

## A God 171

### [Chapter 171: Baffin's shock](#)

On the plane of Tongtianqiao, in the central square of the beautiful island, Bafen, a strange man with four ears in a black robe, had a strange color in his eyes.

"Wang Yi actually crossed the second floor of the Universe Bridge."

"Moreover, it seems that there is still more energy left."

As the guardian of the Tongtianqiao plane, he naturally pays attention to the situation of those who pass through the barrier.

"In this session of the Virtual Universe Company, there are two geniuses who can break through the second level for the first time. It seems that the quality of this genius is far more than the previous dozens." Baffin thought.

"Wang Yi has already gone to the third level, but the third level is much harder than the second level. Even if it is Wang Yi, it is impossible...what?" Bafen's expression suddenly changed, as if he found something incredible. Things, a hint of shock appeared in the eyes.

The third floor of the Universe Bridge.

Wang Yi stepped on the red moon disk, manipulating a beautiful aurora, and fighting with a man in black not far away who was also stepping on a thought-power weapon and manipulating the "Aurora Sword".

The sky's sword energy is vertical and horizontal, and the intense spatial fluctuations continue to oscillate like ripples centered on the collision point.

Compared with the mysterious man in the black mask on the second layer, the control ability of the man in black on the third layer is undoubtedly many times stronger.

The first "Aurora Sword" of the universe's magic weapon was superbly made in his hands, as if he had come alive.

Wang Yi is an eye-opener and has learned a lot.

"Haha, interesting, interesting..." The hearty laughter came from the sky, making the black man glared.

Wang Yi stepped on the red moon disc, with an aura like a rainbow, condescendingly looking down at the man in black, smiling and saying: "It's because you have shown me more ways to use the Aurora Sword. I'll give you a joy."

brush!

More silver-gray streamers flew out from behind Wang Yi, and the secret patterns on the crystal lozenge shone brightly, moving time and the original law of space. The mysterious silver-gray lines were connected together to quickly outline a misty crystal sword. appearance.

Wang Yi stretched out his finger, pointed at the man in black who had changed face on the other side, and whispered, "Go!"

laugh!

The Aurora Sword quietly jumped out, bringing out a beautiful and dreamy Ambilight, full of murderous flying towards the man in black.

The man in black had a solemn face, while he controlled the Aurora Sword and Wang Yi's Aurora Sword, on the other hand, he controlled other Mind Force weapons in an attempt to prevent the second Aurora Sword from approaching.

But with a huge gap, he just struggled for a while, and he would kill with the Aurora Sword!

Wang Yi smiled slightly. He is now the first-order human deity of the universe, but the two clones are both domain masters. I don't know how much consciousness is stronger than the first-order universe. It's easier to control mind weapons, plus the sense of the original law. Going to the third level is completely devastated.

The third pass of the Universe Bridge, successfully passed!

The news of Wang Yi's successful passage of the Universe Bridge was naturally immediately known to the guardian of the plane, Bafen, and he was immediately surprised by the news.

"Wang Yi actually broke through the third floor?"

Baffin was really taken aback.

"Wang Yi continues to go to the fourth floor."

The difficulty of the bridge is a threshold for every three levels, such as 1—3, 4—6, 7—9...So from the third level to the fourth level this big level. It's hard to break through.

As for the new talents who came to Chaos City in the past, it is rare that they can pass the sky bridge for the first time and pass the first level.

The reason why Buran was able to break through the two floors in one breath was because of his enchanting, he himself was an extraordinary genius of the human race once every tens of thousands of years.

Like other young geniuses, it can't be done. Even on the first floor so far, no one can pass.

But Burlan is so powerful, not only does it stop at the third level, but it is also difficult to break through in a short period of time.

After such a comparison, you can see Wang Yi's abnormality!

"How is it possible? How did he do it?" The guardian Bafen was a little puzzled. As the two best geniuses of the Virtual Universe Company this year, Baifen and Wang Yi have known about their information. According to Pinnacle In the performance of the genius battle, although Wang Yi won Burlan, it was also very difficult. There were some elements of luck. In essence, the strength of the two people should be almost on the same level.

But now that three years have passed, Buran has broken through the second floor, but Wang Yi has broken through the third floor, and looking at him, he doesn't seem to feel the pressure.

This rate of improvement is a bit incredible! It is incomprehensible.

If Wang Yi and Buran were on the same level before, then Wang Yi is now ahead of him and is pressing on Buran.

"Interesting, what a pleasant surprise." Guardian Bafen has already focused all of his attention on Wang Yi.

"It seems that many people in the Virtual Universe Company are very interested in Buran and Wang Yi." The guardian Bafen suddenly thought of something, and then sent out many emails.

On the Universe Bridge, the first three floors are surrounded by clouds and mist, and when it reaches the fourth floor, it becomes a high-altitude wind roaring. Wang Yi stood on the bridge and watched the tornado ahead.

The spinning tornado made a sound: "Choose the warrior, the master, the illusionist, choose one, defeat the opponent, and you can enter the fifth floor."

"The master!" Wang Yi said calmly.

"Chichi..." A lean man wearing a silver suit, silver boots, and a silver mask flew out quickly in the tornado. He stepped on the silver giant sword, and a long silver-gray crystal shuttle was suspended behind him.

"Being at the cosmic level, the first time you pass the sky bridge, you can make it to the fourth floor. You are excellent." The silver masked man said coldly: "Defeat me, you can enter the fifth floor, but you won't have a chance. of."

"Really?" Wang Yi also smiled slightly.

boom!

boom!

A fierce and violent red air current erupted from the two people at the same time.

The Tongtianqiao is customized according to the characteristics of each passer, and the guards use the same genre of weapon secrets as the passer.

A large amount of silver-gray streamer flew out from the long crystal shuttle, and a total of 324 diamond-shaped crystals were suspended in the air. The complex secret patterns on the crystal projected a large number of silver threads, densely packed light threads flowing, and tens of thousands of silver and gray that contained the power of law. The silk threads were connected to each other, and finally shrank fiercely, and solidified into an extremely solid, shaped like a spindle with pointed ends and a round center.

The second form of the universe magic weapon-meteor flash.

Seeing this scene, Wang Yi's face sank and he didn't dare to neglect. Also, countless silver-gray streamers flew out behind him, like a beautiful firefly, quickly forming a spindle-shaped crystal in front of him~[www.mtlnovel.com](http://www.mtlnovel.com)~ boom! "

"boom!"

The two spindle-shaped crystals moved instantly, driving the power of the entire space, as if two heavy meteors shot out as fast as lightning. In the process, their speed was integrated with the power of the law of time. Stopped soaring, the speed reached its limit, bringing terrible power, and the two meteors finally crashed together.

As if a big rock was dropped in the space, violent ripples were splashed!

The mysterious man in the silver mask snorted and took a step back.

The meteor crystal he controlled was also deflected a bit by the impact.

Wang Yi is not necessarily better than the slender man with the silver mask, but he has the bonus of law perception and consciousness, which is purely overpowering.

In the frightened eyes of the thin man with the silver mask, the meteor smashed his head like thunder.

The fourth floor, pass!

#### [Chapter 172: The shocked Berran](#)

When Wang Yi crossed the fourth floor of the Universe Bridge, many immortal kings had arrived on the beautiful island in the sea.

A terrible pressure of will quietly permeated the island, making the geniuses who are still waiting for the result of Wang Yi's breakthrough to feel extremely heavy pressure, and their faces pale as if they were out of breath.

This is the natural aura that those super powers did not target them.

Compared with these immature young geniuses and those great immortal gods who have stood in the universe for a long time, the gap is too far away.

However, the immortal kings did not pay attention to these new talents. At this moment, they had all focused their attention on Wang Yi who had crossed the sky bridge.

These are the immortal kings of the Virtual Universe Company, or the sect masters of the cosmic genre who submerged in Chaos City. After receiving the news that a good seedling of the cosmic genre appeared in the universe, they all rushed over happily. .

"Keiber? Are you not in the Samur River area in the Zerg territory? Why do you have time to come here to blend in?" A tall and burly man who is more than four meters tall and has two dragon horns on his head, with a temperament like a sword. The sharp and strong man couldn't help but look at one of the men in the purple armor and said.

"Haha, the war in the Samur River region has been calmed down. We have just received the order and are ready to come back." The purple armored man with six black wings and a mysterious atmosphere said with a smile, "Sword Dragon King, didn't you say Are you going to be closed for a million years? I remember that more than 300,000 years have passed, why did you come out?"

The strong man in Longjiao snorted: "How do I want to retreat and I'll leave it to you?"

These super beings that appear right now come from the five major forces. They are all capable of passing through the eighteenth-story bridge. They are all invincible existences in the immortality, and they are all qualified to open up sects in Chaos City!

Chaos City is a sacred place for cultivation of the entire universe human race. There are 52 major genres, and in each genre, there are many strong people who create some sects.

And the "suzerain" who can be recognized by the city lord's mansion and qualified to create a sect is at least able to break through the 18th floor!

The "Sword Dragon King" from the Virtual Universe Company, the "Black Wing King" from the Giant Axe Fighting Ground, the "Nine Tail King" from the Universe Galaxy Bank...

These super-existences who are above the top, it is difficult to see one side on weekdays, are gathered together because of Wang Yi.

Originally, they came with anticipation, but now they saw Wang Yi rushing through the fourth floor, and they couldn't sit still.

"The talents of our Virtual Universe Company, what are your other forces doing here?" Sword Dragon King coldly snorted.

An old man with white hair and white beard with a kind eyebrow and beard smiled and said: "Sword Dragon King, what you said is wrong. The five powers are one family and all belong to the human race. Since it is rare to have a peerless genius, of course you must cultivate it. You are a melee. Martial artist, the path is not suitable for Wang Yi. I think my spiritual master's path is more suitable for teaching this little guy..."

"Damo! You fart!" The Sword Dragon King had a grumpy temper and immediately said in a rage. "Your Universe Mercenary Alliance also wants to intervene in the internal affairs of our virtual universe company?"

The geniuses of the virtual universe company nearby saw this scene, they were all dumbfounded, and their hearts were even more shocked.

These great beings, who know that they are terrifying and immortal gods at a glance, are actually robbing Wang Yi and want to accept him as a disciple?

Guardian Bafen glanced at these unknown young geniuses. He hadn't told these little guys about Wang Yi's passage, so they didn't know that Wang Yi had already passed the fourth floor of the Tongtian Bridge.

Ba Fen thought for a while, and felt that sooner or later Wang Yi had to let these little guys know about Wang Yi's entry, and it wouldn't hurt to tell them now.

So Bafen opened his mouth to them and said: "I'm telling you a piece of news that Wang Yi has already passed the first to fourth floors of the Universe Bridge in one breath."

Hearing what Baffen said, many geniuses suspected that there was a problem with their ears.

Many people even exclaimed: "Fourth floor?"

"impossible!"

"How could Wang Yi break through the fourth floor all at once? This is the first time he breaks through!"

"Even Bo Lan just crossed the second floor of the Universe Bridge! How could Wang Yi do it?"

Many people reacted fiercely.

No wonder they were so shocked.

You know, that is the fourth floor!

Among this group of people, apart from Wang Yi who is still crossing the sky bridge, only Bolan can cross the first floor, and none of the others!

All failed!

But Buran is so strong, he just passed the second level!

So when they heard that Wang Yi was able to pass the fourth floor of the Tongtianqiao, they subconsciously chose not to believe it!

This is impossible!

The face of the white-clothed young man Beran who was standing alone in the corner also changed.

He didn't believe it either!

but...

Bafen is the guardian of the Virtual Universe Company on the plane of Tongtianqiao!

Naturally, his words cannot be false.

So the only truth is that Wang Yi really passed the fourth floor of the Tongtian Bridge!

Beran felt his heart suffocated, and his heart was disturbed. There was a thought over and over in his mind—Wang Yi, how could he do it!

Guardian Bafen looked at these unbelievable geniuses, shook his head, and looked at the controversial immortals next to him. After seeing Wang Yi's aptitude and potential, these big men seemed to see Like \*\*\*\* sharks, each one with red eyes refused to let go, and they were all arguing about who Wang Yi should be his disciple!

This kind of peerless genius of the cosmic genre that has been born for hundreds of millions of years, no sect is willing to let it go easily, and all want to be included in the school! Teach well, maybe in the future it will be an immortal king, and there may even be some who may become a cosmic master!

Guardian Baffen stared at the screen, but muttered in his heart, with the talent that Wang Yi's little guy now shows, I am afraid that many ancient existences will be attracted.

"Wang Yi was a constant star three years ago, and now it is only a cosmic first-order. I checked the information about his genius warfare again. At that time, his level of law perception was far lower than it is now. It was like changing a person. It was really terrifying." Guardian Bafen sighed with emotion.

Compared with the number of floors that Wang Yi rushed through the sky bridge, UU reading www.uukANAnshu. Com perhaps his talent and speed of progress are what attracts these super existences the most.

If this kind of genius does not fall, the future is destined to become an extremely terrifying super power in immortality!

There are no fools who can live to this point. How can they not see it? Therefore, the immortal kings of these various forces all intend to accept Wang Yi as their apprentice.

"Huh?" Guardian Bafen's expression changed.

"Wang Yi has passed the fifth floor!"

He said these words, not only those immortal kings, but also the many geniuses in the square, they heard clearly.

The scene suddenly fell silent.

But the originally silent Buran seemed to have received heavy punches invisibly. He stepped back uncontrollably, clenched his fists, raised his head, and looked in the direction of the Universe Tongtian Bridge, his eyes filled with shock and inconceivability!

"Wang Yi!" Buran was in a trance, feeling a real sense of powerlessness for the first time!

#### [Chapter 173: Lords](#)

The sixth floor of the Universe Bridge.

The position of the Tongtian Bridge is lifted all the way up, the higher the number of layers of the bridge, it will extend to the depths of the sky, reaching the sixth floor, close to the clouds.

The third floor of the Tongtian Bridge is considered a threshold, and the more difficult it becomes as you go back! 1-3 floors, 4-6 floors, 7-9 floors...

In the original book, Buran was on the sixth floor in Chaos City, but for the next 80 years, this peerless genius "Bolan" has been working hard, but he has never succeeded in breaking through the seventh floor of Tongtianqiao! This shows that the seventh floor is very difficult!

Even if Luo Feng has been in Chaos City for more than 30 years, he is only on the fifth floor!

It is enough to see that Wang Yi can reach the sixth floor in Chaos City for seven days, how amazing it is!

Wang Yi is now comprehending the "Universe Chaos Monument" and has thoroughly understood the first picture, and in the second and third pictures, he also has some insights, but above the fourth picture, he did not spend time on it.

Because he knows well that as long as he lays the foundation in front, he can make rapid progress in the back.

The first three pictures of the Universe Chaos Monument are the foundation!

The spiritual teacher mainly practices "Universal Magical Weapon", which is just a method of using the Universe Magical Weapon, which is a profound secret technique in itself.

For the warrior's melee combat, it is the sword technique in the "Star River Sword Catalog" and the matching sword technique "Quick Sky Knife" purchased for the Void Zerg clone, and the body technique "Hidden Flash Step".

The opponent on the sixth floor of the Tongtian Bridge still uses the second stage "Meteor Flash" of the cosmic magic weapon.

The second form of the cosmic magic weapon-the spindle-shaped crystal that looks like a shooting star can already affect space and time at the same time. The more terrifying... The second is the effect of time, which is mainly reflected in the acceleration of time. The power of the law of time is integrated into the moves of the universe magic weapon. It can reach a terrible speed. The speed is fast enough that the opponent can't even block it. The lethality is naturally strong. .

The opponents on the fourth, fifth, and sixth levels of the Universe Tongtian Bridge all use the second form of the universe magic weapon... but the perception and application levels are different.

Wang Yi thinks it can be divided into three levels-basic, proficient, and masterful!

Now, he is fighting against the opponent in the second form of the universe magic weapon!

"Peng!"

After a brief and fierce fight like sparks and flints, Wang Yi's "Meteor" flew to the opponent's "Meteor", then flashed past, smashing the opponent's body to pieces!

Wang Yi took back and restored the cosmic magic weapon, glanced at the man with the silver mask turned into corpse fragments, and thought to himself: "The second use of the cosmic magic weapon may not be as subtle as you, but I feel that I am not inferior to you by the law alone. Coupled with the strength of consciousness of the Doppelganger Domain, it is only natural that you will lose."

The intensity of consciousness also affects the use of mind-power weapons.

The Flame Star Giant Beast clone is now "Domain Master Level Seventh Order", so in essence Wang Yi's consciousness is...The consciousness of the domain master Level Seven Flame Star Giant Beast clone is naturally tyrannical.

The Void Zerg clone evolved a bit slower, and now it's only the second-tier domain master.

But it has 280 times the genetic level of life as its foundation, so its actual strength far exceeds that of the Yanxing Giant Beast clone that is less than 30 times the genetic level.

The consciousness of the two avatars is superimposed on the human deity, which is even more terrifying!

"The sixth floor has been passed, and the seventh floor is next." Wang Yi had a glimmer of expectation in his eyes, and his figure turned into a stream of light and quickly rushed to the clouds.

...

The sound of waves is on the plane of Tongtianqiao, in the center of the beautiful island square.

A group of immortal kings are no longer arguing, but you look at me and I look at you.

For a long while.

An immortal king said in a dull voice: "This Wang Yi, it's not our turn!"

"It's a monster!"

"The sixth floor! The newcomer who broke into the sixth floor just after coming to Chaos City! He is still the first in history, right?"

More than a dozen sect masters of various genres and universes gathered here, and the immortal kings all discussed like a blast.

And more and more immortals came over after receiving news.

There are almost a hundred people in total!

Those who are the princes are gathered together, and there are more below the princes! They all came here to take a look on behalf of their suzerain or superiors, or simply join in the fun!

But the guardian Baffin sent an e-mail, which was unpleasant.

When he saw Wang Yi rushing through the sixth floor of the Tongtian Bridge, he was also very shocked.

"Now, I believe those venerables will soon be attracted by Wang Yi. This time, Wang Yi has really become a celebrity in Chaos City."

Then he glanced at the hundreds of geniuses gathered not far away, and shook his head.

These geniuses, who have been hit, have begun to doubt their lives.

They didn't even break through the first floor, and Wang Yi has now broken through the sixth floor.

If it weren't for Bolan who had only been able to cross the second layer of the Universe Sky Bridge before, they would have doubted the difficulty of Wang Yi's Sky Bridge.

Now they have the same thought over and over in their minds—Wang Yi, are you still a human being! ?

"boom!"

The void trembled, and a stalwart figure appeared on the island on the plane of Tongtianqiao.

The will that seemed like an endless starry sky shrouded everyone's heads.

The first Venerable is here!

...

"What a bad luck! I still lost!"

Soon after, Wang Yi appeared in his real Chaos City practice residence, sitting on the sofa in the living room on the first floor, and exclaimed.

The seventh level of difficulty, the leaping is a bit beyond imagination!

But it's normal to think about it. On the seventh floor, it's usually the masters who are already going to break through, and most of the masters are trapped on the seventh floor. Although Wang Yi's perception of the original law of space is comparable to that of many realms. I'm the master, but I want to get past the seventh floor, but my understanding of the laws is not enough!

"A lot of emails!" After he finished rushing through the sky bridge, Wang Yi did not dare to choose to appear on the island on the plane of the sky bridge, but chose to return his consciousness directly to reality and close the virtual universe network connection!

Facts have proved that his choice is wise.

"Now, there should be a lot of immortal emails to me, call applications, and there may be venerables who want to accept me as a disciple... but I'm not in a hurry!"

"Don't rush to make a choice! Take a look and talk about it!"

For Wang Yi, the best choice for apprenticeship is the Chaos City Lord. The Chaos City Lord is an ancient and great being standing on the pinnacle of the human race. He is powerful and at the helm of the virtual universe company. He is also dedicated to cultivating disciples... Under the door is the real comfort.

What's more, the Universe Chaos Monument was created by the Lord of Chaos!

Considering from many aspects, if Wang Yi wants to find a teacher in the human race, Chaos City Lord is the best choice!

It even surpasses the strongest man in the human race-the founder of the Great Axe!

After all, the creator of the giant axe is the strongest in the universe~[www.mtlnovel.com](http://www.mtlnovel.com)~ has no clones, at most it is the incarnation of divine power, and he has been in the universe all the year round. There is no time to teach his disciples. Generally, the disciples are to let others Disciple go to teach!

The news that Wang Yi had crossed the sixth floor of the Tongtian Bridge had already spread within Chaos City and the Virtual Universe Company.

"Wang Yi didn't answer my call application?"

"He has disconnected the virtual universe network, and it is estimated that no one will be able to contact him."

"What a cunning little guy."

The many venerables who appeared on the plane of the Tongtian Bridge looked at me and I looked at you.

And those immortal kings and other powerful immortal gods who talked and laughed before stood respectfully by the side, muttering in their hearts: "This Wang Yi is really bold."

"But that's right. Peerless genius is always a bit privileged."

They took a peek at the great venerables who had appeared here because of Wang Yi, and bowed their heads again.

#### [Chapter 174: 'Venerable Pangbo'](#)

"Virtual Universe Company's genius and newcomer 'Wang Yi' broke through the sixth floor of Tongtianqiao!"

"Being rushed to be apprentices by a large group of Cosmos Venerables!"

Breaking news like this has spread in Chaos City, the virtual universe.

As long as you are not practicing in retreat or in the virtual universe, you can basically hear this kind of rumors.

In the virtual universe and Chaos City, there are already many people discussing Wang Yi, and many of them are strong.

Through this time, Wang Yi became famous in the virtual universe, Chaos City.

Even friends like Luo Feng and Rong Jun sent him special emails when they heard the news, just expressing shock and admiration.

Now Wang Yi has been completely separated from those newcomers, and he is completely a person of two worlds!

Those newcomers who have been crushed no longer have a trace of temper. Compared with Burram, they still have a little confidence... Compared with Wang Yi, the most enchanting monster in the history of human race, they have no idea at all!

When the gap is large to a certain extent, it becomes an outlier outside the circle!

Wang Yi is like this now!

However, Wang Yi avoided the vortex of the first day before connecting to the virtual universe network.

"Lots of mail!"

"There are more than a dozen call applications!"

Wang Yi couldn't help touching the non-existent sweat on his head, and deeply felt the wisdom of what he did.

For ordinary geniuses, they are all willing to worship an immortal king as a teacher. If they can be accepted as an apprentice by the power of a cosmos lord, I am afraid that no one can refuse.

But Wang Yi was unwilling, at least he had to continue to wait and see.

"The Chaos City Lord's Mansion didn't send me news?" After reading these emails, the venerable had nearly a hundred, but there was no one from the Chaos City Lord's Mansion that he wanted... which made him a little disappointed.

"Is my performance not genius enough? Can't meet the requirements of Chaos City Lord?" Wang Yi couldn't help but think so, but he has reached the limit. It is estimated that in the Virtual Universe Company countless genius battles, no one can compete with him. , Not even Kedi.

"It's only seven days. I came to Chaos City for seven days. I understood the first picture of the Universe Chaos Stele and mastered 18 kinds of time and space essence mystery... Didn't Kedi be as genius as me?" Wang Yi was a little puzzled and helpless. .

Even with three years of help from "Gallery Knife Catalogue", it is undeniable that the seven days of comprehension in the Chaos Monument is the most important thing.

What Wang Yi didn't know was that at this moment, the Chaos City Lord had already paid attention to him, but unlike what he thought, Chaos City Lord did not send an envoy or send him a message in the virtual universe, but gave him another one. The apprentice gave an order.

Chaos City, Wang Yi's training residence.

"Master! Another email! A venerable from the Virtual Universe Company!" The voice of Smart Life Bermuda sounded in Wang Yi's mind when he was about to go to Chaos City to find Kedi's former training residence.

"It's all this time, come again?" Wang Yi was a little strange, "and it's still through the internal channels of the Virtual Universe Company...I'll go and check it out."

With a move in his heart, Wang Yi separated a trace of consciousness and entered the virtual universe, while he himself still flew towards Kedi's residence in Chaos City. The recording of Kedi's stay in the residence was not very helpful to him. He was only likely to sign in there. Interested in rewards related to Kedi.

Chaos City is extremely ancient and is a holy place for the cultivation of the human race. From ancient times to the present, I don't know how many strong people have gathered, and the places to sign are naturally countless.

Immortal, venerable, and even greater existences exist... but it is estimated that Wang Yi might not be able to approach that kind of place.

Just like the place where the Unknown Time and Space Chaos City Lord stays in the depths of the Chaos City Lord's Mansion, no one can pass without the Chaos City Lord's permission.

Virtual universe, Yuxiang Mountain, Manor 114.

Wang Yi appeared here, and after receiving greetings from the manor servant again, he returned to the study and clicked on the void. A screen appeared and the email was opened quickly.

"Sure enough, it was sent from within the Virtual Universe Company." Wang Yi raised his eyebrows, and then looked at it. This is not the first time he has read the emails of the venerables. It was cordial and enthusiasm, and some directly expressed the benefits of accepting oneself as a disciple... But this time, the more he looked at his expression, the more shocked he was.

This email comes from an existence called "Venerable Pangbo". He clearly stated his identity in the email. Venerable Universe is nothing in Wang Yi's eyes now, but "Venerable Pangbo" will be in the mail next. Wang Yi's content surprised Wang Yi and couldn't help but stand up—

"Wang Yi, I am Venerable Pangbo, the great disciple of the Lord of Chaos City, and the creator of the cosmic magic weapon. If you want, you can join me! I will try my best to teach you!"

This is the general content of the above email!

Wang Yi was very shocked.

The big disciple of the main gate of Chaos City?

This identity is much more amazing than any cosmic venerable person.

The Chaos City Lord is one of the oldest and greatest existences of the human race. It has existed for an extremely long time, dating back to the beginning of the universe.

And his eldest disciple, that is, the first apprentice! How long should I practice? How far did you practice? ?

Wang Yi remembered that the second disciple of the Lord of Chaos, the "Venerable Returned One," seemed to be at the level of the "Overlord of the Universe" in strength.

As for the Venerable Pangbo, who ranked first, it is impossible to be worse than the "Venerable One". It is estimated that he must be at least at the level of the overlord of the universe!

The overlord of the universe, whose strength lies between the sage of the universe and the lord of the universe, is also the real overlord level in the universe!

Not to mention, the other party is also the creator of the universe magic weapon!

Wang Yi has always wondered why the Universe God Soldier fits so well with the Universe Chaos Monument, and now he finally understands it.

Venerable Pang Bo is a major disciple of the Chaos City Master, and he must also practice with the Chaos City Master. It is normal that he will create a magic weapon that fits the Chaos Monument of the Universe.

Wang Yi's heart is really moved now!

Although it was not the Lord of Chaos City who opened his mouth to accept himself as a disciple, the great disciple of City Lord of Chaos, a powerful existence that is likely to be the overlord of the universe, or the creator of the cosmic magic weapon, was enough to make Wang Yi's heart moved.

Moreover, even if he worships the Lord of Chaos as his teacher, he is probably a registered disciple now, and he has to undergo a test before he can become a personal disciple.

Venerable Pang Bo is a real disciple.

The other party has said everything, and will teach it with all my heart! A cosmic venerable said so personally, there is definitely no falsehood.

The only problem is...

If I worship Venerable Pangbo as my teacher~www.mtlnovel.com~ Isn't the Lord of Chaos City my master?

If Luo Feng worshiped Chaos City Lord as his teacher in the future, wouldn't it be my uncle?

This hurts.

Although these relationships depend on the individual, Wang Yi does not have to abide by it, otherwise Wang Yi is still a bit entangled.

After a while, Wang Yi sighed.

He also faintly guessed in his heart that this Venerable Pangbo accepted himself as a disciple at this time, perhaps there was also a relationship with the Chaos City Lord behind him.

There is no evidence, just a guess from his instinct.

Wang Yi didn't know why. Since he came to Chaos City, his intuition has become very keen.

In the end, Wang Yi chose to accept Venerable Pang Bo as his teacher.

This is also the first teacher in his life.

#### [Chapter 175: Kedi](#)

The chaotic air flow drifted.

Wang Yi walked on the street and looked at the practice residence in front of him. There was a line of words on the wall of this practice residence—"Universal Schools". Any words on the walls of various genres meant that the practice residence belonged to a certain genre. Private occupation is prohibited in the public practice residences of the People's Republic of China.

Wang Yi came to the door of a three-story building and checked the number on the door frame. It was indeed number 0334500283.

"This should be the place where Kedi was enlightened back then." Wang Yi was overjoyed.

Kedi, an incomparably dazzling and incredible genius in the history of human race!

He is also the creator of the top-level basic secret method in the "Star River Sword Catalog", the top three pictures of the first three pictures of the cosmic chaos stele! You need 80,000 points to redeem in the virtual universe company!

Even in Wang Yi's view, Kedi is a legend.

Wang Yi entered the residence and quickly walked along the stairs to the rooftop. On the rooftop, which was 100 meters long and wide, there were some random recordings, as well as lines of strange text and pictures.

"The meaning of the knife." Wang Yi inspected around, and finally turned his gaze on a few pictures with a unique artistic conception and sharp lines that seemed to be carved with a knife.

On this, he quickly found a taste that was in the same line as "The Catalogue of Galaxy Swords".

"This should be the recording that Kedi left behind when he cultivated and felt here, but after all, it is scattered and not as systematic and clear as the "Gallery Sword Catalog"." Wang Yi experienced the artistic conception in the picture, and was a little emotional.

Kedi is indeed an amazing genius! At least much better than the current Wang Yi!

"Sign in!"

[Ding, congratulations to the host for signing in successfully, and rewarding Kedi's insight talent. ]

【Number of check-ins available for this place: 0】

In an instant, Wang Yi's soul was once again transformed by that mysterious power, and it was transformed silently!

This transformation is far more than any previous one!

Kedi! That's a peerless genius who was born in the hundreds of millions of eras in the human race! To be more specific time, it is one trillion years! Even for the entire human race, this kind of genius is extremely precious and rare! How terrible is his talent?

"This, this feeling..." The sober Wang Yi stared blankly at the origin law fluctuations lingering in the crystal silk threads in the space cracks in the distant sky, and it appeared in his mind extremely clearly, like a highly myopic person. Suddenly, people acquired the superhuman "eagle-eye" ability, and the whole world became very clear!

Some extremely small details are clearly magnified in the eyes.

The laws of the origin of the universe fluctuate, the rules of the universe's operation, the mystery of the laws...a steady stream of influx into his consciousness.

And the difficulty of understanding is ten times simpler and a hundred times simpler!

"Is this Kedi's talent? It really is like a monster. It is worthy of being one of the most enchanting geniuses in the history of the human race." After a long time, Wang Yi exhaled and felt a little complicated.

However, starting today, he has also become a monster like Kedi, even more against the sky!

...

The original secret realm of the Virtual Universe Company, the most mysterious and dangerous 'Purgatory Abyss', ranks first among many desperate realms, the top floor of a majestic and majestic palace.

A burly black bear man in a gold silk robe stood on the edge of the palace dome with his back hands on his back, looking at the boundless dark starry field without even a single star in the distance.

He is here, he has been sitting in town for so many years.

"Well, Wang Yi has decided to worship me as a teacher?" Suddenly the black bear figure moved a bit after receiving some news.

He turned around, and the fluffy face had two pupils, one black and one white. As space changed, time reversed, and his body exuded an aura that made the void tremble.

"Since it is the teacher's life, then I will teach it carefully." The black bear sighed slowly.

"I haven't accepted an apprentice for a long time. The last apprentice doesn't know how many years it has been immortal."

...

Virtual universe, Yuxiangshan primitive area.

"My new teacher will come over today." Standing at the entrance of the manor, Wang Yi was still a little excited.

Because Venerable Pangbo is not in Chaos City now, and can't even come to the Original Universe, he can only teach Wang Yi in the virtual universe temporarily.

But this is enough.

After all, a cosmic Venerable taught personally, I don't know how many geniuses dreamed of it.

In order to show respect for this teacher, Wang Yi stood guard at the door early in the morning, ready to welcome him.

The immortal teacher "Fei Fa" of Wang Yi Manor was also nearby. When he learned that Wang Yi had passed the sixth floor of the Tongtian Bridge, he was also confused.

After teaching Wang Yi for three years in the Yuxiang Mountain Primitive Area, Fei Fa also probably understood Wang Yi's strength. He said that Wang Yi could cross the first and second floors of the Tongtian Bridge without any problems, and the third floor is not impossible, but the sixth floor...

Feifa felt like he was dreaming at the time.

"I'm a student, it's amazing." Fei Fa glanced at the black-haired boy beside him, feeling full of emotion.

After thinking about it, he could only use the reason that Wang Yi had an incredible talent on the Monument to Comprehend the Chaos of the Universe to forcefully explain why Wang Yi had soared and passed through the sixth floor of the Tongtian Bridge so fiercely!

Although he himself didn't quite believe this explanation!

But he knew that his own student had soared into the sky, and his future prospects were beyond his imagination. Maybe he could still support his identity as a teacher, and he would be touched by the student's light in the future.

When Fei Fa sighed, a stream of light flew from the sky, and it almost instantly fell to the entrance of the manor. Then, a tall and burly black bear man in a golden silk robe walked over.

An invisible pressure filled with this black bear.

Wang Yi and the immortal gods were both surprised at the same time.

Although Fei Fa is an immortal title of the Virtual Universe Company, he has not personally seen "Venerable Pangbo", who is almost the oldest existence in the human race, but he can clearly feel that the other party is unattainable. Far above his level.

Definitely a great Universe Venerable!

Except for the "Venerable Pangbo" who can suddenly appear at Wang Yi Manor at this time, there can be no other people.

"Farewell to the teacher!" Wang Yi stepped forward, saluting very cleverly and respectfully.

"See Venerable!" The two immortal gods Fefa and Jacques also leaned slightly.

"My teacher is actually a bear man." Wang Yi was a little surprised when he saw the true appearance of 'Venerable Pangbo' for the first time, but he did not dare to show it, and he was still respectful.

"Venerable Pangbo" nodded, and glanced at the two immortals next to him: "You don't need to follow." Then he looked at Wang Yi: "You and I come to the training ground."

The two immortals nodded and said yes, stood where they were, watching Wang Yi being taken away by 'Venerable Pangbo'.

They all felt a little emotional...it seems that Wang Yi will rise in the virtual universe company sooner or later.

...

Wang Yi followed the burly black bear man to the training ground of the manor, and then 'Venerable Pangbo' said, "Use the cosmic magic weapon to show me."

Wang Yi didn't dare to be careless, and focused on using the cosmic warrior  
~www.mtlnovel.com~ 'Venerable Pangbo' after reading it from beginning to end, he nodded first, and then began to evaluate.

The \*\*\*\* head of Wang Yi being scolded...

He had never imagined that the venerable powerful teacher he had just recognized would have such a venomous tongue that venom spurted out of his mouth.

Wang Yi was scolded and felt that he was useless in the cosmic magic weapon, and was a waste...

But fortunately, after 'Venerable Pangbo' finished his curse, he finally recognized Wang Yi's talent-  
"Although you have some problems with the use of magic weapons, it is undeniable that your talent is indeed the best I have ever seen. I am afraid that one of my best disciples has far less talent than you."

Wang Yi listened obediently.

Although 'Venerable Pangbo' scolded, the opinions he gave were still very sharp, which solved many doubts that had plagued Wang Yi, and the effect was as powerful as an initiation.

Wang Yi feels that under the guidance of this teacher, although he may suffer a little mentally, his progress is very fast.

Wang Yi was so "painful" and "happy".

#### [Chapter 176: "The Evolution of the Universe"](#)

"Wang Yi, now you have come to my door."

"After a long time, teacher, I have accepted a total of eight disciples in my life, of which three have fallen, and you are the ninth." In the living room, the burly black bear said with emotion. "However, I am very demanding. My disciples, that is, your brothers, have all become immortal kings. My requirement of you is to reach the level of immortal kings at the minimum."

"Yes, teacher." Wang Yi said solemnly.

"Yeah." The black bear man 'Venerable Pangbo' glanced at Wang Yi, "Since you have entered my sect as my disciple, then I will teach you well. Your current level of secret practice is not enough, so the teacher can I give you a set of secret methods-"The Evolution of the Universe"."

"The evolution of the universe?" Wang Yi was taken aback. "Teacher, what did you say is "The Evolution of the Universe" in the hundreds of most expensive books in the treasure house of the Virtual Universe Company?"

Wang Yi once looked through the treasure house curiously. At the end of the treasure house secret method category, there are some terrifying secret methods with high prices.

Wang Yi looked at the burly bear man with a smile in front of him in astonishment, and stammered: "Teacher, you are not kidding, you really want to give me "The Evolution of the Universe"?"

"Yes." Venerable Pang Bo nodded, a mysterious smile appeared on the rugged bear's face, and said: "However, it's not a gift...You can search for this secret method, and I'll talk to you later."

With a weird mood, Wang Yi pointed his finger to form a screen next to him, and quickly clicked on "Treasure House" and "Secret Techniques". From it, he quickly found the expensive and messy "Universe Evolution". The author's name is kept secret. Take a closer look.

"The Evolution of the Universe" Book 1 1,000 points

10,000 points for the first two volumes of "The Evolution of the Universe"

100,000 points for the first three volumes of "The Evolution of the Universe"

...

1 billion points for the first seven volumes of "The Evolution of the Universe"

10 billion points for the first eight volumes of "The Evolution of the Universe"

The first nine volumes of "The Evolution of the Universe" 100 billion points

"Universe Evolution" full set of 1 trillion points

And there is no discount for this "Universe Evolution"!

Wang Yi could see that his eyes were straight, his heart was throbbing, one trillion points, what a terrifying number!

Even if you pass through the 21st floor of the Tongtian Bridge, your points will be over 100 million points!

One hundred billion points is enough to make those cosmic sovereigns hurt their nerves, not to mention "one trillion points", this is really an extremely large number, enough to make the cosmic sovereigns feel trembling. Not to mention the current Wang Yi, he can only look up and stunned.

Wang Yi became a member of Primordial Secret Realm and received 100,000 points as a free gift from the Virtual Universe Company. Afterwards, he bought cheats and only 34,300 points were left! A few days ago, through the sky bridge, through the sixth floor! Get ten times bonus points for newcomers! Add up to only 63,000 points. Now there are 97,300 points in the account! Can't even afford the first three volumes of "The Evolution of the Universe"!

"Hahaha...how about it, are you shocked?" Seeing Wang Yi's dazed appearance, the brawny black bear man with a bad personality seemed to be very happy.

"Teacher, stop kidding me." Wang Yi said helplessly.

"Okay, I won't tease you anymore." Venerable Pang Bo said with a straight face, "Wang Yi, you should also know that you are under my sect, and I am a disciple of one of the greatest beings of our human race, the Chaos City Lord. , In other words, you can also be regarded as the disciple of Chaos City Lord."

"You may not know that the Universe Chaos Monument was created by your master, the Lord of Chaos City."

Wang Yi blinked. He actually wanted to say that he already knew...

Venerable Pangbo might think that Wang Yi was shocked and speechless, and did not observe him carefully. He said to himself: "The Universe Chaos Monument is one of the avenues of our human race. It is profound and unfathomable. It can lead people to realize many things automatically. Gongfa."

"When your master created "The Monument of Universe Chaos" back then, he turned his highest avenue into ten pictures, ten pictures can naturally lead people to enlightenment... At the same time, according to these ten pictures, think hard for a long time. All the secret methods that were occasionally obtained during the enlightenment were recorded, corresponding to ten pictures, and there were 13698 secret methods in total."

"These 13,698 scattered secrets were edited together and turned into ten secrets, which is "The Evolution of the Universe."

"This cheat book was originally written based on ten pictures. The first picture corresponds to the first book, and the second picture corresponds to the second book... The tenth picture corresponds to the tenth book."

Venerable Pang Bo smiled and looked at thoughtful Wang Yi: "So, this secret book belongs to our teacher. As the master of Chaos City, we naturally have the right to learn this secret book for free, but... Venerable Pang Bo paused when the joy was on Wang Yi's face, making Wang Yi's heart burst.

"According to the rules of the teacher, Chaos City Lord, his next disciple or grandson has the benefit of learning this secret method for free, but there are also requirements."

Wang Yi licked his lips and scored a trillion points. If he just became the Lord of Chaos, he could learn and watch all for free. Wang Yi really couldn't believe it.

Venerable Pang Bo mentioned that the face of his teacher, City Lord Chaos, showed respect from the heart.

"Teacher Chaos City Lord said that in order to prevent his disciples from having troubles and hard work, they don't want to make progress, so if you want to get this infinitely valuable "Universe Evolution", you must meet the requirements."

"In fact, this requirement is also very simple, even if I don't say it, you will do it."

What Wang Yi thought of, hesitated: "Teacher, do you mean that..."

"That's right, it's a bridge across the universe." The brawny black bear patted his broad palm like a fan, and smiled: "Master Chaos City Master stipulated that anyone in his line, as long as he cultivates the Universe Chaos Monument... On the seventh floor, you can get the first three secret books for free, if you pass the tenth floor, you can get the first six secrets for free, if you pass the fifteenth floor, you can get the first nine secrets for free...break through the eighteenth floor, You can get a full set of cheats for free!"

"Although the secrets of "Universal Evolution" are precious, they were created by your master, and your master is in charge of the virtual universe company, so this rule can be set."

Wang Yi was dumbfounded: "Teacher...I just passed the sixth floor now..."

"I know ~www.mtlnovel.com~ Venerable Pang Bo smiled and said: "So the first three cheat books can be given to you by the teacher, but if you want to get more in the future, you need to work \*\*\*\* your own. Although the teacher has also studied "Universe Evolution ", but it's not easy to teach you privately without your master's words. Of course, if you have any doubts, the teacher can answer you. "

The first three volumes, one hundred thousand points, for Venerable Pangbo, who stands at the highest level of the human race, is just sprinkling water.

Wang Yi blinked.

Thinking about it this way, this newly recognized teacher is still very generous...a ghost!

For Luo Feng's apprentice, King Zhenyan threw 8 billion points to buy "Seven Kills of Beast Gods" and give it to him without blinking his eyes! People are still just an immortal king!

While muttering that the teacher was stinging, he was very excited.

Just think about it, if you pass the eighteenth floor of the Tongtian Bridge, you can get a set of points worth one trillion for free, even if the Venerable Universe has few cheats that can afford it!

Is the moment full of power?

[Chapter 177: Chaos City Practice](#)

The teacher "Venerable Pangbo" said that he would give Wang Yi the secret books of the first three volumes of "Universe Evolution", and they would send them to the virtual universe, Yuxiangshan Primitive District Manor on the same day.

In the study, Wang Yi opened the silver suitcase containing the secret books. Inside were three metal books with pitch-black covers lying quietly. On the covers, there were four simple lingua franca "Universe Evolution", simple words, but it seems to contain the endless changes of heaven and earth, the rotation of the universe and the starry sky, and it is extremely mysterious.

The length, width and height of the three books are about 60 cm, 50 cm, and 45 cm.

Wang Yi reached out and touched the cover of the book. It was obviously metal, but it gave a very silky and delicate touch. It was a bit like paper, but more like silk.

Every book has thousands of pages.

Wang Yi couldn't wait to open the first page of the first volume. There was a paragraph on it: "...the upper and lower quarters are called the universe, and the universe has always been called the universe..." Wang Yi was immersed in it all at once.

The full set of "Universe Evolution" contains ten books, the first one corresponds to the first picture of the Universe Chaos Stele, and the second one corresponds to the second picture of the Universe Chaos Stele...

The first three volumes that Wang Yi has now are the first three volumes of the Universe Chaos Stele, which are about the mystery of the origin of space and the mystery of the origin of time.

Each book records many kinds of secret methods at will, the first book is the most, and the later the less...Each secret method is far beyond the imagination of Wang Yi now, whether it is close combat, or the master's warfare, or it was an illusion, or a mind attack... it opened his eyes and was shocked.

The secret method is actually the method of using the original law!

And by learning these secrets, you can also reversely analyze the nature of the more profound laws!

Studying and learning secrets...In fact, it also helps to understand the original law!

Wang Yi was obsessed with it and couldn't help himself, flipping through the first book eagerly.

I don't know how long it took before he woke up under Bermuda's reminder.

"It is indeed the Chaos City Lord who created the Chaos Monument of the Universe. It is really terrifying." Wang Yi admired it.

A great existence standing at the pinnacle of the universe like the Chaos City Lord has already reached an incredible level in terms of law perception, and even to some extent, it is equivalent to the incarnation of the law.

The nine-star map contains 18 basic mysteries of time and space. The star map contains 54 deeper mysteries. The hundred-star map contains the last 144 most profound mysteries. There are a total of

216 types of mystery, which are the most essential and basic 216 types of units of the original laws of time and space in the universe.

After seeing these books, Wang Yi knew that he still had a long, long way to go.

Wang Yi's training in Chaos City began.

The human deity watched the original laws appearing in the apparent space cracks in the sky on the roof of the cultivation residence, and received the guidance of the teacher "Pangbo Venerable" in the virtual universe. If the "Pangbo Venerable" teacher is not available, it will make the manor immortal. God's spiritual teacher 'feefa' to guide, of course, the effect is far not as good as the venerable.

As for the primitive area, there are many learning courses, but they are all voluntary.

Wang Yi has a better teacher, and he rarely listens to it.

And the two avatars comprehend the "Universe Chaos Monument" in the world of a hundred times the flow rate of time, and the three body consciousnesses studied the first three volumes of "Universal Evolution", and the sword techniques after the 19th set of "Galatian Sword Catalog"...

At the same time, Wang Yi did not forget to sign in.

Every day as soon as the time comes, he will sign in near the various ancient and famous super-existing residences in Chaos City.

Of course, the Chaos City Lord's Mansion has already signed in, so it can be ignored.

But sometimes immersed in the juncture of practice and enlightenment, you may not sign in for several days, this is no way, after all, practice is also very important, and the randomness of sign in is too much.

Chaos City, one of the nine-story towers.

"Jiuyu Tower" is also very famous in Chaos City, because when the Black Mist King built Jiuyu Tower, it means that you can enter the floor where you understand the picture... Now, the Black Mist King is practicing on the seventh floor. .

This day a black-haired boy came nearby.

"Sign in."

[Ding, congratulations to the host for signing in successfully, and rewarding the secret "Nine Sword Soul Seal". ]

["Nine Swords Soul Seal" has been placed in the panel space. ]

【Number of check-ins available for this place: 0】

Wang Yi scratched his cheek helplessly.

Turn around and leave.

"Hey, Wang Yi." A familiar voice came from not far away. Wang Yi looked up and saw the girl "Qianshui" with elegant green hair standing on the roof of a small white building on the left.

"Why are you here?" Qian Shui seemed to be practicing here, and he was a little surprised to see Wang Yi appear.

"Passing by." Wang Yi smiled.

"Hey, Wang Yi..." Qian Shui shouted again when Wang Yi turned to leave.

"What's the matter?" Wang Yi asked.

"Wang Yi, at the end of this month, our new group of virtual universe companies will have a group gathering in the public area. Are you going?" Qian Shui bit his lip and asked.

"Party?" Wang Yi frowned slightly, then unfolded, and said with a smile: "Let me see the situation, if it's okay, I'll leave first."

"Oh...bye." Qianshui was stunned.

Watching Wang Yi slowly disappear from the corner of the street.

...

"These people are all degenerate, and they don't have enough time for cultivation, and they still think about gatherings all day long." Wang Yi walked to his cultivation residence, feeling deeply. "Hey, there are fewer and fewer people like me who work hard."

"Well...Where are you going to sign in tomorrow?"

Wang Yi is not really in a hurry. He has more than 30 years of time in Chaos City. Even once a day, Wang Yi still has 12,000 sign-in opportunities, which is enough for Wang Yi to sign the places where those powerful people with profound background can practice. all over.

Of course, the premise is that Wang Yi did not have any luck and directly signed the entire Chaos City or the highest reward of the Original Universe.

But... if you really can't sign out the highest reward, it seems pretty depressing.

"It doesn't matter. Even if I haven't signed it in the past 30 years, I can find the opportunity to come back and continue signing." Wang Yi is still very confident in his lifespan.

...

Then, a few days later, next to the cultivation mansion of a Universe Venerable of the Jiuyu School, he was lucky enough to sign a treasure "Mi Lightsaber" worth tens of millions of yuan.

Because it was useless, Wang Yi sold it in the virtual universe, selling 11 million mixed yuan units.

Now his bank account has almost 12 million mixed yuan units, which has reached the standard of a five-star customer.

However, the "Mi Lightsaber" was also the best reward for Wang Yi to sign in for a long time.

There are many other sign-in cheats and so on ~[www.mtlnovel.com](http://www.mtlnovel.com)~ and they can't be sold, so they can only practice by themselves, which is useless for Wang Yi.

After all, there are too many secret methods he can practice now.

What's more, it is impossible for him to wander around in Chaos City all day long. He still focuses on cultivation, but occasionally goes to the vicinity of some super-existence residences in Chaos City to see if he has a chance to sign in.

There are three treasures in Chaos City. One is the cultivation environment here, and the apparent laws of the universe can make it easier for people to understand the laws. The second is the 52 Chaos Monuments, each containing the avenue of cultivation, and the third is the Chaos True Spirit outside the city of Chaos.

Absorbing the true spirit of chaos can increase the strength of the soul.

But it has no effect after saturation.

After spending some time hunting the Chaos Beast to obtain the Chaos True Spirit and unable to continue, Wang Yi gave up going out of the city and devoted himself to cultivation.

Time passed quickly in Wang Yi's single-minded practice.

In a blink of an eye, Wang Yi has been in Chaos City for two months.

[Chapter 178: Break through again! Master class!](#)

Chaos City.

When crossing the sky bridge for the first time, among the thousand geniuses, only Wang Yi passed the sixth floor, Buran passed the second floor, and Luo Feng and Rong Jun passed the first floor.

Subsequently, Wang Yi was accepted as a disciple by "Venerable Pangbo", and Rong Jun was accepted as a disciple by "Lord Yuanchen".

This also stimulated other geniuses, holding a sigh of breath, and working harder and harder to practice.

Four months after coming to Chaos City.

The ancient and majestic city where the chaotic air currents linger, cracks in the sky looming, and crystal filaments extending from the cracks, many great beings stand in the sky and cultivate and enlighten, but on the ground and on the rooftop, I don't know how many cultivators are there. I am immersed in the avenue of enlightenment laws, many have maintained this state for a long, long time...

On the second-floor roof of a training residence in a remote corner of the city, a black-haired young man sat cross-legged on the ground, raised his head and stared at the apparent cosmic origin law in the distant sky, and beside him, the ground also left behind. Some new burns.

"Huh?" Suddenly Wang Yi felt a little moved.

The prokaryotic world in Wang Yi's body is filled with a misty infinite void. One head is more than a hundred kilometers long, and the dark scales are covered with fiery red lines. A pair of giants with sharp blades and wings appeared behind them, raising their hair long and deep. Screams.

"Woo~~"

The majestic roar spread far in the void.

Joy was flowing in the huge pupils of the dark red behemoth that burned flames like a red sun.

It has already felt that the power of the world in its body is surging, and it has reached the opportunity to break through the unknown laws of the outside world.

Wang Yi did not expect that the Yanxing Giant Beast would break through so soon.

Since two months ago, the Yanxing Giant Beast has reached the ninth level of the domain master level under a hundred times the time acceleration of the time world.

After that, it was silent for another two months (time world time is sixteen and a half years).

In just over sixteen years, the Yanxing Giant Beast was about to break through to the realm master, which made Wang Yi also smack secretly.

In general, it is necessary to break through to the world master. In addition to other requirements, the most important thing is that the law is enough.

For example, if the Yanxing Giant Beast wants to break through, it must have a certain sense of the law of origin of fire.

Wang Yi didn't think that the current Yanxing Giant Beast had met the requirements.

Although the Yanxing Giant Beast has been comprehending the original law of fire, more energy is still being spent on the Chaos Monument and other secret methods.

As the darling of the law of the origin of fire, the behemoth of the flame star, the perception of the origin law of time and space, surpasses the origin law of the fire.

Don't know if this is a good thing or a bad thing?

Going back to the present, feeling the pronucleus in the Yanxing Giant Beast's body (it's not the same as the pronucleus in which Wang Yi can only breed clones), the "internal world" that has been stuck at the peak of the domain master level seems to be affected, and suddenly it starts to vibrate.

Wang Yi immediately understood that the internal world of the Yanxing Giant Beast was about to evolve and enter the world master level.

This speed...

From the birth of the Yanxing Giant Beast to the present, it has not even been twenty years.

It is estimated that it is the fastest Yanxing beast in history to reach the leader level.

Wang Yi could only guess that either the giant Yanxing beasts bred by his own pronucleus were relatively special, and the conditions for evolution were greatly reduced, and it was easy to break through to the next level, just like the previous few times.

Either the Yanxing Giant Beast grew so fast, and the Yanxing Giant Beast was originally the fastest growing one among the Star Giants. Wang Yi had no inherited memory of the Yanxing Giant Beast, so he could only guess like that.

Or, it is affected by the "Nine Tribulations Secret Method", and now the Yanxing Giant Beast has successfully practiced the Nine Tribulations Secret Method First Tribulation, and its genetic level has increased by 3 times, reaching 30 times! The Nine Tribulations Secret Method is extremely mysterious and has incredible magical powers. It can change the foundation of a creature and make it easier to cultivate, and breakthroughs are not impossible.

Of course, it is possible that several elements are combined together to become the fastest growing flame star beast in front of us...

It was a bit perverted, Wang Yi sighed in his heart, but he couldn't stop him from continuing to feel the changes in the body of his Yan Xing behemoth.

Because Wang Yi has its own pronucleus (only the clone has its own secret ability), and the Yanxing Giant Beast also has its own pronucleus, the Yanxing Giant Beast breaks through the world within its body.

The world in the body. The vast volcanic continent, which was originally 1.8 million kilometers in length and twice the size of the golden horn behemoth, began to frantically swallow the endless red mist on the periphery of the continent, as well as the endless red mist above the mainland, which enveloped the entire volcanic continent. ...

"Chichih~~"

The fog is constantly being swallowed, the volcanic continent is getting smaller and smaller, and the world space inside the body is getting bigger and bigger.

Moreover, the entire volcanic continent has undergone earth-shaking changes, from a continent... to a planet-like sphere of unknown material...like ore and metal, more like crystal, the whole body is dark red, emitting incredible heat, and slowly floating up. .

There is an extra "sun" in the inner world!

This is the 'flaming star' formed by all the essence of the volcanic continent before the flaming star beast.

The 'Yanxing Star' hovered in the vast internal world space, and the outer crystal wall of the 'Yanxing Star Core' was full of extremely complicated secret patterns.

And in the inner center of the huge Yanxing, the sparkling sparks slowly condense together, turning into a dazzling, dazzling crystal. This is the 'Yanxing Core'! A flame star beast can only give birth to a single 'flame star core' in its lifetime. A flame star core condensed from the real fire essence of the huge body of the flame star beast is infinitely valuable and a true treasure. .

At the same time, within the Yanxing core, strands of new power were born, fusing the original power of the Yanxing behemoth, the power of spiritual thought, the new power of the soul...that is, the birth of the first world power!

The torrent of mental power and the torrent of force have completely merged, and according to the natural evolution of the universe, it has evolved into a source orb!

The primordial bead rotates slightly to release endless silk threads to connect the pronucleus.

The power of the world is born!

Let the consciousness of Yanxing Giant Beast...that is, a trace of Wang Yi's consciousness, as if resonating, sensed the origin of the vast universe, and communicated with the extremely remote origin of the primitive universe.

That is an extremely vast land, and every piece of soil in this endless land is like a space, and there are endless cosmic crystals in the space.

"The origin of the universe!" Wang Yi was full of shock!

This is where he personally came into contact with this mysterious origin!

When Wang Yi's consciousness really touched the origin of the universe, the world in the pronucleus and in the body of the Yanxing Giant Beast clone simultaneously changed astonishingly.

A passage between the "internal world" and the "primitive universe" was opened, and the infinite cosmic origin energy "power of the world" poured into the internal world, like a flood coming turbulently, extremely violently, almost Fully fill the inner world space in an instant!

Wang Yi's internal space is now nearly 18 million kilometers in diameter, but it is still filled in an instant!

However, Wang Yi did not delay. Instead, based on the query during this period and the memory experience from the original work, he began to transform his own internal world.

"Central Continent, there are five marginal continents: Jinmu, Water, Fire, Earth."

"Between the six continents, there is an endless sea."

"In the Central Continent, there is an inner sea."

"Above the inner sea is Yanxing."

"Endless things, birth!"

"The world in the body, become."

Suspended high in the sky, Wang Yi overlooked the vast expanse, filled with flowing water, plants, flowers, and mountains, and the internal world that was no different from the real world, and smiled with a sense of accomplishment.

"Now, the world inside my Flame Star Giant Beast can also be put into life."

"It's so fast." Wang Yi sighed a little.

too fast!

Before I was mentally prepared, I broke through to the master of the world.

Hey, it's too good to be able to do it.

The inner worlds of many world masters are generally tens of thousands of kilometers in diameter.

But Wang Yi, the giant flame star's internal world, reached a diameter of 18 million kilometers!

This has just been born, and it will be even more terrifying when it reaches the peak of the world master in the future!

The larger the body world, the more stable and hard the pronucleus, the more difficult it will be for to break through in the future!

Wang Yi touched his chin, feeling the terrifying hardness of the Yanxing core. "It is estimated that it is very difficult for me to break through to immortality in the world inside my Yanxing behemoth."

For a race of peak bloodlines like this, it is ten times and a hundred times more difficult to break through to immortality than ordinary world masters!

Unlike special life beings loved by the universe, many breakthroughs in immortality are simple.

But for Wang Yi, the harder it is for the Yanxing Giant Beast to break through, the higher the breakthrough achievement will be in the future!

"Continue to use precious Yanxing treasures to swallow the world inside the Yanxing Giant Beast, and continue to grow the world inside it to its limit!" Wang Yi was full of ambition.

With the ordinary cultivation method of the Universe Crystal, the world inside the Yanxing Giant Beast can reach a diameter of 60 million kilometers at most!

And continuing to use precious treasures like the "Sun Stone" to swallow and grow the behemoth of the Flame Star can make the world within it reach a diameter of 180 million kilometers!

To do it, of course to be the strongest Yanxing behemoth!

#### [Chapter 179: Wang Yi's terrifying practice speed](#)

In the endless void of Wang Yi's prokaryotic world, a dark red giant beast is suspended like a continuous mountain. At this moment, the huge body of this giant beast has undergone transformation again under the transformation of the power of the world. The powerful body began to metamorphose, swallowing a lot of world power, making the body gradually larger, the scales became tighter, the wings behind it became wider and sharper, and the whip-like tail under the body became even bigger. It's thick and long, and with a strong pull, the void will be torn apart.

In the end, it becomes a giant over two hundred kilometers, spreading its wings to cover the sky and the sun!

Wang Yi is in a good mood.

"Now, my Yanxing Giant Beast clone is a realm master level! The Void Zerg clan clone is a domain master level five! And my human deity is a universe level one!"

"But it's all one!"

"My current pronucleus can already give birth to a third clone, but I'm not in a hurry! I will consider it slowly in the future!"

"Unfortunately, my Yanxing Giant Beast only has three secrets of talent. Without inheriting the secrets, my strength cannot be fully utilized!" Wang Yi was a little regretful.

He still misses the special secrets of the Yanxing Giant Beasts family of the Virtual Universe Company's treasure house, "The Change of the Stars" and "Space Domain"!

But the points are not enough, now I can only think about it.

"If I can get through the 13th floor of the Tongtian Bridge before leaving Chaos City, and get ten times the points reward, there will be almost 8.2 million points, which is enough to buy one of the secret methods." Wang Yi couldn't help thinking.

You can get a 30% discount when you purchase items from the Virtual Universe Company's treasure trove as a member of the original secret realm.

Of course, some special items are exceptions.

Like Wang Yi's most wanted Yan Xing Behemoth's must-have special "Yan Xing Bian" special secret method, only 5.6 million points can be bought.

However, Tongtianqiao is generally immortal if it can pass the tenth floor. He, a cosmic-level guy who has just arrived in Chaos City within a few months, wants to pass the thirteenth floor in just over thirty years. People think he is crazy!

Wang Yi dared to think so, and of course he was backed by it.

"I am now the Flame Star Giant Beast has broken through to the Realm Master level, and I believe the Void Zerg Clone will soon break through... The two Realm Master level clones together help me realize... The Realm Master Level is a period of power explosion, even immortality. The level is not comparable to the master level!"

"My human body has a unique talent that can be compared to Kedi once it was born in the billions of eras!"

"The talents of fire, time, and space are amazing!"

"There is also the world of time that can accelerate the flow of time by a hundred times! Thirty-three years is 3,300 years! Although it takes some wealth, it doesn't matter!"

"Additionally, the "Universal Chaos Stele", the treasure of human cultivation, can be understood at any time... The original universe is extremely suitable for the environment for understanding the laws... There is also the personal teaching of the creator of the universe, the teacher "Venerable Pang Bo", all doubts can be Answers at any time, the training efficiency is higher..."

"Fuck!"

With such a count, Wang Yi realized that he was truly a monster!

It is estimated that in the entire universe, no one can have such "luxury" training conditions like him!

"Um... it seems that something is missing..."

Sign-in panel: "....."

...

In addition to the two clones, there are actually Moyunteng and the master-level Zerg mother emperor "Elizabeth". However, although Moyunteng has been cultivated to the perfect 180-level master-level Moyunteng at any cost in these years, it is still Can't compare with other clones. n0VELusB.c0M

However, Wang Yi did not give up on both, but put the priority behind.

The most important thing is the three bodies!

Strong own strength is the fundamental!

Part of Wang Yi's consciousness was immersed in the practice of perceiving the laws of the real outside world, while the majority of consciousness, the consciousness of the Yanxing Giant Beast, instantly resonated through the power of the world and instantly entered the origin of the universe.

The mysterious land of the origin of the universe, at the master level, consciousness can enter the land of the origin of the universe for the first time.

The various origin fluctuations of gold, wood, water, fire, earth, wind, thunder and lightning, light, space, and time can all be sensed.

When consciousness comes to the origin of the universe, it will be in a state of incomparably close to the origin of the law.

Because of the incomparable proximity...so the sense is the clearest.

Even the metal, wood, water, soil, wind, thunder and lightning, light, and time that they didn't understand in the past. At this time, the intelligibility of the Flame Star Giant Beast is no less than that of the law of inducing fire at the domain master level.

Of course, the clarity of the origin law of sensing fire is 10,000, the clarity of sensing the origin law of space is 1000, and the other is 100!

This law is more than a hundred times easier to comprehend!

The realm master level is indeed blessed, and many people at the universe level and domain master level can't comprehend at all. After becoming the realm master, they can still cultivate to the point where they can be recognized by the "law of origin".

Because the power of the world is special, it is possible to allow consciousness to enter the origin of the universe.

But once it reaches immortality! The energy level has changed again, with a more powerful immortal power, and the world in the body has transformed into a single independent kingdom of God, but it can no longer integrate consciousness with this earth.

Therefore, many strong people would rather stay at the stage of the world master for tens of thousands of years before entering immortality.

At the realm master level... some peerless geniuses have only cultivated for tens of thousands of years, and their laws and perceptions can be comparable to the immortal gods of the Fengwang level. Once

they step into the immortal gods, they will have a very strong foundation, directly being the Fenghou-level... and even directly being the king-level immortal gods.

However, Wang Yi's Yanxing Giant Beast has already broken through to the realm master, and his consciousness can enter the land of the original law. The speed of this law of perception is naturally much faster than before...

"The law of the origin of fire is not urgent. First concentrate on understanding time and space. Although it is a waste of talent, there is no way." More than 30 years of time in Chaos City is very important. The law of origin is available at any time.

"When the Void Zerg enters the realm master, it will be much simpler to perceive the law of space."

"My human body focuses on the law of time."

"Three-pronged approach!"

"The 33 years of Chaos City will settle first, and then burst out again!"

...

Wang Yi's boring and fulfilling training time in Chaos City began.

The avatar of the Void Zerg clan, the Flame Star Giant Beast is cultivating in the realm of time.

Human bodies are cultivating in Chaos City, and Wang Yi can often be seen near ancient buildings everywhere.

...

Wang Yi never crossed the Tongtian Bridge again, and fell completely silent.

One year, two years, three years~[www.mtlnovel.com](http://www.mtlnovel.com)~four years, five years...

Time is still passing slowly, unaffected by anyone's will.

And other geniuses are also working hard, like Bolan, Luo Feng, Rong Jun...and other peerless geniuses shined brightly during Wang Yi's silent time, and other geniuses also pursued bravely.

In the 13th year of coming to Chaos City, Rong Jun crossed the third floor of the Tongtian Bridge.

In the 15th year of coming to Chaos City, Luo Feng passed the fourth floor of the Tongtian Bridge, and two years later, Buran passed the fifth floor of the Tongtian Bridge!

In the 21st year of coming to Chaos City, Uka passed the third floor of the Tongtian Bridge.

In the 25th year of the Chaos City, Longyun and Calais passed the third floor of the Tongtian Bridge.

In the 28th year of coming to Chaos City, Qianshui passed the third floor of Tongtian Bridge...

Only Wang Yi never crossed the Tongtian Bridge again, and rarely saw him, but no one could forget his existence.

In a blink of an eye, thirty-three years passed.

### [Chapter 180: Three thousand three hundred years!](#)

In the unstable chaos of the original universe, a large blue fish with a body length of nearly one thousand meters was swimming happily.

Inside the spacecraft.

"Venerable, this is the situation of those geniuses in Chaos City these years."

In front of the man in the cyan shirt and purple scales, I saw a beautiful woman with long flowing purple hair wearing a blue battle armor and saluting respectfully.

"Venerable Nine Swords" sat on the chair in the control room and tapped the armrest lightly.

"817 people left..."

"Yes, sir." "Long Jade King" was carved like jasper, with a sense of clarity, as if she didn't exist in this time and space at all. "Bolan has passed the fifth floor of the Tongtian Bridge. Next is Luo Feng. He passed the fourth floor. There are five people who passed the third floor of the Tongtian Bridge. Among them, Luo Feng is the most surprised. He... .."

Venerable Nine Swords raised his hand, and the Dragon Jade King immediately swallowed back the words he was about to report.

"Wang Yi still didn't go to cross the sky bridge?" Venerable Nine Swords asked.

"Yes, Lord, since Wang Yi crossed the sky bridge for the first time 33 years ago, crossed the sixth floor, and was accepted as an apprentice by "Venerable Pangbo", he has been cultivating in Chaos City and never went there again. Tongtianqiao." Longyu King said.

"This Wang Yi, it's a pity..." Venerable Nine Swords sighed lightly.

According to the rules, this genius is in charge of Venerable Nine Swords, and in the future it will belong to Venerable Nine Swords.

Venerable Nine Swords is very happy to have such peerless geniuses as Bolan and Luo Feng, but there is only one Wang Yi...

"Forget it, Wang Yi has already worshipped Venerable Pangbo as his teacher, and it has nothing to do with me." Venerable Nine Swords thought of something, with a trace of jealousy in his eyes.

Venerable Pangbo is the oldest and most powerful group of cosmic Venerables in the human race, apart from the great beings that truly stand on the pinnacle. Among the Venerables, they are absolutely at the most terrifying level. "Venerable" is also far more terrifying, comparable to the super existence of "The Eclipse Palace Master" that can suppress a world.

Venerable Nine Swords can only be regarded as a "late" generation among the Venerables, and cannot be compared with the veteran Venerable Pangbo.

Rumble...In the chaotic void, the spacecraft continued to advance.

Venerable Nine Swords took the spaceship to Chaos City, just to pick up Wang Yi and the group of people.

...

The chaotic air flow is floating, the ancient Chaos City, Wang Yi, who has unknowingly long hair to his waist, sits on the roof of his practice residence, sometimes closing his eyes to comprehend, and sometimes opening his eyes to watch the apparent gear-like winding in the sky. The secret pattern of the law of being together.

And on the only continent in the void of the time realm, the clone of the Void Zerg, who had already reached the level of the realm master, was flashing ghostly above the continent, and every time it flashed, it traveled a distance of millions of kilometers out of thin air.

Moreover, the frequency of "burst" is very fast, with dozens of flashes in one second, and it rushes out hundreds of millions of kilometers in a blink of an eye.

"Boom~~"

In a lava basin on the vast land, a simple chaos monument stands there, a dark red scale-framed monster shaped like a rolling mountain spreads its wings, waving its paws that look like a heavenly sword, every time it swings, There are a few dark cracks in the space, and sometimes the sharp tail hundreds of kilometers long behind it suddenly twitches, slap! The sound of the void is like fragile glass, with dense cracks like spider webs!

Now, the Flame Star Giant Beast and the Void Zerg have spent more than three thousand years in the time world!

The Yanxing Giant Beast, the ninth world master level, 30 times the genetic level!

Void Zerg, ninth-level master class, 840 times the genetic level!

That's right, the two avatars have successfully practiced the first calamity of the "Secret Code of Nine Tribulations"!

In addition to practicing and comprehending the law, the Yanxing Giant Beast has been devouring a large number of treasures to expand its internal world. Now the Yanxing Giant's internal world has expanded from 18 million kilometers in diameter to 98 million kilometers in diameter. Wang Yi's wealth is almost close to 20 million yuan.

However, these wealth is just a small shot of Wang Yi's accumulation over the years.

For more than 30 years, Wang Yi has signed in and sold treasures that he does not need in Chaos City. The funds in his account alone have reached hundreds of millions of yuan!

And money relative to the value of his treasures is only a small part of it.

Mo Yun Teng, also evolved into the perfect world master Mo Yun Teng of 360 master vines, now it is the ninth world master grade!

However, if you want to break through to the immortal level, you need a wealth of tens of billions of mixed yuan units. It is far from what Wang Yi can afford now, and the chance of success is less than half. However, if Mo Yun Teng can break through successfully, he will immediately have it. The terrifying power of "primary entitlement to immortality"!

In addition to Mo Yun Teng, there is also "Elizabeth", the mother of the Zerg clan. Wang Yi did not favor one another with his friends.

"Elizabeth", a \*\*\*\* girl, also reached the ninth rank of the world leader under the cultivation of Wang Yi, and then through the virtual universe company used 2 million yuan units to purchase 200 units of the world leader pinnacle Zerg warrior corpses (one unit 100,000 The corpse of the leader of the pinnacle needs to be purchased in units of 10,000 yuan).

Although the quality varies, an average unit of Zerg clan corpse can produce 5,000 or 6,000 heads of the peak tiger beetle clan... To make a pinnacle tiger beetle clan normally, it usually takes 25 mixed yuan units to replace it with a cosmic crystal. However, it is much cheaper to manufacture from Zerg corpses. Five or six complete tiger beetle corpses can grow a live tiger beetle once the Zerg brood is swallowed. However, the quality of the Zerg corpse units purchased by Wang Yi varies. Therefore, about 10-15 of them can be cultivated. Wang Yi now has 1 million tiger beetle warriors and thousands of 'many hunters'.

One million, this is also the upper limit of the number of master-class Zerg mother emperors that can be controlled at one time, no matter how much it is, it will not be able to form a perfect command effect.

Through the worm sea formed by the control of the Zerg mother emperor ~[www.mtnovel.com](http://www.mtnovel.com)~, millions of pinnacle masters of the Zerg warrior armies fight together, even if the immortal gods dare not face it, they can fight against the immortal gods!

The master-class zerg brood is comparable to the extremely powerful immortal gods, at least very effective in trapping enemies, obstructing, and entanglement. And once this Zerg brood is cultivated to an "immortal level", how powerful it is to create an immortal Zerg warrior army.

Over the years, Wang Yi has been using his own resources to frantically improve his strength.

Now Wang Yi, with so many cards and strength, I am afraid no one would have guessed it.

Perhaps the only thing he knows is the Chaos City Lord who monitors the Chaos City at all times, but it is impossible for the Chaos City Lord to keep an eye on what a universe-class kid is doing.

Even if you noticed it, perhaps it was just a sentence of emotion that this little guy has a rich family and has met people or something.

Ten million Yuan Yuan units were not even a hair for the existence of this level of Chaos City Lord, so naturally they would not care.

In the eyes of others, he was still a cosmic-level human peerless genius who had not passed through the sixth floor of the Tongtian Bridge for long.
