

A God 571

[Chapter 571: Into the universe](#)

The Toya black hole is the strongest black hole in the primitive universe.

If a Venerable Universe is here, he will definitely be torn to pieces, but it is not a big deal to Wang Yi and the giant axe, and he can easily fly to the deepest part of Toya's black hole.

Wang Yi looked curiously.

There are endless terrible distortions and swallowing power. It can be seen that the body of the Toya black hole is a black sphere about three meters high. The surface of the sphere has dark golden secret patterns, and countless secret patterns form a pair. Very strange patterns, even Wang Yi's current secret pattern creation can be done with the strongest secret method, and it is actually a bit invisible for a while.

"It really is a miracle of the universe." Wang Yi thought to himself. "Naturally, the Toya black hole was born, which even the Venerable Universe can easily annihilate, and it also happens to form a channel at the junction of the primitive universe and the universe sea."

He looked forward, "Get out of here, it's the universe."

Wang Yi and the giant axe flew out of a hole nearly 10,000 kilometers in diameter that was torn out by the powerful twisting force of the Toya black hole. The scene outside came into view, making his pupils slightly enlarged.

The surrounding chaotic air currents that seemed to be foggy, the endless chaotic air currents produced monstrous coercion, and the oppression was so strong that it was simply appalling.

Although these chaotic air currents did not deliberately attack, the coercion that was naturally emitted was enough to wipe out an immortal god.

Chaos airflow, a source of energy for the universe.

The small universes of the strongest in the universe all use this chaotic air current as a source of energy.

The chaotic air in the universe has the highest purity, at least much purer than the chaotic air in the initial universe of mankind.

Moreover, the energy of chaotic airflow is very magical, so far no life has been discovered that can directly absorb and transform it.

"So many, so pure chaotic air currents, here are the strongest secrets similar to the 'mirage world' and the 'mini universe', which consumes a lot less and has greater power." Wang Yi looked at the surrounding scenery, his eyes There is wonder.

Boundless, big, and too big, it has completely exceeded the limit of any life's imagination.

And behind is a huge membrane wall that diffuses to the surroundings, as if a huge curtain wall with no end in sight, as if the entire universe sea directly obscured the other half of the original universe.

He didn't feel the pressure of this primitive universe at all, he just felt unattainable. Ordinary people can't feel the pressure when they look up at the sun. I just feel that the sun is unattainable.

It seems that the existence in two worlds is always in sight. It is a huge gap in the level of life.

"It's really spectacular." Wang Yi sighed.

The founder of the giant axe smiled slightly and looked into the distance. "Everyone like you who first enters the universe and sees the appearance of the universe and the primitive universe has such emotions, but when you get to know it soon, you will feel boring and boring."

The giant axe teleported Wang Yi to a void, where there were 39 twisted spatial openings, all of which were natural wormholes.

It is the natural wormhole closest to the Toya black hole.

After Wang Yi learned to identify, the giant axe teleported with Wang Yi again.

The teleportation of the strongest in the universe is much farther than that of the Lord of the universe, and they also have the ability to speak and follow the law, and they can reach incredible speeds by flying in the universe alone.

So on the road alone, the strongest person in the universe is far superior to the master of the universe.

After leaving the natural wormhole route on No. 15, the giant axe took Wang Yi and kept teleporting, while explaining to him the things that need to be paid attention to in the universe.

For example, when the speed of the original universe reaches the speed of light, it will enter the dark universe.

But there is no dark universe in the universe, and the strong gate can easily surpass the speed of light.

The limit is one hundred times the speed of light.

Only the strongest in the universe can surpass this speed, reaching a thousand times, ten thousand times... constantly breaking through by relying on the method of speaking.

But Wang Yi has also learned about it.

The strongest man in the universe fights with the Lord of the universe, and is suppressed in the original universe, but will still be restricted in the universe, but the restrictions will be smaller, but there are still restrictions.

In the primitive universe, if you didn't fight with the Lord of the universe, then the strongest in the universe could also be able to "speak and follow the law," and it could be powerful, and the original law of the universe would also give face to the strongest in the universe.

But once you fight with the Lord of the Universe, that changes!

The law of origin of the universe no longer retreats!

On the contrary, very strong suppression...resulting in "speaking of the law" can not be done, on the contrary, the Lord of the universe can control time and space, so that in terms of domain, the strongest in the universe has no advantage.

The intensity of the divine power is equivalent to the divine power of "the master of the universe with perfect life genes" (ten thousand times).

This is only a small aspect, and there is also the strongest power limit-the upper limit!

It is a limit set by the law of origin of the universe. The power of the strongest in the universe cannot exceed this limit. Once exceeded, it will be "suppressed", and the law of origin of the universe will automatically operate to limit the strongest universe that violates the rules. By.

The utterance will disappear!

Supernatural power is limited!

Even the strongest burst of strength has an upper limit!

and! After killing the Lord of the Universe, he will be severely punished, and the divine body will be severely damaged! Under many suppressions, in the primitive universe, the masters of the universe are almost not afraid of the strongest in the universe! The master of the universe who is a little bit more powerful doesn't need to be afraid of the strongest in the universe.

But in the universe, it's different.

The universe is scattered with a large number of small universes and "primitive universes." The primitive universe is really too big, so the original will of the primitive universe is still the strongest!

Even the laws of the vast universe and the sea are affected by it. It's just that other areas of the Universe Sea are outside of it, so the power of the original universe is much weaker, and the restrictions are much weaker.

There are only two restrictions.

First, when the strongest of the universe and the Lord of the universe are fighting, the law of operation will no longer retreat! It makes it impossible for the strongest in the universe to speak and follow the law!

Second, the strength of divine power has also been suppressed at the level of "the master of the universe with perfect life genes".

Only these two.

As for relying on the treasure, relying on the secret method, how strong can be exerted. This allows the strongest in the universe to play, and there is no upper limit! And after killing the Lord of the Universe, there is no punishment.

Relatively speaking, the limit of the universe is much smaller than that of the "primitive universe".

"There is no way to say it~www.mtlnovel.com~ and the strength of supernatural power is equal to me. The threat to me by the strongest in the universe is much smaller." Wang Yi touched his chin.

But there is an iron rule in the Primordial Universe-an attack performed by a single strong person, no matter how strong it is, it will be suppressed to the top of the sixth order.

But here is the universe!

"The strongest in the universe can explode up to the sixth-order limit in the original universe. Here they may explode to the seventh or eighth...still terrible!"

Like the masters of the normal universe, they are all rule-based. After they break through... they become the strongest, and then use the "mini universe" to transform the chaotic energy into divine power to supply themselves. Make oneself reach the level of the strongest person in the "ten thousand times gene" universe.

After the strongest in the universe broke through, because it was a breakthrough through the rule of law, the strength of the divine power was a hundred times that of the Lord of the universe!

However, the strongest in the universe has a "small universe" and a "heart of the true god", with a steady stream of divine power. Even if you use **** to fight, the time it takes to maintain is much longer than that of the master of the universe.

Wang Yi shook his head. Unless he uses his trump card 'Golden Armor God', he is temporarily unable to deal with the strongest in the universe.

[Chapter 572: The expectation of the founder of the Great Axe](#)

The birth of the primitive universe gave birth to hundreds of millions of ethnic groups and countless powerful people. With the passage of time, the primitive universe will quickly decline and even be destroyed after reaching a most prosperous peak! Then it began a new birth...Every reincarnation will give birth to hundreds of millions of races and many geniuses, some of the strongest in the universe, and a large number of masters of the universe.

One by one, the cycle is extremely long.

Each reincarnation has a group of the strongest in the universe, and each strongest in the universe corresponds to a small universe.

Small universes float in the sea of space, drifting farther and farther, and many of them have long been beyond the scope of the sea of space explored by the powerful men of the original universe.

There are 18,022 small universes that have been discovered alone!

Think of this cycle of the original universe as the third cosmic age.

The previous cycle is regarded as the second cosmic age. The previous cycle is regarded as the first cosmic age.

The entire universe... In addition to the two holy places, the powerhouses of the three universe eras also survived. The other reincarnations are all annihilated.

Of course, Wang Yi knows that the two holy places are the evolution of two small universes that have gone beyond reincarnation.

Purple Moon Holy Land!

Dongdi Holy Land!

Three cosmic ages and two holy places, these are the forces in the endless universe.

Although every cosmic age is not united, just like the third cosmic age is divided into nine superpowers, twelve top powers, and so on.

The first cosmic age and the second cosmic age were equally divided into dozens of forces, so in the endless universe, it was very chaotic.

The third era is the weakest era. The first era is the strongest.

Because this third universe age may only be half of the cycle, the first two cycles are complete, and the number of strong people is naturally different.

The primitive universe currently has only a dozen strongest in the universe, but it is estimated that there are 30 strongest in the universe in the other two cosmic ages.

And they all live longer than the Third Universe Age, so it's understandable that they are stronger.

The Universe Sea now has a total of nearly a hundred forces, and among these nearly a hundred forces, none of them can be compared with the two holy places.

Of course, if you count the entire era of reincarnation in the universe, even the weakest side of the primitive universe is stronger than any holy land. It is estimated that the combination of the two holy places can be comparable to the original universe.

We must know that the Primordial Universe is a dozen of the strongest in the universe, and nearly a thousand masters of the universe!

But the sum of the two holy places is comparable, and we can see the power of the holy places.

...

The founder of the giant axe and Wang Yi kept teleporting, and occasionally passed some dilapidated small universes. Small universes are generally 100 million light-years in diameter and still extremely large, but they have already collapsed and collapsed over time.

"Countless reincarnations have proved one thing. No matter how strong the universe is, their small universe can only exist in three reincarnation ages at most. If they exceed three reincarnation ages, they have not yet broken through again to achieve the Holy Land universe and transcend reincarnation. Then you will die."

"The original universe will be born, rise, fall, and destroy, one cycle at a time."

"Only when the original universe becomes the strongest before the original universe collapses can you avoid being destroyed together with the original universe. Because only the original universe can breed the strongest universe, you must break through before it collapses!"

"This alone can only exist in three eras of reincarnation. Only by transcending reincarnation and becoming a holy universe can the universe endure forever and let the race eternal together!"

The creator of the giant axe sighed infinitely, and looked at Wang Yi with hopeful eyes, "Chaotic Source, except for me, originally Chaos is the next most promising person to become the strongest in the universe, the Lord of Darkness and the Lord of Peng Gong are second. ."

"But now I have you!"

"Your potential exceeds our expectations, and there are many mysterious opportunities, as well as an incredible thing like the Tongtian Tower."

"Tongtian Tower allows us to see the hope of breakthrough!"

"So, you are no longer alone, pinning the hope of the entire ethnic group." The founder of the giant axe looked into the distance, his eyes misty, and he sighed infinitely.

"How difficult it is to transcend reincarnation, since the era of endless reincarnation, only the two holy land universes can know."

"My teacher stood at the peak of the primitive universe, at the peak of the universe, except for the ancestors of the two holy places that have never appeared in the legend, he is the strongest and invincible existence!"

The eyes of the founder of the giant axe were bright.

"The teacher has reached the limit of the strongest in the universe, but at that time he was still not sure that he would be able to transcend reincarnation. According to the word of mouth from the strong men of the previous era, if you want to transcend reincarnation... you must go to reincarnation, but no one knows those who go. What happened to the powerhouses of reincarnation, just looking at the declining miniature universes, and guessing, they all fell."

"It's too difficult to go through reincarnation, the danger is too great, and the way forward is unknown."

"So the teacher came up with another way to fight the Primordial Universe... If he wins, he will be able to break through and achieve the third holy land universe, so that my human race will live forever like the other two holy land!" Those who sigh endlessly.

"Unfortunately, the original ancestor teacher failed and was permanently suppressed by the original universe, unable to get out."

"And I am far from the original ancestor teacher's realm, and I don't have the confidence to do what the teacher didn't do, but I will fight, do whatever it takes, and do whatever it takes."

"Chaotic Source, promise me that you must protect yourself, not only for yourself, but also for the countless humans behind you."

"Everything... is for the race! For the humanity!"

...

The founder of the giant axe kept explaining the precautions of the universe and sea on the road, reminding him of the dangers he might encounter.

The universe is infinitely vast, and the most dangerous and most opportunities are the three Jedi!

In addition to the Three Jedi, there are countless other places, but the theory of danger is far less than the Three Jedi!

You know, the three Jedi's rare peak treasures in the primitive universe don't know how many, and there are even strongest treasures in the core area!

Every strong man who enters the universe will go to the three major Jedi, temper himself, and look for treasures of chance.

As for the human race, except for one's own side, no one else can be trusted!

During the exploration of the universe in this era, there are more than 3,000 dangerous places known to the human race. As time goes by, the number is gradually increasing.

Wang Yi also felt that ~www.mtnovel.com~ In the universe, the human race is not considered strong, even weak.

After the original ancestor was suppressed, it was not easy for the human being supported by the giant axe to navigate the universe.

For the human race, the giant axe also had to hide its strength, hibernated in a low-key manner, and cautiously, in order not to cause harm to the human race.

A strongest person in the universe lives like this, I have to say that it is a bit sad.

But it's different now!

The founder of the giant axe has two Xeon treasures, one Xeon weapon axe, and one domain Xeon treasure!

With the strength of the creator of the giant axe, it is to face several of the strongest in the universe at the same time, and the creator of the giant axe is not afraid!

The founder of the great axe, who has been dormant for a long time, will soon show his amazing sharpness, which will shock the entire universe.

Wang Yi thought a lot, thought about when the suppressed original ancestors could be liberated, thought about when the man who fell in the past, the lord of the universe would be resurrected again, thought about the current situation in the universe, and thought about the future...

[Chapter 573: Wang Yi in the universe](#)

The three major Jedi are about 100 million light-years away each.

There are many dangerous places in the universe. The most famous are the Three Jedi, and there are many second-class ones. For example, the residence of the mountain guest in the universe is in a dangerous place.

Any strong man who explores dangerous places knows...In dangerous places, there are two main ways to move forward, one is teleportation and the other is flying!

Teleportation is to reach some areas that can be sensed, and it will teleport over only if the safety of that area can be guaranteed. Flying is much safer, and you won't be stupid and fall directly into a dangerous place.

In addition, the most conspicuous are the many small universes.

The distribution law of many small universes is... the "younger" small universes are closer to the original universe, like the giant axe, the original ancestor, and the Zerg queen, all are very close to the original universe. While the many small universes of the second cycle are far away, the small universes of the first cycle are even more remote, and the two holy land universes are even more distant!

Wang Yi also discovered many dilapidated small universes along the way.

Those are all left over from the previous reincarnation era, and they are all lifeless and lifeless.

Wang Yi sighed in his heart that it is not easy to get out of reincarnation.

But he is different.

Tongtian Pagoda, Wang Yi dispatched three major divine bodies this time, and the supreme treasure of Tongtian Pagoda was naturally brought out by him. Anyway, it will be a long time before the next 100 million years of enlightenment.

In the Tongtian Pagoda, Wang Yi's incarnation of a divine power maintains a tens of thousands of times the flow of time in the practice space, trying his best to comprehend the law of origin and the way of secret patterns.

After fighting against the Lord of Yuan'ao, he was inspired to understand the fourth secret pattern and created the strongest secret technique.

Wang Yi seemed to have regained his consciousness and entered an explosive period of sentiment.

It's like breaking through a bottleneck and a smooth road ahead.

And Youhai, the kingdom of God, who remained in the primitive universe, also sent the incarnation of divine power to the place where the ancestral gods were inherited to receive the inheritance and improve the perception of other laws.

Wang Yi also understands that the mystery of each rule is not as simple as he thought.

The universe is essentially composed of ten basic laws.

Even with the basic laws, you can comprehend the secrets of the strongest in the universe.

Still the same sentence, thousands of roads, different routes lead to the same goal.

In the end, it is the law of chaos, and then mastering chaos, mastering the essence of the universe's evolution, creating the universe by oneself, rather than the kingdom of God evolving into the universe... The two are not the same concept, and the levels are hundreds of millions of times different.

If he reaches that point, he should also be at the pinnacle of the Origin Continent.

The sea of laws is vast and mighty, and the infinite secret pattern silk thread undulates with the waves, occasionally forming a variety of secret patterns, each of which is more profound than any one of the most powerful treasures.

In the cultivation space, one year is equal to 10,000 years outside.

"It's amazing, I feel that the fifth level of the Tongtian Tower will soon be understood, then my Secret Pattern Map genre will reach the realm of the master of the universe, and it will be easy to create the strongest fusion method." Wang Yi was very excited.

Before, he had been distracted on Primal Stars, he still felt the law of origin, insight into the secret patterns of the Tongtian Pagoda, and analyzed the essence of life, studied the secret patterns of the strongest treasure...

So the progress in the creation of the secret method is much slower.

However, once the foundation is high, and the bottleneck is broken, it is naturally much easier to study the secrets.

That kind of joyful and dripping feeling made Wang Yi very refreshed.

"At this speed, I will soon be able to understand the sixth secret pattern of the Sky Tower (equivalent to the third stage of the Xeon Treasure), and use the secret pattern genre to structure it, and even have the opportunity to create the secret method of the strongest in the universe."

The primordial universe includes the sea of cosmos. At present, no master of the universe can create the secret method of the strongest in the universe.

The reason why they are able to exert Tier 6 combat power is entirely due to the secret pattern on Xeon Supreme.

And if he can create the secret method of the strongest in the universe, even without the Xeon Arcana secret pattern, Wang Yi can still exert his Tier 6 combat power!

Use Xeon Zhibao to strengthen it even more.

"With this as a basis, I will soon be able to grasp the third and fourth levels of other Xeon treasures."

"At that time, my strength will be greatly improved, and each clone will have the top combat power of Tier 6."

"With the addition of Xeon Zhibao, even Tier 7 combat power can erupt!"

Wang Yi was energetic again, and his fighting spirit was enlightened by research.

...

And in the primitive universe, the space mezzanine corresponding to the starry sky somewhere is a vast and boundless kingdom of God.

The endless quiet sea, the sound of the waves still.

This is the body of Youhai, which has expanded a lot in the past ten thousand years.

Occasionally a world ring was sent in from the outside world and was thrown into the secluded ocean.

There are countless lives, matter and all kinds of things that cannot be summarized in the primitive universe, all of which are collected and sent to the secluded sea for study and analysis.

Of course, normal life Wang Yi would not deliberately hurt him, and he would put it back after the study.

"Starting from the divine power route, it is really difficult...I haven't thoroughly studied this 10081 times the perfect genetic level until now."

"If the perfect gene can be analyzed thoroughly, then even the new Youhai clone condensed by Youhai can reach ten thousand times perfection, and the divine body can reach a height of more than 90,000 kilometers!"

A space in God's country can also speed up time. It was left after the "Time Realm" merged in before. Wang Yi's incarnation of a supernatural power was sitting on the island with a solemn face.

There are many ways to start from divine power, and Endless Youhai has the talent to "create", which can analyze the genes of life and create life!

Over the years, Wang Yi has sent a large number of items from the primitive universe into the endless secluded sea to analyze the endless secluded sea.

Anatomy of the endless secluded sea!

After that, the incarnation of divine power will research and think under the speed of tens of thousands of times in the "acceleration space", and once the research has yielded results, it will use the endless secluded sea to conduct another experiment.

1000 times...

2000 times...

3000 times...

Flesh, rock, plant, metal, energy...

The more powerful the life, the more difficult it is to analyze, and it may take a long time to reach the world master level alone.

It is destined that under normal circumstances, it will take Wang Yi an extremely long time to rely on the route of 100,000 times divine power to break through to the true god.

"I hope this deity can gain something in the universe." Wang Yi is full of expectations.

...

In a certain independent universe, this is the holy land of the mysterious Star Giant Beast Alliance, the Beast God Realm.

On the mountain peak, an old man in white robe and another old man with antlers are sitting together ~www.mtlnovel.com~ from time to time looking at the young black-haired youth carved by 64 animal gods on the plain far away.

"I said Zuoshanke, your apprentice wants to comprehend the ultimate wonder of the Lord of the Universe in the Ten Epochs. Even if it has tens of thousands of times the time to accelerate, the difficulty is still not small. No Universe Venerable has ever done it before. This kid also Impossible, I have won the bet this time."

"Hehe, old fellow, don't think that you can understand everything by relying on the ways of the eight beasts and gods to become the strongest in the universe. The mysteries of the universe are more than you think."

"Hmph, although I don't know why, but you seem to have confidence in your apprentice, then I will wait and see."

...

Cosmic sea.

The Great Axe led Wang Yi to impart experience and knowledge while rushing through natural wormholes, everywhere in the chaotic void, often teleporting over long distances, and it was tens of thousands of light-years away in an instant.

High-frequency uninterrupted teleportation, occasionally relying on natural wormholes.

Soon, on the fourth day of entering the Universe Sea, the Great Axe and Wang Yi arrived at the "Qingfeng Realm", one of the three great Jedi in the Universe Sea.

[Chapter 574: Qingfengjie](#)

Looking into the distance, you can see a majestic mountain in the distance. The top of the mountain fell on the mountainside, as if an existence with endless power cut across the mountain, causing the top of the mountain to fall directly on the mountainside. . "Wow..." On the smooth main mountain, there was an endless huge waterfall pouring down, hitting the mountainside below, and the water filled the surrounding area, submerging the top of the mountain that fell there.

At the same time, countless rubble is flying around the mountain.

"This is Qingfeng Realm." Wang Yi couldn't help holding his breath slightly.

"Yes, Qingfeng Realm, one of the three great Jedi of the Universe Sea, and also a place where many powerful people from the Universe Sea gather to fight." The Great Axe stood beside Wang Yi and said with emotion.

"Originally, in the Universe Sea, we used Qingfeng Realm as the main exploration area, and this is also the place we are most familiar with. It took hundreds of millions of years for our human race to explore this place for a little while, but we lacked valuable map information..." After taking a look at Wang Yi, he warned. "With your strength, it should be enough to enter the outer and inner regions, but the core area, even I dare not enter at will. You'd better familiarize yourself with the outer area first, and slowly go deeper. If you encounter trouble, you can always Call me or Hongmeng for help."

He hesitated to speak, shook his head not knowing what he was thinking.

Wang Yi didn't know the idea of Great Axe either. He was still looking at the huge mountain in the endless distance, especially his eyes fell to the top of the mountain that fell halfway up the mountain.

Muttering in his heart, it really seemed as if an existence with endless power cut across the mountain.

The two Wang Yi are now more than 100 million light-years away from the true Qingfeng world, but they still feel the overwhelming pressure oncoming.

While observing, Wang Yi recalled information about Qingfeng Realm in his mind.

The main mountain of Qingfengjie is about 98.02 million light-years high, and the maximum diameter of the truncated peak is 12.26 million light-years.

Outside the mountain, it is an outer domain, with a low degree of danger, but some dangerous places can still let some cosmic masters with weaker life-saving capabilities perish.

Inside the mountain, it is an inner domain, which is extremely dangerous, and even the strongest master of the universe may perish.

The core of the mountain... even the strongest in the universe may perish!

Similarly, in the core place of the mountain, the most powerful treasures have been discovered continuously in history, but the Lord of the universe, even the Lord of the sixth-order universe, did not dare to enter.

The strongest in the universe may fall, and they go in... almost desperate.

"Three Jedi, Qingfeng Realm, Liuzhong Mountain, Universe Boat..."

The Qingfeng world is ever-changing and weird.

Flowing heavy mountains, strange and beautiful, like a maze.

The space boat, a super treasure of mechanical flow, is divided into hundreds of millions of areas, and it can vaguely distinguish some traces of the space boat's intact shape at the time.

In Wang Yi's view, Qingfeng Realm and Cosmic Boat have traces of man-made artifacts, but Liu Zhongshan doesn't know it. Maybe it is also related to the ancient civilization in the depths of the Universe Sea.

"The universe boat has something to do with the ancient civilization 'Wu', as well as the killing of Wu Yuyi. Judging from the name alone, it looks like a single mechanical stream of forces that are hostile to the country of Wu. But in fact, this is Wu. The super treasure used by the country's own strong..."

The countless text messages on the treasures circulating in the universe have proved to have a lot to do with the kingdom of Wu.

Many powerhouses speculate that it may have been handed down from the ancient civilization of 'Wu'.

Wang Yi thought in his heart, "I don't know if I can find the other parts of Killing Wu Yuyi here and sign in."

Of course, if he could take away the other parts of Killing Wu Yuyi, Wang Yi wouldn't mind just doing it.

However, according to Wang Yi's understanding of the plot, the remaining four pairs of wings, the "source" pair, were found somewhere deep in the waters of Qingfeng Realm, but the waters are too big. Wang Yi's is Chaos Wings, and Without the attraction of "killing Wu Yuyi", looking for a needle in a haystack, I have no confidence to find it.

As for the other three pairs? They are all in the Purple Moon Holy Land. The diameter of the Purple Moon Holy Land exceeds 2 billion kilometers. It belongs to the universe of the ancestor of the Purple Moon. It is an old yin ratio. It is impossible to enter... If you want to sign in, you can only be outside the universe. Unless you are lucky, otherwise It's impossible to sign in.

Of course, if Wang Yi is willing to use the long-cherished "probability card" to try it.

The odds cards he has accumulated now add up, and 92% of them can sign in to get the highest reward.

Killing Wu Yuyi is of extremely high grade, is the pinnacle of the ancient civilization's single mechanical flow, and belongs to the eternal true god-level treasure.

Is there no chance to sign in?

"However, compared with the inheritance of the Broken East River, this is too far behind. Signing this is not as good as waiting for the Tomb Ship of Broken Donghe, or the World of Jin." Wang Yi shook his head.

"It's the Universe Ship and Qingfeng Realm, far surpassing them."

Wang Yi looked at the majestic endless mountains billion light years away, and was eager to try.

...

Because the distance is too far, the 'broken stones' in Wang Yi's eyes were all huge mountains and rocks measured in 'light years' when they approached.

"It's really big." Wang Yi smacked his tongue.

And because the limit speed in the cosmic sea is not the original cosmic speed of light, these large seemingly boundless mountains and rocks are flying at several times the speed of light, and the cosmic Venerable being hit is definitely the end of the annihilation of the divine body.

The giant axe took Wang Yi to teleport for a moment, and landed on a celestial rock with a maximum diameter of about 8.2 light-years.

"Because of the need to rescue each other, generally where I am, most of the universe masters of the human alliance are gathered in the Jedi where I am." The founder of the giant axe said heartily, "However, there are also members of my alliance in other places. Activities, but less."

"Because of the Primordial Star opening, most of the strong men of our human race have entered there, but there are also a few in the universe sea, and the Hongmeng and other alien universe masters, but some are still here." Giant Axe said. And Wang Yi went to another place three light years away from the

Celestial Rock. A random groove on the surface of the Celestial Rock was more than a million kilometers deep, and there was a temple in this gorge.

Two figures walked out of the temple and saw Giant Axe and Wang Yi.

"Great axe."

"Great axe."

They respectfully saluted the founder of the giant axe~www.mtlnovel.com~ and greeted Wang Yi in a friendly manner.

"Hello, Hunyuan, this is the first time we have met in reality, right?"

"Chaotic Source, you have finally come to the Universe Sea, haha, the vast Universe Sea is where our Lord of the Universe should enter."

These are the two masters of the alien universe of the Hongmeng. I have seen them all in the virtual universe, and the virtual universe is also completely simulating aura, so it is clearly recognized now.

"The Lord of Yanying, Lord of Mantis." Wang Yi also responded with a smile.

The giant axe said: "Let's go in and talk, are there only you two here now?"

While the Lord of Yanying and Lord of Mantis reverently answered the words of the Great Axe, they secretly transmitted the voice secretly.

"Unexpectedly, the giant axe actually brought the Lord of Chaotic Source over in person."

"Sure enough, the human race attaches great importance to this chaotic source. No wonder he has so many treasures, which is really enviable. We also have to have a good relationship with the master of this chaotic source."

"You're right."

[Chapter 575: Endless treasure, eternal life](#)

"So, there are only two of you here." In the temple, the giant axe and the three masters of the universe sat down beside the round table. Said the giant axe.

The Lord of Yanying and Lord of Mantis looked at each other. The Lord of Mantis continued: "Other people are too far because they have gone deep into the waters of the Qingfeng realm, or the inner realm of the Qingfeng realm. Only we can get back in time when we receive the news."

"Since it's inconvenient, you don't have to rush back. Anyway, it's just a form."

The giant axe paused, "Hunyuan, he first entered the universe, according to the old rules." With a smile and waved, there was a glass of wine in front of the four powerhouses, and the glass was full of wine.

"Master of Chaotic Source, I wish you endless treasures and eternal life!" The savage brawny smiled and said to Wang Yi.

"The treasure is endless, life is eternal." The lord of Yanying and the lord of Mantis said.

Wang Yi also nodded: "The treasure is endless, life is eternal!"

He also knows this rule.

After all, to come to this universe is an adventure, even if there is a clone of the Lord of the universe, there is still the possibility of death! Even the strongest in the universe may be lost. Who dares to say that he won't be lost? At most, be careful to avoid too dangerous places to live longer, but there is no doubt-here, it is an adventure! For the treasure!

Even Wang Yi, isn't it the same? Otherwise, would it be more comfortable and safer to hide in the primitive universe?

Wang Yi looked at the two masters of the Hongmeng alien universe who had met for the first time in reality, the Lord of Yanying and Lord of Mantis.

And the two masters of the universe are also privately looking at Wang Yi, the peerless genius master of the universe who has risen like a comet of the human race.

"The Lord of Mantis is the peak level of combat power, and should be the Lord of the Tier 3 universe."

"But the Lord of Yanying is more powerful."

The Lord of Yanying is also considered to have a higher status in the Hongmeng, because it is extremely powerful, belonging to the same level as the Lord of Bingfeng, usually in the three Jedi inner domains, also has many means, and is very good at saving lives, too. Very difficult to provoke.

In terms of strength, it is considered the top four.

A dark blue bird spread out its wings, with golden feathers on top of its head, while pecking the bird into a wine glass, while speaking the lingua franca of humans.

"Master of Chaotic Origin, this is the first time you have been to the Universe Sea. I don't know if you are acting with us or alone?" said the Lord of Yanying.

Generally, the masters of the universe who come for the first time are relatively weak, so they are all experienced in the outer realm of Qingfeng Realm together with other universe masters, but if they want to go alone and look for opportunities to grab treasures, it will be far away. .

However, the Lord of Chaotic Source in front of him is an alien. He has a record of killing the Lord of the Universe alone on Primitive Stars. It is said that his strength is not under the Lord of Bingfeng. He was brought by the Great Ax himself, and the Lord of Swallow Eagles is also somewhat different. Not sure.

"I'll act alone." Wang Yi glanced at the giant axe and said.

It is impossible for the creator of the Great Axe to act with the Lord of the Universe, and the Lord of the Universe is only a drag on the creator of the Great Axe deep in the Qingfeng world.

In addition, he is relatively free to move, so Wang Yi is of course acting alone. He is full of confidence in his own strength.

"Oh, you have to be careful about Chaotic Source. Walking in the cosmic sea, apart from the danger from the environment, it is mainly the strong men of other forces." The Lord of the Mantis continued.

"Especially the craziest First Universe Era powerhouse. If you are dispatched alone, once you encounter the First Universe Era powerhouse, it will be very troublesome if you get entangled by them."

The Lord of Yanying also sighed: "The lunatics of the First Universe Era are faced with a big limit. They are indeed crazy."

Wang Yi nodded. In the First Universe Era, when this primitive universe is over, it will perish. The coming death is indeed easy to make people crazy, but Wang Yi is not afraid of it.

...

Separated from the human powers, Wang Yi, who had already left the residence of the human race, was also thinking about it.

The outer domains of the three major Jedi have long had many universe masters, but most of them are third-order and fourth-order levels.

With his current strength, there shouldn't be a big problem with entering the inner realm.

The "Dark Land" world beast, the core of Qingfeng Realm...you can go there to sign in instead of being afraid of danger.

It is estimated that there will be surprises.

It's a pity that with Wang Yi's current strength, he still doesn't want to take risks.

If you fall into the Jedi, you won't have the Tongtian Tower, but it's hard to figure it out.

"According to the original description of the world beasts, even in the gestation period, the most common world beasts are true gods, not to mention there may be stronger ones. There are hundreds of millions of worlds in the world beast's nest. The beast, even if the total cosmos and the true sea gods add up, they are not enough to swallow them in one bite..." Wang Yi felt terrible after thinking about it.

If you want to venture into the dim places, you must have the power of the true gods, and have a set of Xeons to ensure safety. It is best to have the mechanical flow of the treasures, which can bring your combat power to the tenth level or higher.

The soul defense is strong enough, and the will is at least above the Void True God.

Wang Yi is still too far behind.

Even if you want to walk in the heart of Qingfeng Realm, it is very difficult.

"In the earliest hunting mission, except for the last one to hunt a true god, I have already completed the others and got a few chance cards. Together, the chance of signing the highest reward is as high as 92%." Wang Yi paused.

Not counting the world of Jin that has not yet arrived, there are only a few places where Cosmic Sea can sign up to the most valuable.

Three Jedi.

Of course, if you count the 'primitive universe'...the 'cosmic sea', it's okay.

However, Wang Yi felt that the probability card should not involve such a large range. Of course, the smaller and more accurate the range, the better.

For example, the tomb boat in the cosmic boat where the Donghe River inheritance is located, such as the Wuqi Tower in the "World of Jin", such as the world beast nest in the "Qingfeng Realm", the interior of the "Dark Land"... Another example is Wang Yi's The physical body can enter the origin of the universe, not just consciousness.

"Whether it is sign-in to break the Donghe inheritance, or get the inheritance of the **** king of Jin, or grow to the extreme to be comparable to the **** king, and the natural ability of the world beast at the same level as the original universe... it is not a loss to me."

"Dangdonghe inheritance, I am now the lord of the universe, and the tomb boat will be born tens of thousands of years later. I may be able to get the final spot if I select the inheritors... If I use the sign-in probability card to get the highest reward, it will help me. It's also huge."

"Staring at the pan is better than eating the bowl."

"The strength is improved, and if I have enough strength, I will go to other places to break, it will be much easier to sign in, even in the dim place, it may not be impossible to break."

Wang Yi was thinking, and he kept moving in the direction of Qingfeng Realm with high frequency.

"Now, the most important thing for is to increase the level of secrets and sign in to give me rewards."

Whether it is a treasure!

Still a secret method!

Or talent!

other!

He wants it all!

He thought of the blessing of the giant axe before, and sighed inwardly.

"The treasure is endless, life is eternal... It's a practical and beautiful wish."

"But true eternity... does it really exist?"

"Even the so-called eternal holy land universe, facing the world beasts, will also have to be destroyed, otherwise there will be countless rebirths, how can there be only two holy land universes in the current universe."

The road ahead is long, and what Wang Yi can do is to keep moving forward with his own efforts.

[Chapter 576: Waters](#)

"Swipe!" Wang Yi teleported and appeared on a huge boulder tens of light-years in diameter in Qingfeng Realm, and then teleported again and appeared in another place.

"My teleportation efficiency is much slower than that of the giant axe." Wang Yi secretly said in his heart.

The distance of teleportation, the Lord of the universe and the true **** are not the same, the speed of the true **** will be faster!

Why can the true **** teleport farther? It is because the 'True God's Heart' is able to resist the influence as much as possible with the help of its origin, can sense greater distances, and naturally can teleport farther.

The teleport distance of the true **** like the void is greater than that of the true god.

This has something to do with the size of the small universe and the strength of its origin.

The teleportation distance of the True God is ten times greater than that of the Lord of the Universe, and the Void True God is ten times greater than that of the True God.

The outer area of Qingfeng can be divided into "air space" and "water area".

Airspace refers to the void in which huge celestial rocks are flying, and the degree of danger is extremely low. Only some celestial rocks are occasionally dangerous.

Countless celestial rocks, most of which have been explored for a long time.

Therefore, the so-called Outer Domain of Qingfeng Boundary by the powerhouses refers more to "waters."

The water area formed under the impact of the waterfall filled the entire main mountain. The water area was full of rugged rocks and dangerous places. Even the Lord of the universe did not dare to teleport in many places, and had to fly forward carefully. Only when the edge of the water area is found to be safe after the inspection of the "Treasure of the Domain" will it teleport.

The waters are vast, hundreds of millions of light-years in diameter.

"Qingfengjie", the towering high mountain with a dipping top, is equivalent to being "immersed" in this waters.

"This water, the Lord of the Universe can easily resist this." Wang Yi has already rushed into the water. If the impact of each drop of water from a high-altitude waterfall is comparable to that of a star, even the Lord will be wiped out, but under the water. It was much calmer, and Wang Yi moved forward quickly at will.

"The most common and terrifying danger in the waters outside Qingfeng's boundary is 'Shui Liu Ling'."

Shui Liuling has no intelligence and has only instinct. Once it gets close to them, it will cause them to attack... A Shui Liuling in this water area, with the help of the water area, is comparable to a cosmic lord.

The yigao people are bold, and relying on his supreme treasure and tyrannical strength, Wang Yi is cautious, but after he is familiar with the current, his speed naturally rises and he continues to penetrate the waters.

"Shui Liuling?"

The waters are all white, with white air currents, sometimes human-shaped, sometimes beast-shaped, weird-shaped, floating in the waters.

Wang Yi didn't care, so he avoided it from a distance.

The surrounding environment was dim, and Wang Yi's domain could spread over a radius of tens of light years, but it was also easy to attract the "Shui Liuling".

It's not a big deal to be alone, but it's hard to get tangled in groups.

[Ding, congratulations to the host for signing in successfully, and rewarding 'Water Spirit Crystal'.]

Wang Yi has already turned on the automatic sign-in mode. He does not need to take the initiative to operate. As long as the arrival area meets the conditions, the panel will automatically sign-in.

Of course, Wang Yi is already the Lord of the universe, and the rewards given must at least be of the highest level.

Most of Wang Yi's consciousness is cultivating, but a trace of consciousness is left to maintain outside exploration activities.

"It's so boring."

Thirteen years later, Wang Yi, who hadn't even seen a strong man, felt a bit boring.

The waters are too big, and it all depends on luck if you want to meet a strong cosmic ocean force.

"Huh?" Wang Yi's face moved slightly, and a violent undercurrent rushed in, "Boom!" A column of water suddenly spurted from a crack in the rock below, like a fountain. It's just that the fountain has a diameter of more than 10,000 kilometers, and its speed is far faster than the speed of light. Its impact is even more terrifying than a million stars combined, comparable to the full blow of the master of the third-order universe.

"Swipe!" The wings behind Wang Yi flapped, and instantly flashed tens of thousands of kilometers away, avoiding this sudden water column.

He shook his head when he looked at the jet stream that disturbed the surrounding waters. He has seen such sudden environmental changes a lot these days. As far as the Lord of the universe is concerned, just be careful and there is almost no threat.

However, some nearby "Shui Liuling" were attracted by the movement here.

"go."

Wang Yi was not interested in dealing with these inexhaustible 'Shui Liuling's, and moved far away after a single teleportation.

"The value of this water area is still too low. It's better to enter the mountain early." Wang Yi thought secretly while drifting in the shockingly pressured water area.

He is different from the masters of the universe who came to hunt for treasures. He mainly came here to sign in, so he could temper himself by the way.

But with his current strength, the role of the outer waters is too small.

"That is....."

In the depths of the dimly pressured waters, a figure radiating dazzling brilliance emerged from a cave, just to see the human figure moving away in a flash in the distance, and blinked his eyes.

"Humanity?"

"From the looks of it, it's human, but it's very strange, and I haven't seen the breath of the divine body."

There are only so many powerful people in the primitive universe who enter the universe.

This figure is like a snowman, covered with thick white feathers, and the whole body exudes cold air, but there are three blue eyes on the head that resembles a bird, shining brightly.

The 'Master of Snow Warehouse' in the Second Reincarnation Era.

"I have seen the appearance of the strong man of the human race. This is very unfamiliar. It should be the newly emerged Lord of the Universe." The 'Lord of Snow Store' in the Second Reincarnation Era recalled the news that had spread in the primitive universe not long ago. .

In these ten thousand years, many lords of the universe were born in the original universe, which shocked the forces of the universe.

Especially the appearance of Tongtian Pagoda at the beginning made all parties extremely jealous.

But no matter how jealous they are, it's useless. They can't enter the primitive universe. This event has nothing to do with them. I don't know how many cosmic sea experts watched eagerly, mad with hatred, and cursed the Third Universe Era for being out of shit.

"It should be the Lord of Chaotic Source, that human genius who is said to have Tier 4 combat power."

There was a glimmer of excitement in the azure eyes of the 'Snowcang Lord'.

"There is a treasure of the pinnacle domain in him."

"It is said that there are other precious treasures." Various thoughts of the 'Snowcang Lord' quickly flashed through his mind. "Surely let me meet him here."

"If you intercept him here~www.mtlnovel.com~, his treasure is mine. But he has the peak domain treasure. I am good at speed. The frontal combat is not strong. He just restrains me... I want to kill. It is not easy for him, and there may be other human powerhouse activities here."

'The Lord of Xuecang' hesitated, and finally gave up.

The era of the second cycle is not as crazy as the era of the first cycle.

"The Lord of the Chaotic Source of the human race in the First Reincarnation Era actually also came to the Universe Sea." This news spread quickly across all forces in the Universe Sea.

And Wang Yi didn't know that because of a peak domain category treasure, he was almost spotted by the Lord of the Universe in the Second Reincarnation Era. Of course, the Lord of the Universe of Tier 4,

even the Lord of the Tier 5 Universe, would be very difficult to kill. This is also the reason why the "Snowcang Lord" of the second reincarnation era gave up easily.

Just Teleport also noticed the breath of life nearby, but the other party didn't follow up, and he didn't care.

He teleported out of the water, and then teleported in the direction of the mountain.

And teleporting within the waters, there is no doubt that the airspace with only celestial gravel is safer, almost all of them have been explored, even if there is danger, it is generally inside the rock.

[Chapter 577: The first era of reincarnation](#)

The reason why Wang Yi explored the waters was also because he was looking for the space of the 'killing Wu Yu's wings', and to see if he could check out the other wing parts of the Chaos Wings to increase the power of the wings.

Only a pair of winged Chaos Wings is too tasteless as an aid.

But in the end he was disappointed.

Wang Yi did not intend to continue to consume it, but chose to leave.

Come back later when you have time.

Moreover, Killing Wu Yuyi should have all been passed down from the Cosmic Boat, and maybe other parts of the Chaos Divine Wing will have the opportunity to sign in the Cosmic Boat in the future.

Looking at the "Qingfeng Realm" from a distance and feeling the hugeness of the "Qingfeng Realm" nearby are completely different feelings.

The towering and endless main mountain peaks and the huge waterfalls pouring down... wantonly exudes endless power. That power makes countless celestial rocks fly around it, and it also forces a large amount of chaotic air currents away.

Through the transmission of time and space induction, Wang Yi can clearly see the scene in an area of thousands of light years or even tens of thousands of light years.

But for the entire "Qingfeng Realm", it is still the tip of the iceberg.

Wang Yi is still in the outer domain of the "Qingfeng Realm".

And the top of the masters of the universe and the strongest ones in the universe, they all walked into the inner domain of the Qingfeng realm.

It keeps teleporting, occasionally flying in some places where the space is fluctuating and condensing, flying through a hundred times the speed of light, and then teleporting again.

Even in the periphery, it was not all smooth sailing. I occasionally saw the strong from other forces. There were the first reincarnation era and the second reincarnation era, the primitive universe... But Wang Yi focused on his journey and ignored it. The other party did not react. Time has already teleported away quickly.

7 years later.

"brush!"

The celestial rocks in the airspace are equally huge. In fact, every celestial rock... is like a towering mountain range. One of its depressions is a huge canyon, the other is a huge mountain peak, and its flat surface area is a vast plain.

Wang Yi's figure appeared on a giant rock, looking at the subject of Qingfeng Realm, which seemed to be close but still far away, and shook his head.

"The route closest to my entry into Qingfeng Realm is estimated to take 13 years, which is still 6 years away." Wang Yi muttered.

It is still very safe in the airspace, this speed is already considered fast.

Om~~ A wave of time and space came, and the surrounding space was frozen.

"Huh?" Wang Yi's expression changed, "Space is blocked?"

The spatial fluctuations in the airspace around Wang Yi stopped in an instant, and he could no longer teleport away. Standing in the void, looking into the distance, there was a black streamer rushing over.

Boom...The endless cyan wind was born out of thin air. The violent wind instantly flooded the surrounding area of 1 light-year in diameter. It must be known that the surrounding space has been blocked before, and this blocked space of 1 light-year area, even if it flies at a hundred times the speed of light, it will take a long time.

"Hahaha... the master of the chaotic source of the human race." The cold laughter resounded through the realm of time and space. "It's really rare. I just received the news that you entered the Universe Sea nearby. I rushed here on purpose. I didn't expect that I would actually meet you here."

That shrill voice changed abruptly, and naturally contained a madness in it, "I heard that you are a peerless genius who has just emerged from the primitive universe, let me see what you have."

"Are you the Skeleton in the First Reincarnation Era?" Wang Yi raised his brow slightly.

"Look at your appearance, if I admit that I am not wrong, you should be the 'Master of Dove Crocodile' of the Skeleton Race?"

That figure appeared. It was a tall evil figure with a crimson body all over, like a coalescence of blood-colored bones, and it was a strong skeletal clan. The other party nodded broadly and looked at Wang Yi with cold and crazy eyes. "Little guy in the primitive universe, come on, do it."

The Skeleton Race is one of the pinnacle races in the First Reincarnation Era, and it can be called the second largest pinnacle race in the First Reincarnation Era. Among their tribes, there are four strongest people in the universe! Second only to the strongest peak tribe, the "God Eye Race"! This is a very secretive and terrifying ethnic group!

Wang Yi looked at the endless winds raging around. This was the top treasure domain of the Skeleton powerhouse, but to him, it was like a breeze. After all, he was wearing a supreme treasure armor.

Attacks below Tier 5 are all in vain, not to mention this bit of domain oppression.

"Muscle Clan, you should know that there is a peak domain type treasure on me, you can't kill me."
Wang Yi shook his head.

"There is a word in our time."

"Life is limited, and eternity is hard to find." The Skeleton Clan's 'Master of Dove Crocodile' whispered:
"Killing is the only way!"

"I heard that you are Tier 4 and I am Tier 4, and I have spent nearly three reincarnation ages in the universe. In terms of combat skills, experience, and tempering, I don't know how much better than you!" The eyes are full of madness.

"The lord of the fifth-order universe, the lord of the sixth-order universe, I have fought, you are a little guy who just entered the universe in the first reincarnation era, what can you do for me."

"Come on, do it, don't waste time." The lord of the crocodile looked at Wang Yi. "I am not the only one who knows that you have entered the universe, and I am not the only one who is interested in you. If you can't even deal with me, then you should just roll back to the original universe and stay."

Many masters of the universe who have just entered the universe have followed other masters of the universe because of this reason.

If you dare to act alone, you must have enough strength or means to save your life.

Otherwise, anyone who encounters a powerful force may fall.

Wang Yi sighed inwardly.

Sure enough, because the first reincarnation era is about to face the limit, many strong people are crazy, and even the many forces in the first reincarnation era are fighting inwardly, and most of them are lunatics.

Because the original universe (the third cosmic era) is really weak, so the nine powers of the original universe, the twelve top powers, and many other strong powers, whether in the original universe or in the universe...unless there are treasures Wait for attraction, otherwise they will rarely really fight each other.

But the first reincarnation era, the second reincarnation era...Even if there is no treasure, you will still kill when you meet!

This is evident from this 'Master of Dove Crocodile'.

Obviously knowing that both sides are Tier 4, this 'Lord of Dove Crocodile' is also acting alone, obviously fighting with no results, but still wants to fight with Wang Yi.

To transcend reincarnation, only the strongest in the universe~www.mtlnovel.com~ These universe masters are hopeless, no matter how hard you struggle, the sense of powerlessness to see the limit approach makes these universe masters become one by one. Go crazy.

If you can't solve the 'Master of Dove Crocodile' in front of you and show your own strength, I am afraid that there will still be other strong people who will continue to be entangled.

"In that case, then I am as you wish." Wang Yi said.

"boom!"

Infinite black spread, and the mighty river flowing in the black that swallowed everything like an abyss, suddenly blasted the surrounding area of the storm of the "Master of Dove and Crocodile", and occupied two-thirds of the territory, and The area continues to expand and becomes a black area with a diameter of more than 5 light years.

"What a strong domain! It seems that it is really a treasure of the pinnacle domain." The lord of Dove Crocodile's eyes changed, and then he became crazy.

"kill!"

[Chapter 578: Lord of Dove and Crocodile](#)

In a high sky above Qingfeng Realm, two towering figures stand opposite each other in a clear boundary formed by endless cyan wind and endless black night river.

A tall, majestic, dark red man with a pair of gray wings spread behind his back and a black-haired man with a sword on his back stands in the chaotic air current. He wears a layer of primitive armor all over his body, and his body lines are so perfect. Two of his The deep eyes are even more calm before the war.

But the other one, which is as high as 10,000 kilometers, looks like the blood-colored bones agglomerated to form a strong skeletal clan. He wears blood-colored bone armor, and his expression is cold and crazy.

"boom!"

The Lord of Dove and Crocodile burned the divine body, and the void in which it was located began to tremble, and an extremely powerful and terrifying wave descended on it, and the blood on it became more and more concentrated, and the red-colored tall evil body glowed with blood. , One by one evil blood-colored secret patterns appeared on the surface, twisting as if they had come alive.

Finally, it appeared in the surrounding area and swelled fiercely. After swelling to one hundred thousand or one million kilometers, the secret pattern began to rotate, turning into a blood-colored vortex full of devouring power.

The endless cyan gusts also revolved, but one was clockwise and the other was counterclockwise, but the two gradually came into perfect contact and merged together.

"Boom..." One layer of cyan, another layer of blood, another layer of cyan... the spiral-like vortex centered on the "Master of Dove Crocodile", spreading continuously, spreading to hundreds of millions of kilometers away, but also The black river space spread to Wang Yi, constantly colliding, annihilating each other's power.

Wang Yi's face changed slightly.

Actually evenly matched.

"Haha, Lord of Chaotic Source, my top-level treasure domain is indeed no better than your top-level treasure, but my Fengblood Realm plus the most treasured domain has greatly increased its power, but it is definitely not inferior to your top-level treasure domain. "The confident words of the 'Master of Dove Crocodile' came from the whirlpool of cyan and blood.

"Now that you have no advantage in your pinnacle treasure field, the next battle is yours and me!"

Wang Yi squinted his eyes, and the Wind and Blood Realm plus the Supreme Treasure Realm, the power can actually reach the level of the highest treasure realm. It really deserves to be an ancient powerhouse who has survived three cosmic ages, and none of them is simple.

"Ang~~"

At this time, a majestic roar came from the vortex with endless evil aura.

First is a huge ferocious head, then a thick neck covered in scale armor, and then a huge body. The whole body is made of dense steel, but it looks like a real living thing...the body is more than 100,000 kilometers long. A pair of huge black eyes with scorching flames were staring at Wang Yi ruthlessly.

At the same time, an endless arrogant and domineering aura passed over.

"This is the unique knowledge formed by the lord of the crocodile's pinnacle, the treasure of thought power weapons-the 'crocodile demon'?" Wang Yi has read the information of the entire universe, including the information of the strong, and is very clear about their information. recognize.

It's like the first mind weapon 'Tissot' that Wang Yi got back has various forms such as 'Diamond Mountain Cone', 'Heavy Mountain Shield', 'Sword Matrix', 'Swordfish Array'... The pinnacle of the most treasured mind power weapon also has multiple display forms... and the 'crocodile demon' is his most commonly used and most powerful combat stance!

"Master of Chaotic Source, you can taste the power of my Crocodile Demon. I have gained countless years of this thought-power weapon, and I have researched three sets of the strongest secrets. With this, I can fight against the Lord of the fifth-order universe for a while without losing the wind! "

"It has been contaminated with the blood of many universe lords, and you are the new one!"

The sharp and crazy voice of the lord of the crocodile came from the huge crocodile, but Wang Yi knew very well that the lord of the crocodile was not in the crocodile, he was remotely controlled.

But the 'crocodile' is proficient in melee combat and is extremely vicious.

"boom!"

The huge body of the Crocodile Demon turned into a black streamer and rushed forward.

Wang Yi looked at it, and said in his heart: "This crocodile demon, on the contrary, is very similar to the magical beast weapon, suitable for the spirit of the "Seven Changes of the Gods". "

Wang Yi cultivated the way of the eight great beast gods. Naturally, the "Seven Variations of Yanshen" and the beast gods would be able to do so, and he could see a little bit of mystery at a glance.

"It's really an extremely delicate and terrifying means of combat. It's different from the style of any beast-god powerhouse I've seen before in the primitive universe. It actually triggered me." Wang Yi exclaimed in his heart, and at the same time ignited. Intent to fight. Fighting with these powerhouses from all sides in the universe may also be of great help to him to understand and study the secrets.

In that case, let's fight.

"Boom!" Wang Yi also burned his own divine body, pulling out the saber behind his back, his eyes dazzling, like burning stars.

"Funeral!"

As soon as he shot, Wang Yi used the strongest secret method he had now.

Moreover, in order to better understand the essence of combat, he did not urge the secret pattern of the "Cang Yue" Xeon Treasure Sabre in his hand.

But even so, Cang Yue, who didn't urge the real power, was comparable to the quasi-Xeon supreme treasure that power urged to the extreme, and surpassed the third most common pinnacle weapon.

Coincident with each other, the power is still terrifying.

This knife slashed out, seemingly slow and fast, and the surrounding time and space were driven by this knife, as if the weight of the universe fell on this knife. The whole world was left with this lonely knife, but it belonged to the absolute center of the knife.

Very dazzling, extremely beautiful, and full of perfect charm.

The black and huge "crocodile demon" also grabbed it, and the sharp claws caught five black light marks, and the fierce aura poured over the sky, as if it could poke a big hole in the universe. In terms of subtlety, it is Not at all under Wang Yi's "funeral".

Wang Yi's divine body has grown to a height of 10,000 kilometers, and his true divine body volume is still 100,000 kilometers. The blue saber in his hand also extends for nearly 10,000 kilometers, which happens to collide with the claws of the 100,000-kilometer behemoth. .

When the two come into contact, all power erupts.

"Boom!" An extremely deep voice was produced, and the voice was also a kind of power at this moment, and the chaotic void rippled in circles at this moment.

Earth-shattering collision!

The surrounding chaotic air current, including the realm, was instantly blown away by violent power.

The power of the collision caused both parties to fly back to www.mtlNovel.com~ Although all the power of this trick is consumed, the remaining power is still passed back to the user through the weapon, but Wang Yi is the strongest treasure, naturally there is no A little bit of feeling, but the black crocodile demon, composed of the most precious weapon of peak mind power, didn't care.

"You did a good job with the sword just now! Actually you can go head-to-head with my crocodile demon!" The lord of the crocodile was a little surprised, and his voice was low. "I really doubt if you have only cultivated for a hundred thousand years."

It is unbelievable to cultivate as the Lord of the Universe in one hundred thousand years, and to create the strongest secret technique is even more unbelievable.

"Whether it's true or not, I'm very upset, so accept my ravages." The lord of Dove Crocodile looked crazy, and the huge black crocodile demon neighed and rushed over again.

"You will be ravaged!" Wang Yi also rushed forward without showing weakness.

[Chapter 579: Don't think that only you can help](#)

"Roar..." The crocodile demon turned into a streamer again, roaring and rushing directly towards Wang Yi. The powerful might can distort and tear the surrounding space.

"Second kill!"

"whip!"

The secret pattern on the armored body of the crocodile demon body composed of the steel forest suddenly lit up, and a huge crocodile demon phantom of tens of millions of kilometers appeared behind it.

"Peng!"

"Woo-" A roar literally tore through the endless void and spread. The whole body was covered with black scale armor, as if a huge beast of a continuous mountain range appeared above Wang Yi, and at the same time the thick and long tail turned into a shadow and drew off at an incredible speed.

"Funeral!" Wang Yi burned the divine body, poured endless divine power on the "Cangyue" war knife in his hand, and at the same time urged the first secret pattern to be issued.

The power skyrocketed suddenly, and the bright knife light immediately faced the huge whip shadow that seemed to be able to split the universe.

"Boom..." The black scaly tail and the huge blue sword directly collided. But in front of the scaly tail, the blue sword was one size smaller.

"Boom!" The huge black scaly behemoth and Wang Yi flew to both sides while being shaken. The powerful impact made the chaotic void turbulent again, and the terrible impact had already repelled the domain.

"It was actually blocked." The lord of the crocodile was even more surprised, and at the same time he became even more crazy.

"I don't believe you can block it next."

"The third kill!"

"Woo-" The hideous black beast shadow of tens of millions of kilometers merged into the body of the giant scaly beast, but the figure of the giant scaly beast shrank suddenly, turning into a behemoth of 10,000 kilometers similar to Wang Yi's body, only on its body. The breath was even more terrifying, and the roar rushed over again.

As if a huge cannonball slammed into Wang Yi viciously, a sharp point was formed in the time and space of the universe, and all the forces gathered on top of the behemoth's attack.

"Good coming!" Wang Yi's eyes were fiery, and he was also alive. "Boom..." The countless burning divine power quickly penetrated the blue sword in a deeper level, the secret patterns in the sword were all lit up, and the power began. Soaring rapidly!

"Boom..." The two fought again like streamers.

The sword and the body of the crocodile demon kept fighting.

Wang Yimeng directly urged the second layer of the Cangyue War Sword!

"Peng!"

The sharp sword burst out, sweeping everything.

The huge black scaly monster was slammed and flew out.

"Impossible!" The lord of Dove Crocodile widened his eyes, and the **** flames emerging from his body obviously began to burn a lot of divine power. Attacked Wang Yi, but Wang Yi was obviously stronger than him.

"Peng!"

"Peng!"

"Peng!"

The light of the knife is like a wave, forming a beautiful knife flower, and the waves are higher than the waves.

The black monster was beaten steadily and retreated, leaving only the power to parry.

"My power of thought, plus the strongest secret technique, is not his opponent?" The lord of the crocodile felt unbelievable.

"His attack power has surpassed me and has reached another level."

"This, this... With this combat power, the Lord of Chaotic Source is not Tier 4, he is clearly Tier 5."

"As soon as you break through to the Lord of the Universe, do you have Tier 5 combat power?"

Although shocked and unbelievable, the lord of the crocodile had to admit the reality.

"Wow!" The crocodile demon who was fighting with Wang Yi suddenly disintegrated from the inside and broke down into black fragments in the sky in an instant. Surrounded by the lord of the crocodile.

Wang Yi was startled slightly, then stopped, and looked at the "Lord of the Dove and Crocodile".

The 'Master of Dove Crocodile' stared at Wang Yi firmly, "Okay, it's really surprising. I didn't expect, I didn't expect that a little guy who just broke through the Lord of the universe is actually the Lord of the fifth-order universe."

"I have to admit, I am not your opponent, that's it for today."

Wang Yi frowned slightly, and said indifferently: "Lord of Dove Crocodile, do you want to go now?" He held a knife and coldly pointed at the stunned 'Lord of Dove Crocodile,' "Yell to me when he comes. Kill, if you can't beat it, just leave...what do you think I am?"

The Lord of Dove Crocodile smiled and said, "Master of Chaotic Origin, what do you want?"

"Although you are stronger than me, but I want to go, what can you do with me?"

The Lord of Dove Crocodile was also resentful in his heart. In terms of strength, the Lord of Dove Crocodile also belonged to the top ranks of the Lords of the Universe, belonging to an existence comparable to the Lord of Bingfeng.

Generally speaking, a gap of only one level is not in danger of death at all.

The master of the fifth-order universe can suppress the master of the fourth-order universe, but it is almost impossible to kill.

So he felt that the Lord of Chaotic Source was doing futile and useless work, wasting everyone's time.

I completely forget that I was so stubbornly entangled before.

"I'll say it again!" Wang Yi turned into a stream of light and rushed up again. Although "Black Night River" could not suppress the strength of the 'Lord of the Dove and Crocodile', it was easy to restrain him from leaving him so easily.

"Then fight!!!" The Lord of Dove Crocodile is also a rebellious and crazy character. Seeing that the Lord of Chaotic Source cannot let him go so easily, he simply wants to fight with the Lord of Chaotic Source again. .

"Peng!" The huge black crocodile demon was severely slashed by Wang Yi and flew away, while Wang Yi flew towards the lord of the crocodile.

To manipulate the crocodile demon to exert the strongest combat power, the distance between the lord of the crocodile and the crocodile could not be too far apart, and soon Wang Yi narrowed the distance.

"Don't think I'm weak in close combat!" The lord of the crocodile roared, purple light spread in his hand, and two claws appeared.

After practicing for nearly three times of reincarnation, he also knew his weakness in melee combat, and painstakingly created a set of melee skills. Although not as powerful as that crocodile demon, it was also the strongest secret technique, and he had the confidence to block Wang Yi.

With the addition of the 'crocodile demon', the two are displayed at the same time, and the combat power is definitely the top of the Tier 4 top.

"clang!"

After a meeting, the lord of the crocodile was shot and flew out by Wang Yi, but after all he was blocked, and the crocodile demon behind had arrived and grabbed Wang Yi's back.

The lord of the crocodile at close range was more able to feel the horror of Wang Yi's saber. Although surprised, he continued to pester Wang Yi.

The Lord of Dove Crocodile also has a clone, but he did not carry it with him. Instead, he quickly restores the consumed supernatural power through treasures similar to the original treasure~www.mtlnovel.com~ Seeing the "Lord of Dove Crocodile" performing the melee secret method, Wang Yi also sighed in his heart. , It's good to live long in this first reincarnation era. The master of the crocodile created the four strongest sets of secret methods and applied them so flexibly, which can be called supernatural.

"Don't think that only you have a helper!" Wang Yi shouted.

"What!" The Lord of Dove Crocodile trembled.

"Wow!" Suddenly two more figures appeared beside Wang Yi, exploding with a powerful aura.

"boom!"

The lord of the dove and crocodile was directly knocked into flight without any resistance, and flew out at a speed more than ten times the speed of light.

The breath of the divine body suddenly weakened.

[Chapter 580: The Unlucky Lord of Dove and Crocodile](#)

It came too suddenly!

At the critical moment when Wang Yi and the Lord of the Dove Crocodile were fighting, especially when the Lord of the Dove Crocodile, even if the "crocodile demon" condensed by fighting and manipulating mind-powered weapons at the same time, fell into the wind, he did not expect it at all. Two people will be killed suddenly.

It's too late to fight.

"boom!"

"boom!"

The second level power of the two Xeon Arcane war knives was triggered, and they smashed on the lord of the crocodile without any weapons to block, and the lord of the crocodile flew out like a meteor, and the lord of the crocodile quaked violently. , I only felt his divine body breath instantly weakened sharply.

It weakened to less than 50% in an instant.

It was just that in the next moment, a large amount of divine power was quickly transmitted to him through the original treasure in the world ring in his body, causing him to soar and recover immediately, but it was not as fast as carrying the clone divine body.

51%.....52%.....53%.....

The Lord of Dove Crocodile turned his head and looked at the Void Zerg and Yanxing Giant Beasts that appeared in front of him. Both the Void Zerg and the Yanxing Giant Beasts are maintained at a height of 10,000 kilometers. In fact, one is more than 90,000 kilometers high, and the other is Million kilometers high.

"I have the protection of the highest treasure armor, just two swords, and the loss of the divine body is more than 50%?" The lord of the crocodile was frightened, if he suffered two more swords, wouldn't it just fall off.

Although it is said that this is just a clone of his divine body, it is not truly fallen, but it is still very precious, not to mention that there is a treasure that he spent countless years and endless efforts to collect.

"How come, there are two such terrifying powerhouses next to the Lord of Chaotic Source, and it feels no less inferior to him. The Lord of Chaotic Source is a human, but the other two are obviously not..." Suddenly, my whole body shook and lost his voice:

"Master of Chaotic Origin, is this your clone?"

"Hmph, have you guessed it, then you go to death!" Wang Yi rushed over with the Void Zerg and the Yanxing Giant Beast.

Of course, the Yanxing Giant Beast did not use the "Blood Cloud Orb" to pretend to be the "Blood Cloud Palace Master".

The 'Master of Dove Crocodile' sank in his heart, anxious and angry.

"Damn it, the Lord of Chaotic Origin not only hides his strength, he himself has the main battle power of the fifth-order universe, and his two clones also have the main battle power of the fifth-order universe. This is too outrageous. What kind of training is this? The one hundred thousand-year-old newly promoted master of the universe is far more terrifying than many veteran Tier 5 universe masters."

"I'm so unlucky."

boom! The three avatars of Wang Yi all held war knives, flapped their wings, and instantly turned into a stream of light and rushed directly to the frightened and angry Lord of Dove Crocodile.

The lord of the crocodile controlled the 'crocodile devil' to intercept, but only one could be intercepted. Wang Yi's human deity and the Void Zerg clone had already arrived in front of him at the same time.

As if two lightning bolts appeared in the void, a poignant blue blade light and a cold silver blade light simultaneously slashed towards the flustered Lord of Dove Crocodile.

"Dang!" The purple claws of the lord of the crocodile blocked one of them, but it was severely slashed by another war knife that suddenly appeared behind.

The powerful impact caused the Lord of Dove Crocodile to throw away the whole involuntarily.

"Ah!" The lord of the crocodile felt a huge shock, and the dazzling silver knife light behind him smashed his body, causing the lord of the crocodile to tremble, and the divine body immediately attenuated, weakening about 20%.

If it weren't for his huge divine body and relatively strong armor protection, he would have to be annihilated in an instant if he replaced it with the Lord of the universe with an average size.

"What to do, I can't beat it." The Lord of Dove Crocodile's eyes were filled with despair.

One hit one, the lord of the crocodile can't beat it.

Now three hits one, one-sided ravaged and crushed.

The situation is completely detrimental to the lord of the crocodile.

And the Yanxing Giant Beast easily got rid of the obstacle of the 'crocodile demon', and its powerful power shot it out, and then rushed to the side of the 'Lord of the Dove Crocodile'. The 'Lord of the Dove Crocodile' could clearly see the Yanxing Giant. The beast's face full of smirk, could not help but agitate.

No matter how crazy it was, the 'Master of Dove Crocodile' never thought that he would die.

"Lord of Chaotic Origin, wait..." The lord of Dove Crocodile eagerly transmitted the voice, "This time it is me who is wrong. I admit it, I am willing to apologize."

Wang Yi's recognition of the 'Lord of Dove Crocodile' surprised Wang Yi a little.

Doesn't it mean that the first reincarnation era was very crazy, all lunatics, and they were all more fierce than the other?

Why did this 'Lord of the Dove Crocodile' be stunned after only a few hits?

Wang Yi stopped, and the three divine bodies formed a triangle to surround the "Lord of the Dove and Crocodile". The sword pointed at him, and he kept thinking.

The 'Master of Dove Crocodile' is the strongest of the 'skeleton race', the second largest peak race in the First Universe Era. The race has four strongest humans in the universe, and the human race is far superior to the primitive universe.

The three cosmic ages all gave birth to human races, among which the first and third cosmic ages, the human races are among the pinnacle races.

Only in the Second Universe Age, the human race belongs to a weaker force, and only one of the strongest in the universe was born.

But the first cosmic age, the second cosmic age that have undergone a complete cycle...they have much more powerful people in the universe.

Therefore, the human race in the Second Universe Era has the same strength as Wang Yi and their primitive cosmic humans, but they are not the pinnacle race in the Second Universe Era.

The 'skeleton race' is a very powerful and crazy race. In addition to the strongest in the universe, there are more lords of the universe than the human race. It is not easy to mess with. Of course, Wang Yi is not worried about what the other party will do to the strong of the human race. .

After all, the strongest in the universe generally will not attack a universe master for no reason.

And the fall caused by the fight between the masters of the universe is also a normal thing.

You can't just let the opponent find the trouble of the human race, the strong human race can't resist, let's kill.

Wang Yi is wondering whether he will kill the 'lord of the crocodile' here.

But he also thought that this 'Lord of the Dove Crocodile' had a clone, even if it was killed here, it would only lose one clone of the main battle, contributing very little kill value.

Wang Yi thought for a while and looked at the awkward 'Lord of the Dove Crocodile' indifferently. He was attacked by Wang Yi one after another. His divine body has not recovered to half until now, and his strength has also decreased a lot.

"Three top treasures, today's things will be clear."

Hearing the other party's request, the "Master of Dove Crocodile" was relieved in his heart.

Although the value of the three top treasures is not low, they can still bear the 'Master of Dove Crocodile', but they will have to bleed heavily.

It seems that the other party has no plans to kill them~www.mtlnovel.com~The Lord of Doves and Crocodile's even a little grateful.

"Okay!" The Lord of Dove Crocodile agreed, and then a spatial ring flew to Wang Yi and was caught by him.

"Lord of Dove Crocodile" said solemnly: "Lord of Chaotic Source, I can go now."

Today, he was embarrassed, he just wanted to leave here immediately and stay away from this terrifying Chaotic Source Lord.

Wang Yi nodded, retracted the domain, and the space blockade was lifted at the same time. Feeling the familiar spatial fluctuations, the "Master of Dove Crocodile" was excited, and disappeared with a single teleport.

Tens of thousands of light years away, the "Lord of Dove and Crocodile" appeared, and looked behind him.

"This Chaotic Source Lord is so powerful, not inferior to the Chaos City Lord, and there are three major divine bodies acting together, it seems that this is not all of his divine bodies... this news has to be passed back to the clan."
