

## A God 361

### [Chapter 361: Pass the test](#)

Gold, wood, water, fire, earth, wind, thunder, light, time, space.

The secret patterns of the Ten Principles of Origin are fused together in an incomparably mysterious and mysterious way, which contains the ultimate mystery, forming a picture of yin and yang fish. The two fish eyes are the core parts of the two laws of time and space, and the great power that constitutes is inexplicable. Under the influence of the force, it flows slowly like a starry sky and a river, as if the shadow of the universe emerges behind it, and a world is faintly born and destroyed.

"Finally succeeded." Wang Yi was overjoyed.

Seeing the perfect law and secret pattern in front of me, this is the fusion of the two ultimate mysteries that I have created.

Power, directly across the pinnacle of the master of the universe, and truly reach the level of the master of the universe!

"However, it should not be the strongest secret of the Lord of the Universe." Wang Yi secretly said.

"Since it is a fusion of the ten fundamental laws, and has an artistic conception of destroying the universe, this secret technique is called 'Ten Directions Are All Annihilated'." Wang Yi raised his head to look up at the sky's brilliant mystery pattern, and said with a smile.

At this moment, Wang Yi was extremely satisfied, and the 60 billion years of hard work in the time world was not in vain.

I really succeeded in the end.

"Although it has been created, there is still a year before the closure of the Tongtian Tower." Wang Yi thought for a while, and was not in a hurry to go to the gray stone pillar to test it immediately. "Check again to see if there are any omissions in the secret method. It will not be too late for me to brand the secret method on the last day."

When Wang Yi did this, he also had his own plan.

"Tongtian Tower" is of great importance. It is closely watched by countless forces throughout the universe. If it is obtained by him in advance, it will definitely attract countless forces to track down. Although it may not be possible to find Wang Yi, since it can reduce the risk, Why did Wang Yi take risks.

Passing the test on the last day, regardless of success or failure, Tongtian Pagoda will kick everyone out. Others will only think that the Tongtian Pagoda will be closed naturally, and never think that someone actually passed the Tongtian Pagoda test on the last day.

Of course, Wang Yi has not yet passed the Tongtian Tower, and everything is unknown.

After making a decision, Wang Yi began to prepare for the last day.

In the Tongtian Tower, time flies quickly.

In a blink of an eye, it was the last day of Tongtian Tower.

Wang Yi, who was sitting crouched by the stone pillars in the gray rock square, opened his eyes.

"It's almost time."

He directly extended the consciousness containing the power of the world into the gray stone pillar.

The next moment, his consciousness appeared in a vast dark void.

An ancient voice rang deep in his ears.

"Demonstrate your secret method. If you pass, you will enter the next level of test."

This ancient voice will sound in every life consciousness that enters the dark space.

Wang Yi silently began to outline his secret method.

In the dark void, a series of colorful rules and secret threads began to form.

The origin law of gold, the origin law of wood...combine with the origin law of space.

The origin law of wind, the origin law of thunder...combine with the origin law of time.

Wang Yi's spirit was extremely concentrated, and he devoted himself to it. The secrets of the law were deduced on his fingers. He was like a painter with the most brilliant, painting his own world.

When the secret patterns of the "Ten Directions All Extinguishment" secret method were all outlined, a powerful and vast aura swept out, causing the dark void to oscillate slightly.

After a short silence.

The ancient voice sounded again, still dull.

"Congratulations, you have passed the first secret test. Next is the second test, the will test."

Before Wang Yi breathed a sigh of relief, a black vortex appeared in front of Wang Yi out of thin air. An invisible suction force passed from the vortex. Wang Yi couldn't resist it, and his consciousness was directly sucked in.

On the outside, the gray stone pillars gradually appeared densely packed secret patterns of various colors, like a sleeping behemoth awakening, filled with palpitating coercion, and weird whistling came vaguely.

The consciousness of all of Wang Yi's bodies was simultaneously pulled into this dark void, and the external bodies had completely lost their response.

Wang Yi's spirit was in a trance, the world changed before his eyes, and he suddenly appeared in a scene, surrounded by a faint white mist, standing on a vast lake, and a wooden bridge at his feet, shrouded in white mist in front of him, I don't know. Where does it go.

At this time, the voice came from the void again.

"Cross this bridge in one day and you can pass the test."

Wang Yi looked at the old mottled wooden bridge that didn't know the end or how long, there was still the sound of running water underneath, and he was silent.

He took the first step.

It doesn't feel much.

Then the second step, the third step...

Wang Yi walks faster and faster, but he can only walk here, and the speed is at best comparable to ordinary people. At this time, Wang Yi can be described as "striving like flying".

But Wang Yi did not relax.

After a short period of time, the wooden bridge still did not see the end, and the front was still shrouded in dense fog. Wang Yi already felt a certain pressure from the void, and his soul was weighed heavily by something.

Wang Yi took a deep breath and continued walking.

As he moved forward, the pressure from the wooden bridge became stronger and stronger, and Wang Yi, who entered this space with consciousness himself, was equal to his entire body being oppressed, and his speed slowed down involuntarily.

It's as if the load on ordinary people keeps increasing.

When Wang Yi walked for more than three hours, he had already walked on the bridge for half a day, and at this time the pressure from the depths of the soul had already made him feel strenuous.

To know that Wang Yi's will is now the overlord of the universe, how terrible?

But there is still some unbearable coercion of this ancient wooden bridge.

And as he moved forward, inexplicable murmurs began to sound in his ears, and many pictures appeared in front of his eyes.

"Illusion?"

"Does this also affect me?"

"roll!!!"

Wang Yi's heart is like a mirror, and he is not tempted at all.

The wooden bridge seemed to be irritated, there was a roar in the sky, and a huge wave was set off on the lake out of thin air. A powerful will rushed towards Wang Yi like a wave.

"boom!"

It's like an ordinary person's head is smashed by a sledgehammer, and it can easily cause a concussion. Even if Wang Yi is now strong and determined, he is still smashed back again and again.

But he still gritted his teeth to bear it and moved on.

It's just that every step forward will inevitably endure the impact of that wave of will.

Time passed by a little bit.

Seeing the time is almost one day away, and there is still a white mist in front of him, Wang Yi is a little anxious.

Damn, what is the end of this wooden bridge?

"boom!"

"boom!"

It was as if thunder and thunder were on top of Wang Yi's soul, his soul was in pain, and his consciousness began to blur.

"Hold it!"

"hold onto!"

The feet seemed to be filled with lead heavy, every step would exhaust Wang Yi's whole body strength.

It's as if a normal person has carried two hundred catties and ran for more than ten kilometers~www.mtlnovel.com~ just like Wang Yi now feels.

A fatigue in the depths of the soul surged from Wang Yi's consciousness.

"give up."

A voice whispered in his ear.

Wang Yi didn't realize it, and moved forward like a machine.

"Wow!"

The white mist in front of him was cleared, and an empty cliff suddenly appeared in front of him.

And on the edge of the cliff, a figure in a scarlet robe stood lonely, as if forever.

"He" seemed to feel Wang Yi's arrival and turned around slowly.

An extremely familiar face appeared in front of Wang Yi.

That is Wang Yi's face impressively!

At the same time, the last time of Tongtian Tower has come.

[Chapter 362: My name is "meditation"](#)

"time up!"

An indifferent voice sounded in the minds of countless aliens in the Tongtian Tower.

Immediately, an incomparably powerful, unimaginable force directly envelops the billionaires.

"brush!"

In the next moment, countless strong figures of various races appeared outside the Star Tower.

"Ah! Is the time up yet?"

"I...I almost finished my comprehension a little bit."

Sorrow, regret, and unwilling voices one after another.

And the major forces in the universe are also very sorry.

"It seems that no one has passed the test of Tongtian Tower."

"Tongtian Tower is still here, but we can't get in anymore."

When the Tongtian Tower blasted them out, the eighteen passage entrances at the bottom had already been closed, so now these strong men just couldn't get in.

Unlike the Star Tower, even if no one can recognize the Lord, they can still enter and exit at any time.

"I don't know if there is still a chance for Tongtian Tower to be reopened. I feel that this ten thousand years of insight has inspired me a lot."

"Me too, I feel that I am about to break through to the Venerable."

Many ancient powerhouses are excited.

Some powerhouses who are already close to breakthrough can't wait to return to their original places.

It is foreseeable that this time the Tongtian Pagoda is opened, and the number of breakthroughs by the powerhouses in the universe will usher in an unprecedented explosion.

There are still some forces who are unwilling to be outside the Tongtian Tower, wanting to stay and explore to see if there is any chance.

However, with the lessons learned from the Star Tower, this time the major forces in the universe have maintained restraint, but there has been no war.

...

Wang Yi is a little flustered now.

He did not expect that he passed the test of the Tongtian Tower and came to the exit. The first thing he saw was a "person" with his own face.

However, the other party understood Wang Yi's feelings very well, smiled, her face changed again, and she became a beautiful girl with a clear face, but her hair, eyebrows, and eyes were all red, and there was a \*\*\*\* tear on the center of her white eyebrows.

"I didn't expect that a legacy I left behind would be passed by a little guy who is not immortal in the lower world."

The life sighed with emotion, but his voice couldn't distinguish men and women.

"She" looked at Wang Yi again, "Little guy, don't be nervous, since you have passed the test of Tongtian Tower, then you are my registered disciple, and I won't hurt you."

"This is just a consciousness that I left behind many years ago. I am invisible, so there is no such thing as your so-called gender, appearance, and random changes. Others call me "meditation."

"Senior." Wang Yilian saluted respectfully.

"Ming" looked down at Wang Yi with blood-colored eyes, as if he could see everything about him at a glance.

She nodded.

"From now on, you can call me a master even if I am a named disciple."

"Yes, Master." Wang Yi said respectfully, but couldn't help muttering in his heart that he passed the test so hard, and he was only a named disciple.

"Ming" seemed to see through Wang Yi's inner thoughts, shook his head and smiled: "You only passed the test of the Tongtian Tower, so you are a named disciple. When you can fully control the Tongtian Tower, and then go beyond the prison, I will be regarded as the real one. Disciple, before this, it was useless to say much."

Wang Yi's heart shuddered, and then couldn't help but ask curiously: "Master, where did you come from?"

"Ming" just smiled, but did not answer. Instead, he turned and walked to the edge of the cliff. Wang Yi quickly followed.

"Wow~~"

Under the cliff, there is an endless sea of blood.

"After more than a hundred thousand source worlds, now it's time for you to come home." "Ming" sighed, stretched out a white jade hand, and lightly grabbed it toward the sea.

"Boom~~"

The entire sea of blood boiled, and the endless sea water gathered together in Wang Yi's shocking eyes, and in a blink of an eye it turned into a \*\*\*\* bead and flew to the hands of "Ming".

Ming turned his head and smiled at Wang Yi with a dull face: "Apprentice, this is the core of Tongtian Tower. As long as you integrate it, you can become the true master of Tongtian Tower."

She seemed to recall something, and she was full of emotions, "At the beginning, I refined the heritage, including the Tongtian Tower, to bet against a few acquaintances. I actually don't like to teach others, so the endless years have passed, and there is no one under my sect. There are a few direct disciples, and there are very few named disciples. You are probably the youngest one."

"I deliberately set harsh conditions. I thought no one could pass the test. Who would have thought..." Ming shook his head gently.

Wang Yi has a strange expression.

It is estimated that no one can meet the test of your old man.

The reason why I can complete it is probably because the sign-in panel reduces the difficulty.

"Tongtian Pagoda is nothing to me, but it is the supreme treasure to the creatures of the Source World. If you have not reached the realm of the God King, it is best not to expose it at will. Of course, no one in the Source World will recognize it."

Ming didn't seem to want to explain more about what a \*\*\*\* king is, and changed the subject again.

"The core of the Tongtian Pagoda does not need to be tested anymore. Your current will is sufficient and there is no danger. It only takes three thousand years." She paused, "However, if you want to urge the Tongtian Pagoda, at least it must be completely integrated. A set of laws, according to the level of the universe on your side is the realm of the ruler..."

"The Tongtian Tower itself is a heritage, mainly used to give you insight into the law, so it does not have the ability to attack, can only be used for flying, defense. Of course, if you have the ability to trap the enemy in, then the opponent will not reach Go beyond the realm of the \*\*\*\* king, otherwise you won't be able to escape at all."

"Tongtian Pagoda, there is a great way to cultivate to the realm of the \*\*\*\* king, you just need to feel it, if you are not bad luck, you can naturally rise to the \*\*\*\* king, but this is also the limit, and you have to open up the road afterwards."

"Don't be too far-sighted, let's get out of your little universe first."

Ming's voice sounded in Wang Yi's mind.

"Yes, Master." Wang Yi said respectfully.

Enlightenment arose in his heart, and it seemed just as he expected that his master, Ming, might have an amazing origin.

"The specific function of Tongtian Tower, after you integrate the core of refining, you will naturally know ~www.mtlnovel.com~ as a teacher, I won't say much."

"Ming" looked at the respectful young man in front of him, with some emotion.

"If you can reach the extreme of this world and completely master the Tongtian Pagoda, then there will be a gift for you as a teacher at the Tongtian Pagoda. You may still have a chance to see me in the future. ."

"Go hard! Lucky little guy, this world is bigger than you think."

Ming took a deep look at Wang Yi, and then his figure disappeared like a shadow.

Only the bead made of a sea of blood flew in front of Wang Yi, spinning around.

Wang Yi looked at the bead of blood in front of him and was silent for a long time.

Reach out to hold it.

"Is it the limit of Tongtian Tower? I will definitely do it."

### [Chapter 363: Recognize the Lord Tongtian Pagoda](#)

When Wang Yi held the scarlet plant, a message was transmitted from the bead, and Wang Yi immediately understood how to fuse and refine the bead.

"According to the teacher's previous statement, the integration process is not dangerous, but it will last for three thousand years..."

Integrating the control core of the Tongtian Tower requires a "world master level" to have the will of the universe overlord level.

And the law perception and secret method creation talent are just the test left by the master of Tongtian Tower.

The difficulty of recognizing the master of Tongtian Tower is definitely higher than that of Star Tower.

"In the process of fusing the core of the Tongtian Tower, there is no need to invest all of your consciousness. Naturally, it will be refined over time... After the integration is successful, the Tongtian Tower will officially recognize the master, and you can exercise some basic control over the Tongtian Tower." Wang Yi smiled. road.

"Fortunately, although the pronucleus is not there, as long as there is a soul, it can be merged."

Wang Yi's human body and the Yanxing giant beast are now in the Giant Axe universe, and the Giant Axe universe is actually a small universe separated from the original universe. In the universe, as time goes by, it will continue to be far away from the original universe. The farther.

Therefore, it will take some time for Wang Yi's human body to rush to the battlefield outside the territory.

Wang Yi no longer hesitated, pressing the blood-colored beads to the center of his brows, and the power of thought penetrated. With the guidance of the soul power, the blood-colored beads melted instantly and poured into the center of Wang Yi's brows like flowing water.

"here we go."

Wang Yi sits on the island, and now the whole world of Tongtian Pagoda is dimmed, and only his island is still shining, and it looks particularly abrupt.

There was no danger in the process of fusion and acknowledgment. Wang Yi carefully observed the soul consciousness and found that it was indeed proceeding smoothly before he breathed a sigh of relief.

There was a smile on his face.

"Three thousand years later, the Tongtian Pagoda will be mine."

"Moreover, I also recognized a great teacher."

"This time, it should have made a lot of money."

"Unfortunately, the Star Tower is gone." Wang Yi couldn't help but feel regretful when he thought of this, and then laughed.

I am too greedy.

The Star Pagoda is just a treasure of suppressing gods, but the level of Tongtian Pagoda is by no means inferior to that of the Star Pagoda, and it is even worse. It is just a treasure of auxiliary cultivation type, and its function is actually equivalent to the chaotic monument of human beings. Attack function, mainly used for defense.

The sea of laws of the Tongtian Pagoda can guide a avenue of cultivation.

Speaking of it, the sea of laws of the Tongtian Pagoda is more like a "Chaos Stele" to guide the effect of the laws of perception.

And the Donghe inheritance of the Tomb Ship is a specific and detailed practice guide, such as "Floating Blood Sword Classic" and "Seven Changes of the Gods".

Both have their own advantages and disadvantages. One has to improve the law of perception to improve comprehension ability, and the other has specific and detailed training steps... If they can be combined, it is really too strong.

In the process of integrating the Tongtian Tower, Wang Yi also knew the specific information of the Tongtian Tower.

As mentioned before, the strongest function of Tongtian Pagoda is cultivation.

One is the sea of laws. The sea of laws is an aggregation of infinite laws, full of infinite changes. Once the master of the Tongtian Pagoda recognizes the Lord, he can enter the sea of laws at will without being restricted, and does not need to be like the masters of the universe and the most Like the strong, you can go deeper only when you reach the level. I

But this is just the perception of the law.

More importantly, it is actually the secret pattern of the Tongtian Pagoda itself.

Wang Yi can comprehend the secret pattern of this most precious law to create the secret method.

The two complement each other and are completely compatible.

According to Wang Yi's understanding...Is this a soldier of proof?

If Wang Yi understands the secret patterns of the Tongtian Pagoda thoroughly, he will be able to completely control the Tongtian Pagoda, and he will naturally reach the realm of "God King".

However, it takes a very long time to polish.

"Master said that he left me a gift in the depths of Tongtian Pagoda. Only if I completely master the Pagoda can I get it. I don't know what it will be?" Wang Yi said inwardly.

Wang Yi already had a vague guess about the identity of "Ming".

"Beyond the cage?"

Wang Yi felt a little throbbing in his heart.

In addition to self-cultivation, Wang Yi also paid attention to another aspect.

That is, the Tongtian Pagoda can be opened to outsiders.

But there are restrictions.

The owner of the Tongtian Pagoda naturally enters and exits at will, but for outsiders, if they want to enter the Sea of Law, first, they must get the permission of the owner of the Tongtian Pagoda, and the second is to wait for 100 million years.

This is a restriction left by the creator of the Tongtian Tower, and Wang Yi has no way to change it.

The Sea of Tongtian Tower Law has been opened once before, and if you want outsiders to enter, you must wait 100 million years.

"One hundred million years... Fortunately, it's not too long." After more than 60 billion years of cultivation, Wang Yi is relatively calm about this number.

As for the enemies of the Tongtian Pagoda, they are being held in other places. The Sea of Law is actually a space for perception and a core.

The Tongtian Pagoda is huge, and there are some secrets inside, waiting for Wang Yi to discover it.

"Furthermore, the Tongtian Pagoda, like the Star Pagoda, can also breed treasures like the Rule Star Orb..."

The number of Law Star Orbs is fixed, with a total of 13,600. At the core of Law Ocean, unless one is lost, a new one will be slowly born at a high cost.

The fusion of the law star beads can greatly improve the law perception in all directions.

Specifically, it's like an ordinary person who has at least the innate talent of law perception of a peerless genius as soon as tens of thousands of eras have appeared.

Of course, the requirements for the soul and the will of the mind are very high.

At least ordinary world masters can't bear it, at least they have to be immortal.

Very guarded!

More importantly, there are 13,600! It can be extracted from the sea of laws at any time.

When Wang Yi first knew it, he almost couldn't sit still.

Although the Sea of Laws is extremely against the sky, it can only be opened once in 100 million years, and only 1008 people are allowed to enter each time.

Before so many people, in fact, the tower of Tongtian has not yet been recognized as the master, behind it is the master of the tower of Tongtian who is in control.

Now that the Tongtian Pagoda has been recognized by Wang Yi, the conditions will return to normal.

Unless Wang Yi reaches the realm of the \*\*\*\* king and thoroughly masters the Tongtian Pagoda, he can make changes.

And once every 100 million years, every time 1008 people, such a precious quota, I am afraid that the human race will only let those top powerhouses come in.

To immortality, unless it is particularly against the sky and is valued, otherwise it is a waste.

In contrast, the "Law Star Orbs" control a lot of space. If Wang Yi thinks about it, it can be used to cultivate the geniuses of the people on the earth or the younger generations of his own disciples.

Not enough soul conditions? Don't forget the strongest aspect of the people on earth.

In addition, Wang Yi got a lot of "soul orbs" when signing in at the Star Tower this time. Although there are few "huang souls" and not many "king souls", there are many "soldier souls" and "general souls", which can be used to improve The soul level of earthlings.

And Luo Feng will soon be able to get the Star Tower, and then there will be a large number of "soul orbs" to provide to the people on earth.

Strong mind and will!

The soul is powerful!

Then make up for the biggest shortcomings of the people on earth...in terms of law perception...

Damn it!

The earthlings are going against the sky!

...

While fusing the Tower of Heaven ~www.mtlnovel.com~, Wang Yi's human body also emerged from the giant axe universe.

Hurrying to the Star Tower.

Because of the appearance of the Tongtian Pagoda before, hundreds of millions of races in the universe swarmed.

Although it is closed now, there are a large number of strong ethnic groups staying behind, wanting to take a break in the outer battlefield.

The entire extraterritorial battlefield has become mixed with hundreds of millions of ethnic groups, and the number of strong people has increased ten million times.

It is a good opportunity for hunting.

Wang Yi, who has spent more than 60 billion years inventing the ultimate secret method, is already sharpening his knife, and the butcher knife is already hungry and thirsty.

#### [Chapter 364: Luofeng and Star Tower](#)

The seventh battlefield of the extraterritorial battlefield, No. 026 barracks base.

In the starry sky, a spacecraft jumped out of the dark universe, and then flew towards the magnificent base of the gods.

In the spaceship control room, Wang Yi's human body is sitting on a wide seat.

He had just finished communicating with the teacher and learned that the teacher was going to retreat and preparing to break through to the Lord of the Universe, Wang Yi was also pleasantly surprised.

The human race will have at least three more masters of the universe this time.

As for the Venerable, there are more, at least dozens of them.

The rest will gradually increase in the years to come.

"Now that I have got the Tongtian Tower, do you want to tell the teacher about them?"

Wang Yi hesitated, but decided not to tell the human race first.

"There are still three thousand years, and I will make a decision when I recognize the Lord Tongtian Pagoda."

Even if you tell the human race now, it's useless. The Sea of Tongtian Pagoda Law is only open once every 100 million years, and you can only comprehend it for 10,000 years at a time... and the strong men of the human race have just come out, and even if they go in immediately, the effect is good Not as strong as before.

It seems that an insight is better than their long years of cultivation. In fact, this is an illusion.

This is very similar to the Chaos Monument, it is usually hard to cultivate and there are many doubts, and the effect is very good to watch.

And this "sea of laws" only increased the effect of the Chaos Stele by tens of thousands of times! But it still requires cultivators to cultivate and comprehend assiduously.

Without accumulation, where is the sentiment triggered?

Wang Yi understands this truth.

But even so, the efficiency and effect of Faruzhihai Perception is definitely more than that of other places.

Because it contains "Tao" that transcends "the strongest in the universe", it is unique.

Even the strongest in the universe can devote themselves to understanding and find a way to break through.

This alone can make countless powerhouses in the universe go crazy.

The ancestral \*\*\*\* teaches that the "place of the beast \*\*\*\* inheritance" is equivalent to "initiation." Whether you know it or not, anyway, I will give you all the knowledge, and how much you can accept is your business.

The "Sea of Laws" of Tongtian Pagoda means taking the initiative to watch, comprehend, and think...this actually has an essential difference.

Moreover, the Tongtian Pagoda has no upper limit, and the beast \*\*\*\* inheritance is only to the Lord of the universe.

"Tongtian Pagoda... absolutely cannot be leaked out, and in the future it can only be used to train the core powerhouses of our human race! At least until our human race has sufficient strength, it cannot be exposed." Wang Yi knew very well about the Tongtian Pagoda. lue.

An ordinary Xeon supreme treasure can make the whole universe crazy and fight to death and life. What's more, the Tongtian Pagoda, which can increase the "upper limit" of the strongest in the universe, and increase the chance of breakthrough by the Lord of the universe, will definitely allow all parties to hesitate. At all costs, to deal with mankind.

At that time, mankind will probably have to repeat the situation of a certain time and space force and be embarrassed on all sides.

Even if humans cannot be destroyed, they must be suppressed and forced to share the Tower of the Sky. Regardless?

Then suppress your humanity, rob you of your territory, destroy your population, kill your strong, and make you unable to develop.

Unless it is forever shrouded in the original universe and the giant axe universe, the original secret realm is not safe and will definitely be besieged by the entire universe.

Wang Yi didn't want to see that happen.

Of course, human beings can also use the tower of Tongtian Tower in exchange for enlightenment quotas, win over certain forces and divide them.

But why?

What's the difference between this and bowing? Humans still suffer.

"Still grow quietly, waiting for the opportunity..." Wang Yi's eyes flickered with cold.

When the human race becomes truly powerful, with several of the strongest in the universe, hundreds of masters of the universe, plus some strongest treasures, even if the forces of the entire universe unite, humans will be fearless.

It is completely possible to let some strong people sit down, and others can kill them.

Whoever has an opinion, win the battle first.

Of course, in the primitive universe, the six pinnacle races all have the strongest in the universe, and they cannot be completely extinct.

And once war starts, humans will suffer losses, so it is best to "deterrence"!

It is Wang Yi's goal to let the human race detach itself and live forever. As for the little troubles of the primitive universe, he is a bit despised now.

The height of the station is different, the angle of seeing things is naturally different, and the mood is naturally different.

It's just like when he was on the earth, he didn't bother to mix things up, and becoming stronger was his main goal.

With that mind, it is better to practice, or make a few fat babies with your wives.

Thunder God, Hong, Luo Feng...These people are all the same.

When the strength is reached, you can solve anything you encounter at your fingertips.

Of course, Wang Yi also understands that where there are people, there are struggles, and there are factions within human beings. Struggles are everywhere, but they are all controlled within a range.

A limited struggle is actually a good way to maintain the vitality of the ethnic group, and this is also the tacit approval of the high level of humanity.

"This time I got the Tongtian Pagoda. It was my big fortune." Wang Yi smiled and looked at the simulation of the location. "If the teachers learn that I have the Tongtian Pagoda, they don't know what their expressions are?"

With the "Tongtian Pagoda", Wang Yi's status among humans will never be lower than that of Chaos City Lords!

But your own strength is the most important!

"In order to prevent changes, let's wait until my strength becomes stronger." Wang Yi rubbed his chin. "It took more than 60 billion years in the time world, and the lifespan of my world master is very short. It's almost time to break through."

"However, first hunt in the outer battlefield and complete the first three panel tasks."

"Go to the Ancestral God Church again and complete some plans."

"Then you can break through."

In another time and space, Luo Feng came out of the battlefield outside the domain, first went to the Wuhua Secret Realm to get the third piece of metal, and then went to the ancestral gods.

But Wang Yi doesn't need to learn from him, he can go to the ancestral gods first, and then go to the Secret Realm of Wuhua.

In fact, he coveted the old lair of Zuoshanke. After all, Zuoshanke is the reincarnation of the \*\*\*\* king, and the Jinwang Palace that he carries with him is also the treasure of the \*\*\*\* king, and Yuan's "Lie Yuan Shu"...everything makes Wang Yi jealous. .

However, facing the mountain guest is very risky, and it will not be too late to face him when he has enough strength.

He believes that this day will not be too far~www.mtlnovel.com~ Speaking of which, Luo Feng should also go to the Star Tower, right? "

...

The seventh battlefield outside the territory.

Star Tower.

A silver-armored and silver-winged youth in the spacecraft stared in shock at a majestic nine-story tower that obscured half of the universe. Around the majestic nine-story tower, there are endless and colorful nebula vortexes, and he feels that With an extremely strong sense of calling, his whole body was trembling.

"This, this feeling is..."

And in the inner hall of the Star Tower, a strong man with antlers on his head was talking to an old man with a snake-tailed body. Suddenly, he seemed to feel something and stopped talking, his eyes turned to the young man, with a smile on his face.

"coming."

#### [Chapter 365: The strongest landlord in history arrives on the battlefield](#)

When Luo Feng faced another major turning point in his life, Wang Yi had already returned to the barracks base.

Then he left the barracks base, teleported through the kingdom of God, and came to the mainland of Yanji.

A silver-white spacecraft flew rapidly over the boundless land.

"Let's take a look at the changes in Yanji Mainland over the past ten thousand years."

Wang Yi opened the military system and searched the database for information about Yanji Mainland.

Generally, these ordinary battlefield materials are made public to their kings.

The confidential information with high authority must be exchanged for military merit.

There were originally thousands of kings in the Yan Ji Continent. Although Wang Yi killed some, some of them were added.

Coupled with the arrival of the "Tongtian Tower" in the Star Tower area of the seventh extraterritorial battlefield, the powerhouses from all over the universe have gathered. Although the Tongtian Tower has been closed, the density of the strongmen on the extraterritorial battlefield, especially the seventh battlefield, is unprecedentedly astonishing.

The strong in the universe, except for the noble ones, can't stay, even if only one in ten thousand stays behind, that's an extremely terrifying number.

"The powerful kings of Yanji Continent, the latest information has been updated, there are 13,952 people?" Wang Yi shook his hand holding the teacup, and was taken aback.

This is ten times more than the number of powerful kings before Yan Ji continent!

Those who can stay are all in the name of the four pinnacle races. After all, this battlefield is built by them, and even if other superpowers want to join, they must get their consent.

And Wang Yi got information and intelligence. The "prisons" of the six pinnacle races joined the "demon race" camp, and the "crystal races" joined the human camp.

Perhaps...because the appearance of the human race is closer to the crystal race?

Of course, this is only in the current extraterritorial battlefield, and I am afraid it will only last for a short period of time, not a ethnic alliance.

The most important thing is other ethnic groups. Even though they are weaker than the pinnacle race group, the number of ordinary strong people is thousands of times more than that of the pinnacle race group. They are the real reason why there are now strong people in the outer battlefield.

"There are so many Yanji Continents, the Star Tower..." Wang Yi couldn't help tapping the projection screen with his finger.

"brush!"

The most recent information of the Star Tower is displayed above.

Wang Yi glanced, and couldn't help taking a breath.

"The seal king of the Star Tower actually exceeds ten million now!?"

"this....."

"This is crazy too?"

The reason why there are so many powerful kings of the Star Tower is also the reason for the "Tongtian Tower". Everyone is thinking if the Tongtian Tower suddenly appears next to the Star Tower, will it have anything to do with the Star Tower.

In addition, since it is here, just stay and have a look. The name of the Star Tower is also famous in the universe. Although many powerful people have heard of it, they have never seen it.

They will naturally not miss this opportunity.

In fact, they guessed right, but they didn't guess right.

The appearance of Tongtian Pagoda is indeed related to the "Star Pagoda", but more importantly, it is because of Wang Yi.

"So many kings..." Wang Yi's eyes were red.

It's all prey.

He usually kills a few kings, he has to hide, fearing to show off and be noticed.

Now that there are so many kings, he kills a thousand or eight hundred, shouldn't it be a problem?

However, he calmed down immediately.

"Don't be anxious... take your time...anxiously, you can't eat hot tofu. Those old guys don't know if they have left the outer battlefield."

In case there is an old alien who happens to be staying on the battlefield outside the territory, and he happens to see Wang Yi jumping up and down, hey, he is actually the lord of the human world, slap it...

Of course, this possibility is very small, but with Wang Yi's cautious character, he can try his best not to take risks.

And the super beings of the human race who originally protected Wang Yi went back to retreat one by one because of the Tongtian Pagoda. Now there is really no super being to care for Wang Yi, and the teacher Pang Bo also reminded him, Want Wang Yi to keep a low profile.

Kill it, don't be too high-profile.

Of course, Wang Yi followed goodness.

Wang Yi stood up and walked under the spacecraft screen with a cold test smile.

"Aliens, your king is back!"

The strongest landlord in the universe has arrived on the battlefield!

...

Wang Yi's detection equipment comes from Venerable Guiyi, an extremely high-end, Venerable-level instrument that can easily detect all movements within a radius of 1 billion kilometers.

In the past, the Yanji continent was vast, and the king was only so small. Sometimes, even if the three bodies move separately, it is normal for him not to meet one in a month.

But now the density of the strong has greatly increased, and this increase is not only for the kings, but also for those below the princes, and the number is far more than the former.

Yan sacrifices to a vast and barren desert on the mainland.

A gray-blue metal spacecraft was advancing over the desert.

Inside the special cabin of the spacecraft, a group of immortal aliens are chatting and laughing.

"The human team that was killed just now is thanks to Lord Guangli."

"Yes, Master Guangli's secret technique combined with his talent for time is truly invincible."

A smiling bald one-eyed giant in the center of the field is touting the immortality of foreign races.

From the outside, this should be an independent and powerful ethnic group "Shadow Demon Race" in the remote territory of the universe.

They are naturally darlings of the law of origin of light, and with the powerful law of origin of light, it is easy to comprehend the origin of time.

Moreover, the best among them have also awakened the "time talent". With the time talent, most of the "shadow demons" are immortal powerhouses.

"Haha, although human immortality is powerful, the "purification" of the law of origin of light and the talent of the law of time just restrain him, so he can easily annihilate his divine body. Next time, there may not necessarily be such a good opportunity..." The bald, one-eyed and gloomy giant was about to say a few words of humility.

"brush!"

A dark red figure suddenly appeared in front of a metal spacecraft flying at the speed of sub-light, and then a blade of light that pierced the sky and the earth slashed down.

"Sizzle..."

The universe has been torn open a huge hole that is thousands of kilometers long.

The aliens hiding in the spaceship were submerged by the light of the knife along with the spaceship, shattered together, and turned into space debris.

"Peng!"

The incomparably condensed power in the blade light exploded in the next moment, shattering the space within a radius of tens of thousands of kilometers.

The alien races in the Zerg camp include their spaceships, which have disappeared without a trace~[www.mtlnovel.com](http://www.mtlnovel.com)~ Wang Yi in a dark red armor casually collected the spoils from the space debris, feeling deeply.

"It's so easy."

The fourth calamity of the Secret Code of Nine Tribulations gave Wang Yi the human deity close to the power of a high-ranking king.

Coupled with the leaps and bounds of the law perception over the years, it is very simple to kill ordinary kings with his strength.

"Next time you meet the Feng King, try it with the Sealing Star Chart."

Wang Yi turned and left.

It's nothing more than an immortal squad, which is of no value. It is only encountered and harvested by Wang Yi.

When the Void Zerg clones merged and recognized their lord in the Tongtian Tower, Wang Yi's hunting on the battlefield outside the territory also continued.

The avatar of the Yanxing giant beast separated from the human body, and began \*\*\*\* hunts on the outer battlefield.

[Chapter 366: 3000 years, the name of invincibility](#)

The seventh outer battlefield, the twin spin domain.

A group of aliens are talking about something in a land with a radius of tens of thousands of kilometers, in a cave in the hinterland.

"I heard that there have been a lot fewer foreign powerhouses here recently."

"Hey, it's not because of the human king of insects."

When hearing this name, all the foreign races couldn't help but shiver, as if they heard something terrible.

"The king of insects, he is a goddess all day long, he was still offering sacrifices to the mainland last year, and this year he came to the Gemini Xuanyu. Some kings met him and seemed to have fallen a lot."

"Who makes the king of insects so terrible? A thousand years ago, the mother of the Zerg clan, Nanxun didn't know where she heard the news, and brought a group of helpers to ambush the king of insects at the place of Jixi Xinghe, but was killed by the king of insects instead. Blood flows into a river."

An immortal king sighed with emotion.

"Nanxun, that is the strongest standing on the 7th domain outside the battlefield, especially her Zerg Legion, which has always been invincible in the wide terrain, plus a group of helpers, who have calculated or not, the result was defeated by the King of Insects. This kind of strength... Tsk tsk, everyone in the outer battlefield now says that the Royal Insect King is truly invincible."

"So terrible?" An alien who didn't know much about the King Insect couldn't help but said: "I heard that all the mother queens of the Zerzu are good at soul manipulation secret methods. Can you use the King Insect?"

The strongest of the Zerg mother emperor is in two aspects, one is the Zerg Legion, and the other is soul control.

Feng Wang Immortal sneered and said: "If soul control is useful to Yu Chong Wang, will the Zerg mother emperor and her helpers fail?" Feng Wang Immortal's eyes showed a trace of fear, "I heard that the battle, Zerg Dozens of immortal kings of the camp have fallen, among which there are more than five kings, and even the immortal zerg army of the Zerg mother emperor has lost more than half... The strongest blow turned the area of 100 million kilometers into nothingness, but there is nothing to do with the King Insect. Instead, the Zerg Legion was killed by the King Insect and the Zerg Mother King was chased and killed all the way. In the end, it seemed to use special means. Only then escaped from the chasing of the king of insects."

That battle completely culminated in the reputation of the "King of Insects" on the battlefield outside the territory.

Everyone agrees that the "King of Insects" possesses the invincible strength of the king, and is now the first strongest among the kings in the outer battlefield.

It also allowed countless aliens to flee for it.

Wherever King Insect King appears, the teams of other factions will rapidly decrease and fled to other places.

However, because of the strange whereabouts of the king of insects, there are no ghosts, no matter how you guard against it, some people will still suffer.

The king of insects has been active on the battlefield outside the territory for three thousand years. After three thousand years, I don't know how many kings are unlucky. Basically, those who encounter the king of insects have not heard of a few that can run away.

After all, someone as strong as the Zerg mother emperor was not chased and fleeing in embarrassment.

An alien who was like a monkey but also an insect made a weird and suspicious voice, "King Yu Chong, this is openly hitting the Zerg in the face. Didn't the Zerg fight back? Let the King Chong ride on their faces?"

"Why didn't you fight back?" Feng Wang Immortal sneered, "I heard that after Nanxun escaped back, he went crazy and invited several female emperors of his own clan to come over... You should know that the venerable from the outer battlefield cannot enter. Therefore, if the Zerg Mother Emperor wants to deal with the Royal Insect King, she can only invite immortal powerhouses, but several Zerg Mother Kings are scary enough."

Every immortal Zerg clan mother emperor can be called invincible under the Lord.

Moreover, they are good at army warfare and cooperate with each other as one person, which makes them extremely terrifying war machines in large-scale ethnic battlefields.

That is to say, the mechanical legion can compare with them.

"But the king of insects is not stupid... how could it be fooled." The alien king shook his head, "the provocation of the mother of the Zerg, the king of insects completely ignored the provocation of the Zerg... ."

When these aliens were talking, a silver-white spaceship was passing by hundreds of millions of kilometers away from the mountains.

The horrible King Insect in their mouths leaned on the seat, holding a wine glass, touching his chin, and listening to these aliens discussing themselves with a smile, there was a smile on that handsome face.

On either side of him, tyrannical servants lined up, looking respectfully at their master.

Each is either the limit of the king, or the soul master of the pinnacle of the king.

In the past few years, Wang Yi has experienced battles on the battlefield outside the territory. It is not without gains. These soul servants are the result of his many hunts.

Over 60 billion years of experience in the Tongtian Pagoda, Wang Yi's will is extremely terrifying. He also pondered some soul secrets and obtained many treasures. The combat power has greatly increased. It is naturally much easier to hunt down the king than before, and After constant attempts, enslaved several Fengwang Peak Soul Masters, and the team began to expand continuously.

Occasionally, powerful kings were captured and enslaved by Wang Yi. Although they were few years old, they accumulated more. After three thousand years, Wang Yi's immortal servants had more than 100

people, and only a dozen were personally enslaved by him. All are indirectly enslaved by his soul servants.

With these servants teaming up to attack, plus the treasures rewarded by Wang Yi, each team's strength is amazing and invincible in the battlefield outside the territory.

As the team grows, the hunting efficiency will increase.

After three thousand years, the results have been numerous.

Because of the massive increase in the strengths of various races in the extraterritorial battlefield during this period, the battle broke out violently, and Wang Yi's team was not very conspicuous here.

Occasionally news of enslavement comes out...but what does it have to do with Wang Yi?

He has long been hiding behind the scenes, and no one else can guess that it is him.

"South Punishment..." Wang Yi shook the charming liquid of the wine glass, chanting the name of this old opponent, somewhat regretful.

When Nanxun saw that the situation was wrong, he immediately fled. He escaped too quickly and decisively. He didn't even care that the precious Zerg army under his command was badly damaged. In the end, Wang Yi didn't take this Zerg mother emperor.

This old \*\*\*\* made him feel a little sorry.

Who doesn't know about the extraterritorial battlefield, he loves getting bugs the most.

Now, his notoriety is spread among the Zerg mothers in the outer battlefield ~www.mtlnovel.com~  
Seeing him is like seeing a ghost.

Even Nan Xun seemed to know that someone was making her idea, and he didn't know where he was. Wang Yi hadn't heard from her in these years, so he could only give up some ideas.

Hey, I wanted to reunite your family neatly.

After drinking a glass of Chinese wine in one sip, Wang Yi stood up, and at the same time the two rows of slave kings in front of him bent down and bowed their heads.

"It's been three thousand years. The mission has been completed, and the Tongtian Pagoda will soon recognize the Lord. It's time to leave." Wang Yi looked in a certain direction.

There was the direction of the Tongtian Tower, and he could already feel that the fusion of the Tongtian Tower was approaching the final juncture.

[Kill ordinary immortal gods: 232185/100000]

[Kill the immortal gods of Fenghou: 84423/10000]

[Kill the immortal \*\*\*\* of the seal king: 1044/1000]

[Chapter 367: End of the extraterritorial battlefield](#)

"Submit task."

[The task has been submitted, start to confirm! ]

【Ding! Congratulations on getting a normal chance card! 】

【Ding! Congratulations on getting a Black Iron Chance Card! 】

【Ding! Congratulations on getting a bronze chance card! 】

Listening to the prompt from the panel, Wang Yi nodded in satisfaction.

The three chances of getting the card are not in vain for his hard work for thousands of years.

Ordinary cards can increase the maximum reward probability of signing in by 2%.

The black iron card and the bronze card can increase the highest reward probability of sign-in by 5% and 10%, respectively.

That adds up to 17%.

...Still a bit low.

And it is a one-time use and can only be used with caution.

Wang Yi turned his attention to the task message display below the task panel.

[Kill 100 Cosmos Venerables, reward a 25% sign-in silver card with the highest reward, the current number of killings: 0/100]

[Kill 10 masters of the universe, reward a 50% sign-in gold card with the highest reward, the current number of killings: 0/10]

[Kill a true god, reward a diamond card with 100% sign in the highest reward, the current number of killings: 0/1]

【Each killing target can only receive one reward. 】

【Card effects can be superimposed to use. 】

After the king was appointed, he had to kill the nobleman.

For Wang Yi, who is still the Lord of the World, it is a bit beyond the scope of his ability.

"I have to break through quickly." Wang Yi was also full of enthusiasm.

When he reaches immortality, his combat power will soar wildly, and he can use such treasures as "Jia Jia" and "Primary Soul", plus secret methods, and he will have the power to kill the venerable.

"However, the genetic level has to be improved to perfection... and the third clone has to be bred."

"That talent secret method copy card, you have to use it too."

"Ancestral God Religion." Wang Yi murmured.

Wang Yi's choice of his third clone in the future, he chose Youhai clone in the end.

However, I want to choose the "master of time and space" of the "world tree" to copy the secret method of talent.

Youhai clone has two secrets of talents, one is "Transformation of the sea" and the other is "creation". With these two secrets of talent, the volume of Youhai can be continuously expanded, and finally counted as "light years".

It is definitely the largest divine body in the primitive universe, and the "creation" of the innate secret method can be used to break through the divine body route. It is impossible for Wang Yi to abandon the useful ones to find other unrealistic clones.

The talent secret copy card was the only highest reward he signed in the world of Xueluo that year.

Talent Secret Method Copy Card: Use it on a target with a talent secret method, and copy one of its talent secret methods to yourself. The higher the target's talent secret method level, the lower the copy success rate, and it can only be used once.

Cannot overlap with the secrets of talents already possessed by oneself.

Before using the target, there will be a hint of the success rate.

After consideration, Wang Yi finally chose the world tree of the Secret Realm of the Ancestral Gods to replicate it.

The Ancestral Mystery Realm can be called the most magical in the universe and possesses the most special lives. Many powerful and mysterious special lives are in the mystery realm of ancestors.

Such as the cold whale, the earthquake in the mountains, the world tree... all of them are special beings with the main power of the universe. After Wang Yi's continuous screening and research, he finally determined that his talent and secret methods were copied and selected the "world tree."

As I said before, the "World Tree" has the natural ability to "master time and space."

Within a certain range around it, time and space are all controlled!

Although it is far inferior to the "Lord of the Universe"'s ability to completely control time and space, as the world tree itself continues to grow stronger, so does the ability to control time and space.

The strongest world tree of the universe venerable class in the secret realm of the ancestral gods, mastering time and space, is no less than the master of the universe.

"The World Tree has three advantages, but compared with the secret method of creating Youhai Clone, I can only choose Youhai Clone." Wang Yi shook his head.

No matter how strong the world tree is, can it compare to a perfect divine body breakthrough?

Although "creating" the secret method is only one aspect, more effort and conditions are needed.

But without the secret method of creation, it is undoubtedly more difficult to break through 100,000 times the divine body.

The original books all pointed out the way for him, and he deliberately went around the corners, that would be stupid.

Unless there is a better choice, Wang Yi's third clone has been decided to be the "Youhai clone".

However, if you copy the talent secret method, you can choose the "World Tree".

The only doubt is the probability issue.

May fail!

"I hope it can be successfully replicated to the world tree's grasp of time and space." Wang Yi was expecting in his heart.

If Luo Feng had the "master of time and space" talent secret after breaking through the venerable, once he used it, it could be comparable to the master of the universe, who would say that he was not the master of the universe?

Mastering time and space is nothing to the Lord of the Universe, but to the Lord of the Universe, it is undoubtedly a big killer.

Moreover, Wang Yi doubts whether this mastering of time and space can reverse time and space and resurrect the dead?

After all, the secret of talent and the reversal of time and space are actually gifts from the primitive universe.

It allows you to have this ability, you can only do it.

Otherwise, the Lord of the universe, even if he masters time and space, cannot reverse time and space and resurrect the dead.

A glimmer of excitement flashed in Wang Yi's eyes. It would be interesting if the World Tree's "mastery of time and space" also had the power to reverse time and space and resurrect others.

Even if the ordinary immortal has the ability to master time and space, it is difficult to reverse time and space to resurrect the dead.

The backlash of the primitive universe can make them want to die.

In short, there are many restrictions, but the divine body is definitely the key.

Does Wang Yi lack the body?

He is not lacking.

Even if there is no Youhai clone, his Flame Star Giant Beast clone achieves immortality, which is comparable to stars.

With the addition of Youhai clone, I am afraid that it will not be difficult to resurrect the overlord of the universe.

"You Hai clone, master time and space, break through immortality..." Wang Yi looked faintly.

"Besides, there is a tower of Tongtian, and my law of perception is a smooth road."

"I just want to ask, who else!"

...

Star Tower.

Luo Feng, who had lost news for three thousand years, was sitting in the palace and was receiving the inheritance of the "Star Tower". He trembled and his expression was painful.

Obviously, the inheritance process of the "Star Tower" is not ordinary pain.

For the inheritors, it is also hellish torture.

But Luo Feng has persisted for three thousand years.

The madness and fierceness in Luo Feng's bones is fully displayed at this time~www.mtlnovel.com~ is that as long as I am not dead, I can stick to it.

In the end, it became a longing and guardian for the family.

In the palace, an old man with a snake-tailed body and a gray-robed old man with first antlers watched this scene.

"It's been three thousand years, teacher, do you think Luo Feng can stick to it?" "Puti" asked in a low voice, the senior disciple of the mountain guest.

"Once the inheritance of the Star Tower begins, it cannot be interrupted." The guest sitting on the mountain shook his head, "I can't judge, everything can only depend on Luo Feng. If he can succeed, a new line of people on the earth will be born. leader."

"If it fails, isn't there still that Wang Yi?"

Take a leisurely road from the mountain.

### [Chapter 368: Law Star Orb](#)

Wang Yi vaguely felt that although his lifespan took more than 60 billion years, even a fraction of it was still longer than the lifespan of ordinary realm masters, but Wang Yi did not dare to use the time realm to consume it at will.

For a person with a life expectancy of tens of billions of years, there are only tens of millions of years left, just like a normal person knows that he can only live for a few more months. Naturally, it is urgent.

"Look for opportunities to break through..." Wang Yi secretly said in his heart, "If you break through to immortality, you don't have to worry about this problem anymore."

Wang Yi was still very jealous of the mountain guest, and he already knew that Luo Feng had entered the Star Tower, and the mountain guest might be there, so he dared not approach the Star Tower at all these years.

I can't provoke you, I can always hide, can I?

And now, the fusion of the Tongtian Tower is almost over, and Wang Yi has already completed the panel task, and he can leave the battlefield outside the territory, and he is also relieved.

...

Tower of Babel.

Although the passage has been closed for three thousand years, the human race, the Zerg race, the monster race... and other forces in the universe still leave spies here to monitor the movement of the Tongtian Tower.

Although the test failed, the various forces still did not give up and wanted to find other ways to obtain the Tongtian Pagoda.

Rumbling...

The vast and boundless sea of light undulated like being stirred by a giant, and the chaotic air currents also formed an incomparably huge whirlpool centered on Wang Yi's island, and the tower of Tongtian tower, which was a hundred light-years high, faintly shook the entire body of the tower.

"Um?"

"Tongtian Tower seemed to shake just now?"

"What happened?"

The strong men of various forces who were still staying outside the Tongtian Tower were alarmed, but no matter how they probed, they couldn't find the situation inside the Tongtian Tower.

Inside the Tongtian Tower, the Sea of Law, on the island, after three thousand years of fusion, the clone of the Void Zerg finally opened its eyes.

But just now, that blood-colored crystal bead finally completely merged with the soul, completely merged.

Wang Yi's soul feels connected with the entire Tongtian Pagoda. In his own eyes, the Tongtian Pagoda seems to have no secret... But he still can't enter in certain places because it is a restriction set by the creator of the Tongtian Pagoda, and Wang Yi's "conditions" Not enough, naturally inaccessible.

"Tongtian Pagoda recognized the Lord for three thousand years, and finally succeeded." Wang Yi felt joy in his heart.

Compared with the succession test of the Star Tower of Luo Feng's nine deaths, Wang Yi's Tongtian Tower made it easier to recognize the Lord, and he didn't even need to devote all his consciousness to it.

Saying to recognize the Lord is more like a process of "digesting".

And now, this blood-colored tower bead has been completely "digested" by Wang Yi, turned into a blood-colored mist, and merged into his soul.

From then on, Wang Yi was the master of the Tongtian Tower, and he was the only master.

Because the tower jewel for recognizing the master no longer exists, if Wang Yi falls, the Tongtian Pagoda will not be recognized by others, and can only use part of its functions at most.

The creator of Tongtian Tower had no plans to find a second owner for Tongtian Tower.

After becoming the master of the Tongtian Tower, Wang Yi can already enter and exit at will, and can also observe the situation outside the Tongtian Tower.

But without observing, Wang Yi also knows that there must be various forces outside.

"How do they know that Tongtian Tower is already owned by me." Wang Yi smiled slightly.

Then he raised his head, looking at the boundless, surging sea of laws, thinking slightly.

Recognizing the Lord Tongtian Tower, he naturally knows all the information.

"The path the teacher left for me. The Sea of Laws is only an aid to comprehension, such as "Chaos Stele", and the secret pattern of the Tongtian Pagoda itself is my main object of comprehension..."

The treasure itself has the secret pattern of the law. The stronger the treasure, the more profound and complex the secret pattern of the law.

The secret pattern on the Tongtian Tower represents a very high level of secret law.

From the outside, it is impossible to see how many floors of the Tongtian Tower, dark and deep, integrated into one.

It was not until Wang Yi recognized the Lord that he knew it had forty-nine floors.

Represents forty-nine levels of secret patterns.

For example, when the first layer of the secret pattern of the Tongtian Tower is only urged, it requires Wang Yi's current level of law, and a thorough comprehension of the secret pattern, and a divine body with the Lord of the Universe, before it can be urged.

In addition, Wang Yi can create secret methods step by step in accordance with secret patterns.

Because the Tongtian Pagoda itself is a cultivation treasure, the progress of this secret technique represents a breakthrough in his own realm level.

In the back, it is getting harder and harder.

Wang Yi vaguely felt that if the tenth layer of secret patterns was thoroughly comprehended, it would be almost the same as the top tenth-order secret technique of the Universe Sea today.

However, Wang Yi couldn't judge the classification of the secret patterns behind the Tongtian Tower. After all, the level difference was too far.

"It's a long way to go..." Wang Yi sighed again.

Originally, he was still a little immersed in his pride in creating the ultimate fusion secret method, but now he suddenly awakened that he was just a rookie at the bottom.

Perhaps, in front of the Tongtian Pagoda, even getting started is not counted.

After all, "beginner" represents a series of laws of fusion (such as Huo Kong), the level of the Lord of the universe...

Wang Yi raised his hand and moved towards the Sea of Law. The stream of light in the depths of the Sea of Law flew down like a meteor shower. Thousands of them hovered above Wang Yi, forming a splendid and beautiful star map. At the same time, the laws of time and space of gold, wood, water, fire, earth, wind, and thunder are oscillating.

"Law Star Bead." Wang Yi looked at this bright star sea and uttered a word. With a thought in his heart, a rule star bead with golden brilliance flew into his hand and became the size of a long eye, crystal clear. The whole body is pure golden rule star beads.

"The law star of the law of origin of gold." Wang Yi sighed as he looked at this treasure with strong law fluctuations and felt the law power in it. "Only this one can give an ordinary person the ability to perceive the Law of Gold comparable to Berran."

"However, it is very difficult for ordinary world masters to fuse the law star orbs. It requires extremely high will and soul."

"At this point, the people on Earth fit perfectly."

There are a total of 13,600 law star beads in the entire sea of Tongtian Tower Law Ocean, the number is fixed, and only one loss will be reborn.

However, after all, it was nurtured by the sea of Tongtian Pagoda law, and it is difficult for the general master of the universe to destroy it.

In fact, the Tongtian Pagoda is not only the treasure of the Rule Star Orb, some of which are far more than that, but only the Rule Star Orb can bring out the Tongtian Pagoda and use it at will.

"The 13,600 law star beads mean that 13,600 earth geniuses can be cultivated." Wang Yi's eyes were bright.

The people on earth have just come into contact with the universe, although after more than ten thousand years of development, they don't even have an immortality now.

At most they are the world masters, and most of them are from the Wang Yi family.

Even if Wang Yi also favors the cultivation of resources for other earth geniuses, there is still a huge gap between the two in essence.

It wasn't obvious at the beginning, but as time passed, Wang Yi's bloodline was obviously much better than ordinary earthlings. Regardless of cultivation or law perception, his soul and will were very strong.

The only thing that needs to be tempered is the spiritual realm.

And this is actually the strength of the entire earth.

In addition, the Wang family of course valued their own family children more and invested more resources, so the Wang Yi family has naturally emerged many strong people over the past ten thousand years, but it is also the master of the world.

According to Wang Yi's words, nine million years can be tempered during the period of the world master, and it is enough to make a breakthrough after accumulating enough.

"There are soul beads~[www.mtlnovel.com](http://www.mtlnovel.com)~ the souls of the people on earth and my descendants can naturally be strengthened. Some talented little guys with insufficient soul power can fully cooperate with the soul beads, and then merge with this law star beads." Wang Yi was slightly excited. .

"If the Law Star Orb is only used by realm masters, there are tens of thousands of geniuses who are comparable to the perception of Berran's Law in ten million years. Even if the level is different, it is impossible for everyone to achieve the title, but at least immortality can be achieved." Wang Yi took a deep breath.

According to Wang Yi's estimation, the use of the Star Orb will give birth to tens of thousands of immortals every tens of millions of years, with a small part of ordinary immortality, the most princes and the least.

Even so, it is amazing enough.

Ten million years is so much, and it can be comparable to a cosmic country several times. In those hundreds of millions of years, how terrible is the number of immortal gods accumulated in the earth's human line?

Coupled with the sea of laws of the Tongtian Pagoda and Wang Yi's care, how many sages will be born in it, and how many lords of the universe, true gods, will be among the sages?

The earth is a human being, and in the future it is destined to become the most powerful existence of the human race and even the primitive universe.

#### [Chapter 369: Retired](#)

"Weak geniuses can be cultivated to immortality by using the Star Orbs."

Wang Yi sighed.

"And when you are above the venerable, when you really come into contact with the profound laws, you can go to the Tongtian Pagoda to see the sea of laws, and you have the possibility of further breakthroughs."

The sea of laws, improve the perception of the laws, and guide the way of the laws.

The law star orb that it bred can also improve the law perception talent.

And the secret pattern of the Tongtian Tower is more similar to the specific and detailed practice secrets.

However, Wang Yi can only comprehend the secret pattern. After all, he is the master of the Tongtian Pagoda. Even if Wang Yi deliberately interprets it, I am afraid that the efficiency of comprehension is not just in case.

"Law Star Orbs, there are only 13,600."

"Tongtian Tower has only 1,008 enlightenment quotas, and it only opens once in 100 million years."

Wang Yi muttered, the human race knows, it should be jealous.

Regardless of the principle of the star orb or the Tongtian Pagoda, the opportunity for enlightenment is very precious, because it can be used continuously to cultivate a large number of powerful people for the ethnic group.

It's nothing to come down once or twice, it's unimaginable after hundreds of millions of years.

As long as a super existence is born, it is an exciting thing.

"This matter, let me talk to the human race after I have the power of the Lord of the Universe." Wang Yi knew in his heart that otherwise it would be troublesome and many incidents would occur, which is unnecessary for Wang Yi.

When he becomes the lord of the universe, even if certain people in the human race are cautious, whether for selfishness or the righteousness of the race to suppress him, as long as he is not happy, no one can do anything against him.

At that time, Wang Yi should be regarded as the most important existence of the human race.

...

"Om..."

The space fluctuates, the green light permeates, and the kingdom of God is looming in the endless light.

Wang Yi's human body walked out of the kingdom of God and came into the Tongtian Pagoda.

The Tongtian Pagoda isolates the virtual universe, prohibits the transmission of the Kingdom of God, and seals off the space, and Wang Yi is already the owner of the Tower of Heaven, so he can naturally use the Kingdom of God to transmit.

"It's been over 13,000..." Wang Yi was a little emotional. "This time the trip to the extraterritorial battlefield has been very rewarding."

Not to mention the Tongtian Tower, he also got the fourth calamity of the Nine Tribulations Secret Code, the two peak treasures of the robbery armor and the original soul, and a large number of other treasures. The heavy treasures and various precious materials alone are a huge number.

To be honest, there are probably not many masters of the universe that can compare with Wang Yi's wealth in the human race.

And also enslaved hundreds of immortal kings, completed the task of signing in to the panel, and got three chance cards.

Also embarking on the road of law fusion, law perception has advanced by leaps and bounds, and created the ultimate secret law of the Lord of the Universe.

Will, also reach the cosmic hegemony level!

It can be said that Luo Feng has spent tens of thousands of years working hard to create a secret method to break the pronuclear shackles of the Golden Horn behemoth, but Wang Yi did not use it.

As long as the third clone is conceived, the pronucleus can be broken immediately and immortality can be entered.

Only the third clone chooses Youhai, and the "World Tree" is also in the Secret Realm of the Patriarchal Cult, and the Patriarchal Cult is also the largest, oldest and most mysterious force in the primitive universe.

It was destined that before Wang Yi wanted to break through immortality, he had to go to the ancestral gods' religion.

"After entering the immortality, I don't know if this special pronucleus is still there..." Wang Yi said to himself.

The original core is a reward for the sign-in panel, which is very special in itself.

Even if Wang Yi became the world master, it was not completely integrated with the natal pearl.

"No matter how much, it's time to go back."

"After returning home, prepare for a breakthrough in immortality and go to the ancestral gods."

Wang Yi sighed with emotion.

The extraterritorial battlefield is over.

When Wang Yi was happily packing his things and preparing to go home with his wife and children, Luo Feng was still struggling to support him in the Star Tower, and it is conceivable that his life would continue for thousands of years...

But Wang Yi didn't worry at all about Luo Feng, the Son of Destiny, how could he die so easily.

...

The seventh battlefield outside the territory, the starry sky far from the base of No. 026 barracks.

"Om..."

A green light suddenly appeared around him, and under the misty green light, an immense pressure was diffused, causing the surrounding space to ripple slightly, and at the same time a dark red figure appeared in the light.

"I'm back." Wang Yi smiled slightly, then took out a flying saucer-shaped spacecraft and flew leisurely to the huge divine base in the distance.

The hideous war machine with a diameter of millions of kilometers much larger than the sun can be called the "AAA God Base" that has reached its peak. The beautiful colorful energy cover energy cycle, the flying saucer-shaped spacecraft is like a grain of sand, and The barracks base is like a huge planet.

It was successfully guided into the passage by the base system, and soon flew to a hall.

"Welcome, soldier." The human waiter in silver uniform smiled and greeted Wang Yi walking out of the hatch. "Do you choose to retire or rest in the base?"

"Retired." Wang Yi glanced at him, his eyes trembling at this world leader, and the waiters who often receive all kinds of powerhouses at the base.

Wang Yi has killed so many powerful men for more than 10,000 years. The number of kings who have fallen in his hands is more than a thousand. In addition, his will has reached the level of the overlord of the universe. Just an inadvertent look may cause the Lord to collapse. .

"Okay, sir, I'll handle it for you right away." The waiter drew a cold sweat on his head and lowered his head respectfully.

When Wang Yi went to handle his retirement, City Lord Chaos also got news of Wang Yi's retirement.

"Wang Yi finally retired?"

Virtual universe, Thunder Island, Chaos City Lord looked at the information of Wang Yi from the virtual universe over the years, and fell silent.

"Hundreds of thousands of immortals..." City Lord Chaos sighed with emotion.

Hundreds of thousands of immortals are nothing to his Chaos City Lord.

But a world master killed so many in more than ten thousand years, which is incredible.

"Wang Yi has made great progress in recent years, and he has the opportunity to defeat the Immortal Zerg in the outer battlefield." A trace of satisfaction appeared in the Chaos City Lord.

Wang Yi is equivalent to a "super existence of the human race" in the future, and the Lord of Chaos City naturally has high hopes.

And Wang Yi didn't let him down either.

Not only were they killed too many, but they were also ruthless.

"When I come back this time, Wang Yi should also be about to break through immortality." City Lord Chaos thought.

"With his current strength comparable to Fengwang Wudi~[www.mtlnovel.com](http://www.mtlnovel.com)~ to break through immortality, he should be comparable to some venerables, right?"

Chaos City Master guessed.

Some of the methods used in the time of the realm master are weak in the time of immortality and venerable.

For example, "Emperor Armor", Wang Yi can rely on it to be invincible during the time of the world lord, but it is useless to break through to immortality. The rules of the universe are limited, so the Chaos City Lord did not dare to think that Wang Yi's breakthrough strength was too high.

Immortality is comparable to the Venerable's combat power, that is already a very heavenly existence.

And the higher you go, the harder it is to improve.

Leapfrogging? Basically impossible.

...

At this time, Wang Yi also finished his retirement, settled a huge sum of amazing military merits, exchanged many treasures in the military system's treasure house, talked to some friends I met at the base, and got together with some people to prepare to return. The earth is gone.

#### [Chapter 370: 13,000 years later](#)

Virtual universe, Yuxiang Mountain, primitive area.

Wang Yi's manor.

"Soon, I will leave here and go to Thunder Island."

Wang Yi looked at the familiar sights around him and the respectful servants with emotion in his heart.

Wang Yi, wearing a flaming red robe with black hair, walked leisurely through the grass full of flowers to his private attic.

"Teacher, I'm in retreat now and I can't get in touch."

During this period of time, the strong men of the human race retreat a lot, and break through a lot.

Of course, the Lord of the universe has not yet been born.

There are some of them, such as King Zhenyan, the current Venerable Zhenyan.

There is also his senior brother Tianyu King, who is said to be about to break through, and he should be called Venerable Tianyu by that time.

Wang Yi touched his chin, wondering what name he would be named in the future.

King Insect King? Venerable Worm? Lord of Worms?

Um.....

Isn't this hitting the Zerg in the face too openly?

Although he really likes to get bugs.

"Luo Feng, I can't get in touch either."

Wang Yi looked at the list of friends. Over the years, he broke through to the master, Luo Feng is also the master, both of whom are members of the Primal Secret Realm.

Rong Jun and Buran are members of the domain master-level primitive secret realm.

Qianshui, Ai Chen, Jiang Mo are members of the domain master-level heaven and earth secret realm.

Obviously, the farther to the back, the bigger the gap.

Ordinary geniuses like Qianshui and Ai Chen have been pulled away by Buran and the others, let alone Luo Feng and Wang Yi.

Ai Chen and the others fell back to the secret realm of heaven and earth as soon as they were promoted to the domain master level.

As for the primitive mystery, there is no possibility.

Thinking of his acquaintances, Wang Yi felt a little complicated.

Especially Qianshui and Ai Chen, who feel inexplicably towards him, and Wang Yi are not really idiots. How can they not see that the two girls have a good affection for him, but Wang Yi no longer wants to bear more emotional involvement.

Although they tried hard to catch up, they would only get farther and farther away from Wang Yi, and eventually became people of two worlds.

Wang Yi sighed softly. Although he could not respond to their feelings, he could help them a little bit.

For example, "Law Star Orb" can help them improve their perception of the law.

Even if it falls, it can be resurrected in the future.

It's just that, I don't know if it is their luck or misfortune.

...

From the battlefield outside the territory, directly transmitted back to the bird star through a fixed space channel.

Space transmission channel.

In the passage like the water curtain, a figure covered in dark red armor came out.

"Huh? Only one person?"

The guard next to him was slightly surprised.

When they noticed the aura from the dark red armor figure, they relieved their doubts.

"It turned out to be an immortal king, no wonder."

"I'm back." Wang Yi was in a good mood at this time.

"This time I got so many military exploits and exchanged them into points, which is enough to make my Yan Xing Giant Beast clone's "Yan Xing Bian" practice to completion."

"Blank Star Change" requires a lot of treasure materials to practice. Some treasures are hard to find. You must go to Hongmeng Mall to find them. Moreover, some of the materials are extremely precious, and the price starts at hundreds of billions of mixed yuan.

But for Wang Yi now, it's nothing at all.

"Body of the Flame" can increase a thousand times when the cultivation is completed, plus the talent secret "Body of the Flame", it is ten thousand times.

The huge amount of energy in this is provided by the core of the flame star in the body world. When the behemoth of the flame star breaks through the immortality, the core of the flame star will further transform, otherwise how could it provide such a huge body shape change.

Moreover, the isogenic level reaches perfection, and the 180 million kilometers in diameter of Yanxing Giant's internal world will be further expanded to an astonishing scale of 1.8 trillion kilometers in diameter.

And this also requires the consumption of trillions of mixed yuan units.

Of course, Wang Yi doesn't care, he just sells a piece of treasure, which is a 10 trillion yuan unit.

"Hmm... With my current position in the Virtual Universe Company, there seems to be a free quota for this kind of material consumption?" Wang Yi rubbed his chin.

"But... this has to wait for my genetic level to break through to perfection."

A normal Yanxing behemoth can only be an internal world with a diameter of 180 million kilometers.

Unless the genetic level changes and reaches the perfect level, the pronucleus in the Yan Xing Giant Beast's body will change, and the upper limit of the Yan Xing Giant's body's world will be expanded again.

And the larger the world inside the body, the more stable and powerful the kingdom of God that will be formed in the future.

Wang Yi speculated that when he broke through to immortality, his many internal worlds should merge together and become even larger.

...

In the solar system, there is a majestic temple standing in the sky to protect the earth, but this temple is far larger than the earth.

The first floor of the temple.

There is a fixed transmission channel, connected to the base camp of the virtual universe company, and also connected to the giant axe battlefield, the first bank of the universe, the universe galaxy bank, and the base camp of the cosmic mercenary alliance.

A group of world masters were chatting through boring voice transmission.

"These days are so boring, when are you heads?"

"I heard that a tower to the sky appeared on the outer battlefield some time ago, and countless powerful people from all races in the universe rushed over. It is a pity that we have a responsibility and cannot pass."

"Yeah, I heard that the Tongtian Pagoda has a mysterious origin, but it is a treasure that even the pinnacle of the universe exists. Our Chaos City Lord and many super existences have rushed past, and even got involved with other pinnacle races. "

"Really?"

"What happened in the end?"

"Wow..."

Suddenly, one of the transmission channels glowed with mist.

"somebody is coming."

"Someone is coming from the Virtual Universe Company."

The dozens of realm masters who were specially waiting next to the transmission channel immediately became respectful. Those who can come through this channel are either extremely powerful or extremely high-status.

Dozens of them watched curiously, only to see a dark red armored youth walking out of the transmission channel alone.

"It's His Royal Highness Wang Yi." Dozens of world masters immediately recognized it.

The earth guarded by the temple now has all the power in Wang Yi's hands. Even the five major forces can only temporarily rent some places and cannot directly control the earth. How could they not recognize it?

"His Royal Highness Wang Yi has been cultivating in Chaos City?"

"Really? I heard that he seems to have gone to the Tongtian Pagoda."

"Isn't it in the giant axe universe?"

Although the landlords of these virtual universe companies are not high in status, they all have their own news channels. In addition, the human race has not implemented a blockade of these news, so as long as you inquire a little bit, you can know some information.

Of course, many are fake ~[www.mtlnovel.com](http://www.mtlnovel.com)~ hearsay.

However, this does not affect Wang Yi's status in their eyes.

This is a peerless figure who has already broken through the 20th floor of Tongtianqiao more than 10,000 years ago. Now that more than 10,000 years have passed, I don't know how amazing his strength is...

"Hey, His Royal Highness Wang Yi seems to be the realm master." Some people were also puzzled.

"However, this aura is really terrifying, more amazing than many immortal kings we have seen." They secretly said.

"His Royal Highness." Dozens of world masters saluted one after another.

"Yeah." Wang Yi glanced at them, and didn't say anything to the bottom owners of these virtual universe companies. He had already received the news that he should get through other channels.

"brush!"

Wang Yi directly teleported and left the temple.
