

## A God 291

### [Chapter 291: Where the earth belongs](#)

Seeing Wang Yi's a little nervous expression, City Lord Chaos smiled and said, "Of course, although the planet was created by the great alien, your soul has also been transformed, but in essence, you are still humans, so there is no need to worry too much. ."

Has it been discovered?

Wang Yi said inwardly, but he had already expected this.

Even he felt that under a certain inertia, even if he and Hong did not expose the earth, the earth would be discovered sooner or later.

Chaos City Lord continued: "Your earth was transformed by a powerful alien billions of years ago... Ordinary life planets only have the function of allowing humans to survive. But the earth is very special, as long as it is inside the earth. The life that is born, especially the embryonic process, will be affected by the invisible influence of the entire earth, and a certain aspect of the soul will undergo a special evolution."

The Chaos City Lord was a little emotional, "That alien mighty person can reach the sky by means, even I can't match it... One aspect of the human souls born on earth has evolved, and the effect is that in terms of mood... it is easier to perceive and improve."

The Lord of Chaos City really admired it, because he was Zuoshanke, the strongest in the universe, and possibly one of the oldest and strongest.

Zuoshanke once created an ethnic group that evolved physically and had extremely powerful physical strength. The only flaw is... the state of mind is relatively poor, it is the Yan God clan.

However, it may be the reason for the poor state of mind. Yan Emperor, who was too strong because of his strength, finally rebelled against the human race and became the powerful ethnic group "Yan God Race" in the universe, which made a clear distinction from the human race.

Therefore, the Chaos City Lord and the highest level of mankind are a little worried, worrying that the earth's human line will end up on its own, just like the Yan Gods.

At the rate of Wang Yi's rise, it is entirely possible to become the next Emperor Yan, or even stronger!

If it really evolves to that point, human beings will really become a big joke in the universe.

Therefore, the Lord of Chaos and many high-ranking human races are silently paying attention to Wang Yi, paying attention to the earth, and the earth is also top secret... Few Venerables know about it.

There are actually only two things that Chaos City Lord wants to do: First, to ensure that Wang Yi will not be separated from human beings, at least he must recognize his human identity. Second, to ensure that the people on earth will always belong to the human race.

Therefore, although the earth contains great secrets, very precious, and has unlimited potential in the future...but the human race still keeps secrets at the highest level.

Things like Emperor Yan must never happen again, that is, they are beating the high-level human race in the face, and no one can bear the betrayal one after another.

Chaos City Lord said: "This powerful alien has spent countless efforts to create the cradle of the earth. The value of the earth far exceeds that of a cosmic country. It stands to reason that this kind of planet with magical effects should belong to mankind. All the distribution of the ethnic group, because it can continuously cultivate more talented powerhouses for the human ethnic group in the future...but."

The Lord of Chaos City took a look at Wang Yi and found that his expression was calm, and he gave a secret compliment, and then said: "Although the earth is precious, the earth itself has been transformed. The countless planets around thousands of light-years have actually undergone some changes. The transformation within a thousand light-years... the core is the earth."

"So the earth must stay in the solar system and cannot be removed. Once removed, there will be no special nurturing effect."

"The transformed earth is very special. Even if it is shattered and turned into wreckage, as time passes, it will naturally condense and become the earth again."

The Chaos City Lord smiled, "Actually, in history, your earth has been broken into wreckage 12 times, but it has been condensed into completeness again and again."

"So, the earth can't actually be destroyed, but it can't move either."

Chaos City Lord paused and looked at Wang Yi with a gentle voice, "Wang Yi, I ask you, if you are asked to dedicate the earth to the human race, the human race will give you enough compensation, are you willing?"

Wang Yi shook his head decisively and looked directly at the Chaos City Lord, "My Lord City Lord, the earth is the hometown of the people on the earth, and it is also my hometown. Let me hand over the earth, I can't do it."

Venerable Guiyi looked at Wang Yi in surprise, thinking that Wang Yi was really courageous, and he dared to directly disobey the Lord of Chaos.

"Well, since you don't want to, I won't force you." Chaos City Lord is a little regretful, "Since you don't want to give the earth to the human race, then the human race leases some places from your earth, and the ownership of the earth still belongs to you. For what you have, we will also give you enough compensation, are you willing?"

Although it is impossible to get the earth directly in hand, the earth is too precious. To be honest, it is a bit too wasteful to live on the earth alone, it is simply a violent thing.

If it weren't for Wang Yi, it would be difficult for the human race to stop with Luo Feng and Hong alone, and it would be impossible to discuss such good things in advance.

There will definitely be some coercive measures.

Just like the original history, Luo Feng was forced to hand over half of the ownership of the earth.

If you sell it, you have to sell it too! If you don't sell it, you have to sell it!

Although helpless, but had to accept.

But now, City Lord Chaos was talking to Wang Yi in a negotiating tone.

It clearly expresses the attitude and importance of the human race.

It was the first time that a realm master could make the human race take things so seriously and treat them equally.

It can be seen that Wang Yi's position in their minds.

In other words, the incident that Emperor Yan had irritated them too much at the beginning.

And Chaos City Lords are also very wise to do so. First, they can reap the heart of Wang Yi, who is likely to grow into the backbone of the human race in the future, and let him fight for the human race.

Second, no matter how much the earth is said to be the same line of the human race, the strength of the earth's people is also the strength of the human race. The meat is rotten in the pot.

Moreover, even if the earth is not taken away, it can be cooperated in other ways, and it does not necessarily have to crowd out the people on earth.

The high level of the human race also wants to understand that cooperation can achieve a win-win situation.

Of course, Emperor Yan's kind of being lost by power, strange, and selfish is not counted, and what he has done has violated the bottom line, and there is no way to communicate.

Wang Yi thought for a while and nodded slowly.

It is not impossible to cooperate with the human race to give up a part of the area.

After all, the earth is too weak now~[www.mtlnovel.com](http://www.mtlnovel.com)~ lacks the resources for development.

It is impossible for Wang Yi alone to provide the resources for the development of the entire planet. It is not practical. After all, the scope of the planet's current activities is the entire galaxy. In the future, the population will increase and the race will expand rapidly.

However, although it is agreed to cooperate with the human race, this kind of thing has to be planned well, three chapters in advance, there can be no outsiders occupying the nest, and the powerful children of the family should not be allowed to do mischief on the earth, making the earth smoky. People are angry.

Just three chapters of the contract is not enough, there must be a similar law enforcement team.

Wang Yi thought it might be possible to ask Venerable Pang Bo for help and send a few disciples to sit there.

However, this is only a stopgap measure, and in the future, the people on earth will have to cultivate their own guardian power. At least you have to have the power of the immortal level of the king to sit down before you can rest assured.

#### [Chapter 292: Gift from the Lord of Chaos](#)

The details of the cooperation with the earth can be discussed later, and the identity of Chaos City Lord will not directly intervene.

Wang Yi's attention to his home planet was also recognized by the Lord of Chaos.

Pay attention to your hometown and ethnic group, so that you will not become strong and only care about yourself and become a white-eyed wolf.

Emperor Yan is a negative lesson.

To be honest, Emperor Yan also contributed to the decision made by the human race.

"Wang Yi, you can be regarded as my sect." After talking about "official business", the tone of Chaos City Lord became softer again.

"Your teacher, Venerable Pang Bo, is under my sect, and you are his disciple. Speaking of which, you are considered to be the underline of my sect."

Wang Yi listened obediently.

Chaos City Lord looked at Wang Yi with a trace of satisfaction. It has been a long, long time since no genius can come to him. In fact, Chaos City Lord has no eccentric thoughts. As long as he is a member of the human race, the higher his future achievements, the greater the possibility of becoming a strong one. , Chaos City Lord pays more attention.

The Lord of Chaos City has always done things fair and seldom shows favoritism, so everyone is very convinced.

Everything is for the human race.

"You are already the pinnacle of the world lord. According to the tradition of the five major forces of our human race, the period of the world lord is to experience life and death. I heard that you have chosen the outer battlefield..." Chaos City Lord said, "the outer battlefield is extremely dangerous, and the strong are like Yun, you are not to be negligent. Remember to be cautious."

"In the history of our human race, we don't know how many peerless geniuses died while practicing on the battlefields outside the territory or in the secrets of the universe."

"The disciple knows." Wang Yi said respectfully.

In fact, with Wang Yi's current strength, there is no difficulty for him in ordinary outer battlefields.

It is difficult for Fengwang Pinnacle to fall on the battlefield outside the territory, not to mention that Wang Yi's strength far exceeds Fengwang Pinnacle, and there are many treasures and trump cards, and the possibility of falling is too small and too small.

In terms of strength, Wang Yi was already comparable to King Zhenyan, who was invincible and immortal, and he was infinitely close to the venerable.

Feng Wang Invincible, will not go to the battlefield outside the territory, because there is no difficulty.

Those who go to the battlefield outside the territory are one for military exploits and treasures, and the other is for self-improvement.

The reason why Wang Yi went to the extraterritorial battlefield was first to meet the requirements of the life and death experience of the owner of the virtual universe company, and second, to have his own purpose.

Although the cosmic secrets can also be experienced, how can it be compared to Wang Yi's going to the battlefield outside the territory.

Originally, Wang Yi had planned well a long time ago, but the sign-in panel suddenly dropped the chain, which annoyed him.

Of course, the Lords of Chaos City didn't know Wang Yi's hole cards and secrets. They just guessed based on Wang Yi's previous performances that Wang Yi should now have the power to become a king.

Over two hundred years, he had the power to be a king. It was simply terrifying, and it was the only one in the history of mankind.

However, they didn't know that Wang Yi still had the "Secret Code of Nine Tribulations."

The "blood of the beast gods" can be guessed, but it has been a long time since the human race has no genius below the master level that can fuse the blood of 10 beast gods.

They didn't know where Wang Yi was.

Therefore, they estimated that Wang Yi should have the power of the king, but he should not be the opponent of those super kings. Therefore, some dangerous places in the outer battlefield are still very threatening to Wang Yi.

However, the most important thing is...

Chaos City Lord solemnly warned: "I will arrange for you to go to the outer battlefield this time, but you must remember that you must never reveal your true identity information, otherwise I am worried that the aliens will attack you."

The extraterritorial battlefields are all outside the human domain, so they are called extraterritorial battlefields.

The protagonists of this ethnic war are of course the four pinnacle races, because the four pinnacle races of humans, monsters, zergs, and machine races are close to each other, so the fighting is fierce.

However, the four pinnacle race groups have many other race allies. Like humans entering the battlefield, they will encounter many allies. Although they are alien races, they are human comrades.

The other three clans also have their own allies.

The war on the extraterritorial battlefield is actually the place where the four pinnacle races led their countless allies to wage a huge battle.

"The disciple must be careful." Of course, Wang Yi would be very careful. When he didn't want to take risks, he suddenly killed an alien cosmic master or cosmic master or something.

"Well, now that you have created the pinnacle secret method, with your strength, you can already fight against those kings in the battlefield outside the domain." Chaos City Lord laughed, "but your own foundation is still very weak, you are still a man after all. Lord, those immortal kings who became immortal gods for countless years, accumulated countless years, may have special secret methods or methods that can harm you..."

Because of their innate qualities, there are very few peerless geniuses in human beings who are masters of immortality. On the contrary, because of their talents, there are many immortal masters of foreign races. As the level increases, it becomes even more terrifying when they become kings.

"You are also under my sect, this time you go to the outer battlefield, I will give you a treasure to defend yourself." Chaos City Lord said.

In fact, the Lord of Chaos City had already sent a token to Wang Yi, so that he could send out a call for help when his life was in danger, and then the Lord of Chaos City would go to save people immediately.

But... this is the last juncture and is used as a last resort. City Lord Chaos is not a nanny, and he does not want Wang Yi to relax his own training relying on him.

The original intention of the Chaos City Lord and the high level of the human race still wanted Wang Yi to exercise while still ensuring his own life safety.

Hearing that the Chaos City mainly gave treasures to himself, Wang Yi's spirits lifted up, and his eyes immediately showed excitement.

Now that the sign-in panel is no longer expected, I hope Chaos City Lord can give him a precious and powerful treasure.

Killing Wu Yuyi is unlikely. It can only be used by practicing "the combination of the law of gold and space". It is impossible for the Lord of Chaos to give Wang Yi an unsuitable item.

So, what will it be?

In Wang Yi's expectant eyes, Chaos City Lord said: "You pass the Purgatory God General's inheritance. You should get a Purgatory God Armor. The body defense armor has the Purgatory God Armor. The Purgatory God Armor is a treasure, and it is powerful enough to help. You resist the attack, and on the weapon, your teacher Venerable Pang Bo has given you his 'Time Shuttle', and you have the weapon... Then, I will give you a life-saving treasure."

"Oh, oh." Wang Yi looked at the Master of Chaos City with a wave of his hand, and a huge fiery red palace suddenly appeared next to him.

"This treasure, Huosuo Palace, is for you to use."

The voice of Chaos City Lord floated to Wang Yi's ear~www.mtlnovel.com~ but he was completely attracted by the huge fire-red palace in front of him.

I saw that the palace was completely red, about a hundred kilometers high, and more than a hundred kilometers long, and it looked like a strange conch.

The palace's 'snail shell' has a metallic luster, and the surface is sparkling and fiery red with irregular red-brown markings. Their spirals are low, with a large number of horns on their shoulders, and the entrance is just below.

There are countless strange monsters carved on the surface of the palace. Wang Yi found that the "Fire Sky Beast God" was also among them. In front of the palace, the coercion it naturally exudes made Wang Yi feel like an ant.

"Treasure, this is a real treasure, and it's a palace!"

Wang Yi opened his mouth slightly.

#### [Chapter 293: Huosuo Palace](#)

The Lord of Chaos City also looked up at the huge and beautiful Huosuo Palace, with an emotional expression: "This Huosuo Palace...the main body was originally a special life in the universe... Under the command of the Fire Sky Beast God, in ancient times, the Fire Sky Beast God was besieged and killed by many super beings. Venerable Fire Conch also died in battle, and no one resurrected it... This shell material finally fell into the hands of us humans. Together with other precious materials, it was refined into this palace."

Wang Yi also whispered to himself, listening to the meaning of the words of the Lord of Chaos, I am afraid that in the super existence of the besieging fire and air beast god, there may be human powerhouses.

There is nothing to conceal, the fire and sky beast gods in the abyss of purgatory, the golden sky beast gods in the bloodluo world... all prove that the human race must have done a lot to encircle and kill the natural beast gods.

The fate of Venerable Fire Conch and the Eight Beast Gods once again proved the truth of the weak and the strong in the universe.

"Huosuo Palace is a very precious treasure. It has a strong defense force and cannot be destroyed even by the Venerable. Only the Lord of the Universe can cause damage to it if he does his best." The Chaos City Lord said seriously, "Its value, If you can make the venerable go crazy, even the Lord of the Universe might also make a move, so if you don't have a last resort, you must not use it."

The reason why the Lord of Chaos City gave the treasure of "Huoshao Palace" to Wang Yi was because of his safety.

Really encountering an unstoppable danger, even if he calls for help, it will take a while for the Lord of Chaos to rush over. During this time, Wang Yi is very likely to be unable to resist being killed or controlled.

Therefore, it is very necessary to give a palace treasure. Although it is only an ordinary treasure, unless the Lord of the universe, it is still very difficult for the ordinary venerable to attack the people inside through the palace. Wang Yi can completely pass this time. Waiting for the rescue of the human strong.

"If Kedi had a treasure back then, maybe it wouldn't fall." Chaos City Lord sighed inwardly.

"Huoshao Palace is a treasure of fire and air laws, and you are also practicing fire and air laws. Although it is difficult, you should be able to master it." Chaos City Lord explained again. "Huoshao Palace is mainly defensive. It can defend against immortal divine attacks and soul attacks at the same time, and it also has the ability to fly!"

Wang Yi's eyes glowed when he heard it.

The landlord took an adventure and actually gave a flying palace treasure!

This is also the treatment that Wang Yi, the most dazzling genius of the human race for hundreds of millions of years, has received!

Only the pinnacle race of human beings is willing to give the peerless genius in the race a treasure.

Like the venerables of many ethnic groups, there are at most two or three ordinary heavy treasures, and there may not even be a top heavy treasure.

Supreme Treasure, that is the cosmic overlord who will take a heartbeat to \*\*\*\* it, and the venerables are jealous and crazy.

Not to mention the most precious treasures of flying palaces. In the original book, the treasure "Galactic Spaceship" obtained by Luo Feng in the Ancestral Shrine is only a top treasure. Even the top treasures are more precious and rarer than other ordinary treasures, let alone true flying. If the treasure of the palace is leaked out, there will definitely be countless venerable aliens coming to \*\*\*\* it.

so! The Chaos City Lord has just said that, as a last resort, don't use it... When using it, try not to let people discover that it is "the treasure"!

"Wang Yi, soul type, flying palace type, domain type... are all enough to drive the universe overlord crazy." The Chaos City Lord solemnly said again for the last time. When using the Conch Palace, try to keep it confidential. If it is leaked out, how many super existences will be eyeing you! The masters of the universe still disdain, but the masters of the universe... just come and prepare a trap for you..."

Wang Yi nodded quickly.

But he also felt that the human race attached great importance to him.

A piece of palace treasure, if it is for other races, I am afraid that the overlord of the universe may not have one.

But the human race gave him one!

Of course, it is also because his potential is high enough to break through the 20th floor of Tongtianqiao in more than two hundred years.

If this kind of genius does not fall, it will be a sure thing to become the overlord of the universe in the future, and it may become a super existence like the Lord of Chaos. It is also equivalent to being given in advance.

Not to mention the precious and rare flying palace treasure.

This is definitely a life-saving weapon, a venerable person hiding in the palace treasure, I am afraid that only the Lord of the universe can kill.

Just ask those cosmic lords, how could the cosmic hegemon not be crazy?

Treasures are generally owned by the overlords of the universe.

Occasionally, a very small number of high sages in the universe have a treasure, like the middle sages and the elementary sages, almost none of them have it.

And this treasure is nothing else, it's not something you can get by chance. Usually these super existences are deliberately left behind and left to the descendants.

Just like the "Jia Jia" and "Primary Soul" left by the mountain guest... and even the Xeon Treasure "Star Tower", it doesn't meet the requirements, and it's useless for anyone to come.

Wang Yi also understood something, so he sighed. "The human race treats me pretty well."

There is no unreasonable giving in the world!

The human race treats him as benevolent, fair and just.

"This Fire Conch Palace, you blend into your body after refining, it can be big or small, big...Even if it covers the entire solar system for hundreds of millions of kilometers, it is a trivial matter, but it can be as small as a small dust." Chaos City Lord said: "I've already told you about its rough use, and how to use it specifically... I will send you a book through the virtual universe. Please take a good look."

"Yes." Wang Yi respectfully saluted City Lord Chaos.

This time, he got a flying palace treasure from Chaos City Lord, and he got hundreds of billions worth of probes from Venerable Guiyi.

pity.....

Wang Yi glanced at the golden panel that stayed quietly in his sight, a little regretful.

The sign-in panel is still in a state of being updated offline, and it doesn't listen at all.

Otherwise, you can try to check if you can sign in here in Chaos City Lord.

Wang Yi left the ruined battlefield continent with regret, and returned to the Chaos City Lord's Mansion with Venerable Guiyi.

Venerable Guiyi sent Wang Yi to the original yard~[www.mtlnovel.com](http://www.mtlnovel.com)~ with a smile: "Congratulations, Wang Yi, the realm master will be able to get a palace treasure. As far as I know, you have been First."

"All are bestowed by ethnic groups." Wang Yi even said.

"Well, it would be great if you could think so." Venerable Guiyi nodded in praise.

"Go, get ready, the outer battlefield is the first stop of your world master's experience, you must come back alive, and be careful of alien races."

Wang Yi left the city lord's mansion and walked on the quiet and wide street, thinking in his heart.

"I have already met the Chaos City Lord and got a flying palace treasure. Next, it's time to go to the outer battlefield."

"Moyunteng should evolve to immortality, and it's time to arrange it in my hometown."

#### [Chapter 294: Preparation before leaving](#)

Wang Yi still has 103.1 billion points in his body. When he was cultivating in Chaos City, he had hardly spent much.

"To make the perfect moyun vine of 360 main vines break through to immortality, at least 11.6 billion points must be invested, and the breakthrough probability is only 40%."

Wang Yi thought in his heart.

The evolution of Mo Yun Teng to immortality is a decision that has already been made, and Wang Yi will not change it.

The Mo Yun Teng of the 360 main vine breaks through to immortality, and it will immediately have the power of a high king, and with its huge body and tenacity, it is the pinnacle of the King, it is very difficult to harm Mo Yun Teng.

"You have to buy a soul secret method to prepare for the need for slavery."

Wang Yi opened the page of the Treasure Treasure of Virtual Universe Company.

"Beep."

There are so many secret techniques that can enslave the immortal soul. When Wang Yi searched, hundreds of items appeared.

"I thought the secret method of enslaving immortality was very high-end, and the number would be very small. I didn't expect it to be so many." Wang Yi was also a little surprised.

In fact, this type of secret law requires very high authority to find out. Wang Yi's authority is now higher than that of many primitive secret realm masters and immortal kings, and there are very few information that he can't check in the virtual universe company.

Wang Yi looked carefully.

To control the immortal gods, the human race has created 629 control methods over the long years, all of which are very difficult.

These 629 secret methods...most of them are obviously stronger than the "Soul Seal" created by Hu Yanbo.

Cultivation conditions are different. Some secret methods require "immortal gods" to practice, some realm masters can practice, and some are at least "universe venerables" to practice.

Yes, the requirements on the soul are very high, just like the realm master can cultivate, the cultivation is more difficult, and the price is more expensive.

"If I didn't accept the inheritance of the Magic Sound God General, and the soul amplitude is not as high as now, I am afraid that I would not even be able to get started." Wang Yi read the information and was deeply moved.

The cultivation of the soul has always been harsh, difficult, and demanding, so the soul master in the immortal is also very scary.

The soul master of Fengwang Pinnacle is even more terrifying than the limit of Fengwang.

When Wang Yi chose the secret method, he also saw the "Myriad Heart Controlling Soul Secret Method" used by Luo Feng to control the Zerg brood. In fact, Wang Yi now has such a high level of thinking power and suitable for practicing this secret method, but Wang Yi wanted to choose A better secret.

Wang Yi set his sights on the expensive secrets.

In fact, a powerful and powerful secret method for controlling the soul of immortality, suitable for the cultivation of world masters, is very rare.

Wang Yi's eyes suddenly brightened.

"Huh? This "Slave God Forbidden Code" seems to suit me."

"Slave God Forbidden Code": The master of the world can practice and has extremely high requirements for the soul. The basic foundation requires 5000 mind power amplitude. It is divided into three chapters, each of which is divided into three volumes, for a total of nine volumes.

The conditions are very demanding, but you can practice the secret method of controlling immortal gods after getting started.

And there are many powerful soul secrets that can be called incredible.

Such as attacking, defending, creating illusions... etc.

More importantly, this slave \*\*\*\* forbidden scripture can actually increase the amplitude of mental power!

According to the secret method, each volume of "The Forbidden Book of the Slave God" will increase the amplitude of thought power, but not much.

The first level is increased by 100, the second level is increased to 200, the third level is increased to 400, and the third level is increased to 600...

The last layer is raised to 1600.

In total, it can increase the amplitude of 1600 mind strength!

The increase is far inferior to the "Secret Method of the Demon Sound God General", coupled with the difficulty of cultivation, resulting in few successful cultivation.

Wang Yi looked at the price again and found that the full set requires 10 billion points.

Even if the king is immortal, it has to be bankrupted before it can be bought.

But as far as Wang Yi is concerned, he can afford it. After all, he still has hundreds of billions of points.

It's just that the points were not brought by the wind, he was considering whether it was worth it.

After thinking about it, Wang Yi finally decided to buy.

In fact, soul training has always been his shortcoming, and if this "Slave God Forbidden Code" is successfully practiced, it will also be of great benefit to him.

"I practiced "The Secret Method of the Demon God General" to more than 8,800 at the beginning. If this "Forbidden Code of the Slave God" can really help me increase the amplitude of my thoughts, it will complement the "Secret Method of the Demon God General", then it would be great. "Wang Yi had a look of expectation in his heart.

Wang Yi actually has a "Magic Sound God Will Inheritance Crystal" signed from Moshan, but that crystal can only be passed on once. Wang Yi was worried that he would not be able to accept all of the inheritance, so he never used it.

If you can use this "Slave God Forbidden Code" to cultivate your mind power to the limit of 10,000, then "Magic Sound God Will Inherit the Crystal" can also be saved and left to the younger generation.

After redeeming "The Forbidden Code of the Slave God", he still had 93.1 billion points, and then spent almost 12 billion to redeem the resource treasures that make Moyunteng enough to evolve.

Later, they exchanged some treasures that could be used in the next rush to increase the means to deal with emergencies.

"Outside the battlefield, my enemies are immortal gods. With my current strength, I am not afraid of them, but the immortal king has immortality. To kill them and improve the efficiency of hunting, we must have special means."

In the end, Wang Yi's gaze fell on the "Fimo" venom.

This is also the most cost-effective item that can harm immortal spirits and bodies.

Fermor venom is a terrible potion deployed by the powerful pharmacist "Fimo" in the human race. This Fermor venom has a strong corrosive power and can erode the divine body of the immortal gods.

1 gram is worth 300 million yuan, which is terribly expensive!

The power is also so frightening!

But Fei Mo's venom is not perfect, it also has shortcomings, but it is also the best method Wang Yi can find to deal with the immortality of the king.

"Ultimately the strongest kings can be killed with a dose of 10 grams, even the invincible strongest kings only need 100 grams..." Wang Yi murmured.

Wang Yi gritted his teeth, smashed all the last points on his body, and bought "Fei Mo" venom!

In the end, I bought a full 270 grams, which is 3 pieces of Femore Venom, and all the points on my body have been spent.

"Next, just wait."

...

The world in the body.

On the vast plains of the Central Continent, Mo Yun vines stretched for tens of thousands of kilometers lie quietly here, luxuriant branches and leaves swaying like forests from time to time.

"Moyun." Wang Yi in a red robe appeared abruptly, stroking the leaves of Moyun vine.

"Master..." Mo Yun also felt excited.

"Mo Yun, I brought you something good this time." Wang Yi still loves the Mo Yun vine, which has followed him since the earth.

Besides, Mo Yunteng was also very helpful to his next adventure.

"Huh." A small mountain-high material appeared in the center of Mo Yun Teng.

"Come on, Mo Yun, swallow it."

Under Wang Yi's command, Mo Yun Teng began to carefully devour the treasures one by one in order, and his body also began to change.

Waves of powerful waves poured out of Mo Yunteng's body, and Mo Yunteng's body began to tremble violently.

"Mo Yun, hold on." Wang Yi was also a little worried. After all, the probability of Mo Yun evolving is only about 40%. If it fails this time, Wang Yi has no way to evolve it again.

Perhaps with the encouragement of the owner, Mo Yun Teng began to slowly stabilize.

Devour, metamorphose, evolve...

Time passed, and after I don't know how long, the huge energy lurking in the body of the golden vines suddenly exploded. The golden vines were instantly frozen, and the surface of the main vine leaves directly condensed. Layers of ice crystals.

The moyunteng resembling a huge ice sculpture, motionless, as if dead, except for the faint and weak energy fluctuations, indicating that the moyunteng is still undergoing some very subtle changes.

"Mo Yun..." Wang Yi stood by and looked at it silently.

...

Nine days later.

A spaceship suddenly appeared in a desolate and remote star field.

Wang Yi flew out of the spacecraft and scanned the surroundings.

"I don't know, if there is a super existence of the human race following me."

"I asked Senior Brother Mohe's immortal spirit to take my kingdom to the border of mankind."

"This is a very desolate star field in the "Shirta Cosmos Kingdom" which is relatively marginal in the 1008 universe of mankind."

"Mo Yun, do you think this is suitable for you to create a kingdom of God?"

Wang Yi said to a lovely and exquisite crystal cane that suddenly stretched out from his arm, that is the moyun vine that has broken through into immortality.

Mo Yun Teng is the immortal king as soon as it is advanced. After its own world power is integrated with the complete laws, it is also transformed into wood immortal divine power, and it has an "immortal body", the soul and divine power merge, and a trace of fragments can be resurrected.

"Master, it's all right here." Mo Yunteng's gentle voice came.

"Then be here."

Wang Yi glanced at the surrounding starry sky, folded his hands into his palms, and cut them off with a knife. "Sila~" cut the paper like a knife. With ease, he tore the space with his hands, tearing a big crack, and Wang Yi instantly rushed into the space. In the cracks.

With Wang Yi's current physical fitness, it is many times stronger than ordinary pinnacle world masters, tearing space is a very simple matter, and can even fly in the dark universe like an immortal god.

In the space mezzanine, there are endless space debris.

The so-called kingdom of gods is formed by the integration of the internal world into the space debris in the space interlayer.

Moreover, because the space debris is mobile, the Kingdom of God can also be moved, but very slowly.

The kingdom of God is built in the space mezzanine. The first element of choosing the kingdom of God is to be "remote", otherwise it will be easy to find.

The second element is to save money for the transmission of the kingdom of God.

But this is the kingdom of Moyunteng, and in the future, Wang Yi's scope of activities cannot be a single cosmic kingdom, so it doesn't matter.

"The space mezzanine is said to be divided into thousands of layers."

"The first layer is space debris."

"The second layer is the kingdom of God layer."

"The third layer is the space torrent layer."

Wang Yi stood in the void, looking at the peculiar scene around him, thinking silently.

Space mezzanine is a terrible place. For example, the space debris layer is the closest to "primitive cosmic space", which is a very small threat.

Some strong masters can resist those space debris.

The "Divine State Layer" is also relatively stable. Immortal gods can generally survive. The space debris there is much larger, some of which are tens of millions of kilometers in diameter, hundreds of millions of kilometers in diameter, and so on.

Outside of the kingdom of gods, the so-called spatial torrents... even the powerful immortal gods may perish ~ [www.mtlnovel.com](http://www.mtlnovel.com) ~ The more you go out, the greater the threat.

Wang Yi flew towards the depths of the space debris and began to help Mo Yunteng find a place suitable for it to entrust the kingdom of God.

Three days later.

The crystal clear moyun vine hovered beside Wang Yi, shining brightly.

A world appeared faintly, flying towards the space debris with a diameter of about 50 million kilometers in the distance.

"Boom..."

A fictitious and a real, the two began to merge violently as soon as the two approached.

The interior was very empty space fragments, and a world gradually emerged, the world gradually solidified, and it was fully revealed in a moment.

"The Kingdom of God, it is finished." Wang Yi watched this scene.

#### [Chapter 295: New journey](#)

The original universe, the headquarters of the virtual universe company, the vast and boundless continent measured by 'light years'.

A young man wearing a dark red shirt and long black hair walked along the long passage with an immortal \*\*\*\* who radiated the laws of thunder and lightning.

The black mask on the face of the black-haired boy showed only a pair of crystal-black eyes and chin.

It is said to be walking, but every step taken is tens of thousands of kilometers away, and the two of them walked over in a few minutes.

"His Royal Highness, the front is the 'Space Passage No. 3 Distribution Group.' From there, you can go to the 36 branches of our human territory." The deacon of the virtual universe company responsible for receiving Wang Yi said enthusiastically.

"His Royal Highness is going to the No. 9 branch, there is it." The Immortal Thunder God pointed in a direction.

"Well, thanks a lot." Wang Yi nodded, and stepped towards the "36 fixed space channels."

These 36 fixed space channels are 36 branches leading to the human domain.

"If there are tokens of my Mo Yun Teng left near the No. 9 branch, it can be directly transmitted to the Kingdom of God, and there is no need to use the channel of the headquarters to transmit it." Wang Yi thought to himself.

He also felt a little emotional. He had been practicing for two hundred and fifty years, and at this point, he was finally about to enter the outer battlefield, and he didn't expect it.

If you start from the virtual universe company genius battle in 2066, it is now 2317.

"Well... I remember that in the original history, after the war of genius, Luo Feng only arrived on the outer battlefield almost 4800 years ago. I was much faster than him." Wang Yi sighed.

It was mainly the "Time Realm", which allowed Wang Yi to save a lot of time for cultivation and comprehension.

It used to be a hundred times the time flow rate.

Later it was a thousand times.

now.

One year of Wang Yi is equivalent to 10,000 years.

Of course, Wang Yi is still accelerating at a thousand times the time. It consumes too much energy and there is no need for this.

"The first style of the time-space shuttle was created by the pinnacle secret method, and there will be second and third styles next."

"The melee sword technique of the Void Zerg clone has to be created."

"There is also the 'Beast God's Way' of the Yanxing Giant Beast."

"Oh, these are all done in the outer battlefield."

The powerful strength and many hole cards made Wang Yi full of confidence and confidence.

Even if Luo Feng in the original book first set foot on the battlefield outside the territory, it was still far behind Wang Yi's combat power at Fengwang Elementary Class.

Wang Yi walked to the space transmission channel to the No. 9 branch, stepped into the space channel rippling like a water curtain, and disappeared.

...

Through the space channel, he arrived at a place hundreds of millions of light-years away in an instant.

After that, he sat in the spacecraft and went to Niaoxing.

Bird Star, one of the eight largest logistics bases in the human domain, is also a fixed delivery point for the space army, from which a large number of space forces are continuously transported to the "extraterritorial battlefield."

The 1008 Universe Nation has only eight logistics bases, and Bird Star is also Wang Yi's nearest choice to go to the battlefield outside the territory.

After all, there are only eight logistics bases, and there are not many choices.

Besides, Wang Yi was too lazy to choose.

The bird star.

Spaceship parking platform.

A silver-white triangular spacecraft with beautiful and smooth curves followed the signal to fly over and slowly docked on the platform.

"Class F spacecraft?" Several nearby staff members were taken aback when they saw it.

A young man wearing a dark red shirt, long black hair, and a black mask flew out of the spaceship door, and then the spaceship disappeared. The young man looked at them, although they were all the masters, but the other person just looked at them. However, these base staff felt a tremendous amount of pressure.

"Hello, I am the staff member here." A staff member wearing silver armor flew over and squeezed out a smile. But I was very surprised: "With an F-class spacecraft and such an astonishing aura, who is this world lord?"

"I applied to enter the extraterritorial battlefield. I don't know which way to go?" Wang Yi's voice was low under his mask.

The staff smiled enthusiastically and pointed in a direction, "If you are a solo traveler, you can follow this passage to the concentration area, and it's the end."

Wang Yi raised his head and looked at a wide passage made of transparent glass in the distance, nodded and said, "Thank you."

Seeing Wang Yi leaving, the landlord of the silver-style battle armor heaved a sigh of relief and muttered, "What a terrifying aura, this landlord actually feels more terrible than many immortal gods. At least he must be the landlord and warlord. , Or stronger, this should be the core genius of the five major forces who came to experience it."

At this time, Wang Yi, who had left, also noticed the staff's reaction, and began to quietly put away his aura.

Naturally, you don't need to care about these in Chaos City, but it's different when it comes out.

Wang Yi touched the cold mask on his face and smiled.

Although the passage was long, it flew to the end very quickly at the speed of Wang Yi. It was a beautiful square where thousands of people were gathering, scattered over a hundred kilometers in diameter, which seemed very sparse.

"Hello, please rest here first." A beautiful female receptionist with wings walked over.

Wang Yi followed her and asked, "How long will it take to go to the battlefield outside the territory?"

He came out this time, but he got the arrangement of Chaos City Lord, the destination can't go wrong.

The female receptionist smiled as she walked and said: "Lord, because you are a lone traveler, the lone traveler needs to make up 10,000 people before they can send them to the battlefield outside the territory. This is also for cost-saving considerations. But you come. It's not the time... the last group of personnel left two days ago. You will have to wait a while, but it won't be too long. It's almost half a month at most."

Every time, you had to make up a hundred world masters to transport the soldiers at once.

It's different if it's a space army. They all come as a legion. There are a lot of people, and the lone traveler needs to make up enough numbers to send.

Wang Yi glanced at the sparse thousands of people in the square and nodded.

He just waited.

There are many alloy benches in this square. There are scattered many cosmic warriors who come to join the war to sit around. Wang Yi also found a place to sit down and waited.

The waiting process was boring. Wang Yi took out a bottle of fine wine and a glass glass from the world ring while looking at the crowd around him~[www.mtnovel.com](http://www.mtnovel.com)~ and poured a glass of wine, which was suddenly rich but clear and strange. The fragrance began to diffuse.

Some cosmic warriors nearby looked over involuntarily.

What kind of wine is this man drinking, it's so fragrant.

Of course, the wine Wang Yi drank was not ordinary wine. Although it was not the same as that of the reception of Hong and Thunder God, a bottle was equivalent to half of an immortal god, but it was also very valuable. It is estimated that there are ten peak world masters in a bottle. Net worth, of course not Fanpin.

I'm afraid I haven't heard of such powerful people who came here from all over the universe and wanted to go to battlefields outside the territory.

There were still some people who wanted to get close to Wang Yi. Seeing this battle, they all flinched.

At first sight, they weren't ordinary world masters, and they didn't know which noble member came out of a big power, but don't go there, if they were disgusted, they would be ashamed.

#### [Chapter 296: Lord of the World](#)

"Haha, is this friend just here?" A rough and bold voice came.

Wang Yi looked up and saw three tall and burly bear men standing in front of him about four or five meters tall and wearing heavy armor. One of them was a strong bear man with a crescent-shaped white hair on his forehead.

"Yes." Wang Yi said with a smile.

"Don't mind sitting down and chatting together?" The bear man continued.

"Of course." Wang Yi said.

The three giant bears also unceremoniously sat down beside Wang Yi's seat, their eyes all falling on the wine bottle in front of Wang Yi at the same time, their throats twitching.

"Brother, where did this wine come from? It's so fragrant." The grizzly bear with a scar on his face swallowed his saliva.

"Eh..." The brawny bear man with white hair on his forehead glared at his brother, and said embarrassingly: "Friend, I'm sorry, my brother is just a bite." But his eyes fell on Wang Yi's wine bottle.

Feelings are still three drunks. Wang Yi smiled inwardly.

However, because of the teacher, Wang Yi actually has a good impression of bear people. When he flipped his hand, three more wine glasses were created, and the power of the world was filled with them. He stretched out his hand and smiled: "Meeting is fate, I will ask you three. Have a drink."

The three-headed bear people watched Wang Yi pour them over and did not stop them. After Wang Yi handed over the wine glass, the three of them rushed to pick up the glass, but did not rush to drink, but first put it deep under their noses. Sniffed, revealing the color of intoxication, and then took a slow sip.

"Wow..." A bear man widened his eyes.

"Good wine!"

"Friend, this wine is really good."

The praises of the three brawny bears are beyond words.

Wang Yi looked at them, the three people's bold and unpretentious attitude made him very fond, and Wang Yi's invitation to them also made the three bear tribes very enthusiastic towards Wang Yi, and they soon started talking to each other.

During the conversation, Wang Yi knew that the three bear people were from the "Wofu Clan" on a void and secret continent in the "Guya Universe Kingdom", and they were three strong masters who were recognized by the Law of Origin!

Although there are thousands of people in the entire square, most of them are at the domain master level, and a few are at the realm master and universe level.

However, there are few cosmic ranks because it is difficult for them to travel across vast areas to participate in extraterritorial battlefields.

The reason why there are fewer strong world masters is because they are already fewer.

The bear man boss said with emotion: "Looking at the appearance of Brother Blackface (Wang Yi's pseudonym), you know that you are not an ordinary person. You are from the Primitive Universe? But there are not many realm masters from your Primitive Universe. Many of them come from secret continents and the kingdom of Gods worlds like ours. That's really a lot."

Wang Yi nodded.

In fact, the humans in the 1008 universe are only part of the human race.

In some cosmic secret realms, there are many lands. There are countless humans living on those super large lands. It is said that some large lands have a diameter of hundreds of billions of kilometers, etc. The population on a large land is comparable to a universe. country.

There are also a large number of human immortal gods, and there will also be a large number of human beings in the kingdom of immortal gods.

According to the living environment, human beings can be divided into divine kingdom human beings, cosmic secret realm human beings, and cosmic kingdom human beings.

However, the background of each environment is different, resulting in a huge gap between the number of strong men born and the upper limit.

It is as if giant sharks cannot be raised in shallow water, and towering trees cannot be grown in indoor potted plants.

The formation of life is very special, whether it is flesh and blood life, mechanical life, plant life, etc... As long as it is life, it will absorb the "essence" of the entire universe when it is conceived.

Life is conceived and grown by absorbing the special energy in the universe.

The primitive universe is the treasure land with the largest resources and the richest resources.

The Kingdom of God has the largest number of humans, but they can only cultivate to the level of the realm master. If there is no special fate, the mankind of the Kingdom of God is destined to be unable to become 'immortal'.

Terrestrial humans in the Secret Realm of the Universe rank second in number. They can cultivate to become immortal gods just like the "Humans of the Universe", but they want to produce a "Venerable Universe"...the one with a low probability is outrageous!

Human beings in the universe are the least in number, but occupy the most territory! A large number of immortal gods have been born in history, and 98.2% of the cosmos venerables are all human beings from the universe.

Territory is like fertile soil!

The larger the territory, the greater the potential of this group, and the higher the probability of the birth of a super strong.

This is the reason why so many ethnic groups in the universe madly compete for territory at any cost.

But this is an internal secret, and ordinary people have no chance to know it.

Wang Yi looked at the bear people who had quite appetites in front of him. In fact, they were lucky and were born in the Secret Realm Continent. If they were born in the Kingdom of God, they would be the realm master if they were born in the kingdom of God.

...

While Wang Yi and the others were waiting, there was a steady stream of people who participated in the battlefield outside the territory, but they were mostly Domain Lords, and there were relatively few Cosmos Masters.

On the 7th day, there were enough 10,000 people, but it was not until the 11th day that there were enough 100 world masters.

"Universe level, gather here."

"Domain owners, come here to gather."

"The realm masters, all come here."

The access gate opens.

Tens of thousands of lone soldiers were quickly classified.

Wang Yi also got up and gathered with other world masters.

Looking at the 100 high-spirited realm masters, the white-haired bear man who has been acquainted with Wang Yi these days muttered: "100 realm masters come to participate in the extraterritorial battlefield, and I don't know how many will survive in the end."

The extraterritorial battlefield is very cruel, and the death rate is the highest among all human battlefields!

In history, those who can come back alive do not keep one in ten!

But even in such a fierce and cruel battlefield, there are still countless people yearning for it.

Under the auspices of an immortal god, these newly-arrived world masters began the "authority granting ceremony" before heading to the battlefield outside the territory.

This is also a traditional process.

When the masters of the world were talking about it, Wang Yi was calm.

Authorization is to determine the accurate position in the army.

And how to confirm it is through the strength shown in the virtual universe.

Virtual universe is almost omnipotent, and there is no doubt about fairness and justice.

The rating is divided into three levels, one is the 'ordinary master fighter,' the second is the elite fighter, and the third is the master warrior.

Most of the world masters are ordinary world master fighters.

Recognized by the law of origin, he can barely be regarded as an elite fighter.

In the hundreds of elite warriors, there is usually one warlord.

The higher the authority... the position in the army is naturally different.

At the beginning of authorization, 100 realm masters lined up and walked towards the immortal god.

And the immortal god's armguard shot a blue light on the screen, covering the coming world master.

"Ordinary Realm Master Warrior!"

"The elite warrior!"

"The elite warrior!"

...

There are a lot of elite warriors.

It stands to reason that the "ordinary realm master fighters" account for the majority of the realm masters.

But those who dare to come to the battlefield outside the territory. They are all strong among the world masters, just like the three Wulf bears, they are all recognized by the law of origin.

It was Wang Yi's turn. Wearing a mask, long black hair and dark red shirt, he walked up.

"Dip. UU reading [www.uukanshu.com](http://www.uukanshu.com)" the blue light enveloped Wang Yi, and at the same time he made a sound.

"Master of the world."

"Wow!"

All the people around looked at Wang Yi together, and even the insiders of the Bird Star who were granting the domain master and cosmic level permissions in the distance also looked over in amazement.

Among the 100 realm masters, there is actually a realm master warrior.

The appearance of a master warrior among the 100 elite warriors is just a matter of probability. Sometimes it is normal that no one appears in several batches in succession.

The immortal \*\*\*\* that seemed to be cast in metal showed a slight smile. "good."

The authorization ceremony continued, but in the end, only Wang Yi was the leader of this group of world masters.

#### [Chapter 297: Sign-in Panel Two. Version Zero](#)

The authorization soon ended. Among the 100 realm masters, there are 1 realm master warrior, 65 elite realm master fighters, and 34 ordinary realm master fighters.

The immortal \*\*\*\* who was responsible for authorizing the realm master looked at these realm masters, and muttered in his heart, "It's rare. The above asked me to send these people to the seventh battlefield."

The extraterritorial battlefields, all outside the boundaries of the human race, are divided into eleven battlefields.

The seventh battlefield ranks third among the eleven battlefields in extraterritorial battlefields, with an average mortality rate of 96.8%.

The death rate on each battlefield is not lower than 90%, and it is all scary.

When the authorization ceremony is all over.

"Go!" The immortal spirit gave an order, and immediately tens of thousands of soldiers followed forward with great momentum.

Wang Yi and their group of world masters walked at the front of the team, followed by the domain masters, and then to the universe level. Most of them were looking forward to the excitement on their faces. They dared to participate in the battle in the outer battlefield known as the ethnic meat grinder. Be psychologically prepared.

Soon, the team came to a huge hall with a diameter of thousands of miles, in which there were 11 huge spatial water curtain-like passages.

"This is the space passage leading to the seventh battlefield." The immortal spirit stepped forward and said in a cold voice: "The seventh battlefield is a cosmic secret realm with a maximum diameter of about 1.1 million light years...There are a hundred in the seventh battlefield. Barracks base, the base you will be teleporting to is No. 026."

His eyes swept across the group of people in front of him like electricity, but he didn't notice anything unusual.

Wang Yi's face remained as usual.

This was in his expectation, he had originally asked the Chaos City Lord to arrange it.

The seventh battlefield, Star Tower! This is Wang Yi's real goal.

After all, this is probably the strongest treasure in the primitive universe.

The \*\*\*\* king of Jin reincarnated as a mountain guest, and then made a \*\*\*\* king weapon in the primitive universe as if hitting the Great Fortune... This joke is a bit cold.

Wang Yi felt that the water behind the Star Tower was a bit deep, just like some legendary stories, certain treasures were prepared for certain people.

Of course, this is only Wang Yi's current guess.

What if it is "the one who is predestined to get it"?

Wang Yi muttered in his heart.

The cosmic warriors of Wang Yi lined up and quickly passed this water curtain which was one kilometer wide and one kilometer high.

Then with the Kingdom of God as the transfer station, when tens of thousands of soldiers arrived at the transfer station of the Kingdom of God, they once again entered the space channel, and then directly transmitted to the base of the No. 026 barracks in the seventh battlefield outside the human territory.

Simply put, it is the channel-the transfer station of the Kingdom of God-the channel.

"Look! Some recruits are coming!"

"Ah, after waiting so long, it's finally here."

"Don't be lazy, get up quickly."

When Wang Yi and others had just passed through the passage and had not yet clearly seen the spatial scene in front of them, there was a burst of shouts and shouts like a vegetable market.

The new soldiers gathered in front of a dozen soldiers in white armor, and the head was an immortal \*\*\*\* with white hair and white robe. The immortal \*\*\*\* was smiling, and there were electric snakes faintly in his eyes.

"Recruits, welcome you to the seventh battlefield '026' barracks base. All the realm masters will go with him, all the domain masters will go with this little guy, and all the universe class will go with this little girl."

Under the leadership of the three leaders, the realm master, the domain master, and the universe level walked towards three channels respectively.

And Wang Yi is among them.

Suddenly, there was a familiar "ding" in his ear.

【update completed. 】

【Retrieving host...】

【Searching...】

【Searching...】

Wang Yi: "..."

Seeing the words [Retrieving] and the sound of "ding" that kept appearing, cold sweat came out of my head unknowingly.

"What's the matter with you?" Because Wang Yi is the only realm master and his position is superb among this group of realm masters, so he walked in the forefront, and the silver-haired woman leading the way saw his ugly expression and the appearance of cold sweat left behind. Somewhat puzzled.

"I was a little nervous the first time I came here, and it made you laugh." Wang Yi forced a smile.

Of course, because he was wearing a mask, he could only see the wry smile at the corner of his mouth.

"Oh, newcomer, it's the first time to come to the outer battlefield, some people may not be comfortable, and it is normal to be nervous." The silver-haired woman expressed understanding, perhaps because Wang Yi was pleasing to her eyes, she comforted, "But you are the master of the battle. The probability of survival is much better than those of the world masters, so rest assured."

The world masters behind: "..."

"If you don't mind, I can introduce you to some relaxing places in the barracks, guaranteed to be effective." The silver-haired woman smiled slightly, teasing a bit.

Wang Yi: "..."

Masters: "..."

However, the silver-haired woman was also joking, and continued to lead the way earnestly after speaking.

[Found the host, start binding! 】

[Binding...]

[Binding...]

[Binding failed! 】

[Start rebinding...]

Wang Yi: "..."

The ups and downs of life are just so exciting.

Fortunately, the second binding was finally successful.

And the golden panel flashed a brilliance and appeared in Wang Yi's field of vision.

Of course, only he can see it.

At the same time, a lot of information began to emerge.

[The update is complete, the host has been bound, and all functions are officially opened. ]

Wang Yi received a lot of information, and a clear understanding rose in his heart.

This newly updated sign-in panel can be called [Sign-in Panel Version 2.0]. Of course, this is the name Wang Yi himself gave him.

As a father, Wang Yi feels that he has this right.

As for the person who begged his grandfather to tell his ancestor when the sign-in panel disappeared, Wang Yi said that he did not know him.

The updated sign-in panel has new functions.

First of all, the restriction that you can sign in only once every 24 hours has disappeared. If you don't sign in, you can sign in.

However, the sign-in requirements have increased, and sign-in rewards lower than Wang Yi's level will no longer appear.

For example, if Wang Yi (human body) is at the master level, if the reward is lower than the master level, he will not reappear, that is, he will not be able to sign in.

Similarly, each place can only be checked in once, and cannot be checked in repeatedly.

The most important thing is that there is an additional sign-in task that starts randomly: the trigger condition is uncertain.

For example, now there is one more sign-in task——

[Task Name: Time to Kill]

[Task content: Kill the designated target, achieve the number of killings, you will get related rewards. ]

[Kill 100,000 immortal gods, reward a normal card with the highest reward of 2% sign-in, the current number of killings: 0100000]

[Killing 10,000 seals are immortal, rewarding a 5% sign-in black iron card with the highest reward, the current number of killings: 0100000]

[Kill 1,000 immortal kings, reward a bronze card with the highest reward of 10% sign-in~www.mtnovel.com~Current number of killings: 01000]

[Kill 100 Cosmos Venerables, reward a 25% sign-in silver card with the highest reward, the current number of killings: 0100]

[Kill 10 masters of the universe, reward a 50% sign in the highest reward gold card, the current number of killings: 010]

[Kill a true god, reward a diamond card with the highest reward for 100% sign-in, the current number of killings: 01]

【Each killing target can only receive one reward. 】

【Card effects can be superimposed to use. 】

[The killing target must be completely killed, there can be no clones or soul consciousness remaining, and soul slavery is also considered to be killed. 】

【Duration: None】

#### [Chapter 298: First time](#)

Wang Yi looked at the contents of the panel task from start to finish, and finally fell on the [Task Duration: None], and he was relieved.

There is no task deadline.

There is no task penalty.

The son still loves his old father.

As for the content of the task... it's easy to understand.

Killing monsters in exchange for rewards, this operation Wang Yishu.

The number is a bit exaggerated.

Kill 100,000 immortal gods in exchange for an ordinary card with the highest reward of 2% sign-in.

It's almost necessary to kill all the immortality of a universe nation before it can be counted.

The 2% margin is also very low.

But considering Wang Yi's current strength, it is not incomprehensible.

Immortal gods are very special.

The domain master is the "life core", the soul is condensed on the life core, the life core is not in a fixed part of the body, and the life core must be attacked to kill the domain master.

The Lord of the Realm is the Origin Pearl.

The original force and mind force, when in the master period, are integrated into the power of the world, giving birth to the inner world, and the world projection.

The realization of immortality is the biggest leap in life.

Once it becomes an immortal god, the soul begins to fully merge with the body, and even every spiritual imprint is integrated into every cell.

At that time, every cell can be regarded as a part of the soul, because there is no clearly visible soul, only the most basic 'spiritual imprint' can be detected, and every life with a soul has a different spiritual imprint.

Ordinary immortal gods, the cohesion of the divine body is not perfect, and there is no immortal body, even if the immortal army master kills ten times, the divine body will completely collapse.

Above the immortality, the soul and the divine body are perfectly integrated, and there is an "immortal body", which is more difficult to deal with.

Wang Yi secretly said in his heart: "If you cultivate to the point of an 'immortal body', even if it is shattered, even the immortal divine power will begin to collapse and shatter, and the soul mark will be shattered... But as long as there is a trace of debris left! You can absorb countless others in an instant. Shatter the energy and restore the complete immortal body."

"If you reach the immortal body, it will be very difficult to kill. Not to mention the loss of 10% of the soul, that is, the loss of 99.99%. As long as there is a trace of residue, it can be completely recovered, and it is an instant recovery."

Wang Yi sighed in his heart that the immortal body is very terrifying to other ordinary immortal gods.

There are normally two ways to kill immortal gods with immortal bodies, one is soul destruction, and the other is forced annihilation, both of which are extremely demanding.

Like in the original book, the Virtual Universe Company arranged a task for Luo Feng to kill a Fenghou Immortal God, and then dispatched a team led by Fengwang Immortal Existence, fighting for several rounds before successfully killing him.

If Wang Yi wanted to kill Fenghou Immortal easily, he also had to rely on "Fimo Venom."

"100,000 ordinary immortal gods, 10,000 immortal princes, 1,000 immortal kings... It seems that this time the outer battlefield will be very fulfilling." Wang Yi said with emotion.

Those rewards are related to the highest reward for signing in. If you can get the normal card to the gold card together, there is a 92% chance that you can sign in at one time to get the highest reward... Think about it, if you go to the universe ark, the world of Jin, and the tomb Zhou and other places, sign in with these cards...beautiful.

Of course now he can also kill immortality. As for the Lord, the Lord of the Universe, the true god? He can only watch now.

Venerable Space controls space, Venerable Time controls time, and the Lord of the Universe is able to control time and space, not to mention that the strongest in the universe (the true god) speaks the law,

and even the laws of the original universe will temporarily avoid face... Beyond the horror, unless Wang Yi reaches immortality and possesses the domain treasure, it will be difficult to threaten the venerables.

When Wang Yi looked at the surrounding scenes, he remembered that he was in the barracks base.

After a long time, he almost forgot his own way of doing things.

Of course you have to sign in at this time.

"Sign in."

[Ding, congratulations to the host for signing in successfully, reward 'A-812' Vulcan Origin Crystal (quantity: 3). ]

【Number of check-ins available for this place: 0】

Wang Yi frowned.

'A-812' Grade Vulcan Origin Crystal?

He remembered that the treasure house of the virtual universe company, the 'A-812' grade Vulcan Origin Crystal, cost 12 billion points to exchange for one. It is a very high-end product of the Vulcan Origin Crystal, which is equivalent to three times the self-destruction of the strongest king. Power can already threaten the ultimate powerhouse.

Such high-end items, if they were purchased outside... such a huge fortune, could almost ruin the immortal king of his family.

3?

That is 36 billion points.

The good boy is really sensible, and he will give his dad such a meeting ceremony as soon as he comes back.

Wang Yi nodded slightly, expressing his satisfaction, and thinking in his heart how to maximize the effect of the three Vulcan Origin Crystals.

The silver-haired woman took Wang Yi and his team of world leaders. After a while, they arrived at an elegantly decorated hall. There were tens of millions of seats in the hall. Wang Yi could see that there were hundreds of thousands of people. The Lord is sitting here.

There are eleven battlefields in the extraterritorial battlefield, and each battlefield has one hundred bases.

If there are so many world masters in each base, it adds up to an extremely shocking number.

Many newcomers were shocked, only Wang Yi and a few who knew the inside story had no expressions.

"Hey!" The silver-haired woman who was responsible for leading the silver-haired woman shouted loudly, "The recruits are here, but there is a 'world leader warlord' among these recruits. You want to hurry up, haha..." The leader turned around after speaking. After leaving, he winked at Wang Yi by the way before leaving.

"what?"

"Lord of the world?"

"Lord of the world?"

"Is the leader of the realm coming here?"

Those world masters who were drinking and chatting all looked over, and many even stood up.

brush! brush! Brush...In an instant, tens of thousands of world masters ran over.

Wang Yi and the realm masters here were a little dazed and nervous by this sudden situation.

When the landlord soldiers were close to each other, the smart light brains they carried would prompt each other for permission, so the eyes of the tens of thousands of landlord veterans instantly fell on Wang Yi, a black-haired teenager wearing a black mask.

Began to solicit enthusiastically.

"Friends, join our team. Our team is strong. It has been on the battlefield outside the territory for tens of thousands of years, with rich survival experience, and the leader of the immortal gods in the battle. Whether it is to survive or gain military merit, it is easier than other places."

"Join us, we are stronger! We are also very friendly to newcomers!"

"our side....."

These world master veterans were frantically inviting Wang Yi, but they didn't bother to pay attention to the other 99 world master recruits.

The other recruits watched this scene stupidly.

Wang Yi's expression remained calm.

His gaze swept across many of the world master veterans, and finally stayed on an immortal \*\*\*\* who had just walked over.

The other veterans of the realm broke apart involuntarily, still complaining a bit.

"Antonio is here."

"He is immortal, and he actually came to grab someone in person."

"No way~[www.mtnovel.com](http://www.mtnovel.com)~Who makes our captain lazy."

"Ah, Brewster, your captain is there looking at you."

...

The extremely mighty and mighty lion head immortal \*\*\*\* with the fiery red temples scattered and came over, grinning at Wang Yi, showing sharp white forest teeth.

"Rookie, how about joining our squad? Our team has two immortal gods, and all of the team members are like you, at least as masters of the world... The stronger the team, the easier it is to mix in the outer battlefield. I think you should understand this truth. ."

Wang Yi looked at him and nodded.

After a while.

Wang Yi and the tall and burly lion-headed immortal \*\*\*\* were all sitting at a dining table.

#### [Chapter 299: Recruit "Black Face"](#)

"Introduce myself first. I am the captain of the Realm Master Team No. 026-20210603, Antonio." The majestic Lionhead immortal grinned. He is nearly five meters tall and wears a thick golden armor with exquisitely carved mysterious patterns. The law of flame breath exudes.

"Black face." Wang Yi whispered.

"Blackface?" Antonio raised his brows. This name is just a code name, but it is common to use nicknames and code names instead of real names on the battlefield outside the territory.

The two talked while drinking.

"Brother Blackface, you have just come to the extraterritorial battlefield. Joining our realm master team will definitely not let you down." Perhaps because it is rare to meet a realm master warrior, the immortal \*\*\*\* Antonio has a very good attitude towards Wang Yi.

After all, 30% of the new recruits of the world are "elite world main fighters", and 0.3% are the world main fighters... can be the world leader during the recruit period, all of them are extraordinary, otherwise Antonio would not go out and draw in. , Is also a good thing for their team.

Wang Yi thought about it and nodded, "Okay, I am willing to join your team."

The army has the rules of the army. Every participation in an extraterritorial war has military merit requirements, and Wang Yi is no exception. He also has military merit requirements.

Before accumulating enough military merit, one must join the organization and obey orders.

That being the case, joining a powerful squad of masters has become a very necessary thing, at least without being delayed.

"Haha, that's good." Seeing Wang Yi's altogether consent, Antonio couldn't help but smile.

In the field of extraterritorial battles, it is a joy to get a strong companion, not to mention that a member of their team retired not long ago, and just a new person is needed to fill it.

"Captain, is this the newcomer who just arrived?" At this moment, a voice came from the side, causing Wang Yi to turn his head and see a werewolf boy in a gray armor and a black-haired man who also wore a white mask. The woman came over.

The werewolf boy was tall, although he was not as good as the Lionhead, but he was more than two meters tall, but his face was as beautiful as a boy.

The woman next to him was wearing a black robe and a white mask with a mysterious pattern on her face. She exuded a cold breath, and her green eyes aimed at Wang Yi.

There was a light talisman faintly rotating in those eyes, with infinite charm, which made people involuntarily addicted to it.

"Haha, you just came here, this is the new player we just joined, Blackface." Antonio laughed, "Blackface, these are our team members Storm and Mel, and they are also the masters of the world. "

The werewolf boy storm and the woman in the black robe and white mask looked at Wang Yi at the same time, with a touch of friendliness on their faces.

"By the way, how about your deputy captain? Why didn't you see her?" Antonio asked, looking in one direction.

The werewolf boy sat beside Wang Yi grinningly, patted him on the shoulder, and looked familiar.

"Black-faced, right? I'm Storm, and everyone will be comrades in the same team from now on."

It looks like I will cover you from now on.

The black-robed woman took a look at the storm, and then said to the captain: "Sister Olivia said she wanted to drink with her old friend, but she hasn't come back yet." Her voice was hoarse but faintly echoed into the soul.

"Here again..." Antonio showed a trace of worry on the lion's head, patted his forehead, and said to Wang Yi: "Blackface, come together and meet the other members of our team. Let's get to know each other."

The four of them set off together towards the square. On the way, Wang Yi was still being pulled by the werewolf boy to speak: "...brother, I think you look like you, the black face shouldn't be your real name, right..."

Wang Yi felt that this werewolf boy might be a talkative, although he didn't dislike it very much.

I don't know why, seeing the happy face of the werewolf boy, a Erha appeared in his mind.

In the other corner of the square, sitting six figures, either tall and burly, or petite and slender, with different appearances and different temperaments.

Among them is a sturdy body, wearing a cyan alloy jersey with a scaly structure, and his face is covered with cyan scales. There is not a single hair on his head, but a cyan scalp. Its forehead is slightly The "blade clan" with arcs and sharp corners like a machete.

There are also a pair of black-winged "Black Gods" who are as short as a child, yet look as mature as an adult.

There is also the "double star family" of the girl sisters with diamond-shaped spar on the eyebrows, which look exactly the same.

Lionhead Antonio glanced around and said, "Where is Olivia? A newcomer has come, and she, the deputy captain, hasn't come back yet?"

"Come here, am I back?" A lazy voice floated, and a ghost-like figure appeared next to the crowd. It was a woman who was beautiful enough to harm the country and the people, and her upper body was nothing. Perfect to be fussy, wearing a green suit, with a green snake tail on the lower body, with dense scales on the snake tail.

"Is this the newcomer? Looks quite strong." The snake-man beauty looked at Wang Yi with big watery eyes, showing a thrilling and beautiful smile.

"Cough." Captain Antonio gave a light cough, "Blackface, this is our team's deputy captain, Olivia. At the same time, she is also an immortal \*\*\*\* who is proficient in soul illusion, and her strength is no worse than mine."

Olivia smiled at Wang Yi and sat next to the black-robed woman.

Ten people sat down in a circle.

Wang Yi looked at the team members around him. The composition was really diverse. There were lionheads, werewolf teenagers, blade tribes, twin star tribe girls and sisters, and snake women...

"Let me introduce you." The immortal \*\*\*\* Antonio pointed to Wang Yi, "This is the new recruit who has just arrived, the "Master of the World". He is a spiritual teacher. You can call him a black face."

"Black-faced? You wear a black mask. Our team's Mel likes to wear a white mask all day. I think you are a good match." The "Ushen tribe" man, who looks like a child but has an adult face, joked. .

The black-robed woman Mel's voice was low and hoarse: "Ying, you're itchy again, aren't you?"

"Well, you can introduce yourself to the newcomers." Antonio interrupted them.

"Storm, warrior." The werewolf boy said with a grin.

"Mel, pharmacist." The black-robed woman's voice was low.

"Wing, puppet master." The black-winged man of the Wushen tribe, who was as short as a child, smiled.

"Sani, Laura, spiritual teacher." The twin star clan girls who looked exactly the same said in unison.

What's more bizarre is that their voices are all synchronized, so it sounds like a person is talking.

"Baikamo, warrior." The sturdy blade clan man's voice is like a gold and iron clash, sonorous and powerful.

"Eugene, animal trainer." The last team member looks the strangest. The upper body is a glamorous and perfect human woman, but the lower body is in the shape of a horse, and they are all dressed in armor...looks like a half-man and a half-horse.

All the team members, including the snake-man woman "Olivia", are sitting on the chairs, but she is kneeling.

Olivia's voice sounded softly: "The new little guy, my name is Olivia, I am the deputy captain of this team. I was originally the captain, but I think the team is too busy, so I gave you the position. The big guy next to him." She glanced at the lion's head.

"I am an illusionist, an immortal god."

Antonio seemed to be accustomed to Olivia's way of speaking, he didn't mind at all, and continued: "I am the captain and an immortal warrior."

After the introduction, Wang Yi also had a preliminary understanding of this newly joined team.

The captain and the deputy captain are immortal gods, and the other seven players are the masters of the world. The strength of the squad is placed in the master squad, which is definitely an elite!

After Wang Yi submitted the application, he formally joined the squad numbered 026-20210603.

After Wang Yi joined, the attitude of the 026-20210603 team became more enthusiastic.

During the conversation, Wang Yi asked: "Captain, when shall we leave for the battlefield?"

"Black Face is very impatient."

"All newcomers are like this."

"That's because he doesn't know the dangers of the extraterritorial battlefield."

The members of the team spoke.

Captain Antonio took a look at Wang Yi and said, "Don't worry, in five days, our team will leave the base and go to the battlefield outside the territory. By that time, it will not be as stable as it is now. You just came here, so please listen to the veterans. Experience guidance is good for you."

"He doesn't have to drag his legs." The blade man sitting in the corner suddenly said. He is also the only one in the team who has acted lukewarm to the rookie Wang Yi.

"Old Dao, you are still so cold."

"Hei Mian is a newcomer, so you have to get used to it."

The Werewolf Youth Storm said: "Old Dao is such a cold temper, don't be surprised by the black face, in fact, he is very strong, good man, and a reliable companion."

Wang Yi smiled slightly. "It's okay, talented people are proud."

The others laughed.

"Blackface can really speak."

"Bakamo is actually praised."

"Blackface, don't give him face, beat him severely if you have a chance."

...

Wang Yi stayed in the barracks base for five days and learned a lot of information from it. Most of the information he found on his own were more detailed experiences of fighting and killing lives on the "extraterritorial battlefield."

Although Wang Yi's strength is very strong, his strength is beyond imagination. But it does not mean that these experiences are useless to him.

Unlike the nervous and excited recruits who were mostly on the battlefield for the first time, Wang Yi always performed very plainly, and this mentality also made the team members praise.

In battle, a calm mind is very necessary.

In a hall with a diameter of more than 30,000 kilometers, Wang Yi, the fully replenished leader team, gathered together, ready to set off to the battlefield.

Spaceships of different appearances and sizes stopped in the hall in order, and the number of space warriors on board was also varied, some might be tens of thousands, or some might have only a few people.

The captain of Wang Yi's team, "Antonio", also took out a flying saucer-shaped spacecraft with a diameter of about 100 meters from the world ring, and then flew up with the team members.

"Starting." The werewolf boy 'Storm' followed Wang Yi with a smile, and the two had become acquainted with each other in the past few days.

The captain "Antonio" took the lead and flew into the spaceship door first, followed by the enchanting snake-woman Olivia of the deputy captain, then the girls of the double star clan Laura and Sani, and then the armor-clad centaur beauty "You "Jin", "Baikamo", a man of the blade clan... Finally, it was Wang Yi and the Werewolf boy.

"Let's go to the lounge." Captain Antonio's voice came from the front.

Everyone in the team, including Wang Yi, had no doubt. Everyone was familiar with it, and Wang Yi knew the situation in advance.

However, the werewolf boy who followed Wang Yi still introduced him to this "rest room". "...Blackface, this lounge is specially built by the captain. It is our safe house. It has a strong defense force and can withstand sudden enemy attacks, allowing us to react in time."

Wang Yi nodded, expressing understanding.

Everyone came to the lounge, which was very spacious, more than enough to accommodate their team of ten people.

Everyone walked in and sat down according to their habits. Wang Yi also sat on the sofa with his eyes on the wall material of the lounge. With his eyesight, he could tell at a glance that it was an F9-grade material, but what exactly was it? He didn't know the material.

"The outer shell of the spacecraft is made of E9 grade materials, and the important rest room is made of f9 grade materials. This can not only save costs, but also prevent casualties from being attacked by immortal gods. It is a normal practice." Wang Yi nodded secretly. .

A spaceship full of F-class materials is expensive and not something ordinary immortal gods like Antonio can buy, but it is not a problem to just use F-class materials to create a lounge.

Such an arrangement can prevent sudden attacks by the enemy on the way.

It is estimated that this has become a consensus in the extraterritorial battlefield.

"The location is virtual 100%." Captain Antonio said while taking out some fine wine and putting it on the middle table.

The scene of the lounge immediately disappeared and turned into a vast hall with spaceships in line.

"It's time to enter the passage. Once you enter the passage, you can leave the base and head to the battlefield." The Wushen tribe member said with emotion.

"Boom!" "Boom!"

The gates behind him fell, and the gates in front opened again.

Thousands of spacecraft flew out like a swarm of bees leaving the nest and rushed out of the base.

"Turn on energy defense, let's go!" Captain Antonio ordered.

At this time, the charming snake woman "Olivia" curled up her tail and lay down on the sofa alone, outlined a beautiful upper body, picked up a bottle of wine without a glass, and drank directly to her mouth.

"Wow!"

The spacecraft that Wang Yi and the others were riding in flew out from one of the passages of the huge barracks base in an instant.

At the rear, a huge building appeared.

Through the virtual location, Wang Yi could clearly see the barracks base.

"It's spectacular." Wang Yi sighed.

The entire barracks base, at least several million kilometers in diameter! Comparable to a star!

And the surface of this huge war base is completely covered by a layer of colored energy ~  
www.mtlnovel.com~ it really deserves to be an AAA \*\*\*\* base. "Wang Yi said inwardly.

In the past few days, Wang Yi has also been signing in at the base, and he has also received some rewards. Of course, it is incomparable to the one who just arrived on the first day.

"Eugene", a centaur woman, whispered: "AAA God base...the entire seventh battlefield has only a hundred barracks bases. It is also the base camp on the battlefield of mankind, and it is the highest standard base for the gods. Even the Lord of the universe. The strong also want to destroy the AAA spiritual base."

"The base is also a harbor and resting place for us people. It is absolutely safe there. We don't need to worry about being attacked, and we don't need to be frightened." Another member of the team, Mel, in black robes, said with some emotion.

The rest of the rest room looked at the magnificent \*\*\*\* base, and they all calmed down.

### [Chapter 300: Extraterritorial battlefield](#)

The original universe, Chaos City.

Wang Yi's departure did not cause any disturbances, because in the eyes of outsiders, "Wang Yi" still stayed in the residence of Venerable Pangbo to practice, and occasionally came out, but did not leave at all.

Virtual universe, Thunder Island.

Thunder Island is the immortal concentration center of the virtual universe company, the true highest concentration center.

Thunder Island is vast, with clouds and mist circling around the island with electric snakes. If Yuxiang Mountain is larger than the average planet, then Thunder Island has more than one million Yuxiang Mountain.

"Wang Yi has reached the battlefield outside the territory."

At the highest point of Thunder Island, outside the palace in the endless air current, standing near the cliff is a figure in a golden robe. It is the Lord of Chaos City, who is overlooking Thunder Island below.

And beside him was a vague figure that was completely immersed in the darkness.

"We have made arrangements this time, and we should be able to ensure stability and worry-free." Humanity in the dark.

"Wang Yi's news has been blocked at the highest level, and only people who have reached the level of you and me who really know his whereabouts are absolutely impossible for them to divulge Wang Yi's secrets."

"Chaos City has arranged for people to pretend to be Wang Yi, even if the aliens are interested in investigating, they can't find anything...Even if they suspect, the extraterritorial battlefield is so big, plus there are cosmic secrets, it is impossible for the aliens to detect it."

"The alien race is very careful. In the assassination of the Garbage Star Territory, three king puppets were dispatched, but this was just a test for them."

Chaos City Lord said: "We will never give them a chance, a little fluke."

Why use Wang Yi as bait to lure the super existence of the alien race and then siege, this kind of plan Chaos City Lord will not do it.

From the very beginning, it was to guard against death.

Make it clear, Wang Yi, we have super strong guards, there are many traps here, don't come over...

After living for a long time, City Lord Chaos knew very well that he was lucky.

So he didn't plan to give the alien a chance at the beginning, and he wouldn't give a chance at all.

If it weren't for Wang Yi's insistence on going to the battlefield outside the territory, even he would like to arrange for Wang Yi to go to some cosmic secret realm controlled by humans, he could also be tempered, and if there is danger, the human race can be rescued in time, even if it's really fallen, it can be resurrected. .

It's just that there are many restrictions on resurrection. If there is any big secret in Wang Yi that makes it impossible to resurrect, or lose those opportunities after resurrection... then the gain is not worth the loss.

Therefore, as far as possible, let Wang Yi be tempered while ensuring his life safety.

The highest level of the human race also supports the idea of Chaos City Lord.

With the potential shown by Wang Yi, he will become the overlord of the universe in the future. They will be the best, comparable to the lord of the universe, as well as clones... This is equivalent to having an alternative "immortal body", which is equivalent to one more human being who is not afraid of being damaged. Super combat power.

The resurrection of the overlord of the universe can only be done by the giant axe, and there is a high price to pay.

Wang Yi has a clone, and the cost of restoring the clone will be much smaller.

If Wang Yi becomes the lord of the universe, it will have an even greater effect on mankind.

The human race has not given birth to the Lord of the universe for a long time.

But now Wang Yi is too weak, he is only a realm master, even if his combat power is comparable to that of the Feng King, he still has no chance to meet the Universe Venerable.

The human race can only give him training while at the same time carefully guarding him...If he can't be aware of it, he loses his vigilance in his heart and becomes dependent on the power of the human race, then it loses the meaning of training.

Wang Yi is not aware of the "good intentions" of the human race. At this moment, he is flying in a spacecraft with a team he has just met in the starry sky of the battlefield outside the territory.

In the void, at a glance, you can see some floating debris, or corpse debris, or spaceship debris, weapon debris, etc. everywhere.

The cosmic secret realm with a diameter of millions of light-years... the entire huge star field is a battlefield.

Leaving a safe barracks base is actually tantamount to fighting at any time.

The spacecraft flew in the starry sky at a sub-light speed, floating in the wreckage in the void, and some were directly hit by the spacecraft.

In the spaceship lounge, ten members of the team sat together, but the atmosphere was very relaxed.

"Heimian, our destination this time is about 130,000 light-years away from the base of No. 026 Barracks. There are many powerful foreigners gathered there. It is also the main battlefield of our elite squads who act as sharp knives." Captain Antonio Said with a smile.

Wang Yi nodded.

In the extraterritorial battlefield, there are two main types of battles, one is legion battles, and the other is elite squad fighting.

The weak cosmic class, domain master class, and ordinary world master fighters who have not been invited by the elite squads form a legion. Under the leadership of the immortal gods, these legions fight against other alien legions.

The immortal gods of the Legion fight against the immortal gods, and the weak against the weak.

This is also the most common mode of warfare.

There is another kind of elite squad like Antonio. A squad can be comparable to a corps, but the number is very small. What they do is similar to "sharp knives", in some special battle areas, and foreign strong teams. Fight.

The vice-captain, the beautiful snake-man Olivia, put down the wine bottle. The table in front of her was full of empty wine bottles. Olivia hiccuped and said with a reddish cheek: "We are going to go. The 00128901314520 starry sky battle area-Stranglethorn Vale, in all battle areas, can be considered a bit famous. The four pinnacle races include their allies. There are many strong and small teams lurking there. It is also our battlefield."

Olivia's moist eyes sparkled with excitement.

"Stranglethorn Vale..." Wang Yi said the name softly.

The extraterritorial battlefield was originally the place where the four major ethnic groups specially opened up to serve as battlefields for war. Here, many places have been completely shattered and fragmented due to the destruction of the long war.

And some places are very unique and suitable for elite teams like Antonio to gather and fight in lurking battles.

Because the entire seventh star field battlefield, many places are empty and void, you can see the enemy from a distance at a glance, and you can run away early if you see that it is not the opponent. So it is not suitable as a combat area.

Olivia stretched out her white jade fingers and gently tapped the void in front of her.

Suddenly the rays of light converged to form a projection screen, and a star map appeared automatically on the projection screen.

"This is Stranglethorn Vale." Olivia pointed to the screen image.

Wang Yi looked over.

Stranglethorn Vale...it gave Wang Yi the feeling that it was like an area floating with a lot of dense kelp.

"It is said that Stranglethorn Vale, when this cosmic secret realm was not yet regarded as a battlefield, it was originally a super-large plant life. It is said that the plant has a diameter of hundreds of millions of kilometers, and it also has some unique abilities. It has more branches and spreads. Tens of billions of kilometers away." Antonio exclaimed.

Wang Yi held his breath slightly.

"Billions of kilometers? Tens of billions of kilometers?"

It's not thousands of times larger than a star, and it's plant life.

"Later, this powerful Void Thorn Life was besieged and killed by the super existences of all parties when opening up the battlefield, the soul was destroyed, the huge body was also torn apart and scattered in the surrounding stars, and some planets were also affected by the battle. , Exploded, forming a large area of wreckage..."

Wang Yi looked at the countless small sesame-like particles surrounding the "kelp" in Stranglethorn Vale. Those should be the remains of broken planets.

"So, there is this Stranglethorn Vale."

"The diameter of Stranglethorn Vale is about 1.3 light-years in the starry sky. The remains of its roots are actually extremely hard. It is difficult for the world master to smash the debris with a full blow, but it has no use value, so it stays there. There, it gradually evolved into a very famous special area of Stranglethorn Vale."

Antonio exclaimed.

A plant larger than a star, its body remains turned into a battlefield for powerful people of all races after death, it sounds really exciting.

"By the way, Heimian, you have to remember that there are too many powerful aliens lurking in the Broken Star Belt, so it is forbidden to fight for too long, and it is forbidden to be too public." The werewolf boy sitting beside Wang Yi scratching his ears.' Storm' reminded.

"When the battle lasts a long time, the movement of the battle will attract other powerful foreigners to come, and it will be dangerous when it is besieged."

Wang Yi nodded, "I see."

"boom!"

"boom!"

Along the way, the spacecraft also found multiple powerful energy bombardment aftermaths, apparently undergoing battle.

With the high-end detection equipment presented by Wang Yi's Venerable Guiyi, he clearly saw all the battles within a radius of 1 billion kilometers.

There were far more battles than he saw.

Wang Yi couldn't help sighing. It was indeed an extraterritorial battlefield, and it was fierce and cruel.

Soon, the spacecraft came to an empty area of nothingness, where there was no wreckage or rubbish, it was deliberately emptying a large area, because there were no obstacles, it could accelerate and travel through the universe.

In the "Seventh Star Field Battlefield", such "cosmic shuttle points" cost hundreds of millions.

"Start traveling through the universe!"

"10...9...8...3...2...1...0!"

In the starry sky, the light and shadow of a flying spaceship were slightly blurred and disappeared suddenly.

In the dark universe.

In the spacecraft, Captain Antonio said with a smile: "Well, entering the dark universe, basically there is no danger. Everyone has a good rest. After five days, we can reach the destination. At that time, we will be ready to fight."

When the team members heard the captain's words, they relaxed slightly, but they still maintained their basic vigilance.

Most of the team members are drinking and chatting, and some connect to the virtual universe to relax.

"This time I come out, I must accumulate more military merits so that I can buy some materials for my darlings." The centaur beauty "Eugene" said expectantly.

She is an animal trainer, because of her racial talent, she can control many tamed animals to fight, so that they can form a strong combat power.

In the vast universe, human beings have many partial evolutionary routes. The so-called warriors and spiritual masters are just the most basic and generalized classification.

There are also some "puppet masters" who specialize in controlling puppets, animal trainers who fight with powerful beasts, and pharmacists who study various strange substances in the universe...

These are all occupations that can defeat the strong with the weak.

However, the development route of the side-sect in the universe is also destined to be narrower and more bumpy. Many people who are not strong enough in the law of perception would rather take these side-sect routes.

Just like the master potion master who deployed 'Fimo's Venom', he might not be very strong, but he could produce a terrifying potion that would make the king and invincible fall.

Although Wang Yi once knew about the genres such as pharmacist, puppet master, and animal trainer, but not many, he was also a little curious about the performance of these people on the battlefield.

The team members were talking, and suddenly the "Sani" from the Double Star Clan turned to Wang Yi and asked: "Black Face, speaking of it, how much is your military merit?"

"My military merit quota?" Wang Yi raised his eyebrows slightly.

Every soldier on the battlefield outside the territories has a military merit quota, and must have accumulated enough military merit to obtain a "free body."

For example, the normal requirement for an ordinary recruit's military merit quota is 1 million. When the recruit just arrived, he did not have any military merit. As he slaughtered on the battlefield, his military merit continued to accumulate.

When it reaches 1 million, soldiers can choose to "retire", choose to "exchange treasures", choose to "continue fighting", or even fight alone, etc... they have the right to choose freely.

Before completing the military merit quota, one must honestly obey the military order.

"Yes, the black face is the leader of the world. He must be very powerful. I guess it is 200 million." The twin star clan girl 'Lola' echoed her sister's words.

The double star family is very special. They are twins at birth, either male or female... and they are oviparous. They are both conceived from the same mother's eggs, and they are born to be able to communicate with each other.

However, there are countless branches of the huge human race, and there are even more rare and unique races, which is nothing.

"Yes, I almost forgot, what is your military merit for Black Face?"

Other idle people also turned their eyes to Wang Yi.

"Well... my military merit quota is 1 billion." Wang Yi did not hide it.

As soon as Wang Yi's voice fell, the scene was a little quiet, and then everyone let out a cry of exclamation.

"1000000000?"

"My God? Did I hear you right?"

"Blackface, your military merits are so high?"

The members of the team were shocked without exception.

In fact, Wang Yi felt a little helpless.

In fact, he didn't want to show the limelight. The 1 billion military merit quota belongs to the military merit quota issued by the army through the virtual universe system. This has been "formulated.

The military merit quota issued also accurately shows a person's strength.

The minimum amount of military merit for all world master fighters is 1 million, and the maximum is 1 billion.

Among them, the ordinary landlord fighters are generally 1 million to 10 million.

The elite fighters are between 10 million and 100 million.

The main battle will be 100 million to 1 billion.

One billion is the upper limit of the masters and generals of the world. Anything that is issued with such a high amount of military merit... represents one thing, having the strength not weaker than that of ordinary immortal gods!

Antonio and the others knew this very well, so they were so surprised.

The look in Wang Yi's eyes has also changed. A newcomer who has just arrived on the battlefield outside the territory has a military merit quota of 1 billion, which is obviously from an extraordinary origin.

"Blackface, is this true? You really have a 1 billion military merit quota?" The originally lazy and glamorous vice captain snake-man beauty 'Olivia' couldn't help saying.

"I don't have to lie, right?" Wang Yi spread his hands innocently.

In the lounge, everyone sitting on the sofa glanced at each other, and then smiled on their faces at the same time.

"Ha ha....."

"Hei Mian has such a high evaluation, it seems that his strength must be very strong~[www.mtlnovel.com](http://www.mtlnovel.com)~ Our team has Hei Mian to join this time, but it is really great."

"Blackface, there will be a fight later, let us see your strength."

...

The players all laughed.

Even the face of the arrogant and stern look of the blade warrior "Baikamo" has also changed, and the look in Wang Yi's eyes is also solemn.

Obviously, Wang Yi's evaluation in his mind has changed.

But Wang Yi muttered in his heart when he saw this scene.

"What is the 1 billion military merit quota... If you know that Virtual Universe has arranged a 100 trillion military merit quota for me this time, wouldn't you go crazy?"
