

A God 181

[Chapter 181: 1 dynasty broke out!](#)

Chaos City.

Wang Yi, who was enlightening on the rooftop, suddenly opened his eyes.

There seemed to be a flash of lightning in his eyes.

"Um?"

"Come and see me!" A voice rang directly in Wang Yi's ears and mind.

"Come and see me!"

"Come and see me!"

"Come and see me!"

"Come and see me!"

...

The voice reverberated again and again, causing all the 1,000 geniuses who had been sent to 817 who were still alive to stop practicing.

Rong Jun, Luo Feng, Bo Lan, Jiang Mo, Qianshui, Ai Chen... these geniuses all raised their heads.

"It's the Lord!"

Wang Yi raised his brows. "Is it time to leave?"

Whoosh!

Wang Yi's figure soared into the sky, and there were figures like him flying into the sky everywhere in Chaos City, flying in one direction.

"Hair is a bit long." During the flight, Wang Yi found that his hair had grown a lot unknowingly over the years after his concentrated practice. With a light tusk, he gathered strength on his fingertips and swiped his hair behind his back and his hair was cut short. , Into a refreshing hairstyle.

"It's much more comfortable now."

The sky above the vast and turbulent Chaos City.

The purple-scaled man in the cyan shirt stood in the air in front of 817 geniuses such as Wang Yi and nearly 100 immortal beings, looking down at them like a god, and a breath of surrender emanating from him.

The large group of people underneath felt the tremendous pressure being pressed down, and cold sweat was dripping on their foreheads.

It was as if an ant was staring at by a huge dragon.

"This is the Venerable..." Wang Yi didn't dare to look up. Although he didn't perform as badly as other geniuses, he wasn't much better.

Although the clone already possesses the strength that can rival the immortal gods, compared with the venerable, it is like Yinghuo and Haoyue contend for glory, and there is still a big gap.

"Hmph, you disappoint me." The cyan shirt and purple scaled man indifferently looked down at the chilling group of people, and said coldly: "In such a safe place as Chaos City, you can all die more than a hundred, wait to go outside. , I am afraid that in less than a hundred years, you will only be half dead."

Under the coercion of the Venerable's mighty will, others could only bow their heads and listen to the reprimand.

"Okay, hurry up for the last 10 days. If you should cross the sky bridge, you should cross the sky bridge. If you need to go to the Chaos Monument, you should hurry up. When you leave the Chaos City... I want to come again next time. It will be a long time later. "Let's go." The green-robed and purple-scaled man waved and said, "Go all."

...

"There are still ten days." In the training residence, Wang Yi sat cross-legged, his eyes calm and deep. These years of cultivating in Chaos City has also been a very good tempering of his mind and will. For more than 30 years, the time world has passed three times. Over a thousand years, how long did Wang Yi live before? "First spend seven days to sort out the insights of these years, try to integrate them as much as possible, and then go to cross the sky bridge on the eighth day." Wang Yi stopped thinking and closed his eyes.

The other geniuses scattered in Chaos City also made the final preparations for leaving, and went to cross the sky bridge one after another.

Rong Jun passed the fourth floor...

Luo Feng passed the fifth floor...

Berran has passed the sixth floor...

Many people want to make another break before leaving Chaos City.

Finally, it was the third penultimate day of leaving Chaos City.

"call!"

Wang Yi opened his eyes, his eyes flashing like electricity.

He stood up and looked at the vast sky of Chaos City with a smile on his face.

"For many years of silence, it depends on the present."

He is consciously connected into the virtual universe network.

...

Virtual universe, Manor No. 114, Yuxiangshan Primitive Zone.

"His Royal Highness!" Seeing Wang Yi's appearance, the immortal "Jacos", the manor guard leader, immediately appeared and said with a smile. "His Royal Highness hasn't entered the virtual universe for many days. Master Fei Fa has also specifically asked about it once. I told him that His Royal Highness is cultivating, and Master Fei will not bother anymore." He looked at the black-haired boy, "His Royal Highness this time. Do you want to cross the sky bridge?"

"Yeah." Wang Yi smiled.

"His Royal Highness, how many floors can you pass now?" Jakes asked curiously.

"This... keep it secret for now." Wang Yi smiled mysteriously.

The virtual universe passes over the bridge plane.

Wang Yi appeared on the beautiful central island square.

"Huh? There are still so many people?" Wang Yi glanced away and saw that there were already more than a dozen people on the island.

"Wang Yi!"

"It's Wang Yi!"

"He came over to cross the sky bridge?"

Those newcomers from the Virtual Universe Company were surprised to see the appearance of Wang Yi who had been silent for more than 30 years, and then became excited.

Over 30 years ago, Wang Yi's amazing record of breaking through the sixth floor of the Tongtianqiao for the first time was still deeply imprinted in their minds.

You must know that when he first came to Chaos City and he had not experienced these years of cultivation, Wang Yi could reach the sixth floor, but after so many years of cultivation, what can Wang Yi reach?

It's exciting to think about it.

"Wang Yi, I haven't seen you in these years. You finally came here." The guardian Bafen was very impressed with Wang Yi. He saw him appear and smiled and said, "If you are here to cross the sky bridge, the Universe Sky Bridge is right now. people."

He was curious again: "Wang Yi, tell me, which floor are you sure you can reach now?"

"Master Bafen, I don't know, please do your best." Wang Yi smiled.

Wang Yi glanced at the nearby geniuses who were watching and watching, smiled slightly, turned around, rose into the sky, turned into a streamer, and quickly rushed into the cosmic bridge surrounded by white mist.

Then, the news that Wang Yi went to cross the overpass quickly spread.

"What? Wang Yi went to cross the sky bridge?"

Primitive area, Manor 115, standing on the training ground, the cold white-clothed young man Beran held his blood sword, his hand trembled, and his eyes suddenly became fierce.

"Apply to enter the Tongtianqiao plane!"

In reality, Chaos City.

Luo Feng, who was sitting cross-legged and closed his eyes in the practice residence, suddenly opened his eyes, with a hint of surprise in his eyes.

"Wang Yi went to cross the sky bridge?"

He pondered.

"Wang Yi had already crossed the sixth floor of the Tongtian Bridge more than 30 years ago, and he has not been there ever since. He went to cross this time..." Luo Feng intuitively felt that something big would happen this time.

"go!"

"Go to the plane of Tongtianqiao!"

"That enchanting Wang Yi went to cross the sky bridge!"

More than 800 geniuses who were originally busy with their own affairs ~www.mtlnovel.com~ received this news, and they all put aside what they were doing and quickly entered the virtual universe.

On the plane of Tongtianqiao, a large number of people gathered at once!

brush! brush! Swipe...a group of figures kept appearing.

Not only are the geniuses of the virtual universe company Berlan and others who can't wait to see the results of Wang Yi's crossing the bridge, there are also many big figures within the virtual universe company who have been paying attention to Wang Yi, who has shown shocking talents when he first arrived in Chaos City. Peerless genius!

But this time Wang Yi rushed through the sky bridge, like a huge boulder smashed into the lake, causing a thousand waves!

The law breath surging, immortal coercion pervades, immortal gods appear!

Wang Yi broke through the flyover! Suddenly became the eye-catching!

[Chapter 182: It's turned upside down!](#)

A large but simple mansion in a remote area of Chaos City. The gate of this mansion is as dark as ink.

Venerable Nine Swords and his friend, the guardian of the chaos stele cultivating chamber, and the three-eyed old man "Kandri" sat opposite each other in the living room of the mansion.

While chatting, Venerable Nine Swords suddenly gave a soft voice.

"What's the matter?" Kandry looked over.

Venerable Nine Swords smiled lightly: "One of the new batch of talented little guys from our Virtual Universe Company, that is, 'Wang Yi' who was accepted as a disciple by Pang Bo's predecessors, just broke through the eighth floor of the Tongtian Bridge."

"The eighth floor?" Kandry narrowed all three eyes. "I remember, that Wang Yi is the best among the geniuses of your Virtual Universe Company. He has only been in Chaos City for more than 30 years, and now he can reach the eighth floor...Tsk, this kind of talent, I guess. It's not much worse than the peerless genius of the past. If he grows up, it is estimated that he will at least start as a king. Haha... Jiu Jian, you have lost a lot this time."

Venerable Nine Swords smiled faintly: "It's not necessarily true. No matter how talented he is, he will not become immortal, but it will be in vain... and even if he becomes immortal, it is still under my command."

Kandry smiled weirdly: "There is Pang Bo watching him, do you dare to point him to his apprentice? I remember Pang Bo's temper is not very good among the venerable, and he is stingy and caring for shortcomings. If you treat his apprentice badly, I guess he I dare to come over and trouble you directly."

"Besides, he already has a powerful teacher who is the overlord of the universe. Where can he go? He still needs to do things with you? You think too much."

"Huh." Venerable Nine Swords was a little unhappy.

However, he also knew that Kandry was right. In terms of strength, Venerable Pangbo's strength is the highest among the Venerables. He sits alone in the first desperate "Purgatory Abyss" in the Primitive Secret Realm, suppressing one side of time and space, and in terms of identity and status, people are in the virtual universe. The company is also far ahead of him. As far as the background is concerned, it is the big disciple of the owner of the virtual universe company, Chaos City Lord. It has a vast network, and all the brothers are venerable...Why don't you crush him?

The most important thing is that Venerable Pangbo has a weird temper, he does his own way, and is very short-sighted.

Wang Yi had such a teacher, even if he really came under the command of Venerable Nine Swords, Venerable Nine Swords would have to pinch his nose to coax him.

Forget it, can't afford it!

The virtual universe passes over the bridge plane.

Hundreds of immortal gods gathered here and looked at the screen with awe.

The process of Wang Yi crossing the overpass just now really surprised them.

On the seventh and eighth levels, Wang Yi used cosmic magic weapons to directly kill the gatekeepers!

Although it had been anticipated that Wang Yi might make an extraordinary move, no one thought that Wang Yi would be able to pass the seventh and eighth floors of the Tongtian Bridge so easily!

As we all know, the farther behind the bridge is, the more difficult it is!

Those who can pass the tenth floor are generally immortal gods!

The elders of universe-level people in Taichu District have been cultivated by virtual universe companies for thousands of years at least, and thousands of years at most. Very few have broken through the seventh floor of Tongtianqiao, and all others are on the sixth floor of Tongtianqiao!

Where is Wang Yi? I have only arrived in Chaos City for more than 30 years, and I have already passed the eighth floor of Tongtian Bridge! Has surpassed all the geniuses in Taichu District! Even at the cosmic level in the Primordial Zone, only the strongest genius who has cultivated for thousands of years is only at the eighth level!

Wang Yi is still rushing, and looking at the momentum, he still doesn't know which floor he will reach.

This gap is so big that it makes people desperate.

The virtual universe company geniuses gathered not far away were extremely quiet, their faces were extremely solemn, and their expressions were different.

"Wang Yi..." Buran, dressed in white and carrying a blood sword, looked at the screen, but his eyes were full of determination.

"Now you are ahead of me, but I will definitely not lose to you, I must catch up and surpass you!"

Even though Wang Yi had already passed the eighth floor of the Tongtian Bridge and left him far behind, Beran still did not give up the hope of catching up!

For him, if he does not surpass Wang Yi, the strongest opponent in his generation, his life is meaningless!

Wang Yi is his fateful opponent!

Wuka, Rong Jun, and Luo Feng also stood together, and saw Wang Yi on the screen together with the cosmic soldiers smashing the heads of the eighth gatekeepers, and they couldn't help but shrink their necks.

"My mother, Luo Feng, Wang Yi came from the same planet as you. Why is this guy so perverted?" Uka wiped the cold sweat on his forehead, "My Barbarian Kaxing tribe is considered to be the pinnacle of the human race in the universe. It is one of the races, but it is estimated that there has never been a pervert like Wang Yi in history! This is a great perversion!"

"One move, that eighth-level gatekeeper, it is estimated that one can easily kill 10,000 of me, but was killed by your friend Wang Yi with one easy move!" Uka's face was pale and gritted his teeth fiercely!

The gap is so big, it makes people feel desperate!

The most terrible is not that the opponent is better than you, but that the opponent will always improve faster than you, or the kind that you can't catch up no matter how fast you chase, which makes people feel a deep sense of powerlessness!

Rong Jun, a burly savage man with messy hair, looked at the black-haired boy on the screen who was fighting with the gatekeeper on the ninth floor, but his eyes were still full of fighting spirit!

"Wang Yi!" The look of the black-haired boy was deeply impressed in his mind. "If I have the same strength as Wang Yi and the speed of improvement, it is very likely that I will become a Universe Venerable in the future, and I will have a chance for revenge..."

Other geniuses, but not all people like Bolan and Rong Jun are as firm-willed or full of conviction, many of them have almost lost their conviction and began to doubt their lives.

"Oh my God! The ninth floor!"

"Wang Yi... he is simply a monster!"

"I couldn't even make it to the third floor, but he made it to the ninth floor. Why, why is there such a big gap? It's unfair!"

"Bolan, Luo Feng, and Rong Jun are terrible enough, this Wang Yi is tens of thousands of times more terrifying than them combined!"

"Can't catch up! No chance!"

After seeing Wang Yi's incredible strength, the young people who were originally regarded as the supreme geniuses in their own universe were shocked, disappointed, desperate, and fearful...

Of course, there are also ones to admire, admire, and desire.

"Wang Yi! That's amazing!" Thousands of watery eyes stared at the black-haired teenager who was cold and calm and fighting with his opponent on the screen, and his eyes flashed with strange brilliance.

The immortal gods are also in heated discussions.

"I've also watched Wang Yi's previous genius battle video. His progress in Chaos City is too fast, right? It's not in line with common sense at all?"

"Haha, do you make common sense with such an extraordinary monster, evildoer?"

"What floor do you think Wang Yi can get to?"

"Looking at Wang Yi's posture, how can it be the tenth floor!"

"Tsk tsk, the Universe Grade can pass the tenth floor! I haven't seen this kind of peerless genius appear for a long, long time, and can once again witness the birth of a peerless genius, this time it didn't come in vain."

"Our human race is probably about to give birth to a peerless genius like Kedi and Luhuo."

Even those noble immortal kings who are above the top ~www.mtlnovel.com~ are excited to look forward to it.

There is a feeling of witnessing history.

But they stopped talking soon, and one by one fell into incomparable shock...

I saw the black-haired boy 'Wang Yi' on the screen quickly killing the ninth gatekeeper!

...

Then there is the tenth floor!

...

The eleventh floor!

...

Twelfth floor!

...

"Fuck!!!" On the quiet square, I didn't know which great immortal **** widened his eyes and burst out.

[Chapter 183: Kill the world crazy!](#)

"sky."

"How can it be?"

"horrible!"

"too frightening."

Many immortal gods gathered on the islands on the plane of Tongtianqiao were frightened.

A newcomer of the universe rank who had just participated in the genius battle and had been in Chaos City for more than 30 years, was able to pass the twelfth floor of the Tongtian Bridge.

This is too challenging the three views of these immortal gods.

How many floors are there in the entire Tongtian Bridge?

Reaching 10 levels is the most common immortal **** level.

Reaching the 15th floor is the Fenghou level.

Reaching the 18th floor, that is the level of the king.

Even Luo Feng in the original book, after many years of hard practice and many magical encounters, did not pass the thirteenth floor of the Tongtianqiao at the domain master stage until hundreds of years later, and in this way, it has been hailed as the first epoch of tens of millions. Peerless genius.

Where is Wang Yi? In Chaos City for more than 30 years, he was still at the cosmic level...and he could challenge the thirteenth floor.

Simply unprecedented! Unheard of!

Throughout the ages, I am afraid that the human race Tongtianqiao has never seen a monster like Wang Yi!

Don't forget that he was a constant star genius who just participated in the genius battle more than 30 years ago!

The first time I crossed the sky bridge, I passed the sixth floor! At that time, it caused a lot of shock in the virtual universe company and attracted the attention of many big people!

And just after more than 30 years, he has surpassed the sixth floor in a row! Rush to the twelfth floor in one go! And it's not over yet!

The speed of progress is far beyond the understanding of these ancient great beings, beyond imagination.

Wang Yi's speed of improvement has surpassed the category of "peerless genius" and even surpassed the first definition of "monster". It should be said to be... a monster! A peerless genius monster that exceeds people's imagination and the rules of normal development!

This kind of miraculous performance... Even the top peerless evildoers in the history of the human race, none of them can match.

After these immortals came back to their senses, many of them had already started reporting crazily. The news that Wang Yi had crossed the twelfth floor of the Tongtian Bridge spread through the Virtual Universe Company in an instant, causing a storm.

The 13th floor of the Universe Tongtian Bridge.

The surface of a fiery star.

Wearing a dark red shirt, Wang Yi stepped on black combat boots and carried two sabers on his back. He controlled a red moon disk to float under his feet, and behind him was a silver-gray crystal shuttle that was longer than his height.

"Choose your opponent, the warrior, the master, the illusionist, choose one, and defeat him to pass the thirteenth floor." A low, rumbling voice came from the entire star.

"The master," Wang Yi said.

The two master-level clones of the time world have been comprehended for more than three thousand years, plus the "Universe Chaos Monument", and many secrets, and the careful teaching of the teacher "Venerable Pangbo", Wang Yi himself is comparable to Kedi's peerless talents. This step.

The reason why those immortal gods were so shocked was because they didn't know Wang Yi's hard work behind him and his incredible fate.

The first three pictures of "Universe Chaos Monument" have been fully understood, which means that Wang Yi has thoroughly understood the 108 essences of the original law of time and 108 essences of the original law of space... Regardless of time or space, he can understand 108 of them. Comparing with the ability of the twelfth floor of the Tongtian Bridge and understanding the two fundamental laws at the same time, it would be even more terrifying.

What's more, Wang Yi has not only understood the first three pictures!

"The first picture, the second picture, and the third picture are combined with each other, and they are perfectly integrated, so that they can be regarded as truly complete and perfect." Wang Yi felt a little regretful in his heart.

The Avenue of Laws is extremely profound and vast, as if there is no end in sight.

It is already very difficult to comprehend all the essence of a source law alone, the essence of time and space, or the combination of the mystery, or the formation of three pictures into a whole... This is even more a test of people's will and talent!

Fortunately, Wang Yi doesn't lack these. This is the capital for him to stand on the thirteenth floor of the Tongtian Bridge today.

With his insight into the original laws of time and space against the sky, Wang Yi was able to complete the unprecedented feat of being able to reach the thirteenth floor of the Tongtian Bridge by a newcomer at the universe level!

"Boom!" The fiery flame burning on the surface of the star suddenly burst into flames. This fiery flame hovered directly above the Tongtian Bridge and then condensed, turning into a man with a fiery red battle armor mask. He has a fiery red color. War armor, fiery red hair, a "cosmic warrior" hovering around him, and a red moon disk under his feet.

Except for not carrying double knives on his back, it was exactly the same as the weapon used by Wang Yi.

"You can reach the thirteenth floor from the first cosmic level. You are the first one in history." The man's golden eyes looked at Wang Yi in admiration. . "Surprising little guy, let me see if you can create a new record today."

"As you wish!" Wang Yi smiled slightly.

"Snapped!"

The "cosmic warriors" floating around the two suddenly split from the middle and turned into two parts...One part of the silver crystal lozenge, the other part of the gray crystal lozenge, distinct and fused together, as if two rivers, one silver and one ash, are each other. Entangled together.

10081 pieces of silver crystal lozenge contain the mysterious pattern of the origin law of time, and 10081 pieces of gray crystal lozenge contain the secret pattern of the origin law of space.

Strips of silver and gray silk threads stretched in the void, densely packed, forming a mysterious pattern.

The power of the original law of time and the power of the original law of space are simultaneously mobilized and integrated into the "universe magic weapon"!

Time changes.

Void tremors.

"Buzzing~~"

In the air, a thread-like spear spike that was more than six meters long appeared.

The sixth stage of the cosmic warrior-the instant star mark!

When his own cosmic magic weapon was formed, Wang Yi felt extremely difficult!

After all, Wang Yi's physical fitness is first-order in the universe! If it weren't for his avatar consciousness assistance, it would be impossible to independently complete the sixth change of the universe's magic weapon, second only to the strongest form of "killing the gods"!

This is also why it is more difficult for young geniuses to cross the Tianqiao as they go to the back. In addition to the law perception, the most important thing is that their physical fitness is too weak.

Although the opponent is also the first-order universe, it has the setting of the virtual universe. Although it is also the first-order universe, his setting can perfectly and smoothly display the universe magic weapon of that level! Of course, it is impossible for him to possess the avatar consciousness against the sky like Wang Yi can exert power far beyond his own level.

When the two sides have completed the combination of the universe magic weapon at the same time ~www.mtlnovel.com~ at the same time point to each other, shouting: "Go--"

The two silver-gray handles that were originally stagnant in the air were intertwined like threaded spikes exuding a sharp aura of tearing the sky and the earth. They suddenly shook, and then disappeared from the sight of the two of them.

Wang Yi's mind was startled, the "Sixth Armed Force of the Universe" communicated with the surrounding time and space, allowing him to instantly discover the location of the opponent's weapon.

The same goes for the man with the flaming red battle armor mask on the opposite side.

The two sides coincided with each other, manipulating weapons at the same time, and collided viciously.

There is no weapon at all, only ripples appearing in the void between the two sides.

That is the space fluctuations caused by the collision of the forces of the laws of time and space contained in the weapons of both sides.

Silently.

The scene is extremely strange and thrilling!

Many immortal gods in the square saw this scene silently.

[Chapter 184: Level 7: Killing God!](#)

Being able to display the sixth stage of the universe magic weapon at the first tier of the universe, Wang Yi can be regarded as the first person in history.

Upon seeing this scene, those immortal gods who had been shocked and beyond their limits began to discuss vigorously with a blast like a honeycomb.

"The sixth cosmic weapon, Wang Yi has actually mastered the sixth cosmic weapon!"

"Being able to use the sixth level of the universe's magic weapon, and being so perfect, it means that his perception of the original law of time and space must be very high, definitely reaching the twelfth level! However, I can't figure out how he did it."

"Nonsense, you are here again, such an extraordinary monster cannot be explained by common sense."

"It's incredible!"

Many immortal gods are still immersed in shock at Wang Yi's performance.

Don't blame them for this.

It is really incredible that Wang Yi, a cosmic little guy! This is the first time for the human race to have such a miracle!

"boom!"

"boom!"

A stalwart figure appeared, endless coercion permeated, and an ancient existence far greater than the immortal gods descended.

Among them, there are also the Nine Swords Venerable and the three-eyed old man Kandry!

He couldn't help but when he received Wang Yi rushing through the twelfth floor of the Tongtian Bridge, he still showed up with his friends.

In addition to them, there are also a large number of immortal gods and many cosmic elders flocking to them.

Soon the islands were densely packed, endless laws of fluctuations were pervasive, and the terrible pressure kept the void shaking. Thousands of immortal gods and hundreds of cosmic sages gathered here in a short period of time!

The center of their sight was the black-haired boy on the screen who was fighting with the gatekeeper on the 13th floor of the Tongtian Bridge!

Seeing this scene with their own eyes, they were amazed, shocked, admired, and regretful... all kinds of emotions, and so on.

And all the 816 new talents of Virtual Universe Company except Wang Yi appeared here!

"Wow!"

There was a sudden uproar on the island!

The man in the fiery red battle armor mask on the screen didn't know what happened, and his body suddenly exploded and fell apart.

Then, ripples appeared around Wang Yi, and a crystal spike appeared out of thin air.

Wang Yi passed the thirteenth floor of Tongtian Bridge!

This once again shocked many strong people!

"The thirteenth level is far more difficult than the twelfth level, and he can actually pass..." an immortal spirit murmured.

Compared with the shocked immortal gods and venerables, the geniuses of the virtual universe company are even more unbearable!

Buran had lost his blood on her face, her lips were trembling, her eyes had lost focus, and she looked at the screen blankly.

No matter how stupid he was, at this time he knew that the gap between himself and Wang Yi was already so big that it would be hard to make up in his lifetime!

"The sixth floor..."

"Thirteenth floor..."

Beran smiled nervously.

It's the other geniuses, one by one, all faceless, one by one pale!

The gap between them and Wang Yi seems to be hundreds of millions of light years away! That is a realm they can never reach!

"Such a genius monster actually appeared among us, I don't know if it is lucky or unfortunate." A genius murmured.

"Yes, Wang Yi, even in the history of the human race, they are probably the most terrifying kind of genius. We can't compare them." Some geniuses sighed.

They are not stupid, and they all understand that the talents shown by Wang Yi will probably be highly valued by the human race immediately, and they will invest unimaginable resources to cultivate them. The gap in strength between them will only increase. They can only look up.

Oh, no, or they can only look up now.

"Guru..."

Luo Feng and Rong Jun looked at the handsome and handsome Prince Kaxing who was nervous and swallowing his saliva with difficulty.

Uka suddenly grabbed Luo Feng's arm, "Luo Feng, your brother Wang Yi is not a wife. There are still several sisters in my family who have no partners. Or, my aunt can do it too. I think my father and king. I won't mind..."

Luo Feng: "... This always rebellious, fighting-spirited Prince Barbarian Star has been irritated and confused. Is he talking nonsense?

The miracles that Wang Yi created again and again completely shocked them.

Countless people on Tongtianqiao Island were watching the screen with breathlessness.

The fourteenth floor of Tongtianqiao.

On the hot and dazzling star, the flames rose up and condensed into a "flaming armor man".

"The Universe can pass through the fourteenth floor. You are the first person in history." The man with a fiery red battle armor mask was in the flames, with his golden eyes staring at the black-haired boy on the opposite side. The distance between the two sides was hundreds of kilometers. , But the voice still

spread to the other side clearly. "It is an honor for me to fight against a genius like you! The next battle...I won't be merciful!"

"The fourteenth floor is different from the thirteenth floor. Although the sixth layer of the universe magic weapon is also used, but..."

Wang Yi's face was calm, his hands slowly lifted, and at the same time, the silver-gray crystal behind him was radiant!

"Boom!" The universe's magic weapon burst, and diamonds flew all over the sky.

20162 beautiful silver-gray crystal diamonds are arranged on Wang Yi's head like stars, and the secret patterns of the laws of time and space are intertwined. After a combination of incomparably complex but precise calculations, the one is incomparably beautiful. , The crystal shuttle with mysterious patterns all over the body appeared!

It is vaguely the same as the most primitive form of the cosmic warrior, but it is very different. This is the seventh stage in the legend of the cosmic warrior, which is the final form-the killing of the gods!

The perfect combination of time and space!

Not even like the previous ones, except for the huge spatial fluctuations that occurred when the combination was first started, after the combination was formed, no breath of power was leaked, quietly suspended in the air, crystal clear, and flawless.

The flame armor man's voice stopped abruptly, and his pupils shrank sharply.

"The seventh cosmic warrior-Killing Gods!?"

Wang Yi said softly: "You are my first true opponent after I practiced this trick. Let me have a taste of its sharpness."

The seventh stage of the universe magic weapon-Killing the gods!

The power is amazing! Even in the vast universe, not many can be displayed before immortality!

Wang Yi also struggled in order to perform at the universe level.

After all, the basic strength is too far away. Even if Wang Yi's law is against the sky, no matter how good the technique is, without enough strength, it is difficult for to display it.

If it weren't for Wang Yi's clone of the Void Zerg Clan to have reached the ninth level of the world master level (840 times the genetic level), with an inconceivably powerful consciousness bonus, Wang Yi would not be able to perform this trick.

The flame armor man finally realized that he was facing an unprecedented monster.

The crystal shuttle flashed and disappeared in the void, flickering and appearing, fascinating.

The flame armor man hurriedly controlled his cosmic magic weapon to stop him. Within the space of the cosmic magic weapon's influence, he could feel the opponent's weapon quickly approaching him with terrifying speed and unpredictable trajectory.

The "crystal spike" of the Flame Armored man wanted to intercept Wang Yi's crystal shuttle, but found that he couldn't catch up.

Shuttle in the void! Time warped!

"Puff!"

The next moment, a beautiful light flashed, and the body of the flame armor man was penetrated by the crystal shuttle.

Wang Yi, win!

[Chapter 185: There is no one like me in the world!](#)

"Ha ha ha ha....."

The black hair was flying, and the young man wearing a dark red shirt stepped on the red moon disc, and flew quickly to the entrance of the fifteenth floor where the Tongtian Bridge appeared.

3300 years of penance! Just for today's exciting battle!

Kill him upside down! The world is crazy!

In Wang Yi's hearty laughter, he disappeared on the fourteenth floor of the bridge.

I don't know if Wang Yi is crazy or not. The many powerful people gathered on the islands on the plane of Tongtianqiao are going crazy.

"Oh my God!"

"This Wang Yi is crazy!"

"Universe level, broke through the fourteenth floor!!!"

As we all know, the tenth floor of the Tongtian Bridge is generally immortal gods.

The fifteenth floor, has reached the level of the immortal gods!

Wang Yi, a little cosmic guy who has been practicing for less than a hundred years, broke through to the fifteenth floor of the Tongtian Bridge!

It is also the most difficult cosmic bridge among the 52 chaotic monuments!

In the long years of the human race, countless peerless geniuses, scientific truths, fire eclipses, eclipses of the sky have emerged... but none of them is as terrifying as Wang Yi!

Cultivation for a hundred years, cosmic level, possessing the enlightenment of the immortal law of the marquis! What is this concept! ?

What's more, this is still the most difficult to practice, and it is the cosmic chaos monument that also cultivates the two fundamental laws of time and space at the same time!

An immortal **** could not even help his emotions, and said in an extremely excited tone: "This Wang Yi, if he does not die, he will definitely become a super power in our human race in the future!"

No one thinks what he said is wrong.

There is no precedent in the history of human races like this, and the talent can be called the first peerless genius. I am afraid that becoming a venerable is a solid matter. I am afraid that it is still very likely to become a higher-level existence... For a time, many people have many ideas in their hearts. .

Wang Yi, who is only at the cosmic level, has already affected the minds of these ancient beings who have been standing high in the universe for a long time.

And Luo Feng, who was in the crowd, looked at Wang Yi, who was advancing bravely on the screen, but the scene of them getting together when they were young many years ago appeared in his mind. How immature they were at that time, who can think of it. Then, one day, his partner can actually stand on the pinnacle of the universe and be watched by countless great beings!

"Wang Yi..." Luo Feng's heart surged.

Somewhere in the endlessly distant starry sky, in the vast and majestic temple complex, the top floor of the most majestic palace.

The burly tall black bear man in the gold silk robe opened his eyes, and the black and white eyes that distorted the stars revealed a faintly different color.

"Wang Yi...my apprentice, I didn't expect that he was so good at him, so he still looked at him as a teacher."

The strong black bear murmured.

"That's right, if he doesn't have the chance to go against the sky, he will pass the fifteenth floor of the Tongtian Bridge no matter how high the algorithm is."

"But so what, he is my disciple of Pang Bo, and he will be my disciple for one day, and he will be my disciple for the rest of his life."

"what!"

"Hahaha!"

"I, Pangbo, can receive such a good apprentice! It's a godsend to me too!!!"

"Pang Bo!"

A huge voice straddled the endless distance and suddenly appeared in the consciousness of the brawny black bear.

Venerable Pang Bo, who was laughing excitedly, suddenly froze.

"teacher!"

...

"Chichichi..." The endless flames surged around. The 14th floor of the Tongtian Bridge has come to an end, and Wang Yi is standing at the end of the Tongtian Bridge, still choosing the master as his opponent. This time the opponent is still the "flaming armor."

"His Royal Highness Wang Yi!" The gatekeeper, who has always been indifferent, used honorific words this time. "His Royal Highness Wang Yi is able to break through here. It is unprecedented, and he will be able to make a name for my human race in the future! But it is very difficult for His Royal Highness to pass my level!"

"What I use is the last move of the Universe God Soldier-Killing God!" The Flame Armored man smiled.

Wang Yi's expression hasn't changed much. He has already expected this.

"Boom!" The two sides stopped talking, and broke out at the same time, and the two perfect forms of the "Universal God Soldier" finally appeared in combination at the same time.

The whole world seemed to bend down under the pressure of a certain heavy aura.

Whoosh!

When the beautiful crystal shuttle vibrated, it disappeared.

Wang Yi is highly concentrated.

The seventh stage of the "Universal Weapon", the reason why it is so powerful, even known as the "God Killing", is because of its ability to travel through the void, like teleporting! And with the effect of time acceleration and distortion!

Appearing in front of the opponent in an instant, time warping, and exploding faster, the terrible lethality, even the immortal gods, is difficult to defend against!

To achieve this step, you can easily defeat or even kill Immortal at the level of the master!

However, this requires a very high level of user perception. Normally, many peerless genius masters who reach the fifteenth and sixteenth levels may not be able to perform the seventh stage of the 'universe magic weapon'!

The reason is that the law of origin of time or the law of origin of space cannot meet the requirements at the same time!

And being able to achieve the time-origin law and the space-origin law at the same time achieve the use of cosmic magic weapons, it is estimated that becoming immortal is a breeze.

Two cosmic warriors appeared in the sea of flames, constantly shuttled and fought!

In terms of the situation, Wang Yi was faintly suppressed, and the two magic soldiers were getting closer and closer to him.

"Huh?" Wang Yi could see that the opponent's attempt was to compress his space, and when the battlefield was near him, he suddenly shot himself to death.

"There is no way, it can only break out completely." Wang Yi took a deep breath. Originally, he wanted to fight with the opponent based on his own true laws, but he underestimated the level of the gatekeeper on the fifteenth floor.

Moreover, it is indeed too reluctant to control the cosmic magic weapon at the cosmic level, and it is impossible to want to be perfect.

Since it can't be perfect, then... just shake it!

Wang Yi's aura suddenly changed, and an extremely powerful consciousness blessed on the crystal shuttle that was struggling to resist the opponent's cosmic warrior.

Consciousness is the general of mind, and will is the commander of consciousness! A strong sense of will will make the soul exert ten times a hundred times more power.

"Boom!" The original cosmic-level first-order mental power crystal shuttle seemed to have taken stimulants~www.mtlnovel.com~ The power burst instantly, the speed soared, and a rush, fiercely hitting another cosmic **** that was caught off guard. Pawn.

The cosmic soldier who had the upper hand was hit and flew hundreds of kilometers away.

The stronger the consciousness, the stronger the will, the greater the power of the thought force weapon that will naturally be exerted!

Hum!

Wang Yi's cosmic warrior was unforgiving, and rushed toward the opponent whose complexion changed drastically.

The flame armor man tried his best to control his cosmic magic weapon to resist Wang Yi's attack, but it was too late.

Peng! The crystal shuttle pierced his head like a bamboo, and under the bombardment of that terrible force, the flame armor man headshot without accident!

Wang Yi...successfully broke through the 15th floor of the Universe Tongtian Bridge!

And on the beautiful central island on the Tongtianqiao plane, there was no sound at this moment, the great cosmos venerables, the immortal gods did not make any sound this time, just silently watching the heroic and prosperous young man on the screen!

[Chapter 186: Points purchase](#)

Virtual universe, Manor 114, Primitive District.

Wang Yi came out of the Tongtian Bridge and sat in the study on the third floor of the pavilion, feeling pretty good.

"Well, there are many more emails."

More than two hundred emails were sent by friends Wang Yi knew, other immortal gods, or even Venerable Universe.

Of course, those Cosmos Venerables could no longer mention the matter of accepting disciples this time. Instead, they expressed their appreciation and friendliness to Wang Yi in the email, and they also had a vague sense of wooing.

Some e-mails from immortal gods even praise or even compliment the content.

"Oh, so enthusiastic, I feel a little embarrassed to say it." Wang Yi smiled and shook his head.

"This time, I passed through the fifteenth floor of Tongtianqiao."

The sixteenth floor is based on Wang Yi's universe. It is too difficult to break through. After Wang Yi is defeated by the gatekeeper, he has no interest in breaking through.

Although the ten times points rewards for breaking through the sky bridge in the Chaos City rookie period are very tempting, there is no way to break through.

not to mention.....

"Well, with my current strength, I can already go to the cosmic-level primitive Tongtian Mountain. There was light in Wang Yi's eyes.

"The cosmic-level primitive Tongtian Mountain, it is rewarded with 100 million points! Although it can only be obtained after the master of the world!"

Breaking through the primitive Tongtian Mountain is the sign of the truly supreme genius!

There are three Tongtian Mountains-the primitive Tongtian Mountain, the Taichu Tongtian Mountain, and the Tiandi Tongtian Mountain.

If a "Apocalypse member" successfully traverses three Tongtian Mountains in one go, then he can be directly promoted to a "Primitive Mystery member"!

The cosmic grade 'primitive Tongtian Mountain' requires the ability to pass through the 12th floor of the Tongtian Bridge in order to pass.

"But the three gatekeepers of the Primordial Tongtian Mountain, all seem to be the ninth cosmic level... It's a bit troublesome, forget it, I'm not in a hurry, and I can go after I break through the domain master level soon." Wang Yi thought for a while. Just put this aside for now.

This time, he rushed from the seventh floor to the fifteenth floor of the Universe Tongtian Bridge, surpassing the ninth floor in one breath! I don't know how many people will be shocked.

And breaking through these nine floors also allowed him to get 30,704,000 points.

With the addition of 97,300 points on the original account, the total points on his account now have reached an astonishing level of 30.8 million points!

"With these points, the two special secrets of Yanxing Behemoth, "Yanxing Bian" and "Space Realm" can also be purchased. Moreover, I have passed through the fifteenth floor. According to the teacher said that day, I can get "The first nine cheats of "The Evolution of the Universe"!" Wang Yi's breathing was short.

"Universe Evolution" is one of the most expensive cheats in the top 100 in the virtual universe company's treasure house! Worth one trillion points! Can't discount yet!

But if Wang Yi can get through the fifteenth floor of Tongtianqiao, he will immediately get the first nine cheats for free!

If you have to buy it yourself, you have to spend 100 billion points! Even the Lord of the Universe has to hurt his muscles and bones!

The book "The Evolution of the Universe" is a kind of practice and perception system that analyzes the essence of the original law of the universe's time and space, and drills out the above ten thousand secret methods.

For Wang Yi's role, it is only under the treasure "Universe Chaos Stele".

"Treasure Treasure." Wang Yi clicked on the Treasure Treasure folder, and then selected "Secret Techniques".

Enter directly the search term of Yanxing Giant Monster.

drop! A list of secrets related to Yanxing Giant Beast appeared on the laptop screen.

The secret method of "Blank Star Change", 8,000,000 points can be exchanged (30% off the original secret realm, 20% off the secret realm of the beginning, 10% off the secret realm of heaven and earth, full price of the secret realm in the last days)

"Space Realm" secret method, 7,800,000 points can be exchanged for 30% off the original secret realm, 20% off the secret realm of the beginning, 10% off the secret realm of heaven and earth, and full price of the secret realm of the last days)

.....There are 21 special secret methods related to Yanxing Giant Beast, and 3756 common secret methods.

"Very good." A smile appeared on Wang Yi's face. "Bought "Blank Star Change" and "Space Realm", and then buy a few common secret methods suitable for the cultivation of the Yanxing Giant Beast, it's almost the same."

"Blank Star Change" and "Space Realm" are the most expensive, and they require 5.6 million and 5.46 million points respectively to buy them after discount, while the other common secret methods add up to less than 100,000. It can be seen that... the first two secret methods It is the pinnacle of the Yanxing Giant Beast clan.

"The transaction is successful!"

"After deducting 11,152,500 points, the balance is 19,551,900 points."

"Please wait, someone will deliver the secret method soon." A string of prompt text appeared on the screen.

"The purchase was successful." Wang Yi smiled, "With these secrets, I believe that the strength of my Yanxing Giant Beast clone will be even higher."

"Yan Xing Bian" can be regarded as a secret method of body amplitude.

And "Space Realm" is a secret method of space body law.

Wang Yi will not lose any of the three three bodies, and will do his best to strengthen it!

The Yanxing Giant Beast seems inferior to the Void Zerg clone, but it doesn't look at the Void Zerg clone, but it is a special life in the universe, which is inherently against the sky.

And no matter how the Yanxing Giant Beast is a race of the pinnacle of the universe, once it grows strong and grows to the pinnacle, it is also a monster that can fight against immortality at the master level.

What's more, Wang Yi's "Secret of the Nine Tribulations" continues to evolve genetic levels, and it is destined that the avatar of the Yanxing Giant Beast will be the scariest one in the history of the universe.

Wang Yi and Luo Feng are different!

The world like the golden horn behemoth conceives life... also has a fertility limit. It is unrealistic to conceive a life-defying life that is inherently 280 times the genetic level, such as the clone of the Void Zerg.

And Luo Feng's three bodies share the same core and the same inner world. Prosperity and prosperity, loss and loss!

But Wang Yi is different. His core pronucleus can only breed clones, which can be conceived at a level that is 100 times higher than his own genetic level, and other clones have their own internal worlds.

For example, the Flame Star Giant Beast has its own internal world, and the Void Zerg also has its own internal world, at most... that is, the manifestation of the internal world is different.

When Wang Yi becomes the master of the world, it is estimated that he will also have his own internal world of his own human body.

So even if Yanxing Giant Beast's own pronucleus includes the destruction of the inner world, it doesn't matter. It can be re-bred from the "Clone Pronucleus", but the cost will be much higher than Luo Feng's prokaryotic world.

But for both, the pronucleus is the root.

...

There is still one day before Wang Yi leaves Chaos City.

"Master, someone is visiting." An electronic voice rang from the practice residence.

"Yeah." Wang Yi opened his eyes, got up, walked out of the lounge, and opened the door to the living room. Standing outside the door were three men and women in black robes, each of them filled with a powerful atmosphere of the world, all of them are the masters of the world.

"Black-robed messenger of Chaos City?" Wang Yi moved slightly in his heart.

The tall woman in black robes headed by ~www.mtlnovel.com~ has purple eyes, she smiled and said: "His Royal Highness, we are from the City Lord's Mansion, and we are here to give you something specially." She waved her hand. A simple ring flew towards Wang Yi and was caught by Wang Yi.

"This is..." Wang Yi raised his head.

"This is a secret. His Royal Highness Wang Yi will know by checking it for himself. We are leaving first." The three black robe envoys turned and left.

And Wang Yi returned to the living room of his residence with the quaint black ring.

"Why would the City Lord's Mansion suddenly send me a ring for me to check?" Wang Yi moved in his heart, and a thought force quickly penetrated into the ring. There was a layer of concealed protection outside the ring, but it touched Wang. After Yi's soul breath, there was no obstacle.

Wang Yi clearly saw that there was a golden token in the ring space, with a faint carving on the token, which faintly resembled a city.

Wang Yi moved in his heart and realized what it was.

"A token to call the Lord of Chaos City to rescue?"

[Chapter 187: Teacher's gift](#)

Wang Yi deepened his mind into this golden token, read the spiritual branding information inside, and completely determined that this was the distress token given to him by the "Chaos City Lord".

To be able to give him such a token is enough to see the importance of the Chaos City Lord and the human race to him.

Like those immortal kings and even venerables, it doesn't necessarily mean that City Lord Chaos will care.

"Hey, the Lord of Chaos City gave me tokens, and he didn't even ask me to see him..." Wang Yi was a little disappointed.

He has been looking forward to the ruined time and space of City Lord Chaos for a long time, and he feels that he must be able to get something good there.

If you can, it's best to draw that "Ku Yuyi Killing (Chaotic Golden Wing.

Kill Wu Yuyi, a total of six pairs of wings. It is a mechanical treasure. Especially after the "source" transformation, the attack power displayed will be extremely strong. This mechanical flow treasure... generally allows the strong to leapfrog and fight, so it is also a very popular genre in ancient civilizations, which can be almost tied to the melee flow!

If there is a single pair of wings, it is just ordinary supreme power.

In general, this is a weapon that surpasses the eternal true **** and is only under the king of chaos. The complete form of Wu Yuyu Wing, once all the internal core energy bursts out, it can even kill countless world beasts in an instant.

Although Killing Wu Yuyi is a treasure suitable for those who practice the "space and gold" fusion law, because of its particularity, in the absence of better treasures, it is already the best choice for Wang Yi at present.

If you can sign a complete form of Wu Yuyu with six pairs of wings directly from the Chaos City Lord, then it will really be sent! Except for the "Star Tower", the total treasures of the entire primitive universe are probably not as good as the "Slaying Wu Yu Wing".

Wang Yi spit out silently again. Luo Feng deserves to be the protagonist of the destiny, even if he is from the city lord of Chaos, he will give it away, and he will give away treasures with a background that is too big to be against the sky.

Some of us traversers don't "corrupt" a bit, so how will they get mixed up in the future?

"Master, someone is visiting." An electronic voice sounded again in the practice residence.

Wang Yi was slightly startled. "It's the last day, how come so many people come to me?"

"His Royal Highness Wang Yi." Outside the door, three world masters wearing silver armor stood outside. One of the female world masters with silver eyebrows and eyes handed over a ring and smiled: "His Royal Highness, this is an item sent to you by the Virtual Universe Company by someone else, please sign for it."

"Give it to me? But I remember I haven't bought anything recently. Is it the wrong item?" Wang Yi was a little puzzled.

The female master Lian said: "There can be no mistake, this is delivered through the internal channels of the virtual universe company."

When Wang Yi heard a move in his heart, he said, "Oh, then you can give it to me."

After the three world masters left, Wang Yi returned to the house alone again, holding a silver ring in his hand.

Wang Yinianli entered the space ring, and he was immediately shocked. He found that inside the space was a silver-white triangular spacecraft, and with Wang Yi's current eyesight, it could be seen that the value of this spacecraft was absolutely extraordinary, at least at all. It is an F-class immortal-class spaceship.

Just like the spacecraft "Meteor Star" owned by the owner of Meteorite, it is at least worth millions of mixed yuan units.

Of course, with Wang Yi's current wealth, it is easy to buy such a spacecraft.

Wang Yi also wanted to continue to observe and understand this spacecraft, when the intelligent life 'Bermuda' suddenly sounded in his mind. "Master, your teacher, Venerable Pang Bo, asked you to come and see him."

Yuxiangshan primitive area in the virtual universe.

"teacher!"

In the living room of the manor, Wang Yi stood in front of a burly black bear in a gold silk robe.

Venerable Pang Bo was sitting, the hill-like body was also taller than Wang Yi, full of oppression.

However, his eyes looked at Wang Yi with a hint of smile.

"You should have received the space ring just now, right?"

Wang Yi had already guessed in his heart, and said, "Teacher, you gave me the spaceship?"

"Haha..." Venerable Pangbo couldn't help laughing, his voice loud and loud.

He raised his huge palm and stroked the long hair on his face.

"You are leaving the Chaos City, and you are about to go to the secret realm to practice. Since you are my disciple, the teacher will send you a spaceship to make you safer in the secret realm adventure."

"That spacecraft is considered extremely high in the level of the spacecraft dedicated to the immortal gods. Even if it is immortal, many of them cannot be bought. However, it is only a trivial matter to your teacher. Although you are still cosmic, you can The status of the virtual universe company is not too prominent with this spacecraft."

"Thank you teacher." Wang Yi smiled slightly. Although he himself could afford this spaceship, it was the teacher's intention after all, and Wang Yi would not deliberately refuse it, but would keep the other side's favor in his heart.

The relationship between teacher and student in the universe is extremely stable, just like the closest relatives. After all, relatives will die of old age, and if there are no accidents, the relationship between teacher and student will accompany you throughout your life.

Venerable Pang Bo devoted himself to teaching Wang Yi over the years and was very grateful, respecting him as a respectable elder.

This feeling is difficult to understand unless you experience it yourself.

"Right, teacher..." Wang Yi suddenly remembered the golden token that Chaos City Lord sent to him just now. He didn't know if his teacher knew about this. After all, the teacher was the first disciple under the Chaos City Lord's gate.

When Wang Yi hesitated to say this, Venerable Pang Bo laughed immediately.

"Your teacher, I already knew about this."

"Since your master gave you something like this, it means that he values you. After all, you are currently the best genius of our human race. You will definitely encounter hostility from other races, and you may encounter many dangers in the future. Your master The ancestor gave this to you, but also worried that you will fall... But you can't rely on this to be unscrupulous. There are endless dangers and dangers in the universe. Even if you are a teacher, I may fall. You must always be in awe of the universe. , You can't be arrogant, you know?" Venerable Pang Bo's face was solemn, and he warned him earnestly.

"Yes, teacher, disciples must keep this in mind!" Wang Yi also said in a deep voice.

In fact, it is really difficult for Wang Yi to die. Unless he is controlled by some super beings unsuspectingly, once he enters the realm of time, even the power of Chaos City Lord can only stare at it And before he really grows up, Wang Yi will not easily give opportunities to other hostile races.

"By the way, teacher, I want to ask, how much do you know about the secret missions of our cosmic geniuses?" Wang Yi asked again with a move in his heart.

Many secret realms of the peak forces of mankind hide big secrets and fortunes behind them, such as the fallen beast gods in the world of Xueluo, the magic sound **** generals and the cold ice **** generals of the demon mountain, and other secret worlds, etc. ...All more or less, containing big fortunes.

Of course, the greater the chance, the greater the danger.

Those secrets are difficult to find on the face of the Virtual Universe Company, and Wang Yi's current authority is not enough.

However, my teacher is a virtual universe company, and the high-level human race must know the secret.

Venerable Pang Bo looked at Wang Yi and instantly understood what the disciple meant. He subconsciously touched the long hair on his face, showing a pensive color. After a long while, he said in Wang Yi's color of surprise: "Well, anyway, you will do it in the future. I'm going to do a training task...it's okay to tell you something..."

[Chapter 188: The shocking Luo Feng](#)

After the teacher left, Wang Yi sat on the sofa in the living room with his arms folded and propped his chin on his chin, thinking about the secret information he had received from the teacher.

"It turns out that most of the secret realms controlled by the five pinnacle forces of the human race have some unknown secrets behind them." Wang Yi sighed.

Just like the world of Xueluo, a natural beast **** fell there in ancient times.

The magic mountain in the secret realm in the early days was originally owned by a certain alien power. Later, because the human power extended here, it also silently retreated. From then on, the place where the two great gods inherited the magic mountain was controlled by the human race, or Hongmeng.

As one of the six peak races in the universe, the human race is indeed extremely powerful.

"I am a member of the Primal Secret Realm. At the cosmic level, I can do three desperate level missions or fifteen dangerous level missions." Wang Yi continued to think. "I have to consider these eighteen tasks carefully before I can make a decision."

In many mission worlds, great fortunes are hidden, which is still very helpful to Wang Yi now.

Like the "Blood Luo World" "Blood Luo Power" can improve the genetic level.

Like the magic sound **** will inherit, can increase the amplitude of thought power!

Each can be said to be very powerful.

"However, those places are generally full of crises and extremely dangerous. Even if I have a clone, I can't be careless." Wang Yi opened his laptop and said, "Buy an advanced detection instrument."

After purchasing the secret method for Yanxing Giant Beast, Wang Yi Virtual Universe Company's core member account still has more than 19 million points, which can be said to be very rich.

And in the Universe Galaxy Bank, there are hundreds of millions of mixed yuan of funds!

However, these funds Wang Yi are ready to invest in the secret method of "Banyan Star Beast" clone.

"The Change of the Flame", a special secret method specially prepared for the behemoth of the Flame Star, is divided into three layers. If you want to practice, you must consume a lot of precious and extremely complex materials.

The first level of "star change" can increase your body shape by ten times and increase your strength by three times!

The second level of "Dark Star Change" can increase your body shape by a hundredfold and increase your strength by nine times!

The third layer of "black hole change" can increase body shape by a thousand times and increase strength by 27 times!

With such a great increase in strength, the difficulty of cultivation is of course also very difficult!

Throughout the ages, there have been very few Yanxing giants that can successfully cultivate the second level.

There are only a handful of people who have successfully cultivated the third level, and they are all legends among Yanxing Giant Beasts.

"The Yan Xing Bian" this set of exercises is against the sky. Strength has risen exponentially! But this set of exercises is too demanding on various materials, and the price is ridiculously high.

According to Wang Yi's estimation, if you want to fully cultivate the second level successfully, you need to invest tens of billions of yuan in the unit to achieve it. It is enough for an immortal king to ruin his family!

Even if the current Wang Yi is bankrupt, he can only do it to make the Yanxing Giant Beast clone and cultivate to the second level, increasing his strength by about 6 times, and the further he goes, the higher the price for every increase.

Wanting to rise to the second level 9 times is not something he can afford now.

Wang Yi opens "Tools" and selects "Detection Instruments".

Whether it is the cosmic starry sky or secret realm or some special environment, detection instruments are very important, and they are also necessary equipment for the strong to venture out.

"Tsk tsk, this detection instrument, as expected, the larger the detection range, the higher the precision, the more advanced and the more expensive it is."

"However, you can't save, especially for me. Investing now is for more gains in the future. There are never too many cards to save your life."

Wang Yi kept browsing the introduction information on the page.

"Well, that's it. It can detect a range of one billion kilometers, and at the same time, it can detect a range of 10,000 kilometers with "high intensity". This detection instrument is introduced as a very high-end equipment, which can maintain a large range and a small range. The two kinds of detection are carried out at the same time, and the small-range detection is more careful and advanced." Wang Yi finally took a fancy to a high-end detection instrument.

tpx089 detection instrument, can be exchanged for 5.6 million points (30% off the original secret realm, 20% off the secret realm of the beginning, 10% off the secret realm of heaven and earth, full price of the secret realm of the last days)

High-end members such as Wang Yi, the original secret realm, cost 30% off, and all need a full 3.92 million points to buy it.

However, this is because Wang Yi is taking advantage. If such a high-end detection instrument is outside, I am afraid that it will not be able to get it without tens of millions of mixed yuan units.

"The transaction is successful!"

"With 3,920,000 points deducted, the balance is 15,631,900 points."

"If the small money does not go, the big money does not come." Although Wang Yi felt distressed, he still bought the tpx089 detection instrument.

Wang Yi searched for 'technological weapons' again.

The strongest Vulcan Origin Crystal, 30 billion points? Equivalent to 10 times the power of Fengwang Peak's self-destruction! Even there is a certain probability that the limit of the king will fall!

The super A-812 Vulcan Origin Crystal also needs 12 billion points! Quite 3 times the power of Feng Wang Pinfeng's self-destruction.

The advanced b-755 Vulcan Origin Crystal is worth 200 million points each, and if one is detonated, it can be comparable to the emperor's self-destruction.

...

The lowest grade V-1129 Vulcan Origin Crystal (comparable to ordinary flame immortal gods that explode), purchased with Wang Yi's current authority, can be exchanged for one after discount of 600,000 points.

But... is it worth it? With the current strength of the Void Zerg clone of Wang Yi and the insight of the law, it is possible to kill ordinary immortal gods. There is no need to use the Vulcan Origin Crystal, and the opponents who need the Vulcan Origin Crystal to deal with it can't afford it.

And if he really needs it, his Flame Star Giant Beast clone is now the pinnacle of the world lord, using the "Star Flow Fire" talent secret method to explode, and the power may still be higher than the lowest Fire God Origin Crystal. The pronucleus of the Yanxing Giant Beast clone can also escape through space. As long as the pronucleus is still there, it can quickly recover and be used unlimited times at a much lower cost than a Vulcan Origin Crystal.

So why bother, spend the points on other aspects, such as the internal world of the Yanxing Giant Beast or the "Yanxing Transformation" secret method, isn't it good?

Wang Yi looked at his poor points, and silently shut down the treasure house website.

...

"Huh?" Just as Wang Yi wanted to quit the virtual universe, he received another email from the plane of Tongtianqiao.

When Wang Yi opened it, there was a hint of surprise on his face.

"Luo Feng...passed the sixth floor of Tongtianqiao?"

Not only Wang Yi, but also a group of newcomers from the Virtual Universe Company, including some high-level powerhouses who pay attention to them, also received emails.

When they opened the email and saw the news, they were shocked.

"Luo Feng? Crossed the sixth floor of Tongtianqiao?"

"Didn't he just cross the fifth floor of the Tongtianqiao just a few years ago? How come so fast...?"

"Luo Feng!"

"Luo Feng!"

I don't know how many people are chanting this name~www.mtlnovel.com~ The geniuses and newcomers of virtual universe companies are really shocked this time.

Monsters other than Wang Yi are not discussed.

As a peerless genius who came out of Ten Thousand Era, they could understand that Bolan could pass the sixth level.

Although Luo Feng has made amazing progress over the years, he is still far from the perception of Berran's Law in essence.

Many people feel that it will take at least a hundred years for Luo Feng to pass the sixth floor of the Tongtian Bridge!

How could he have passed the sixth floor of Tongtianqiao now?

It can be said that on the day when Luo Feng was about to leave Chaos City, the news that Luo Feng had crossed the sixth floor of the Tongtian Bridge shocked many people.

[Chapter 189: Primitive Secret Realm](#)

Chaos City.

A group of human figures flew into the spaceship along the entrance of the belly door of the "big fish".

In the lounge of the spacecraft.

As soon as 817 young people entered the lounge, they talked familiarly with each other.

But Luo Feng, who had just passed the sixth floor of the Tongtian Bridge, was surrounded by several acquaintances.

"Luo Feng, you kid sneaked through the sixth floor of the Tongtian Bridge without making a sound. It's a bit too much." Mankaxing Prince Uka looked upset.

"Good luck, good luck, it's just that there was an epiphany at that moment." Luo Feng smiled slightly.

"Just scream!" Uka slammed Luo Feng's chest hard.

Buran, who was dressed in white, was sitting alone not far away with a cold face, and his expression was much colder than before.

"Luo Feng..." He glanced at Uka's side and said silently in his heart.

"Even you are catching up with me?"

"At the same time, taking into account the original laws of time and space, am I really wrong?"

Buran remembered the advice given by his immortal teacher and some big figures in the virtual universe company, and his persistence for a long time was finally faltering.

Perhaps, the law of space is the main principle, and the law of time is supplemented, which is really suitable for his cultivation path?

Beran took a deep breath, his eyes firmed down.

Under Wang Yi's unknowingly influence, the trajectory of many people's fate seems to have also changed.

Luo Feng, Manka, Rong Jun and others got together, while Wang Yi was also chatting with Qianshui and Ai Chen over there.

Time passed unconsciously.

"Venerable Nine Swords" arrived.

The lounge was quiet immediately, and no one dared to speak.

"The 30 years of basic training in Chaos City is over." Venerable Nine Swords glanced across the 817 young people in front of him. The results are very good, especially Wang Yi, Bo Lan, Luo Feng, and Rong Jun, who are very good."

The words of Venerable Nine Swords caused a slight commotion among the young people below, but they still dared not express anything.

Wang Yi passed through the fifteenth floor of the Tongtian Bridge...This is a unique monster in history, and there is no need to discuss it.

Berran crossed the sixth floor of the Tongtianqiao!

Luo Feng passed the sixth floor of Tongtianqiao!

Rong Jun crossed the fourth floor of Tongtian Bridge!

In fact, apart from Wang Yi, Luo Feng is the most surprising.

No one thought that Luo Feng could pass the sixth floor of Tongtian Bridge in Chaos City for more than 30 years, just like Bolan!

And Luo Feng's progress is obvious to everyone, and many people "wow and admire".

After experiencing the chaotic passage of time, the spacecraft finally entered the original universe.

The Cosmos Headquarters of the Virtual Universe Company, this is an incomparably vast continent suspended in the starry sky. In contrast, stars are as tiny as sesame seeds.

Looking at the miraculous great creation, Wang Yi was also a little emotional.

Thirty years of practice in the original universe, a hundred years have passed since the original universe!

For Wang Yi, it is more than just thirty years. The time world has passed more than three thousand years.

An extremely long practice!

For Wang Yi's family, it has been a long one hundred years!

"My family..." Wang Yi raised his head and looked at the sky, feeling lingering in his heart.

Although I can contact via virtual universe email and video call, it still feels uncomfortable.

Now that the original universe has passed over a hundred years, the hometown may have undergone earth-shaking changes. People like Wang Yi's student days probably don't know how many old and dead people have died.

However, Wang Yi still maintained his youthful appearance, if not to mention his temperament, he would not even change at all.

With Wang Yi's continuous advancement, there will be more and more such things.

"Perhaps, this is the fate of the strong." Wang Yi was a little sad.

"Wang Yi, Bolan, and Luo Feng in the primitive area are going to the primitive secret realm. You follow the Venerable and leave together, so stay here for the time being and wait for the Venerable."

The control room of the faint blue big fish spacecraft. Wang Yi, Luo Feng, and Bolan's only three primitive secret realm members gathered together with the Nine Swords Venerable and a group of immortals.

"This time, I am personally responsible for taking you to the Primordial Secret Realm." The purple scale man in the cyan shirt glanced at them. "The Primordial Secret Realm is the closest to the headquarters, and it is in the same universe as the headquarters. So it doesn't take much time to arrive. , If you feel bored during this period, you can go back to your room to rest, and you will be notified when you arrive there."

"Thank you Nine Swords Venerable." Wang Yi and others leaned respectfully.

The faint blue big fish spacecraft is moving fast in the dark universe.

time flies.

Day by day, 13 days have passed in a blink of an eye.

Wang Yi and others also returned to their rooms to practice on their own.

"Come out." The voice of Venerable Nine Swords echoed throughout the spacecraft, "I'm in the Primitive Secret Realm, and we will travel through the universe immediately!"

call! Wang Yi stood up with a hint of excitement in his eyes.

The Primal Secret Realm has finally arrived!

An icy voice echoed in the entire control room: "Starting to shuttle through the universe, 10, 9, 8, 7, 6...3...2...1..." All of a sudden the entire spacecraft shook slightly. After a while, The spacecraft returned to normal.

In the spaceship control room, Wang Yi and the other three gathered together with Venerable Nine Swords again. Looking at the simulated scene from the location, they could see the 136 stars in the distance in the distance, and they were all amazed.

"These 136 stars form a time and space on their own, and the highness who lives in them is extremely safe. Even the power of the cosmos lord can not break into that time and space." A one-eyed man of the immortal **** explained with a smile. , "This is also the Virtual Universe Company, which was built for all His Royal Highnesses through the ages."

The 136 huge stars are constantly moving around each other in the void, and their tracks are extremely mysterious.

Wang Yi looked at it, and suddenly the first picture, the second picture, and the third picture of the cosmic chaos stele appeared in his mind.

"Very similar." The more Wang Yi observes, the more he can clearly feel the mystery of the original laws of time and space contained in the trajectory of the 136 planets.

"The front is Wuchen Time and Space, plus the three of you, there are now a total of 116 members of the Primitive Secret Realm." Venerable Nine Swords smiled lightly. "Okay, the place has arrived. Go down. Someone will lead you to the place where you lived~www.mtlnovel.com~Wang Yi and others once again respectfully thank you, leave the spaceship, and the big blue fish swings. The tail disappeared quickly.

Standing in the void, Wang Yi, Buran, and Luo Feng looked at each other, and suddenly all laughed together.

No matter what their relationship is, they are newcomers now.

"Boom..." The space ripples in the void, and a gorgeous full-length golden spaceship with a length of more than a thousand meters appeared out of thin air.

The hatch opened, and three powerful men surging with the aura of law were standing. These three Wang Yi only knew one person... the bald and green-skinned man "Jacs"!

"His Royal Highness!" they shouted together.

Wang Yi estimated that this should be the three immortal guard leaders of each of their three Primordial Highnesses.

Wang Yi and the others flew over, and "Jacos" greeted him with a smile: "Welcome to the original secret realm. Below, this spaceship will send you to your respective residences."

[Chapter 190: Practice task](#)

In the center of time and space where the 136 stars revolve, there is an extremely dazzling continent. On this floating continent, there are a group of exquisite palaces.

In the original secret territory, the Wuchen Continent in the ninth time and space "Wuchen Time and Space" is extremely vast, and every His Highness can be allocated a territory of nearly a million kilometers.

The guards led by Jakes naturally lived in Wang Yi's territory. There were 1,111 guards in the palace. The guardian leader of the immortal gods has 1 leader, 10 leaders (landlord), 100 captains (domain owner), and 1,000 cosmic warriors (cosmic level), which constitute the guard team under Wang Yi's command.

But like other servants, there are even more, tens of thousands.

After moving in, Wang Yi got to know the situation of the residence and then connected to the virtual universe network.

Virtual universe, Yuxiang Mountain, primitive area.

In a secluded study with a Chinese style, Wang Yi sat on a pearwood chair, turned on the laptop, and looked at the screen, and found that there was an extra file on the laptop screen-"Backstage Management".

Every group of geniuses in the company have to go through a process of laying a foundation in Chaos City. After coming out of Chaos City, the authority will change, and many things that could not be done in the past can be done.

"In Chaos City, I have to be busy with understanding the laws and practicing. I don't have time. Now I can finally improve my physical fitness." Wang Yi sighed.

As early as on the way to the headquarters of the virtual universe company, he broke through to the first level of the universe (mental power and genetic power).

As a result, it came out in Chaos City for more than 30 years, and it was still the first order of the universe.

The core members of the Virtual Universe Company have this privilege. As long as they break through to the first tier of the universe, or to the first tier of the domain master or the first tier of the world master,

they can go directly to the nutrition cabin. There are many precious substances in the nutrition cabin, which can allow the practitioner to complete the quantity. Accumulation!

Wang Yi clicked on "Backstage Management", the file opened automatically, and a page appeared with three options: "Life"- "Learning"- "Cultivation".

Wang Yi chose "Life" to open.

A large number of sub-items suddenly appeared inside, including "star map", "diet", "nutrition cabin", "residence", "spacecraft"...

Wang Yi directly selected the "nutrition cabin" to open it.

beep! A small screen immediately appeared. A girl with short purple hair wearing a white uniform with the logo of the Virtual Universe Company appeared on the screen. She leaned slightly and smiled and said, "Hello, Your Highness Wang Yi, may I ask, you are applying to use the nutrition capsule? Does it rise from the first cosmic level to the ninth level?"

"Yes." Wang Yi said.

"Well, your Royal Highness Wang Yi, please wait a while. We will deliver the nutrition cabin to your residence as soon as possible within one day." The purple-haired girl smiled.

"thanks."

Subsequently, the call is closed.

"This application is really quick and convenient." Wang Yi smiled slightly. "Moreover, it's free."

The virtual universe company supplies these core secret realm members, generally not too expensive, for free.

Wang Yi opened the "Learning Bar" again.

The study column is divided into theory and practice.

Theory is open lectures by many powerful people, usually immortal beings give lectures, and occasionally there will even be "universe kings" giving lectures.

The practice column is divided into "Tongtianqiao", "Illusion Sea" and "Immortal Altar".

However, these are of little use to Wang Yi.

He has already passed the fifteenth floor of Tongtianqiao. Unless he breaks through to the domain master level in a short period of time, his perception of the algorithm will improve, and it will be difficult to pass the sixteenth floor.

The immortal altar, the sea of fantasy, the points are too few, Wang Yi is not very interested.

After closing the "study" column, Wang Yi clicked on the "practice" column.

In the virtual universe company, earning points is to choose a practice mission in addition to the 'Tongtian Bridge', the 'Illusion Sea' and the 'Immortal Altar'.

Cultivation tasks are all trials in reality.

Cultivation tasks are divided into five levels according to the degree of danger: "safety level", "ordinary level", "difficult level", "dangerous level", and "extreme level".

Safety level: 0 death rate

Ordinary grade: the mortality rate is 10%

Difficult level: the mortality rate is 20%

Risk level: 50% death rate

Desperate level: the mortality rate is 90%

"Tsk tusk, it looks scary at first." Wang Yi smiled and shook his head.

"Every cosmic genius can take on training tasks while studying."

"Up to 10 missions every 100 years."

"The 100 years here refers to the 100 years between the two qualification battles."

"However, the first qualification battle is still too early for me. Even if it is really carried out, it will not affect me." In the study, Wang Yi held a tea cup and looked at the laptop screen indifferently. "This time, let's use it for training tasks."

Cultivation tasks are the privilege of cosmic-level geniuses, and only cosmic-level geniuses who stay in the secret realm can receive it.

But once it breaks through to the domain master level... it will be released by the virtual universe company, usually to go to the homeland universe country to take the role of a border official. Although there are many benefits to controlling power, it can no longer accept cultivation tasks.

The scale and number of missions that a genius in each secret realm can take is different.

The Primordial Secret Realm Cosmos-level genius has the highest authority, and can receive 3 desperate-level missions and 15 dangerous-level missions in total.

There are four desperate missions in the Secret Realm under the Virtual Universe Company, among which there are two desperate mission worlds in the Primitive Secret Realm.

One is the No. 1 "Purgatory Abyss". The task points reward is 1 million points, which is the highest, and it is also the most dangerous and difficult one.

One is the "Wandering Galaxy" ranked 6th. The mission points reward is 500,000 points, which is slightly more dangerous than the magic mountain.

One is the 8th "Magic Mountain", with a mission point reward of 400,000 points, located in the secret realm of the beginning of the virtual universe company.

The last one is the 17th "Nightmare Caverns", the mission points reward is 350,000 points, located in the secret world of the virtual universe company.

In addition, there are a total of six 'dangerous missions' worlds in the Primitive Secret Realm, including "Visk Star", "Ruined Ancient Temple", and "Old Ruins" and other dangerous and ancient places.

The "Blood Luo World" that Wang Yi is more concerned about is a dangerous mission, located in the secret realm of the beginning.

If you want to do the "Blood Luo World" mission, you must go to the Secret Realm of the Beginning, and from the Primordial Secret Realm to the Secret Realm of the Beginning, it takes at least one or two months to take the shuttle spacecraft of the Virtual Universe Company. Wang Yi will not consider it for the time being.

Sitting in the study, Wang Yi touched his smooth chin. The brilliance of the screen was reflected in his dark eyes, and there seemed to be a phantom beating in the depths.

"First, do all the six dangerous level missions of the recent Primal Secret Realm, get acquainted, and then do the two desperate level missions of "Wandering Galaxy" and "Purgatory Abyss"."

"The mission of the Primal Secret Realm is finished, and then go to the Secret Realm of Taichu to do the quests of "Blood Luo World" and "Devil Mountain"."

"The three desperate-level missions ~www.mtlnovel.com~ dangerous-level missions, all of which happened to be completed within 100 years!"

Wang Yi had an inexplicable brilliance in his eyes.

In one hundred years, his two major clones used the "Universe Chaos Stele" to practice in the world of time, and that was ten thousand years of comprehension. However, the perception of this law is that the more difficult it becomes as you go to the back, Wang Yi is not sure what level he will reach by then.

The two avatars have grown to the peak of the world lord, and the next step is to perceive the law and break through to immortality.

But the realm master stage is the fastest time to perceive the law, not to mention that the third clone has not been conceived yet, even if it can really break through, Wang Yi is still unwilling to break through so quickly.

Work hard to lay the foundation first, the more solid the foundation, the greater the achievement after breakthroughs in the future.

"Luo Feng can kill the immortal king, how can I not lose to him?"

As for one hundred years later, whether to continue to do missions to gain benefits, or to break through the domain master outside... Then we will talk about it at that time.

...
