

A God 281

[Chapter 281: Return to Chaos City](#)

Hongmeng's base camp is in a plane space specially opened up in the virtual universe.

There are countless stars in that plane space.

Surrounded by the stars, there is a huge floating ancient city. This ancient city suspended among the stars... is the "Hongmeng City" where countless powerful people live.

A silver-haired man in a black robe embroidered with golden stars and shining silk thread walked from the street of the community outside the city of Hongmeng. He was slender and had an extremely beautiful face. His pair of golden vertical pupils were extremely deep, and there was also on the crystal white skin. The purple lines add to him a strange feeling.

This is Wang Yi's identity in the Hongmeng City, a human immortal king who has been retreating for many years in the wilderness area-Gray.

Gray is a lone ranger, and his relatives and friends have already died in the long years. Because of his lonely character, he has few friends and has been cultivating alone in the wild star realm.

He was invited to join Hongmeng about 150 million years ago, but because of his personality, he rarely appeared in front of people outside Hongmeng.

Of course, this is the identity that Chaos City Lord arranged for him to cover.

"The outer city of Hongmeng City is much more lively than the inner city." Wang Yi, who changed his appearance, stood at a crossroad at the end of a street in the outer city, surrounded by alien races of various appearances. Humans passed by him without anyone. Follow him.

And in the open space in front, there are nearly a thousand immortal kings of various races gathered together, scattered everywhere, chatting and drinking in twos and threes, in a leisurely look.

There are too many strong people here.

In addition to one hundred thousand immortal human kings, there are more than 3 million immortal kings of various races gathered here, and those whose strength is divided from one star to three stars live in the outer city.

The strength is divided into four stars-six stars, living in the inner city, and almost all of the universe venerables in the inner city.

At the core of the entire Hongmeng City is a shining and mysterious palace that is one million kilometers high. It looks like a giant sword that will pierce the starry sky. This is the "Hongmeng Palace."

The "Seven Stars" existed in the Hongmeng Hall, and the Seven Stars existed... at least it was also the overlord of the universe such as Palace Lord of the Eclipse and Herod.

The masters of Hongmeng Hall... are beyond the existence of the "Seven Stars".

The arrival of Wang Yi also made the immortal kings see.

"Who is that? It's a bit strange. Is it the old man on our side?"

"I don't know, I haven't seen him either."

"It seems to belong to the human race."

Among those immortal kings, there are only more than a dozen human immortal kings, and the others are alien races.

However, in Hongmeng City, humans are respected, and mankind is the ruler of Hongmeng! So humans have a high status here.

Few alien races dare to directly offend humans here.

"Hongmeng City is the real place where fish and dragons are really mixed and powerful." Wang Yi also noticed the eyes of those foreign races, but he didn't care.

In Hongmeng City, all the strong bodies have the same physical fitness, and they are all fragile bodies maintained at the apprentice level. "

It is impossible to judge a person's strength simply by looking at his appearance.

Because everyone's body, the strength of the force, etc. are the same, the only difference is consciousness... and as long as the consciousness converges to coercion, it is impossible to judge the strength from the surface.

Therefore, Wang Yi is not afraid of being discovered by others.

If it were a realm master, Hongmeng City, which was full of immortal kings, was still very eye-catching.

"Hey, are you new here? I don't seem to have seen you." A human immortal king with short purple hair and silver armor cloak came over and greeted warmly.

"No, I'm already here, but I rarely come out." Wang Yi smiled slightly, perhaps because he had changed his "appearance", his smile was slightly stiff.

"Oh, really, I said I have lived here for so long, why haven't you seen you, you must rarely log in to Hongmeng City, right?" The immortal king suddenly realized. Then he took the initiative and warmly invited. "Are you free? Would you like to have a drink together?"

"Okay." Wang Yi didn't refuse either, and responded with a smile.

"My name is Qiu You, the titled Skull Dust King, how about you?"

"Gray, the titled Bloodshadow King."

With a new identity, Wang Yi chatted with the immortal kings who had just met.

Wang Yi also discovered that in Hongmeng City, the immortal kings of mankind are united.

Because every king's residence in Hongmeng City is fixed. Unless they move into the inner city, because they are destined to be in the same community forever, they will naturally form a group of forces, each holding a group.

...

"My goal this time is to elevate the law perception to the 20th floor in Chaos City, and create a unique school that can satisfy me."

Wang Yi bid farewell to his family, took a deep look at the figure of the earth for the last time, then turned and stepped into the passage of the kingdom of God that loomed in the radiance behind him.

Target, the headquarters of the virtual universe company.

Wang Yi's family gathered together and watched Wang Yi's figure disappear into the glory of the kingdom of God. Everyone's expression became gloomy. This time they said goodbye, and I don't know when Wang Yi will come back.

The other side.

"Jakes, thank you for this time."

Wang Yi looked at the endless continent floating in the starry sky in the distance, smiled and said to the burly green-skinned man next to him.

Next, Wang Yi will follow the Virtual Universe Company's own spacecraft and other immortal gods into the "Original Universe."

As for Jax and the guards, they couldn't follow in.

When Wang Yi leaves the Chaos City, it will be the pinnacle of the realm lord, and he will no longer be able to bring the guards with him.

In other words, from this moment on, the guards had already separated from him.

"Your Highness, take care." Jakesi solemnly said.

Wang Yi smiled, waved to Jakes, then boarded his spacecraft and flew towards the base camp of the virtual universe company headquarters far away.

The original universe, Chaos City.

An oval-shaped spaceship of the Virtual Universe Company flew in from outside and stopped above Chaos City. Then the hatch opened and dozens of immortal gods with different appearances flew out. Among them was Wang Yi, a black-haired young man in a fiery red robe.

"Chaotic City, I'm back again." Wang Yi glanced down, and the chaotic air currents filled the vast Chaos City. Countless cultivators on the cultivating platform were sitting quietly, some showing their thoughts, some self-consciously engraving on the rooftop, most of them No one is standing by, only a few have noticed an extra spacecraft in the sky.

And in the horizon, in the cracks, a stalwart figure stopped there, also enlightening.

Chaos City is the oldest holy land for human cultivation.

"I really miss it. Now that I am here, sign..." Wang Yi patted his forehead abruptly.

"Forgot to sign in the panel that guy is still updating."

Since Wang Yi broke through to the world leader, the sign-in panel has been kept in the state of [Update...] ~www.mtnovel.com~ There is no response to Wang Yi's call, and he can no longer sign in.

Wang Yi is a bit regretful. He originally wanted to take advantage of this time to sign in in Chaos City. After all, his status and status were not enough before, and there are still many places he can't get close to.

Who knew the sign-in panel would suddenly drop the chain.

"Forget it, now I can only rely on myself." Wang Yi sighed and flew in a direction in Chaos City, which was near the Central Chaos City Lord's Mansion, and was also the residence of his teacher Venerable Pang Bo in Chaos City.

When I came back this time, Wang Yi lived in the teacher's residence.

[Chapter 282: Time and Space Warrior](#)

In Chaos City, an ancient mansion covering a vast area, in the courtyard.

Wang Yi was talking with a man in a gray robe, black hair, and a pair of red antlers on his forehead.

"Senior Brother Mohe, I've interrupted this time."

"Junior Brother Wang Yi, what are you talking about? You and I are the same class. I just asked the teacher to help him look at the mansion. Since you have been invited by the teacher, you can naturally live here."

The seventh disciple of Venerable Pangbo, "Mohe King" said enthusiastically.

This time when he returned to Chaos City, Wang Yi would not live in his cultivation residence. Instead, he listened to his teacher Pang Bo's previous message, and came to the teacher to live in the Chaos City mansion.

Although "King Mohe" is an ancient and powerful pinnacle and immortal, but facing this future, he may catch up with the teacher, and his status is far above him. The younger brother who is favored by the teacher dare not be indifferent at all, but is enthusiastic. Attentive hospitality.

"By the way, Brother Mo He, the teacher has accepted so many apprentices for so many years, hasn't one breakthrough?" Wang Yi suddenly asked curiously after a meeting.

"Venerable Pangbo" is one of the oldest human beings, and his strength is comparable to the general master of the universe. He taught more than a dozen disciples to be kings, but none of them broke through to the venerable. It really made Wang Yi feel a little strange. .

There was a trace of shame on King Mohe's face, "Hey, it's because we didn't live up to our expectations and let down the teacher's expectations... In the past, there was a fourth senior under the teacher, who was a venerable person, but was later calculated by an alien in an ethnic war. In the end, he was sacrificed, and he couldn't even be resurrected. The teacher was also depressed for many years."

"So that's it." Wang Yi came to understand.

A disciple of the Venerable, must have been cultivated for a long time, devoted endless efforts, and spent many years with him. The relationship must be deep, I am afraid that it is deeper than ordinary father and son... But suddenly fell, and he will never be able to resurrect... Such sadness, helplessness, change Everyone will be sad.

King Mohe looked at Wang Yi, "Junior Brother, you are the most talented among us and the most accomplished in the future. Don't let the teacher down."

In the universe, the relationship between master and disciple is very deep, just like the closest relatives... Venerable Pangbo's disciples have followed him for many years, and naturally want to make the teacher happy.

However, it is difficult for them to do it, and they can only rely on Wang Yi.

"I will work hard." Wang Yi said seriously.

"The teacher told me to give it to you before." King Mohe took out a bronze ring and handed it to Wang Yi.

"There are things the teacher gave you, and there are comments. If you don't understand, you can go to the virtual universe and ask him."

"The teacher gave it to me?" Wang Yi curiously took the space ring, and the power of the world immediately penetrated.

This is actually a very ordinary space ring. Wang Yi's power of the world can easily penetrate into it, and he can see an object quietly placed in the space.

"Huh? This is..."

Wang Yi felt that the appearance of this object was very familiar, and it was very similar to his spiritual weapon "Universal Magic Soldier", but he felt that it was a little different.

It is a three-meter-long "shuttle" with pointed ends and a round center. The whole body seems to be cast from black and white exotic metals. There are countless mysterious and mysterious patterns, imprinted on it like exquisite patterns, forming strips of black, The white roaming snake, as if it had come to life... an ancient and eternal aura radiated from above, and just by looking at it, you could feel the earth-shattering coercion that might burst out at any time.

Wang Yi's eyesight has also been tempered now, and he can see at a glance that this weapon is by no means simple, it should be a "heavy treasure."

And it is also a treasure of the combination of the law of "time and space".

"The teacher actually gave me a treasure?" Wang Yi felt complicated.

A heavy treasure, a heavy treasure, even the difference in value starts with a unit of trillions of mixed yuan, and the average venerable only has two or three heavy treasures.

Enough to make the Venerable jealous, the immortality of the king was crazy.

Before that, Teacher Pang Bo gave him the "Six Paths of Fire in the Sky", which was worth trillions of points.

Wang Yi has checked, like those 126 basic secrets... said they are basic, but most of them are far more immortal than ordinary kings. The secrets of many venerables... add up to more than tens of billions of points.

Not to mention Venerable Pangbo's pinnacle and ultimate jerk, and the combined value will never be lower than that of "The Six Paths of Fire".

Coupled with these secret methods in front of him, the resources Venerable Pang Bo invested in Wang Yi may have gone by tens of trillions.

If it is an ordinary venerable, then it is estimated that the family is almost ruined.

That is to say, Venerable Pangbo is the most powerful, comparable to the general master of the universe, and he is willing to spend this on a realm master-level disciple.

"teacher....."

Wang Yi's heart was heavy and warm.

"Junior Brother Wang Yi, what did the teacher give you?" King Mohe next to him saw Wang Yi sitting there in silence and couldn't help asking.

He was also curious to ask like that, like the fellow brothers under Venerable Pangbo, they are still relatively close and united.

An invincible and arrogant and immortal king like the Sky Feather King, Wang Yi was still a cosmos class at the beginning, but because Wang Yi was his junior, he was equally entertained and presented many precious treasures.

This is the relationship between the same family. In the future, camp grouping, practice, adventure, battle... are all very reliable.

"The teacher gave me a weapon..." Wang Yi raised his head without concealing it.

Although a weapon is a treasure, King Mohe is his senior brother. Since Venerable Pang Bo let him guard the mansion and prove his reliability, Wang Yi has no need to lie or conceal it.

"It turns out that the teacher actually gave you the 'Time and Space Warrior'?" King Mohe was taken aback.

"Space-time magic weapon?" Wang Yi asked suspiciously.

King Mohe looked at Wang Yi and explained with a smile, "The space-time magic weapon is the original form of the universe magic weapon you used before, also called the 'time and space shuttle'... I once heard the teacher say that its real name is 'Qi Longsuo' ...But it's just a name, it doesn't matter."

King Mohe looked serious, "One of the nine masters of the magic weapon, the universe magic weapon, is a "simplified version" created by the teacher a long time ago when the teacher created the secret technique... "

"Junior, you should also find that the upper limit of the use of cosmic magic weapons is very high, but it is almost the same up to the 18th floor. That is to say, this is a weapon that can barely be a king. In fact, when it comes to a king, there are a lot of better and more handy weapons. Weapons can exert their own secret magic power. Therefore, for those of us who practice "Universal Chaos Stele", which can be used in the early stage, we will have to find weapons that are more suitable for us later."

Wang Yi also nodded in agreement~www.mtlnovel.com~ such as secret methods, weapons...they were only used in the early stages, but later. Many powerhouses have created more suitable weapons and secret methods by themselves!

"Space-time magic weapon... The time-space shuttle is a thought-power weapon created by the teacher in order to give play to the power of his secret method, and it is a weapon that fits his time and space.

"The King Mohe said with emotion, and he also has a trace of envy for Wang Yi.

"The cosmic magic weapon is the limit when it comes to being a king."

"The Time and Space Shuttle is a great treasure, but it has at least two forms, and it is a top treasure that allows the Venerable to perform the power of the secret magic perfectly!"

"This is the gap!"

"So..." Wang Yi understood.

[Chapter 283: Start practicing](#)

Heavy treasures are simply divided into "ordinary heavy treasures" and "top heavy treasures" according to power.

"Ordinary Heavy Treasures" generally only have a single form. After the immortality of ordinary kings is enlightened, they can barely display them by burning the divine body.

"Top heavy treasures" are rare treasures for the Venerable. Many Venerables do not have a "top heavy treasure". The Venerable's burning divine power has brought new changes to the top heavy treasures, which can have secondary forms.

The time shuttle actually has a second form, which is definitely the top treasure.

This time and space shuttle alone, I am afraid that Wang Yi, a unit worth a million yuan, would believe it.

And if there are three forms, then it will cross the threshold of the treasure.

However, even if the venerable cherishes the "Treasure", it is not common for the venerable to have the "Treasure".

In addition, he was the creator of the cosmic magic weapon, created by Venerable Pangbo himself... it fits Wang Yi's current path very well, and it is naturally twice the result with half the effort to master it through cultivation.

"Teacher is really..." Wang Yi's rough bear face appeared in his mind, and his mood was a bit complicated.

In fact, as long as Venerable Pangbo reaches the immortal king, he will be given a "heavy treasure." Venerable Pangbo can still afford...but Wang Yi's is the most precious. At this time, even Venerable Pangbo is a treasure. It is impossible to take out too much.

After all, this is the "top treasure" second only to the "great treasure", and Venerable Pangbo also spent a lot of effort to build it.

In addition to the precious treasure of "Time and Space Shuttle", there are three tokens in the space ring, which were handed over to Wang Yi by Venerable Pang Bo. If he encounters danger outside, he can crush the tokens and trigger the spiritual imprint inside, then Pang Bozun The person will rush over immediately.

Wang Yi was very touched, to see what his own person is, this is it.

The protection of the human race to themselves is actually more like an investment in Wang Yi's view.

But Venerable Pang Bo made Wang Yi feel the real care and attention.

...

Chaos City, the residence of Venerable Pangbo.

Wang Yi sat cross-legged on a large cyan stone plate in the courtyard, his eyes closed.

"Now, on a secret technique in time and space, I have the Universe Chaos Tablet, "The Evolution of the Universe", and a large number of secret techniques given to me by Teacher Pang Bo, which can be used for cultivation and research."

"The way of the beast gods includes "The Six Ways of Fire and Sky" and the sculptures of the beast gods."

"The time flow of the time world is tens of thousands of times!"

"Three bodies, practice together!"

"Now my real law perception is between the 18th and 19th floors of Tongtian Bridge."

"After obtaining the Secret of the Nine Tribulations, my efficiency in fusing the flame blood jade has also increased, and now it has reached about 50%..."

Wang Yi has not given up on the fusion of Yan Xueyu, but most of his time is still spent on cultivation.

In fact, because of the time realm, Wang Yi has been tempered for longer than the outside world, so his will rise very quickly, reaching a level comparable to immortality very early, and now he is almost close to the "Venerable."

However, the immortality of the will of the venerable is a hurdle that cannot be achieved overnight, and Wang Yi needs more tempering and time.

In fact, Wang Yi is not in a hurry to merge the blood jade, and it will be a matter of time before the integration is complete.

He now pays more attention to the enlightenment of the law and the secret law.

"I have a talent that is stronger than Kot... but the talent also has its limits."

Wang Yi is very clear that the outside world's evaluation of his "the most powerful and peerless genius in the history of mankind" is actually inconsistent.

His talent is better than that of Kedi, Palace Master of Eclipse...but it is not that big yet.

His speed of progress is more dependent on the "time world" a hundred times and a thousand times the time flow rate, the "cosmic chaos stele", the "three major bodies", the blood of the beast gods and the increase in the degree of compliance with the laws of the universe... and so on.

And Wang Yi's own talent actually has a limit.

Therefore, Wang Yi can pass through the 20th floor of Tongtian Bridge, through the original Master-level Tongtian Mountain, and join the Hongmeng...become an unattainable genius in the eyes of others!

But in fact, Wang Yi still has a ceiling to lift the space.

According to Wang Yi's estimation, the 20th floor of the Tongtian Bridge is his limit...If you want to break through, you must get other triggers.

"The law of time, the law of space, thoroughly master one, it is the Lord!"

"If you want to become the Master of Space, you must master the three extremes of the laws of space: "teleport," "blockade," and "strangle", and master them all, to achieve consummation!"

"The same goes for the Venerable Time, the flow of time, the distortion of time, and the annihilation of time! These are the three ultimate applications of the law of time!"

"There is a time world. One year is equal to 10,000 years. In the first year, try to comprehend the six extreme applications of the laws of time and space."

"The way of the beast gods can be put aside for the time being, and the main energy is used to understand the way of time and space!"

"If you have mastered the application of the six major laws, the perception of the laws will reach the 20th level, and you can almost begin to create secret methods."

Wang Yi's training thinking is still very clear.

However, if you let others know that he would want to master the ultimate application of the six laws that countless strong men have been unable to master for hundreds of millions of years... I am afraid that he will be crazy.

It's just that the outside year is 10,000 years for Wang Yi. Although Wang Yi's deity is limited by the flow of time outside, the two bodies can cultivate in the time world. Wang Yi can invest most of his consciousness in the time world. On Oita, the deity stayed in reality, speeding up the cultivation speed.

"It's a pity that the deity can't enter..." Wang Yi didn't dare to enter the realm of time.

It's safe to fall in the primitive secret realm, and there is no Venerable to follow at any time.

In the outside world and Chaos City, Wang Yi can't do this.

The realm of time is his big hole card and cannot be exposed at will.

If a foreign race or a hostile powerful person knows that he has such a life-saving time and space, a Zerg mother emperor, the master of the universe or the strongest soul master, jumps out and gives him a soul attack... Then Wang Yi will sit on the wax.

The Lord of the Universe wanted to sneak attack on him, but Wang Yi didn't think he could escape.

"It would be great if there was a piece of the soul of the strongest treasure in the body." Wang Yi couldn't help thinking.

"However, the supreme treasure seems to have requirements...Each of the requirements for refining the supreme supreme treasure is extremely demanding. In the original work, Luo Feng is also considered abnormal. If he wants to inherit the Star Tower, he is made to die and almost finished... I have no way to find a Xeon Supreme Treasure anywhere. The entire human race wants it in their dreams, but there is none...unless..." Wang Yi silently cast his gaze on the quiet sign-in panel.

"..."

"Good son?" Wang Yi said tentatively~www.mtlnovel.com~Updated, please wait...]

"brother?"

【Update, please wait...】

"Big brother?"

...

"Ancestor, you are the ball, come back soon..."

[Chapter 284: 1 year, extreme](#)

Wang Yi temporarily settled in Chaos City.

There are several ways to become a permanent resident of Chaos City, but the most remarkable one is to get through the eighteenth floor of the Tongtian Bridge!

Anyone who can pass through the eighteenth-story bridge is extremely powerful in Immortality, and they are all qualified to open up sects in Chaos City.

Wang Yi has now passed the 20th floor of Tongtian Bridge, and he is also eligible to own his own independent house in Chaos City. It is not a training residence that everyone can use... but a house that belongs to him forever.

This is also an honor and special treatment!

Just like King Zhenyan, King Tianyu, King Longyan... some invincible mansions, Wang Yi can now have a magnificent mansion!

In addition, you can start a school and give lectures!

It's okay to accept disciples!

This is very incredible. You must know that Wang Yi was just a newcomer who just came to Chaos City more than two hundred years ago (primitive universe time). After more than two hundred years... he can actually start a sect like those invincible king masters!

It is the only one in the history of Chaos City!

It's incredible!

Of course, in order to hide his own news, Wang Yi would not do this.

Even those venerables who watched Wang Yi's crossing the sky bridge that day were ordered not to disclose the incident of Wang Yi's crossing the sky bridge, so as not to attract greater attention from the alien race.

Although Wang Yi is now ranked first on the list of geniuses to be assassinated by foreign races.

The residence of Venerable Pangbo.

"What I have to do now is to comprehend the seventh picture of "Universe Chaos Stele" to the extreme as soon as possible."

Wang Yi thought in his heart.

"The Monument of Universe Chaos" is the treasure of mankind and contains the avenue of time and space.

It is also the only chaos monument that has both "time and space" concurrently repaired!

Time is the respect! Space is king!

One who fully understands the laws of space is the Master of Space.

To fully comprehend the law of time, one is the Lord of Time.

At the same time, the person who fully understands time and space, truly controls time and space, has incredible superpowers such as time-space reversal...that is the "Master of the Universe".

According to the classification of the chaotic stele, the seventh picture of "Universe Chaotic Stele" has a thorough comprehension, and then you have the insight of the 21st floor of the Tongtian Bridge, and you can achieve time! Or the Lord of Space!

"So, the seventh picture of the Cosmos Chaos Stele contains the complete laws of time and space... But because of limited ability, almost everyone who cultivates the Cosmos Chaos Stele breaks through one of the routes." Wang Yi said softly. .

If you want to comprehend the eighth picture of the cosmic chaos stele... then at least one of the "laws of space" or the "law of time" in the seventh picture must be thoroughly comprehended, otherwise it will not be possible to continue practicing.

After the eighth picture, it is more inclined to the combined application of the law.

Therefore, if a complete law is not enlightened, it is difficult to continue enlightenment.

"So..." Wang Yi touched his chin. "In history, no one should be able to fully understand the seventh picture of the Chaos Monument."

"I'm afraid the eighth picture, the ninth picture is the same."

Wang Yi felt terrified!

The Universe Chaos Stele is indeed the most esoteric among the 52 Chaos Steles, and the most difficult one to cultivate!

Although the Giant Axe Chaos Stele has 32 floors, it ranks first among the Chaos Steles, but it cannot be more difficult to comprehend than the Universe Chaos Stele.

The cosmic chaos monument is very special.

Of course, maybe not all of them have been comprehended, but if you comprehend the seventh picture nine out of ten, plus the eighth picture, the ninth picture... the combined rule of perception, it may not be better than the ordinary universe. Main low.

It's just that there is no master of the universe in control of a time and space, and the ability to reverse time and space is no more.

"My teacher, Venerable Pang Bo, shouldn't he be stuck in this thread? Or is it because of other reasons on the road of cultivation?" Wang Yi's thoughts glowed.

"There is also the first person in human history. The teacher's original ancestor, who has been invincible in the universe and the tenth-order majesty, and the Lord of Chaos City, is walking on the path of time and space integration?"

The original ancestor was indeed a surprisingly talented character, and Wang Yi also admired it very much.

It's a pity that the road went crooked, trying to seize the original universe, but was finally suppressed forever.

Wanting to seize the original universe in the original universe is a bit of a death.

Otherwise, the human race has two of the strongest in the universe, and one is still invincible. Where there are other races in the primitive universe, human beings can dominate as a family, even if the ancestor **** teaches, facing the original ancestor, they have to bow their heads.

"Start practicing now." Wang Yi stopped thinking about it.

Wang Yi's training in Chaos City began.

"Cosmic Chaos Tablet", "Universe Evolution", and many secrets granted by the teacher... The two avatars are enlightened in the realm of time, and the human deity is practicing in reality.

The time world is now 10,000 times the flow rate of time. One year has passed since the original universe, and 10,000 years have passed since the time world.

It is equivalent to 10,000 years of comprehension for the two bodies!

Moreover, in combination with the outer operating laws of the original universe, the speed of perception is indeed much faster than outside.

In Chaos City, the human deity cannot enter the time world, so the perception efficiency will be much slower, which is undoubtedly a hindrance.

But it's important?

If one year doesn't work, it's ten years, and if ten years doesn't work, it's a hundred years.

In 100 years of the original universe, the time horizon is 1 million years.

With the addition of the cosmic chaos monument and watching the apparently operating laws, no matter how slow the three major bodies are, they can push their perception of the laws to the 20th floor of the Tongtian Bridge!

It is to maintain a tens of thousands of times the time to accelerate, and 330,000 mixed yuan units are needed a year.

100 years is 33 million yuan unit.

For those immortal kings who have reached a bottleneck in their sense of law and have no special encounters, it is not worthwhile to use the flow of time to speed up the practice.

Because even if they double the flow of time by tens of thousands of times and cultivate for 100 million years, their progress will be very small! He also lost all his wealth, and the immortal gods have an endless life span, time is eternal, and there is no such rush mentality.

What they lack is just chance!

It is Wang Yi, if the law senses the bottleneck, it is impossible to continue to maintain this cultivation method.

The two avatars are practicing in the realm of time. Wang Yi's human body is not idle. He occasionally goes to the Chaos City Lord's Mansion to understand the Chaos Monument. What is surprising is that what he has enlightened is not the Universe Chaos Monument, but the "Great Axe and Chaos

Monument". , "Jiuyu Chaos Monument", "Dragon Walk Chaos Monument", "Black Hole Chaos Monument"... and other chaotic monuments.

Each chaos monument will be comprehended for seven days, until the number of comprehensions has been exhausted.

In the eyes of outsiders, this approach is simply incredible.

After all, what Wang Yi is currently practicing is "Universal Chaos Tablet", and every opportunity for comprehension is precious, but Wang Yi wastes all the time on other Chaos Tablets.

Even after passing through the 21st floor of Tongtian Bridge, I only have 21 chances of enlightenment, each time only has 7 days!

This is simply a violent thing!

Venerable Pang Bo couldn't help asking Wang Yi for inquiries. Wang Yi smiled and said to look for inspiration and to follow the analogy...

Venerable Pang Bo pondered for a while, and felt that this disciple had always been mysterious and might have his own ideas.

After reporting to the teacher, "Chaos City Lord", he simply gave Wang Yi another 30 opportunities for enlightenment!

Therefore, after Wang Yi came to Chaos City for a year, he had to comprehend all 52 Chaos Monuments of human beings.

And Wang Yi often asked Venerable Pang Bo for advice, and the progress of cultivation shocked Venerable Pang Bo.

It's like a 10-year-old kid in my own family who grew 1 year old the next day~www.mtlnovel.com~ In the past week, he became a 17-year-old boy!

This kind of cultivation speed, after a long period of time, Venerable Pang Bo, who has seen countless geniuses, found it incredible, and he was full of expectations for this disciple in his heart.

...

One year later, for the extremely ancient Original Universe, this point of time is just fleeting.

Chaos City.

An old mansion.

In the courtyard, the red-robed black-haired boy sitting cross-legged on a large blue stone slowly opened his eyes.

Those eyes were crystal clear and profound, as if time passed and space changed.

"Tongtianqiao's 20-story rule, the ultimate, and success."

[Chapter 285: Master and apprentice](#)

"a thousand years!"

"The ultimate application of the three aspects of the law of space... teleportation, blockade, and strangulation!"

"The ultimate application of the three aspects of the law of time...flow velocity, distortion, and annihilation!"

"Master everything!"

Wang Yi's eyes seemed to contain the great terror of time and space.

Ten thousand years of hard work and insights in the time world have also transformed Wang Yi's mind and will once again!

It's only a trace away from the Venerable...

"but..."

It's over!

Wang Yi stood up, flicking his long black hair, and his red fine robe was spotless.

Wang Yi walked to the flowers and plants in the courtyard, looked down, and said softly: "The laws of time and space have already realized the current extremes. Now if you want to go further, you can only integrate one of the laws of time or space. , Break through as the Lord!"

"But... I'm just a world master now!" Wang Yi felt helpless.

Lord-Immortal-Venerable-Lord of the Universe.

This is the division of hierarchy in the universe.

One of the most important prerequisites for breaking through to the immortal gods is to truly understand one of the eight laws of the lower series.

For Wang Yi, there is no difficulty at all!

His law of origin of fire has already been recognized by law of origin, and his comprehension in the law of origin of fire has been extremely high!

Coupled with the comprehension of the "Beast God Mood" before the Yanxing Giant Beast clone, the law of origin of fire has already accumulated to an extremely deep level.

In the sense of the law of the origin of fire, it is close to the realm of becoming the immortal **** of fire.

But for Wang Yi, becoming immortal is not that simple.

Because of certain conditions, he must break through the four bodies together.

But now Wang Yi has only two clones, and the last one has not been conceived.

"Come slowly, now the law perception has reached the 20th floor of the Tongtian Bridge, and the seventh picture of the Universe Chaos Stele is only a trace away..." Wang Yi murmured.

Now Wang Yi has long been recognized by the original laws of time and space!

In the future, he can choose the law of time to become the Lord of Time, or he can choose the law of space to become the Lord of Space!

Perhaps, you can also choose the most incredible path...Both break through together!

Of course, that is very, very difficult! More than the law of fusion!

"The laws of time and space have reached the bottleneck, and it doesn't make much sense to continue to immerse yourself in cultivating." Wang Yi secretly said in his heart. "It's time to create a secret method."

A long time ago, Wang Yi thought about creating his own secret method after he realized the bottleneck of the law.

Now is the time.

"My human body is a Void Zerg clone to create the secret method of time and space... It is difficult to help me with the Yanxing Giant Beast clone. At this time, you can go to the "Six Ways of Fire in the Sky" and the artistic conception of beast gods."

"On the Secret Code of Nine Tribulations...because of the third tribulation practice, there is a 12-fold genetic level, and my will has improved a lot over the years. The human body's blood jade can already fuse to 56 pieces, and the Void Zerg clone can fuse to 61 pieces. The avatar of the Yanxing Giant Beast has merged to 8,215..."

Wang Yi exclaimed, "The Yanxing Giant Beast is really suitable for fusing the blood of the Beast God!"

The star beast has a deep relationship with the beast god!

In the earliest days of the universe, there were eight born beast gods, who were the incarnations of the law of fusion, and were born to be the powerful existence of the Lord of the universe!

"However, it is becoming more and more difficult to merge now, so take your time, as it is to temper your will."

The process of fusing the blood of the beast **** is very painful due to the impact of the evil spirit, and it is very helpful to the tempering of the will.

Wang Yi is not in a hurry, as long as he can raise his genetic level to ten thousand times before he becomes immortal.

...

The virtual universe, an independent plane belonging to the Venerable.

In the majestic palace in black and white, Wang Yi respectfully stood in front of Venerable Pang Bo.

Venerable Pangbo sat on the chair, looking at his lover like a ghost.

"In just this short time, have you raised your perception of the law to the 20th floor of the Tongtian Bridge?"

Venerable Pang Bo felt that the Three Views were severely impacted.

Wang Yi also told him before that his own real law perception is actually between the 18th and 19th floors, and that he can get through the bridge through other means.

Venerable Pangbo also had speculations about this, so he was not surprised at the time.

But now the apprentice told him that his law perception has reached the level of the 20th floor of the Tongtian Bridge!

That's 20 floors! It's only one line from the Venerable!

Just like the invincible "king of true king", it is only at this level, and has been trapped in this level for countless years!

How long has he been practicing for this apprentice! ?

It has only been more than a year since the last time I crossed the overpass, right?

If it weren't for knowing that his apprentice wouldn't make jokes about this kind of thing, Venerable Pang Bo would doubt if he had heard it wrong.

Wang Yi said again: "Teacher, the reason why the disciple can quickly break through the law in such a short period of time is because the disciple has other adventures..."

Venerable Pang Bo looked at Wang Yi.

"The disciple once got a treasure of time, which can speed up time thousands of times, or even tens of thousands of times, but that place can only be entered by the disciple alone, and there are some restrictions..." Wang Yi felt that the world of time could be explained in another way. Anyway, they I don't know that the time world is in another time and space, and even the strongest can't help it.

In this way, it can also explain some of Wang Yi's previous secrets.

And with Wang Yi's current status and background, even if the human race knew it, it would not covet this time treasure.

"Time treasure?" Venerable Pang Bo moved slightly.

"So that's the case, but I think you have always been outside..." Venerable Pang Bo said in a puzzled way.

"That's because the disciple has a clone!" Wang Yi explained.

"Oh!" Venerable Pang Bo suddenly realized!

This can explain why his apprentice broke through so quickly and repeatedly performed unexpectedly!

Later, I felt that this disciple of me was really a fortune, and his chances were magical, so he was so perverted!

The Purgatory God will inherit! Such a precious and powerful secret method! For so long, only 13 people have obtained the complete inheritance, and his apprentice universe level has obtained it!

The magic sound **** will inherit, a unique inheritance in the entire universe, and his apprentices have also entered!

The treasures that can speed up the flow of time, why did Venerable Pangbo not know that each piece is invaluable!

And listening to the apprentice's words, it can actually be increased to ten thousand times the time flow... This is a bit scary.

The entire human race has no time treasure of this level!

It's not that it can't be refined... It's just too expensive! Just for cultivation, you can temporarily create an environment with ten thousand times the flow rate of time, and if you want to refine a "ten thousand times the flow rate of time", the price is staggering! Even the human race is not willing!

His apprentice didn't know when he got such a treasure!

Treasures such as the Temple of Time are generally manufactured by the "Master of the Universe" who fully understands the laws of time and space.

The created Temple of Time is actually a place of cultivation, but the flow of time is faster.

After ten years of cultivation, maybe only a month has passed outside. But... the Temple of Time is extremely expensive, and it's normal to speed up ten times or a hundred times, and speed up a thousand times is already a sky-high price.

Speed up ten thousand times... at least there is no such time temple in the human race.

There are also clones!

Venerable Pang Bo looked strange.

Seeing this disciple's appearance against the sky, his clone must be extremely difficult!

I just don't know how many clones there are...

but...

The more enchanting the apprentice, the more perverted UU reading www.uukanshu.com, of course, the more happy and proud he is as a teacher!

"Good! Good! Good!"

Venerable Pang Bo laughed, stood up and walked in front of his apprentice, patted his shoulder vigorously, as if he felt uncomfortable, and rubbed his head vigorously, turning him into a chicken nest.

"Okay! My apprentice is really good! You have a clone and so many adventures. In the future, you can rest assured that you can venture outside the battlefield and adventure in the universe." Venerable Pang Bo said happily.

Wang Yi also grinned.

The master and apprentice looked at each other and laughed loudly together.

[Chapter 286: Self-made jerk](#)

"Teacher, my understanding of the law has reached the extreme, I want to create a secret method, I would like to ask you, how should I do it?" Wang Yi asked respectfully.

"Based on your current law, it is indeed time to create a secret method." Venerable Pang Bo nodded, turned and walked back to the large black stone seat, and sat down.

"The secret of creation is divided into many kinds, the method of close combat, the method of far attack, the method of body, the method of power amplitude, the method of auxiliary secret, the method of life preservation... etc." Venerable Pang Bo smiled slightly.

"What you cultivate is the way of time and space. Naturally, you have to use the law of time and space as the foundation and combine your own understanding to create your own secret method."

"Your other avatar teachers don't know. But your human body should take the path of the spiritual master. Then, you have to combine the experience of the predecessors and your own laws and perceptions to create a battle and experiment with you. The secret method that matches Nianli weapons."

"In this way, you can give full play to your own strength."

Wang Yi thoughtfully.

"Teacher, I understand, I will go back and have a good understanding."

Venerable Pangbo smiled and nodded, "Well, if you have something unclear, you can always ask the teacher."

"By the way, you can create the secret method in the virtual universe, and arrange various opponents, which is also helpful to you. I will arrange this for you at that time."

"Yes, thank you teacher."

"Well, you go back and prepare."

Wang Yi saluted, then turned and left.

Venerable Pangbo watched his apprentice disappear into the palace, his eyes darkened, and a smile appeared on his mouth.

"My apprentice, it's really not easy..."

Wang Yi was able to tell himself the secrets that belonged to him, which proved his respect and trust in Venerable Pang Bo and made Venerable Pang Bo very happy.

But now Wang Yi's business is no longer his own business, but involves the human race.

"Go and talk to Teacher Chaos, you still have to tell the teacher about Wang Yi."

...

Wang Yi began to create his own secret path.

The virtual universe, Yuxiang Mountain, Wang Yi's manor is a training ground thousands of kilometers long.

"Condensation!"

A strange metal shuttle entangled in black and white is suspended in the air, and rays of light shoot out. Numerous black and white silk threads are connected in series to communicate the origin of the universe and form a strange monster pattern.

That monster, with three sharp horns, a hideous head, thickly armored scales, wings like a knife, four hoofed feet, and a tail, is lifelike, full of charm, and full of evil spirits.

It looks like a monster pattern, but it is actually composed of countless original laws and secret patterns.

Arrays of powerful time and space fluctuations radiated from above, making the starry sky that the entire cultivation field changed as if it were in the waves, undulating.

A smile appeared on Wang Yi's face while controlling the "Time Shuttle".

"With the treasure of Time and Space Shuttle, it is indeed much easier to use the secret technique."

The function of mind force weapons is mainly that they contain fixed rules and secret patterns. Through some combination and deployment, they can form a fixed trick. At that time, you only need to drive successfully to perform the attack.

A good mind weapon has a strong amplitude effect. With the aid of the 'time and space shuttle', the power of Wang Yi's secret magic naturally soars.

"I studied the cosmic chaos monument, and integrated its law and understanding into the space-time shuttle."

"The last volume of 'The Evolution of the Universe', many superb fighting secrets, and the faculty taught by the teacher, after I realized it, I was also inspired."

"Revisit the secret pattern on the space-time shuttle, and the two merged to create the prototype of this secret method-eroding light."

Wang Yi looked at the black and white monster with amazing power in front of him. With a wave of its claws, it could definitely tear apart a planet easily.

"I have mastered the ultimate in the six laws of time and space. It is very simple to create some common secret methods, and they are rare levels of secret methods."

Like many common world masters and the secret methods created by mediocre immortal gods, they can only be regarded as influential.

This kind of secret method would not even look at it at the current level of Wang Yi.

And many secret methods created by immortal gods and some world master geniuses are all ordinary categories.

"The secret method, simply divided, can be divided into five levels: 'influence', 'ordinary', 'top level', 'peak', and 'ultimate'." Wang Yi secretly said in his heart.

"I can create ordinary secret methods casually now. If I concentrate on research and spend time, it will not be difficult to create top secret methods."

"The only difficult thing is the pinnacle secret method. Even me, I have to work hard to create a set of pinnacle secret methods that suit me."

At the top level, the general masters, peerless geniuses and immortal gods, the secrets created by them are at the top level!

peak! For example, the kind of immortal and invincible kings that are close to the universe, or the secret method created in the period of the realm master is considered to be the pinnacle.

Wang Yi is at this level now!

Every set of peak secret methods that suit you is gradually formed after thousands of tempers, continuous absorbing experience, modification, and thousands of times!

And in the world of time, the clone of the Void Zerg race is also enlightening the cultivation, in front of it is a huge chaos monument, and the "time and space shuttle" is suspended above its head.

In the distance, there is a huge dark red scaly monster called the "Yanxing Giant Beast" like a continuous mountain range. The "Yanxing Giant Beast" is now comprehending the "Beast God Artistic Conception" and "The Six Paths of Fire in the Sky", because the law of space achieves its extremes. The reason for the high and extraordinary talents is that it has cultivated the "Six Paths of Fire" at an amazing speed. The first stage has realized great success in just one month, and the second stage is also very fast. Now it is already experiencing the third stage.

If the third major achievement is achieved, the "Beast God Artistic Conception" even reaches the level of perception of the "Tongtian Bridge 20th Floor" rule! That is the level of King Zhenyan!

However, Wang Yi's main energy is still used to understand the laws and create secrets. During this time, he read and studied many secrets and classics, and his knowledge and insights have also improved a lot.

"It's a bit difficult for me to create the pinnacle of unique knowledge that combines the laws of time and space."

"Then, I will take a step back and create the peak secret method on the time side, or the peak secret method on the space side, and deduct it step by step until it is perfect." Wang Yi already had a plan in his heart.

Creating secrets is actually a process of summarizing what you have learned, discovering your shortcomings, and making up for your progress.

Wang Yile is among them.

Although the time world does not maintain ten thousand times the limit time flow rate, it also has a thousand times.

In reality, a year, the time world has also passed a thousand years.

The cosmic chaos stele can be seen at any time, the outer laws of the initial universe are visible, and many secrets and fascinations mirror each other. The teacher's guidance often fights against various powerful opponents in the virtual universe, discovers its shortcomings, and modifies it...

Under these conditions, Wang Yi's speed in creating secret methods is also amazing.

Only in the third year of Chaos City, he created a top secret method-Eclipse ~www.mtlnovel.com~ and deduced it to Dacheng.

The secret method just created is generally not perfect, and it must be perfected before it can be regarded as a real secret method.

Wang Yi's top secret method "Erosion Light" is a bit special because it is a secret method combining time and space.

The masters who are suitable for cultivating the cosmic magic weapon are already the secret method of the king's level.

Wang Yi put it on the secret treasury of the Virtual Universe Company. The price is 100,000 points, which is relatively high among the top secrets.

And like the secret method created by the master of Meteor Moxing, that is, the ordinary level, only a few hundred or thousands of points.

But Wang Yi's goal is the pinnacle secret method!

Time flies quickly in the days when Wang Yi studied the secrets of creation...

[Chapter 287: Tomine secret method](#)

In the fourth year of coming to Chaos City, Wang Yi kept watching various secrets and then blended into the "time and space artistic conception." Wang Yi began to gradually create his own fighting secrets.

In the virtual universe, Venerable Pangbo also arranged various opponents for him to fight according to Wang Yi's characteristics, and discovered his own shortcomings and shortcomings in the battle.

In the virtual universe, the basic quality is fixed. If you want to exert a stronger combat effectiveness, you can only rely on the law to understand and create a powerful secret method.

Venerable Pangbo arranged for Wang Yi to defeat one opponent before a new one would appear.

If you can beat 500, it means that the secret of creation is already at the top.

If 1000 can be defeated, it means that the secret of creation-has reached its peak. Almost every Venerable Universe can create the pinnacle secret technique.

If you can defeat 2,000 opponents, it means that the secret of creation has reached the extreme.

However, there are many levels of the ultimate secret technique. As mentioned before, the venerable, the overlord of the universe, the master of the universe... can all create the ultimate secret technique of his level.

It's just that it is very rare among the venerables to create their own ultimate secrets. The universe hegemon exhausts his efforts to create it, and the universe master can basically create this level.

It is very difficult to create a jerk, but Venerable Pangbo can arrange opponents at any time, aiming at the shortcomings of the secret technique again and again, this kind of design and arrangement ability... Ordinary Venerable Universe may also be difficult to do.

Wang Yi's speed of progress has also been improved.

After three years in Chaos City, Wang Yi has been able to create top secret methods.

However, it wasn't until the sixth year that he really created his own style of pinnacle knowledge.

There is also a gap between the peak secret methods.

For example, defeating 1,000 opponents is the pinnacle of skills, and defeating 1999 opponents is also the pinnacle of skills. Even if the pinnacle of the cosmic hegemon created by Xidoro, it is only at the level of 1200.

What Xidoruo is really good at is to deduct the "Seven Changes of Gods" to the seventh level, so that he can cultivate to become the lord of the universe...Although no one succeeded in the practice.

On an endless continent, on a vast lake with a radius of tens of thousands of kilometers, the lake is braving blue and cold, and there is no ripple at all, like a beautiful huge blue emerald.

The next moment, this dead silence was broken.

"Boom~~"

The clouds in the sky were shaken open, and shock waves surged in all directions, as if a sky curtain was opened, revealing a huge circular cavity, and in the cavity, two figures were fighting.

Wang Yi, in a dark red battle armor, flew down from the sky with his feet on the Mind Force weapon, and there was a black and white streamer around him.

Opposite him, there is an immortal strong man whose lower body is like an octopus, but his upper body is like a lion. He is holding two machetes in his hands, making a thrilling whistling sound, turning into a stream of light, towards Wang Yi. Dive over.

This is the "Devil Squid Clan", a kind of rare life race in the savage areas of the cosmos. At the same time, it also has many special abilities, which is very difficult to deal with.

Wang Yi coldly watched him rushing forward and pointed his finger at him. The black and white streamer beside him suddenly shined brightly, and the silk threads descended like black and white silk, forming a faint flow with the "space-time shuttle" as the core. With the mysterious black and white swordfish picture, the power of the universe's origin is spurred, and the surrounding time and space

faintly form a whole. A palpitation breath emanates from above, and then it rushes towards the opposite enemy with the power to distort time and space.

Wherever he passed, every inch of space was torn apart, and a huge pitch-black ravine was torn apart.

"Roar..." The lion-shaped octopus-like "Demon Squid" roared that shook the heaven and the earth, and the swords with both hands were smashed by thunder. With a momentum, he cut off towards Wang Yi's black and white swordfish array.

Bang! The space debris shattered and shattered, and the strong shock wave instantly dissipated tens of thousands of kilometers. The lake below was lifted up by huge waves, and a deep crater with a diameter of tens of thousands of kilometers was instantly formed.

In the sky, the battle continues.

A large cosmic space over the mainland collapsed completely. Wang Yi and the "Devil Squid" powerhouse were surrounded by countless torrents of space debris. They were fighting in the torrent of space debris.

The land underneath was also destroyed by a large area and collapsed.

"call out!"

After fighting for a while, the "tiger squid clan" expert made a careless effort. The blade light was broken by the black and white swordfish image, and the black and white sword energy passed by him, tearing half of his body.

"Ah..." The tiger squid clan powerhouse roared, and the torn body condensed again.

But the breath is obviously weaker.

"One time." Wang Yi's expression remained unchanged, still manipulating the magic soldiers to continue attacking and fighting.

The opponents that the teacher set for him are basically immortal gods, but there is no immortal body, but the power definitely reaches the level of "immortality".

Because there is no immortal body, the strength of the divine body is comparable to the peak of the immortal army leader, so it can be destroyed by tearing the body ten times.

Of course, this situation will change depending on the opponent.

For example, the energy life "Starlight Clan" attacked equally, only to be broken hundreds of times before they could be killed.

The black and white swordfish made a flexible turn and swung its tail, like a real fish, and shot at the tiger squid again.

Under the blessing of the artistic conception of time and space, this fish appears and disappears in space, like floating up and down in the ocean of time, which is difficult to catch and incredibly fast.

The tiger squid clan powerhouse tried his best to stop him, but he had been injured and his strength had declined. Of course, he was even more unlikely to be an opponent.

"Puff!"

The black and white swordfish once again avoided his machete and penetrated into his body, a powerful force exploded in his body, tearing his body apart.

Several times in a row, the tiger squid clan powerhouse was killed, and finally blew himself up.

However, because Wang Yi was a remotely controlled weapon, he avoided it from beginning to end, so naturally he was not affected.

"call....."

A black and white swordfish instantly returned to Wang Yi's side, and turned into a bizarre metal shuttle of entangled black and white colors, with countless mysterious patterns on it, and an ancient and mysterious aura radiated from it.

"After seven years in Chaos City, I finally blended this space-time artistic conception and created this "black and white swordfish array"." Wang Yi smiled.

"After defeating these 1,200 opponents, this black and white swordfish formation is a pinnacle."

In the sixth year, Wang Yi had used the "Time Shuttle" to create the "Black Fish Array" of Space Artistic Conception and the "White Fish Array" of Temporal Artistic Conception, but both belonged to the 1000th floor... just crossed the threshold of the peak secret technique. A sort of.

Later, on the basis of "Black Fish Array" and "White Fish Array", time artistic conception and spatial artistic conception were integrated into them. After a lot of battles and fusion...this powerful and more perfect "black and white" was created. Swordfish Array".

"My new **** now is comparable to the third formula of the cosmic master Hidorro's "Beast God Soldier"...that is, the ultimate application of the 20-story rule of Tongtian Bridge." Wang Yi thought in his heart.

"However, the 1000th to 1999th floors are all pinnacles. Compared with the secret techniques created by many powerful cosmic sages, and even some guardians who have practiced for hundreds of millions of years, I am still far behind. I can't be complacent."

"Creating a pinnacle **** suitable for the bodies of people on earth, and if a melee **** suitable for the clone of the Void Zerg clan is created again,...then my strength is the strongest among the crowned kings." Wang Yi felt happy in his heart. .

On the basis of the body ~www.mtlnovel.com~ Wang Yi is actually very powerful, with 12 times the genetic level, 10 times the power of the beast gods, the secret method of purgatory increases the strength of the body by 100 times, and the secret method of magic sounds increases the amplitude of the thought power by 88 times...

Then the body strength reaches 12,000 times, which is equivalent to the immortal level of the primary king.

Mind power can also reach 10560 times. It is also the primary level of immortality!

Wang Yi controls the top treasure "Time Shuttle" plus the pinnacle secret "Black and White Swordfish Array", but the human body has the power of the peak and even the limit of the king!

After all, there are only a few who can create peak secrets in the king, most of them are top secrets.

"Now that the pinnacle secret method has been created, and the subsequent deduction has reached its limit, then it is time to leave Chaos City and head to the outer battlefield." Wang Yi took a deep breath.

[Chapter 288: Hong and Thor who came to Chaos City](#)

In the seven years of Wang Yi's cultivation in Chaos City, 21 years have passed since the original universe.

Many things have also happened in these two decades.

Luo Feng has already broken through to the domain master, and returned to the world of Qianwu as the special envoy of Qianwu monitoring, starting his career as a special envoy that may be hundreds of years.

Wang Yi felt a little sympathetic to the Big Three in the Qianwu Branch. He was sent away at the first, and Luo Feng, a new special supervision envoy, was ushered in the back.

But Luo Feng was still good at talking, and their days were not difficult.

At the same time, Hong and Lei Shen had been practicing in the Secret Realm of Dry Witch for more than two hundred years. They were finally absorbed into the core layer of the Giant Axe Fighting Arena two years ago with their outstanding performance... Originally, Wang Yi thought they would join the Virtual Universe Company, but In the end, they still joined the giant axe battlefield just like the original history.

Join the giant axe fighting field and become the core genius members. According to the convention of the five major forces, they will be sent to the Primordial Chaos City for a practice, and they will also choose the Chaos Monument.

Quiet Chaos City.

Some chaotic air currents occasionally drifted dimly, and in the distance, the sky and the earth were faintly seen cracking from time to time, and a large number of strange secret patterns could even be seen flowing on the edge of the cracked space. That was the appearance of the original operation rules of the universe.

In the vast ancient city, there are countless residences for cultivation, and a strong man on the rooftop is sitting in meditation and thinking, some of which have maintained a posture for thousands of years.

A pitch-black sword-shaped spacecraft flew from a distance and stopped above Chaos City.

The hatch in the abdomen of the spacecraft opened, and hundreds of elite geniuses from the giant axe fighting field flew out of it.

"After flying for two years, it's finally here."

"This is Chaos City?"

"We human beings are a holy place for cultivation."

In the crowd, a bald young man in white and a cold young man in black also flew out.

"Wow!"

"So big! Lots of strong people!" The bald young man in white opened his eyes and screamed strangely.

At this time, a black streamer flew in the distance. Stopping in front of them, she became a tall and thin woman in a black robe with white scales on her face.

She looked at these cosmic geniuses, and those geniuses also looked at her.

"Everyone, I am the reception messenger of Chaos City." The black-robed woman smiled, but her voice echoed in everyone's ears with strange overlapping sounds.

"It's the first time you come to Chaos City. I will lead you to you. Please come with me."

The black-robed woman flew down after speaking.

The geniuses of the giant axe fighting field followed the black-robed woman, and flew down on the wide streets of Chaos City.

Lei Shen and Hong whispered while following the black-robed woman like everyone else.

"Brother Hong, Wang Yi said he is in Chaos City now. We should be able to see him with our own eyes when we come here this time?"

"Well, that's right." Hong nodded.

In the past two hundred years, Thor and Hong have been trained in the Secret Realm of Dry Witches, and with the support of Wang Yi, they have also made great progress. They are now the ninth cosmic rank and have become the core geniuses of the giant axe battlefield.

Of course, it's only the lowest level of the four secret realms.

"We must be like Wang Yi and Luo Feng, and become members of the highest 'Great Axe Secret Realm'!" Hong's eyes have brilliance.

"Of course...Speaking of which, Wang Yi's kid has improved too fast. Luo Feng is now at the domain master level. Wang Yi is faster and now the master..." Lei Shen sighed, "It's really unimaginable."

Realm Lord, Hong and Thunder God on Earth used to be like gods in the eyes.

Of course, now Hong and Thunder God are both cosmic grade, and have been absorbed into the core layer of the giant axe fighting arena, their status and vision are different.

Even if the ordinary world masters face them, they must be respectful and call "His Royal Highness".

...

Chaos City Lord's Mansion.

After Hong and Lei Shen chose the Chaos Monument, they watched the Chaos Monument for seven days in the practice secret room. After they came out, they chose to live in the city, and then went to cross the sky bridge.

Of course, they have only cultivated for three hundred years at the universe level, and it is very difficult for them to get through the first level.

"Tongtianqiao is really difficult."

The two of them sat together in the lobby on the first floor of Hong's residence, and Raytheon complained while drinking wine.

"Of our group, only one has passed the first floor."

"This is a very normal thing." Hong Dan smiled, holding a teacup in his hand, which they brought from the earth. "According to the usual practice, there are very few new talents like us who can break through the first level for the first time. There may be one out of the 100 batches of the second level. We can practice in Chaos City for more than 30 years. Come, don't worry."

"Sure enough, Brother Hong, you can hold your breath." Lei Shen said.

"It's not that you can't hold back your breath. You are too tempted." Hong glanced at this good brother.

"Speaking of it, Wang Yi seems to have crossed the sixth floor for the first time." Lei Shen couldn't help but said, "I didn't know the difficulty of crossing the sky bridge before, but now I realize that Wang Yi really surprised us. What a pervert."

"That guy broke through the 15th floor more than a hundred years ago, you don't know." Hong said helplessly.

Compared with a monster like Wang Yi, isn't this uncomfortable?

"By the way, Brother Hong, did you choose the Illusionary Chaos Monument?" After Thor was depressed, he changed the subject, "I chose the Giant Axe Chaos Monument." Thor said with a grin: "I heard that this is 52 Chaos Monuments. The most significant achievement is also the highest level. I want to try, where can I go."

Thor has a heart of innocence in martial arts.

For him, pursuing progress in martial arts and constantly breaking through himself are the most enjoyable things in life.

And Hong is the same, sincere in martial arts, extremely good at martial arts, and perseverance, so he can make great achievements.

"Boy! You have mail!" The old man Wu's broken gong voice sounded in Thor's consciousness.

"Master, you have an email." At the same time, Hong's Zhizhi also sent a reminder.

"Um?"

"It's Wang Yi's mail."

The two were divided into a trace of consciousness at the same time, entered the base camp of the giant axe fighting arena in the virtual universe, opened the email, and were a little surprised.

"Brother Hong, Wang Yi invited us to visit him." Lei Shen looked at Hong. "He said he is now cultivating at the residence of his teacher Venerable Pang Bo."

"It's really envious that there is a Venerable as a teacher." Thor muttered finally.

"Then let's go. It's been a long time since I saw him in reality." Hong's eyes also had a hint of expectation.

Wang Yi did go back to the world of dry witches before, but at that time Hong and Thunder God were still cultivating in the secret realm of dry witches, so they could only meet in the virtual universe.

In reality, this is the first time in more than two hundred years.

Chaos City, the residence of Venerable Pangbo.

"drop!"

Because of Wang Yi's prior authorization, the mansion's intelligent system confirmed the identity of the two and no longer blocked them.

"Two, it's Mr. Hong and Mr. Thor." A black-faced man dressed as a servant stood at the magnificent and spacious main entrance. He smiled and said, "His Royal Highness Wang Yi has ordered, please come with me."

Hong and Lei Shen looked at each other, shaking in their hearts.

Immortal gods.

An immortal **** is actually a servant?

And it seemed that there was more than one immortal servant in this mansion.

As a matter of fact, it is quite normal that Venerable Pangbo, such an ancient and great Venerable, has a group of immortal servants.

Just like when Hu Yanfu, the master of Meteorite Star, was able to reluctantly enshrine him, he could have nine immortal servants~www.mtnovel.com~Wang Yi's fellow brothers, all enlisted kings, and a large group of immortal under his command.

Even the current Wang Yi, as long as a word, there are a large number of immortal gods who are vying to put themselves under his command, I am afraid that the immortal is willing to serve him.

In the elegant and beautiful courtyard, Hong and Lei Shen were politely led in by the immortal servant, and they saw Wang Yi sitting on a stone table with two beautiful immortal maids arranging wine and dishes.

"You are finally here, come here soon." Wang Yi smiled and waved when he saw them.

Hong, Thor: "..."

This facade is a bit scary.

[Chapter 289: See the Lord of Chaos](#)

"Come on, this is the "drunken wine" from the distant "Black Snow Secret Realm". This bottle costs 3,000 yuan units and was given to me by a senior."

In the courtyard, Wang Yi is entertaining old friends.

"Tsk tusk, don't my cup cost 10 yuan unit? Drink all the wealth of a realm master pinnacle in one sip?" Raytheon took a sip, and then showed an expression of enjoyment.

"Cool!"

"Comfortable!"

Hong and Lei Shen praised.

This "drunk wine" is indeed a rare wine, even if it is immortal, it is generally seldom willing to buy it for enjoyment.

It can make the immortal gods feel drunk, let alone Hong and the others. Although they are strong-willed, they can't resist this physical drunkenness, and they soon become drunk one by one.

That kind of wonderful feeling, even the immortal gods will be intoxicated, so the high price of "drunken spirits" is not unreasonable. Of course, it is also good for the body. One cup can quickly improve the physical fitness of an ordinary person to the cosmic level. Can slightly increase the speed of perception of the law.

However, a cup is equal to the entire wealth of a peak world master, and it is estimated that few are willing to do so.

Wang Yi did not let the drunk Hong and Thunder God return to the room, but stayed in the courtyard at the residence of Venerable Pangbo, without worrying about their safety.

Virtual universe.

"Teacher." Wang Yi came to the palace.

"You are here." Venerable Pangbo's burly figure slowly emerged.

"Teacher, I'm here to say goodbye to you." Wang Yi lowered his head and respectfully said to this brawny bear who has been trying his best to teach him for many years.

In his heart, he was very grateful to Venerable Pang Bo, the teacher.

"The young eagle will eventually try to spread its wings and fly high." Venerable Pang Bo glanced deeply at the youngest disciple in front of him, and said softly: "Go, remember, no matter what time, the teacher will be behind you, go."

"By the way, before leaving the Chaos City, remember to visit your Master in the Chaos City Lord's Mansion." Venerable Pang Bo said again.

Wang Yi knelt on the ground and bowed, then stood up, turned and left here.

Venerable Pang Bo looked at the place where this disciple disappeared, and slowly closed his eyes.

Venerable Pang Bo seemed rough, but he was actually a very emotional person. He took every disciple as his own child and cultivated seriously. Perhaps this is the reason why he has fewer and fewer disciples in recent years.

Wang Yi's consciousness left the virtual universe and returned to reality. He glanced at the two drunk and unconscious people who were still lying on the table. He smiled and told the servants not to disturb them. Then he walked out of the mansion and headed towards the Chaos City Lord's Mansion. Go.

Wang Yi walked out of the residence of the teacher, Venerable Pang Bo, and walked along the wide street towards the city lord's mansion in the distance.

On the way, some of the immortal gods who noticed him, the world masters talked a lot.

"That's Wang Yi."

"I heard that he is the most enchanting genius of our human generation."

"Is he the one who broke through the 15th floor of the Tongtian Bridge at the Cosmos Level?"

"Little monster like a monster."

"It turns out he is Wang Yi."

Wang Yi walked silently on the wide streets of the ancient Chaos City with many eyes, thinking in his heart.

"I'm finally going to see City Lord Chaos."

"Unfortunately, my sign-in panel has not returned to normal over the years."

Wang Yi has some regrets.

The sign-in panel [Update] took longer than he thought.

This time to see the Chaos City Lord, you must enter the ruined battlefield time and space, and it is also a precious opportunity to sign in. It is a pity that it seems to be missed.

Soon, the majestic city lord mansion far away was already within sight.

The gate of the "city lord's mansion" in Chaos City has been open, and people often enter and leave the city lord's mansion.

However, in recent years, Wang Yi used to come to the Chaos City Lord's Mansion in order to comprehend 52 Chaos Monuments, so he is also familiar with the road.

Passing through other areas, walked towards the most severe "Inner Mansion" of the City Lord's Mansion.

The outer palace gate of Chaos City Lord's Mansion has been kept open for a long time. However, the inner palace has strict guards, and at a glance, all the guards are immortal gods.

But as soon as Wang Yi approached, a group of guards glanced at him and then at each other.

One of the immortal guards with majestic golden armor and sharp aura stepped forward and said: "His Royal Highness, Lord City Lord has given an order, you can go in."

The guards behind have given way to a passage.

It turned out that City Lord Chaos had already greeted him in advance. No wonder these guards were so polite.

Wang Yi passed through the guards of these immortal gods and entered the inner palace.

And the group of immortal guards who watched him leave couldn't help but talk with each other.

Wang Yi is now in Chaos City, the Virtual Universe Company...and the high-level of the human race are indeed big celebrities, and they have reached the point where no one knows.

Inner House.

Along the wide corridor, Wang Yi quickly walked to a square paved with chaotic rocks, and at a glance he saw a bald man in a fire-red shirt standing in the distance.

He had a faint smile on his face, and the whole person seemed very peaceful. Just looking at this bald man... made people involuntarily calm down, as if faintly blending into the vast and tranquil cosmic starry sky.

Wang Yi lost consciousness for a while, and then immediately woke up.

"What a terrible existence, is he the One Venerable? I have seen a lot of Venerable Universes, but the one who can compare with him, surpass him, maybe only my teacher Venerable Pang Bo..." Wang Yi secretly said in his heart.

When Wang Yi walked towards the bald man in the fiery red shirt, he also welcomed him with a smile, and his smile had the power to infect the soul. "Wang Yi, I am Venerable Guiyi, I am coming to pick you up by the order of the teacher."

"I have seen Venerable Guiyi." Wang Yi saluted respectfully.

Venerable Guiyi smiled in his eyes: "You don't need to be polite, your teacher and I are both under the sect of Chaos City Lord Teacher. Your teacher is earlier than me. You are a senior brother, and I am a second senior brother. You can call me second senior uncle."

"Yes, the second uncle." Wang Yi immediately changed his words.

"Yeah." Venerable Guiyi nodded, suddenly raised his hand, and suddenly there was another object in his hand.

"You call me Uncle Master. When we first meet, I don't have anything to give you. I will give you a little gadget. Maybe it will be helpful for you to roam outside."

"Thank you Master Uncle." Wang Yi respectfully took the ring with both hands.

"You come with me, the teacher has been waiting for you for a long time." Venerable Guiyi turned and led the way, while Wang Yi followed.

Only then did Wang Yi have the energy to focus on the space ring he just got~www.mtlnovel.com~ and he was also curious that Venerable Guiyi would give it to him.

"Venerable Guiyi is a disciple of the Chaos City Lord. He has always stayed by the Chaos City Lord. He is powerful and has a special status. The things he sent should be extraordinary..." Wang Yi's world power pierced into the space ring, when he saw that When I was doing things, my eyes went straight.

"Is this... a detection instrument? Or the extremely high-end SDU01—000001? There is also a099—127789." Wang Yi was really shocked.

Because he had checked the relevant information, he clearly remembered the information of these detection instruments.

SDU01-000001 type: The detection radius is 1 billion kilometers, and 50 billion points are required.

A099-127789 type: detection radius of 100 kilometers, 40 billion points are required.

[Chapter 290: Wang Yi and Chaos City Lord](#)

Detectors are mainly divided into two categories.

One is a super-large range, generally in three specifications with a radius of 100 million kilometers, 300 million kilometers, and 1 billion kilometers. The more high-end, generally there are two specifications of 300 million kilometers and 1 billion kilometers.

One is the ultra-small range. Generally, there are three specifications with a radius of 10 kilometers, 20 kilometers, and 100 kilometers. For high-end models, 20 kilometers and 100 kilometers are more common.

The large detector... is to detect spaceships from a long distance, making it easier to lay out.

Small detector... Generally it is an adventure in the secret realm of the universe, and it is easier to detect in a small area.

Because the detection range is small, it can be detected at a higher level.

Of these two detection instruments, one is a super-large-range detection... the other is a micro-detection that belongs to an ultra-small range... Of course, the advanced nature is needless to say, but they are all extremely expensive. The immortality of the king is absolutely unaffordable, and only the Venerable... and It is the richer among the sages who are willing to buy it!

Two detection instruments add up to 90 billion points!

Wang Yi's previous points through Tongtian Mountain and Tongtian Bridge combined were only more than 100 billion points. Even if the price is half the price, it will take 45 billion to buy it. Wang Yi simply cannot buy it.

"Venerable Guiyi, unexpectedly gave me such an expensive gift." Wang Yi was a little surprised.

Even if it was a gift from Venerable Guiyi to a junior, it was definitely a big deal.

"This is also a small gift, ooh, it seems that City Lord Chaos is very rich." Wang Yi muttered in his heart.

"It seems that now, I can save the money for buying detection equipment."

The ultra-small detector is priced at 40 billion points. Although it only detects a range of 100 kilometers, the price is almost the same as that of an ultra-wide-range detection instrument. Because the detection range is small, the detection precision is comparable to those large-scale detectors with trillions of points, that is to say... ...With this ultra-small detector, as long as there are some super-powerful detecting Wang Yi, even if the large-scale detecting instrument cannot find it... the small-sized detector will know in advance.

Of course, Wang Yi doubts whether there are such high-end detection instruments on the battlefield outside the territory.

"Master Guiyi is really generous." Wang Yi exclaimed.

These detection instruments don't look like they are purchased inside the Virtual Universe Company at a discount, but outside, it's normal for the price to increase several times, that is to say, the price may be more than two trillion mixed yuan units... All of them are high-end detection instruments.

"That's right." Venerable Guiyi said as he walked, "The teacher has three avatars, and the one who presides over the city of Chaos is the master killer, so you must be respectful and not offend."

"Yes, the disciple knows." Wang Yi continued.

Soon, Venerable Guiyi took Wang Yi to a secluded courtyard. Outside the courtyard was a stone tablet with the three characters Chaos Ruins.

"Go in, the teacher is inside."

Venerable Guiyi said, step in first.

Wang Yi also followed closely.

Boom...

Wang Yi felt the time and space around him change, and the stars shifted. He was in the Chaos City Lord's Mansion with Venerable Guiyi before, but the next moment he came to a vast expanse of heaven and earth.

At a glance on the endless earth, there are corpses that can be seen everywhere. Some corpses are as huge as planets, and some are smaller than human beings, but each corpse contains a terrifying aura that makes one's heart palpitating.

This... should be the ruins behind a terrible peak battlefield.

"This is the Chaos Ruins, and it is also where the avatar of the Chaos City Lord's killer is located." Wang Yi secretly said in his heart, and at the same time raised a glimmer of expectation.

To be honest, for the Chaos City Lord, he admired the most, even above the original ancestor and Luo Feng.

"Let's go." Venerable Guiyi reminded Wang Yi as if he was in a daze when he saw Wang Yi.

Wang Yi and Venerable Guiyi walked on this ruined land with no end in sight.

Wang Yi looked at the countless strange shapes, some of them comparable to the corpses of the planet, and was shocked, "How many powerful people have been killed by the Lord of Chaos."

He witnessed this scene with his own eyes, and understood more deeply that the strong in the universe all rose from the killing.

"teacher."

At this time, Wang Yi heard the shout of Venerable Guiyi. He quickly looked up and saw a burly tall man about three meters tall standing not far away. He was wearing an extremely complicated and simple dark red battle armor. He stepped on his combat boots, and at the same time a scaly tail protruded from the battle skirt.

There are two fiery red horns on his forehead, and there are strange secret patterns on his face, which look very vicious, but his eyes are as plain as the vast ocean, like the endless starry sky, making people involuntarily calm down.

When Wang Yi's eyes fell on this person, he felt his soul trembling. At first he only saw a figure, but then he seemed to see the endless laws of the universe...

The majestic and vast laws of the universe continued to exude a killing aura, making Wang Yi's consciousness and even his soul completely surrendered.

"Wang Yi." Chaos City Lord spoke, and Wang Yi woke up from the illusion.

"Wang Yi pays homage to City Lord Chaos." Wang Yi knelt down and bowed.

In my heart, I was thinking, "At the point of the Chaos City Lord, I have already naturally carried the rules. Watching the Chaos City Lord himself... That is to directly observe the powerful laws of the Chaos City Lord."

This is the state.

The realm of the Lord of the Universe.

Although his teacher Pang Bo is powerful, his combat power may be comparable to the master of the ordinary universe, but the realm is far from the peak existence in the universe such as the chaotic city master.

The Lord of Chaos City looked at Wang Yi, who was kneeling in front of him, but in his mind he inexplicably remembered that little guy named Ke Di a long time ago. Both of them are the same peerless genius. They have magical encounters. They showed their talents early and became the most dazzling existence in the race. ...

It is a pity that his disciple finally fell when he went to the cosmic secret realm during the period of the world master.

"Ke Di..." City Master Chaos was a little sad. More is anger.

"If I had watched more closely at the beginning, perhaps Kedi would not have fallen." Chaos City Lord cast his gaze on Wang Yi, Wang Yi's scalp was slightly numb, and there was always a feeling of being seen through.

"Wang Yi, this is the first time you and I have met." City Lord Chaos said, his voice is ordinary and flat, but there is an infinite power that makes people feel at ease.

"You have a good talent~www.mtlnovel.com~ and you have many adventures. In fact, I found you the first day you came to Chaos City... You and the little guy named Luo Feng both have clones, right?"

"Yes, Lord Chaos City Lord." Wang Yi said respectfully.

However, although City Lord Chaos saw that Wang Yi had a clone, he didn't know why.

After all, the universe is too big and endless adventures, even the Lord of Chaos can't know everything.

"Yeah." The Chaos City Lord nodded, and the eyes that seemed to be able to see everything fell on Wang Yi, "You came from the earth, your earth is very special, do you know?"

Wang Yi showed suspicious eyes.

Chaos City Lord continued: "Your earth, long ago, was created by a great power in the universe, but that great power was not owned by our human race."
