

A God 391

Chapter 391: 9The Sea of Secluded

The core materials of the Primordial Treasure are divided into low, high, top... and all the laws in the legend are inclusive.

The "heart of space" (the other is the heart of time), which is the most precious material of the higher origin, should be able to allow the clones of the void zerg to evolve the possibility of "domains".

And the original treasure core material that contains all the laws in the legend... Wang Yi can't even imagine what it is, whether the primitive universe has ever appeared.

"I will follow the path of fusion of the Ten Principles in the future, or this legendary and highest source material will be of great help to me."

Wang Yi shook his head.

This kind of extremely rare treasure can never be found, and who knows where it is.

In the end, Wang Yi still did not encounter the space vortex like Luo Feng, and then went into the place where there was "the most precious material of the origin of space".

After all, the Ancestral Mystery Realm is too big, it is a miracle to try your luck without knowing the specific location.

Luo Feng's kind is completely the son of destiny, even if you go out, you can bump into the kind of adventure, Wang Yi don't expect it.

It is better to carry out your plan honestly.

Wang Yi separated a part of his consciousness to fight in the Glory World, while advancing in the core area of the Ancestral Mystery Realm, while the Yanxing Giant Beast cloned in the Tongtian Tower to enlighten the law.

More than ten days later.

Wang Yi's figure appeared in the void, looking at the distant time and space.

"Jiuyou Time and Space."

In the dim space in the distance, the sea is surging. At least from the outside world, Jiuyou Time and Space is like an endless water world.

"Who would want to know that this Jiuyou time and space, which is only 12 light-years in diameter, is the body of the Lord of the Universe." Wang Yi shook his head and sighed.

The real master of Jiuyou Time and Space is called the 'Lord of Jiuyou'.

The entire Jiuyou Time and Space is the territory of the Lord of Jiuyou.

Regardless of whether it is the strongest world tree or the masters of other universes, as long as they are in the time and space of Jiuyou, they are all under the master of Jiuyou.

The Lord of Jiuyou is invincible in this time and space of Jiuyou. Why? It's because the Sea of Nine Nethers is his body!

Once the divine body is burned, how terrible is it? Even if the Lord of the universe is here, he can easily be killed by him.

Wang Yi teleported several times and then flew billions of kilometers to arrive at a safe place known as "Desolate Rock Island" in Jiuyou Time and Space. Then he flew for hundreds of millions of kilometers, and there was an obsessive appearance in the distance. View.

"Here." Wang Yi stood on the highest peak of the deserted stone island. Looking into the distance, beyond this island... there is an endless ocean. The end of the ocean cannot be seen at first glance. At first glance, it looks blue and follows But it turned purple, then blood red, and then became transparent like crystal, and then turned into golden yellow, silver white, dark gray, azure blue... the color was constantly changing, and it was magical.

This is the Sea of Jiuyou.

Jiuyou Time and Space is mainly an endless ocean. There are many large or small islands on the ocean, and some aborigines live on them. For example, some islands are inhabited by some terrible existences, such as the "world tree". On an island, that island is also extremely large, and was named "Tree Island" by the inheritors.

The deserted stone island is extremely small, and it is the most common island among the thousand islands on the sea of Jiuyou.

Tree Island, but much larger, is one of the top ten super large islands in the Sea of Nine Serenities.

The sea of Nine Serenities, vast and endless, is also a potential crisis.

In addition to those super islands, the Sea of Nine Nethers is also very scary, especially the Nine Nether Vortex. According to legend, once caught in the Nine Nether Vortex, there is almost no hope of survival.

"The tree island is just ahead." Wang Yi stared at the huge island with both eyes, and said inwardly.

Whoosh, Wang Yi in a red robe next to him appeared out of thin air, it was his human deity.

"Sign in."

[Ding, congratulations to the host for signing in successfully, and reward "Nine Nether Blood Sea Water" (Master Level).]

Wang Yi was startled, feeling the message on the panel, and then smiled.

"It's so easy to get it."

The inside of the Sea of Nine Nethers is the Nine Nether World, and there are 108 imperial seas in the center of the entire Nine Nether World.

These 108 Emperor Seas are actually 108 children of the Lord of the Nine Nethers, conceived and born in him.

It's just that these princes are strong and weak. Among them, there are three Universe Venerables, 56 Immortal Class, and 49 Realm Master Class.

If you want to breed a clone, you can only use the water of the world master-level blood sea. Immortality is useless.

Wang Yi didn't expect that he was so lucky. When he first came to the Sea of Nine Nethers, he immediately got the water of the world master-class blood sea, completing the biggest goal of his trip.

"When the water of the sea of blood arrives, then I can give birth to the third clone." Wang Yi was a little excited.

The success of the third clone not only means that he will have an extra powerful body, but also that he can immediately break through to immortality!

Once immortal, strength soars, more means, and life span will no longer be limited.

Just like the time acceleration training space inside the "Time World" and "Tongtian Tower" can also be used. Of course, the stronger the strength, the higher the cost of accelerating time training.

"Since the water of the sea of blood is obtained, there is no need to go to the Nine Nether World. The next step is to copy the time and space talent of the World Tree."

Wang Yi calmed down, and immediately followed the Void Zerg clone and started teleporting. Soon, he took the human body across the Sea of Nine Serenities and reached the edge of the tree island.

"Sign in."

[Ding, congratulations to the host for signing in successfully, and rewarding life branches.]

The sacred tree formed by "world branches" is called the tree of life.

The branch of life was just one of the branches that grew out of the branches of the world, and it was considered a treasure to the world master, and it quickly recovered the world master's physical injuries, but it was useless to Wang Yi.

But Wang Yi was not disappointed either, raising his head and looking at it.

The endless huge tree island is full of various plants, it is a sacred place for plants, all kinds of flowers, trees and plants are everywhere, full of endless vitality, quiet and beautiful, but there are no other creatures.

The most dazzling thing is the big tree that soars into the sky~www.mtlnovel.com~ The big tree is the tallest, showing emerald color, the crown is like a canopy, and every leaf is crystal clear like a spar carving, Like emerald green, the endless breath of life is contained in it, making countless flowers and plants around it sway.

The strongest world tree, the special life of the universe venerable class with the main power of the universe!

Although it is in the depths of the tree island, it is too large, with a height of 590 million kilometers, a crown diameter of over 1 billion kilometers, and the trunk is like a huge emerald, faintly emitting light, so it is very eye-catching. Even here, it can be seen with Wang Yi's eyesight.

But the nine world trees are obviously different in height and volume.

Obviously the strongest world tree is the one with the highest level of life. It is rumored that it should be thousands of times as many as human genes, and belongs to the highest level of special life in the universe.

The three immortal world trees are slightly worse.

The five world-class world trees are even worse.

"According to the plan, there should be no problem." Wang Yi stared for a while, retracted his gaze to hide the human body, and then appeared at the edge of the canopy of the strongest world tree in a teleportation, without any concealment.

Chapter 392: World Tree. Master Time and Space

"Human Wang Yi, pay homage to Lord World Tree." Wang Yi said immediately after Teleport appeared.

The strongest world tree naturally exists in the center, and the other eight world trees surround the surroundings. The nine world trees alone occupy about a quarter of the entire island.

"Om..." The nine emerald-like world trees exuded bursts of green light, forming layers of apertures, and all foreign objects could not pass through this aperture.

The strongest world tree possesses the natural ability to master time and space. As soon as Wang Yi appeared teleported, it noticed it.

"boom!"

One side of time and space was controlled by a certain will, and endless coercion enveloped him. Wang Yi felt the surrounding space fluctuations, the time fluctuations had disappeared, and a powerful consciousness bet it over.

As he thought, World Tree discovered his existence.

However, Wang Yi felt that as the strongest world tree was comparable to the Lord of the Universe, as long as he was not out of line with his words and deeds, he should not cause death.

"Human? No, you are a special life, you have been taken away by humans?" A gentle voice resounded through the territory occupied by the entire World Tree. With the strength of the strongest world tree and mastering the time and space of one side, it is completely possible to see through the disguise of the clone of the Void Zerg in an instant.

What's more, Wang Yi didn't plan to hide anything in front of the World Tree.

With a smile on his face, he respectfully said, "I have already heard of Lord World Tree's reputation. I came this time to exchange the treasure and Lord World Tree for a branch..."

"Oh?" The branches and leaves on the huge canopy of the strongest world tree swayed gently, letting out a surprise.

He has seen a lot of foreigners who sneaked to Tree Island for a long time, most of them are alien inheritors who want to steal the branches of the world, and the little bit of the talented world master in front of him is so bold that he dares to come and show himself in front of him, the strongest The World Tree also has some curiosity.

At this time, seeing that the strongest world tree didn't mean to do anything, and looked very gentle, Wang Yi also breathed a sigh of relief in his heart. While taking out a piece of heavy treasure grade material, he activated a copy card, and said, " Master World Tree, I want to exchange this "Mihua Star Crystal" with you..."

[Do you use the talent secret copy card? 】

"Yes."

【Select the nearest target. 】

Wang Yi chose the strongest world tree. Fortunately, this copy card has a wide range of choices, and because he is close to the edge of the world tree, there is no problem in choosing it.

[The target has been selected, and the detection success rate is started...]

[The test is successful! Goal [Venerable World Tree], talent "Master Time and Space", copy success rate 39.1%, do you want to copy? 】

"Yes." Wang Yi said without hesitation, feeling a little excited, the success rate was much higher than he thought.

[Start copying...]

It's just the next second.

【Ding! 】

A clear reminder sound made Wang Yixin jump with it, and became nervous.

There is only one copy of this card, and there is only one chance to use it. The failure is really gone.

【Successfully copy, you can get the "Mastering Time and Space" talent secret after using it. 】

A reminder sounded in Wang Yi's mind like a sound of nature.

At this time, the strongest World Tree also rejected Wang Yi's exchange request. Of course, for the sake of his innocence and very respectful manners, he did not kill him, but expelled him.

The strongest world tree is also a member of the ancestral gods. If the inheritors do not offend them, in fact, they will not take the initiative to kill them under normal circumstances.

The reason why Luo Feng is so complicated and thrilling is actually because Luo Feng is not clear about the background of the World Tree and because he actively hurt the World Tree.

"call!"

The avatar of the Void Zerg Clan appeared in the void on the edge of the tree island, with a smile on his face.

I was a little excited.

"The secret of the talent of the World Tree is obtained, and then use the copy card to copy this talent to yourself, and you will have the ability to "master time and space". "

What a terrifying ability to master time and space, I don't know how many aliens in the universe dream of it.

That is to say, the world tree, the top level of special plant life, can have such a talent that is against the sky.

Like the "Destroying Giant Beasts" of the twelve pinnacle bloodlines of the Star Giant Beasts, that is, the talent of time...time is still.

Compared with the World Tree, it is far behind.

Converging with the human body, Wang Yi glanced around.

"The water of the sea of blood has arrived, and the talent of the world tree has been obtained, it is time to leave..."

"Break through immortality!"

Wang Yi's eyes shone brightly.

"Wow!" Wang Yi waved his hand, and an immortal servant that he carried with the world immediately appeared beside him.

"Master." It said respectfully.

"Return to human territory." Wang Yi said.

Breaking through immortality, he doesn't want to teach in the ancestral gods, then other foreign races will know that he is not immortal, but the master of the world, and Wang Yi's identity will be exposed.

At this time, it is not necessary.

In the human domain, it is safe to find a hidden place to break through without being noticed by anyone.

"Next time I come back, I will be the real Hunter King..." A terrible smile appeared on Wang Yi's face.

"Yes, Master." The alien with two pairs of colorful butterfly wings and a beautiful face immediately activated the Kingdom of God Teleport. With the opening of the Teleport Channel of the Kingdom of God, the misty blue light like the sea immediately permeated the surrounding area, and waited for the light to disappear. Wang Yi and others were also lost where they were.

...

The remote human territory, the dry witch universe, somewhere in a desolate and remote star field, inside the core of a hot burning star.

"Wow!" The light lit up, and Wang Yi appeared from it.

When he returned to Earth, he secretly left many divine power tokens in various parts of the Qianwu universe to facilitate his actions, and he immediately came in handy at this time.

"Unexpectedly, I will be back in less than a year." Wang Yi looked around. The surroundings were quiet and deserted without any abnormalities. He nodded with satisfaction. When he chose the coordinate location, he specifically chose not to be discovered. Where there are hidden divine tokens, such as the interior of a star, how many stars are there in the vast sky? No one will find out.

Wang Yi teleported to a desolate desert planet hundreds of millions of kilometers away, and landed directly on the highest mountain.

"Use the copy card first."

Wang Yi had an extra silver-white card that looked like a translucent crystal card.

With a movement of the mind, the card shined brightly, then turned into a little starlight and dissipated.

In the next moment, on the special pronucleus where Wang Yi's clone was born~www.mtlnovel.com~ a mysterious and incomparable secret pattern was born out of thin air. At the same time as the formation of the secret pattern, a message poured into Wang Yi's In consciousness.

Just like instinct, Wang Yi immediately mastered the ability to use the "Secret Technique of Talent".

However, mastering does not mean understanding. He does not understand the principle of time and space at all, but the ability brought by the secret method of talent.

"However, it's enough." Wang Yi smiled slightly, mastering time and space is very weak in the immortal stage, but as he himself continues to grow stronger, his ability to control time and space continues to increase.

The strongest world lining of the Universe Venerable Level, the ability to master time and space is no less than the Lord of the Universe.

Wang Yi didn't think he would be inferior to the world tree when he arrived.

Moreover, what is even more frightening is that because it is the secret of talent possessed by the pronucleus that breeds the clone, the other three clones also automatically master this secret of talent, which is equivalent to the other clones having an extra talent ability to master time and space.

Wang Yi is full of expectations.

"Next, it's the third clone."

Chapter 393: Clone 3

Wang Yi's clone of the Void Zerg returned to the mysterious realm of the ancestors, while the human body remained in the human domain.

In the body world integrated with the special pronucleus.

Wang Yi entered here with "Blood Sea and Sea Water".

Standing in the air, looking in front of him, he saw a large basin of blood tumbling in suspension, bursting with blood.

"Innate secret method clone! Breed!" Wang Yi's will controls the entire body world.

With Wang Yi's control, the entire body world was throbbing and trembling. The endless world power rushed to the blood sea and sea water at the core of the whole world. The blood sea and sea water instantly dissipated like mist, leaving only the most basic ones. A little bit of life matter is wrapped in the power of the endless world.

A red sphere appeared high in the sky.

The birth clone has been activated. Wang Yi's consciousness senses everything all the time, just for a moment.

"Success, all life matter has been resolved and the real gestation has begun." Wang Yi's consciousness quickly sensed this.

All living substances in the sphere have been resolved and are beginning to be truly gestated.

"It's done." Wang Yi couldn't help showing a smile on his calm face.

After so long, the third clone was finally gestated.

Compared with the Void Zerg Clone, the Yanxing Giant Beast Clone, in fact, Wang Yi had the highest expectations for the "Nether Sea Clone".

"My third clone is destined to be the Nine Nether clones of the Sea of Blood. In the future, I will have an endless source of divine power. Even if I perish, I can be born again."

"Furthermore, the creation of the innate secret method can help me analyze the essence of life and improve the level of the divine body."

As the birth of the clone began, Wang Yi's consciousness also sensed that it would take more than 60 years to breed the third clone!

The stronger the internal world, the easier it is to breed.

The stronger the conceived life, the longer the conceived time.

However, the pronucleus of Wang Yi's clone is quite special. Regardless of life, the incubation time is much shorter than that of the golden horn behemoth's pronucleus.

Wang Yi remembers that the golden horn beast used over 600 to breed the third clone, but it only took more than 60 years to breed himself.

"But..." Wang Yi smiled slightly. "I have the time realm, and I put the pronucleus in the time realm to accelerate, but it doesn't take that long."

The fastest time flow in the time world is 10,000 times, which means that it only takes less than three days for the pronucleus to be bred in the time world.

Wang Yi put the pronucleus that gave birth to the clone into the world of time, and then waited for less than three days.

...

Time Realm, the Void Continent.

There is an extremely huge oval red egg suspended in the sky. This oval red egg was small when it was just conceived, but as it was conceived, it became larger and larger, and is now tens of thousands of kilometers high.

Standing on a mountain, Wang Yi's human body raised his head and stared at the giant egg.

"Soon!"

"It's almost conceived!"

Time passed, suddenly.

"Ka Ka Ka..." The huge oval red egg that was tens of thousands of kilometers high gradually showed a trace of cracks.

"Here." Wang Yi narrowed his eyes and looked forward to it.

The egg shell continued to shatter, and with the last slap, the egg shell was completely shattered, and a giant nearly 10,000 kilometers tall stood in the air.

This is a perfect body shape standing naked, nearly 10,000 kilometers high, with white skin and crystal clear skin, like a jade carving, but with a faint **** thread lurking, adding a sense of demon.

Youhai clone, conceived!

"Sure enough, it is a flesh and blood life... and the genetic level is 300 times." Wang Yi muttered after sensing it.

"The Secret Book of Nine Tribulations" must be flesh and blood beings in order to cultivate, and Youhai clone is flesh and blood beings, so it can naturally be cultivated.

But only 300 times the level of life genes, but it has such a large volume.

Generally speaking, the level of life genes is super high, and the size is also super large.

But it also depends on the species. Humans are limited in their natural body shapes, and special life like plants and rocks are still scary even if they are hundreds of times the level of their genes.

Wang Yi began to sense himself carefully, and soon felt that the bones, muscles, blood vessels, blood, etc. of his huge body were faintly aura of laws, containing a trace of information. His consciousness absorbed these messages.

The information contained in this huge body also made Wang Yi fully understand some of the mysteries of that Youhai clone.

Youhai clone has two secrets of talent: one, transforms the sea. Second, create.

Among them, the first innate secret method, "Huahai", refers to the secluded sea clone that can instantly transform into an ocean with a diameter of about 100,000 kilometers. The time and space around the ocean will be controlled by the "ocean". This control is accompanied by the "secluded sea". The strength of the clone keeps increasing and becomes more exaggerated. When the strength is weak, the impact on time and space is still small, but when the strength is strong... like the Lord of the Nine Nethers, his "Nine Nether Seas" has reached the limit of the surrounding time and space. No other master of the universe dared to break into that "Nine Serenity Time and Space".

The second kind of talent secret method "creation", while transforming the sea, the whole body is completely turned into a sea of blood. With this "creation" talent, energy can be extracted, life genes can be combined, and life can be finally condensed. If you use it well, you can use this method to create an ethnic group. Since this ethnic group is created, it will always surrender and admire the master who created them.

"Youhai clone's transforming sea can also affect time and space, and it is considered a good time and space talent, but it seems to be worse than the world tree itself." Wang Yi secretly said, it seems that it overlaps with the world tree's mastering time and space talent, but he doesn't feel it a pity. , After all, mastering time and space is what he must get, and once copied, all clones can be owned, which is the most important.

Not to mention, the secluded sea must be transformed into an endless ocean to affect time and space, while the world tree does not. This is the essential difference.

One is incidental, the other is the main body, and the power is also different.

Youhai has many uses.

You can transform the sea first, and then rely on the 'creation' talent to create an energy clone, and the consciousness is mostly concentrated on the energy split.

The secret method of talent "creation" is to first see the life composition of other species, and then copy this life composition through the secret method of talent to form a new life. Copying other life formations should be the most basic stage, and an advanced master like the Nine Nether Lords can create a powerful ethnic group.

Wang Yi sighed softly, "Creation!"

The sea of blood was surging, and a naked body 1,000 kilometers high appeared in the sea of blood.

The life gene level of Youhai clone is 300 times, and the new Youhai clone created by this 'created' has only 30 times the life gene level.

Wang Yi's consciousness, who was completely fused with the sea of blood, suddenly felt that the entire sea of blood was naturally absorbing energy, apparently creating a "new secluded sea clone", which

consumed nearly 10% of the energy, even the volume of the sea of blood was a little smaller. At this moment, the sea of blood is automatically absorbed and restored.

When the sea of blood is intact, it cannot absorb energy. But after the loss, it can absorb energy to recover.

"This is the secret of the infinite expansion of the sea of blood." Wang Yi smiled.

"Energy supplement!"

"boom!"

In the body world, the turbulent world power quickly poured into the sea of blood. In just a moment, the sea of blood absorbed enough, restored to its previous size, and no longer absorbed the power of the world.

"Dissolve!"

The new Youhai clone fell into the blood sea again~www.mtlnovel.com~ At the same time, the whole ablation, the blood sea water formed after the ablation, merged into the blood sea at this moment... the two seas merged, and the volume suddenly increased! The sea of blood, which was originally 100,000 kilometers in diameter, suddenly expanded a little further towards the surrounding area, causing the surrounding space to be oppressed.

"Create a new Youhai clone, and then let the blood sea recover, let the new Youhai clone melt into sea water, and merge with the blood sea! It will continue to grow bigger." Wang Yi watched this scene, "but choose to expand the blood sea. Road, you can't move the sea of blood, you can only condense the action of the clone. Although the combat power will be affected, it does not matter if the clone falls. It can be condensed immediately... and with such a huge divine body, it is completely immortal and worthwhile. ."

The Sea of Nine Nethers has expanded to more than ten light-years in diameter. The Sea of Nine Nethers alone can rival the most powerful treasure of the universe. The only pity is that it cannot move.

"Don't worry about the expansion of the Sea of Nine Nethers, let the Sea of Nine Nethers practice the Nine Tribulations, but it's only the fourth calamity. Even if the cultivation is successful, the genetic level will be only 7,200 times." Wang Yi shook his head and arranged the clone of the Nine Nethers Sea. The cultivation in the human form is gone, but there is a time realm, and the cultivation is naturally very fast, and it only takes three hundred years in the time realm.

"Now, it's time to go to another thing." Wang Yi thought for a while.

Chapter 394: Prepare

Since it was decided to let You Hai clone into the sea, Wang Yi would not hesitate.

After practicing the fourth calamity in Youhai clone.

Through the channels of the Virtual Universe Company, a large number of cosmic crystals are continuously sent from the outside into the time world, causing the sea of blood to expand rapidly again and again.

However, the time world seems to be vast and has its limits. Wang Yi estimates that the specific size of the time world is about tens of billions of kilometers in diameter.

And the blood sea that is too huge can no longer be put into the time world.

"Rumble... Wow..."

The waves are turbulent, the blood waves are overwhelming, and the entire world of the time world has become a world of blood.

The land with a scale of one billion kilometers in diameter is also completely covered by a sea of blood, and the void beyond the land is also a sea of blood.

"Ten billion kilometers, it's the limit..." Wang Yi was not surprised either.

The world master level Youhai clone has limits, not unlimited expansion.

"Ten billion kilometers in the sea of blood is okay for me at the moment, but Youhai clone has not reached ten thousand times the genetic level, which is a pity," Wang Yi said in his heart. "It seems that we have to get the remaining few calamities as soon as possible."

The blood sea of the princes of the world masters in Jiuyou Time and Space is only 80 million kilometers in diameter, and the sea of immortal princes is 960 million kilometers, while the Venerable Class is 32 billion to 101 billion kilometers.

Because of the huge gap in the level of life. That makes Wang Yi's blood sea so big.

Standing on a peak in the endless sea of blood, Wang Yi looked down at everything, full of pride in his heart.

"The sea of blood is complete!"

"However, it is not perfect, and there are other preparations to be done next."

Wang Yi thought for a while, connected his consciousness to the virtual universe, and went to visit the Lord of Chaos City.

At the highest point of Thunder Island, where the chaotic air currents haunted the palace, the Chaos City Lord walked out with the appearance of a majestic middle-aged man in golden armor.

"Wang Yi, what's the matter when you came to see me this time?" The City Lord of Chaos looked at Wang Yi with some doubts in his heart.

Wasn't Wang Yi busy fighting with the genius inheritors of the cosmos? How could there be time to come over to him?

"Wang Yi came here this time because there are two things he wants to trouble the City Lord Chaos." Wang Yi said respectfully.

"Oh, tell me." City Lord Chaos looked solemn.

Wang Yi is now the most optimistic peerless genius at the top of the human race, including the Chaos City Lord, and his request will naturally not be ignored.

Wang Yi continued to respectfully say: "Wang Yi wants to ask for a high-level source material, "The Heart of Space", and is willing to exchange it with a sufficient price."

"The heart of space?" City Lord Chaos was a little surprised.

He took a deep look at Wang Yi, knowing that there are many secrets in him. If Wang Yi is willing, he will take the initiative to tell him, if he is not willing to say that Chaos City Lord will not follow up.

"The Heart of Space is extremely rare, and its value is more precious than an ordinary treasure. Are you sure you can pay a sufficient price?" Chaos City Lord asked.

When Wang Yi heard the words of Chaos City Lord, he knew that the human race does have a "heart of space". He was so happy that he said, "As long as it is the heart of space, then I can pay enough." He signed in those years at the Star Tower. Many of the materials, although most of them are not as good as the high-level original treasure materials, but they add up to a very considerable amount.

Wang Yi is confident that he can exchange for a "heart of space" with only a part of it.

The Lord of Chaos City didn't ask what price Wang Yi could pay, and he groaned, "The heart of space is in Chaos City. If you want, you can go back to Chaos City to exchange it for yourself. I will arrange it for you."

"Yes, thank you City Lord." Wang Yi said gratefully, and City Lord Chaos did help him a lot.

It is a pity that his teacher, Pang Bo, is in full retreat, and the clone is not connected to the virtual universe, otherwise this kind of trivial matter will not often trouble the Chaos City Lord.

"This time I go to Chaos City, maybe I can also go to the Chaos Ruins to meet the Chaos City Lord and sign in." Wang Yi secretly said in his heart.

The Lord of Chaos City nodded, "You can go to Chaos City and donate treasures to the race. All the treasures are in special locations in Chaos City. The virtual universe system will carefully check and determine the value and give the contribution value. With the contribution value, you can redeem you. What I want includes the heart of space."

"This is one thing? Is there another thing?" Chaos City Lord said.

"Wang Yi wants to go to the Chaos Ruins to meet the city lord in person." Wang Yi hesitated and said.

"Oh?" City Lord Chaos glanced at Wang Yi. "Is there anything I can't say here?"

Wang Yi was a little embarrassed: "Wang Yi wants to ask the city lord for advice in person about some rules and perceptions. I don't know if it's okay."

The Chaos City Lord chuckled, "Well, some things are really not easy to display in the virtual universe. If you want to come, then come over."

After Wang Yi and the Lord of Chaos chatted a few more words, the Lord of Chaos also asked about Wang Yi's recent situation. He knew that Wang Yi would soon break through immortality, and he also had some expectations in his heart.

...

On the same day, Wang Yi arrived at the base camp of the Virtual Universe Company through the Kingdom of God, and then took a spaceship to the Chaos City through the "cosmic channel".

The original universe, Chaos City.

"I am back."

Wang Yi, in a dark red armor, flew out of the spaceship with the crowd, feeling a little bit emotional.

After more than ten thousand years, he came back here again.

"According to the words of Chaos City Lord, first go to the special place where the treasure is exchanged."

Arriving in Chaos City, Wang Yi came to the City Lord's Mansion.

The location of offering treasures... is in an ancient side hall in the City Lord's Mansion of the Original Universe. To offer treasures, you must apply for it in the virtual universe in advance, because the ancient side hall is always closed. Only after the application...then once you arrive there, the Piandian will automatically open.

Wang Yi walked to the side hall.

"Boom..." The ancient palace door slowly opened, and the bronze door, which was about a hundred meters wide, opened completely.

As he stepped inside. "Boom..." The gate of the palace closed again.

"This is the place where the treasures of the ethnic group are offered." Wang Yi looked at the entire side hall. The side hall was very wide. Only a huge stone disk with a diameter of about 100 meters was placed in the center. Just put the treasure in the stone disk. , The virtual universe system can perform a detailed inspection of the treasure through the stone disk.

"Sign in first?" Wang Yi said inwardly.

"Sign in!"

[Ding, congratulations to the host for signing in successfully, and rewarding the treasure "Lanxi Demon Axis".]

"Huh?" Wang Yi consciously checked the treasure he had just signed in.

It was a quaint gray scroll, forged from unknown materials. Once unfolded, it could cover a vast light-year area. It was powerful, and it was a treasure of seals.

Although it seems to be only a common level treasure, its value can be comparable to the high-level armor-type treasure or the top-level weapon-type treasure. U U Reading www.uukanshu.com

This can be regarded as one of the top ten treasures of Wang Yi's sign-in rewards over the years.

"I got a seal-like treasure as soon as I came. Good luck." Wang Yi smiled.

Not all treasures are useful to him, this Lanxi Demon Axis is not bad for him.

"Next, I will offer material treasures, exchange contribution points, and then exchange for what I want." Wang Yi is ready to break through immortality. Of course, the more treasures he has on his body, the better. He doesn't even have the most treasured weapons in his body. And he has four bodies now.

A space ring appeared in Wang Yi's hand, and then stepped forward, at the same time removing his own life mark from the space ring, and placed the space ring on the stone plate.

This spatial ring was filled with a large amount of unnecessary treasures and materials he had harvested over the years, of course, most of them were obtained from the Star Tower.

Hum...

A series of cyan silk threads leaped up from the stone plate, enveloped the entire space ring, and spread in, and began to examine the treasure materials in the entire space ring in detail.

Chapter 395: Appraisal

Wang Yi watched this scene quietly. The identification here was carefully checked by the virtual universe system to determine the value.

In terms of judging value, no one is as good as a virtual universe system.

And let the virtual universe system make the judgment, it is also absolutely fair, because this is a perfectly executed intelligent system, there is no need to worry about personal emotions and selfish interests in it. All the strong are convinced.

Wang Yi is also not worried that his treasures and materials will be greedy. Of course, the virtual universe system may take advantage of some aspects, but overall, it is still very fair.

Suddenly a voice rang in the side hall.

"There are 3691 pieces of heavy-treasure-level materials and 213 pieces of supreme-level materials. Dedicating them to the ethnic group can get 9.8 treasure points. Wang Yi, are you willing to dedicate this treasure to the ethnic group?" The voice was gentle and refreshing.

"So low?" Wang Yi frowned. Although he didn't offer all the materials on his body, he still had the vast majority.

In fact, the 9.8 Supreme Treasure Point is no longer low, but now Wang Yi has too many powerful treasures, and his vision is higher, and he has a little indifferent to this number.

"It seems that I have to go back to the treasures of the ancestral gods to see if I can get any treasures." Wang Yi thought to himself.

"Wang Yi, are you willing to dedicate this treasure to the ethnic group?" The voice sounded again.

"Of course." Wang Yi said with a stretched brow.

Ka...The center of the stone plate cracked sharply, moving to the sides, and the spatial ring fell directly and slowly under invisible manipulation. Immediately after the stone pan, he reunited, returning to the original state.

"This is a detailed form for the exchange of precious treasures of the human race." The gentle voice continued, and at the same time, a dimly huge gray form suddenly appeared in the midair of the entire Partial Hall, and there were four huge categories on the form— Treasures, Heavy Treasures, Materials, Special Resources...

Wang Yi looked up at the huge gray form in mid-air.

I began to study the treasures of the human race carefully. The four seemingly simple categories are shocking after careful study... This form probably lists all the core wealth of the entire human race!

Of course, Wang Yi has no way to watch many of these aspects at present.

For example, the treasure category is divided into five categories: "ordinary treasure," "higher treasure," "top treasure," "peak treasure," and "Xeon treasure,".

He can only watch ordinary and high treasures now. As for the top treasure, the pinnacle treasure, the strongest treasure... they are not qualified to watch it at all.

"Xeon Supreme..." Wang Yi paused at Xeon Supreme, and shook his head. "Humans may have had them before, but they definitely don't have them now. Otherwise, the giant axe won't be able to fight others shirtlessly, just for an axe. He also lost his life in the universe."

"Don't talk about the Xeons, I'm afraid there are very few peaks."

Wang Yi now has the unexplained Tongtian Pagoda, the domain category Xeon Arcana "Colorful Aurora Lake", and two peak Arcanas. The value of one Xeon Arcana may be close to or even more than the wealth of the entire human race.

Regarding contribution points, there are two levels.

Dedicated to the treasures of the ethnic group, the ethnic group will bestow the "treasure point" or the "treasure point".

In general, the most common piece of treasure, dedicated to the ethnic group, will receive 0.5-1.5 treasure points, of course some special treasures, even suit treasures and even "domain treasures", "flying palace treasures" and "soul treasures" whose value is comparable to ordinary treasures. "Then the price will be higher.

As for the treasure, a most common treasure is dedicated to the race, and you will get about 1 treasure point.

However, the exchange between the treasure points and the treasure points has been constantly changing. Generally, 1 treasure point can be exchanged for 3000 treasure points-4000 treasure points, and there is always a fluctuation. The current situation is that 1 treasure point can be exchanged for 3220 treasure points.

Just like the materials mentioned by Wang Yi just now, it's okay to say that the precious treasure-level materials, otherwise 10,000 pieces are not worth a treasure point. His contribution value mainly comes from the 213 treasure materials, of which there are more precious materials that can be exchanged for more. A little bit of treasure.

Hundreds and thousands of heavy treasures can be exchanged for an ordinary treasure.

"Materials." After watching for a while, Wang Yi still remembered his goal this time and said.

Wow! Form changes have resulted in a large number of complex resource exchanges.

And Wang Yi looked at the dense list and said again: "The Heart of Space."

"Wow!"

Only one material appeared this time, and Wang Yi couldn't help frowning while looking at the exchange price.

"Ten Treasure Points?"

The value of this high-level primordial treasure material is already comparable to the 10 most common primordial treasures.

Originally, Wang Yi wanted to redeem some other things this time, but now he can only redeem the "Heart of Space" first.

For the strong, there are no more treasures, but fine!

Wang Yi took a deep breath and took out a space ring again. This time the appraisal result came out, and it could be exchanged for 0.6 treasure point.

Add up to 10.4 treasure point.

"You can exchange the heart of space." Wang Yi smiled.

"The heart of space needs 10 treasure points in exchange, Wang Yi, do you want to exchange it?"

"In exchange!" Wang Yi did not hesitate.

"Boom..." The stone plate cracked slowly, and the rate of cracking was very slow, until it revealed a channel leading to the bottomless abyss, followed by a treasure slowly flying up, it is a strange with 10081 section. Spherical crystals, part of its surface area sometimes flows like water, sometimes seems to have a transparent flame rising~www.mtlnovel.com~Sometimes it seems like a plant grows...

This is the heart of space, the core material of this primordial treasure, whose value is comparable to many low-grade jewels.

The Heart of Space flew over and was held in his hand by Wang Yi. Wang Yi breathed a sigh of relief. "Finally got it."

...

It was a human body that Wang Yi came to Chaos City this time, and it was a clone of Youhai that remained in the Ancestral Mystery Realm, because the Glory World only covers the entire Ancestral Mysterious Realm. If you want to continue the battle in the Glory World, you must leave a consciousness clone there.

However, the avatar of the Void Zerg also came with Wang Yi, inside Wang Yi's body world.

When the avatar of the Void Zerg came into contact with the "heart of space", the life nucleus in the body had the same 10081 cross-section as the heart of space, with complicated spatial laws and secret patterns on it. At this moment, the life nucleus seemed to be the same. The heart resonates, and a stream of strange energy is transmitted into the life nucleus, causing the life nucleus to slowly undergo transformation.

"Sure enough." The Void Zerg clone was a little excited.

The huge and incomparable essence in the heart of the space is continuously transmitted to the life nucleus of the Void Zerg clone. Gradually, a secret pattern that emits golden light slowly appears in the life nucleus, and some of the original secret patterns have also changed. After being erased, secret lines were born and disappeared continuously.

However, because the Void Zerg Clan clone's genetic level has reached a very high level (without urging the blood of the beast god), this change is much lower than Luo Feng's Demon Kill Clan clone, and it is even impossible to change his genetic level and increase his level. Strength only changes the secret talent of the Void Zerg clone.

"ended."

The Void Zerg Clan clone life crystal core itself has secret patterns, and the third set of secret patterns has become more complicated at this moment.

Void Zerg clone's talent secret "Void Stealth" has evolved, adding a "domain" ability!

Chapter 396: Chaos Ruins, Chaos Wings

Chaos City, the inner mansion of the city lord's mansion.

"His Royal Highness, the city lord has long given an order, you can go in when you come." The group of immortal guards in front of the gate of the inner palace did not stop it either.

In the eyes of outsiders, "Wang Yi" has been cultivating in Chaos City. Of course, this can be regarded as an arrangement of the higher level of mankind. Therefore, it is not surprising that Wang Yi appeared in the City Lord's Mansion.

Wang Yi stood in front of the "Chaotic Ruins" in the courtyard. This time, Venerable Guiyi did not show up to lead him.

"Last time because of the panel upgrade, I didn't have time to sign in at Chaos Market until I left Chaos City." Wang Yi secretly said, "I don't know what I can sign in at Chaos Market this time."

Wang Yi took one step forward.

Boom!

Time and space changed, Wang Yi appeared on the vast ruined continent, with hundreds of millions of corpses everywhere, and a figure sitting cross-legged in the distance.

"Wang Yi pays homage to City Lord Chaos." Wang Yi cautiously came to the figure and saluted respectfully.

Unlike the image of a man wearing golden armor in the virtual universe with a strong face and a strong face, the Chaos City Lord sitting in the Chaos Market looks terrifying, like a tall and burly scaly dragon, but his eyes are still warm and jade. As unfathomable as the starry sky of the sea.

City Lord Chaos smiled and nodded: "Wang Yi, you haven't seen you for more than ten thousand years, you have made a lot of progress."

Chaos City Lord also felt it.

Wang Yi was on the battlefield outside the territory. He saw all the actions of the Ancestral Gods in his eyes. Wang Yi's achievements also made him satisfied. In particular, Wang Yi is about to defeat countless alien inheritors in the universe and obtain a lot of glory points, which can be exchanged for a lot of The number of inheritance...This makes him more likely to break through and become the lord of the universe. How could Chaos City Lord not pay attention?

"You said that there is something you don't understand in your law perception. If you have anything you want to ask, just ask." Chaos City Lord said.

"Yes..." Wang Yi bowed respectfully, and said inwardly as he spoke.

"Sign in."

[Ding, congratulations to the host for signing in successfully, and reward "Chaos Wings" (1/6).]

Chaos Wings: The eternal true god-level top single mechanical flow treasure created by fusing time, space, gold, wood, water, fire, earth, and the laws of light, thunder and wind. Chaos Wings have six pairs of wings, and there are five complete Chaos Wings. The method of re-urging issuance.

In addition, there are six pairs of wings of Chaos God Wing, all of which have different effects.

The first pair of wings can use time and space to speed up the escape, and some geniuses, even the immortal and the venerable, can use it.

The second pair of wings can control time and space! It is a simplification of the True God's "Speaking Law Follows", and it can be used by the master of general laws.

The third pair of wings is a simplification of the Void with one thought. Generally true gods can use it.

The fourth pair of wings can be made by one thought of the universe, which is a simplification of the eternal true **** and one thought of a small universe, and can be used by the general void true god.

The fifth pair of wings controls the chaos to a certain extent. This is also the origin of the name "Chaos Divine Wings". Generally, the eternal true gods can use them. With the help of it, some of the powers of "sacred existence" are already available.

The sixth pair of wings is the wings of attack! It is indestructible, extremely powerful, contains the characteristics of the chaos law, and is suitable for the strong on any road.

...

This kind of treasure uses the 'source' as the central stimulus. At present, only one pair is left, and the other five pairs need to be gathered to achieve the highest power.

With many abilities, controlling the chaos to a certain extent, the Eternal True God can use it to have some of the strength of the holy existence.

...

Wang Yi looked at these messages and blinked. Isn't this a pirated version of "Chaotic Golden Wings"?

The main difference with "Chaos Golden Wing" is that it contains all the original laws from the beginning, so any strong person has the opportunity to use it.

"On the battlefield of the ancient civilization, the legion battles mainly divided into groups of treasures, such as the Jin Luo Tiandi, etc., and there are also single-type treasures. The Chaos Golden Wing is the best in the ancient civilization." Wang Yi Secretly. "My Chaos Divine Wing, to put it bluntly, is a replica of Chaos Golden Wing, and the level is the same."

Mechanical flow treasures, symmetrical saints are of little use.

It is almost useless for the existence of the **** king.

The mechanical flow treasure used by the Eternal True God almost represents the pinnacle of the mechanical flow treasure.

"What I got is the first pair of wings, which are incomplete, and there are five more pairs..." Wang Yi felt a bit of toothache.

He guessed that it would be almost impossible for the "Chaos God Wings" to gather unless they signed in by luck, and the place where there are other "Chaos Golden Wings" components is most likely.

"Really, this turtle son... doesn't stop at all."

After the Chaos City Lord answered Wang Yi's doubts, he asked: "Wang Yi, your current law perception should be enough, when will you break through immortality?"

Wang Yi said respectfully: "Back to the city lord, if there are no accidents, I am going to make a breakthrough in the next period of time."

City Lord Chaos smiled and nodded, "Well, break through as soon as possible. You will become a pillar powerhouse of our clan as soon as possible, and you can also occupy a higher position in our clan." City Lord Chaos has great expectations for Wang Yi.

...

After coming out of the Chaos Ruins, Wang Yi looked at the pair of Chaos Divine Wings on the panel, and couldn't help but feel joy in his heart.

He now has the super treasure "Tongtian Pagoda", the common palace treasure "Fire Conch Palace", the domain class supreme treasure "Colorful Aurora Lake", the long-range weapon treasure "Zhenfeng Star Map", and the pinnacle treasure armor "Robbery", The peak soul treasure "Original Soul", the common seal treasure "Lanxi Demon Axis"...

However, the only weapon that can be used as a frontal warfare, the "Zhenfeng Star Map" has to incorporate a large number of "Zhenfeng Stars" in order to exert sufficient power, and the mighty power reaches the stage of the overlord of the universe and the lord of the universe.

Generally speaking, Wang Yi is now extremely capable of life-saving, but there is not a single weapon that can be used for frontal fighting.

"I need a powerful weapon~www.mtlnovel.com~Wang Yi walked out of the city lord's mansion and touched his chin.

"Unfortunately, although Youhai clone is on Bauhinia Island, the mysterious ancestral realm, it can only be signed by the human deity, and my next actions will require the human deity." Wang Yi hesitated.

"Forget it, the treasure trove is there, and it's never too late for me to break through immortality."

The matter of Chaos City has ended. Wang Yi has received a Sealed Arcana, an Eternal True God-level Arcana's first pair of wing parts (which can only exert the power of ordinary Arcana), and obtained the "Space Heart" to allow the Void Zerg clone to evolve. The natural ability of the domain" is considered to be full of rewards.

...

The remote territory, the core of the mystery of the ancestors, the Bauhinia Island, a beautiful castle next to the lake, condensed from a beautiful and normal human appearance of the secluded sea clone sitting on a high place, consciousness connected to the glory world.

Crazy scoring.

At this time, Wang Yi's ranking in the triple inheritance ranking on the Glory World Black Book was already ranked first, and the second place was far behind in the winning game.

"2398565 wins and 0 loses."

Chapter 397: Wuhua Secret Realm

"Next, I'm going to the Ice Prison Star in the Secret Realm of Wuhua."

The metal spacecraft in the dark universe is like a silver crescent moon, moving forward at nearly a hundred times the speed of light.

In the spacecraft, it was Wang Yi who had left Chaos City for almost a year.

"The cosmic secret realm where the ice prison star is located is too remote." Wang Yi said with emotion, "My servant teleported from the kingdom of God to the closest cosmic secret realm. There is still more than 1 billion light-years away, even in the dark universe nearly a hundred times. The speed of light travels, and it takes almost a year to arrive."

It turned out that in order to sharpen the third disciple, the mountain guest in time and space placed the third metal fragment of "The Secret of Nine Tribulations" on the Ice Prison Star.

"What I am most worried about right now is whether or not the third piece of metal fragment was placed there at this time, otherwise, I will run for nothing this time." Wang Yi said in a low voice.

Of course, it took one or two years, which is nothing to him.

.....

Wuhua Secret Realm has a maximum diameter of 160,000 light-years. It can only be regarded as small in the cosmic secret realm. The danger of the whole secret realm is average, and immortal gods can enter and break through.

Except for the six extremely dangerous areas, the other areas of the Wuhua Secret Realm are relatively low in danger, and they are also a threat to ordinary immortality.

And the six extremely dangerous zones, but even the Universe Venerable may perish!

Ice Prison Star... is in one of the six danger zones, the "Ice Prison Star Belt"!

The maximum diameter of the entire Ice Prison Belt is actually 2.1 light years, and one teleport can span the past.

"brush!"

Void Zerg clones wearing purple-gold armor appeared in the outer starry sky of the Ice Hell Belt.

"Ice Prison Star, here comes." Void Zerg clone muttered.

Teleportation produces special spatial fluctuations, which can be sensed by those who are good at teleportation at a very long distance.

But the Void Zerg clone who has mastered the "domain" can make this fluctuation disappear without attracting the attention of any strong.

"The domain is a very powerful trick." Wang Yi thought to himself, "Unless you become the lord of the universe, before...this trick is quite powerful."

"domain" and teleportation are two completely different means.

"Domain" is the Void Zerg clone first completely transformed into a space with a diameter of tens of thousands of kilometers, which fits with the original space, and then is restored from the space to the Void Zerg clone!

Ordinary Universe Venerable One teleport is 1000 light-years.

And the Void Zerg clone that has mastered the "domain" can teleport for about 100 light years.

Besides, the Void Zerg clan clone can easily blend into the spatial fluctuations before using this innate secret method, without causing any special fluctuations. Once left, even the Venerable who masters the space wants to pursue it, it is very difficult.

"Before I didn't want to come to Wuhua Secret Realm, because the Ice Prison Star has the special life "Kou" comparable to the main force of the universe. There is no "domain". Once my Void Zerg clone is discovered, there is absolutely no possibility of escape." Wang While using the "domain", Yi cautiously moved forward in the Ice Hell Star Belt following the route detected by the detection instrument, while secretly thinking in his heart.

In the entire Ice Prison Star belt, the two great cosmic venerables are both of the "King Kou" clan, and because they are special beings of a thousand times the genetic level, their combat power is very terrifying.

Wang Yi stopped. In front of him were colorful water streams, like ribbons, encircling the core of the entire Ice Prison Star Belt ring after ring. These currents were filled with monstrous cold air. This is the depths of the Ice Prison Star Belt. Extremely dangerous "star belt".

The vast core area surrounded by star belts, the ice-covered planets, at a glance, you can vaguely see hundreds of planets.

That is the Ice Prison Star, the residence of the "Kou" clan.

Wang Yi could feel strong summons coming from the direction of the group of ice prison stars.

"It's that one!" Wang Yi's eyes instantly locked on one of them, "The call came from there! The mountain guest really put a piece of metal there." Wang Yi felt relieved.

Wang Yi had no idea about snatching this piece of metal. First, it was the tempering left to the third disciple by Zuoshanke. There must be some means left by Zuoshanke, and it is easy to be discovered by Zuoshanke. The second is that Venerable Ziyan Kou kept a tracking method on the metal fragments. Wang Yi stole it, which was equivalent to letting Venerable Ziyan Kou chase him... he was not so busy.

"Just sign in." Wang Yi said silently in his heart. With the stealth hiding ability of the Void Zerg clone, as long as you don't meet the Venerable Purple Bandit face to face, you don't have to worry about being discovered.

"Get close to the ice prison star first and find the palace where the metal fragments are hidden."

Wang Yi was about to act when he suddenly noticed something, hid his figure, and looked to the side.

In the wide and turbulent "Star Belt River" in the distance, a few fuzzy figures rushed out.

"Hahaha....."

"Ha ha....."

Wang Yi looked at several fuzzy figures rushing out of the star-belt river in the distance, and his heart moved slightly.

"Huh? Is this Hokuou?"

Those figures are divided into obvious purple and cyan, with cyan or purple crystal-like armor on the body. The purple pirate looks like a beautiful human female, and the pirate looks like a handsome human male... But in fact, the pirate is a special life. , Itself has no gender.

"Several world master-level bandits are playing nearby." Wang Yi stood quietly watching, feeling a little, "These bandits are really carefree."

Wang Yi shook his head, and ignored these happy bandits. He turned around and disappeared without a trace, and then appeared out of thin air in the starry sky about 20 million kilometers away from the ice prison star.

"The detection instrument remains on." Wang Yi cautiously started flying towards the Ice Prison Star, and finally entered the Ice Prison Star.

This ice prison star has a diameter of more than 8,000 kilometers. There is nothing bare on the surface of the planet. The surface is extremely cold. There are only wide passages that lead directly to the depths of the ice prison star.

Wang Yi chose a channel at random, and flew quietly inward, while relying on a miniature detector to detect it.

The deeper the depth, the colder it became. After flying for more than 3,000 kilometers, Wang Yi finally flew to the end.

Wang Yi's heart beat suddenly.

In the depths of the Ice Prison Star, a majestic palace over a thousand kilometers high completely made of purple-cyan mixed ice appeared in front of him, and a frightening atmosphere filled the palace.

"There are Venerable Hukou Clan inside." Wang Yi hid his figure more carefully and sneaked towards the palace.

An invisible wave filled the entire palace. But when I passed by Wang Yi, I didn't notice it.

"Fortunately, my Void Zerg clone has a second talent secret, "Body Melting Void", plus "domain" to ensure concealment." Wang Yi secretly said in his heart.

Although he is now sure to escape under the hands of Venerable Hukou~www.mtnovel.com~, once the two Venerables are alerted and kept on guard, it will be even more difficult to continue sneaking in.

After all, Wang Yi's purpose is only to sign in.

[Ding, congratulations to the host for signing in successfully, and reward "Ice Hell Star Stone".]

[Ding, congratulations to the host for signing in successfully, and reward "Ice Prison Qinglu".]

These two treasures are well-known in the universe, one is the "Ice Prison Star Stone" and the other is the "Ice Prison Dew". Among them, only Venerable Cyan Kou has exhausted his efforts to create the "Ice Prison Dew". Only the Venerable Violet Kou can make the "Ice Hell Star Stone" with great difficulty.

Both of these are very expensive materials with special miraculous effects. The ice **** star stone with the big nails stored in the palace alone is worth about 2 trillion yuan.

Not to mention that Wang Yi signed in, they were all fist-sized.

But Wang Yi couldn't be happy.

"The Nine Tribulations Secret Code, come out quickly." Wang Yi muttered in his heart.

Maybe God heard his voice.

【Ding, congratulations to the host for signing in successfully, rewarding the fifth and sixth calamity exercises of the 'Secret Code of Nine Tribulations'. 】

[This reward is the highest reward at the current location, and you can no longer get any rewards here. 】

Chapter 398: 9 calamities fifth and sixth calamities

Secret Code of Nine Tribulations, Fifth! The sixth catastrophe!

The fifth calamity can increase the level of life genes to 48 times!

The sixth calamity can increase the level of life genes to 96 times!

All Wang Yi's body, human deity, Yanxing Giant Beast clone, Void Zerg clone, Youhai clone...At this moment, the genetic level has all been increased to 96 times!

Void Zerg clone was originally 280 times, and it stands to reason that the 96 times increase is 26880 times!

But because of the limitations of the universe's laws of operation, ten thousand times is the limit! Therefore, the clone of the Void Zerg can only reach 10081 times the genetic level!

There is no need to borrow the power of beast gods anymore, the clone of the Void Zerg family now has a perfect genetic level!

The human body is increased to 96 times!

The avatar of the Yanxing Giant Beast has increased to 960 times, and the power of the beast **** is a hundred times stronger. The Yanxing Giant Beast, which was still a little worse but could not reach the tens of thousands of times the genetic level, has finally reached the tens of thousands of times the genetic level this time!

"Wow~~"

On the sea and land islands of the Law of the Tongtian Pagoda, a giant Yanxing beast with a body over a thousand kilometers raised his head and roared with excitement, crackling...Bones, sharp horns, muscles, etc. all began to grow suddenly, and at the same time turbulent Absorbing a large amount of world power in the world in the body, the length of the Yanxing Giant Beast is constantly increasing...

10,000 kilometers...

20,000 kilometers...

30,000 kilometers...

reached the perfect genetic level, the gift of the primitive universe came, making its body reach more than 90,000 kilometers.

This is also the reason why the strongest masters of the universe and the strongest people in the universe are all over 90,000 kilometers away!

Because they have all reached the perfect tens of thousands of genetic levels!

However, the more difficult it is to increase the genetic level, 10081 times is the real perfection! Therefore, even if many cosmos masters reach 9,000 times, 10,000 times, the strength is similar to those of the perfect genetic level cosmos masters, but the gods are far behind in size.

The Yanxing Giant Beast lands on the ground. Its claws are like a pillar of heaven, tens of thousands of kilometers high, and its body is more than 90,000 kilometers long. That scaly tail is completely comparable to the main body of the body...The scaly wings completely cover the world as soon as it unfolds, and its infinite power is contained in it.

Yanxing Giant Beast, this moment has reached the perfect genetic level!

Even if the "power of the beast god" is released, the gift of the original universe will not be taken back, and it will remain in this shape of more than 90,000 kilometers.

At the same time, the Youhai body in the time realm has also undergone earth-shaking changes. Because Youhai has expanded to the limit of the time realm, it cannot be expanded, but the genetic level is also constantly improving, which is 300 times the fourth calamity of cultivation and 7200 times. The Youhai clone of the life gene level is constantly increasing...8000 times...9000 times...10000 times...

finally reached 10081 times the perfect genetic level!

If Youhai condenses a small clone again, then you can have about one-tenth of the main body, which is 1,000 times the genetic level of the Youhai clone with a height of more than 9,000 kilometers.

What surprised Wang Yi even more was that the prokaryotes of the Yanxing giant beasts that reached the tens of thousands of times the genetic level and were in a flawless state had undergone transformation. After all, every body has its own origin orb (pronucleus, life crystal nucleus), even if you are a clone of Youhai. In fact, it is no exception.

Therefore, only when the Yanxing Behemoth itself reaches the perfect tens of thousands of times the genetic level, the pronucleus changes under the action of the mysterious force of the universe, and is reborn.

"The universe's strongest talent secret method...Because of the same soul consciousness, it can only be obtained once, but the pronucleus is separate...The Yanxing Giant Beast clone has finally changed this time." Wang Yi looked at this scene with joy. , The pronucleus of Yanxing Giant Beast was strangely altered, and it was also hazy and chaotic, and it didn't feel hard to carry the inner world, which was nearly 200 million kilometers in diameter, and was very relaxed.

And, to Wang Yi's surprise, after the Yan Xing Behemoth reached the tens of thousands of times the genetic level, "Yan Xing Bian" automatically transformed, and also automatically mastered the ability to "shape change"!

This is actually equivalent to the fourth level of "Yanxing Bian"... but there is no record. It cannot be practiced and can only be mastered by the Yanxing behemoth, which has reached ten thousand times the perfect genetic level.

And how many of them can meet against the sky like this?

"The Yanxing Giant Beast, now, the smallest, can be reduced to a height of one meter, the largest, can be tens of thousands of times larger..." Wang Yi became excited.

More than 90,000 kilometers and nearly 100,000 kilometers of Yanxing giant beast clones, achieving immortality, can have more than 900 million times the length of the divine body!

And it will no longer be restricted by body shape, it can change its body shape, it is not a fixed appearance of Yanxing behemoth, and it is undoubtedly much more flexible in battle!

And becoming bigger and smaller, it will not affect the original strength of the Yanxing Giant Beast, of course, it will not increase.

Although it sounds weird, who can understand the changes in the original universe?

is like reversing time and space and resurrecting, which is even more unthinkable, but the original universe grants the Lord of the universe this ability, which can be done.

The Flame Star Giant Beast slowly lowered his head, with a hint of excitement in his eyes.

"The prokaryotic metamorphosis of the Yanxing Giant Beast can expand the world in the body again."

Among all the worlds in the body, the Yanxing Giant Beast is the largest in the world!

This is because the other clones are essentially ordinary Origin Orbs, and there are limits to how the world within the body expands.

But the Yanxing Giant Beast has a "flaming star core", which is similar to the Golden Horn Stone of the Golden Horn Giant, which can bear the burden of a larger internal world!

The bigger the world inside the body, the greater the pressure on the pronucleus.

Flame Star Giant Beast relies on the trick of "swallowing treasures and materials" to expand the world. It uses all kinds of energy to continuously strengthen the pronucleus and make the pronucleus extremely strong. Only in this way can it have a super large internal world.

So the Yanxing Giant Beast can reach a diameter of about 200 million kilometers~www.mtnovel.com~ and the other parts of the body world add up to less than half.

A pile of cosmic crystal mountains appeared out of nowhere in the inner world of the Yanxing Giant Beast. One of the cosmic crystal mountains immediately melted away, and a large amount of world power spread out and began to blend into this inner world. After absorbing the world, it makes the world in the body like a hungry child and devours it desperately.

Boom... Boom... The sky trembled.

keep getting bigger and bigger...

For this day, Wang Yi has already prepared a large number of cosmic crystals and various treasure resources. At this moment, these almost endless cosmic crystals and treasure resources are continuously poured into the body of the Yanxing behemoth, making its internal world like bean sprouts after rain. The same constant expansion and growth...

This process of swallowing and expanding the world within the body will continue for a while, but Wang Yi cannot wait.

The Void Zerg clone glanced at the palace in front of him, grinned, and then displayed the "domain", silently, the Void Zerg clone left here and appeared in a predetermined area 100 light years away, then teleported, and then blinked. Move... After more than 100 consecutive teleports, Wang Yi appeared in a star. The immortal servants who had been waiting here opened the teleportation of the kingdom of God, and teleported Wang Yi away in an instant. At this time, it was even the Venerable Yukou. I found that trying to catch up was useless.

The light flashed, and Wang Yi had already teleported out of here.

Chapter 399: Storm is coming

The core of the Ancestral Mysterious Realm, Bauhinia Island.

In the lakeside castle, under a willow tree in the courtyard, Wang Yi's Youhai clone in a red robe slowly stood up.

"It took almost a year and eleven months to finally end the battle for the Glory World." Wang Yi sighed on his face.

More than 6.86 million battles, Wang Yi also got close to 6.9 million glory points.

And to go into the land of inheritance once, only 100 glory points are needed.

Now the entire ancestral sect, I don't know how many people envy and hate Wang Yi.

"Damn it! How could this human being have such good luck, and actually get so many glory points, how many inheritance opportunities should that be!"

"I have been to the Ancestral God Church for so many years, except for the number of free inheritance times, I also went in twice!"

Now the entire Ancestral Church is discussing Wang Yi's achievements in the glory of the world!
envy!

envy!

Hostility!

Greedy!

.....

Various emotions, so many!

Even Hongmeng Zhong has a very complicated feeling for Wang Yi.

The human race is okay, but the other Hongmeng races are actually very complicated.

And even within human beings, there are envy and hostility even if you are not sure.

But Wang Yi didn't care about this. He hid in the castle, did not allow outsiders to enter, and only fought in the glory world, did not appear in the open-air square where the inheritors of all races gathered, and did not contact with other inheritors... So the rumors outside, The ups and downs have nothing to do with him.

"But I made such a big disturbance this time, and other forces should also pay attention to me... Next, there may be an assassination of me." Wang Yi whispered, and he was also a little uncertain.

The ancestor gods are very safe, but they can't stop the madness of the aliens. They really want to do it in an instant and kill with one blow. Even protecting the colorful Aurora Lake on Bauhinia Island requires a little reaction time.

As long as the assassination is strong enough, maybe that time passes and Wang Yi will die.

"I am just a Youhai clone here, how could they kill me... But if they want to control me with soul attacks, it would be a bit troublesome." Wang Yi strolled in the castle garden.

"Everything is ready, it's time to break through immortality, but before that, go to the place of inheritance and accept an inheritance. The third level of my beast god's way has reached completion, and it should be possible to accept the fourth inheritance. "There was a glimmer of expectation in Wang Yi's eyes. "Maybe, I can quickly comprehend the fourth level, Breakthrough Venerable."

Step into the fourth level of the Way of the Beast God, you can break through to the Venerable Universe. It turns out that King Zhenyan made such a breakthrough in history.

But it's simple to say, but difficult to do, but this step has blocked the immortality of countless kings in the universe.

"Go to the land of inheritance." Wang Yi was also stubborn. The main human deity is still with the Void Zerg clone and is on his way back to the human domain. He accepts the inheritance for only one day at most, so there will be no delay.

Wang Yi's Youhai clone is wearing a "Purgatory Armor" that can disguise and conceal his breath, and can independently enter and exit the castle that only inheritors can come out. Therefore, as soon as he comes out, he is deemed to be the owner of the castle...that is, the human inheritance. By.

The palace residences of the inheritors of various races on Zijing Island are seated after each. Thousands of kilometers away from Wang Yi Castle, there is an ancient mansion resembling a black pyramid next to the lake. At this time, the top floor of the mansion was surrounded by Venerable Universe with a strange creature lying there silently.

The Universe Master has three weird-looking heads, four hooves, an elephant-like body, and two tails. At this moment, three heads are simultaneously gloomy.

This cosmic sage is a cosmic sacred who has come to the ancestral gods to accept and inherit a long time from the "Mita tribe" in the mechanical clan alliance.

"The Alliance asked me to come here to observe and monitor the human Jiujiang..." There are three heads, none of the other heads have eyes. Only the central forehead has a vertical pupil, emitting an evil light.

It is the "Venerable Qi pupil". The secret of talent is the vertical pupil, which can see through many illusions and disguises. It can see through even some illusions that the Lord of the universe cannot see. It is also good at soul attacks. It is also because of this. The Alliance will send it over to observe the recently famous human Jiujiang, and see if he is the hunting king of the human race or other geniuses.

Obviously, all ethnic groups actually doubt the true identity of human Jiujiang. If they can grasp more information, they can make various methods based on the information.

"I am a dignified Venerable Universe, who actually does this kind of errands to monitor a king..." Venerable Qitong complained in his heart.

However, it could not resist the orders of the Machine Race Alliance.

"It's just monitoring now. If the Alliance feels that this human threat is too great, I want to take action..." Venerable Qitong felt cold. This was what it worried about most during this time.

"Today, the human battle in Jiujiang will be over, and it is very likely to come out." Venerable Qitong stared at the black evil vertical pupil in the middle of his head.

The total number of battles in human Jiujiang has now been estimated by all parties. According to the speed of 10,000 battles in each wave of human Jiujiang, there will be occasional differences, but it can be calculated...Today is the day when the battle is over.

The trace of Venerable Qitong's consciousness connects the glorious world watching the black book, watching the continuous changes of human achievements in the black book.

"There are the last 15 games."

"The last 2 games."

"ended."

Venerable Qitong breathed a sigh of relief, and his heart trembled when he thought of the huge amount of glory. For the past year, he has watched human Jiujiang get a lot of glory, and he is jealous and jealous. "It is incredible, if I had so much glory. Point, I am afraid that there is hope for becoming a cosmic hegemon."

"Kill him, this kind of genius alliance will definitely not watch him grow up, it will definitely kill him." Venerable Qitong thought of this place and suddenly got better~www.mtlnovel.com~ just in case the time came. There was really an order to assassinate... and the person who executed it was himself, and Venerable Qitong's mood became bad again.

"Damn human!" It cursed bitterly.

"Then human, should he come out soon? Get so many glory points, he always has to accept the inheritance. To accept the inheritance, he has to go to the inheritance passage in front of the island owner's palace, and he must leave the castle." Venerable Qitong When he got down and continued to stare at the distant castle silently, he suddenly felt that the castle was very annoying.

"If he keeps coming out, I can only stay here and do nothing."

after a while.

"Um?"

The vertical pupil on the forehead of Venerable Qitong, who was lying silently on the upper floor of the mansion, moved, with a trace of excitement on his face.

"Humans have come out?"

In its sight, at the gate of the castle, slowly walked out a figure wearing a dark red armor. From the appearance, it was exactly the same as the human in the information.

"Are you out?" Venerable Qitong also stood up.

"Um?"

"No!"

"Wait, this is..."

But looking at it, the vertical pupils on Venerable Qitong's forehead opened wider and wider, and the black brilliance was almost as real in the end. Venerable Qitong seemed to have seen something shocking, with an incredible expression on his face.

"How come? That human... is actually a realm master?"

Chapter 400: Wang Yi, the lord of the human world!

The base camp of the virtual world of the mechanical clan, Yulan World.

In an independent space.

In the dark and deep sky, with the stars in the sky, a magnificent palace stands in the starry sky.

Suddenly, a huge voice resounded through the void.

"What are you talking about? Human Jiujiang is the master of the world?"

"Yes, my lord." A thousand-meter-high mechanical veteran cast from silver and blue metal with a full body streamlined on the ground respectfully, looking up at the majestic existence on the throne that seemed to blend in with the starry sky.

"The one sent by our clan alliance to monitor the King of Hunting is Venerable Qitong, and news has been sent back that the King of Hunting...or the human being aliased as Jiujiang is indeed a realm master." Respectfully said, "According to our judgment, the greatest possibility is that he is the first

genius of the recent rise of mankind, Wang Yi. It is just that there is a treasure hidden in his body that he can't see it!"

"Wang Yi?"

"Human beings are actually the realm master... and they are also the Hunting God King!" The great being on the throne was a little surprised and a little angry. "Human beings are really hateful. They hide it so deeply. Fortunately, we asked Venerable Qitong to explore it. Otherwise, when human beings grow up, they will be a big threat to our race in the future!"

Kneeling down on the ground, the veteran of the mechanical race also sighed in his heart that a realm master, disguised as immortal by virtue of the hidden breath of the treasure, broke out such a reputation, killed the limit of the king, and was invincible in the three-fold inheritor of the ancestral gods, sweeping the glorious world. , Even when he first learned about it, he couldn't believe it.

"This human being is such an enchanting person, absolutely can't stay, it must be eradicated as soon as possible!" The voice of the great existence of the mechanical race is cold.

"With the talent and growth rate of this human being far surpassing that of the perished Kedi in the past, he will probably become the human eclipse palace lord and star **** demon lord, and it will be even more difficult to cut it off at that time. In addition, our clan will also pay a price I don't know how much." The great existence of the mechanical clan sounded lowly in the palace.

"So it must be early! This peerless genius of mankind must never stay! He is still the master of the world and must be killed before he grows up!"

The Kneeling Machine Race Venerable said: "But my lord, human Wang Yi is now in the Patriarchal Cult. The Patriarchal Cult is the largest power in the universe. It is absolutely forbidden for other forces to do anything there. It is difficult for us to act."

"The human Wang Yi is the realm master, but he has the power to kill the king. If you want to kill him, you must at least be the venerable, and there is still the possibility of failure..." The mechanical overlord also felt a little tricky. Then he said, "However, human affairs can't just be our headaches and spread out! Spread out the news that human Jiujiang is the king of hunting gods and the lord of the human world... Humans are not only our enemies, but also the Zergs and monsters. The family has a headache."

Humans, monsters, machine races, and zerg races are bordered by the borders of the four pinnacle races, which makes the struggle between them the most fierce and fierce. No matter which race has peerless genius, it will be stifled by other races.

Obviously, the human genius Wang Yi made the Robot Race feel threatened, but they didn't want to bear the cost and loss of assassinating humans alone, so they wanted to spread the news and let the Zerg Race and the Monster Race bear it together.

...

The human "hunting **** king" in Jiujiang is a realm master!

The news was like a thunderstorm on the ground, shocking the powerless. This news spread rapidly at a crazy and terrifying speed, and almost within a day, most of the forces in the universe already knew about it.

As the center of the universe, the ancestors of the largest power, gathered peerless geniuses from all over the universe, and they were also the first to hear the news.

"What? Hunting God King, that human Jiujiang is actually the landlord?"

"How can it be?"

"He can easily kill the ultimate powerhouse of the king, and he can even fight millions of times in the Glory World's Triple Successor without a single defeat. Such a terrifying genius can be the realm master? Can the realm master be so strong? Impossible!"

"What a joke! Where did the news come from!"

"This is impossible."

Almost everywhere in the glory world of Bauhinia Island can be heard, the news of those who are immortal kings talking about the King of Hunting.

"The news is absolutely true. The Monster Race, Machine Race, and Zerg Race have all released public rewards. It is to kill the Hunter King."

"If the Hunting God King is the realm master, how could so many powerful people be unable to distinguish it? The realm master's breath and immortal aura are completely different." Some strong people don't believe it.

"It is said that the Hunter King got a treasure. The most treasures can hide their breath and release a certain amount of pressure. It is the Venerable Qitong of the Mechanical Race Alliance who has the talent and secret method to see through everything, and he can see that the Hunter King is one. The realm master, the news was also the first to spread from the machine clan."

"Treasure?"

"Will the Hunting God King have the treasure? The sages of the universe are all madly competing for the treasure."

"Yes, how could they make fun of this kind of thing and offer such a high reward? Human Jiujiang must be a realm master."

"Oh my God, I actually lost to a realm master in Glory World!"

"Human Jiujiang is the realm master so powerful. It's no wonder that the mechanical races are so anxious that they have offered sky-high rewards. The mechanical races, the zerg races, and the monster races all offer a treasure. Anyone who can completely kill this human can Treasure from the clan."

"What? Isn't that the three treasures? Such a high price is indeed worthy of the three pinnacle races. It is indeed rich and powerful, but the threat of Wang Yi can be seen by being able to offer such a high reward."

"This is the most precious treasure that even the venerables are madly fighting for...If anyone can kill this human being, wouldn't it be a fortune?"

The entire ancestral religion, not only the Bauhinia Island, but other islands, are also discussing matters related to Wang Yi.

After all, the things that human beings have done in the glory world before in Jiujiang are too amazing! And now that the identity of the human world lord has been exposed, it has pushed him to the forefront of the storm even more!

The news is spreading wildly. Not only is the human Jiujiang the owner of the world, but there are also reasons for the high price of three treasures.

The lord of the universe may not care about the three treasures ~www.mtlnovel.com~ but the sage of the universe and the overlord of the universe can't help but be moved.

The news almost went crazy. "Human Jiujiang "God of Hunting" is the lord of the world." "God of Hunting has the most treasures." These are all things that make countless powerful people crazy jealous. Ordinary heavy treasures can make countless kings fight desperately. , The value of a treasure is hundreds of thousands of treasures, how amazing is the temptation! How terrible!

Even the Lord of the Universe might be heartbeat.

...

In the vast universe, hundreds of millions of ethnic groups, at least in the last ten and a half months, countless ethnic groups have learned the message of "The Hunter King". Let the hunting **** pass the entire universe by name, and let countless powerful people know.

Of course, the human race knew right away. The City Lord of Chaos contacted Wang Yi immediately. Wang Yi was also a little surprised when he learned about it, but his expression was calm.

So what if he knows it, right away... he is no longer the master of the world.

In the human domain, in a remote and dark starry sky, Wang Yi floated alone on a desolate red planet. He looked back at the vast starry sky and smiled.

"It's finally time for a breakthrough!"
