

## A God 311

### [Chapter 311: 'Mengchen Island'](#)

Wang Yi stood in the spatial turbulence formed by the self-detonation of immortal divine power, standing still like a mainstay. As soon as those violent energy fluctuations hit him, they were easily offset by the heavy armor on him. The self-detonation power of Wang Yi could not even reach the immortal attack power of the king, and Wang Yi's Purgatory God Armor is a top heavy treasure, it is a magical armor that can be greatly weakened even by the Lord's attack.

Heavy treasures are divided into two levels: ordinary and top-level. General weapons are the most common, armor types are more precious, and domains, palaces, and souls are more precious and rare, and their value is much higher than other heavy treasures.

Like the "Purgatory Armor", it can easily counteract the material attack of the king's limit immortality (the power of a million pinnacle world master). If it exceeds this range, it will be transmitted to Wang Yi, but it will also be weakened by a thousand times.

But in terms of soul defense, it is not so powerful. Soul attacks below the immortal level of the prince will be almost completely resisted, the soul attacks of the prince level will be weakened a hundred times, and the soul attacks of the noble level will be weakened ten times.

After all, "Purgatory God Armor" is not specialized in defense in nature, and being able to have such a soul defense effect is already very valuable.

However, each treasure has its upper limit. When the upper limit is not reached, the function of the treasure can be fully utilized, but when the upper limit is exceeded, the power will be greatly reduced!

If the treasure defense limit is exceeded, it may even be destroyed!

But if you want to destroy a heavy treasure armor, it is difficult for ordinary venerables to do it. I am afraid that only the strong among the venerables or the overlord of the universe can do it.

After killing five immortal alien races quickly, Wang Yi quickly returned to the original battlefield.

In the starry sky battlefield, as the five immortal aliens flee, the battle has become one-sided. Three immortal human camps have joined. Those aliens are immortal and lose their fighting spirit. They have no intention to fight and run away. They are chased and killed by human fighters, only twenty. Many world masters fled, and nearly thirty were killed.

"Seven brothers, second silly." On the other side, Poison was excited and gathered with the other two top masters, "We all survived this time, it's great."

"That strong man is really amazing, he should be immortal, he directly and domineeringly killed those five alien immortals."

"Haha, yeah, I almost thought I couldn't escape this time, I should thank the Master Fenghou."

The members of the Taiwo team happily discussed the superpower who saved them, and there was no lack of worship in their words.

When Wang Yi came back, they were cleaning up the battlefield with joy. They saw the dark red armor, the powerful and powerful, immortal immortal immortal who killed immortality like a chicken and dog came, and they all set their sights on admiring and admiring them.

"brush!"

Wang Yi, who was wearing a dark red armor, dark red helmet, and dark red boots and carrying two cyan quaint swords on his back, flashed and appeared in front of them, the powerful aura of coercion looming, making people palpitate.

Under the helmet revealed a pair of dark and deep eyes, like an ice-bound volcano, containing a great horror that destroys the sky and the earth.

"Thank you for your help!" The three immortal gods of the human camp and many world masters bowed respectfully and gratefully to Wang Yi.

Without Wang Yi, some of their three immortal gods might have fallen, and the world leader teammates would suffer heavy losses.

"My lord, this is Taiwo."

"I'm Gunte."

"I am Yaheng Keppel."

The three immortal gods all introduced themselves first.

Among them, Taiwo is an immortal \*\*\*\* of the human race, and looks similar to the "dragon people", a sub-race of the human race.

The other two are allies of the human camp-the immortal gods of the Batajiao tribe and the Ranteng tribe, their appearances are also very different from human beings.

However, they were very respectful in the face of Wang Yi, a powerful immortal prince.

"Well, they are all human beings. It should be done, thank you for not having to." Wang Yi waved his hand, and his eyes fell on Taiwo.

Taiwo was taken aback for a moment, and then he got up and down in his heart, wondering why this sudden immortal deity looked at him like this.

However, everyone is in the same camp and has military system restrictions, so he doesn't worry about what the other party will do to him.

Just wondering, the adult looked a little strange in his eyes.

Looking at Taiwo, Wang Yi also sighed.

In the original history, the Taiwo team and Luo Feng only met in the extraterritorial battlefield more than 4000 years later. Before that, the team member "Seventh Brother" was killed by an alien immortal

for protecting the "poison". The comrades-in-arms were eaten in front of them, and the poison has been blamed and brooding.

However, in the outer battlefield, anything can happen, and the mortality rate is too high. Elite teams like Taiwo may also encounter irresistible enemies and be destroyed at any time.

With the bonus from the original memory, Wang Yi still has a very good impression of Taiwo, the united world leader team. Since he encountered it, I don't mind helping them at this time. It is best to avoid the fate of the original book from continuing to happen to them. .

...

Soon after, Taiwo and others watched Wang Yi's spacecraft disappear at the end of the starry sky. The nearby allies "Gunt" and "Yaheng Keppel" looked at Taiwo with a smile on his face and said, "I really envy you. , Taiwo, actually was able to win the favor of that lord and gave you all those fallen and immortal treasures...that are five immortal treasures, probably more than we have been fighting for hundreds of years on the outer battlefield."

"Haha, it's all that the adult values, it's good luck." Taiwo's face was full of smiles.

"Hey, I really envy your human super powers, so generous." The other two allies were still envious.

Those five immortal gods who died were all high-ranking and even peak immortal warlords. They accumulated a lot of wealth. Although they were far inferior to being immortal, all the treasures added up to more than 100,000 units, which was more than their total wealth combined. .

"Haha..." Taiwo was still smiling, but in his heart he was figuring out how to distribute the wealth in the team, the adult said, these wealth is for his entire team, not him alone.

Taiwo thought about it, and suddenly saw the "Little Seven" in the team whose combat power was comparable to ordinary immortal gods, and suddenly had a thought in his heart.

At this time, Wang Yi, who had already taken the spacecraft away from Taiwo and them, was sitting on the sofa in the spacecraft control room. The helmet on his body had been put away, only the black mask was left. He was sitting on the sofa drinking tea with a smile on his mouth.

"Master, do you seem to value that world leader team?" An image of Smart Life Bermuda appeared next to him, asking curiously.

She is very clear about the character of the owner. It is not the kind of person who will give alms to others for no reason. Antonio and his team are nothing more than the team that the owner has joined, but the human team called Taiwo is just a fate, she The host will not suddenly show kindness.

"Hehe, it's just a little wealth, it's pleasing to them. What's the matter with them." Wang Yi smiled.

During the long journey, Mo Yunteng and Smart Life Bermuda are his closest partners.

And he was right, the wealth of a few ordinary immortal gods was nothing to him.

Next, he has to kill thousands, which is called excitement.

During the conversation with Bermuda, the spacecraft turned into streamers and continued to fly to the void shuttle area closest to the Yanji Continent at sublight speed. Through there, the spacecraft can enter the dark universe and then quickly reach the Yanji Continent.

...

Time world.

In the vast and boundless continent of time, the original chaotic monument is no longer in its original position. Only the clones of the Void Zerg race and the giant flame star beasts are here. The secret of combat.

At this point, the role of the Chaos Tablet is already very small, unless there is more accumulation or touch, or the role of the Chaos Tablet is not big.

Otherwise, the human race can only allow those cosmos venerables, peerless geniuses born in tens of thousands of epochs, to comprehend the Chaos Stele for hundreds of millions of years.

In fact, this is simply not feasible.

The chaos stele is only used to guide the comprehension. It is not that the chaos stele can definitely lead the way out.

In the end, it depends on the individual.

Comprehension, inspiration, chance, accumulation... are also very important.

This is why the Virtual Universe Company clearly knows that the life and death of the owner is dangerous, and it has adhered to this tradition for countless years.

Only in tempering can the real strong appear.

As for the Chaos Stele, it is only necessary to enlighten it when needed occasionally. Now this Chaos Stele is placed in the body world, and it is enlightened by the mother emperor Elizabeth of the Zerg clan.

Sitting in the control room of the spacecraft, Wang Yi's human body is very leisurely.

"I walk through time and space at the same time, the way of beasts and gods."

"In the future, you will either control time and space at the same time to become the master of the universe, or integrate the law of fire and sky to become the master of the universe."

"But before that, I have to become immortal, a venerable one."

"Before becoming immortal... you have to comprehend all the ten original laws until they are recognized by the original laws."

Wang Yi thought to himself.

His plan for his future path is actually very clear, and he also knows many deep-seated mysteries in the universe.

When you are a realm master, you can perceive various laws, and each law is very close to the realm master.

When immortal, the soul is fully integrated into the divine body and becomes a part of it. The divine body is composed of immortal divine power, which can be called a part of the ocean of the law. To the strong rejection of other laws, the difficulty soared ten thousand times, one million times when comprehending.

Of course there are special circumstances.

If a certain law can be recognized early, then there will be no rejection, but it is still much harder to realize it.

and also--

The upper level of the five laws of wood, water, fire, and earth is the law of space.

The five laws of gold, wood, water, fire, and earth have been perfected to become the immortal laws of space to perceive. Although they are repelled, there is still the possibility of improvement, but it is much more difficult than the realm master period.

There are three laws of wind, thunder and lightning, and to understand the law of time, it is also possible to improve.

If it is clearly the law of enlightening the wind, but he insists on studying the law of space, it is okay in the realm master stage, but once it reaches the immortal stage, then there is no way to practice.

"It's a long way to go." Wang Yi sighed with emotion.

Once there is a direction, there must be a correct method, otherwise it will only struggle on this road.

It is not easy to merge the two laws alone.

If the fusion is successful, that is the Lord of the universe.

How many masters of the universe are there in the human race?

Up to now, the law has realized his point, has reached a bottleneck, but can spare time to make other preparations.

The practice secret method of the practice secret method, the sense rule of the enlightenment law.

Such as King Zhenyan, King Tianyu, King Yanlong... and other invincible kings, all have been stagnated on this level for hundreds of millions of years, unable to break through.

It took only two hundred years for Wang Yi to reach the level of keeping abreast with them. The name of the first genius in human history is not a vain name.

"I'm not in a hurry, I'm still far away from the realm beast catastrophe." Wang Yi had a good mentality.

Ruth walked step by step and had to eat one bite at a time.

He is already far ahead of Luo Feng, and he has the advantage of foresight, so there is no need to worry unnecessarily.

"First hunt in the outer battlefield, complete the panel task, and then sign for a wave at the Star Tower, it's almost the same."

Wang Yi is full of hope for the future.

...

Wang Yi's detection equipment was able to spot some enemies within a ten-kilometer radius early. In addition, Wang Yi always wore purgatory armor on his body, exuding the aura of immortality. In Stranglethorn Vale, few people dared to provoke the immortality. Rushing all the way, this E9-class spacecraft flew to the "cosmic shuttle point" without encountering any enemies.

Those enemies are very careful when they see a spacecraft that has not been detected by the detection instrument, even if they don't know the specific situation of the spacecraft, they dare not easily provoke them.

A piece of planet fragment on the edge of the void area of the starry sky.

Control room.

"Well, Mo Yun Teng's divine power token has been found in a hidden place. If you need it in the future, you can directly send it back here through the Kingdom of God." Wang Yi touched the armor of Mo Yun Teng on his body with satisfaction, and then Give commands to the projected image of Bermuda on the spacecraft's screen.

"The universe shuttles."

"50 times the speed of light."

Wang Yi looked at the star map route on the screen.

"It takes about five hours from here to reach the shuttle point near the Yanji Continent. After arriving at the shuttle point, it will take about eight days to fly to reach the Yanji Continent area."

...

Eight days later ~[www.mtlnovel.com](http://www.mtlnovel.com)~, a black flying saucer-shaped spacecraft that flew for a long time on the battlefield outside the territory finally arrived at its destination smoothly.

"Yan Ji Continent, is it finally here?" Wang Yi who sat on the sofa in the control room most of the time, but occasionally separated his consciousness into the virtual universe, stood up, stood in the control room, and looked at the starry sky image simulated by the exterior scene in front of him. .

The distant starry sky is a vast and boundless continent, and there are some equally large continental fragments outside the continent suspended in the starry sky.

"Here, in the coming years, it will become my hunting ground." A terrible smile appeared on Wang Yi's face under his mask.

The next period of time will become a lingering nightmare in the memory of many strong people on the battlefield outside the territory, especially some strong people who have been killed but resurrected. In the long years that follow, they have kept secret of someone's name and avoided it. Don't talk about it.

#### [Chapter 312: Mission "Army Command"](#)

Yan sacrifices to the mainland.

Yan Ji continent, divided into the main continent and the surrounding land fragments.

Although they are just some land fragments, some large land fragments can only fly over a month or two even with light. It is conceivable that they are huge.

Standing in the control room, Wang Yi looked at the vast land that was gradually enlarged in front of him.

"According to the star map, the main continent is the land of Yanji Continent 01."

"The continental debris I am passing through is Land 05, with a maximum diameter of about 1.3 trillion kilometers. If it is directly penetrated, even if it continues to fly at 290,000 kilometers per second, it will take more than a month to fly over this land." Wang Yi looked down at the surveillance display on the arm guard screen.

The ultra-high and sophisticated detection instrument with a radius of one billion kilometers has enveloped the vast land within the detection range. All the alien teams or legions lurking here are displayed on the screen.

A team, many foreign experts, the level is obviously better than Stranglethorn Vale, at least the immortal gods are often seen.

After watching Wang Yi for a while, he lost interest.

"Luck is really bad, not even an immortal title." Wang Yi was a little regretful.

Originally, he wanted to find a Fenghou Immortal to try the knife.

The black flying saucer-shaped spacecraft quickly flew into the outer edge of the vast land.

At the same time, Wang Yi heard a familiar voice again.

【Ding! 】

[Trigger mission! 】

[Task Name: Army Command]

[Task content: Command a human extraterritorial battlefield army, get 100 battle victories in the extraterritorial battlefield, and get related rewards. 】

[Reward content: When the mission is settled, the overall casualties of the legion are less than 10%, and a random high-level reward will be given. 】

[Reward content: When the mission is settled, the overall casualties of the legion are within 10%-20%, and a random medium reward will be given. 】

[Reward content: When the mission is settled, the overall casualties of the legion are within 20%-30%, and a random elementary reward will be given. 】

[When the mission is settled, the overall casualties of the legion are more than 30%, and the mission fails without any rewards and punishments. 】

[Task time limit: the receiving task must be completed within 100 years from the start of the task. 】

[Please pick up before the end of the countdown, otherwise it will be cancelled automatically and will no longer appear...]

【59.....58.....57.....】

Wang Yi looked at the task that suddenly appeared, somewhat surprised.

The sign-in panel son who could not beat a fart from the three clubs in the past has become much more active after "evolution".

Of course, Wang Yi is very welcome in his heart, because he can get more benefits in this way.

I was worried that in case this son couldn't think about it someday or got a brainstorm, he would post a mission that he couldn't complete, such as "kill the strongest in the universe in one day, and wipe out if you can't complete it"... Then the fun would be great.

However, based on the current situation, the sign-in panel will not post tasks that exceed his capabilities or are impractical.

Looking at the content of this task, Wang Yi was a little curious about what this "random reward" was?

Wang Yi thought for a while, commanding a space army to conduct 100 battles is not too difficult for him, but it is a failure, and there is no mission penalty. You can try it.

Therefore, Wang Yi chose to take over the task.

Now that he takes over the mission, he must have a space army.

Wang Yi overlooked the vast land underneath, and once again connected to the military system.

Apply to "command the army."

"Warrior Wang Yi, you are applying to lead the army, are you sure?"

"Confirm." Wang Yi said softly while looking at the location.

"You have chosen to lead an army. Under normal circumstances, this army will be composed of 100 realm masters, 1,000 realm masters, and 10,000 cosmic-level masters. Your task is to lead this army to fight on the extraterritorial battlefield. To the strong aliens, you will deal with the immortality among the strong aliens, and your army will fight against the alien armies."

"You are willing to lead the army and shelter the army, and you can get an extra 50% of your military merit when you accumulate your military merit. For example, you can get 100 million military merits by killing ordinary immortal gods, and you can get 150 million military merits by killing the same immortal gods while leading the army. And... when leading the army, you don't need to protect them, you only need to deal with the immortal gods of the alien race and prohibit the slaughter of the immortal gods of the alien race."

"Your application has been submitted and will be reviewed by the system. According to your coordinate position, the nearest uncommanded space armies will be assigned to you, and you can choose one to lead."

"If you are not satisfied with this, you can go back to the barracks base and re-select the army you want to lead at the barracks base."

Wang Yi's arm guard screen shot a light, forming a starry sky map.

More than ten light spots appeared on it.

The army system continued: "This is the 17 space armies closest to you within the 026 Barracks Base of the Seventh Battlefield. You can choose one of them to lead."

Wang Yi looked at the starry sky map. As I said before, the starry sky map of the entire seventh battlefield is very complicated.

There are thousands of places like "Stranglethorn Vale".

There are also hundreds of millions of regions lower than Stranglethorn Vale. Those regions have a small number of strong people, and they are generally the scope of world masters, domain masters, and universe-level activities.

If a space army happens to have no immortal spirits willing to lead, they cannot enter those higher-level areas to fight, and can only move in the outermost periphery.

Most of the light spots that Wang Yi saw were far away from the Yanji Continent, only a few were near the Yanji Continent, and only one was closest to him, and it was in the starry sky near Land 05.

Wang Yi clicked on the army numbered 026-39217 and checked their situation. For a moment, he nodded.

"I choose Army No. 026-39217 to lead the army for me."

...

In a starry sky about a few light-years away from Wang Yi, a blue flying saucer-shaped spacecraft with a diameter of about 400 meters is flying in the direction of the barracks base.

The four-hundred-meter-diameter flying saucer-shaped spacecraft has a 300-meter-diameter upper, middle, and lower three compartments on its abdomen. All three compartments are 300 meters in diameter and can easily accommodate tens of thousands of human space fighters.

In the three cabins, these cosmic warriors are all talking.

"It's really unlucky. Our commander lost too much immortal body while fighting the enemy's immortal gods. Now that we have to apply to withdraw from the army and go back to recuperate, we have to go back."

"Why go back? You can also merge with other troops."

"The Lord of the Army said that it seems that he has not wanted to accept our army recently."

"It's a pity, our military merits are still a bit worse."

Among the cosmic warriors with a number of more than 20,000, there are more than 300 realm masters, close to 4,000 domain masters, and more than 24,000 cosmic warriors.

In the battlefield outside the territory, the number of troops is not fixed at 10,000. Sometimes there will be losses, less than 10,000. Sometimes it will supplement some other cosmic warriors who have been defeated and fled, and some will merge with another cosmic army. Form a larger space army.

However, the number will generally not exceed too much, otherwise it will be difficult to lead, and it will easily attract attention on the battlefield outside the territory.

Unless it is an ethnic battle in the 1000 era.

The large-scale ethnic battles that occur every 1000 epochs belonged to the decisive battles. It was a showdown between the mighty and mighty powers of countless powers. Even if the immortal gods were crowned kings, they would be killed by accident, with a mortality rate of over 99%.

But that kind of large-scale battle cannot be carried out frequently, and the pinnacle race can't withstand this kind of consumption. It's only once in the 1000th era.

At this moment, they felt that the spacecraft suddenly began to slow down, and then stopped.

"Um?"

"Why did the spacecraft stop?"

"What happened?"

"Isn't it about going to the void shuttle point and returning to the barracks base?"

The realm masters, domain masters, and universe class of the three-story cabin inside the spacecraft are all puzzled.

"Listen well!"

A majestic voice came, it was the voice of the immortal \*\*\*\* who ruled them. Let the noisy soldiers instantly quiet down.

"The above is about to assign a new commander to lead you to continue the battle, so we will not return to the barracks base. You are ready to welcome the new adults."

The cabin was quiet for a while, and then there was a boom of discussion.

"The military owner said it is true or false?"

"Is there really a new immortal spirit coming over to lead us?"

"Haha, then we shouldn't need to disband."

"I just don't know what the strength and personality of this adult are."

"You can check the army system by yourself. There are the latest instructions there." The immortal \*\*\*\* said no more here.

This time he was besieged by two immortal alien races. Although he repelled each other, he was seriously injured.

Immortal spirits, if the loss of the divine body exceeds 10%, it will affect the strength, and it will take a long time to recover.

His loss this time has exceeded 10%, and it will take at least hundreds of thousands of years to recover. It is no longer suitable to continue to command this army in battles outside the territory, and can only be handed over to others.

"There is mail."

"Are we going to the Yanji Continent now?"

"I heard that it is the second-class battle zone. There are a lot of powerhouses in the main continent, and there are many princes. There are even princes... I have not seen a prince at the battlefield outside the territory for so many years... Should we not go? Right there?"

"It shouldn't be the case. The Yan Sacrifice to the main continent of the mainland is mainly a small group activity. An army like ours should only be mixed in the outer debris continent."

In the cabin, the world masters, domain masters, and cosmic warriors were both happy and worried.

These cosmic warriors, of course, hope that the immortal gods sent are strong, so they have a greater chance of surviving on the battlefield outside the territory.

Otherwise, once the immortal gods are defeated, the immortal gods can still escape, and they will be slaughtered below the world masters.

In the extraterritorial battlefield, the landlord is a little better, and the territories below the master level are simply cannon fodder, and the mortality rate is too high and too high.

And the immortal gods are different in character and style.

Those who are kind and responsible will try their best to help their troops, reduce casualties, and protect them as much as possible when facing danger.

And like the kind of irresponsible or cold-hearted, just ignore yourself, ignore the army under his command, and even abandon the army when facing danger and run away alone.

Although there is a system of military supervision, the binding force on the immortal gods is not that great...After all, compared with the immortal gods, those ordinary cosmic armies are not so valuable.

Abandoning the immortal spirits of the army may be punished, but those domain masters and universes are facing life and death, and it is difficult to survive.

"Hopefully, a better military leader can come this time." Some soldiers prayed silently.

Just as the blue spaceship began to turn towards the Yanji Continent, these cosmic armies were discussing the new immortal gods who ruled them, Wang Yi also flew over here in the spacecraft. There is a void where space can be carried out. shuttle.

He has been in contact with the army, meeting in one place.

"Well, according to the speed, you can meet that army in about seven days and take over."

Wang Yi sat on the sofa and muttered.

A smile appeared on his face.

"Unexpectedly, I also have the time to lead the army in combat."

In the cosmic kingdom of Qianwu, there is a cosmic army, and the cosmic army of the cosmic kingdom of Qianwu is composed of 100 armies, and there are over 100 million cosmic warriors!

Each group army consists of 100 armies. Each army is composed of an immortal god, 100 realm masters, 1,000 domain masters, and 10,000 universe-level masters.

These troops are all going to be used on battlefields outside the territory! Each of the regular troops going to battlefields outside the territory has more than 10,000 people.

"This time the task is completed, do your best to get the highest reward." Wang Yi smiled and blew the heat on the teacup, "I just don't know what the reward will be." Wang Yi has a little expectation.

"Um?"

Just then. Wang Yi frowned.

"The virtual universe has mail."

"Did it from Luo Feng?"

Wang Yi is a little curious. He and Luo Feng haven't seen each other for a long time.

Of course that is in reality, in the virtual universe, and occasionally still connected.

"Luo Feng sent an email to me for what?" Wang Yi separated a trace of consciousness and entered the virtual universe.

Virtual universe, Yuxiang Mountain, primitive area.

Wang Yi's manor, study room.

Wang Yi tapped the void in front of him lightly, and a screen suddenly appeared.

Open the message.

"Well, invited me to the Rongzhuang Hotel in the public area for a drink, and also invited Rong Jun, Buran and the others?"

Luo Feng is now the domain master and has been dispatched to the Qianwu universe as a special monitoring envoy, but his domain master-level primitive zone manor in Yuxiang Mountain still remains.

Occasionally, the new talents of these virtual universe companies will meet up to connect with each other.

Now this group of newcomers ~www.mtlnovel.com~Wang Yi is already at the master level, fighting in extraterritorial battlefields. Luo Feng is at the domain master level, and he is sent to serve as the chief official of the border. Others such as Bolan, Rong Jun, and Uka Waiting is still cosmic level.

Wang Yi touched his chin and continued to look down.

Wang Yi then showed a trace of astonishment on his face.

"Huh? Luo Feng was accepted as an apprentice by the Palace Master of Eclipse?"

The Palace Lord of the Eclipse, sitting in the Palace of the Eclipse to frighten the supreme existence of the vast blood world, even in the virtual universe company, it is definitely a super existence of the ruling class.

According to Wang Yi's understanding, that is the existence of the top universe hegemon, perhaps it can be compared with the weakest universe lord, and the strength is not much different from his teacher "Venerable Pangbo".

"Luo Feng was actually accepted as an apprentice by the Palace Master of Eclipse..." Wang Yi was silent.

### [Chapter 313: Wang Yi's army](#)

The Eclipse Palace Master actually accepted Luo Feng as his apprentice, which surprised Wang Yi.

But it's only a little bit.

Since Luo Feng had already worshipped the Lord of the Heavenly Eclipse Palace as his teacher, it was unlikely that he would continue to worship the Lord of Chaos City as his teacher.

However, no one can tell.

Wang Yi was just a little surprised, and stopped thinking about it anymore, his consciousness entered the virtual universe, ready to go to the party.

Still muttering, "Interesting."

It's really interesting.

"Luo Feng worships the Lord of the Eclipse Palace as his teacher, so the City Lord of Chaos probably won't give that Killing Wu Yu Wing to Luo Feng."

After all, it is a treasure that is neither relative nor reason. No matter how enchanting Luo Feng is, he is also a genius of other people's family.

"Tsk...it looks like I have to figure out a solution." Killing Wu Yuyi, but the treasure parts of the Eternal True God Realm, unfortunately have the "golden and empty" attributes, otherwise Wang Yi might have to take it and use it first.

Virtual universe, Yuxiang Mountain, public area, Rongzhuang Hotel.

A luxurious hotel covering several kilometers long and wide, there is a row of beautiful maids and handsome male receptionists standing outside the hotel lobby.

"His Royal Highness Wang Yi, please follow me!" A realm-level woman with a furry tail smiled and led the way.

Wang Yi followed the woman of the landlord, stepped onto the ladder inside the hotel, and quickly ascended to the highest level of the entire hotel, before the ladder stopped.

On the highest floor of the hotel, there is an artificial lake with a beautiful scenery on the top floor, and there are old trees around the artificial lake.

It was not the first time that Wang Yi came here. He stepped out in the gift from the woman of the world master.

"Haha, Wang Yi is here."

"He is already the master of the world, he should be called Lord Wang Yi."

At a noble and elegant dark golden dining table in front of the lake, the new talents of this virtual universe company who have been away for many years gather here. There are not many people. They are all members of the Primordial Secret Realm and the Primitive Secret Realm.

Among the many members, Wang Yi, Luo Feng, and Rong Jun all worshiped His Holiness as their teachers, and they were the best.

But even though Buran had broken through the seventh floor of the Tongtian Bridge, he was defeated in the Primitive Secret Realm qualification battle, and he fell to the Primordial Secret Realm, and now there is only one Master Feng.

But still above others.

People like Rong Jun, Ai Chen, Qianshui, Jiang Mo... didn't even have the Immortal Teacher of the King. Except for Rong Jun who was reluctant to stay in the Secret Realm of the Beginning, everyone else had already been eliminated to the Secret Realm of Heaven and Earth in the qualification battle.

Seeing Wang Yi with the same demeanor, they all felt a little emotional.

Although Wang Yi's law perception far surpassed them at the beginning, everyone was still cosmic.

As a result, more than a hundred years after they came out of Chaos City, they were still Cosmos Grade, but Wang Yi was already the Lord of the World. Now they are submerged in Chaos City (the smoke bombs released by the human race), the gap is really too big.

However, everyone had no thoughts to compare with Wang Yi, that is, they were emotional.

People like them might fall somewhere in the future.

After all, according to the previous record of cultivating geniuses by the Virtual Universe Company, normally speaking, only ten out of a thousand people can break through to immortality, and all others have fallen.

Wang Yi also smiled and greeted those friends and walked over.

"Wang Yi, I have a seat here, sit here." Qian Shui said suddenly.

Will Mo darkly gave his sister a thumbs up.

The others have a slightly weird look and a smile at the corners of their mouths.

Wang Yi was startled slightly, then smiled and walked over and sat beside Qianshui.

On the other side of him was Ai Chen, Ai Chen's bright eyes fell on Wang Yi's face, and then he moved away.

As today's host, Luo Feng smiled at this scene, then stood up and raised the wine glass in his hand.

"Everyone hasn't been together for a while, and today we are not drunk or go home."

The others also smiled and stood up and raised their cups.

"If you don't get drunk, you won't return."

"Oh, it's actually 'God Drunk'. Luo Feng is really generous today. It seems that he has made a lot of money when he was a great official in Xinjiang." Uka joked.

"God drunk", although it is the \*\*\*\* drunk in the virtual universe, it tastes exactly the same as in reality. But in reality, the gods are drunk, such a bottle costs 8000 yuan. In the virtual universe, a bottle only cost 8 Hunyuan units.

But in order to entertain these partners present, the sum is not a small number.

However, everyone present can easily take it out, but they are reluctant.

Everyone was sitting on a dark golden round table next to the artificial lake, sipping the intoxicating wine and chatting.

Being able to drink and chat with a group of old friends, Wang Yi also enjoyed such a time.

...

Seven days later, a few light-years away from the 05 continent fragments were cleared out of the void. On a huge meteorite on the edge, a 400-meter-diameter blue flying saucer-shaped spacecraft stopped here, and many cosmic warriors filed out. , Quickly lined up on the meteorite.

"Hurry up, line up and get ready to meet the adults."

Those world leader-level captains shouted to their subordinates.

Hula la, tens of thousands of people, quickly arranged neat square formations on a broad flat ground on the surface of the meteorite, which was very imposing at first glance.

Most people feel a little nervous.

In front of the military formation stood a sturdy man wearing a dark blue exquisite battle armor with blue scales on his face and hidden fangs at the corners of his mouth.

He is the original leader of this army "Peng Xing".

He is a pinnacle immortal army master, but because of mystery and talent, his combat power is almost comparable to Fenghou Immortal.

"I have led this army for five thousand years. I have been fighting for so long, and now it's time to leave." Peng Xing looked at the dense subordinates behind him, feeling a little bit in his heart.

Many familiar faces in memory are no longer there. Soldiers have changed shuttle after shuttle. In the battlefield outside the territory, the death rate is too high, and the elimination of the army is also very cruel.

Few people can retire alive with military service.

"Military owner, when will the new adult arrive?" An old subordinate who had been with Peng Xing for many years couldn't help but get close to him, and without using sound transmission to cover up, he asked directly.

"According to the previous communication, it should be soon." Peng Xing replied, looking at the arm guard screen. On the screen, the positions of allies and comrades within 1 billion kilometers can be displayed.

"I don't know what the strength and character of this adult is..." the senior master said worriedly.

If an unreliable immortal \*\*\*\* follows him, the casualties of the army may not be very large.

Peng Xing heard it too, but there is no way to do it. This is an order issued by the virtual space army system. If there is no special reason, he has to listen to the arrangement.

To be able to lead the army, at least he must have the strength of an immortal god, but he can't understand the specific situation of the opponent. Although he has contacted the opponent several times, he has not received much information.

The soldiers in the rear are also discussing with each other in private.

As time passed, while everyone was waiting, Peng Xing's eyes suddenly lit up.

"coming."

On the display of Peng Xing's army system, a new friendly reminder appeared, and he was flying over here quickly.

However, Peng Xing's detection equipment did not respond at all, showing nothing.

"It seems that this new detection instrument is better than mine, and the strength should not be worse than mine." Peng Xing moved in his heart.

The level of the detection instrument can also reflect the strength of the user from a certain aspect.

The more expensive the generally used detection equipment, the stronger the user's strength.

After all... ordinary people can't afford to buy those expensive detection instruments, and they don't even want to buy them.

Just like "Peng Xing", the detection instrument he used was only more than a thousand yuan unit, and it was considered very good in areas similar to Stranglethorn Vale.

"Listen well, your new commander is coming soon, everyone pay attention, don't talk indiscriminately." Peng Xing's voice spread throughout the army, and all the world masters, domain masters, and universe masters who heard it all had expressions. Awe-inspiring, raised his head and chest, looked at the starry sky, with a glimmer of expectation in his eyes.

I don't know what kind of person the new army master will be?

A little bit of time passed, as everyone waited patiently, a stream of light appeared in the distant starry sky, and then flew over here quickly.

"Come!" The immortal \*\*\*\* Peng Xing's eyes flashed.

"Come!" The tens of thousands of soldiers in the army also saw the spacecraft flying over, all concentrated, watching the black flying saucer-shaped spacecraft fly onto the meteorite and land in front of them.

Click! The door of the spacecraft opened automatically, and a figure of normal human shape that was not too tall came out in one step.

"this..."

"This is..."

The immortal \*\*\*\* "Peng Xing" who was about to meet him stopped, his eyes widened suddenly.

The other army soldiers who waited with bated breath also stared in shock.

Coming out of the spaceship was a long-haired man wearing a beautiful dark red armor, stepping on dark red boots, carrying two cyan primitive war knives, and wearing a black mask.

But the breath radiating from him is so powerful that it makes the heart tremble.

"Such a powerful breath coercion, Fenghou immortality... is definitely a Fenghou immortality." Peng Xing was a little bit unbelievable, "Also, depending on the strength of the breath, it is stronger than the high immortality of Fenghou I've seen before. It should be the pinnacle seal. Hou!"

"A pinnacle entrusted him to apply for commanding an army? This, this..."

Peng Xing couldn't believe it.

Because the detection equipment was previously blocked by the opponent, Peng Xing could not detect the opponent's strength, and could only discover the existence of this teammate through the military system.

No wonder Peng Xing was so shocked.

In the battlefield outside the territory, the leaders of the army are almost all ordinary immortal gods, such as primary immortal army masters, high immortal army masters, and peak immortal army masters.

Immortal like Fenghou?

They are powerful and have "immortality". It is easy to earn military merit. There is no need to specifically command an army, which is very troublesome.

They almost all exist as squads or lone rangers.

So when a strong man who was suspected of being "Feng Hou Pinnacle" suddenly appeared in front of him to lead his army, Peng Xing hesitated decisively.

"Could it be the person who confessed to the wrong person?"

"Maybe this strong man passed by?"

The tens of thousands of troops in the rear also shook.

"Fenghou is immortal!"

"Our new army master is actually the immortal prince?"

These soldiers were excited.

This is related to their vital interests. The stronger the army leader, the higher the chance of survival in the battlefield outside the territory, and the easier it is to gain military merit.

Seeing the sturdy young man walking in front of him, Peng Xing did not dare to be careless, greeted him, and asked hesitantly: "But the 'Black Face' Lord?"

Black face is what Wang Yi used to call Peng Xing on the phone before.

"It's me, you're Peng Xing, right?" Wang Yi glanced at the immortal god, and from his faint breath, he could see that he was injured, and he was still not light.

No wonder. He secretly said.

"Lord Blackface." Peng Xing was overjoyed, and his attitude was much respectful.

The opponent is the immortal \*\*\*\* of Fenghou, regardless of strength or status, it is higher than him.

Although it is not clear why a Fenghou Immortal came to lead an army, relying on this strong man, his original army will not be easily destroyed in the battlefield outside the territory, and Peng Xing has always worried about it and feels a lot more relaxed.

Respectfully led Wang Yi to the neatly arranged army.

"Hurry up and see your new army master?" Peng Xing shouted.

Wow! In the dense army formation, tens of thousands of soldiers knelt down and shouted respectfully in unison: "See the master of the army!"

"Yeah." Wang Yi nodded slightly with his hands on his back.

Peng Xing smiled next to him: "Blackfaced Lord, this is the No. 026-39217 Army. I have always been in charge. However, because I was injured in an extraterritorial battlefield not long ago, I couldn't continue to lead them, so I could only give it to others. , I hope you can treat these soldiers well."

"The 026-39217 Army Corps currently has 325 people at the realm master level, 3869 people at the domain master level, and 25,271 space fighters. Their detailed information has been sent to you, the lord, you can command them through the military system, or you can Arrange for subordinates to coordinate and command operations." Peng Xing smiled, "But according to my experience, military operations, my lord, you only need to deal with alien enemies and immortal gods most of the time. Those ordinary alien troops can be handed over to subordinates. Distracted."

Wang Yi looked at the imposing army in front of him and nodded gently.

But muttering in my heart, let them fight? I am afraid that the army casualties required by the task of the panel will be difficult to control.

For 100 military battles, the overall casualties must not be higher than 10% to get the highest reward.

At least it must be less than 30% in order to be rewarded. If it exceeds, the task is equal to failure.

Wang Yi has already known in advance that the overall mortality rate of an ordinary space army is usually above 80-90% in 100 battles based on the mortality rate on the battlefield outside the territory.

If Wang Yi left it alone, the task would definitely fail.

"Don't worry, I will take good care of them, and will not let them get killed or injured easily. UU Reading [www.uukanshu.com](http://www.uukanshu.com)" Wang Yi said in a meaningful way.

"Thank you very much, my lord, then." Peng Xing did not hear what Wang Yi said, and thought he was very happy to meet a strong man who was considerate of his subordinates.

And those cosmic warriors are also very happy and excited.

A powerful immortal prince became their commander?

With such a powerful military master, their chances of survival and military merits will be even higher in the battlefield outside the territory.

Therefore, the morale was high for a while, and I could not wait to immediately follow the new army master to fight on the battlefield.

But I don't know that they have been classified as a "protected group" by Wang Yi.

Want to fight desperately on the battlefield? That also depends on Wang Yitong's disagreement.

[Chapter 314: Zerg brood show off](#)

In the vast starry sky, an E9-class black flying saucer-shaped spacecraft is flying at an astonishing speed. This 500-meter-diameter spacecraft is divided into five layers of cabins. The nearly 30,000 space fighters received by Wang Yigang are there. Staying in the cabin, excitedly discussing where to fight next.

While Wang Yi looked at the starry sky map, the spacecraft was rapidly approaching the 05 Continental Fragment.

Seven days later, the spacecraft officially entered land No. 05, and Wang Yi's detection equipment had been investigating.

"Within 1 billion kilometers, except for the two teams on our human side, there are 6 other alien teams in total." Wang Yi squinted his eyes.

The so-called team may be a small team or a legion.

However, what the panel mission requires is "legal combat."

Therefore, those alien races that acted in squad mode were first eliminated by Yang Wangyi.

"Bermuda, shield all those alien teams, leaving only the Legion." Wang Yi said.

"beer!"

The red light spots scattered on the vast land were instantly reduced by half.

"There are three foreign legions." There was a hint of excitement in Wang Yi's eyes.

"A recent goal."

"It's 69 million kilometers away? Really close." Wang Yi looked at the starry sky map with a smile.

"That's it, let's go over."

The spacecraft slightly changed its flight angle and flew away at a speed of 250,000 kilometers per second in the other direction of the landing site.

Wang Yi put his arms around his chest and looked at the screen projection, with a weird smile on his face.

"The land with a diameter of only 1.3 trillion kilometers actually squeezed tens of thousands of teams."

It is important to know that the maximum detection distance of detection instruments is generally 100 million kilometers, then 300 million kilometers, and 1 billion kilometers.

The 1.3 trillion kilometers seems to be far away, but there are many teams at the same time, and it takes only more than a month to travel from one end to the other.

Legions of countless strong men from all sides are fighting on the battlefield outside the territory.

A black streamer flew across the sky.

The distance keeps shrinking.

The target Wang Yi chose did not move, but was lurking in a cave in a mountain range. Therefore, it took only half a minute for Wang Yi's spacecraft to fly to the vicinity of the alien army, a place of 100,000 kilometers.

Because of the shielding of the detection equipment, the alien army did not find a human spacecraft approaching.

The other human allies on land 05 were discovered through the military system map. Some of their communications to Wang Yi were ignored by Wang Yi.

"Master, the enemy's detector was found. The enemy was in a cave deep in that mountain range." Bermuda Report reported, "The range of the enemy's detector is 100 million kilometers, but their detector is lower than ours. ."

"Lower-end than us?" Wang Yi smiled.

This is too normal, if it is higher than Wang Yi's high-end, then it is the hell.

After all, the detection equipment used by Wang Yi came from the hands of Venerable Guiyi, and its value was almost over one trillion.

It's so cool, this feeling of suppressing the opponent in detection is really cool, because the height of the detector determines... the battle is under my control.

Subsequently, Bermuda transmitted the enemy's picture.

Wang Yi looked up slightly. A projection screen appeared in the middle of the control room, and a video appeared on the screen. It was a vast cave that was artificially excavated. There was a palace in the cave, and there was a camp next to the palace. Conversation scene with strong aliens.

Sitting on an alloy chair, he has gray skin and is only three meters tall. He has a human body and a cow-like head.

Opposite him there is an alloy chair sitting on a woman with a human body and a bird head covered with gorgeous feathers.

At first glance, the two of them looked like alloy castings, a bit like the "silver guard" used back then, not like real life at all.

There are two strong aliens altogether.

"Huh?" Wang Yi narrowed his eyes when he saw the two powerful aliens in the picture.

"Human body, animal head, puppet body? Is this a monster?"

Yes, the human body bull head and human body bird head, these two bodies are puppet bodies, a bit similar to mechanical puppets.

There are major categories of life in the universe, which can be divided into flesh and blood life, metal life, intelligent life, energy life, plant life, rock life... Big difference.

Like rock-like life, some ethnic groups look like rocks, some are like a big mountain, some are like boulders, and some have no traces of rocks on the surface. These flesh and blood monsters are the same, but the internal composition of the body is different.

However, the two immortal gods of the Yaozu were too large to ride on a spaceship, so they could only hide in the "world ring".

They let the puppets carry the world ring on a spaceship, and they can rush out of the world ring at any time in the event of danger.

As for this "puppet body", it is a very popular kind of puppet body that can be manipulated through consciousness. It is made of alloy and is a receiver of connotation consciousness.

If you separate a trace of consciousness on the puppet's body, you can control the puppet's body.

The world ring they really hide has been refined and can be rushed out at any time.

"Yaozu? If you are unlucky, let's take you for the operation first." Wang Yi's eyes were full of murderousness.

As one of the pinnacle races, the human race is adjacent to the three pinnacle races of the monster race, the machine race, and the zerg race. After countless years of war, the hatred has already reached the point where it cannot be reconciled.

For the foreign race, Wang Yi would not have a hint of pity when it was time to do it.

The other party was just two ordinary immortals, not even the prince of immortality, Wang Yi didn't bother to spend other thoughts.

He already has a plan for how to complete the military tasks posted on this panel.

"Bermuda, bring the distance closer." Wang Yi looked at the two strong monsters on the screen who were chatting without knowing that the danger was coming, and smiled: "I will give them a big gift."

The spacecraft flew quietly to a place thousands of kilometers away from the mountain cave, suspended in the air.

Then the spacecraft disappeared and was included in the "One World" of the World Ring by Wang Yi.

Including the 30,000 cosmic warriors, they did not resist because of Wang Yi's order, and they were successfully included in the world ring by the power of the world.

It's just that they are very puzzled.

But of course Wang Yi would not bother.

This army can fight by himself. As for the army under his command? It's better to hide behind and watch.

As for their military merits? Of course, they would not have military merits if they didn't join the battle personally. Wang Yi would definitely make some remedies afterwards, and it would certainly be better than they had to fight with others from birth to death again and again.

Wearing dark red armor, dark red boots, and a black mask, Wang Yi stood in the air with long hair moving in the wind.

"Sasha."

"Master." A three-kilometer-high Zerg mother nest appeared aside, and the mother emperor's soft and melodious voice sounded.

Wang Yi smiled and said, "Sa Sha, as I ordered before, give my guests a meeting that will never be remembered."

"Yes, Master." Elizabeth, the mother of the Zerg clan, also had a hint of excitement in her voice.

This is the first time she has fought in the outside world, deliberately acting actively in front of her master.

"Wow!"

Millions of Zerg warriors appeared in the air. After so many years of careful cultivation, the top Zerg warriors created by the Zerg brood have exceeded two million.

One million of them are tiger beetles.

And the other one million is the Front Shadow Zerg.

I saw that there were countless dense zergs around the Zerg brood, each tiger beetle was about 30 meters high, with a thick carapace all over the body, and a dark red hideous body, exuding a palpitating breath. There are a million tiger beetle tribes densely packed, all of which are exactly the same.

On the other side, there are the same number of overwhelmingly overwhelming front shadow Zerg. Compared with the tiger beetle, it looks thinner and is about 24 meters high. The carapace is not fiery red, but dark gray, ready to go, the same. Exudes sturdy and fierce momentum.

There are a total of two million Zerg warriors of the pinnacle realm, divided into two camps, the mighty, densely packed countless Zergs surround the central Zerg brood, and the distance between each Zerg is either 100 meters or tens of meters, forming Two huge balls.

And Wang Yi's miniature detector can shield the space where the two huge spheres are located, which is enough for the 2 million Zerg warriors to form a formation.

"The shielding of the most high-end detection equipment, coupled with the devastating and terrifying attack by the Zerg army..." Wang Yi stood beside the Zerg brood, watching this scene, and sighed softly.

With the combination of these two alone, Wang Yi was able to hunt down many powerful immortals in Yanji Continent.

"Attack." Wang Yi ordered with a smile.

"Yes, master."

The Zerg mother emperor answered without hesitation.

"First formation, attack!"

Hum——

The millions of tiger beetle tribes all stretched out their claws, and the dazzling beam of light shot out from the claws. These million master warriors seemed to have a heart, but in fact they were indeed distracted by the Zerg mother emperor "Elizabeth". Versatile, at the same time controlling millions of tiger beetle clan, although it is impossible to make an attack that contains laws, but a precise attack can still be done.

boom! boom! boom! boom! boom! boom! boom! boom! boom! boom.....

In almost an instant, the million tiger beetle tribes with perfect angles all released their accumulated energy attacks, countless beams of light shot out, condensed into a dazzling light in the distance, and then instantly bombarded the distant high mountain range. , Under this terrible energy attack, the mountain range also melted directly...

"Boom!!!" The sound of huge energy bombardment came in a low voice.

"The second formation, attack!"

After completing the first collective attack, Elizabeth immediately gave up the control of the first camp and immediately manipulated the 1 million front shadow zergs of the second camp. Numerous beams of light flew out again, converging into a huge, devastating beam of light, and bombarded the mountain range again. In terms of location, it will be completely destroyed there.

The difference between the two formations, front and back attacks, is only 0.1 second.

Where the Zerg Legion's combined attacks explode is entirely up to the control of the Zerg Mother Emperor.

Because when the million energy beams gather, ten or ten beams begin to accumulate and compress, one hundred beams are compressed into ten beams, and then the compressed ten and ten beams gather... the further the geometric growth rate becomes more exaggerated, Finally compressed to the extreme!

The distance, angle, and sequence of the release attack will affect this compression. Only when compressed to the extreme will a big bang be formed!

As long as the Zerg mother is willing, the Zerg can explode hundreds of thousands of kilometers away or millions of kilometers away.

...

The two immortal monster races who were in the cave deep in the mountain were still talking, their expressions suddenly changed.

"Enemy attack!"

When the Zerg army is not attacked, it is shielded by the detection equipment, and naturally it will not be detected. Once it attacks, the huge energy fluctuations are immediately detected by the detection equipment.

But it was too late.

The place Wang Yi chose to attack was less than 10,000 kilometers away from the Yaozu legion. At this distance, the attack arrived in an instant.

boom!

An extremely terrifying attack instantly tore through layers of rocks, and directly bombarded the immortal palaces of the two monster races with incomparable precision. This palace was also made of E9 metal, but under the attack of this devastating energy, it was penetrated in an instant, and then there was an earth-shattering explosion.

"Boom..."

The inner space of the mountains shattered like soap bubbles, and the violent explosions surged in all directions. The millions of kilometers around were bombarded directly torn apart large holes in the universe, exposing endless space interlayers.

All the demon army was submerged in the impact of the explosion, torn to pieces and annihilated.

Subsequently, the second beam of light followed almost in no particular order.

A terrible explosion occurred again, the power was earth-shattering, and the space was torn apart more, the space interlayer was also involved in the big explosion, fragments were flying, and the area near the core of the explosion was shaken into a stream of particles.

"Boom..."

A terrifying scene appeared, the world changed color, the big explosion turned the entire mountain range into nothingness, and a huge crater with a depth of 100,000 kilometers appeared in the surrounding endless land.

Caught off guard, first the puppet of the human body and the world ring were destroyed, and the exposed real body of the monster race was also completely shattered and ceased to exist.

The immortality of the two monster races, including their armies, was directly wiped out under the terrifying joint attack of the Zerg Legion, and none of them were spared.

Ordinary millions of realm master fighters can severely injure the pinnacle of the king in one combined attack. Of course, the premise is that they can be bombarded. Those strong kings are not fools, and all of them have strong dodge and escape capabilities... so the general threat effect of the millions of realm masters Well, the army has a good effect during the battle. The real one million realm masters battle against a king, it is all about threats.

A combined attack, as long as it hits, Fengwang Pinnacle will be seriously injured, let alone ordinary immortal gods.

After the attack was completed, Wang Yi immediately retracted the Zerg brood, and the whole person teleported away from the explosion range for an instant, so although the range of the intense energy impact was large this time, it did not affect him in the slightest~www.mtlnovel.com~ Mid-Air In the

middle, he looked at the rising air wave and the fast disappearing and healing space gully in the distance, and whispered: "It's really beautiful fireworks."

Because of the simultaneous transmission of the virtual universe in this battle, Wang Yi also gained a lot of military exploits by killing two immortal aliens and a large number of alien armies.

But Wang Yi didn't care too much, but instead focused on the panel.

The above task progress shows that there have been new changes.

[Kill ordinary immortal gods: 9100000]

[Number of successful military operations: 1100]

At the same time, the terrible energy fluctuations and big movements that appeared here were also detected by some nearby alien teams on land No. 05 at the same time.

### [Chapter 315: Mop up](#)

The land of Yanji Dalu 05 depicted on the sky map.

These land fragments, like many human beings fighting in the Yanji Continent and countless alien races, have passed through countless years, and they have long had some default titles. The main land is naturally a land, and these land fragments are called 'islands'.

For example, the mainland fragment No. 09 is called "Frost Island", and the land No. 05 is called "Mengchen Island."

The strong in the main continent are like clouds, and there are many immortal gods at the rank of prince, and there are even immortal gods of prince.

Many immortal gods who believe that they are not strong enough roam on the islands. Mengchen Island belongs to the larger island. There are many powerful aliens, but the immortal gods are almost all of the immortal army master level.

Of course there are also immortal gods, but Wang Yi didn't find it when he came here. After all, Mengchen Island said it was not big, and it was not too small to say it was small.

Mengchen Island, most of the area is covered with yellow gravel, when the wind blows, the sky is full of wind and sand, covering the sky, so it is called Mengchen Island.

In one of the caves tens of thousands of kilometers deep in the desolate desert, there is a palace standing, and an alien team is resting.

Petite, with black and white soft hair, big watery eyes, and two crystal dragon horns on his forehead, a cute life like a kitty sits on the first seat and licks two paws with a pink tongue from time to time.

It is an immortal god, and it is also the "Chi An Clan". This clan is also quite famous in the universe. It looks cute on the outside, but it is actually very scary.

In addition to the immortal gods of the "Red Annihilation", there are three other immortal immortals next to them, as well as nearly a hundred world masters.

"Haha, this time fighting on Mengchen Island for more than three hundred years, the harvest is good."

"After saving for so long, I can use my military merits to exchange for the mechanical weapon I want when I go back this time."

"Captain, when shall we go back?"

The "Red Dark" creature lying lazily on the black throne covered with unknown fur raised its eyelids and said lazily: "No hurry, we will continue to fight on Mengchen Island. After another 100 years, we will go back. ."

"We have to wait a hundred years..." Some strong aliens wanted to complain, but they didn't dare.

After all, he knew that although the captain of the Crimson Clan looked cute, he was actually grumpy, so he had better not arbitrarily contradict his decision.

"Woo!"

At this moment, the Chi An clan who was lying lazily on the throne meowed, his limbs stood up from the throne, his hair was erected, and a pair of cat eyes showed a strong shock.

"The detection instrument, which has just detected 370 million kilometers to the north, has a powerful explosive response."

"Strength, reach the peak of the king?"

The shock in Chi An's eyes could no longer be concealed.

You know, this is just a piece of land on the periphery of the main continent, and there are very few immortals, and there are only a handful of them, absolute overlord-level figures.

Feng Wang peak?

It is almost invincible.

Of course, this is only the energy fluctuation detected. Maybe the opponent is using a mechanical weapon, a Zerg warrior legion, or other treasures, and the method is not strong in itself... but it is not something that this alien team can provoke.

"We are 370 million kilometers away from the explosion place? It's too close!" The Crimson Clan immortal had a spirit.

"team leader."

"What's wrong with you, what happened?"

Other immortal aliens were also taken aback by the captain's reaction.

The Immortal Clan glared at them and let out a low growl. "Don't ask so much, get out of here now!"

This alien team fled in a panic by the explosion that Wang Yi made.

And at the same time escaping from this area, there are also several other alien teams that have detected this energy fluctuation.

And where the explosion was, Wang Yi was rushing to the interlayer of space, looking for the two immortal treasures of the fallen alien race.

As for the items of the alien army? Almost all were wiped out under the power of the big bang just now, and Wang Yi didn't bother to pay attention to these worthless items.

"found it."

The two monster races were immortal, and under the joint attack of the Zerg army just now, the divine body was annihilated and fallen, and even the armor was broken, but their world ring remained.

After all, the world ring is very important as a storage place, so the material used to make it is very strong and can withstand the attacks of the king. But such a small world ring requires very few materials, and ordinary immortal gods can easily afford it. .

Therefore, Wang Yi easily found the two world rings near the space mezzanine.

"call out!"

Wang Yi flew out of it, and the power of the world easily broke the mark left by the original owner and penetrated into the world ring.

"Oh, it's not bad. The treasures in the two rings together can be worth 30,000 or 40,000 yuan." After a while, Wang Yi smashed his mouth.

This wealth is of course not worth mentioning to Wang Yi, but how long did it take to look at it?

The stronger you are, the faster you can accumulate wealth.

"The military merits of the virtual space army system are judged to be... an immortal military master, 100 million military merits, an immortal military master high, 1 billion military merits, and other alien armies, which add up to 200 million military merits."

100 million military merits can be exchanged for 1,000 mixed yuan units, or equivalent virtual universe company points.

Wang Yi was all smiles.

Loot.

Military merit.

Panel task progress.

Three-pronged approach.

One word, incense!

"Mengchen Island, but there are a lot of alien races, next time, just kill those alien teams that you encounter, anyway, the energy consumed by the Zerg Legion is not one-time, and can be quickly replenished."

If it is some treasures, or mechanical weapons, of course the energy issue needs to be considered.

But the Zerg Legion itself is composed of Zerg warriors, and it can restore energy by itself.

With a collective energy attack like just now, the Zerg Brood can perform ten times eight times at a time without panting.

"Detection equipment shields the whereabouts, hides in the past, and then uses the Zerg army to make a fatal blow!" Wang Yi's face was bright with a smile.

Although the Zerg Legion is powerful, it is still not his own trump card, so Wang Yi doesn't mind using it wildly when hunting.

convenient!

Fast!

Efficient!

This is the correct way to use the Zerg Legion.

Wang Yi gently praised himself.

Of course, the premise is that he has high-end detection equipment, otherwise he will be discovered by the other party far away, and the other party is prepared. When you see you summon the Zerg brood, there is no chance of sneak attack.

Therefore, to use this routine, high-end detection equipment and Zerg brood are indispensable.

In fact, the enslaved Zerg brood is still very rare in the universe.

On the contrary, there are many strong people enslaved by the Zerg mother emperor.

After all, the number of Zerg broods is too small, "Hu Yanfu" was lucky at the beginning, and was proficient in soul secrets, only to get a realm master-class Zerg brood.

In fact, there are too few master-class Zerg broods that have come to the battlefield outside the territory.

Wang Yi didn't care about revealing that he had a Zerg brood. Anyway, he was pretending to be a human being immortal. Although it is rare to have a Zerg brood, it is not a fuss.

Moreover, the Zerg Brood is not the top combat power in him.

"Let me see where the nearest alien team is...huh? Why did everyone run away?"

Through the detection equipment, Wang Yi could see that with him as the center, all alien races within a billion kilometers, including human teams, were moving quickly to the periphery.

They all seemed to be avoiding some terrible things. Although they couldn't detect Wang Yi, they were all frightened by the energy explosion.

The human team didn't know that it was made by its own side, and when it was detected, it would of course run with it for insurance.

Moreover, all parties communicated through the military, and the news spread rapidly. Some people who received notification from their allies might also stay away from this dangerous place for their own safety.

Wang Yi understood immediately when he thought about it.

"run?"

Wang Yi showed a trace of hideousness.

"Did you run away?"

"From today, this pig farm will belong to me."

Wang Yihu entered the pig herd.

...

In the following time, Wang Yi frantically carried out hunting and raids on the "Mengchen Island."

Relying on the detection equipment to shield the detection signal, he sneaked to the side of the alien team without knowing it, and then released the "Zerg Legion" to directly join forces!

The terrible nakedness of the Zerg Legion appeared.

A combination of energy strikes, the beam of light penetrates everything, destroying the world.

Basically, with one shot, most immortal gods will fall, and there is no doubt that the immortal gods below will die.

It was a fluke to survive, the divine body was also severely damaged, and there was no one in ten strengths. Faced with Wang Yi's astonishing abnormality with the fast speed of the body, there was no possibility of survival.

The beam of light shines.

Death is coming.

Teams and legions of foreign races were harvested violently like grass and mustards.

With the mass destruction of the alien team, news about Wang Yi spread throughout the "Dust Island."

All alien races know that a terrifying human powerhouse has newly arrived on "Mengchen Island".

With a combined attack on the Zerg brood and extremely high-end detection equipment that can damage the peak of the king, no one can find his existence. When the Zerg army's combined attack appears, everything is too late and there is no escape.

The alien team on "Mengchen Island" began to panic.

In just one month, hundreds of alien teams, including legions, were in the hands of this human powerhouse.

Many aliens who felt that the "Mengchen Island" was no longer safe began to leave here one after another.

Of course, there are also those who don't believe in evil or are confident in their own strength, and feel that the human powerhouse with the Zerg brood can't deal with them.

The sky is full of wind and sand, and there is an alien military camp in an artificially excavated cave underground in a desolate desert.

There is a strange alien spaceship in the central area of the barracks.

"My lord, this time we have gained a lot of military merits. If we continue at this rate, the adults will be able to gather enough military merits within a hundred years. When you go back, you will be directly absorbed into the 'Clan Elders' Association'!"

It looks like a tree, with vines hanging down his head, and his body is wearing emerald green armor. The tallest Nino, about 12 meters tall, smiled happily.

"Yes, although there are many troops and generals sent to the battlefield outside the territory of our clan, how many can survive on the battlefield outside the territory? Not to mention the sturdy warfare like an adult. After returning to the clan, the senior leaders in the clan will definitely treat the adults. Even more importantly, the day has come for the adults to stand up."

A smile appeared on the stiff face of the Nino tribe who was sitting at the head. "I, Kanlf, accidentally committed a serious crime and was targeted by an opponent, so I had to come to this foreign battlefield. After so many years of fighting, I can have today. I can't do without your help. After returning, with this military exploit, we must Being able to gain a firm foothold in the clan will make those who looked down upon us regret."

"My lord is right. We must go back gracefully and make those \*\*\*\* regret it."

Just when these aliens are happy to talk about the bright future after returning.

Tens of thousands of kilometers away, a figure quietly emerged, revealing the figure of a black-haired boy in a dark red armor.

Under the dark and cold black mask, there are a pair of eyes without temperature.

Looking at the desert in the distance, it is as if you can see the underground caves through the sand.

"Nino... this is from the Zerg camp." A smile appeared on Wang Yi's face. "But you have no chance to go back, so stay here forever."

Wow!

A huge Zerg brood appeared next to Wang Yi.

Subsequently, a large number of Zerg legions were released by the Zerg mother emperor.

The Zerg Legion is actually staying in the inner world of the Zerg Mother Emperor. Once it needs to fight, it can be released at any time.

Two million Zerg warriors, each of which is the pinnacle of the landlord. The hideous-looking tiger beetle Zergs and the front shadow Zergs, under the command of the Zerg mother emperor, quickly arrange formations like the most sophisticated machines, forming two huge \*\*\*\* with claws. The huge energy began to condense one by one.

"Master." Elizabeth's soft voice sounded.

"Let's get started." Wang Yi stood beside the Zerg brood with his hands on his back, looking into the desert that was about to usher in a devastating blow in the distance, with a glimmer of cold light streaming down his eyes.

"First formation, offense!"

The Zerg mother emperor immediately gave the order.

In the dense and overwhelming core of the entire Million Zerg Legion, the Zerg Brood separates millions of consciousnesses and controls all the Zerg warriors at the same time. At this time, it is natural that the millions of Zerg warriors are completely united.

I saw a huge energy ball appeared on the claws of every Zerg warrior, an energy ball, and the immortal powerhouse did not even despise it.

But if millions of them gather, even if Feng Wang Dianfeng is hit, he may fall.

A combined attack by a million masters of the Zerg race... that was already terrifying to the extreme.

"Shoo!" "Shoo!" "Shoo!" "Shoo!" "Shoo!" "Shoo!"...

The endless ball of light flew out of the sky instantly, as if countless bolide stars across the sky, all began to converge gradually as they flew.

After flying 10,000 kilometers, it directly converged into a palpitating rainbow light, and the universe was extremely fragile in front of this rainbow light, and it continued to crumble and shatter.

The beam of light disappeared in the desert in the next instant.

And the second beam of light, with an interval of 0.1 seconds, also fell afterwards.

The sudden silence seemed to have passed for a long time, but in fact it was only a momentary matter.

"Boom..."

A powerful explosion appeared in a barren desert. The surrounding space exploded directly, tearing apart huge gullies. Numerous space debris formed a torrent, and the powerful shock wave spread out in all directions, radiating millions of kilometers.

When encountering an attack by the beam of light from the Zerg Legion, the leader of the Nino tribe actually noticed it immediately.

But when it found out, it was too late.

He can only have time to collect his subordinates into the world ring. As for the other troops in the barracks? He can't care about ~www.mtlnovel.com~ Boom! "The dazzling rainbow light that made the immortal gods feel palpitation, directly bombarded the strange creature spaceship.

In the next moment, the outer shell of the spacecraft that had reached class f was directly torn and shattered under the shock of terrible energy, and it melted directly like Shirayuki met a blazing flame.

The core compartment of the Nino clan's immortal craftsmanship is made of f9 metal. This sturdy core compartment forcibly carried the energy shock down, but cracks also appeared.

"boom....."

Most of the energy shock was blocked by the cabin, but a part of it directly hit the Nino Clan Immortal.

"Peng!"

The immortal divine body of the Nino tribe was unsurprisingly shattered.

#### [Chapter 316: "Mushi Hou"](#)

When the first beam of light exploded, the second beam of light fell on the origin almost indiscriminately and exploded.

With the precise control ability of the Zerg Mother Emperor, it is completely possible to perfectly control the energy beam to explode in the same place.

"Boom..."

As if thousands of stars ushered in the end at the same time in an instant, two clusters of incomparably brilliant and hot white rays were born instantly. The clusters of light condensed by these two clusters of countless rays possess terrifying energy.

The large tracts of space are instantly transformed into the most basic particle flow by this energy impact, and the countless space debris in the space interlayer is also directly annihilated into a particle flow.

The tens of thousands of alien armies of the Nino tribe instantly vanished in the endless light that ruined the world.

Although the spacecraft of the immortal leader of the Nino tribe is not a full-body f-class, the outermost shell is made of f-class metal materials, and the central compartment is made of f9-class metal, which can withstand the attacks of the king.

But under this devastating energy explosion, the entire spacecraft was torn apart, a strong impact hit the central cabin, and cracks began to occur.

The extremely powerful impact force was mostly resisted by the cabin, but the remaining part still spread inside.

"Peng!"

The immortality of the Nino tribe was in a frightened expression, and the divine body suddenly exploded.

Cohesion again.

Then burst open again.

After several consecutive times, the immortal Nino tribe was horrified to find that his divine body was weakened to the extreme.

Another powerful shock wave rushed in. Although it was far worse than when it first broke out, the immortal divine body of the Nino tribe was not as intact as it was at the beginning, because the divine body was severely damaged and its strength was greatly weakened.

"Do not....."

"Peng!"

His divine body shattered again, this time, it did not condense.

...

In the distance, Wang Yi, who had moved into the sky several million kilometers away, watched the dazzling white light rising on the desert. The invisible shock wave spread in all directions, flying everything away, and the huge roar shook the world.

Even if he was here, he could clearly feel the terrible vibration.

In the detection instrument, the original breath of life disappeared.

Wang Yi looked at the military merit tips from the military system, his face was plain, and his figure swiftly pierced the air toward the explosion.

"There are fish that slip through the net..."

There were three immortal alien races detected by the military system just now, but the military merits awarded did not meet Wang Yi's expectations. Wang Yi knew that there must be other alien races still alive.

The aftermath of the heavens and the earth was still shaking, and in the deep gully that had not been healed by the explosion, space debris entrained a storm surging, and a black ring was rolled into the distance, and several cracks were exposed on the ring.

"boom!"

The ring exploded, and two figures appeared, their faces full of panic. It was the other two immortals that were taken into the world ring by the "Nino tribe" army leader.

If it weren't for the protection of the leader of the Nino clan, the world ring would be strong, but it would shatter if it couldn't bear the first wave, and everyone would have to die in the explosion.

"The general's divine power item has no aura fluctuations."

"The general has fallen."

"escape!"

The shocked two immortals glanced at each other, turned around and fled without hesitation.

In fact, it was not only the two of them who were taken into the world ring, and some of the world masters, who were just getting in the way, were taken into another world ring by them.

At this moment, they saw a streamer flying over quickly.

At the same time, there was a strong breath coming over.

"Fenghou is immortal!"

"It's the human powerhouse with the Zerg Legion!"

The immortality of the two Nino tribes immediately understood everything, and their faces were frightened and frightened.

"brush!"

Wang Yi, in a dark red armor, swept down like a hunting falcon, with murderous intent, and the target of his prey was two immortal gods.

His eyes swept away.

"Two immortal warlords, die!"

A red streamer flashed away.

Wang Yi's speed has risen to an incredible level.

Using the spatial body method, the speed can be even faster.

However, the void shuttle method is not always available.

For example, if the opponent uses space to block or disrupt time and space, this move will be restricted.

For example, in some places where energy fluctuates sharply, the effect will also be greatly reduced.

For example, in the frantic flow of space mezzanine, it is just as difficult to use.

Like a ghost, Wang Yi quickly approached the two immortal gods who were running away.

Swish, swish, two cosmic magic soldiers appeared, and while the diamonds were flying, they condensed into a perfect seventh form in an instant.

It is very easy for the current Wang Yi to control two cosmic weapons at the same time and use the seventh stage.

An incomparably beautiful crystal flying through the air with mysterious patterns all over the body.

"Flee separately!" Faced with a human being who possessed a Zerg brood, the two Immortal Ninos had no courage to fight at all, and they just made this decision.

suddenly--

"Shoo!" "Shoo!"

Two crystal shuttles flew abruptly, the origin of time and space were moved, and even formed into a unity with the universe. Shuttle through the space, there are countless time and space lights and shadows floating around, instantly appearing in two immortal gods at the same time. Behind.

The two immortal gods felt that the space around them seemed to be stagnant at the same time, as if they had fallen into the mud, making it difficult to move.

"what!"

The two alien immortals knew that they were at the critical moment of life and death, and the light in their eyes suddenly flourished. One of the Nino immortals flew out of a large number of small green swords, densely scattered all around, the sword spirit lingered, forming an airtight defense. And another immortal Nino roared, thick vines sprang out from the tree-like body, and purple silk threads appeared on the vines, and the sky was thunderous, connecting the universe's origin time law in series, like thousands of thousands. Strangling to the cosmic warrior like a giant python.

"boom!"

"boom!"

Their attack or defense simultaneously collided with the cosmic soldiers.

Time and space hit, the earth moved and the mountains shook.

Countless sword qi collapsed, the sword qi world controlled by the Nino tribe was cut open by the cosmic warriors, a stream of light flashed, and the body of a Nino tribe was cut open, and the surging power exploded, and his body followed broken.

And the immortality of another Nino who used vines to strangle was not much better. All the smashed vines were pierced by the cosmic magic soldiers whose strength was condensed to the extreme, just like paper, unstoppable, and instantly penetrated the incredible face. The body of the immortal god.

"Peng!"

"Peng!"

The two immortal bodies exploded at the same time and condensed at the same time.

His face was full of horror.

They tried all kinds of methods, but they couldn't resist the terrifying and terrifying cosmic magic weapon that appeared and appeared, powerful, and capable of shredding even space.

After a short period of time, two immortal Nino tribes were killed.

"Wow."

"Wow."

The two streamers flew back to Wang Yi's side and were put away by him.

Wang Yi thoughtfully said, "If I don't use the void shuttle method, this simple flying speed is still a bit slow, and it's best to use it with a flying mind weapon. It seems that it must be combined with time and space to create a flight that can match the Love Pipit Disk. Secret method."

Just as the "Universal Weapon" with the corresponding law perception and secret method can greatly increase the power, the "Love Pirate Disk" with the corresponding secret method can also do the same.

And the "Love Pipit Disk" is now the best flying weapon under Wang Yi's hand, only inferior to the "Sun Wings" used for the "Big Flame Star Beast" clone.

After destroying the enemy's immortality, Wang Yi began to search for the spoils, and quickly found several Nino immortal treasures.

First, scan the world rings and quickly break the original spiritual imprint.

"Well, one of the rings really has the remnants of the Nino tribe." Wang Yi's eyes were calm.

The soul attacked a sweep, and all the remaining alien world masters in the world on one side of the world ring fell.

Wang Yi's soul attack had little power against those immortal, but it was a sweeping massacre against these ordinary world masters.

After cleaning up and finishing off, Wang Yi got on the spacecraft and left the place.

"Bermuda, search for nearby enemies."

Wang Yi sat in the spacecraft control room, feeling a little bit.

Recently, there are fewer and fewer enemies on the dusty island, and the efficiency is getting lower and lower.

The alien races that ran across the land in the past seemed to have disappeared and became cautious.

Wang Yi knows why this is so.

"It seems that Yan sacrifices to the mainland is the most suitable for me."

Wang Yi sighed.

"And the fattest pigs have not been found yet."

Mengchen Island, Wang Yi's pigpen.

All foreign races on the island are pigs raised by him.

Can be slaughtered at any time.

And the fattest, those alien princes that Wang Yi cared a little about, hadn't encountered any of them in this period of time.

However, Wang Yi has only been on the island for a month, so it is normal that he has not met in such a short period of time.

Wang Yi was a little worried whether the aliens would receive the news and run away in advance.

In Mengchen Island, there are a total of 15 princes, all of whom are the overlords of the island.

On the human side, there are 2 members, the Zerg tribe has 6 members, the monster tribe has 5 members, and the mechanical tribe has 3 members.

Wang Yi will look at what he has gained during this time.

Needless to say, the treasures, Wang Yi kept sweeping the island this month, destroying hundreds of legions and squads, killing more than two hundred immortals, and his military merits have exceeded one hundred billion. The wealth of those immortal treasures adds up to counts. Ten million mixed yuan units.

What Wang Yi cares more about is the panel task.

[Kill ordinary immortal gods: 235100000]

[Number of successful military operations: 69100]

Except for the number of ordinary immortal kills reaching 235, the number of other princes and kings is 0.

"It's far from the minimum requirement of 100,000 for hunting missions."

Wang Yi sighed, but he was not in a hurry.

It's still a long time.

Because Wang Yi deliberately chose the legion to do his work during this period, the number of foreign legions eliminated has reached 69, and the team has exceeded 30.

However, his cosmic armies did not participate in the battle once. Only in the past one month, those cosmic warriors in the world ring were still at a loss, thinking where the military master was still flying, but didn't know that the battle had been carried out hundreds of times. .

Wang Yi does not intend to let these troops out, they will only drag their feet.

Let them stay in peace until the end of the army command mission.

...

Most of the alien teams hunted by Wang Yi were instantly annihilated by the Zerg Legion, and even the news was too late to spread, and very few who could escape two rounds of attacks were subsequently killed by Wang Yi's tail, without exception. All fall.

Although Wang Yi has eliminated hundreds of teams, these teams are dispersed into the three camps, but the number is not large, and there are even fewer people who can perceive that they are human beings.

Because there are few messages that can be sent out, and the three camps do not spread quickly between them, many alien races know that Mengchen Island has an additional terrible human being with a Zerg brood, but they don't know the specifics.

But with the passage of time, as Wang Yi continued to make moves, the news of Wang Yi's hunting and killing of teams of all ethnic groups on Mengchen Island must be concealed.

After all, although there are many immortal gods on Mengchen Island, hundreds of them have fallen in just one month, which is indeed too terrifying.

The main reason is that Wang Yi's methods are too scary. Even if other immortal vassals are strong, ordinary immortal gods have a chance to escape.

However, Wang Yi relied on high-end detection equipment and the Zerg brood, and every time he lurked over, he suddenly sniped and killed. Under the horrific blow of the Million Zerg Legion, few immortal gods were able to survive. This resulted in this amazing record.

In the eyes of many foreign powerhouses, the human Fenghou who just appeared on the island is more terrifying than the other 15 veteran overlords combined!

A human being with a zerg army and an immortal body, on a small dusty island, the degree of danger has surpassed that of other old fenghou overlords, which makes people feel disgusted.

"Damn humans, relying on the Zerg brood to bully us ordinary immortals."

"There are such high-end detection instruments."

"Too asshole."

Many foreign races who learned about it screamed.

This is really bullying.

A single world master class Zerg brood is worth at least a million yuan unit, and the secret method to control her is also very valuable. More importantly, it is difficult to obtain, and even if it is obtained, it is difficult to cultivate successfully.

Those who can control the Zerg brood are generally immortal kings.

How could that kind of super strong come here to specifically bully them, these ordinary immortals?

Those strong men are all active in the high-level combat areas of the Yanji Continent, and rarely appear in the border areas.

Many worrying teams have already planned to leave Mengchen Island and seek refuge in other places.

If other immortal immortals go to hunt and slaughter so unscrupulously, then the immortal gods of all parties will begin to unite, two or three teams will merge into one, four or five immortal gods will gather together ~[www.mtlnovel.com](http://www.mtlnovel.com)~ or six Seven immortal gods gather.

Many people are powerful! Even if you have the "immortal body" and be immortal, besieged by many immortal gods, you will also fall.

No matter how bad, you can protect yourself and have the opportunity to escape.

But you can't do this with Wang Yi. A group of immortal gods huddled together and unable to detect Wang Yi's arrival is tantamount to being overwhelmed by the Zerg Legion. Even if you hide in the Ring of the World, the strong cabin is not safe. Let alone the danger, it's too late to deal with. , And those who couldn't resist the power of the explosion, there were no more than a hundred or eighty alien immortals that died under Wang Yi's cannon.

In just over a month, that terrifying new arrival human was given a nickname-"Yu Chonghou".

The Zerg has something to say about this...

The well-known Wang Yi also fell into the eyes of those with a heart.

### [Chapter 317: 1 Fight to destroy the Fenghou](#)

In fact, in the outer battlefield, the immortal gods will adjust appropriately according to the situation, for example, it is dangerous, then several teams will unite.

The level of danger is low, such as the Broken Star Belt and Stranglethorn Vale, that is, a single immortal \*\*\*\* can break through.

People like Wang Yi who relied on the high-end detection equipment and the Zerg army to run wildly did not appear before.

Even more excessive, like a sudden emergence of an immortal king who kills and kills in the outer area, of course, it is relatively rare. After all, most superpowers pay attention to face, and relying on strength to slaughter the weak like this will provoke them. When the anger comes, it is easy to attract the siege of the strong opponent.

In the vast "Mengchen Island" somewhere in the hot desert, an abrupt mountain hinterland gathered at this moment many powerful men.

The six immortals of the Zerg camp are all here.

There are fifteen terrifying characters on Mengchen Island, and the Zerg camp accounts for six, but this does not mean that other camps are weak, but Mengchen Island has more powerful Zerg camps.

In fact, like these overlords, they usually act alone.

But not long after they emerged, the arrogant human beings made them vigilant and threatened.

"It's been three months... that human being is still hunting everywhere."

In the slightly depressed hall, there was a sound as if gold and iron were struggling.

The speaker was a huge, tall, 15-meter-high Sek immortal who looked like piles of purple rocks. He was one of the fifteen great immortals of Mengchen Island, "Wu Muxi", and he was also called by immortals. For the existence of the "Thunder Demon", he is definitely the overlord of one party on Mengchen Island.

At this moment, he was angry, because several of his people were attacked and killed by the "Yu Chonghou" of the human camp not long ago.

"Only the immortals confirmed by our camp that died in the hands of the human Fenghou, there are already 30, not counting the monsters and the mechanical clan, even if the other two human camps are named "Night Sword" and "One Sword". Hou"...A hundred years of killings combined is not as much as his." Another one-eyed man wearing a fire-red battle armor sitting in the hall said in a low voice.

"It can't go on like this."

"Yes, for so many years, Mengchen Island is our territory, and we cannot allow a human to act wantonly."

"We can't just sit back and watch. The human being sealed off should go to a higher battle area. It shouldn't be here on Mengchen Island and disrupt the balance."

The feudal lord of the six Zerg camps condemned at the same time.

In every region, there is a delicate balance. An existence like Wang Yi is like a shark falling into a pond, which will cause a devastating blow to other fish.

At this time, other people will unite to deal with him and eliminate him as a saboteur.

It is also Fenghou, but it is not impossible to deal with the Zerg brood.

What they were afraid of was the concealment ability of the detection instrument and the lethality of the Zerg army.

The concealment ability of the detection instrument allows human beings to come and go without a trace.

The terrifying lethality of the Zerg Legion, once hit, can make any immortal seal fall easily.

But the Zerg Legion is not invulnerable, and there are also weaknesses. As long as they are restrained and suppressed, they can concentrate on dealing with humans.

What they have to do now is to find the hidden human being, and then besieged and killed, no matter how bad they are, they have to force him to leave Mengchen Island.

The six great Fenghous teamed up to be the strongest combat power on Mengchen Island, and they already had this kind of confidence.

The vast Mengchen Island, the yellow wind and sand, vaguely see some undulating mountains, as well as some ceremonial sculptures on the huge mountain walls that still have traces for hundreds of millions of years.

At this moment, a stream of light from the sky flew towards here quickly.

In the spacecraft, Wang Yi was sitting on the sofa in the control room with his eyes closed, with a tea cup in front of him, which was a bit boring.

In the past three months, under Wang Yi's aggressive hunting and killing, a large number of alien teams were destroyed, causing a large number of alien teams to smell the danger, fleeing Mengchen Island, and dared not stay again.

It also greatly reduced Wang Yi's hunting effect in the next two months.

I bumped into a few foreign teams in one day, but now it's hard to meet one in a day.

Wang Yi looked at his panel task.

[Kill ordinary immortal gods: 399100000]

[Number of successful military operations: 98100]

"It's still a little bit, the army's combat mission can be completed..." Wang Yi thought to himself. "This period of time is too inefficient. Those alien races have run away. It will take several days to find one. Hey, I just don't know what rewards the panel will give when the task is completed."

"Master, found that Fenghou is immortal!" Bermuda's tender voice was filled with excitement.

Wang Yi, who was closing his eyes and meditating, heard Bermuda's voice, opened his eyes sharply, and his eyes flashed brightly.

"Oh? Did it finally show up, what's the situation?"

"There are six immortal princes, all of which are the immortal princes of the Zerg camp."

"Huo!"

The words of Bermuda made Wang Yi stand up directly.

"Take the investigation screen over."

Wang Yi was excited with a hint of surprise. Like Luo Feng in the original book, he went to Wusha Island. He has been in Wusha Island for a hundred years, but he has never encountered a Fenghou-level immortal god.

And he actually met six at a time?

"You want to besiege me?" Wang Yi's mouth raised slightly as he listened to the discussion in the screen.

"Sure enough, the ignorant are fearless. I just show the strength of immortality, so they are not afraid."

It's been a long time since the wind has been going well, these Fenghous who have ruled and ruled Mengchen Island for many years have forgotten the feeling of death.

"Let me give them an unforgettable memory... if they are still alive after today."

"Big business." Wang Yi's butcher's heart was about to move.

His butcher knife was already hungry and thirsty.

In the picture, the six great immortals in the hinterland of the mountains are still discussing how to deal with human beings, but they don't know that the human beings they want to target have come to their door and sharpen their swords.

"Six Zerg camps are enshrined, and there are more than 120 ordinary immortal gods...hehe, it's really an unexpected gain."

Wang Yi looked at the mountains in the distance, with fierce lights in his eyes and a cruel smile on his face, and ordered the Zerg brood next to him: "Elizabeth, say hello to our friends who haven't met... Let's have a splendid firework. "

Elizabeth knows her heart.

"Zerg Legion, ten combos are ready..."

The densely packed and mighty, two million Zerg Legion soldiers arranged in two huge spheres stretched out their claws, and the claws glowed with energy-gathering light. The powerful energy was poured on the claws and gathered into a dazzling ball of light.

The sky seemed to be filled with endless bright stars, but under the shielding of detection equipment, the immortality of the alien races hundreds of thousands of kilometers away was still unaware.

"First formation, attack!"

Following the order of the mother emperor, the millions of front shadow zergs of the first camp simultaneously launched the energy light \*\*\*\* of their claws, and the dense \*\*\*\* of light like raindrops flew out, gathered together during the flight, and finally became a group of people. A brilliant beam of light with palpitations.

"The second formation, attack!"

Almost at the same time when the Zerg army of the first camp was launched, the mother emperor gave the order, and the million tiger beetle Zerg clan, which matched the perfect second giant spherical shape, also flew out the ball of light, condensing millions of energy into a beam of light containing terrible power , Fell hundreds of thousands of kilometers away after 0.1 second.

The Nest Mother Emperor did not stop, and ordered the Zerg army that had reconsolidated its energy to continue its attack.

"First formation, attack!"

"The second formation, attack!"

...

The six lords who were discussing in the temple hall in the hinterland of the mountains, including hundreds of ordinary immortal gods, suddenly changed their faces and received an alarm from the detection equipment.

"Enemy attack!"

"how come?"

"who is it!?"

"My miniature detection instrument is always on, and it doesn't respond at all."

Some roared immortal, some had a bad premonition in their hearts.

When they felt the enormous energy come to the top of their heads, everyone had already understood it.

"It's a human being to seal the prince!!!"

A stern cry sounded.

"Boom..."

When these alien immortal gods reacted, the devastating attack had already landed on the hinterland of the mountains, and the next moment there was a sudden earth-shattering explosion.

The huge mountain range is like a castle piled up on the beach. The next moment it shatters suddenly. The blazing light rises like a star, melting the space, revealing a huge cavity. In the cavity, there is an endless space interlayer, violent shock waves. Sweep in all directions and destroy everything.

"Boom..."

After a wave of unrest, the second big bang followed one after another.

The third wave of attacks, the fourth wave of attacks...Wang Yi's Zerg army continuously bombarded the original mountain range, and the space there was like a rolling sea, constantly undulating.

The entire mountain range was destroyed under the ten waves of long-range energy attack that was compressed to the extreme by the Zerg army, revealing a huge crater with a radius of more than one million kilometers and a depth of more than one hundred thousand kilometers.

In the center of the explosion, the space was shattered by a blast, and the flow of particles surged wantonly.

Everything ceases to exist.

"Wow!"

"Wow!"

From the space mezzanine, a few embarrassed figures suddenly rushed out.

They flew out of the space crevice, staring fiercely towards Wang Yi's side, and they had just discussed how to deal with Wang Yi's immortality in the hinterland of the mountain. It's just that the original six princes, now there are three remaining. And the breath is weak.

"Humanity!"

"Yu Chonghou!"

The sound of anger resounded across the sky.

The three surviving Zerg camps were immortal, they were the imperishable "Thunder Demon" of the Sek tribe, who was towering and tall like a purple rock, and the one-eyed tall and thin man wearing a fire-red armor. And a tall female immortal \*\*\*\* who is five or six meters tall and looks like jade.

The other three immortal immortals were very unlucky and wiped out in the ten bombings just now. Only when they escaped quickly or had some means to save their lives did they survive this sudden attack.

But it was still affected by the explosion, severely injured, and its strength was also affected.

The hearts of the three powerful masters are bleeding, and the divine bodies of the immortal gods are all divine powers. Each point of divine power is accumulated over hundreds of millions of years, and is integrated with the soul. Therefore, the lost immortal divine body is also a lost soul. , The more serious the injury, it will take a very long time to recover.

The sudden attack just now left them lack of reaction time, otherwise three Fenghou would not have fallen.

Their divine bodies have suffered losses ranging from 15 to 20%. For the immortal gods, it has already affected their strength.

If it reaches 30%, they can only play half of their strength.

At present, the three immortal princes probably have about eighty to ninety percent of the strength of their heyday.

They looked at the human beings, full of anger that could not be contained, and rushed over frantically.

Wang Yi had already put away the Zerg brood, and the Zerg Legion had little effect when the opponent had already taken precautions.

Wang Yi looked at the three Fenghou rushing over with a sneer on his face.

"There are three more..."

"kill him!"

The anger of his companion being killed and his body hurt made the three great immortals hate Wang Yi.

And even though they were injured a little, they still retained 90% of their combat power. They were confident that the three of them could deal with Wang Yi as an immortal.

"Let's take your knife first!" Wang Yi showed two cyan primitive war knives in his hands, all covered in dark red armor, only a pair of cold and merciless eyes were exposed, and his head turned to the crystal-clear, jade-like female immortal god.

Divine light appeared in the cyan eyes of the female immortal god.

"Ah!!!" A sharp cry rushed in front of Wang Yi with the soul impact, and the imaginary immortal power slammed on the "Purgatory Armor", but was completely blocked.

The soul attack of the immortal \*\*\*\* of Fenghou, unless it is particularly abnormal, it is impossible to break through the defense of the treasure of "Purgatory God Armor".

"How is it possible!" Feeling that his soul attacked like sea water on the steel city wall, but couldn't shake the other party a bit, a shocked look appeared in the eyes of the immortal \*\*\*\* of the "Nasha tribe" female.

"Swipe!" At this time, Wang Yi had already turned towards her and charged at her, as fast as lightning.

"Stop him!"

The Sek clan's immortal roar instantly turned into a purple electric light, and killed Wang Yi. The purple secret patterns on his body lit up, including the purple secret patterns on the head, neck, and back. He raised his hand. The black giant hammer, as if the entire space was being lifted, slammed it down towards Wang Yi with great strength.

Wherever the sledgehammer passed, the space burst like a plow.

Wang Yi felt the time flow around him slow down in a trance.

"Kill! Humans, you \*\*\*\* it!" On the other side, the one-eyed man in the fiery red armor was enveloped in flames, and he directly swung the powerful red club to unleash the strongest blow he had done for many years.

He smashed his head with a stick, and the attack contained the complete law of fire and some laws of space that he had comprehended, and it was powerful.

With that wanton split... the universe was also split apart, shattering along with many interlayer spaces.

"Ah!!!" Nanasha women were as unwilling as immortal, launching her strongest soul attack.

Countless white silk threads are condensed from the imaginary immortal divine power, falling down like a spider web, shrouding the dark red armor in the center, a human powerhouse with full expression.

If it were an ordinary immortal prince, he would have to retreat in the face of the siege of the three powerhouses, but Wang Yi ignored it and rushed forward brazenly.

The countless white soul threads entangled on him, and they had been pierced before they penetrated.

"when!"

"boom!"

Two cyan swords and sticks, the giant hammer hit together ~[www.mtlnovel.com](http://www.mtlnovel.com)~ The huge power fluctuations burst the layers of space.

In the next moment, the two alien Fenghou flew out together, and the divine body was also shaken.

"Cough!" The one-eyed man spouted a mouthful of blood, his face was shocked.

"How can it be!?"

These three Fenghous were able to escape in the explosion just now, naturally it was not a fluke, apart from some means, but also because they were at least Fenghou high-level strength.

Two seniors, one pinnacle, three-to-one, they couldn't suppress each other, but were easily blown away by the other.

This kind of strength made the three alien Fenghou jump with horror.

Wang Yi continued to charge, even if he only used the physical power of the pinnacle prince, he could easily ravage the three alien princes in front of him.

#### [Chapter 318: be terrified](#)

Wang Yi's goal is very clear, which is to kill the Nasha Clan immortal first.

Seeing Wang Yi rushing over, the face of a tall and immortal woman with a body as flawless as jade also changed.

However, the "Thunder Demon" of the Sek tribe named "Thunder Demon" and the one-eyed man "Fen" looked at each other, did not flinch, and rushed forward.

Everyone is immortal, who is afraid of whom.

The dignity of the powerful Fenghou made them unable to give up so easily.

Otherwise, where is the face?

Relying on the "immortality", without the threat of the Zerg army, and knowing that Wang Yi is not easy to provoke, the three alien marquis still gritted their teeth and planned to fight Wang Yi.

If you want to cause damage to the immortality of the Fenghou, even if it is an elementary Fenghou, it is generally necessary to have the power of the elementary Fengwang, and it takes some effort.

If it is a high-ranking prince, the first-ranking prince wants to kill the high-ranking prince, and he has to burn some divine power. Without the recovery of the treasure, it will take hundreds of thousands of years to recover on his own.

And how precious are the treasures that can restore the divine body!

Therefore, there is generally not enough assurance and benefits, and it is rare for the super strong to fight to death.

It was not as easy as envisioning a king to be immortal and killing a prince.

Wang Yi also saw through the thoughts of the three Fenghous, a sneer appeared in his eyes.

These alien races didn't even know that he didn't use real power at all.

"Well, just let you give up."

Even with the power of Fenghou level, he can kill Fenghou!

Not to mention, what he wore was the "Purgatory Armor", and the attacks of the Fenghou level could be completely ignored.

The three alien races are immortal, and they don't know what opponent they are facing. At this moment, they want to besiege Wang Yi.

Two high-ranking marquis, one pinnacle seal, still have the opportunity to besiege the other pinnacle seal.

They are still unwilling to give up at this time, one is hatred, and the other is they consciously haven't tried their best.

The three of them besieged, as long as the divine body was torn apart and annihilated, paying some price, there was still a chance to kill.

But they didn't know that Wang Yi was not an immortal god.

It's the landlord of the most enchanting monster in human history!

Booming...

The surrounding cosmic space was completely torn apart, even if it was to be bridged every time, it was torn again. The world with a diameter of tens of thousands of kilometers was completely shattered. In the turbulent flow of space debris, the four powerhouses were fighting each other, and the killing was faint. The sky is falling apart, and the turbulent flow of space debris can't hurt them at all.

"Can you stop me?" Wang Yi felt that it was almost done. He sneered, instead of fighting as before, completely ignoring the obstacles of "Thunder Demon" and "Fen". His speed skyrocketed and his figure was elegant. A swing shook off the interception of the two of them, and rushed towards the immortality of the Nasha Clan as fast as thunder and lightning.

"What kind of body is this?"

"So fast?" Thunder Demon and Fen were also furious.

When the Nasha Clan immortal saw Wang Yi rushing towards her, her expression changed. Although she was also a high-ranking prince, she was in the line of illusionists. Her achievements in close combat were actually very low. Melee melee.

But this is not for her to decide. Wang Yi quickly approached her, and the sharp light of the knife was already on.

The enlightenment of the law of the princes is at least above the fifteenth floor, and the immortality of the three princes like the Nasha tribe, normally the enlightenment of the law is on the sixteenth and seventh floor, but it is inferior to that of Wang Yi's 20th floor. It's too far.

Even though Wang Yi is not the strongest sword technique, he is still powerful enough to exert great power.

A wave of invisible and immortal force impacted Wang Yi, but it entered the sea like a mud cow, with no effect.

The power of immortality has a soul attack effect as long as it becomes virtual.

Regardless of the line of martial artist, or the line of spiritual teacher.

It's all immortal divine power.

Of course, the soul attack is ineffective to Wang Yi, but Wang Yi can't resist the soul attack, but with the blocking effect of the "Purgatory Armor" and "Eye of the Abyss" on the virtual immortal power, the soul attack can be weakened. Ignore the soul attack of the Fenghou level.

Even the Nasha Clan's immortality even used the weapon of thought force, but it still had no effect on Wang Yi.

"Swipe!" Wang Yi easily avoided numerous obstacles, and in a blink of an eye, he came to the immortal Nasha tribe who was frightened. Two dazzling knives were cut down fiercely, and a shape appeared in the immortal hand of the Nasha tribe. The strange sword wants to fight with Wang Yi.

However, the sword skills of the two sides are too far apart. Wang Yi only cut her with a war knife with one stab, and with the other stab, she has brazenly split her jade-like flawless body.

In the face of this infinitely powerful knife light, the cosmic space was too fragile, and it directly shattered the surrounding cosmic space completely, and the unmatched power entrained in the knife light shattered the woman's body together with the space.

"what?"

"One cut..."

The "Thunder Demon" and "Fen" who were chasing from behind trembled in their hearts.

There is a gap between the peak Fenghou and the high Fenghou, but it shouldn't be so big either.

"What kind of knife light is that, why is the power so terrible?"

"Not good!"

The two immortals hesitated.

"Wow..." A large number of bright white light points quickly gathered from the space from all directions, and instantly condensed into the tall jade woman. It was obvious that her immortal body had reached the point of "immortality". She looked at Wang Yi with an uncontrollable expression in her eyes. Panic and panic.

"How come... I actually lost 1.2% of my divine body?"

The immortal body that Wang Yi exploded just now, the countless immortal divine power split by the woman could not escape for a while, and the immortal divine power that was forcibly annihilated by his blocked space, caused the woman's current divine body to be damaged.

The "Thunder Demon" and "Fen" in the rear also saw that the breath of their companions had weakened, and they were also shocked.

"what!"

Once trained into an immortal body, being blasted once has almost no effect on strength.

Of course, it also depends on who used it. For example, the invincible entitlement to the king can completely kill the enclave rank in one move.

"His strength just now is clearly at the rank of the prince, and at best it is higher than that of my victory, but the sword technique has made him incredibly powerful. His law perception is definitely more than ours, I am afraid that he has reached the prince. Level, otherwise it can't be so terrible!" The only immortal Fenghou Peak among the three "Burn" swallowed his saliva.

"Moreover, his body technique is also very scary. We can't stop him at all. He can use his body technique to avoid other people. With that sword technique, one-on-one, no one is his opponent."

"This is a lot of trouble."

The two great princes, withdrawing in their hearts.

But they don't know, this is just the beginning.

Wang Yi has been studying the secrets of creation since he reached the 20th level of the law. First of all, the secrets of spiritual masters created the peak secrets. Although the melee swords are backward, they have reached a very high level. At least they have the level of top secrets.

The top-level secrets and the utmost knowledge, coupled with the 20 levels of law perception, and Wang Yi's physical strength now controlled at the pinnacle level, are enough to ravage the three captains in front of him.

"Thunder Demon" and "Fen" are far away. Although they were shocked and didn't personally experience the horror of Wang Yi's knife just now, the Nasha Clan's immortality really realized it, especially that the divine body was suddenly weakened by 1.2%. , Even more frightened.

A single blow caused her to lose 1.2% of the divine body, which is definitely not the strength of the Fenghou level. I am afraid that only the elementary entitlement and the burning of immortal divine power can cause such serious damage to her.

Wang Yi is also observing the physical condition of the opponent and assessing the power of his own knife.

"1.2%? It's about the same as I estimated."

Physical strength, secret level, law perception... all have a direct impact on combat power.

Then there was another dazzling knife light that slashed down, and the entire space was stagnant. When the knife light hit, a big crack in the universe appeared directly!

"Ah!" The Nasha Clan was already terrified of being immortal. Her soul attack was completely ineffective to Wang Yi. She wanted to call for help to her companions, but found that both "Thunder Demon" and "Fen" had seen the situation wrong, and turned and left.

Originally, friendship was not enough, "Thunder Demon" and "Fen" didn't need to continue to seal her with this human being... No, this is no longer a seal, but a terrible guy with the power of a king.

The immortality of the Nasha clan wanted to transfer, but Wang Yi flickered like a ghost, and the sword always broke through her blocking line, and slashed directly on her left shoulder. , Like cutting butter tofu, directly divides the immortal jade body of the Nasha tribe into two.

boom! The universe collapsed...

The powerful force entrained in the general trend of space exploded, once again shattering the immortality of the Nasha Clan.

Strength, realm, secret technique, body technique... are completely crushed, making Nasha women unable to run even if they want to run.

To kill the immortality, the two main methods are 'soul destruction' and 'forced annihilation'.

Wang Yi is not yet proficient in soul methods, but his power level is enough to destroy the immortality.

"2.5%?" The Nasha Clan's immortal body condensed again, with an expression of horror on his face.

Although there is a big gap between Fengwang Elementary and Fenghou High-level level, their attack power has not yet reached the point where they can be forcibly annihilated. If you want to kill Fenghou High-level, you have to pay a certain price, that is, "burn your own immortal divine power."

If "Feng Wang Gao" kills "Feng Hou Gao", even if the immortal divine power is not burned, normal attacks can damage the opponent's essence, and a little bit of immortal divine power can be easily destroyed and restored for a few years.

If it is "Fengwang Peak", then "Fenghou Gaoda" can be easily killed.

This is forced annihilation!

It relies on the absolute gap in energy, and if the gap is not enough, it relies on "burning immortal power."

Wang Yi's first attack was only the strength of the high-ranking king, and the second attack was already the attacking power of the high-ranking king close to the peak of the king, so it could easily cause damage to the immortal divine body of the Nasha tribe.

At this time, Wang Yi also noticed the escape of the two alien races "Thunder Demon" and "Fen". He snorted and looked at the struggling Immortal Marquis before him again, "Go and die."

The immortal Nasha tribe flew away while begging for mercy. "My lord, please spare me!"

"Against each other, begging for mercy?" Wang Yi felt a little ridiculous.

Wang Yi's figure flew over like a ghost, and cut it down with a single knife. The light of the knife fell like a galaxy. Wherever he passed, the space collapsed on a large scale.

"brush!"

The light of the sword flashed away, passing over the immortal body of Nasha tribe, and directly splitting her into two. Then the light of the knife swept over and drowned her remnant body. The immortal scream of Nasha tribe was overwhelmed. Knife light swallowed.

Unprecedented pain surged, and the sharp, destructive light swallowed her divine body every inch, as if hot water melted the ice and snow, as if sulfuric acid corroded, the immortal divine body of the Nasha tribe was extremely fragile in the face of the destruction knife light, and was directly forcibly annihilated.

Wang Yi's power has completely exploded. With 12,000 times the power of the pinnacle master, combined with the deep law perception realm and the powerful sword technique, the power of this sword has completely reached the level of the pinnacle of the king!

With a single cut, the divine body of the Nasha Clan's Fenghou loses more than 30%!

If it is an ordinary immortal god. Losing 50% of the immortal body (equivalent to losing 50% of the soul), the consciousness will collapse and it will be finished.

After becoming immortal, even if you lose 99%, you will not die.

Can survive 1%, keep memory at most, strength will be the cannon fodder in immortality, it will take hundreds of millions of years to restore all the strength in the past with 1% immortal body.

The Nasha tribe was desperate. She still wanted to beg for mercy, but Wang Yi didn't listen at all, and another palpitating knife shot straight down.

"boom!"

As if the whole world trembled, the light of the sword spread like a flood of opening gates, splitting a huge spatial gully as long as 10,000 kilometers, and the powerful and violent sword gas poured into the cracks in the space, tearing the interlayer of the space. Broken into pieces.

The Nasha clan was sealed, completely annihilated, and fallen!

All this is slow to say, but in fact it happened in a short moment when a high-ranking Fenghou fell into Wang Yi's hands.

But the "Thunder Demon" and "Burn" who had turned into a streamer and were flying in the distance observed this scene, and their hearts and souls were broken by fright.

"He is not a prince, he is a prince, he is a prince!" Lei Mo howled in his heart.

"Mengchen Island actually showed a king-class combat power, which is really bullying." Fen shouted in his heart while trying his best to escape. "I also pretended to be immortal, shameless, too shameless."

There are still many ways to disguise breath coercion in the universe, so after seeing a human being killed a high-level Fenghou with a few stabs, they all thought that the other party deliberately suppressed the breath coercion to the Fenghou level, but they did not expect that the other party was real. The identity is actually just a realm master.

Even if it is an elementary seal king, if you want to kill a high seal king, you have to burn immortal power to kill, but it is definitely not that easy.

So they guessed that Wang Yi was an elementary seal king with a strong sense of law, or simply a superior seal king.

As for the landlord? They never thought about it.

If there is a realm master in the human race, it is possible to defeat or even kill the peerless genius of the sealed master, but the total number is only more than 30, and it is very difficult to kill the elementary masters, let alone Said advanced Fenghou... In essence, the basic gap cannot be made up by the perception of the law.

No matter how big it is, it is impossible.

What about Wang Yi? With the third calamity of "Nine Tribulations", the genetic level reaches 12 times, the power amplitude of the beast \*\*\*\* is 10 times, and the purgatory \*\*\*\* has the secret method amplitude 100 times...the base of the body is 12,000 times the power of the pinnacle master!

Properly crowned king level!

Coupled with the perception of the laws of the 20th floor of the Tongtianqiao, and even the 20th floor has reached a far height, even the melee swordsmanship is at least the top level.

The combat power played out is comparable to the pinnacle of the king.

In addition, the "Purgatory Armor" completely blocked the soul attack, and it was naturally very easy to kill a high-ranking prince who was proficient in illusion arts and had a fragile body in melee.

#### [Chapter 319: mission accomplished](#)

On Mengchen Island, Wang Yi, who is overbearing and domineering, won the iconic title of "Yu Chong", or "Yu Chong Hou", with the help of the Zerg Legion.

Of course, Wang Yi didn't care about it, and smiled away.

But after today, this title can end.

With the astonishing record of beheading a high-ranking prince with three swords, Wang Yi still had no trouble.

He looked coldly at the direction the two great princes fled in the distance, but did not leave.

However, the detection equipment was shielded, and the two masters did not know the exact location of Wang Yi, so they could only speculate in panic.

"We escaped so fast, should humans not catch up?"

There is a lot of resistance on the dusty island. Reaching close to the speed of light is already the limit! To reach the speed of light, we must go to some "shuttle points".

As long as it is an immortal god, as long as it is given enough time, it can reach the point of "close to the speed of light", once the speed is so fast. Then even if the immortal gods of the king were chasing after him, they could not chase the ordinary immortality.

Because everyone has the same speed, they can't catch up no matter how fast they are.

Unless it teleports!

So-the immortal spirits burst out in an instant when they battled more, assuming they were close to each other, and didn't open enough distance.

One immortal spirit ran, and the other chased after him. Coupled with the very fast burst speed in the next moment, it will naturally catch up with the previous one! After all, it will take a while to reach close to the speed of light.

In fact, if you chase at the speed of Wang Yi's body at this time, you can still catch up with one of the immortal princes. But he had already considered the current situation in advance and made arrangements.

"Wow..."

A palpable roar suddenly sounded in front of one of the fleeing immortal "Thunder Demon". The expression of "Thunder Demon" changed. When he looked up, he saw a huge figure quickly rising from under the desert in front of him.

"Wow~~" A large amount of yellow sand poured down from the huge mountain-like body like sea water, like a fierce sand rain.

It has a body of thousands of kilometers, the whole body is dark, the scales are filled with fiery red light, and a pair of streamlined beauty like swallows on the back, black and red wings appear in front of the "Thunder Demon".

Its head is triangular, its neck is not long, and its body is as strong as cast steel, full of power.

The limbs are slender, but full of sensuality, and there are bone spurs like blades in the elbows and knee joints.

The most amazing thing is its tail, which is about half longer than its body, and the tail becomes thinner as it goes back. It is as thin as a sharp blade, but its tip is extremely sharp, like an awl.

Crimson eyes were filled with red light that devoured everything, and the scorching temperature radiated from its body that seemed to contain a volcano, causing the surrounding air to begin to twist.

"Boom~~"

The vast wings behind it spread out, and the next moment it was covered with a layer of dazzling golden scales, the scales were covered with mysterious patterns, and they burned blazingly. As soon as they spread out to obscure the sky, it seemed that there was an extra sun in the sky.

"This is... the Yanxing Giant Beast!?"

Thunder Demon was taken aback!

Yanxing behemoth! One of the twelve pinnacle bloodlines among the star behemoths!

The star behemoth is so famous in the universe that ordinary people can't recognize it, and of course the Thunder Demon recognizes it.

Thunder Demon felt the breath of the Yanxing Giant Beast, and then felt relieved.

"World Master Grade Flame Star Giant Beast? It's okay."

"But why did this Flame Star beast suddenly appear here?" The Thunder Devil was a little puzzled.

But he was not in the mood to think about this. Although he had escaped very quickly, he was still worried that the terrifying human power would catch up.

The speed of flight is very fast near the speed of light, but the coverage of the detection instrument is as small as 100 million kilometers and as many as 10 kilometers. If it is 1 billion kilometers, it will take almost an hour to fly over.

Not to mention, the human powerhouse must have extremely high-end detection equipment. If he wants to chase him down, this distance is not safe at all.

The "Thunder Demon" had been frightened, and just wanted to quickly escape from this island, and then look for the nearest void shuttle point to leave this ghost place.

"The Yanxing Giant Beast! Get away!" The Thunder Demon shouted angrily when seeing the Yanxing Giant Beast flying towards him.

The Yanxing Giant Beast turned a deaf ear, a pair of red pupils that looked like a burning star staring at him coldly, with one wing, and flew over quickly with a bang.

"Looking for death!" Lei Mo smiled, "A mere realm master-level flame star behemoth. I also want to block my way."

Realm master level flame star behemoths, even if they grow to their peaks, they are comparable to ordinary immortal gods.

But after breaking through to immortality, it is different. The twelve peak bloodlines of the star behemoths are extremely difficult to break through to immortality, but once they break through, they basically have the strength comparable to Fenghou.

Coupled with their huge bodies, talents, and inheritance secrets, they are all considered powerful at the Fenghou level.

However, although the one in front of the master-level Yanxing behemoth looks a little different, the "Thunder Demon", as a high-ranking and immortal powerhouse, will naturally not be afraid of the battlefield outside the domain for many years.

If it's an immortal-level Yanxing behemoth, he might retreat for a while, world master-level? If it wasn't for the lack of time, and worried that the human king would chase and kill him, he would definitely kill it.

"Go to hell! Flame Star Giant Beast!" The Thunder Demon roared, and a black giant hammer appeared in his hand. The figure entrained purple electric light fell like a meteor. He waved the giant hammer in his hand and directly shattered the surrounding universe. , The giant hammer swept through countless space fragments, and directly smashed the sudden appearance of the giant flame star beasts domineeringly.

"Roar~~~" The eyes of the Yanxing Giant Beast suddenly lit up, really like two shrinking stars. At the same time, the lines on the body's scales also burst into blazing colors. The strong and huge wings on the back

flicked, a strong and sharp one. The claws also shredded the space, and slapped the thunder demon as small as an ant.

This trick contains the artistic conception of beast gods, and the third attack secret method of "The Six Paths of Fire and Sky".

Before the claws arrived, a terrible pressure came oncoming, as if the sky was collapsing and the earth was falling, the end of the universe.

"Wh..." The Thunder Demon looked at the steel claws that were like a big mountain in shock. The devastating breath of death made his body tremble involuntarily.

"this is not....."

It was too late to avoid, facing the thick red claws that hit in an instant... He could only grit his teeth and scream with a heavy hammer to blast out with all his strength!

"boom!!!!"

The universe collapsed! ! !

The black giant hammer lingering thunder and lightning directly collided with the hoof claws. The thick claws more than 30 kilometers were like stepping on an ant, and they were caught together with the thunder and lightning black giant hammer and the immortal "Thunder Demon" of Fenghou. The claws that came out of the hoofs were sharp like war knives, and they drew across the body of the sledgehammer and the thunder demon.

The giant hammer was thrown away directly, and the ten-meter-high purple rock body of the Thunder Demon was directly torn like a watermelon. His powerful body had no resistance in front of the claws of the giant flame star beast.

"Peng!" The thunder demon's rocky body was smashed into powder without any resistance, and the space underneath collapsed all the way, shattering to thousands of kilometers away, all the way to the surface.

Under this terrifying blow, the divine body received a devastating fundamental blow, and no breath was left behind.

Thunder Demon, fall!

"Roar~~" A huge high-ranking monster raised his head and roared with a paw to kill.

Although the Yanxing Giant Beast is now the pinnacle of the world master, his own genetic level is 10 times that of the third calamity of the "Secret Code of Nine Tribulations", that is 120 times!

The power of the beast \*\*\*\* is increased by at least 10 times, and the "Secret Method of the Purgatory God General" is increased by 100 times!

Add up to 120,000 times the power of the pinnacle master!

Reach the peak power level!

The Yanxing Giant Beast also has a "king armor", and the requirement for the use of the "king armor" is that it can be carried by the "ten thousand times the peak of the world lord", and it can exert the "one hundred thousand times the power of the peak of the world lord".

Add up to two hundred twenty thousand times the power of the pinnacle world master!

In addition, the mysterious attack from the Yanxing Giant Beast containing the Beast God's artistic conception is so powerful that it can kill an ordinary high-ranking prince with one move, easily!

Not to mention the high-ranking princes, even the peak princes will fall. I am afraid that only the first-ranking princes can survive under this piercing claw, but they will also be injured.

In the other direction, the desperate one-eyed man "Fen" suddenly received a communication from the strong "Thunder Demon" of the same camp, but only a few words were gone.

"The Flame Star Giant..."

The Flame Star Giant Beast attacked the killer too quickly, and the Thunder Demon was too careless. He was killed instantly, and fell before the news could be heard.

"Yanxing behemoth? Isn't it a human strong?" Because I was worried that the human strong would catch up, Thunder Demon and Fen kept communicating, but they didn't expect to wait for news from that human being. Instead, "Yanxing" Behemoth".

Fen was puzzled, "The Yanxing Giant Beast, that fellow Fen, was frightened stupid, what did he say?"

Fen wanted to continue to contact the Thunder Demon, but the army system prompts that his contact partner has fallen.

"..."

Fen was stunned in an instant.

Thunder Demon has fallen?

Are you kidding me?

The Thunder Demon was a high-ranking prince, even if the king was immortal, it was impossible for him to kill him before the news came out.

Unless it is a soul attack, let him die instantly!

"What happened?" Fen felt a chill in his heart.

"call!"

At this moment, a ghostly figure suddenly appeared in front of Fen.

It was a figure with a height of more than three meters and wearing a purple-gold battle armor. The whole body was covered in the battle armor, and only a pair of silver-white eyes with no emotions were exposed, and he looked over coldly.

After that, he raised the sword in his hand that looked like a sickle.

"Teleport? Seal the king?" Fen was so scared that he didn't notice the sudden appearance of the opponent.

What appeared was the "Void Zerg Clone" of Wang Yi's two clones.

It is also the strongest of the three bodies.

"Void Zerg Clone", after obtaining the third calamity of the Secret of Nine Tribulations, the genetic level has reached 3360 times!

The power of the beast \*\*\*\* is not as exaggerated as 10 times, but the amplitude is also 7000 times!

The "Purgatory God General's Secret Method" once again amplitude, the power reached 700,000 times the peak world master level!

At this moment, the "Void Zerg Clone" is wearing the "Imperial Armor", and the "Imperial Armor" needs "million times the power of the peak master" to fully carry it, and can exert the power of the peak master ten million times!

Even if it is not possible to fully exert the power of the "Imperial Armor" now, the amplitude of the "Void Zerg Clone" will be 7 million times!

The power of the peak divine body of ordinary human beings is only 100,000 times the peak of the world master!

However, Wang Yi's clone of the Void Zerg urged the "Emperor Armor", but it could reach 70 times the power of the pinnacle of the king!

Ordinary human beings, with a gene level of 1, would be tens of millions of times the power of the pinnacle world master, which is exactly the same as the "Void Zerg Clone" that fully exerts the power of the "Imperial Armor".

It can be seen how terrifying the current Void Zerg clone power is.

Of course, the Venerable can generally make his own genetic level reach about 10, which is 100 million times the power of the pinnacle realm master.

In addition, the venerable masters the complete laws of time or space, the strength is absolutely to crush those kings.

It is also invincible as the king, maybe you can jump.

In fact, Wang Yi's three major bodies share the laws and perceptions, and at the same time master the laws of time and space.

But the physical talents are different. For example, the "Void Zerg Clone" has a mastery in space that far exceeds that of the human body and the body of the Yanxing giant beast.

The most direct manifestation is teleport. With three bodies, the Void Zerg clone teleports the farthest.

But the teleportation distance of the peak of the Fengwang peak by one or two light years is no problem, and the teleport distance of the world master-class Void Zerg clone is already comparable to those of the Fengwang.

"boom!"

As soon as the Void Zerg clone appeared, terrible aura pressure erupted, causing the space to burst directly into dense cracks, and it also made the legs of the alien Fenghou "Fen" scared of the opposite race weak.

"Really the king?"

As mentioned earlier, the Void Zerg clone has two spatial talents, and finally a camouflage talent.

As long as the power level is sufficient, even the coercion of Fengwang Dianfeng's breath can be simulated.

Adding to its power, no one can see it. It is harder to see through than the human body of Wang Yi wearing the "God Armor of Purgatory".

Fen was terrified when he saw the clone of the Void Zerg clan full of killing intent.

"This respected Lord Sealer..."

He wanted to beg for mercy.

escape?

Where to flee?

In front of a pinnacle who can teleport? No matter how fast you run, it's useless.

Fen didn't want to break his head and didn't understand why so many powerful kings suddenly appeared on a small dusty island.

The clone of the Void Zerg was not too lazy to talk nonsense, slashed it out, and smashed it into pieces.

The huge disparity in power forcibly annihilated the "burning" divine body.

The six great princes of the Zerg camp on Mengchen Island have all fallen, and no one is left.

Including those ordinary immortals in the hinterland of the mountains before, all died under Wang Yi's hand.

In World War I, six great princes were killed, hundreds of immortal!

After killing "Fen" ~[www.mtnovel.com](http://www.mtnovel.com)~ Void Zerg clones, carrying the weapon armor, treasures and world ring left by "Fen", disappear instantly.

"brush!"

Appearing beside the Yanxing Giant Beast, there was a figure standing on the huge body of the Yanxing Giant Beast.

"It's over." Wang Yi smiled.

Panel tasks:

[Kill ordinary immortal gods: 522100000]

[Kill the immortal gods of Fenghou: 610000]

【Number of successful military operations: 102100】

"There are actually a few foreign legions in the hinterland of the mountain range, so that the quota for commanding the command of the army is full." Wang Yi smiled happily.

### [Chapter 320: Treasure](#)

"Fortunately, there is no hard requirement for the army command task of the panel. The army must participate in the battle, otherwise the task will be difficult." Wang Yi sighed.

This time the panel mission requires 100 legion battles, which in fact means the elimination of 100 alien armies.

Normally, this kind of military combat is the immortal \*\*\*\* vs. the immortal god, and the soldiers of the army fight each other.

However, Wang Yi refused to let his army join the battle, relying on himself for the whole process.

It can be considered a small loophole in the sign-in panel.

Wang Yi looked at the "killing progress" of the panel task again.

Ordinary immortal gods, it is 522.

The title of immortality is 6.

Over the king, 0.

The total value of the spoils has exceeded 100 million yuan units (including the immortal weapons and armors, etc.), mainly the six that have just been killed. The total wealth of them is more than hundreds of ordinary immortal gods. More.

And the total amount of military merit reached more than 14,000 billion... of which 1 trillion was obtained by killing Feng Hou Dianfeng's "burn".

100,000 military merits are equal to 1 mixed yuan unit or 1 point, which is more than 14 million, which is still too little for Wang Yi.

But compared to other places, the speed of earning wealth is terrible.

"Sure enough, in the outer battlefield, you can only gain more by killing the strong." Wang Yi shook his head. "Killing a prince is more useful than killing a hundred ordinary immortal gods."

However, Fenghou Immortal possesses an immortal body. Apart from Fengwang, who can kill like Wang Yi with ease?

"More than 500 ordinary immortal gods have been hunted in three months. If this progress is followed every month, then the first killing mission can be completed in 50 years." Wang Yi was thrilled.

One hundred thousand immortal gods are like nothing in Wang Yi's eyes.

At the same time, he also sighed that there are so many immortality on the battlefield outside the territory.

But this is also normal, nominally this is the battlefield of the four pinnacle races, in fact, hundreds of millions of races in the universe are participating.

It is like Hongmeng, nominally headed by mankind, mankind has only one hundred thousand kings, while other ethnic groups have more than three million kings.

In the universe, humans, zergs, monsters, machine races, crystal races, prison races... these six pinnacle races are the most powerful among the hundreds of millions of races.

However, it does not mean that they are invincible. After all, the individuals of other ethnic groups are far inferior to the six pinnacle races, but if they all add up, it will exceed the six pinnacle races thousands of times. After all, there are too many alien races, so There are also alliances in the universe.

Individuals are weak, and after forming an alliance, they still compete against the six pinnacle races.

There are many camp alliance organizations like the "Hongmeng" in the universe.

When Wang Yi first knew it, he was also amazed, "This world is too big, I want to go for a walk."

...

In the outermost area of the Yanji Continent, there are a lot of land fragments in the outer area. Even the land fragments are very large and require a long flight. It takes about a month or two to fly to the main continent of Yanji Continent.

After confirming the completion of the army's mission, Wang Yi has applied to leave the army and return the army back.

However, before leaving, he sent the army to the nearest "shuttle point" and gave some wealth to make up for them.

Although it was only three months, it was not enough for the space army to make a rush.

The wealth is not much. According to their strength, the world master can get 10 yuan unit of wealth, the domain master can get 1 yuan unit of wealth, and the universe level can get the wealth of 0.1 yuan unit.

Adding up is not enough for the wealth of an ordinary immortal god, Wang Yi now pulls more vellus hairs than this, and doesn't care at all.

Wang Yi handed over the task after sending away the space army that had been traveling in March.

【drop! 】

[The mission "Command the Army" is complete! 】

[The army's overall mortality rate is less than 10%, and you can get the highest reward! 】

[Reward has been issued, please check. 】

Wang Yi listened to the crisp and sweet "ding", and then another piece of animal skin paper appeared in his hand, and some messages poured into Wang Yi's mind, letting him understand what it was.

"This is... the map of the treasures of the Yanji Mainland?" Wang Yi blinked.

It feels very wonderful.

From the information just now, Wang Yi already knew that this map indicated the location of an undiscovered sacrificial tower in Yanji Continent.

What is the sacrificial tower?

That has to be said from the beginning of the opening of the extraterritorial battlefield.

The seventh battlefield was opened that year. It is said that some strong people from the four pinnacle races swept many areas and opened up battlefields.

The Yanji Continent is also among them. The aborigines ushered in a catastrophe. At that time, the aboriginals of the Yanji Continent were an ordinary race in the universe. There were less than ten cosmic lords in the race. They opened up battlefields in the four pinnacle races. In front of the powerful existence, shivering like an ant.

Those Cosmos Venerables knew that they would be the main target, and the possibility of escape was extremely low.

So even the treasures accumulated by several of them in the universe and the clan were quickly distributed to the clan members.

At that time, it was actually divided into 100 inheritance teams, and the 9900 team belonged to the fish-eye mixed beads...The ten thousand sacrificial towers also had high and low specifications, such as the 9900 team, the fish-eye mixed beads that specifically affected the cannon fodder of the four pinnacle races...

With some special sacrificial patterns, the "sacrifice tower" also contains the ability to conceal breath, conceal detection, and block space.

However, the materials used to make the sacrificial tower are much worse.

Actually... there are many differences between the 100 Inheritance Team and the 9900 Team.

Like the leader, the true inheritance team, each team has six leaders of the powerful kings.

But the 9900 ordinary team is led by six immortal princes!

Treasures are also different.

There are 9900 ordinary teams with few treasures. The Inheritance Squad... is the real treasure that has a large number of treasures, and it is truly passed on by the race.

And obviously-what Wang Yi got now was one of the 100 heritage sacrificial towers back then! And it's still the one that hasn't been found!

Wang Yi looked at the animal skin map and couldn't help thinking: "In the original history, Luo Feng came to the battlefield outside the territory and was once invited by a friend "King Yechen" who accidentally got a letter to worship the tower. At that time, a total of six great seal kings went in together, and there were still lurking in the Yan offering to the original native aboriginal powerhouses. They fought and fought fiercely. In the end, only Luo Feng and the hidden and insidious "Purple Bell King" survived."

"The wealth of Yan offering to the mainland is not small." Wang Yi's eyes shone slightly.

If it is for him to look for the so-called sacrificial tower aimlessly, no matter how rich he is, he is unwilling.

But with a map, it's different.

The sacrificial tower is mysterious and unpredictable, even the Venerable Universe cannot destroy or explore it. It is the survival base for the aboriginal ethnic group in Yan Ji continent to escape.

In the first sweep of the Yanji Continent, the wealth and treasures found in the "sacrifice tower" were all swept away, and only those that were not found were left. Because of the special structure of the sacrificial tower, the detector could not detect the sacrificial tower, even the universe. Venerable's divine power detection is not good either.

This is the magic of the sacrificial tower. If you don't know the specific location, you won't be able to detect it even if you are in front of him.

Therefore, after a long time, occasional sacrificial towers were discovered, which led to a fight and fight.

"In history, more than a dozen sacrificial towers have been found on the Yanji Continent." Wang Yi stroked his smooth chin and smiled. "My current treasure on this map, isn't it the one that Luo Feng entered in the original history, right?"

The more Wang Yi thought about it, the more he realized it was possible.

Wang Yi looked at the animal skin map in front of him, "Since I have got it, there is no reason to miss it."

"Bermuda, set off now to go to the Yan offering the mainland."

"Yes, master!"

An image of Bermuda's black and white dumplings appeared on the screen in the control room, waving two small paws excitedly, elated.

"Goal, Yan Ji continent, is expected to arrive in 47 days!"

"Go! go! go!"

Wang Yi shook her head, really wondering how she liked the mantra on this earth.

However, when leaving the No.05 land fragment "Mengchen Island", Wang Yi still left Moyunteng's divine token here so that he could send it back at any time in the future.

It is said that the high-ranking Mo Yunteng has been on the battlefield outside the territory for so long, and has not been dispatched, Wang Yi feels that it is a bit lonely.

...

22 days later.

In a black flying saucer. Wang Yi, who had already flown away from Mengchen Island, stood in the control room, looking at the infinitely vast land in the distance.

That is the place where Yan Ji Continent's main continent is thousands of times more dangerous than Mengchen Island, and it is also a place where the strong are like clouds.

The maximum diameter of the main continent of Yanji Continent is 1.8 light-years, and all the powerhouses on the thousands of islands around it add up to less than a fraction of the main continent.

On the Continent of Yanji, immortal gods accounted for about two-thirds of immortal warlords, about one-third of immortal princes, and a very small number of immortal kings.

Yan Ji Continent Lord, any team in the mainland will be immortal!

"There are still 25 days before we officially enter the main continent." Wang Yi said softly with a smile on his face. "According to the data, the main continent, but the strong are like clouds, and the strong from all sides gather here... I heard that there are more than a thousand kings. Three."

"But the vassal races of mankind, as well as a large number of alien races that entered the battlefield through the human alliance, all add up, but there are hundreds of kings. After all, there are tens of thousands of races. On average, dozens of alien races have one. When the king was offering sacrifices to the mainland in Yan, the number of kings was greatly increased. In Yan offering sacrifices to the mainland, the total number of the four parties must be more than a thousand."

In the extraterritorial battlefield, except for the four pinnacle races, a large number of other races are not all vassal races. Some of them are powerful races who specially negotiate with the pinnacle race before arranging members of the clan to come in.

even! In addition to the four pinnacle races, there are lives of other pinnacle races.

Therefore, the number of strong players is so exaggerated. There are eleven extraterritorial battlefields and the seventh battlefield alone. The number of kings is very impressive.

"There are more than a thousand kings, even if it is not a hundred thousand, the ordinary immortal military masters are hundreds of thousands." Wang Yi squinted his eyes and licked his lips, like a tiger and a leopard seeing his prey. .

"Unfortunately, I can't wantonly massacre. Otherwise, it's easy to attract the attention of the strong. It's nothing more than to seal the king. If it is noticed by other super existences, it will be troublesome."

There are also unspoken rules in the extraterritorial battlefield. Those who participate in the battle can only be below the immortal gods, and the super beings above the venerable level cannot enter.

The extraterritorial battlefields of the four major camps, where the Universe Venerables are absolutely forbidden to enter!

Unless it is a decisive battle.

Otherwise-what appears on the outer battlefield are all beings below the "Universal Venerable".

Of course, some super-existences such as Chaos City Lord can occasionally break the rules, because the status is so high, those vassal groups dare not say at all.

However, the human cosmic sage and the alien cosmic sage are also not eligible to enter the outer battlefield.

However, for the same reason, if Wang Yi, a human peerless genius, is discovered, other super-existences of other races will not care about breaking the rules, and will definitely come to obliterate him immediately.

"Well... I have to think of a way to kill a large number of powerful people and minimize the possibility of being noticed." Wang Yi leaned on the sofa, enjoying the vast scenery outside.

"The Void Zerg clones are powerful and have the ability to simulate camouflage. They can pretend to be different races to assassinate those strong aliens... But it's nothing more than ordinary immortal gods and princes, and Yan sacrifices to the mainland for hundreds of strong kings in each camp. There will still be trouble if you kill too many."

"Furthermore, many strange superpowers with different faces and super strength suddenly appeared, killing everywhere. Those foreign races are not fools, and they must be suspicious."

"But..." Wang Yi smiled, picked up the wine glass, and shook the moving red liquid inside. "They doubt it, as long as they don't doubt my human deity, what about doubt?"

"In addition to the Void Zerg Clone clone, the Flame Star Giant Beast clone can also be shot... plus my human body, and kill separately."

"Kill him like a river of blood!"

"There are not many kings in the Yanji Continent, but there are still many princes and ordinary immortality."

In fact, there are still many loopholes in this way. For example, the hunted strong can send news before dying.

But Wang Yi didn't care. He was originally to disturb the sight of all parties and reduce the possibility of his real body being discovered.

What does the killing of the Void Zerg clone have to do with his human deity?

Wang Yi was in a good mood while tasting fine wine.

This feeling of hunting a strong man and killing happily is indeed very wonderful.

"There is also the treasure of the tower, hunting along the way. But if it is the treasure in the original history, there will be six symbols, and you need six strong men to hold one and go through six passages before you can enter." Wang Yi pondered.

The treasure of the Pagoda's Treasure is a huge treasure~[www.mtlnovel.com](http://www.mtlnovel.com)~ There is also a treasure that even the venerable cherished, such as the "arm of the air lock," Wang Yi will certainly not miss it.

Although he has mastered the "space blockade"...but the landlord's space blockade and immortality are two concepts.

After all, Immortal uses the power of immortality and the application of the law to use the space blockade, but although he masters the use of the law, he does not have the power of immortality, and can be used with the power of the world... But isn't this revealing his true identity?

Moreover, the "space blockade" performed by the power of the world is far inferior to the power of immortality in terms of scope and effect, and cannot play much role in battle.

Once it is used, it is easy to be destroyed by the strong, and it is the same as if it is there or not, and it has little effect.

However, it is different to get the "air-locking arm". The "air-locking arm" is one of the Yan Sacrifice mystery weapons in the universe that has less than a hundred surviving.
