

A God 371

[Chapter 371: Earth!](#)

Wang Yi's journey back to Earth was very peaceful, and no people who knew how to live or die came out to stand in the way.

The five major forces of the human race had clearly stipulated various regulations in the original agreement with Wang Yi. Under normal circumstances, the immortality of the external forces of all parties cannot set foot on the earth.

And the powerful children of the families from different parties can only operate on the sites that Wang Yi has planned for them. It is a bit unrealistic to completely isolate other forces from participating in the earth.

After all, sovereignty belongs entirely to Wang Yi, and all parties pay a price for allowing young people to come and have children. In essence, the earth does not suffer.

Wang Yi also doesn't want to be too stiff with the human race, there is no need.

After all... the earth didn't pay anything, it's purely the wool of all parties who have no capital to buy and sell.

Rent a few pieces of land for them and you can lie down and collect money.

And soon the earth will rise and become a strong side, so all parties will be honest.

Only the strength is not strong enough to be bullied. If the strength is strong, all problems can be solved easily.

The city of Yangzhou has undergone earth-shaking changes at this moment. After all, more than ten thousand years have passed, and the people on earth are also scattered throughout the galaxy, and most of the people who remain on the earth are elites.

Star ratings are very common on the street.

The Wang family has continued to multiply and grow for more than 10,000 years. The family population is already larger than the original population of the earth. However, only the family Qingying can stay in the family base camp. There are already a group of realm masters, and there are more domain masters and universe-level ones. , The Wang Family finally became a pivotal big family in the Qianwu Universe Nation. It involved all aspects, and perhaps only the Luo Family could be compared with it.

The Wang family also cultivated some immortal auxiliary plants, metal rocks and other life, staying in the earth to guard the family.

In addition, there are five great power temples sitting in the solar system, and the earth can be considered peaceful.

Although the Wang family's ancestral house has been well maintained in the past ten thousand years, although the appearance is the same, in fact, various materials are built with materials that can be

stored for hundreds of millions of years in the universe. In the mansion, Wang Yi and his three wives are walking together.

When Wang Yi returned this time, Wang Yi didn't make much fanfare. Apart from the top leaders of all parties, only Wang Yi's closest parents and children knew about it.

"Is there nothing wrong with the earth these years?" Wang Yi asked.

"No, everything is as usual." Gao Yurong, in a white robe, looked the same, but with more noble temperament, she smiled: "Although the aliens have come to live here, you are still there. How dare they be arrogant."

In the original contract between Wang Yi and the human race, alien immigrants live in floating cities on the ocean. Without permission, they cannot set foot in areas where people live on Earth. Although most of the alien immigrants have backgrounds, there are also super-existences behind them. 'S family, but under the above order, no one has dared to directly defy it.

The condition set by Wang Yi was that immortality could not step into the earth, and the earth is now guarded by a group of immortal beings. Alien immigrants got the news in advance. Even if some people have ideas in their hearts, no one dares to touch the mold.

Of course there are some small conflicts, but there are still internal fights in his family, and Wang Yi doesn't bother to bother about such small things.

"The human race is doing pretty well, but they also know my bottom line..."

When Wang Yi came back this time, he also had the idea of killing chickens and monkeys, but it does not seem to be needed now.

Wang Yi said in his heart, "However, the necessary defensive measures will remain."

"When I come back this time, I will leave Moyunteng on the earth." Wang Yi said.

Starting from the earth, Mo Yunteng has always followed Wang Yi, loyal and deep-rooted.

Mo Yun Teng is now at the pinnacle of the king's level, using it to protect the earth, those alien immigrants will have more scruples.

In addition, Wang Yi of Void Thorns would also cultivate, but for Wang Yi, even if the Void Thorns were cultivated to be immortal, they would not have a great effect. They could only be used to improve the earth's foundation.

At the level of Wang Yi, it would be of no use unless the Moyunteng was cultivated to the Venerable.

"Then, let's count and gather the appropriate elite geniuses from the family and the earth people. Let me see if there is anything that can be made in them." Wang Yi was worried about the use of the star beads to cultivate talents for the earth.

Although Luo Feng is the nominal leader of the earth's human line right away, Wang Yi is also an earthly person, so naturally he will do his best.

In the outside world, Wang Yi, who has the ownership of the Heilongshan star domain of the Milky Way, is the real master of the earth.

Not only did the five major forces think so, but Luo Feng and Hong also thought so.

"I got it." Although Gao Yurong and the others didn't know what Wang Yi wanted to do, they were just gathering the talents of the earth.

"How long will you stay at home this time?" Lin Youyu asked her most concern.

Wang Yi glanced at them and said with a smile: "I will probably stay on the earth for a while, so I can accompany you well."

Patter, patter, a rush of dense and fine footsteps approached from the back of the corridor, and a round black and white ball ran from behind.

"Hey, it's Bermuda." Lin Youyu and the others smiled at the naive roundness, as if they saw their daughter.

They don't like the Zerg mother emperor such as Elizabeth Shen Yan, but they love Bermuda, which is a lovely mechanical life that now has its own body.

Bermuda also very cleverly raised his chubby paws and was picked up by several women.

Wang Yi watched this scene with a smile.

The four powerhouses of the earth at the time, Wang Yi was already an invincible powerhouse who wandered on the battlefield outside the territory. Luo Feng also held a very high position in the virtual universe company. Those who were accepted as named disciples by the founders of the Great Axe, all of them have an extraordinary background in the high position of the human race, and the earth is also thriving under their influence... everything is developing in a good direction.

...

The news of Wang Yi's "return" to the earth from Chaos City soon became known to the five major forces of mankind, and the spies of foreign races also knew immediately, and quickly spread the news to the organization.

A vast country of God.

"That human Wang Yi finally came out of Chaos City."

The hoarse voice kept reverberating in the towering palace.

"If he has been hiding in the hinterland of mankind, we still can't help him, but if he goes to the battlefield outside the territory or other places, then we can find a chance to get rid of him."

"Continue to stare, never let go, and report any findings immediately."

Even if the Tongtian Tower appeared, the parties did not actually relax their surveillance of Wang Yi, but first they could not enter the Chaos City, and secondly, the Tongtian Tower was completely isolated.

Even they could not know the specific situation of Wang Yi...so they had a lot of information. All mistakes.

And Wang Yi's reappearance made these foreign organizations feel excited again like sharks smelling blood.

Of course, UU reading www.uukanshu.com, they thought that Wang Yi had finished his training and was going to practice the world master.

They are destined to be disappointed.

Just like Wang Yi's original idea, as long as I break through fast enough, others will not be able to catch up with me.

...

At this time, the talented elites scattered all over the universe also received a piece of news that inspired them.

The legend of the earth, the master of the Heilongshan star field, and the pride of earth human beings—Wang Yi, must gather them.

This time, Wang Yi not only trains those world masters, but also includes constant stars and above. As long as they show outstanding talents, they will be summoned.

Following the practice of the Virtual Universe Company, Wang Yi also intends to establish an organization dedicated to cultivating strong people on Earth. He has already thought of the name, and it is called Dragon Nest.

The place where the dragon soars.

[Chapter 372: Perfect genetic level](#)

The world in the body.

Wang Yi no longer uses the "time world". First, it is unnecessary, and second, the life span is no longer sufficient.

On the endless prairie, Wang Yi and the Void Zerg clones are all here. As for the Yanxing Giant Beast, it perceives the law and the secret pattern in the Tongtian Tower, but it does not matter, it can also integrate the "blood of the beast god" by itself. .

Wang Yi originally planned to fuse the blood of the beast gods before breaking through to immortality. Before he stepped into immortality, the genetic level could reach perfection.

After these years of continuous fusion of "flaming blood jade", Wang Yi's human body has integrated 77 human bodies, and there are more Yanxing giant beast clones, more than 300, and Void Zerg clones 85.

Now Wang Yi has received the fourth calamity of the "Secret Code of Nine Tribulations", and his will has undergone a fundamental transformation in these years.

"Try to see how much you can blend first." Wang Yi's two bodies were sitting cross-legged on the grass, and a pile of scarlet spar appeared beside him at the same time.

"The 78th..." Wang Yi cut through his palm and began to fuse the blood jade.

Powerful and hot pain surged over like a fire wave, Wang Yi's body trembled slightly, but his face remained unchanged.

Continue to fuse flame blood jade.

The flame blood jade was fused one by one, 24 times the level of life genes, extremely good in terms of genes, and with the greatly improved will, the limit of fusion was much higher.

"89th, 90th, huh?" Wang Yi's face suddenly changed, and he felt a tearing pain from his body. Although he could bear it, his body began to collapse. The power of the beast **** flows back into the flame blood jade again.

"Only 90?" Wang Yi frowned slightly, then stretched out.

"It seems that you can only use the blood of the beast **** that has been extracted."

The human body has its limits, and fusion is not only related to will.

Lineage, genetic level, and will all affect the upper limit of fusion.

A drop of the blood of the beast **** melted into the body, in fact, it was equivalent to 1 blood jade melted into the body.

The use of the blood of the beast **** is a very extravagant method. Usually, it can be fused to the limit of 100 flame blood jade, but if it is relying on the blood of the beast god, it is 100 drops, which is equivalent to 10,000 flame blood jade.

"But I now have 90 flame blood jade fused with the earthly deity, and I can rely on 10 drops of the blood of the beast god. As for the flame star giant beast clone, it needs more than 600 flame blood jade, it is too difficult to rely on the blood of the beast god. Now." Wang Yi groaned in his heart.

Judging by the number of fusions, the maximum number of Yanxing Giant Beast clones is 100, and the whole body can be fused with a maximum of 1,000, and the genetic level can be increased by a hundredfold.

Now the Yanxing Giant Beast clone has only merged more than 300.

"Try it first, how much Yanxing Giant Beast can fuse."

Wang Yi's heart moved.

Endless far away, outside the battlefield, inside the Tongtian Tower.

Under the sea of law, on a vast continent, a giant flaming star with a body length of thousands of kilometers, like a huge mountain range, lay there, and now, it started to move, slowly lowering its huge head.

One, two.

The Yanxing Giant Beast continuously fused with each piece of Yan Blood Jade.

"371...372..." Crackling... While absorbing the flame blood jade, the bones, sharp horns, muscles, etc. of the Yan Xing Giant Beast clone changed.

Soon, the Yanxing Giant Beast stopped. "441...Although it has strengthened my body, it has little effect...Forget it, let the Void Zerg clone and the human body come directly, the Flame Star Giant Beast clone has the perfect gene, I'm afraid it will have to wait until the other nine calamities are obtained. It's later."

Once you reach the perfect life gene level, the clone will evolve! Consciousness enters the origin of the universe and is bestowed by the most talented secret method.

When his consciousness returned to the earth, Wang Yi began to use the Void Zerg clone to fuse the blood jade.

The results came out shortly afterwards. The Void Zerg clones had originally merged 85, this time they merged directly to 93.

When ten clones of the human body and the void zerg clan fuse, the power of the beast **** will be driven, and the genetic level will be increased by 10 times.

According to reasoning, once the limit of 100 Flame Blood Jade is fused, it will skyrocket a hundred times!

Wang Yi secretly said: "The human body's genetic level is only 24 times, that is, it is a hundred times higher, which is only 2400... And the fourth catastrophe genetic level of the Void Zerg clone cultivation is more than 6000 times, fusion to the limit, a hundred times higher, no matter how weak it is, It will definitely reach tens of thousands of times!"

Wang Yi's eyes shone brightly.

"continue."

Wang Yi brought out the "blood of the beast god" that he had treasured for a long time.

This "blood of the beast god", when he was picking up the wool in the secret of purgatory, exchanged most of the flame blood jade with the Virtual Universe Company.

In fact, the human race prepared for Wang Yi's peerless genius with a free quota resource, but Wang Yi did not apply.

The Yanxing Behemoth needs too much, and the free quota is definitely not enough.

And the weight required by the clone of the Void Zerg race and the human body far exceeded the blood of the beast **** in his body.

"Now there are 93. With the blood of the beast god, just 7 drops will do."

A transparent transistor, with a dazzling red light inside the transistor, exuding bursts of surging aura, and the roar of the beast **** faintly sounded in his ears.

"The blood of the beast god." The corner of Wang Yi's mouth raised slightly. Precious resources such as the blood of the beast gods are strictly controlled, like many powerful kings who want to buy them, they have to wait until the auction opportunity. No money can buy it.

At first, Wang Yi searched fiercely in the secret realm of purgatory, and then exchanged it for 200 drops.

Wang Yi gently pulled out the tube plug, and then poured the red light on the palm of his left hand.

At first glance, it is red light. If you look closely, you can also vaguely see the drop of molten liquid in the red light, with countless secret patterns flowing in the liquid.

"Snapped."

The red light dripped, dripping on the palm of the hand, and then all penetrated into it in an instant.

Following Wang Yi's Void Zerg Clan clone's skin was faintly glowing red, and the power of the beast **** lurking in every cell in the body was already very powerful.

Therefore, this drop of blood of the beast **** blended into it easily, causing very little reaction.

If the fusion of "flaming blood jade" was a thousand cuts~www.mtlnovel.com~, now it seems to have been stabbed by a needle.

"It's really easy." Wang Yi couldn't help feeling. "Completely blending with the blood jade is not a difficulty."

Wang Yi then picked up another transistor and poured out the blood of the beast **** inside.

Drop by drop, the blood of the beast **** continued to merge into the body of the Void Zerg race.

Soon, all the 7 drops of Beast God's blood were successfully fused, and when Wang Yi tried the eighth drop of Beast God's blood, that drop of Beast God's blood rolled around in Wang Yi's palm, but this time it was nothing. Can't blend into the body.

"Sure enough, 100 drops of the blood of the beast **** is the limit for the Void Zerg clone."

Wang Yi put away the transistor and stood up, his eyes bright.

"Then, the next step is to drive the power of the beast **** in the body to see if it can reach the perfect genetic level ten thousand times."

[Chapter 373: The most talented secret "mirage world"](#)

"It turned out that Luo Feng used a 300-fold genetic clone of Youhai to successfully cultivate the Nine Tribulations and the Fifth Tribulations, before reaching the ten thousand times limit, which is different from my current situation."

Wang Yi's eyes were dignified.

"Now the power of the beast **** in my body has reached its limit."

The tall Void Zerg clone stood on the grass.

"The power of the beast god, drive!"

boom!

The avatar of the Void Zerg clan suddenly burst out of ancient and long-lasting aura, as if passed from the oldest period of the birth of the universe, the body became taller and stronger, and every inch of the skin surface of the whole body was faintly scaly, with countless **** threads entangled. The whole body, especially on the chest, showed a huge roaring figure of the beast god's head, extremely delicate, as if the real beast **** was roaring. A faint red halo enveloped the whole body.

The mysterious power of the power of the beast is integrated into every cell, making it undergo unprecedented changes.

The genetic level of the clones of the Void Zerg race was increased to the extreme in an instant!

At this moment...Every inch of the skin and every inch of musculoskeletal avatar of the Void Zerg is like the most perfect work in the universe! The life gene has reached the point of perfection, even if the secret method of "The Secret of Nine Tribulations" goes against the sky, it can't be improved in the face of an already perfect life gene.

Perfect!

Using consciousness or even seeing the composition of each cell, whether it is macro or micro, no matter what level it is from, the clone body of the Void Zerg Race at this moment is perfect.

"Slightly more than ten thousand times...10081 times, this should be the perfect limit of the genetic level of life in the universe." Wang Yi could feel it.

And when it reached the most perfect state... the body of the Void Zerg clone began to skyrocket!

"Cracking, cracking..." The Void Zerg clone began to absorb energy frantically, and at the same time, its height continued to rise, and its body continued to grow larger.

A large amount of world power poured into the body of the Void Zerg.

One thousand meters...Two thousand meters...

One thousand kilometers...Two thousand kilometers...

Wang Yi watched this scene calmly.

Although it had already been predicted, it was amazing to see the clone of the Void Zerg who was more than three meters high suddenly turned into a huge tens of thousands of kilometers high.

If a species does not break through its genes, then at the peak of the world master, its size will grow to its limit. Like the Yanxing Giant Beast, which is two thousand kilometers long, the immortality, the cosmos venerable, and the master of the universe are all two thousand kilometers long.

If the level of life genes is raised, mutations are possible, and it is only possible.

As for "Blank Star Change", it belongs to the special method of the Yanxing Giant Beasts, and the "Body of the Flame Star" belongs to the secret technique of talent, similar to the talent ability, so it can change the body shape so huge.

Like Wang Yi's practice in "The Secret of Nine Tribulations", the body shape has not changed. The height of the earthly person is still less than two meters, and it has not suddenly skyrocketed to hundreds of meters, kilometers, or tens of kilometers.

Now, the rules of the universe have sensed the changes in the genetic level of life, but the clone of the Void Zerg race has been transformed!

The body skyrocketed.

Enlarging the body does not directly increase the strength, but it can increase the body of the **** after breaking through to immortality.

This can also be regarded as a gift of the original rules of the original universe to the life gene level to achieve a perfect life.

Wang Yi muttered in his heart, "I don't know what changes will happen if the Yanxing Giant Beast clone reaches perfection." The Yanxing Giant Beast clone can reach 20 million kilometers. Although it can't increase any power, it is very sky-defying.

However, Wang Yi estimated that even if the Yanxing Giant Beast clone reached the perfect genetic level, its body shape should not continue to grow larger.

At this time, the clone of the Void Zerg was still getting bigger and bigger.

It wasn't until the whole body reached more than 90,000 kilometers high that it finally stopped growing.

At this moment!

"boom!"

The whole body world freezes instantly.

Everything was frozen, the clones of the Void Zerg race, the human body of Wang Yi, the undulating waves of the grassland, the floating dust in the air, every inch of space in the body of the world, everything... everything was frozen.

For Wang Yi to transform the special pronucleus left in his body this time, he was directly infused by the most mysterious force at this moment.

When this incredible force was poured into it out of thin air, the pronuclear nucleus suddenly changed.

Fire red, turquoise, sky blue, khaki, dazzling gold... finally turned into a cloud of chaos.

This seemingly ordinary pronucleus seems to contain endless mysteries.

And when this mysterious power came, the temple sitting in the solar system and the super beings in it didn't even notice the coming of this power.

That mysterious and incredible power, while transforming Wang Yi's core "pronuclear", the mysterious power that penetrated into the body world directly envelops the clone of the Void Zerg.

The clone of the Void Zerg was completely wrapped in this mysterious power.

The next moment, Wang Yi's consciousness entered a mysterious place.

This is a space filled with countless light spots. Every light spot seems to contain incredible power. Wang Yi even feels that any light spot is more terrifying than the Lord of the universe.

"This should be the place of the original consciousness of the universe?" Wang Yi wondered.

call out! One of the light spots suddenly turned into a streamer, and it shot at Wang Yi's consciousness rapidly, and the speed was much faster than the speed of light. It seemed that it was here...the speed of light was no longer the limit speed.

Wang Yi didn't escape the thought, and calmly faced the flying light spot.

"boom....."

When the spot of light touched the consciousness, the pictures were quickly transmitted to Wang Yi's consciousness. Wang Yi's consciousness seemed to have seen the birth of the universe, the birth of endless life, and saw the destruction of the universe, a scene of annihilation, and many more. The picture, but after seeing it, it was immediately forgotten, and it seemed that it couldn't be remembered at all.

Immediately afterwards, endless messages merge into consciousness.

"Boom!"

When all this was completed, Wang Yi's consciousness was directly kicked out of this space.

In the inner world, the endless grassland, a silver-white giant that seems to stand upright here stands tall.

He suddenly opened his eyes, and there was still a hint of shock and comprehension in his eyes.

"My consciousness, I just entered the land of the original consciousness of the universe, and was given a message. The message is a set of secret talents against the sky."

Wang Yi looked at his own pronucleus. The pronucleus had turned into a hazy and chaotic color. At first glance, it seemed as if endless time and space were moving.

"My most important pronucleus has also been transformed."

Most of the secrets of talent are engraved on the skin, or life crystal nuclei, and so on.

But the secret technique that Wang Yi was given this time was directly engraved in his consciousness.

This is a gift from the universe for achieving perfect life genes!

Wang Yi began to recall a secret method he had just obtained in his consciousness.

Wang Yi didn't understand any mystery of the secret method, or how the secret method was created. Although it was extremely complicated to use, the process of the method of casting was like a knife carved directly into his consciousness.

"The secret of talent...A mirage world?" Wang Yi murmured.

The secret of talent-mirage world!

Once cast, the divine power burns, and the divine body will instantly transform into a strange world, trapping the enemy in this world.

The biggest feature of the mirage world is that once it is formed, it cannot be directly destroyed before the divine power burns clean. It is similar to the space blockade formed by the Yanji Continent False Mystery, but the level is far beyond.

It's partial to the soul! The power is extremely powerful, and it can make the enemy fall into the world of soul illusion. Once the consciousness sinks, unless Wang Yi takes the initiative to release it, it will never recover!

It's as if the owner of Meteor Star controlled the Zerg mother emperor.

It is equivalent to a soul secret that is extremely large and powerful!

However, this heaven-defying talent secret method requires extremely high divine power.

According to the detailed introduction of the message delivered, the lowest threshold for the use of the secret talent "Mirage World" is the clone of the Void Zerg that has reached the perfect life gene, and can only be used after becoming immortal!

The amplitude of the divine body has to reach 50 times ~www.mtlnovel.com~ and the divine body is burned... this is the minimum energy standard for displaying the "mirage world".

"The Mirage World", each time it is cast, the minimum duration is about 10 seconds.

With the lowest energy standard and the shortest time, the 90,000-kilometer divine body of the Void Zerg clone can only be used 10 times...the divine body will be completely burnt out!

Outrageous consumption, power is also against the sky.

Wang Yi couldn't imagine how exaggerated the power of the "mirage world", which required more than 90,000 kilometers of void zerg clone immortal divine body, could only burn ten times.

And this is the most secretive and hardest to guard against soul attacks!

"To use it, you will have to tens of thousands of times the genetic level, the amplitude of the divine power is 50 times, and it will consume tens of thousands of kilometers of the divine body..." Wang Yi was full of excitement. Such a powerful soul-type talent secret method, even the venerable can easily control it.

[Chapter 374: Fire and Sky Beast God Inheritance Order](#)

Earth Asia, Yangzhou City.

At dusk.

The sky is golden, and the twilight fire wheel emits the afterglow of the sky behind him, illuminating the huge transparent French windows of the castle with the color of the sunset.

Wang Yi, dressed in a red robe, faced the cool evening breeze, and his black hair that moved with the wind was plated with golden brilliance. He stood alone on the top of the castle enjoying the beautiful scenery.

"As I expected, the human body is fused with the blood of the beast **** to the limit of 100, which is a hundred times higher and only 2400 times the life gene level. However, the gene level of the Void Zerg clone has reached perfection, and the strongest talent secret method has also been obtained. Then next it is to go to the ancestral gods to implement the next plan." Wang Yi secretly said.

"But if you want to go to the ancestral gods, you must have the beast **** inheritance order."

The beast **** inheritance order is related to the ancestral **** religion.

The Patriarchal Cult is the number one power in the universe.

When the universe was born, the ancestral gods were born, and the three ancestor gods in the highest position in the entire ancestral gods were the legendary!

Three ancestor gods, eight beast gods, 72 gods, 3000 gods!

This is the permanent fixed number of strong men in the ancestral gods. Although there are candidates for the gods, candidates for the gods, candidates for the beast gods... But for the true eight beast gods, only one can hold the position of each beast god, unless the original. If the beast gods are lost, otherwise it is absolutely impossible to give birth to a new beast god.

The same is true for gods and ambassadors. Each of 72 gods and 3,000 gods is unique.

The inheritance of the Patriarchal Religion is divided into three types.

One is the inheritance of the gods, the second is the inheritance of the gods, and the third is the inheritance of the beast gods.

Among them, the lowest ambassador inheritance, those inheritance crystals are wandering in the universe and are obtained by the strong one by one. But "the place where the gods will inherit" is a fixed place, scattered all over the universe.

As for the "Beast God Inheritance Land", it is controlled and protected by the Ancestral God Sect, and there must be a Beast God Inheritance Order to enter the heritage land.

There are eight kinds of beast **** inheritance orders, namely "gold, space", "wood, space", "earth, space"... "light, time", "wind, time", "thunder and lightning, time" eight ways of fusion! It also represents the way of the eight beasts and gods!

The Patriarchal Sect is an open sect. It does not need territory, does not engage in ethnic wars, and does not engage in power struggles.

In addition to the three great ancestor gods, the other eight beast gods, 72 gods, and 3000 gods are scattered among the hundreds of millions of ethnic groups in the universe.

Even if it is inherited and cultivated to perfection, it is still not a member of the ancestral sect, only the inheritance is!

"Every piece of the Beast God Inheritance Order is very rare, more precious than a heavy treasure, but the human race should have some treasures." Wang Yi secretly said, "With my current status in the human race, I want to apply for a Beast God Inheritance. Ling, it should be a very easy thing."

It is normal to be bestowed until reaching the stage of immortality.

But like Wang Yi's talent and potential now, the human race will also consider carefully when he submits an application.

Most likely to be available.

When Wang Yi thought of this, he didn't hesitate to connect to the virtual universe.

Virtual universe, the highest point of Thunder Island, the palace where the Lord of Chaos is located.

In the main hall, chaotic air flow is permeated.

"Wang Yi begged to see City Lord Chaos." Wang Yi came to the palace respectfully and authentically.

"Wang Yi, I heard that you have returned to your hometown. Why are you looking for me so quickly?" The City Lord of Chaos uttered a gentle and majestic voice from the airflow.

A figure in a golden robe emerged from the chaotic air current, and the Chaos City Lord, who looked like a majestic middle-aged man, walked over, looking at Wang Yi with his calm eyes like endless stars, with a trace of satisfaction in his eyes.

Like this generation, the best is no different from Wang Yi and the Seven Swords King, but the Seven Swords King is immortal, and Wang Yi is the realm master, and the displayed combat power is still higher than the Seven Swords King. Can the two compare?

"City Lord, I want to ask the group for a beast **** inheritance order." Wang Yi said.

"Oh?" Chaos City Master said with a hint of surprise in his eyes, "You actually know the Beast God Inheritance Order, then you should also know the value of the Beast God Inheritance Order, do you want to go to the Ancestral God Cult before you break through to immortality? "

The Beast God's Inheritance Token is absolutely comparable to the preciousness of a set of precious treasures, which represents the highest opportunity for the inheritance of the Patriarchal Cult.

Even if King Zhenyan was an invincible titled king, he was not qualified to be bestowed by the race, but the King of Seven Swords was almost the same.

"The disciples have gained a lot from training in the foreign battlefield, but if I want to go further, I feel that the Patriarchal Cult is very suitable for me." Wang Yi said, he did not actually lie. "Moreover, the disciple still has a third clone that has not yet been conceived, so I want to go to the Secret Realm of the Ancestral God Sect to find a suitable gestation."

"So that's it." City Lord Chaos groaned.

"On your terms, you are already eligible to apply to the ethnic group."

"What you want to ask for is the inheritance order of the Fire Sky Beast God, right?" Chaos City Lord asked again.

"Yes."

"Well, I will apply for a Beast God inheritance order for you." Chaos City Lord Wen said, "Because this is the resource of the entire ethnic group, it has to go through high-level internal discussions, or the application may be rejected. After all, normal practice is the immortal stage. Go again, but on your terms, it is very likely to be approved. You can go back and wait for the news first."

"Yes, Wang Yi retire."

Wang Yi bowed respectfully and turned to leave.

Chaos City Lord watched him leave Thunder Island, thinking in his heart, "Wang Yi went to the Patriarchal Sect. Although the place of inheritance is dangerous, it is some danger of elimination in the process of inheritance. After all, it is the important place of the Ancestral Sect. Will not be assassinated by foreigners."

An independent space specially opened up by the virtual universe.

In the ancient magnificent temple, above the throne, many supreme beings of the human race gathered together to discuss whether to grant Wang Yi the beast **** inheritance order.

In fact, even the Seven Sword Kings who are far less talented than Wang Yi can get the Beast God Inheritance Order, and Wang Yi can naturally get it, but they are usually granted immortality, and Wang Yi is the realm master. There are different opinions.

The landlord gave Wang Yi the beast **** inheritance order, would it be a waste?

Do you really want to make an exception for Wang Yi?

After some not so fierce discussions, under the impetus of City Lord Chaos, finally passed the resolution smoothly——

A beast **** inheritance order was bestowed on Wang Yi.

The human race is extremely efficient. After the decision was made, only the next day, a team of envoys arrived on Earth to personally send the Beast God Inheritance Order~www.mtnovel.com~ The Beast God Inheritance Order. "

Wang Yi held a six-sided red crystal card in his hand. The crystal card was engraved with a picture of the bizarre and ferocious beast statue. This sculpture is exactly the appearance of the ancient beast **** in the world of purgatory.

When Wang Yi's thought power penetrated in, he felt as if he had entered an ancient world, and a message poured into his mind.

"Holding the Beast God Inheritance Order, go to the place of inheritance. If the talents meet the abilities, then it is possible to obtain the Beast God Inheritance. The cosmic coordinates of the place of inheritance are..."

The message also described the six-sided crystal card as the inheritance order of the beast **** of the "fire and space" fusion law.

In fact, the beast-god inheritance order alone is of little significance to Wang Yi, who now has the inheritance of the Tongtian Pagoda.

"With it, I can go to the Secret Realm of the Ancestral God Sect." Wang Yi's eyes flickered slightly.

[Chapter 375: Ancestors](#)

Outside the earth, in that towering temple.

A bald-headed man wearing a fiery red shirt walked out of the space transmission channel. The bald-headed man was smiling, and his smile had strange magic power, which made people involuntarily immersed in the artistic conception of a vast starry sky.

I was already waiting here, Wang Yi hurriedly stepped forward to salute.

"I have seen Venerable Guiyi."

The Venerable Guiyi is the second among the many disciples of the Chaos City Lord, and he serves the Chaos City Lord all the year round, and is definitely a confidant of the Chaos City Lord. In addition, because he has been staying in the "Chaotic City"... the strength of Venerable Guiyi has always been a mystery, but the slightest reveal is enough to shock all parties. He almost represents the tongue of the "Chaotic City Lord". There are many things about the Chaos City Lord. They are all conveyed and executed by these two disciples!

Venerable Guiyi looked at Wang Yi and smiled and said: "Wang Yi, this time I am ordered by the teacher to send you to the Secret Realm of the Ancestral God Sect. If you have nothing to do, let's set off."

Wang Yi said, "I am ready and can set off at any time."

"That's good, then let's go." Venerable Guiyi nodded, and then in the respectful eyes of other temple guards, he teleported Wang Yi into a starry sky.

Venerable Guiyi smiled and said: "The place of inheritance is extremely far away from our location, but my servant has the coordinates of tokens that are closer to the place of inheritance, and we can directly transmit it to the kingdom of God."

A tall and burly one-horned alien life appeared next to Venerable Guiyi, whose breath was probably the pinnacle level of Fenghou, respectfully saluting Venerable Guiyi.

"Owner."

"Open the kingdom of God and send us to the nearest token coordinate to the place of inheritance." Venerable Guiyi ordered.

The unicorn alien said respectfully: "Yes."

The foreign servants immediately began to initiate the transmission of the kingdom of God.

"Om..."

His whole body was faintly filled with a strong aura of law, and his eyes were looking at the endless void. Suddenly, an extremely dazzling light shone from the alien beings, instantly spreading across the surrounding universe for several kilometers.

And Wang Yi and Venerable Guiyi, who were shrouded in this light, vaguely saw the vast world at the other end of the channel that was connected by the light, and that was the kingdom of the servants of foreign races.

Then the three of them disappeared from the starry sky and entered the kingdom of God.

Using the kingdom of God as a transit point, he came to a remote star field and a desolate planet in the territories of mankind.

Venerable Guiyi and the others appeared here. Venerable Guiyi took the servants back and said: "This place is very close to the place of inheritance. I will take you directly over it."

Generally, after realizing "teleport", the teleport distance will be the same regardless of the world master or the king. Teleportation depends more on the perception of the "law of space"! In an instant, the body is in harmony with the spatial fluctuations, and is directly transmitted to a certain remote spatial fluctuation coordinate position that can be sensed.

After comprehending the complete laws of space, the teleportation distance of the Universe Masters is much exaggerated, and the Universe Masters can teleport directly for more than a thousand light-years at once!

"brush!"

Venerable Guiyi took Wang Yi directly for several teleports. After a while, Venerable Guiyi stopped.

"arrive."

In front of the two of them, there was a violent wind that resembled a giant python, and black gusts roared over hundreds of millions of kilometers, like pythons playing around with each other, crisscrossing the starry sky. And the nearest place to the two of Wang Yi is an endless black whirlwind that is not known how many billions of kilometers wide and runs through the starry sky at a loss.

Wang Yi also looked at the terrible scene in the distance, holding his breath.

According to legend, the ancestral mysterious realm is one of the most dangerous secret realms.

It is comparable to the size of a universe nation, and dangerous places are everywhere, even if the universe venerable enters it cautiously, it is difficult to come out alive.

The Secret Realm of the universe is also divided into different levels, and the scope of the area is also different.

The place of inheritance is in one of the most terrifying cosmic secret realms in the universe, the "Ancestral Mystery Realm".

Its largest diameter is 160 million light-years. As the highest and most dangerous mystery, ordinary danger can cause the Lord of the Universe to perish. In some extremely dangerous places, even the Lord of the Universe will stop.

Legend has it that the most common ancestor's mysterious realm is the black whirlwind, that is, the black gusts that Wang Yi saw. Although it is common, it does not mean that it is not dangerous. The black whirlwind...I'm afraid it will seriously injure the Universe Venerable, if a large amount of black whirlwind is enough to annihilate the Universe Venerable.

Venerable Guiyi said: "We have entered the mysterious realm of ancestors, and the coordinates are here. Then, we can wait, and someone will come to pick you up soon. I don't have an inheritance order from the beast gods. After you enter, I have to leave. After that, you can only rely on yourself."

Even Venerable Guiyi did not dare to break into the mysterious territory of ancestors at will.

When Wang Yi heard the words of Venerable Guiyi, he waited with peace of mind.

"Sign in."

[Ding, congratulations to the host for signing in successfully, reward the black crystal sand (100 units)!]

Wang Yi took a look at the information of the black crystal sand. This is a treasure that was born from the natural condensation of the black whirlwind. It has many uses. One of them is to make weapons, which has a powerful erosion and damage effect on the immortal gods' bodies. , Similar to "Fermore Venom", but it can be used forever...Of course, only the Venerable can venture to find crystal sand in the black whirlwind, and use the black crystal sand to refine a weapon. It is absolutely unattainable for the immortal gods. The sky-high price.

100 units of black crystal sand is definitely a lot, and in terms of value, it is comparable to a treasure.

Suddenly the peaceful void around him began to twist.

Venerable Guiyi said: "Don't move."

Afterwards, the twisted space around him instantly seemed to swallow them both as a whirlpool.

The next moment, Wang Yi found that he was teleported into a void, and next to him was the Venerable Guiyi. It's just that the distant scenery is beautiful and breathtaking. I saw the endless colorful river rushing and surging in the distance. The vastness of this colorful river is full of magical power, which makes people involuntarily attracted to stare at it.

However, whether it was Venerable Guiyi or Wang Yi, the will was extremely strong, and the impact was minimal, and he woke up in an instant.

"It turned out to be Venerable Guiyi, long time no see." A cold voice came.

Next to the void stood a rock **** about eight meters high. He wore a purple armor with flames on the surface. His whole body was glowing with dark green. At first glance, it looked like a dark green emerald, which can be distinguished from his appearance. ...This is the "Ficang Clan" in the universe, a kind of rock life.

He seemed to know Venerable Guiyi ~www.mtlnovel.com~ and he greeted Venerable Guiyi and then glanced at Wang Yi. Just now, the human world lord was able to get rid of the influence of the colored river in an instant like Venerable Guiyi, which made him feel a little bit in his heart. be surprised.

"Venerable Feicang." Venerable Guiyi smiled slightly, with a warm smile on his face.

Venerable Feicang clan said: "Is this a peerless genius newly born from your human race? The Lord can be given a beast **** inheritance order and be escorted by you personally. It seems that he is very talented."

If it is an ordinary Venerable or other weak and immortal gods who dare to break into the mystery of the ancestors without authorization, Venerable Feicang clan will certainly not let it go easily, but Venerable Guiyi's true strength is not below him, and he is still an acquaintance, so Venerable Feicang clan also No longer mention any sins.

Venerable Guiyi replied: "Venerable Feicang, I know the rules of your ancestral gods. This time I just **** this junior over, and I will leave soon. I'll take care of you next time."

Venerable Feicang clan nodded, "For your human race, this is the last time. Let's not take it as an example."

[Chapter 376: First Arrival in the Mysterious Land of Ancestors](#)

The reason why Venerable Guiyi personally escorted Wang Yi over was because he was worried that he would be intercepted by a foreign race on the way. Now that he has entered the mysterious realm of ancestors, it is almost impossible to encounter a foreign race assassination, so Venerable Guiyi told Wang Yi to send a few words later. left.

Venerable Feicang clan looked at Venerable Guiyi leaving, shook his head, and said to Wang Yi: "Take out your beast **** inheritance order. If there is no beast **** inheritance order, you can trespass into the important place of my ancestral **** teaching. capital offense."

I didn't see you saying this to Venerable Guiyi just now, but Wang Yi muttered in his heart, obediently taking out the beast god's inheritance order.

Venerable Feicang clan saw the beast god's inheritance order, and then he smiled: "I am the leader of the Ancestral God's Sect. Come with me."

The Venerable Feicang clan flew in front, while Wang Yi naturally followed behind. In front of him was the endless rushing and colorful dreamy river.

"The ancestor **** teaches the most precious treasure, the colorful Aurora Lake." Wang Yi naturally knew it.

This is a realm-class supreme treasure with boundless power. The Patriarchal Cult also relies on it to sit in front of it, so that it is not afraid of all foreign enemies invading, and is as stable as Mount Tai.

Next, the Venerable Feicang clan took Wang Yi to the vicinity of the endless vast river and explained to him. While Wang Yi listened, he looked at the endless river of five colors and endless aurora in front of him. It was far away. It can be distinguished from the shape of a river at a place, but at a close distance, it only feels big and boundless.

Venerable Feicang clan said proudly: "...The diameter of this colorful aurora lake is 10 light-years at most, and its power is endless. If the power of each aurora bursts out, it will be enough to seriously injure Venerable Universe, and the entire lake is endless. The composition of the aurora of, the power is infinite! It is one of the strongest treasures in the vast universe. With this treasure of apologetics, who can trespass my ancestral religion?"

Wang Yi also sighed, sighing...sign in.

[Ding, congratulations to the host for signing in successfully, and reward 'Colorful Aurora Lake'!]

"..."

Wang Yi's expression became strange.

Venerable Feicang clan didn't pay attention, and said with a slight triumph: "This colorful Aurora Lake is the treasure of my ancestral gods! The strongest treasure of the universe, you can see it, it is luck."

Wang Yi: "Yes...Yes, it's so shocking."

Wang Yi couldn't help but open the sign-in panel, and he saw a colorful treasure like a lake in the panel.

This is the colorful Aurora Lake, and it is also the strongest treasure that the ancestors of the gods rely on as the strongest screen.

Wang Yi did not expect to give him such a super gift as soon as he came.

Lucky is too good, right?

"But... Xeon Zhibao is actually not the highest sign-in reward." Wang Yi was full of wonder. "The foundation of the Patriarchal Cult is deeper than I thought, and it really deserves to be the spokesperson of the will of the primitive universe."

At this moment, Wang Yi's heart was full of a strong urge to squeeze the wool.

There is only one thought-light it up!

Although "Colorful Aurora Lake" is infinitely powerful, the driving conditions are also extremely demanding. Wang Yi is afraid that he will get the venerable, and he can only try to use it if he has enough divine power.

After all, the Xeon Supreme, even the strongest in the universe can hardly use its full power.

"I now have a tower of unknown level, but at least a god-king level tower, a domain-type supreme treasure "Colorful Aurora Lake", and two peak treasures "Jia Jia" and "Original Soul"..." Wang Yi was full of sorrow, "If you let all parties in the universe know, I'm afraid you will really go crazy."

Many cosmos masters dismiss such treasures as Star Map and Killing Wu Yuyi, and they are bestowed upon the strong within the race.

Like some of the top treasures of palaces, it is enough to make the masters of the universe jealous.

Qianbaohe is such a treasure, enough to make the masters of the universe crazy.

As for the highest "Star Tower", it is enough to make countless ethnic groups crazy, and the strongest in the universe desperately want to get it. The equivalent "Colorful Aurora Lake" is the treasure of the greatest apologetics of the largest force in the universe! The foundation of protecting the base camp!

Wang Yi now has more treasures than he could imagine!

The Tongtian Pagoda is the treasure of the palace, the colorful Aurora Lake is the domain type, the robbery is the body armor type, and the original soul is the soul type...

Wang Yi can already imagine that when he took out the colorful Aurora Lake in the future, the ancestor **** taught that life doubts.

"These treasures don't tell me the growth of my strength, I don't know how many levels the life-saving ability improves." Wang Yi secretly said in his heart.

When Wang Yi's strength rises, once he casts the colorful Aurora Lake, hides in the Tongtian Tower, puts on the robbery armor, and brings the original soul, I am afraid that the strongest in the universe will be helpless.

At least in the Primitive Universe, no one should have a solution to him.

I'm right here, hey, come hit me.

Wang Yi could already imagine himself sitting on the Tongtian Pagoda and passing by other forces, while the other party could only stare at him and take pictures of his helplessness.

Thinking about it this way, I feel a little excited.

After introducing Wang Yi to the strongest treasure of the Ancestral God Cult, "Okay, let's not say, take you to Bauhinia Island." Venerable Feicang clan didn't know the rich inner drama of the little fellow human beings next to him, and took Wang Yi with him. Teleported directly to the edge of the colorful Aurora Lake.

The distance is too close, and you can clearly see the aurora, each of which is about 10,000 kilometers long, and the mighty and unrivaled might shock Wang Yi.

And in the endless aurora, you can vaguely see a vague island.

"Did you see it? The Bauhinia Island is there, come with me." Venerable Feicang clan flew directly into the Aurora.

Wang Yi didn't hesitate, and flew in. When he touched a flying aurora, the aurora passed around Wang Yi's body like a stream of water, without the slightest attack.

Of course, it was also because Wang Yi had the Beast God Inheritance Order. If he rushed in without carrying the Beast God Inheritance Order, he would be attacked by the entire colorful Aurora Lake as an intruder.

Walking in the colorful Aurora Lake seems to be in real lake water, and it is extremely comfortable, and the island also expands in Wang Yi's line of sight, and soon comes to the front.

Venerable Feicang said, "Here, this Bauhinia Island is the place where you inheritors of the beast gods live, and it is also the outermost periphery of Wucai Aurora Lake."

The Bauhinia Island is millions of kilometers in diameter, and there is no aurora close to it for tens of thousands of kilometers.

There are densely packed palaces on the land and on the mountains far away. There are countless palaces of various styles. At the same time, many palaces have a strong atmosphere... Obviously, there are many strong people on Bauhinia Island.

And in the sky, there are circles of brilliance covering the entire Bauhinia Island, and that circle of brilliance is constantly expanding, and it disappears when it expands to the edge.

A new aperture is born in the center of the aperture.

An aperture covers an aperture, just like ripples on the surface of the water.

Constantly spreading around.

Birth, annihilation.

Birth, annihilation.

So endless...

Then each circle of brilliance is composed of countless laws of silk threads ~www.mtnovel.com~The laws of time, space, gold, wood, water, fire, earth, wind, thunder and lightning, and light are mixed, and there are even Many fusion laws, and many more incomparable and mysterious laws, silk threads are all entwined, making every aperture extremely perfect.

"Wait, this is..." Wang Yi witnessed this scene with his own eyes, and countless auras appeared in his mind, and he was completely shocked. The circle of disillusionment seemed to interpret all the mysteries in the universe.

However, Wang Yi's understanding of the law of fusion and the mysterious idea of creating the secret method was greatly touched by him unknowingly.

This kind of inspiration is very precious, allowing Wang Yi to see his future path more clearly.

"The appearance of the law of the cosmic operation where the Ancestral Gods is located is more obvious than that of the Chaos City of the initial universe of mankind." Wang Yi was also shocked in his heart, and he was indeed the spokesperson of the will of the original universe, with the maintenance of the law of the universe as the core. Nature is also protected and favored by the laws of the universe!

[Chapter 377: On the way to the wool](#)

On Bauhinia Island, there are palaces of various styles, and you can also see the powerful men of various races of the cosmos's billions of races, various breaths of life, various appearances, and some special lives.

"Come with me, the first thing the newcomers do is to build a residence on this Bauhinia Island." Said Venerable Feicang Clan.

At the same time, he explained the situation on Bauhinia Island to Wang Yi who followed.

There are many inheritors on Bauhinia Island. Since the birth of the universe, the accumulated inheritors have been an astonishing number. Today, there are more than 100 million inhabitants on Bauhinia Island, and more than ninety-nine percent of the others have disappeared in history.

If the inheritor dies, even if the Lord of the universe reverses time and space and resurrects, he will still be reluctant to resurrect the inheritance order.

Because the cost of the beast god's inheritance and resurrection is too high, the Lord of the universe is also reluctant to bear it.

Following the conversation, Venerable Feicang tribe quickly took Wang Yi to a picturesque lake and said: "You can build a residence here. Remember, each palace covers an area of at most one kilometer in length and width. Even those beings with huge divine bodies have to shrink and live in them. No one can be exceptional."

Wang Yi nodded, and he also understood that none of the residences of various ethnic groups that he saw along the way were more than one kilometer long and wide. As for the height, there is also a limit, and it cannot exceed one kilometer.

"Also, you can leave a token in your palace, and you can directly teleport to this place in the future."

Venerable Feicang clan reminded again.

"If you have soul servants, remember, don't bring them out. Once they are brought out, they will be attacked by the colorful Aurora Lake and annihilated instantly... Even if you really want to bring them out, they will be in your own palace at most. Inside, it's your territory. Once you leave the palace, you must never bring out slaves. Of course, life with vassal attributes like plant life and metal life is fine."

Wang Yi checked in while listening. In fact, he kept the check-in on on the side of the road, but the check-in could not be triggered anywhere.

[Ding, congratulations to the host for signing in successfully, and reward 'Shen Yi Bow'!]

An ordinary treasure.

It's useless. It seems that important places have been checked in. Wang Yi said inwardly.

Judging from the urine properties of the sign-in panel, Bauhinia Island can only be regarded as a large area, and the highest area should actually be the Mysterious Ancestral Realm, which is a place that is more than 100 million light years away.

Of course, Wang Yi is not in a hurry. He has still been in the mysterious realm of ancestors for a long time.

The wool has to be simmered slowly, and it is not good to simmer it all at once.

Even if you pick up the watermelon, you can't lose the corn and peaches, right.

Afterwards, the facilitator Feicang Clan took Wang Yi to the highest mountain in the entire Zijing Island. There was only a majestic palace on the mountain, which was thousands of kilometers long.

"That's..." Wang Yi looked at the towering palace that faintly exuded the ancient and eternal atmosphere, and there seemed to be unimaginable existence lurking in it.

"The area of your inheritor's palace is limited, but the island owner has no limit." Venerable Feicang clan pointed to the majestic palace from afar, and smiled: "See, that is the palace of the owner of Zijing Island. , We go over."

"Okay." Wang Yi also had a glimmer of expectation in his heart.

The land of the owner of Bauhinia Island should be able to gather good things.

But get closer.

The Venerable Feicang clan did not disappoint Wang Yi's expectations, and took Wang Yi and the two across the mountains to the vicinity of the palace.

From a distance, there are many carvings on that palace, like giant unicorn lizards, roaring orangutans, and wings spreading birds... Although there are thousands of carvings, there are only those eight kinds, these eight kinds. The sculpture should be the image of the eight beast gods.

"The owner of Bauhinia Island is assumed by the guardian beast god."

Venerable Feicang clan said.

"The guardian beast god?"

"Yes, you look up at the sky." Venerable Feicang clan pointed to the sky.

Wang Yi looked up and saw a surprising scene.

Looking up from this position, you can see a gap in the colorful Aurora Lake. Along this gap, you can see the deep core of the colorful Aurora Lake. There is an extremely dazzling huge palace, which exudes endless Around the palace of light, there are eight palaces one size smaller in suspension.

"That is the true core of the Ancestral God Sect." Venerable Feicang Clan's eyes lit up.

"The largest palace is the Ancestral Temple! That is the place where the Ancestral Gods live. Although there are three Ancestral Gods in my Ancestral God Church, there is generally one who sits at the core."

"The eight smaller palaces around the ancestral temple are the Eight-Faced Beast Temple, where the eight great beast gods live."

"There are more than ten sub-dians around the Bafang Beast Temple, which is the Guardian Beast Temple."

"There are 72 continents on the periphery of the Temple of the Guardian Beast. Of course, from our perspective, we can't see all 72 continents... There are the continents where 72 **** generals live. It is said that each The God General Continent is no less than Bauhinia Island."

"The dense cluster of stars in the outermost part is a world of 3,000 stars. Each star world... is also the residence of a divine envoy."

"Ancestral Shrine, Bafang Beast Shrine, Guardian Beast Shrine, 72 God General Continent, 3000 God Envoy World, this is the core of the Ancestral God Sect."

"In addition to this core place, there are also islands in Wucai Aurora Lake. In addition to your Bauhinia Island, there are also a large number of scattered islands. On those islands there are peripheral members of the Ancestral Gods."

...

From the explanation of the Feicang clan, Wang Yi also knew.

The guardian of the beast gods refers to the existence of the complete beast **** inheritance and cultivation to the point of the master of the universe. Perhaps some of them are because the current beast **** is alive and cannot inherit the position, or they themselves are unwilling to inherit the position. After all, inherit the respect. Although the position can make the strength skyrocket, it can never be improved.

The Lords of the universe, no matter where they are, are a group of great beings at the pinnacle of the universe. Even if they are unwilling to inherit their position, the ancestors will respect their wishes and make them 'guardian beast gods'.

There is a huge platform square in front of the island owner's palace, which is a section of a mountain that is cut off and exposed. There are three fountains in the thickly carved and perfect square. The spring water is born out of thin air and gushes endlessly, but the ground on the square is not wet at all, and the scene is beautiful.

Wang Yi and Venerable Feicang descended to the square platform ~www.mtlnovel.com~ to sign in. "

[Ding, congratulations to the host for signing in successfully, and reward the 'Beast God Inheritance Order' (Quantity: 8).]

Wang Yi saw eight more six-sided tokens with different colors and materials carved with different monster appearances under the sign-in panel. Each token exudes a different breath. He immediately understood that this is the inheritance order of the eight beasts and gods. Done.

Wang Yi felt a little speechless. The Beast God Order is indeed a good thing, but everyone only needs one piece.

"This...really." Wang Yi was a little bit dumbfounded.

However, if you can sign in at the core of the colorful Aurora Lake in the sky, the Ancestral Temple, and the Beast Temple, you should get a very generous reward, right?

Wang Yi is looking forward to it, if he can sign in and get the highest reward in the entire Ancestral Mystery Realm, what will it be?

"I have to find a way to go up." Wang Yi said inwardly.

[Chapter 378: Guardian beast](#)

"Sir, what conditions do I need when I think of the Beast Temple or the Ancestral Temple?" Wang Yi asked suddenly.

"Do you want to go up?" Venerable Feicang clan was surprised, and then shook his head, "The Ancestral Temple and the Beast Temple are the core sites of my ancestral **** cult, and not everyone can approach it. Unless you get the permission of the ancestor **** or beast god, you can count on it. God will not be able to enter at will either."

Venerable Feicang clan took a look at Wang Yi, "However, in history, there are still some peerless genius inheritors who have the qualifications to become the lord of the universe. When the ancestor gods and beast gods are noticed and summoned, there may be a chance to go up at that time. You If you work hard, it might be possible."

The venerable Feicang clan is just talking about it. The ancestor **** taught him to see more peerless geniuses in the universe. Although Wang Yi is the best of mankind, there are billions of peoples, lives, and inheritors in the universe. Mankind is here. It was inconspicuous at all. He didn't think Wang Yi had this opportunity.

The Venerable Feicang clan has been in the ancestral gods for too long, and he didn't pay much attention to the news of the universe. He didn't even know that the strongest demon who was born in the human race was right in front of him.

Is it just that?

It doesn't feel difficult.

Wang Yi muttered.

It turned out that Luo Feng came to Bauhinia Island in history and was a blockbuster. With his insight into the powerful laws of the way of the beast, he accepted 620,000 invitations in the World of Glory Battle World, and his winning rate remained above 98%, shocking countless people and attracting the ancestors. The attention of the high-level teachers, waiting for him to gain a reputation in the universe, and let the ancestor **** personally come to bestow the treasure.

Now he has gone through the sea of "Tongtian Pagoda" law and "Time Realm" for more than sixty billion years of comprehension, advancing side by side in the ways of the eight beasts and gods, and created the ultimate secret method. In terms of strength, he is stronger than the original Luo Feng. Don't know how much.*n0VELuSb.c0m*

The weakest beast god's sentiment can be compared to King Zhenyan. There are hundreds of millions of inheritors on the entire Bauhinia Island, and few of them can be his opponents in the immortality.

Wang Yi didn't know, because he came up with the fact that the Tongtian Tower came down and the will of the primitive universe was deceived. The highest level of the Patriarchal Cult is now affected, and the Patriarchal Gods are still busy communicating with the will of the primitive universe.

Venerable Feicang tribe left after fulfilling his obligation to lead. Wang Yi stood alone in front of the palace gate, and there were three fountains in the square behind.

He walked in.

Passing through the front hall, there is an empty atrium behind, and behind the atrium is the broadest and most majestic main hall.

"Huh?" Wang Yi's eyes were certain.

There is a human man sitting cross-legged in the atrium. This human being wears a plain black robe, has long blue hair, and has blue secret patterns on his face, but the faintly exuding aura is at the level of the sage of the universe.

The human black-robed man sitting cross-legged saw Wang Yi and stood up with a smile on his face.

"I didn't expect to be able to see me here as a human being, as a realm master, it's really rare."

"I am a servant of the island owner. I am responsible for guarding the palace here and sending messages to the island owner."

Wang Yi looked at the black-robed man in front of him, the human being in front of him was a human being enslaved by the soul.

Although he felt a little uncomfortable, he understood that this was reality.

Strong humans can enslav other ethnic groups, and other ethnic groups can also enslav humans.

The guardian beast **** is the existence of the master of the universe, so it's weird to accept a human universe as a slave.

The black-robed man smiled and said, "You are the new inheritor, come to visit my master, right?"

"Yes, sir." Wang Yi suppressed the feeling in his heart and bowed slightly.

"I have reported your arrival to the master. Your luck is good. The master happens to be free. You don't need to wait. Some unlucky newcomers are out of luck. When they encounter the master, something happened, just wait for thousands of years. , The master is already waiting for you, come with me." The black-robed man turned and walked towards the palace behind, Wang Yi followed.

When he walked into the main hall, he could feel an extremely overbearing heart-trembling breath covering the entire palace.

There was a figure lying on the high throne. It was a strange life similar to a flood dragon, but with wings. The dragon head was held up high and looked down. There was a layer of strange armor on its body. With a blossoming flame, it lies on the throne... It makes Wang Yi feel trapped in an endless world of flames. The entire time and space around is filled with flames, and that strange life is the controller of this time and space, as long as it is willing , A thought can make him fall.

"It really deserves to be a guardian beast **** who has reached the level of the master of the universe. It is really terrifying." Wang Yi took a deep breath. "This is the guardian beast god! And it should be the beast **** who cultivates 'fire and space' to achieve great success and become the lord of the universe." Seeing it, Wang Yi seemed to see the future self, and his heart was shaken.

After all, if Wang Yi's future is not for the way of time and space to become the master of the universe, it will probably be "fire and space" becoming the master of the universe.

At this time, a slightly high-pitched voice uttered from the dragon's head: "Newcomer, from this moment on, you are the inheritor of Bauhinia Island."

"First of all I grant you the permission to enter the 'Glory World'."

As soon as the mythological sound of the apologetic beast fell, an artifact similar to a light brain appeared out of thin air and flew directly towards Wang Yi.

"This is the receiving sensor of the virtual world. The glory of the world... it is the virtual world powerhouse of my ancestors' religion..." The guardian beast **** briefly introduced the "Glory World" to Wang Yi.

"I also grant you the authority to enter the 'Land of Inheritance', into the 'Land of Treasures', and into the 'Land of Secret Realm'."

There are three water curtains outside the palace of the owner of the Bauhinia Island. They are a transmission channel and must be authorized by the owner of the Bauhinia Island to enter.

Three water curtains lead to three locations.

The water curtain on the left is the passage leading to the land of inheritance.

The water curtain in the middle leads to the place of treasure.

The water curtain on the right is the land leading to the secret realm.

The place of inheritance is the place to accept the inheritance of the animal gods and test the laws and comprehension.

The place of treasure is the place where the treasures are hidden left by the super powers who taught the ancient beast gods, guardian beast gods, and beast gods. There are huge treasures there.

Many strong people have left many obstacles, restrictions, and requirements. Only by meeting the requirements of the predecessors can the treasures be taken out.

Like the "Seven Sword Kings" of the human race and Luo Feng, the original ancestor of the ancestral religion, had obtained treasures in the treasure land~www.mtlnovel.com~ However, Wang Yi didn't care much about this treasure hunter.

Is the sign-in not fragrant?

In the secret realm, if you want to explore the ancestral mysterious realm, you can follow that passage and enter the depths of the ancestral mysterious realm.

Ancestral Mysterious Realm... is the most mysterious realm in the universe, where the most special lives live, and there are also many mysterious treasures in the universe, whether it is various natural materials, but some of the treasures and treasures bred in the universe. Hidden among them.

Wang Yi's intention to break through immortality has a lot to do with this ancestral mystery.

However, there are many dangers in the depths of the Ancestral Mystery Realm, and the more treasured the land, the more dangerous it is. Even the Lord of the Universe may perish, and even the Lord of the Universe may be trapped.

Wang Yi wants to take risks and get what he needs is not so simple.

[Chapter 379: The huge auxiliary training effect in the land of inheritance](#)

"Before going to the land of inheritance, build a residence first." After exiting from the palace of the owner of Zijing Island, Wang Yi returned to the location pointed out by the Venerable Feicang clan before and began to build his own residence on Zijing Island.

"Ning!" Without much thought, Wang Yi quickly condensed a castle with the "power of the world" in his body. An ancient castle full of natural atmosphere and hidden in the years appeared, one kilometer long and one kilometer wide, full of strange flowers. In the grassy courtyard, there are paths winding by cobblestones, pool pavilions and rockery, which are magnificent, like an exquisite picture scroll, which is the Wang Family Castle in Yangzhou City of Wang Yi.

No changes are made, so the exterior and interior are almost identical.

The power of the world is condensed. It only takes a thought to quickly condense such a castle. In order to be strong, it consumes a lot of world power.

"Out!" Wang Yiyao pointed to the land by the lake in front of him.

boom! A huge square and square castle fell directly on that piece of land, located on the picturesque lake, blending with the surrounding environment in perfect harmony.

Wang Yi clapped his hands, walked in the quiet castle, thought for a while, waved again, and a group of figures appeared beside him.

"Master." They all salute respectfully, and each of them has a tyrannical aura. It is the many immortal kings that Wang Yi enslaved on the battlefield outside the territory.

Those who were called out were all humanoids that were more in line with their own aesthetic concepts.

"You can make the divine body smaller, it's about the same as mine," Wang Yi said, looking at the servants with huge divine bodies.

"Yes." Those servants immediately reduced the divine body, which was similar to ordinary people, but it was still easy to tell from the outside that it was not a human being.

Immortality can easily change the divine body, enlarge or shrink it, or even change its body shape, but it will affect its own strength.

Therefore, unless it is beneficial to the battle, they will not easily change the divine body.

But Wang Yi called these servants naturally to serve as servants of the castle, and they had nothing to do anyway.

Elizabeth and Natia, the mother emperors of the Zerg clan, were also summoned to serve as their own maids.

Everything was ready, Wang Yi looked at the lively castle and nodded in satisfaction. Next, he went to the place of inheritance to see it.

...

Wang Yi once again came to the square in front of the palace of the owner of Zijing Island, looked at the fountain that gave birth to spring water out of thin air, and walked into the fountain on the left. He disappeared as soon as he touched his body.

Immediately I felt a change in front of me, and felt a terrible pressure enveloped before I could see the surrounding scenery.

"Boom..." A terrifying repression came, much heavier than a neutron star on the body, and at the same time, the pressure of the soul came.

Wang Yi's expression remained unchanged, he looked around and saw clearly that there was a void around the void, and black mist surrounded the void.

There is a meteorite suspended in the void, and there are strong men wearing purple armor and wolf heads on the meteorite. It is one of the larger branches of the human race-the strong men in the werewolf race. The werewolf powerhouse was surprised when he saw Wang Yi, and then he smiled and said, "You are Wang Yi, I already know you will come."

"I have seen Venerable Jiufeng." Wang Yi saluted respectfully.

The Venerable Dove Wind in front of him is one of the seven-star overlords of the human race, and an existence comparable to the Palace Master of Eclipse.

According to legend, he has accepted the complete inheritance of the gods.

However, accepting the inheritance of the complete **** does not mean inheriting the position of the god, but this can also show the strength of Venerable Jiufeng.

Venerable Jiufeng sat on the meteorite and said with a smile: "You are now at the place where the Patriarchal Sect is inherited. Naturally, there is a strong pressure on the soul of the gods... if there is no king. I am afraid that strength will be lost directly. This is why the geniuses in the clan generally must become immortal to be granted inheritance orders. After all, those peerless geniuses who can be granted inheritance orders have achieved immortality, and none of them is lower than the king."

"The leader of the energy world came here at the pinnacle. You are the first of my human race." Venerable Jiufeng sighed, "I hope you will not let down the expectations of the race, work hard, and strive for an early breakthrough to immortality and venerable. "

"Yes." Wang Yi said solemnly. This was originally the purpose of his coming to the Ancestral Gods Church this time, but his ambitions were actually bigger than Venerable Jiufeng thought.

Venerable Jiufeng nodded, then pointed to the surroundings, "Did you see the black mist around you?"

In fact, Wang Yi also explored the void here. The void here is too weird. Neither the divine power nor the power of the world can be detected.

"Choose any direction, enter the black mist, and accept the inheritance." Venerable Jiufeng said.

Wang Yi bowed respectfully to Venerable Jiufeng, and then flew in one direction.

Venerable Jiufeng watched Wang Yi disappear into the black mist, smiled slightly, and closed his eyes again.

As soon as Wang Yi flew into the black mist, an incredible force acted on his whole body.

Even if Wang Yi's will has reached the level of the overlord of the universe and he is psychologically prepared, he cannot resist this mysterious force!

Wang Yi, who didn't resist, stood in the air stupidly, and at the same time stretched out the fingers of his right hand slightly.

"Sneez!" A world power emerged from Wang Yi's fingertips, quickly condensing into a rule secret pattern.

I saw a number of rules and secret patterns emerge. The entire "space, gold" fusion law started from the most basic, and Wang Yi started to demonstrate so uncontrollably, step by step from the foundation, to interpret all insights, and follow Later, more and more secret patterns of the law emerged, and the secret patterns of the law were entwined around them, forming a beautiful world of rules.

After the interpretation of "Space, Gold", Wang Yi paused slightly, and the power of the world emerged from his fingers again, and they condensed into the secret pattern of "Space, Wood".

After the deduction of the law of "space, wood", it is again "space, water".

Followed by "space, fire", "space, earth", "time, wind", "time, thunder", "time, light"...

Wang Yi's insights into the ways of the eight beasts and gods over the years have been fully displayed ~www.mtnovel.com~ and the deduction is unimpeded, even the places that have been troubled by him are depicted without stagnant deduction.

The void where Wang Yi was located immediately became a colorful, beautiful and dreamy place.

The eight principles of fusion are all explained!

At the same time, in the depths of the sea of the Law of the Tongtian Tower, thousands of kilometers long like a giant flaming star lying on the mainland, surrounded by countless flashes of fluorescence, like illusory and real secret patterns, all of them It was the secret pattern projected by the Tongtian Tower, but based on Wang Yi's law, he was still comprehending the secret pattern of the first layer.

Just when Wang Yi was controlled by the incredible power of the place where the ancestral gods were passed down and deduced the law of fusion, the Yanxing Giant Beast clone felt at the same time.

"Chichi..."

The power of the world is crisscrossed, and the secret patterns of the law are densely intertwined like a spider web. It is very mysterious. Looking at these secret patterns of the law, the Yanxing behemoth echoes each other and the secret patterns of the Tongtian Tower. Numerous auras and insights popped up in his mind like a spring, and he couldn't help letting out a roar of excitement.

He found a shortcut to accelerate his cultivation and comprehension...

[Chapter 380: The Pearl of Legacy](#)

After a long time, when Wang Yi finished his interpretation of the eight fusion laws one by one, he stopped, and the mysterious power instantly escaped from his body.

"Huh?" Wang Yi immediately regained consciousness.

Looking at the black mist around him, he was lost in thought. He still clearly remembered the scene just now, remembering that he was manipulated by invisible power and then he went to interpret the mysterious scene of the law of fusion with all his strength.

"Does that power have anything to do with the primitive universe?" Wang Yi asked inwardly.

The "place of inheritance" of the Patriarchal Sect may be the most important place of the Patriarchal Sect.

Apart from being related to the origin of the primitive universe, Wang Yi could not calculate other possibilities.

Just as Wang Yi was thinking, that mysterious power came again.

"The third level!" A mighty voice resounded directly into Wang Yi's mind. It was not about any Wenyu, but it made him instantly understand the meaning of 'third level', and the wonderful voice kept in his mind. Reverberating, these voices once again sank Wang Yi.

In a strange illusion.

In that illusion, the deeper mystery of the Way of the Beast God was continuously revealed to Wang Yi in the most careful manner, tearing up all the profound things of the Eight Principles of Fusion, as if explaining it inch by inch.

Too detailed! It is as if there is a super power who directly pours the mystery into his mind!

This is much better than watching the "52 Chaotic Monuments" and watching the "Sea of Laws" alone.

That mighty and mysterious voice rang in Wang Yi's mind eight times in succession. Wang Yi was also directly instilled in the principles of the eight kinds of beasts and gods. stone carving.

It took a long time before Wang Yi opened his eyes, with a hint of excitement in his eyes.

And as this mysterious power dissipated, the surrounding black fog also repelled him abruptly, causing him to fly backwards.

"The inheritance effect given to me by the mysterious power of this inheritance land, combined with the sea of Tongtian Tower law and secret patterns, feels much faster than practicing alone, I don't know how much." Wang Yi's heart was hot and hot.

It's like cultivating in Chaos City, and there are various conditions for blessing.

The chaotic stele, the law of the initial universe's operation is revealed, the many insights and portrayals left by the residence, various secrets and secrets...

And now Wang Yi is the same.

Inheritance assistance in the land of inheritance.

Observation and comprehension of the sea of law.

Guided practice by the secret pattern of Tongtian Tower.

The three add up to increase his perception of the law of fusion to an incredible level!

"The land of inheritance will never be let go..."

"If this is the case, then..." Wang Yi took a deep breath with a light in his eyes.

"Sign in!"

In case of indecision, sign in first!

[Ding, congratulations to the host for signing in successfully, and rewarding the "Pearl of Inheritance".
】

Wang Yi immediately sensed relevant information.

Raised his brows.

"The Pearl of Inheritance, can I receive a 10 times increase in the effect of inheritance in the land of inheritance?"

this...

That's so cool!

Although it is impossible to directly improve his strength, it is tantamount to indirectly increasing Wang Yi's perception efficiency by 10 times!

The only regret is that it can only be used in the land of inheritance, and the land of inheritance cannot be entered at will.

Venerable Jiufeng on the meteorite looked at Wang Yi who was repelled by the black mist and stood there stupidly, not surprising, and said, "Don't stand stupid."

Only then did Wang Yi wake up and look at Venerable Jiufeng.

Venerable Jiufeng smiled and said: "The place of inheritance is the natural birth of the universe. It is extremely mysterious, and it is also an absolute place for the ancestors of the gods."

"Every time you pass on, you will first watch your law perception progress. The Beast God inheritance is divided into seven levels. If you have a thorough understanding of the first two levels, and the third level has not, then the inheritance of the land of inheritance... is the third level. Inheritance. If you have a thorough understanding of the third level, the inheritance you accept is the fourth level."

Wang Yi nodded. He felt in the sea of Tongtian Pagoda laws that time was spent on the eight fusion laws, the creation of the ultimate mystery, and the final fusion of the ultimate mystery. In fact, if you only study one of the laws of fusion, you might have reached the first Fourfold... can only say that there are gains and losses.

but...

"In fact, I have almost thoroughly understood the third stage. This time I accept the inheritance, and I will be able to fully understand the third stage immediately!" Wang Yi's eyes flashed brightly, "Next time, it will be the fourth stage!"

Once he can enter the fourth level, it means he can break through to the venerable level!

However, Wang Yi is not even immortal now, and he has to follow the steps.

Venerable Jiufeng saw the joy on Wang Yi's face and smiled: "It seems that you have gained a lot this time...but don't be too proud of it too early, thinking that every succession effect is so good, but it is not at all."

Wang Yi nodded when he heard the reminder from Venerable Jiufeng. He also understood in his heart that this was very similar to the chaos monument. It was usually hard to cultivate and had many doubts, and the effect was excellent when he went to watch it. And this "Inheritance of the Beast God" only increased the effect of the Chaos Stele by tens of thousands of times! But it still requires cultivators to cultivate and comprehend assiduously.

"But Venerable Jiufeng didn't even know that I have the Sea of Law and the Tower of Tongtian, which can quickly accumulate in this respect." Wang Yi secretly said in his heart.

Discovering the role of the place of inheritance made him feel good.

At this time, Venerable Jiufeng said: "The inheritance of the beast **** is divided into seven levels, and you have a free enlightenment opportunity for each level."

"If you have understood the third level, then you can receive the fourth transmission for free. When you have fully mastered the fourth level, you can receive the fifth transmission for free...If you continue like this, the reason is very simple."

"The free opportunity is only one time."

"In other words, you want to accept the third inheritance for free, unless you understand the third inheritance." Venerable Jiufeng looked at Wang Yi.

"However, there is still a chance to receive the inheritance for free on the basis of accepting the inheritance for free. That is to go to the 'Glory World'."

"For things about the glorious world, and you can know it when you enter." Venerable Jiufeng did not say much, but advised Wang Yi to be careful, and told many things that need to be paid attention to in the secret realm of the ancestral gods.

1. Killing is forbidden within the colorful Aurora Lake area, you can compete with each other, but if you want to kill the opponent, you will be attacked by the colorful Aurora Lake! Of course, no one will care if you leave the range of Wucai Aurora Lake.

Second, every inheritor on Bauhinia Island has a palace mansion. The palace is the inheritor's own territory, and other strong people are forbidden to break into it.

For the same reason, they are also prohibited from breaking into the residences of other strong men. Unless the owner leads or agrees.

After telling Wang Yi about this common sense, Venerable Jiufeng said: "You can go now, the space passageway is behind you."

Behind Wang Yi, there was an area of transparent ripples in the void. Wang Yi bowed respectfully to Venerable Jiufeng, then turned and flew into the passage, disappeared from the heritage site in a blink of an eye, and was teleported away.

Venerable Jiufeng looked at the place where Wang Yi had left, and muttered, "The most talented junior of my clan, I don't know if he can rise to the ancestors' religion." He shook his head, closed his eyes again, and the void returned to calm again. , Until the next inheritor is ushered in.
