

A God 241

Chapter 241 Breakthrough! Domain master

The incident of Wang Yi breaking through the universe-level primitive Tongtian Mountain did not cause much disturbance in the Virtual Universe Company.

After all, Wang Yi had the ability to break through the 15th floor in Chaos City a hundred years ago.

It is normal to break through the cosmic-level primitive Tongtian Mountain.

Can't get through, that's surprising.

They are more looking forward to Wang Yi's performance in the future.

Primitive Secret Realm, Wuchen Continent, Wang Yi's palace residence.

"I will break through the domain owner immediately."

"Once you break through to the domain master, you will naturally rise to the original secret realm domain master level."

"And there are now 10 people in the Primitive Secret Realm main level, 9 of them have passed the tenth floor, and one has passed the eleventh floor."

Wang Yi sat cross-legged in the cultivation chamber.

As the most enchanting genius in human history, the universe-level possesses the 15th floor of Tongtianqiao, which is indeed unprecedented.

In fact, based on Wang Yi's so many years of progress, Adventure, even on the 17th and 18th floors, it is not impossible to make a breakthrough.

The more difficult it is to improve the law perception as you reach the back. The 10th layer is a hurdle, which is equivalent to the perception of ordinary immortal gods. The ninth to the tenth layers, it can be said that it is more difficult than the first to the ninth layers combined. .

The 15th layer is equivalent to the perception of the immortal law. Although the efficiency of the original secret realm of the virtual universe company is not as good as that of Wang Yi, he can practice for hundreds of thousands or even millions of years. The perception of the law is not much different from him. All of them are at the level of Fenghou.

While Wang Yi was able to break through the 15th floor, he actually relied more on clones. The perception and application of the true law may not be comparable to those of these primitive secret realm masters who have practiced for hundreds of thousands of years.

The 18th floor is equivalent to the perception of the immortal law of the king. The top 20 or 30 of the original secret realm masters are close to the level of the perception of the king.

and even the first few, the law perception has reached the 18th floor of Tongtianqiao.

However, the gap between them and "Kedi" is still far, far away, because the more you understand the law, every level up is as difficult as reaching the sky. People like King Zhenyan are trapped on the 20th

floor and cannot enter for hundreds of millions of years. You can see on the 21st floor-how difficult it is going forward.

From the 18th floor to the 19th floor, it is almost as difficult as the combined difficulty from the 1st to the 18th floor!

The difficulty has risen geometrically.

So the 18th and 20th floors seem to be very close, but almost every generation of Primordial Secret Realm masters have reached the 18th floor, but they reach the 20th floor... I am afraid that only one will be born in tens of thousands of eras.

According to Wang Yi's understanding, if one of the "teleport, blockade, and strangulation" of the spatial law alone is mastered at the level of the law of space alone, it will inevitably reach the level of the 18th level of perception of the law, and master 2 types, and reach the 19th level. , Master 3 kinds, you can reach the 20th floor.

Integrating the three aspects into one is the real law of complete space!

You can become "Venerable Universe"! That is, the 21st floor level of Tongtianqiao!

But it does not mean that if you can break through the 18th floor of the Tongtianqiao, you must be able to master teleport and other abilities.

Just like Wang Yi, he can cross the bridge for many reasons.

"If we take the cosmic chaos stele and understand the first six pictures, we will definitely reach the level of the 18th floor of the cosmic bridge." Wang Yi sighed.

Universe Chaos Monument is the most difficult to cultivate Chaos Monument!

Even Wang Yi has not understood the first six pictures for so many years.

Mainly, he spends almost all his time accepting inheritance.

But the real law perception has reached the level of the fifteenth floor of Tongtianqiao.

Real combat power, break through the sixteenth floor, and the seventeenth floor is completely fine.

Up to the eighteenth floor, Wang Yi hadn't made it through, but he was not sure.

"My perception of the origin law of fire has reached the level of recognition of the law. But I don't know how long it will take to get the recognition of the origin law of time and space." Wang Yi thought.

If the perception of the law of space is to reach the point where it is recognized by the original law...it is necessary to master one of the highest three types of "teleport, blockade, and strangle" before the imprint of the law recognition will appear.

Even with the help of the sign-in panel and many adventures, Wang Yi still has a long way to go.

...

In Wang Yi's body, after evolving to the cosmic level, nine "stars" will collapse, and the core will become a huge black hole, a spiral galaxy. When it reaches the ninth order of the universe, there will also be eight small black holes on the eight spiral arms.

And the huge black hole of the spiral galaxy is the "location of the pronucleus".

Wang Yi's pronucleus is very unique, and has nothing to do with Wang Yi's improvement in strength, but can breed clones (including the body).

"Breakthrough!"

Wang Yi, who was sitting cross-legged in the cultivation chamber, had a thought.

"Boom..."

The engulfing force of the central black hole and the eight black holes of the spiral arm soared, and the surrounding stars were madly swallowed, especially the central black hole continued to grow bigger and bigger, and gradually, even the eight small black holes next to it were also constantly approaching under the influence of gravity. past.

Devour!

The central black hole swallowed everything that could be swallowed, and it became bigger and bigger. Gradually, eight small black holes were swallowed in one after another.

A moment. All the swirling galaxies disappeared, leaving only one super large black hole.

"Boom..." The super-large black hole suddenly collapsed inward, and the entire black area within the "protonucleus" shrank rapidly at a speed visible to the naked eye. In the blink of an eye, the entire black hole collapsed and disappeared, and at the same time, there was a gray in the center of the original black hole. The ball appears.

The gray spherical shell kept growing until it was as large as the entire pronucleus, and then the gray spherical shell quietly and completely merged with the pronucleus.

But Wang Yi could feel that this fusion did not produce any changes to the pronucleus itself, and Wang Yi was able to separate the pronucleus from this fusion state at any time.

But the fusion of "singularity" and "pronucleus" makes Wang Yi's pronucleus more concealed and difficult to be discovered.

When the inside of the gray sphere reaches its extreme as the law and perception evolves, the "inner world" can be bred inside, and Wang Yi's human body can also step into the world master.

And the pronucleus will still exist in the body world in the form of "pronucleus" and will not disappear.

In other words, if Wang Yi's human deity becomes the world master, he will have an internal world and a prokaryotic world (bringing clones).

At the domain master level, Wang Yi can reach the ninth level of the domain master level within a short time by relying on the nutrition cabin, and then he can break through to the domain master.

Lord of the world, there is no difference between "spiritual power" and "body's original energy". They are all merged into "power of the world", and they have a world projection.

When immortality is reached, the soul and the divine body are integrated, which is the "power of immortality" and possesses the realm of laws.

Wang Yi opened his eyes, his eyes flashed, and he stood up.

"It has broken through to the domain master level."

"Now, go to the master-level Tongtian Mountain. UU reading www.uukanshu.com"

...

Domain-level primitive Tongtian Mountain and universe-level primitive Tongtian Mountain are not in the same plane space.

Universe level, domain master level, and world master level respectively have three Tongtian mountains: "Heaven and Earth, Taichu, Primitive".

While Wang Yi had cleared the cosmic level Primordial Tongtian Mountain before, less than a day later, he came to the primary level Primordial Tongtian Mountain, which is the only one in history.

When the majestic and majestic primitive Tongtian Mountain was idling at the foot of the mountain, the tauren warrior, the ape-man spiritual teacher, and the snake woman illusionist saw Wang Yi approaching the main-level primitive Tongtian Mountain with shocked expressions.

It's been only half a day before you come back again, are you not a human?

Wang Yi fell down and smiled: "Three, I'm here again to break through this primitive Tongtian Mountain."

After a while.

The three corpses were lying on the ground unloved, and Wang Yi's figure went away.

On this day, Wang Yi broke through the domain master, successively rushing through the universe level, the domain master level primitive Tongtian Mountain!

To shock the upper echelons of the human race!

Chapter 242 Outside release

"Lots of mail."

After breaking through the domain master level primitive Tongtian Mountain, Wang Yi received a lot of emails, including his friends, acquaintances, teacher Pang Bo, and some immortal and even cosmic masters. Wang Yi slightly responded.

Wang Yi broke through to the domain master level, but he did not need to move. After all, he was originally a member of the primitive district, and this manor could be used until the domain master.

The original area of the Virtual Universe Company, there are a total of 100 world masters, 30 domain masters, and 3 universe-class people, which together make 133 people.

However, now the main level of the original area has become 31, and there is one more person, that is, Wang Yi.

And until the next domain master qualification battle, this number will not change.

Wang Yi wouldn't care either. The interval between domain master level qualification battles was much longer than that of universe level. By then, Wang Yi had already broken through to the realm master.

After dealing with mundane things, Wang Yi began to prepare for things after the breakthrough.

The human body breaks through to the domain master level, and the function of the "time world" bound to the human body is once again improved. The universe level "time world" can only be accelerated by a hundred times, while the domain master level "time world" can be accelerated by a thousand times. .

And to maintain a day in reality, it needs to consume approximately the energy equivalent of 30 yuan unit resources.

After one year, it will be a unit of 11,000 yuan, which is comparable to the total net worth of an immortal god!

is the immortality of the Houhou, it can only burn for a thousand years and it will be ruined.

Wang Yi would not dare to do so if there were no rewards for signing in to the panel.

Although this price is high, it is still worthwhile for Wang Yi. One year of cultivation in the "Time Realm" is equal to 1,000 years outside. Waiting for the past 100 years...There are Void Zerg clones and Yanxing Giant Beast clones, the law will be felt. What level?

"Break through to the domain master level, according to the rules of the virtual universe company, I have to be sent out to experience, and I will be a great history in a certain universe country, and I am the original secret realm domain master, and the position arranged by that time is absolutely the best. That one, it is estimated that most of them returned to the Qianwu universe as a supervisor." Wang Yi thought.

"Leaving the original secret realm and returning to the cosmic kingdom of Qianwu, I can do a lot of things."

For signing in, Wang Yi is not so rushed now. He knows that he is not strong enough. He just wants to go to some dangerous areas to sign in, but he can't do it.

It's like sitting in the mountain guest's lair, even if he knows, he can go in, dare to go in?

"Speaking of which, the Secret Code of the Nine Tribulations was created by a guest who sits on the mountain. If you encounter it at that time, I don't know if he can discover the secret in me." Wang Yi had also thought about this issue before.

It may be found, or it may not, so you have to see the sign-in panel to give you no support.

The Secret Code of Nine Tribulations (Sit Mountain Guest Sky Soul Crystal Edition), and the Secret Code of Nine Tribulations (Direct Reward Version on Sign-in Panel), there are still differences.

At least Wang Yi will not be restricted by the rules of the original universe.

However, if you want to continue to improve, it depends on luck.

...Wang Yi feels that he is usually very good to his son.

Wang Yi came from the earth. If you are a little concerned, you will definitely know his existence.

With the patience of a mountain guest, if you have the intention, you must find some secrets in Wang Yi's body very simple.

What will happen when the time comes?

Wang Yi is also not clear.

But this world is full of miracles, and even the reincarnation of the god-king Zuoshanke has appeared. It is not surprising that Wang Yi obtained the "Secret Code of Nine Tribulations" through other means to raise his gene level against the heavens... and sitting in front of Wang Yi. Shanke understands that this kind of ancient power is mostly kind to him.

Don't forget why Zuoshanke reincarnated into the original universe.

If you find Wang Yi's special and bizarre, you might well "cultivate" him.

certainly. This is just one of the possibilities. Wang Yi actually doesn't want anyone to discover his secrets until he is strong enough.

Of course, Wang Yi is not too guilty. At any rate, he also has a "world of time", which is also his biggest life-saving card.

Yuxiang Mountain, a public area, a luxurious hotel covering a vast area, among private rooms, Wang Yi and friends from the Virtual Universe Company are all here.

"Wang Yi, you can do it. If there is no sound, it will give us a surprise. It actually broke through to the domain master level to be released." Uka said in a dull voice. He was not in a very good mood. This time the qualification battle, except for Rong Jun in the Secret Realm of the Beginning, everyone else would be eliminated to the Secret Realm of Heaven and Earth.

The original secret realm "Bolan" was eliminated to the primordial secret realm.

"I broke through to the domain master level only two hundred years ago, and now only you in Yuxiangshan do this." Rong Jun also sighed.

Ai Chen, who was sitting with Qianshui, looked at Wang Yi with blinking eyes.

Wang Yi looked around. These were all the friends he had known for the past two centuries, Rong Jun, Wuka, Qianshui, Ai Chen, Jiang Mo, Buran... Wang Yi also felt a little emotional in his heart, and kept a

smile on his face, "I only It's just to leave the secret realm and go out to experience it. What are you doing so sad, you think I'm going to die if you don't know."

"It is fate to know you all in this life. I made this cup." Wang Yi held up the wine glass.

The others looked at each other, raised their wine glasses, and got together.

"Dried this cup."

"Dried this cup."

Jianmo, Longyun, Qianshui, Wuka...and others knew in their hearts that if Wang Yi did not fall, he was destined to rise quickly and become the super existence of the human race, and they were destined to drift away.

Perhaps only Luo Feng and Bolan are a little closer to Wang Yi.

It is hard to say that other people will survive and become immortal in the future.

Everyone understands in their hearts.

"Take care of yourself."

"Take care of yourself."

"Take care of yourself."

.....

Wuchen Continent.

After Wang Yi broke through to the domain master level ~www.mtlnovel.com~ the next day, personnel from the Virtual Universe Company stationed on Wuchen Continent arrived and quickly checked Wang Yi's body to confirm that Wang Yi had broken through.

The headed deacon in black respectfully said: "Congratulations to His Royal Highness Wang Yi for the breakthrough. All the detection information has been simultaneously transmitted into the virtual universe network, and Your Highness Wang Yi can now continue to strengthen your body to the ninth level of the domain master. We have already brought the nutrition capsule. Come, there is enough nutrient solution in the cabin."

The black deacon put out a nutrient capsule full of rocky gray. Wang Yi glanced at it and nodded slightly. Virtual Universe is just like this. Your Highness does not need to waste time on energy accumulation. This stepped in. The first level of the domain master can be directly strengthened to the ninth level of the domain master through the nutrition cabin.

"There is a second thing." The black deacon continued respectfully: "Since your Royal Highness has broken through to the domain owner, according to the regulations of our Virtual Universe Company, it must be released outside."

"According to the conventions, they are usually sent to their hometown. His Highness's hometown is in the 'Qianwu Universe Nation'. I don't know if His Royal Highness is willing to return to the Qianwu

Universe Nation to take on the important post of the Qianwu branch of my Virtual Universe Company. If not, Your Highness can choose a universe country at will."

"I am willing to go to the world of witchcraft." A smile appeared on Wang Yi's face, and he was finally able to go home.

Chapter 243 Ambition

Original secret realm, the abyss of purgatory.

"Wang Yi is going to make a breakthrough, and he is returning to the world of Qianwu." Luo Feng felt a little complicated.

"Luo Feng, if you continue to work hard, even if you can't compare to Wang Yi, you can become a powerful person who surpasses your teacher, and even become an eternal and great existence comparable to the Lord of the Witch." Barbata said to Luo Feng in his consciousness.

"Hmm!" Luo Feng was silent for a while, then grinned.

Yes, compared to surpassing Wang Yi, it is his real goal to become a strong guarding the earth.

"Wang Yi, you are one step ahead now, but one day, I will surpass you."

Luo Feng's eyes were firm.

Every strong person has an unwilling heart.

.....

"Wang Yi..."

The white-haired young man Berlan who had left the primitive area and came to the Manor in Taichu District silently looked at the sky.

Many people are thinking about Wang Yi leaving the original secret realm.

In this era, Wang Yi is extremely dazzling. He is hailed as the strongest genius in human history, and he naturally receives countless attention.

Not only are the geniuses of the same era of the Virtual Universe Company and Wang Yi, there are also many immortals, and even the venerable are paying attention to this peerless evildoer.

Chaotic City.

In the time and space of the ruined battlefield.

"Wang Yi is about to leave the original secret realm and go to the world of witchcraft." The City Lord of Chaos groaned.

Chaos City Lord also paid great attention to this peerless human genius who is even better than Kedi. As soon as Wang Yi passed through the seventh floor of the Tongtian Bridge for the first time, Venerable Pangbo was ordered by Chaos City Lord to take Wang Yi. The Lord of Chaos City valued Wang Yi very much, and from a seniority point of view, Wang Yi is now his disciple and grandson.

The investigation of Wang Yi has never stopped, and even a team of venerables went to investigate the earth where Wang Yi is located, but so far nothing has been discovered. The hometown of Wang Yi and Luo Feng is an ordinary planet.

Until now, there are still Venerables lurking in Wang Yi's hometown.

As for checking it out in person? Chaos City Lord hasn't been so idle yet. The most important thing is Wang Yi. Once Wang Yi came to Chaos City, Chaos City Lord confirmed that he was a human and was not controlled. That was enough.

"Wang Yi is now the most dazzling genius of my human race."

"His news must also be taken seriously by the alien." The Chaos City Lord's eyes were cold.

The human race is one of the six peak races in the universe. It is extremely powerful and also has countless hostile forces. The war has continued and never ceased.

Like the human race, it is adjacent to the territories of the Zerg race, the machine race, and the monster race. After countless years, the two sides have suffered countless deaths and injuries, and the contradiction has long been irreconcilable.

Things like assassination of peerless geniuses of each other's ethnic group are commonplace, and all parties are doing it.

"Wang Yi has left the original secret realm now, and all parties must receive the news, and they will definitely do something." After so many years, the Chaos City Lord has been very aware of the foreign race's practices.

The human race attaches great importance to the tempering of geniuses, but they also value their safety.

This is why there are guards, especially the members of the primitive Secret Realm, guard leaders and even immortal gods.

But even so, the assassination of geniuses still happens from time to time.

Peerless geniuses of the human race like Wang Yi, who are unparalleled in the world, going out, just like throwing out a piece of delicious meat, those crazy alien races will surely rush forward at any cost.

Chaos City Lord said that he was not worried, it was fake, but it would not allow Wang Yi to shrink back into the original secret realm, or humans' lair would not go out, and the flowers in the greenhouse could not withstand wind and rain.

"I have to strengthen the protective power around Wang Yi..." The City Lord of Chaos raised his head and looked at the gray sky above him. All around him, there were corpses of foreign races.

The high level of the human race knew that the foreign race would definitely assassinate Wang Yi, and the foreign race also understood that the human race would definitely strengthen the defense and protection around Wang Yi. Both sides tacitly knew... and this kind of contest has been going on for countless years.

Wang Yi, who was in the vortex of the storm, didn't even know that his name had already spread to hundreds of millions of races in the universe. Surrounding him, the undercurrents were already surging under the calm surface, and those races at the peak of the universe were silently watching.

.....

According to the normal process of the Virtual Universe Company, from early to one month to half a year, the Virtual Universe Company's position arrangement for Wang Yi will be officially finalized, but Wang Yi, who is eager for homesickness, has already packed up the next day and is ready to return to the Kingdom of Qianwu Universe. NS.

The original secret realm, Wuchen Continent, at the gate of the palace.

"Jacos, I beg you this time." Wang Yi looked at the tall, sturdy, green-skinned man beside him.

"Don't worry, your lord, wrap it around me." A smile appeared on Wang Yi's immortal guard "Jakes".

Wang Yi sent out this time to leave the original secret realm, and the guards around him still have to follow.

One immortal god, ten peak masters recognized by the law, 100 elite domain masters, and 1,000 elite cosmic warriors.

The fighters trained by the Virtual Universe Company are much stronger than those of the same level outside.

This is also Wang Yi's protective force on the surface, and the Virtual Universe Company secretly does not know what arrangements will be made.

Even if no one talks to Wang Yi, Wang Yi knows how important he is to the Virtual Universe Company today. It is absolutely impossible for the senior executives of the Virtual Universe Company to just watch Wang Yi bring such a small number of NPC thorns back to the Kingdom of Qianwu Universe.

To tell the truth, the alien race is really crazy. At any rate, even if the venerable protects it, it may not be good, but the alien race is unwilling to pay such a high price.

Like Luo Feng in the original work, once it is determined that he has the potential to grow into the "Lord of the Universe", even the strongest person in the universe will come out.

Now because Wang Yi is too weak, the future is uncertain, but the threat has already ranked first on the assassination list!

In the eyes of a foreign race, if a few immortal gods could die, they would be very happy to kill him.

I just wanted to kill Wang Yi who was carefully protected in the hinterland of human territory. The difficulty was not so great, even foreign races had to look for opportunities.

This time I returned to the Kingdom of Qianwu Universe, because he wanted to save time and was unwilling to hurry, so Wang Yi chose to ask his immortal guardian "Jax" to start the teleportation of the Kingdom of God!

As the guard leader of the core members of the virtual universe company, the immortal **** "Jax" is naturally trustworthy.

At least please send him back without worrying about anything wrong.

Each immortal **** has its own kingdom of God, which is formed by the interlayer of the inner world and space.

And the kingdom of God is all in the cracks of cosmic space.

Those channels connecting the kingdom of God and the outside world are transmission channels.

In God's country~www.mtnovel.com~ As long as there are coordinate points left in some other place in the universe, the space transmission can be instantly opened up for a one-time transmission.

Every time you send, you must open a space channel, and the cost varies according to the distance.

Wang Yi has already learned that returning from the original secret realm to the kingdom of Jacques, to open up a teleport, it needs to consume about 4 yuan units of resources. From the Divine Kingdom of Jacques, to open the passage to the Universe Kingdom of Dry Witch, about 5 mixed yuan units are needed.

Twice transmission, the total is 9 mixed yuan units.

And the general wealth of the leader of the world is 10 mixed yuan units.

After such a transmission, it is gone.

Many immortal gods have a wealth of less than 10,000 mixed yuan units, so even if the immortal gods are not necessary, they will not use the kingdom of God to teleport, but use the spacecraft to drive on their way.

While using the Kingdom of God Teleportation, Wang Yi can return to the Universe Kingdom of Dry Witch in an instant, and then quickly return to his hometown via the spacecraft.

Chapter 244 Return to Earth

In a dark starry sky, on a remote and desolate planet, a dazzling light lit up, and a silver-white triangular spaceship appeared out of thin air.

Inside the spacecraft.

"His Royal Highness, the teleportation of the Kingdom of God has ended. This is the Zhelong Star Field within the Kingdom of Qianwu Universe."

"The primitive mystery is far away from the Qianwu universe. Even if you take the best F-class spacecraft, it will take a year or two to get there." Inside the spacecraft, the immortal god Jakes' smiled, "But using the kingdom of God, one It's an instant."

"The kingdom of God is the most important place for immortal gods." Jakes said with a serious face, "So your Highness, you must remember...Don't bring threatening enemies into the kingdom of God. Once the enemy is taken into the kingdom of God, then it is The real life and death battle is over. Once the

kingdom of God collapses... even if the immortal spirit survives by chance, it will never be possible to move forward."

Wang Yi, who has been watching the entire process of the transfer of the kingdom of God, nodded slightly beside him.

Divine Kingdom Teleportation has many requirements.

The location of the destination must be determined before sending!

The immortal god's 'immortal power' is unique, and each immortal god's power is unique, so it can be used as a positioning.

And the space transmission of the Kingdom of God must choose a very secret place, and there are no other immortal gods in a certain range around.

Because once the teleportation is carried out, the spatial location of the kingdom of God will be exposed. Being discovered by other immortal gods where your kingdom is, the consequences would be disastrous.

"The Kingdom of God", similar to the pronucleus of the Golden Horn.

"How far is it from the Heilongshan star field?" Wang Yi asked.

Jacques smiled and said: "Your Highness, this coordinate position is the closest place to the Heilongshan star field in my many positioning coordinates. We shuttle from here to the universe, and we are on our way, moving forward in the dark universe with 50 times the beam of your spacecraft. , About 23 days."

Jacques is just an ordinary immortal god, that is, the strength of a superior immortal warlord. He is not even immortal, nor has the ability to purchase an F-class spacecraft...so they used the spacecraft gifted by Wang Yi from the teacher "Pangbo Venerable" .

Wang Yi felt relieved, with a smile on his face. "23 days is not too long."

Jakes saw the smile on Wang Yi's face and laughed.

"It seems that His Royal Highness can't wait to go home, and that's right, His Royal Highness is still young and naturally looks forward to reuniting with his family, so let's set off now."

The lives of immortal gods are extremely long, so almost all the most important relatives die, leaving only blood descendants, but these blood descendants may not have deep feelings with them. Some even have no home planet, so naturally there is no feeling of missing their hometown. .

Wang Yi, his life is too short. So far, he has only lived for more than two hundred years, and his relatives and friends are still there, so Jax can understand his feelings.

Wang Yi looked at the screen in front of the control room, and a black and white ball appeared on it, which was Wang Yi's intelligent life "Bermuda".

"Go, travel through the universe, and return to the earth!"

"Yes, master!"

Has not been active in the universe for many years, and 'Bermuda', which is not long after 'born', is also full of enthusiasm.

"The spacecraft accelerates, and immediately shuttles through the dark universe."

"go! go! go!"

As the silver spacecraft continues to accelerate, the outside world can no longer see the planet with the naked eye, only the surrounding starry sky is completely blurred, and gradually even becomes dark.

In the vast starry sky, a silver-white spaceship that has become blurred, suddenly-the space is slightly rippling. The spaceship has disappeared!

"The space shuttle is successful and has entered the 'dark universe'." The black and white ball on the screen shouted: "Now flying at 50 times the speed of light, it is expected to arrive on Earth in 23 days and 7 hours."

When the spacecraft entered the dark space for flight, Wang Yi also returned to his resting cabin in the spacecraft, lay down in the nutrition cabin, and evolved with the precious nutrient solution inside.

The nutrient solution provided to him by the Virtual Universe Company allows him to upgrade from the first level of the domain master to the ninth level of the domain master in about 9 months.

Like ordinary strong people, without this condition, they have used a long time to absorb energy a little bit of evolution.

23 days later.

Heilongshan star field, the Milky Way, a starry sky, the space is slightly rippling, and a silver-white triangular spacecraft emerges out of thin air.

"Master, we have arrived in the Milky Way, and there are still 20 minutes to reach the earth." A reminder from Bermuda sounded in Wang Yi's ear.

"Huh? Has it arrived?" Wang Yi, who was in the virtual universe, immediately withdrew. In reality, the door of a nutrition cabin full of rock gray color opened with a bang, revealing a strong and perfect body without any strands, and the black muscles are clearly defined. The young man sat up and opened his eyes that were deep and bright as stars.

"Pop!" Wang Yi stepped forward, the liquid on his body evaporated automatically, and at the same time the black streamer surged, turning into a familiar dark red shirt.

"His Royal Highness!" At the door of the spacecraft cabin, the immortal guard "Jax" was already waiting, while the other guards were in other parts of the spacecraft.

"Jakes." Wang Yi in a good mood also smiled and nodded.

"It has been 23 days, and the appointment of the Virtual Universe Company has not yet come down." Wang Yi and Jacques were walking on the spacecraft passage.

"His Royal Highness, don't worry, because His Royal Highness is a member of the Primitive Secret Realm. He must be appointed to the highest position of the Dry Witch Branch. The power and interests

involved are great, and it takes a series of processes to make the appointment." Jakes laughed. "According to the virtual universe company's process, it can be as short as one month or as long as half a year. Sooner or later, the appointment will come down."

"The members of the Primitive Secret Realm will be released outside, and the official position will be unified as the Supervisory Special Envoy." said Jakes. , Those three ministers will certainly warmly welcome you to please your highness."

The position is equivalent to three ministers, but it does not mean the same status.

Now Wang Yi's position in the Virtual Universe Company is far more than ordinary immortal princes. If the three ministers are not stupid, they will definitely not fight against Wang Yi.

Wang Yi and Jacques came to the spacecraft's central control room, and soon he could see that there was a beautiful blue planet in the distant starry sky.

The moment I saw it, the intimacy from the depths of the soul spontaneously flowed out.

This is his hometown ~www.mtlnovel.com~ and his source, the earth.

"Finally back." Wang Yi took a deep breath.

Now the Earth, the Four Powers are all gone, but the Milky Way where the Earth is located has become Wang Yi's territory. Naturally, the Earth also belongs to the Wang family. With the intervention and support of several parties, the Earth has gone out of the universe, and many people on Earth are in other parts of the Milky Way. Take roots, multiply and grow.

Relatively speaking, in the eyes of the outside world, the Wang family is still relatively low-key and conservative. This is all orders from Wang Yi.

Luo Feng, like Wang Yi, is at the core of the virtual universe company, and now in the original secret.

Hong and Thor, are now in the "Dry Witch Secret Realm" in the core hinterland of the Dry Witch universe.

Wang Yi is now back as the domain master of the Virtual Universe Company, but he has no chance to meet them.

When Wang Yi's spacecraft appeared in the Milky Way, in a starry sky very close to the earth, in a magnificent temple that was hidden, comparable to a planet, there was a white-haired man with two purple secret patterns on his head. Looked at his ancient existence, his body exuded a vast aura like the starry sky, and the space around him was fluctuating.

"Wang Yi is back."

Chapter 245 The King of the Earth

"The solar system is ahead." A silver-white triangular spacecraft flies in the starry sky at a very fast speed. With the technology of an F-class spacecraft, the starry sky defense system deployed around the earth cannot be discovered today.

But if it is an e-class, master-class spacecraft, it will be spotted all at once.

There is no way, the cost of deploying a starry sky defense system that can be found by even the Immortal-class spacecraft is too staggering. The most important thing is the large range. Except for the earth, monitoring in other places can only do this step temporarily.

But now that Wang Yi has returned, as a member of the original secret realm of his virtual universe company, his residence will definitely be remodeled and become more rigorous.

At that time, even if the aliens are immortal, they will not be able to sneak into the solar system.

In fact, without Wang Yi's knowledge, there is already a super existence of a virtual universe company secretly lurking here.

"That is Mars. Two hundred years later, it has become a planet of life."

A familiar and unfamiliar green planet appeared in the field of vision.

said that he was familiar, because he was Mars, and Wang Yi had been there many times.

What's strange is that it has become a vibrant green planet. The original Mars was desolate, but now it has been transformed into a tree-lined, picturesque, high-rise life planet suitable for people to live in.

Two hundred years have passed, the solar system has changed drastically.

In the solar system, human beings now live on the earth, and Mars. Some satellites such as the moon have also been transformed, and there are a large number of spacecraft coming and going every day. Because of advanced technology, human beings on the earth can toss around Mars, the earth and other places in one day.

In the atmosphere of the earth, a silver-white spacecraft was floating here like a ghost, and Wang Yi and his guards flew out.

"Huh." The spacecraft disappeared and was taken away by Wang Yi.

Then Wang Yi looked at the members of the guards, "Don't resist, I will take you into the world."

"Yes, Your Highness." The members of the guards were then taken into the world he prepared by Wang Yi.

Leave only the guard leader "Jacos" with him.

The "world" created by the world master is very convenient, and this kind of world can also allow life to live in, but the world can only be created by the world master. Once it becomes an immortal god, it cannot create the world.

Because of the high cost, the number of worlds created is still very small.

Like Wang Yi's "One World", the best length, width, and height are over 100 million kilometers, worth 10 yuan.

"It seems that His Royal Highness does not want to go back to his hometown with a big fanfare, do you need my cover?" Jakesi laughed.

"No, I can do it myself." Wang Yi shook his head slightly.

The body exudes mysterious waves, and the body seems to be integrated with the space.

Although it is impossible to hide from the immortal gods, it is not a problem to confuse the earth's scientific and technological detection.

Although is only at the domain master level, the law perception and secret method have been applied to Wang Yi's level, and it has surpassed countless world masters.

After taking these guards into the world they carried, Wang Yi and the immortal **** "Jax" flew towards the earth.

Earth, the original city of Yangzhou.

After two hundred years, Yangzhou City has been completely transformed into the private domain of the Wang family. It was built into a huge castle covering a vast area. It was surrounded by a black and solemn city wall up to 100 meters high. That little castle.

said it was small, but the side length was more than one kilometer, and only the direct descendants of the Wang family could live in.

Here, it is still called 'Yangzhou City', but it belongs to a transcendent existence on the entire earth.

After all, this is the residence of the "Lord of the Milky Way". The entire earth, solar system, and galaxy coefficient of 100,000 living planets, including everything in the territory, belong to the royal family according to the rules.

However, the existence of the Wang family is only known to a few high-level people on the earth. Ordinary people only know that the Wang family is one of the most powerful and mysterious families on the earth, and the Luo family and the Hong family are known as the three major families on the earth.

The children of the Wang family rarely show up outside, and their behavior is very low-key, so few people outside know about the Wang family.

They have not experienced the terrible "Beast Devouring Disaster" that swept across the world, and Luo Feng and others are not as well-known as the original history. They have become heroes who save the earth, just like Wang Yi. No one knows his existence except for a small number of powerful people on the earth. .

Two hundred years ago, the "Primary Genius War" was not noticed by many people on earth at that time.

Because Wang Yi did not give instructions, the higher Earth officials did not dare to publicize Wang Yi's affairs, and instead blocked relevant information.

As a result, few ordinary people know that Wang Yi is the real master of the entire galaxy!

On this day, the Wang family was very lively, and a large number of children living outside had been summoned back in advance and gathered in the castle.

Wang Yi's return is a secret, but of course the people closest to Wang Yi already knew it, so I called back all the family members who had reproduced in the Wang family over the years to meet their patriarch.

Based on the concept of people on earth, the Wang family is definitely a big family now!

After more than two hundred years, Wang Yi's children have married each other, and naturally there will be children. The offspring continue to reproduce. Two hundred years are not long, but according to the twenty-year generation, they have reproduced for almost ten generations.

And the longer the life, the more offspring will be reproduced, and the longer the interval will be. Like Wang Yi's eldest son, Wang Ping, who was married early, the eldest child is almost 180 years old, and the youngest child is also 100 years old, a difference of eight. Ten years, according to the previous concept of the earth people, it is difficult to imagine, but this kind of thing is normal in the universe, just like a domain master with a life span of up to a million years, the age gap between children of the same generation is very large.

But the more powerful, the higher the level of life, the more difficult it is to give birth to offspring.

It's already difficult for domain masters to reproduce offspring, and it's even more difficult for domain masters, so the strong generally attach great importance to their direct descendants.

Because of the large amount of resources provided by Wang Yi, Wang Yi's parents, wives, and children have been promoted to cosmic level in the past two centuries. Like Wang Yi's talented children, the strongest ones are faster than the ninth cosmic level, which is impossible to place in ordinary galaxies. imagination.

Have a large number of resource treasures~www.mtlnovel.com~ Formidable secrets, excellent teachers, complete external training environment... With the blood of Wang Yi, the probability of the birth of a strong person in the Wang family is actually very high.

A large number of elite guards and guards in Yangzhou patrol the city, many of them are cosmic-class, and there are many domain master-class powerhouses, and thousands of members of the royal family have gathered inside and outside the castle of the ancestral home of the Wang family. Of these children, only two are unmarried now, and the other nine are married.

For example, Wang Yi's first-generation children generally have only one spouse due to the influence of their ideas, so the number of offspring born is limited. However, as the generation goes on, many of the Wang's children have more and more spouses. In addition, the acquiescence behind the family has led to young men in the family. On the contrary, younger generations have many spouses, so more and more children are born, resulting in a substantial increase in the population of the Wang family two hundred years later.

It is as if a man from the royal family and ten women gave birth to ten children, and the number of these ten children will continue to be exaggerated.

The population of the Wang family increased at a snowball speed.

In the lively atmosphere outside, Wang Yi's three wives still look like girls, Lin Youyu, Shen Yan, Gao Yurong and their eleven children, Wang Yi's parents are also there, and they all look forward to it. With regard to the return of her husband, father, and son.

Chapter 246 Wang Yi's Descendants

Because of premature growth, two hundred years later, Wang Yi's children are very young in appearance, standing with Wang Yi like brothers and sisters.

Even Wang Yi's parents are like people in their early thirties.

"Huh."

The figures of Wang Yi and Jacques appeared in the castle out of thin air.

One fell into the eyes of everyone.

"A Yi!"

"dad!"

"Xiao Yi!"

Wang Yi's family was in a daze, and then they gathered around excitedly.

"Dad, mom!" Wang Yi first greeted his parents with a smile.

"You child..." Wang Yi's parents' eyes were reddened, and when they saw their son who was thinking about it, they were emotional, their faces flushed, and a thousand words, but they were stuck in their throats and couldn't pour out them.

Wang Yi gently hugged three wives before looking at the eleven children he was familiar and unfamiliar with.

said it was familiar, it was because I often met in the virtual universe, it was strange, it was because it was the first time to meet in reality after many years.

When I saw it with his own eyes, Wang Yi felt very sad that his child has really grown up.

The little one that could be held in the palm of the hand is now a parent.

Wang Yi has six sons and five daughters. They are five children of him and Lin Youyu: Wang Ping, Wang An, Wang Xi, Wang He, and Wang Luo.

and Shen Yan's three children: Wang Bao, Wang Bei, Wang Chang.

and Gao Yurong's three children: Wang Le, Wang Ri, and Wang Yuan.

The eldest son is Wang Ping, the eldest daughter is Wang Le, and the youngest daughter is Wang Yuan.

Except for Wang He and Wang Yuanyuan, all the other children have already married and have children.

Wang Yi patted the shoulder of the eldest son who had recently been full of excitement, looked around at his family members, and smiled: "Let's go in and talk."

"By the way, this is the immortal **** Jax, the guard leader sent to me by the Virtual Universe Company this time."

Wang Yi introduced to his family the tall, solemn, unique-looking green-skinned man standing beside him with a quiet smile.

Because it is Wang Yi's family, Jax has always restrained his breath, but no matter how he restrained, the extraordinary temperament that is different from ordinary people is still hard to ignore.

"Dad, you actually have an immortal **** as a guardian. That's too powerful." Wang Xi's three sons, Wang Xi with a more detached personality, said excitedly.

"Third brother, the guests are here, don't be rude." Wang An, the second oldest among the brothers and sisters, whispered softly.

"It doesn't matter, I was originally the guardian of His Royal Highness Wang Yi. This is a fact." Jakesi smiled slightly. "Moreover, it is also my honor to be the guardian of your Highness."

In fact, in today's Virtual Universe Company, there are many immortal gods who want to be the leader of Wang Yi's guard, but unfortunately, he has already taken the lead.

His Royal Highness Wang Yi's guard is very popular.

Wang's children looked at each other, and it seemed that their father's position in the virtual universe company was stronger than they thought.

"Mr. Jakes, come in and sit together." Wang Yi's father didn't dare to be rude, and hurriedly greeted his son's guests.

They only know that Wang Yi is a genius of the virtual universe company, but they don't know much about the specific situation. They don't know the true status of Wang Yi in the virtual universe company now. Therefore, an immortal **** is comparable to the existence of the **** lord of the Black Dragon Mountain Empire. They seem to absolutely not be negligent.

Wang Yi has been afraid of his family members for so many years, so he didn't say anything about the details of the virtual universe company.

Therefore, Wang Yi's family has more information about Wang Yi from the outside.

Castle living room, a family sitting on the sofa talking.

Sitting next to Wang Yi were three wives, eleven children sat down on both sides, and the parents were on the opposite side. As a guest, Jacques was not suitable for attending this kind of family gathering. He had already arranged to rest in the next room, but in fact there was only one side. corridor.

Wang Yi was talking with his wife and children while listening to the nagging of his parents. He was very moved.

In recent years, the royal family has risen and established power in the Qianwu universe from the start of the Milky Way. Because Wang Yi is a member of the original secret realm of the virtual universe company of the human giant, even if the royal family of the Qianwu universe is very face-saving, many immortal gods and ancient families are willing to make friends. ...So the Wang family has developed smoothly over the years and expanded extremely fast.

Family affairs are mainly handled by the three wives. Even if they are insufficient, they have many helpers to assist them. In fact, as long as the backstage is hard enough, family managers only need to manage step by step, and the family can grow and grow healthily.

Wang Yi's children grew up with a desire to be a martial artist and a spiritual teacher, because they worshiped their father and wanted to embark on a path similar to the power of their parents. There are also those who like to run a family, some like exploring and adventurous travel, and some even like star art... With Wang Yi's acquiescence, they let them pursue their goals in life.

However, Wang Yi is very strict with their ethics.

The bottom line is not allowed to violate.

This has been written in the family rules. As a family that may last for hundreds of millions of years or even become a behemoth in the human race in the future, it is inappropriate and impossible to rely on personal management alone. Wang Yi has no interest in managing a family, so he must Rely on sound and strict family law to maintain the healthy development of the family and clean up the scum among them.

But at present, the family hasn't seen the kind of scum that is angry and angry. On the contrary, there are very many elites.

"Hmm... Maybe it's because I have excellent genes?" Wang Yi couldn't help touching his chin, feeling a little proud.

"By the way, since you are back this time. I have something to tell you." Wang Yi's wife Gao Yurong said to Wang Yi.

"It's about the child Yuanyuan." Gao Yurong glanced at the pretty girl who was sitting next to Wang Yi.

"Huh?" Wang Yi glanced back at his daughter, she lowered her head slightly, as if a little embarrassed.

"What's wrong?"

Because of the inheritance of Wang Yi's blood, Wang Yi's children look very good. Wang Yi's daughters are not only beautiful, but they are all beautiful.

"We only have Lao Wu and Xiaoyuan in our family who are not married." Shen Yan next to him also said, "We have urged them all these years, but they have been reluctant, and we can't help it."

Wang Yi glanced at his two children, and they both bowed their heads slightly.

"Well, since they don't want to, then take it easy..."

Wang Yi's children have basically reached the cosmic level and have a life span of 100,000 years. Their future achievements are not destined to be low, two hundred years old? To be honest, many races of the human race have just grown up at this age. When it comes to marriage matters, Wang Yi feels that he is still enlightened and will not do things like force his children.

"The fifth child is adventurous. He wanders around alone. As long as we don't go to dangerous places, we can't control him." Lin Youyu, who has always been gentle, couldn't help but glared at his son, scared him to bow his head again.

She said she didn't care, but she still cared about the major events of her son's life in her heart. As long as Wang He came back in the past two hundred years, she would blatantly find a bunch of objects for her son. Unfortunately, none of Wang He's temperamental excitement could be appreciated. Eyes made her very unhappy.

"But Yuanyuan has had an object recently. You are her father. After coming back for the first time in so many years, you should also worry about your daughter's lifelong affairs."

Wang Yi blinked.

What the hell? I returned home for the first time in many years, but my youngest and most beloved daughter was about to marry?

"Who is the other party?" Wang Yi asked his a little shy daughter curiously.

Gao Yurong glanced at her uneasy daughter, and said softly, "It's the grandson of your good brother Luo Feng, Luo Ning."

"Oh?" Wang Yi raised his eyebrows slightly.

Chapter 247 Family Affairs

In fact, if Wang Yi's daughter likes an ordinary person, it's not a big deal.

However, Luo Feng's two sons, Luo Ping and Luo Hai, grew up with Wang Yi's children, and they were close to each other as brothers. That's why Gao Yurong and the others felt a headache.

The seniority is all messed up.

Wang Yi didn't feel much. It was Luo Feng's grandson, not his. After learning about Ronin's situation, he asked his daughter: "Do you really like that Ronin, want to be with him?"

Loning, the son of Luo Hai, the second son of Luo Feng, is also Luo Feng's grandson.

The talent is very good, very hardworking, and now he is also the only cosmic-level direct descendant of the Luo family.

In fact, Wang Yi doesn't care what the other party is like. He only cares about his daughter's feelings.

"Yeah." Although he was a little restless in his father's eyes, Wang Yuanyuan raised his head bravely and nodded.

"Since you like it, let's do what you think, dad has no objection." Wang Yi smiled freely.

It's just that he didn't expect that being brothers with Luo Feng is not enough, and now he still wants to be in-laws.

This generation is a bit messy.

Gao Yurong and the others stopped talking. Wang Yi is the head of the Wang family. As long as he decides this kind of thing, basically no one can object.

So the affairs of Wang Yuanyuan and Luo Ning were settled.

...

A banquet was held in the Wang's Castle that night.

"Meet the Patriarch."

In the brightly-lit hall, thousands of family members from the Wang family gathered in the hall, all bowing down to salute the person in front of them respectfully.

Wang Yi sat in the main seat at the front of the hall with a smile on his face.

Now these are his descendants.

There are more than 1,000 male members alone, as well as some girls born in the family, as well as the wives of male members. A male member can only bring three wives to the banquet.

Some parents are still holding their babies and bringing the children over, and some have obvious features different from those of people on earth.

However, because of family regulations, even if men in the clan marry women of other races, they must be similar to the race of the earthlings, so there is no offspring that looks too bizarre.

But as time goes on, the family population multiplies and becomes hundreds of millions. This situation must change.

"However, I don't have to worry that my direct blood will grow strangely..." Wang Yi thought.

There are too many other children to manage, and you can still manage your direct descendants.

In addition to his offspring, Wang Yi also saw his siblings, but they were more restrained to Wang Yi.

"Dad, this is Ronin."

During the banquet, Wang Yuanyuan brought a tall and thin young man to Wang Yi.

Loning looked at the legend in front of him. He had heard of the Wang Family Patriarch from the same era as his grandfather Luo Feng. Although his expression was calm, his heart was full of tension.

As a son of the Luo family's elite, he has traveled through the universe. He knows how terrifying Wang Yi is.

This is a dazzling figure than the grandfather he admires most.

"Uncle Wang is good." Luo Ning obediently said.

"Hmm." The corners of Wang Yi's mouth twitched slightly, and he responded, neither salty nor light.

Your grandpa and I call brothers and sisters, and your grandpa is also a brother in front of me, so you dare to call me uncle...

Wang Yi glanced at the begging in the eyes of the little girl next to him, and finally decided to let the kid go.

What's the matter, I have to be laughed at by Thunder God Hong when I turn around.

Wang Yi felt a little helpless.

After chatting with his youngest daughter Luo Ning, Wang Yi let them leave.

Although his youngest daughter's life-long events gave him a bit of a headache, Wang Yi was still very happy to see the prosperity of his family.

While Wang Yi returned to the family, he also re-arranged. For example, many precious resources and some trump cards were left for the family's foundation, so as to cultivate more outstanding family children.

However, the Wang family now has only a thousand male members, and there is not even a domain owner. Compared with those ancient families that have multiplied for countless years, have a population of hundreds of millions, and have a large number of domain owners within the clan, they are far away.

As for the marriage of Wang Yuanyuan and Luo Ning, the two families are also happy to see it happen, and plan to hold a wedding for them during Wang Yi's time on the earth, so as to completely settle the matter of the two families.

Wang Yi returned to the earth and began to medicate with peace of mind and accompany his relatives. At the same time, he waited for the appointment of the virtual universe company to be issued. The plan to transform the earth and the solar system is also underway.

The alien assassins did not emerge either, everything was as plain as water.

And this time, three months have passed.

...

The afternoon sun passes through the treetops, casting mottled light and shadows.

The castle of the Wang family is quite chronological. The immortal **** Jacques sits on a chair under the tree in the castle courtyard and sips tea from the earth leisurely, while the ten guards who have been recognized by the law of origin are nearby teaching the children of the Wang family. On the grass, hundreds of newly born babies from the Wang family were rolling all over the floor under the care of their mothers. Gao Yurong and the three head mothers watched this scene with a smile.

Wang Yuanyuan and Luo Ning, who had just been married for a month, were also enjoying the scenery on a balcony of the castle, discussing which planet they would go to for their honeymoon.

The top floor of the castle, the floor where only the head of the family and a few important members of the family can enter, the training chamber, there is no one, only a ring that carries the world of one side is placed there.

But that was just to cover up people's eyes. Others thought that Wang Yi was cultivating in a world. In fact, Wang Yi had already entered the "world of time."

"Time Realm" is now 1,000 times the flow rate, one day outside, 1,000 days in the Time Realm.

Although he burns money, his cultivation speed is fast.

Wang Yi signed in during the training mission over the past century, and got a lot of treasures, sold them, and got almost 20 million yuan units.

It seems to be far inferior to the hundreds of millions of yuan units signed in Chaos City in the past 30 years, but I don't look at where Chaos City is. It is the oldest holy land for human cultivation. There are countless strong people and endless background, even if you sign in randomly. , Can get countless treasures.

In the time world, the Void Zerg clones are comprehending the "Universe Chaos Stele", the Yanxing Giant Beast clones are comprehending the "Beast God Carving" and the Chaos Stele, and the human body is also comprehending the Chaos Stele...including the top-level "Universe Evolution" Secret method.

Now Wang Yi has obtained the first nine cheats of "The Evolution of the Universe", as long as he crosses the 18th floor of the Universe Bridge, he can get the last cheat.

Getting the "Secret Method of Purgatory God General" and "Secret Method of Demon Sound God General" undoubtedly made Wang Yi a great advance.

Especially the "Inheritance of Purgatory God Generals" has reached the limit of a hundred times the amplitude of the body's strength, which is also the limit of the universe.

And the "flaming star transformation" secret method of the flaming star behemoth is up to 27 times the amplitude of the body's strength, and it cannot overlap with the secret method of the purgatory general.

But the special secret method of the Yanxing Giant Beast not only amplifies the physical strength, but also grows larger...huge body, which means that after the achievement of immortality, the divine body will be even bigger.

The third level of the Flame Star Giant Beast's "Flaming Star Transformation" can make the body a thousand times larger, which means that the original 2,000-kilometer Flame Star Giant Beast can reach two million kilometers. "...The body shape has become ten times bigger again, that is 20 million kilometers!

What a terrible figure is this? Already more than many celestial stars!

The third level is very difficult to cultivate. Even in the long years of the universe, there are not a few behemoths of the flame star that can successfully practice, and a lot of resources are required, which is an astronomical figure.

However, since the amplitude force has no effect, you can wait until the conditions are sufficient before practicing slowly. Wang Yi is not in a hurry.

"Also, in the future, this law will become more and more difficult to understand. No wonder so many immortal gods have been unable to make progress for hundreds of millions of years." Wang Yi sighed.

Now he is looking at the sixth picture of the Chaos Stele and practicing together with "The Evolution of the Universe", but the speed of progress is still greatly slowed down.

Of course, compared with other world masters, it is hundreds of thousands of times faster!

The "power of the beast god" has also increased Wang Yi's understanding of the law of origin by more than ten times!

So in fact, the speed of comprehension is much faster than that of the Chaos City. However, the Universe Chaos Stele is the strongest and most difficult chaos stele of the human race. The sub-picture is also very difficult.

But Wang Yi is not in a hurry, he still has time.

At this time, Wang Yi's mind suddenly moved.

"Huh? There is internal mail in the virtual universe?"

Chapter 248 Supervision Envoy

Virtual universe, Yuxiang Mountain primitive area, inside Wang Yi's manor.

In the study room of the small building.

Wang Yi sat at the desk and watched the official email notification received on the laptop screen. It was an appointment sent by the Virtual Universe Company.

From today, he will be the special supervisory envoy of the Virtual Universe Company in Qianwu branch!

Have a series of privileges such as investigation and surveillance of the Ministry of Armed Forces, the Ministry of Commerce, and the Ministry of Military.

Wang Yi browses the appointment content.

The appointment is very simple. This expatriate appointment is a test at the domain master level. Just monitor this work and when Wang Yi reaches the day when the domain master resigns, he can directly get 100,000 points.

At the same time during the release period, the Virtual Universe Company will occasionally send out some special tasks for him to perform, and each task will be rewarded with corresponding points.

Wang Yi could not help but sigh...

"There are so few points!"

According to the content of this appointment, when he was a supervisory envoy at the domain master level, he might only receive a mission in 50 years.

Long time and low points, which is acceptable to others, but Wang Yi cannot accept it anyway.

"It took almost four months for the appointment to come down. Virtual Universe Company is not very efficient this time." Wang Yi shook his head. "But now that the appointment has been made, the Qianwu branch will also be notified that I have taken office and it is time to visit the Big Three."

The appointment did not come down, and Wang Yi was a genius member of the Primitive Secret Realm.

After was appointed, he was the special supervisory envoy of the Qianwu branch, who could be on par with the Big Three, and he also had supervisory privileges.

Virtual Universe Company's 'Qianwu Branch' in the Qianwu universe is divided into the Ministry of Arms, the Ministry of Commerce, and the Ministry of Military. Under normal circumstances, there are three giants at the highest level, who can serve as a minister of a certain universe country branch.

The Takebe refers to the large number of powerful men directly under the management of the Virtual Universe Company, as well as the collection of genius training in the entire Qianwu universe, etc., all of which belong to the Takebe.

The Ministry of Commerce is the business side, with hundreds of millions of employees and huge interests.

As for the military... the military of each universe country is generally managed by the senior officials of the universe country itself and the virtual universe company (or the giant axe fighting field) stationed in the universe country branch!

Wang Yi's hometown, Qianwu universe country, happens to be one of the 504 universe countries under the jurisdiction of the Virtual Universe Company.

So there is an additional military headquarters.

Monitoring Special Envoy, who is on behalf of the 'headquarters' to conduct supervision, can supervise the three ministers and has great power. This is also the most basic power of the supervisory envoy.

With Wang Yi's identity background, the three ministers did not dare to provoke Wang Yi at all, and could only please coax them.

"Well... they don't provoke me, and I don't want to trouble them." Wang Yi said inwardly.

Wang Yi focuses on cultivation, and it is impossible to focus on monitoring the operation of the Universe State Department. He can only check it occasionally. Of course, he can directly understand it

through the internal intelligence department of the Virtual Universe Company, without spending energy trying to check.

If the three major ministers did not do too much, Wang Yi would just open his eyes and close his eyes.

Of course, if they crossed the bottom line and did too much, it would be equivalent to not paying attention to Wang Yi. If he, the monitoring envoy, does not care, it would be a joke.

It all depends on the situation.

.....

"Amethyst Island" under the jurisdiction of Qianwu Continent.

This is an extremely beautiful island made of purple crystals.

The entire island area is not inferior even when compared with the Black Dragon Mountain island.

The island has a palace made of undulating amethyst.

The most central amethyst palace, which is tens of thousands of kilometers high, is the most dazzling one. Under the sun, this majestic amethyst palace reflects all kinds of brilliant colors.

"Is this the Amethyst Island?" Wang Yi appeared on an amethyst reef with dozens of flats on the easternmost side of the Amethyst Island with a burst of brilliant brilliance, looking at this vast and beautiful island in the distance.

Amethyst Island is the office of the Qianwu branch of the Virtual Universe Company.

Because the universe is too vast, this office is naturally located in a virtual universe.

"Go and meet those three giants. Now, they should be ready to meet me?" Wang Yi grinned.

Huh, Wang Yi turned into a streamer and rose into the sky, flying towards the center of the island like a meteor.

Soon, flying about 100,000 kilometers away, I saw the densely packed line standing on the huge amethyst square. At first glance, I couldn't see the end of the line.

And three figures stood in front of the densely packed figures.

"Huh!" Wang Yi fell and looked at the three.

An elegant ape-man in a gorgeous purple robe, with a smile on his face and purple lightning rippling around his body. He is the minister in charge of the Ministry of Commerce, the "Zi Dianhou", who shakes the air.

The man with extremely dazzling golden long hair, his smile is extremely bright, and the whole person feels warm like the sun. He is the minister in charge of the Armed Forces "Kin Yuhou" Ever.

The barefoot girl wearing only black gauze, the inadvertent temptation is known to be a temptation, and she feels in a good mood. She is the minister in charge of the military department, "Hei Dan Hou" Wei Sa.

The three giants of the Qianwu branch, the Commercial Department, the Armed Forces, and the Military Department, are also the three immortal lords!

"Welcome to Mr. Wang Yi, Special Envoy of Supervision!" The black gauze girl smiled.

.....

Half a day later, Wang Yi, who came back from the first inspection of Amethyst Island, quit the virtual universe and exclaimed: "The three ministers are really very enthusiastic, and I am embarrassed to be so enthusiastic."

Enthusiasm, eager to flatter, please, you can describe these three ministers in this way.

Obviously, they are really afraid that Wang Yi will trouble them.

Wang Yi didn't believe it if they didn't have any tricks at all.

"I'm good at being a human being, but I don't have the mind to focus on work."

Wang Yi smiled slightly~www.mtnovel.com~ stepped out of the training room, came to the top roof of the castle, and looked at the distant scenery.

Although you are in Yangzhou City, the original dense high-rise buildings have become lush forests, and there are even artificial lakes and rivers, which are picturesque.

Now that the earth has entered the era of cosmic technology, it has long since cared about that little land.

People can connect to the virtual universe to practice, learn and entertain life. They can also exercise in the martial arts gym, travel to the planets of the solar system...if they have the will, they can even immigrate to other planets and see the scenery of the universe.

Now, the people on earth have stepped out of the earth and marched towards the universe.

And this is just the beginning.

"Domain master, the world master is just the beginning..." Wang Yi muttered to himself.

The three ministers of the Qianwu branch wanted to hold a grand reception banquet for Wang Yi, inviting the high-level immortal gods of the entire Qianwu universe to attend and witness the arrival of the new monitoring envoy.

"Well... the supervision of the special envoy's appointment has ended, now there is one more thing... Has Hong hooked up with Na Ji Qing? According to historical progress, it is almost this time period." Wang Yi looked at the clear sky and touched his smooth chin. , Thoughtful.

Chapter 249

Ji Qing is a descendant of "Yinxuehou", one of the "Three Hundred Princes" of the Qianwu universe.

is also a super genius, qualified to enter the core layer of the universe mercenary alliance.

At the same time, she is also a disciple of the immortal "Phantom King", a high-level master of the Universe Mercenary Alliance.

"Phantom King" is a member of the "Cosmic Mercenary Alliance" camp, a very, very terrifying one of the king-class immortal gods.

Although she only passed the nineteenth floor of the Tongtian Bridge, it seems that the perception of the laws of the universe is one level lower than King Zhenyan and King Tianyu, but because she is a very strange illusionist...

Therefore, the Phantom King is also one of the most terrifying existences in the Sealed King-Class Immortal.

Due to special cultivation reasons, the disciples of the Phantom King's school are not allowed to be involved in emotional aspects and combine with the opposite sex.

Because of this in the original book, Hong and Ji Qing, who were originally in love, were told by the Phantom King that the furious Phantom King wanted Hong to leave Ji Qing, or he would kill him...Finally, under Luo Feng's interference, he put many tests. , Hong risked his life to pass the illusion test, but! Ji Qing broke up with Hong because of his own ideas.

Everyone has their own pursuit. This is the business of Hong and Ji Qing. Wang Yi declined to comment on this.

Not every effort will be rewarded. In many cases, it may be just wishful thinking.

History has changed. Hong is already a member of the Secret Realm of Dry Witch. Because the teacher "Luo" is a member of the Giant Axe Fighting Arena, he was also recommended to join the Giant Axe Fighting Arena. Thor has always followed Hong, and the two finally entered the Giant Axe. Colosseum.

History is always surprisingly similar.

Wang Yi has deep eyes.

So...Does Hong know Ji Qing now?

.....

Virtual universe, Black Dragon Mountain Island, Jiuxing Bay.

Hong, Thor, and Wang Yi gathered together and drank tea on the round stone table in the courtyard.

"Ji Qing? I don't know." Hong shook his head slightly.

"Men's and women's?" Raytheon looked gossiping, "Is it possible that Boss Hong is secretly hiding from us and knowing women?"

Since I don't know each other, it's okay.

Wang Yi drinks tea at ease.

Hong and Raytheon didn't know why Wang Yi asked a stranger's name. Since Wang Yi didn't say it, they didn't care.

"History has indeed changed, and the fate of Hong and Ji Qing are different." Wang Yi said with emotion.

At first, he was a little worried that Hong would be hit emotionally again.

Thunder God and Luo Feng went to participate in the "Thunder World" apprentice mercenary assessment, it was because of the place in the Black Dragon Mountain Star Territory, the most recently opened assessment world at that time was the "Thunder World", and going there was also a normal development.

But Hong and Ji Qing, even though they are both members of the Great Axe Fighting Ground of the Qian Witch Branch, want to meet in the vast crowd and love each other, the odds are extremely slim.

A Ji Qing is nothing, and Wang Yi no longer thinks about it.

"By the way, Wang Yi, the news that you are coming back to the Cosmos Nation to be the special monitoring envoy this time has spread. It is estimated that no one in the Cosmos Nation knows. I heard that the three giants jointly issued an invitation letter. Only the real high-level officials. Only to be there, many immortal gods were not invited. This time you are really majestic." Thunder God laughed.

Wang Yi smiled slightly.

In order to please Wang Yi, the three giants of the Qianwu branch really did their best.

It's not surprising that there are many people.

They wanted to please Wang Yi and make good relations with Wang Yi, so that Wang Yi would not trouble them.

After all, the position of the Third Minister of Witchcraft is much stronger than the ordinary immortal status, and there is a lot of oil and water. No one is willing to move in this position for a long time.

Hong laughed and said: "I have also heard that the reception of the wind banquet by the special supervision envoy of the Dry Witch branch has become the most popular thing in the Qin Witch universe. The specifications are so high that many immortal gods are not eligible to participate. The real top big man in the Wu universe kingdom."

There are more than 13,000 star regions in the cosmic kingdom of Witch.

"If you can receive an invitation this time, at least it must be at the level of the three hundred princes."

There are 32 kings and 268 lords in the Qianwu universe!

and called the Three Hundred Princes!

"The three hundred princes are extremely powerful, and they belong to the best among the tens of thousands of immortal gods, and they are almost all immortal princes." Wang Yi said. The birth of

immortal gods is inherently very difficult. The families of the three hundred princes are very old. Like Ji Qing's ancestor "Yin Xuehou" Ji Tianzang is one of the three hundred princes, and the family also has many immortal gods.

However, the Lord of Dry Witch has no immortal kings, and there are almost no king-level immortal gods in the major cosmic nations.

"Many powerful immortal gods from the entire Qian Witch universe are gathered together. I don't know what the scene is." There is a trace of yearning in Hong's eyes.

Over the years, under the strengthening of the Secret Realm of Dry Witch and the precious resources given by Wang Yi, both Hong and Thor have made great progress. Even in the Secret Realm of Dry Witch now, they are absolutely outstanding. It is estimated that they almost have the strength to enter the core layer of the giant axe battlefield. .

Wang Yi knows that both Hong and Lei Shenqiang are talents in "cultivating the mind", which leads to their inefficient perception of the law, and their initial growth is very slow.

The later stage is when they break out.

Like Hong, the original historical achievement is the "True God", Thor is also the "Master of the Universe".

And what he can do is to help them as much as possible and let them go further smoothly.

Earth also needs more powerful people, united as one, in order to truly rise to the human race and occupy a place.

"Hong, do you want to participate? If you want, I can arrange it." Wang Yi squinted at the two.

Hong and Thor looked at each other.

"Forget it, that kind of place is not suitable for us now, even if you go in ~www.mtlnovel.com~ through Wang Yi, it doesn't mean anything." Hong shook his head. "Immortal gods, in fact, we often see them in the Secret Realm of Dry Witch. By the way, Wang Yi...Thank you for the resources you gave us so that we can gain a foothold in the Secret Realm of Dry Witch and have our current achievements."

"Wang Yi is getting more and more important now. They are all at the domain master level. Moreover, some immortal gods in the Secret Realm of Dry Witch said that Wang Yi went to Chaos City and passed through the 15th floor of the Tongtian Bridge for more than 30 years. Known as the first genius in the history of the human race." Thor touched his bare head in awe. "Those immortal gods are so ancient, great and proud, but in their tone, they respect you very much, and even worship."

An immortal **** worships a universe!

No one believed it!

But it did happen.

You must know that breaking through the tenth floor of the Tongtian Bridge is already an insight into the law of immortal gods, and Wang Yi has survived the fifteenth floor after living for more than a hundred years!

Few in the human race do not know Wang Yi.

Hong is also emotional.

The gap between them and Wang Yi is indeed getting bigger and bigger, but seeing that Wang Yi is so powerful and dazzling, they are also happy from the bottom of their hearts.

Chapter 250 Latent Organization

The news that Wang Yi served as the special envoy for the supervision of the Qianwu universe nation quickly spread to the alien organizations lurking in the human domain.

Qianwu Universe Kingdom, a very ordinary life planet "Varo Planet" about tens of thousands of light-years away from Qiong Jade Star.

Varo Planet, inside an underground base.

"Through various intelligence channels, it is now completely possible to confirm that no.1 has left the original secret realm and appeared on the earth of his hometown." A bald three-eyed man in a silver uniform reported to his superiors respectfully, "Although we have already Anticipating this in advance, a hundred years ago, when the opponent left the Chaos City, he sent someone to his hometown to arrange the solar system, but because there were already strong human races there secretly, all the people we sent were lost there... Until now, our people have tried their best to infiltrate it."

"Yeah." Behind the long silver table in front of him, another bald three-eyed man in a black uniform, his eyes flashed with dim light, and he looked at the screen in front of him coldly.

There is a detailed information on the screen. It is the information about Wang Yi.

"The human race actually came up with such a terrifying peerless genius in this era, and the universe level broke through the 15th floor of the Tongtian Bridge. This, this..." The bald three-eyed man can still remember his shock when he received the news. , And the crazy command from above.

"Whatever the cost! Kill no.1!!!"

Even if the entire organization has been lurking for many years in the Qianwu universe, it would not hesitate to fill in it.

The three-eyed bald-headed man knew how much Wang Yi was valued by him, and he had even reached the point of wishing him not to die.

This peerless genius of the human race, full of infinite possibilities, must not be kept for him to grow up!

but.....

The first time he was sent to the hometown of the star field where the target's cosmic coordinates was obscured by the space secret method, it damaged an organization's immortal god.

This is an immortal **** that has been difficult to organize for thousands of years and has not been exposed. Its importance is comparable to that of an unexposed prince or even an immortal!

It's just a test, it's gone! ! !

The human race attaches great importance to this Wang Yi, and has already made all kinds of preparations to set up the net, just waiting for them to cast the net.

The bald three-eyed man is absolutely loyal to the organization, and he is impatient, but he also understands that it is useless to be anxious.

If you want to kill this human super genius, you must wait patiently for the opportunity and plan carefully.

Before the opponent grows up, wipe out the threat in the bud!

"This time the Dry Witch Universe Kingdom gave Wang Yi a dusty banquet and gathered many immortal gods. It is a pity that it is also a trap..." The bald three-eyed man shook his head.

No.1 is absolutely to be assassinated, but senseless actions will only sacrifice in vain, waste the power of the organization, and let other forces laugh at jokes.

The mysterious organization has done a great deal for Wang Yi this time, and even mobilized the hidden power of a large number of cosmic nations around it. The level of secrecy is so high that even the bald three-eyed man does not know the wind.

Unfortunately, they never know how fast Wang Yi is growing.

.....

There are no eternal friends or enemies in the world. Many years have passed. Looking back on these years, I am afraid that these people's actions will be very ridiculous.

Qian Wu universe country.

The three giants of the Qianwu branch held a reception banquet for the supervisory envoy sent by the headquarters of the virtual universe company, and sent invitations to all important families in the entire universe. Because of the limited scale, it is definitely Qianwu that can receive the invitation. The top figure in the universe!

After all, the Qianwu branch of the Virtual Universe Company has a very detached position in the Qianwu universe.

Because the Qianwu branch represents the virtual universe company, some management of the entire Qianwu universe! Although it was the director of the Kingdom of Dry Witch... but even the Lord of the Kingdom of Dry Witch had to obey the Virtual Universe Company.

Wang Yi, a member of the original secret realm from the core layer of the Virtual Universe Company, is also a special envoy for supervision and comes to the Qianwu branch. His status can be imagined!

How many of his banquet invitations dare not to give face?

Because the scale is really small and the level is very high, only the three hundred princes and a handful of relatively powerful immortal **** families have been invited. And more than 90% of the immortal gods were not invited!

Finally, under Wang Yi's opinion, this grand banquet that shocked the entire Dry Witch Universe Nation was held on Grote Star, an important planet in the Dry Witch Universe Nation closest to the Black Dragon Mountain Star Territory!

And on this day, all expensive spaceships were parked above the front entrance of the manor specially built by the Big Three for Wang Yi, and one of the top big figures of the Qianwu Universe Kingdom stepped down from the spaceship according to formal etiquette. Enter at the front door.

Wang Yi, a handsome black-haired boy in a gorgeous red robe, walked out of the manor to greet him with the three heads of the Dry Witch Division, Eve, Zhen Qian, and Wei Sa.

"Hahaha... Congratulations, congratulations to the special envoy Wang Yi to our witch work."

A noble and immortal **** with a powerful breath of law congratulated Wang Yi with a smile on his face.

No matter how arrogant the immortal gods were, they would not dare to be big in front of Wang Yi.

As long as the information is a little bit more informed, you can know the status and potential of this young Highness in the virtual universe company, putting on airs in front of such a genius who is likely to become the overlord of the human race in the future...Do you think you are too comfortable now?

The three enthusiastic ministers accompanied Wang Yi to get to know these guests.

"Monitoring Special Envoy, this is the Dragon Wing King, one of the three hundred princes of the Dry Witch Universe Kingdom." A girl dressed in black gauze and barefoot and full of temptation, the military minister'Hei Dan Hou' Wei Sa next to Wang Yi's voice softly Introduction.

"Dragon Wing King, hello." A guest from afar, Wang Yi nodded and smiled very politely.

The "king of the universe" is only in name. Representation of identity, unlike virtual universe companies, giant axe battlefields and other peak human powers such as "Feng Wang" and "Feng Hou", the gold content is very low, and they are all just Feng Hou-level immortal!

"Hahaha, His Royal Highness Wang Yi, when I heard the news that you had crossed the overpass, I admired you very much..." The man with a big nose, one horn, and curly hair, dressed in a gorgeous dark golden robe, had a rough appearance. The Dragon Wing King said passionately.

"It's so happy that we can have such a peerless genius as His Royal Highness in the Universe Nation~www.mtlnovel.com~."

When the three ministers saw Dragon Wing King's almost flattering performance, they glanced at each other, and they all curled their lips. "This Dragon Wing King looks like a big boss, but he is very clever." But the eldest brother didn't talk about the second elder brother, their performance was also true. It's not good to go there.

"Huh?" Dragon Wing King talked a few words and went in, and Wang Yi's eyes lit up and he saw a familiar figure in the immortal spirit team.

"Master Guren!"

still wore a red dress, and the snow-white forehead was marked with exquisite and noble red petals. The beautiful woman like a blazing red lotus brought two young women closer, and her cold face showed a smile after seeing Wang Yi.

To be honest, Honglianhong was also very shocked when he learned of the performance of this genius who had been teaching for several years in Chaos City.

Wang Yi is also grateful for Honglianhong's careful teaching in the first few years.

The other immortal gods who were watching behind saw this scene, and their hearts were filled with sourness.

It would be great if I had been taught this Wang Yi errand...

Damn it!
