

A God 271

[Chapter 271: Sign-in panel evolution](#)

...

Thunder Island is the gathering place for all the immortal gods of the Virtual Universe Company.

this day.

In the virtual universe, the Thunder Island became lively, and the management members of the entire company soon learned a piece of news-Wang Yi broke through to the owner of the world.

The original secret realm masters rose from the previous 100 to 101, and the extra... is Wang Yi!

"Wang Yi broke through to the world master?"

In the primitive mystery, Luo Feng, who had just returned from the abyss of purgatory, was stunned.

He is Cosmos Grade... Has Wang Yi been to the Realm Master?

Do you want to be so sudden?

"what!?"

"Wang Yi, he broke through to the domain master less than ten years ago, right?"

"This is crazy too?"

Many people are shocked by this.

It is normal for a cosmic genius to stay in the secret realm for thousands of years.

Domain master-level geniuses generally stay for tens of thousands of years.

It is not strange that the world master-level genius will stay for hundreds of thousands of years.

And how long did Wang Yi practice?

From the genius battle of the virtual universe company to joining the virtual universe company, chaos city training, training missions, external release... it only took more than two hundred years to add up, Wang Yi actually broke through to the world master without a word?

too suddenly!

On this day, Wang Yi once again became a man of the virtual universe company. I don't know how many people are talking about his amazing actions and madness.

At the highest point of the virtual universe Thunder Island, there is a temple in the chaotic air flow. There are no servants in the temple, and it is empty, surrounded by endless chaotic air currents.

Venerable Pang Bo suddenly appeared, marching in the temple.

"Teacher." Venerable Pang Bo saluted respectfully, and a fuzzy figure slowly walked out of the chaotic airflow deep in the temple. He was wearing a golden robe, but there were patches of blue scales on his head, but his face resembled an earthly person, his expression was easy-going, except that he was wearing a golden robe. Those eyes were as plain as the endless ocean, and as far away as the starry sky.

He is one of the most ancient existences of the human race, the person in charge of the virtual universe company, and the Chaos City Lord who has made hundreds of millions of ethnic powers fearful before the ancient years!

"Pang Bo, your disciple Wang Yi just broke through to the realm master, do you know?" Chaos City Lord asked.

A wry smile appeared on Venerable Pangbo's majestic and rugged bear face: "Teacher, I also just learned about it."

"Oh?" Chaos City Lord looked over.

Venerable Pang Bo continued: "Teacher, although this disciple of mine is young, he is very assertive. In addition, he is one of the best geniuses in the history of our human race, so sometimes it is not strange to do something unique."

"Never mind." City Lord Chaos waved his hand. "Wang Yi will leave it to you. He has now broken through to the realm master. He will soon go to the outer battlefield or the secret realm of the universe to train. In such places, our human sages may not enter, and to train the king. Yi, we can't always send people to protect him. The flowers in the greenhouse cannot survive wind and rain."

"The disciple knows. The disciple will definitely teach him well."

"Yeah." Chaos City Lord turned and walked into the chaotic air flow, his voice misty.

"Before he goes to the world master experience, let him come to Chaos City Lord's Mansion to see me once."

"Yes."

Venerable Pang Bo respectfully sent the Lord Chaos City away.

...

And when the outside world was hustling, Wang Yi was also troubled.

Because after he broke through to the master level, the sign-in panel suddenly updated.

The good boy who used to be on call now seems to be rebellious, awkward, and no longer obedient.

【Update, please wait...】

Every time Wang Yi called the sign-in panel, such a reminder appeared in his mind.

Wang Yi couldn't help worrying. Could it be that he had too much wool and let the sign-in panel go on strike?

"Huh?" Wang Yi suddenly received an email from the Virtual Universe.

He opened it and looked surprised.

"The teacher wants to see me?"

It is probably because of his breakthrough to the world master. Wang Yi said inwardly.

Wang Yi's extremely sudden breakthrough has indeed caused an uproar in the Virtual Universe Company.

For this matter, many familiar people came over and asked why he broke through so quickly.

No one doubts Wang Yi's talent, but is it too impatient?

Based on Wang Yi's current conditions, it can actually settle for a few more years, and it is also possible to wait a few hundred years before breaking through to the world master.

And now, Wang Yi has only been at the domain master level for less than ten years, which has surprised many people.

Wang Yi went to the virtual universe Yuxiangshan to meet with the teacher and accept the teacher's teachings.

Wang Yi lowered his head, obediently.

Venerable Pang Bo shook his head helplessly, just wondering if this little apprentice could listen to him with good intentions.

"You have broken through to the master level. According to the traditional rules of our Virtual Universe Company and the other four pinnacle forces, you will soon have the master experience. This master experience is also the most dangerous experience. There are some The place is immortal, and the venerable is in danger. You must not neglect it."

Venerable Pang Bo still couldn't help but exhorted once.

He also felt a bit uncomfortable. This apprentice had only been under his sect for two hundred years, and he was about to leave his shelter to go outside the dangerous human race territory, to trespass, to take risks, to fight... There is a way to go, but he still has some unspeakable taste.

In his opinion, this disciple is still too immature and too young. Although talented, the universe-level passed through the 15th floor of the Tongtianqiao. He is the most dazzling genius in human history. He is also honored as a teacher. Like parents worried about their young children going out alone for the first time

Like life, it is natural for Venerable Pangbo to have such a mentality.

"Disciple, you must remember that Kedi's enchanting genius was finally lost. You must be careful and not take risks easily." Venerable Pang Bo sighed.

"Yes, teacher." Wang Yi said with a solemn expression on his face.

"So, have you thought about where to go?" Venerable Pang Bo asked concerned.

"I'm thinking about it. I'm going to an extraterritorial battlefield." Wang Yi said without hesitation.

"Outside the battlefield..." Venerable Pang Bo frowned, but he didn't say much.

"Well, I hope the teacher can see you on the day when you come back safely from the battlefield outside the territory." Venerable Pang Bo said, and then said: "By the way, your current secret method shouldn't be created yet, right?"

"Yes, teacher."

Venerable Pang Bo groaned, "Well... the master class needs to create a secret method, and the master class has the fastest perception, so you need first-class secret law books to assist in your research."

"However, what you are cultivating is the cosmic chaos stele, both time and space...so the ordinary secret method does not have much effect on you, and it is not necessary." Venerable Pang Bo looked at Wang Yi. "Apprentice, you should be able to cross the 18th floor of the Tongtianqiao now. Then, go ahead and get the last volume of "The Evolution of the Universe". "The Evolution of the Universe" is the painstaking effort of your ancestors, and it is also the best of the human race. One of the top secret methods, it is also the most suitable research method for you. You can use it to research and understand the secret method, which can achieve a multiplier effect with half the effort."

"The last volume of "The Evolution of the Universe"..." Wang Yi also thought of this incident.

"Yes..."The last volume of "Universal Evolution" ~www.mtlnovel.com~ contains all kinds of secrets that are truly the pinnacle, and it is also the most precious wealth that the teacher gave to his disciples. Unfortunately, for hundreds of millions of years, your master's family has been in the same vein. There are very few who can fully understand "The Evolution of the Universe", even if you teach me, I am still a little bit behind, stuck in the last step of endless years." Venerable Pang Bo said with emotion.

Venerable Pangbo is already the most powerful existence among the Venerables, at the level that is infinitely close to the Lord of the universe, and his strength is terrifying.

But for some reason he has been stuck at this step for a long, long time.

It is indeed very, very difficult for time and space to reach the extreme at the same time and become the master of the universe.

But even so, the Venerable Pang Bo who practiced "Universal Chaos Stele" was definitely standing on the strongest ladder of the human race, and the ordinary Venerable had almost no power to fight back in front of him.

"I understand." Wang Yi nodded.

[Chapter 272: Cross the flyover again](#)

Venerable Pang Bo was very confident that his disciple had crossed the 18th floor of the Tongtian Bridge, because Wang Yi asked him from time to time, so he still had a general understanding of his disciple's level of perception.

Even so, he was still shocked from time to time.

Especially when Wang Yi was recognized by the law of the origin of space, Venerable Pang Bo felt that he knew this apprentice for the first time when the space mark appeared on his forehead.

It's just that he concealed his inner shock well.

"Recognized by the law of space origin in just over two hundred years?"

"Our human race has never seen such a terrifying monster genius, right?"

Venerable Pang Bo shook.

Only on the surface, Venerable Pang Bo just asked lightly.

"My apprentice is getting more and more against the sky." Venerable Pang Bo muttered in his heart.

Wang Yi was reminded by his teacher and began to prepare for future cultivation.

At the beginning, every cultivator is learning the secrets of his predecessors, constantly improving himself, and improving the perception and knowledge of the laws. When the perception of the laws is high enough, the accumulation is almost the same, and to a certain extent, he can create a secret method suitable for himself.

Wang Yi must create a secret method that suits him best. This is a path that any strong man has to take, and generally he will begin to create a secret method during the peak period of the realm master. When creating the secret method, you can already start collecting materials to make weapons for yourself.

The secret method is mainly divided into research category and combat category.

The so-called research is to achieve the effect of improving the perception of the law through these secret methods and auxiliary items. The higher the perception of the law... the stronger the strength naturally.

In fact, the law perception is a bit similar to "internal strength", and the combat secret method is a method of use, and the same law perception.

Different methods of use may have very different combat effectiveness.

For example, if you say that the perception is internal strength, then the secret of combat is swordsmanship, swordsmanship and other skills.

Just like "The Evolution of the Universe" and "The Illustrated Book of Galaxy Swords", they are all considered to be research secret methods.

The cosmic magic weapon is considered a secret method of combat.

The very heavenly "Magic Sound Secret Method" and "Purgatory Secret Method" are also auxiliary secret methods to strengthen the body's strength.

Wang Yi walked on the streets of Yuxiangshan public area, thinking about his future cultivation methods.

"My earthly deity and Void Zerg clones are both cultivating "Universe Chaos Stele", but the earthly deity is more inclined to the time series, and the Void Zerg clones are more inclined to the space series...

What the earthly deity is good at is actually a weapon of mental power. , And the Void Zerg clone is good at melee swordsmanship."

"As for the avatar of the Yanxing Giant Beast, I am currently comprehending the sculpture of the Beast God and understanding the mood of the Beast God. Although there is no secret method similar to the "Seven Kills of the Beast God", it can also be combined with the secret method of the Yanxing Giant Beast clan to create a suitable flame. The secret method of battle of the star behemoth itself!"

"Fundamentally, it is still the way of fusion of the original laws of fire and space, that is, the way of the beast god!"

"Let's do it, according to the teacher's words, go to cross the sky bridge and get the last volume of "The Evolution of the Universe"! Go to Chaos City to learn the secret of creating your own!" Wang Yi's eyes lit up.

The reason why I went to Chaos City is because Chaos City is located in the original universe, and the law is obvious. Although the flow of time is much slower than the outside world, the efficiency of enlightenment is faster.

Second, because there are still many places in Chaos City that have not yet been checked in, Wang Yi has always been obsessed with the highest reward of the original universe.

Finally, the teacher Pang Bo Venerable had mentioned that before the Chaos City Lord asked him to go for the experience, the Chaos City Lord's Mansion went to see him.

Wang Yi remembered that there was a clone of the Chaos City Lord, who had been sitting in the depths of time and space on the other side of the Chaos City Lord's Mansion for a long time.

Wang Yi is also looking forward to signing in at the time and space of City Lord Chaos.

"I have "Cosmic Chaos Monument" anytime and anywhere, and "Universe Evolution", a precious cheat that is worth trillions of points, and the flow of time in the world of time tens of thousands of times. The three bodies practice together..."

"One year in Chaos City is equivalent to 10,000 years of cultivation in the time world!" Wang Yi howled in his heart.

"I don't believe it anymore. Before going to the extraterritorial battlefield, I can't create a unique school that suits me!"

Ordinary jerk, top jerk...Wang Yi is indifferent. What he wants to create must be at least the peak jerk...even the ultimate jerk.

Perhaps the difficulty will be unimaginable, but Wang Yi is still ambitious.

...

On the plane of Tongtianqiao, the beautiful central island, the guardian Baffin has been waiting here for billions of years.

"call."

A sudden figure appeared.

A fire-red robe, long black hair, a handsome face, and a noble and beautiful pattern of flames and dots of stars on the forehead and brows.

If you carefully observe his eyes, you can feel the terrifying spiritual power contained in the young man's heart.

"Huh?" Ba Fen looked over, his eyes lit up, haha smiled and greeted him.

"Haha...Wang Yi, I heard that you broke through to the realm master, so fast, it seems that you have made a lot of progress over the years... This time, are you here to cross the sky bridge?"

Over the years, Buran has passed through the 7th floor of the Tongtian Bridge, Luo Feng has passed the 8th floor of the Tongtian Bridge, and like Rong Jun is on the 6th floor, and the others are below the 5th floor...

The more difficult it is, the longer the interval between comings and goings.

After leaving Chaos City for more than a hundred years, this is also the first time that Wang Yi has come to cross a sky bridge.

"Master Guardian." Wang Yi smiled and saluted, "It's been a long time since I saw you, this time I'm here to cross the overpass."

"Well...someone just happens to be rushing through the Universe Bridge, you will wait a while, and soon it will be your turn." Bafen said.

I muttered in my heart: "Wang Yi, a monster, has come to cross the sky bridge again. This news has to be told to all the bigwigs."

Because Wang Yi is the most dazzling genius of this era, even going straight back to the trillion era, I am afraid that he is the one with the most enchanting talent... Therefore, the virtual universe company, including the entire human race, countless high-level executives are paying attention to Wang Yi.

But because of the orders of Chaos City Lord, there is generally nothing to do, and they will not disturb Wang Yi.

What I fear is to interfere with Wang Yi's practice.

Even if it was protection, he had never been in contact with him. They were all secret protection. Now Wang Yi doesn't even know who the venerable is to protect him.

Sometimes he felt that his performance was so against the sky, but the virtual universe company and the human race maintained a relatively calm attitude towards him. Is it too calm?

Wang Yi and Bafen stood chatting on the island square, and Bafen's emails have been sent to a large number of senior executives of the Virtual Universe Company, and almost all the senior executives have received the message.

"Huh? Did that little guy Wang Yi cross the flyover again?"

"He just broke through to the world master, he went to cross the sky bridge..."

"I don't know how many floors he can get through this time?"

"A hundred years ago, he only broke through the 15th floor~www.mtlnovel.com~ No matter how much he progresses in this century, he will only reach the 16th floor at most. It can't be too high, right?" Not confident.

If it were the peerless geniuses of other world masters in the Primal Secret Realm, no matter how advanced they were, it would not be possible to raise the perception of the law from the 15th floor to the 16th floor in just one hundred years.

Because 13-15 is a threshold, 16-18 is another big checkpoint.

But like Wang Yi, an enchanting monster like Wang Yi is unprecedented and cannot be theorized, even the venerable can hardly evaluate it with his own experience.

Countless high-levels, the ancient existence were all shocked at this moment.

"Haha, let's go and take a look at the peerless genius of our human race. How many floors can he get through? It will never be the 20th floor, right?" A venerable joked. "I don't believe it anymore. If he can get past the 20th floor this time, I will swallow this golden horn boundary stone on the spot."

[Chapter 273: There are always people who do not believe in evil](#)

The news that Wang Yi went to cross the sky bridge spread at the same speed as the wind in the virtual universe company and the high-level human race. And because Wang Yi's level of secrecy is extremely high now, only the high-level seniors above the venerable level receive the news. Still the same.

Immortal spirits may also be controlled and controlled by foreign races, but it is almost impossible for the venerable unless they have different intentions.

In fact, under the circumstances that can reverse the resurrection of time and space and the strength of the human race, the higher the level, the less likely it is to betray human beings.

Unless Yan Di directly rebels on his own!

The current human race is still very united within, even if there is a struggle, it has not reached the point of betraying the race.

It didn't take long when Wang Yi entered the Universe Tongtian Bridge--

Brush and brush——

A stalwart figure appeared on the central island of the Tongtianqiao plane, and at the same time a terrifying aura that made time and space tremble filled.

In just ten seconds, hundreds of sages appeared here, and there were sacreds who kept coming over.

"call!"

Another figure appeared, and the others couldn't help laughing when they saw it.

"Hi, Jiu Jian, you are here too."

"Jiu Jian is really a busy man. He has rarely been seen in Thunder Island recently."

A man wearing a cyan shirt and purple scales on his head walked over and greeted those familiar venerations with a smile.

The venerables, who are usually hard to see even immortal gods, are gathering here like Chinese cabbage at this moment.

In addition to the Virtual Universe Company, there are also the Great Axe Fighting Field, the Galaxy Bank of the Universe, the First Bank of the Universe, and the Universe Mercenary Alliance..... all the venerables have appeared.

In front of them there was a huge screen on which was Wang Yi who was flying to the 16th floor of Tongtian Bridge.

That is to attract them here.

"Wang Yi..."

"What an amazing little guy."

"I heard that he has already broken through to the world master."

"The geniuses in the same class as him are still at the universe level. There is not even a domain master. He alone is at the domain master level."

"You said, how many floors can he pass this time?"

The Venerables who were difficult to meet in the past gathered together, and they all had a lot of fun.

...

Wang Yi sprinted all the way, rushed out of the starry sky, and came to the depths of the last star.

There, there is a dark star, which is also a neutron star.

It is a planet with an area of about three hundred square kilometers.

A neutron star is the densest stellar body except black holes. It is a kind of stellar body between a white dwarf star and a black hole. Its density is quite many times greater than that of any matter on the earth.

Here, each cubic centimeter weighs more than 100 million tons, and the gravity is incredible.

However, the realm master level powerhouse can still resist and endure.

"boom!"

Wang Yi's figure fell heavily on the incomparably hard ground at a terrifying speed, but no cracks were formed.

The entire neutron star is like a huge "nucleus" connected into one.

"The controller on the fifteenth floor of the Universe Tongtian Bridge uses the seventh cosmic magic weapon. I don't know if the sixteenth floor is the same."

Wang Yi stood at the neutron star at the end of Tongtianqiao and chose the master as his opponent.

This time the opponent is the "Silver Grey Armored Man".

"Boom!" The two sides simultaneously used the cosmic magic weapon, and instantly fought against each other!

"Snapped!"

The cosmic crystal shuttle quickly passed the cosmic magic weapon of the silver-gray war armor, and then slightly shook, as fast as lightning, time and space were distorted, as if there were countless overlapping crystal long shuttle phantoms, covering the silver-gray war armor.

There is no escape!

"Puff!"

The streamer instantly penetrated the body of the silver-gray armored man, tearing the silver-gray armored man apart.

The powerful force shattered the natal pearl in his body into powder.

Wang Yi, one move, win!

The plane of Tongtianqiao.

"You win with one move!"

Many venerables were taken aback.

...

Seventeenth floor.

Wang Yi chose a warrior, and he also chose a battle sword. In close combat, a knife tore the silver-gray warrior and the neutron star together.

...

The eighteenth floor.

Wang Yi chose the illusionist. This time it ended faster than the previous two. The terrible illusion didn't seem to affect Wang Yi at all. The illusion had the effect of chaotic time and space, but it could not affect Wang Yi's will!

The battle is over with a flyby of the cosmic warrior.

...

The hundreds of venerables on the central island of the Tongtianqiao plane, as well as the guardian Bafen, are extremely quiet at this moment, and everyone is concentrated, watching Wang Yi go through three levels in succession on the screen.

The sixteenth, seventeenth, and eighteenth floors are all easy to get through!

And the performance in the battle was flawless, shocking those venerables.

For those who are in control of the spiritual master, Wang Yi directly uses the cosmic magic weapon to kill!

For melee warriors, Wang Yi also slashed them with a sword!

For the illusionist, it is as if there is nothing, and it is also a fatal blow!

Wang Yi is like a monster with no shortcomings, running rampant on the Tongtian Bridge!

...

"Boom~~"

An extremely powerful attraction came, and even the light could not escape. At the end of the star's core, there was a distorted space with endless darkness.

Black hole!

Wang Yi stepped on the Mind Force weapon, squinted, his figure accelerated, and he was instantly sucked in.

If it were in reality, Wang Yi would not dare to approach the black hole at all, even in the nearby areas, the real black hole celestial bodies in the universe could be shredded to pieces by the immortal gods, and the core of some terrifying black holes would not even be approached by the Venerable.

Incomparable darkness, this is a deadly space, and only Wang Yi is floating alone, but Wang Yi can clearly "see" everything around it.

This is only the outermost periphery of the black hole space, not the core area.

"Choose your opponent, warrior, master, illusionist, choose one, defeat him to pass the nineteenth floor." A cold voice came from the darkness.

"I choose... the master!" Wang Yi said calmly.

He was very curious about what weapon and how powerful the controller on the nineteenth floor of the Tongtian Bridge would use.

Ripples appeared in the dark space, and suddenly a large number of black dots floated out and then condensed into a figure. Wearing a black battle suit, wearing a black mask, and stepping on a flying mind weapon, the controller with a silver-gray crystal shuttle suspended behind it came out of nothingness. Emerged.

Still a cosmic warrior!

"It's really rare. It's been a long, long time since I met a realm master to challenge this level."

"His Royal Highness, defeat me and you can pass the nineteenth floor of the Tongtian Bridge." The black-clothed controller stared at Wang Yi with dark eyes, and his voice became cold.

"Good." Wang Yi smiled.

"boom!!!"

The world projection erupted on the two people at the same time, and the flame world enveloped an area of thousands of kilometers.

Wang Yi is at the master level, so naturally his opponent is also at the master level.

The test of Tongtianqiao is the perception of the law, so both the passer and the controller maintain the same physical fitness.

The real test is law perception, secret law, will, experience, skills... etc.

Wang Yi and the black-clothed controller are more than 10,000 kilometers apart, and they are suspended in the black hole void. There is a ray of light behind them, and there are flying weapons under their feet.

boom.

In the virtual universe, the two world projections confront each other, and are on par.

"Wow~~"

The silver-gray crystal shuttle behind Wang Yi blasted out thousands of rays of light at the same time, and countless diamonds floated for a time. The silver and gray ruled threads connected in series to the origin of the universe, the law of space and the law of time. The power of the world combined with the power of the law, instantly condensed. Become a world-time and space world!

And the core of the time and space world is the "God Killing Shuttle" condensed into a perfect form.

The final form of the cosmic magic weapon-the killing of the gods.

The black-clothed controller on the opposite side also manipulated the cosmic magic weapon to form a "killing shuttle."

Killing the Shun Shuo, perhaps the 15th floor of the Tongtian Bridge can be driven by the comprehension of the law.

But the same is urging, and the power is also different.

Just as many people only get the cosmic magic weapon, they also know some of the most basic manipulation methods, and how each layer can exert the strongest power depends entirely on their own perception. But from Teacher Wang Yi... the seven universe magic weapons, each of which has a variety of corresponding secret techniques. These secret arts were created by Venerable Pangbo based on the "Universe Chaos Stele" during the long years, and they are extremely suitable for the universe magic weapons. Cast.

Initially proficient in the use of the universe magic weapon, which is almost the fifteenth layer of the Tongtian Bridge combat power.

And like Wang Yi, there is only one who has been personally and carefully guided by the creator of the cosmic magic weapon, is very suitable for his cultivation method, and has many talents to assist... and there is only one.

Two **** soldiers shuttled through space at the same time, distorted time, and collided in the black hole void.

At a distance of 10,000 kilometers, even less than a hundredth of a second, they have collided together.

"Peng!"

The black hole is empty and the space is extremely stable. Therefore, even if the strength of both parties reach the level of the master, there are amazing laws and perceptions that can control the cosmic magic weapon to burst out terrible strength. If the outside world can easily tear the space and penetrate the planet with this power, But here, it can only cause violent vibrations.

"What!?" The black-clothed controller felt a powerful and mighty force uploading from the cosmic warrior. The next moment, he was shocked to find that the time and space power condensed around his cosmic warrior had shattered like a bubble, and the opponent's cosmic **** The soldiers smashed down suddenly, smashed thousands of times in an instant...

"Peng!!!"

Under the power far beyond his level, the cosmic magic weapon of the black-clothed controller could not even maintain its original form, and instantly collapsed, turning into tens of thousands of light spots and disappearing into the depths of darkness.

"Puff!"

Wang Yi's cosmic magic weapon broke through the space, and an acceleration has penetrated the throat of the black-clothed controller.

Under this kind of peak duel, unless you master an extremely astonishing body technique, you can't get rid of the attack of the cosmic magic weapon at all.

Wang Yi, win!

...

On the plane of Tongtianqiao, the central island, the Venerables have gathered nearly a thousand people.

Seeing this scene, everyone was silent.

Many venerables looked at each other~www.mtlnovel.com~ A venerable muttered: "He has passed through the nineteenth floor so quickly, then on the twentieth floor, can he also rush through."

As he said, he looked at a Venerable friend next to him.

When that venerable came just now, he also joked with his friends.

It was said that if Wang Yi could pass the 20th floor of the Tongtian Bridge this time, he would swallow the golden horn boundary stone on the spot.

The venerable person noticed that the other venerable gazes had deep meaning, and the corners of his eyes twitched slightly.

I just said casually, do you still want to come, don't you?

Can you be friends and have fun together?

Gan!

[Chapter 274: Twentieth floor](#)

The plane of Tongtianqiao, in the endless darkness.

A meandering bridge deck continues to extend into the depths of darkness. Wang Yi, dressed in a dark red shirt and deserted eyebrows, is flying continuously against the bridge deck above the bridge. He has just passed the 19th floor and is now flying to the 20th floor. Layers pass the end of the sky bridge.

Wang Yi's real law perception is actually between the 18th and 19th floors of the Tongtian Bridge.

"Just now I killed the 19th-level master, I used the "Magic Sound Secret Method", and the amplitude was more than ten times the power in an instant, and then I suddenly killed him."

Wang Yi knows very well that the 19th-level master's law perception surpasses him.

But Wang Yi also has his own advantages.

The first is the "Secret of Magic Sound" and "Secret of Purgatory" two large amplitude secret methods.

The second is the powerful consciousness of the Void Zerg clone and the will that exceeds a lot of immortality.

The third is the mystery of the universe magic weapon taught by Venerable Pangbo... Don't underestimate this point. Venerable Pangbo is one of the oldest Venerables. It is only a short distance from the true Lord of the universe. The true combat power is not necessarily weaker than the average. Lord of the universe.

His secret technique is definitely of the pinnacle level. Looking at the human race, they are all first-class. As long as Wang Yi masters some, he can greatly improve his strength.

Even if the Lord of Chaos City is stronger than Venerable Pangbo, his realm is also higher than Venerable Pangbo, but teaching Wang Yi is not necessarily better than Venerable Pangbo... Moreover, Venerable Pangbo can often guide Wang Yi when he sits in the abyss of purgatory. As the first virtual universe company The Chaos City Lord of a person in power couldn't do it.

The combination of the three advantages made Wang Yi easily pass the 19th floor with the 18th floor rule.

As for the power of the beast god, the Secret of the Nine Tribulations... etc., it can't be used in the virtual universe.

"I can use "The Secret Method of Magic Sound" and "The Secret Method of Purgatory", but the avatar consciousness and the achievement are forbidden..." Wang Yi thought to himself.

"Magic Sound Secret Method" and so on are still the application of their own law perception, but the consciousness of clone is suspected of cheating.

Wang Yi believes that as long as he keeps practicing, it is only natural to pass the 21st floor, and he does not need to rely on cheating to pass.

And if he really crossed the 21st floor... and he didn't have a sense of the laws of the venerable level, the joke would be big.

Endless darkness, silence...The bridge continued to extend to the depths of darkness, Wang Yi's heart was like an ice-bound volcano, although he was extremely calm, but under the ice was the boiling magma!

The flame star behemoth's desire for destruction was just around the corner under his fighting intent.

It seems to want to break through the shackles and destroy everything.

"Huh!" Wang Yi's figure stopped abruptly and looked up at the space.

At the end of the 19th floor, there is still darkness.

But the surrounding space has been distorted, and there have been a lot of cracks distorted to collapse, like the waves that keep rolling.

Of course, this is only the background, so the gravity of the real black hole cannot be felt, and the "sight" will not be deprived of the black hole.

"Choose your opponent martial artist, controller, illusionist, choose one, defeat it and you can pass through the 20th floor and go to the next floor." A deep voice came from the darkness.

"I choose... the controller." Wang Yi did not hesitate.

The space vibrated in the darkness, and a large number of black dots floated out and then condensed into a figure, a human being with a black armor and a black mask. Behind the human being is a cosmic magic soldier with incomparably beautiful stars.

The cosmic magic weapon is indeed the most beautiful and noble one among the nine masters of the master!

The other masters of the nine magic weapons, of which eight magic weapons, are one of the eight fundamental laws of gold, wood, water, fire, earth, wind, thunder, and light combined with the two laws of "time" or "space". One kind, manufactured.

The last of the nine magic weapons of the universe is a magic weapon created by fusing the two most profound original laws of "time" and "space".

And its use limit is very high!

Like other magical soldiers, the final form can be fully used up to the fifteenth floor, and it has reached its limit.

If you use it again, you will only restrain yourself.

However, the cosmic magic weapon, the fifteenth layer, just happened to be able to use the seventh final form.

The sixteenth to eighteenth floors are still at ease.

Wang Yi wondered whether the universe magical soldiers experienced anything when they were created by the teacher...

The two most profound laws of time and space origin law merge...

Wang Yi thought to himself.

At this time, the gatekeeper on the opposite side began to speak and said slowly: "His Royal Highness Wang Yi. Welcome to the 20th floor. This floor is guarded by me. If you want to pass the 20th floor, you must defeat me. "

Wang Yi woke up from thinking, looked at the elegant gatekeeper opposite, smiled and said, "I will."

"Let me remind Your Majesty. Actually, when I reach my level, Your Highness should find that gatekeepers of us are good at applying the laws of a certain side of time or space." The gatekeeper seemed to be in a good mood and said a few more words. "And the more you get to the back, the more rules you can master."

"Such as the flow of time, distortion, and annihilation!"

"For example, the teleportation of space, blockade, and strangulation!"

Wang Yi also nodded.

He also understands that the law of space and the law of time are divided into many aspects, such as the teleportation of the law of space, which belongs to one of the extremes.

The stillness of the law of time is the ultimate in another aspect.

Start with the "acceleration" and "deceleration" in terms of time... It is relatively easy to get started, but it is very difficult to reach the extreme.

Another example is "annihilation". In fact, time annihilation is a characteristic that seems to eliminate the opponent from the source, but instead of traveling back to the previous era to eliminate the opponent's traces, it is the time force that directly "annihilates" the opponent's physical matter, similar to "The purification of "light", the destruction of "thunder and lightning", and the erosion of "wind" are just a lot more advanced and terrifying.

Just like the space strangulation, it is an ability to perceive the law to the extreme.

The law of time is much simpler but more profound, and even the Master of Time is rarer than the Master of Space.

This can be seen from the source law of the Eighth Great School.

On the space side, gold, wood, water, fire, and earth account for five things.

On the time side, light, wind, and thunder account for only three things.

As a result, there are much less time-sages than space-sages.

Although the law of space and the law of time are juxtaposed at the same time, the law of time is recognized as the most bizarre and complicated law.

"Next, I will let His Royal Highness see the power of the law of time and the ultimate use of all aspects of the law of space. Although it is not a complete law of space or time, I hope that it can be inspiring for His Highness." The gatekeeper smiled. The cosmic soldiers behind are radiant.

"Come on." Wang Yi smiled slightly.

boom! boom! Thousands of silver-gray light burst out from behind Wang Yi and the black armored man at the same time, and the 20162 Lingguang quickly turned into a three-meter-long crystal shuttle with brilliant and mysterious patterns on the surface.

Under the control of the power of the world and the perception of the laws of the two, the power of the cosmic magic weapon was urged to the extreme in an instant.

With them as the center, an extremely stable and huge space-time force field is faintly formed around it.

The higher the enlightenment of whose law, the stronger the application, the greater the power of the universe's magic weapon that can be exerted.

"kill!!!"

The gatekeeper screamed.

"Boom~~"

The entire black hole space is shaking.

Wang Yi was shocked to discover that with the opponent's cosmic warrior as a spear, the power of the space condensed in front of him surged like ocean waves one after another.

Special use of space secrets, space tides!

And the closer the cosmic warrior gets closer, the faster the speed, like a misty color, entraining the power of the entire space, outrageously colliding with Wang Yi's time and space world!

During this process, Wang Yimeng discovered that his own space-time world was constantly eroded and changed by the opponent's time flow rate, just like a well-functioning machine, with individual parts being dismantled.

The time and space world around Wang Yi began to shake and become chaotic.

At the same time, a strong pressure was suppressed, and the space was instantly sealed off, making Wang Yi inevitable.

Even Wang Yi had the illusion that the flow of time around him was slowing down.

Wang Yi gritted his teeth. "Is this the ultimate application of the two fundamental laws of time and space?"

It was really scary.

His eyes shined brightly.

"But I still won't lose!"

When his cosmic magic weapon was about to be defeated by the opponent, Wang Yi exploded fiercely.

Magic sound secret method, 88 times the amplitude of soul consciousness!

"His Royal Highness, you lost... what?" Just as the gatekeeper was about to announce the result, he was suddenly taken aback.

Wang Yi, who was already crumbling and about to lose, suddenly exploded with astonishing power. Under the blessing of strong will and soul power, the cosmic warrior who had been pressed to collapse instantly stabilized, and burst out like a spring pressed to its limit. An amazing counterattack!

"Peng!"

The two cosmic soldiers collided instantly, and the center of the collision lit up with a dazzling light.

The next moment, the guardian's cosmic magic weapon flew out, and was knocked off hundreds of thousands of kilometers away by a powerful force.

"How is it possible!" The gatekeeper was a little unbelievable. "Your law perception is far inferior to mine, how could this kind of power burst out...this is a secret law?" The gatekeeper reacted.

"Die!" Wang Yi's eyes were cold and enthusiastic, and he controlled the cosmic soldiers to rush towards the gatekeeper.

The face of the gatekeeper changed drastically, and he wanted to control the mind-power weapon under his feet to stop it, and at the same time, to pull back the cosmic magic weapon that had been knocked out, but the distance was too big...

With this level of fighting, the winner will be decided in an instant!

"Puff!"

The guardian's whole person, including the life orb, was shattered by the huge force entrained by the universe gods, and the dead could not die again.

The 20th floor! Wang Yi rushed past!

...

The plane of Tongtianqiao.

"Suck..." I don't know how many sages took a breath at the same time.

Although they had a premonition, they couldn't believe it when Wang Yi made it through the 20th floor.

After more than two hundred years of cultivation, he passed the 20th floor of the Tongtianqiao?

Or is it the most difficult cosmic chaos monument?

What is this concept?

What kind of monster is this?

Many venerables have fallen into doubt in their lives.

This little guy Wang Yi challenged the limits of their thinking time and time again, breaking their past understanding of "genius", "monster", and "monster".

"This is the real monster..." a venerable muttered ~www.mtnovel.com~ but said the voice of everyone present.

That's right!

In their eyes, Wang Yi was already an unimaginable monster.

Wang Yi's heart-shaking changes once again occurred in their hearts.

No one has any doubt about Wang Yi's future.

The fifteenth floor and the twentieth floor are two different concepts, and they are very clear about what they represent.

At this point, Wang Yi was at least able to withstand the rules of a strong king.

Comparing Wang Yi's age and cultivation progress, how terrible is this?

"Maybe, we humans will soon have a true peak existence..."

[Chapter 275: Master-level primitive Tongtian Mountain](#)

The 21st floor of Tongtianqiao.

At the end, there is a sphere with a diameter of more than two meters. The space around the ball is completely distorted and shattered, and a large amount of space debris surrounds it.

There is an environment for every three floors of the bridge. The 19th to 21st floors are all black hole environments. Wang Yi used to fly around the black hole, but now he finally sees the so-called black hole.

Wang Yi's choice this time is still the "controller"!

The controller is actually the direction of his future human body cultivation.

Void Zerg clone, good at close combat!

The behemoth of Yanxing has a huge body, many secrets of talent, strong defense, and a terrible "blow" talent secret!

The flame star behemoth at the pinnacle of the world master can kill ordinary immortal gods by relying on the secret method of talent, and can also "escape the golden cicada" and escape for hundreds of thousands of miles.

The other two secrets of Yanxing Behemoth, "Absorption" and "Body of Yanxing"...One can absorb external damage, and the other can strengthen defenses and become larger!

The Yanxing Giant Beast is immortal, and basically has the strength of Fenghou Immortal, and the more powerful ones can reach the peak level of Fenghou!

Even if the Flame Star Giant Beast of Fenghou pinnacle level, relying on that huge divine body, talented secrets, and other secrets, it is not afraid of being immortal!

The immortal-level Yanxing behemoth exploded, and the huge divine body coupled with the "innate secret method" catalyzed it, and even the immortal king could be blown to death!

This is also the last means of life-saving of the Yanxing Giant Beast, and it is also used desperately, and it cannot be used as a conventional method.

Of course it was an ordinary Yanxing behemoth, and Wang Yi didn't have that many restrictions.

As long as he is willing to consume it, it is quite equivalent to one more mobile bomb of the "flaming star behemoth card".

...

"Huh..." A large number of black spots suddenly floated over the black hole celestial body and then condensed into a figure. He was wearing a black armor and a black mask. There was still a cosmic magic weapon suspended behind him, which was almost the same as the two guards in front. As soon as he appeared, he looked at Wang Yi.

"His Royal Highness Wang Yi, it is my honour to be able to meet a leader-level challenger." The gatekeeper was polite. "But I will not be merciful. Your Royal Highness Wang Yi, please be prepared mentally. I will let your Highness know that you will not be able to pass my level without understanding the entire law of space or time."

"Okay! Then I'll try it!" Wang Yi saw that the gatekeeper didn't mean to take action first, and was unambiguous. He directly performed the last move of the universe magic weapon, and a strange wave came from the crystal shuttle behind Wang Yi. , The time origin law fluctuates, and the space origin law fluctuates at the same time by a magical force. Streams of light are arranged in mid-air quickly, and the mysterious silver-gray rays of light are connected together to form a crystal clear, radiant and flawless. On the crystal shuttle, the mysterious and profound secret patterns on it are shining, hooking the huge power of time and space.

With Wang Yi as the center, the power of time and space covers the world projection, forming a time and space force field completely controlled by him.

Soul amplitude, soaring to the extreme in an instant!

Boom...

The power of the origin of time and space, while the strength of the soul increases, explosive growth, and the power of the universe's magical soldiers soars unprecedentedly!

"go!"

With cold eyes in Wang Yi's eyes, he pointed his finger at the long-distance guard in black armor. The next moment, "Shen Shuo" entrained the vast space and time power, and crushed everything, sending out surging waves and rushing. To the gatekeeper.

"Killing God Shuttle" passed through the area, time was distorted and chaotic, and space burst and shattered.

"Feng!" The gatekeeper didn't panic, and pointed at the roaring "Shen Shuo".

A powerful invisible binding force came in an instant, and the "cosmic warrior" that had rushed towards the guards directly solidified in mid-air, and even Wang Yi, who was standing far away, was completely sealed by solidification in an instant. The seal is so powerful that even the cosmic soldiers can easily suppress it.

There is a trace of regret in Wang Yi's eyes. After all, his real law perception is only the 18th floor of the Universe Bridge, and what he really understands is only the teleport in the law of space, and the acceleration in the law of time... and the 21st master of the law of complete space. Gatekeepers, the gap is too big.

"Kill!" Although the result had already been known, Wang Yi still burst out with his last strength.

"boom!"

The originally imprisoned cosmic soldier struggling like a trapped beast, in the surprised eyes of the gatekeeper, instantly broke the confinement of the space, and shot at him with majestic momentum.

"Kill!!!" The gatekeeper's eyes were cold and severe, and the cosmic magic weapon behind it was decomposed, flying all over the sky, and condensed into two sickle-shaped weapons, one silver and one ash.

"Knife?" Wang Yi was a little surprised when he saw this scene. He had never seen the universe magic weapon in this form.

The next moment, two sickles, one silver and one ash, burst out of the air, and something shocking Wang Yi appeared. The space where the silver sickle passed by was static, while the place where the gray sickle passed by easily cut a huge space gully. .

The cosmic magic weapon collided with the two sickles, and he groaned in pain, "Papa..." It collapsed after only supporting it for two seconds. The sickle smashed the cosmic magic weapon and continued to fly towards Wang Yi.

"seal up!"

That imprisoning force once again fell on Wang Yi, and he had no resistance this time.

"Puff!"

Two sickles swept over Wang Yi's body in the next moment, killing him.

...

The plane of Tongtianqiao.

"call..."

Seeing that Wang Yi finally failed, the sages of the universe, who were nervous and solemn, let out a sigh of relief.

"Finally failed."

"I was scared to death. I thought he could get through the 21st floor."

"Haha...how could it be possible."

"However, after more than two hundred years of cultivation, he can pass the 20th floor of the Tongtianqiao. He is also considered the first in our human history."

"Just now, that was the strongest 'kill' for gatekeepers. If you can force gatekeepers to use the 'kill' trick, even if Wang Yi's strength hasn't reached the 21st floor, it will be more immortal than many kings. Much stronger."

All space law guards may use different weapons and methods, but they all have the same three methods, "blocking", "killing" and "instant", respectively representing the evolutionary tricks of "blocking", "strangling" and "teleporting". Much bigger, among which "killing" is the most aggressive of the three.

And "seal" is generally to deal with the weak, directly seal and catch, only when encountering difficult opponents, will they be forced to "kill"! Only when you encounter the same opponent, you will be forced to use it together with "instant", "kill" and "block".

And the gatekeeper on the 21st floor of the Universe Bridge has the ability to possess the complete laws of time and space at the same time!

Although it is not the ability of the Lord of the Universe to have the laws of time and space at the same time, it is like the Lord of the Universe's laws of time and space are placed in the same cup, and the gatekeeper is actually separated in two cups, just showing There are two rules of ability, but in fact the power gap is huge.

But the difficulty of trying to get through is much harder than other bridges.

Wang Yi's real law perception is between the 18th and 19th floors of the Tongtian Bridge, plus the secret technique of Venerable Pang Bo, and the 88 times the soul amplitude of "The Secret Method of the Demon God General", and there are more than many immortal gods that are barely close to the tyrannical power of the Venerable Only with the will of the people can they break through the 20th floor and force the 21st floor gatekeepers to use the strongest "killing" methods (time static, space strangling).

In fact, even if you don't use "killing" and get a little entanglement, the gatekeeper can use other moves to kill Wang Yi, but Wang Yi's performance makes the gatekeeper also moved, and he uses this all at once. trick.

Regardless, Wang Yi broke through to the 20th floor one after another this time and forced the 21st floor guards to use killer moves, which has left an indelible impression on the hearts of many venerable human beings.

They have realized that Wang Yi's rise is unstoppable.

After Wang Yi broke through the sky bridge, all the seniors of the venerables again received a strict order from above-all insiders, forbid to leak the news of Wang Yi's cross sky bridge this time.

...

"The 20th floor has passed."

Wang Yi exited the virtual universe and sat on a chair on the balcony of the earth's castle, looking at the blue sky.

"Add sixteenth, seventeenth, eighteenth, nineteenth-a total of five levels of points."

"Total 101,580,800 points this time."

In other words, Wang Yi broke through the sky bridge this time and got hundreds of millions of points at a time!

The balance of points on the account is more than 120 million!

but...

Compared with passing through the primitive Tongtian Mountain, it is nothing.

Wang Yi said inwardly.

In accordance with the regulations of the Virtual Universe Company.

You can get a reward of 100 million points by breaking through the primordial cosmic Tongtian Mountain.

You can get 3 billion points rewards for breaking through the original domain master-level Tongtian Mountain.

You can get one hundred billion points rewards for breaking through the world master-level primitive Tongtian Mountain!

However, these can only be obtained when the master of the realm is required.

The regulations of the Virtual Universe Company are also concerned that some peerless geniuses will work hard in the first place, and then slack off later, and set the regulations.

The 20th floor of Tongtian Bridge is just a condition for breaking into the "Master-level Primitive Tongtian Mountain", it does not mean that it will definitely pass!

Because when fighting, you also need to look at the combination of combat secrets, body amplitude secrets, thought power amplitude secrets, and will consciousness!

The world master-level primitive Tongtian Mountain is a benchmark for countless geniuses in human history. Only by conquering it can be regarded as one of the strongest geniuses in history.

Wang Yi is now on top of the strongest genius...

But his goal is to become the strongest person at the pinnacle of the universe!

"Go to the primitive Tongtian Mountain!" Wang Yi put down his teacup, his eyes bursting with astonishing brilliance.

In the primitive Tongtian Mountain, he would not be as shackled as the Tongtian Bridge.

This time, he can rest assured to act boldly with all his strength.

...

On this day, the senior powerhouses of the Virtual Universe Company were shocked again.

A news came that Wang Yi went to the original Tongtian Mountain after breaking through the 20th floor of Tongtian Bridge!

This time, successfully passed through!

This astonishing news spread across the entire human race like the wind, causing a big shock.

Many super beings marveled, marveling that Wang Yi rushed through the world master-level primitive Tongtian Mountain so quickly.

After all, Tongtian Mountain and Tongtian Bridge have different ways to pass through. The main test of Tongtian Bridge is in terms of perception, and there is only one opponent, and the fighting method is relatively simple.

The Tongtian Mountain is divided into three levels. Each level has three opponents: "Warrior", "Mental Master", and "Illusorist" to jointly launch an offensive. The difficulty is not as simple as one plus one plus one.

One carelessness will fail.

Therefore, if you can pass through the world master-level primitive Tongtian Mountain, you will be regarded as the truly top peerless genius of the human race!

However, thinking of Wang Yi's talent and strength, many people were just amazed, not surprising.

...

"One hundred billion points, get it."

Successfully rushed through the original Tongtian Mountain, the master of the world, without any twists and turns.

After all, with Wang Yi's current will, the illusionist "Snake Girl" among the three opponents would be abolished as soon as they started a battle.

The purgatory **** has a hundred times the power amplitude of the secret method, so that he can resist the attack of the tauren warrior in close hands.

The magic sound of the magic sound 88 times the amplitude of the thought power, so that he can easily suppress the spiritual teacher ape-man.

After a quick fierce battle, the original Tongtian Mountain was taken down naturally.

Wang Yi also received points rewards from the three primitive Tongtian Mountains at the same time, the universe level, the domain master level, and the world master level.

Wang Yi immediately returned to the virtual universe, Yuxiangshan's manor.

This time, although Wang Yi passed through the original Tongtian Mountain and the 20th-story Tongtian Bridge, the news was blocked, so no one except the real high-level human race knew about it. Wang Yi was reminded by the teacher, and of course he would not talk about it.

Seeing Wang Yi's appearance, the guards and servants of the manor saluted respectfully.

"His Royal Highness!" The guard leader "Jakes" with green skin, tall and burly, and two tentacles on his forehead also appeared immediately.

In fact, in reality, the guard leader and the guard team have always stayed beside Wang Yi.

"Well, Jax." Wang Yi greeted with a smile, but he felt a little sorrowful in his heart. Now that he is the master of the world, he will soon go to the battlefield outside the territory, and it is impossible to carry the guards on the battlefield outside the territory. These guards will soon be there. Get out of yourself.

In fact, when Wang Yi came out of Chaos City, ordinary immortal gods were no longer qualified to be his guards.

In fact, everyone knew that those who protected Wang Yi secretly were Wang Yi's true guards.

But of course no one will mention it, tacitly.

The manor building, in the study.

Wang Yi was sitting at his desk. There was a misty figure in the laptop screen. The figure said in a low voice: "Primitive Secret Realm Master Level member 'Wang Yi', you have ever passed the universe level, domain master level, The world leader is the original Tongtian Mountain, so the Virtual Universe Company rewards you with 10.31 billion points. You should rely on these 10.31 billion points to strengthen your strength. In this way, you can have a higher vitality in the extraterritorial war you are about to participate in."

"Yes, I understand." Wang Yi smiled.

"I wish you alive through the extraterritorial war career." After the figure finished speaking, he cut off the communication directly.

Sitting on the chair with the backrest, Wang Yi showed a smile on his face.

103.1 billion points, finally got it!

Relying on these points, Wang Yi can also make some preparations before going to the outer battlefield.

"This time, it should be possible to elevate Mo Yun Teng to immortality."

There are many treasures in Wang Yi, and his clone is the master of the world, and he cannot be promoted to immortality temporarily, so a true immortal **** plant life support is very important. UU reading [www. uukanshu.com](http://www.uukanshu.com)

"The Super Moyunteng of 360 main vine has broken through to immortality, it is the strength of the high-ranking king, and it can also have the teleportation of the kingdom of God, which is not bad." Wang Yi nodded.

The 360 main vine 'Moyun Vine', the best solution is to become an immortal **** by 40%, requiring nearly 11.6 billion points to be paid.

In fact, if you cultivate from the larval stage, you can cultivate an immortal moyun vine with 360 main vines, and more than 10 billion points will be enough.

If you cultivate to this point from the later stage, it will cost ten times the price!

These points are acceptable to Wang Yi.

This time, Wang Yi was determined to cultivate Morrison to the immortal level, because he has felt that he might not be able to break through to the immortal level for a long time, so a sufficiently strong and loyal immortal plant life is very necessary. .

[Chapter 276: Huge point cost](#)

But another auxiliary life-Zerzu mother emperor "Sasha", but there is no such good opportunity.

If the Zerg mother emperor wants to break through to immortality, she must have enough space to comprehend the law, and it also needs nearly 100 billion yuan unit resource treasures to cultivate, and it is still not up to the conditions.

Even if Wang Yi often gave himself various treasures and resources to the Zerg Mother Emperor, and occasionally took out the Cosmic Chaos Monument and placed it in his body for the Zerg Mother Emperor to understand, the Zerg Mother Emperor was still some distance away from breaking through immortality.

After all, Wang Yi, the mother of the Zerg clan, was really born more than two hundred years ago.

The difficulty of the "Zerg Mother Emperor" breaking through to the immortal gods is far more difficult than that of the golden horn behemoths. This kind of powerful and powerful can become immortal.

However, once the Zerg mother emperor becomes immortal, a large number of immortal Zerg warriors will be created. It was invincible under the so-called "Venerable Universe" and swept many immortal legions.

It can be said unceremoniously that an immortal-level Zerg clan mother emperor has the strength to fight against a cosmic kingdom immortal gods legion, of course, it does not include the venerable.

Wang Yi began to think.

"My human body, although it is only the first level of the world leader, it can be directly upgraded to the ninth level with the resources of the virtual universe company without additional costs."

"Other treasures, you can buy, are not helpful to the human body."

"The avatar of the Yanxing Giant Beast's body has expanded to its limit. The secret method of "Scorching Star Transformation" has reached its limit because of the "Secret Method of Purgatory". , The secret method of the law of space fusion, but I don't know if there is any in the human race..." It's different from what the protagonist needs in the original book. Many times Wang Yi needs to cultivate by himself.

But there is no group like the Golden Horn group eagerly rushing to send any secret methods, or the "Fire Sky Beast God's Way" that is just suitable for their own clones.

"Void Zerg clones are also difficult to use various treasures to enhance." For a special life like Void Zerg, it may be easier to break through to immortality, but it is too difficult to think about evolution on the basis of the original extremely high.

Wang Yi felt that he had a feeling of "points are useless".

Since you can't directly improve your own strength, just use foreign objects!

If you need a detection instrument in an extraterritorial battlefield, buy the most high-end one!

As long as the points are purchased, how expensive it is to buy!

Wang Yi is well aware of how important a technologically advanced detection instrument is on the battlefield outside the territory.

The detection instrument Wang Yi originally used was a high-end instrument worth millions of points. Generally, it was only used by the king, and there were only a few in the immortal Fenghou.

However, it's okay to be on the periphery of the battlefield outside the territory. When it comes to the Yanji Continent, the strong are like clouds, and it is not enough.

Of course, as far as Wang Yi's current strength is concerned, under normal circumstances, basically no immortal powerhouse can threaten him.

Just having an advanced detection instrument is indeed much more convenient.

"But it's not in a hurry, just buy it if you want it before going to the outer battlefield."

"Also, when I go to the outer battlefield this time, I can also learn from Luo Feng and control immortal servants...but I need to learn a powerful soul secret first." Wang Yi secretly said in his heart.

It is very difficult to control soul servants, especially immortal gods.

Unless it's a soul master, it's easy.

Ordinary strong, even if it is the limit of the king, it is very difficult to enslave the strong.

Too many conditions are required.

One is that the opponent cannot escape.

The second is that the opponent's divine body does not have one, and the strength is greatly reduced.

Third, the opponent blew himself up too late.

Of course, the most basic thing is that Wang Yi has cultivated the secret soul method to his home, so he can control the immortality of slavery.

The more powerful the soul secret technique, the harder it is to practice, and it also depends on the talent of the soul.

Immortal servants are generally only owned by soul masters, such as the master of Babata, Hu Yanfu, the King of Illusion, the mother emperor of the Zerzu... ordinary immortal powerhouses do not.

But the benefits of getting immortal soul servants are also very great.

One is that there is a strong thug, and he is loyal.

Second, it can burn with divine power and solve many of the problems that Wang Yi may encounter that is not immortal at present.

The third is the transfer of the kingdom of gods. Immortal gods from all over the universe will definitely have a large number of coordinates from all over the world, which will be convenient for Wang Yi to move in the future.

With these three points, it is enough for Wang Yi to choose a soul secret method to practice.

And the soul has always been Wang Yi's "weakness"...Compared with his own other strengths, the strength of the soul is indeed not outstanding.

"Before I go to the outer battlefield, I will go to Chaos City to practice for a while. During this time, I will first find a soul secret method to practice."

"With the amplitude of "Magic Sound Secret Method", if it succeeds, the power of my soul secret method will be very terrifying!"

Wang Yi is still very confident in himself.

For him, the extraterritorial battlefield is a "treasure house" that walks all over the floor. Anyone who kills an immortal king may get billions or tens of billions of mixed-element units!

Killing more than a dozen, the value is comparable to the hundreds of billions of points obtained by breaking through the original Tongtian Mountain!

Kill a king's limit, and get wealth in the tens of billions to hundreds of billions!

In fact, you don't need to care too much about the points in front of you.

Of course, you have to kill it too!

"If you want to kill the immortal gods, the point is that the other party's immortal gods...Most of the powerful men have immortal bodies, let alone the kings, each of them is very difficult to kill."

In the original work, Luo Feng was so easy to kill Fenghou Immortal at the beginning, but also because he had the spatial power of "Slaying Wu Yu Wing".

Take a treasure kit of at least the eternal true **** level to kill an immortal, and there is no one.

And let's not talk about whether or not "Killing Wu Yuyi" can be obtained. The City Lord of Chaos gave it to Luo Feng because it is a treasure of the law of "gold and space", but Wang Yi is not.

Wang Yi pondered.

"If you want to deal with the immortal gods, you can only learn from Luo Feng and buy the cost-effective Femore Venom."

Wang Yi sat at the desk, turned on the laptop, quickly clicked on "Treasure Treasure, File", then clicked on "Treasures, Classification", and searched for "Fimo Venom", and the result appeared immediately.

Fermor's venom: 1 gram worth 300 million yuan of mixed yuan unit is a terrible potion prepared by the powerful pharmacist "Fermor" in the human race, so it is named after Fermor. This Fermor venom has a strong corrosive power. This potion It is configured specifically to erode the "immortal body".

Generally, 10 grams can erode and kill the ultimate strongest king, and 100 grams of Feimo venom (one content) can kill the strongest "sealed king invincible" (like the real king).

This is a one-time item. It uses a little less and has many shortcomings. However, if Wang Yi wants to easily kill the immortal gods, he must exercise restraint.

"300 million per gram? It is really scary." Wang Yi shook his head.

He now has hundreds of billions of points, and he can buy more than 300 grams if he buys all of them.

"Still wait."

Wang Yi suddenly felt poor.

There are many treasures, but the important ones cannot be sold, and the ones that can be sold are worthless.

"If you sell the Purgatory God Armor...Well, other people who don't practice the 'Secret of Purgatory' will not be used, and it is estimated that the price will not meet my psychological expectations." Wang Yi also just think about it, the Purgatory God Armor is still useful to him. of.

The most important thing at the moment is actually the cultivation of secret methods.

When he can't break through to immortality, it is already difficult to improve himself, then the secret method becomes the biggest key to his strength improvement.

"The Way of Time and Space, I already have "The Evolution of the Universe", so what's left is the Giant Yanxing Beast." Wang Yi is very ambitious, and the law of time and space alone cannot satisfy him.

Knowing the secrets of this world, how could it be possible to leave other law systems alone.

What's more, he originally chose the "flaming star behemoth" that fits his own attributes for this reason.

To practice "The Way of the Beast God", you can go to the "Ancestral God Sect", which is the number one power in the real universe!

The background is the will of the original universe! Many heritages, endless treasures, a large number of secret realms, and even the peak forces of the human race are inferior.

How can I just practice the Tao of "Time and Space"?

There is no "way of time and space integration" in the ancestors of the gods! Wang Yi only practices the time and space, and it is impossible for the human race to let him go to the Patriarchal Sect to accept inheritance.

Real man, just want everything!

Wang Yi began to search for the secret method related to the 'Beast God'.

The way of the 'beast god' is actually a secret of the human race, and only a few people know it.

However, Wang Yi has now broken through the primitive Tongtian Mountain and is the master of the primitive secret realm. With his authority, he is also qualified to inquire.

This time there were very few search results, only a few dozen.

"Woo!" Wang Yi's heart was lifted when he saw it. There are so many secrets in the way of "Beast God", and it seems that the human race still has a very deep foundation.

Although there are only dozens of secret methods, without exception, the prices are very high.

At the top of the list is "Seven Changes to the God of Yan", also called "Seven Kills of the Beast God", created by the legendary veteran of the Golden Horn tribe Xidoro with the goal of the Beast God. There are seven layers...seven cheats.

"Seven Kills of the Beast Gods" is also called "Seven Changes of the Gods of Yan", and you will be invincible under the 'Universe Venerable' when you practice the first three levels. The first six levels will be invincible under the 'Master of the Universe'. When you reach the seventh level, you can become a real beast god, just like the beast **** is alive, comparable to the real master of the universe, standing on top of the universe.

However, even Xidoro, the creator of "Seven Changes in the Gods", only practiced the first six levels, and the seventh level was just his imagination and was not really perfect.

"The Way of the Beast God" is very difficult to practice, focusing on talent and understanding. Many venerables do not get started in the cultivation.

Many strong people who have been trapped in the realm of the venerable for a long time have tried to cultivate and tried to break through, but without exception, none of them can successfully break through to the realm of the master of the universe with the "Seven Changes of Gods".

Wang Yi looked at the message on the screen about "Seven Changes in Yan Shen".

"Seven Changes in Yanshen" Volume One 80 Million Points

800 million points for the first two volumes of "Seven Changes in Yanshen"

8 billion points for the first three volumes of "Seven Changes in Yanshen"

...

The first six volumes of "Seven Changes in Yanshen" 8 trillion points

"Seven Changes in Yanshen" a full set of seven volumes with 80 trillion points

There is another note below: no discount

Wang Yi: "..."

What did i see?

I'm going to be blind!

"The Change of the Gods" is a secret method that can be cultivated to become the Lord of the Universe. It is simply expensive and frightening!

Fortunately, for the first three floors, the prices in the back are all ten times higher.

When it comes to the sixth volume, I am afraid that even if the Venerable buys it, it will have a lot of nerves and bones.

Full set! ?

That would be bankruptcy!

And reluctance is still a problem.

but.....

"The Change of the Gods" is difficult to practice. It is thousands of times more difficult than to understand a law of space or time alone. Many venerables cannot get started.

In this way, most of the sages are probably the first three levels of cultivation.

The fourth floor is very rare.

Thinking about it this way, it means spending tens of hundreds of billions of points, which is acceptable to the Venerable.

But Wang Yi felt so painful.

The "Seven Changes of God Yan Shen" that "the laws of gold and space merge" are so expensive.

I am afraid that the integration of other laws will not be much cheaper.

But think about it, can such a tall thing as the law of fusion can be played by ordinary people?

Even the Venerable must think carefully.

Wang Yi searched down again anxiously.

"Frozen Nine Layers", the secret method of "laws of water and air fusion"... a full set of 5.5 trillion...

"Infinite Darkness", the secret method of "the law of light and time fusion"... a full set of 7 trillion...

"Hiroya Secret Technique", the "Muscle Law Fusion" Secret Technique... A full set of 4.8 trillion...

The prices of these secret methods are not as high as the "Seven Changes of the Gods", and the level is not as high, but the full set of prices are at least a trillion points!

Soon, Wang Yi finally saw the secret method he wanted——

"The Six Paths of Fire and Air", the secret method of "the law of fire and air merge"!

Wang Yi didn't have time to read the introduction to the cheat book, so he went to check the price first.

When I saw the price, even though I was mentally prepared, the corners of my mouth still couldn't help but twitch.

"The Six Paths of Fire" Volume One 60 Million Points

600 million points for the first two volumes of "The Six Paths of Fire"

6 billion points for the first three volumes of "The Six Paths of Fire"

...

600 billion points for the first five volumes of "The Six Paths of Fire"

"The Six Paths of Fire" Complete set of six volumes 6 trillion points

It's much cheaper than "Seven Changes in Yanshen", but there are only six floors, and the full set costs 6 trillion!

Wang Yi couldn't complain in his heart, so he went to see the detailed introduction.

"The Six Ways of Fire in the Sky is another vassal of the "Prison Tribe" in the pinnacle tribe of the human race in the distance. , The law of fire is fused with the secret method created by the incarnation of the "Fire Sky Beast God", and there have been rumors that 'Ba Deng' had followed the ancient natural beast **** for a period of time. This secret method was also formed by its guidance and teaching... .."

"Huh?" Wang Yi refreshed.

Is this a secret method created by the natural beast god's personal guidance?

"The Six Paths of Fire in the Sky" is divided into six layers ~www.mtlnovel.com~ and the upper and lower chapters. Just like the "Seven Changes of Gods", you can practice the first three layers and you will be invincible under the "Universe Venerable".

The first six levels will be invincible under the 'Master of the Universe'.

But there is no seventh floor... Legend has it that there is a seventh level of cultivation secrets in the forbidden land of the "Lielin Clan" sanctuary, but no one has it, and the "Lieblin Clan" also denies it.

Because the pillar powerhouse of the "Lielin Clan" "Ba Deng" has always existed and sits in the ethnic group, no one dares to invade easily. Therefore, the "Six Ways of Fire in the Sky" that has been circulated has always only had the first six levels. After the human race has obtained it, it will also be included in the treasure house. middle.

Similar to the situation in "Seven Changes in Yan Shen", there were also many human experts who practiced "The Six Paths of Fire and Sky", but at most they only practiced to the fifth level, and no one cultivated to the sixth level.

The difficulty of cultivation is comparable to "Seven Changes in Yan Shen", and the power is not inferior, and even worse.

[Chapter 277: "The Six Ways of Fire and Sky"](#)

"Fire and sky beast god..." Wang Yi couldn't help thinking of the natural formation of the beast **** in the abyss of purgatory, and the "flaming blood jade".

The eight oldest born beasts and gods at the beginning of the universe all fell, and none were spared.

Now, only a trace of them can be spied from some legends and data.

"Weakness is the greatest sin..." Wang Yi took a deep breath.

"The Six Paths of Fire and Space" is an important help for me to practice the law of fusion of fire and air, and I should not underestimate it."

In a blink of an eye, Wang Yi made up his mind to buy.

Points are all dead, not to mention that there are too few useful things for Wang Yi now.

Wang Yi gritted his teeth and clicked to redeem the first four layers of the "Six Paths of Fire in the Sky".

"The transaction is successful!"

"After deducting 60 billion points, the balance is 431,227,450,58 points."

"Please wait, someone will deliver the secret method soon."

A string of prompt text appears on the screen.

Wang Yi breathed a sigh of relief.

When Wang Yi bought "Six Ways of Fire in the Sky", City Lord Chaos also received a message from the backstage. Since Wang Yi successfully smashed through the world master-level primitive Tongtian Mountain, his attention from City Lord Chaos has greatly increased.

Now, he can always know the first thing about Wang Yi's big move.

"Six fires?"

On Thunder Island, the chaotic air current is permeating, the Chaos City Lord figure walks out, walks to the edge of the towering temple, overlooking the huge mountain "Yuxiang Mountain", as if you can see the little guy in the study room of the Yuxiangshan primitive area manor.

The Chaos City Lord whispered, "I actually bought the first four floors of "The Six Paths of Fire and Sky" worth 60 billion yuan. Does he have any thoughts on the law of fire and air fusion?"

60 billion points, for the Chaos City Lord, the so-called points are just a virtual value of their own, which is meaningless.

But it was different for Wang Yi, who had just been promoted to the world master and only got hundreds of billions.

"Since he is willing to spend 60 billion points to redeem "The Six Paths of Fire and Sky", it is estimated that he can really practice the law of fusion of the Fire and Sky Beast God..." City Lord Chaos nodded.

"Let's just wait and see. Let's see if this little guy can do it. Moreover, he has already embarked on the path of cultivating the laws of time and space, and then goes to practice the way of beasts and gods, which is a bit greedy." City Lord Chaos thought NS.

Wang Yi, he cared very much, even more than any disciple he had received before.

The Chaos City Lord does not accept disciples at will. The endless years of the human race can produce a peerless genius every tens of millions of epochs, that is, a trillion epochs. That's one hundred thousand!

Chaos City Lord takes everything, how can you take it?

Now, under the main gate of Chaos City, plus the fallen, there are only more than 30 direct disciples, of course. There are so many registered disciples.

But the named disciple is different from the direct disciple!

When Wang Yi came to Chaos City, the Lord of Chaos City actually discovered his special.

Like Luo Feng, he saw the pronucleus in their bodies, but Chaos City Lord didn't care much. There are endless opportunities in the universe and various secrets. As long as they are human souls and not sent by a foreign race, Chaos City Lord will not care. .

After that, Wang Yi's rapid rise and his first breakthrough over the sky bridge, his powerful cultivation and progress talents, once again attracted the attention of City Lord Chaos.

However, the Lord of Chaos City did not accept Wang Yi as a disciple, but after considering it, he recommended it to the big disciple "Venerable Pangbo" who is more suitable for teaching.

"Venerable Pangbo" is also the oldest and most powerful disciple under his sect. It can even be traced back to the years of the Master of Chaos City Master, who had been instructed by the first leader of the human race.

The big disciple "Pang Bo" is more suitable to teach in Chaos City Lord. After all, Chaos City Lord cannot teach a disciple at any time, that is, accepting disciples. In many cases, it is also taught by the disciples of Chaos City Lord. Chaos City Lord only occasionally teaches. Give pointers.

Being taught by "Venerable Pangbo", a disciple who was not inferior to the Lord of the Ordinary Universe, City Lord Chaos felt that this arrangement was not bad.

But Wang Yi's progress is getting faster and faster, and the talent shown is getting more and more shocking...

Many secrets have been unearthed.

Until now...

The Lord of Chaos City looked in one direction, his eyes were deep, as if he could see through the gap between the two universes and see a certain place in the starry sky.

"Earth....."

"I hope you can do what I want, Wang Yi..."

...

Yuxiang Mountain, in the manor study.

"Huh...Since "The Six Ways of Fire in the Sky" is bought, then the next step is..."

Sitting on the chair, Wang Yi focused his eyes on a special application option on the screen.

The descendants of the disciple of the main gate of Chaos City, as long as they can pass through the 18th floor of the Tongtian Bridge, they can pass this application to get a full set of "Universe Evolution" cheats!

Wang Yi clicked to apply.

"drop."

After the application was connected, a girl with wavy white curly hair and a few beards appeared on the screen. She was very cute and cute. She was wearing a purple uniform with a fluffy tail fluttering behind her.

"His Royal Highness, what can I do for you?" The girl's eyes lit up, she bowed slightly, and asked respectfully in a clear voice.

"I have passed the 18th floor of Tongtian Bridge, when can the full set of "Universe Evolution" be delivered?" Wang Yi said directly.

"His Royal Highness Wang Yi, please wait a moment, I will check it for you first."

The information about Wang Yi's crossing the sky bridge has been classified as confidential, and few people know it. Therefore, even the internal staff of the Virtual Universe Company must apply to view it.

After a while, the girl's voice came again, with enthusiasm.

"His Royal Highness Wang Yi has confirmed that you have passed through the 18th floor of the Tongtian Bridge and meet the requirements of the secret method. The full set of "Universal Evolution" cheats you need will be delivered to your residence within one day. Do you still need any services? "

"Well, it's okay." Wang Yi turned off the communication.

Smiled.

"Um... The last book of "The Evolution of the Universe" is coming soon. The teacher said that the last book is very helpful for me to create secrets, so I have to take a good look."

"The Evolution of the Universe" as a research aid a total of one trillion points for the full price, only 100 billion points are needed for the first nine floors, which is equivalent to 900 billion points for the last volume. Obviously, the last one Book... is the most profound and most valuable place.

Wang Yi is looking forward to this.

"Master! Your teacher's application for a call!" He has been sitting on Wang Yi's shoulders and playing with his hair with his little paws. The small and cute pocket-sized black-and-white dumpling "Bermuda" cried in his ear.

"Huh? The teacher's application for a call?" Wang Yi smiled, "Let's get through."

In the study, rays of light converged and intertwined, forming a screen that appeared in front of Wang Yi. In the screen, it was the tall and burly black bear man with golden silk robes, Wang Yi's teacher "Venerable Pangbo".

He was angry at the moment.

"Disciple, I heard that you want to buy "The Six Paths of Fire" to practice?"

[Chapter 278: Pang Bo: Me! Strong wealth!](#)

"You come to my palace to see me right away!"

After Venerable Pangbo said these words, he hung up the communication angrily.

Wang Yi touched his forehead helplessly.

"The teacher seems to be very angry. Could it be that he already knows the news that I bought "Six Ways in the Sky"? Or did I conceal his true combat power of Tongtianqiao?"

Anyway, Wang Yi had to go to the teacher's palace immediately.

...

Virtual universe, in a certain plane space specially formed.

This is the exclusive space belonging to the great 'Venerable Pangbo'.

A group of towering palaces with distinct black and white, suspended in mid-air, and inside one of them.

"Teacher." Wang Yi teleported over and came to the teacher.

Standing in front of the teacher obediently at this moment.

Venerable Pang Bo glanced at him obliquely, but at this moment Venerable Pang Bo was not as angry as he was in the call just now, sitting on the palace throne and touching his beard, looking at the disciple below.

"You bought 'The Six Paths of Fire and Sky' because you want to cultivate the way of beast gods, right?" Venerable Pang Bo said.

"Yes, teacher." Wang Yi leaned slightly.

"You have practiced well in the original laws of time and space. In just over two hundred years, you have crossed the 20th floor of the Tongtian Bridge. Teacher, I just knew that, and I am proud of you."

Venerable Pang Bo snorted, "But you are now Actually want to practice 'The Six Paths of Fire in the Sky' ...Do you think that you are talented and omnipotent, and you can learn anything?"

"The disciple didn't mean that, and never thought about the way to fall into time and space... It's just that 'The Six Paths of Fire and Sky' is indeed helpful to the disciple." Wang Yi said respectfully.

"Huh?" Venerable Pang Bo glanced at Wang Yi.

"real?"

"Yes, how dare the disciple deceive the teacher." Wang Yi continued.

Venerable Pang Bo looked at himself, a disciple who had repeatedly acted unexpectedly.

He is also his most proud and beloved disciple.

"you sure?"

Venerable Pang Bo stood up, "Then you can demonstrate to the teacher that if you really have the talent to cultivate the way of beasts and gods, teacher and I can't be accommodating."

"Yes."

Wang Yi also straightened up, walked to the center of the palace, stood still, then his expression was serious, and his whole body exuded a terrifying aura like a lava beast.

"Huh? Interesting." Venerable Pang Bo narrowed his eyes slightly.

"what!"

Wang Yi let out a low roar, his expression violent, his figure rushed out like an arrow, his right hand was raised high into a claw, and it was a claw suddenly in the sky!

Tear it!

A super red giant claw visible to the naked eye appeared in the palace, a giant claw composed purely of energy and law, and the giant claw was torn off... the entire space seemed to be torn apart.

This is one of the three ultimate moves created by the Yanxing Giant Beast based on the artistic conception on the "Beast God Carving" and fusing the secret methods of the Yanxing Giant Beast clan.

The rough prototypes are one claw, one wing, and one tail.

Although Wang Yi is a human body, the law perception is originally one, so Wang Yi can also display its charm and law perception, but it is not as powerful and terrible as the Yanxing Giant Beast.

"Huh?" The huge eyes of Venerable Pang Bo, who had always had a calm expression, lit up in an instant.

Although Wang Yi's secret technique is still very immature at the level of Venerable Pangbo, the beast-god mood in it is true and real.

The so-called beast-god artistic conception is actually the embodiment of "the origin of fire and the law of fusion of space origin".

Since Wang Yi can show it, it means that he really understands the artistic conception of beast gods and has made achievements.

The corners of Venerable Pangbo's mouth twitched slightly.

What kind of monster is this disciple of him? Even if he can pass through the 20th floor of the Tongtian Bridge, he can understand the beast god's artistic conception in such a short period of time and apply it to this point.

Is there anything in him that I don't know?

"Teacher." Wang Yi stopped after displaying the Yanxing Giant Beast version of the "Three Types of Beast God" and turned around respectfully.

"Hmm..." Venerable Pang Bo returned to his senses, and subconsciously stroked his face like a steel needle, his tone hardly pierced. "Your beast god's mood really realized, when did it happen?"

"Almost a hundred years ago." Wang Yi replied.

"A hundred years ago, a hundred years can comprehend the mood of the beast **** to such an extent..." Venerable Pang Bo pondered, and said helplessly: "Since you have the talent to cultivate the way of the beast god, then the teacher will not stop you."

"However, the teacher also gives you a warning, greed is too much to chew, time and space alone are vast and infinite, and a strong person can hardly understand the end in his life. If you distract your energy to understand the way of beast gods, It will only slow down your overall cultivation speed..."

When Venerable Pang Bo thought of something, he sighed: "Ambition is a good thing, but if ambition is so big that it deceives reason, then it is blind."

Wang Yi respectfully said: "Teacher, you can rest assured, I am sure."

"Heh... as expected, being young is fearless." Venerable Pang Bo glanced at him and sneered, "I hope you won't regret today's decision in the future."

"Teacher, I have confidence in myself." Wang Yi said confidently.

Venerable Pang Bo looked at Wang Yi's firm eyes and understood that this disciple had made up his mind, so he couldn't help but shook his head.

"You come with me."

Venerable Pang Bo turned around and walked to the other side of the palace.

Wang Yi was stunned, and quickly followed.

Although Venerable Pangbo's palace was magnificent, there were no people. There were hardly many guards in the corridors and no servants. It seemed very deserted.

Wang Yi felt that this teacher seemed to like being alone very much, and he didn't know why.

Venerable Pang Bo took Wang Yi to a quiet side hall and pointed to the things inside, "When you leave. Take them away."

Wang Yi looked at a large iron box four meters long and wide. It feels like a shipping container. He already had some guesses in his heart, and subconsciously looked at the black bear man next to him.

"Teacher, is this...?"

Venerable Pang Bo smiled faintly, and tossed his sleeves very gracefully.

"This is the "Tao of Fire and Sky" you want, the full set!"

"..."

Wang Yi stopped talking.

To be honest, at this moment, he was really shocked.

The full set of cheats for "The Way of Fire and Sky", that is a full 6 trillion points, even the venerable, it is definitely not a small number, almost comparable to a handicap treasure.

Venerable Pangbo actually bought a full set of cheats for him!

Wang Yi's first thought at this moment was not moved, but felt that... the teacher is really rich!

"Teacher, I..."

"Don't thank me, this is what the teacher should do." Venerable Pang Bo raised the bear face and turned sideways slightly.

"No, teacher, can my points for the first four books be refunded?"

"..."

Venerable Pangbo coughed, "I have already told them, and I will refund you later."

"Thank you teacher!" Wang Yi said happily.

Venerable Pang Bo: "... I always feel that what you are grateful for is a bit wrong~www.mtlnovel.com~Your teacher, I am not happy at all!

However, Venerable Pangbo didn't bother to care about this little apprentice who kept up the bar from time to time, and continued: "Yes, in addition to the "Six Paths of Fire in the Sky", there are other secret methods that I have created, including the Seven Peaks and One Extremely Unique, and others. 126 basic secret methods, these are also the painstaking efforts of your teacher, you must study and comprehend, and create your own secret methods as soon as possible."

Seeing the expectation in the eyes of Venerable Pang Bo, Wang Yi warmed his heart and said seriously: "Yes! Teacher! I will work hard!"

"I will create an extremely keen school as powerful as you as soon as possible!"

The corners of Venerable Pangbo's mouth twitched again.

The opening is the ultimate secret method. Although I know your ambitions, are you here to block me as a teacher?

[Chapter 279: Way of the Beast God](#)

Wang Yi returned to his manor residence with the secret law books given by the teacher, and looked at the hundreds of secret books placed in front of him, and he was secretly grateful for the thousands of secret books.

Although Venerable Pangbo was silent, he still cared very much about his disciple.

The reason why I didn't give these precious cheats to Wang Yi before was that he still needs to settle and lay a foundation. Learning too much and too much may not be beneficial, and it may affect Wang Yi's perceptual law. That's enough.

And now that Wang Yi needs it, his teacher is not stingy. He directly spends trillions of points to buy him a set of extremely precious "Six Ways of Fire in the Sky." Wang Yi has already kept this care in his heart.

Wang Yi focused his attention on the six heavy black and red metal books that were huge and square. Each book was 2.2 meters long and 1.1 meters thick. There was only one word on the cover of the six books—" One", "two", "three"...until "six".

It looks thick, but every page is ultra-thin, and the first volume is more than 10,000 pages. Turning a page, you can see the dense dark red on the black paper with the slight brilliance of the small letters.

"One level less than "Seven Changes of the Gods", and to the sixth level, that is, invincible under the lord of the universe, and Yomo is also the level of the top cosmic overlord." Wang Yi muttered in his heart.

However, "Seven Changes of God Yan" is the fusion law formed by the fusion of "golden and space", and "The Six Paths of Fire and Space" is the fusion law formed by the fusion of "fire and space".

The first level is the fusion of part of the law of space and part of the law of fire.

Second floor.....

The sixth layer is the fusion of the entire law of space and the law of fire, forming the law of fusion!

Reaching this level...it can be said to be invincible under the "Master of the Universe".

However, the successful integration of the law of space and the law of fire is thousands of times more difficult than simply understanding the law of space and time.

One-half of the first volume is the content of guidelines for law perception, and the second half is about the use of secret methods.

but.....

The creator of "The Six Paths of Fire", the super existence of the "Scorching Scale Race", walks the body flow, so the creation is also the melee type secret method.

"That's enough. The Yanxing Giant Beast originally walked in the melee school, so let it cultivate on its own. My human body still has to go in the spiritual teacher school." Wang Yi said in his heart and began to read the "Six Paths of Fire" again. With Wang Yi's current consciousness, it doesn't take much time to write down the contents of these secret books. It just takes time to read them.

The first layer of "The Six Paths of Fire" is almost the same as the 15th floor of Tongtian Bridge.

Even if the second chapter of "The Six Paths of Fire" is completed, its power is equivalent to that of the 18th floor of the Tongtian Bridge.

And the third level of Consummation, even if the 20th floor of Tongtianqiao is the ultimate, that is, the level of King Zhenyan.

King Zhenyan cultivated the "road of the beast gods in earth and space", but he has been trapped in the third limit for hundreds of millions of years. It can be imagined that the cultivation of the way of beast gods is definitely not that easy.

If you break through to the fourth level, it will be the level of "Universe Venerable"! Truly become the super existence in the universe, the overlord of one party.

The fifth stage is considered the strongest among the sages (such as the sacred fire sage)!

The sixth level is the overlord of the universe (such as the eclipse palace lord, Pangbo Venerable).

The lineage of the beast gods in the Ancestral Palace is divided into seven levels. Wang Yi is very clear that at the seventh level, he really has the mighty power of the Lord of the Universe.

However, one of the most elusive levels in the way of the beast **** is...you must understand the heart of the beast **** in order to become a true beast god!

Those cosmic overlords, without the heart of a beast god... cannot be transformed into real beast gods, they can only be transformed into "pseudo beast gods".

As in the original work, Luo Feng's immortal level can create a genre of secret patterns of the ultimate secret of the Lord of the Universe. It is also the secret pattern of Luo Feng's most talented secret method "I am the universe". "The 64 perfect secret patterns carved by the 64 beast gods, plus hundreds of millions of years, the "heart of the beast god", and all the conditions, were finally created by luck with the eight secret patterns of the golden beast gods.

All accidents come together to become a necessity and a miracle.

Wang Yi understands that what he needs to do is to first concentrate on learning these secret methods, and gradually create a set of his own secret methods on the basis of the secret methods.

For the time being, the Master of the Universe's Ultimate Secret Technique is not daring to count on it, and the Venerable Universe's Ultimate Secret Technique can still be tried.

As for the power and level of the secret technique, it all depends on how well one's abilities are.

Wang Yi knows very well that his current advantage is nothing. For example, at the genetic level, to the Lord of the universe, they can slowly rise to the limit of ten thousand times over the long years!

The secret method of body amplitude, the secret method of soul amplitude? The overlords of the universe have almost reached perfection in the amplitude of soul and body.

Even if it is the pinnacle **** and the ultimate jerk, it is also divided into the celestial **** and the ultimate **** of the sage of the universe, the cosmic hegemon grade pinnacle and the utter jerk, the master of the universe, the pinnacle jerk, the utter jerk... and even the strongest in the universe. The **** of the author.

He has a long, long way to go.

...

Wang Yi received the precious cheats of "The Six Paths of Fire in the Sky" given by the teacher, and at the same time the last volume of "The Evolution of the Universe" he obtained after breaking through the 18th floor of the sky bridge was also sent over.

Unlike "The Six Paths of Fire and Space", which belongs to the "Law of Fusion of Fire and Space", the "Universal Evolution" is a avenue of laws that combine pure time and space. It is even more profound than "The Six Paths of Fire and Space."

After receiving the secret method box sent by the Virtual Universe Company from the manor of the primitive area, "Aitor", Wang Yi was once again immersed in the process of reading many precious secret books.

In reality, the Virtual Universe Company also sent someone to quickly send the nutrition capsule over, which was enough for Wang Yi's physical fitness to quickly improve to the ninth rank of the world leader.

Just the third day after Wang Yi immersed himself in reading the secrets in the manor.

"Wang Yi!"

Venerable Pang Bo, the teacher, came again.

"teacher."

Wang Yi greeted him from the small building.

"How did you come?"

Venerable Pangbo smiled at Mimi and looked at his apprentice, "How have you been watching these past few days?"

"It is quite rewarding, especially the secret method created by the teacher. It is so powerful and inspiring me a lot." Wang Yi slapped a little flattery~www.mtnovel.com~Well..." Venerable Pang Bo knew The apprentice was flattering himself, but still very happy to touch the hair of his chin with his big fluffy cat fan.

"It's good to be inspired. If you think any secret method is useful for you, don't be polite, and tell the teacher directly, the teacher will buy it for you." Venerable Pang Bo said boldly.

Wang Yi was surprised by the generosity.

But it is also a happy thing to have such a generous teacher.

"Thank you, teacher, but it's enough for the time being. I have to study and enlighten and cultivate." Wang Yi continued.

If the secret method can't be cultivated even after cultivation, it means that he hasn't studied it yet, how can he create his own secret method?

Wang Yi's current path has just begun.

[Chapter 280: Join Hongmeng](#)

"In fact, you don't need to cultivate to the peak of those secret methods. At any level, if you have any gains, just create that level of secret methods. Step by step, from easy to difficult, you can also learn from experience." Venerable Pang Bo pointed.

"I understand, teacher." Wang Yi nodded.

It's like Wang Yi doesn't need to practice the complete "Six Paths of Fire" to create secret methods. For example, if he successfully cultivates the first level, he can create a secret method suitable for him on the basis of the first level.

"Then you practice hard." Venerable Pang Bo patted him on the shoulder, "By the way, I am here this time to tell you one thing."

"What's the matter, teacher?"

"I'm here to convey the instructions of the teacher, Chaos City Lord." Venerable Pang Bo said, "You have now passed through the 20th floor of the Tongtian Bridge, and you are already qualified to join our largest human organization... Hongmeng, but because of your special identity, it is a secret. Join, the teacher will help you disguise an identity in Hongmeng, and will not reveal your true identity."

"Hongmeng?" Wang Yi raised his head.

Is he finally going to come into contact with the largest organization in this human camp?

What is Hongmeng?

Hongmeng is an alliance formed by the human race and a large number of alien races! At the very least, the immortal power of the king is eligible to become a full member of the "Hongmeng".

Or a world-class human genius like Wang Yi who can break through the 20th floor of Tongtianqiao is also eligible to join the Hongmeng.

Venerable Pangbo also explained the situation of the Hongmeng to Wang Yi, and then said: "Because of your special situation, in order to prevent the leakage of information from being harmful to you. So the Master of Chaos City Master has changed your identity in the Hongmeng to another human race. The king is immortal, and there is absolutely no loophole in it. You can use him for activities in Hongmeng City, and only those at the highest level of our human race have the authority to view your information."

"Oh, it turned out to be like this." Wang Yi suddenly realized.

He is also very interested in Hongmeng City, an organization that gathers all humans and countless foreign powerhouses.

Venerable Pangbo smiled again: "In general, immortal gods will be invited when they formally grant kings. "King immortal" is a basic threshold to enter the Hongmeng. However, there are special circumstances, like your world lord. You just passed through the 20th floor of the Tongtian Bridge. Once you break through the immortality, you will be crowned the king. In fact, it can be considered as meeting the requirements... In addition, your master considers that you will soon go to the outer battlefield. Go to Hongmeng City in advance, which will help you understand more. The conditions of the various races, that's why this permission treatment has been activated for you."

"Teacher, can I enter Hongmeng City now?" Wang Yi couldn't help asking.

"Of course." Venerable Pang Bo nodded. "Hongmeng City is actually an independent special plane in the virtual universe. As long as it is recognized by our human race, we can join Hongmeng City."

"But I still have something to ask you before that. Are you willing to join the Hongmeng?" Venerable Pang Bo's expression became serious.

"Of course I do." Wang Yi nodded.

Needless to say.

One's own teacher, ancestor, fellow...including all the super beings of the human race are in it, who would dare not join.

Moreover, joining it can broaden your horizons, recognize more powerful people, and have broader trading channels, which is also very helpful to Wang Yi.

"Ding!" Wang Yi said, and a dazzling star suddenly condensed in the middle of the living room.

The stars are shining.

Then it gradually shrank into a stream of light, and flew directly on the cuffs of Wang Yi's robe, revealing a small star.

The strength of the official members of Hongmeng is always confirmed according to the record. The stronger the record, the higher the division of strength. The division here is based on one star, two stars, three stars... to seven stars, a very simple division, and all the strong are protected. There will be stars on the arms or cuffs.

This can easily determine the strength of the opponent.

All members who have just joined the Hongmeng are all stars. Afterwards, based on their achievements in reality, the "Hongmeng City Sub-system" of the virtual universe system will automatically determine their achievements and strengths, thereby dividing the ranks.

One star, the first-time Hongmeng is at this level, generally the most common level of immortality.

Two stars, can be regarded as the strongest among the kings.

Samsung, the limit of the king.

Four stars, the most initial level of Venerable Universe, like King Zhenyan can also be divided into this level.

...Seven stars, the most initial level of the Lord of the Universe, Venerable Pangbo and Palace Lord of Eclipse can also be divided into this level.

Of course, there are also the existence of the Seven Stars of Transcendence, the Hall Master of the Hongmeng Hall, each of them is the true pinnacle of existence in the universe.

Hongmeng City is strictly hierarchical-the status is determined according to the level of strength and contribution, and the higher status naturally enjoys more power.

"Boom!" Just as Wang Yi looked curiously at his cuff, a misty human brilliance suddenly hovered in the air. Under the invisible coercion, although Wang Yi could vaguely see the brilliance, he was fundamentally under the coercive pressure. Can't look up.

It was as if the ant was in front of the gods, without any resistance.

Although Venerable Pangbo could look straight, he bowed his head slightly and bowed to the misty human figure to show respect.

The human light and shadow bowed their heads slightly, leaning over Wang Yi.

"Human Wang Yi!"

The brilliance makes a sound, the sound is hard to distinguish between men and women, and it penetrates the soul.

"You are welcome to join Hongmeng. From now on, you are an official member of Hongmeng!"

"The crisis of the universe is lurking, and the race needs to survive. It needs the strong of the race to fight, fight for the Hongmeng, and fight for mankind. This is the mission of every human strong, and it is also your mission." The light and shadow gradually disappeared, but the voice It was constantly echoing in Wang Yi's consciousness, and the entire living room was silent for a long time.

"Why, are you scared?" Venerable Pang Bo, who had already sat down at this time, raised his wine glass and smiled slightly.

"Teacher, who is the human light and shadow just now? It feels more terrifying than you." Wang Yi couldn't help asking. "Could it be that a certain pinnacle of our human race exists?"

"No...but you don't need to know so clearly. If you are really curious...when you truly become a super existence in our human race, you will naturally know." Venerable Pang Bo did not answer Wang Yi's question.

Looking at the expression of Venerable Pang Bo, Wang Yi already had a guess in his heart.

It is estimated that it is not the master of the universe of the human race. According to Wang Yi's guess, it is likely to be one of the consciousness of the master of the mechanical universe that controls the operation of the virtual universe. In fact, it is super intelligence?

Teacher Pangbo respected the human light and shadow so much just now, or... was it respect for the original ancestor of the first human leader?

But as the teacher Pang Bo said~www.mtnovel.com~ these have nothing to do with him now.

"From now on, Wang Yi, you are already a member of the Hongmeng. You can now check the details of the Hongmeng." Venerable Pang Bo said. "Before you enter Hongmeng City... first carefully check some information, so that you don't have to have your eyes black when you enter Hongmeng City, and you don't know anything. If I want to explain in detail, I don't know when to explain it. After all, there is too much to describe in Hongmeng, and I can't finish it in a short time."

"I see, teacher." Wang Yi nodded.

"Well, then I will go back first." Venerable Pang Bo glanced at Wang Yi, "When you go to Hongmeng City, you will automatically pretend to be another immortal king, and that new identity information will also be sent to you, hello Take a look, don't miss your feet then."

Wang Yi personally sent Venerable Pang Bo out of the gate of the manor and watched Venerable Pang Bo disappear into the distance before turning back to the small building of the manor and going to the study to check information about Hongmeng.
