty." The black robe envoy rebuked the group of people in front of him, "Now, I will give out the names of these 40 chaotic steles..."

""Maternal Ancestor Chaos Monument"... "Wind Shadow Chaos Monument"... "Universe Chaos Monument"... " The black robe messenger quickly announced the names of forty Chaos Monuments in one go.

"Choose these 40 chaotic monuments, go directly to the leftmost entrance in front, and you will be arranged into each secret room." The black robe envoy pointed to the distance, on the left side of the end of the training field, it was nearly thirty high. Mi's entrance, "Now you go over."

More than 800 people, including Wang Yi and Bolan, all turned into a group of streamers and left. On the practice field of UU Reading www.uukanshu.com, more than a hundred young people including Luo Feng, Rong Jun, and Wuka looked at them eagerly. Leaving, I felt a little envious.

There are people in "Jiuyu Chaos Monument" and "Great Axe Chaos Monument".

They can only continue to wait for no one to enter the chaotic stele practice secret room.

Wang Yi and the others marched in a corridor that was about 60 meters wide and 120 meters high. On both sides of the corridor, they saw tall bronze gates, each of which was about 160 meters high. Approximately 120 meters, there are ancient writings on the bronze gates.

"Mother ancestor", "Great Axe", "Dragon Walk"... and in front of each bronze gate stood an old man with a benevolent face.

The weird thing is! Every old man in front of the giant bronze gate looks exactly the same.

Wang Yi knows very well that this is Kandri, the guardian of the chaos stele cultivation chamber, a cosmic Venerable who possesses the power of a clone, and his clone has been guarding these 52 secret rooms for a long time.

"You are here." The old man looked at them with a smile.

[Chapter 166: 7 days for others and 2 years for me](#)

The benevolent old man smiled and looked at these smug-faced young geniuses: "No need to be surprised, little guys, my name is Kandry, you can call me Lord Kandry, I am the guardian of the chaos stele practice chamber, this The 52 chaotic steles in front of the practice secret room... are actually one of my clones."

Wow!

A group of young people were shocked to look at the seemingly ordinary and charitable three-eyed elders in front of them, and it was the clone of the same person who guarded the 52 practice secret rooms.

"Master Candry." Over 800 people including Wang Yi saluted respectfully.

"Yeah." Kandry looked at these young guys with a smile, and said, "You are all talented newcomers selected by the Virtual Universe Company. Sure enough, I am full of vitality. Seeing you is like seeing the future of the human race. Hope, what chaos monument you choose, just go to the corresponding practice secret room."

More than eight hundred young geniuses respectfully said yes, and then scattered to various cultivation chambers.

Wang Yi, Bo Lan and other people who chose "Universal Chaos Stele" came to a huge bronze gate. On the ancient bronze gate that has existed for hundreds of millions of years, there are two universal languages called "universes", and the ancient gate is 120 meters high. People can't help but look up! Standing by the bronze gate was an old man with a vertical eye, who looked exactly the same as every other old man in front of the same door.

"Well, you are lucky, no one has comprehended "Universal Chaos Monument" now, so you can go in now." The old man standing at the door said with a smile.

"Boom..." The whole bronze door began to open slowly, and the chaotic air flow in the cultivation chamber was indistinguishable.

"go in."

The three-eyed old man said. "But you only have 7 days to comprehend in it. As soon as the time is up, I will call you out."

"Thank you, Lord Kandry." Wang Yi and a dozen other geniuses who had comprehended "Universe Chaos Monument" saluted the old man at the door, and then walked into the giant bronze gate one after another.

The cultivating chamber is very huge, and you can faintly see the chaotic air current surrounding a huge stone stele.

Wang Yi and others approached with excitement.

"This is the Universe Chaos Monument." A young man raised his head and muttered.

Wang Yi, like everyone else, raised his head and looked at the 100-meter-high and nearly 100-meter-wide Chaos Stele in front of him. There are ten pictures on it. On the edge of the Chaos Stele, there is also the lingua franca of the universe—"Universe". Each picture is exactly the same as the picture of "Universal Chaos Stele" seen on the corridor mural before, but the feeling is obviously different.

The first picture is the nine-star map, which is the nine meteors falling from the sky, and contains the nine simplest time and space mysteries.

The second picture is a picture of stars. A group of bright stars are scattered in the sky. If you look carefully, there are a total of 36 stars. In this picture, there are nine mysteries and more profound aspects of time and space. Twenty-seven mysteries of time and space.

The third picture is the Hundred Stars picture. A total of 108 stars are moving in the sky with unique trajectories. If you observe carefully, you will even feel that the whole sky and the whole world are moving... This picture includes the previous two pictures. The thirty-six mysteries and the more profound seventy-two mysteries.

The fourth picture shows a group of satellites orbiting the planet, and the planet is orbiting the star...

The fifth picture shows one star system after another, forming a bright starry sky...

The sixth picture, a piece of star field, gathered into countless stars...

The seventh picture is a peculiar existence of half human and half snake. It is coiled in a circle in a strange posture, just like a Tai Chi...

The eighth picture...

The ninth picture...

The tenth picture...

If Wang Yi can still see clearly from the first to sixth pictures at the beginning, and has some insights, and feels the origin road contained in it, then at the beginning of the seventh picture, he is a bit blinded, and he can only look at nothing. I can't even feel it.

Wang Yi understands that this is the reason why he is too low-level and has too little perception.

"If you can fully comprehend the seventh picture, then it is at least the realm of the Universe Venerable. It is normal for me to be unable to comprehend the level of artistic conception now." Wang Yi was not angry.

Although he does have an extraordinary talent for the law of origin of time, and the incomparable special life, the Void Zerg clone to cooperate with understanding, but the foundation is the foundation, it does not mean that he can do it overnight, like this kind of chaos that contains infinite wisdom and the highest source of origin. The stele can only be understood step by step in a down-to-earth manner.

"I have two avatars, plus the "Time Realm" accelerated by a hundred times. Seven days, it is two years. I don't know how much better than others. I must grasp it." Wang Yi took a deep breath, calmed down, and started. Comprehend the picture on the Chaos Monument in front of you.

The others had already sat cross-legged on the ground, quietly comprehending.

When Wang Yi watched the first picture "Nine Stars", the whole person's spiritual consciousness was completely immersed in it instantly, and the nine meteors developed infinite artistic conception in Wang Yi's consciousness.

You must know that Wang Yi has three bodies, because all three bodies have consciousness carriers. For example, the consciousness carrier of the people on earth is the soul in the sea of consciousness.

The consciousness carrier of the Yanxing Giant Beast is the soul in the pronucleus.

The consciousness carrier of the Void Zerg clone is the crystal nucleus in that body.

Because the three are one, and the consciousness is shared.

Therefore, Wang Yi saw that the other two bodies naturally located in the time realm were also equivalent to seeing them.

The mysterious time realm, even the primitive universe, or the Chaos City Lord who controls the time and space of one party, could not find its existence.

On the vast land filled with gray mist, the Void Zerg clones transformed into Wang Yi's human form shuttled like ghosts in the wilderness, and thousands of figures appeared... The behemoths of the flame star, like a huge mountain range, were also immersed in the opposite. In the perception of "Universal Chaos Stele", six blade-like claws pierced the void...

Wang Yi had previously purchased the "Galatian Knife Catalogue~www.mtlNovel.com~" which was created by a peerless genius who was born in the hundreds of millions of eras, and he learned about the basic secrets of the first three pictures of the cosmic chaos stele.

Wang Yi has been comprehending for three years, and now, through the mutual confirmation and connection with the three pictures on the cosmic chaos stele, he has a clearer and deeper understanding of the essence and mystery of the original laws of time and space!

Not to mention that there is the special life "Void Zerg" clone of the darling of the law of space origin to help him enlighten!

The time world is a hundred times faster! One hour has passed outside, and five days have already passed in the world of time!

This speed of comprehension is equivalent to a hundredfold increase!

Wang Yi eagerly absorbed the knowledge of these original laws and filled his own blanks in this regard. With his continuous insight into the "Universal Chaos Stele", his understanding of the original laws of time and space has become more and more profound...

The first picture, the second picture, the third picture...108 kinds of time essence mystery, 108 kinds of space essence mystery...all are constantly blending and lingering in his mind.

Time just goes by slowly.

[Chapter 167: Reward you 1 Chaos Monument](#)

"Gallery Knife Catalog" is based on the first three pictures of "Universe Chaos Stele" to analyze its essence and mystery and create a set of basic secret methods.

Although it is basic, the price in the virtual universe company's treasure house is as high as 80,000 points!

This is even more expensive than the secret method created by many immortal gods!

It can be seen that it is precious!

Even if it does not cooperate with the "Universal Chaos Tablet" to study and take it out separately, "The Galaxy Sword Catalog" is definitely an extremely precious secret method in the universe!

Among them, it is divided into 216 volumes of Knife Techniques, which are divided into two categories, "Time Chapter" and "Space Chapter", each with 108 volumes!

It is divided into three parts: upper, middle, and lower!

The upper part 1-9 volumes of the "Time" knife technique, the middle 10-27 volumes, and the lower 28-108 volumes correspond to the 9, 27, and 72 time mysteries of the first picture of the first three pictures respectively.

The upper part of the "Space" knife skills 1-9 volumes, the middle 10-27 volumes, and the lower 28-108 volumes correspond to the 9, 27, and 72 spatial mysteries of the first picture of the first three pictures respectively. .

Regardless of the "Time" or "Space" knife skills, the top 9 volumes are the easiest, the middle 27 volumes are more difficult, and the lower 72 volumes are very, very difficult to comprehend!

This also represents the difficulty in comprehending the 108 time essence and space essence contained in the first three pictures of "Universe Chaos Monument"!

Wang Yi also had to admire Kedi's geniuses! In this way, we can understand and penetrate all the essence of time and space in the first three pictures of "Universe Chaos Monument"!

If Wang Yi can master the "Time" or "Space" volumes 1 to 9 of "Xinghe Sword Catalog".

That represents the "Nine Stars Map", the first picture of "Universe Chaos Monument". It can be said that there is no secret in front of Wang Yi, and he has fully understood it!

But if he only mastered the first nine sets of swordsmanship in "Time" or "Space", it would only mean that he could only master the 9 time mysteries or 9 space mysteries of the first picture, and he could not reach perfection.

Regardless of the law of origin of time or the law of space origin, they are extremely profound.

Only then did Wang Yi realize that he had taken it for granted at the beginning, even if he got the sign-in panel from the Secret Realm of Dry Witch, the talent that is comparable to the darling of the law of time origin, and the space talent bonus of the very sky-defying Void Zerg clone... but the vast universe, The human race has never seen any genius in the endless years, but they can't fully comprehend these three pictures in a short time.

Although Wang Yi is tough, it is not necessarily superior to the geniuses of the human race in the longest river of time and space in terms of space talent or time talent.

Thinking of this, he completely dispelled his impatience, settled down, and immersed himself in the comprehension more attentively.

And "Time World" is his biggest advantage at this time.

Wang Yi has understood that it is quite good to be able to thoroughly understand the 9 time mysteries and 9 space mysteries of the first picture in seven days, that is, two years in the time world.

You know, even if Luo Feng in the original book possesses three bodies, he has only fully understood the first picture "Raindrop Diagram" in "Jiuyu Chaos Monument" in the 28th year of Chaos City, and mastered the 9 simplest spatial mysteries. , Past the fifth floor of the "Jiuyutong Overpass"!

But the first picture of "Universe Chaos Monument" contains 9 kinds of time and space origin mysteries at the same time, which adds up to 18 kinds!

In fact, if you enlighten it at the same time, it will be more than ten times more difficult.

In the early days of Buran's perception of the law of space, he was so perverted, he was not seriously hindered by the law of time, and he fell into this big pit and almost didn't climb out!

Wang Yi dared to try, one is because he has three bodies, and he has the talent of time and space at the same time!

Second, there is "Universe Chaos Monument" for him to comprehend!

Third, there is the acceleration bug of "Time Realm"! Others comprehend for seven days in front of the Chaos Monument! But he is two years!

The three advantages add up, and only then can Wang Yi dare to accomplish a feat that even if Buran has been in Chaos City for 33 years in reality, he could not achieve a feat in seven days!

Seven days! Completely understand the first picture of "Universe Chaos Monument"! This is also the small goal set by Wang Yi!

Wang Yi was immersed in the comprehension of the first picture. In Wang Yi's mind, the various mysteries of the "Universe Chaos Stele" evolved into a magical sword technique, or through the cosmic magic weapon. The weapon of thought power that contains the mystery of time and space and the profound meaning of "Universal Chaos Stele" is on display...

Although his main comprehension was the first picture, the second and third pictures still accumulated a lot of insights unknowingly!

Therefore, Wang Yi's perception of the true laws is not only the first picture.

Moreover, it is not enough to just understand it, you need to master the know-how to display its true power!

Only then did Wang Yi discover that the cultivation process of the Universe God Soldiers is a perfect match for the mystery of the "Universe Chaos Monument" that he has come to understand!

The process of comprehending "Universe Chaos Stele" is actually a process of cultivating cosmic warriors!

Law perception can only represent a basis! As for what level can be applied to the foundation! It depends on the individual!

In this regard, the cosmic warrior is simply tailor-made for "Universe Chaos Monument", seamless!

"Could it be that the creator of the cosmic magic weapon also practiced "Universe Chaos Stele"?" Wang Yi had such a guess in his heart.

However, Wang Yi was very happy about this unexpected joy.

"Well, the knife technique of "Galatian Knife Catalog" allows the Void Zerg clone to use it in close combat, and the cosmic magic weapon can be used by my human deity. Of course, the Void Zerg clone can also use the magic weapon, but its biggest advantage is melee!" Wang Yi is very clear about his three physical advantages.

Time passed quickly in the crazy practice of Wang Yi's three bodies, but Wang Yi and the others who were immersed in the practice didn't notice it.

In a blink of an eye, seven days passed.

"Boom..." The bronze giant door opened suddenly, but the people in the practice secret room were still obsessed with comprehension and did not wake up.

"Come out!" A voice came in, directly in everyone's mind and it kept echoing, getting louder and louder.

Whoosh, whoosh, whoosh...

The people in the secret room couldn't bear the magic sound, and they quickly rushed out of the secret room. The sound disappeared in an instant, and they were relieved.

"how?"

"Is the time up?"

"So fast!"

The people who were still immersed in the practice experience just now were a little reluctant.

Wang Yi glanced back at the slowly closing giant bronze gate, with some regrets, but...

"The first picture of the Cosmos Chaos Monument, a total of 18 time and space essences, I have thoroughly understood!" Wang Yi's mouth slowly conjured up.

"Plus the cosmic magic weapon! The sword technique! If you confront Bolan again, you will never defeat him as hard as a genius war!"

Wang Yi was in a very happy mood~www.mtlnovel.com~ He suddenly remembered something.

"By the way, there is still sign in."

In these days, he has been immersed in the original law of the chaotic tablet, and has forgotten to sign in.

"My dear son, come out, daddy, I'm coming to see you again." Wang Yi said with a grin in his heart.

Sign-in panel: "....."

"Sign in!"

[Ding, congratulations to the host for signing in successfully, and reward a 'Chaos Monument' (you can choose any one).]

[The selected 'Chaos Monument' will be placed in the panel space, please activate it.]

【Number of check-ins available for this place: 0】

Wang Yi: "..."

Damn it! ! !

[Chapter 168: Ready to guard against the sky](#)

[Ding, congratulations to the host for signing in successfully, and reward a 'Chaos Monument' (you can choose any one).]

[The selected 'Chaos Monument' will be placed in the panel space, please activate it.]

【Number of check-ins available for this place: 0】

When this news appeared in Wang Yi's mind, he was unbelievable the first time.

Has the Chaos Monument been rectified for me?

Son, are you serious?

"I want the Universe Chaos Monument." Wang Yi said subconsciously.

The sign-in panel flashed golden light.

Wang Yi quickly looked at the space grid under the sign-in panel again. Sure enough, there was a primitive stone stele with chaotic air lingering there, with ten pictures on it, and on the edge of the chaotic stele there was the lingua franca of the universe—"Universe", and I saw exactly the same thing I saw in the practice secret room before.

After Wang Yi confirmed, he couldn't help taking a breath.

The Chaos Monument is really rectified!

Son, you are so awesome! ! !

Wang Yi's mood at this time is a bit indescribable.

The chaos stele contains the cultivation avenue. There are only 52 chaos steles in the entire Chaos City. Each chaos stele is unique. It can be seen that it is precious...just like the "Secret Code of Nine Tribulations", it creates a statue that can guide others. The cost of taking the initiative to comprehend the original law of the chaos monument is bound to be huge and unimaginable. If it could be made more, the human race would have done it a long time ago.

Every time the opportunity to comprehend the Chaos Monument is very precious. Except for the new talents who came to Chaos City for the first time by the five major forces, everyone else who wants to comprehend the Chaos Monument must go through the sky bridge and cross the first floor to get an insight. Opportunity, only seven days at a time.

As for the Tongtianqiao, the more difficult it is to pass through the barriers towards the back.

The tenth layer represents the perception of the law of having ordinary immortal gods!

The 15th floor is the immortal level of Fenghou.

The 18th level is the level of immortality of the king.

The 21st floor, Lord!

And even if you can get through the 15th floor, you will only get 15 enlightenment opportunities, a total of 105 days of enlightenment time, and that is already the immortal level of Fenghou!

Even the five pinnacle forces of mankind, such as the Virtual Universe Company, can achieve immortality, it is already rare and precious.

But now, Wang Yi got a real chaos stele that only belonged to him.

This is going to spread, I don't know how many people are going crazy.

Thinking of this, Wang Yi felt cold on his scalp and immediately made a decision.

"This Chaos Monument cannot be taken out in Chaos City. Even if it is a prokaryotic world, one world will not work... it must be placed in the 'Time Realm'!" Wang Yi made up his mind.

too frightening!

If someone else knows that he has a chaos monument, it is estimated that the peak powers of the entire human race will come to him to "talk" in the next moment, and then study him from the inside out!

That kind of result is unacceptable to Wang Yi.

Lao Tzu keep on going!

...

Suspended in the void, the mysterious land surrounded by grey mist, huh—a huge stone tablet suddenly fell from the sky and crashed on the ground, filled with smoke and dust, and a fiery red streamer flew over and turned into a huge mountain-like mass. The dark red behemoth spreads its blade-like wings on its back, covering the sky and obscuring the sun, with fire shining into the sky, like a fiery red meteor, wherever it passes, it brings out a long tail flame, as if the void is burning.

In the other direction, a shadow kept flickering ghosts and charms, walking a distance weirdly every time. After not knowing how many flickers, it instantly came to this chaos stele, revealing the avatar of the Void Zerg clan in silver armor.

One of the two avatars overlooked and the other raised their heads, both looking at this chaotic monument full of endless mysteries with an expression of excitement and joy!

"Universe Chaos Monument!"

"Ha ha ha ha....."

"With it, plus the realm of time, if my two clones can advance to the realm master, relying on the realm master's ability to perceive the law..."

"The speed at which I perceive the law is definitely against the sky!"

Wang Yi's eyes are getting brighter!

It can become the treasure of the Chaos City, the treasure of the entire universe human race, one of the "Universe Chaos Monument" is indeed infinite, and the aura rules contained in it can unknowingly guide others to enlighten and improve!

Because of its preciousness, there are many people who come to enlightenment, so it is limited-the first time you come to Chaos City, you can have an opportunity to enlightenment. As for the future, you have to rely on your own understanding. Limited resources!

But now, Wang Yi can have a chaos monument that belongs only to him and can be understood anytime, anywhere!

In addition, the time realm can be accelerated a hundred times the time at present, one year is equal to one hundred years, and the 33 years of Chaos City is three thousand three hundred years!

Three thousand three hundred years to comprehend the Chaos Monument!

Moreover, in the time world for 3,300 years, the two avatars will advance to the world master no matter what!

The realm master is the fastest time to comprehend the law of origin!

Multiple stacking!

Each one is extremely against the sky!

What an amazing effect will it have? Wang Yi couldn't even imagine.

...

And beside the huge bronze door in the corridor, after Wang Yi, who had just come out of the cultivation chamber, the guardian Kandry smiled and said, "You are the first time you have entered the cultivation chamber. I remind you...you should find a place to be yourself now. After 30 years of cultivation residence, then you will enter the virtual universe and apply to enter the "Tongtianqiao."

Tongtianqiao? Many other geniuses were puzzled, but Wang Yi, who knew what was going on, nodded secretly.

Except for the geniuses like Wang Yi who entered the cultivating chamber of the Chaos Stele of the Universe, other geniuses also came out of their cultivating chambers one after another. Seeing their expressions, they were a little unwilling.

If Wang Yi had the same mood as them just now, but now he secretly smiled in his heart, brother now has a chaos monument.

After walking out of the city lord's mansion, Wang Yi and the geniuses scattered directly and began to find a place for cultivation.

"Wang Yi..." the white-clothed young man, Beran, stared at Wang Yi's distant figure, clenching his fists, "I am confident that I can take a step forward this time to comprehend the Chaos Monument. you."

Burlan left with confidence.

Chaos fog lingers, a black-haired teenager is walking on the vast streets of the ancient and magnificent Chaos City.

Chaos City occupies a very large area. Except for a few special buildings, the practice residences are almost identical, and the "doors" of most practice residences are pale white~www.mtnovel.com~ This means that the practice residences are still There is no owner.

"Where do you choose to be your residence for the next 30 years?"

Wang Yi stroked his chin and thought.

"Wang Yi!"

At this time, a clear voice came, and Wang Yi looked away and saw "Qianshui" and "Ai Chen" flying over together.

"Qianshui" opened his big watery eyes and said with a grin: "Are you looking for a place to live? Do you want to be together, let's be neighbors?"

The ethereal eyes of the beautiful girl "Ai Chen" who was dressed in white feather clothes and seemed to not eat the fireworks in the world also looked over.

"..." Wang Yi hesitated for a second, then shook his head decisively.

"No, I like a person!!!"

Qianshui: "..."

Ai Chen: "..."

[Chapter 169: Tongtianqiao](#)

After Wang Yi and Qianshui Aichen separated, Shi Shiran alone found a place far away from the center of Chaos City—that is, the City Lord's Mansion, a relatively remote and quiet unmanned practice residence. After that sudden induction, he felt positive in his heart. The inscrutable Chaos City Lord in the legend is really a little dazed, choosing this position is also to make him feel at ease, although perhaps this is just a psychological comfort.

After dealing with the problem of his own residence, Wang Yi chose to enter the virtual universe network.

Virtual universe, Manor No. 114, Yuxiangshan Primitive Zone.

"call!"

Wang Yi appeared in the manor.

"His Royal Highness!" A group of nearby servants, the guard hurriedly saluted.

Wang Yi waved his hand.

"Apply to enter the Tongtianqiao."

"Yes, master."

The fist-sized virtual assistant "Bermuda" on Wang Yi's shoulder waved his paw, and immediately began to contact the virtual universe general system to send out an application.

Soon, an electronic voice sounded in Wang Yi's mind: "Identity confirmation, Wang Yi, you are permanently eligible to enter the Tongtian Bridge. I hope you will work hard to reach the end of the Tongtian Bridge. Send now!"

brush! In the next moment, Wang Yi disappeared directly from the manor.

Virtual universe, a special plane space.

This surface space is an endless ocean, and the sea is surging.

And there is the only beautiful island in the ocean. There are a total of 52 ports on the edge of the beautiful island. Each port has an endless long bridge extending towards the end of the sky and the earth...

Wang Yi suddenly appeared on the square in the center of the island.

"what?"

"Sura?"

"Wang Yi, you are here too."

A large number of people have gathered on the square at this moment, and many newcomers who have just come out of the city lord's mansion and found a home for cultivation have arrived at the surface of Tongtianqiao in the first time.

And not far from the square stood a genius and a few geniuses who had just appeared explaining the situation. The man in the black star robe had four ears but no nose. Wang Yi knew that he was the guardian of the Tongtianqiao plane. Fen.

"By the way, Wang Yi, Buran came here just now," said a beautiful girl with long blond hair and a gap between her eyebrows.

"Huh?" Wang Yi turned his head.

"Yes, he just entered the Universe Tongtian Bridge, not long before you came here." said another demon young man with vertical pupils with fish scales on his face.

"Wang Yi, you also came to cross the sky bridge, right?" Another genius couldn't help but leaned over.

Excluding Luo Feng, Wang Yi and Buran are recognized as peerless geniuses born every tens of millions of years. Among these thousand people, they are the strongest in talent and strength, and they belong to the existence that others can only look up to.

And they were also very curious. When they came to Chaos City, Wang Yi and Buran, two extraordinary super geniuses, would gain an advantage and overwhelm each other.

Wang Yi just smiled, "Since Buran has entered, then I will wait."

The plane of Tongtianqiao was created for 52 chaotic monuments in Chaos City.

Over the long years, countless people have cultivated 52 Chaos Monuments, and 52 genres have been formed in Chaos City.

The 52 Tongtian Bridges correspond to 52 chaotic monuments. Wang Yi and Bolan were the ones who comprehended the cosmic chaos monuments, so they went to 'universe bridges'.

Break through the flyover, the farther you break, the stronger your strength!

Every time you reach one more level, you will get a chance to enlighten! Only seven days at a time!

So every opportunity is precious!

And during this time, Wang Yi also discussed with other geniuses. Because Wang Yi is strong, talented, and destined to be great in the future, most geniuses are still willing to talk to him.

Through the conversation, Wang Yi learned that the Tongtian Bridge is difficult to break through. Before these young geniuses who had just arrived in Chaos City, some people tried to break through, but without exception, none of them passed and all failed!

Even the first floor did not succeed!

After a while, Phew, a cold young man with long white hair and white clothes carrying a blood sword appeared beside him, and everyone looked at him.

Grim Reaper "Bran"!

Once hailed as the undisputed first place in this session! Peerless genius born every tens of millions of years!

However, Wang Yi encountered a slippery rail and was abruptly defeated by Wang Yi by a slight gap!

This seriously stimulated Burlan's self-esteem!

"Wang Yi!" Buran looked at the black-haired boy in the crowd for the first time, with a bright light in his eyes.

Guardian Bafen said with a smile: "This little guy named'Bolan' is good. He just crossed the first and second floors of the bridge in one breath. It is the best performance among you newcomers."

"Wow!"

The guardian Baffin's words caused a slight uproar in the surroundings.

Second floor!

How difficult the first level of the Tongtian Bridge is, these supreme geniuses have known for a long time, no one has been able to pass the first level yet!

But now, Burlan has broken through the second floor at once!

This is the gap!

All the super geniuses feel a powerful pressure invisible!

Except Wang Yi!

He looked at the white blood sword youth faintly, then leaned slightly to the guardian Bafen, and said, "Guardian Lord, I want to cross the sky bridge of the universe."

"Wang Yi, I have heard your name. In this genius battle of Virtual Universe, you and Buran are the best talents. Of course, this doesn't mean anything." Guardian Bafen looked at him with a smile. "I look forward to your performance, go, there is no one at the Tongtian Bridge, you can go in."

Wang Yi turned around, and under the quiet gaze of other people in the square, it turned into a stream of light in Buran's piercing eyes, and flew directly to a far-reaching Tongtian Bridge that stretched to the end of the sky. He saw that Tongtian Bridge from afar. There is a stone tablet in front of it, and the word "universe" is on the stone tablet.

It wasn't until Wang Yi's figure was hidden in the white mist on the bridge deck that the crowd began to talk.

"You said, Wang Yi's first time traversing the Cosmos Tongtian Bridge, how many floors can he reach?"

"Wang Yi's strength was about the same as Buran three years ago, and it is estimated to be at least the first level, with a high probability of being the second level."

"The gap is so big, we are so reluctant even on the first floor, they can all make it to the second floor."

"So you have to work hard and can't lose to them."

"Yes, in Chaos City for more than 30 years, it is an opportunity for all of us ~ www.mtlnovel.com ~ being behind now does not mean that we will also be behind in the future!"

...

The Tongtian Bridge stretches until the end of the sky and the earth, with misty white mist entangling, and the sea waves below.

After crossing the Tongtian Bridge, Wang Yi received an email from the Virtual Universe Company describing the rules for rewarding points.

But Wang Yi already knew about it, so he didn't pay attention to it.

"Even if it is 10 times the points, it is still too little..." Wang Yi is still eager for points now.

He has wealth and funds, but he has few points, and he wants to exchange points with the virtual universe company to get immortal gods, otherwise he has to trade privately with other people who have points, which is too troublesome.

"The first time, let's see which floor can be reached!"

Wang Yi's eyes were bright, and his figure flew quickly across the wide bridge with white mist and waves.

[Chapter 170: Wang Yi breaks through](#)

"Choose your opponent, you can choose the martial artist, the spiritual master controller, the spiritual master illusionist, choose an opponent at will, and defeat your opponent by passing the first floor of the Tongtian Bridge."

In front of Wang Yi, there was a huge cloud and mist, and a sound came out from the mist.

Wang Yi wears a dark red jersey with two knives on his back, standing in the air, smiling indifferently: "I choose...the one who is in charge of the spiritual master."

call! A group of black liquid flew out of the clouds and mist immediately. The group of black liquid changed in mid-air and condensed into a mysterious figure with a black mask. This mysterious figure stood on a silver giant sword, and Wang Yi was very familiar with it suspended behind it. His cosmic warrior had a pair of deep eyes staring at Wang Yi, and said indifferently: "Challenger, defeat me, and you can pass this level."

"Clang--"

Wang Yi didn't use the "Universal Weapon" to confront the enemy, but slowly pulled out the two war knives behind him. The wide and long, streamlined blade of the Long Yan war knife was flowing with dazzling brilliance along with the action.

"Kill!!!" The black mysterious figure groaned, and the mind-powered weapon rushed forward. At the same time, a silver-gray streamer flew from the crystal shuttle behind it, shooting wildly towards Wang Yi from all directions, every streamer speed. Unbelievable fast, and faintly fluctuating in space.

"Huh? Why didn't even the first layer condense?" Wang Yi moved in his heart and raised his saber indifferently. With a movement, he faced the mysterious black figure.

A fiery red air current erupted from Wang Yi, and thousands of phantoms appeared at the same time!

Like a locust, it rushed to the mysterious black figure in the center from all directions.

The black mysterious figure changed color slightly, and without hesitation, he controlled the silver giant sword under his feet, and quickly retreated, while controlling the crystal diamond pieces that were as thin as cicada wings to attack those phantoms that were close to him.

At this moment, a phantom body was slightly distorted and disappeared, and at the same time, a figure of Wang Yi appeared behind the mysterious figure in the black mask like a ghost. He raised his head and smiled slightly, and he was unceremoniously chopped down by the double sword thunder.

The pupils of the mysterious man in the black mask shrank and roared, and a silver light flew out of the "Universal Soldiers" again to rush towards Wang Yi. At the same time, he also displayed the phantom body, and there were also thousands of phantom bodies densely scattered all over the place. In this space.

"Cut!" But Wang Yi didn't even look at it. He didn't care about the numerous phantoms that kept flying and dodge. Instead, he still strangled a mysterious man with a black mask nearby with two swords.

"Peng!" The silver giant sword attempted to stop it, but Wang Yi split it open with a slash. The light of the sword fell like a waterfall, tearing open the body of the mysterious figure in the black mask.

The mysterious figure in the black mask was cut to pieces by Wang Yi!

The victory is divided!

Wang Yi watched the mysterious figure in the black mask turn into black liquid again and flew back into the clouds, with a faint smile on his face.

With the help of the world of time, Wang Yi has not only understood the most basic 9 time mysteries and 9 space mysteries, but also laid the most solid foundation for the "two years" of the chaos monument. Using, for example, three kinds of spatial mysteries can be combined into one attack, four, five, six...Nine spatial mysteries are merged into one, forming a cycle, and it is considered a completeness.

The time is the same!

Time and space are combined with each other, the combination... then it is even more complicated!

Even today's Wang Yi, even if he understands the 18 mysteries in the first picture of the Universe Chaos Stele, he cannot perfectly blend them together! It's almost time to fire!

Even so, Wang Yi can use this foundation to exert all the power of the first form of the cosmic magic weapon, and even perform the second 'meteor flash'!

Enlightenment of the Law of Origin! For example, understand the mystery of the 18 nature of time and space!

Mode of operation! For example, combining the essence of time and space alone, or fusion with each other, or into the cosmic magic weapon... the effects are all different! It can also be called a secret method! stunt!

The two complement each other to give full play to the combat effectiveness!

Wang Yi's melee ability has been continuously tempered through the clone of the Void Zerg, and it has reached a very terrifying level!

That's why we can defeat the gatekeepers on the first level simply and neatly.

"...This first-tier gatekeeper can actually use thousands of phantoms. It is estimated that the strength is about to approach the peak genius of Beran." Wang Yi muttered. "With this difficulty, it's no wonder that Beran can only get through the second layer of the Universe Bridge."

"But Beran wants to make it through the third floor, it seems it will be eight months later."

"Let me see how difficult the third layer is."

Wang Yi looked towards the entrance of the second floor cheerfully.

The clouds and fog in front of him have dissipated, and a second-level Tongtian Bridge appeared, leading directly to the top.

Wang Yi turned into an afterimage and flew into the second floor.

...

The second floor of the Universe Bridge.

"I choose the one who is in charge of the spiritual teacher!" Wang Yi said calmly.

It was still a cloud of black liquid flying out of the huge cloud and mist, and the black liquid quickly condensed in mid-air into a mysterious person wearing a black battle suit and a mask. He stepped on a silver giant sword, and behind him was still a "cosmic warrior", and The gatekeeper on the first floor looked exactly the same, but Wang Yi could feel the stronger aura in him.

"Kill!" The two did not talk nonsense, they fought directly!

"Om~~" A strange wave was uploaded from the crystal shuttle behind the mysterious man in the black mask. The origin law of time fluctuates, and the origin law of space fluctuates at the same time by a magical force. Streams of light are arranged in mid-air quickly. Silk Xuan'ao silver-gray rays are connected together to form a misty crystal long sword.

"The first weapon of the universe, the Aurora Sword?" Wang Yi was startled.

But then he breathed a sigh of relief. "Fortunately, it's just a combination of any rule, not a perfect fusion, otherwise it will be a little troublesome."

"Go!" The black masked mysterious man who controls the Aurora Sword doesn't care about Wang Yi's reaction ~www.mtlnovel.com~ points to Wang Yi far away.

And the "Aurora Sword" floating in front of him shook and disappeared directly, looming in the air at an incredible speed, rushing towards Wang Yi.

"At this level, I'm not afraid of you!" Wang Yi sneered, and the "cosmic warriors" floating behind him flew into a dense stream of light, which quickly combined into an identical "streaming sword", forming faster than a black mask. Mysterious people are much faster.

when! when! when!

The two crystal swords met in mid-air, and then they kept colliding frantically!

In just an instant, it collided hundreds of times, and the "Aurora Sword" of the mysterious man in the black mask was shattered and scattered into pieces of crystal diamonds!

"What?" The face of the mysterious man in the black mask changed suddenly!

The next moment, a sword light pierced his forehead!

Wang Yi, cross the second floor of the Universe Bridge!
