

## A God 201

### [Chapter 201: Land City](#)

Suspended in the void, the vast, endless ancient land is full of potholes and gullies, and huge bottomless holes, like a piece of glass falling from a high altitude to pieces, allowing them to barely maintain one another. The whole is still a kind of mysterious power, and a thunderous roar came from afar, echoing on this piece of ruins that have been shattered for countless years.

A dark red figure pressed against the ground and moved forward at an astonishing speed.

"According to the collected information, the most dangerous places in the ruined continent are the three dangerous places in the central area-the sun mountain, the big city and the black abyss."

"These three places have long been turned into ruins, but some of their leftover forces still make them the most dangerous forbidden places on the entire continent."

"The more dangerous it is, the fewer people will explore and the greater the chance."

When the detection equipment is unavailable, Wang Yi's Void Zerg clone uses the power of the world more to spread around it and its sensing of spatial fluctuations, which makes it easy to grasp every movement of the surrounding space.

The power of the world cannot radiate too far, because it is easy to be perceived by people, but the spatial fluctuations are different. This is completely a talent and instinct of the Void Zerg clone.

In order to prevent the omission of possible secret places and the inability to respond to sudden encounters, Wang Yi has slowed down.

"The clone of the Void Zerg is indeed much stronger than the human deity..." Wang Yi couldn't help but sigh, feeling the speed and the pleasure of controlling the space.

The pinnacle master who is powerful enough can move close to the speed of light in the universe, not to mention the Void Zerg clones, as long as they are willing, they can instantly break into the interlayer of space, or shuttle in the dark universe.

The secret world with too many obstacles is actually not suitable for the spacecraft to fly and shuttle, so the speed must be slowed down, but the Void Zerg clone that can merge into the void is much more flexible, and the instantaneous burst speed is even more terrifying.

Wang Yi even felt that with the weird and flexible body form of the clone of the Void Zerg, even if he was immortal, he might not be comparable.

The perilous ruined continent is naturally full of various dangers, some from the environment, some from the original creatures on this continent, and some from foreign adventurers... But these have nothing to do with Wang Yi. After hiding his breath, he was almost unimpeded all the way. Coming to the middle of the ruined continent, where the most dangerous ruined ancient temple is located, you can see the majestic and majestic mountains that have been cut in half out of thin air but still undulating, as well as the collapsed, broken, and incredible golden area on the mountains. Palace group.

That is the Sun God Mountain.

At the foot of the Temple of the Sun is the vast ground. Obelisk-shaped blue buildings have risen from the ground. Most of them have been destroyed, but the sharp breath of the ancient vicissitudes still remains. There are also some huge and majestic broken statues. , Witnessing the glory of the past.

That is the legendary city of the earth.

I saw roads of millions, tens of thousands of kilometers, wide, black rifts crisscrossing this land like a devil's mouth, and the ground cracked through countless huge deep valleys, as if the entire ground was originally built on A thin layer of rock above the endless abyss, a black mist rises from the inside, and an unknown screaming and screaming mist. These mists are very corrosive and highly toxic, and even a realm master dare not touch it easily. Touch, if the domain master falls, it will melt in an instant - and this kind of mist is everywhere here.

And this is the most obvious danger in the forbidden area. As you go deeper into it, the danger you encounter will become more dangerous and terrifying. Even the immortal gods will not necessarily be able to retreat.

The eternal and immortal golden flames on the Sun God Mountain can burn all the golden flames. The city of the earth does not know when it will erupt. The gravitational shock waves that are so powerful that they can even distort the space, the deadly poisonous fog that can be seen everywhere in the underground black abyss... This ancient place is painted with a layer of death that is too thick to dissolve.

This kind of place is a mortal place for the universe... The core members of the human race geniuses may be able to mess around in the periphery, but if they go deep, the chance of falling is also infinite, even the world master, dare not say that they can be here for sure. It can be safe.

There are countless crises here, but there are also endless opportunities...So since ancient times, countless people have come here for adventure.

"Huh?" Wang Yi, who was exploring in the jungle of blue unknown stone obelisks tens of hundreds of kilometers high like sharp swords into the sky, suddenly moved his consciousness and looked to the north—in the ruins. The mainland is equally directional.

In order to conceal, Wang Yi's power of the world only diverged to 10 kilometers around, and everything in this area was scanned clearly by Wang Yi.

Phew, Wang Yi's figure quickly rushed out, and instantly came under a spire that was tilted and collapsed one-third of the time. There was a mountain of boulder ruins. Wang Yi's expression remained unchanged, and the power of the world spread over.

"Boom..." The entire boulder ruins shook, lifted up by the power of the invisible world, and the smoke rolled, revealing the corpse of the unknowing landlord underneath.

"He" is close to a human shape, more than twenty meters tall, with scales on some parts of his body, and he is wearing an exquisite blue armor engraved with strange patterns... But this armor is now full of cracks and seems to be covered by a huge force. It has been shocked, and its owner is even more involved in this force, wanting to struggle, but in the end still can't escape the fate of death.

It's like a strong little bug caught in the vortex of a river, desperately but in vain.

Even after he died for so long, the original master's body still exudes a fierce and terrifying aura like a giant beast, witnessing his strength.

"It seems that he died under the impact of the shock wave. The natal pearls are all shattered. It seems that they should have been dead for hundreds of years..." Wang Yi shook his head.

Next to the dead native landlord's corpse, there was also a large number of objects in the world spilled out because of the fragmentation of the internal world, but basically all of them were damaged. Very few survived, and Wang Yi didn't look down on it either. But for those adventurers who come to explore the mainland, it is already a huge asset.

Wang Yi just took away the space bracelet of this world master, and let the others stay here.

Looking at the body of this world master, he couldn't help feeling a little bit, even if a powerful world master, in this kind of place, one who is not careful can fall at any time.

This is how dangerous the forbidden land is.

Wang Yi's world power penetrated into this space bracelet, and there were a lot of things in it, but they were of no use to Wang Yi, and probably only a few yuan unit, better than nothing.

"Om~~"

An invisible shock wave suddenly appeared, rushing toward Wang Yi like a sea wave. The space-distorted corrugations appeared one after another, and the strange thing was that the surrounding obelisk buildings and the ground were not affected at all.

However, Wang Yi seemed to be an unknown prophet. He had already flashed past, and instantly appeared on the obelisk in the other direction.

"The spatial talent of the Void Zerg clone is too convenient in this kind of place." Wang Yi sighed.

Along the way, he evaded in time because the Void Zerg clone felt the signs of this shock wave  
~www.mtnovel.com~ in advance.

If it is an ordinary landlord, I am afraid that he will not be able to do so easily.

Of course, Wang Yi can easily bear a shock wave of this scale.

However, the shock wave of the Earth City has a law. The more you confront, the stronger it is. In addition, when you are in the shock wave, you will endure unimaginable gravity, and your movement speed will be greatly affected. The Lord will be directly crushed and cannot be spared.

Wang Yi is of course the more cautious the better in such a strange and dangerous place.

## [Chapter 202: Meigo Honshin](#)

The Void Zerg clones ventured and explored in the ruined continent, while the human deity, the Flame Star Giant Beast clone took the pronucleus to cultivate in the time realm...In fact, since the time realm appeared, Wang Yi has always kept the pronucleus in the time realm, relying on the time realm.

Uniqueness, as long as the pronucleus of the human deity is indestructible, Wang Yi will be invincible

innately. No matter how many times the outer clone is destroyed, he can also rely on the pronucleus to make a comeback.

Under the slightly sloping blue obelisk at the edge of a large, bottomless rift valley that is thousands of kilometers wide, Wang Yi, who had already penetrated into the city of the earth, stopped and felt that time was almost up.

"Sign in."

[Ding, congratulations to the host for signing in successfully, and reward "fangjian". ]

【Number of check-ins available for this place: 0】

A thick black metal shield appeared in the bottom space of the sign-in panel, which looked like a sharp triangle at the top, covered with blue secret patterns, and faintly formed a giant figure, which made Wang Yi very familiar.

Wang Yi received the introduction information of this shield. This is a shield that can be used by immortal gods. It is strong and strong. The secret pattern on it can also provide sufficient defense, but it is suitable for practicing the combination of the original law of "soil and space". People who use it, Wang Yi probably won't use it anyway.

If it is auctioned outside, it is worth about 20,000 yuan, which is pretty good.

Wang Yi is not the only one on the vast ruined continent. There are other strong men from the Void Continent who are active here. Wang Yi has seen a lot of them along the way. He has seen these natives kill each other many times... In addition to the environment, the most dangerous thing on the ruined continent is people.

However, Wang Yi deliberately avoided it, and he exuded the aura of the pinnacle master class. This kind of strength can already walk sideways on the ruined continent. As long as it is not a fool, generally no one will deliberately provoke him. Many natives just feel a little bit. When Wang Yi's breath came, he ran away like a frightened rabbit.

"Om~~"

Void vibrations, and several invisible and qualitative shock waves, came blasting. This kind of environmental attack from the city of the earth itself was very sudden, and many people would be caught off guard. It was like a trap, and the deeper the interior of the continent, the more frequent this phenomenon, the greater the lethality of the shock wave.

The most terrifying thing is the sudden emergence of several shock waves from all directions at the same time. There is no way to hide, and all the shock waves collide with each other, and the power will increase exponentially. The dead landlord who Wang Yi saw before estimated it's so unlucky to get involved.

But for Wang Yi, this shock wave is not a threat, and when he encountered several groups of natives who were trapped by the shock wave, he kindly went to rescue them, and the Void Zerg clone flashed them away from the place. Thousands of kilometers away, these indigenous people still don't know who rescued them.

The detection equipment was unavailable, and Wang Yi could only use the world power of the Void Zerg clone, his naked eyes, and spatial sensing to search for the surrounding environment. There was a little gain in the end of the day, although this didn't make him care.

In addition to the shock wave, there are cracks that spread all over the ruined city, from which thick black smoke is continuously spit out. This kind of thick smoke Wang Yi experimented with a clone of the Void Zerg. The master can barely move in the thick black smoke, but Energy will be consumed very quickly, and this is only coming out of the ground. The poisonous smoke under the real abyss must be even more powerful.

Unpredictable shock waves that appear from time to time and ubiquitous poisonous smoke constitute the two major death hazards of the ruined continent... But this is not over yet, on the golden mountain above the city, occasionally there will be golden fire rain—this is it. The most dangerous thing in the ruins of the continent, as long as the creature is contaminated, it will be wiped out in the blink of an eye, and there will be no scum left.

It is the realm master, if he does not cut off the flame-contaminated parts in time, he will be burned alive.

But the ruined continent is not a place without safety... Just in the blue obelisk like a giant sword, as long as you hide in, at least the shock waves and golden flames will not hurt you. These almost indestructible ancient buildings are The only comfort for adventurers and intruders exploring this ruined continent.

The next day, Wang Yi came to the golden mountain range that stretched over half of the continent like a giant dragon. The mountain range seemed to be split into two directly with a sword. One half had collapsed and turned into a new group of valleys—and the other One piece still largely maintains their original appearance, and golden shrines stand here. Although most of them have been dilapidated in the long years, they can still be seen in their past glory and magnificence.

Some palaces are even bigger than a planet, and the entire group of mountain palaces is tens of thousands, like the endless golden ocean, which is amazing.

But this is also a very dangerous area. Some palaces will always gush out golden flames. Even the masters dare not touch these flames. Even if they can be dispelled by various means, few people are willing to do it. Generally seen They are far away.

Row upon row of halls and buildings, all of which are far beyond the scale of human use. Standing on top of a palace carved with a three-headed eagle, Wang Yi looked at this vast and magical land. From the tip of the iceberg of these buildings, You can vaguely see the great prosperity of this continent in ancient times, but unfortunately, it was finally destroyed in the war, and even their creators were buried in the dust of history forever.

Weakness is the greatest original sin.

An enlightenment arose in Wang Yi's heart.

He didn't think that the human race was doing something wrong. Development is the way for a race to survive. If a race stays in place, sooner or later it will decline, be invaded and extinct by other races...It's like ruining an ancient temple.

Almost all those who can become the most powerful and pinnacle race in the universe are full of aggressiveness.

"This is also my way..." Wang Yi muttered, lowering his head.

Strengthen yourself!

Protect your family!

Guard the race!

Wang Yi worked hard.

If he is strong enough, he can shelter the race under his wings.

It's like the giant axe, the Chaos City Lord and other human super beings... It's not that they can't stay out of things, take care of themselves, and be at ease, but they have not done so... After all, as long as they are not too selfish, they always have a little identification with the race. Feeling, would not do this.

An exception is Emperor Yan, who is extremely selfish and selfish. Wang Yi disdains to learn from him.

"A strong self, protect everything I want to protect..." Wang Yi's eyes were bright, and his soul seemed to have experienced an unprecedented baptism.

Enlightenment of self and original mind~www.mtlnovel.com~will, mind, and soul have become more tenacious and transparent.

With faith, you will naturally not be tempted easily, shake your heart, and lose yourself.

He finally understood why geniuses have to roam and temper in the universe, because only in this way can they cultivate truly strong-willed people.

Standing on the magnificent, ancient and majestic temple, Wang Yi said silently: "Panel, sign in."

[Ding, congratulations to the host for signing in successfully, and reward "wings of the sun". ]

【Number of check-ins available for this place: 0】

### [Chapter 203: Underground abyss](#)

"Boom~~"

Two huge, burning golden wings fell from the sky and landed on the land of a world. The bottom of the hard and sharp wings directly pierced the hard ground into two deep pits... the kind that was dozens of kilometers deep.

Wang Yi's Void Zerg clone also appeared here, looking down at the "Wings of the Sun" that was just taken out from the sign-in panel, looking at the oncoming flames that looked like a star, and that was hundreds of kilometers long. , Towering wings, took a long breath.

To be honest, it is the first time that Wang Yi has seen such a large weapon.

That's right, the Wings of the Sun is an immortal weapon, and it can also act as an auxiliary flying treasure.

A series of mysterious and beautiful secret patterns surfaced on the exquisite wings. These are a pair of metal wings. The whole body is made of a special material that is immortal and hard to destroy. It is not only hard and sharp, but also full of lethality.

For the materials alone, I am afraid that the price will exceed 10 million yuan per unit.

What makes Wang Yi even more pleased is that this is a pair of winged treasures that integrate the original laws of "fire and space". Whether it is Wang Yi or the Yanxing giant beast, they are very suitable for display, and the pair of sun wings can be enlarged and reduced in size. , The smallest can be reduced to more than ten meters, the largest can be enlarged to thousands of kilometers... and this is its limit.

"My human being is still at the cosmic level. This wing should be used by the Flame Star Giant Beast. Moreover, this is originally a piece of equipment for the winged race."

As soon as Wang Yi waved his hand, the golden wings that looked like a burning torch disappeared from one world and entered the realm of time.

"Roar~~"

A deafening moan came full of joy, and the giant flame star beast flew up to the sky like a mountain range. The flame wings fell down and fell on it, and the power of the world poured into the wings, preliminary Brand your own spiritual imprint.

"Clang—"

After acknowledging the Lord, the secret patterns on the wings of the Wings of the Sun lit up, illuminating the entire world, and the continent seemed to have an extremely dazzling golden sun.

And in the sun, a giant beast slowly emerged, and the dark red blade-like wings behind it had been covered by a layer of golden scale armor, as if plated with a layer of dazzling gold.

"boom!!"

The Yanxing Giant Beast's wings flicked, and a firelight flashed in place, and the whole body had jumped out like a golden meteor.

"Roar-"

The Yanxing behemoth roared excitedly in the sky.

"Speed, so fast! The speed of the Flame Star Giant Beast is so much faster after equipped with the Sun Wings!"

"Unbelievable! This Wing of the Sun has such a high degree of compatibility with the Giant Flame Star!"

"Moreover, this is still the normal flight form of the Sunwing. If the secret pattern is activated, then the speed can be greatly increased!" Wang Yi was full of excitement. "However, I have just recognized the Lord now. If I want to master this treasure thoroughly, I have to take my time. For those wing secret patterns, I have to spend time to comprehend and reach the level of proficient use."

The universe-level human deity cannot use this overly powerful immortal-level wings, but the flame star behemoth of the pinnacle realm master is enough.

...

After signing for a treasure of the Wings of the Sun, Wang Yi, who was in a good mood, continued to explore for a few days in the Sun God Mountain, and found nothing, so he turned his attention to the cracks in the abyss on the earth.

This ruined continent with a diameter of more than ten billion kilometers, the core area is three dangerous places, namely, the mountain of the sun, the city of the earth and the black abyss.

Among them, the Mount of the Sun and Wang Yi, the city of the earth, have already explored for a while, so there is only the black abyss lying deep underground, which is also the most mysterious and dangerous place in the ruined continent.

For so many years, I don't know how many people have explored this ruin, but no one can tell what is under the black abyss. Most explorers can never get out again.

In addition to the terrible black mist, there are many more terrifying things inside.

Standing in front of a huge crack like a canyon, Wang Yi looked down at the rising and distorted black mist, "I have a clone of the Void Zerg, even if it is dangerous, I can rush out, and even if the clone is really dead, it will still It can be recondensed."

After thinking about it, Wang Yi made up his mind. The power of the world was permeating his body, and the Moyunteng armor also emerged. After adequate protection, he plunged into the dark valley.

"Zizi..."

Black mist poured from all directions, eroding the shield formed by the power of the world.

But for Wang Yi, this degree of corrosion is completely within the tolerance range.

"I don't know where such a wide range of black fog came from." Wang Yi looked at the thick black fog that was indistinguishable from his direction, and he was shocked.

Wang Yi tried to spread the power of the world condensed into one line in one direction, but after only a few hundred meters, it was unsustainable...The black mist eroded too fast, and the greater the exploration distance of the power of the world, the higher the difficulty.

And the surrounding black poisonous fog didn't know what it was composed of, and even the realm master's eyesight couldn't see through it at all.

In this case, the power of the world and the naked eye are almost useless, and you can only explore the surroundings by sensing the space.

Wang Yi is like this, the natives on other ruined continents will only get worse, almost becoming blind.

"I heard that the abyss underneath is vast and unfathomable. If you get lost in it and you can't find an exit, it will be dangerous." Wang Yi shook his head.

The entire ruined continent is over tens of billions of kilometers in diameter, and the thickness is definitely more than 100 million kilometers...Under such a huge volume, coupled with the continuous

erosion of the black fog, it is difficult for even the landlord to persist underneath for too long, and once it is unable to power If you leave before running out, you will be trapped and die inside.

Therefore, most adventurers only dare to explore in the periphery, and few dare to go deep to the bottom.

"However, I have scanned the entire continent map frame before and determined the spatial coordinates. I can know my position clearly, so I don't have to worry about getting lost." Wang Yi kept falling in the dark fog, thinking lightly in his heart.

It's just that without powerful exploration methods, Wang Yi felt that it would take a long time for him to discover something here.

"You have to try your luck." Wang Yi's world power maintains a kilometer-long "line", sweeping around from time to time, which will make him consume a lot less.

"Woo~~"

The abyss is like the mouth of an earth giant, UU reading [www. uukānshu.com](http://www.uukānshu.com) was extremely empty, a dead silence, without a trace of life, only the whistling sound that did not know where it came from from the depths.

Wang Yi explored this place patiently and kept flying down. He felt that the deeper the place, the greater the possibility of chance. Of course, this was only his guess.

ten kilometers...

100 kilometers...

Thousand kilometers...

The whole process is boring and tasteless.

The surrounding black mist remained unchanged for thousands of years.

Time, just one day passed.

[Chapter 204: Shrine visitor](#)

"This place is too big." Wang Yi muttered under the abyss filled with endless thick black mist.

He looked up at the void in front of him, somewhat helpless. "When this goes on, when is the head?"

"No, I have to be patient."

Wang Yi calmed down.

"Sign in first."

[Ding, congratulations to the host for signing in successfully, and reward "Eye of the Abyss". ]

【Number of check-ins available for this place: 0】

"Huh? The Eye of the Abyss?" Wang Yi's spirits lifted up, and the name was unbelievable.

The Eye of the Abyss, said to be an eye, is more like a fist-sized, smooth round jewel, the whole body is pitch black, as if it can \*\*\*\* in all light and full of magic, just looking at it, the soul will be sucked in.

Wang Yi felt the introduction of this "Eye of the Abyss" and was delighted.

"Well, this Eye of the Abyss is actually a soul treasure?"

The soul is the most important core of intelligent life.

Therefore, many powerful people pay attention to protecting their souls, some try their best to improve their souls and will, some painstakingly create various soul secrets, and some use treasures at any cost... But soul treasures are very rare, not to mention the present. This obviously unusual "Eye of the Abyss".

After refining and fusion, the Eye of the Abyss can guard the soul and resist attacks from the outside soul for the owner, and its power is amazing.

It also has a method of use and contains a triple secret pattern, but even if it is not actively activated, the Eye of the Abyss in a passive state can completely resist the soul attack of the peak master level, that is, the soul attack of the master level against the abyss of equipment. The life of the eye is invalid.

Initiate the first level, the ordinary immortal level soul attack can be weakened to one-tenth.

Invoking the second stage, the soul attack on the immortal level of the prince can be weakened to one-tenth.

Initiate the third level, the soul attack of the immortal level of the king can be weakened to one-tenth.

Of course, if the limit of urging the defense of the treasure is exceeded, the weakening ability will be greatly reduced.

But even so, it is definitely a treasure that will be coveted by immortality.

The estimated value should be in units of "100 million mixed yuan".

But it is not so easy to urge the Eye of the Abyss, at least it must continue to nurture it, blend seamlessly with the soul itself, and reach the point of integration, and it must be practiced to understand it.

This cannot be done in a short while.

However, Wang Yi has the time realm acceleration time and three body consciousnesses, so there is no need to worry about not having the time to cultivate and comprehend this treasure.

Wang Yi was also pleasantly surprised to obtain the "Eye of the Abyss", an extremely precious soul treasure.

Although it is far from being a "heavy treasure", after all, the price of any heavy treasure is "trillion", and the price of a "ten trillion" mixed yuan unit started, but it can be regarded as an extremely precious treasure in the immortal level of the king.

And the key point is that Wang Yi currently has no soul treasures. Although he practices soul secrets like "Void Tower", the soul can be protected by an extra layer, which is naturally more reassuring.

With the "Eye of the Abyss", from now on, it is the human deity, and can be fearless from the soul attack of the pinnacle master.

And "Eye of the Abyss" has some other mysteries, waiting for Wang Yi to study and discover in the future.

"This mission world is indeed my blessed place." Wang Yi was happy to blossom.

...

Wang Yi has explored in the abyss of black mist for more than half a month, and has reached a distance of about tens of millions of kilometers underground.

Most natives of the ruined ancient temples probably wouldn't dare to go so deep.

However, it is still not in the end.

For more than half a month, Wang Yi's Void Zerg clone insisted on carefully searching the surrounding environment every day, but except for the black fog and the local rocky cliffs that are not affected by the black fog, everything here is empty, nothing, desolate and dead.

The entire abyssal world is too big. With Wang Yi's search speed, even 10,000 years will not be able to explore one percent of the entire abyss.

But he can only explore a certain distance around the sinking route, and other places are powerless.

"Swish—"

Suddenly a few streams of light flew over the horizon of the Ruin Continent. The speed was unparalleled. In a short moment, it came to the sky above the vast blue obelisk city on the Ruin Continent, and stopped, revealing three figures wearing strange robes.

A strong world power radiated from the three of them, and their foreheads all had a mark of the law of origin.

These are three powerful world masters recognized by the law of origin.

One of them was a coquettish girl with scales on both sides of her cheek in a blue robe and smiled and said: "This time the large-scale selection of the temple, after 10,000 years of re-assessment, finally selected three of us who are eligible to enter the legendary "Ancient Gods" Tan", it's not easy."

The other two companions also nodded, with arrogance on their faces.

The three of them are the most outstanding peerless geniuses of the ancient temple, representing the "Temple of Earth", "Temple of Light" and "Temple of Darkness" to enter the legendary "Ancient Shentan", and in order to get this rare They also paid a lot for their chances.

Many ancient temples and immortal gods are not qualified to enter the ancient temples. One is that the time is not right, and the other is that they fail to meet the qualification requirements.

The three of them were able to get a spot, and it was also the result of the trilateral temple's competition behind the scenes.

No more, no less, exactly one on each side.

"Gu Shentan, just below, let's go down, have you brought all the tokens?" The black-robed and white-haired man looked at the two companions.

"rest assured."

"How could you not bring such an important thing."

The other two companions said one after another.

"Well, let's go down. The three-party tokens can just open the ancient Shentan channel. Without tokens, those outsiders can only wander at the bottom of the endless abyss forever, but it is impossible to find a place to enter the ancient Shentan." The black-robed white-haired man Nodded with satisfaction.

The three of them turned into three streams of light and flew into the big crack lingering in the black mist.

And at a certain location under tens of thousands of kilometers, Wang Yi was still patiently searching around in a bored manner.

Except for stones, black fog, and wind, there is nothing here.

Wang Yi could only be patient, and while isolating most of the laws of consciousness and perception, he controlled the power of the world to scan his surroundings.

Suddenly, Wang Yi's mind moved slightly.

From the Void Zerg clone's ability to sense space, he instantly noticed that unusual spatial ripples suddenly appeared above him.

"Someone has come down?"

Almost instinctively, Wang Yi quickly regained the power of the world, his aura was restrained, and the moment he brushed his figure merged into the void, disappearing without a trace.

The next moment, the three streamers broke through the black mist, rushed directly into the abyss, and disappeared in the blink of an eye.

They didn't notice that ~[www.mtnovel.com](http://www.mtnovel.com)~ was just beside the place they passed by, and there was another person hidden.

"The three world masters are still powerful world masters recognized by the law of origin." Wang Yi had already carefully remembered the appearance of the three in his heart just now, a little surprised.

"What are they doing here? Looking at their actions, it seems that there is a predetermined target direction, and there must be a problem."

Wang Yi squinted his eyes, and his interest came up all at once.

The Void Zerg clone talent secret method is activated, and the figure sneaks into the void, like a ghost in the space, following the traces left by the three people quickly.

"It's rare to show up a target and see what they are going to do."

"This spatial fluctuation is so obvious, I don't have to worry about losing it." Wang Yi followed slowly, very pleasantly.

There are three different temple tokens with three different images carved in gold, black and blue.

The three world masters poured their power into the tokens, and the three tokens lit up and turned into three rays of light and flew towards the three ancient gods. They did not enter their bodies, and then a trail of light marks lay in the three like a spider web. The sculptures of the ancient gods spread, and along with the powerful spatial fluctuations that swayed round and round, the sculptures of the three ancient gods seemed to come alive, and the aura on their bodies rose rapidly, reaching their zenith soon.

"Om~~"

A door opened from the void, and a stream of light leaked from the door.

"This is..." Wang Yi couldn't help but watched this scene with bated breath.

The flowing light, like a bubble, makes it impossible to see the scene inside the portal at all.

"Unexpectedly, it would be so troublesome to open the land of the ancient gods once." A coquettish girl with scales on her face in a blue robe looked up at the void portal that shed light, and sighed.

The only sturdy white-robed creature among the three who did not look like a human said: "This is already the safest way. Without this gateway, if you want to go to the land of the ancient gods to receive the baptism of the ancient gods, you must go through that one. The old road in ancient times is the "corridor of the abyss" that even us temple elites can hardly pass."

"But I heard that there are many ancient treasures in the "Abyss Corridor", and some even the gods are fighting for it, such as the legendary "Zichen Bailuoye" and "Black Starwood"... It's a pity that we can't go there." The charming girl in the blue robe said regretfully.

"It's too dangerous there. There are still many ancient monsters sleeping there all the time. With the arrangement left by the ancient gods, the gods are in danger in the past, not to mention us." The white-robed creature said, "Don't think about it so much. We should enter the ancient Shentan to complete this baptism."

"Not bad." The white-haired young man in black robe nodded slightly.

"I heard that the baptism is difficult, I don't know if we can complete it." The seductive girl had a glimmer of expectation in her eyes.

"Time is limited, let's go in."

"Um."

"go."

The three of them walked forward, stepped into the void portal that appeared out of nowhere, and disappeared into the stream of light.

After they left, the void portal slowly closed, and finally faded and disappeared, and the cave was quiet, as if nothing had happened before.

Wang Yi sat and watched the three world masters walk into the door, but did not stop them.

He concealed his figure, the power of the world carefully swept through the cave, and then carefully sensed the space here, and found nothing unusual, so he kept hidden and flew into this mysterious cave carefully.

The cave was silent, all the sculptures stood silently there, and nothing happened because of the strange outsider Wang Yi.

When Wang Yi came to the sculptures of the three ancient gods, he looked up at the three huge and majestic ancient gods, with emotion in his heart.

"These are the three great beings that are at least at the venerable level. Unfortunately, against the five superpowers of the human race, even the venerable can only fall." Wang Yi shook his head.

The five superpowers of the human race, each of which has more than one master of the universe, and a race with a master of the universe can be regarded as a powerful race in the universe.

What's more, the depth of the human race is beyond imagination.

The Venerable had no resistance at all in front of them.

Wang Yi took out three tokens, his eyes were a bit complicated.

He also didn't expect that the token, which was accidentally signed in the mainland temple where the Tanagos tribe was located, could actually play a role here.

I just don't know if this token also has that kind of magical effect.

"Just try it," Wang Yi murmured.

Wang Yi injected his world power into the token.

As the power of the world poured into the token, the hidden function in the token was activated, and the previous scene was staged again. A door was silently opened in the void, and there was a stream of light overflowing in the portal, but Unable to see the internal situation.

Wang Yi's thoughts turned quickly before he stepped out and stepped into the door.

The stars shift and the space changes.

In just an instant, Wang Yi appeared in a majestic ancient palace with a radius of ten kilometers, and the palace was suspended in the air with an endless starry sky outside.

The entire palace was empty, with only a circular pool in the center, and the pool was filled with pitch-black liquid.

Wang Yi's sight fell on the black pool in the palace for the first time.

"Is this Gushentan?" Wang Yi couldn't help but guess, "Is the baptism performed here?"

There was only such a pond in the palace in front of him, and Wang Yi could only guess like that.

It's impossible for those great beings to spend their minds and deliberately build the space under the abyss and set up numerous organs. As a result, it is just a decoration inside, right?

Wang Yi's Void Zerg clone scanned the entire palace ~www.mtlnovel.com~ and found no problems. He hesitated and walked to the black pool.

When I approached, I found that the liquid inside the black pool was almost solidified in the pool like extremely viscous mercury.

A strange smell floated over, Wang Yi had never smelled it before, and it was hard to tell what it was.

Wang Yi cautiously grabbed a cloud of pitch-black liquid with the power of the world and came to him to observe carefully.

He also dropped the liquid on the body of the Void Zerg.

Suddenly, a strong burning sensation swept through the body from the liquid touch to the body parts, and the intense pain reached the soul.

Unspeakable pain came from the depths of the soul like a tide.

With Wang Yi's current consciousness and strong will, he couldn't help being slightly dizzy.

"Ah..." Wang Yi couldn't help groaning, and took a step back before adapting to it, staring at the mysterious circular black pool with horror in his eyes.

"What the \*\*\*\* is this?"

#### [Chapter 206: baptism](#)

Wang Yi looked again, and the black liquid like oil had penetrated into his skin and disappeared.

The strange thing is that with Wang Yi's grasp of the body, he can't find out where the other party has gone.

Wang Yi guessed that this liquid may be aimed at the deepest transformation of the soul and genes.

The reason why there is no response may be the reason for the absorption of too little liquid.

"Since the Virtual Universe Company has released Gushentan's mission, there should be no danger." Wang Yi muttered, staring at the black liquid in the pond.

"Perhaps, this is the ancient \*\*\*\* liquid I'm looking for?"

"The baptism mentioned by the mission should be carried out here, and..." Wang Yi looked around, "The previous three aboriginal world masters were not here, they should have appeared in other places, then it means that there is more than one place in the ancient Shentan, and it may exist. Four places, five places or more..."

Wang Yi thought for a while, gritted his teeth. "Let my human body try it first, if it works. Then let the Void Zerg Clone and the Flame Star Giant Beast Clone absorb it. Maybe, I can try to take this liquid away."

Wang Yi stretched out his hand, and a transparent crystal container the size of a watermelon appeared. A large group of pitch-black viscous liquid was controlled by the power of the world and left the pool. It

turned into a black water stream and poured into the crystal container. However, Wang Yi was worried that it might affect the next. Baptism, so it didn't \*\*\*\* too much, just fill a bottle.

"Next, it's baptism..." Wang Yi looked at the black pond.

call!

Another Wang Yi appeared in the palace, standing with the original Wang Yi, like twins.

This is Wang Yi's human body.

The Yanxing Giant Beast clone took the original pronucleus and stayed in the time world.

"You, protect the law for me." Wang Yi's human body looked at the Void Zerg clone.

The Void Zerg clone nodded slightly, and the figure gradually faded into the space, disappearing.

"Mo Yun." Wang Yi lifted his armor, and Mo Yun Vine turned into a palm-sized vine, swaying around Wang Yi's arm. "You stay aside."

Wang Yi, naked all over, took a deep breath and stepped into the pitch-black ink and viscous liquid like mercury. The "water" in the pool was not deep, probably less than one meter deep.

"Shit~~"

A strong pain passed from below to the whole body, but this time Wang Yi was mentally prepared to bear it abruptly.

Long-term pain is worse than short-term pain. Wang Yi gritted his teeth and simply sat in the pool. The indescribable black liquid instantly drowned Wang Yi.

A far more intense pain than before was transmitted from every part of his body to his consciousness, as if his soul was about to burn, Wang Yi's body spasm, and his consciousness was suffering indescribably.

As if the black liquid in the pool was alive, it slowly flowed in Wang Yi's direction and was absorbed by his body.

A mysterious force quickly integrated into Wang Yi's body cell genes. In his soul, Wang Yi's muscles swelled like inflated, and the blue veins wriggled under the skin like an earthworm, shockingly shocking.

A dull low growl came from Wang Yi's throat.

He felt as if he had fallen into the molten volcano, and his whole body was about to melt.

Consciousness also began to blur.

"Hold on..." Wang Yi gritted his teeth, his teeth were about to smash, and blood flowed from the corners of his mouth.

The magical power contained in the black liquid is integrated into the depths of the body cells, fundamentally causing a special leap in body genes, so that every cell of the body contains a magical special power. This power is not original energy, not mind power. It is some kind of unknown force.

As time passed, on the surface of Wang Yi's body, black magic patterns appeared and spread rapidly. The soles, thighs, abdomen, arms, chest... and even some indescribable parts began to be covered with such mysterious and complex patterns. Make Wang Yi look as hideous as a demon.

And Wang Yi's consciousness was like a rock in the stormy sea, and he was also suffering from endless pain like a sea wave.

For Wang Yi, the passage of time every minute and every second is like a year.

And the black magic patterns on Wang Yi's body became denser and denser, and gradually began to converge into a very complicated and clear black pattern.

It was a weird snake-like creature with wings.

"boom!"

When the pattern took shape, Wang Yi felt a shock in his soul, the pain receded like a tide, and there was a feeling of sudden penetration throughout his body.

Metal, wood, water, fire, earth, wind, thunder and lightning, light, time, space... all kinds of cosmic origin laws fluctuate, appearing in consciousness more clearly.

I feel that the whole person is different.

"It's amazing..." Wang Yi was dumbfounded, with some surprises. "This mysterious liquid actually has an effect similar to that of Xue Luoqing?"

Xue Luoqing, actually called the blood of the beast god, contains the power of the beast god's bloodline, which can fundamentally enhance the absorber's deep-level genetic power.

For example, fusion of three can drive the simplest \*\*\*\* mystery pattern, which not only makes it easier to perceive the original law of the universe, but also makes it easier to control the law.

Because it is closer to the origin of the universe, it will make the use of various laws to attack, and the power will be even higher!

It is equivalent to improving the "fitness" of the law of origin.

In addition, there are changes to the body.

Wang Yi flew out of the black pool. Since Wang Yi completely formed the black snake pattern, the black liquid seemed to have no effect on him.

Standing by the palace, driving the mysterious power deep in the cell genes in the body, the black snake monster pattern on the body is more obvious, such as a ferocious black snake wrapped around Wang Yi, and even his skin has faint black scales.

Wang Yi tried to use the secret method without using any extra power. He whizzed and swiped a claw, instantly forming three qi jin visible to the naked eye. He roared and bombarded the palace wall, but no ripples were lifted. All his qi was absorbed by the palace wall. NS.

"The perception of the law and the power of the law have probably doubled." Wang Yi thoughtfully.

Then he moved his hands and feet again, and finally determined that his physical strength had also doubled.

That is, if this mysterious power is driven, Wang Yi's original power of 3 times the genetic level will be increased by 2 times again.

That is to achieve 6 times the original strength ~www.mtlnovel.com~ but the actual strength has been improved even more.

pity.....

Although this black liquid has a magical effect, it is not as continuously absorbed and strengthened like Xue Luoqing. Wang Yi's body is now saturated with absorption, even if it continues to soak, it will be useless.

"Since this is the power transformed by the ancient gods, it's called "the power of the ancient gods"."

Wang Yi looked at the black liquid that didn't seem to decrease in the pool, stroked his chin, and then smiled.

The Void Zerg clone appeared and nodded to Wang Yi. Then Wang Yi's human body disappeared and returned to the time world, while the Void Zerg clone walked into the black pool, and a familiar burning sensation surged over.

In the realm of time, Wang Yi looked at the huge mountain-like body of the Yanxing Giant Beast, feeling a little worried.

Is the black liquid enough to transform such a large body?

Wang Yi thought for a while, but decided to give it a try.

#### [Chapter 207: Power of the Ancient Gods](#)

Wang Yi took out the big crystal bottle containing the mysterious black liquid-"Ancient God Liquid", carefully condensed a drop of black liquid about the size of a fingernail, and put it on the dark red scale of the Giant Flame Star like a playground. , Under the gaze of a person and a giant beast, the drop of black liquid slowly penetrated into the scales—

"Woo--" A strong pain came from the scales, the familiar burning sensation of the soul, and even to Wang Yi's surprise, a drop of black liquid of about the same size caused the pain to the human body and the body of the Yanxing giant beast. It's almost the same.

The pain came and went quickly, and Wang Yi discovered that the Yanxing Giant Beast's ability to withstand pain was much stronger than that of its own human body.

"Come again." Wang Yi blinked, and again condensed more black liquid from the crystal bottle, this time the size of an egg, and poured it on the paws of the Yanxing Giant Beast.

"Roar~~" This time the Yanxing behemoth was a little bit overwhelmed, its huge body trembled violently, like a big earthquake, its paws sank deep into the ground, leaving behind a few ravines as deep as a canyon, the pair were as red as the burning sun. His pupils showed a tyrannical color.

"Chichih~~"

That mysterious power penetrated into the most subtle genetic cells of Yanxing Giant Beast's body and changed its structure.

"Come again." Seeing that the Yanxing Giant Beast had adapted, Wang Yi once again grabbed a cloud of black liquid with his mind and "wiped" it on the Yanxing Giant Beast.

The painful low roar of the Yanxing Giant Beast sounded from time to time.

Soon, a whole bottle of black liquid was consumed, and the liquid-smeared claws of the Yanxing Giant Beast had more black lines - lines similar to those on the mysterious black snake monster on Wang Yi's human body.

Wang Yi estimated the size of the body part that the Yanxing Giant Beast had been transformed by a bottle of black liquid, and he was slightly relieved. "The pool of black liquid should be no problem, it's enough."

In the palace, in the circular pool, the Void Zerg clone has also finished the absorption process. At this time, "he" has changed back to the original state of "Void Zerg Kadiz", and the ferocious body like a silver-white praying mantis monster has crawled on it. The dense black secret patterns formed a terrifying black snake monster, making him even more terrifying.

"Boom!" The avatar of the Void Zerg race drives the mysterious power, and the incomparable black snake monster secret pattern appears on his body, and the secret pattern lights up, as if the entire monster has come to life.

The sharp forelegs of the long knife of the Void Zerg clone lightly swept in front of them, following the fluctuation of the original law of the space, and it seemed to be split along the "wood texture", silently, the space was cut into a dark and deep crack.

After absorbing the black liquid and completing the transformation, the law of the Void Zerg clone was realized, and the power and strength of the law was doubled again!

You know, the clone of the Void Zerg Race was originally a special life at 840 times the genetic level (after practicing the first calamity of the Nine Tribulations), and now the physical strength has increased again, and it has definitely entered the immortal level of Fenghou!

Except for the "immortal body" without the immortality, the overall strength is not weak in the immortality.

"Hahaha..." The Void Zerg clone laughed happily.

"happy!"

Being able to get this kind of opportunity in the ruined ancient temple really made Wang Yi feel that his trip was worthwhile.

"Next, it's time to deal with these ancient \*\*\*\* liquids." Wang Yi turned and looked at the black liquid in the pond.

Goose plucking feathers, this kind of magical precious treasure, how could Wang Yi have missed it since he saw it, not to mention, the avatar of the Yanxing Giant Beast still needs it.

"Huh!" The power of the world spread out, turning into an invisible big hand, grabbing the liquid in the entire pool.

"Wow!" The black liquid in the entire pool floated, revealing the stone disk engraved with a black snake-shaped pattern underneath.

"Huh?" Wang Yi's face suddenly changed, who was smiling.

"Om~~"

Suddenly, secret patterns appeared on the walls of the entire palace, and a huge force came and suppressed Wang Yi, who wanted to collect the entire pool of ancient \*\*\*\* liquid.

"boom!!!"

Wang Yi was taken aback. His figure flickered and merged into the spatial fluctuations. He wanted to avoid it, but was still directly shaken out by the powerful force. He slammed his head against the palace wall, and a silver-white liquid flowed out from the corner of his mouth. The shock was not light.

However, that power seemed to be the spontaneous protection of the palace. It was only aroused for a moment, and after the "outlaws" who intended to take Wang Yi away from the entire pond, the "outlaws" flew up, they did not attack again.

But Wang Yi was sure that if he dared to collect the black liquid from the entire pool again as boldly as before, the palace would definitely not give up.

"What's the matter, this palace suddenly attacked me?" Wang Yi was a little depressed. "I took some just now, and I haven't seen it respond so much... Could it be that I took too much at once?"

Wang Yi can only think so.

He looked at the black pool with greedy eyes, hesitated, and cautiously controlled a world force, penetrated into the black pool, then grabbed the fist-sized black liquid, and gently grabbed the surface of the pool... The palace did not respond, Wang At this moment, Yi had a lot of bottom in his heart, and quickly took it into a world, "Roar~~" and the flame star beast waiting in a world saw the black liquid falling from the sky and gave a huge cheer.

Like a little thief, Wang Yi stole the liquid from the black pond in small pieces. Although he took less at a time, he was fast. Soon, the water surface of the black pond was visible to the naked eye. reduce.

Wang Yi took a lot of joy.

When the liquid in the black pool was reduced by almost one-third, the terrifying breath exuded again in the palace, faintly threatening... and Wang Yi had to take out the black liquid that had already been taken out. Putting it back, looking at the pool with some regrets that there are still two-thirds of the ancient \*\*\*\* liquid, these are treasures, it's a pity...

"Wow~~"

When Wang Yi was wondering how to dump the black liquid in this pool before leaving, there was a strange noise in the pool.

Wang Yi's eyes widened when he saw it~[www.mtlnovel.com](http://www.mtlnovel.com)~ The black liquid was diminishing and all penetrated into the black snakestone plate at the bottom of the pool, and was absorbed. In a blink of an eye, the pool was empty, and all the black liquid disappeared. not see.

"..."

"Forget it." Wang Yi said sadly.

Staring at the black stone plate a little unwillingly.

Black stone plate: "..."

Wang Yi hesitated again and again, and finally gave up to anger the palace and forcibly took away the black stone plate-mainly because he felt he couldn't handle it.

In the world of time, the Yanxing Giant Beast had already absorbed an unknown amount of black liquid, and had completely completed its evolution.

"Roar!!!"

There was a roar that tore the sky like a giant beast in the beginning.

The whole body was covered with black secret patterns, and the golden steel wings spread out behind the sky to obscure the sun, burning the raging flames, and the huge flaming star beast suspended in the sky like a mountain, making an excited roar.

#### [Chapter 208: Two hundred thousand points](#)

In the huge grotto, a door opened in front of the sculptures of the three ancient gods, and a figure appeared in the stream of light.

Wang Yi looked around. He was the only one in the entire grotto. The three indigenous masters didn't know whether they were still being baptized in Gushentan or had left, but this has nothing to do with Wang Yi.

This time in the ruined ancient temple, Wang Yi harvested a large amount of ancient \*\*\*\* liquid. In addition to allowing his three bodies to have the ability to stimulate "ancient \*\*\*\* power", there was still some ancient \*\*\*\* liquid left.

"The Zerg mother emperor can be used for baptism, and the rest can be given to Luo Feng, Hong and Thunder God..." When dealing with treasures that he didn't need, Wang Yi was quite generous.

Next, Wang Yi continued to search the bottom of the abyss of the ruined continent for another month, and finally had to give up. The entire ruined continent is too big, it is like finding a needle in a haystack, and the efficiency is too low.

And Wang Yi didn't want to make too much noise to attract the attention of the ancient temple above. Even if he is now strong, Wang Yi still will not underestimate the power of the temple that once had the

inheritance of the three ancient gods, not to mention he does not want to attract the human race. Unwarranted attention.

In addition, this time all the tasks were completed and the rewards were full. Wang Yi persisted for a month, and finally gave up on exploring.

Therefore, after a three-month mission in the ruined ancient temple world, Wang Yi sat on the spacecraft, shuttled through the starry sky, and returned to the outside.

The towering black palace, which is bigger than a planet, is still suspended in the void, unchanged for billions of years.

Coming here also means that Wang Yi's mission this time has ended.

The spaceship of the Virtual Universe Company that came to welcome Wang Yi appeared in his field of vision. Wang Yi finally looked back at the twisted dark star field. He felt a little regretful. In the end, he still failed to sign in to receive the highest reward of the ruined ancient temple.

...

"His Royal Highness Wang Yi, hello, I am 'Samuqi' who is the recruiter of Yeheng Palace. Congratulations to His Royal Highness Wang Yi for completing the world experience of the ruined ancient temple."

A large hall on the first floor of the towering black palace, responsible for receiving Wang Yi's virtual universe company messenger, a strange man with purple skin, a single emerald horn on his forehead, and a pair of scaly wings behind him smiled.

"His Royal Highness Wang Yi was able to complete the mission of the ruined ancient temple so quickly... For so many years, His Royal Highness is the most efficient one I have seen in performing the reception tasks. It is really surprising, and he really deserves to be His Royal Highness."

Facing the flattery of this world master, Wang Yi just smiled and said a few words of humility.

Wang Yi had already put away his "silver spaceship". The two of them walked in the hall of a palace on the first floor where a large number of spaceships were parked thousands of kilometers long and wide. On a black triangular spaceship with a diameter of more than six hundred meters, "I will send your Highness here, and then this spacecraft will send your Highness back to the Ninth Space and Time. I wish your Highness a good journey."

Wang Yi smiled and said thank you, and returned to the spacecraft with the person in charge of the transfer.

Of course, Wang Yi did not forget to sign in when he left the "Yeheng Palace".

[Ding, congratulations to the host for signing in successfully, and reward "Nirvana Qingyanhua". ]

【Number of check-ins available for this place: 0】

It was an unfamiliar name. Wang Yi raised his brows and asked Bermuda to check it out. Only when he found out that it was a piece of material worth more than 200,000 yuan. It could be used to nurture

higher plant life and break through to immortality. Some help, for Wang Yi, was also regarded as a windfall.

The black triangle spacecraft started, flew out of the palace, speeded up and shuttled, entered the dark universe, and continued to accelerate, flying to the ninth time and space "Wuchen Continent".

"The mission of the ruined ancient temple has been completed. Next, when we return to Wuchen Continent, we will hand over the mission, and then go to take over other dangerous-level tasks, and finish the dangerous-level tasks first." Wang Yi sat on the sofa in the luxurious living room and fell down. A glass of wine, I feel very good.

...

The spacecraft of the Virtual Universe Company sent Wang Yi back to Wuchen Continent after half a day.

In the vast Wuchen Continent and the palace complex covering an area of 10,000 kilometers, Wang Yi walked through the magnificent palaces and pavilions in the respectful greetings of the servants and guards, returned to his special residence, and connected to the virtual universe network.

Yuxiang Mountain, Primitive District, Manor No. 114.

Wang Yi clicked on the "Backstage Management" file, selected the "Cultivation" option, and soon entered the practice task page.

Select "Apply to confirm completion of the training task".

After confirming the operation, Wang Yi closed the communication, rubbing his chin and looking out the window in a good mood. "Now, just wait for the people from the Virtual Universe Company to come over to verify and confirm that the task is completed, and I will be rewarded with points."

About seven hours later.

A simple gray-blue shuttle-shaped spacecraft flew from a distance and stopped on the grass outside Wang Yi's palace.

And Wang Yi also brought the guard leader Jacques and others here to greet him in advance.

Three men and women wearing the black uniforms of the Virtual Universe Company walked out of the spacecraft. The strong werewolf headed by them said respectfully: "Hello, Your Highness Wang Yi, please enter the spacecraft alone for verification."

"Okay." Wang Yi nodded, and under the eyes of Jakesi and the others, followed the three virtual universe company staff into the spacecraft and came to a special inspection cabin.

"After your Royal Highness Wang Yi enters the inspection cabin, just follow the smart prompts."

The three men and women were very humble and polite towards Wang Yi, and they obviously knew Wang Yi's status.

"Yeah." Wang Yi walked into the inspection cabin.

Then the hatch closed, isolating all information inside.

After Wang Yi entered, the three masters of the virtual universe company talked with each other through voice transmission.

"I heard that this dangerous mission was completed within three months by His Highness Wang Yi. This is to add the time to hurry."

"Isn't it? It's said that even if our world lord enters in the dangerous mission world, the possibility of falling is very high. We can complete the mission so quickly. Don't think that His Royal Highness Wang Yi is just a universe level. His trump card kills us. How easy it is."

"I also heard that many senior executives in our virtual universe company are paying attention to His Royal Highness Wang Yi."

The interior of the silver-white cabin is not big and empty, with only a cylindrical metal platform.

A synthetic electronic voice sounded without the slightest emotion.

"His Royal Highness Wang Yi, please take out the quest item Ancient God Order and place it on the platform in front of you."

Wang Yi had already made preparations. At this moment, he placed the ancient \*\*\*\* order from the temple on the metal platform.

"drop."

"Passed ~www.mtnovel.com~ The first task was completed with an ancient \*\*\*\* order, and 20,000 points were awarded." The rigid electronic voice sounded in Wang Yi's ear again.

"His Royal Highness, please prove your baptism in Gushentan."

Wang Yi stretched out his hand to drive the mysterious force in his body. A powerful breath suddenly burst out of Wang Yi's body, and black magic lines appeared on Wang Yi's arm.

A blue light stayed on Wang Yi for three full seconds.

"drop!"

"confirm!"

"His Royal Highness Wang Yi, congratulations for completing the second task, completing the baptism of the Ancient God Lake, and earning 180,000 points as a reward."

Wang Yi did not move, his expression calm, as if waiting for something.

Sure enough, the next moment...

"Wang Yi." A cold woman's voice sounded in Wang Yi's ear.

#### [Chapter 209: The efficient Wang Yi](#)

"A drop of 3000 points? It's a pity that I don't lack your points."

Wang Yi came out of the detection cabin and muttered in his heart.

"His Royal Highness Wang Yi!"

The three world masters who were still guarding saw Wang Yi coming out, and they all spoke up.

"Well, it's over, I'm leaving, you don't have to give it away." Wang Yi smiled.

"His Royal Highness, go slowly." The three world masters watched Wang Yi leave.

Wang Yi returned to his residence and entrusted the Virtual Universe Company with three copies of Gu Shenyuan packed in silver suitcases to Luo Feng, Hong, and Lei Shen.

"Luo Feng should have been adventurous in the mission world now, and he can only receive my gift when he comes back."

Luo Feng is already a member of the Primordial Secret Realm, so he did not choose the "Blood Luo World" in the Primordial Secret Realm for the first training mission like in the original history. Instead, he chose another dangerous mission "Death Sea" in the Primordial Secret Realm nearby. It didn't take long to start.

However, Wang Yi had also told Luo Feng about the secrets of the Xueluo World in advance. If Luo Feng didn't have any accidents, he would choose the "Blood Luo World" in the end.

But whether or not Luo Feng could get those opportunities, Wang Yi had no idea.

With the emergence of the butterfly effect, history has changed once again, and Wang Yi is a little helpless.

Regardless of him, everyone has their own chances, and he believes that the future City Lord Luo will not die so prematurely.

"Then I will continue my mission."

Wang Yi began to prepare for the next dangerous mission in the Primitive Secret Realm.

Viska Star!

...

"His Royal Highness, Viscar is in front." The staff of the virtual universe company responsible for transporting Wang Yi to Viscar respectfully said to the dark-red shirt and black-haired boy with a flat expression on his side.

"Well, thank you." Wang Yi smiled slightly, and when he stepped on the floor of the hatch, it turned into a streamer and flew towards the huge silver-white oval sphere in the distance.

The staff who left the place sighed with emotion: "His Royal Highness Wang Yi is hailed as the first genius of our human race, and he is so polite to the low-level people like us. This is the heart of a truly peerless genius."

The Virtual Universe Company seems to allow Wang Yi to do various training tasks, but in fact it has been closely monitoring his whereabouts and movements, and even two venerables are responsible for processing all his information.

However, tasks like the dangerous level may be dangerous for ordinary geniuses, but for Wang Yi, a peerless evildoer that is rare in billions of times, it is not that difficult.

If Wang Yi did not die, he would basically come back without incident.

Therefore, the relevant senior management is not too worried.

...

"Viska star."

Wang Yi looked at the huge silver-white oval celestial body in the distance...It was suspended in the starry sky, like a huge egg.

Viscar is a naturally formed planet with a very long history, even when the human race first discovered it, it already existed.

In addition, many strange and powerful lives were bred from within, the realm masters, and there were many immortal ones.

Because these lives were bred from the origin of Viska and are naturally good at hiding inside the planet, even the human race, unless the Viska is completely cleaned and destroyed from the beginning to the end, from the inside to the outside at a high cost, Otherwise it will be difficult to destroy these lives.

The human race obviously has scruples and did not do so.

The powerful beings born on the planet are also very clever, hiding in the depths of the planet, not daring to offend the human race.

The Viska planet is divided into layers from the inside to the outside, just like a round cake, each layer has its own ecological circle.

Generally, there is no danger in the outer periphery. The deeper the inner planet, the greater the danger encountered.

If you enter the core of the planet, I am afraid that Immortality is easy to hit.

An ordinary cosmic genius encounters immortality, that is, death.

Wang Yi thought about it, took out the Immortal-class silver spacecraft, skillfully disguised it as a meteorite, and flew towards the giant silver-white planet in the distance.

One month later.

Wang Yi's avatar of the Void Zerg shuttled through the ground quickly, forcibly smashing layer after layer of the planet's incomparably hard rock barriers. Each layer of barrier may be tens of thousands of kilometers thick, but Wang Yi is comparable to Feng Hou. Under the eruption of immortal power and speed, Wang Yi had already broken through dozens of layers of barriers in a short span of time.

And behind him, the law aura was as vast as the sea, and waves of powerful immortal fluctuations were earth-shattering.

A roar came. "Dare to blaspheme the tomb of the ancestors! Kill our companion! Kill him!"

A large group of immortal gods chased after Wang Yi's \*\*\*\* fiercely, headed by a powerful immortal king.

Before Wang Yi sneaked into the tomb of the ancestral gods and stole some of the treasures, but it was discovered by several immortal gods guarding here. Wang Yi exploded on the spot and unexpectedly killed the two immortal gods, but the other immortal gods were also chased out immediately. Coming over, even Wang Yi dare not shake the large number.

More importantly, there are two immortal kings inside. Except for one who stayed in the tomb of the ancestors to guard, the other was chasing Wang Yi with murderous expression.

Wang Yi didn't dare to stop and fight against the immortal king who was full of anger. He was not the opponent's opponent in terms of power or secrets. Moreover, there were a large group of immortal gods helpers on the opposite side. Wang Yi really stopped. I guess this clone would have to be The explanation is here.

Fortunately, Wang Yi's avatar of the Void Zerg clan is weird, combined with the unbelievable fast speed of the original law of space, even if the king is immortal, it is difficult to catch up with him.

"Peng!"

A stream of light smashed the planet's surface, turned and flew to the other side of the planet, disappearing in a blink of an eye.

"what....."

The Emperor Immortal watched the enemies who had desecrated the temple of the ancestors and killed his companions fled. He roared with anger, and his divine power exploded, shattering within a radius of thousands of kilometers.

But he didn't dare to catch up. The towering palace in the distant starry sky made him terrified. He looked at Wang Yi's direction bitterly, remembering his appearance thoroughly, and turned and left here.

On the other side of the planet's surface, Wang Yi's cosmic human deity hid here, watching the Void Zerg clone teleporting in front of him.

"Got it."

"It's not in vain that I worked hard for a month."

Both bodies smiled.

"Well, the task is complete, and it's time to leave."

Wang Yi performed the Viscar mission, which lasted 35 days and was completed.

...

After that, Wang Yi went on to do four other dangerous missions in the original secret realm, "Old God Relics", "Silent Iceland", "Sea of Death", and "Nine Dragons Tombs".

With the addition of the "Ruined Ancient Temple" and the "Visk Star", it took a total of five years and three months to complete six dangerous missions, earning a total of 605,000 points and a lot of treasures.

And Wang Yi frantically doing dangerous tasks ~www.mtlnovel.com~ has also spread among the geniuses of Yuxiangshan, and many people are surprised by his crazy energy.

...

Virtual universe, Yuxiangshan, public area.

In the big hotel.

Wang Yi and Rong Jun, Wuka, Ai Chen, Qianshui, Jiang Mo... even Luo Feng, who had been working on missions in the mission world, arrived.

"Wang Yi, the whole Yuxiang Mountain has spread. You know that you are doing dangerous-level missions all day long. You are too crazy. There are only six dangerous-level missions in the Primitive Secret Realm. You don't care about it, and you took them all." Qian Shui looked at Wang Yi worried.

"Yes, even if you are sure, you have to be careful."

Other friends and acquaintances also began to persuade.

Dangerous tasks, with a 50% mortality rate, even they have to do it like walking on thin ice. How can they be like Wang Yi in desperate rushing, and others are frightened.

Wang Yi looked at these friends with a warm heart, and smiled: "Don't worry, I have my own opinions."

#### [Chapter 210: Purgatory Abyss](#)

Wang Yi left the public area and returned to his original manor. Just now, he chatted with Ai Chen and the others for a drink and was in a good mood.

"It's time to do the desperate mission of the Primal Secret Realm."

He stroked his chin.

"Do you want to take Luo Feng to do the task?"

He hesitated.

Over the years, Wang Yi has been busy with his missions. Wang Yi didn't know what Luo Feng had gained in other mission worlds. Every time he went to perform Luo Feng's mission world, Luo Feng had already left. The two sides just staggered and never met.

However, he felt that Luo Feng's gain should not be small. After all, he has a golden horn monster, a clone of the Demon Killer clan, and a pile of hole cards. As long as he is not stupid, it is easy to mix good in the dangerous mission world.

Another thing to mention is that Luo Feng still worships King Zhenyan. If he goes to the Demon Mountain in the future, he will have to be hunted down by someone sent by the billion-year-old grudge Guiyu Hou.

...Wang Yi hadn't reminded him of this, and he didn't know what to say.

I can't say, ah, your teacher once abandoned an old friend. Fortunately, he was in Devil Mountain. He wanted to send someone to kill you because he was not pleasing to your eyes... Is he such a gossip?

But Wang Yi is also very curious, how did King Zhenyan, a monkey, get together with a snake in the first place?

In the original work, Guiyu Hou was completely transformed into a human form, and he was seven or eight meters tall, right?

emmmm...

Wang Yi admitted that he was indeed gossip.

In the past few years, there have been some gains in completing dangerous missions, but none of them have helped Wang Yi as much as the first "Ruined Ancient Temple". They are just some foreign objects and have limited help to Wang Yi's own strength improvement.

Although there are many good things to sign in, at the level of Wang Yi, if you want to improve quickly, the consumption is huge.

It's like in Wuchen Continent. Although Wang Yi often went everywhere, he didn't check in any treasures that made people's eyes shine...Each place could only check in once, and the randomness of rewards was too great.

After thinking about it in the study for a while, Wang Yi decided to act alone and not bring Luo Feng.

After all, it was the same sentence. He and Luo Feng had a good relationship, but they weren't Luo Feng's nanny. Everyone had their own way to go.

He can only give Luo Feng some help as much as he can.

Now that Wang Yi has developed, he has forgotten subconsciously the idea of lying on Luo Feng's thigh to the end...

The abyss of purgatory.

The news of Wang Yi's application for the mission of the extremist level was immediately passed to the "Venerable Pangbo" who was sitting in the abyss of purgatory. As one of the oldest human beings with extraordinary strength, Venerable Pangbo has been sitting in the most dangerous area of the primitive secret realm. "The Abyss of Purgatory" has not been seen for hundreds of millions of years.

At the beginning, he didn't even pay attention to Wang Yi. The reason why he came out to accept Wang Yi as his disciple was mainly because the teacher was "Chaos City Lord".

But this is also the most satisfactory disciple he has ever received.

Venerable Pang Bo would never want such a disciple to be bold enough to go to the "Purgatory Abyss" to do a mission.

After receiving the news of Wang Yi's application for the mission of desperate level, in his heart "Venerable Pangbo" didn't want this young disciple of the Tianzong Wizard to venture into such a place. The genius has to be tempered, but it also depends on the situation.

The Virtual Universe Company never encourages geniuses to take risks in the "Purgatory Abyss", and the reason for keeping the Purgatory Abyss is mainly for deeper reasons.

Generally speaking, virtual universe companies will not interfere with the decisions of geniuses, and they are responsible for everything.

However, Wang Yi, a peerless genius with the most heaven-defying talent in the history of the human race, has great hope in the future to become the backbone of the human race. It is impossible for the human race to let this genius go to the abyss of purgatory and this desperate adventure, and die in vain. In that kind of danger, it was a violent thing!

"Venerable Pangbo" also wanted to prevent Wang Yi from going to the abyss of purgatory at first, but then he thought of what the teacher Chaos City Lord had said to him, and the idea of preventing Wang Yi was suppressed.

"The teacher agrees that Wang Yi will venture into the abyss of purgatory. He must have his own ideas."

"Venerable Pangbo" said inwardly.

He hesitated again and again, and finally agreed to Wang Yi's application.

"Venerable Pangbo" did not know that the reason why the Chaos City Lord agreed to let Wang Yi go to a desperate adventure was mainly because he had known in advance that Wang Yi had a "clone" existence, a genius with a "clone" existence, as long as he did not die by himself...Basically It is difficult to truly fall in the training mission.

At the same time, Wang Yi received the reply that the application was approved, with a smile on his face.

The abyss of purgatory is too dangerous and difficult to pervert.

The average death rate of the desperate missions is 90%, but the No. 1 Abyss of Purgatory is a shocking 99%! So generations of geniuses... Few people dare to venture.

That is, one hundred geniuses who chose this task, only one can survive in the end, and it may not be able to complete the task.

As the most difficult task of "Purgatory Abyss", only one task, the points reward is 1 million points! It is also the highest among all desperate-level tasks.

Three days later.

Wang Yi was in the shuttle spacecraft of the Virtual Universe Company, and after nearly three days of flying in the dark universe, he arrived in a star field.

In this star field, the most conspicuous is the towering giant mountain and the palace on the giant mountain.

That is the "Sky Vault" and also the palace of "Venerable Pangbo".

Of course, Wang Yi didn't know that his teacher was sitting here, and Venerable Pangbo hadn't talked about his sitting here, so Wang Yi didn't know anything about it.

"Venerable Pangbo" did not talk to Wang Yi under the orders of the Chaos City Lord. Wang Yi came to the most dangerous area of the mission of Purgatory Abyss, the most dangerous area, and it was so smoothly completed that Wang Yi didn't notice anything at all. abnormal.

I don't know at all, the human race doesn't know how many bigwigs are watching him secretly.

Right now, UU reading [www.uukanshu.com](http://www.uukanshu.com), his teacher "Venerable Pangbo" is standing on the top floor of the tall palace and staring at him coldly.

"Venerable Pangbo" actually did not know that Wang Yi had a clone. One was that Wang Yi had not told him, and the other was that his true body was always here and did not meet Wang Yi in reality, so "Venerable Pangbo" Naturally worried that Wang Yi would enter the abyss of purgatory this time.

In his opinion, this is playing with fire.

"Forget it, the Master Chaos City Master must have made arrangements, no matter how bad, with the token of the teacher, Wang Yi will definitely be fine in the end. This time, treat him as a temper." Venerable Pang Bo said in his heart. think.

And Wang Yi also left the shuttle spacecraft of the Virtual Universe Company and stood in the void, looking at the burning blood-like world in the distance.

Just looking at it makes people feel that the souls are burning together.

There is the abyss of purgatory.

The grave of genius. For countless years, I don't know how many geniuses of the human race have ventured there with confidence, and in the end almost all of them are buried there, and now, there is more Wang Yi.
