

## A God 481

### [Chapter 481: Stormy sea](#)

Virtual universe, the top of Thunder Island, Wang Yi's palace group.

"Apprentice."

"teacher."

Wang Yi smiled as he looked at the golden-robed bear who came by.

Both Wang Yi and Pang Bo are the masters of the universe, and their palaces are close together.

"I've heard that the Tongtian Pagoda in the outer battlefield disappeared just now, and it shocked countless people. You took the Tongtian Pagoda away, right?" Pang Bo sat down opposite Wang Yi, waved his hand, and there were more wine and delicacies in front of him.

"Yes, it's me." Wang Yi nodded.

Pang Bo exhorted: "Tongtian Tower is of great importance to the future of the ethnic group. You must be careful not to expose it. If it is lost, it will be a great loss."

"Don't worry, teacher." Wang Yi knew it.

Just kidding, except for him, no one in the entire primitive universe can use the Tongtian Tower. Even if he really falls, the Tongtian Tower will not have a second owner.

Ming did not plan to find a second apprentice.

Pang Bo smiled, and poured a glass of wine for his apprentice. "Now the outside world is in a mess because of the sudden disappearance of the Tongtian Tower. Several masters of the universe."

"These days, the masters of the universe have all come to you." Pang Bo stroked his golden hair and sighed when he looked at this apprentice with a different temperament. His apprentice is really incredible, even the masters of the human race and the universe are all around him.

There is no doubt about Wang Yi's status and importance in the human race. Even for him, the human race can go to war with any force without hesitation.

However, this kid is generally low-key and stable.

"Well, plus the teacher, you are here." Wang Yi said with a smile. Many Lords of the Universe have come to visit Wang Yi during this period. It's not coming to the earth.

Either it is for the enlightenment quota of the Tongtian Pagoda in the future, or it is for the exchange of the most precious treasure, and also for the "rule star orb". After all, the human race genius is much more than the current human line on the earth. This kind of treasure can be used to produce cultivation genius on a large scale. , Who is not rare?

The 13600 law star orbs are equivalent to a steady stream of 13600 peerless geniuses similar to Berran.

But Buran was born in tens of thousands of epochs, but with the Rule of Star Orbs, tens of thousands of geniuses similar to Buran can be cultivated every one million years, ten million years!

In other words, the number of immortal gods in the human race will be greatly increased.

Even the Lord of Chaos City has personally approached Wang Yi for this, and it can be seen that the high level of humanity attaches great importance to this.

Wang Yi had never thought about monopolizing the "rule star orb", which could be used by the human race, but it must be ensured that the genius of the earth is given priority.

However, there are still very few Earth Lines that can integrate the Law Star Orbs, even without a 1% usage rate. Under such circumstances, it is a good thing to provide it to the human race and help the human race cultivate more geniuses.

...

When Wang Yi took the Tongtian Pagoda away, the entire universe was bombed.

The news that "Tongtian Tower has disappeared" spreads faster than the news that the \*\*\*\* monarch captured tens of thousands of cosmic venerables back then! Because the shock of this news is thousands of times stronger! A supreme treasure that has long been scorned by hundreds of millions of races in the universe has disappeared?

The six pinnacle races of the universe, the Star Giant Beast Alliance, the Northern Frontier Alliance, the Ancestral Gods... I don't know how many forces, but after learning the news, they were all shocked.

In order to "Tongtian Pagoda", all parties tried their best. Even the strongest in the universe tried one by one, but no one could take the Tongtian Pagoda. Everyone was helpless with the Tongtian Pagoda. Even the strongest in the universe couldn't shake it. .

Everyone has a consensus that the Tongtian Pagoda cannot be recovered by strength alone.

The Tongtian Tower suddenly disappeared, and many people speculated based on the picture that it should have been taken away by some existence.

Crystal family.

In the crystal clear temple, the main hall is in a circular layout, with a crystal throne spread out, a total of 16 thrones, just looking at the throne layout, it does not distinguish between high and low.

I saw a famous crystal clan powerhouse sitting on the throne.

The 15 thrones are all seated, but one seat is vacant.

The crystal clan holy lord looked at the seat, but there was a glimmer of expectation in his eyes, and then it became majestic.

"You already know what happened. There was news from the outer battlefield that the Tongtian Tower disappeared. This is related to the future of our clan and should not be ignored. I decided to send 12 of you out to investigate, and let other things go first."

The 14 masters of the crystal clan universe looked serious, and they all knew the meaning of the Tongtian Pagoda.

"The Lord of Mengchen is still in retreat, sprinting to the strongest in the universe, although hope is not great, but you can't disturb her casually. Then this time, let's be led by the Lord of Conglai and the Lord of Weiji."

"Yes."

"For the ethnic group."

"For the ethnic group."

...

"Check! Must check!"

In one of the universes belonging to the monster race, a large silver-white snake's eyes burst out with a stern light, and the power fluctuations shook the time and space, and the sound resounded through the void.

"Use all resources to investigate, check carefully! Find out who got the tower of the sky! Even if he has the strongest treasure, he can't hide in the tower of the sky forever. If it is a weak person, we have a complete opportunity to get the tower of the sky. Take it."

"Yes."

"Yes, Dream Demon Ancestor."

The Dream Demon Ancestor and the Earthquake Demon Ancestor are very anxious, because they know what it means to get the Tongtian Pagoda.

"Who the \*\*\*\* is it?"

"Who got the Tongtian Pagoda?"

Not only the monster race is anxious, but other races and forces are also anxious, frantically searching, and the human race is also the same. The only people who are not worried about watching the drama secretly are probably the only human masters of the universe.

"Oh, I'm all anxious."

"Hurry up, look for it."

Of course, watching the drama of human ethnic music, you still have to behave on the surface. Several masters of the universe went to the battlefield outside the territory and pretended to start searching.

...

The cosmic sea, the depths of the endless chaotic air currents, the deep core of the dangerous place "North China Snow and Lanterns"... Surrounded by the endless air currents, a lonely palace exuding bursts of blue light is suspended, and there are faint servants in the palace. In the figure, every servant is a universal master.

This is where the "Zaoshan Ke" really lives. The North China Snow and Lanland, this dangerous place also represents the Zuoshan Ke.

There are nearly a hundred forces in the universe, but no one will provoke these people.

Everyone knows...it's not easy to mess with a mountain guest.

Main hall.

On the throne ~www.mtlNovel.com~ the majestic old man over ninety thousand kilometers high is sitting.

A strong human "snake-man" family with a snake-tailed human body was waiting in the hall.

"Tongtian Tower disappeared?" There was a solemn expression on the face of the sitting mountain guest.

"Yes, teacher." Puti said respectfully. "Now all parties in the original universe are frantically looking for the whereabouts of the Tower of Heaven. Many of the original universe powerhouses who were originally in the universe have begun to rush back."

"Tongtian Pagoda is indeed extraordinary, far surpassing the average Xeon to treasure, even if I have to be tempted." The mountain guest sighed. "I don't know, who is in the hands of it. If you can find him and accept it as a disciple, then it will be fine."

Puti looked up in shock. He followed the teacher for countless years, but it was the first time he saw the teacher's expression of regret.

"I'm afraid that the third junior brother has never been so valued by the teacher..." Puti said inwardly.

#### [Chapter 482: Guardian beast](#)

In the fifth year that Wang Yi became the lord of the universe, in the mystery of the ancestors, inside the Bauhinia Island covered by the colorful Aurora Lake.

Wang Yi came out of the water curtain of the fountain again with a smile on his face.

As for those alien watchers, they are already less than half.

Wang Yi has become the lord of the universe, and it seems that many forces have no need to continue to monitor, and only the demons and other hostile races are still staring at him.

"Although the way of the fire and air beast gods has become the Lord of the universe, the way of the fire and air beast gods has been completed and cannot continue to be inherited, but the ways of the other seven beast gods are far from being completed. It's kind of useful. Although the improvement is much smaller than before, it's better than nothing."

Just when Wang Yi had just returned to the castle, ready to continue his cultivation.

"Master of Chaotic Source!" A magnificent voice sounded in Wang Yi's mind.

Wang Yi had never heard this voice, but Wang Yi could feel a trace of great power in it.

Wang Yi thought about it and guessed a possibility.

"Ancestral God?"

"It's me, come to me." said the magnificent voice.

Wang Yi thought for a while, "I wonder why the ancestors are looking for me?"

"Don't worry, it's good and harmless to you, you know when you come," said the ancestor. "My ancestors are not going to murder a master of the universe."

...

Wang Yi was still taken by a beam of light to the "ancestral palace" in the depths of the colorful Aurora Lake, and landed on the majestic palace square.

"Lord of Chaotic Source, come in." The voice came from the hall in the distance. Outside the hall were eight Venerable guards standing in golden armor, but this time they saw Wang Yi and respectfully turned sideways to make way.

Wang Yi smiled slightly, walked to the threshold of the palace, and then entered the hall.

The majestic hall contains tall pillars with almost invisible ends. Each pillar is carved with totems. There are sculptures of various ethnic groups, such as human sculptures, zerg sculptures, mechanical sculptures... and countless others. Alien carving...

On the farthest throne, the stalwart figure is sitting, a strong alien with six arms and thick legs. He has a face on the front and the back of his head.

The face on the front is white, looking very kind, with a smile on his face, which makes people involuntarily influenced by it. The negative face is pitch black, very hideous and full of evil spirits.

"Two-sided ancestral gods." Wang Yi recognized at a glance, this was one of the three ancestral gods of the ancestral gods.

The three ancestor gods taught by the ancestors are actually not the strongest in the real universe, but in the primitive universe, they can exert their ultimate combat power, that is, at least the top combat power of Tier 6.

The ancestor looked down on the black-haired and red-robed man with a smile on his face: "Lord of Chaotic Origin, this is the first time we have met. I am the double-sided ancestor of the ancestral gods. I have heard of your deeds. The ancestral gods can appear like you. Peerless genius, haha, really makes us happy."

Wang Yi bowed slightly to show respect, "I have seen the double-sided ancestor god. I don't know if the ancestor \*\*\*\* asked me to come, what's the matter?"

"Hunyuan, you have been in the mysterious realm of my ancestors for some years. You have already joined our ancestral sect's peripheral organization. You are already the master of the universe, and you

are qualified to be a guardian beast \*\*\*\* of my ancestral sect." The kind face of the double-sided ancestor \*\*\*\* Looking at Wang Yi gently.

"The guardian of the beast god?" Wang Yi was startled.

"The Ancestral God Sect is divided into full members and peripheral members." The double-faced Ancestral God looked at Wang Yi with kind eyes. "The real battle is more on the outer members. In fact, the outer members of our Ancestral God Sect... are the most important thing. A powerful organization of force!"

Wang Yi nodded listening.

There are only a few official members of the Ancestral Sect, while the peripheral members are countless peerless geniuses who have collected hundreds of millions of races in the entire universe. It is to possess the power of the overlord of the universe! This is definitely a very terrifying force.

Like Candidate God Envoys, Candidate God Generals, and Beast God inheritance who fully accept the five-fold inheritance (or higher), they must join the Peripheral Organization of the Ancestral God Sect!

In fact, Wang Yi was bestowed on the treasure by the Thunder Beast God. The Patriarchal Sect had already expressed its attitude. Wang Yi was already invited to join the Peripheral Organization of the Patriarchal Sect in advance.

"You Hunyuan, you are an internally appointed member of the peripheral organization of my Ancestral God Sect, and a key member." Double-sided Ancestor God continued. "You are already the lord of the universe, according to the rules of my ancestor god, you can directly get the position of guardian beast god."

"The peripheral organizations are divided into apologists, patriarchs, patriarchs, and patriarchs."

"Each divine lord rules a force. There are several universe lords under his command, and their status is only a little bit worse than my three ancestral gods. The strength is also invincible in the universe, comparable to the chaotic city lord of your human race."

"The guardian lord, that is, the guardian beast gods, our ancestor gods currently only have 16 guardian beast gods."

When the double-sided ancestor saw Wang Yi not speaking, he continued to speak: "You don't need to think too much."

"You are the most promising one of my ancestral gods since the last long years." The double-sided ancestors smiled and looked at Wang Yi. "Now you are just a guardian of the animal gods, but our ancestral gods are optimistic about you and hope you will grow and grow to be comparable to you. Teacher Chaos City Lord. At that time, my ancestors will naturally have a position of 'Patriarch of God' for you."

"If you are worried that joining the Patriarchal Church will make you embarrassed, you don't have to."

"Although you join a peripheral organization, you will not be an enemy of the human race." The double-sided ancestor \*\*\*\* smiled. "The peripheral organization has always been very free and usually has no

companions. By chance, my ancestor \*\*\*\* teaches something that needs to be resolved before it is issued. Order, if you are unwilling to do it, you can even tell the reason, the ancestors will not force it."

Wang Yi bowed slightly, "So, then I am willing to accept the position of guardian beast god."

"Very good." The double-sided ancestors stroked his palms in admiration. "From today, you Chaotic Source will be the 17th Guardian Beast God of our Ancestral God Church, and you are not under the jurisdiction of any Guardian God Lord. We will announce this matter so that the entire universe will know that you Chaotic Source, it is my ancestor \*\*\*\* who teaches and protects the beast god."

"Take this token away~[www.mtlnovel.com](http://www.mtlnovel.com)~ With a wave of the double-sided ancestor god, a golden light flew towards Wang Yi.

"If you imprint your life imprint, this ancestral order can only be used by you," said the double-sided ancestral god. "Through this ancestral order, you can contact the ancestral sect, and the ancestral sect will issue tasks, and it is also issued through the ancestral order. Within the scope of this universe, you can communicate through the ancestors' order."

"This token has extremely high authority and can directly contact our ancestor gods and other beast gods." The double-sided ancestor \*\*\*\* continued, "The ancestor god's order is very special. Don't lose it."

Wang Yi reached out and took the golden token. It was heavy and cold. There were only two characters on the Ancestral God's Order-"Ancestral God". This font is made up of countless secret patterns. Wang Yi didn't know him, but he knew it was the Ancestral God. Two words.

Coming out of the ancestral temple, Wang Yi was emotional when he saw the eight respectful guards at the door, but he didn't expect that he would suddenly become one of the beast gods of the ancestral gods.

#### [Chapter 483: Fifty-four Chaos Monument](#)

In the inheritance space in the Tongtian Tower, the rule of law Wang Yi is cultivating.

Wang Yi has already understood the second Secret Rune and has begun to comprehend the third Secret Rune.

Normally, it is easier to induce secret lines than to create secret lines!

Like some fifth-order top universe masters, none of them have created secrets of the strongest level in the universe. But it can urge the secret pattern of that level!

And Wang Yi's unique knowledge... is also destined to be able to induce higher levels of secret patterns.

"The third secret pattern, I feel it with my heart, I believe that I can barely urge it soon, but it is very difficult to use this to break the third trick. It is necessary to understand it." Wang Yi thought to himself.

Like the "Chaos City Lord", relying on the top domain category "Qianbaohe" to cross the universe, that is, to maximize the function of "Qianbaohe" and integrate it into his own unique knowledge.

What's more, some can combine the different treasures on the body to create a powerful and incomparably unique school.

Wang Yi raised his head and looked at the Sea of Laws, "Moreover, I am now the lord of the universe, and maintaining a flow rate of ten thousand times that would cost too much."

Ten thousand times of time cultivation is very extravagant, because "ten thousand times of time acceleration" originally violates the laws of time and space, so the more powerful people practice under time acceleration, the higher the price they need to pay!

Fortunately, the immortal level can also be supported by the venerable level.

But if the Lord of the Universe wants to maintain the flow rate of time ten thousand times, it is too difficult.

That is, Wang Yi can do this with the Tongtian Tower, otherwise the small universe of the strongest in the universe can carry out this kind of "acceleration". This is a great plunder of the origin of the respective small universe! The Lord of the universe is so oppressive to the small universe. If the strongest person in the universe tried to spend tens of thousands of times, the consumption would be even more outrageous. No one dares to do this for a long time!

So now that Wang Yi stepped into the Lord of the Universe, he didn't dare to maintain the tens of thousands of times the flow rate of time, except for an emergency, just a hundred times that.

"In addition to the secret enlightenment, there is also a divine body." Wang Yi was lost in thought.

His Youhai clone, he will continue to create and expand, reaching the limit of the original universe, comparable to the Lord of the Nine Nethers, it is only a matter of time.

But to analyze the composition of life, we must take the initiative to study.

The divine power route, the higher the genetic breakthrough, the more difficult it is. He was originally 10081 times the life gene. It is not difficult to analyze this level as long as it takes enough time and energy. Only by thoroughly analyzing 10081 times the life gene can you break through to a higher level.

On this road, there are several major hurdles. The first level is to break the limit of perfection. The second stage, breaking through 30,000 times the gene. The third hurdle exceeded 60,000 times. The fourth level exceeded 90,000 times.

In the end, it is a perfect 100,000-fold divine body.

In terms of genetic structure, the true \*\*\*\* is above the Lord of the universe.

It allowed Wang Yi to discover more directions for breakthroughs, but Wang Yi now only got the blood hair of the "Great Axe Founder"...the number is too small, and more is needed.

Wang Yi, who is familiar with the plot, has long understood the cultivation method of the divine body route.

1. Analyze the structure of billions of lives and billions of matter.

Second, create life.

Life that can reproduce is the most difficult to create! Like the Lord of Nine Nethers... all the lives created are born from his ocean, they are all energy lives, and they cannot reproduce.

It is the easiest and least difficult.

To allow life to multiply on its own, this involves the "origin of life", which is more complicated, and it is also of great help to the analysis of life.

Of course, according to Wang Yi's understanding, at the very least, he can evolve the divine body up to 50,000 times. Only at that level can he be qualified to create a multiplying life.

Use this to assist yourself...make yourself go higher on the line of divine power.

However, for Wang Yi, who has not even analyzed the 10081 times life gene, and the divine body has not broken the 10081 times limit, it is too far away.

With the help of the human race, with an order, hundreds of millions of races from all over the universe life body tissues, countless kinds of rocks, plants, metals, energy bodies, etc., are sent to Wang Yi here and thrown into the secluded sea. , To be parsed, to be studied.

Whether it is life or dead things, they are all collected and thrown into the endless secluded sea.

And this is destined to be a long and bumpy process.

The original universe, Chaos City.

Wang Yi and his teacher "Lord of Star Prison" were called by the Lord of Chaos City.

"Chaotic Origin, Star Prison, now you are all the masters of the universe, you can also leave a chaos monument in the group." Chaos City Lord mentioned.

Wang Yi and the Lord of Star Prison looked at each other. They didn't expect Chaos City Lord to call them over because of this incident.

"Leave a chaos monument?" Wang Yi thought about it, and felt that it was all right. This is not to accept disciples, but to leave his own orthodoxy.

The 52 chaotic monuments in Chaos City are left over by the super existence in the history of the human race. Even if they are not the Lord of the universe, they are very close to that level. There are only 21 floors, and each chaos monument can be cultivated to at least the realm of the venerable.

With Wang Yi's current law and realm, it is enough to leave a chaotic monument.

"Yes, I happen to have some insights about the law, which can be better expressed in the form of a chaotic monument." The Lord of Star Prison nodded.

"In that case, I also leave a chaos monument." Wang Yi smiled.

It's just that his cultivation path is rather special, the cultivation conditions are also very demanding, and he has high requirements for understanding and talent.

The Chaos Monument can help the younger generations to practice, but I don't know how many people will choose their own Chaos Monument, and how many people will be able to break through the Venerable.

"Haha, it's so good." Chaos City Lord laughed and said: "We are about to have two more Chaos Monuments in Chaos City, which is a good thing that will benefit all generations."

With a wave of the Chaos City Lord, there were two tall gray stone steles in front of him. They were of exactly the same material as the "Universal Chaos Stele" that Wang Yi had once felt. They were very precious, and allowed the powerful ones to deduct the way of the laws left by them in a peculiar way. Pass it on to the viewers.

Different cultivators will have different perceptions when viewing the same chaotic stele pattern.

Chaos City Lord has another knife in his hand, "Which one of you will come first."

"I'll do it first." Wang Yi stepped forward to take the treasure knife used for carving by the Lord of Chaos, walked to a blank gray stone stele, closed his eyes and pondered, and then started carving.

Swipe...

Wonderful patterns appeared on the blank stone tablets~[www.mtnovel.com](http://www.mtnovel.com)~ The Lord of Chaos City and the Lord of Star Prison were watching. With their eyes, it was natural to see that every pattern carved by Wang Yi seemed to be It is the embodiment of the law of origin, and contains the law to the truth.

The traces of the ten laws can be seen on it, and there is a faint blending, as if the ten laws are about to merge into one.

In fact, Wang Yi left a path of fusion of the eight laws on this chaos stele, which is equivalent to the way of the eight beasts and gods, and he can practice up to the sixth level, that is, the level of the overlord of the universe.

But there are also ten sources of the law of fusion mystery, but it is only a trace, can be understood, according to Wang Yi's thoughts, it is estimated that all the eight beasts and gods on the stone tablet must be understood to a very deep level.

If you divide it carefully, the entire Chaos Monument is estimated to be equivalent to the 23-24 levels of the Tongtian Bridge.

"This Chaos Monument is called Tongtian Chaos Monument."

[Chapter 484: Eclipse Palace Lord Breakthrough](#)

The original universe, Chaos City.

In the space cracks that were wantonly split in the sky, the secret patterns of the glittering silk floating in the cracks were entangled with each other, and the strange fluctuations of various original laws were faintly mixed in the viewing.

The ancient and vast city of Chaos is filled with chaotic air currents, quiet and peaceful, as if unchanged for billions of years. On the rooftops of the villas on both sides of the street, only a few of the strong men who meditate are sober, and most of them are immersed in penance. Enlightenment. Many people's beards and hair have grown very long, as if they hadn't been trimmed for hundreds of thousands of years.

And in the center of Chaos City, that is a majestic building about 300 meters high. From a distance, you can see the three most dazzling universal linguistic hearts of the City Lord's Mansion-"The City Lord's Mansion".

The entire city lord mansion often has messengers wearing black robes, and occasionally some immortal beings and world lords can be seen entering and leaving the city lord mansion.

Everyone knows that in Chaos City, there are 52 most precious chaotic steles of the human race. Each chaotic stele records a large number of mysterious patterns and so on. These 52 chaotic steles are avenues of 52 kinds of cultivation, leading directly to them. The most peak avenue! If you understand a chaos monument, it will directly become a real super existence in the universe, even if you want to open up a universe, it will be easy.

The City Lord's Mansion is vast and vast, with buildings inside, occupying an area of thousands of miles.

There are many bronze gates in the secret room of the 52 chaos steles, and in front of each bronze gate stands an old man with a benevolent face.

The three-eyed old man smiled and looked at the new group of little guys who had just arrived in front of him, "Oh, the new group of little guys from the Virtual Universe Company?"

Suddenly his expression moved slightly and he became cautious, showing a trace of respect, facing a certain direction.

At the end of the corridor, three figures appeared silently, each of them resembling the incarnation of laws condensed, like the supreme existence between heaven and earth.

One of them is the Chaos City Lord.

The other two are the Lord of Star Prison and Wang Yi who have just finished carving the Chaos Stele.

However, the newcomers of the Virtual Universe Company in the corridor, including the black robe messenger who were introduced, were completely invisible.

"City Lord of Chaos, Lord of Star Prison, Lord of Chaotic Origin." Kandry said respectfully.

He was also astonished in his heart. The three masters of the universe came to him together. Is there any major event?

Chaos City Lord smiled and said: "Kandry, from today, there will be two more Chaos Monuments here. Please separate two more avatars and guard them."

Kandry looked at the Lord of the Star Prison and the Lord of Chaotic Origin, shaking his body, showing a surprised expression, "Could it be..."

The Lord of Chaos City nodded and smiled and said: "Yes, it is the Heavenly Chaos Monument of the Lord of Chaotic Origin and the Star Chaos Monument of the Lord of Star Prison."

"So that's it." Kandry bowed respectfully, "The city lord has orders, and I take it for myself."

He was also secretly surprised, and scenes from Wang Yi's arrival tens of thousands of years ago flashed across his mind.

Unexpectedly, in such a short time, this little guy who participated in the genius battle has become the lord of the universe, leaving behind a chaos monument, which will last forever.

It made him feel inexplicably.

The scene where the Chaos City Lord talked with Kandri was not seen by the newcomer and the black robe messenger beside him. In their eyes, Kandri was still standing there alone with a smile on his face.

"Boom..."

Suddenly the entire City Lord's Mansion shook, and even the entire Chaos City could feel this shock.

Even the endless chaotic air current surrounding the entire Chaos City vibrated and boiled.

"What happened?"

"Why did it suddenly shake?"

The countless ancient existences in Chaos City, countless cultivators were awakened, and their eyes turned to the direction from which the shock came. That was the City Lord's Mansion.

The next moment a magnificent voice came, resounding through Chaos City.

"From today, I will set up two chaos monuments, "Tongtian" and "Xingyu" in Chaos City!"

"Anyone who is interested can come to comprehend!"

The vast voice echoed for a long time above the vast Chaos City.

"This is the voice of Chaos City Lord!"

"We humans have two more chaos monuments?"

"Xingyu? Tongtian? Was this created by the two new universe masters of our human race?"

Countless people were shocked.

In the secret room of the City Lord's Mansion, two new chaotic monuments have been added to the secret room.

The three-eyed old man Kandry looked at the dumbfounded newcomers with a smile. "By the way, which Chaos Monument you want to comprehend, now there is still a chance to change it."

The human race has two more chaotic monuments.

And this news spread rapidly among the human race.

And, it soon spread to other forces in the universe.

The core members of Giant Axe Fighting Field, Virtual Universe Company, Universe Mercenary Alliance, Universe First Bank, Universe Galaxy Bank... also know this.

"Tongtian Chaos Monument? Is this created by the Lord of Chaotic Source Wang Yi? His cultivation system, I don't know if he can learn from me." The Master of Xujin in the Giant Axe Fighting Field groaned. Looking at the two young men in front of him, one with short black hair, a sharp and cold-hearted young man, and a man with a warm smile on his bald head in white clothes. These are his two "little apprentices" and the two youngest apprentices of the founder of the giant axe.

"Wang Yi created a chaos monument." Hong and Lei Shen's expression also became very complicated.

Although the two have made great progress under the guidance of the founder of the great axe and the master of the virtual gold over the years, they are only immortal at the moment.

While they looked at the younger generations who grew up on the earth before, they are now standing at the pinnacle of the universe, and they have left a great existence in the human holy place of Chaos City with the Chaos Stele for people to admire.

"Brother Hong." Raytheon looked at Hong.

Hong smiled slightly.

"This is a good thing. From today, we will target Wang Yi."

Hong and Thunder God also both have ambitions. They are pure warriors, and they are so strong that even the Lord of the universe would marvel at them.

...

Primitive secret, a majestic black palace floating in the Qianbao River.

The length and width of the ninth floor hall are tens of thousands of kilometers~[www.mtlnovel.com](http://www.mtlnovel.com)~ and the height is tens of thousands of kilometers. Even the earth can be placed in this hall.

A figure is sitting cross-legged in the hall. He is wearing a silver robe, long brown-red hair, crystal skin, and there are raised marks on the center of his eyebrows. Except for the marks, the whole person is too similar to the people on earth. Although the height is average, in front of him, even those giants will feel that they are facing the endless world and feel that they are weak.

The breath of various origin laws lingers around him, and a series of mysterious laws and secret patterns are looming, intertwined, and constantly changing. The time origin and space origin fluctuate like sea water.

brush!

He suddenly opened his eyes. They were black eyes, deep and deep. At this moment, a scene of the birth and disintegration of the universe emerged, and it seemed to be an infinite avenue of heaven and earth.

"Boom..."

In the next moment, the law of origin of the universe comes!

#### [Chapter 485: Primordial star](#)

Virtual universe, in front of the Great Axe Temple.

On both sides of the stone table in front of the Great Axe Temple sits a famous universe lord.

The Eclipse Palace Lord, who has just been promoted to the Lord of the Universe, is also among them, sitting in a row with the other 7 Universe Lords of the Virtual Universe Company.

8 masters of the universe in one pulse!

Unparalleled grand occasion!

The other four powers, the masters of the universe, are a little envious and jealous.

Especially the cosmic galaxy bank where there are only two universe masters, the envy is beyond words.

The eclipse palace lord with long brown hair scattered and a silver robe was talking with other universe lords, and his voice was very elegant, as if the wind was blowing in a bamboo forest.

"Hahaha..." Loud and rough laughter sounded, and a giant axe like a savage man appeared.

"Today is a very happy day. During this time, our human race is really happy!" The founder of the giant axe has a brilliant face. He looked around and said with a loud voice: "Our human race has another universe lord, the eclipse palace. Lord! The number of Lords of the Race Universe has reached 21!"

"This is my human fortune!"

...

After the routine welcome and congratulations, the masters of the universe talked freely.

"The eclipse, the primordial star is about to open, are you going in?" An ethereal and pleasant voice sounded, and a female master of the universe spoke. Wang Yi remembered that this was the master of the universe, the "Lord of Clouds" in the giant axe battlefield. She is also one of the two female masters of the universe of the human race. From the outside, it looks like the "Mengluo Wing" tribe, with six pairs of white wings behind it, and the body seems to be condensed by light and shadow to make it unreal.

Although Palace Lord of Eclipse made a breakthrough, he did not intend to change his name. He still continued the name of Palace Lord of Eclipse. He nodded slightly and his face was calm. Besides. If it can be created, it will not be too late for me to go."

He couldn't help but glance at Wang Yi next to him. When he was practicing in retreat, he was isolated from the outside world and cut off from the virtual universe. So after the breakthrough, he learned that Wang Yi had become the lord of the universe first, and his heart was full of shock.

After all, Wang Yi is a genius of the same group as his apprentice Luo Feng. Now he is less than a hundred thousand years old. His apprentice is also a peerless genius. Although his combat power is

amazing, he is only immortal. Wang Yi has become the lord of the universe and has already joined him At the same level.

And then what shocked him even more was that Wang Yi actually inherited the "Tongtian Tower" and exchanged a piece of Xeon Supreme Treasure to the founder of the Great Axe, all of which made him feel incredible.

"Wang Yi, it's incredible..." The Palace Master of the Eclipse thoroughly understood Wang Yi's current status in the human race.

However, as the master of the universe of the virtual universe company, he is naturally closer to Wang Yi, so he doesn't need to think too much.

"The human race will have a large number of super powers entering the Primordial Star this time, and I have to work hard." The Eclipse Palace Master secretly said in his heart.

The primordial star has been on for a thousand eras, and the eclipse palace lord feels that he still has a chance.

The strong human beings are preparing to enter the primordial star. For example, several powerful people who can complement each other form a team, such as borrowing treasures from some powerful people who don't want to go to Primal Star, etc...

...

Time passed, year after year passed.

In a blink of an eye, it is the original star opening date.

"Luo Feng." On the top of Thunder Island, the Eclipse Palace Master walked on the palace corridor, his voice rang, "Tomorrow the Primitive Star will be on, I heard you are planning to go too?"

"Yes, teacher." Luo Feng followed behind the Eclipse Palace Master, respectfully.

"What do you plan to do? Who do you want to form a team with, and have you invited some strong people?" The Eclipse Palace Master asked. He still has to continue submerged cultivation and can't get in, but he still cares about this promising disciple.

Wang Yi has become the master of the universe, and he also expects this disciple to achieve it too.

Because I value it, I care about it. Otherwise, I won't specially get the "Ku Yu Wing" for him. Although it is not suitable for the Palace Lord of the Eclipse, it is always a treasure, not a treasure that can be given at will.

"If you want to form a team with someone, I can help." The Eclipse Palace Master said, "Your strength is still a little weaker. The Supreme Masters of the Universe are looking for two or three strong people to complement each other and add vitality. You too. It's time to find suitable strong people to help each other."

"I plan to go alone." Luo Feng said.

"Alone?" Palace Master of Eclipse stopped and looked at this apprentice who made him very satisfied.

"The disciple is only going to see and see, he will be careful." Luo Feng said.

"That's right, you, like the Lord of Chaotic Origin, have a sea of blood as your foundation." The Palace Lord of Eclipse pondered for a while and nodded.

"But everything is still the best, the Primordial Star is turned on, but the whole universe is gathered, even if there are many masters of the universe, if you are in danger, you should send out a cry for help to the other strong in the human race, don't force it." The palace master said, "You and the current Lord of Chaotic Source were once friends. The Lord of Chaotic Source is powerful, and he is not ordinary among the Lords of the Universe. He will also go in this time. If you can, you can also ask him for help."

"The disciple understands." Luo Feng nodded, but in his heart he wanted to use his own strength to sway in Primordial Star.

...

The next day, the original star is on!

This is a great event for hundreds of millions of races in the entire universe! Of course, those immortal gods don't know at all, this is a killing feast for the super strong...

The scene of the Primordial Star where each channel is opened, the channels are opened, the scene is earth-shattering, and the power is unlimited. The power of each channel is even more terrifying than the power of the Lord of the Universe.

Then a group of forces began to pour into Primal Star.

10081 channels are distributed all over the universe.

The superpowers composed of hundreds of millions of races in the universe, a super-existence, either act alone or join hands with each other, one by one, fly into the channel and enter the primordial star.

10081 original stars...

The \*\*\*\* killing begins!

The vast starry sky, a starry sky about 10 billion light-years away from the human territory, there are no planets in this starry sky, only storms formed by some electromagnetic fluid.

A figure of a dark red battle armor was standing in the starry sky, and the mighty and powerful aura made the surrounding starry sky stagnant, and even the law of origin was shaken.

Wang Yi looked ahead. Amidst waves of electromagnetic fluid storms, there was a huge vortex. The vortex was about tens of billions of kilometers in diameter. The pressure generated by the passage, generally immortal spirits will be crushed into nothingness.

"Original Star Channel!" Wang Yi whispered ~[www.mtlnovel.com](http://www.mtlnovel.com)~ I don't know how much I can get this time. "

In the next moment, Wang Yi rushed into the gorgeous passage, and as he flew toward the inside of the passage, the oppressive force became stronger and stronger.

"Boom..."

Amid the tremor and roar of the space caused by the oppression, Wang Yi's tiny figure disappeared directly into the depths of the passage.

...

A towering figure passed through the passage of a primordial star and directly descended on a primordial star.

Primitive Star is the place closest to the origin of the universe, a true treasure star!

There are also crises...

And if you step into the original star, you cannot connect to the virtual universe!

[Chapter 486: Wang Yi arrives](#)

"This is the original star!"

Wang Yi stood in the air, looking away. Behind him is the vortex channel, and the vortex is in mid-air.

"The boundless boundlessness." Standing in the air, Wang Yi felt the endless pressure acting on his body. This terrible pressure far exceeded that of a neutron star, and even the pressure of some heavy treasures was far less.

【Ding! 】

[The host has triggered the sign-in task [Treasure Hunt], collect 10 treasures on each original star, and exchange them with the panel for a chance to win a lottery. 】

[1% chance of Xeon to treasure]

[20% chance of peak treasure]

[79% chance of top treasure]

[The type of treasure is not limited, and it will be drawn randomly. 】

[Can only be done once on each original star. 】

[The treasure must be collected by the host itself, and cannot be obtained through any means other than its own behavior. All behaviors are automatically judged by the panel. 】

[Only one of the original stars can be selected for check-in and lottery. 】

[Friendly reminder: When you sign in at Primordial Star, the probability of getting Xeon Treasure is 0.01%]

[Currently collected treasures: 0/10, number of draws available: 0]

Wang Yi didn't expect that the panel task that he hadn't seen for many years suddenly popped up again, and he gave himself a big surprise.

"lottery?"

"10 treasures, one original star at a time?"

"The highest reward is Xeon Supreme?"

Wang Yi couldn't help gasping slightly.

This reward is a bit strong.

Although the probability is only 1%, the reward is of high value.

Xeon Zhibao has a minimum of 100,000 Zhibao points, and the high millions have millions.

Even if you haven't drawn the Xeon Supreme, there are the Peak Supreme and the Top Supreme.

The most common top treasure weapon is almost one hundred treasure points, if you get a domain, palace, or soul class, then thousands of them are possible.

And the probability of drawing the peak treasure is as high as 20%!

Xeon Zhibao is hard to come by!

No matter how you think, you don't lose.

Wang Yi became excited.

"There are 10,081 primordial stars, and the opening time is a thousand years, that is, 10 million years, and they will be closed." Wang Yi secretly said in his heart. "In other words, for each original star, I can stay at most for 1,000 years."

"No, all three clones must be pulled over."

In addition to the huge Youhai body remaining in the kingdom of God, the new Youhai clone with a genetic level of thousands of times higher than tens of thousands of kilometers must also join this operation to improve efficiency.

The four bodies are equivalent to the main combat power of the four universes, and there is the Yuhai body, even if all four bodies fall, they can still be resurrected in the Youhai.

"Besides, I'm the only one, a bit weak and weak, it is inevitable that there will be times when I am not strong enough."

"I have to ask my Human Hongmeng for help."

"Although it is impossible to directly let the human race powerhouses exchange treasures for me, they can indirectly help me seize the treasures."

For example, how could Wang Yi know where treasures were born.

With the help of the entire Hongmeng!

The venerables in the Hongmeng, thousands of people came in this time, and they spilled over tens of thousands of primordial stars, and the searchable and surveillance range was wide.

If Wang Yi is alone with four bodies, even if one body guards one primordial star, that is, four, it is so inefficient.

Upon discovering where there are treasures, although Primordial Stars cannot communicate with the virtual universe, for this action, the human race has already asked all the strong to leave divine avatars outside. These avatar consciousnesses are connected to the virtual universe and can also be connected.

The human race has 21 masters of the universe, and with Hongmeng, there are more than 40 masters of the universe.

The main body of the universe plus the clone, the number is more.

But even so, compared to 10081 primordial stars, the power is still too thin.

It is inconvenient to travel within the Primordial Star and cannot be teleported. Sometimes the treasure is born, and it is too late for the masters of the universe to arrive.

Wang Yi immediately contacted the human race. Although the Chaos City Lord and other human leaders did not understand why Wang Yi asked for it, they heard that it was related to the exchange of the Supreme Treasure of the Tongtian Tower.

"Maybe it is the tempering of the Tongtian Tower inheritance?" Chaos City Lord and other experts guessed that in their eyes, the Tongtian Tower was extremely mysterious, especially the power of the Tongtian Tower inheritance, which made them hard to imagine what existence it was.

It's normal that there will be some trials and hardships.

Of course, Wang Yi will not let the mankind's Hongmeng work in vain and make promises.

"Try to let Hunyuan win the treasure with his own hands?"

"Hunyuan promised to help him win a treasure, and everyone can get a high contribution value?"

"If it is a treasure that an individual has discovered and can be obtained, as long as it is guarded until the Lord of Chaotic Source recognizes the Lord, the Lord of Chaotic Source is willing to pay a higher price in exchange?"

Many unidentified masters of the universe are excited.

Today's contribution value is urgently needed by the lord of the human universe.

In the eyes of the masters of the universe, the contribution value is equal to the treasure dot.

Ordinary treasures, the Lord of the universe doesn't care, and sometimes doesn't even fight for it.

What can enter their eyes is the highest treasure, the top treasure, and the pinnacle treasure.

It is not so easy to get precious treasures in Primordial Star, and they often have to compete with a group of cosmic masters, not necessarily to obtain them, and may even be injured and fallen.

But now it is much easier to help the Lord of Chaotic Source to fight for the treasure.

The probability of the appearance of ordinary treasures is much higher than that of other high treasures, top treasures, and the general master of the universe will not fight because of this, which is not worth it.

Although Wang Yi's request that he must get the treasures by himself was very strange, the masters of the universe were still very moved.

They responded, and if they meet the treasure in other primitive stars, they will definitely notify Wang Yi, and even wait for him to arrive.

Not only the human race, but the masters of the universe of Hongmeng are also very interested in this. After all, the rewards of the masters of the chaotic source are very high, things seem to be easy, and they are also very excited.

Lord of Qingdong (Human Race): Don't worry, Hunyuan, I will definitely let you know.

The Lord of Youhou (Human Race) \*\*\*\* to me.

Lord of Flint (Hongmeng Alien): Of course I will help the Lord of Chaotic Source with this little help.

Lord of Mantis (Hongmeng Alien Race): Haha...Since the Lord of Chaotic Source is willing to pay such a big price, then I will join in the fun too.

...

The lord of the universe, or the human race, or the Hongmeng, after receiving the news, said that as long as the treasure is found, they will definitely notify the Hongmeng and notify the Hunyuan.

By leaving an avatar outside, consciousness can enter the virtual universe at any time, and they want to connect only in an instant.

Although the Lord of the Universe of Hongmeng didn't understand why human beings fully supported the actions of the Lord of Chaotic Source, there were advantages, and they would not refuse.

"I found a common treasure and won it alone, and waited until the Lord of Chaotic Source came to recognize the master, can I get at least half the contribution value of the common treasure?"

"The same goes for the Highest Treasures?"

"What the \*\*\*\* is the Lord of Chaotic Source doing?"

The lord of the Hongmeng alien universe talked about it privately~[www.mtlnovel.com](http://www.mtlnovel.com)~ They didn't understand what benefit this would do to mankind and the lord of Chaotic Source.

On the other side of the human race, Wang Yi gave a more thorough explanation, which made the human powerhouses such as Chaos City Lord really crazy.

This time... there is a chance to get Xeon Treasure.

Just this sentence is enough to make the human race determined to help Wang Yi seize the treasure.

And the power of the entire Hongmeng was also activated instantly.

However, the Venerables of the Universe didn't know the above things. They only knew that they found the most precious treasure and immediately reported it, and they would get a greater contribution value than before, and the Venerables' enthusiasm for searching was also increased.

The strong men of the Hongmeng who originally wanted to stay somewhere and wait for a while or do other things changed their goals and started searching around the Primordial Star to see where the treasure was born.

#### [Chapter 487: Treasure hunt](#)

On the original star numbered 00239.

"Although it is decided to carry out the lottery task, we still have to try signing in to reward." Wang Yi secretly said.

It is a bit impractical to rely on the collection of treasures to draw all the 10081 original stars, which is equivalent to collecting 100,000 treasures.

During the entire primordial star opening period, it is not certain whether there are 10,000 treasures born.

So it can't be done at all.

But Wang Yi had to do it. It was so fragrant that one percent of the rewards from Xeon Zhibao were rewarded. Moreover, the lowest prizes in the lottery draw were the top treasures, so you can't easily miss it.

"Ten million years have been spent on Primordial Star. Try to choose a lottery. If it doesn't work, sign in at the end, it's not a waste."

"Try your luck from this primordial star first." Wang Yi looked down at the vast land.

"Sign in."

[Ding, congratulations to the host for signing in successfully, and reward "Menghezhou". ]

"The treasure of the palace?" Wang Yi was a little surprised, and excitedly put it on the panel for identification, but he was disappointed.

Menghezhou: worth 33 treasure points.

It's just a treasure of ordinary flying palaces.

But Wang Yi also expected this.

In fact, regardless of whether it is signing in or using 10 treasures to draw a lottery, Wang Yi will not lose.

Even if all the 10081 original stars are signed in, Wang Yi can get at least 10081 treasures.

But according to the urinary properties of the panel, more than 90% of them are estimated to be ordinary treasures, and all together, it is estimated that they are not as good as a Xeon treasure!

Therefore, the lucky draw opportunity must be seized.

And he can't use too precious, such as high palace treasures, top treasures to exchange for lucky draw opportunities, that is, ordinary treasures, and ordinary high treasures of low value, will be exchanged for lucky draw opportunities.

For the slightest possibility of getting the Xeon Supreme!

One percent, it looks very low, but what you get is Xeon Supreme!

In the primitive universe, the Xeon Supreme Treasure is the treasure of the town clan! The strongest in the universe will compete frantically.

And what Wang Yi paid, that is, some ordinary treasures and a sign-in opportunity...however, it is worth it!

Even if you can't get the Xeon Arcana, you can also get any kind of the pinnacle Arcana, or the top Arcana!

No loss.

It is natural for Wang Yi to want to take a fight.

"In addition to collecting the treasures born on the Primordial Star, there may be another possibility in this collection..." Wang Yi thought.

If that's the case, it means he is going to kill again.

"Wow!" Three figures appeared beside Wang Yi. They were more than ten meters high, with black unicorns on their foreheads, blood-red eyes with flames beating in their eyes, and a layer of red scales all over the body. A pair of sharp wings, at the same time a scythe-pointed tail, exuding a scorching scorching scaly creature... the flame star behemoth clone human form, because it has changed, even if the star behemoth is hard to recognize its original identity.

Beside him was floating a three-meter-high silver armored humanoid life, with a pair of silver wings spread out behind him, and two war knives on his back, only a pair of silvery white eyes were exposed. This is the clone of the Void Zerg.

Finally...the new Youhai clone of a thousand times the genetic level, created by Endless Youhai, is also the weakest one. Of course, it's just the genetic level and the divine body difference, and the treasure is not the best in the body, but there is also the Lord of the universe. Of combat power.

Wang Yi looked at the three clones. "I just wanted to bring only two clones, but I didn't expect all of them to be dispatched in the end."

His gaze finally stopped on the "flaming star behemoth clone". In fact, among the four bodies, after the perfect genetic level, among the clones that can act, the flame star behemoth has the best talent, the largest divine body, and the highest strength.

"This time, let the Yanxing Giant Beast be the strongest combat power." Wang Yi said lightly, "Blood Cloud Bead", "Fantasy Slash", "Tongtian Tower", "Tianluo Diwang", "Jia Jia", " "Primitive Soul", "Chaotic Wings" (first pair)... The best treasures in Wang Yi's body have been transferred to the Yan Xing Giant Beast, causing the Yan Xing Giant's combat power to soar immediately.

"I have too many concerns with the clone that may be exposed, and there are some things that I can't do on the bright side."

"If necessary... The Hell Lord disguised by the Flame Star Giant Beast can be born again."

"The lord of \*\*\*\* is a public enemy of the universe, but there is no camp." Wang Yi showed a sneer on his face.

The treasures of other bodies are far inferior to the equipment of the Yanxing Giant Beast clone, but they are also at the level of the Lord of the Normal Universe. Therefore, as long as Wang Yi does not encounter the Lord of the Universe who is too against the sky, there is no need to worry too much.

"The new clone of Youhai will act together with the clone of Yanxing Giant Beast."

"And I and the Void Zerg clone are also separated."

"Three parties together."

Wang Yi took a look at the pinnacle treasure weapon (the other pinnacle sword in exchange for the \*\*\*\* knife and the panel) and the top treasure armor (the \*\*\*\* armor) on his human deity, and then took a look at the palace treasure "Menghe" he just obtained. Boat", chuckled.

Although knowing that this is the configuration of most normal universe masters, he still feels a little shabby inexplicably.

"When will each body be equipped with a set of Xeon Supreme Treasures, that's cool..."

"Begin, the treasure hunt of Primordial Star."

...

There are a total of 10081 primitive stars, each of the same size, with a diameter of about 100 billion kilometers!

The spatial fluctuations on the entire Primordial Star were completely stopped, and that powerful to the limit pressure... was enough to turn ordinary immortal gods directly into nothingness. This strong pressure made the space tremble, making it impossible for the kingdom of God to transmit.

Cannot teleport!

Unable to teleport to the kingdom of God!

With a diameter of only 100 billion kilometers, it doesn't seem to be too big for a super strong... It should be understood that under such terrible pressure, although Wang Yi and the others can accelerate to close to the speed of light, it takes longer to accelerate.

Sudden steering, shifting, and changes will be significantly slower than the outside world... this kind of super pressure... is like a domain released by a huge domain-like treasure.

"With a diameter of 100 billion kilometers, no matter how strong it is, no matter how strong it is, it can only reach sub-light speeds at most without teleporting and breaking the space barriers." Wang Yi said with emotion while flying in the mountains and forests. "In other words, if you want to fly around this planet, it will take almost 4 days."

Even if the strongest in the universe is at this speed, the primordial star is the place closest to the origin of the universe, and the utterance of the strongest in the universe is not easy to use here, that is, the ability to control time and space is strengthened. In fact, other universes How does the lord move~www.mtlnovel.com~ how do they move, so it is not so easy for the strongest in the universe to kill the lord of the universe here.

Wang Yi did not release the space-time realm and mastered this space-time, but moved forward in a low-key manner while carefully sensing the energy aura. According to the information obtained, inducing energy aura on the Primordial Star is a way for most powerful people to find treasures.

"There is no need to release the space-time realm. The energy aura of the birth of a heavy treasure is very low and it is useless to me." Wang Yi looked very leisurely. "The aura of the birth of the treasure is generally very strong. It is easier for me to master the surrounding time and space than other strong ones. Induction, it will be too late to use the space-time domain at that time."

The entire primordial star is just that big, and the space-time domain of the Lord of the Universe can be completely covered.

The Lord of the Universe controls the strength of a space-time domain, and if it explodes, it can even directly obliterate the weak and weak Cosmos Venerable Divine Body, at least it is difficult for the higher Universe Venerable to resist.

Sitting firmly on the Diaoyutai, Wang Yi certainly would not explore and venture as cautiously as other venerables.

#### [Chapter 488: Primordial star](#)

Wang Yi stopped in a lush mountain forest, on an ancient tree towering into the clouds, sitting on the canopy and looking at the sky.

"Stay here for a while." Wang Yi touched the branches under him. Because of the original pressure of the Primitive Star, the weaker immortal spirits would be annihilated, but these trees, flowers, plants, mountains and rocks survived intact. There is no doubt that these branches, flowers and plants And so on, they can all be used to build ordinary immortal weapons, they are definitely valuable and rare materials.

"Furthermore, according to the information...flowers and trees are difficult to damage. Even if the superpower damages them, they will condense and grow back to their original state."

The flowers and trees here are one with the original stars.

Although it can be temporarily taken away by violence, these will quickly return to the original place on the original star.

Everything is destined to be useless. Only items that are not "connected as one" with Primordial Star, such as some born treasures, etc... can be taken away.

"It's really quiet." Wang Yi looked at the beautiful and peaceful scenery around him. There were no beasts here, of course it was quiet.

All the powerhouses who hunt for treasure in Primordial Stars will not run stupidly. Almost all of them stay in one place and wait silently, sensing their breath. Once they sense some special movement, they will immediately rush away.

Thoughts flew in my mind.

"Waiting like this doesn't seem to be the answer."

"There are too many original stars, and I am destined to not collect too many treasures for the lottery. It is better to sign in some original stars and accumulate some treasures. If I can sign a few peak treasures, it will be of great help to me now. "

According to the description of the data.

There are 10081 primordial stars, and there are 10081 vortex channels randomly distributed in the midair of each primordial star, one of which is out (the exit of the vortex channel through which Wang Yi came)!

The other 10080 channels lead to the other 10080 primitive stars.

In other words, there are channels to connect to the outside world, and there are channels to connect to other primitive stars.

"My human body should go to other primordial stars to sign in first. Even if you can't sign in all, you have to sign in part." Wang Yi stood up, clapped his hands, and his figure rose into the sky, turning into a stream of light and flying into the distance, speeding up continuously. Soon it rises to the speed of light.

"The pressure of the primordial star is really terrifying. I am afraid that the ordinary cosmic venerable can hardly move here, and only the advanced cosmic venerable can move freely. It is no wonder that the primordial star is almost all the advanced cosmic venerable." Wang Yi felt that the primordial star was exerting on it. The pressure on the body secretly said in my heart.

But this little pressure is nothing to him.

"Boom..." Wang Yi did not constrain his aura, nor did he deliberately exude his aura, but the terrifying divine coercion of the Lord of the Universe still swarmed everywhere, making some of the Cosmos Venerables passing by along the way frightened and retreated.

"What a terrible breath!"

"It's the Lord of the universe!"

"Which Lord of the Universe is this?"

Most of the higher cosmic lords who came to the Primordial Star were teamed up, and only the cosmic overlord acted alone.

The Lord of the Universe, here, he really went sideways.

Unless another cosmic lord appears to fight, even the top cosmic hegemon will have to retreat in front of the great cosmic lord.

Wang Yi was flying, and suddenly, "Boom!" A wave of energy passed over a long distance to Wang Yi.

"Treasures are born?" Wang Yi tilted his head slightly, he didn't expand the realm of time and space, but flew in secretly.

"The energy fluctuation is so small, it's probably not a good baby, but if you encounter it, it's good to see it."

Wang Yi kept close to the light and quickly passed a mountain range, and soon he saw more than a dozen powerful men fighting on the vast black plain far away.

"Thirteen Cosmos Venerables." Wang Yi glanced at it, "divided into four forces, this is a big melee, hey, there are also my human alliance."

It is the Human Alliance, the Prison Alliance, the Fengfeng Alliance and the Ancestral Gods that are fighting on the plains.

There are nine superpowers in the universe, and twelve top powers. The twelve top strengths, in terms of the number of races and the number of cosmic venerables, are not necessarily inferior to the human alliance, the monster race alliance, etc... but they do not have the strongest person in the universe to sit in!

Wang Yi glanced around again, "There are still five strong teams staring."

And a group of cosmic venerables who were scrambling for treasures in the arena were also shocked by the sudden appearance of a powerful aura.

"Lord of the universe!"

"It's the Lord of the universe!"

They hurriedly dispersed like frightened birds.

That is, Wang Yi deliberately restrained his breath. Otherwise they could feel it from a distance.

In front of the Lord of the Universe, no one dared to fight for the treasures, let alone just a few heavy treasures, just kill them by themselves, and grab them in front of the Lord of the Universe.

"I have seen the Lord of Chaotic Source." The strong men of the Human Alliance recognized that this was the Lord of the Universe on their side, showing joy and bowing slightly.

"I have seen the Lord of Chaotic Source." The strong man on the side of the Ancestral God Sect also saluted.

The news that Wang Yi was one of the beast gods of the ancestral sect was already known to everyone, and he was also his own person. Of course, the ancestral sect members were not afraid that Wang Yi would attack them.

But others such as the Zerg Alliance, the Prison Alliance... etc. are not so easy, and they also force themselves to calm down and bow to see you.

"Master of Chaotic Source."

Wang Yi glanced at the respectful Cosmos Venerables all around him, with a hint of emotion, and said, "This precious treasure is owned by my Human Alliance."

Venerable Universe from other parties did not dare to object, nor complained. Although I felt that a lofty master of the universe personally went down to help his Venerable to grab the treasure, it was a bit too bullying, but whoever allowed himself to be unlucky, just happened to meet the other party. The Lord of the universe is nearby.

"These precious treasures are useless to me, you can take them away." Wang Yi said to the venerable Hongmeng again.

"Thank you, the Lord of Chaotic Source." Several Hongmeng Universe Venerables showed joy.

Wang Yi glanced at the precious treasures that were born on the plain again, but unfortunately they weren't the most precious treasures, so he ran for nothing.

The treasure, if the breath is reduced, it is difficult to tell whether it is a treasure or a treasure from the outside.

Primitive stars are treasure stars with many treasures.

The birth of heavy treasures...nothing happened~[www.mtlnovel.com](http://www.mtlnovel.com)~ Some top-level suit heavy treasures may have a little movement, but "the birth of the most precious treasure" is definitely moving!

The greater the movement, the higher the level of the treasure! There is even a palace specially emerging from the ground, and there are treasures hidden in the palace, etc...

One sentence.

The greater the movement, the more high-level treasure.

...

Seeing that they had nothing to do with them, the strong teams from all sides dispersed. They were not worried that the Lord of Chaotic Source would kill. The Lord of the Universe still pays attention to identity, and will not rashly attack the ordinary cosmic venerables, but each Fang also has unspoken rules. Under normal circumstances, unless the two forces break out into a war, the Lord of the Universe cannot kill the Universe Venerables of other parties at will.

Of course, if it were to "move to the treasure house" with many precious treasures like Luo Feng, it would be different, and the Lord of the universe would not let it go.

## [Chapter 489: Tireless](#)

"Huh?" Wang Yi saw the space vortex in the distant mid-air at a glance. "A vortex channel. I don't know which primordial star this channel leads to."

"Go and see." Wang Yi turned into a streamer and rushed into the huge space vortex.

In another primitive star named 01755, a majestic figure with a powerful breath flew out of the whirlpool passage in mid-air.

The red armor and the sword on his back are Wang Yi's human deity.

"This is the original star 01755." Wang Yi found out after checking it.

"There is no news from Hongmeng now, it seems that there are very few treasures born."

"Check in first."

Wang Yi is also unambiguous.

With 10081 original stars, it is estimated that he can draw very few prizes.

Let's talk about improving the strength first.

And Wang Yi remembered.

After more than 10,000 years, Luo Feng will break through the nobleman, rise strongly, and become the lord of the universe.

The "Broken East River Legacy" of the Universe Sea will appear in about 50,000 years. Even if Wang Yi wanted to continue mixing on the Primordial Star at that time, it would be impossible.

The world of Jin will appear in eight million years.

"Although the primordial star is good, it is still too small compared with the universe." Wang Yi understood.

However, before going to the Universe Sea, I must first search for the benefits of the Primordial Star and accumulate more strength.

Otherwise, it would be embarrassing if you can't do any of them.

"If it doesn't work, let me go to the Universe Sea to get familiar with the environment first, and make a stand. The human deity stays in the Primordial Star." Wang Yi glanced around. It was a vast plain, no one.

"Sign in."

[Ding, congratulations to the host for signing in successfully, and reward "Ryumata". ]

Panel appraisal, Longmata cone, worth 1.3 treasure points.

The most common treasure.

Wang Yi was a little disappointed.

But he immediately cleared up his mood.

"Go to the next primordial star."

Each primordial star is 100 billion kilometers in diameter, there are 10,080 space vortices leading to other primordial stars, and one directly leads to the outside world.

Wang Yi just left, and suddenly stopped again. When he swept his eyes inadvertently just now, he found something underneath.

There was a small river winding across the plain, the river was gurgling, and a figure fell from the sky and fell in the small river.

"Wow~~" A black prismatic object half buried in the sand of the river was directly caught by Wang Yi.

Under the divine power sweep, the mud, sand and water completely fell off, and a simple object with some complicated rules and secret patterns on the top was completely revealed. The top half is sharp and the bottom is round. It is very unique and has a faint aura. It is obviously a treasure.

"It's a treasure." Wang Yi showed a strange look on his face.

Put it on the panel for appraisal, which is worth 123 treasures, which is not bad.

"It should be a top treasure."

The imprint of Wang Yi's life was imprinted on this sharp round object. Suddenly the heavy treasure became his. With the transmission of messages, the object quickly shrank and became only the size of a jujube kernel.

There are many treasures on the primitive stars. Some heavy treasures are born without any movement, so they may appear in rivers, mud, etc., and they can be stepped on by walking... This has happened many times in history.

"But hiding here, if it weren't for my sharp eyes, I'm afraid I would be almost unlucky." Wang Yi shook his head.

However, there are indeed many Primal Star Heavy Treasures... As long as you mix in Primal Stars for a longer time, it is not difficult to get dozens of hundreds of Heavy Treasures, and you can completely hand over to the ethnic group to exchange for a set of Heavy Treasures!

And these heavy treasures can also be disassembled, and some precious materials that are disassembled are usually difficult to collect.

After dismantling a large number of treasures, using countless precious materials, gather together, there is absolutely hope to create an ordinary treasure!

It is difficult to refine ordinary treasures...after all, to create super treasures such as "Jia Jia", "Primary Soul" and "Yan God Halberd", I am afraid that only the "Sit Mountain Guest" who refining treasures can do it.

But Wang Yi is different. He has a panel that can be exchanged directly at will, don't care.

"I hope my luck will be so good in the future."

Although the treasure was not of high value, it made Wang Yi feel good.

Wang Yi soared into the sky, as fast as lightning, and regarded the huge pressure of the primordial star as nothing. If an ordinary cosmic Venerable wanted to maintain this speed, he would have to burn the divine body, but it was very easy for Wang Yi.

The other strong teams that I saw along the way felt the breathtaking and towering figure, and all of them were scared to hide.

Such a terrifying aura must be at least the top cosmic overlord, so it's better to stay away.

But this time Wang Yi never saw the strong fight again.

The powerhouses in Primordial Stars are all very cautious, and they won't be easy to shoot if they don't have enough treasures to attract or have full confidence.

He quickly saw the next whirlpool.

...

Original star number 01632.

"Sign in."

[Ding, congratulations to the host for signing in successfully, and reward the "Bronze Bone Heart". ]

Value 3.5 treasure points.

...

The original star number 03748.

[Ding, congratulations to the host for signing in successfully and rewarding "Eternal Life". ]

Worth 6.9 treasure points.

...

The original star numbered 05112.

[Ding, congratulations to the host for signing in successfully, and reward "Donglilo". ]

Value 0.9 treasure point.

...

Wang Yi kept signing in, and at his speed, through the nearest whirlpool channel, he could sign more than 20 primordial stars in one day.

Get more than 20 treasures.

However, as he expected...most of them are ordinary treasures, and the value is low!

Check-in 107 times within five days, 89 ordinary treasures, the highest palace category among the ordinary treasures, but only 80 treasures.

There are 16 high-level treasures, the highest is the first-class treasure, worth 890 treasure points.

There are 2 top treasures, one weapon, 103 treasure points, and one flying assist treasure, 950 treasure points.

The peak treasure, the number is zero.

Add up to a total of 12533 treasure points.

Wang Yi didn't know whether he should be happy or worried.

To get tens of thousands of treasure points in five days, none of the strongest in the universe can do it.

However, most of the sign-in items are ordinary treasures, and the value is too low.

But then I think about it, 107 original stars can get tens of thousands of treasure points, 10081 all signed in, at least one million points.

It is more than enough to exchange ten Xeon Xeon weapons.

"Even if I sign in halfway, I can get at least 500,000 Arcana Points, which can be exchanged for a Xeon Arcana." Wang Yi's spirits lifted.

He now has weapons, palace, domain type treasure, and lack of battle armor and soul type treasure.

The soul class doesn't want to temporarily, the exchange price is too scary.

Battle armor can.

If you add a Xeon Supreme Armor, then his defense will be against the sky.

Xeon Supreme Treasure Armor generally weakens one-hundredthousandths of material attacks and also weakens some soul attacks, but the upper limit of damage is very high. Generally, it is impossible to reach the upper limit below the sixth level, and it is up to three layers compared to the peak arcade. There are more heavy secret lines that can be activated.

The higher the activation, the stronger the defense ability.

"Hehe." Wang Yi smiled triumphantly and continued his tireless signing career.

"According to this speed, it is estimated that half of the original stars can be signed in two years. That is to say, in two years, I can have a Xeon Arcana."

[Chapter 490: When the action is in progress](#)

The days on the primordial star are very dull and boring. Unless the treasure is born, the powerhouses of all parties will quietly squat in one place and wait for the movement of the treasure. Once they find the movement of the treasure, it will be like a shark smelling blood. Swarmed.

However, among them, there was a figure that quietly shuttled across Primitive Stars.

Because Wang Yi was deliberately low-key, converged, and did not release the space-time realm, Wang Yi descended on each primordial star and left from the nearest vortex channel every time he signed in, so there was hardly much wind.

In a blink of an eye, one month passed. During this period, there were two news of the treasure from Hongmeng, but the treasure was taken away before Wang Yi passed. In this case, Wang Yi had nothing to do. If the treasure was returned It's okay if you haven't been snatched...after the fact, if a master of the universe deliberately snatches the weak for an ordinary treasure, it would be too embarrassing to do so.

It's like an adult grabbing a kid's candy, it's not embarrassing enough!

"The identity of the lord of the human universe is a shackle. If he is a \*\*\*\* lord who does no evil, he kills as he pleases, as he pleases, there are so many constraints." Wang Yi sighed in his heart.

"However, in the past four months, I also signed in 2230 times and got more than 300,000 points." Wang Yi felt better after thinking about it.

Over 2,200 check-ins, such a huge number of check-ins, finally got more than ten peak treasures. Wang Yi, including his clone, was re-armed once. At least every combat power can be exchanged for a Xeon treasure weapon. Of course, and the most The powerful Yanxing Giant Beast is incomparable, but the three strongest treasures are in it, and it is simply inhumane.

However, considering various circumstances, Wang Yi temporarily exchanged it for each body into weapon armor, palace, domain, and soul peak treasure.

Make up for the shortage in yourself.

For example, the best products among the peak treasures of souls, domains, and palaces, there are tens of thousands of treasures, and some are more expensive than the strongest treasures.

Wang Yi's shotgun changed and his combat power soared!

The feeling of being powerful and the joy of harvesting made Wang Yi more motivated to act.

Each primordial star takes one or two hours as fast as possible, which is at most 7 or 8 days away (from a primordial star to a channel, and then from another primordial star to the farthest channel), and there is no danger along the way , For Wang Yi, it is very easy.

"Signed in more than 2,200 times, and only 11 of the peak treasures...the probability is not even 1%" Wang Yi shook his head and sighed.

"If there is a lottery, the probability is one in five!"

This is the gap!

There is also a 1% chance of getting the Xeon Supreme!

In the panel identification, the probability of getting the Xeon Treasure after signing in with the original star is not even one in ten thousand!

Basically it is a lucky draw.

And if you sign in, although the probability is also very low, it is after all too much higher than the sign in. If you sign in a palace or soul and other high-value Xeon treasures, then Wang Yi will make a lot of money.

"There is still a lot of redemption chance for the lottery..."

It has only been more than four months now, and there are not many treasures born, the Primordial Star has been on for a long time, and Wang Yi is still very patient now.

In the virtual universe, the Human Alliance, a magnificent and majestic palace suspended in the splendid galaxy, a group of Lords of the Hongmeng universe gathered to exchange information on the original stars.

Like the Primordial Star, it's normal to travel for thousands of years. Venerables of the universe and the masters of the universe gather in a secret realm. It is also convenient to connect to the virtual universe for communication and to facilitate actions. If there is any trouble, the strong in other places will also Can receive messages quickly.

And this time the Primordial Star was turned on, and the large-scale entry of the masters of the universe of the Human Alliance also attracted the attention of some major forces in the universe. Of course, they were still guessing the intentions of mankind, and at the same time heightened their vigilance and did not act rashly.

The Lord of the Hongmeng Alien Universe was tied to the same chariot as the human race, but only received a bit of wind. As for the top secrets such as "Tongtian Tower" and "Exchangeable Treasure", they still don't know.

They all thought that the human race was heading for the Primordial Star Treasure.

This is actually true.

"Longxing, have you gained anything during this period of time?"

"No, but I met with the Lord of the Blood Chisel of the Monster Race on Primordial Star No. 0701."

"You didn't do it, right?"

"There is no treasure, and you can't kill, how is it possible."

"My place is very boring. I don't have a treasure, but those little guys are a bit rewarding."

"It's just a little bit of treasure, and I'm happy, you see it?"

More than 15 masters of the universe from the human race and 13 masters of the universe from the Hongmeng and other races gathered in the hall. The gods fit the tall throne, like a starry sky giant talking, drinking and chatting, and laughter rumbling.

Not all the masters of the universe are here, after all, they occasionally have their own things to deal with or are unwilling to log in to the virtual universe at any time.

It's like the Palace Master of Eclipse, who just broke through to the Lord of the Universe, is practicing with great concentration, ignoring the activation of the Primordial Star this time.

"Hunyuan, how about you?" a Hongmeng's face was like a rock-carved universe lord asked.

Although they haven't been acquainted for a long time, the masters of these Hongmeng and alien universes have become very familiar with the newly-born super existence of the human race.

Sitting in the corner with a red robe and black hair casually draped, Wang Yi held a crystal glass and smiled and said, "I don't have much luck. I haven't gained much these days. I only picked up a treasure, but I was in the original star numbered 00231 a few days ago. I ran into the Lord of Catfish from the Monster Race Alliance."

Picked up one piece of heavy treasure, and "picked up" three pieces of Xeon treasure. Wang Yi muttered in his heart.

"Choose a heavy treasure? Well, this luck is fine."

"Ha ha."

"Speaking of which, there are so many masters of the universe in the Monster Race Alliance."

"No way, the monster race has a huge population, and many of them have high pedigree talents, so that they will give birth to more masters of the universe."

"The Monster Race Alliance is nothing, the Northern Xinjiang Alliance is really many."

"Speaking of which, I heard that the Galaxy Lord of the Northern Xinjiang Alliance also appeared on the Primordial Star."

"Well~[www.mtlnovel.com](http://www.mtlnovel.com)~ The Lord of the Galaxy, the Lord of the Black Lotus, and the Star Lord of Lanlan are all very powerful." The Lord of Chaos City was also there, smiling.

The Northern Frontier Alliance is a super alliance, with a large number of idle races gathered, and the number of masters of the universe is about a hundred!

After all, elite alliances like Hongmeng have about forty masters of the universe.

One can imagine the number of "Masters of the Universe" in this loose super-large alliance in Northern Xinjiang, and its interior is also divided into many factions.

As for the leader of Northern Xinjiang? It's just a name, and the two sides help each other.

On the contrary, the lord of the galaxy, the lord of the black lotus, and the star lord of Lanlan have real influence. All three of them are "Top 5" combat power!

Everyone is not inferior to Chaos City Lord.

For example, if some cosmic masters of Hongmeng meet individually with top cosmic masters such as the master of galaxy, it is a bit dangerous.
