

A God 211

[Chapter 211: Death is everywhere](#)

Purgatory Abyss training mission: Survive for one year, successfully earn 1 million points.

It's very simple, and it's simple to point people out.

But Wang Yi could smell a strong breath of death.

In fact, the requirements of those desperate missions are all very simple, some are simple "survival missions", and some are "search missions."

On the contrary, like the danger level and the misery level, you can often see that the mission requires "hunting" and "killing to obtain certain items", which encourages killing.

In the desperate level mission, it is inherently dangerous, if you dare to kill, then you are really looking for death.

The abyss of purgatory does not exist in the starry sky, but there is another level of space similar to the "kingdom of God".

The interior is vast!

And its entrance is... a huge scarlet fireball, like a mutated sun, its light completely illuminates the surrounding star field, but it is bloody!

There is a whirlpool passage in there, and there is the entrance to the abyss of purgatory.

Wang Yi flew into the sea of flames in his silver spacecraft, turning into a blood-colored world in front of him, which made people extremely depressing, and beside the whirlpool passage, there were levels arranged by the human race, but there were no living people, but intelligent systems. In control.

And this is just one of the channels into the abyss.

Looking at the huge **** vortex, Wang Yi could feel the overwhelming terrifying aura emanating from it even through the spaceship.

die! destroy!

Wang Yi could feel these two breaths in the **** vortex.

The abyss of purgatory is as vast as the kingdom of God.

The abyss environment is extremely harsh and the temperature is extremely high. Only the universe level can barely survive there. Purgatory monsters are naturally bred in the abyss. The lowest is the universe level. There may also be domain master level and world master level monsters. They basically Without reason and wisdom, the nature is full of killing and destruction. This is a kind of monster that is constantly fighting and evolving, and only instinct is full of the desire to kill.

The Purgatory Beasts are extremely hostile to outsiders, as soon as they are discovered, all the Purgatory Beasts will work together to hunt down.

Because they were born in the abyss of purgatory, they are inherently very sensitive to the environment of the abyss of purgatory, as long as there is a little trouble, they will be attracted.

Ordinary cosmic-level geniuses come here with care. They cannot stay in a fixed place for too long. The "Purgatory Abyss" is like a consciousness of their own existence, full of rejection of external life. Once they stay in the same place for too long, There will be various dangers, such as volcanic eruptions, the collapse of the earth, and the gathering of a large number of infernal monsters...This is all possible.

You can only stay in the same place for up to three days, and you must leave. This is a safer time.

"Hoo~~"

Wang Yi put away the spacecraft and flew alone to the flame vortex tunnel with a diameter of more than 100 kilometers. Compared with this huge tunnel, he was as indistinct as dust.

And the towering giant mountain palace suspended in the starry sky, "Venerable Pangbo" in gold silk robe watched Wang Yi fly into the sun without hesitation, and muttered, "This stinky boy..."

...

The vortex channel is very long, making Wang Yi wonder if it is connected to the core of the star. Fortunately, after flying for almost a million kilometers, a "mirror" glowing white light appeared in front of him. Wang Yi observed it. Rushed in.

It felt like passing through a water curtain. The next moment, Wang Yi saw a flower and appeared on a vast molten land. The black, reddish rocky land stretched to the end of the horizon, while rivers of molten lava flowed like blood vessels. The desolate ground is winding and winding.

The sky was covered with fiery red clouds, and drops of fire rain fell on the ground and smoked.

This is a liquid like molten smelt.

At the same time, an astonishing heat surged in, surrounding Wang Yi as if he were in a big furnace.

The ninth rank of the ordinary constant star is here, and it will instantly turn into fly ash, even the cosmic rank, which is also very uncomfortable.

"This is the abyss of purgatory." Wang Yi muttered as he looked at the flame world in front of him.

"Bermuda, use a detector to detect the world in front of you."

"Master, it cannot be detected."

Bermuda's aggrieved voice sounded in Wang Yi's consciousness. Obviously, she felt that the owner always played in this kind of place, which made her useless.

Wang Yi was not surprised by this.

Wang Yi perceives that the restraining power of this world is astonishing. Even at the cosmic level, it is difficult to get rid of this restraining force to fly. Perhaps it can only be done at the domain master level and above-this undoubtedly increases the difficulty of survival.

Especially at the Cosmos level, it is undoubtedly a very serious challenge to survive here.

The weakest monsters here are all universe-level, domain master-level, and world master-level, and even immortal-level monsters are lurking in the depths.

It's **** difficulty!

Wang Yi glanced at his back. There was a mountain that was disguised by the Virtual Universe Company. It was indestructible, and the way back was here. There are many such channels in Abyss World. Of course, compared with the vast area of Abyss World, there are very few. NS.

Wang Yi recalled the internal news about the Abyssal World he had received from his teacher, and took a deep breath.

According to the news dug from the teacher before, the vast terrain of the entire abyss world is a roaring scaly monster with wings and a three-horned lion head on its head. The lava rivers are lines, outlining the appearance of a scaly monster.

What is even more surprising is that this topographical environment is naturally formed, that is, once the abyssal world is born, this "natural environment"-like landform will be formed therewith.

Here, some places are full of incredible power of laws, very magical.

Wang Yi once heard a term that he cared about from his teacher—the place where he was first conceived, was born with a beast...

"It is very likely ~www.mtlnovel.com~ this is the birthplace of a born beast god, born to be the life of the Lord of the universe, and itself is the manifestation of the original law of the universe, how magical cannot be overstated..." Wang Yi said inwardly.

Wang Yi thought about the introduction of the "natural beast gods" in the original book—"The natural beast gods are different from the acquired beast gods. They are the condensed essences of the universe. They are natural treasures, its scales, and its fur. All its blood has miraculous effects. It is more precious than the thousands of ordinary treasures. It is a feast to besieged and killed the natural beasts and gods, and it is a feast of many super existences."

Therefore, although the natural beast gods are powerful and have been the masters of the universe throughout their lives, they all fell in the end, without exception.

The world of Xueluo is... and here, too...

Wang Yi sighed in his heart, and at the same time wondered what he could gain here.

The most important thing at the moment is of course...

"Son, sign in."

[Ding, congratulations to the host for signing in successfully, and rewarding "Fire and Sky Beast God Carving".]

【Number of check-ins available for this place: 0】

[Chapter 212: Yan blood jade](#)

Wang Yi looked at the strange sculpture that appeared abruptly in his hand... It was about three feet high. It was dark red in color. It was made of unknown stone. It burned in the palm of his hand. The entire statue was a "unicorn" resembling an ancient legend on the earth. ", but with a pair of wings, a very long tail, his body leaned on the ground, his head slightly raised, and three sharp horns on top of his head, making a forceful gesture.

The entire statue faintly exudes a terrible breath that makes the soul tremble.

"Beast **** carving..." Wang Yi murmured.

In the world of Xueluo, there is a sculpture of the "golden and empty" beast **** that has been handed down. In the original work, Luo Feng received one, and based on this, he realized a trace of the beast god's artistic conception.

But right now, Wang Yi also got a statue, but it was a "fire and air" beast god.

The Dao of the Beast God is a Dao of fusion of laws, and the difficulty of cultivation is far more than that of the ordinary Dao.

"This is what suits me." Wang Yi was delighted.

"Golden and empty" Beast God Avenue is suitable for Luo Feng, and "fire and empty" is suitable for Wang Yi.

Of course, it also includes the way of time and space, but this does not belong to the way of the animal gods.

When the universe was born, there were only two powerful laws at the beginning, one of which was broken down into the six fundamental laws of gold, wood, water, fire, earth and space, and the other was broken down into the four fundamental laws of wind, thunder and lightning, light and time. !

This has become two factions.

Space faction, space is the superior law, and gold, wood, water, fire, and earth are the inferior laws.

Time faction, time is the superior law, and thunder and lightning, wind, and light are the inferior laws.

...

One who fully understands the laws of space is the Master of Space.

To fully comprehend the law of time, one is the Lord of Time.

At the same time, the person who fully understands time and space, truly controls time and space, has incredible superpowers such as time-space reversal...that is the "Master of the Universe".

And there are eight natural beast gods in the universe. The powerful life "beast god" directly bred when the universe was born has the strength to match the master of the universe, and this beast **** is a fusion of the eight lower-level laws and the two upper-level laws of time and space. The avatars that are together naturally contain the law of fusion in every move, and even the statue of the beast **** contains the law of fusion.

Simply merging "gold and space", or "wood and space", or "water and space", or "fire and space", or "earth and space", any of these five types is difficult to ascend to the sky !

The fusion of the two forms the law of fusion, once it reaches the perfect point, it can be comparable to the Lord of the universe!

However, the successful fusion of the law of space and the law of fire is thousands of times more difficult than simply understanding the law of space.

Wang Yi carefully looked at the "carving of beast gods" in front of him, the scales, claws, head, tail...every detail was imprinted in his heart.

Wang Yi and Yan Xing Giant Beast are one body, and Wang Yi sees it, which means that Yan Xing Giant Beast sees it.

"Ang~~"

In the time world, the Yanxing Giant Beast clone let out a earth-shaking roar, and joy was radiating in its huge red eyes.

The instinct of the Yanxing giant beast that exists deep in the bloodline of the body is touched. It seems to see a fierce giant beast that swallows the sky and the earth traverses the universe, killing thousands of scenes...The claws are torn, the wings are split, and the tail is twitched. ...All carry the Dao Yun that goes straight to the origin of the universe, the same as heaven and earth.

The Yanxing Giant Beast was suddenly immersed in this artistic conception.

It resembles a toddler, crudely imitating the attitude of the mysterious behemoth seen in consciousness, tearing its claws, raising its wings, flapping its wings, and beating the tail behind...

Seeing the "soul charm" and artistic conception carried on the "Beast God Sculpture", it is a condensed embodiment of the Tao of the original law... The Yanxing Giant Beast seems to see its own future path, and this is what the Yanxing Giant Beast is advancing. direction.

The statue of the beast **** is to the Yanxing behemoth, just like the cosmic chaos stele is to the human body, it can guide the Yanxing behemoth to feel the charm of its artistic conception, and it is naturally countless times faster.

With this carving of the fire and sky beast god, the Yanxing Giant Beast will understand the mood of the beast **** in the future, and it will be much easier to step on the way of the beast god.

"This simple three-step comprehension is called "Beast God Three-step", forget it." Wang Yi thought to himself.

Claw tearing, wing flapping, tail pumping...This is the prototype of the three forms of the beast god.

However, if you gradually understand and evolve, it will become a very terrifying jerk.

Now, it is only a rudimentary form, but it is also enough for the Yanxing Giant Beast to play its role.

...

Wang Yi got the sculpture of the beast **** and sent it to the time world for the Yanxing giant beast to comprehend, while the human deity was comprehending the Chaos Steele, and his Void Zerg clone was acting outside.

Wang Yi had been secretly revealed by the teacher "Venerable Pang Bo" that although the abyss of purgatory is extremely dangerous and countless beasts, there are also various treasures, among them... there is a very precious flame blood jade... this is only the abyss of purgatory. A specialty only.

"Venerable Pangbo" did not elaborate on the special function of the Yanxue Jade, but Wang Yi could also guess it vaguely.

This kind of treasure is generally only possible to find in some extremely dangerous areas in the abyss of purgatory. Of course, there is another way to get the blood jade, and that is to kill the infernal beast!

The flame blood jade is naturally very attractive to the purgatory monsters, so many purgatory monsters find the flame blood jade and swallow it into their bodies, but in fact, the flame blood jade cannot be digested by the purgatory monsters, but they have ways to use it. The special effect of Yan Xue Jade enhances one's own strength.

Although not all purgatory beasts have 'flaming blood jade' on them, the more powerful the purgatory beasts, the higher the probability of 'flaming blood jade'!

"Woohoo!"

On the bank of a surging hot molten river, a crimson fierce purgatory monster like a cow with a snake's tail wanders frantically on the bank of the molten river, with red eyes swaying his head, seeming to be looking for an object to attack.

Abruptly, a figure rushed over like a ghost, almost instantly in front of it, a vague blade of light lit up, the Purgatory Monster instinctively sensed something was wrong, and raised its head fiercely, reflecting the dreamlike sword in its eyes. Light.

This world master-level purgatory beast can also be regarded as a tyrant in the nearby area, but it can only watch the sword light fall.

Its body reaction speed is compared with the falling speed of the knife light, it is like lightning and a snail. Almost instantly, its head is split by the knife light, and the dark red hot liquid is spilled on the ground, like sulfuric acid. There was a noise, and thick smoke rose.

The figure rushing towards Wang Yi was solid and turned into a dark red battle robe. He also carried a dragon-patterned sword in his hand~www.mtlnovel.com~The power of the world invaded the still twitching body of a purgatory monster, and then , A smile appeared on Wang Yi's face.

Puff...a fiery red "jujube nucleus" shape with three finger joints long. The sparkling stone flew out from the neck wound and fell into the palm of Wang Yi's hand.

"Yan Xue Jade, I finally found one." Wang Yi sighed.

"Kill more than 20 purgatory monsters, most of them were at the domain master level, only three, and there was one at the domain master level."

As for the universe-level purgatory monsters, there is no such thing.

This probability is a bit low.

After some attempts, as Wang Yi guessed before, "Yan Xue Jade" is actually an alternative version of "Blood Luoqing", which contains the "blood of the beast god", but Xue Luoqing is a "golden, empty" beast. The blood of the gods, and the flame blood jade is the blood of the "fire and air" beast gods.

Compared with Xue Luoqing, 'Yan Xue Jade' undoubtedly fits the physique of Wang Yi and Yan Xing Giant Beast better.

Wang Yi's big hunt in the abyss of purgatory began.

[Chapter 213: Power of the Beast God](#)

"Roar--"

"Aw—"

"Cruel—"

A beast roar sounded chaotically on the mountain.

Wang Yi, in a dark red shirt, hovered in the air with a cold expression, a silver-gray streamer shuttled through the void, suddenly flashing out of a group of purgatory beasts, ethereal and teleporting, killing one after another, and the domain master. Under the slaughter of the seventh form of "Universal Weapon", the world-lord-level purgatory beasts fell down like wheat, and the "flaming blood jade" in their bodies was collected by the power of the world scattered by the Void Zerg clone stand up.

"Roar--"

A roar that shook the world and the earth came from afar, causing Wang Yi's expression to change slightly.

"A big guy is here, but it's almost there." Wang Yi looked at the sea of blood on the corpse mountain. The large number of high-level purgatory beasts gathered in this area were slaughtered by him in a short time.

The Purgatory Beast is almost irrational, not afraid of death, even if many of its companions are killed, it will not be afraid to retreat and escape. Of course it is terrifying for others, but for Wang Yi, it is convenient for him to harvest.

The purgatory beasts in this area also allowed him to get dozens of 'flaming blood jade' at once.

Wang Yi glanced at the large swaths of dazzling red light that was approaching fast in the distance, and he could feel the astonishing power from a distance.

Immortal Purgatory Warcraft!

In the abyss of purgatory, each area occupies an immortal-level purgatory beast. They have some simple wisdom than ordinary purgatory beasts. Generally, they will not kill the purgatory beasts underneath, but gather them and collect them as subordinates.

Wang Yi hunted and killed them in large numbers, which is tantamount to openly provoking them.

Wang Yi once angered a purgatory beast overlord by hunting down a large number of beasts in a region. After a fight, Wang Yi discovered that in the abyss of purgatory, these immortal-level purgatory beasts were so perverted that they could not be killed at all.

Wang Yi is much stronger than the opponent, but every time he destroys the opponent's divine body, it will heal instantly, with almost no loss...In the abyss of purgatory, these immortal-level purgatory beasts seem to be immortal and cannot be destroyed at all.

Perhaps it is because Wang Yi's own strength level is not enough.

And Wang Yi was unable to display abilities such as "seal".

Since then, Wang Yi has tried his best to avoid these immortal purgatory monsters.

"It's time to go." Wang Yi didn't mean to confront this immortal-level purgatory monster, his figure flickered, and instantly disappeared from the spot.

...

The sky was blazing, and inside a giant volcano towering into the clouds and gushing out a black plume of smoke, Wang Yi sat on the bank of the boiling molten lake and counted his harvest over the past 35 days.

"29185..." There was a trace of satisfaction in Wang Yi's eyes.

The average number is about 900 per day. It is conceivable how much killing Wang Yi has caused during this period.

Wang Yi hurriedly entered the realm of time. In the realm of time, both the human deity and the avatar of the giant flame star are comprehending the law of origin.

The human deity sits in front of the tall cosmic chaos monument, concentrating on comprehension. .

The giant Yanxing beast, which was as large as the mountains, folded its wings and lay down on the ground, with a pair of eyes as large as a lake staring at the "carving of beast gods" in front of it.

In one world, Mo Yun Vine shrank into more than 100-meter-long blood-colored vines, quietly entwined on a mountain peak, and its branches and leaves fluttered in the wind.

In the distance, an 800-meter-diameter Zerg brood stands on the plain, and there are millions of Lord Zerg warriors nearby.

In the mother's nest, the Zerg mother emperor is also using various resource treasures to evolve itself, comprehending the law of origin, and hope that one day he can enter immortality.

The Mother Nest of the Immortal Zerg is definitely one of the most terrifying existence under the Lord.

However, it will take a long time.

Wang Yi took out a red crystal-like blood jade and placed it in his palm to watch.

"As I expected, the Flame Star Giant Beast clone fuse this flame blood jade very efficiently. A right claw easily fuses 100 pieces, driving the pattern formed by the power of the beast god, which is equivalent to before the transformation. The entire Yan Xing Giant Beast's physical strength is 10 times as great!..."

"Plus the strength of the ancient gods obtained from the ruined ancient temple is doubled..."

"That's 11 times!"

"The Yanxing Giant Beast successfully cultivated for the first calamity of the nine calamities, and its foundation is 30 times."

"The Yanxing Giant Beast, its current strength is about 330 times."

Wang Yi thought to himself.

The fusion of the flame blood jade also has to go through the impact of the killing evil spirit on the consciousness, the will is not strong enough, and it is absolutely impossible to bear it.

But perhaps it is because there is some connection between the Yanxing Giant Beast itself and the "Beast God". The Yanxing Giant Beast bears the pain of fusion much stronger than the human body and the Void Zerg clone.

Perhaps it was also because Wang Yi had once improved his spiritual and will talent on the earth, which made him more likely to bear the pain of fusion with the blood jade than ordinary humans. Although the whole process was a bit tortuous than he thought, it succeeded in the end.

Don't think it's really easy, in reality for a month, in the world of time, but it has only been a successful integration in the past ten years.

The human body is also fused with the blood jade, but it can only fuse 10 pieces. Driven by the power of the beast god, the gene is transformed, and the body's strength has soared, reaching 10 times the previous.

One fuse 100, and one fuse 10, but the effect is completely different.

Perhaps it is because the body of the Yanxing Giant Beast is too large, and the power of the beast **** can only cover the right claw.

The earthly deity has the power of beast gods all over the body, and the transformation is the complete transformation of the whole body. Naturally, the body strength directly reaches 10 times before.

However, this Wang Yi had already speculated before, and he was not surprised.

Even with the power of the beast god, his own strength is only 30 times, far inferior to the avatar of the flame star behemoth and the void zerg clan.

"Both Yanxing Giant Beasts and Earthlings have successfully merged. Now, it's the Void Zerg clone's turn. I just don't know how much the Void Zerg can evolve as a special life?" Wang Yi whispered.

Wang Yi scratched his fingernails on the arm of his Void Zerg clone, and then placed the Yan Xue Jade on the wound. Suddenly, an invisible and strange energy burst out of the Yan Blood Jade, like a peerless murderer who had been suppressed for a long time. The beast rushed into the body violently.

"hiss!"

As the fusion process began, an extreme pain surged, the body trembled violently, and the evil aura attacked the consciousness, but because there had been too many fusion experiences, and the will was originally the same person, the Void Zerg clone could easily bear it. Living.

Will and consciousness are different. Consciousness depends on the strength of mental power, while will is purely caused by personal beliefs.

After so many years of training, Wang Yi's will is actually far more tenacious and powerful than he thought.

1, 2, 3...

The 10 flame blood jade quickly merged.

The whole body of the Void Zerg clone is undergoing transformation, and even unable to control it, it directly changes back to its original form, covered with dark red scales, like a ferocious humanoid beetle monster.

"Hi...his..."

With the integration of the last trace of the power of the beast god, the pressure finally faded and disappeared as quickly as the tide is ebb. The Void Zerg clone slowly returned to normal.

"Well, try to see how much the Void Zerg clone's strength has increased."

The body shape of the Void Zerg clone and the earthly human are almost the same, but the genetic level is hundreds of times different. Wang Yi is very curious about the effect of the Void Zerg clone fused with the "blood of the beast god".

With Wang Yi's thoughts and bangs, the skin of the whole body that maintained the silver-white void zerg form was faintly red, with a hint of red in the protruding eyes, and the whole body was slightly thinner at the same time, which was more refined like steel.

Like a peerless beast exuding real domineering.

"Um!?"

The Void Zerg clone felt the changes in the body and tilted its head slightly.

"Sure enough, it's less than 10 times, it's about 5 times."

The tone is a bit disappointed.

The blood of the beast **** is very effective in the early stage.

Ordinary life, I am afraid that it can only rely on this to increase to the limit of one hundred times its own genetic level!

Some powerful beings may be taller.

If something is unique, the genetic level is thousands of times innate, and it is a special life with the original law attributes of "water" and "earth", and the blood of the beast **** may lose its effect.

However, although the clone of the Void Zerg is also a special life, the basic genetic level is only 280, and it is increased to 840 by relying on the first calamity of the Secret Book of Nine Tribulations, but it has not exceeded 1,000 times.

His body shape is similar to that of a human being, and he is fused with flame blood jade, and it is estimated that 100 will be the top.

Combining 100 units of the blood of the beast **** can increase your strength a hundred times! And this is the limit before the Lord of the Universe.

And Yanxing Giant Beast, I am afraid that it will have to fuse 10,000 to reach this level.

Now that the power of the beast **** alone is driven, the clone of the Void Zerg race has almost 4000 times the genetic level.

However, many talented secret methods, blood of beast gods, and other such heaven-defying chances, are okay when the strength is weak.

In the later stage, especially in the master stage of the universe, the effect will become weaker and weaker.

...

Hundred times is the limit.

A hundred times the amplitude of body strength is the limit.

A hundred times the soul amplitude is the limit.

The level of life genes increases, and a hundredfold is also the limit... This is part of the laws of the universe, just like the fastest flight in the original universe reaches the speed of light. These are all iron laws.

However, there are also ways to break this iron law, such as the "Secret Code of Nine Tribulations" against the sky.

Another example is to keep it simple and win the house.

Wang Yi's Earthman base is 1, Yanxing Giant Beast is 10, and Void Zerg clone is 280.

It is conceivable how much benefit will be given to oneself by robbing a strong life.

Wang Yi calmed down with joy, silently changed his human form, and stood up.

"My three bodies continue to receive the next level of the Nine Tribulations Secret Code, and I can continue to improve this foundation."

"At the same time, you can also use the blood of the beast **** to continue to improve!"

"In the future, strive to reach the tens of thousands of genetic levels before immortality!"

"Well~www.mtlnovel.com~ My current Void Zerg clone originally had 840 times the genetic level, plus 1 times the power of the ancient gods, and about 5 times the power of the beast gods, which can increase the power by about 6 times. That is the peak of 5000 times. The power of the world master!"

The explosion of ordinary immortal gods combined with immortal divine power, in strength, 100 times the peak of the realm master!

The peak of the immortal warlord is close to the Fenghou level...it should be 1000 times the peak of the warlord!

Fenghou pinnacle is close to the Fengwang level, and the immortal physical strength alone should be 10,000 times the pinnacle level of the realm master.

As for Fengwang Pinnacle, once his immortal divine body exploded with full force, it should be 100,000 times the peak level of the realm master.

That is to say, if the Void Zerg Clone now bursts out with all its strength, it is estimated that it can reach the level of "high-ranking immortality"!

And the clone of the Void Zerg is just a world master.

How horrible is this?

Wang Yi nodded in satisfaction and looked at the plume of smoke above his head, "The hunt is almost done, and we can stop temporarily. Now...it's time to find the real secrets of this world."

[Chapter 214: Purgatory God will inherit](#)

After half a month.

The abyss of purgatory.

The avatar of the Void Zerg, who has activated the secret method of "merging into the void", is walking on the vast molten land like a ghost and ghost.

The target is the central area of Purgatory Abyss.

"call."

Wang Yi's body in the space is like a fish returning to the sea, swimming freely.

Following the fluctuations in space, he jumped for tens of thousands of kilometers.

And it didn't leave any traces.

In this way, without knowing it, Wang Yi quickly reached the middle of the abyss of purgatory, which was also the most dangerous place.

"What a big pit!"

Standing on a mountain peak in the distance, Wang Yi looked in awe at the super-giant crater that appeared suddenly, and the huge hole may be more than a million kilometers in diameter, and a thick black and red plume of smoke billowed. Rising into the sky with great momentum.

"Rumble~~" From a distance, one could hear the loud thunderous noise, echoing in the sky for a long time like the roar of a god.

"If there is any big secret in the abyss of purgatory, it is probably the most likely here." Wang Yi thought to himself.

He stepped on the ground, his figure jumped out of the air, and suddenly disappeared in the next moment.

On another nearby mountain, the eagle-like molten bird and beast, sitting on the top of the mountain, looked at it suspiciously, and then drew back lazily without seeing anything unusual.

Over the crater larger than a star, Wang Yi blended into space and sneaked over. He is now in a strange state. Even if you stand in front of him, you cannot see him or touch him.

This is the magical power of space.

And Wang Yi can only do this by using the avatar of the Void Zerg Clan using the innate secret method.

"In other places, there are a lot of infernal monsters, they are everywhere, and there is no purgatory monster here." Wang Yi looked around and squinted his eyes.

The corners of his mouth grin slightly.

"Sure enough, it's weird."

"Go in and take a look." With the time world, Wang Yi is now much less afraid of this unknown place. He immediately became excited when he discovered that the crater might have a secret.

After a while...

Deep underground of the crater.

Wang Yi hid beside the rock wall and looked at the scene before him in shock.

He is now in an extremely vast underground space, with molten lava everywhere, and he can't see the edge when he looks up.

Countless purgatory beasts stayed here without fighting, and countless powerful auras were mixed and intertwined, and there was no one below the level of the master.

What surprised Wang Yi even more was that dozens of thousands of li-long mountains lay here, but they were not real mountains, but immortal-level purgatory beasts, but they seemed to fall into sleep and dormancy, motionless, as if they were real mountains. Same. It's easy to ignore if you don't pay attention.

Wang Yi also clearly saw that one of the black and reddish mountains seemed to move.

Countless purgatory beasts just stay here like this "uncontested", the number is astonishing.

After thinking for a moment, Wang Yi bypassed the purgatory beasts from the side, especially the place where the group of immortal purgatory beasts seemed to be half-asleep, and sneaked through this sea of beasts.

Even today's Wang Yi finds this amount troublesome.

Especially the group of immortal level purgatory beasts, even if he is now, he said that it is easy to defeat, but it is impossible to kill them.

These immortal purgatory beasts are very difficult to kill in the abyss of purgatory.

Wang Yi didn't want to provoke these purgatory beasts. He guessed that there must be some big secret hidden here, so he just planned to walk through it quietly to explore.

"Woo~~"

"Wow~~"

In the vast underground world, in the molten sea, countless fiendish beasts are wandering, resting, and fighting.

But no Purgatory Beast had noticed at all, a strange creature passed by just now.

Even the group of immortal purgatory beasts in a semi-sleep state did not notice.

Wang Yi walked through this dangerous place like a chasm to other people.

Booming~~

"Huh?" A lava waterfall with a width of 10,000 kilometers in front vented down from an unknown height, igniting a thousand waves.

The earthquake trembled.

The hot air waves rushed over his face.

"It's the end?" Wang Yi was puzzled.

"wrong."

Wang Yi rushed into the molten waterfall, and the extreme high temperature impacted Wang Yi, isolated by the power of the world, and had no effect on Wang Yi.

"Wow!"

Wang Yi rushed out of the waterfall, his eyes lit up, and he appeared in a new world.

There was a cliff in front of him, and the bottom was dark, bottomless, and there was no living creature, so quiet.

On the side of the cliff where Wang Yi is located, 36 bridges are connected impressively. Next to the entrance of each bridge is a simple dark red stone stele with a height of 10 meters and a width of 3 meters, with some words engraved on it.

Among them, 29 stone bridges have been shrouded in a layer of hazy cyan light, and it is not clear to see, only 7 are not shrouded in light.

"What is this?" Wang Yi observed the surroundings and found no danger or abnormality. He walked carefully and came to the entrance of one of the stone bridges that was not shrouded in light. He looked up at the dark red stone stele. Wang Yi hadn't seen the text of "," but when he saw it, the meaning of it came to mind.

"The place where the Purgatory God will inherit! Non-members of my human race-those who enter are dead!"

The first sentence was **** and full of endless murderousness.

Just looking at the sharp font, it seemed that the soul was about to be cut and pierced.

Wang Yi was shocked at first, and then there was a burst of ecstasy in his heart.

"God will inherit?"

"Is it the same as the inheritance of the Demon Sound God General and the Frost Ice God General in the Demon Mountain in the Secret Realm of the Beginning?"

"Sure enough, I knew that there must be a big secret in the abyss of purgatory. I didn't expect that there is also a lineage of the gods here. I don't know what the lineage of the gods of purgatory is?" Wang Yi was full of excitement and curiosity.

The universe is vast and boundless, with countless races, strong like clouds, with many great abilities, and all forces may leave behind various inheritances.

For example, the "Chaotic Stele" can be said to be a kind of inheritance, and it is also an extremely precious and powerful one, but it can be used by countless people.

At the same time, there are also rarer and precious ones that can only be passed on by one person, and once they accept all the inheritance, they will disappear.

The number of inheritance is fixed, and one inheritance is one less.

The inheritance of the gods is this kind of inheritance, even if it is placed in the vast universe, it is regarded as the top inheritance.

Wang Yi thought about memory in his heart~www.mtlnovel.com~ I remember that in the original work, the inheritance is divided into the inheritance of the gods, the gods, and the eight beasts... Among them, the gods are the lowest level, the gods inheritance, and the ultimate is the limit of the king. Becoming the only certain envoy, is comparable to ordinary cosmic venerables. "

"The inheritance of the gods is billions of times more difficult than the inheritance of the gods. Once you accept the complete inheritance, then it is the limit of the universe, even if you face the Lord of the universe, there is a certain hope of life preservation. The strength is equivalent to the palace lord of the eclipse, Herodo The like, that is, the overlord of the universe."

"And get a complete inheritance, such as the inheritance of the gods, every place where the gods inherit...Once the complete inheritance is accepted, the entire inheritance land will directly collapse, which is equivalent to the loss of a inheritance place."

"However, it is too difficult to inherit a **** general... The magic sound **** general inherits 32. It seems that no one in history can inherit one of the inheritance completely."

Wang Yi looked at the stone bridge in front of him, "Of the 36 stone bridges, 29 are shrouded in light and cannot be entered. There should have been people accepting the inheritance. Now there are 7 stone bridges that are not shrouded in light. I can go in if they are free."

Wang Yi's heartbeat could not help speeding up slightly.

[Chapter 215: 0 times power amplitude](#)

Wang Yi continued to look at the dark red mysterious stele. The font on the following ancient text was obviously different from the first paragraph. It is probably not from the same hand. The former should be left by the super existence of the human race to warn the aliens. It is the owner who inherited the forbidden land, and the content of the above record is to the effect of—

"Since the birth of the Forbidden Land of Purgatory Inheritance, you are the 189521th person to enter the Forbidden Land of Infernal Inheritance, and you are eligible for the life of Purgatory Inheritance...

Any flesh and blood life can come to accept the inheritance.

Since the birth of the Forbidden Land of Inheritance, 49 inheritance bridges have been divided. As long as a life can accept the complete inheritance, he can obtain the title of "Purgatory General".

..."

"49?" Wang Yi couldn't help but stunned when he saw this place, and once again looked at the surrounding stone bridges that could not be seen clearly. There were only 36 remaining stone bridges here.

"It seems that over the long years, 13 lives have been inherited here." Wang Yi secretly said in his heart.

But Wang Yi was also a little slapped.

The stone bridge he stepped on has experienced 189,521 heirs for a very long time. As a result, none of them can complete the entire inheritance process?n0velu**sb.com**

Those who can set foot here to accept the inheritance must not be the weak. They can't do it. It can be seen that the difficulty of inheriting the Purgatory God will be extremely exaggerated.

Wang Yi looked into the depths of the stone bridge, where white mist was permeated. Even with Wang Yi's amazing vision, he still couldn't see through the situation inside. Even if the power of the world was cut off by an invisible force, it couldn't penetrate the past.

Wang Yi's eyes flashed, and he stepped onto the stone bridge.

When Wang Yi walked over the stele and completely walked into the bridge, the dark red stele suddenly lit up, as if some mechanism had been activated, and the secret patterns on the stele bloomed brightly.

Streaming words fell off the stone tablet, flew up to the sky above the stone bridge, and instantly shattered like fireworks, sprinkled in dots.

Then a layer of cyan hazy light suddenly appeared, turning into a light curtain covering the stone bridge where Wang Yi was.

Wang Yi watched in silence for a while, then turned around and continued on.

For a moment, he came to the end of the bridge, there was no road ahead, it was a void, with a pale white mist lingering.

"There is no way?" Wang Yi looked around in amazement.

"Boom~~"

At this moment, a huge dull roar suddenly came from the blank fog in front of you, and a strong air current rushed in, blowing away the clouds and mist within a radius of tens of kilometers, but each stone bridge was far apart—and Wang Yi estimates that there will be some spatial means to isolate each other.

A simple and crimson cauldron was presented in front of Wang Yi impressively.

This cauldron is as high as a hill, with nine feet standing on top of it. The cauldron is also carved with patterns of stars. Wang Yi looked at it, and there should be tens of thousands of patterns of stars.

These star patterns seem to be moving along an incomparably mysterious trajectory, containing some kind of principle, Wang Yi was in a trance, as if seeing the stars forming a human-like trajectory pattern, and then turned into a lizard pattern with wings on its back. , Half plant and half animal pattern...a star trail, but it seems to include the mystery of life in the infinite universe, it is very magical.

"Curious and wonderful tripod!" Wang Yi couldn't help sighing secretly.

A deep voice sounded out of thin air in Wang Yi's consciousness.

"Foreigners, enter the ten thousand star fortune cauldron, accept the inheritance of the Purgatory God General, accept all the inheritance, and then become the noble Purgatory God General!"

Listening to the sound coming from nowhere, Wang Yi couldn't help but looked at the majestic giant cauldron, fell silent for a moment, and grinned.

"Swipe!" Wang Yi stepped forward, stepped out of the bridge, and stepped into the void.

A red light was projected from the giant cauldron and fell on Wang Yi. The light flashed. The next moment, Wang Yi appeared in a space filled with red mist. There were red mystery patterns floating in the surrounding sky, dense and numerous. The stars in the sky surrounded Wang Yi in the center.

"Inheritance...begin!"

It was the deep and vast voice again.

"There are ten thousand stars distributed in this inheritance space, and each star corresponds to an inheritance message. If you receive ten thousand star inheritance messages, the inheritance will end immediately and you can become the super existence in the universe-the Purgatory God General!"

The mysterious voice sounded deep in Wang Yi's mind, and then, a secret cultivation method began to flood into Wang Yi's mind.

"This is..." Wang Yi was immediately attracted and couldn't help but sink in.

This is a detailed set of secret methods for cultivating the body, and you must have a body in order to practice.

Moreover, this mysterious method of inheritance gives Wang Yi the feeling that it can even be comparable to some chaotic monuments. It is definitely the top inheritance, up to the origin of the universe!

"Curious! It's amazing!" Although Wang Yi was already mentally prepared, he was still attracted involuntarily and devoted himself to this mysterious practice.

Not only was Wang Yi's clone of the Void Zerg cultivating, his human body and the body of the Yanxing Giant Beast were also cultivating, and the red secret pattern was imprinted on the body of the Void Zerg, but the feedback he received could be felt by the three bodies together.

Whether it is the clone of Wang Yi's Void Zerg race, the human deity, or the clone of Yanxing Giant Beast, they all instinctively start to use the energy in the body according to the cultivation method.

And as he practiced, the red mystery patterns in the inheritance space also floated down and disappeared in Wang Yi's body.

Outside the red giant cauldron, among the ten thousand stars pattern on it, one star began to light up slightly.

Time, slowly passing...

This set of "Secret Code of Purgatory Generals" can be divided into two parts according to the content of the inheritance message that Wang Yi received.

One is the foundation.

The second is the secret law of the body.

Among them, the foundation occupies the vast majority of the secrets of this inheritance, as long as the foundation is well laid, the cultivation of the secrets is easy.

The "basic" here refers to the strength of the body's amplitude!

Perfect control of the body, 100% control of body strength, is a condition for becoming immortal.

It can only control its own strength, even if it reaches perfection, it cannot increase, and there is no way to increase additional strength.

And the body amplitude is to improve the body's strength on this basis!

If the body's perfect force is regarded as 100 units, then the body amplitude secret method can achieve 200, 300, 400... and many times the body strength amplitude!

Soul, there is the amplitude and intensity of thought power!

The body has power amplitude intensity!

The limit is 100, but that is the normal limit.

Some special secret methods and special treasures will make people exceed normal limits! And these secret methods and treasures are all extremely expensive treasures in the universe. UU reading www.uukahnshu.com

The Purgatory God will inherit the secret method, which is a set of extremely detailed and super secret methods that can guide others to practice and increase the strength of the body's amplitude to an incredible level! This is a set of ultimate inheritance that truly leads to the ultimate!

"Accepting the inheritance of 100 stars can probably increase the amplitude of the body by one time... 10,000 stars, that is 100 times!" Wang Yi was excited.

100 times the amplitude of body strength! This is the ultimate of the universe!

"My Void Zerg clone accepts the inheritance, and I don't know where it can be." Wang Yi had a glimmer of expectation in his heart.

Different conditions will lead to different results.

The human body is at the cosmic level, and no matter how powerful it is, the inheritance is limited.

However, the clone of the Void Zerg clan can burst into a heaven-defying existence that can reach 5000 times the genetic level!

The scope that it can accept inheritance must far exceed the human body.

Wang Yi silently looked forward to it.

[Chapter 216: Phase 1](#)

Inside the giant red bronze cauldron.

Stars lit up, and red runes fell like raindrops, dotting Wang Yi's body of the Void Zerg.

As the stars lit up faster and faster, Wang Yi received more and more messages of inheritance.

Three bodies, and two bodies in the realm of time, use a hundred times the flow rate of time to cultivate this secret method.

Regardless of the human deity being the cosmic level, his talent is the highest. After all, the talent of the peerless genius who has been integrated with the human race in the past billions of eras, how can it be low.

Once the inheritance begins, it cannot be stopped! Must keep practicing.

And this secret method of body amplitude is not only a secret method, but also has a special tempering effect on the body.

Such as resilience, toughness, resilience... will all be improved.

Even flesh and blood life can achieve the defensive power of rock life, the cohesion of energy life, and the resilience of plant life.

The more Wang Yi cultivated, the more mysterious this set of secrets was felt.

It was that the flesh was a little bit painful in the process of being tempered, but Wang Yi could still bear it, and it could also temper his will.

Under the influence of this secret method, Wang Yi's bones, skin, flesh and blood, internal organs... and even hair began to change subtly.

The bones become harder and stronger, the skin becomes more flexible, and the flesh becomes more dense and compact. Even the most fragile internal organs are also tempered and stronger than before...

Soon one day passed.

On the giant red copper cauldron outside, the stars were also lit up, shining brightly.

In the red bronze cauldron space, red mist is permeated, secret patterns linger in the void, stars above the head are dazzling, and the internal space is much larger than the outside of the red bronze cauldron... and in this space, a black-haired young man in the dark red shirt sat cross-legged on the ground, his face solemn, drops of sweat slipped from his face, dripped onto the ground, and quickly evaporated.

And the stars above his head are already close to a thousand.

This is less than two days!

The Purgatory God divides the inheritance into three stages, each stage has more than 3,000 stars.

And every time you complete a stage, you can also get the reward left by the inheritor.

Wang Yi kept tempering his body according to the secret inheritance method of the purgatory god, just like a piece of iron was forged into steel again and again, and a large number of secret patterns were integrated into the body. After the entire flesh and blood tissue absorbed those secret patterns, it happened Subtle changes.

Constantly changing, it's like scrap iron becomes stainless steel and diamond again.

The basic chapter in "Secrets of Purgatory Generals" is an extremely magical transformation of the body.

And the use of this secret method can make the body's strength soar!

The strength of the normal world master's body is 100 times at most.

When Wang Yi lights up the 100th star, the amplitude of his force has reached 100... In the traditional sense, the perfect limit for the master of the world!

And now that Wang Yi has completed the inheritance of more than 1,000 stars, the amplitude of his body's strength has reached more than 1,000!

What concept? When I first came to the place of inheritance, the body amplitude intensity was 80-90, now it is more than 1,000! Turned over ten times!

To put it simply, Wang Yi's Void Zerg clone had only 5,000 times its full burst, but now it has more than ten times, reaching more than 50,000!

The bottom line of the immortal threshold of the pinnacle is ten thousand times the power of the pinnacle master!

Now, the Void Zerg clone's physical strength alone has far exceeded this standard!

Horrible!

And this... is just the effect of receiving the inheritance of more than 1,000 stars, even the first stage of more than 3,000 has not been completed, and there are more than 8,000 waiting for Wang Yi to practice.

"powerful!"

"too strong!"

"Awesome!"

"I'm so awesome!"

Wang Yi was completely immersed in the joy of becoming stronger, unable to extricate himself.

The inheritance of purgatory became more difficult as it went down. On the fifth day, Wang Yi's human body was cultivated to the 2,000th level, and the speed slowed down. His cosmic body could not withstand the secret method to continue tempering, and the strength increased very slowly and could only help. Other bodies continued to comprehend the secret cultivation method, while their physical cultivation almost stopped.

But it doesn't matter, as long as the other clones accept the inheritance, the same soul consciousness, other bodies can continue to cultivate slowly when the strength increases.

The avatars of the Yanxing Giant Beast and the Void Zerg Race are very relaxed, far from the limit.

The Yanxing Giant Beast is 30 times the genetic level, and the Void Zerg clone is 840 times the genetic level. Moreover, they are all peak masters, and their bodies are naturally very powerful.

Soon, seven days passed, but in the world of time, almost two years passed.

"Huh?" Wang Yi, who was practicing, raised his head suddenly.

Mysterious words appeared out of thin air, and they belonged to the same style as the previous stone tablet words. Although Wang Yi didn't know what the words were, he completely understood the meaning in an instant.

The words in the void mean...

"Come to accept the life of the inheritance, you have accepted all the inheritance of the first stage of the 'Purgatory Inheritance'! The Purgatory God will inherit the three stages. If you can complete the first stage, you can get the title of 'primary candidate' and get The reward of the 'primary' class!"

"You are the 87562th inheritor who can pass the first stage. You are eligible for the title of 'primary candidate' and get the primary candidate's reward."

"Huh? Already passed?" Wang Yi was a little surprised. Only then did he discover that the stars above his head were densely packed, and unknowingly, it had already reached more than 3,300.

But because Wang Yi was obsessed with cultivation, he didn't find it.

When he first accepted the inheritance, Wang Yi already knew a lot of information.

The inheritance of the Purgatory Gods belongs to a relatively powerful inheritance in the vast universe, a relatively peak one. The requirements for the body are extremely demanding. For hundreds of millions of years, batch after batch of inheritors can get a complete inheritance. , Only 13 people!

And those who can come here are almost all immortal gods!

After a long time ~www.mtlnovel.com~ more than 100,000 inheritors, in the end only 13 can be completely inherited!

Many immortal gods are stuck at the end of the first stage! Some immortal gods are stuck in the second stage! Very few gods are trapped in the third stage.

And so far, only 13 can pass the third stage of inheritance!

Wang Yi was able to complete the first stage of the inheritance in just seven days (in fact, there is a time realm to accelerate the auxiliary practice), which has surpassed most immortal gods!

However, there are many reasons for this. For example, each of Wang Yi's three bodies is against the sky, and even the weakest human body is the talent of the human race in the billions of times. In addition, the 840 gene level foundation of the clone of the Void Zerg clan... It's very scary, and the time realm takes a hundred times to cultivate and realize...

This allowed Wang Yi to pass the first stage of inheritance in a short period of time!

"Boom~~"

There was a loud noise in the void above his head, and there was a wave of fluctuations in the space. Two streamers flew down and fell in front of Wang Yi.

Those are two cyan swords with simple and slender shapes with mysterious lines faintly emerging.

[Chapter 217: The last stage](#)

"This is..." Wang Yi looked at the two quaint swords floating in front of him, exuding a thrilling chill, and searched for relevant shapes in his mind, and relevant information immediately appeared.

"Cyan Soul Knife?"

The Qingpu Knife is a weapon dedicated to immortal gods. It is famous for its hardness and sharpness. One value is between 1.5-2 million yuan. The two add up to be more expensive. Generally, only the king is immortal or a small part of it is sealed. Immortality can be held.

As soon as Wang Yi grasped the two swords in front of him and felt the terrifying power contained in them, the corners of his mouth were slightly raised. "Exactly two, there are these Qingpai knives, enough for me to use the immortality of the king." With the Qingpai knife material, it is more than enough to withstand the battle of the immortal level of the king, and Wang Yi just happens to lack two battle knives that can be used together. It can be regarded as satisfying his wish.

After getting the Cyan Soul Sword, Wang Yi continued to practice the "Secret Method of Purgatory Inheritance". Once this inheritance begins, it cannot be stopped. If it fails, he will lose his qualifications.

Time passed silently again.

3500.....3600.....3700.....

Stars are lighting up.

Three months later in reality, Wang Yi's Void Zerg clone cultivated the "Secret Method of Purgatory Inheritance" to 5000 levels in one breath.

But the Yanxing Giant Beast clone was unsustainable on the 3000th floor.

Therefore, only the Void Zerg clone is still continuing to practice, and the other two clones are just to help the cultivation.

But after reaching the 5000th floor, Wang Yi clearly felt the difficulty of accepting inheritance, and the speed of his cultivation also slowed down.

It only takes less than two days to cultivate the first 1,000 floors.

It only takes two days to cultivate from the 1000th to the 2000th floor, and only three days for the 2000th to the 3000th floor.

From the 3000th floor to the 4000th floor, it takes Wang Yi half a month in total.

From the 4000th to the 5000th floor, it takes more than two months.

Wang Yi could feel that the more difficult it is to pass on and cultivate as you go to the back.

On the 5000th floor, the speed slowed down significantly.

In the back, even to the point where only one star can be lit every day.

Four years after coming to the red bronze giant to accept the inheritance.

"what....."

There was a low roar like a beast injured in the inheritance space of the red bronze giant cauldron.

The muscles all over his body were bulging, and Wang Yi, whose eyes were full of blood, grasped the ground, his body convulsed violently, and he endured the intense pain during the inheritance process.

Although the physical pain was intense at the beginning, it was still tolerable.

And now, such extreme pain has undoubtedly surpassed the limit, very test the will.

In the past few years, Wang Yi has been experiencing painful torture and constant confrontation all the time, and his will has been tempered and strengthened.

Pure pain... can't knock him down.

But the will can fight the pain caused by inheritance, but the body has its limits.

"There are still 300 floors, hold on..."

Wang Yi gritted his teeth and felt a faint smell of blood coming from his teeth.

Now he has reached the 6300 floor, very close to the 6666 floor that completed the second stage.

However, Wang Yi estimated based on the inheritance information, but felt that he had at most one or two hundred floors to reach his limit.

"The Purgatory God will inherit and test the harsh physical talent, but what is the physical talent...?" Wang Yi endured the physical pain and kept thinking in his mind.

"Try it!"

"what!"

Wang Yi roared, driving the mysterious force in his body.

Wang Yi's body swelled up, his muscles bulged up like rocks, with distinct levels and full of power, and black magic patterns appeared, forming a seemingly simple but mysterious pattern. The black magic snake monster opened his mouth. Letter, it seems to be thrown out.

With the increase in strength in his body, Wang Yi instantly felt that the pressure from the outside world had suddenly become smaller.

"Really useful!" Wang Yi was delighted, but regretted again. "I should have thought of this long ago."

But it was also normal. Wang Yi was completely immersed in the secret method of cultivation and inheritance before, and he didn't have time to think about other things.

"The power of this ancient **** can only double the strength of the body. But the power of the beast **** can only increase several times." Wang Yi was full of hope. "Before my Void Zerg clone, only 840 times the genetic level, I have cultivated to the 6000 level. I am afraid that 90% of the immortal gods who came here can't do this."

The Purgatory God will inherit, and constantly squeeze the endurance of the cultivator's body in the process of cultivation, which is also a great training for the will.

The clone of the Void Zerg Clan is a realm master level, relying on 840 times the genetic level, the physical strength can reach the point of being comparable to the immortal gods.

In essence, the divine body of the immortal gods is still very different from below the realm master.

And more importantly, is the physical talent.

And here, it can only be passed on to life below the immortal, the Venerable has no chance.

Many Venerables have a genetic level of 10 times.

There are very few immortal gods who can do 10 times.

The clone of the Void Zerg has a unique advantage in this respect.

Wang Yi's eyes lit up, "I'm a clone of the Void Zerg race, and without the power of activating the beast gods, I can accept the 6000th floor inheritance. If activated, I'm afraid I have a good chance to reach the 9000th floor. Maybe, I can still accept the complete **** general inheritance. ."

But Wang Yi just thought about it. After all, the inheritance of purgatory, the more difficult it gets as you go.

The power of the ancient **** of the Void Zerg clone plus the power of the beast **** is equivalent to an increase of 6 times.

The fusion of 10 human bodies is 10 times, and the fusion of 100 Yanxing Giant Beasts is about 10 times.

They all continue to practice in the world of time.

The clone of the Void Zerg race continued to practice with the power of the ancient gods, and finally, after a month... broke through to the 6666 floor.

After receiving the inheritance in the giant red bronze cauldron for four years and one month, Wang Yi finally completed the second stage of the inheritance of the Purgatory God General.

The mysterious and ancient text in the void reappeared...

"Come to accept the life of the inheritance, you have accepted all the inheritance of the second stage of the 'Purgatory Inheritance'! The Purgatory God will inherit, there are three stages, and the second stage can be completed and accepted, and you can get the title of 'True Heir' and get 'True Heir' level reward!"

"You are the 1314th inheritor who can pass the second stage. You are eligible to be awarded the title of 'True Heir' and get the True Heir reward."

"The true heir?" Wang Yi muttered in his heart.

Accept the first stage complete 3333 inheritance, is the primary candidate.

Accept the second stage of the complete 6666 inheritance, which is the true heir.

From the title alone, it can be seen that "True Heirs" have a much higher style than "primaries".

More than 80,000 people passed the primary election ~www.mtnovel.com~, but only more than 1,000 passed the true pass.

But in the end, there are only 13 people who can fully accept all the inheritance!

"This purgatory **** will inherit it, and the more difficult it is, the more difficult it is to imagine!" Wang Yi had a clear understanding in his heart.

Although he is currently the most outstanding genius of the human race!

But don't forget, who are the people who can come here?

Almost all immortal gods!

And the person who can make it to the third stage is definitely the kind of amazing talent, outstanding among his peers, and the outstanding person of an era!

None of them accepted the complete inheritance. Although Wang Yi relied on a lot, he was not arrogant.

"Boom~~"

A huge roar came from the void above the head, the starry sky split, and a red light flew out like lightning, and fell in front of Wang Yi. The light dissipated and turned into a fist-sized red fruit with crystal clear body and haunting a faint red mist.

[Chapter 218: Purgatory General](#)

The words appearing in the starry sky above the head again-"The reward of the true heirs is the Yan Demon Fruit. The Yan Demon Fruit is an extremely precious treasure in the universe. Make the body more suitable for inheritance!"

"Yan Demon Fruit?"

Wang Yi looked at the lingering faint red mist in front of him, and the crystal clear surface exuded the red fruit like gemstones with hazy light, and muttered.

The primaries are not eligible for this kind of fruit.

Only the 'true heir' who passed the second stage of inheritance is qualified to receive this kind of magical fruit that fundamentally changes the body.

A Yan Demon Fruit, the value is far above the Qingpu Sword, even if the king is immortal, it will be a treasure that will be jealous.

"That's right... Since the original master stayed with this inheritance, I must hope that someone will accept this inheritance completely, and it is normal to leave some treasures to aid cultivation." Wang Yi was in a good mood.

With this "Yan Moguo", I believe he can accept more inheritance.

Wang Yi reached out and grabbed the crystal clear "Yan Devil Fruit" in front of him, wrapped in a light red mist. A hot breath passed from the red fruit to his body, causing his blood to boil slightly.

Wang Yi did not hesitate, put the fruit to his mouth, took a bite, and immediately, the pulp turned into a hot slurry that flowed into the body along the throat. Immediately, a fiery air flow rushed over the limbs, causing Wang Yi's body was warm, like an ordinary person bathing in a hot spring, very comfortable.

"Kacha, kacha..." Wang Yi ate the fruit quickly in two or two bites, and the inside of his body was like a small stove, his whole body was hot and scary, and his skin was flushed with steam.

After the fruit entered the body, it turned into a red air current, which penetrated into every corner of Wang Yi's body, conceiving his flesh and blood.

"Crack, pop..." Wang Yi's bones all over his body creaked like popping beans, his height was much higher, and his muscles became firmer and stronger. Originally, he was only about one meter tall, but now he suddenly became 1.8 meters tall. Around, the whole person is also a lot more vigorous.

It seemed that he didn't look like a teenager anymore, and became a more mature youth.

The bones in Wang Yi's body also turned into a substance like a translucent diamond with a hint of red, and the flowing blood was immersed in crystals.

"Ha..." Wang Yi was refreshed, opened his mouth, and spit out a hot red smoke ring.

"Curious!"

"It is not to improve the genetic level, but to transform the body from another aspect to make him more 'perfect'."

Wang Yi was a little surprised when he felt the changes in his body.

The evolution of the body is not only about improving the genetic level, but also other aspects.

Just like the immortality of the world master, it is actually the essential transition of the life level.

And now Wang Yi, who is taking "Yan Moguo", has also undergone a similar transformation.

"The feeling of strenuousness before has disappeared, and now I can accept more inheritance." Wang Yi was very satisfied.

In fact, the effect of Yan Demon Fruit on the poorer the basic life, like the Void Zerg clone, the innate genetic level is very strong, taking this Yan Demon Fruit, the effect of improving the body is actually not as high as the body of the universe-level earthly deity.

But things have to be viewed from two perspectives.

The clone of the Void Zerg is doubled, which is far more than 10 times stronger than that of the human deity. After all, the clone of the Void Zerg has too much innate advantage.

And Wang Yi has been in the abyss of purgatory for four years. His survival mission had been completed three years ago, but he was unable to go out because he was accepting the inheritance. He had to take a stand in the virtual universe and report to his teachers and friends that he was safe. Just prove that you are alive.

In fact, it is common for those geniuses to do tasks for decades or hundreds of years to spend on a task.

If Wang Yi hadn't done the most dangerous mission of the "Purgatory Abyss", in just four years, it would not have attracted so much attention from others.

Fortunately, the friends that the virtual universe company knows, like Wang Yi's wife and children... I haven't seen him for more than a hundred years. Some of Wang Yi's children have already married. Unknowingly, he has become an "old man" full of descendants.

What made Wang Yi speechless was that his parents actually gave him a younger brother and younger sister in these hundred years.

The mood that Wang Yi knew at the beginning was a big daze.

Wang Yi's eldest son: Dad, this is your grandson.

Wang Yi's youngest daughter: Dad, this is your granddaughter, come, Ruoruo, call grandpa.

Father and Queen Mother: Son, this is... Well, this is your younger sibling.

Brothers and sisters who have grown up and even have grandchildren: eldest brother~~

Wang Yi: "..."

I won't mention these sad things, Wang Yi now only wants to cultivate quietly by himself.

...

In a blink of an eye, ten years have passed.

Wang Yi has been in the abyss of purgatory for fourteen years!

Among the universe-level geniuses who performed the mission of Purgatory Abyss in the entire Virtual Universe Company, he was also the one who performed the long mission.

Had it not been for Wang Yi's frequent appearances in the virtual universe, it is estimated that many people would have thought whether he had fallen there.

Some friends were very worried and asked him to finish the task quickly.

The interior space of the giant red bronze cauldron.

The red mist is already thick, and the shadows of the people can't be seen clearly.

In the mysterious starry sky above, the stars are already densely packed, blooming brilliance, like a real starry sky.

Wang Yi's Void Zerg clone has now become its original form. The hideous body is covered with a layer of red scale armor, and black magic patterns appear. The fierce and fierce aura permeates this space, looking like a **** demon. .

Wang Yi has received the 9000th inheritance!

After taking that precious 'Yan Demon Fruit' and adding the power of the ancient gods, he cultivated to the seventh thousandth level in one fell swoop!

On the 7th and 500th floor, he began to feel strenuous again, and finally had to turn on the 'power of the beast god'.

Maintaining the blessings of the 'power of the beast god' and the 'power of the ancient god', coupled with the effect of the 'Yan Demon Fruit', he has managed to cultivate to the 9000th floor with difficulty in these ten years.

And now it's reaching the limit again.

"Why is it so difficult? It's too difficult!" Wang Yi was also shocked.

His Void Zerg clone is a special life in the universe, possessing 280 times the genetic level!

Successfully practiced the first calamity of the Nine Tribulations Secret Code!

With the addition of the 'Yan Demon Fruit', the 'Power of the Ancient God', and the 'Power of the Beast God', the three avatars cultivate together, and the time realm accelerates the assistance for a hundred times, only in just fourteen years... can he cultivate to the 9000th level.

Even in the long years, among the more than 100,000 inheritors, few can reach the level of Wang Yi!

"I don't believe it..." Wang Yi gritted his teeth and continued to practice forcibly.

9011th floor...9023th floor...9031th floor...

Soon ~www.mtlnovel.com~ Wang Yi felt difficult and unsustainable in his practice.

"Puff..." Wang Yi, who was practicing, trembled, and a mouthful of blood came out.

The whole body is about to split apart.

"No way, it's really reaching the limit..." Wang Yi gritted his teeth.

"There is only one last way to try."

"Sign in."

In case of indecision, sign to resolve it.

The sign-in panel son, who has been forgotten for more than ten years, once again made his debut in gold.

[Ding, congratulations to the host for signing in successfully, and rewarding "Inheritance of Purgatory God".]

【Number of check-ins available for this place: 0】

"???"

Wang Yi sprayed out old blood again.

[Chapter 219: Final reward](#)

"Om!!!"

With the arrival of the rewards from the sign-in panel, Wang Yi automatically received all the remaining inheritance messages, and as soon as it came time, the body that had reached its limit could practice the ten thousandth level successfully without hindrance!

Above the head... Ten thousand stars lit up, shining brilliantly, illuminating the entire space of inheritance!

Then all the stars revolved and turned into a cluster of nebula vortexes, and a voice like Hong Zhong Dalu rang from the inside.

"Congratulations, the foreign life, you have passed the 'Purgatory God General Inheritance'... As the 14th life in history who has cultivated and passed on completely, you will receive the title and glory of the 'Purgatory God General'!"

"Now, please receive your reward!"

In the nebula vortex, a magnificent palace slowly descended, suspended above Wang Yi like a majestic mountain, filled with an ancient breath.

"Heirer, please come forward." The voice with inexplicable ancient meaning sounded in Wang Yi's ear.

Wang Yi looked at the tall palace and flew up.

"Boom~~" The huge bronze gate of the palace carved with various strange monsters slowly opened, welcoming the arrival of another noble "Purgatory General" after a long time.

In the vast palace, Wang Yi stepped into it, and at a glance, he saw forty-nine towering copper pillars standing in the palace, of which 13 copper pillars were shrouded in faint light, and on each copper pillar there was a Ruoyouruuowu figure appeared on the surface, as if he noticed Wang Yi's arrival, and looked over slightly.

"Huh?" Wang Yi frowned slightly. Those figures are mostly humanoids, but there are also animal forms and other strange life forms. There are a total of thirteen copper pillars, which symbolize the thirteen people who have received a complete inheritance here.

"Everyone who passes the third stage of inheritance, the newly born Purgatory God will be able to keep his own figure in this Purgatory God Palace forever. You are the fourteenth passed on through the Purgatory God General, and you can also transfer yourself The name of "Leaves here, it will be passed down forever." The voice rang in Wang Yi's ear again.

"Om~~" A huge bronze pillar radiated in an instant, and a figure appeared on it, vaguely seeing the appearance of a brave, domineering black-haired boy.

Wang Yi walked past the 13 bronze pillars left by the forerunners-"Wild Dragon", "Sywinona", "Alcalon", "Zhan Di", "Witch Meng"... before the ancient years, The figure of a majestic man who once received the honor of "Purgatory General" in the Purgatory Palace is still vividly preserved here. Perhaps some of them have fallen, but their names can still be here. It will be passed down forever in this shrine.

Wang Yi came to the fourteenth bronze pillar, the bronze pillar of his own light and shadow, looked at his own light and shadow, and the light and shadow looked at him, both of them smiled slightly.

"Wang Yi!"

He left his name, and officially became the fourteenth infernal **** born in the long years of the universe!

A black stone platform slowly rises from the ground. On the stone platform is placed a group of red air currents lingering objects, and Wang Yi subconsciously walks over.

Without any obstruction or accident, Wang Yi came to the black stone platform, and the red air current on the object seemed to sense his arrival and dissipated automatically, revealing the true contents of the object inside.

It was an exquisite blood-red armor. The armor was covered with mysterious patterns and a powerful aura permeated from it, as if there were endless and eternal years. The powerful aura alone made Wang Yi Palpitations, just from the appearance, you can see that this armor is unusual.

Wang Yi understood in his heart that this armor... is an ancient treasure with infinite power.

"Purgatory God Armor": The Purgatory God General's standard battle armor. Only when the Purgatory God General is inherited can the power of this armor be perfectly used. It is a high-level treasure, usually an armor used by the venerable. It has extremely high protection performance and can greatly weaken material attacks. And soul attack.

"This, this..." Wang Yi couldn't help but feel moved when he saw the message contained in the **** armor itself.

"It's really a treasure?" Wang Yi was a little shocked.

Even if he is, now through sign-in and various adventures, he has obtained many treasures, many of which are worth far more than this purgatory **** armor... But this is the first time he has obtained the heavy treasure-class armor.

Weapons and armors in the universe are divided into ranks one to five, immortal ranks, and above them are heavy treasures and supreme treasures.

Heavy treasures are generally treasures that can only be possessed by the venerable. Generally, it is almost the same for the venerable to have two or three heavy treasures.

The immortal gods, if they don't have the gift of being against the sky or the power of the elders, they won't be able to get a treasure at all.

The worst treasure is worth more than one trillion yuan!

You know, a powerful immortal king is usually worth tens of billions of dollars, and a piece of treasure is enough to make them crazy.

Only the most invincible and powerful, immortal king with a deep background, dare to expose his treasure. Even if he is lucky enough to get the treasure, he uses it carefully and dare not expose it to outsiders.

"The Purgatory God Armor...Yes, I remember that the last article of the Purgatory God General's inheritance is the "God Armor" secret method, which can stimulate the power of this Purgatory God Armor." Wang Yi stroked the **** armor, full of joy. .

It is also very difficult for ordinary strong people to get this purgatory **** armor, because it is specially formulated for "purgatory **** generals", and only purgatory **** generals who have accepted a complete inheritance can perfectly display its power.

Of course, no matter how it is, it is also a treasure, and its defense power alone is far superior to the armor of other immortal gods.

"This purgatory **** armor, if I am not strong enough, I can't easily take it out outside, otherwise it will provoke a lot of covetousness." Wang Yi also understood in his heart that the treasure was touching.

The more precious the treasure, the easier it is to attract coveting.

However, as long as he is strong, this is not a problem.

The Purgatory God Armor can only be used after special refining. Wang Yi doesn't have time now, so put it away first.

Looking around, smiled slightly.

"After passing the complete purgatory inheritance, I am now a purgatory god."

After a long time, the fourteenth purgatory **** in the universe!

Wang Yi was full of spirits.

During this trip to the abyss of purgatory, he got the "carving of beast god", "blood of the beast **** (flaming blood jade, blue soul sword, purgatory **** armor, and the most important "purgatory **** general" inheritance... Said the harvest was amazing.

In particular, the complete "Inheritance of Purgatory God Generals" can allow Wang Yi to become a clone of the Void Zerg with a hundredfold power amplitude!

The clones of the Void Zerg who had exploded with all their strength had already been 5,000 times, plus the "Purgatory Secret Technique Amplitude", the power was once again increased by a hundred times!

That is 500,000 times the power of the pinnacle master!

Ten thousand times the power of the pinnacle master ~www.mtlnovel.com~ is the bottom line of the immortal power of the king.

In terms of power alone, Wang Yi's Void Zerg clone is definitely an extremely terrifying level in the immortality of the king!

"In the future, when my will is strengthened, more blood of beast gods are integrated, or more techniques of the Nine Tribulations Secret Code can be obtained, my strength will be greatly improved." Wang Yizhi is satisfied.

"But the hardware is up, and I have to keep up with the software. Maybe when I have a chance in the future, this secret method should start to be pondered." Wang Yi thought to himself.

The secret method Wang Yi currently practices is mainly from the secret method of virtual universe companies such as "Universe Evolution".

After all, his cultivation time is mainly spent on the insight into the chaos monument, and only by laying a solid foundation can he build tall buildings.

Wang Yi is not really anxious about the secret method. It is not too late to wait for him to comprehend the six pictures in front of the cosmic chaos stele, and to realize the 20-story rule of the Tongtian Bridge before he can create a set of his own secret methods.

Before that, other secret methods were enough for him to use.

[Chapter 220: Perfect ending](#)

After receiving the final reward, Wang Yi was teleported to the edge of the stone bridge.

Behind him, the stone bridge that stretched to the unknown did not know when it had disappeared.

The stone stele standing there was also turned into powder and sprinkled all over the floor.

The 36 Purgatory Gods will inherit the space that has lasted forever, and because of Wang Yi, they have become 35.

Wang Yi also immediately realized the trouble.

It's impossible for the human race to fail to notice such a big movement. Even if they knew it was him, Wang Yi didn't worry about it. After all, this inheritance was considered part of the abyss of purgatory itself. Wang Yi obtained it, and that was his strength.

What's more, with his talents, the human race is still happy to see it happen.

However, in order to avoid trouble, Wang Yi left here quickly.

Not long after Wang Yi left, a team of powerful immortal gods came here through a special route. The two immortal kings led the team. When they saw that there were only 35 stone bridges left, they were all aware of it. Something happened.

Inheritance is impossible to be destroyed or disappear silently, unless it is the kind of power comparable to the Chaos City Lord, but how can that kind of power appear in the primitive secret realm and do such a thing?

Then the only possibility is that someone passed all the inheritance of a stone bridge and gave birth to a new purgatory god!

But... what about people?

Why didn't you see anyone?

The immortal gods looked at each other.

The significance behind this news was too great, and it soon caused an uproar among the upper echelons of the human race.

Outside the abyss of purgatory, "Sky Palace", wearing a gold silk robe, the burly black bear brawny "Pangbo Venerable" touched the hairs of his chin and his hands.

How strong the human race is, not to mention such a major event. After an extremely efficient investigation, the targets were eliminated one by one, and finally the arrow was pointed at Wang Yi, who had been performing missions in the abyss of purgatory for a long time.

Although it is not 100%, it is more than 90% possible.

Many bigwigs of the human race were really shocked at this moment.

They are very clear about the difficulty of inheritance of the Purgatory God, otherwise there will not be only thirteen talents who pass the inheritance and become the Purgatory God General over the long years.

Mainly Wang Yi is still a universe-grade little guy who can accept the complete purgatory inheritance. They can't figure out how Wang Yi did it.

Even Chaos City Lord doesn't understand. He knows that Wang Yi should have a clone, but the difference between the clone and the deity's strength is generally not too big. Wang Yi is cosmic. It is very remarkable that his clone can reach the realm master. He wants to accept complete purgatory based on this. inherited? Totally impossible!

In fact, the Chaos City Lord, they guessed right...If Wang Yi had the sign-in panel, even if he was against the sky, it would be difficult for him to accept the complete inheritance of the Purgatory God at this stage. It would be too difficult, almost impossible. possible.

History can accept complete inheritance, without exception, 100% are immortal kings, and they are the kind of immortal kings that are against the sky. Among them, eleven have broken through to become venerables, and they have amazing fighting power. There are also two. Fallen midway.

"Is that really that kid, right?" Venerable Pang Bo was about to pull his beard out of his entanglement.

"This kid, I really stabbed a hornet's nest now."

"It's really going against the sky."

"Tsk, this is my disciple."

After the entanglement, Venerable Pang Bo finally became proud again.

Wang Yi's incident was finally classified as highly classified by the human race and blocked.

Otherwise, if this news spreads out, I am afraid that all ethnic groups will really have to kill the most dreadful genius in the history of human race with red eyes at all costs, otherwise they will not be able to sleep peacefully.

...

"Is it the teacher's mail?" When Wang Yi left the underground cave and flew out of the crater, he received a prompt from the virtual universe network.

Generally, if this kind of reminder is not important, Wang Yi's Smart Life Bermuda will block it, and only those emails with a very important priority will be notified to Wang Yi as soon as possible.

It's like Wang Yi's family, a more important friend, the teacher Pang Bo Venerable.

After thinking about it, Wang Yi separated a trace of consciousness into the virtual universe.

"brush!"

Virtual universe, Yuxiang Mountain primitive area, Wang Yi's manor.

"His Royal Highness!" When Wang Yi appeared, the manor guard servants saluted respectfully.

Over the past decade or so, because of the acceptance of inheritance, Wang Yi has had very little time to enter the virtual universe. Therefore, seeing Wang Yi appear this time, some people feel a little strange.

"His Royal Highness, are you back?" The guard leader "Jacs" who was resting in his room in the manor immediately sensed Wang Yi's appearance, was shocked, and hurried over to greet and salute.

"Well, Jacques, I will entertain the teacher later, and you will let people prepare." Wang Yi smiled.

Wang Yi said that the teacher is naturally not the "Fei Fa" of his original manor's immortal teacher. The teacher is now in name only and rarely comes to Wang Yi's manor, because it is difficult to teach Wang Yi when he comes.

Wang Yi's true teacher is "Venerable Pang Bo".

"I see." Jakes didn't dare to neglect, and immediately went down to make arrangements.

Soon, Venerable Pang Bo came to Wang Yi's manor.

"You kid, you actually stayed in the abyss of purgatory for so long, and didn't leave after the mission period expired. Say, did you find something?" Venerable Pang Bo's temper has always been straight, and the same is true in front of the disciples here.

"Hehe, I knew I couldn't hide from you, teacher." Wang Yi poured a glass of wine for Venerable Pang Bo with a smile on his face.

Venerable Pang Bo took up the wine glass with satisfaction, finished it in one sip, and then looked at the beloved in front of him, "Let's say, the purgatory **** will inherit it, did you get it?"

Wang Yi was not surprised why the teacher immediately knew what he had inherited. With the human race's ability to control the primitive secret realm, it is strange not to know, not to mention that Wang Yi did not do much concealment.

"Yes, teacher, I have indeed obtained the inheritance of that purgatory god." Wang Yi admitted simply and happily.

"You really got it?" Venerable Pang Bo widened his eyes.

Originally he was seven points and three points doubtful, but he didn't expect that his disciples would really get it~www.mtlnovel.com~ how did you do it? Venerable Pang Bo said, then shook his head, "Forget it, that's your personal secret, so the teacher won't ask more. "

Peerless geniuses have their own opportunities and secrets. After such a long life, why don't old guys like Venerable Pangbo understand?

Wang Yi smiled slightly, but he didn't explain, anyway, the teacher would definitely know in the future.

Venerable Pangbo looked at his shocking young disciple, and said with emotion: "You got the inheritance of the Purgatory God this time. No matter how you got it, it caused a big shock among the

high-ranking people of our human race. Haha, For many years, there has not been a genius who received the inheritance of the Purgatory God General, not to mention that it is not from the Hongmeng, but from our inner human race. With you, there are only four human races in the history of our human race who have been completely inherited. ..." The more Venerable Pangbo said, the happier he was, and the head of that huge bear couldn't help shaking.

"Purgatory **** general, my disciple is actually a purgatory **** general." Venerable Pang Bo sighed.

Wang Yi also smiled slightly. Seeing the teacher's appearance, he knew that what he had inherited from the Purgatory God would be calmed down by the human race.
