

A God 301

[Chapter 301: Void Thorns](#)

In the original book, Luo Feng came to the battlefield outside the territory to practice the life and death of the owner, and the Virtual Universe Company only gave him a 10 trillion military merit quota.

And Wang Yi is 10 times taller!

Obviously, the senior executives of the Virtual Universe Company believe that since Wang Yi can break through the world master-level primitive Tongtian Mountain, he has 100 billion points for the bottom... at least he has the power to seal the king.

The Virtual Universe Company's speculation is actually not wrong.

Wang Yi is indeed at the level of the king now.

It's just that the first grade of the king is the king, the peak of the king, the limit of the king... and even the invincibility of the king is also the king.

Can suppress or even defeat Fengwang Invincible, that is also Fengwang.

Now mastering the six ultimate abilities of the laws of time and space... Wang Yi, who has two more clones and many treasures, is just so powerful.

After confirming Wang Yi's 1 billion military merit quota, the team was very excited, because there are many human race masters who have experienced life and death trials in the outer battlefield to become masters, but it is rare that they can face ordinary immortal gods.

For the entire No. 026 barracks base, there are probably only two or three such landlords.

Although Antonio's team has two immortal gods, and the other members are also world leaders and generals, none of them can achieve the "immortal god" combat power.

This shows how excited they are by Wang Yi's joining.

Now there are three "immortal gods" in the team, and the chances of survival for the entire team have naturally increased a lot.

"Haha..." Antonio laughed very happily. "That guy in Taiwo often shows off the "poison" in their team. Isn't that the "venom" that can play the power of immortal gods? Now our team also has a "black face". 'And Hei Mian is a spiritual teacher, much better than the 'poison' that requires medicine to exert its strength."

Although I haven't seen Wang Yi take action with his own eyes, Antonio and the team members already believe that Wang Yi has the power to be an 'ordinary immortal god'.

It is impossible to make mistakes in the evaluation of the virtual space army system.

The exposure of Wang Yi's huge military merits is to make the atmosphere of the lounge team warm up for a while.

A strong teammate is very helpful in the battlefield outside the territory.

Wang Yi also felt the enthusiasm from his teammates.

The spacecraft flew in the dark universe for five days, and then the universe shuttled and appeared in another empty area.

However, according to the star chart data, it takes about three months to fly to reach the destination "Stranglethorn Vale".

During this time, they have to pass through some dangerous places, and battles may occur at any time, so they must always be vigilant.

Wang Yi looked at those dignified teammates, and then at the monitoring of the super detection equipment on his armguards that spread around a radius of 1 billion kilometers, and smiled.

In the extraterritorial battlefield, he really didn't worry about being attacked.

Perhaps there may be some strong people... For example, the Zerg Mother Emperor may be hiding in the world inside the puppet. It is difficult to judge the strength from the team outside, and it will be kicked.

But being attacked or something does not exist.

Kicked to the iron plate... probably does not exist.

What Wang Yi wants to consider is how to complete the first few panel tasks during the period of time in the extraterritorial battlefield.

100,000 ordinary immortal gods! Ten thousand seals are immortal! A thousand kings!

Even with Wang Yi's current strength, it would take a long time to gather the number of killings.

The team member 'Ying' saw the casual expression on Wang Yi's face and reminded: "Black face, be careful, don't be careless, the various combat experiences we told you some time ago, don't look down on those little experiences, they are all one time. Sum up the second life and death battle."

"I see." Wang Yi also put away his expression.

These teammates do not know his true strength, and it is normal to be worried.

In a small team, personal strength is very important, but cooperation is also very important.

These team members have been together for at least a few thousand years, and they cooperated with each other very well. Suddenly, there was a new recruit, and they had to consider more.

The spacecraft was advancing carefully in the void at the speed of sublight, avoiding places where the strong might be hidden.

And Wang Yi and his team also stayed in the safe lounge, chatting while being vigilant.

That's it, time passed day by day.

...

"immortal!"

"There are immortal gods!"

A team of alien masters who had attacked Wang Yi's spaceship in ambush saw the two immortal gods Antonio and Olivia flying out of the spaceship, their expressions changed drastically, and they fled madly.

"It's boring!"

"These guys ran away as soon as they saw the captain."

"They are so weak, there is no immortal **** in the team, don't run away and stay and wait for death."

"Those Kmiao clan who seemed to be from the monster clan camp just now, right?"

"Unfortunately, I couldn't see the black face shot."

The squad members who stopped because of the sneak attack did not fly out, but stayed in the lounge, watching the captain as usual to scare the alien world masters away.

Boring.

These ordinary alien world masters have very few military exploits, and it is difficult to hunt down, and Antonio and the others have no intention of continuing to take action.

Along the way, sneak attacks like this have occurred several times.

But it can be easily solved every time. After all, an elite world master team like "two immortal gods leading eight world masters", ordinary alien world master squads simply can't provoke them.

This is also the reason for going to a specific destination, because in other places, opponents are too weak and accumulating military merit is too slow.

"Okay, let's continue." Antonio waved his hand, and a spaceship appeared next to him again. The previous spaceship had been destroyed in the attack just now.

But Antonio didn't care either. There were still a lot of these reserve spaceships in his world ring, that is, there were not a few spaceships in the spoils collected.

The team, which was delayed for some time because of the sneak attack, set off again.

...

Three months after coming out of the barracks base, after several attacks, Wang Yi's elite team finally arrived at its destination...Stranglethorn Vale.

"The front is Stranglethorn Vale." Through the simulation of the spacecraft's exterior, Wang Yi could clearly see the scene of the starry sky.

Far away, giants like mountains traverse the starry sky, just like seaweed floating in the sea.

The only difference is that these seaweeds are thousands to tens of thousands of kilometers long and have a diameter of more than tens of kilometers.

The fractured cross-section can accommodate a large city on the earth.

In Wang Yi's field of vision alone, many of these root vine debris were found, but the entire starry sky did not know how many.

In addition to plant remains, there are spaceships, dust and other debris ruins, forming a desolate and weird picture.

"Stranglethorn Vale is here, everyone should be vigilant. There are a large number of elite teams of foreign races lurking here." Antonio sat up straight and said in a low voice. "From this moment on, we have to be ready to fight at any time."

Olivia took the call and laughed: "In addition to us, there are also teams of humans and allies. Let's find a place close to the forces of our allies as a temporary station to facilitate future actions."

Wang Yi also looked at the monitoring screen displayed on his armguard. All movements within a radius of 1 billion kilometers can be detected, and the situation of the enemy and the enemy can be seen at a glance.

"Found one of humanity's main squad, as well as three allied squads."

On the battlefield, humans can certainly support each other.

The main consciousness connects to the virtual universe and keeps it open, then the virtual universe system will display the coordinates of all comrades and allies within a range of 1 billion kilometers.

1. Show the coordinates of comrades-in-arms and allies (within one billion square meters)
 2. Call for help in emergency (all humans and allies within tens of billions of kilometers will receive help)
- This is the virtual universe network, which has two major roles on the battlefield.

Of course, there are other functions, such as contacting superiors, calculating military merits, and so on.

Soon after, the spacecraft came to a starry sky and then stopped, while Antonio and the others flew out of the spacecraft.

"It's close to our allies' range of activities, so it's more suitable for us to build a temporary nest." Olivia said.

In front of them was a plant wreck. Although it was a wreck, it was dozens of kilometers in size.

Although very hard, these plant remains have been destroyed more and more in the long years of endless wars among the four major ethnic groups.

A natural deep hole was found in the plant remains, and no one occupied it.

"Let's go here, the environment is good, and you can also form an offensive and defensive alliance with nearby allies." Antonio discussed with the players, and everyone has no opinion.

Wang Yi looked at the shape of the roots of the surrounding plants, and the lines fell into his eyes after being magnified countless times, just like huge ravines and potholes.

And this is just an inconspicuous, insignificant piece of debris within 1.3 light years, as insignificant as a piece of sand in the desert.

"It's a terrible and great life..." Wang Yi sighed inwardly.

It's hard to imagine what a spectacular scene this plant should be when it is alive.

Wang Yi and other team members flew into the plant debris tunnel together, subconsciously meditating.

"Sign in."

[Ding, congratulations to the host for signing in successfully, and reward a seed of 'Void Thorns'.]

【Number of check-ins available for this place: 0】

"Um?"

When Wang Yi heard the name, his heart moved.

"Void Thorns? Doesn't it have anything to do with this plant remains?"

Wang Yi pulled out the sign-in panel and looked over it, and immediately saw the gray seed covered with mysterious patterns on the surface of an apple core just like the extra apple core under the sign-in panel.

At the same time, Wang Yi also received information about the seed, with a strange look on his face.

"Does it really have something to do with this plant remains?"

In the universe, there are countless lives, races, and plant life is one of the huge races.

Most plant life is born with a huge body, but the wisdom is weak. Because of the "lower wisdom", many plant life are closer to "things". Therefore, plant life such as *Morinda citrifolia* does not require the law of perception, as long as it satisfies the evolutionary conditions. You can break through to immortality.

Only by breaking through to immortality can they possess complete wisdom and communicate clearly with others.

Just like human races are divided into nine classes, the weakest adult is no more than an apprentice, and the strongest adult can be the domain master.

Void thorns are the top-level existence in plant life. Plant life such as Mo Yun vines and stargrass are also precious, but they are far inferior to Void thorns.

Void thorns can be regarded as the "special life" in plant life. They are scarce in number, but innately powerful.

Their strongest place is their body shape. A thorn in the void is cultivated to immortality, and the main body part alone is comparable to a real star, which is calculated in millions of kilometers.

If he breaks through again, his body will expand thousands of times again, to an extremely terrifying level.

However, its huge size does not mean invincibility. At the beginning, this terrifying void thorn was killed by the soul, and then the body was also torn apart, scattered in this star field, and turned into a battlefield area.

"This emptiness thorn is much stronger than Moyunteng..." After receiving the message, Wang Yi was full of wonder. "The most perfect moyun vine of 360 main vines, breaking through to immortality, will also be crowned high, but this void thorn, in the most perfect form of the pinnacle of the world, there are more than ten thousand main vines, and the other branches may add up to millions.Once it is opened, it will be overwhelming, filling the entire starry sky, extremely terrifying."

"Moreover, it also has a powerful talent for manipulating space-space cage. It is similar to space blockade, but it is more powerful than the suppression ability of simple space blockade. Ordinary immortality in a space cage, I am afraid it will be immobile."

Wang Yi's eyes brightened and then dimmed again.

"Unfortunately, it is too difficult and too slow to cultivate a Void Thorns... Even if I have Locke Divine Water, it is impossible to cultivate the Void Thorns to the perfect Manteng form."

"As soon as the void thorns in the form of Wanteng break through to immortality, with its divine body and talent, I am afraid that no one can pose a threat to it except the venerable and some special methods."

At the beginning, the perfect form of Moyunteng 360's main vine, it took nearly 12 billion points to break through to immortality.

The Void Thorns is equivalent to the special life in plants. Although the genetic level is not very high, it definitely exceeds the Yanxing Giant Beast, and it is estimated to be dozens or even a hundred times higher.

If it breaks through to immortality, it can be hundreds of times more difficult than Mo Yun Teng!

Wang Yi feels that if you don't have trillions of points, you don't have to think about it.

"No matter what, let's train the void thorns first." Wang Yi became interested in the void thorns.

"But I want to cultivate the void thorns to a master-level resource in the perfect Wanteng form...I don't have it yet."

"Incubate the seedlings first, take your time." Wang Yi is not in a hurry, anyway, he already has Mo Yun vine, no matter how full the potential of the Void Thorns, it will be a matter for the future.

The reason why Wang Yi suddenly emerged to cultivate it was because he thought that the earth needs a powerful plant to protect it.

Void Thorns fully meets the conditions.

It's just that the void thorns in the form of the perfect Wanteng, it is estimated that they have the power of immortality. If they suddenly become immortal, it will be even more remarkable. It is estimated that they can be called "invincible under the nobleman."

Wang Yi put the Void Thorns Seed into the body world, and then let the Zerg mother emperor who is doing nothing to understand the law to take care of it.

And their team went directly to the hinterland along the natural deep passage of the plant remains. There was an empty cave with a diameter of about 100 meters, and it was connected to other passages. At the end of the passage was a similar cave.

Antonio and others looked around for a while, and said that the environment here was okay.

"Huh!" The lounge cabin made of "titanium ice blue mother" appeared out of thin air
~www.mtlnovel.com~ and fell into this cave.

"After flying for so long, let's take a break here and discuss the next battle by the way." Antonio laughed.

He turned his head and said to the black masked teenager who bowed his head in silence: "You should listen carefully to the black face, and you can raise any comments. You will have to help you in the next battle."

Wang Yi nodded, but he was thinking about when he would complete the military merit quota requirements of the army, get rid of it early, and then complete his military merit tasks and panel tasks alone.

"One billion military merits are nothing..."

"100 trillion military merits, trivial..."

"The most important thing is the hunting mission... the next few years will be busy."

[Chapter 302: Interracial Realm Main Team](#)

In the vast starry sky, there are huge plant vine roots and remains, and between the roots are a large amount of dust, planetary debris, and spacecraft debris.

A flying saucer-shaped spacecraft shuttles through the starry sky at a speed of nearly 150,000 kilometers per second, and deliberately avoids places where alien teams may be lurking.

In the spaceship lounge, ten members of the entire team were sitting on the sofa.

"Detection equipment found battle fluctuations." Deputy Captain Olivia suddenly opened his eyes.

The others looked over at the same time.

Although Antonio is the captain of the team, Wang Yi also discovered that in fact, most of the time the person responsible for commanding is the snake woman. Of course, this does not mean that Antonio is inferior. It can only be said that Olivia is more suitable for commanding teammates.

And Olivia's detection equipment is also the best in the team, perhaps this is also the reason.

Of course, compared to Wang Yi's trillion-dollar detecting instrument, it is rubbish.

This was bought by ordinary venerables, and placed on the battlefield outside the territory, it was almost like a bug.

"Close to the past!" Antonio immediately ordered, "Olivia, check out the opponent's strength."

"Yeah." Olivia also continued to explore.

Wang Yi also looked at the screen on his arm guard. He had already detected the situation in the nearby area clearly in advance, but he could not explain the high-end detection equipment on his body.

"If you are in danger, talk to them again." Wang Yi said inwardly.

After a short moment, Olivia opened her eyes again, with a hint of excitement.

"Fluctuation has been found, there is a wave of immortal law, and the others are the world masters." Olivia said quickly:

"As for their opponents, they seem to be the Zerg camp, but they have already been defeated and are being hunted down."

The extraterritorial battlefield is a battlefield specially opened up by the four pinnacle races for the sake of war.

Here, humans, zergs, monsters, machine races and their allies and vassal races are divided into four major camps, fighting in chaos.

No matter which side meets the other side, either fight or avoid it. There is no second possibility.

"An immortal?" Antonio whispered, his voice low and loud, "Ready to fight!"

"Yes!"

The other players in the lounge were refreshed and full of fighting spirit.

Since staying on the battlefield outside the territory, either for tempering or for military merit... and all of these have to fight against alien races.

"Wow!"

Eight realm masters, including Antonio and two immortal gods, were simultaneously covered with battle armor. Even Wang Yi's face showed only a pair of dark and deep cold eyes under the mask.

Murderous! Everyone's eyes were full of killing intent.

The spacecraft quickly flew towards the distant battlefield.

"The target's detection equipment should be worse than ours. We didn't find us." Olivia smiled.

Smiles appeared on the other people's faces.

Detecting instruments are very useful on the battlefield outside the territory. They can spot enemies in advance and react to them. They can also shield the detection of detection instruments that are worse than oneself and hide their whereabouts.

And now, it is the detection instrument on the human side that has the upper hand.

The spacecraft approached the battlefield at a speed of 200,000 kilometers per second.

In the lounge, Olivia was also talking, "There are 15 million kilometers away from the destination... 9 million kilometers... 5 million kilometers..."

"Stop!" Olivia ordered the spacecraft to stop when it was less than 5 million kilometers away from the opponent, and then Antonio stood up and said: "All get off the spacecraft, we fly over."

Olivia also reminded at this time: "Remember, you must be close to me and the captain, so that my detection equipment can shield the other party's detection, so that the other party cannot detect your fluctuations."

The whole team of ten people walked out of the lounge, rushed out of the hatch along the passage, and came into the starry sky of the universe, and then looked at the place where the residual energy fluctuates in the distance.

"Go!" Antonio Lion had a grinning smile on his face.

...

In a starry sky, on the edge of two vines tangled together tens of thousands kilometers long, a battle has just ended.

An alien squad covered in green armor is fighting with another elite team. There is no doubt that their team has the obvious upper hand, because only three realm masters were killed, and the three realm The Lord also began to flee.

"Haha... I want to escape, kill them all, don't keep one!"

The speaker was a foreign immortal with a height of more than ten meters, a body like a human arthropod, and a fly-like head, laughing with excitement in its native language.

This is an ordinary tribe in the universe close to the Yao tribe's camp—the Sand Insect tribe, which is also a kind of flesh and blood life, with a fierce and warlike nature.

"Yes, Captain!" The other Sand Insect Realm Masters roared out.

The Sand Zerg Immortal went to chase and kill one realm master himself, while the other eight Sand Zerg realm masters separately hunted down the other two deserters.

There was a huge gap between the strengths of the two sides, and the three fleeing world masters were overtaken shortly after they fled, and they were killed with almost no resistance.

"Haha, got another military exploit!"

"Damn it, Zat, you snatched it again this time."

"Can you blame me, you are too slow."

"Zat, you are a spiritual teacher, and the speed of flight is faster than ours. You are ashamed to say."

"Thanks to the captain, who made a quick shot, I didn't let this team escape."

"Yes, they are all well led by the captain."

The alien world masters who had earned military merit were very happy, and began to flatter the immortal captain.

"Well, this time the battle was good. Everyone worked hard. Hurry up and pack up the spoils. Let's go to the next place and continue hunting." The ugly fly head of the Sand Zerg tribe immortal shook slightly and ordered.

"Yes."

Those Sand Zerg tribe masters happily cleared the battlefield. In the battle just now, the world within the fallen realm collapsed, but a lot of items were scattered, and there were world rings. Of course, these were collected and distributed according to the battle achievements afterwards.

far away.

In the place shielded by the detection equipment, a powerful elite squad of mankind is sneaking over silently.

"Slow down." Antonio ordered, "Olivia, let's attack them together and hurt them first."

"Okay." It's not the first time Olivia has done this kind of thing, so she immediately cooperated.

Sneez...The two immortal gods both stretched out their hands, and they began to crazily condense a large amount of immortal divine power between their hands, and they continued to compress and condense. In fact, this trick is a bit similar to the Vulcan Origin Crystal, which is compressed to even more than the "Immortal Crystal". A state of dense, and then suddenly detonated, of course the technical content is too high.

Even if the immortal **** is the king, there is no way to compress a crystal with the density of the "Vulcan Origin Crystal" without exploding on his own.

Wang Yi looked at the terrifying energy that was rapidly condensing in the hands of the two captains, and sighed inwardly, this is the method of the immortal gods, no matter how powerful his combat power is, he cannot condense this kind of attack with the power of the world. .

And because of the shielding of the detection equipment, the other party did not find it at all.

When the power of immortality condenses to a limit-

"kill!"

Antonio and Olivia glanced at each other, and shot out like lightning, followed by Wang Yi and other eight realm masters.

As the distance drew closer, the two immortal gods simultaneously waved the "immortal divine light ball".

Suddenly, a red and blue dazzling beam of light flew quickly towards the alien team in the distance like a meteor.

At the same time, the immortal gods of the Sand Zerg finally discovered the attack.

Even those Sand Insect Clan masters also saw two meteors suddenly appeared in their field of vision for the first time.

"Um?"

"what is that?"

"Immortal divine power compression body attack!"

The Sand Zerg race reacted quickly, and the members of the landlord began to panic and dodge one after another.

"Damn it, I just fought for a while, how come you come so fast!" The immortal **** of the Sand Insect tribe changed his face and immediately stretched out six claws. The Sand Insect tribe has a pair of hind feet and six claws.

boom! boom! boom! boom...

The six beams of light shot directly from the hands of the immortal gods of the Sand Zerg tribe and directly directed towards the two streamers in the distance.

The immortal powers of the two sides collided in the next moment.

"Boom..."

The six beams of light and the two compressed immortal divine power light spheres instantly collided, creating a terrible big explosion. The powerful divine power fluctuations instantly tore the surrounding area of thousands of kilometers, and the terrible immortal divine power fluctuations escaped in all directions.

"what!"

Although the Zerg tribe masters fled quickly, there were still two involved in the explosion, and there were no bones left.

"Damn humans!" Seeing the death of their two tribesmen, the Sand Zerg immortal eyes were red, and his heart was full of anger.

"There are actually two immortals!"

But seeing that there are two immortal gods in the opposite human beings, he was also shocked.

He is the only immortal **** in their team, and the other players are the masters of the world, but there is no such thing as strong enough to match the immortal god.

In addition, two team members have already died, and the enemy is very few. Once they fight with the humans in front of them, they will probably be wiped out.

"Run! Run away!"

While the Sand Zerg Clan immortal roared, they continued to attack Antonio and the others with the beam of immortal divine power, trying to stop them from pursuing them.

But obviously he was going to be disappointed.

"Hehe, I want to escape, and I asked if I have it." The snake-man beauty Olivia, who is at the front line faster than Antonio, outlines her perfect upper body in a close-fitting green jersey, while the lower body is swimming. Seven or eight meters long snake tail covered with scales.

Her green eyes were glowing with gloomy light, as if there were dreams floating in those beautiful and unreal eyes.

The immortal divine power is blurred, and the soul attack is entrained, and it quickly spreads like a ripple in the starry sky.

The first thing that bears the brunt is the immortality of the Sand Zerg. It originally had six arms swinging a beam of immortal divine power. Without such subtle skills, it just shot out an incomparably powerful immortal divine power, blasting in the direction of the human enemy rushing forward!

This also caused the immortal power in his body to be quickly consumed, but it didn't matter.

As long as the immortal spirit is not burning divine power, as long as it is not annihilated by divine power... then after the divine power is attacked, it will still return to the body.

Because that immortal divine power is fused with consciousness, it has long been his private possession!

However, its divine power attack could not stop the imaginary immortal divine power and the soul attack. When the soul attack quietly fell on him, it instantly sensed that something was wrong, "Not good!" A look of anger appeared on his face. .

Although he tried his best to resist the soul attack, his consciousness still stagnated for a moment, causing a short gap in the divine power attack.

Although he will wake up in the next moment, Antonio has already rushed in front of him like a lion full of flames, a pair of golden steel cast, covered with secret patterns, and there are sharp barbed punches at the knuckles. The sleeve bombarded him.

"Ah!" The immortal Sand Zerg tribe found that it was affected by the attack of the soul. Those tribe members lost consciousness and stopped in place. They also lost the opportunity to escape. They couldn't help but let out a sharp and strange howling sound. Six arms appeared at the same time. Six black scimitars full of extremely complicated secret patterns, slashed frantically, blocking Antonio's attack.

"Boom..." When the power of the two immortal gods exploded, countless space cracks were directly broken into the surrounding starry sky. Under the power of the immortal gods, the universe seemed fragile.

"Peng!"

The immortal sword of the Sand Zerg tribe was shining like a wave, and Antonio swung his fist out of the phantom. The two sides fought in an instant. I don't know how many records, the divine power fluctuations of the two sides surged like a flood in the shattered space.

After a brief confrontation, the Sand Zerg race immortal backed, and Antonio rushed up with a low roar of excitement, fiercely fierce. "Go to hell, alien!"

The Sand Zerg Clan immortal looked at the only remaining clansmen not far away, with a trace of sorrow in his eyes. These clansmen had followed him for many years and were born to death. There were only a few left, but this time he could not keep them.

It's nothing more than Antonio, he still has a lot of power to fight, but coupled with the more terrifying and weird snake man woman soul attack, he can't parry.

"what!"

The Sand Insect Clan immortal let out an angry roar, and the sound spread far in the deep starry sky, possessing incredible power, even if the space was rippled.

Afterwards, the Sand Zerg race was immortal but unexpectedly did not continue to fight hard, but turned around and ran away, not even caring about the same race at all.

"I and your deputy captain are going to hunt down Immortal, you deal with other people." Antonio snorted, turned into a golden streamer and chased after him, and commanded at the same time.

"Yes, Captain!"

"Haha, don't worry, leave it to us!"

Seeing his own two immortal gods pressing against the only immortal **** on the opposite side, Wang Yi's morale was also high.

Because of the reason Antonio and the others suddenly attacked with the immortal power of the compressed body, two alien world masters died, and most of the remaining six sandworm family world owners also had some injuries on their bodies. At this moment, these six world owners were killed by the team. The master warrior of the famous world surrounded the unkind groups.

And intentionally or unintentionally left an alien world master to Wang Yi. UU Reading
www.uukANAshu.com

Wearing a gray battle armor with a cloak exposed, the rather irritating werewolf boy brandished his mace vigorously while shouting: "Blackface, kill him, let's see what you can do!"

The other teammates besieged one by two. Only Wang Yi was facing an enemy alone. The intention was self-evident. They all wanted to see the true skills of this new teammate.

Although it was only a realm master and general as the target, some depths of Wang Yi can also be seen through the details of the battle.

Really...

Wang Yi shook his head slightly, standing in the starry sky, a crystal shuttle covered with mysterious patterns appeared behind him, then looked at his unsightly enemy and stretched his finger.

"go!"

[Chapter 303: Fierce battle](#)

Wang Yi indifferently looked at the landlord of the Sand Insect Race who rushed up frantically, his eyes sharpened.

Not far away, two or one of the members of the squad were fighting against alien races.

Brilliant brilliance bloomed behind Wang Yi like petals, and quickly assembled into a sword-shaped crystal.

The origin law of time and the origin law of space fluctuate lingering on the crystal sword.

At the point of Wang Yi, he has become supernatural, not constrained by the original moves of the "universal magic soldier", or in other words, his own level has surpassed the power of the original magic soldier and has become even more unpredictable.

"go!"

As Wang Yi pointed at the alien world master, the secret pattern on the crystal sword lightened up, then turned into a stream of light and shot towards the world master.

"brush!"

The two sides were separated by a million kilometers, and the crystal sword pierced the air, and almost came to the front of the alien world master in a blink of an eye. The tip of the crystal sword turned into a time vortex, and the flow of time seemed to change for a while.

"Huh?" When facing the crystal sword, the alien world master who was attacked felt that his reaction speed had slowed down a lot, and the whole body was faintly locked and locked, his face suddenly changed. "No, it's a human genius with the laws of space and time, and has cultivated to a very high level." With his rich experience in the battlefield, the Sand Insect Realm Realm immediately discovered this.

"Ah!" The ugly face of the Sand Zerg Realm Master, who was aware of the bad things, came down, let out a roar, and thunder and lightning lingered all over his body. He was holding different types of weapons in his six hands, including war swords, big swords, and spears. , There are giant axes, and even shields... And right now, these weapons are bursting with light under the power of thunder, and under the control of the sand insect clan master with a very subtle coordination, they smashed towards the crystal sword.

Not far away, the human squad was also fighting fiercely with other sand worms. Although the human squad had the upper hand, it was difficult to eliminate these not weak alien races at once.

"For help!"

"Send for help! Tell the surrounding allies that there is a squad of human elite masters here!"

The fleeing Sand Zerg immortal resists the two human immortal attacks, Antonio and Olivia, while connecting to the military system.

In the battle just now, he didn't notify his allies... that was because he was strong enough and thought he could eat the opponent, but of course he didn't want allies to divide the military merits.

But now it was different. The situation changed. He was pursued and killed by two immortal humans. The situation was precarious, and the Immortal Sand Zerg had to ask for help.

"Call for help, call for help, meet a human team with two immortals!"

The immortality of the Sand Zerg race was affected by Olivia's soul attack, and the flight speed was not as fast as that of the two, so it was very difficult to escape.

In such a starry sky full of debris and ruins, even if the immortal gods want to accelerate to the speed of light, it will take some time, not to mention that it is difficult for them to really maintain their speed due to various restrictions in battle.

Another soul power invaded, but this time the Sand Zerg Clan immortality had already been prepared for it, and just a little shake, blocked the soul attack, but it still had some influence on him, and it could not be blocked by Antonio's fist. , The divine body was torn apart some injuries.

But recovering in a blink of an eye, the injury was actually minimal.

However, as far as the immortal spirit is concerned, as long as it is not too severely damaged, even if the body is torn, it can be healed in a blink of an eye, and its strength will not be greatly weakened.

The huge compound eyes of the Sand Insect Race's immortality flashed crazily. "Allies and comrades in close range can come quickly. I must insist, and persist until allies and comrades come. Persevere. As long as allies and comrades come, I can survive, maybe I can fight back! These **** human beings."

"Boom..." A golden steel fist that shattered the space slammed over, and the Sand Zerg immortal raised the black saber in his hand to resist, but another soul shock accompanied the illusion attack, and the Sand Zerg's immortal power couldn't help it. 'S weakened, the Lionhead Antonio, who was in full burst, fisted, and some green blood was sprayed out.

"Ah..." The immortality of the Sand Zerg race is really going crazy.

No matter how fast his divine body heals, as long as it is not an "immortal body", he will be hurt in a steady stream of tears, and the accumulation will add up, and the divine body will always reach a limit.

In other words, it will really die!

The perfect tacit cooperation of Antonio and Olivia gave it a sense of aggrieved and helpless immortality that was not weak.

"Die, Sand Zerg is immortal!" There was a hint of excitement in both Antonio and Olivia's eyes.

Killing an immortal **** is a lot of military merit.

While struggling against the immortality of the two human beings, the Sand Zerg Clan immortal also kept calling for help.

Like human beings, once the members of the monster race call for help, they will be quickly communicated to all their comrades and allies within 10 billion kilometers around through the messaging system. 10 billion kilometers is a considerable distance. The speed of light is 300,000 kilometers per second, which is 10 billion. It will take more than half a day to fly.

The distance of the speed of light more than half a day is the radius, which is a scattered sphere area. How many allies and comrades in arms?

"Encountered a master squad with two immortal human elites."

This message was quickly learned by the elite teams of the demon race and its affiliated races.

"Two immortal gods?"

"It's really good in Stranglethorn Vale to have two realm master teams of immortal gods."

"The place is a bit far away, so let's not go, the hapless guy asks for his own blessings."

"This coordinate is a bit close to our team's position, go and have a look."

After receiving the news, the Yaozu and the large number of ethnic groups under its command, many foreign experts reacted differently after receiving the news.

Some laughed, some lamented what happened to the other party, and some were indifferent.

After all, the Monster Race is so big and there are so many races, it is impossible to unite as one.

However, several teams killed after receiving the message.

"The two immortal gods, with the strength of our team, can deal with them."

In a fast-flying purple biological spacecraft, a strange life with a height of fifteen meters, like a hill, with a crystal corner on its forehead smiled.

His body exudes a strong aura of immortality, and the surrounding area light is faintly distorted, turning into a black hole.

And beside him, there is an immortal god, and more than a dozen world masters.

"I hope our allies can support a little longer so that we can get to the battlefield in time." Another immortal, lying on the ground like an octopus, made an unpleasant hoarse sound, like a knife scraping on glass, sharp and ear-piercing.

There was no sympathy for his allies in his tone.

"I hope so." The strange life of the crystal unicorn also didn't feel much about the ally being besieged.

Originally, these ethnic groups were the groups under the vassal of the monster clan, and it was not a good relationship. If it weren't for the management of the monster clan, maybe they would be able to kill each other when they met on the battlefield outside the territory.

"Let the spacecraft move at full speed toward the target location!" the alien immortal **** ordered.

The leader of this team is very famous in Stranglethorn Vale. His name is "Surfing the Sea". He is a powerful immortal **** whose strength is close to the immortality. Of course, there is no immortal body, so it is not as terrible as the immortal. The huge Stranglethorn Vale is also considered a top powerhouse.

Although "Stranglethorn Vale" gathers powerful people from all races, the immortal gods are still very rare. As long as this "survival of the sea" is careful, it is almost nothing to encounter those few Stranglethorn Vale overlords or be besieged by a group of immortal gods. Fearful.

And in the original battlefield.

"Puff!"

A streamer broke through the sand insect clan master's weapon barrier like lightning, and forcibly tore half of its body unstoppable.

"Ah!" The Lord of the Sand Insect Clan roared, but the broken body quickly healed under the influence of the power of the world.

Domain masters, world masters, as long as they are not directly attacked to destroy the life core, they will not die, and the body can recover quickly, of course, not as terrible as the immortal gods.

Wang Yi controlled the streamer and easily ravaged this Sand Insect tribe's realm master who had reached the level of the realm master and warlord.

At the same time, he can also watch the situation of his comrades next to him distracted.

Except for the two immortal gods, Wang Yi's team is the leader of the world!

This kind of lineup can be regarded as the absolute elite in the Stranglethorn Vale team!

At the periphery of the outer battlefield, the level of the team can be divided into the ordinary main squad, the elite main squad, and the ace main squad!

Ordinary master squad, the team does not have immortal gods, most of them are composed of elite master fighters and master warriors, and it is difficult for ordinary master fighters to be invited to join the master squad.

The elite realm master team must have an immortal god... or the power of ordinary immortal gods, and then most of the team are realm masters and generals! This can be called an elite!

The ace master team... the leader of the team is likely to be immortal, or the strength is close to the immortality, and then there are many immortal gods in the team, and although the master also has it, it is not so important. The strength of this trump card team completely crushes other teams. It can walk sideways throughout Stranglethorn Vale and stand at the top of the pyramid.

Wang Yi saw the identical twin-star girls in the team maneuvering two crescent-like thought-power weapons, working with them seamlessly, besieging a sand worm clan master, defeating that master steadily, and it seems that it will be soon Was killed.

The werewolf boy "Storm" brandished his mace, and with the assistance of the black-robed woman "Meer", he frantically bombarded a sandworm landlord with a strange whistle of excitement in his mouth.

The centaur beauty "Eugene" has a monster with four heads beside it... It looks like a thunder dragon from ancient times on the earth, with snow-white scales all over, with its mouth split to the neck, spouting dazzling beams of light. The power was so great that he was embarrassed by the opposing alien world lord who was struggling to resist, with wounds on his body, and Eugene also took out a bow and arrow-like weapon to attack the lord from a distance, and one person would have the upper hand with a beast tamed.

The sturdy blade warrior "Baikamo" has been violent. The blades are all born warriors. They are not afraid of death, and are dedicated to the pursuit of strength. Therefore, they are also the craziest in the battle. At this time, they have turned into a burst of swordsmanship. The opponent is shrouded in it.

And the last Sand Zerg tribe master was entangled by tens of thousands of puppets in the shape of black apes under the command of tens of thousands of puppets in the shape of black apes, the black-winged dwarf man of the Wu God tribe, who was as short as a child. Unhurriedly release more puppets, form different formations, and firmly suppress the opponent.

While Wang Yi was watching his teammates, the rest of the team were also observing Wang Yi, the new player.

"That seems to be one of the nine great soldiers of the universe."

"Is this the fourth or fifth stage?"

"I don't seem to have seen this kind of cosmic soldiers."

"Me too."

"Is this a cosmic warrior?"

Seeing Wang Yi so easily suppressing a strong alien world master, the team members were amazed and admired, and then they began to wonder and discuss again.

They also understand the information of the "Universal Magical Weapon", one of the nine great masters of the human race, and they also know that the Universal Magical Weapon is divided into seven layers.

However, he couldn't recognize which layer Wang Yi was using now.

Of course they couldn't recognize it, because this was originally not the inherent form of the cosmic magic weapon.

At the level of Wang Yi, he can already use his own understanding, freely use, and create his own means of attack.

However, Wang Yi has not been able to create a match with such a super move as the seventh "Killing the Shuttle".

The members of the team did not relax their fighting during the discussion, they all went all out and quickly killed the alien world masters one by one.

When Wang Yi saw this situation, he felt that he was almost playing, and he killed the scarred and terrible Sand Insect Realm Master on the opposite side.

There was even a hint of relief in the eyes of the Sand Insect Realm Lord before his death.

He, you are finally willing to kill Lao Tzu...

"Black Face, I saw the battle just now, your kid is quite strong, you deserve to be a guy with 1 billion military exploits."

"Haha, the black face is indeed very powerful, but you are using the cosmic magic weapon? What kind of move was that just now?"

"Blackface uses the cosmic magic weapon. It is one of the nine magic weapons. It is still the most difficult... I am so envious. I can't use it with Sani." It was Laura who was speaking from a girl of the Twin Star Clan. Looking at Wang Yi~www.mtlnovel.com~ with bright eyes, the nine great soldiers in charge, but the dream of a spiritual teacher.

However, there are not many people who can cultivate to a high level, and they are rare.

After killing all the six alien world masters, the eight team members gathered together and communicated quickly. Everyone was full of energy, talking and laughing, and then looked at the place where the strong energy fluctuations broke out in the distance.

"Go, let's help the captain and them deal with that alien immortality!" The werewolf boy "Storm" was eager to try.

All eight team members flew over. With their strength, all of them can easily reach the speed of light. Of course, they also need an acceleration time.

Because of Olivia's influence and Antonio's obstruction, the battle of the three immortal gods was actually maintained at a short distance. The Sand Worm Race didn't run very far, and they were soon overtaken by Wang Yi.

[Chapter 304: Kill immortality](#)

"Ah! Bastards!" Seeing the appearance of the human world leader team, the Sand Zerg Race Immortal also knew that the members of their team were wiped out. His heart ached, and it was even more angry and painful.

"Haha, die, the foreign race is immortal, you're done!"

"There is no chance. Give up resistance and become our military merit."

The werewolf youth storm, the black-robed woman Mel, the sisters of the double star race... and other team members gathered around like a pack of wolves. Their strength could not directly join the battle of the immortal gods, but they could harass and interfere with the immortal gods of the foreign race.

When Wang Yi saw this scene, he shot again and silently assisted.

"Swipe!" A beautiful silver-gray streamer shook slightly, breaking through the space, disrupting the fluctuation of time, and killing it towards the embarrassing alien immortal.

The Alien Immortal was just about to smash away Antonio's powerful steel fist, and suddenly a stream of light appeared next to him, "No! What kind of attack is this?" The Sand Zerg tribe's immortal heart suddenly felt bad, but Olivia's. The soul attack had arrived, and his reaction was still slow. In fact, even if his reaction was not slow, he could not avoid the attack.

"Puff!"

The armor on the sandworm race's immortal body was easily pierced, and his body was torn apart.

"what!"

The Sand Zerg Clan immortal made a sound of fright, and there was a hint of panic in the sound. He looked at the black masked human standing quietly in the distance, a human world master, so easily hurting his body?

The Sand Insect Race has a bad premonition for immortality.

The players next to him included Olivia, and Antonio was overjoyed when he saw this scene.

"Good job! Black face!"

"It deserves to be a black face!"

"good!"

While excited, they still did not forget to launch a fierce attack on the sand worm immortal whose divine body was damaged, soul attack, illusion attack, mind weapon attack, energy attack...like the tide, they surrounded the sand worm immortal.

The immortality of the sand worms was unwilling to sit still and struggled fiercely.

When resisting the attack of Olivia's soul, his six black sabers fought with Antonio, who was attacking from the front.

The collision between the fist and the saber instantly seemed as if a star was erupting, and the terrible high temperature generated by the collision alone would distort the surrounding space, and the shock waves produced by the collision of the extremely powerful immortal force surged in all directions.

The black knife light and the golden fist kept colliding.

With the collision of the sky and the earth, hundreds of kilometers around the universe and the starry sky completely collapsed, and countless spaces were turbulent.

Peng! Peng! Pompong...

The powerful force oscillated in the space, and the space was torn apart.

At the same time, the immortal sand worms are also trying to get out of the battlefield.

at this time--

"call out!"

The silver-gray crystal shuttle gleamed with misty brilliance, and suddenly appeared on the side of the immortal Nasha Zerg.

"Ah!" The immortal face of the Black and Green War Armor Sand Insect Race changed drastically, and he didn't even notice that he was rushed in front of the enemy's thought-power weapon.

The beautiful weapon that broke through the air at this moment seemed to completely engulf the surrounding space, and it felt as if the sky had collapsed. The terrible pressure made me immortal without the confidence to resist.

"Obviously just a realm master, why!?!??"

When the weapon broke through the barrier of his black sword and tore his divine body again, the Sand Zerg race's immortal heart was full of confusion and fear.

"good chance!"

Seeing that the immortal body of the Sand Zerg tribe was torn apart, Antonio and Olivia, who were already prepared, were overjoyed at the same time. Two powerful immortal powers fell on the body of the Sand Zerg tribe that was too late to recover from the cracked immortality, and his divine body was once again. Torn.

"Ah!!!" The Sand Zerg Race Immortal roared in anger and unwillingness.

But under the siege of Antonio, Olivia, and Wang Yi, three enemies with the power of immortal gods, he couldn't do much.

"Blackface, you continue to attack him and tear his divine body, Olivia and I will destroy his divine body." Antonio's Immortal Power transmitted to Wang Yi.

Wang Yi's eyes flickered.

Although the immortal gods have extremely strong recovery capabilities, they also have limits. If it reaches the point of "immortality," then the sand worm immortality will not die even if it continues to shatter and become smaller, but it obviously has not reached that point. The shattering is too thorough, and the spiritual imprints are shattered, then it's over.

Even if it is not broken to the extreme, but the divine body is constantly torn, and every time he recovers, he needs to consume strength. Wang Yi feels that he only needs to attack a few times to make him lose a lot of immortal power, and then he can kill him. .

After all, it is not an "immortal body", every time it is torn apart, it loses a lot of immortal power.

There is an "immortal body", even if it is shattered, the energy loss is minimal.

Therefore, the immortal gods with immortal bodies are very terrifying, and those ordinary immortal gods are unwilling to face the battlefield outside the territory.

But now that the two immortal gods work together, it will naturally be easier.

"Puff!"

The misty brilliance appeared again suddenly, tearing apart the immortal divine body of the Sand Zerg race, making it impossible for him to gather in time.

At this time, Antonio and Olivia had seized the opportunity to control the immortal powers to trap part of their broken bodies.

However, those shattered bodies contained powerful immortal divine power, and the instincts struggled very hard, and the two immortal gods had to go all out to suppress them.

Seeing Olivia and Antonio, the two immortal gods of one's own side, each began to destroy the enemy and shatter their bodies... Those body fragments were divided into two parts, and one person dealt with one part.

Constantly bombarding, shattering those bodies continuously, breaking them more and more, causing the enemy's immortal power to be consumed continuously, and the enemy cannot explode in this crushed state...

Eventually, it will be consumed by the immortal power, and will be directly collapsed.

Wang Yi stopped, wondering how much military merit this immortal **** was worth...

Seeing that the two captains had already gained the upper hand, the situation stabilized, and the other team members stopped attacking. Instead, they surrounded Wang Yi and praised them.

"Good job!"

"Blackface, that trick just now was pretty powerful!"

"Sure enough, there is a black face, our team's strength has greatly increased, now in the outer battlefield, our team is more likely to get mixed up."

"call....."

On the other side, Olivia and Antonio had completely shattered the immortal body of the Sand Zerg race, blasting them to death so that they could no longer die, ending the battle.

"It's over." Antonio grinned on the wild lion's face.

The other team members also cheered, even if the blade clan Baikamo is like this, there is a smile on the cold face.

"Well, the battle is over, quickly clean up the scene, we will leave here quickly." Deputy Captain Olivia said.

"Oh!"

When others start to clear the battlefield and collect loot.

"Master, you have gained military merit again." Bermuda said happily.

At this time, Wang Yi also noticed the new prompt on the arm guard screen.

The battle must be connected to the "virtual universe network" so that the battle can be monitored and military merits judged.

Just now, Wang Yi killed the sand worm tribe realm master and got 10 million military merits.

In the outer battlefield, you can gain military merit by killing the enemy.

Killing ordinary warriors alone is 100,000 military merits.

Killing the elite fighters alone is one million military exploits.

Killing the main battle generals alone is 10 million military exploits.

This is a single kill. If you team up with other people, the military service will be divided and you can only get a part of it.

100,000 military merits can be exchanged for 1 mixed yuan unit, and can be exchanged for treasures in the military system!

Accumulating 1 billion military merits is a unit of 10,000 yuan, which is almost the entire wealth of ordinary immortal gods.

If they are in the human domain... these masters of the world will fight for the 1,000th era in their entire life, and I am afraid it is impossible to earn 10,000 yuan units, except for special circumstances.

But in the extraterritorial battlefield, as long as it can survive tens of thousands of years, it is easy to accumulate 10,000 mixed yuan units.

Just now Wang Yi killed the warlord of the Nasha Zerg tribe, and obtained 10 million military merits, which is equivalent to 100 yuan unit, all the wealth that the 10 world masters can accumulate in a lifetime!

Wang Yi finally understood why the extraterritorial battlefield could attract so many powerful people.

"And now I cooperate with two immortal gods to kill an alien immortal, and give me 20 million military merits." Wang Yi shook his head. "Total the previous world master, only 30 million military merits."

"It is estimated that this dead alien immortal is just an ordinary elementary immortal god. Because of my help, I was awarded 20 million military merits. The two captains probably divided the remaining 80 million military merits, so the total is 100 million military merits." I secretly said, "The stronger immortal gods have more military merits."

Immortality is divided into immortal military master, immortal prince and immortality.

And even the lowest immortal warlord can be divided into high and low. The weakest can only pass the 10th floor of the Tongtianqiao, while the strongest immortal warlord can pass the 14th floor.

Once you have broken through the 15th floor...that is the immortal **** of Fenghou.

From the 10th floor to the 14th floor, they are all immortal warlords, and of course there is a big difference in strength.

The immortal warlord, also known as the ordinary immortal.

On the battlefield outside the territory, it is naturally divided into "ordinary immortal elementary", "ordinary immortal advanced" and "ordinary immortal pinnacle".

The strength is different, and the military merits of the kill rewards are also different.

Killing an alien world master alone will only have at least 100,000 military merits and a maximum of 10 million military merits.

And kill Immortal alone, the minimum is 100 million, and the maximum is 1,000 trillion (killing Fengwang Pinnacle).

Even Wang Yi Virtual Universe's request is only 100 trillion military merits!

But the powerful gods are notoriously hard to kill.

To kill the immortal prince, generally requires the immortal strength of the prince.

Immortal King of Killing Peak?

It's even more difficult.

It is easy to defeat, difficult to seal, and the hardest to kill.

"The Virtual Universe Company gave me this indicator at the beginning, and it probably didn't expect me to kill the king..." A smile appeared on Wang Yi's face.

Peerless geniuses like Kedi, who were born in the tens of millions of epochs and hundreds of millions of epochs, have many magical encounters, and have received massive resource training from the virtual universe company. In the peak period of the landlord, they only killed the immortal.

And it's not necessarily the immortality of the pinnacle!

As for the landlord to kill the king? That is incredible! Even in the universe, it is estimated that only the realm master who is the most against the sky can do it.

Although Kedi was a genius, he was still far from the most enchanting level in the universe.

But Wang Yi is different. The third calamity of the Secret of Nine Tribulations has increased his genetic level by 12 times, and there are "Inheritance of the Demon God General", "Inheritance of the Purgatory God General", "Power of the Beast God"...single It is the stage of the master of the human body, and the foundation can achieve the power of immortality!

The law perception has also reached the extreme, and the 20th floor of the Tongtianqiao is only a short distance from the Venerable.

Master the ultimate abilities in the six aspects of time and space!

Create your own peak secret method!

Not to mention there are two more perverted clones, as well as "Emperor Armor", "Purgatory God Armor", "Fire Conch Palace"... and many other treasures.

The extraterritorial battlefield was nothing more than a temporary hunting ground and a place of tempering for him.

"Master, I found an alien spacecraft appeared in the detection range and is rapidly approaching our area." Bermuda's voice once again sounded in Wang Yi's ears.

"Huh?" Wang Yi frowned.

"Send the picture here."

"Yes."

On the screen of Wang Yi's armguards, a detected image appeared. It was a purple-shaped biological spacecraft. Inside the spacecraft, there were more than a dozen creatures. Sitting on top was a 15-meter-high, like a hill. There was a strange life with a crystal corner on his forehead, and beside him, there was a life lying on the ground like an octopus.

"Two foreign races are immortal?" Wang Yi moved in his heart.

"Looking at their appearance, they should have received a request from the Sand Zerg tribe just now, so they should be from the monster tribe camp."

"However, I don't recognize their race, it should be the Monster Race...or other ethnic groups attached to the Monster Race."

The universe, hundreds of millions of ethnic groups.

It is as if human beings, as the peak race, are divided into countless ethnic branches.

There are also those like the "Golden Horn tribe" who are attached to human beings and serve humanity in exchange for living space.

There are also similar to the "Hongmeng", the allies of mankind.

The same goes for other pinnacle races.

Therefore, the number of various ethnic groups appearing on the battlefield outside the territory is very staggering.

While Wang Yi watched the opponent's spacecraft fly over, he thought quickly.

"They received a request for help. They should know the situation here. Since they already know that humans have the power of three immortal gods... even if they are just ordinary immortal gods, they cannot be dealt with by two immortal gods. If they dare to come over, they must be sure."

"They must be extremely strong!" There was a hint of excitement in Wang Yi's eyes.

"Maybe, he is the best immortal warlord!"

Ordinary immortal gods have only 100 million military exploits.

The pinnacle of immortal military masters, however, has 1 billion military exploits.

Kill one, and you can make up for the army's 1 billion quota requirement. Since then, you will restore your free status, no longer subject to strict restrictions by the military system, and you can move freely.

"Hope, there is a pinnacle immortal military master." Wang Yi thought silently in his heart.

As for "Fenghou immortal"? He didn't expect it, it was a bit difficult to encounter an immortal prince in the vast Stranglethorn Vale battlefield area.

But Antonio and others, who were cleaning up the battlefield, did not notice the approach of the alien spacecraft. Obviously... the technical content of the other party's detection equipment surpassed them.

15 million kilometers away, in the purple spaceship.

"The human squad has been found, but our ally and friendly image has been killed." There was a smile on the strange face of "Sorrow Sea" with a crystal corner on his forehead.

He didn't care about the death of his ally ~www.mtlnovel.com~, but was a little happy in his heart.

When the ally is dead, the treasure of the ally falls on the enemy, which is equivalent to falling on him immediately.

Perhaps this is one of the reasons why he arrived at this time.

After all, within the Yaozu, it is also strictly forbidden to fight against each other among allies, and cannot start against allies.

"Well, ready to fight!"

"Wow!"

Su Hai, who was wearing purple armor, stood up, his tall body exuding an astonishing aura.

"Hoop!"

The other creatures in the spaceship stood up, and each creature had a fierce and fanatical killing intent in its eyes.

[Chapter 305: "Black-faced"!](#)

"Two immortal gods, eight world masters..." Through detection, Yan Hai understood the situation of the opposing team in an instant.

However, he didn't know that there was a realm master who was "comparable to the battle power of immortal gods".

Because of Wang Yi's sudden move, when the Sand Insect Race's immortality finally fell, he did not send the news in time.

And when the spacecraft of "Surfing the Sea" arrived, the battle had ended, and they had already missed that scene.

So he thought that the human team had only two ordinary immortal gods and eight realm masters.

"Faguzi, you and I will take action together." When the spacecraft was 6 million kilometers away from Wang Yi and the others, it stopped, and many foreign races flew out of the spacecraft. Among them, the tall and strange life wearing purple armor "was dying." Sea" said to the immortal **** like an octopus with sixteen pairs of eyeballs covered in black scale armor.

"First, a wave of compression and divine power attacks... Then, you and I will deal with an immortal **** separately." Shan Hai grinned and said. "Other people, go and deal with those world masters."

"Okay." The octopus-like creature responded.

The octopus life comes from a race group "Diro" in a distant place in the universe. In fact, it is not a member of the Yao race, nor does it belong to the group of the Yao race. However, in order to join the extraterritorial battlefield, these races will pay some price, and then some Participate in the battle as a member of one faction.

Therefore, although the outer battlefield is said to be the war of the four pinnacle races, it is actually terrifying on a large scale.

The strong from hundreds of millions of races in the universe are fighting here and fighting **** battles.

The two alien immortal gods began to act, condensing and compressing the immortal divine power, preparing to catch the human team by surprise.

The other alien world masters are also closely surrounding the two immortal gods, so as not to be discovered by human detection equipment.

On the team's side, except for Wang Yi, no one had discovered the situation.

Seeing "Surfing the Sea" stretched out his hands, in an instant, a surging light of immortal divine power began to gather between his hands, the divine power continued to gather, getting stronger and stronger, I saw a white light appeared between his hands The strength of the divine power in the ball, the ball of light is still improving and climbing.

And beside the "Surfing the Sea", the octopus, whose body resembles a behemoth of the deep sea, was immortal and stretched out its eight tentacles. With the surging immortal power surging, the powerful immortal power gathered, a deep blue one. The ball of light gradually formed between its tentacles, illuminating the scales of its hideous body, and powerful energy fluctuations permeated the surroundings.

But because of the detection equipment, these anomalies have been concealed.

There must be detection instruments on the battlefield outside the territory.

Mine found yours, but yours couldn't find me. This is the technological content.

As before, the Sand Zerg tribe was attacked by humans, and the detection equipment didn't detect it, so they were hit. Obviously human means are higher. And this time... it seems that the means on the alien side are higher.

Millions of kilometers away, Antonio and the others have quickly cleaned the battlefield and began to gather to leave.

"Eight Lords, one immortal god, this time the harvest is not bad." Olivia said with a smile to Yan Yan. A pair of beautiful eyes looked at Wang Yi, "Especially Black Face, this time I helped a lot, and I will give you a little more later."

There was a hint of envy in the other people's eyes, but there was no jealousy.

In the squad, speaking with strength, whoever has the strongest strength and contributes more in the battle will naturally get more trophies. This is also a rule that has long been agreed within the squad.

Wang Yi didn't care about these rewards, but stared at the arm guard.

"Blackface, what are you looking at?" Werewolf boy storm asked curiously, carrying the mace that was bigger than him.

"There are enemies!" Wang Yi fiercely looked in one direction and issued a warning.

"There are enemies!?"

The others were startled, their eyes followed Wang Yi, and they immediately saw two meteors flying over from the starry sky in the distance.

"Compressed body immortal divine power attack!" Everyone's expressions changed.

But Wang Yi was very calm. This time he solved the two immortal gods, and the points he got should also enable him to meet the military requirements of the army. Since he was not planning to stay in the team, he didn't need to cover up too much.

"not good!"

"Quickly get out of the way!"

The faces of the immortal gods in the two teams of Antonio and Olivia changed drastically. At the same time, two beams of light shot directly from their hands to the two streamers in the distance.

The rest of the leader team quickly began to flee.

Except Wang Yi.

His dark eyes flashed with light, and he stepped on a thought-power weapon, but behind him quietly appeared the misty and beautiful light and shadow of the "cosmic warrior".

"Boom~~"

The four beams of light collided with the two compressed immortal divine powers in the starry sky, and then there was an earth-shattering explosion. The intense energy fluctuations spread in all directions, the space was also distorted and shattered, and space debris was flying around.

But because Wang Yi reminded in advance that the immortal spirits of the team reacted in time and quickly intercepted the enemy's attack by the immortal divine power of the compressed body, so the explosion range did not affect the members of the realm master team, and no casualties were caused.

Although she undermined the other party's intention to attack, Olivia did not relax. She looked at the display of her detection instrument, her face solemn, and reminded: "My detection instrument did not

find the enemy's trace before being approached by the other party. The other party's detection The instrument is definitely more advanced than ours. This time the enemy is not easy. Please be careful."

At this time, a group of streamers flew in the distance.

"Haha, I was actually reacted by you."

"But it doesn't matter, you are all going to die here today."

A grim smile appeared on the big rock-like face of the alien immortal **** "Shan Hai".

And beside him, there was a foreign immortal **** with 16 pairs of black eyes waving eight tentacles, as well as more than a dozen foreign world masters, and they killed them aggressively.

"What a strong aura of immortality!" Olivia and Antonio both had solemn expressions.

In terms of strength, Antonio and Olivia are both considered to be at the middle level of ordinary immortal gods, that is, "ordinary immortal high."

And the two immortal gods of this alien team that suddenly appeared on the opposite side, the purple armor of the alien immortal aura is the most powerful, absolutely surpassing them, at least the pinnacle of the immortal army master, and the other one should be the immortal army master high , From the perspective of breath alone, it is much stronger than them.

Antonio and Olivia sank, feeling that today is about to usher in a hard fight.

The result this time may be worse than they thought.

However, since the establishment of the team, they have been fighting for thousands of years in an extraterritorial battlefield. It is not the first time they have encountered a crisis. Right now, either flee or desperately, Antonio and the others choose...

But now the other party has rushed to the front, it is not so easy to want to escape.

"Don't resist, I will put you in the world ring." Antonio felt a little anxious.

The other team members looked at each other.

Laura, a girl from the Double Star Race, said: "Captain, we have to fight too."

"Shut up, you staying here will only get in the way. The immortality of these two alien races is not easy." Olivia scolded.

Olivia is usually very gentle with the players, and when she gets angry at the moment, no one dares to object.

Antonio took the initiative to swing a beam of immortal power to stop those enemies.

And Olivia flew to the players, and just wanted to control the world ring to take them in, suddenly her face changed.

"what?"

At this moment, a powerful and invisible soul wave rushed over, and Olivia shouted angrily, also bursting out soul power, two powerful virtual and immortal divine powers faced each other in the void, "Bangbang..." The cosmic starry sky began to twist and vibrate, and it made a sound like an explosion.

Olivia snorted, with a hint of horror in her eyes.

And the bright sixteen pairs of eyes on the immortal Faguzi of the octopus "Di Luo" who had rushed over in the distance also blinked, a little surprised. "Hey, there is an immortal **** who is proficient in soul attacks."

The "Diro" is a powerful illusionist by nature. The race has a unique advantage in soul talent. Therefore, after achieving immortality, it is also proficient in soul. Generally, it is difficult for ordinary immortality to resist its soul attack and will be severely affected. The strength is weakened, and this is the time for his teammate, the strength to be close to the immortal Feng Hou's "Shan Hai" shot.

Relying on this combination, they have almost no disadvantages in the "Stranglethorn Vale" war zone and rarely encounter opponents.

But I didn't expect Olivia to stop the first wave of attacks.

But looking at Olivia's appearance, it is also very reluctant.

Because of the opponent's block, Olivia didn't have time to put the players away.

"It can actually block the attack of Faguzi's soul." Shan Hai was also a little surprised.

"It's okay, I can suppress that woman." Faguzi's cold voice sounded behind him.

"None of them can run today."

"That's good."

Wearing a purple battle armor, the huge mountain-like crystal unihorn alien race had a bloodthirsty expression on his face, and he rushed towards him with a grinning smile. In his hand, there was a long spear that was more than 20 meters long, silvery white and covered with secret patterns.

"Hahaha....."

"boom!"

"boom!"

The two alien immortals laughed frantically, and directly released the "law field". In an instant, within a range of thousands of kilometers, the dark area formed by the twisted light and the blue water were covered.

"We deal with each other's immortality, and you deal with each other's world master." Olivia saw the situation evolve to this point, so she could only be cruel and give it a go.

"kill!"

"Fight!"

The other members of the world also knew that it was the moment of life and death, and their eyes were red, preparing to explode with their strongest means.

Antonio and Olivia also exploded in their own law realm, and suddenly a burning sea of fire and ice and snow appeared in the starry sky, antagonizing each other's law realm.

Just as the battle between the two sides was about to break out, a figure suddenly appeared among them, and quickly greeted two alien immortals and more than a dozen alien world masters.

"Black-faced?"

"what are you doing?"

"Are you crazy? Come back soon!"

"Come back! You will die!"

Antonio, Olivia, Storm and others were shocked when they saw Wang Yi rushing out like no other, and wanted to stop him out loud.

And Yu Hai and Faguzi also discovered that a realm master among the humans on the opposite side suddenly rushed over.

"A world master?"

"Do you want to die? Kill him!"

Naturally, Shan Hai and Fa Gu Zi would not care about a mere realm master.

Even if he possesses a world master comparable to ordinary immortal gods, they are divided into different levels.

It's good to have ordinary abilities against ordinary immortal gods, and it's too rare to see a world master genius who can fight against "higher" and "pinnacle" immortal masters.

That's harder to encounter than Fenghou Immortal.

Faguzi instantly cast a soul attack of immortal power, hum... a soul attack instantly penetrated Wang Yi's "Purgatory God Armor" disguised as ordinary armor, and most of it was weakened.

As a heavy treasure class, the main defense is material defense, but it also has some soul defense, depending on the power of the opponent's soul attack, and the soul attack of ordinary immortal gods like this is almost completely resisted by the purgatory armor.

This weakened to the extreme soul attack was blocked by the **** body of Mo Yun Teng hidden on the surface of Wang Yi's body. Mo Yun Teng was already immortal, and was a high-level king, and the **** body itself also had the power to resist the immortal immortality. The ability of, if it is a king-level soul attack, it is nothing more than an ordinary immortal god-level attack like this. To be honest, for Morunteng, it may be about the same as a breeze.

The "Eye of the Abyss" in Wang Yi's mind that specializes in resisting soul attacks, and the "soul clock" formed by the soul defense secret method he cultivated were useless at all, and the immortal soul attacks of foreign races had disappeared.

Wang Yi just raised his eyelids.

"Wow!"

With the silver-gray crystals flying out from behind, thousands of pieces of silver and gray crystal diamonds are flying all over the sky, and the rays of light spread and interweave, motivating the original power of time and space, and quickly combined into three beautiful handles. A crystal long sword containing extremely large power.

"What's the matter? He actually blocked my soul attack?" Faguz's eyes changed and he noticed something wrong.

At this time, Wang Yi's three-handed crystal sword had already taken shape.

With black hair flying in front of Wang Yi's forehead, there was a murderous look in his eyes, and he gave a soft drink.

"go!"

"Om!"

"Om!"

"Om!"

The void vibrated slightly, and the streamer flickered, and the three crystal long swords were hidden in the void at the same time~www.mtlnovel.com~ Brush! "

The next moment, a flying sword suddenly appeared in front of the alien immortal "Surfing the Sea" in the purple battle armor, carrying a terrifying murderousness and a huge power that shocked the immortal gods, and pierced him fiercely.

"What is this!" Shan Hai was full of shock, this thought-power weapon came too fast, and he didn't even notice it beforehand.

When the crystal sword turned into streamer and flew over, Yu Hai's body shone brightly. The law of light and the law of time blend together to form a unique dark time domain. In this space, the immortal power of light is condensed in a special way. At the same time, time slowed down involuntarily.

"Huh...even if you are great, you want to attack me... how is it possible?" Yan Hai's eyes widened, and he found that the speed of the crystal sword that should have been slowed down unexpectedly did not slow down, but rushed forward more quickly, instead His consciousness was affected, and his movements slowed down involuntarily.

[Chapter 306: Baffled alien immortality](#)

"Snapped!"

The silver-white spear that was barely swung with a lot of immortal divine power in the sea was swept lightly by the crystal sword, and then under his watch, it pierced in from his chest... "A world lord, even if it can attack me, it can't be broken. Open my armor defense..." Chan Hai is very confident in his armor defense. In the past, even if the immortal gods with strong offensive powers can directly break through his armor defenses, this is also the place that Chan Hai has always been proud of. .

Then he felt the pain coming from his body tearing.

"Puff!"

The Crystal Long Sword easily tore his armor and pierced into his body. The powerful sword aura exploded in his body, a trace of panic flashed in Yan Hai's eyes, and his body was torn apart in the next moment.

"call!"

Shang Hai instantly condensed into one body, but his face became hard to look.

My heart is full of incredible.

"How is it possible... My defense, even if it is immortal, cannot be broken so easily!"

He turned his head abruptly and looked at the black-haired realm master who stood indifferently in the void in the distance, his eyes full of shock.

"He is just a realm master, how could he have such a powerful attack power!"

"what!"

"what!"

At this time, Chen Hai heard the familiar screams not far away, and hurriedly turned around, only to find that the subordinates of the realm master he had brought were facing a side-to-side massacre.

A stream of light flickered among them, and every time it flickered, it would break open the body of an alien world master, shatter their original orb, and let them fall.

Chan Hai's pupils shrank. "It's the crystal sword again... he can control two crystal swords, it's not right."

"Crack!"

An ear-piercing cry came from a distance that seemed to tear the soul apart. It was the voice of his comrade-in-arms Faguzi.

A streamer was besieging it frantically, Faguzi, as an immortal god, had no resistance at all, and his body was quickly torn apart under this terrible streamer.

"Faguzi!" Shan Hai couldn't help but shouted.

"Master Shang Hai, my soul attack is useless to him...Ah..."

Shan Hai couldn't help but rise in a chill in his heart.

This world master can actually attack three of them at the same time, and can also completely suppress them.

At this time, the beautiful and moving crystal sword rushed towards him again.

Chan Hai waved his spear without believing in evil, preparing to fend off the crystal long sword, and then went to kill the human world master.

At this time, he still had a glimmer of hope in his heart.

Time and space are distorted, and the weapons that kill the sea fail.

"Puff!"

His body was torn apart again.

Cohesion.

"Puff!"

Shred.

Cohesion again.

And the black-haired boy, always standing there calmly, didn't move, looking at him like Gu Jing Wubo in his eyes.

As if to say, I am here, waiting for you to kill me.

The divine body was torn several times, and even if Chen Hai was close to being immortal, it was not yet an immortal body, and its strength began to weaken significantly.

"team leader!"

There was a stern cry at this time, and then there was no sound.

Shan Hai's heart trembled, his teammate's "Diro" was immortal, and his breath disappeared.

If he couldn't even kill himself with the enemy, he would have fallen.

After all, the immortality of the Diro clan is stronger in the soul attack method, and in terms of physical defense, it is far inferior to "succumbing to the sea."

Even "Surfing the Sea" was torn to pieces one after another under Wang Yi's attack, and was embarrassed, let alone the immortality of the Diro clan.

And his world masters, not to mention, were already dead, and under the terrifying speed of the Crystal Long Sword and the mysterious movement trajectory, they couldn't escape at all.

"Om!"

Three crystal swords rushed over.

Chan Hai no longer hesitated, even though he was extremely humiliated, he turned around and ran very wisely.

And the members of the human squad who watched this scene from beginning to end in the distance have collectively fallen into a sluggishness.

The whole battle situation changed too quickly, and the law of Antonio and Olivia still remained in the field, frozen there.

Seeing the immortality of the alien race being killed and fleeing by the black face of the recruits who had just joined in their team within a short time, their bodies were agitated, and at the same time they came back to their senses.

Looking at each other, both of them felt incredible.

Although they learned that Heimian had a military merit quota of 1 billion, they believed that Heimian had combat power comparable to ordinary immortal gods.

But they misjudged.

The realm master who can match ordinary immortal gods is indeed a "1 billion military merit quota", but it can kill ordinary immortal gods, and even can match, and even the "realm master" who can kill immortal gods is also a 1 billion military merit quota. . Because the 1 billion military merit quota is an upper limit for the landlord fighters.

How can they know how terrifying Wang Yi's strength is now.

In the bottom of their hearts, it is enough to be able to compete head-on against ordinary immortal gods!

But now, Wang Yi's performance has broken their three views, shocking them inexplicably.

In the body of the world master, with one enemy and two, he can easily kill one of the immortal, and force the other immortal to flee.

This kind of strength is simply unimaginable for them.

"Huh, want to escape?" Standing on the Nianli weapon, Wang Yi looked at the alien immortal who turned and fled as a streamer, a cold light flashed in his eyes.

The original Nianli weapon disappeared under his feet, and a strange-shaped stone plate, the Love Pipit plate, about three meters long and about half a meter wide at the widest point appeared. He stood on the stone plate and then shot it out.

In terms of speed, it was no slower than the fleeing alien immortality, and even faintly faster.

"Ang..." A scream resounded through the void.

In the shocking eyes of everyone, I saw a huge and extremely beautiful bird phantom flying up.

"Love Pipit Plate!"

"That's" Love Pipit Plate! "!"

Antonio and Olivia recognized immediately.

The Love Pipit Disk is a well-known flying auxiliary weapon. It is naturally formed and has a peculiar shape. At first glance, the entire stone disk looks a bit like a bird, especially the natural pattern of the stone disk constitutes a mysterious bird... once After the Love Pipit plate and the owner are fully compatible, the huge phantom of the bird will be produced when it is fully urged, so that the speed can be assisted to increase.

Although the price of the Love Pipit plate is only between 1 and 2 million yuan, because it is naturally formed, the quantity is very scarce, and it is difficult to buy with money, and there are only a few of the immortal gods of the Fenghou.

Being able to own the Love Pipit plate has proved his identity and strength.

"Blackface not only has the Love Pipit plate, but also has the strength to kill immortal gods head-on. He must be a core genius member of a super power!" Antonio was a little excited.

Olivia also exclaimed: "The two alien immortals just now have at least the strength of high-level and even peak immortal warlords, but they were easily defeated by Heimen. Heimen is still a realm master. This needs to be at least immortal. The combat power is simply unimaginable, what level of perception the law of the black face has reached..."

The team members of the other teams watched Wang Yi murderously chasing an immortal alien, and they were full of enthusiasm.

When will they see this scene?

The realm master has one enemy and two, and he can easily defeat and even kill the immortal gods!

How terrible is this?

The alien immortal "Shan Hai" who was escaping thought he could not be beaten and could run, but he felt the terrifying aura rising from behind, and when he looked back and saw the huge and beautiful strange bird, the expression of "Shan Hai" immediately changed.

He recognized it too. "Love Pipit Plate? He still has Love Pirate Plate!?"

Shan Hai roared and roared in his heart.

At the same time, there was a faint fear in my heart.

"Who is he? How could I be so unlucky to meet such a terrifying monster of the landlord!"

That's right, in the eyes of Yan Hai, Wang Yi is an out-and-out monster. Otherwise, if he is close to Fenghou's immortal strength, how could he have no power to fight back, lose so badly, but desperately can't even get close to the opponent. , Can only be beaten.

The upside-down and devastating battle just now made the arrogant "Surfing the Sea" not have the slightest idea of turning back to fight, let alone the other side has a helper.

"His flying speed is faster than mine!" Shan Hai instantly noticed something wrong.

The flight speed of the primitive universe has a limit. If it exceeds the speed of light, it will enter the dark universe.

However, in Stranglethorn Vale, where there are obstacles everywhere, it takes a while for the immortal gods to accelerate to the speed of light.

The speed of light is the speed limit of the original universe. After accelerating to the speed of light, it will be "kicked into" the dark universe and complete the universe shuttle.

All immortal gods can physically travel through the universe.

Most of the world masters can't do this, even the limit speed of the peak power of the human world master is 150,000 kilometers per second. The main reason is that the master's physical fitness is not enough. Quickly, the burden on the body is getting heavier! It is a geometric increase.

But for Wang Yi, of course it is very easy and simple.

Wang Yi looked at his opponent who was quickly escaping hundreds of thousands of kilometers away.

When an immortal spirit runs away with one heart, and the speed is close to the speed of light, when the distance is far.

Unless it teleports, even the immortal gods cannot chase after the king.

However, now that the two are very close, Wang Yi is not worried that "Surfing the Sea" will suddenly run away.

At their level, how fast is the movement speed per second.

When "Chan Hai" discovered that Wang Yi was approaching, the distance between the two sides was no more than 100,000 kilometers.

This distance seems far away, but for the immortal gods, it is an attack distance that can be reached in an instant.

"Damn it!" Shu Hai couldn't think of it, and he didn't even dare to stop and stop Wang Yi with a long-range magical attack, because if he attacks, his speed will definitely be affected. If Wang Yi's dodge ability is superb, he can take advantage of this opportunity. Overtake him in an instant.

"Boom!" A powerful aura erupted from the imperishable alien race with a single-horned purple battle armor crystal, Shan Hai's face was savage, and there was still a trace of distress in his eyes.

Surprise the sea, start to burn his immortal power!

"boom....."

Chan Hai's body suddenly turned into a dazzling white light. You must know that the body of the immortal **** is an "immortal **** body", and it is also a combination of endless immortal divine power.

Once it becomes immortal, the body can easily be transformed into the endless immortal divine power, and the endless immortal divine power can also be transformed into the body. Of course, the integrity of the soul imprint must be ensured.

This time, Shan Hai almost consumed 8% of his own accumulated energy for countless years. Don't look at this, it's only 8%. You must know that every part of the immortal body contains spiritual imprints. When burning, it is also burned. Part of his own spiritual imprint, he is not an "immortal body", as long as there is a trace of cell fragments, he can quickly recover the whole body. He is not an "immortal body", so... if he dares to burn 8%, he is already close to his limit.

Vigorous power filled the whole body, and dense secret patterns began to appear on the crystal horn on his forehead.

The speed of the sea has increased again!

"Forcing me to burn the divine body to perform forbidden techniques, damn! Human world lord! You are waiting for me, like you are a peerless genius, there must be many monsters who are interested in you! I must pass the news of you. Go out and let others chase you down!" Shan Hai howled in his heart, full of anger.

Seeing the sudden increase in the immortal speed of the alien race in front of him, Wang Yi also noticed something, and there was a hint of coldness in his eyes.

"Burning immortal power?"

In fact, if Wang Yi wants to catch up with this alien immortality, it is very simple, as long as a teleport is enough.

Although he is only the landlord now, he cannot achieve the immortality of the king, the teleport distance calculated in light years, but it definitely exceeds the movement speed range of "Surfing the Sea".

However, Wang Yi was unwilling to expose his ability to "teleport" easily.

Wang Yi looked at the immortal alien race that was farther and farther away, nearly a million kilometers away, with cold light in his eyes.

"so be it!"

In Wang Yi's body, there is an Essence Orb, which is the Essence Orb of his human body.

And the key to his true soul, the "pronuclear" is in the time world.

At this moment, Wang Yi's fiery red Origin Orb disappeared, and then it was replaced with another even larger Origin Orb with mystery patterns all over it.

That is the origin orb of the Yanxing Giant Beast.

At the same time, it also contains the world inside it!

"boom!"

The huge metamorphosis of the inside world projection that belonged to the Yanxing Giant Beast descended instantly, and the space within a range of millions of kilometers was directly distorted and turned into an endless sea of fire.

Including the flying "Surfing the Sea", it is also trapped in this super large-scale projection of the world.

"What is this? World projection?" The Law Domain of Death Sea had already been withdrawn, because in the previous battle, his Law Domain could not reach Wang Yi at all, and his body was almost collapsed without any effect.

And now, when he discovered that he had suddenly fallen into the other side's world projection, Chen Hai was also shocked.

"The projection of the world over a million kilometers?"

"Why is the world inside his body so huge?"

Some golden horn behemoths that have chosen to rely on the evolution of the universe have reached the pinnacle of the lord. The internal world has a diameter of 30 million kilometers. The world projection formed by such a huge internal world has been able to compete with the realm of laws on an equal footing. And Wang Yi's Yanxing Giant Beast now has a world diameter of 180 million kilometers in diameter!

In terms of volume, it is 60 times! The power of world projection has also skyrocketed!

But of course Wang Yi would not directly expose his 180 million-kilometer-diameter projection of the world in the body, which is too amazing.

Instead, it is controlled within a million kilometers, but in essence, there is not much difference in power.

"Shan Hai" wanted to use its own law domain to fight against the opponent's world projection~www.mtlnovel.com~ but the law domain had just come out and was almost collapsed by oppression.

"What the **** is this? How could he have such a terrible world projection?" Shan Hai was almost crazy.

boom! The world projection rapidly increased its restraint power. Under the constraints of the world projection, the flight speed of the immortal alien "Miss the Sea" naturally decreased sharply, but Wang Yi's flight speed was pushed forward and naturally quickly caught up.

"Humans, don't force me!" The immortal aliens turned around, roaring in voice, and uttering human language.

His response was a terrible streamer.

Shan Hai wanted to resist, but the level was too far away. As soon as his weapon was lifted, he was blasted away by the streamer, and the streamer hit his body. In the harsh cutting sound, the body of Shan Hai was torn apart.

Although he condensed again, the breath of the divine body was obviously weakened.

[Chapter 307: 2.1 billion military merits](#)

Olivia, Antonio and others in the distance also observed this scene. The projection of the world covering a million kilometers away was so amazing that they were also taken aback.

However, they are more concerned about whether Black Face can smoothly chase down this alien immortal.

Chan Hai is facing cruel and inhumane ravages.

The cosmic soldiers cut and tore his body frantically again and again!

But he gathered again and again!

But every time he tears his body, he obviously loses a lot of immortal power.

He is not an "immortal body" after all, and every time he is torn apart, he loses a lot of immortal power.

There was already a trace of panic and fear in "Shan Hai"'s eyes, but looking at the black-haired human in the distance, he just looked at himself indifferently, like a prey about to die.

"Shan Hai" had anticipated the fate of his death, and a trace of sorrow emerged in his heart.

"Unexpectedly, I was killed in the sea to achieve immortality. After so many years in the battlefield outside the vertical and horizontal domains, I would die here today, in the hands of a human master..."

Escape and can't escape! It was repeatedly attacked.

"Human! I won't make you feel better!"

"Surfing the sea" roared frantically.

He had been calling for help before, but he couldn't wait for the support of allies.

So he is desperate now.

A piece of news was quickly spread by him through military communications.

"I will die, you will die too, sure, sure..."

He stared at Wang Yi fiercely.

He roared and wanted to rush towards Wang Yi, wanted to explode and drag the humans to die together, but he was torn and pierced directly by the "cosmic soldiers" flying over.

The gap was too big, and the world projection completely restrained him, preventing him from escaping, and his speed was also affected. He had never thought that he would be so awkward under the projection of a world lord.

He used soul attacks but was unable to harm the opponent. The long-distance attack on Wang Yi with thought-power weapons and divine power beams still failed. He wanted to explode but couldn't get close to the opponent's body.

Finally made him crazy hysterical.

"boom!"

With a earth-shattering explosion, Su Hai finally couldn't bear the feeling of despair and blew himself up.

"Rumble..."

The self-detonation caused the thousands of kilometers around the space to collapse instantly, and the impact force generated at the moment of self-detonation was thousands of times that of the "immortal leader pinnacle" during normal combat!

Even the shuttle condensed by Wang Yi's cosmic magic weapon was directly disintegrated by the explosion.

However, Wang Yi's cosmic magic weapon was specially customized before departure. The main part of the material was made of g-grade materials. The material cost alone cost tens of millions of mixed yuan units. Weapons cause damage.

"Whhhhhhhhhhhhhhhhhhh" A large number of diamond-shaped crystals flew in all directions, then turned in mid-air and all flew towards Wang Yi, quickly forming a long crystal shuttle.

"Did you blew yourself up in the end?" Wang Yi said softly. He was 10,000 kilometers away, so naturally he was not affected by the explosion at all.

Killing two immortal gods did not cause any waves in his heart.

When creating the secret method, the opponents encountered in the virtual universe, such opponents can't make it to the table.

And from the start of the battle, to the chase of the "Surfing the Sea", to the time when the opponent blew himself up, it only took less than three minutes.

everything is over.

"Bermuda, how much military service do you have?" Wang Yi asked in his heart.

Bermuda responded quickly.

"Master, the total military merits are '2.110 million'." Then he added, "Master killed the first alien immortal, with 1 billion military merits, and killed the purple armor immortal, with 1 billion military merits, and 15 foreign masters 80 million. , Plus the previous 30 million."

"Oh." A smile appeared on Wang Yi's face.

Wang Yi came to the battlefield outside the territory. As a soldier, the military merit quota issued by the army through the virtual universe system was 1 billion.

Only by completing this military merit quota can you obtain a "free body" and have the right to choose freely. Before completing the military merit quota, one must honestly obey the military order.

"Enough military merits." Wang Yi secretly said in his heart, "I am now a free body, even if I leave the team, I will not be punished by the military system."

"call!"

At this time, a group of streamers flew over and Wang Yi's teammates arrived.

But at this time they were still in shock, and their expressions looking at Wang Yi were complicated and inexplicable.

Obviously, Wang Yi's strength shocked them all.

"Blackface, are you okay?" Werewolf Boy Storm couldn't help but said.

The black-robed woman next to her immediately retorted: "Storm, your dog's mind, with such a relaxed look on the black face, how could something be wrong."

"Can I just worry about it?" The Werewolf boy stared.

"Haha...well, since the battle is over, then we have to leave here immediately. The alien immortal should ask for help from his camp allies. If someone comes over at this time, it will be in trouble." Antonio laughed.

"Yes, we will leave immediately." The other team members also recovered their calm, but their eyes still fell on Heimian from time to time.

The black face became extremely mysterious in their eyes.

But they also know that this is a secret belonging to the black face, and since the black face doesn't want to say it, they won't ask it ignorantly.

Antonio took out a c9-class spaceship from the world ring, and all the other team members flew in quickly and left the battlefield quickly.

After they left, five more demon elite teams arrived in this starry sky.

"It's a pity, are you late?"

"According to the traces of the battlefield, the enemy has been away for at least a minute."

"Just now, the guy in 'Chan Hai' was calling for help, right? With the power of Cang Hai, he called for help... Is that human realm master really that powerful?"

"Since Chen Hai has fallen, the news should not be false."

"Shanghai's strength is very close to the immortality, and their team's strength is considered top in Stranglethorn Vale, and the entire army is wiped out so quickly. It seems that the human world lord is really very powerful."

The news that the immortal team of the Sand Insect Race, the powerful alien "Surfing the Sea" was eliminated by an elite team with peerless human genius masters quickly spread in Stranglethorn Vale, and attracted the attention of many powerful teams within the Monster Race.

Human talent is generally weaker than Yaozu's talent.

Therefore, it is very, very rare that the human world lord can match the "immortal gods", and the number is extremely rare. The No. 026 barracks base in the seventh battlefield of the extraterritorial battlefield is one of the few.

The hostile race of humans, the "Demon Race", has special regulations and special rewards for killing human geniuses.

These rewards are enough to make many members of the Yaozu coveted.

As a result, many demon elite teams began to look for elite teams with powerful human geniuses in Stranglethorn Vale.

...

In a starry sky, huge land-like plant remains can be seen everywhere, and a flying saucer-shaped spacecraft flies in the starry sky at sub-light speed.

Ten team members including Wang Yi are all in the lounge inside the spacecraft.

Everyone looked at Wang Yi.

Just now, Wang Yi has said that he wants to leave the team.

Although it was a bit regretful, everyone understood that it was impossible for someone like Wang Yi to easily kill the pinnacle of the immortal warlord alone for a long time.

They all judged from the explosion of Wang Yi's strength...Wang Yi is not the core genius of the five major forces, or a personal disciple carefully cultivated by a certain super existence.

People like this are unlikely to come to the battlefield outside the territory for military exploits or treasures. There must be other reasons.

However, they did not follow up.

The atmosphere in the lounge was a bit depressing for a while.

"By the way, Blackface." The deputy captain Olivia thought of something and took out a ring. "This is the spoils you used to kill the alien immortal and those world masters. They are all here."

Wang Yi looked at the ring, shook his head, and said, "These trophies are actually of no use to me. I'll leave them to you. They can be regarded as a little gift before I leave."

"this..."

Olivia and Antonio looked at each other and smiled at the same time.

"Alright, then we're welcome."

Wang Yi looked at these players who had been with each other for several months, and felt a little emotional in his heart.

They will continue to wrestle in the perilous extraterritorial battlefield, and I don't know if there will be a chance to see them again in the future.

Wang Yi hopes that one day.

Wang Yi thought for a while, and then took out a world ring. It was the wealth from the self-destructed alien immortal "Muhai". With Menghai close to the power of Fenghou immortality, this wealth was dozens or hundreds of times more than ordinary immortal gods.

Antonio and the others declined, and they accepted Wang Yi's gift without pretense, but their mood became more complicated.

Perhaps they will never have the opportunity to meet again in the future.

However, the recruit named "Black Face" was destined to leave an indelible impression in their memory.

"Come on, say goodbye to our players!"

In the lounge, everyone gathered in a circle while raising glasses full of wine.

"Hey."

"Take care of yourself!"

"Take care of yourself!"

"Take care of yourself!"

...

At the door of the spacecraft, Wang Yi separated from these teammates who had known each other for several months.

"Goodbye!"

"Blackface, remember to be careful!"

"Don't forget us."

"Take care of yourself."

Werewolf boy "Storm", black-robed woman "Meer", sisters of the double star tribe "Sani", Lola, Wushen tribe "Wing", blade warrior "Baikamo"...

In the eyes of many team members, Wang Yi flew out of the cabin door and waved a black spaceship next to him. Standing next to the spaceship, he looked back at the team members he had known before, smiled slightly, and waved goodbye, then turned and flew into the spaceship. .

Afterwards, the spacecraft turned into a stream of light and quickly disappeared from their eyes.

Olivia felt a little uncomfortable in her heart.

"Another partner has left..."

Antonio's rough and majestic lion face looked at the direction of the spacecraft's departure.

"However, with the strength of the black face, it should be easy to survive in the outer battlefield."

Everyone has their own way to go, and this is just another beginning.

...

In the spacecraft control room, Wang Yi held his chest with both hands, sat on the main seat, and looked at the projection screen in front of him.

The projection screen displayed the information of the teams within a radius of 1 billion kilometers around the spacecraft, but the teams of powerful aliens could not find Wang Yi at all.

"Venerable Guiyi gave me this advanced detection instrument. At least I don't have to worry about being attacked suddenly on the battlefield outside the territory." Wang Yi was very leisurely.

A good detector is very important on the battlefield outside the territory. A good detector can detect opponents and prevent them from discovering themselves.

It is easy to win the battle.

But the better the detection equipment, the more expensive it is.

This set of detection instruments on Wang Yi's body is divided into large-scale detectors and ultra-small detectors. One detection range is one billion kilometers in radius, and the other is 20 kilometers in radius, but the value is not much different.

But because of the small detection range, the detection precision of the ultra-small detector is far greater than that of the large detector.

In other words...With this ultra-small detector, as long as there are some super-powerfuls who detect Wang Yi, even if the large-scale detection instrument cannot detect it... the small-scale detector will know in advance.

Of course, Wang Yi didn't think that this kind of thing might happen on the battlefield outside the territory.

After all, this is a noble-level equipment, worth hundreds of billions of points.

In the entire extraterritorial battlefield, it is estimated that few people can match the Wang Yi detector.

"Next, it's time to start hunting."

Wang Yi folded his hands, and another screen appeared in front of him.

There are some content about killing immortal gods to gain military merits.

"The immortal gods are divided into three levels: immortal warlord, prince, and king. Among them, the immortal body can generally be achieved after reaching the prince. Once it becomes an immortal body, it is much more difficult to kill." Wang Yi said softly.

Killing the immortal army has the least merit, and only divided into two levels.

The immortal army master is low, 100 million military exploits, and the immortal army master has 1 billion military exploits. Just these two levels.

"Fenghou level and Fengwang level are divided into three levels."

"Kill Feng Houchu's 10 billion military exploits."

"Kill Feng Hou Gao's 100 billion military exploits."

"Kill Feng Hou Dianfeng with 1 trillion military exploits."

"Kill Feng Wang Primary for 10 trillion military exploits."

"Kill Feng Wang Gao's 100 trillion military exploits."

"Kill Feng Wang Dianfeng with 1,000 trillion military exploits."

Wang Yi looked at these messages with a flash of excitement in his eyes.

Military merit is actually nothing to Wang Yi.

He is more concerned about other things, such as the "panel mission" reaching the hunting quota, such as the sign-in of the highest battle area "Star Tower" in the seventh starry sky battlefield in the extraterritorial battlefield...

"Master, there is mail." Bermuda's tender and crisp voice sounded in the control room.

"Are you coming?" Wang Yi was not surprised, his consciousness connected to the virtual universe network.

Most of the moments on the outer battlefield are connected to the virtual universe with consciousness.

Because in this way can we know the comrades and allies in a certain range around, and the moment of battle must be turned on, so that the virtual universe network can maintain synchronous transmission.

Only in this way can we monitor the battle and determine military merits.

"The message is directed to the arm guard screen."

Subsequently.

"drop."

The military system directly issues orders.

"Warrior Wang Yi, you have completed your military service quota and left the team. You now have two choices. One is to continue fighting on the battlefield outside the territory. The other is to retire and leave the battlefield outside the territory."

The text message appeared directly on Wang Yi's arm guard screen.

"Continue to fight." Wang Yi did not hesitate.

The monitoring system received his voice response, and soon another email was sent.

"Becoming a free body, you have the right to 'exchange treasures' and can also be directly exchanged for money. Every 100,000 military merits is a unit of mixed yuan. Since you are a member of the virtual universe company, every 100,000 military merits can also be exchanged for 1 point. , You can exchange

your military exploits for treasures in the military system, or exchange points for treasures in the virtual universe treasure house."

"You choose to continue fighting."

"One, you can be alone."

"Second, you can choose to lead an army. This army is composed of 100 realm masters, 1,000 domain masters, and 10,000 cosmic-level masters. Your task is to lead this army to fight on the battlefield outside the territory and encounter foreign powers. You, you deal with the immortality among the powerful aliens, and your troops go to fight against the alien armies."

"Choose the first one, then military merit is a normal accumulation."

"Choose the second kind of willingness to lead the army..." Then came a detailed introduction.

Each has its own advantages.

"Please make a choice."

Wang Yi smiled softly.

"I choose the first one."

He didn't come to be a nanny.

"It has been recorded, soldier Wang Yi, you can apply to lead an army at any time, and now send the latest starry sky map of the 'seventh battlefield' outside the field. Please receive it."

The military control system sends a starry sky map directly through the virtual universe, and then cuts off contact.

"Starry sky map." Wang Yi ordered.

"drop."

In front of Wang Yi, a three-dimensional virtual projection formed a broad starry sky map.

The starry sky map of the entire seventh battlefield is very complicated, densely packed with special areas, such as "Stranglethorn Vale", that is tens of thousands.

There are hundreds of millions of areas lower than Stranglethorn Vale, UU Reading www.uukanshu.com. The number of regional powerhouses on [uukanshu.com](http://www.uukanshu.com) is very small, and they are generally the scope of realm masters, domain masters, and universe-level activities.

Of course, there are also higher battle areas than "Stranglethorn Vale".

The danger level of each area is clearly marked.

Wang Yi directly skipped those areas, and his eyes fell directly on a red eye-catching sign in the star chart.

The starry sky map is the miniaturized "seventh star field battlefield", with countless locations and text signs around it.

"Star Tower, the highest combat area of the seventh battlefield." Wang Yi whispered.

This is also his ultimate goal this time.

[Chapter 308: Taiwo Team](#)

In the vast starry sky, a spaceship is advancing fast.

Wang Yi looked at the red sign of extreme danger on the starry sky map on the projection screen.

"Show the information of the Star Tower."

Suddenly, a majestic nine-story tower appeared on the projection screen.

The tower has nine floors and is a square cone. It is very similar to some towers in China on the earth. At the same time, there are endless nebula vortices around this majestic nine-story tower. The colorful nebula vortexes make people tolerate. Can't help but indulge in it.

"This is the Star Tower." It was also the first time that Wang Yi saw the appearance of the Star Tower, and couldn't help but exclaim.

Wang Yi muttered in a low voice: "The Star Tower, nine light-years high... Since the opening of the outer battlefield hundreds of millions of years ago, the Star Tower has been in this space and time. It has swallowed the endless energy in the universe for countless years. The "Nine Swirl Nebula", which looks like a nebula, is actually an extremely terrifying energy vortex."

"Nine swirling nebula, there are nine swirls, the further the inside, the more terrifying the force of the vortex tearing."

"In the fourth spin, the immortality of the king can hardly be held, so that the Universe Venerable can safely be in it."

"The seventh spin, even Venerable Universe will be torn and annihilated."

...

In addition to displaying the video and coordinates of the Star Tower, there is also a detailed introduction to the information.

"Back then, the four pinnacle races selected this unfamiliar star field to open up the battlefield. During the sweeping process, they suddenly discovered the Star Tower. For this star tower... the four pinnacle races came to a war. It is said that many cosmic lords Therefore fell."

"The Star Tower is black in its entirety. It is impossible to test what kind of material it is made of. It has not been damaged in the large-scale wars of the four pinnacle races. It is said that... the lord of the universe can't destroy the Star Tower in the slightest." Wang Yi shook his head. .

He knew that the Star Tower was recognized by the cosmic peak powers as the "Xeon Strongest Treasure", but it was refined by the mountain guest. In the process of refining, a cosmic strange light was incorporated, so that even the mountain guest could not see it. Understand the change.

Although Zuoshanke is the refiner of "Star Tower", he cannot use "Star Tower".

In fact, this is actually a **** king weapon.

There are very harsh conditions for the Star Tower to recognize the Lord.

Realm master, immortality, and the possibility of recognizing the master. Venerable Universe may not even have a trace.

The most test of acknowledgment of the Lord is the soul and the will!

From Hong's mouth, the spiritual realm that swallows the starry sky can be divided into three levels.

Although there are three levels of mind-cultivation, the level of level only represents one level.

But the third and second weights are higher than the first weight. It is mainly high in the state, or more similar to the technical aspect, which has an amplitude effect.

However, the way the star tower recognizes the master is the fusion of crystal beads and soul, but there is no shortcut at all.

What hard and soft, what tolerant, are useless.

I can only let the crystal bead merge with the soul...

All you need to do is one thing-endure the severe pain! At this time all the realm skills are useless... It depends on how persistent the heart is and how strong is the ability to withstand severe pain!

Just like Hong's spiritual realm reached the so-called third level of heart cultivation, but his will was only at the domain master level, it would be impossible to accept inheritance.

Moreover, according to the original work Puti later discovered that Luo Feng's state of mind seemed to be easier to accept the test of the Star Tower inheritance.

At this point, Wang Yi was too lazy to complain.

He got used to the protagonist's halo anyway.

In fact, in the original work, Zuoshanke believed that the triple state of mind has no distinction between high and low, but actually represents three paths.

"Know your mind and see your nature, and point to the original mind." Such as Luo Feng.

"Yin and Yang are in harmony, the heart of a child." Like Thor.

"The heart embraces everything and the universe." Ruhong.

Three peerless geniuses on the earth have walked three different paths.

In fact, to the end, there are great achievements.

Wang Yi has been training for so many years, and although there is no clear division, he faintly follows Hong's style of "heart tolerates everything and the universe" on the line of heart cultivation, rather than Luo Feng's "clear mind and direct guidance." Original heart".

This kind of person is unwilling to just accept it and become one with the heaven and the earth.

They have a big heart.

With endless ambition, faith is also firm and terrible.

Wang Yi found it very strange, why must the treasures recognize their masters to test the mind and will, rather than the law perception, or the fundamental level of strength?

The more powerful treasures should be used by the stronger ones.

But considering that this is actually a "God King Class" weapon, or this is its mystery, maybe.

Besides, the process of acknowledging the master of the Star Tower is extremely dangerous and irreversible!

Once it starts, no one can stop it.

Once it fails, the will will be completely disintegrated, the soul will be completely disintegrated, and there will be no doubt that death.

If you want the Star Tower to recognize the lord, the realm lord must at least have the will of the venerable level!

Although Wang Yi's will is now strong, he is still far behind the Venerable, and even if his will reaches the state of the Venerable, there is still great danger in the process of recognizing the Lord.

So don't say that Wang Yi has no idea of playing the Star Tower for the time being.

Moreover, the Star Tower was refined by the Mountain Guest, and was constantly monitored by the Mountain Guest. If Wang Yi wanted to move the Star Tower, he would definitely meet with the Mountain Guest.

Wang Yi has not yet figured out how to face the old monster sitting on the mountain. This situation is currently avoided by Wang Yi.

"If it's not necessary...I won't go inside the Star Tower." Wang Yi muttered.

The Star Tower is a treasure, but it is too hot to handle.

Wang Yi faintly felt that the "Star Tower" might not belong to him at all.

...

The black flying saucer-shaped spacecraft flies in the starry sky full of root vines at sub-light speed.

Through that extremely advanced, venerable-level detector, Wang Yi can easily get a panoramic view of everything within a radius of one billion kilometers.

Those alien teams lurking in various root caves, planetary debris caves, and abandoned spaceships couldn't hide from his eyes, and they were all discovered.

Wearing a dark red armor, Wang Yi sat on the sofa with a teacup on the table, very leisurely.

"Star Tower, it's a long time anyway, I don't have to go in a hurry now, let's finish the panel task first." Wang Yi said inwardly while drinking tea, and then looked at the starry sky map formed by the three-dimensional projection in front of him.

"The level of Stranglethorn Vale is too low, and there are too few immortal gods. The hunting efficiency may be very low. It is not known how long it will take to make up 100,000 immortal gods, let alone the immortality. Is there a hundred real vassals in the entire Stranglethorn Vale? I don't know Immortality, it's too difficult to find."

Wang Yi knows that the panel task "immortality" refers to the immortality of the "immortality".

Just like some realm masters or ordinary immortal gods who have the power of warlord warfare, it is useless if Wang Yi kills them.

"It can only be changed to a higher level, with more immortal gods."

"The closest to me, there is only one high-level combat zone, and that is..."

"Yan sacrifices to the mainland!"

Wang Yi raised his head and looked at the projected starry sky map.

"Search for Yan Ji Mainland."

"enlarge."

Following Wang Yi's instructions, one of the hundreds of millions of points on the starry sky map, "Yan Ji Continent", quickly zoomed in. An irregular continent appeared on the starry sky map. Around this continent, there were still some continents floating around. Fragments.

At the same time, dense texts are attached to the side of the starry sky map, detailing this Yan offering to the mainland.

Wang Yi looked at these written materials.

"Yan Ji Continent: The highest combat area within the control of the No. 026 Barracks Base of the Seventh Battlefield, the humans who dare to enter the Yan Ji Continent and countless strong aliens, if it is an elite team, there must be an 'immortal god' in the team, if it is a one An army must be led by immortal gods."

"Each team has immortal gods, and there are a huge number of honorable immortal gods."

"Among the immortal gods, the 'immortal warlord' accounted for about two-thirds, the 'fenghou-level' accounted for about one-third, and there were a handful of the 'fenghou-level'."

"Here, if there is no immortal body, then the probability of survival will be very low."

"..."

A large number of introductions about the dangers of the Yanji Continent, this dense text finally said: "The largest diameter of the Yanji Continent Main Continent is 1.8 light-years, and there are thousands

of mainland fragments floating around the Continent. Those fragments are as small as a hundred. Ten thousand kilometers in diameter, even larger than one trillion kilometers in diameter."

Wang Yi read the complete information, Yan Ji Mainland, is the highest combat area within the control of the No. 026 barracks base.

But in the entire seventh battlefield, the Yanji Continent was considered the second-class battle area. Above it, there was the first-class, the scattered range of the 022-036 barracks base, and there was a more terrifying place.

That is the "Star Tower"!

"Before going to the Star Tower, let's go hunting in the Yanji Mainland." Wang Yi put down his teacup and said softly.

Standing in the control room, Wang Yi looked at the vast starry sky. There was dust in the distance, and some undulating mountains were vaguely seen... It was a huge plant wreck, surrounded by countless meteorites, planetary debris, and many spacecraft wrecks scattered around. Here, an extremely lonely and desolate area is formed.

And Bermuda, the intelligent life that controls the detection equipment, keeps telling him the latest findings.

"Master, there is a team found in a spaceship 930 million kilometers away. There is an immortal **** and 9 realm masters."

"Master, another team is 870 million kilometers away. There are two immortal gods and 23 realm masters."

Bermuda continued to pass on probe information back to Wang Yi, but Wang Yi lacked interest.

"weak."

"too weak."

"The number is too small."

One or two ordinary immortal gods, Wang Yi was reluctant to do it.

But because of the shielding of the detection equipment, the alien teams did not find Wang Yi's location at all.

With a radius of one billion kilometers, the area is already very large.

It is as if Wang Yi found a spacecraft 930 million kilometers away. Assuming that the other party stopped moving and flew at sub-light speed by himself, it would take almost an hour to get to the other party.

Unless Wang Yi moves to the vicinity in an instant, he will suddenly come out. That way, the efficiency will be very high!

"Stranglethorn Vale is mainly the area where the leader team is active, and less than one-third of the immortal gods lead the team." Wang Yi sighed. "Sure enough, I still sacrifice to the mainland, this kind of high-level combat zone is suitable for me."

Thinking about it this way, Wang Yi couldn't wait to go to the Yanji Continent to kill him.

After a while--

"Master, the detection instrument found that the battle was fluctuating. The location is 890 million kilometers away. There are 8 immortal gods gathered there. The situation is a bit special. It seems to be a team of four forces, but it is divided into two camps to fight."

Bermuda's voice once again sounded in Wang Yi's consciousness.

"Oh?" Wang Yi immediately became interested when he heard the news.

"Get close to the past!" Wang Yi ordered, "Transfer the detection screen."

Chih, a three-dimensional projected image was immediately displayed in front of Wang Yi.

"Hmm...it seems to be a human squad?" Looking at the chaotic and fierce battlefield, Wang Yi stroked his chin, and then looked at the display of the military system on the screen of his armguard.

"Yes, there are two teams from our human camp."

Starry sky.

The energy fluctuates violently, and the five teams of humans, monsters, machine races, and zerg races are fighting frantically.

There are eight immortal gods alone, and there are seven or eighty realm masters.

Of the eight immortal gods, there are three on the human side, and five on the other three power camps.

However, the current situation is that the three teams of Monster Race, Machine Race, and Zer Race unite to deal with the human team!

This is also a relatively common situation in the extraterritorial battlefield. As long as the strength of which side is more threatened, the others will tacitly unite to deal with him.

You don't even need to communicate.

The military system will not consider this to be a collusion with foreigners.

In fact, there are no permanent enemies on the battlefield outside the territory.

"Boom..." Accompanied by the wanton surging divine power fluctuations... the universe was also torn apart, shattering many spaces in the interlayer.

The naked eye can see huge rifts in the cosmic space, and the layers of space are thus shattered, forming a turbulent flow of space.

Eight immortal gods are fighting fiercely. Among the immortal gods of the three human camps, only one belongs to the human race, the other two belong to the immortal human allies races, the immortal gods of the two vassal races of the Zerg camp, and the two mechanical vassal races are immortal. Deity, an immortal deity of the inner race of the monster race.

"Roar!" The one who is fighting the only human immortal **** is the immortality of the two Zerg vassal races "Kna". It is a metal life similar to a chimpanzee. It is made of black metal. There is only a scarlet on the big head. The eyes exude a bloodthirsty light that makes one's heart palpitating.

The two "Kna tribe" metal immortal beings both held a sharp knife in their hands, and the golden fierce air current lingered on it, and the surging of the air current alone tore the surrounding space to pieces.

They roared, frantically besieging the immortality of the human in front of them.

The one who fought with them was an immortal **** with a scarlet armor and a scaly tail. He screamed and the immortal power exploded. Countless earthy yellow light spots scattered around, and each light spot was heavy and terrifying, and it blasted out with two punches, fighting against the two immortal aliens on the opposite side.

"Boom!" The powerful impact caused the universe to fragment again~www.mtlnovel.com~ The terrible impact directly leaked into the interlayer through the fragmented space cracks.

The immortal gods of the earth flew out, coughing out a mouthful of golden blood, and then the blood composed of immortal gods returned to the body, but the breath was weakened.

"Captain Taiwo!" His team members changed their faces when they saw this scene, and shouted anxiously.

But Taiwo's face suddenly changed.

"The virtual space army system shows that one of our teammates is nearby?"

"But my detection equipment did not find the other party, and the other party's detection equipment should be higher than mine..."

"No matter, let's send a request for help first, I hope he can come over, even if there is only one immortal god, the situation on our side will be much better."

[Chapter 309: Humanity! Feng Hou! ?](#)

Taiwo looked at his teammates who were struggling, and he was also very anxious.

Not only Taiwo found out, but also the immortality of the other two human camp allies.

Soon, three calls for help were sent directly to Wang Yi by the military system through the virtual universe network.

"Call for help! Call for help! I am waiting for a joint attack by 5 immortal tribes from the machine race, the zerg race, and the monster race. They all have the strength of the immortal warlord to the pinnacle and ask for support."

The call for help is sent directly to all allies and comrades in arms within 10 billion kilometers.

Wang Yi is now less than 100 million kilometers away from the battlefield, but because of the advanced detection equipment, which shields the detection of the two below...So neither of them can detect it, but the human side can know that the surrounding area is within a certain range through the "army system". Coordinates of allies and comrades.

"Master, the three immortal gods of the human camp who fought in the front apply to you for a call at the same time." Bermuda said to Wang Yi.

Wang Yi stood in the control room, looking at the projection screen, but his eyes fell on the human immortal **** who was being crushed and beaten by two "Kna tribes" immortal and looked a little miserable. He also heard it on the battlefield through detection and reconnaissance just now. The dialogues of those squad owners, which aroused his interest.

"Interesting, Team Taiwo..."

Wang Yi's gaze then fell on the members of the Taiwo team on the chaotic battlefield.

Based on some impressions in his memory, he recognized some of them.

The illusionist "Wei" who looks like a skeleton... Full of fascination, the "Nightmare" fascinating girl who is faintly surrounded by mist... The warrior "Whirlwind" with pointed ears with a mask on her face... handsome purple hair The master of the world, the spiritual teacher "Kuangwu"...the "god" of the white armor...the hammer is a very calm and heavy Yanbolu warrior "hammer"...

There is also a little guy who is only one metre tall. He has a cute face and green secret lines on his cheeks. He is only one metre tall like a child... His real name is Zhuchen, a pharmacist codenamed "Poison".

However, he is being besieged by a large number of world masters, and there is a warrior who is strong and can almost rival the ordinary immortal gods to protect him.

"Lao Qi always protects Chenchen."

"Second fool, don't talk nonsense, come if you have the ability!"

"These hateful aliens, fight it!"

The total number of three-party alien world masters is almost double that of the human camp, and there are also two alien world masters whose strength is comparable to ordinary immortal gods, which also puts the human side masters into a bitter battle.

The situation is already precarious.

"I didn't expect to meet Taiwo's team here. Taiwo, who was originally the second child, has also become the captain... Although it is a bit unexpected, it is also within the scope of Barracks No. 026, which is normal."

In addition to his immortal god, Taiwo's team also has 9 realm masters.

And his allies, there are 2 immortal gods, and close to 20 realm masters.

Their enemies, the other three parties, have 5 immortal gods, and they add up to almost 50 realm masters.

Regardless of the number or the strength, Taiwo is always at a disadvantage, and the support is very hard.

After Wang Yi glanced around the battlefield quickly, he let out a cold snort. "Alien!"

"Connect to the immortal gods of mankind." Wang Yi said.

Then, on the armguard screen, there appeared an immortal **** wearing a scarlet armor and a scaly tail. His body was covered with scars and his face was anxious. "Comrades-in-arms, we are encountering an enemy's attack. There are five immortal gods on the other side. We only have three. Please help us..."

Taiwo is hopeful.

He could not be inferior to him if he could possess a detection instrument that he could not find.

The reason why the human camp has been crushed is that the number of immortal gods is half less than the opponent. Three to five is too reluctant, but if there is one more immortal god, even if the strength is not so strong, it is also four to five, which is different in an instant.

Taiwo is not worried about his safety. If he escapes, he is quite sure that he can escape, but he is worried about his teammates. They are just the landlords. Even with Taiwo's help, I am afraid that he can escape halfway. .

Wang Yi gave a soft hum, nodded, and then closed the communication.

There was a cold smile on his face.

"Five immortal gods... barely able to get me to shoot."

"Swipe!" Wang Yi was covered with thick armor, and even a helmet appeared on his head, covering his masked face.

That is... Purgatory God Armor.

However, some details of the armor have been changed, that is, those who know the Purgatory God Armor can't recognize from the appearance that this is the exclusive armor of the inheritor of the "Purgatory God General".

In a blink of an eye, Wang Yi became a sturdy warrior wearing a dark red helmet, dark red armor, and dark red boots!

At the same time, there is still a powerful breath of pressure from him!

When there was no refining purgatory **** armor, Wang Yi didn't know it, but when he completely refined the purgatory **** armor, truly integrated and integrated, regardless of each other, as if they were part of the body, he discovered that the whole Humans naturally exude coercion. In fact, this coercion... was originally contained in the purgatory **** armor. After fusion, it was released through Wang Yi. Although it only released a little, it was enough to make the immortal gods tremble.

After fusing the Purgatory God Armor... it is impossible to detect Wang Yi's strength at all.

Perhaps only the Venerable can find out, but the immortal gods, even if the king is immortal, cannot discover that Wang Yi's breath pressure actually comes from the "Purgatory God Armor."

Through this, Wang Yi can adjust and release the coercive aura, which can be an ordinary immortal god, or an immortal prince, an immortal prince...

And now, the aura on Wang Yi's body is... Immortality!

"The king is still too eye-catching in Stranglethorn Vale. It is enough to be immortal." Wang Yi is very satisfied with the camouflage function of the "Purgatory Armor". It is worthy of a treasure-class armor. Perhaps it is far inferior to the treasure "Slaying Wu Yuyi". ", but the killing of Wu Yuyi was incidental, and the Purgatory God Armor deliberately created the function of disguising aura and coercion.

Therefore, even if you don't investigate carefully, it's hard to find out at once.

Of course, the Lord of the universe can see through it at a glance.

Through this, Wang Yi can disguise himself as an immortal **** on the battlefield outside the territory, reducing the chance of being discovered by a foreign race.

"Those alien races might not have imagined that it was me who was a human king on the battlefield outside the territory, right?" Wang Yi smiled, "However, I can't be careless. I should try my best to hide my true identity. ."

Many treasures have some magical abilities. For example, getting bigger and smaller is the basic function of many treasures, and changing the appearance is also very easy.

Wang Yi has changed the original iconic appearance of the "Purgatory God Armor", and also concealed his appearance, and also pretended to be the coercive atmosphere of the immortal god, even if he was familiar with it, he would not be able to recognize it.

"This time, let's use a knife." Wang Yi thought, and two cyan swords appeared behind him, it was the Qingpai sword.

The only two eyes exposed under his helmet were murderous, and his figure flickered, and he had come to the outside of the spaceship, and once again flickered, he appeared in the starry sky battlefield.

At this time, Taiwo and the immortal gods of the two human alliances felt anxious and uncomfortable.

"That comrade-in-arms, why can't he still come, we can't hold it anymore."

"Haha, kill them!"

The immortal gods of the machine, monster, and zerg are very tacit understanding.

It's all one party against one party.

For example, two immortals in the mechanical camp deal with one immortal in the human camp, two immortals in the Zerg camp deal with one immortal in the human camp, and one immortality in the monster camp deals with the immortality of a human camp...

As for fighting together? They can't do it yet.

After all, they are also enemies themselves.

This step is still possible because of the previous tacit understanding.

"brush!"

At this moment, a figure suddenly appeared, just so suddenly on the battlefield.

All the immortal gods were taken aback, because even in the battle, they still remained alert to their surroundings, but even so, they still didn't notice how the opponent appeared.

Everyone looked over involuntarily.

When they saw the figure covering the entire body of armor in the starry sky, exuding powerful pressure, their hearts trembled.

"sky!"

"This breath is..."

"Fenghou Immortal? No, it seems to be stronger than the Fenghou Immortal I have ever seen."

"It's the immortality of the human side!"

After being shocked, the mechanical, monster, and Zerg tribes all began to panic.

"Fenghou is immortal!"

But the alien immortality of Taiwo and the other two human camps was overjoyed.

They did not expect that the reinforcement they were looking forward to would actually be a powerful and immortal prince!

In a small place like Stranglethorn Vale, the immortal entitlement can be said to be the absolute peak combat power, super overlord!

After all, almost all of them have "immortal bodies." At this level, except for the kings and besieged by many immortal gods, it is almost difficult to fall.

The humanoid warrior in the dark red armor stood in the void, carrying two sabers on his back. When he looked over, his cold gaze made all the immortal spirit bodies involuntarily cool.

powerful!

We can't resist this immortal god.

Just one look made the three immortal alien races lose the idea of fighting at the same time.

"Boom..."

The space was shattered, the space was torn apart, and the space debris was turbulent, but the five immortal aliens from the Zerg race and other three parties chose to turn around and ran at the same time.

At the same time, they also issued an escape order to their subordinates.

escape!

The other party has an immortal presence, and three immortal gods as helpers, it can't be beaten at all!

The immortal army master pinnacle and Fenghou, although only a little bit difference. However, the degree of terror differed by thousands of times...If you only talk about combat effectiveness, the difference between Immortal Army Master Pinnacle and Fenghou Elementary is very small. The only difference is-the immortal body!

Once it became an immortal body, it was terrifying thousands of times.

Like the immortal monster race with the strongest strength present, the strength is very close to that of Feng Hou, but even if it explodes! Shattered the immortal gods of Fenghou Primary, the opponent will still be united again without any damage, and the self-destruction will not damage the other party. Do you think there is meaning to fighting? So when they met Fenghou, they just fled one word!

"The immortality of mankind is here!"

"escape!"

"Run away!"

The three-party alien world masters were stunned when they saw the terrifying and coercive figure that suddenly appeared, and after receiving the order of their own immortal god, they immediately fled frantically.

One is faster than one.

Immortal mankind?

Don't you run to stay and wait for death?

On the human side, morale is boosted!

"Haha, our reinforcements are here!"

"They ran away, don't let them go!"

"Kill!"

The situation was reversed in an instant, and Wang Yi hadn't even started fighting. It was just a breath of coercion that caused the scene to undergo earth-shaking changes.

Seeing those alien world masters who had suppressed their bullying run away, the anger of the human side masters all turned red.

For the dead comrades.

For the aggrieved just now.

For military service.

They are all like tigers out of the slaughter, chasing after those world masters.

"Haha, Brother Seven, let's go too." He was only one meter tall, and his face flushed with excitement like a "poison" like a cute child. At the same time, he looked at the man in the golden armor and saw the wound on his body. There was a trace of distress on his face.

"Seventh brother, are you okay?"

"It's okay, just a small injury." The young man named Brother Seven rubbed his little head, and then looked at the dark red figure in the distance, with a trace of admiration and envy in his eyes.

"Fenghou is immortal, this is the real powerhouse, I don't know when I will reach that level."

Although Seventh Brother possesses the strength to defeat ordinary immortal gods, he is only a powerful opponent. As the lord, fighting against immortal gods, most of the time he can only protect himself, and defeat is very difficult, let alone kill.

And the immortal lord Feng Hou just showed up, letting a group of arrogant immortal world immortals on the opposite side flee, the gap between them was too big, which made him envious.

At this time, Wang Yi also shot.

The first thing he rushed towards was the immortal monster race.

There is no other reason. The immortality of other alien races was intercepted by the immortality of the human camp, but he got rid of the entanglement of his opponents and ran the fastest of all.

Who do you kill if you don't kill?

And that body was nearly one kilometer tall, like a black one-horned lion, the immortal monster race saw Wang Yi rushing towards him, his speed was terrifying, and a trace of panic appeared in his eyes.

"How to chase me?"

In fact, even if it is immortal... it is generally difficult to kill ordinary immortal gods alone.

But there are four immortal gods on the opposite side, and one of them is immortal. It is an absolute advantage and has no chance of winning at all. The three parties are naturally unwilling to stay and die.

What's more, the aura that Wang Yi exudes is still terrifyingly strong, and has faintly reached the pinnacle of immortality.

Faced with such a terrible enemy, the five aliens in three directions are immortal, and naturally one flees faster than the other, lest they stay and let the strong human camp intercept and kill.

However, the first to be unlucky was the immortal monster race with the strongest strength and the fastest running.

The black one-horned giant lion found that the immortal speed of human beings was terrifying.

"brush!"

"brush!"

"brush!"

A few flashes have appeared behind it~www.mtlnovel.com~ An astonishing murderous opportunity has emerged.

"Do not!"

Although the black one-horned giant lion is flustered, it is unwilling to sit and wait for death. It turns around fiercely, with its sharp claws carrying a mysterious space law and artistic conception. The divine power surges, and the dazzling light condenses into huge claws, tearing the space, turning back and grabbing Wang Yi. .

call! Wherever the claw light passed, the starry sky was shattered, but he did not catch the human figure.

"brush!"

Wang Yi had already appeared in front of it, and the mysterious patterns on the two cyan swords in his hand had lit up.

One knife!

The blade light cut down, and in the horrified eyes of the one-horned black giant lion, it split its huge body in two, and the surging power in the blade light shattered his body.

[Chapter 310: Not 1 left! 5 kills!](#)

Wang Yi is now the pinnacle of the world lord, his genetic level has reached 12 times, and there is the "Secret Method of the Purgatory God General", the body amplitude secret method, which can amplitude a hundred times the body strength, that is 1200 times the peak power of the world lord!

Even without the power of the beast god, they have reached the bottom line of immortal power!

Coupled with the law perception, the secret method, the attack power can even soar to the level of the king! Now it's just a little bit of power to smash an ordinary immortal god, it's not difficult at all!

The Immortal Demon Race, whose strength is comparable to the peak of the Immortal Sergeant, is just a face-to-face, and the body is shredded!

Although the immortal deity of the monster race immediately condensed into the body, it showed an expression of incomparable horror.

"My divine body lost 21% suddenly?"

You must know that the loss of the divine body just started to have little effect on the strength, but the further the later, the more shocking and outrageous the impact on the strength.

Within 10% of the loss, there is almost no impact on strength.

With a loss of 30%, only 50% of the strength remains.

With a 50% loss, only 10% of strength remains.

Loss of 70%, I am afraid that the strength will be less than 1%.

Loss of 90%, has fallen into a deep sleep, and even lost consciousness. In the long sleep, it may be slowly repaired, or it may be slowly and continuously worn down until it falls. In short, there is no resistance at this time!

It can be foreseen... how amazing the impact of the loss of the divine body will be on the strength.

"I am the pinnacle of the immortal army master, and my strength is almost close to the first rank, but the opponent's blow caused me to lose 21% of the divine body?"

"He is not an ordinary Fenghou immortal, he is definitely the pinnacle of Fenghou!" The immortal monster race was terrified!

"My lord! Forgive me!" The Immortal Monster Race began to beg for mercy regardless of the different camps.

It was the cold and dazzling knife light that answered it.

This is two dollars.

The monster body of the immortal gods was instantly torn apart, shattered, and annihilated in the fierce and terrifying light of the sword.

It was desperate and didn't even explode itself. It's meaningless for him to explode in front of Fenghou Peak Immortal.

What's more, Wang Yi's sword was too fast, and he didn't have time to blow himself up.

In just a blink of an eye, the immortality of the monster race fell!

Wang Yi stood in the void with a knife in his hand, watching the immortality of this monster race fall in front of him.

Indifferent eyes.

He killed the opponent before, relying on the suppression of absolute power, destroying the opponent's immortal power, and completely destroying it! As long as the opponent's immortal power is completely annihilated... the opponent is naturally dead.

There are two types of forced annihilation.

The first type is that the gap is too big, like the existence of the Chaos City Lord, or like the sages of the universe, you can kill the immortal Fenghou with the flip of the palm, without the slightest cost at all. When the level difference is too big... it's easy to destroy the immortal body.

The second type, the gap is not too big, a "Feng Wang Elementary" wants to kill the "Feng Hou High"...Although it can be destroyed again and again, the other party can still condense again and again. At this time, you have to pay a certain price to kill the opponent, that is, "burning one's own immortal power."

Once burned, it is equivalent to permanently losing this part of the divine power and the very little soul contained in it. This is a permanent loss!

How powerful is Feng Wang Primary, once the immortal divine power is burned, the instant attack power is very terrible, which is comparable to Feng Wang's fate and will naturally annihilate Feng Hou.

Annihilate a high-ranking Fenghou! Even if it is the first class of the king-it has to be restored for a hundred years and millennia.

Of course-if "Feng Wang Gao Lian" kills "Feng Hou Gao Liao", even if the immortal divine power is not burned, normal attacks can damage the opponent's essence, and a little bit of immortal divine power can be easily killed, and it can be restored for a few years.

If it is "Fengwang Peak", then "Fenghou Gaoda" can be easily killed.

This is forced annihilation!

It relies on the absolute gap in energy, and if the gap is not enough, it relies on "burning immortal power."

The power base that Wang Yi exerted just now was 1200 times the power of the pinnacle master, that is, the elementary level of Fenghou, but coupled with his law perception and secret method, he can reach the peak of Fenghou, even close to the king!

It is also normal to kill an ordinary immortal **** with three swords that does not even have an immortal body.

But if it is "primary entitlement to immortality", it has an "immortal body".

If Wang Yi's attack power can reach the "primary level of the king," normal attacks can also harm the opponent's essence.

If the attack power reaches the "high-ranking king" and the power level is sufficient, then it is easy to kill the primary and immortal kings!

The reason why those immortal gods burn immortal divine power is that their attack power is not enough!

The attack power is strong enough, even if the rules can be broken, let alone an immortal body!

According to Wang Yi's understanding, in order to attack the immortal gods of the "immortal body", the attack power must be at least three levels higher!

Want to kill easily, at least four or five levels higher!

Therefore, the primary immortality of the king, generally only the limit of the king, can there be a chance to kill without burning the divine body!

At the high level of kings, I am afraid that only the invincible kings like "king of true Yan" and "king of heavenly feather" can kill without burning the divine body!

Therefore, the king is immortal, in the battlefield outside the territory, as long as you be careful, it is generally difficult to fall.

With Wang Yi's current strength, it is not easy to kill the immortal Wang Gao, and want to kill him quickly.

So he prepared "Fymore Venom", a big killer that specifically corrodes the divine body!

But there is no need to deal with Fenghou Immortal, his own attack power is enough to kill!

And the other four entangled alien immortals in the distance also discovered this scene, scared to death.

This sudden appearance of human beings is a powerful immortal, more terrifying than they thought.

"Boom..."

All alien immortals no longer hesitate, nor dared to hesitate, they blew themselves part of the immortal divine body, blocking the enemy at the same time, the body moved away quickly.

This is also the reason why it is difficult for Fenghou immortal gods to kill ordinary immortal gods.

The opponent can't fight, but they can escape!

If the speed is not an absolute advantage, let the opponent leave the battlefield and start the flight speed. Once it is close to the speed of light, it will be difficult to catch up.

Unless there is teleport!

Although Wang Yi has teleportation, he still doesn't want to use it now. Even if he flickered just now, it is not teleportation, but an extremely clever spatial body technique.

Even if it is not a clone of the Void Zerg, Wang Yi now has a sense of the law of space, and he is very terrifying in terms of speed and physical strength.

After all, this is a man who has reached the 20th floor of the Tongtian Bridge in the sense of the law of space!

"Boom..."

Four alien immortal gods burned a part of their own gods at the same time, and the surrounding starry sky burst directly. Numerous space fragments formed a torrent. The powerful explosion impacted the immortal gods of the three human camps. Although they were guarded, they were still shocked. Throwing away directly, the divine body still suffered some damage.

"Damn, they ran away!" Taiwo opened his eyes angrily, looking at the enemy who rushed out hundreds of thousands of kilometers in an instant.

"Go and kill those world masters, and leave these four immortals to me."

There was a voice from the army communications.

Taiwo and the immortality of the other two human camps were slightly startled at the same time.

They heard that this was the powerful and immortal voice.

Could it be possible that this immortal prince can hunt down those alien immortals who have sacrificed their lives to run away?

Although Taiwo and the others were puzzled, they still followed the other party's proposal and immediately turned around to hunt down those alien world masters.

However, most of their attention is still on the immortality of the dark red armor.

When they saw a flash of the immortal figure of Fenghou, they rushed hundreds of thousands of kilometers away, and after a few flashes, they caught up with one of the immortal alien races, their eyes widened in surprise and almost forgot to be on the battlefield.

"What body speed is this?" Taiwo blurted out in horror.

As we all know, the flight speed of the primitive universe has a limit. When the speed of light reaches the speed of light, it will shuttle into the dark universe.

Therefore, in the primitive universe, no matter how powerful the immortal gods may explode at different speeds, their flight limits are always close to the speed of light.

But Wang Yi's physical body is different.

Not teleporting, but like teleporting.

Wang Yi named it-Shuttle in the Void.

A long time ago, the Void Zerg clone used its own talents. At the master level, it can easily flash ten times every moment, just like a swimming fish. When it dives, it will blend into the space and move at a faster speed. Leap, when it jumps out of the water, it appears in the primitive universe, instantly crossing a long distance.

Wang Yi also mastered this terrifying spatial body technique. Although it was not as perverted as the clone of the Void Zerg, it was far faster than the instantaneous explosion speed of the immortal gods in the primitive universe.

One flicker is hundreds of thousands of kilometers away, and ten flickers in an instant is a distance of millions of kilometers!

Although the four immortal gods are scattered, they are still in the same general direction. One of the mechanical immortal gods, the chimpanzee-like metal life, felt a strong and powerful aura instantly appear behind him, and he was so scared that he quickly looked back. When he reached the dark red armor figure, the one-eyed stared round in shock.

"brush!"

The sharp cyan knife light lit up, like a Wang Qingquan, flowing through the immortal body of the "Kna tribe".

The body, which is so hard that even the temperature of the core of the star cannot damage a trace, is fragile under the beautiful light of the knife.

Kill two kills.

The violent shattering space containing the infinite power of the blade light shatters everything.

Then it exploded.

"Crack!"

The immortal metal life of the "Kna tribe" appeared again with the condensed divine body and the face of horror.

The breath was already weakened, and the cut just now caused it to lose at least 30% of its divine body.

It wants to run, but it has no chance.

Wang Yi's other Qingpai knife has been cut down without mercy.

This time, ushered in the last knife to end its life.

The power of the divine body was greatly weakened, making the metal immortality of the chimpanzee even more incapable of resisting Wang Yi's knife.

"Puff!"

Another alien immortal has fallen!

Double kill!

The other three surviving aliens were immortal, and their bodies trembled with fright.

Even the three immortal gods of the human side who were chasing the alien world masters in the rear were shocked.

What is this terrible body speed?

What kind of perverted knife technique is this?

Just two swords, one immortal **** is gone?

Seeing that terrifying dark red figure looked over again, the three immortal aliens stopped breathing.

Oh, they don't need to breathe either.

"brush!"

"brush!"

Seeing the death-like figure approaching like a ghost, the remaining alien immortality can only continue to escape far away, so there may be a chance to survive.

But they are doomed to be disappointed.

The third one that Wang Yi overtakes was the immortal metal life of the mechanical race. It looked at Wang Yi approaching, and humanized fear and pleading appeared on the savage metal face.

Wang Yi had no mercy and slashed it.

"Roar!" The Metal Life roared, swinging out the black war knife, and exploding its divine power with all its strength, the war knife shattered the space, and it ran into Wang Yi's Cinnamon Knife.

when! The immortal metal sword of the "Kna tribe" was directly split open, and in his desperate expression, the cyan knife slashed on him unstoppably.

The immortal body of the "Kna Clan" shattered suddenly, and then before it had time to condense, it was already submerged in Wang Yi's wave of sword light, leaving no trace of it, and no aura.

Three kills!

Wang Yi's eyes fell on the two immortals of the Zerg who had fled millions of kilometers away. They were two energy life races.

Shuttle space.

Dou Zhuan Xing Yi.

It's like walking in front of the court, stepping over in one step, and catching up with an immortal energy life.

The immortal saw Wang Yi chasing him with an incredible look in his eyes.

"You—not Fenghou..."

Wang Yi's eyes were weird, he slashed it down, and the sharp sword sprang out, tearing a thousand-kilometer-long gully in the starry sky.

Comparable to the power of Feng Hou, coupled with the perception of the law against the sky, the power of this sword is so powerful that ordinary immortal gods can only look up.

Seeing the destroying blade light swept down like a tide, the energy life of the Zerg camp felt like an ant in the torrent, extremely small.

The surrounding space has stagnated, and the flow of time has also slowed down.

Before the sword fell, the time and space around the alien immortal seemed to be still, turning into an invisible amber, and it was an ant in Amber, with a frightened expression on his face.

"Peng!"

The starry sky exploded, exploding together with this alien immortality.

But as an energy life, this alien immortal is innately stronger than ordinary life immortal divine body. It will soon re-condense the divine body in the turbulence of space, but the aura will inevitably weaken.

"Ah!" Seeing the cold and murderous human powerhouse in front of it, it knew that it was no longer immune, and in despair, it simply blew up.

"Boom..."

The self-detonation caused the surrounding tens of thousands of kilometers of space to fall apart instantly and no longer exist. The impact generated by the violent force shattered the starry sky and formed a large-scale starry sky storm.

However, Wang Yi moved out at the same time when the immortal **** blew himself up. Because of the fast movement, he was only affected by the edge power. For Wang Yi, who has the "Purgatory Armor" and "Mo Yun Teng" on his body, he and Mosquito bites are worse.

Four kills!

Wang Yi brushed his head and looked at the last immortal energy life that had escaped tens of thousands of kilometers away.

And that energy life is immortal, and through the military system and detection equipment, knowing that his teammate is dead, it is fear, shock and panic.

"Chamaru is also dead, that human being was so terrible, what is the origin of it? Why have I never heard of him in Stranglethorn Vale?"

Only its last person is left, this energy life is immortal and dare not stay~www.mtlnovel.com~ flying desperately.

"brush!"

"brush!"

Wang Yi flashed quickly, chasing after it. Although the immortal energy life was flying close to the speed of light, he was still caught up.

"brush!"

Wang Yi appeared in front of it this time, turned his back, and then turned to look at it.

"It's over!"

When seeing the dark red armor figure, the last immortal of the Zerg camp, such a thought came to mind.

"Boom..."

Five kills!
