

## A God 321

### [Chapter 321: Wang Yi in Sahuan](#)

"The Arm of Locking the Air" is the most powerful and mysterious "sacrifice secret pattern" of the Yanji clan.

Every secret-weave weapon contains false secret lines formed by a complex structure. Once an energy source is provided, the false secret lines can be scattered in the void.

The range of amplitude and dispersion is all the control range.

The function of the "empty-locking arm" is the spreading area of the "virtual secret pattern", and the spatial fluctuations in this area will be completely locked.

Cannot teleport!

Therefore, this "air-locking arm" can be regarded as a nightmare for those who are strong in the law of space, and of course it will also affect the users themselves.

The user himself cannot be teleported!

But for Wang Yi, this "air-locking arm" is simply a big killer, and getting it is just like a tiger.

Because the imaginary lines are indestructible.

As long as it is blocked, the peaks of the kings cannot be teleported, and then he will be slaughtered.

The body style and burst speed of the Void Zerg clone are all abnormal levels!

Plus the power far beyond the limit of the king! And the "Emperor Armor" ability to resist damage!

He used to worry about teleporting and fleeing if he couldn't beat the king. Then he could do nothing. After all, he couldn't keep people.

With the "air-locking arm", it's not the same. Those kings can't run away...

Therefore, Wang Yi still values the treasures of the tower.

After another 25 days passed, a black flying saucer-shaped spacecraft flew into the vast Yanji continent at sub-light speed.

Just as Wang Yi was heading to his new pig farm in a spacecraft sharpening his sword, in a remote place in the universe, in a desolate and remote star field, amidst the vast kingdom of God in the interlayer of space.

Towering into the clouds, the majestic central mountain range, in the golden temple, a imaginative soft beauty sounded.

"Is there any news about Target 1 recently?"

Several figures in golden robes knelt respectfully in front of the huge Worm Nest, surrounded by thousands of sturdy and ferocious golden Zerg warriors.

"Master, according to the latest news, Number One has stayed in Chaos City to practice since it entered Chaos City 22 years ago, and has never gone out."

In Chaos City, that is where the Chaos City Lord sits, foreign spies can't sneak in at all, so they can only gather intelligence from the outside and make speculations.

In only 22 years, even the clever Zerg mother emperor would never have thought that the human genius they regarded as an important threat had actually gone to the battlefield outside the territory to sing Huan.

The "Wang Yi" who stayed in Chaos City was just an illusion made by the high level of mankind.

By substituting fakes for truths and concealing things from the sky, humans are very skilled in this set of operations.

"Well, you continue to pay attention, don't let go of any clues, come and report as soon as there is any important news." The Zerg mother emperor exhorted.

"Yes."

The effect of Wang Yi's swift breakthrough came out. The parties had never thought that he had progressed so fast, and they were still staring at Chaos City, thinking about \*\*\*\* him.

Even if they noticed that human beings suddenly added a new king on the outer battlefield, they wouldn't have thought for a while that they would be a realm master who had only cultivated for more than two hundred years.

...

Out-of-territory battlefield, the seventh battlefield, Yan sacrifices to the mainland.

"Om..."

"Om..."

The two shining beams of light running through the sky and the earth fell in a huge valley almost indiscriminately, annihilating the entire valley in an instant, countless rocks directly turned into nothingness, and more rocks were directly involved in the turbulent flow of space debris. In the space mezzanine.

"Boom..."

The terrible energy impact produced huge explosions spreading layer by layer, the earth cracked numerous huge gaps, and a deafening roar resounded across the sky.

"brush!"

A figure of lightning generally rushed out from the edge of the explosion, and the body made of divine power was covered with scars, and was extremely embarrassed.

"call!"

At this moment, a dark red streamer rushed over at an astonishing speed.

The "Poison Eyes" alien immortal of the mechanical clan camp that had just escaped from the shocking explosion felt the formidable pressure approaching, and then saw the dark red streamer, I didn't understand why he was attacked by the enemy. During the bombardment of the Zerg army, he hurriedly escaped, but also lost more than 30% of the divine body. Feeling the enemy's strength, he did not dare to attack at all, but chose to escape.

But Wang Yi's speed is much faster than him.

"Ah..." A scream resounded throughout the world, and a huge and extremely beautiful bird phantom emerged from Wang Yi. His speed suddenly skyrocketed again, and his whoosh quickly approached the desperate alien immortal.

Seeing the beautiful and intoxicating phantom of the huge bird, the immortal face of the alien changed. "Love Pipit Plate!"

"Stay!" Wang Yi shot out a ray of light, and the black and white swordfish flew out. The powerful origin of time and space was controlled by the law, and its power soared and shot directly at the enemy in front.

Wang Yi's law perception has reached the 20th floor, and he has created the pinnacle of thought-power weapon flow.

The "Black and White Swordfish Array" is the embodiment of this fascinating knowledge.

Although the soul thought power was only the first grade of the king, the combination of the three... also reached the peak of the king.

Even if he did not use the top treasure "Time Shuttle" handed over to him by his teacher, Venerable Pang Bo, but only used another special "Universal Weapon", the power would be extremely powerful.

The black and white swordfish jumped, cut through the void, and instantly came to the back of the alien immortality.

The "Poison Eye Clan" immortality originally had the strength of Fenghou Pinnacle, but it lost more than 30% of the Divine Body in the explosion just now, and only 50% of its original strength was left. At this moment, facing Wang Yi's fierce offensive, it could not be resisted.

"Puff!"

The black and white swordfish appeared in the space where they were traveling along the way, and they ran into the "Poison Eye Race" immortal blocking weapon with amazing speed and strength, and cut through his body, and their fierce strength annihilated his divine body and soul, "Ah. ..." The Poison Eye Clan immortal felt the intense pain passed from the divine body, felt the number of divine bodies lost, and its eyes widened with fright.

"7%? How is it possible?"

He is the pinnacle of the title, even the high-ranking king could not destroy his divine body so easily.

"How can the human camp have a new pinnacle crowning king on the Yanji Continent?" The Poison Eye Clan immortal panicked completely.

You can't escape.

Can't beat and beat.

The opponent can easily hurt his divine body.

"call out!"

"call out!"

Black and white flashes constantly shuttled in the sky, each time taking away a part of the Immortal Divine Body of the Poison Eye Race.

Soon, less than 30% of the Immortal Divine Body of the Poison Eye Clan remained.

With a 50% loss, only 10% of strength remains.

Loss of 70%, I am afraid that the strength will be less than 1%.

The general loss is 90%. If the immortal gods who are not determined to entrust the marquis or entrust the king, they will fall into a deep sleep and even lose their consciousness.

"what!"

This Poison Eye Clan is immortal and ruthless, and does not beg for mercy in the face of desperation. After sending out the final message, when only 20% of the divine body remained, he boldly chose to explode.

"Boom!!!" Detonated the entire immortal body in an instant.

Blew!

"Boom..." The universe collapsed, the surrounding mountains collapsed, and Wang Yi, who was prepared for a long time, retreated quickly. The violent self-detonation energy impacted on the "Purgatory God Armor". The "Purgatory God Armor" itself is a treasure. Attacks can be completely resisted, and attacks above the king can also be weakened by more than 90%.

After being weakened by the "Purgatory God Armor", this remaining less than 10% of the impact was then taken by the "Mo Yun Teng", which is now a high-ranking king, and the battle clothes it became can also withstand the king. The impact of hierarchical forces.

Greatly weakened again!

The rest was left for Wang Yi's human body to bear, but after Wang Yi's "Purgatory General Secret Method" and "Beast God's Power" amplitude, his physical strength has reached 12,000 times the peak power of the realm master, and he is a first-class king.

This impact, naturally, could not cause any harm to him.

In the aftermath of the overwhelming explosion, Wang Yi soared into the sky and landed on a mountain. He looked at the barren land, his long black hair fluttered, and his eyes were indifferent and merciless.

"Able to escape the attack of the Zerg army, you are very good as a captain, but unfortunately, you are still going to die."

One month has passed since he came to the Yanji Continent, and Wang Yi also discovered that although the Zerg Legion's combined attack might be powerful, it may not be 100% sure to kill.

Some strong men made various responses at the moment of perceiving danger, and occasionally some were lucky, or avoided the combined attack of the Zerg army by various means.

Of course, there are very few such people, and none of them can retreat all over, basically all injured. In the end, it was cheaper to look at Wang Yi next to him.

Wang Yi collected all the treasures left by the Poison Eye Clan and other alien races that fell under the attack of the Zerg Legion, that is, all the trophies.

He did not leave, but hid at the mountain peak and waited for a while.

"It seems that no one has come here." Wang Yi shook his head as he waited for nothing.

He also hopes that some alien races nearby will be attracted, but it seems that those alien races are not so stupid.

"Huh!" A gray-black flying saucer-shaped spacecraft with a diameter of more than 100 meters appeared nearby, and Wang Yi turned and flew in.

"It's been a month since I came to the Continent of Yan Jizhu." On the large and comfortable sofa in the spaceship control room, Wang Yi, wearing dark red armor, sat comfortably on it, drinking fine wine, and was in a good mood.

"In the 32 days of entering the Yanji Continent Master Continent, I found more than 1,000 teams, whether it is an alien team or a human team, each team must have an immortality."

"And this month, I hunted 273 teams and all succeeded." Wang Yi raised his head and drank the wine in a hearty manner.

Finding an alien team does not necessarily mean that they can hunt. After all, if the opponent has been flying, unless Wang Yi teleports over, it will be difficult to intercept it.

More than 1,000 teams, after deducting the human camp, there are actually more than 800, but Wang Yi hunted 273 teams!

Without a single omission, no one can escape.

In just one month, this killing speed is simply terrifying!

"Detection instruments are indeed a good thing. Those alien detection instruments are not as advanced as I am, and they can't find me at all." Wang Yi raised the empty glass in his hand and said with a smile.

The entire extraterritorial battlefield may have more advanced detection equipment than Wang Yi, but the seventh battlefield, Yan Ji Mainland, is unlikely.

Wang Yi is like a ruthless ghost, hunting down those alien immortals quickly and efficiently.

Of course, there are more times, and it is inevitable that his existence will also be spread out.

Now, the strong people in the land of Yan Jizhu have already known that the human side has an extra powerful king, relying on detection equipment and the Zerg army to hunt down those weak teams frantically.

But the continent of Yan Jizhu is too big, and there are too many teams of various races. It has only been a month, and many people don't care about it at all.

The three camps intercepted by Wang Yi each counted tens of thousands in the Yan Ji mainland team, and the loss of dozens of them was nothing at all.

However, Wang Yi's deeds also began to circulate in the mainland of Yan Jizhu. Although not very well-known, it is also remembered by many powerful people.

Wang Yi opened the sign-in panel to check the progress of the task.

[Kill ordinary immortal gods: 1289100000]

[Kill the immortal gods of Fenghou: 31510000]

[Kill the Immortal God of the Sealed King: 01000]

The corners of Wang Yi's mouth raised slightly.

Came to the land of Yan Jizhu for a month, and the results were numerous.

More than 700 ordinary immortal gods have been killed.

More than 300 immortals were killed.

Contributed to him a lot of military exploits, and gained countless trophies.

"Yan Jiji Continent is indeed a treasure of mine." Wang Yi sighed. "Compared with Mengchen Island, it has two levels, but I still haven't met a seal king!"

"It seems that there are really few kings. I have been flying for 32 days in Yan Fei Continent, and I haven't found a team with kings." Wang Yi smacked his lips.

But Wang Yi is not surprised.

The entire Yan Jizhu Continent, 1.8 light-years in diameter, which means that it flies close to the speed of light, takes 1.8 years to pass through.

In such a vast area, there are only more than a thousand crowns, and it is normal that you have not met a crown in a month.

"It's really unreliable to make up the progress in killing the Feng King in the Yan Jizhu Continent. It seems that if you want to kill the Feng King, you should go to the Star Tower." Wang Yi whispered softly.

Star Tower, but hundreds of thousands of immortal kings gathered.

Moreover, it was also Wang Yi's main purpose this time.

Star Tower, he is unlikely to enter, and it is easy to be spotted by the "sit on the mountain", but it is okay to squat outside and kill some of the kings by the way.

Sign in by the way.

Pretty good.

Wang Yi happily poured himself a glass of wine, which was still a trophy obtained from an unlucky alien prince who was killed by him.

"First, accumulate the killing quota for ordinary immortal gods and the killing quota for immortality in the Yanji Continent, and then go to the Star Tower."

Wang Yi is now flying towards the location of the sacrificial tower indicated on the treasure map, but because the hidden location of the sacrificial tower is in the middle of the main continent, even if Wang Yi flies all the way, it will take a year to get there.

Coupled with hunting from time to time along the way, this time will be stretched~[www.mtlnovel.com](http://www.mtlnovel.com)~ but Wang Yi is not in a hurry, because the pagoda can't run away there.

He was on the road while fighting monsters along the way, harvesting heads, and it was not a waste of time.

"Sure enough, Yan Jizhu Continent is as strong as a cloud. Only one month has allowed me to complete so much progress." Wang Yi felt happy. "According to this efficiency, it is estimated that in less than a hundred years, I will be able to get two chance cards."

Chances are that this thing is precious, precious, or not precious, just like that.

It all depends on personal luck.

Wang Yi felt that his character and luck were unparalleled in the world, and he was very strong, but he couldn't stand his son and was not strong enough.

Therefore, it is best to get this card, and you can use it when you encounter a sign-in treasure in the future.

### [Chapter 322: Just hit](#)

In another place hundreds of millions of kilometers away from Wang Yi's spacecraft, a white triangular metal spacecraft shuttled quickly over the deserted mountains.

On the alloy chair in the spacecraft's central control room, sat a silver-white mechanical puppet about two meters high.

"He" looked at the picture on the projection screen in front of him, and the artificial eyeballs flashed light, like a real person.

"Woo, there are really few foreign teams around here, I haven't met one in two days."

A world ring was also worn on the finger of the mechanical puppet.

Inside the World Ring, on the land about 100,000 kilometers long and wide, lying bored with a scarlet giant beast, with golden wings lying on the ground, it was the avatar of the giant Yanxing beast separated from Wang Yi.

The avatar of the Yanxing Giant Beast plus "A King's Armor" also has the ultimate combat power of the king.

In order to improve the efficiency of hunting, the three bodies have now been separated and headed to various places in the land of Yan Jizhu for hunting.

If there is any unexpected situation, the three bodies that have mastered the teleport can quickly arrive.

After all, the continent of Yan Jizhu is only 180 million light-years in diameter, and flying by spacecraft is slow, but teleportation is just a blink of an eye.

But now that the three bodies have been used, the matter of cultivation has been put on hold for the time being.

The Yanxing Giant Beast clone carries the detection instrument that Wang Yi used to spend millions of points to buy, which is at the level of the king. The Void Zerg Clan clone carries the best detection equipment it can get from killing Fenghou strong, but it is only nearly a million yuan unit, far worse than the Yanxing Giant Beast, let alone Wang Yi human. Carried by the body.

The body of the Yanxing Giant Beast is too large to sit in the spaceship. It either flies outside or learns the way of the demon race. It can only stay in the world ring, control the mechanical puppet, and rush out after fighting.

The special secret method of Yanxing Giant Beast Clan, which is cultivated by Yanxing Giant Beast clone, is far away from the second level of Dacheng. If the third level of Dacheng is cultivated, there will be a chance to expand the world in the body again, reaching two trillion kilometers. diameter.

But that requires a huge amount of resources, and there are no trillions of mixed yuan units without even thinking about it.

Therefore, the "Yanxing Giant Beast clone" is now honestly practicing and comprehending the "Beast God Mood".

"Simply cultivating "Yan Xing Bian" to the third level, I am afraid that it will have the resources of trillions of mixed yuan units." Yan Xing Giant Beast muttered. Not counting the resources needed to expand the world within the body.

However, if the "Yan Xing Bian" is successfully practiced, the body of the Yan Xing Behemoth can be expanded a thousand times.

Adding ten times the talent secret method "Body of Flame Star", it can be expanded ten thousand times!

The Yanxing Giant Beast is now the pinnacle of the world leader, with a body size of more than 2,000 kilometers.

When it is time to expand ten thousand times, that is 20 million kilometers!

Once you break through to immortality, it will be terrible!

The larger the body, once it becomes an immortal god, the cheaper it will be!

Because at the moment of stepping into the "immortal gods" from the realm master, the land of the origin of the universe and the sea of laws will be touched. At that time, there will be endless energy supply and the realm master's body will be directly converted into the "immortal divine body" in an instant. This kind of opportunity to get that terrifying energy to transform the immortal body for free, only once.

Some beings, who are only one or two meters tall, can convert immortal divine bodies, how much energy can they absorb?

Some bodies are as long as one or two kilometers, and the energy needed to convert the immortal body is naturally astonishing. Like a giant starry sky, a body that is thousands of kilometers long, absorbing energy is even more against the sky!

Perhaps the attack power alone is 10 times stronger, but the reserve of "immortal power" in the immortal body is many times greater.

The "Big Flame Star" who practiced "Blank Star Transformation" and possessed the secret technique of "Body of the Flame Star" had a unique advantage in this regard.

In history, there has been an immortal-level Yanxing behemoth relying on its huge size and the "star stream fire" self-explosion secret method to blow up a cosmic venerable to death.

However, the behemoths of the flame stars that can cultivate "Blank Star Change" to completion are legends in the history of the behemoths of the flame stars!

difficult!

Wang Yi's backing to the human race has a good chance to become a master of "Scorching Star Change", but he doesn't have enough money.

"This time, in the extraterritorial battlefield, it's a lot more money. You can't be without money, and you can change it with a heavy treasure." Yanxing Giant Beast scratched his chin.

He looked at his sharp claw knife, a bit disgusted.

At present, Yanxing Giant Beast mainly cultivates the law of fusion of fire and air. If the "Beast God Artistic Realm" reaches the fourth level, it can break through to the realm of the venerable.

Of course, the Yanxing Giant Beast was Wang Yi's clone, and the breakthrough conditions were different.

The current "Fire and Sky Beast God's Way" is only the third level of cultivation.

On the other side, the avatar of the Void Zerg clan was wearing royal armor, disguised as a captain of a vassal group of the human camp, and flew in a direction opposite to the two bodies in a biological spacecraft.

The three bodies act together and attack separately.

But the three bodies are the same soul, the consciousness is connected, and no matter what happens, they can all know at the same time.

The "Pronuclear" remained in the "Time Realm" and was carried by Wang Yi.

Because the "Time Realm" is bound by the human body, it can only be opened by the human body.

The sign-in is the same, and sign-in can only be done from the location of the human body.

"Hey, there is a team here." The Yanxing Giant Beast raised its huge head, and there was a hint of excitement in its dazzling and brutal red pupils.

...

With three bodies of Wang Yi, the human body can use the "Purgatory God Armor" to display the strength of the "Prime Seal of Kings", and the use of "Wang Armor" can display the strength of the "Limited Kings".

The Yanxing Giant Beast clone itself has the strength of the "king peak", plus the "king armor", it also has the strength of the limit of the king, and it is stronger than the human body.

The clone of the Void Zerg, plus the "Emperor Armor", is far more powerful than the "king limit".

No matter which body it is, it can roam wildly on the continent of Yan Jizhu.

If you really encounter an irresistible danger, you will either sacrifice your clone, anyway, the "pronuclear" can be resurrected in the time world.

Either hide in the realm of time, no one can do anything with him.

But the first two will reveal their own secrets.

Either call someone, whether the teacher Pang Bo Venerable or Chaos City Lord, he will be there on call.

But as a last resort, Wang Yi would not do this, and he was confident that no one on the battlefield outside the territory could push him to this point.

...

The Void Zerg clone wearing a purple-gold battle armor sat on the spaceship chair with his hands on the handle of a huge war knife. He is much better than the Flame Star Giant Beast clone. The Void Zerg clone itself is not large, and With the ability to transform at will, even if it becomes as huge as the avatar of the Flame Star Giant Beast, its strength will be affected.

The flying directions of the three-body spacecraft were not the same. They were triangular in shape and scattered in three locations on the land of Yan Jizhu.

Now, what the clone of the Void Zerg clan disguised was the aura of "Fenghou Peak".

The three-meter-high Void Zerg was covered in purple-gold armor, and there were a pair of folded wings behind it, with its eyes closed.

The purple shuttle-shaped spacecraft is flying in one direction.

The Void Zerg clone doesn't care where he is flying, he only cares if he has prey.

As a special life, the Void Zerg is a natural hunter, whether it is disguised, sneaked or killed, it is very terrifying!

Just waiting silently...

suddenly--

"A spacecraft was found at 950 million kilometers ahead." The voice of the intelligent system that controls the detection equipment rose in the control room.

The Void Zerg clone opened his eyes, his eyes were silvery white, without the slightest emotion.

"drop!"

A projection screen appeared in front of Wang Yi. The picture was a dark red biological spaceship flying in mid-air.

Biological spacecraft is actually a more common type of spacecraft in the universe.

But... it's only popular among demons and other ethnic groups. As for humans and machine races, they mainly use alloy spaceships and metal spaceships.

Biological spacecraft and metal spacecraft also have their own advantages and disadvantages.

Wang Yi's avatar of the Void Zerg clan uses a detection instrument of nearly a million yuan unit, which is considered good on the land of Yan Jizhu, just to be able to detect their situation while shielding the alien detection instrument of this biological spacecraft.

In the control room, a group of ugly creatures with a height of only about one meter two, covered with dark red hair like mice, are sitting together, stretching out their fluffy paws, each holding a glass of scarlet liquid and drinking.

They all faintly exude law fluctuations.

Six immortals.

"The rat race of the monster race." Wang Yi's eyes flashed.

One is a captain, and the other five are immortal warlords.

These six alien immortals had no idea that they had fallen into the eyes of death, and they were still drinking and discussing.

"I heard that there are several new powerful kings appearing on the Yan Jizhu Continent. It seems that there is a Zerg brood on the human side, killing people everywhere, killing many princes, and now he has a title called "The King of Insects".

"King Royal Insect? It's such a mighty prestige, aren't you afraid that the Zerg will trouble him? Who is it?"

"People have enslaved the Zerg brood, and they are afraid that you will make trouble."

The voices of these powerful squad clan have some envy.

This month, Wang Yi quickly made a name.

After all, he was able to kill even Feng Hou Pinnacle. The dozens of Feng Hou Feng he killed also included many Feng Hou Pinnacles, which completely beaten his reputation. There are also many, but this can only be done by the general high-ranking kings.

Yan sacrifices to the mainland powerhouse like a cloud, there are countless different races, but only thousands of crowned kings.

Every king has a name.

Because Wang Yi always uses the "Zerg Legion" before every shot, the Zerg Legion has terrible attacking power, so naturally he gradually gained the nickname "King of Insects".

When Wang Yi heard these aliens discussing himself, he listened curiously.

It turned out that in addition to the human body, his other two bodies, the "Big Beast of the Flame Star" and the "Void Zerg" also received two titles.

However, the "flaming star behemoth" is the "flaming star world lord", especially abnormal, it can be called the most abnormal Yan star behemoth in the history of the outer battlefield, the world leader will kill Fenghou Pinnacle! Possess a combat power that is at least comparable to that of high-ranking kings! Let many powerhouses in the extraterritorial battlefield look at him!

If it weren't for the genius of the human race, but for the Yanxing behemoth, without a special reward for killing, there might have been many powerful people looking for trouble.

"Void Zerg" made many shots, and also received a name-"Hunting King", which means that it appears suddenly every time, kills with one blow, and is extremely brutal, and no prey can escape.

The three names represent the characteristics and styles of the three powerhouses, all of which are highly evaluated, and the "Void Zerg Clone" is even more rated as the strength of "The Peak of the King"!

Hearing this, Wang Yi couldn't help but feel that news of the foreign battlefield spread quickly. He had only been here for a month, and he actually gained a name so soon.

But this is also related to his strength and frequent shots to kill Fenghou.

The stronger the strength and the sturdier the record in the extraterritorial battlefield, the fame will easily spread to hundreds of millions of ethnic groups.

Ming Chuan Universe, this is also the lifelong pursuit of many strong people!

However, Wang Yi is only just showing up, and he is still far from the famous universe.

While Wang Yi was thinking, the monster clan spacecraft flew away from the detection range of the detection instrument, but Wang Yi had no intention of continuing to chase it.

Wang Yi's human body continued to fly towards the destination of the Sacrifice Tower, while the two major clones of the Yanxing Giant Beast and the Void Zerg were hunting and killing the immortal alien races everywhere in the Yan Jizhu Continent.

...

In a mountain range billions of kilometers away from the avatar of the Void Zerg, a pyramid spaceship is hidden in the void. In the spacecraft, there are two mechanical tribesmen sitting together. The two mechanical tribes are all made of metal. Very similar, at first glance it looks like two metal people sitting on two alloy chairs respectively.

"Haha, Imoli, this big fish we found this time, we will jointly kill him, and then the spoils will be divided equally." One of the mechanical races wearing black streamlined armor grinned openly.

The bald but handsome young mechanical race man sitting opposite him shook his head.

"No, no, no, Karnev, this time I found him first, and I first set a trap to lead him in, so I have more credit, and I have to get 10% more..." The mechanical youth saw his opposite companion. His face sank slightly, and his tone changed, "Of course, the battle is not over yet, our prey is still struggling, and we are still fighting with trapped beasts, so I propose that whoever has the most power in the battle can fight. More trophies will be distributed later."

He added another sentence, "Of course, what I have extra will remain the same."

Karnev pondered for a moment, and then reluctantly said: "Well, for your brother's sake, I agreed to this proposal. Next, we will work together to solve our enemy."

"Haha...You are a high-ranking king. Although I am a little behind you, I am only a junior-ranking king, but my mechanical army was created with the help of my senior. This alien named king!" Imoli laughed happily.

Karnev's expression is also much better. With his arrogant and arrogant personality, he will easily agree to the party's conditions, except that the opponent is not weak~[www.mtlnovel.com](http://www.mtlnovel.com)~ and because the other party's brother is a member of the Fang Yan's sacrificial mainland machine clan Super strong.

"Boom..."

And in the vast mountains, countless flames and electric snakes penetrate the void, and the entire flame thunder and lightning prison has a space of hundreds of millions of kilometers in diameter. The thunder and lightning puppets of the mechanical clan, the flame puppets are forming a formation in the middle of the siege of an immortal king, and various powerful mechanical weapons are suppressing and attacking the immortal king.

A fierce battle is going on, the space is torn apart, the sound of a huge explosion shakes the sky and the earth, and the mountains are wiped out in ashes.

And more than one billion kilometers away, a purple shuttle-shaped spacecraft is flying over here quickly.

"Hey, why didn't I see people? This detection instrument is still not enough. If only there is a mechanical clan seal king detection instrument." A certain big knife is already hungry and thirsty.

[Chapter 323: it's fate!](#)

"Master, an energy combat response was found at 980 million kilometers ahead."

"Huh?" The Void Zerg clone sitting on the chair opened his eyes.

"What did you find?"

"Only the phenomenon of energy combat was found, and no enemies were found in the detection range."

"Oh?" Wang Yi was finally interested.

Although the instruments carried by Wang Yi's Void Zerg clone were only worth a million yuan, they were considered good at the Fenghou level, and only a small part of Fenghou was willing to buy them.

To be able to make the detection equipment invisible, it can only be said that the detection equipment used by the other party is better than Wang Yi's.

"Fenghou or king?" Wang Yi became interested.

"Pass the battle screen over, and also, immediately move towards the battle location." Wang Yi ordered without even thinking about it.

The purple shuttle-shaped spacecraft turned its direction slightly, and then flew towards the battle site at full speed.

"Huh?" Sitting on a chair, Wang Yi looked up at the picture on the screen in front of him, raising his eyebrows slightly in the cage of thunder and lightning flame prisons spreading hundreds of millions of kilometers in diameter. "The thunder and lightning prison of the mechanical race, the fire sea prison?"

Wang Yi's vision is very high now, and he can see at a glance that this thunder and lightning flame prison with a diameter of hundreds of millions of kilometers contains the terrifying power. . And for the deployment to be successful, I am afraid that the cost of the equipment will have to be calculated in units of 100 million yuan!

"It's a big deal, it doesn't seem to be an ordinary mechanical clan powerhouse."

The detection instrument still could not find the enemy, but it was able to pass back the magnificent battle scene shooting.

And in the vast cage where thunder and lightning are intertwined and flames soaring, millions of mechanical puppets are forming a legion, besieging a strong man, and smashing the world.

Moreover, the mechanical puppet army is clearly divided into two sides.

On one side, there are purple robots about fourteen meters tall. Each of these purple robots is carrying a heavy alloy war knife. At the same time, there are electric snakes running on the surface of their alloy bodies.

On the other side, there is a crimson mechanical puppet with weapons such as war swords, giant swords, large axes, and spears on the back.

Wang Yi could tell at a glance that each of these mechanical puppets was entirely made of F9 grade metal 'Purple Kun Thunder Mother' and 'Red Mixed Copper Mother'.

They have similar numbers, around 5 million.

"Thousands of F9-level mechanical puppets, each one is completely made of F9-level metal. Even if you save costs, an F9-level mechanical puppet is at least a metal block of this size, such a large metal block. It's worth more than 10 yuan unit." Wang Yi was also a little surprised.

The metal materials for these mechanical puppets alone cost more than 100 million yuan in total.

What surprised Wang Yi more was the combat power that these puppet legions displayed.

I saw that the more than 10 million mechanical puppets were divided into ten camps, distributed up, down, left, and right. Tuantuan surrounded the strong alien in the middle. Each camp had one million F9-level mechanical puppets, and four hundred of the next four camps. Thousands of mechanical puppets are accumulating energy in their chests at the same time.

boom! A million beams of light shot at the enemy at the same time, converging into a huge beam of light with a diameter of 100 meters.

The power of each beam of light can be comparable to the full blow of Fengwang Elementary!

Four beams of light are equivalent to a combined long-range energy attack by four elementary kings.

After the four beams of light fell, four more beams of light fell, endlessly.

The remaining one million crimson mechanical puppets and one million purple mechanical puppets did not join the attack. Instead, they released a kind of energy like a wire mesh, trapping the immortality of the alien races layer by layer, but it did not affect it in any way. The combined attack of the surrounding mechanical legions, on the contrary, the immortality of the alien race was entangled like a bug falling into a spider's web, constantly breaking open and continuously combining, no matter how hard it can break away.

This energy light net gave Wang Yi the feeling that it was ten times more dangerous than other mechanical legion beam attacks.

Outside the cage of lightning and flames, there are suspended pyramids, which are the cages of them, and at the same time, they continue to provide energy to the mechanical legions.

"boom!"

"boom!"

The palpitating beams of light blasted down, blasting the immortal kings in embarrassment.

Wang Yi squinted his eyes, "With such powerful energy, this mechanical puppet is not a cheap metal lump, and its energy core is also very high-end. Such a mechanical puppet is worth hundreds of yuan units at least. Billions of mixed yuan units."

"It seems that the king of the mechanical race is infallible." A smile appeared on Wang Yi's face.

He was worrying about where to find a high-end detection instrument, and this machine clan was sent to the door.

"But..." Wang Yi glanced around the battlefield, it was still empty, no enemy could be found. "The strong mechanical clan hides it with a detection device. I have to find him first."

Regarding the fighting methods of the powerful aliens, Wang Yi has checked some information through the virtual universe network.

For example, the machine clan, the description of the data is that "machine clan people are essentially intelligent life, and each mechanical clan person represents a mechanical empire. With the resources at hand, various layouts, fine and terrible control, cooperation, and strategy will form a variety of Terrible attack".

Every mechanical tribe is actually a mechanical empire!

Of course, the strength of the mechanical empire depends on the "control and command ability" and "richness", both of which are indispensable!

Suppose there is a huge mechanical corps... but smart combat alone is not enough. You have to rely on the "mechanical tribes" to control the entire corps separately, and allow the mechanical corps to perform attacks that contain laws and perform subtle cooperation. , The combat effectiveness may be increased by dozens of times and hundreds of times.

Robot people are essentially intelligent life.

As for the intelligent life, once it understands the law and cooperates with its innate ability to calculate and command... it is very terrifying.

Coupled with various "mechanical weapons", the combat effectiveness can be brought to a terrifying level!

This is a pinnacle group no less than the "Zerg"! The Zerg mother emperor, fighting more instinctively!

The robot tribes, but the battle shows more wisdom, skill, and strategy!

"Looking at this situation, it should be that two powerful mechanical races are besieging an alien king." Wang Yi can see that the alien king is also a high-level king, and his strength is also considered a super master in the Yan Jizhu continent, but he is being mechanically attacked. The ingenious arrangement of the clan makes him embarrassed and in a bad situation.

"It's a good opportunity for me to take advantage of the fact that the mechanical race is besieging the alien race now, and the energy is scattered, and there is no time for him to take care of him..." A smile appeared in Wang Yi's eyes.

Wang Yi's spacecraft quickly flew to the edge of the battlefield.

In the Pyramid spacecraft, the two mechanical puppet regiments commanding the battle of the mechanical puppet army also discovered his existence when Wang Yi flew into the range of their detection instruments.

Their detection instruments are much more advanced than Wang Yi's. The mechanical clan always attaches great importance to science and technology. Their detection instruments are all equipped with the highest configuration of their own, which are priced in units of 100 million yuan.

"A spaceship appeared 990 million kilometers away."

At first they were a little worried, but when they saw the breath intensity detected by the detection equipment, they relaxed.

"Fenghou Dingfeng?"

"A little bug ran in."

"Leave him."

The primary goal of the two great mechanical clan powerhouses is the immortality of the high-ranking alien race in front of him. As for the Fenghou pinnacle? They don't have time to pay attention to it.

The kill value of Fengwang high-ranking powerhouse is much stronger than Fenghou pinnacle.

Originally they thought that Fenghou Immortal would flee far away when he discovered the battle here, but then they discovered that the shuttle-shaped spaceship actually continued to fly towards here.

"He came towards us, it is less than 300 million kilometers away."

"What's going on? He is the pinnacle of Fenghou, does he still want to participate in the battle with Fengwang? Isn't he afraid of death?"

The mechanical black armored powerhouse and another handsome bald-headed young man looked at each other, and they felt something was not quite right.

"Shit!" A purple shuttle-shaped spaceship appeared on the screen, and inside the spaceship was a humanoid creature with a pair of wings and a pair of wings covered in a purple gold armor.

"It is indeed Fenghou Dingfeng, but it looks very strange, have you seen it before."

"No, there is no information about him in my database."

Karnev said, "It should be the one who has just come to offer sacrifices to the Lord Continent."

"Well, maybe." Imoli, a young man from the mechanical race, also nodded.

Neither of them paid much attention to the changed appearance of the Void Zerg clone.

"However, we are now dealing with the critical moment of this alien king, and we can't let the sudden intrusion of the king be disturbed." Imoli's tone was murderous.

"Stop him first. You can't let him get close to this battlefield."

"Knock him away, if he doesn't know, kill him."

The two powerful mechanical clan soon reached a consensus at the same time.

It's not that they don't want to keep Wang Yi, but that they can't allocate more energy.

More importantly, the alien king who had fallen into the siege.

If they let go of a prince because of Wang Yi, it is estimated that they will feel distressed to death.

On the smooth surface of the silver-white pyramid they were riding on, the surface textures were very special. At this time, the palpitating energy was constantly flowing through these textures. The energy began to accumulate and accumulate, and gradually, a pattern appeared on the surface of the metal plate. A purple ball of light.

"attack!"

Wang Yi's avatar of the Void Zerg was wearing a purple gold exquisite and gorgeous battle armor, with his hands around his chest, and a pair of wings behind his back. Standing in front of the screen in the control room, he watched the fierce battle scene on the screen.

suddenly--

A dazzling beam of light instantly pierced the sky, directly bombarding the shuttle-shaped spacecraft that was flying fast in the distance.

"boom!"

In an instant bombardment, part of the hull melted directly!

At the same time, the destructive power contained in the beam of light directly tore apart the thick E9-class alloy hull of the spacecraft, turning the entire spacecraft into an exploding fireball in an instant.

Rumble... The bombardment wave spread all around, spreading for tens of thousands of kilometers.

"call!"

A figure flew out of the shock wave of the explosion, but it was not damaged at all.

He turned his head and looked in one direction.

"Alien, leave!"

An icy voice came full of warning.

As far as humans are concerned, other races besides themselves are alien races, but as far as machine races are concerned, other races such as humans are also alien races.

Wang Yi ignored the warning, but continued to fly forward quickly.

He is already less than 200 million kilometers away from the battlefield and will be able to arrive soon.

"court death!"

The owner of the voice is currently irritated.

Suddenly, a dense cluster of light spots burst out from a certain position in front. These dense clusters of light spots can be seen from a long distance. If you look closely, you can distinguish... a large number of purple mechanical puppets with a height of 14 meters, each of which is a mechanical puppet. , All holding metal spears, thunder and lightning flashing on their bodies.

The number is at least one million!

"Om~~" Thousands of thunder and lightning suddenly appeared in the millions of thunder and lightning mechanical puppet army, besieging the oncoming Void Zerg, all these thousands of thunder and lightning contained "law of time" attacks, and the surrounding Countless mechanical puppets crazily absorb the lightning, and at the same time pass it on to the "core puppet" that sends out lightning attacks.

That powerful thunder and lightning energy combined into a huge ferocious thunder and lightning spear, which was thrown at Wang Yi, tearing the surrounding void in an instant.

Like a flash of light that spans time, it came to Wang Yi in an astonishing speed.

That huge energy was shocking, and this blow definitely reached the level of a king.

The two immortal mechanical races sitting in the Pyramid spaceship watched this scene distractedly, and sneered: "It's really stupid. You can't walk away. This wave of lightning attacks will hurt you...what!?"

When the huge thunder and lightning spear was about to pass through the immortal figure in the purple and gold armor, he disappeared.

"What about people?"

"It didn't hit the physical target, so detect it quickly...no!"

The two powerful mechanical clan experts were stunned to see that the purple and gold armor immortal appeared in their spaceship's position instantly, and looked over.

Their bodies trembled at the same time.

"This spatial fluctuation is..."

"Teleport!"

"This is Teleport!"

"He is not Fenghou, he is Fengwang!"

The two mechanical clan kings immediately reacted.

They were found!

In fact, it was only a moment.

"Om!"

A beautiful, palpable, huge knife light slashed straight down, and slashed heavily on the silver-white pyramid spacecraft of the Mechanical Race that was thousands of meters high.

"Om!" When the spacecraft encountered an attack, secret patterns appeared on the surface of the spacecraft, but they had no effect.

The metal material alone is as hard as the F9 class, coupled with the mechanical technology, it is much stronger than the human f9 class super spacecraft. Under this terrible knife, it was directly torn a big hole. .

"Huh!" The next moment, the Void Zerg clone rushed in.

And the two mechanical clan kings who detected the power of the sword looked even more ugly.

"Feng Wang Pinnacle!"

It is so easy to tear his spaceship defenses with a single stab. Even if ordinary high-ranking kings can't do it, there is only Fengwang pinnacle~www.mtlnovel.com~ who is he..."

"Damn, he's here!"

"Close the entrance to the passage, and can't let him come over!" The two mechanical clan kings were a little panicked at this time.

The mechanical clan powerhouses generally have most of their strength in the mechanical corps and various weapon arrangements. Although their own strength is not bad, it is still a bit behind other kings who rely solely on their own force.

Let them fight melee with a warrior of the peak of the king? Isn't this a ravaged life?

"Boom~~" The entire pyramid spacecraft was shaking violently, and it was thrown out uncontrollably, as if a wild beast was ramming.

Both mechanical clan kings could feel that a powerful and fierce aura quickly approached.

#### [Chapter 324: The tragic king of the mechanical clan](#)

In fact, in normal battles, even the pinnacle of the king, it is difficult to break into the side of the king of mechanical clan.

But once the two mechanical clan kings were wholeheartedly besieging another alien clan king, most of their power was put in.

Secondly, they didn't expect that a Fengwang Summit would pretend to be a Fenghou, so that they could not see it, and it was too careless.

Third, it was the teleportation of the clone of the Void Zerg, which caught them by surprise.

Many of them are carefully arranged, but they are all in vain.

Seeing Wang Yi brandishing his saber in the spaceship passage, advancing violently, as if entering an uninhabited state, the bald and handsome young man of the mechanical race said viciously, "God of Hunting!"

They finally remembered the peak power of Feng Wang, who had risen to fame on the Continent of Yan Jizhu.

But they never expected that they would encounter this terrifying strong man in such a short time, and it would still be such a dangerous situation.

"Boom!" The violent force directly split open the alloy door of the control room passage, and the fragments shot in the air. The two mechanical clan kings stood calmly on the spot, watching the tall figure walk in.

Slowly speaking, in fact, it means counting the interest time, and then kills them in front of them.

"King Lei Yuan."

"Fire Sting King."

Wang Yi's cold silver-white eyes turned, glanced around the indoor situation, and then he understood, grinning open.

The names of the two great mechanical clan kings, among the thousands of kings on the land of Yan Jizhu, they are also quite famous and powerful.

But "King Lei Yuan" is a high-ranking king.

The Firethorn King is a first-ranked king, but the actual combat power is said to be very close to that of a high-ranked king, and there are some special methods that are more difficult to deal with than many high-ranked kings.

"It's a good fate to meet the two of the Machine Race here." The Void Zerg clone smiled, and the sword slowly dropped.

At this time, because the Void Zerg clone broke in, the fighting outside has stopped. The lightning and flame hells covering hundreds of millions of kilometers in diameter have been transferred to the Pyramid spacecraft, and tens of millions of mechanical puppet legions have also moved frantically. Coming from here.

The alien king who was out of danger looked at the sudden situation in amazement, but still didn't understand what was going on.

But after finally getting out of the sea of suffering, he was not willing to let go of this opportunity, hesitated, and finally decided to turn around and leave this place.

During the flight, I was a little bit lucky and puzzled.

"What happened to those two machine races?"

"Huh?" The alien king suddenly saw a dazzling fiery rainbow flying over in front of him.

In the rainbow light, there is a monster with brilliant golden wings and huge scarlet scales. A pair of scarlet pupils are full of endless desire for destruction.

As it approaches, one can feel a hot murderous air permeating the sky and the earth.

"The Lord of the Flame Star Realm?"

The Yanxing Giant Beast is now well-known in the Yan Jizhu Continent, and the realm master has a high-level kingship battle power, which has shocked many powerful people.

On the other side, at the same time, there was an afterimage bursting through the air. It was a human with a pair of feet on the Love Pipit, wearing a dark red armor, and showing only a pair of cold and dark eyes.

The high-ranking king of the human camp, the king of insects!

...

The Pyramid spacecraft felt the avatar of the Void Zerg species teleported over by two large bodies, looking at the two mechanical kings who were close to enemies, grinning, and raising the sword in his hand.

"God Hunter, wait a minute!" The bald youth of the mechanical race suddenly said.

"King Firethorn, at this time, what else do you have to say." Wang Yi said indifferently.

"King of Hunting God, we admit that you are powerful and worthy of being the pinnacle seal king, but do you think you must have eaten us?" The "King Lei Yuan" next to him couldn't help saying.

Wang Yi said coldly: "Try it and you'll know."

Under normal circumstances, a pinnacle seal is indeed stronger than a high seal and an elementary seal, but it is not so easy to kill them.

Under normal circumstances, only those with the ultimate power of the king can easily kill the elementary class of the king, and the high class of the king...It is very difficult to easily kill such a powerful person, unless it is a powerful person who is proficient in soul attacks. .

However, soul attacks are inherently very complicated and difficult. Its power is amazing, and it also makes the difficulty extremely high. Generally, only one of dozens of crowned kings can accidentally have a specialization in soul.

So although "Lei Yuan King" and "Fire Sting King" were frightened, they were not too scared.

Unfortunately, they don't know the true strength of the Void Zerg clone.

That is far beyond the limit of the king.

And outside the pyramid spacecraft, flames and lightning were permeated, and an infinite army of mechanical puppets surrounded it, but there was no way to get in, so they could only stand outside.

The handsome young man with a bald head of the mechanical clan spoke at this time: "The Hunter King, I admire you as the top leader of the king, but you want to kill us, but it is not so easy... Everyone is the king, you should also know, the king. The battle between them is not that simple. If it is a waste of effort, why not just let it go?"

Almost all powerful kings have their own cards, not to mention that King Lei Yuan is a high-ranking king at any rate. If you really put it together, even if the King of Hunting, who is the pinnacle of the king, kills King Lei Yuan and King Fire Stabbing, the price may be paid. To be more than 5% immortal divine body.

This price is too high...

Why is this bother?

Of course, they didn't know that the clone of the Void Zerg Race was just a world master, and could not burn immortal divine power at all, nor did they need to burn immortal divine power.

Wang Yi remained unmoved and looked at him, "Is it finished? Go to death when you are finished."

"brush!"

"The Hunting King!"

The two mechanical clan kings roared at the same time.

The distance was too close. When the Void Zerg clone rushed over, the battle between the three kings broke out instantly.

In the narrow spaceship control room, the wings of the Void Zerg clone vibrated, and the figure blended into the space fluctuations like a ghost, appearing ghostly beside the two mechanical kings, while the bodies of "Lei Yuan King" and "Fire Sting King" were simultaneously on the body. The battle armor appeared, and a purple warhammer and a red spear also appeared in his hands.

The avatar of the Void Zerg clan is holding knives in both hands, the long knives are danced, and two dazzling long rainbows of knives slash at the "Lei Yuan King" and the "Fire Stabbing King" at the same time.

"Lei Yuan King" and "Fire Sting King" tried their best to resist.

"boom!"

The three weapons collided together, and the extremely powerful force erupted directly inside the spacecraft, the space was shattered, the control room was completely destroyed, the entire spacecraft trembled violently, and cracks appeared in the bulkhead, "King Lei Yuan" At the same time as the "Fire Stinger King", he flew out and hit the bulkhead, sinking deep into the metal wall amidst the loud noise.

They are not opponents of the Void Zerg clone at all.

Even if the clones of the Void Zerg race only use the power of the peak of the king, it is enough to crush them.

"Karnev, you stop him first, I first go out, and then you come out again, we will control the mechanical puppet army to deal with him." The handsome bald young man "Imori" of the mechanical race eagerly said.

"Good!" King Lei Yuan did not hesitate either.

Playing against Wang Yi in the spacecraft was too bad.

At this time, Wang Yi's figure appeared in front of them again. The speed change was too ghostly, and it made King Lei Yuan and King Fire Stabbing his heart beat.

Wow!

The beautiful and intriguing light of the knife tears through the space and emerges like a gentle moonlight, but it implies murder.

King Lei Yuan desperately resisted, "Dang!" The heavy hammer in his hand blocked the sword, but the whole person was smashed deeper into the metal wall by a surging force, and "Fire Sting King" Imoli was on the other side. Even more unbearable, the whole person, together with the spear weapon, was smashed into the air by the knife, and the divine body was also torn apart.

"Ah!" The Firethorn King let out a painful cry, his voice full of fright.

"My \*\*\*\* body!"

After all, he was only a junior entrusted king, and he could only fight against some higher entrusted kings by some means, but his own divine body was not so powerful. When Wang Yi's knife shredded his body, the divine body was also lost.

"My divine body lost 0.7%!" Firethorn King gritted his teeth.

Wang Yi's erratic and ghostly speed was too terrifying. They couldn't escape from it at all. It was very detrimental to them to be stuck in this narrow and solid spacecraft to fight.

I am afraid that before the spacecraft is destroyed by the battle, his "Fire Sting King" Imoli will be seriously injured or even fall.

It can only be said that Imoli was too unlucky and the fleeting years were not good, and Wang Yi just happened to be stuck in the spacecraft and was forced to fight.

And if he was outside, he would burn the immortal divine body and still escape. Here, he could only bite the bullet and fight Wang Yi.

For the first time, Imoli hated his spacecraft so sturdy.

Although King Lei Yuan was willing to help, the humans had already thrown him away and prepared to kill the weaker "Fire Sting King" first.

Seeing the human being charged with murderous aura again, Imoli hurriedly said through the voice: "Wait! Hunter King, you don't come here! Otherwise everyone will be finished together!"

At the same time, he flipped his hand, and a black crystal ball appeared in his hand, and a heart-palpating energy wave radiated from the crystal ball.

Wang Yi stopped.

"This is....."

He looked at the black crystal ball. The black crystal ball looked ordinary on the surface, but the energy fluctuation exposed the unusualness of this black crystal ball.

Very familiar.

"'A-812' Grade Vulcan Origin Crystal!" The "King Lei Yuan" next to him was taken aback. "Imori, you are crazy, you actually took out the 'A-812' Vulcan Origin Crystal in this place!"

"I'm not crazy!" The handsome young man with a bald head of the mechanical clan roared, then his eyes fixedly looked at the tall human being covered in purple and gold armor.

He also blamed King Lei Yuan in his heart. If he wasn't useless and couldn't stop the Hunter King, would he need to take out this long-secret Vulcan Origin Crystal?

"Hunt the king, this is my life-saving trump card. The 'A-812' grade Vulcan Origin Crystal is a high-end product of the Vulcan Origin Crystal. Vulcan Origin Crystal was only obtained after I exhausted many years of wealth." The mechanical clan youth said in a low voice.

The higher the power of Vulcan Origin Crystal, the higher the price.

It only needs 800 million points to be comparable to Fengwang's self-destruction, but this A-812 Vulcan source crystal, like Wang Yi, would cost 12 billion points to purchase. However, the machine clan has advanced technology and is in the manufacture of Vulcan source crystal. Technology is the strongest in the universe, the cost is not that high, and the price paid through internal channels will be lower.

Imoli got this Vulcan Origin Crystal through his senior, and it cost almost 8 billion yuan unit.

Such a huge wealth can almost bankrupt the Emperor's immortal family. With such wealth, many strong people would rather buy treasures to increase their strength, or purchase powerful weapons, etc., are among the few who are determined to buy a Vulcan Origin Crystal.

A mess, the control room full of barbarians quieted down.

Imoli's behavior is normal in the fight between the strong.

Before fighting each other, test each other.

There is the possibility of both sides hurting, and the strong are generally reluctant to fight each other.

Imoli feels the same way. No matter how strong the Hunting King is, it is also the pinnacle of the king, not to mention that in such a closed environment, there is no escape, and the explosive power will be even greater. Facing one at close range is equivalent to sealing. The Vulcan Origin Crystal with 3 times the power that the strong Wang Dianfeng exploded, even Feng Wang Dianfeng would be seriously injured or even fall.

Of course, Imoli and King Lei Yuan are sure to die.

If Imoli hadn't been crushed by Wang Yi's clone of the Void Zerg, he couldn't escape, and he wouldn't want to take it out.

But it won't work if you don't take it out, the clone of the Void Zerg is looking for him to kill, and King Lei Yuan can't help.

In other words, there is a high probability that King Lei Yuan could survive and escape under Wang Yi's attack, but Imoli was definitely killed. In this case, how could Imoli not be impatient and jealous.

Although "King Lei Yuan" was full of unwillingness, he also understood Imoli's feelings, so he remained silent at this time and did not speak.

The two mechanical clan kings looked at Wang Yi at the same time.

How does he decide?

In silence, Wang Yi said indifferently. "So what? You must die today."

"crazy!"

Hearing Wang Yi's words, this thought came to mind at the same time in the minds of the two mechanical clan kings.

At the same time, I felt incomprehensible.

What kind of hatred? As for you, a pinnacle king, can't live with us like this?

"Swipe!" The Void Zerg clone's figure moved again.

"The Hunting King!"

The two mechanical clan kings shouted at the same time.

"King Lei Yuan! If you don't help me, everyone will die together!" Imoli has no way. Who would have thought that this "King of Hunting" is so crazy, before he comes up with a source of fire \*\*\*\* that can die together. Jing Empress actually wanted to kill them so persistently.

This is simply a lunatic!

King Lei Yuan's eyes flickered.

"boom!"

The two sides fought against each other again, and King Lei Yuan and King Fire Stinger were bombed out at the same time without any accident, and King Fire Stinger was stabbed once again, causing his Vulcan Origin Crystal to almost fail to grasp and explode.

"Karnev!" Imoli's eyes suddenly cracked.

King Lei Yuan, who had originally flown out, suddenly changed the subtle angle with the help of the power of the hunting king, and rushed to the spacecraft's hatch.

In fact, the position of the hatch is very close, and you can rush over in an instant, but the Hunting God King's body speed is too abnormal, and he never gives them a chance.

"Imoli, don't blame me, you are dead, I don't want to die with you." King Lei Yuan, who rushed to the hatch, was also very aggrieved, but he knew that he could only stay with Imoli. Die together.

As a high-ranking king, he didn't want to just die in such a place.

But what is faster than him is Wang Yi's knife~www.mtlnovel.com~Peng! "King Lei Yuan also wanted to use weapons to block and use Wang Yi's power to rush out, but Wang Yi didn't give him a chance. He directly smashed his whole person onto the metal wall next to him with two ingenious knives, using part g. The special metal walls made of Grade Metal are extremely hard, and only a few cracks appeared under the battle of the three powerful kings, and they were far from being completely destroyed.

The failure of King Lei Yuan to escape also made King Firethorn completely desperate and angry.

"Die together!"

He detonated the Vulcan Origin Crystal in his hand!

"Do not....."

"boom!!!"

King Lei Yuan's words were instantly overwhelmed by the huge explosion.

#### [Chapter 325: Kill 3 kings](#)

"Damn Imoli, he killed me." King Lei Yuan cried secretly in his heart. Without hesitation, a purple carapace condensed on the surface of his body, burning the power of the divine body and pouring it on the carapace, and the carapace was like awakening. An ancient breath rose, and at the same time a strange turtle phantom appeared to protect Lei Yuan King inside, praying in his heart, "I hope that the purple thunder armor I got from the thunder hidden realm can let me live from this big explosion. Come down..."

Except that Imoli, who knew he was going to die, gave up struggling, the Zijin Armored humans and the mechanical king "King Lei Yuan" did the same thing at this moment-resist the explosion!

"Boom..." Under the energy impact comparable to the three times the self-detonation power of Fengwang Peak, the turbulent flow of space debris instantly shattered into unbreakable particles before the super energy explosion.

And because inside the enclosed and narrow spacecraft, what originally exploded in all directions but was forced to be restrained inside, the power soared again!

The control room made of some G-grade metal and a large amount of F9-grade metal could no longer withstand this huge energy. The walls quickly cracked, shattered, and were swept elsewhere by powerful impact and space debris.

"boom!!!"

It was quiet for an instant, and the next moment, hot light rushed out of the spacecraft like the sun rising, and the spacecraft exploded in an instant. The surging Vulcan source crystal energy swept in all directions, swallowing countless mechanical puppets around it like a tide.

Tens of millions and a staggering number of mechanical puppets are extremely vulnerable to the explosive shock wave that is more powerful than the self-detonation of the Fengwang peak. The hard metal body was directly shattered and torn, and was instantly destroyed by the explosion. .

The dazzling white light spread rapidly, covering a range of millions of kilometers, all the earth, rocks, everything turned into the most basic particle stream... After a long silence, it ushered in the rumbling explosion, and the invisible shock wave impacted in all directions and moved away. The mountains at the place blew up directly, tearing the earth millions of kilometers away into huge valleys with no bottomless...

Over the endless boundless land, the flame star giant beast clone and the human body fighting with the alien kings took a slight pause at the same time, looking at the place where the explosion appeared.

After that, the two bodies did not hesitate, and both increased their attacks.

The golden wings of the Yanxing Giant Beast shook, and Shi started to comprehend the special body technique from "The Six Paths of Fire", leaving a tortuous trajectory in mid-air, and the speed quickly soared to an astonishing level.

"Om!"

The Yanxing behemoth flicked its wings and turned into a dazzling red light. A huge space crack appeared along the way, as if a twisted lightning bolt rushed directly to the high-ranking alien who was bruised by the two bodies. King.

"The Yanxing Giant Beast! Human!" The besieged alien king was extremely angry.

He really poured blood mold today. He had just escaped from the heaven and earth nets arranged by the two mechanical clan seal kings, and he encountered the sudden flame star realm master and the human "Insect King".

Originally, he didn't care too much, because the news circulated from the outside world, "The Flame Star Realm Lord" is only a high-level king-closing power, and the "King Insect King" is even more terrifying because of the combined attacks of the Zerg army, and it is only a high-level king-closing force.

He originally thought so, but when the war started, he realized that he was wrong.

Who said that the two of them are high-ranking kings fighting power?

This he is obviously the two pinnacle crowned kings!

An alien entrusted king can't deal with it, let alone two teaming up to besiege, and the ravaged one has no temper.

"Wow!" The Yanxing beast instantly turned into an extremely dazzling golden rainbow light. This dazzling golden rainbow light was invincible, and directly tore the space of the universe. In the cracks

and gullies of the universe full of space debris, Yan Xing The giant beast rushed out, slashing its wings directly on the terrified alien king...

There is nothing to resist!

"Shi!" The alien king was divided into two in an instant, full of horror.

Before he could recover, a black-and-white streamer flew through the air and pierced into his divine body at a speed that could not cover his ears.

The "black and white swordfish" formed by the cosmic magic soldiers pierced into the immortal divine body that was still full of cracks in the alien king, and Femore's venom instantly began to corrode.

"No!" The alien king hadn't cared yet, but then he felt that the divine body was rapidly annihilated, completely shocked by the toxicity of the Femore venom, the first time he chose to completely separate the divine body, but it was too late!

It takes 1 gram of venom to kill the strongest king, but only 0.1g of venom is needed for the strongest king.

The alien immortal, with its whole body lingering in the thick earth-yellow air current, stared in horror, and then immediately collapsed and annihilated, and fell to the ground.

And Wang Yi, who controlled the "cosmic warrior" smeared with Fei Mo's venom to kill the king, stood in the distance and watched this scene with his own eyes.

This is also the first time he has tested the effect of "Fermore Venom".

Extremely powerful, even if Wang Yi's two bodies, humans and Yanxing Giant Beasts, combined their strengths, the high-ranking kings who were difficult to kill were instantly killed by the "Fermore's Venom".

In order to do experiments, Wang Yi applied only 0.5 grams of "Fermore Venom" to the cosmic warrior. When he pierced the alien immortal armor, he also lost 0.2 grams of venom. Only the real 0.3 grams of venom eroded into the immortal body. .

With just 0.3 grams, it instantly corroded the divine body of a high-ranking king.

There are many shortcomings of "Femore Venom", because it is solidified on the weapon, and it is easy to wear out in battle.

Moreover, some powerful kings felt that the venom had entered the body, and could completely isolate the corroded part of the divine body in an instant.

So the best way to use venom is just like killing a foreign king.

Shatter the opponent's divine body first, so that the opponent has no resistance.

Then pierced into the opponent's broken \*\*\*\* body with a knife, and there was no battle armor to resist, and no weapons to resist, you could easily kill!

However, it is not so easy to shatter an immortal divine body.

"Woo... one gram of "Fimo Venom" is equal to 300 million points. I just used 0.5 gram, which is 150 million points." Wang Yi muttered in his heart.

"However, for killing a high-ranking king, the military merit reward is 100 trillion military merits."

"Equivalent to 1 billion points, as well as the spoils left by the slain King Seal, I still earned it."

Wang Yi is still in the mood to calculate here, and he doesn't seem to worry about the clone of the Void Zerg who is affected by the explosion in the distance.

And Wang Yi does not need to worry.

...

The original battlefield, the endless land, mountains, lakes, clouds, ice and snow covering millions of kilometers, all disappeared, leaving nothing but an endless void.

The terrible aftermath of the explosion before that still echoed in this void.

"call!"

A flash of lightning rushed out from the aftermath and turned into a purple and gold battle armor with a tall figure with a pair of wings behind it.

It is Wang Yi's clone of the Void Zerg.

From the outside, it was unscathed.

The deep silver eyes of the Void Zerg clone overlooked the vast void area underneath.

The big explosion in the spaceship just now involved him in an instant, but because of the protection of the "Imperial Armor", the explosion energy of the Vulcan Origin Crystal, which has a self-detonation power three times more than the pinnacle of the king, can be prevented when passing through the "Imperial Armor." The "Emperor Armor" who resisted the "Millionfold Peak Master Power" easily stopped it, and did not cause any harm to the Void Zerg clone.

However, the two mechanical clan kings, "Fire Sting King" and "Lei Yuan King", were undoubtedly killed in the explosion, and the only one who survived was Wang Yi.

Afterwards, the avatar of the Void Zerg took away the weapon armor, the world ring, and the space ring left by the two mechanical clan kings, and then left this vast area.

[Kill the Immortal God of the Sealed King: 31000]

...

The mechanical clan, the base camp of the virtual world.

The virtual world made by the machine clan can spread all over a star area.

Therefore, in the hundreds of star regions in the mechanical clan territory, each star region has a virtual world.

Although they are scattered in different star areas, each star area can be connected to the "base camp", and there is a base camp for overall scheduling. Of course... it's just very cumbersome, and ordinary robot people do not have the qualifications to enter the "base camp".

Generally, mechanical tribesmen on the battlefield outside the territory have to pass through the virtual world deployed by the "machine tribe" on the battlefield outside the territory. After a long period of transmission, their consciousness can enter the base camp.

The "machine clan virtual world base camp" is also called "Yulan World".

In a prosperous street in the "Yulan World", on the top floor of a blue crystal building, several powerful robots are chatting and talking.

"Haha...At that time, I fought with the "Shanguang King" of the monster race, and finally got the treasure by chance..."

"I really envy you "King Zhanchen", that treasure is worth at least tens of billions of Yulan units, right?" Sitting in front of the silver and white round table was wearing a dark armor with gleaming stars, bronze metal skin, and the water chestnuts. The mechanical clan powerhouse with golden markings on his face said with a hint of envy.

The blue unit of the mechanical race is equivalent to the mixed unit of the human race, but 2 blue units are equal to 1 mixed unit.

"Haha, it's all luck, luck." The tall mechanical race young man sitting opposite was full of smiles. He was a burly figure, about three meters tall, and his metal muscles protruded into pieces, but he twisted like human muscles. , His skin was silvery white, his head was shiny and metallic, and his pupils were pitch black. Sitting there, he exuded the dark breath that absorbs all the light.

"Huh?" Zhan Chen Wang Zheng was chatting with his friends happily, and suddenly received a virtual system prompt, "Hmm...this is?" Zhan Chen Wang stood up fiercely.

This is a cry for help from his junior brother Imoli.

"Imoli's help? Is he in danger on the battlefield outside the territory?" King Zhanchen was a little anxious.

He and his younger brother belong to the same cosmic master, and the mechanical tribe is very different from other tribes, because every mechanical tribe is just an intelligent life when it is just born, and as an intelligent life... is born to recognize the Lord.

In the mechanical clan, a cosmic venerable mechanical clan will let some "machine clan immortal" recognize the master!

A mechanical overlord who is as powerful as the Chaos City Lord will still make the "Universal Venerable Robot Clan" recognize the lord!

These acknowledgments of the master have been carried out long ago...Unless the strength of the servant surpasses the master one day, the high level of the mechanical clan will order the master to directly dissolve the master-servant relationship, otherwise the master-servant relationship will be maintained forever.

The entire mechanical clan is a pyramid relationship.

They have feelings, and they will also have many emotions such as resentment, jealousy, anger, excitement, happiness, etc. However, "recognition of the Lord" is a core ability of intelligent life. Once they recognize the Lord, they will absolutely obey the master in essence, and there will be no The slightest thought of betrayal may be jealous and dissatisfied with other people of the same clan, but he is absolutely loyal to the owner!

Under the master, "King Zhanchen" has the best relationship with his junior brother. After countless years, the relationship is like a brother.

"King Zhanchen, what's the matter?" A light blue-skinned machine with a graceful female figure sitting on the other side asked curiously in a hoarse voice.

"I have something to talk about next time."

King Zhan Chen quickly left the virtual world, and his consciousness returned to the battlefield outside the territory.

King Zhanchen is now on the outer battlefield, but he is in the outer area of the "Star Tower" and has not yet entered.

Moreover, he is practising the law of "time" and does not teleport in space, so if you want to quickly return to the land of Yan Jizhu, you must find a companion who can teleport and take him back to the land of Yan Jizhu, or through the power of staying in the land of Yan Jizhu. The token is sent back to the kingdom of God.

But even if you send it back, it will take a long time to get to the target location. After all, the Yan Jizhu Continent is 1.8 light-years in diameter, so how long does it take to fly?

"King Zhanchen" originally received an invitation from a friend before leaving Yan Jizhu Continent to go to the "Star Tower".

"King Zhanchen" just wanted to contact one of his friends who can teleport to take him back to the land of Yan Jizhu, but immediately received a message: "Vengeance for me, it is the King of Hunting!!!"

"Imori!" In the spacecraft, Zhan Chen Wang fiercely grasped the armrest of the alloy chair, and forcibly crushed the metal comparable to F9.

"Imori is dead." King Zhan Chen burst into anger in his eyes.

"The Hunting King, the Hunting King." A huge roar echoed in the spaceship.

Calm down a bit.

King Zhanchen clenched his fists, "God Hunter, you dare to kill my junior, Imoli, I will definitely help you take revenge."

"According to the message sent back by Imoli before his death, he and Karnev were trapped in the spaceship by the Hunter King. There was no way to escape, and he had to use the Vulcan Source Crystal to explode... now Imoli has If he died, Karnev was also dead...The Hunting King is the pinnacle of the

king, or in a narrow environment. Under the power of three times the self-detonation of the pinnacle, I am afraid that he will be severely injured if he is not dead, and his strength will definitely be greatly reduced."

A cold light burst into King Zhan Chen's eyes. "This is my opportunity. If he leaves the battlefield outside the territory, I can't help him, but if he dares to stay, I will kill him."

Although King Zhan Chen wanted to avenge his junior brother, he had not yet dazzled his head with anger.

Although he is considered to be the limit of the king, if the opponent is the pinnacle of the king, under normal circumstances, he wants to kill it, unless he finds a helper.

But dealing with Feng Wang Dianfeng~www.mtlnovel.com~ is not an easy task, it is not easy to find a helper, and the price is very high.

But if the opponent is severely injured by the explosion of the Vulcan Origin Crystal, and his strength is greatly damaged, then he has a chance.

"Now, we must first figure out the situation and specific location of the Hunter King."

"King Zhanchen" began to send messages in his own camp... he offered a reward for all the news of the human camp "God of Hunting", knowing the coordinates of the opponent and telling him that he can get 20 million Yulan units.

And countless powerful people in the mechanical clan quickly learned that... the peak power of the human camp, the "Hunting God King", killed the "Lei Yuan King" and the "Fire Stabbing King".

And, "King Zhanchen" wants to deal with him.

This was the first time the "God of Hunting King" killed the king, or two at a time, for a time, and he became famous.

#### [Chapter 326: reward](#)

Wang Yi didn't know that he had been spotted by a powerful mechanical clan king, and after solving the three king queens, he left in a spacecraft.

Wang Yi first checked the spoils to see if there were any suspicious items.

The immortal gods can transmit the kingdom of the gods, and they need some tokens. The so-called tokens can be an "immortal crystal" (because the immortal divine power contains spiritual imprints), it can also be a plant life that recognizes the Lord, or it can be specially made. Some of his tokens, like the tokens that Venerable Pangbo left to Wang Yi.

There is a trace of spiritual imprint in the token...no matter how far away, no matter how far away it is, it can be sensed no matter in the body world or in the kingdom of God.

In the extraterritorial battlefield, such small details cannot be ignored.

Wang Yi checked and destroyed all the items that might carry traceability and supernatural power.

He didn't want his position to be known.

Inside the spacecraft, Wang Yi held a few world rings in his hands, and the relics of the three kings were all here.

After Wang Yi did some research and identification, he summed up the value of the spoils obtained from this battle.

However, many of them were destroyed by battle explosions, such as the Pyramid spacecraft of the Mechanical Race, such as the tens of millions of mechanical puppets... But most of them remained in the hands of Wang Yi, including the high-end detection instruments of the Mechanical Race.

"Haha... The detection equipment of the mechanical race is really advanced, much better than my other clones."

Two sets of detection instruments, one of which is worth 150 million yuan and the other is worth 200 million yuan... are far beyond the original use of the clone.

Even if the slain high-ranking alien entrusted the king, the detection equipment left behind is not as good as that of the mechanical race.

The wealth of either of the two mechanical clan kings is greater than that of the alien clan.

Although the Firethorn King is a junior prince, his wealth adds up to 15.1 billion yuan.

King Lei Yuan has 14.9 billion mixed yuan units.

Ordinary immortality, the net worth is about 10,000 yuan.

Feng Hou is immortal, and his total net worth is around 10 million yuan.

The king is immortal, and the total net worth is about 10 billion yuan unit. This is the average level of the top king and the peak of the king. Like the ultimate king, it is usually tens of billions or even nearly 100 billion yuan.

And like the King Zhenyan, the king is invincible, and even comparable to the most common cosmic venerable, the net worth is generally hundreds of billions or more.

It's normal for some of the first-ranking kings to be mixed up too badly, and their total assets are less than 1 billion yuan.

Obviously, the Firethorn King, a first-ranked king, had more wealth than the high-ranked king "Leiyuan King", and he must have a very background.

The efficiency of accumulating military exploits and earning wealth is not comparable to killing some background characters. One kill can get a large amount of treasures. Of course... the greater the background, the more difficult it is to kill.

And the alien king, although it was a high-level king, it was just an ordinary group, not a peak group like the machine race or humans, plus no background, the wealth was very ordinary, only more than 10 billion points.

In addition to trophies, there are military exploits!

A primary titled king, 10 trillion military merits!

Two high-ranking kings, each with 100 trillion military merits!

It has only been less than a year since he came to the foreign battlefield. Now Wang Yi's military merits have exceeded 200 trillion yuan, fulfilling the requirements of the Virtual Universe Company.

The price is the fall of the three kings!

"The spoils add up to more than 30 billion yuan of wealth, and the military merits add up to 3 billion points..." Wang Yi was also a little excited.

"It adds up to 33 billion. I hunt so many confessions, and my wealth doesn't add up to them."

The stronger the stronger, the more exaggerated the accumulated wealth, and the larger the gap. A strong like the City Lord of Chaos, even the hundreds of billions of Hunyuan units would be nothing in their eyes.

These trophies and treasures are of no use to Wang Yi. When they return to the barracks base, they can be sold and exchanged for money.

For the current Wang Yi, returning to the barracks base is also very simple. It can be teleported, and if it is too far away, it can also be teleported by the Kingdom of Moyunteng.

"This is the strong..." Wang Yi sat comfortably on the sofa and looked at his palm. It seemed ordinary, but it had the ability to destroy the sky and tear the starry sky easily.

Even if it is a star, in front of today's Wang Yi, it will be destroyed if it is destroyed.

Ordinary planets are playthings like glass beads.

With three major bodies, many powerful inheritances, and treasures, Wang Yi can be like a fish in the water on the battlefield outside the territory, accomplishing the miraculous feat of the master of killing the king.

After the battle was over, the Yanxing Giant Beast clone and the Void Zerg clone left with the detection equipment of the Mechanical Clan Seal King and moved separately. Obviously, they found that the prey was more efficient.

Kill if you can, if you can't kill, call the clones to kill together. Wang Yi is ready to carry forward the group fight tactics.

"Unfortunately, there is no servant of the king yet." Wang Yi was a little regretful.

The "Forbidden Code of the Slave God" practiced by Wang Yi is not like the "Ten Thousand Hearts Controlling the Soul", it is more demanding and more powerful!

"Ten Thousand Hearts Control Soul", the ultimate is to control 10,000 soul slaves.

The "Slave God Forbidden Code" pays more attention to the power of the soul secret law, and can only control 100 soul slaves.

Therefore, Wang Yi was very careful when choosing soul slaves.

Ordinary immortal gods, immortal, even if they were given to him for enslavement, he would not consider it.

The number of assessment places.

Wang Yi's ideal goal is the limit of conquering the king! Or Feng Wangfeng who is good at soul attack!

Of course, this is difficult.

It turns out that in history, Luo Feng also used the environment of the Star Tower, added treasures such as the seal of stars, and "Fimo Venom", the ultimate servant of the king, the "Heavy Arrow King". Soul master.

Then the team snowballed and grew.

Now Wang Yi, although "The Forbidden Code of the Slave God" has been cultivated to the seventh level, the amplitude of his thought power has also increased by 1,200, and the addition of "The Inheritance of the Demon God General" has made his soul amplitude a hundred times!

With the conditions for enslaving and entrusting kings, it is not so easy to enslave the powerful.

To travel through the universe, it is very important to have comrades in arms and servants!

However, it is very difficult to get a powerful servant. You have to meet that you can solve it and make the opponent unable to escape. And the direct control of the soul can only be achieved by the "soul master", and he is good at the soul. There are very few masters in this area.

Strictly speaking, although Wang Yi has a strong soul will, this is the foundation, and it is not the same as the control of the soul secret law, which belongs to the scope of the skill.

Since there are no conditions, if you want to be enslaved, you can only use another method...kill the opponent into a deep sleep, and then control it!

However, this method also has many weaknesses.

The opponent is likely to perceive the crisis and explode. Secondly, he falls asleep so accidentally. If he goes too far, he may directly kill the opponent.

Second, even if it succeeds, controlling a sleeping immortal god, how long will it take to restore the sleeping immortal \*\*\*\* and possess powerful servants?

If you use precious treasures to restore and awaken it, the price will be too high.

It takes 63 billion mixed yuan units to restore a sleepy Fengwang peak with only 10% of the divine body loss from stunned to the "wake-up stage". Although it only increases from 12% to close to 20%, the cost is very high. .

In the "recovery phase", another 58 billion mixed yuan units are needed.

So if you want a Fengwang Pinnacle to restore its full strength, it needs almost 120 billion mixed yuan units.

And many kings limit, accumulated endless years, perhaps not so much wealth.

If the king was restored to the limit, the price would be even more terrifying!

In short, it is very difficult to control a powerful immortal servant, especially a servant close to his own strength. Generally those soul masters have a higher probability of doing it.

Although Wang Yi has three major bodies, each of them is extremely powerful. The Void Zerg clone and the strength of the "Imperial Armor" are far beyond the "limitation of the king."

But wanting to enslave a king's limit or the soul master of the king's peak, it is still very hanging.

Moreover, this strength can only be said to be "nearly invincible" in the outer battlefield, but it cannot be said to be truly rampant.

It was really too arrogant and provoked the anger of the public. A large group of the ultimate kings and peak kings came together to kill in a team, and Wang Yi also had to avoid it.

After all, he is just the lord, not immortal!

The best choice to enslave the king is to use the Star Tower.

However, if you enter the Star Tower, it is estimated that you will be discovered by "Zitshan Ke" or his disciple "Puti".

Wang Yi's cultivation of the "Secret Code of Nine Tribulations" can form a special relationship with the Star Tower.

What Wang Yi hesitated was whether the "Zoo Shan Ke" paid attention to him now.

Entering the "Star Tower", you may have to face the most terrifying old monster in the universe.

Facing the strongest in the universe, he has no confidence in his heart now.

The origin of the "Nine Tribulations" is not easy to say. Luo Feng will definitely start practicing the "Nine Tribulations" now. If the mountain guest did not use the "Sky Soul Crystal", Wang Yi himself would not believe it.

As long as someone practices the secret method on the "Sky Soul Crystal", the mountain guest will definitely know.

But Wang Yi's Nine Tribulations came from the panel, not to mention cultivation, he was directly promoted, to be precise, the beginning and the process were omitted directly, and the result was directly entered.

If Wang Yi hadn't appeared in front of Zuoshanke, perhaps Zuoshanke wouldn't know.

If the "Sit Mountain Guest" discovers that there is a second practice "Secret Code of Nine Tribulations", he will definitely be surprised.

Together with curiosity, Wang Yi might be caught for research.

In the face of the power of standing at the pinnacle of the universe and the reincarnation of the "God King", it would be better if the other party does not force it. It seems very difficult to keep secret...

Although the human race is strong, no one can keep him unless he hides in the "Original Universe" or "Great Axe Universe" forever.

"Sacrifice to the tower..." Wang Yi thought about another thing.

He must go to the treasure of the sacrificial tower and get it, because the treasure inside is the "air-locking arm", which is related to his next hunting and fighting on the battlefield outside the territory.

But if there is no accident, to enter the sacrificial tower, you must have six strong men, each holding a token and breaking through the passage, in order to open the entrance to the core area.

There are layers of obstacles in each passage, and only the immortal Fenghou level can pass successfully.

However, Wang Yi only had three bodies, and the Yanxing Giant Beast was too big to get in. It counted as only two.

It was four short, and if Wang Yi wanted to go in, he had to find a helper if he had no immortal servants.

Finding one's own camp is restricted by the military system, and no one can attack the same camp. There are many restrictions, and it will be very troublesome to sort out treasures, and Wang Yi will not want to.

It would be very simple to find a hostile camp. Once you enter it, you can kill it like the one in the original book. Maybe you can also kill a few of the aborigines of Yanji mainland who are hiding in the kingdom of God by the way, but it should How to do it?

While Wang Yi was thinking, half a day passed unconsciously, and Bermuda suddenly issued a reminder.

"Master, there is an alien team 970 million kilometers away. There are 12 immortal gods and 31 alien world masters! Among them, there are two immortal immortals!"

Wang Yi nodded. It is very normal for the leader of the team to be immortal and to worship the mainland in Yan.

"Go ahead and stop it."

"Yes." Bermuda responded immediately.

The spaceship is also loaded with weapons from the mechanical race, even if it is enough to deal with ordinary immortality, let alone intercept a spaceship.

The flying saucer-shaped spacecraft in the distance continued to move forward, although it was not completely flying relative to each other, but the distance was still shrinking.

The Wang Yi spacecraft was shielded by a detector, and the alien spacecraft approached quietly without noticing it.

"boom!"

After calculating in advance, a beam of light shot out from the surface of Wang Yi's black spacecraft, and almost instantly, it hit the flying spacecraft millions of kilometers away.

This E-class spacecraft was torn apart in an instant, and a large number of alloy debris fragments flew in all directions. The entire spacecraft rumbled and exploded, the space was torn apart, and countless space fragments shook.

The space gradually stabilized and calmed down.

In the aftermath of the explosion...a group of figures appeared, more than a dozen immortal, and there were some realm masters beside them.

Those world masters did not suffer any casualties because of the immortal protection.

After they appeared, they dispersed for the first time and fled in all directions.

"Our detection equipment actually failed to find the target. Flee, escape first, and then see who the other party is!" A voice rang in everyone's ears.

And Wang Yi, who was floating in the air, wrinkled his brows as the natural pattern of Wang Yi's feet formed a mysterious bird flying over.

"I just ran away and didn't fight?" This was one of his most annoying situations.

His goal is to lock the strongest immortal in the team for the first time, that is the pinnacle seal.

"Just you."

"Ang~~"

A scream resounding across the sky made the alien races scattered and fleeing could not help turning their heads.

A beautiful and enchanting huge bird phantom flew up, and inside it was a figure with a dark red battle armor all over, rushing over like lightning.

"Love Pipit Plate!"

The expression of Feng Hou Dianfeng's alien race suddenly changed.

"Only one person... the breath is the pinnacle of Feng Hou... but this looks like a human... among the strong men in the land of Yan Jiu, who fits this information..." The news of the foreign race Feng Hou is also very well-versed, face is difficult to look.

"The King of Insects!"

What is the most afraid of encountering ordinary immortality in the outer battlefield?

One is the king...the second is the king who teleports!

To be honest, it is very simple for the teleporting king to kill the ordinary immortal, and he can't escape.

Therefore, in the Continent of Yan Jizhu, every team has at least a title.

Only in this way can he barely survive in the Continent of Yan Jizhu.

According to the news, the "King of Insects" on the side of the human camp is a "high-ranking king" strength!

#### [Chapter 327: Who doesn't know i'm gonna get worms](#)

"call out!"

Wang Yi's body method blended into the Love Pipit disc, so fast, and when it passed away in a flash, it was already before the life of the scaly armor.

"Wow..."

The whole body of the scaly armor spouted endless icy mist, but what greeted him was a phantom like a "black and white fish", and the fish was moving very delicately.

If it is said that the immortal spirit moves at an amazingly fast speed, then it moves hundreds of times faster than the immortal spirit's body.

The long tail that the fish dragged out left behind a trail of shadows. The immortal law domain merged with his law perception. It was very powerful. Even a hot star could freeze instantly, but it even slowed down the black and white swordfish. Speed can't be achieved.

The space-time artistic conception contained in the "Black and White Swordfish" easily tears apart the ice and fog law domain of the scale life.

Wang Yi raised his brows when he saw the surprisingly powerful realm of the scaly life.

The realm of law is the natural law power conferred by the original law of the universe, but these forces directly oppress it, just like a straggler. But once the rules of space are used to control and comb, it will make the field of laws stronger.

However, it is difficult for ordinary immortal gods to achieve this step, because it is to integrate the understanding of the laws of space and time into the 'law field', which must at least reach the level of the fifteenth floor of the Tongtian Bridge.

The scaly life uttered an angry and frightened roar. He has four thick green scaly arms, each holding a sledgehammer. He swings the sledgehammer frantically, heavy and fast like thunder, every A hammer entrained astonishing power, and the space it hit burst open, bombarding the black and white swordfish that shuttled and made him feel a strong sense of crisis.

A ray of light passed by like a dream movie, and it broke through his tight defensive circle and pierced into his body.

"Boom!" The scaled armor's life trembled slightly, followed by the whole being completely shattered.

"Huhu..."

Numerous cyan light spots in the void quickly gathered together, instantly regaining the appearance of cyan scaly armor, but his expression was frightened and his aura weakened.

Then the black and white swordfish flew back again, smashing the divine body of scaly life.

It's just a one-sided ravaged.

The other scattered alien races seemed to ignore the scale life at all, and were quickly moving away.

Just when Wang Yi wanted to quickly kill the scaled life in front of him with a cruel hand.

suddenly--

In the distance, one of the alien realm masters who escaped suddenly appeared next to a huge Zerg brood, and around the Zerg brood, there appeared densely densely packed world master's pinnacle Zerg warriors!

Millions of Zerg warriors had a ball of light condensed on their claws at the same time.

"Om!"

At the same time, the scaly life-burning divine body that was being ravaged by Wang Yi, its aura suddenly soared, its only one eye turned blood, blooming with dazzling brilliance, looking directly at Wang Yi.

A circle of invisible fluctuations permeated, and Wang Yi could feel the fluctuations in the surrounding space suddenly stagnate. At the same time, his movements stagnated, as if he had fallen into the ice and snow, and his body began to stiffen.

The secret of talent...Space imprisoned!

This is a big killer for the life of the scale armor, and it has not been used until now.

Coupled with burning a large number of immortal divine bodies at any cost, the power of this trick has skyrocketed!

With Wang Yi's current strength, he was imprisoned abruptly.

Even if Wang Yi had teleport, he couldn't use it at this time.

In just a short moment, a beam of light over a hundred meters in diameter descended!

Everything is already designed!

"The Zerg Mother Emperor!!!"

Wang Yi roared in his heart.

"Die! Die! What about the high-ranking kings, under the combined force of my millions of pinnacle masters of the zerg army, even the pinnacles of the king will be seriously injured and fall!" In the huge worm nest in the distance, the beautiful Zerg mother emperor Very excited.

Those alien races are immortal, and the world masters are her servants. The Zerg brood is usually hidden in the humble world master. When you encounter a powerful enemy, you will use this to set up traps and carry out lore!

The Zergs are very insidious and proficient in calculations.

From the emergence of the Zerg brood, to the scaly life-burning immortal divine body of Fenghou pinnacle displaying the void imprisonment, to the attack of the Zerg legion... It's slow to say, but it's just 0.1 second.

The energy beam of the Zerg Legion blasted on Wang Yi at a speed comparable to that of light.

Caught off guard, Wang Yi took the blow steadily. The combined force of more than a million pinnacle master Zerg warriors could cause the Fengwang pinnacle to be seriously injured or even fall!

boom! The combined attack of millions of world masters' pinnacle warriors of the Zerg clan bombarded Wang Yi's "Purgatory God Armor". The "Purgatory God Armor" is indeed a treasure of the Universe Venerable Grade. Naturally, the bombardment cannot destroy the "Purgatory God Armor", but it was bombarded and thrown away in an instant, and the powerful impact shocked the space instantly, and the strong impact was then transmitted to the body of Wang Yi who was wearing Mo Yun Teng behind!

"Purgatory Armor" weakens 90% of the impact!

Moyunteng is now a "high-ranking king", plant life, metal life, natural advantages in the body.

The body of the Moyunteng of the "High-ranking King" is far surpassing the high-ranking humans, and even stronger than the Peak-Kinged Humans. With its strong regeneration ability, it can resist the impact that will be weakened by 90% in the following.

"Bump, burst, squeak..." The battle armor formed by Mo Yun Teng was under tremendous pressure, and it kept cracking and cracking in its body.

The combined force of the Million Pinnacle Master Zerg Legion is too terrifying, the quantity change causes a qualitative change, even if it is weakened by 90%, it is still stronger than the normal pinnacle king's full blow!

But it was impossible to kill Mo Yunteng who was the "high-ranking king".

The impact was weakened twice, and finally fell on Wang Yi's human body. His body strength is now 12,000 times, comparable to the primary seal king. Naturally, he can easily withstand the impact, but he also spit out a mouthful of blood. The physical injuries had no effect on him.

"Boom..."

Tens of thousands of kilometers above the wilderness was completely torn apart in an instant, and the torrent of countless space debris was disrupted.

"Shoo..." Wang Yi's body turned into an afterimage like a meteor. He was blasted away millions of kilometers away, smashing a mountain along the way, and then stopped and suspended in mid-air.

Feeling the pain in the body and the loss of Mo Yun Teng, Wang Yi was really annoyed.

But seeing Wang Yi unscathed, and even stronger aura, the mother emperor of the Zerg clan in the distance was frightened.

The combined blow of a million world lord pinnacle zerg warriors was enough to seriously injure the immortal \*\*\*\* of Fengwang pinnacle, without even killing the human being.

"I didn't even die, run away quickly." The Zerg mother emperor hurriedly ordered.

"Wow!" The other immortal Fenghou flew to the Zerg brood, put her into the world ring, and then expanded the speed and fled frantically.

And that burning immortal divine power, and the scale-armored life of the peak Fenghou who had been traumatized by Wang Yi before, also ran away with it.

All alien races fled with the Zerg mother emperor.

Wang Yi's performance frightened the Zerg mother emperor. She believed that she was not Wang Yi's opponent, so she was naturally unwilling to stay and continue fighting.

But how could Wang Yi let her go.

The military system judges military merit, in addition to the opponent's level, but also the opponent's race, talent, and strength.

The mother nest of the master class Zerg is generally the strength of the Fenghou class, and the military merit is naturally much higher. Just as the monsters have special rewards for killing human peerless geniuses, humans also have special rewards for killing the geniuses of the other three pinnacle races.

Moreover, even though this Zerg clan mother emperor is a realm master, there are so many immortal servants, among which there are two princes. The attainments in soul secrets must be very high... If you control her, you might be next to yourself. The trip to the tower was helpful.

The same is the Zerg Mother Emperor. Wang Yi's Zerg Mother Emperor was only born more than two hundred years ago. Although he has also vigorously cultivated, it consumes all his energy just to cultivate and create the Zerg Legion. Naturally, he has not studied the soul secrets so deeply. It is not as good as those. In the territory of the Zerg tribe, the mother emperor of the Zerg tribe who has been carefully cultivated and practiced for tens of millions of years has been accepted.

There is no saying that the Zerg has a king or a queen. As long as it is the immortal Zerg mother emperor... it represents the most terrifying existence under the Universe Lord, controlling the immortal Zerg legion,... a combined attack will make the lords of countless races in the universe fearful.

"Did you escape?" Wang Yi snorted coldly. Now that the "Purgatory Armor" has exposed the amazing defensive power, then he doesn't mind exposing more strength.

Wang Yi's figure disappeared from the place, and when he reappeared, he had already come to the immortal Fenghou.

Feng Hou Immortal had been flying at high speed, and happened to collide with Wang Yi who appeared in front.

"Space fluctuations, not good!" Feng Hou Immortal also noticed the spatial fluctuations, and he stunned, "Teleport!"

"It actually teleports!" The Zerg mother who was hiding in the world ring and seeing this scene through the controlled soul servant couldn't help but squeezed her hand, a little panicked.

The laws of space can be divided into three categories: "teleport", "strangulation" and "blockade".

Each category can be subdivided into many subcategories. As long as one subcategory is fully understood, it can be recognized by the law of space, but it is extremely difficult and extremely difficult to cultivate one of these three categories to the extreme.

Can teleport, strangle, blockade, any one of them can be cultivated to the ultimate perfection...generally they are at the pinnacle level of the king.

It can also be used by a few high-ranking kings.

Because this exam is the ability to perceive laws, some high-ranking kings may be weaker in other areas, but they can have a higher perception of laws, so they can also be used.

"Wow!" The huge zerg brood reappeared, along with the pinnacle zerg legion of the million masters.

"Human powerhouse, do you have to fight with us today?" The Zerg clan mother emperor said softly with a seductive voice.

And more than a dozen immortal gods, including two immortal immortals, also vigilantly surround the Zerg brood.

Wang Yi sneered. "A realm master-level Zerg clan mother emperor, why should you talk to me about life and death?"

The Zerg mother emperor was also angry, "In this case, then..." She was just halfway through her words, and another huge beam of light flew out, a full one hundred beams of light, but each of them condensed the full strength of the tens of thousands of world masters' pinnacle Zerg warriors.

At the same time, "Shit!" The invisible soul impact immediately attacked Wang Yi.

"The Zerg Mother Emperor is really cunning, but you have no chance."

Wang Yi had been prepared for a long time. How could he be recruited? The soul attack passed through Wang Yi's surface "God of Purgatory Armor" in an instant, but it was not completely offset. The obstacles were very shocking, and they blocked over 90% of the impact in an instant. The only impact left was protected by the "Eyes of the Abyss" that shrouded the Essence Orb in Wang Yi's body... it was easily isolated.

There are many materials that prevent the soul from attacking, and this is also related to the level of mind power.

When the power is low, such as the planetary star, ordinary metal can hinder the power of mind. With the increase in strength, the powerful mental power can penetrate the metal to probe carefully.

Like the Meteor Star spacecraft, it can block attacks from souls "below immortality".

The Eye of the Abyss can easily resist even an immortal soul attack.

The weaker the mind, the easier it is to block.

When becoming immortal... hindering the soul attack of immortal gods, matter is rare and precious, and the hindering efficiency is also divided into high and low, like "Purgatory God Armor" almost obstructs more than most of the soul attacks, which is very rare. Treasures can definitely be regarded as first-class treasures in the universe, and many cosmic lords may not be able to come up with such magical treasures.

Unaffected by the slightest influence, Wang Yi displayed his astonishing speed, dodged like a ghost, dodged all the attacks of the Zerg army, and then rushed over.

"Om~~" The scaly life Feng Hou Dingfeng opened his \*\*\*\* one-eyed, and wanted to perform "Void Confinement" on Wang Yi, but he could not lock the erratic figure.

Casting void imprisonment is generally to control the space within a certain area. If Wang Yi is trapped and not moving... then the scaly life cast lock is much easier, but now Wang Yi expands the speed and body skills, constantly changing places, Forcing the scaly life to continuously control the space of each area, which is very difficult.

"Asshole! Master, I can't lock him down!" The scaly life was a little anxious.

"boom!"

"boom!"

The millions of Zerg legions arranged in formation, divided into several steps rhythmically to attack Wang Yi, and those immortals who were enslaved by the Zerg mother emperor also tried their best to attack and block Wang Yi with various methods, while constantly retreating.

The Zerg Legion is better at long-range combat, which is more convenient to perform combined attacks. Although there are also worm-sea tactics, in the face of a high-ranking king who can teleport and have amazing defenses, the worm-sea tactics are undoubtedly useless.

A series of dazzling energy beams, dazzling immortal divine power compression light balls, thought force weapons, soul attacks, time and space interference...The dense, overwhelming Chao Wang Yi fell.

"Block him! Go! Go!" While commanding the Zerg army and servants to stop Wang Yi, the Mother Zerg emperor thought to herself, "I have sent emergency rescue to allies on the battlefield outside the territory. As long as I hold on, I can get rid of the current situation. It's in trouble."

The Zerg mother emperor is different from human beings.

The number of Zerg mother emperors in the entire universe is pitifully small, even comparable to the giant star beasts.

They are the true core existence of the Zerg! Therefore, the status of each Zerg mother emperor is very noble! Even Feng Wang~[www.mtnovel.com](http://www.mtnovel.com)~ will treat them respectfully!

Upon receiving her call, the Zerg camp will definitely soon come over.

Just as the Zerg brood was retreating quickly under the protection of many Zerg warriors and immortal servants, spatial fluctuations came from the rear. Originally, the Zerg mother emperor was happy to think that the strong one on his side had received the call for help and teleported away. Come here, but when she looks over, she finds--

It was a humanoid creature that was more than three meters tall, covered in purple-gold battle armor, and had a pair of wings behind it.

"He" raised his head and looked in the direction of the Zerg brood, and a pair of silver-white eyes without any emotion came into the eyes of everyone.

"boom!"

An incomparably powerful soul attack descended on the Zerg mother emperor!

#### [Chapter 328: Enslave the Zerg Mother Emperor](#)

The clone of the Void Zerg came very suddenly, as soon as it appeared, it was a large-scale soul impact!

Soul abyss!

You know, at this time, the Void Zerg clone has already fully deployed its combat power, and its soul power is 700,000 times that of the world leader's peak!

Has entered the scope of the limit of the king!

This wave of soul impact, even those who are strong at the peak of the king, will be instantly lost, let alone those who are immortal, ordinary and immortal, and the Zerg mother emperor who stays in the worm's nest, although she has special defense methods, she faces The soul attack of this king's limit level, those defenses collapsed instantly if they couldn't even hold on to it for an instant.

In a trance, everyone's souls fell into an illusion.

If it weren't for the Void Zerg clone to keep alive, just this wave of soul attacks could severely damage those immortal seals and destroy ordinary immortals.

"brush!"

Then the clone of the Void Zerg moved to the mother's nest of the Zerg. The round nest was one kilometer high, and the nest was full of holes, filled with various venoms and poisonous gas.

The avatar of the Void Zerg race penetrated through one of the passages, while Wang Yi's human body continued to maintain the illusion outside.

In the huge worm nest passage, there are also zerg warriors with a hideous appearance more than ten meters high. According to that powerful aura, each is a zerg king, far surpassing the ordinary pinnacle master zerg, but these zerg warriors guarding the Zerg brood The fighters seem to be unconscious and unconscious because of the mother emperor who controls them.

The avatar of the Void Zerg clan was like electricity, rushing to the depths of the Zerg brood, and in the wide circular hall at the core, he saw the Zerg mother emperor lying on the ground.

There were four golden Zerg warriors beside them, exuding immortal law fluctuations.

Of course, these powerful golden immortal Zergs, like the Zerg mother emperor they guard, lose their consciousness and are deeply trapped in an illusion.

The Void Zerg clone's eyes quickly fell on the weak figure.

The whole body is white and translucent, like a weak body made of crystals. She is about twelve meters tall and has a pair of wings that look like butterfly wings. The wings are wrapping her delicate body like a thin layer of yarn. Yi, that bumpy body can be said to be a good fortune, even if she falls into a deep sleep, her brows are still slightly frowned, which makes people feel distressed.

This is a naturally noble and beautiful life. The proportions of the figure are perfect. Even in the sleeping state, the natural charm is so incredible.

This is the Zerg mother emperor!

The real members of the Zerg tribe are a tribe composed of these Zerg mother emperors, and Megatron Universe has become one of the pinnacle tribes of the universe. Even if the human race is strong like a cloud, they are still just evenly matched.

Wang Yi had already seen the charm of Elizabeth, the mother of the Zerg clan, and he was not surprised.

The power of the world diffused out. After sweeping the delicate body of this beautiful and noble Zerg mother emperor, it directly penetrated the body and began to detect the soul of the Zerg mother emperor.

"call."

Like a breeze, the power of the world turned into nothingness and penetrated into the body of the mother emperor of the Zerg race. As soon as it penetrated into it, you saw an amazing scene.

The body of the Zerg mother emperor is crystal clear, as if it is composed of countless energy rays. There are pipes in the body, and there are 10,000 light orbs. These 10,000 light orbs are similar to the soul of the normal world lord-the original pearl, but because of life The structure is completely different, the Zerg mother emperor has 10,000 soul sources.

Moreover, these 10,000 light spheres are sharing countless energy rays with each other, forming a mysterious and peculiar network.

This peculiar body structure is very similar to the network that builds a virtual universe in the body when practicing in the Nine Tribulations Secret Code.

To control it, you must control all soul sources.

"Try it first. If it doesn't work, then you can only let Elizabeth try it."

If you want to control the Zerg mother emperor, you don't need to have a strong soul, you have to have a unique method.

Luo Feng also used the third layer of the "Myriad Heart Controlling Soul Secret Method" to control the Zerg brood sleeping on the earth.

Wang Yi's "Slave God Forbidden Code" is actually more suitable for controlling immortality, because the immortal soul is completely integrated with the divine body, so the control method is similar.

And to control the Zerg mother emperor, it may be useless.

At the world master, the power of soul thought and genes can be transformed and merged into "power of the world", which can perform material attacks or soul attacks. Now, Wang Yi is using the power of the world to display the power of the world.

"At the beginning, Luo Feng didn't even have a soul amplitude of 4,000, so he could succeed in enslavement. Now I am already 10,000. If I reach the limit of the universe, I should be able to succeed." Wang Yi thought to himself.

Under his control, the power of the invisible world entered the body of the Zerg mother emperor, spread to the body of the Zerg mother emperor, and quickly combined into strange silk threads. Numerous silk threads were connected in series and invaded one "ball of light" after another.

Suddenly, the originally dazzling light network enveloped a layer of silver light, and countless silver threads penetrated into every soul source. The Zerg mother emperor had not resisted at all, after all, she was in a state of fainting.

"Soon."

"good!"

"Success!"

After a while, Wang Yi successfully enslaved the Zerg mother emperor.

After successfully enslaving the Zerg mother queen, she also unlocked the soul illusion.

The delicate body of the Zerg mother emperor moved, her long eyelashes trembled, and then slowly opened, revealing those blue eyes, a pair of breathtaking blue eyes and then looking passionately at the purple-golden armor figure in front of her. As if it were her most attached lover.

"Master." She said softly and softly, leaning slightly towards Wang Yi's clone of the Void Zerg.

Wang Yi stood in front of the beautiful Zerg mother emperor with butterfly-like wings, white and translucent body as if crystal condensed, and soft as water, and raised his head to look at her.

Every face of the mother emperors is beautiful, and one look makes other creatures feel distressed as if to protect her.

This is his second Zerg female emperor.

"What's your name?"

"Master, my name is Natia," said the Zerg mother emperor.

"Yeah." Wang Yi nodded slightly, "I will call you Natia from now on. Natia. You put away your army and servants first, and you can do things for me later."

"Yes, this is my honour." The Zerzu mother emperor said joyfully.

After the soul is controlled, it will naturally have a good impression of the owner and extremely respect.

Even if you realize that you are a slave and that you are under control, you will not feel a little disgusted. The soul's most original source makes the soul slave convince the master, and naturally think that the master is good, and everything must be listened to by the master. This is the servant of the soul!

From the bones of the soul, they are completely loyal servants.

Unlike those slaves controlled by biochips, although those slaves are controlled, most of them are unwilling and want to change their destiny. But soul slaves would not have these possibilities.

"That's right." Wang Yi asked again after thinking of something, "Natya, you are now the pinnacle of the world lord. If you break through to immortality, how long will it take and what do you need?"

Although Wang Yi's Zerg mother emperor "Elizabeth" is extremely talented and has unlimited potential, she was born too short, and she is still far away from breaking through to immortality.

And Natia may be different.

Natia smiled gently and said: "Sorry, master, my own law ability has not yet reached the threshold of becoming immortal. The mother king of my zerg needs to have a very high sense of law, or in space law, or in time. law!"

"Single understanding of the law of permeation, the law of fire, and any other law cannot become immortal. You must achieve extremely high achievements in the law of space or the law of time."

Wang Yi nodded. Although a little disappointed, it was expected that if Natia really broke through so easily, she would not appear on the outer battlefield now.

It must be understood that the truly intelligent beings in the universe all need to have a high level of understanding in order to become immortal!

External matter alone is not enough.

Just like human beings, at least one of the laws of metal, wood, water, fire, earth, wind, thunder and lightning, and light must be fully understood in order to become immortal. If the law is not fulfilled, even more treasures are useless.

The universe is fair, and the difficulty of breaking into immortality for the peak blood race groups like the star behemoth and the Zerg mother emperor is simply incredible.

And for some special beings, because they are loved by the universe, many breakthroughs in immortality are very simple.

However, once they break through, their strength is also very strong.

The immortality of the Zerg mother emperor is very terrifying, she is a master of the soul, and there is an immortal Zerg army under her command!

As long as the Zerg Mother Emperor is immortal, it represents the most terrifying existence under the Universe Lord!

Wang Yi now has two Zerg mother emperors, but they are both at the master level.

"That's right, master." Natia said hurriedly after thinking of something, "When I was attacked by your master, I had already sent a call for help to allies in the military system. It is estimated that super powers from the Zerg camp will soon come over. Here..." After becoming Wang Yi's soul slave, her soul naturally felt that Wang Yi has three bodies, so in essence, which body is her master.

"Oh?" Wang Yi asked, "can you know who is here?"

"It's no longer possible, Master." Natia said, "When I was under the control of the master's soul, the army system also monitored this scene, so now I have officially left the Zerg camp. I am regarded as a traitor to the Zerg. Military system."

"That's it." Wang Yi thought for a while, and decided to leave here with Natia first.

And Natia's Zerg legions and immortal servants were also taken back.

Wang Yi also knew that there were a total of 1.1 million peak master Zerg warriors in Natya's command, but among them there were one million "Bloodthirsty Demon Man" and one hundred thousand "Spirit Butterfly" Zerg.

"Bloodthirsty Demon Man" is good at physical melee and long-range attacks.

But the "Lingmei Butterfly" is good at soul attacks, in some respects, it is far more terrifying than a million "Bloodthirsty Demon Man".

In addition, there are 1 pinnacle prince, 1 high ranking prince, and 16 soul servants of immortal army masters.

In addition, the four golden Zerg warriors who were sent by her teacher to protect her were close to the immortal peak of Fenghou. It can be said that the strength is not inferior to the general Fengwang.

However, he was planted here with Wang Yi, and he would never stand up.

"call!"

In the inner world, in the vast expanse of the wilderness, Wang Yi and the mother of the Zerg "Natiya" appeared together.

"Natya, you should stay in my body first." Wang Yi said to her.

"Yes, Master." Natia said obediently.

Then she turned her head to look in one direction in response.

In the distance, a weak figure quickly flew over and fell on the grassland. The butterfly-like wings flapped slightly with the wind, and a pair of blue eyes also looked at "Natiya", two equally beautiful and similar styles. The Zerg mother emperor stood together like a sister.

"Owner."

"Well, Elizabeth, she is Natia and your family. You will have one more companion in the future." Wang Yi smiled.

"That's great." Elizabeth was also very happy.

Unlike those Zerg mothers who are proficient in calculations, Elizabeth has not experienced too many things from the outside world except for talent and some racial inheritance knowledge and memory. Her personality is very simple, just like a blank piece of paper, so it is true to see that there is more of the same kind. Very happy.

"Nathya, stay here to get along with Elizabeth, and teach her by the way." Wang Yi ordered.

"Yes, Master." Natia replied respectfully.

Wang Yi returned to the spacecraft and sat on the spacecraft's luxurious sofa, looking thoughtfully at the screen.

"Nattia's teacher is actually the old monster Nanxun..."

Nanxun is a name that a Zerg female immortal emperor once reported by himself. In the Zerg clan, there is no saying that Hou Fengwang is named. Naturally, the immortal female emperor is simply called Nanxun, and there is no such name as Nanxun's king. Law.....

But the entire seventh battlefield... the vast majority of the strong will collect her when they understand the intelligence, because she is the immortal Zerg mother emperor!

The mother emperor of the Zerg race 'South Punishment', her subordinates control the limits of kings and the pinnacles of kings, and she is also a master of souls, and controls the immortal Zerg warrior army, and her strength is terrifying!

Of course, she can only be regarded as "nearly invincible entrusted kings", which is still worse than true invincible entrusted kings such as King Zhenyan and King Tianyu who have reached the extreme in the realm of kings and comparable to ordinary cosmic vipers.

But in the "seventh battlefield of the extraterritorial battlefield", the mother emperor Nanxun is already one of the top existences.

Existences like King Zhenyan are rare among hundreds of millions of races in the universe, and the number is extremely rare. They are all looking for opportunities to enter the venerable level...

Few will enter the extraterritorial battlefield, because it is not challenging for them in the extraterritorial battlefield.

If the mother emperor Nanxun knew that her clansmen and disciples were enslaved by Wang Yi's soul, then the picture...tsk!

But Wang Yi was not afraid in his heart. The Immortal Mother Emperor is strong, but he is not weak. When the time comes, I really don't know who wins and who loses~www.mtlnovel.com~ It's not good, he also has the ability to protect himself. The immortal mother wants to deal with him, it is not so easy.

"Now, let's work hard to strengthen my own strength first. I have enslaved Natiya, and Natiya's soul attainment is comparable to many peaks of enfeoffment, and even close to enfeoffment. I myself do not enslave those ordinary immortal, enfeoffment. Immortality can let Natia come to enslavement."

Although Elizabeth is also the mother emperor of the Zerg clan, she is still much worse than Natia, who has been practicing for hundreds of thousands of millions of years. It is not that simple to control the immortal gods, and Wang Yi is unwilling to beat their gods to sleep. , It's better than nothing.

When enslavement is at a critical juncture, the immortal spirits will definitely resist, and it is easy to fail, so Natia is more suitable than Elizabeth to control the immortal servant.

As long as Wang Yi controls one or two Zerg mother emperors, his subordinates are equivalent to a batch of immortal followers, and he doesn't need to waste his soul servant quota.

### [Chapter 329: "The King of War Chen"](#)

Less than a minute after Wang Yi left in the spacecraft.

"Huh!" Three figures appeared out of thin air where they were fighting.

"The battle is over?"

"The Zerg mother emperor can't be found either, it seems we are late."

A weird life shrouded in a black robe with a faint blood haze uttered a harsh sound.

"There is a strong energy response remaining here."

"It should be a joint attack by the Zerg Legion."

The super powers of the three Zerg camps talked a lot.

In this, there are two peaks of kings and one limit of kings. Together, there are few rivals in the Continent of Yan Jizhu.

"What to do? The mother emperor is the apprentice of Master Nan Punishment. Now that she has fallen, how should we explain to Master Nan Punishment?" a strong man couldn't help but said.

The Zerg race itself does not have many strong people in the land of Yan Jizhu. More are the vassal groups and Zerg alliances.

And these powerhouses are in awe of the super powerhouses of the Zerg.

Any world master-level Zerg female emperor has a higher status than a foreigner powerhouse at the peak of the king, let alone an immortal Zerg female emperor, and many foreign veterans respect them.

Another alien king who was more than ten meters long and prostrated like a hedgehog said: "There is no way, we have rushed over as quickly as possible after receiving a call for help. Who knows that the other party ended so quickly, let's take a look around here first. If there is an enemy, if the opponent doesn't run far, they can still catch up."

"I hope the other party hasn't mastered the teleportation." The strong man covered in black robe said in a low voice.

Not every king can master "teleport".

The law of space can indeed be divided into three categories: teleportation, space strangulation, and space blockade. Each category is divided into many sub-categories. For example, "teleport" can be subdivided into "dead object teleportation" and "space resonance". "The body melts into the void" and many other sub-categories...Only when all of them are solved, can they have the teleport ability.

This is just a way of dividing.

Just as humans can be divided into men and women, they can also be divided into infants, children, teenagers, adults, and old age.

According to different concepts...There are indeed many classification methods. After all, the various classifications are integrated as a whole "space law", and each classification can naturally be integrated.

Some strong people may pursue lethality and study "space blockade" and "space strangulation."

Or in pursuit of speed, blending a small part of "Space Teleportation" with other mysterious parts.

When the three categories are fully mastered and integrated into the law of complete space, one is naturally the venerable.

But this also troubles the countless kings of the hundreds of millions of races in the universe.

The human race has accumulated for hundreds of millions of years and has been resurrected continuously, and there are only more than 6,000 sages.

And it is even more difficult to master "time" and "space" at the same time!

The Lord of the universe is already a great existence standing at the pinnacle of the primitive universe!

They reverse time and space, can resurrect living beings, and possess endless power.

After a quick search.

"Our detection equipment did not find an enemy within 1 billion kilometers."

The faces of the three kings were a little ugly.

The short stature of the three of them was as cute as a little girl, but with \*\*\*\* corners and evil eyes, Feng Wang also said: "It seems that the situation is as bad as we thought before, or the other party's detection equipment is better than ours. , Shielding us from detection... Either teleport and leave the battlefield as soon as the battle is over. Of course, it may also be teleported by the kingdom of God, but

the battle has just ended. If the kingdom of God teleports, it will leave traces of space. We did not notice it here. To any trace of space that uses the kingdom of God to transmit."

The three powerhouses looked at each other.

"The distress message Natia sent over before seems to mention the "King of Insects" in the human camp?"

"I'm afraid she has fallen, or she is controlled by the "King of Insects"."

"I've also heard of him. He dare to enslave the mother emperor on the battlefield outside the territory. He is really not afraid of death."

"A high-ranking king... Master Nanxun knows that he will definitely be very angry. This King Chong, he will be dead unless he leaves the battlefield outside the territory."

On the same day, the Zerg camp began to circulate a message that the Zerg Mother Emperor began to issue notices to a large number of allies on the Yanji Continent, including the entire seventh battlefield, and began to offer big rewards to investigate the traces of the Zerg King.

...

In the undulating mountain area of the Yanji Continent, a black stream of light was speeding.

"Natiya has two immortal princes under Natya's command. If you find two more, you can enter the sacrificial tower." Wang Yi thought to himself.

The reason why he didn't go to the tower right away was not only because of the insufficient number of people, but also because of the desire to pit a few foreign kings.

After all, there is a sacrificial pattern inside the tower to block the space, which cannot be teleported. The space is still closed. When they enter, they can only smash with Wang Yi. They can't run away. But outside, they can't beat them, and they can escape by various methods. .

Even if Wang Yi wanted to kill a pinnacle king, it was not an easy task.

His "space blockade" can be used with the power of the world, but it is okay to deal with ordinary immortality, and when dealing with the king, the opponent can break it in an instant, which is useless.

"It will be different if you get the Arm of Locking Hollow." Wang Yi was a little expectant in his heart.

After thinking about it, Wang Yi decided that if he could lure a few foreign kings into it, he would lure them in, instead of adding servants himself.

Before that, let's go hunting and see if we can enslave the newly-acquired Zerg mother-emperor Natia again with a few powerful immortal gods.

...

The Yan Ji Continent is divided into four major camps, humans, Zergs, Machines, and Demon races. The strength of each camp seems to be different, and the number of kings in the Yan Ji Continent is also similar.

Recently, the "King of Insects", "King of Hunting Gods" and "Lord of Flame Star Realm" in the human camp are very famous.

"King of Insects" and "King of Hunting Gods" are because they are wanted for rewards from the Zerg camp and the Mechanic camp... and the "Lord of the Flame Star Realm"... purely because it is one of the twelve pinnacles of Star Giant Beasts. one! Very rare! Being the landlord again, he has the high-level combat power of the king!

The Yaozu faction said that they couldn't understand. Although the Starry Sky Behemoth Alliance has always been neutral, you can join any party to enter the outer battlefield... But the Yaozu always thinks that the Starry Sky Behemoth is a member of the Monster Race, because the Starry Sky Behemoths are highly intelligent and talented. It is a giant beast, especially the Twelve Pinnacle bloodline, which is even more noble than the imperial bloodline of the Monster Race.

On the whole, the star behemoth is really equivalent to the "enhanced" monster race!

The Yaozu has always wanted to integrate the star behemoth into its own group.

However, the Star Giant Beasts are too proud to consider themselves a member of the Monster Race. Basically, they and all parties in the universe are in good condition.

The star behemoth has great strength, but no territory!

The behemoths of the starry sky are scattered in various regions of the universe, and many world masters will never touch the other one for a lifetime. Unless you become immortal and have eternal life, you can touch the core of the star behemoths-the starry behemoth alliance.

Starry Behemoth Alliance! That is one of the super leagues in the universe.

It can be compared with the "Hongmeng" of mankind!

If this alliance is willing to integrate into the Yaozu, the Yaozu will immediately become the number one pinnacle group in the universe!

It's a pity that even though the Yaozu tried very hard to invite, the group of proud star beasts were unwilling to even take care of them.

A world master-level peerless genius Yanxing giant actually appeared on the outer battlefield, which also caused many people to mumble about the background behind this giant.

Could it be a super existence of the Star Behemoth Alliance or simply a disciple of the Lord of the Universe?

On a vast lake.

Powerful aliens are generally hiding in hidden locations such as mountain caves, underground caves, underwater caves, etc. Unless the kind of super power who stands on the highest peak on the continent, no one dares to build a striking place for palace residences. .

In the underwater cave, a group of alien immortal gods from the mechanical clan camp are talking.

"A few days ago, King Zhanchen issued a reward. The 20 million Yulan units offered a reward for the coordinate information of the human camp strong "Hunting God King." More."

"Yes, if we can find the "Hunting King" and tell it to King Zhanchen, then we will send it."

"The beauty you think about, can we provoke the kind of strong? When you find out, you will die."

"I just don't know how the Hunting God King provokes King Zhan Chen."

"It seems that the younger brother of King Zhanchen was killed by the Hunting God King."

"On the outer battlefield, it is normal for the strong to fight and fall, but the Hunter King was a bit unlucky, and he actually killed the younger brother of King Zhanchen. This time King Zhanchen was eyeing him. King Zhanchen is the limit of the king, the \*\*\*\* of hunting. From now on, the king will probably have to worry about walking in the Yanji Continent."

"The Hunting God King is also the pinnacle of the king, it is not so easy for King Zhanchen to kill him, right?"

"Can't people call friends and invite friends? King Zhanchen knows a lot of friends at the top of the king and the peak of the king. A group of super powers join forces to kill a peak of the king. It is not impossible..."

"I just don't know if the Hunting God King will fall to the Yanji Continent..."

While these alien races were talking about immortality, a black flying saucer-shaped spaceship was quietly suspended above their heads.

Wang Yi, dressed in a dark red armor, sat on a chair, shaking the liquid in his wine glass, looking at the screen in front, those alien conversations also fell into his ears.

"King Zhanchen?" Wang Yi said in a low voice.

"interesting."

"Is it the limit of the king? I'll see who will kill who by then."

"It's not that easy to kill my Void Zerg clone!"

"Natya, Elizabeth, come out and start work."

...

"The Hunter King, why haven't he found his trace yet?"

In a mountain range in the Yanji Continent, on a towering mountain that rises like a sharp sword, there is a silver-white pyramid palace emitting endless light. In the palace, wearing a black armor and exuding a strong dark atmosphere "Wang" sat on the throne with a cold face.

He was the only one in the entire palace, and it was terribly quiet.

"King Zhanchen" is the rare ultimate powerhouse in Yanji Continent. He stands on the pinnacle of Yanji Continent. Apart from going to the Star Tower, he naturally disdains the hordes like other immortals.

In these days, he has been waiting in the palace, wanting to get news of the "Hunting King" who killed his junior, so as to avenge him, but there has been no news.

"King Zhanchen" always believed that the "God Hunting King" could not escape the explosive power of the Vulcan Origin Crystal. In that case, even he might suffer some damage, let alone the "God Hunting King" at the peak of the king, he Thinking that the "God of Hunting King"'s strength would be greatly reduced, naturally he would not be willing to let go of this opportunity.

"The Hunting King, are you still on the Yanji Continent?"

King Zhan Chen raised his head and looked at the sky outside.

And on the other side of the seventh battlefield, the Gemini Xuanyu.

Gemini spiral domains are two supermajor vortices with a very wide range of dispersion. The diameter of these two supermajor vortices is 3.9 light-years in diameter and the larger is 4.2 light-years in diameter. These two supermajor vortices influence each other and spread out. The scope can no longer expand, but it still faintly attracts a large amount of distant matter to fly into the vortex.

Gemini spin domain has both suction and repulsion.

Just entering the Gemini spin domain, the suction is extremely strong, the deeper the suction, the more terrifying the suction, when it reaches an extreme.

Later, the suction force disappeared completely and turned into a repulsive force.

The closer to the depths of the vortex, the repulsive force of the core becomes more astonishing. At least no one in the Immortal King has heard of anyone who can reach the core of the Gemini Rotary Domain.

Someone tries to teleport in, but as soon as the teleport goes deep, the much stronger repulsive force will instantly annihilate the immortal gods.

This is also an extremely dangerous battle area, much more dangerous than the "Yan Ji Continent". Most of the people who haunt here are immortal kings.

In the whirlpool of the larger Gemini spin domain, one of the continents with a diameter of more than 50 million kilometers is flying around in the whirlpool, flying eternally.

This continent has been occupied by a certain team for a long time, and the strong from other camps dare not approach it at all.

In a tall and golden palace on the mainland, there is a huge zerg brood with a diameter of more than ten kilometers, and there are thousands of golden zerg warriors hovering around.

In the palace, there are some powerful men of various races with different appearances.

They are all under the command of the Zerg mother emperor.

Some are soul slaves, some are followers.

The number of kings alone is dozens, let alone the kings and ordinary immortality.

"Hasn't the news about the King Chong been found?"

A cold and majestic female voice sounded in the palace, somewhat crisp.

Kneeling under the palace's hands respectfully said: "Master, we have notified the entire faction that we have offered a reward for King Insect King, and spread it to other camps through various channels. Now the entire seventh battlefield should know that we are offering a reward to Insect King. The news of the king, but so far, no trace of the king of insects has been found..."

"Humph!"

The mother emperor snorted angrily, causing the golden zerg warriors underneath to agitate, and the servants of the enshrined king even lowered their heads.

"The king of insects is so bold." The mother emperor's voice was cold.

The name is not just called casually. If some people with strong names don't want to accept it, they can veto it out loud.

Otherwise, the name "Devil King ~ [www.mtlnovel.com](http://www.mtlnovel.com)~ Demon King"... and so on will be spread out by someone who is interested, and I am afraid that you will be besieged to death within a few days on the battlefield outside the territory.

Although "King of Insects" is not so large, after the appearance of this name, "King of Insects" has never been expressed.

Regardless of whether he intended it or not, the Zerg was not pleasing to his eyes anyway.

Nanxun felt a burst of anger in his heart when thinking of his apprentice.

She herself learned from various sources that her apprentice was mostly enslaved.

In fact, the Zerg mother emperor is very sweet in the eyes of the strong from all sides. In many cases, the Zerg mother emperor is enslaved, but fewer are killed.

But from the perspective of the Zerg, there is no difference between being enslaved and dying, but it will irritate them.

### [Chapter 330: Catch](#)

Over the icy lake, because of the shielding of detection equipment, no matter if you use the naked eye, detection equipment or supernatural power, you can't find Wang Yi's spacecraft hiding its traces.

"Huh." Wang Yi and a Zerg brood appeared, wearing dark red armor and black masks with long flowing hair.

However, this time it was Natia, who had just been taken into a slave by Wang Yi.

"A total of 8 alien races, one primary entrusted king, two high rank entrusted marquises, and the rest are also primary entrusted marquises. This team is good at strength." Wang Yi smiled slightly, "Natiya, let's join a wave of a million Zerg army. ."

"Master, the millions of Zerg army are fighting together. They are very powerful, won't you take them into slaves?" Natia's soft and sweet voice sounded inexplicably.

"No, I don't need the weak." Wang Yi was very cold.

The Zerg mother emperor immediately followed Wang Yi's instructions.

Millions of "Bloodthirsty Devil Praying Man" appeared and began to gather strength.

After a short period of condensing power, the next moment, hum... an endless ball of light flew out through the air, as if countless fire meteors dart across the sky, the scene was extremely spectacular.

Countless bolide continuously gathered together during the flight, directly converging into a palpitating rainbow light, and the space was extremely fragile in front of this rainbow light, constantly crumbled and shattered.

"Boom..."

Millions of Zerg Legions combined a blow, and the terrifying energy beam explosion directly tore tens of thousands of kilometers of space into fragments, and a figure flew out in the chaotic torrent of space debris.

"Om~~"

And the 100,000 "Spirit Butterfly" Zerg warriors of "Natiya" who had been prepared for a long time under her control simultaneously performed soul attacks.

As a special existence in the Zerg warrior system, not all Zerg female emperors can nurture the "Spiritual Butterfly". Only a very small number of Zerg female emperors can successfully cultivate and create a "Spiritable Butterfly" at the pinnacle of the lord. The cost is higher than making a Zerg king!

The "Lingmei Butterfly" is about seven or eight meters high, with a slender and weak body, an extra large head, and a pair of colorful butterfly wings behind it, which is not suitable for hand-to-hand combat.

But they are good at soul attacks and illusions.

Gathered together, like a colorful cloud.

"Natiya" can create one hundred thousand "spiritual butterflies", it can be seen that her background is unusual.

A full 100,000 "spiritual butterflies" are operating under the distracted control of the Zerg mother emperor, exploding with astonishing power!

"boom....."

The entire void was shaking, and the mighty soul power surged like a boundless ocean wave, blasting on the alien elementary seal king immortal who had just escaped from the explosion.

The soul attack created by the combined efforts of 100,000 "spiritual butterflies" would be difficult to resist even if the high-ranking kings arrived.

"Natiya" was too late to take out the "Lingmei Butterfly" to challenge, after all, she could only control a million Zerg warriors at the same time.

The translucent and unreal brilliance spread over and enveloped the alien king, making him instantly lose consciousness.

"Uh!" The alien king's soul was shocked, and he seemed a little dull for a while.

"Master, my spirit magic butterfly legion illusion can only last a short time against the king." Natia said through voice transmission.

The soul illusion formed by the union of one hundred thousand "spiritual butterfly" zerg races is indeed very powerful, but it has not yet crushed a king.

If it weren't for the existence of Natia and Worm's Nest to be completely shielded by Wang Yi's detection equipment, it would not be so easy to carry out a sneak attack, so that the immortal aliens would not be able to react completely.

If you go to fight, the Zerg army must be within one hundred thousand kilometers. If the distance is too far, it will be too easy to dodge.

Under normal circumstances, it is difficult for the Zerg Legion's attack to hit the king.

"Leave it to me." Wang Yi's figure jumped out quickly. Almost instantly, he came to the alien seal king who had fallen into the illusion. The cosmic warriors condensed into a "black and white swordfish", spurring the original power of time and space, and emitting sharpness. The sound of breaking through the sky pierced the alien king with a fierce aura that tore everything.

"Sneer!" Wang Yi's "black and white swordfish" arrogantly stabbed into the alien king's battle armor, and the fierce and powerful force directly tore his divine body, and at the same time made him cry out and woke him up.

"what....."

He turned his head to see Wang Yi, and was suddenly shocked.

"The King of Insects!"

He also saw the Zerg brood in the distance.

Then he was frightened again.

"My \*\*\*\* body..."

Although Wang Yi's human body is the power of the first-class king, but the law perception is the 20th floor of the Tongtianqiao, plus the self-created pinnacle secret method, the power of this blow can be comparable to that of the pinnacle king!

This mechanical alien race is just an ordinary elementary seal king. Just now he suffered a blow from the "black and white swordfish" unsuspectingly, and the divine body lost more than 1%.

Under normal circumstances, the pinnacle seal king also burns the divine body, in order to cause enough damage to the elementary seal king.

Wang Yi doesn't need it, because his moves are powerful enough!

With Wang Yi's blockade, coupled with the continuous powerful attacks of the Zerg army nearby, this alien king had no power to fight back at all, and the divine body was continuously weakened.

Even if he wanted to attack the Zerg Legion, he would be intercepted by Wang Yi.

Wang Yi was not fast enough to escape, so he was easily stopped.

Burning the divine body can't beat Wang Yi, and will only die more quickly.

"Ah, King Insect King!" The divine body of the alien king soon lost 50%, desperate.

The remaining 50% of the immortal body is equivalent to half of the soul, and I am afraid that the remaining strength is less than one-tenth!

If the immortal body burns too much and the soul loses too much, it will not be able to maintain a complete consciousness, and it will even fall into a deep sleep directly.

The gods are sleeping...Slowly repairing the soul in a state of sleep, the repair is slow and takes a long, long time, it may take hundreds of millions of years, or it will never be able to wake up.

Therefore, the burning of immortal divine bodies generally burns within 5%!

With such a loss, it is not difficult to recover.

But now only 50% of the alien kings of the mechanical clan camp are left with the divine body, and there is no chance of survival at all.

He also sent a call for help to the same camp, but the question is can he support it until then? Will someone really come to rescue him?

Unless there is a strong person in your own camp nearby or you know a strong person who can teleport, it is too late.

"King Yu Chong, don't force me!" the alien who resembled a human figure but had a scorpion's lower body and three tails roared in a common human language.

Wang Yi's indifferent manipulation of the "black and white swordfish" attacked the "foreign kings", and was completely unmoved.

Still calculating in my heart.

"The \*\*\*\* body still has 43%..."

It is too difficult for a complete king to enslave, even the pinnacle master soul master must be lucky to enslave a king.

Of course, if he wants to enslave the opponent, while weakening the opponent, he must also guard against the opponent's self-destruction, otherwise he will fall short.

Wang Yi also cannot weaken the opponent too much, otherwise the strength will be lost too much and recovery will be too troublesome.

Of course, in the end, regardless of whether the opponent blew himself up or was enslaved, he made money.

The divine body of the alien king soon only left 30% of the original, and he was completely crazy.

"Want to kill me, force me, die, die, die together!"

He rushed over, trying to take Wang Yi and blew himself up.

Even if he had only 30% of the divine body left, the power of self-detonation was also terrifying.

But when he acted, another wave of soul attacks from the Zerg Legion arrived just right. The strength was greatly damaged, and most of the soul loss caused the alien kings who were also weak in consciousness to be attacked at once, and the movements were slowed down.

"The 30% divine body...I am afraid that the strength is not as good as that of Feng Hou Peak... But it has been weakened to this level, I hope it can succeed in enslavement." Wang Yi looked at the alien sealing king in front of Yun Tuo Tuo with some emotion.

Afterwards, a tall purple-gold figure and a huge, fiery red body as large as a mountain emerged.

Wang Yi's three bodies came together.

"Soul Abyss!"

"Soul Abyss!"

"Soul Abyss!"

The three bodies, together using the soul secret method, suppressed the consciousness of the alien king, making him unable to move or explode.

"Natiya!"

"Yes, Master." The Zerg brood appeared next to the alien king. At the same time, "Natiya" who was staying in the Zerg brood began to use the soul enslavement secret method and began to enslave the poor alien crown king who had been hit hard in front of him.

It was the first time for "Natiya" to personally enslaved the king.

However, Wang Yi didn't care about the immortality of an elementary titled king, so he entrusted it to "Nati Ya" to enslave him.

"Natiya" is his soul slave, almost like his slavery.

With Wang Yi's awareness of helping suppress the "foreign race kingship" consciousness, the Zerg mother emperor "Natiya" began to use the soul secret method to forcefully infiltrate and control.

The azure blue gradually became deep and blurred, exuding weird gloomy light.

The body of the alien king can't move, but in the soul... the two are fighting the most fiercely.

"Want to control me? No! I would rather perish!" The alien king roared from the bottom of his heart, and all the souls in his body were struggling frantically, finally breaking through Wang Yi's forced suppression control.

At the critical moment, the alien king suddenly exploded with an astonishing will, and barely grasped a trace of the body's control ability.

"Huh!?" Wang Yi's expression changed, and he teleported away with the Zerg brood.

"Hahaha... want to control me, dream..."

Before the crazy laughter of the alien kings fell, they immediately detonated the immortal divine body.

"Boom—"

The terrible shock wave instantly spread in all directions, sweeping the entire land, turning everything into nothingness.

"It failed." Wang Yi hovered in the sky and frowned at the scene formed by the explosion.

"I have suppressed so much, I can get rid of my suppression at the last minute, I don't know if I am unlucky or he is too lucky..."

"Master, I'm sorry, I'm useless, I didn't control the king." Natia said apologetically next to her.

"No, it is not so easy to control the king, and you can't be blamed." Wang Yi shook his head.

"It's nothing more than an elementary entrusting king. This time it won't work, but the next time. Since entrusting a king won't work, let's try to enslave him first."

"But we also have to be careful. If we kill too much of the strong, it will arouse public anger and provoke the super strong to show up."

Wang Yi's super power naturally refers to the invincible king or the cosmopolitan.

Wang Yi took Natia back into her body.

The two avatars of Wang Yi left again to search for prey elsewhere.

...

A few days later.

"Om!"

A group soul attack by the "Ling Mei Butterfly" of the Zerg Legion caused the fleeing immortal consciousness of the Marquis to begin to blur.

"No, no..." He tried his best to struggle, but his consciousness was like a leaf trapped in a whirlpool, appearing so weak, and finally his consciousness slid into the abyss of darkness.

Wang Yi and the Zerg mother emperor appeared together.

"Natya, this high-ranking foreign race has been handed over to you."

"Yes, Master." Natia was full of confidence this time.

Nathya began to use the soul control secret method to the immortal Fenghou who had fallen into a faint consciousness.

After a while.

"call!"

The red rock skin, as high as hundreds of meters, was full of endless high-temperature rock life. Opened the blazing fire pupils, looked at the Zerg mother emperor next to him, and through the soul connection, he immediately understood who the real owner was.

This is a race of rock life in the universe-the Gastda.

"Successful." Wang Yi nodded, feeling a little bit in his heart.

Although the Zerzu mother emperor's consciousness intensity, soul amplitude, and will are far inferior to her own, her research and mastery of soul secrets are far more advanced than her own.

Like those soul masters, they have been studying illusions for a long time to study the methods of controlling souls. They have a profound understanding of soul research. To capture them... it really takes some luck.

However, the rock life in front of him is not so lucky.

"Get up." Wang Yi looked at the rock life.

Rock Life stood up and looked at the Zerg mother emperor with respect from the soul. At this moment, the Zerg mother emperor was the one he felt closest to, and immediately saluted respectfully: "Master."

The Zerg mother emperor "Natiya" said happily: "Master, it's successful." She is also very happy to have one more powerful soul slave. This means that she has the ability to do more things for her master.

And Wang Yi was also in the process of suppressing slavery, and he also learned and mastered many useful experiences. At least he would know what to do when he went to enslave those who were the top kings in the future.

"well done."

"Let's go ahead."

...

Wang Yi's three major bodies are in Yanji Mainland, constantly capturing and enslaving all the powerful aliens that can be seen.

Because the start was too quick and sudden, those alien races didn't have time to spread the news.

After Wang Yi continued to enslave the fourth immortal, he ended this hunting and capturing.

In order to prevent the capture action from being interrupted suddenly, when dealing with the mechanical clan, the clones of the Yanxing giant beasts or the human clones are used, while for the Zerg

camp, the clones of the Void Zerg tribe and the giants of the flame star are used to take action. Anyway, everyone I don't know that the three prestigious and powerful kings are all the same person~[www.mtlnovel.com](http://www.mtlnovel.com)~ Without any interruption, Wang Yi fought 9 battles, successfully enslaved 4 targets, and failed 5 times.

The failed targets eventually chose to blow themselves up.

However, Wang Yi finally helped Natia, the "Zerzu Mother Emperor", to obtain 5 servants.

In addition, she originally had two princes under her command, and that is seven princes immortal.

Among them, 4 were Fenghou Dianfeng and 3 were Fenghou Gao.

As for those below Fenghou? Wang Yi doesn't like it at all.

And basically all died under the combined attack of the Zerg Legion.

"It's almost time, it's time to go to the tower."
