

A God 581

[Chapter 581: Inner Domain of Qingfeng Boundary](#)

Wang Yi looked at the disappearance of the "Lord of the Dove and Crocodile", put away his two divine body clones, and stroked the simple and mysterious lines of his "Cangyue" war knife, thoughtfully.

"Although I am strong now, I mainly rely on the Xeon Supreme...If I don't have the Xeon Supreme, I would only be a stronger Tier 4 top cosmic master."

"The main reason is that my secret technique level is not enough."

"If I can create the secret method of the strongest in the sixth-order universe, even without the strongest treasure, I will be able to explode the sixth-order combat power."

"If I can comprehend and master the third Secret Rune of the Xeon Supreme Treasure, then by inducing the secret rune, I can also explode the sixth-order combat power."

"And now, I have not fully understood the fifth layer of secret patterns connected to the Sky Tower, nor have I created the strongest fusion method, let alone the strongest secret method in the universe..." Wang Yi took a deep breath, "so I want to improve quickly. The best way to strength is to comprehend the third secret pattern of the Supreme Treasure."

The third secret pattern of Xeon Supreme (equivalent to the sixth stage of Tongtian Tower) is much more mysterious than the first two secret patterns. Even if Wang Yi wants to understand it, it will take a lot of time.

However, he doesn't lack time now. If the incarnation of divine power or a clone accelerates the research in the cultivation space, one year is equal to 10,000 years.

"Mastering the third secret pattern of Xeon Supreme Treasure as soon as possible to improve my strength is also good for me to explore the universe."

Wang Yi nodded slightly.

As soon as he turned around, he teleported far away with a "swipe" sound, the place was empty, as if nothing had happened before.

As soon as he left the water and came to the airspace of Qingfengjie, Wang Yi flew directly to the entrance of the high mountain in Qingfengjie by teleporting and flying.

Because the main body of Qingfeng Realm was actually an extremely majestic mountain, which was then cut off in the middle. So the exit is very wide.

The main mountain of Qingfengjie is about 98.02 million light-years high, and the maximum diameter of the truncated peak is 12.26 million light-years.

So even if it keeps flying upwards, some areas can be teleported, and it takes time.

...

The Skeleton Clan is the pinnacle group of the first reincarnation era. There are four large and small universes in the vast universe.

In the fourth small universe.

In a single plane space, the sky is densely covered with dark clouds and faintly flowing red light, endless volcanoes are located on this land, and one of the most majestic craters sits on a majestic palace.

Inside the palace, a humanoid creature in a golden armor opened his eyes. He has six pairs of eyes, exuding a blood-red glow that makes people palpitating.

"Master of Chaotic Source..." He murmured, his voice hoarse.

"The human race in the First Universe Era actually had such a powerful cosmic lord. Fortunately, I ran into him as a clone and was not killed." The Golden Armored Demon thought for a while, and reported this information to the tribe's database. , With a memory image of himself fighting with the Lord of Chaotic Source.

He walked out of the palace, looking at the black and crushing sky and the thick smokey land, sighing with emotion.

"My race, when can I truly be detached."

The news reported by the 'Lord of the Dove Crocodile' was quickly learned by other skeletal powerhouses because it marked important information.

"The Lord of the Chaotic Source, is the peerless genius of human beings who has recently risen in the primitive universe and has been rumored to be a great genius?"

"Can he defeat the lord of the crocodile? Forcing him to bow his head?"

"The Lord of Dove Crocodile said that he has the main combat power of the fifth-order universe, which can be comparable to the Lord of the Galaxy and the Lord of Chaos City?"

The skeletal powerhouses were all taken aback.

The Master of Human Chaotic Source has only cultivated for 100,000 years, so is he so powerful?

There is no air-tight wall in the world, not to mention that this news has not been forbidden to spread. The skeletal powerhouse's mouth is not strict. Soon it was discussed and spread slowly through some channels, and it was known by other forces in the universe. .

Soon, the various forces in the universe knew that the human race of the primitive universe had a fifth-order cosmic master who entered the universe, which was not easy to mess with.

In the end, even the original universe knew about it.

At this time, Wang Yi finally entered the body of Qingfeng Realm's lord mountain and began his adventure.

...

The inner and outer areas of the main mountain of Qingfengjie.

Wang Yi is flying in a cave tunnel.

This tens of millions of kilometers high and endless deep ochre channel was filled with pale white fog, and as it flew forward, some white ice crystals emerged.

The space is full of endless cold air. If the Venerable Universe comes in, the divine body will freeze after a while, and the soul mark will also be broken by the freezing and fall off.

Going deeper, the Lord of the universe does not have the treasure of armor, and the divine body is easily injured.

Because of the existence of these white mists, the spatial fluctuations here have already stagnated and solidified, and cannot be teleported. You must leave this frozen area, go to places with spatial fluctuations, and sense other areas with spatial fluctuations before you can use instantaneous shift.

In Qingfeng world, the main mountain is majestic and mysterious, and there are caves leading to the outside world.

This cave passage sometimes has forks. Wang Yi naturally chose the largest fork to move forward and keep moving forward.

"Legend, Qingfeng Realm's inner region is very dangerous. Chaos City Lord and others may fall. In the core place, the strongest in the universe may fall." Wang Yi squinted his eyes.

It's like trespassing in the Qingfeng realm, which is extremely dangerous. Generally, you have to be a top palace treasure.

In many places, even rely on the peak palace treasure to break through.

Those who dare to invade in the interior are basically the masters of the fifth-order universe or the masters of the fourth-order universe with superior life-saving methods.

Such as the lord of Yanying, the lord of Bingfeng, the lord of Xujin, the lord of Qingdong... and even the lord of Chaos City, the lord of Penggong, they all wandered in the inner realm.

And the founder of the giant axe has penetrated deep into the inner realm time and time again.

Even the master of the sixth-order universe dare not enter those places easily.

"It takes a lot of time to wrestle inside the three Jedi. A rush may take decades or hundreds of years." Wang Yi used the "Black Night River" field, and the mighty field spread to tens of millions of kilometers...because the field cannot be penetrated. The rocky mountain wall can only maintain such a large range in this narrow passage cave.

But even if he used the domain, Wang Yi remained vigilant in his heart, knowing that some of the dangers of the three major Jedi came quietly, that is, the domain could not be discovered, and it was too late to wait for the danger to come.

Therefore, in addition to field penetration exploration, it is necessary to carefully observe changes in the surrounding environment to prevent crises.

Wang Yi's goal is the depths of the inner realm of Qingfeng Realm. After all, there are many peaks and treasures in the inner realm, which means that there are many opportunities for signing in and rewarding opportunities.

Flying along the deep cave passage, occasionally detected some anomalies in the nearby area that made the area unexplorable. Only relatively normal areas can be explored clearly, and Wang Yi ignored it and moved forward.

According to the map data information given by the human race, he soon flew for almost three years in a constant turn of the road.

In three years, the space for Wang Yi's cultivation is 30,000 years.

Sitting on a beautiful island in the Tongtian Pagoda practice space that Wang Yi carried with him ~www.mtlnovel.com~, Wang Yi smiled.

It's a pity that although this island is beautifully arranged to suit Wang Yi's preferences, there is no creature other than him.

"It was unexpected." Wang Yi was full of joy. "The fifth Secret Rune of the Tongtian Tower, in these 30,000 years, I actually understood most of it, and this speed is too fast."

"Could it be that I have accumulated too much before and laid a good foundation?" Wang Yi guessed in his heart.

"Furthermore, the battle with the lord of the crocodile was also very inspirational to me. Now I have begun to study the strongest secret method of fusion...Although it is only the fusion of the two strongest secret methods, it is not as good as the five kinds of the lord of the five chakras. Unparalleled integration."

But this good beginning undoubtedly made Wang Yi full of confidence.

The only regret is that I haven't mastered the third level of Xeon Supreme Secret Weave.

[Chapter 582: Magical Cave](#)

one year later.

Wang Yi was flying at a speed close to one hundred times the speed of light in an endless, vast cave where the space fluctuates and stagnates.

"This route has been explored by my human race, and it is considered one of the safest routes into the Qingfeng realm. The outermost white mist cave spans about 120 light years."

"And here, although the spanning area is ten times that of the White Mist Cave, some places can be teleported at any rate."

"Finding those places will naturally increase the speed of advancement."

Before teleporting, Wang Yi would naturally use the Treasure Domain to investigate and confirm the safety before teleporting over.

These areas are simply divided into ordinary, dangerous, and extremely dangerous. This area just entered can only be regarded as ordinary. On the one hand, the natural power is not terrible enough, on the other hand, it can first explore through the domain and then teleport to evade.

The ability to teleport depends on teleportation. It needs to be used for super long-distance to clear the way in the treasure field, and even needs the palace to spend it, and it will also rely on the palace to spend it.

"I don't know what I can get in the inner domain." Wang Yi had a look of expectation in his eyes.

Xeons are generally located in the core area and rarely appear in the inner region. Wang Yi doesn't expect to be able to meet them, but relying on the panel, everything is possible.

After all, this is the 'Qingfeng Realm', one of the three Jedi who experienced the age of reincarnation, and it is an incredible existence in itself.

Wang Yi entered the 32nd year of the Universe Sea.

The inner domain of Qingfeng.

At the place where the endless white light hits, a black python with a length of tens of millions of kilometers is advancing against the wave.

The black python is actually made up of countless black rivers. The serpentine body has faint black light lingering, pushing away the white light around it, and shuttles in the endless white space, while the tail of the python has a dragon boat shape. Purple palace.

Inside the palace, Wang Yi stared at the space around him, manipulating the black pythons formed in the Supreme Treasure Domain from time to time, or shaking his head to avoid the danger of lurking in the white light, or directly waving his tail to fly it out.

Wang Yi whispered: "This magic light cave is a dangerous area in the Qingfeng realm. The largest diameter is 13,000 light-years, and the outermost periphery is hazy white light. Then the brilliance gradually deepens, and the power becomes more powerful. The Lord can pass through with his armor, and when he gets here, he must use the top treasure palace to resist, otherwise he can only persist in this endless white light for a day or two at most..."

Wang Yi can easily detect through the Supreme Treasure Domain that the white light is composed of endless tiny "white crystal grains", sweeping at a speed comparable to dozens of times the speed of light, and the impact of each white crystal grain is equivalent to the high-level universe. One blow, thousands, and endless grains, even the Lord of the universe can hardly bear it by relying on the treasure of the armor alone, and must rely on the palace of the treasure.

And this is just the periphery of the famous and dangerous place of the "Magic Light Cave". Inside its core, there is a black light area, with endless suction like a black hole, and its power is thousands of times that of a black hole. If the Lord of the universe is accidentally caught Inhale it, even if you take the top palace treasure, you will fall, only the peak palace treasure has a bit of survival.

Even if it survives, it is generally impossible to escape. You must call the strongest in the universe to take it away.

Fortunately, the radiated area of this 'black light area' is not large, and it can be bypassed under normal circumstances, and there are very few riots.

Of course, if you don't know the situation here, it is difficult to detect the situation, and the degree of danger will naturally increase greatly.

[Ding, congratulations to the host for signing in successfully, and reward the 'magic mirror'.]

The prompt of the panel appeared in Wang Yi's mind, but Wang Yi was unmoved by the ancient well.

It is not the Xeon Supreme, and it is of little use to him.

"Even if it is a hundred times the speed of light, it will take more than 30 years to cross this area with the shortest route." Wang Yi sighed with the difficulty of driving the inner region.

Other strong players have to carefully explore some areas, and the speed is several times slower.

"It would be great if there is detailed map information inside Qingfengjie, but I haven't signed in." Wang Yi was a little pity.

With a map, you can know which routes you can walk on, where there are dangers, and where there is the fastest path to avoid disasters.

There is a detailed map, it is naturally safer to explore, and the efficiency will be improved a lot.

The three major Jedi, since they are Jedi. In those endless years, no one can really have a complete map of the Jedi, and no one has the ability to explore every place in the Jedi clearly. In the Universe Sea, the map information of the three major Jedi has always been of high value. The wider the recorded area and the deeper the three major Jedi, the higher the value.

The three Jedi are on par. Qingfeng Realm, Space Boat, and Liuzhong Mountain are all places where each piece of the strongest treasure can be born, and the highest treasure is even more common. Of course, accompanied by precious treasures is the terrifying environment...a map that becomes more detailed is extremely precious.

"The map of the human race is too crude. The true map of Qingfeng Realm is only a very small part of it, and many places are not detailed enough." Wang Yi secretly said, "Like the depths of the inner realm and even the core area, it is even more important. A little pitiful, almost all left behind by the founder of the giant axe."

"The Qingfeng world is so big and there are millions of dangerous places. It is completely impossible for the Lord of the universe to explore it only by the human alliance."

Not to mention the human race, even the two holy land universes dare not say that they have a complete understanding of the three Jedi.

After a long time, every force is exploring, and sometimes some map information that is explored at a great price is regarded as a treasure internally and is not easily exchanged.

A look of excitement appeared in Wang Yi's eyes, "However, it has been 32 years since I entered the universe, and 320,000 years have been spent in the cultivation space. With my continuous comprehension of the fifth secret pattern of the Tongtian Pagoda, I feel that I am almost able to understand... .."

"It's really hateful~www.mtlnovel.com~The third secret patterns of several Xeon Arcana swords are all stuck at the end, just a little bit." This is a bottleneck, as if it goes from 0 to 1. It is a different concept. Wang Yi understands that if there is no chance, it would be normal for this step to last for hundreds of millions of years.

"But if I understand the fifth Secret Rune, then I will be able to create the strongest fusion method immediately."

"With this as an impetus, I can quickly understand the third secret pattern of other Xeon Supreme Treasures."

"At that time, my combat power will increase again. Even if I don't rely on Xeon Supreme, I can still be comparable to the top cosmic masters such as the Chaos City Lord and the Galaxy Lord."

"With the Xeon Supreme Treasure, then a group of fifth-order universe masters, I can sweep them all!"

Wang Yi looked at the black python that stretched for tens of millions of kilometers outside the palace, filled with pride.

[Chapter 583: Dongdi Holy Land](#)

About ten years later.

"Well, the front is the 'gray light area'. It's also called the gray tide area."

A huge black python swims in the endless white world, shook its head, and looked towards the front of the grayish color.

The light there is much darker and darker than other places, so it can be seen at a glance.

"Inside the gray light area is the black light core, but it is much larger than the black light core."

"If you make a detour, it will take more time. Go straight through, the fastest."

"Of course, go straight through. If you encounter a black light burst, you will easily get involved."

"The entire Demon Light Cavern is the most terrifying black light hole eye that can explode and spread to most of the Demon Light Cave area'Black Light Tide.'"

"The outbreak of black light only appears once in a period of time. I shouldn't be so unlucky." Wang Yi muttered inside the palace like a purple dragon boat. "I have the pinnacle palace treasure. Even if I get involved, it won't fall. Even if I can't get it out, I can ask the founder of the Great Axe to help and take me out."

"Since there is no life-threatening...then go straight through." Wang Yi was also very simple.

"Magic Light Cavern" can only be regarded as an ordinary dangerous area in the "Qingfeng Realm", and you can save your life with the treasure of the peak palace.

And like some high-risk areas, such as the Twelve Abyss at the end of the "Frozen Lake Tinghuo" of the Cosmic Boat, only the strongest in the universe can survive, and even the master of the universe who has the strongest treasure dare not enter. Going in... is going to a dead end.

Extremely dangerous places, even if the strongest in the universe breaks in, they will fall, but such places are generally in the core area of the three major Jedi.

Wang Yi quickly rushed into the gray light, and then felt a far more powerful impact and pressure than before. There are countless 'gray grains' in the gray light, each of which is thousands of kilometers in size, which is several kilometers in size. , The white light particles with a diameter of tens of kilometers are many times huge, and the flight speed is also increased a lot... a large number of gray crystal grains... or the crystal mountain hits the palace treasure at a high and terrible speed, and even the peak of the treasure field is formed All of the black pythons were a little unstable when they were impacted.

Wang Yi had to shrink the field a bit, from tens of millions of kilometers to millions of kilometers, and it was easier to maintain control.

If there is no domain protection, his flight speed in the light tide will definitely be greatly affected, and it is almost impossible to cross this magic light cave in the planned time.

And now, the python formed by the "Black Night River" in the highest treasure domain repels the surrounding impact, and he is much more relaxed. Of course, the divine power will be consumed a bit, but Wang Yi naturally has a lot of treasures to restore the divine power, so consumption is not a problem. .

"boom!"

"boom!"

Thousands of kilometers or even tens of thousands of kilometers of crystals whizzed and hit, and the black python's body 'sagged' down and recovered, advancing against the impact of countless crystals.

Each crystal mountain is extremely hard, even the Lord of the universe is difficult to destroy.

The inner peak palace treasure was also bombed by Jingshan, but it was still as solid as a rock.

At this time, in a place dozens of light years away from Wang Yi, two parties were chasing.

"The Lord of the Eight Ruins! Stop!"

"The Lord of the Eight Ruins! The most precious treasure born in the East Emperor's Holy Land has been guarded for so long. You will grab it as soon as you come, and return it quickly, otherwise you won't be able to eat it!"

"The Lord of the Eight Ruins! Don't be obsessed with understanding!"

...

A shout came through various means, and there were a total of three palaces rushing in the gray light.

Inside the palace in front that looked like a khaki mountain peak, a rock giant was holding a stone hammer, and when he heard the cries of Dongdi Holy Land, his face showed disdain. "Guys from the Eastern Emperor Holy Land, the treasure I take will belong to me. If you want it, come and take it yourself."

"This is the Magic Light Cavern. You have been chasing me for decades, but don't chase me away accidentally when you get here, hahaha..."

He simply ignored the threat of Dongdi Holy Land.

Among the two palaces in the Holy Land of the East Emperor, there is a beautiful woman in the Holy Land of the East Emperor, surrounded by vines and leaves, wearing a delicate silver armor, and showing a cold color on her face.

"The Lord of the Eight Ruins is really hateful. He actually dared to go against my Dongdi Holy Land."

"It's nothing more than a sad guy facing the limit. Even the top of Tier 5 will fall after this era of reincarnation."

"It's all to blame, Ling Yan, didn't you look at the treasure, this can be taken away by him. The treasure falls into the hands of the master of the Eight Ruins, and it is difficult to get it back."

"Aren't you also unable to stop the other party? Otherwise, why would we have to catch up until now."

The Lord of the Universe in the East Emperor Holy Land was a little annoyed. He thought that no one was coming nearby, but he let the Lord of the Eight Ruins who suddenly rushed out to take away the treasure that was born with hard work. The East Emperor Holy Land holds that it is the universe. The two sacred places of the sea have always believed that they are a bit higher than the other forces. How could they bear this breath and called the Lord of the nearby Holy Land Universe to chase and block the Lord of the Eight Ruins together.

However, the region in the "Qingfeng Realm" is complicated and there are many dangerous places. Even these cosmic masters dare not run wild, and they have not stopped the 'Master of the Eight Ruins' and recovered the treasures after delaying until now.

I chased it several times for decades, but didn't stop the top 5th Tier 'Master of the Eight Ruins', and rammed into the 'Magic Light Cavern' again.

Of course, the other cosmic masters of the East Emperor Holy Land also came to help after hearing the news.

"This time the Lord of Fog is here, waiting to catch up with the Lord of the Eight Ruins, he will definitely be trapped." A Cosmos Lord said viciously.

The Lord of Fog, the special life in the universe of the East Emperor Holy Land, he is good at trapping enemies and other methods, plus he is a cloud of creatures...even if he condenses into a human form~www.mtlnovel.com~ wants to kill him Still extremely difficult. Because he didn't know how many times of reincarnation when he was practicing in the secret method, his misty creature was able to perform strong and strong attacks instead. In terms of strength, he is absolutely comparable to Chaos City Lord! In terms of life-saving ability, he is even stronger than Chaos City Lord.

The Lord of Fog came here later, otherwise he wouldn't have been caught up several times before and escaped by the Lord of the Eight Ruins.

The Lord of Fog was alone in another palace, and a face was vaguely revealed in the volatile mist. Looking at the gradually thick gray outside, he seemed to think of something, revealing a hint of contemplation.

The two sides chased and ran, just facing Wang Yi's direction, and the distance kept getting closer.

And in the central core part of the Magic Light Cavern, there is a thick black that is slowly stirring, unlike the 'crystals' in other places, it is like a liquid, giving people a very thick and heavy feeling. , And a trace of black light is slowly permeating in all directions, seemingly slow, but the diffusion speed is constantly increasing, faster and faster...

[Chapter 584: spread](#)

In a mountain surrounded by the mighty earth-yellow light, the rock giant "Lord of the Eight Ruins" suddenly looked in one direction.

"Huh? There is an outsider ahead?"

There was a trace of evil spirits from his rough rock face. "Is the East Emperor Holy Land coming to intercept my people?"

In the past few decades, he has seen the Lord of the Universe who suddenly appeared more than once.

At this time, the few parties have already rushed into the gray tide. Due to the interference of the gray tide, the detection range is limited. When they find each other, the distance is very close, and their flying speeds are far faster than the speed of light, which can be said to be a day and a half away. Distance.

And Wang Yi in the purple dragon boat palace also found the mountain in the distance and two palaces of different styles at a distance.

Those who can appear in Qingfeng Realm are either the extremely strong fourth-order universe master or the fifth-order universe master. Wang Yi did not have the intention of looking for trouble, and controlled the palace slightly with the intention of avoiding trouble. .

According to the original route, the two sides would have collided directly at a close distance, but the angle of Wang Yi was so small that the difference was far.

The 'Master of the Eight Ruins' found out immediately, and he was relieved.

It seems that they are not from the Holy Land of the East Emperor.

"The friend in front, please stop that mountain, our East Emperor Holy Land will remember your friendship."

A voice came.

Dongdi Holy Land? Wang Yi was a little surprised.

However, what does this have to do with him.

Wang Yi decided to ignore it.

The two ancient sacred places of the East Emperor Holy Land and the Purple Moon Holy Land have a big name, and their strength exceeds any of the nearly 100 forces in the universe...but they are weaker than any of the three cosmic ages.

Perhaps they are not much worse at the master level of the universe.

However, in the First Universe Age and the Second Universe Age, the number of the strongest in the universe is more than ten times that of the two holy places!

For example, the Purple Moon Holy Land, there are two strongest people in the universe, a group of masters of the universe. The two strongest men are still without the mini-universe, the mini-universe has long been decayed, and can only live on the holy land universe.

The strongest in the universe without a small universe in the Purple Moon Holy Land, the strongest is only the eighth-order combat power. Although it can be made up for by Xeon Supreme, it is still inferior compared to other universe ages.

Just like the God Eye Race in the First Universe Era, the seven strongest people in the universe are not afraid of the two holy places, and the two holy places generally do not deliberately provoke the God Eye race.

The Eastern Emperor Holy Land is stronger than the Purple Moon Holy Land, but there are only a few strongest people in the universe, and the strongest ones are also limited.

Wang Yi is really not afraid of such a holy land of the Eastern Emperor.

The universe masters of the East Emperor Holy Land behind the 'Master of the Eight Ruins' were also a little annoyed when they saw Wang Yi's request from his side as unheard of going away.

In other words, they are also making a request on behalf of the East Emperor Holy Land.

The result was gorgeously ignored.

It's just that they also know that those who dare to sway in the 'Magic Light Cavern' activities are all super powers. Looking at the hidden breath of the power of the black python domain and the palace treasure, the opponent is either a strong fourth-order top universe master, or It is the lord of the fifth-order universe.

But at a long distance, they don't know whether the opponent is the first reincarnation era, the second reincarnation era, or the weakest primitive universe era.

"Hmph, the other party should be passing by, and I don't know which power is from. Since we are unwilling to help, then we will chase after us." A universe lord said with a slow expression.

The Lords of the Universe in other palaces also nodded one after another. At present, the most important thing is to catch up with the Lord of the Eight Ruins.

How can this be tolerated by taking food from a tiger's mouth.

If you don't take a good punishment, everyone will dare to offend his Dongdi Holy Land. What is the majesty of his Dongdi Holy Land.

Regardless of the reasons for the interests of the treasures or the reasons for maintaining the reputation of the holy place, these universe masters will not give up easily.

At this moment--

"What's that?" The Lord of the Universe, who is in charge of controlling the field's blessing palace's forward speed, said suddenly.

Then all the masters of the universe in the palace saw the scene, their expressions changed.

It can be seen that in the distance, endless darkness is pouring over the sky and the earth.

And Wang Yi also saw the darkness that was surging like a sea wave, like a huge mouth that swallowed everything.

"Black light broke out?" Wang Yi's face was a little surprised.

The black light burst is something that only occurs once in a long, long time, so long that most of the masters of the universe who wandered in the Qingfeng realm have not experienced it.

He is so lucky, he just came across this?

"Black light."

"It's black light."

"It's troublesome now."

The 'Masters of the Eight Ruins', the masters of the universe in the two palaces of the Eastern Emperor's Holy Land frowned.

They are all powerful masters of the universe, and they all carry the peak palace treasures. According to the description of this black light eruption in the past, there is no need to worry about falling.

However, being drawn into the "black eye" by the black light, it is almost impossible to escape in a short time. The master of the universe who has been drawn into the black eye in history has to find the strongest person in the universe to take it out.

"The Lord of the Eight Ruins doesn't care, let's avoid the black light first." The beautiful woman unwillingly glanced at the khaki mountain in the distance and said.

"The black light bursts so fast, can we have time?"

"Do your best. Although the black light has a large range, it is only half of the magic light cave. If you are lucky, you can avoid it. If it doesn't work, you can only let the strongest people in the clan bring us out. ."

"The Lord of the Eight Ruins is lucky."

"Let's leave the Lord of the Eight Ruins alone, maybe he can't escape, he is trapped in the black eyes."

The two palaces immediately turned their directions, instilled divine power madly, and flew violently in the direction away from the darkness.

All three parties did this, and no one wanted to be drawn into the black light.

Then you have to find the strongest in your own universe to rescue.

However, the black light spread faster than they thought. As soon as they saw the darkness in the distance, they came to them almost in a blink of an eye.

Subsequently.

"boom!"

The other peak that escaped the slowest was swallowed in the darkness.

Then there are two palaces in the Holy Land of Dongdi.

Then came the purple palace surrounded by Wang Yi's black river.

When falling into darkness, infinite pressure rushed from all directions, and the binding force far exceeded the peak domain-like supreme power, and it is estimated to be comparable to the strongest supreme domain of the universe ~ www.mtlnovel.com ~ thoroughly Crushed.

The Peak Treasure Domain was suddenly compressed to the outside of the palace, like a leather coat.

And Wang Yi also felt the surging flow of power in the darkness.

The palace treasure is somewhat uncontrollable, like a boat on the waves when a storm is coming, swinging from left to right, even if Wang Yi tries his best to control it, it is difficult to control.

Even so, Wang Yi began to burn his divine power, still trying to control his palace to fly in the outer direction, trying to stay away from the center of the black light burst.

According to common sense, the closer the area to the black light, the stronger the binding force and swallowing force.

Not only Wang Yi, but also the "Lord of the Eight Ruins" and the East Emperor Holy Land did the same.

[Chapter 585: Xeon is born](#)

The Magic Light Cavern is an ordinary dangerous area in the inner region of Qingfeng Realm.

It is not even ranked in the dangerous area of the inner region of Qingfeng.

But now this ordinary area is bursting with amazing power.

The ubiquitous black light diffused like a tide, sweeping across the cave, at a speed far exceeding a hundred and a thousand times the speed of light.

Wang Yi, the Lord of the Eight Ruins, and the Lord of the Universe of the East Emperor Holy Land were all caught in it, struggling ceaselessly.

It's like a flying insect falling into the mud, moving forward with difficulty.

"This binding force is too strong." Wang Yi exclaimed while burning his divine power to control the palace treasure to fly to the outside.

It feels a few grades better than his full control of Xeon Zhibao.

"However, isn't it that the black light center will burst out with swallowing power? Why didn't I feel it?" Wang Yi looked at the outside of the palace with a look of doubt.

As the owner of the treasure of the palace, he can naturally see the scenery outside the palace and observe everything outside.

But now, there is boundless darkness outside, that darkness is constantly impacting the palace like flowing water, and that strong impact makes it almost impossible to sustain even the peak and treasure domain.

"Moreover, this black light power is too strong. This is still the periphery. If it is the core area, the Peak Palace doesn't know whether it can withstand it." Wang Yi was full of doubts and surprises, faintly aware of what seemed to be an abnormal situation in the Magic Light Cavern.

"A situation that hasn't happened in hundreds of millions of years has actually happened." Wang Yi's eyes showed a hint of excitement, which represented an extraordinary opportunity.

From a perspective that Wang Yi could not see, a huge twisted vortex was formed in the center of the Magic Light Cavern, and the vast and endless black hole of the abyss appeared there. However, it was not a swallowing force. On the contrary, it seemed to have accumulated countless years of accumulation. Like an eruption, endless darkness surging out from the abyss black hole, permeating the entire Magic Light Cavern area for tens of thousands of light years!

In the end, the entire Magic Light Cavern was shrouded in incomparable darkness.

"Boom..."

The endless dark abyss black hole is like a huge jet black eye pupil, which is constantly expanding. The abyss black hole with a diameter of trillion kilometers is expanding, and it will soon reach the shape of one light-year...two light-years...three light-years ...

And in the dark endless abyss, something faintly behemoth floated up.

It was a black boxy object, extremely large, just drilled out of the enlarged black hole of the abyss.

The speed is very slow and slow, even the monstrous impact force only makes it emerge faster.

It's just a force of if there is no such thing, which has spread throughout the entire magic light cave. As the object is born, it continues to rise. Even if it is thousands of light years away, everyone can feel the eternal and ancient power. Pressure.

"A strong coercion, it feels more terrifying than the strongest in the universe."

"what exactly is it?"

The many masters of the universe who were floating in the endless darkness were shocked.

"This kind of vision, even if we don't have it in the historical records of the East Emperor Holy Land, is it possible that some super treasure was born?" The universe masters of the East Emperor Holy Land were first excited.

"Such a strong sense of oppression, the average peak treasure is far inferior, I am afraid that only the strongest treasure can have such a strong coercion." The beautiful silver armored woman's eyes shined and she was extremely excited. "This is our great opportunity."

"From the direction of the pressure, from the core area of the black light burst, the treasure appeared there."

"Quickly, let's go over."

The masters of the universe in the East Emperor Holy Land quickly communicated, and all decided to go and take a look.

But at this time they realized how difficult it is to advance in this black light flowing water.

That is not swallowing power. If it is swallowing down, it is easy to handle. They can use this power to move forward, but now what is coming from the darkness is a powerful and incomparable binding force.

Not to mention a hundred times the speed of light, it would be nice to have ten times the speed of light.

Fortunately, they are not far from the core area where the black light bursts, and they can reach their destination in about 20 years.

Inside the khaki mountain peak, the 'Master of the Eight Ruins' also made up his mind to urge the mountain's treasure to fly towards the core area of the Magic Light Cavern.

He was originally in the first reincarnation era, and he is already facing a limit. Even if he doesn't fight, he will soon fall. It is better to fight hard and find a glimmer of hope.

The first reincarnation era is so crazy, but also a kind of helplessness and sadness.

Of course, Wang Yi wouldn't miss it. He was still optimistic, thinking that he might be able to check in something good when he went to the core area of the black light.

However, the three parties are about the same distance from the core area, and even if they are on the way, the time is about the same.

In the endless dark black hole of the abyss, the huge tetragonal body is still slowly emerging outside, with his body shape, it is estimated that it will take several years to completely escape from the abyss black hole.

"The pressure is too strong." Wang Yi looked at the darkness surging around, and the faint coercion that came from it made people palpitate. "The Lord of the ordinary universe is simply unable to move an inch here."

"The power that accompanies the birth alone is so terrible. I don't know what the treasure is. It's not simple. It may be the Xeon." Wang Yi's eyes showed a ray of light. "I am not the only one who

discovered the situation here, as well as the Dongdi Holy Land and the other side. It is estimated that there will be a fierce struggle to seize it by then."

"It's better to inform the race."

...

Wang Yi's Yuhai ontological consciousness left in God's country is connected to the virtual universe.

The virtual universe, the plane of Hongmeng, in the city of Hongmeng.

In the core of the entire Hongmeng City-a shining mysterious palace that is one million kilometers high, it looks like a huge sword to pierce the starry sky. This is the "Hongmeng Palace."

In the Hongmeng Hall, a gathering of hall masters is at least the existence of the master of the universe.

"Chaotic Source."

"Hunyuan, what happened to you in such a hurry to call us over?"

The lord of the Hongmeng Palace includes the lord of the universe of the human race and the lord of the alien universe. The lord of the alien universe is slightly more than the lord of the human race universe, but they are divided into different ethnic groups, and some ethnic groups have three or two universes. There is even only one master.

Generally speaking, the lord of the human race universe is stronger, and the founder of the giant axe is of course the absolute center of the Hongmeng. The entire Hongmeng is also revolving around humans.
novel.usb.com

Wang Yi summoned, and there were more than twenty masters of the universe present here.

Including the Lord of Chaos City ~www.mtlnovel.com~The Lord of Qingdong, the Lord of Peng Gong, the Lord of Darkness, etc. have all come over.

Wang Yi looked around and said: "Everyone, I ventured into the universe before and entered the inner realm of Qingfeng Realm. I encountered a black light burst in the Magic Light Cavern. Because it came too suddenly, I was involved."

"What? The black light of the Magic Light Cavern?"

"Hunyuan, are you okay?"

"Have you been sucked into the black eyes? You have to let the giant axe come over."

The masters of the universe opened their mouths one after another.

"I can still protect myself. This black light burst is different from any black light burst in history as we know it." Wang Yi solemnly said. "At the same time as the black light broke out, I felt a powerful pressure coming from the center. It should be the birth of a certain treasure... I suspect that this treasure may be the strongest treasure."

[Chapter 586: The strongest in the universe](#)

"The strongest treasure?" The many masters of the universe in the Hongmeng Hall were in an uproar.

"Is it really the Xeon Treasure?"

"Hunyuan, this is not a joke."

"Didn't the Xeon Arcane all appear in the core area of Qingfeng Realm? How could it appear in places like the Demon Light Cavern in the inner region? The Demon Light Cave, it seems that the highest treasure has never appeared before, right?"

Some universe masters in Hongmeng couldn't believe it. Those were the masters of alien universes. They were also kept in the dark by the human race. They didn't even know that the creators of the great axe already had the supreme treasure.

And the Lord of the universe of the human race had already seen Wang Yi's incredible things, and he had actually believed it in his heart.

Sitting in the first seat above, the founder of the giant axe who was specifically called over was blatantly blatant, and he spoke with a deep and powerful voice. "I believe in what Hunyuan said, regardless of whether it is Xeon Supreme... Even if there is only one point possible, it is worth our time to leave."

"Even if it isn't the Xeon Supreme Treasure, it is also a Super Supreme Treasure comparable to the Special Peak Supreme Treasure. We won't lose if we can compete for it."

The masters of the universe in the palace nodded one after another, and this was indeed true.

"This time, we all mobilized the Lord of the Universe in Qingfeng Realm, and the goal is the Magic Light Cavern." The creator of the giant axe said, "I will also leave immediately, with the fastest speed, in about three years. Arrived."

The creator of the giant axe is the strongest in the universe. It can penetrate into the inner realm of Qingfeng Realm faster than Wang Yi, the Lord of the Chaos City, and the lord of the universe. In addition, the location and distance of the Magic Light Cave are different... so I don't want to come over easy.

"Great Axe, you have to be careful in Qingfeng Realm, don't take too much risk on the road, pay attention to safety." Chaos City Lord and the Lord of the Universe said worriedly.

The creator of the Great Axe is currently the only one of the strongest in the universe in the human race. If something happens in Qingfeng Realm, it will be a big trouble.

"Haha, don't worry, ordinary places in Qingfeng world can't trap me." The founder of the giant axe smiled.

Then he turned his head to face Wang Yi's side, with a solemn tone. "Before we arrive at the Magic Light Cavern, we will rely on you from Chaotic Source."

"I will do my best." Wang Yi nodded.

This time, it would be a good thing if the human race could get another supreme treasure.

...

Hundreds of light-years away from Wang Yi and the others, in the darkness, there is also a palace where numerous sculptures of strange animals have emerged.

In the palace, is the master of the monster race universe.

Orderly mixed and magnificent feathers of golden and cyan colors, birds heads are noble and glamorous long crowns, with three monster eyes of gold, silver and red, and three pairs of huge wings. Underneath are four hooved feet, lying on the ground. .

If it is a strong man in the primitive universe, it is easy to recognize that she is the top master of the universe "Master of Eagles" of the monster race.

Speaking of, the lord of the eagle was also a peerless genius of the monster race that was extremely against the sky. He has great potential. He has been tempered in the cosmic sea early, and has also given some powerful treasures to protect him. When encountering the danger of being unable to resist, other powerful monsters Rescue immediately.

After a long period of tempering, the lord of the eagle has indeed become the top and most terrifying lord of the universe in the monster race! The status is high, second only to the dream demon ancestor and the earthquake demon ancestor.

Like the Chaos City Lord of the human race... She is considered to be the Lord of the Universe who is most likely to break through to the strongest in the universe.

"This, what kind of breath is this, so terrible." After the initial shock, the Lord of Eagles, like the Lord of the Universe of the East Emperor Holy Land, immediately guessed that this was an extremely terrifying treasure born, and immediately became excited. .

"Adventure, this is an adventure that belongs to my eagle."

"However, it is very difficult to get it with my ability. If it is discovered by other forces and the strongest of their universe rushes over, I will not be able to fight for it." The lord of the eagle calmed down, and his greed was suppressed by reason.

"It's better to inform the two ancestors."

The divine power incarnation of the demon clan that the Lord of the Eagles stayed in the primitive universe immediately contacted the two ancestors of the demon clan-Zhen Yaozu and Dream Demon ancestor. The two demon ancestors attached great importance to them. After a quick discussion, they decided The Dream Demon Ancestor set out with several powerful cosmic masters of the race, and at the same time ordered the other cosmic masters of the Monster Race Alliance in the Universe Sea to rush to the inner region of Qingfeng Realm as much as possible if there is nothing else to do.

This time, Yaozu decided to seize this treasure.

In order to reach Qingfeng Realm in a hurry, the Yaozu did not go to the distant natural wormhole at all, but jumped forward directly from the divine kingdom in the interlayer of space.

The vast primitive universe, one of the walls of the universe. "Boom!" A towering figure directly rushed out of the cosmic membrane wall. A small cavity appeared in the cosmic membrane wall, but it quickly recovered automatically.

That figure was surrounded by thousands of snake shadows, a huge silver-white snake head looked around, and the void around its huge body was completely twisted into a whirlpool.

Meng Yaozu looked around with satisfaction, "I have already left the primitive universe, um, set out immediately and head to Qingfeng Realm." There was expectation in her eyes. "This time, maybe my monster race gets another powerful treasure. If it's a Xeon treasure, it would be best. In the original universe, my monster race's strength will rise again, overwhelming other forces."

Huh! Then teleported forward.

...

The vast universe, in the small universe of the first reincarnation era far from the original universe.

"The Devil, that's it." In the undulating and towering palaces of the small universe, the divine power incarnation of the 'Lord of the Eight Ruins' reported respectfully to the owner of the small universe he entrusted.

All the masters of the universe who are active in the sea of space must have the strongest in the universe behind them, otherwise they would not have survived without a small universe in which their lives were entrusted.

However, some are in a single race, such as God Eye Race, Zerg Race, Skeleton Race... or powers such as the ancestral gods of the First and Second Reincarnation Era, and some are the strongest in the lonely universe like the Lord of the Eight Ruins. By.

"I didn't expect ~www.mtlnovel.com~ in a place like Moguang Cavern, that kind of treasure could actually appear. It is estimated to be the first and only time in a billion epoch, okay, that's great." Sky The towering figure in the middle of the firelight lingers with weird laughter. It is the incarnation of the demon god, but with the blessing of the origin of the universe, even the Lord of the universe can easily suppress it. "It just so happens that my real body is in Qingfeng Realm, and it's time for me to get this treasure."

"If it's the Xeon Supreme Treasure, hum, the old guy, Star Master Bei Chi, has been pressing me over with his strength. This time I get the Xeon Treasure, and I must find a place back."

"There is also the rampage of the Second Reincarnation Era, who often laughs at me, and we must teach him well."

The Fire Demon God, the strongest in the ancient universe in the First Reincarnation Era in the depths of Qingfeng Realm, also began to act.

...

And the East Emperor Holy Land Universe, which is the furthest away from the original universe, also received a report from the Lord of the universe below.

[Chapter 587: North Star Lord](#)

There are only two holy land universes in the vast universe that can transcend reincarnation, namely the Purple Moon Holy Land Universe and the East Emperor Holy Land Universe. In terms of the long history, the strength and the depth of the foundation...Naturally, no one knows the existence until now. How long is the East Emperor Holy Land universe.

The 3.2 billion light-years in diameter of the East Emperor Holy Land Universe can be called the largest mini-universe in the known universe. Even the small universe of the other holy land universe, the "Purple Moon Holy Land", is only 2.1 billion light-years in diameter, far inferior to the East Emperor Holy Land.

The distribution law of the small universe is that the "younger" small universe is closer to the original universe. Like this, the East Emperor Holy Land universe, which was born before the reincarnation epoch, can be said to be a "surviving" small universe. The most distant.

The universe of the East Emperor Holy Land contains the "Endless God Realm".

Nine percent of the immortal gods of the entire holy land and universe, ninety percent of the universe's venerables, the lord of all universes, and the strongest of the universe gathered in the endless gods.

The entire endless **** realm is beautiful, peaceful and peaceful, with countless buildings of various civilized styles, and all kinds of rare flowers and plants can be seen everywhere.

As the creatures of the oldest holy land in the universe, they have pride in their bones. Even faintly look down on the Purple Moon Holy Land Universe! And from the size of the "Holy Land Universe" ...their ancestor of the Eastern Emperor is probably stronger than the ancestor of the purple moon!

In the center of the Infinite God Realm, there is a towering green tree that runs through the entire God Realm. That is the ancestor tree that symbolizes the ancestor of the East Emperor Holy Land. Under this ancient tree, there are people sitting cross-legged. At first glance, there is no end in sight.

In the sky near the ancestor tree, a majestic and majestic palace carved with white stones is looming in the clouds and mists of the gods.

A figure suddenly appeared.

"teacher!"

A man in a white robe walked out from the gate of the palace, looked at the handsome woman who appeared, and smiled faintly.

"Ling Yan, haven't you been adventurous in Qingfeng world these years? How come you have time to come to my teacher?"

The Northern True Star Lord, an extremely ancient existence, as the strongest in the universe...Naturally, he became the strongest in the universe in the age of the primitive universe. The ancestor of the East Emperor also existed in the same age. It's just that his small universe has long been rotten, and he can only live with the Holy Land universe as its root.

"Teacher." The lord of Lingyan was respectful and humble. "I am here to disturb you this time because..."

The Northern True Star Lord is extremely old, and he is also one of the strongest in the universe of the East Emperor Holy Land, because the universe of the East Emperor Holy Land is too long and has been inherited several times. Although the Northern True Star Lord has no small universe... but with the ancient heritage, his combat power is still relatively high among the strongest in the universe.

However, he has been staying in the Holy Land of the East Emperor, and has not entered the universe for many times.

"Oh, did you find a newly born Xeon Supreme Treasure in the inner domain of Qingfeng Realm?" The Northern True Star Lord moved slightly.

Unlike the suspicions of other forces, after a long period of reincarnation, the Holy Land of the East Emperor, which has a lot of ancient information, can easily determine that the Xeon was born.

The most powerful treasures are extremely precious. Even the Eastern Emperor's Holy Land, the quantity is very scarce, all accumulated over countless years.

Ling Yan looked at the teacher who was silent and a little anxious. "Teacher, besides us, there are other forces that have discovered the birth of the magic light cave's treasure. If we don't send people over, the treasure will be taken away by other forces..."

If the East Emperor Holy Land does not send out the strongest in the universe, relying solely on other universe masters, unless there are hundreds of them, it will be hard to dispute those strongest in the universe.

The North True Star Master yelled: "What anxious, it's just the most powerful treasure, haven't you seen it?"

One or two extra Xeon Treasures are nothing more than icing on the cake for the East Emperor Holy Land with the deepest heritage in the universe.

The Lord of Lingyan was helpless.

Teacher, you are not in a hurry, you are the strongest in the universe, and you have the strongest treasure.

But we don't.

Most of the masters of the universe, Dongdi Holy Land, are extremely ancient.

Like the East Emperor Holy Land universe, the existence is extremely long, even if ten universe masters are born in one era of reincarnation, there will be more than ten thousand universe masters! But the fact is that there are only a few hundred masters of the universe...Why? It is because of the endurance of the Holy Land universe!

Just like a piece of land, how many plants can be planted at most, if there are too many plants, the land cannot bear it. And a small universe cannot give birth to the strongest person in the universe, at most, the Lord of the universe can be born! And the "Master of the Universe" that a small universe can

withstand is limited...Every Master of the Universe is a huge burden on the small universe. If it reaches a certain amount, it cannot be increased, otherwise it will cause harm to the Holy Land Universe itself. .

They have also lived for a long time. Some have lived for hundreds of times of reincarnation or even longer. Naturally, they can be very strong in all aspects. Most of them are the masters of the top cosmos of Tier 4, a few are Tier 5, and even have the strongest. The master of the sixth-order universe of the treasure.

There is little hope for these universe masters to break through to the strongest in the universe, and the secret method has been studied to the extreme.

The Xeon Supreme Treasure can be obtained based on the contribution to the ethnic group, but the conditions are very demanding, even if hundreds of times of reincarnation are struggling, they will not be able to make it.

The Northern True Star Lord glanced at this disciple, of course he understood the thoughts of this disciple who followed his ancient years, and shook his head and said, "Teacher wants to leave the Holy Land. It is not a random thing. You must get the consent of the ancestor to act."

Like the Lord of the Holy Land Universe, the conditions for leaving the Holy Land are very simple, reaching the top of Tier 4 is almost the same, and some will even train to Tier 5 before entering the Universe Sea.

But as the only few of the strongest in the universe in the Holy Land universe, they couldn't move lightly.

"Ancestor?" The lord of Lingyan was shocked, and his eyes showed fiery worship.

Ancestor! The universe of Dongdi Holy Land exists endlessly! The ancestor "East Emperor" is the supreme existence in the hearts of the whole Holy Land universe.

Every creature in the Holy Land of the East Emperor they worship the ancestor of the East Emperor extremely.

However, in the endless years, the ancestor "East Emperor" rarely appeared as if it did not exist, and even many "lords of the universe" lived many reincarnations, and they had never seen the ancestor Dongdi in person! Let alone the outer universe... In the outer universe, no strong man has ever seen the ancestors of the two holy land universes.

Therefore, the original ancestor is called the first strongest in the universe!

The Lord of the Ordinary Universe naturally cannot contact the mysterious ancestor of the Eastern Emperor, but the oldest and strongest in the universe like the Northern True Star Master knows that the ancestor of the Eastern Emperor is always paying attention to his own universe, and there is nothing to hide from him.

The North True Star Lord thought for a while and said, "But... the magic light cave is less dangerous, and it's rare that a strongest treasure was born. I'll ask the ancestors. It shouldn't be a big problem to go out."

"Yeah." The Lord of Lingyan was full of expectations.

[Chapter 588: Fire Demon](#)

After a while.

The Lord of the North Star is riding a dazzling polygonal black sphere, traveling at high speed in the universe.

"In addition to me this time, I also set off with the fifty masters of the universe from the Eastern Emperor Holy Land." The North True Star Master was full of confidence. "This strongest treasure will belong to my Dongdi Holy Land."

Deep in the inner realm of Qingfeng Realm, somewhere near the core area, there was a drizzle in the sky.

rustle.

Surrounded by a unique and quiet atmosphere.

Abruptly, a big foot stepped on the dirt.

The burly savage man stood on a high mountain, staring sharply in a certain direction of Qingfeng Realm, as if he could see through time and space.

"Magic Light Cave..."

"With one more supreme treasure, I will grow stronger as a human, and I have no chance to lose it." The giant axe stroked the beautifully patterned bronze axe in his hand, and his eyes filled with firmness under his loose, messy hair.

"It just so happens that I have been comprehending this magic axe over the years, and I have gained something. This time, even if I expose some strength, I have to eliminate all obstacles that hinder me."

"boom!"

The next moment, a sharp and dazzling axe flew up into the sky, overwhelming all wind and rain.

This giant axe is about a million kilometers long. The bronze axe has a huge face. There are ancient secret patterns carved on the back of the axe. The secret patterns are mysterious. At this moment, this giant axe exudes a soaring light... directly tore the surrounding space. Make the surrounding water curtain recede, the boulders shattered, and all the laws would retreat!

"Not enough!" With a powerful roar, another golden token flew into the sky, and endless golden light was released, like billions of golden divine swords, and countless golden sword lights covered the divine axe like feathers. The **** axe is coated with a layer of sacred light, and the breath is even more terrifying.

The power of the Xeon Supreme Realm is blessed on the **** axe, and its power instantly reaches an incredible level.

boom!

The space in front has long been condensed and cannot be teleported, but this giant axe completely pushes back all the laws and is not restricted by the laws of operation, and the speed soars more and more exaggerated.

Thousands of times the speed of light, ten thousand times the speed of light... it keeps soaring upwards, passing through this condensed area of space in just a few minutes.

follow closely!

Huh!

Teleport directly.

This huge axe disappeared out of thin air with the golden light.

The creator of the giant axe rushed to the 'Magic Light Cavern' within Qingfeng Realm at an astonishing speed.

...

In the 'Magic Light Cavern', torrents of endless darkness surging, even the pinnacle of the Treasure Domain can only barely maintain, and it is difficult to advance in the endless undercurrent.

"Boom...boom...boom..."

In the center of the 'Magic Light Cave', that huge black square object slowly drilled out of the abyss of the black hole, and there were golden lines on the black square object, forming horizontal and vertical lines, just like the 'Magic's Cube'.

In the past three years, Wang Yi, the Lord of the Eight Ruins, the Holy Land of the East Emperor, and the "Master of Eagles" of the Monster Race have all been trying their best to rush to the direction of the birth of the treasure, all wanting to reach the target before the others, so as to get the first place.

machine.

However, at their speed, it will not take more than ten or twenty years to reach the 'Black Rubik's Cube'.

Primitive universe, the core of Yaozu territory, the secret realm of Dream Demon Ancestor.

"Jianjiu, I will be here soon, what's the situation like?" asked Meng Yaozu's divine power incarnation.

And the divine power incarnation of the Lord of Eagles stood in the palace of the ancestor Dream Demon, and respectfully said to the silver-white snake: "Teacher, the treasure has not yet been completely born. I am going to that place and haven't found other abnormalities."

"That's good." Dream Demon Ancestor lowered his head, looking at the Lord of Eagles under the steps, "I will get to your side as soon as possible."

A place called 'Beihai' near the Moguang Cave.

"Boom!" Far more than 100,000 times the speed of light, an afterimage wreaked havoc in the void of the shell sea, advancing at an extremely terrifying speed, and soon approached the entrance of the magic light cave.

Behind the appearance is a pair of huge brilliant golden wings, resembling a human shape, but with three heads of towering beings. His divine body is like a combination of golden and red diamonds. There is black flame liquid flowing in the diamonds, and black flames are burning in his eyes. The scorching heat that was naturally emitted made the surrounding space tremble and twist.

"The front is the Magic Light Cavern." A smile appeared on the fierce face of the Fire Demon God. "According to the words of the Lord of the Eight Ruins, the strongest in the universe has not yet arrived. I was the first to come here. This treasure, I should be the most hopeful to get it, but I can't take it carelessly. Other universes are the strongest. I don't know when it will arrive, I want to grab this treasure as soon as possible."

The Fire Demon instantly rushed into the endless darkness. "What a strong resistance." The Fire Demon God was also a little surprised. "It feels like it's only weaker than the realm of Xeon."

"Can't waste time here." The fire demon's eyes burst into flames, and his body was covered by golden flames. Under the monstrous might, the surrounding darkness was forced back, and the fire demon flew in the direction of the pressure. .

The speed keeps soaring, one hundred times the speed of light, one thousand times the speed of light.....

The rule of the universe's one hundred times the speed of light is constantly being broken by the strongest person in the universe.

The Lord of the Eight Ruins also immediately learned the news that the Fire Demon had arrived, and was overjoyed.

The Lord of the Eight Ruins took decades to pass the distance, and the Fire Demon God passed through in just half a day.

However, the Fire Demon God didn't care about the Lord of the Eight Ruins, and approached the "Black Rubik's Cube" directly.

And because of the surrounding dark realms, neither Wang Yi, the Lord of Eagles, or the Eastern Emperor's Holy Land had discovered that the Fire Demon God had arrived.

The Fire Demon flew at an astonishing speed. It only took less than ten days to appear near the Rubik's Cube, watching the black cube slowly emerging from the abyss of the black hole, almost three-quarters of the volume of the black square, feeling the magnificent breath. , Fire Demon God's eyes glowed.

"That's right, this is the Xeon Supreme Treasure." The Fire Demon God was a little excited.

It was too difficult. After so many years, he had ventured in the first reincarnation era until now, and he has only one piece of the strongest treasure, still a weapon.

The Fire Demon looked at the Xeon Supreme Treasure that was still born, and muttered, "What kind of Treasure is this? Weapon? Armor? Palace? Domain type? Soul type? Or other special type? Anyway, it's me. Of the Fire Demon God."

The Fire Demon God flew over. Although the coercion surrounding the huge black square object was unmatched, he could easily resist it.

"I don't know what the conditions for recognizing the Lord are? I hope it won't be too difficult~www.mtlnovel.com~ In the tense expectation of the Vulcan God, a divine power quickly penetrated into the black square object, but it was directly bombarded by the invisible vibration. Scattered.

Huomo Shen's face changed. "Is still in the process of being born, can't I recognize the Lord? How could this be?" The Fire Demon God was a little anxious.

He was the first to come, and now he has the greatest advantage. Waiting for the strongest from other universes to come over, he will be in trouble.

Fire Demon God continued to try a few more times, but still couldn't brand his divine power, so he gave up.

Fire Demon God watched the black square slowly emerging from the abyss of the black hole, calculated it in his heart, and quickly concluded that it would take another year for this treasure to be completely born.

"Come out quickly."

The Fire Demon God was helpless, staring at him.

[Chapter 589: Followed by](#)

The news that a super treasure was born in the "Magic Light Cavern" in Qingfeng Realm is currently only known by the human race, the monster race, the fire demon god, and the East Emperor Holy Land.

The Fire Demon God who happened to be in the inner region of Qingfeng Realm was the first to arrive because of its location.

After the Fire Demon God rushed to the Magic Light Cavern for about a month.

"boom!"

A golden brilliance rushed from the inner area of Qingfeng Realm at a speed far exceeding one hundred thousand times the speed of light, wow! The streamer decelerated rapidly, but still domineering until it stopped at the entrance of the Magic Light Cavern, revealing the figure of a burly man with loose hair, staring at the mighty dark water in the distance, and there is a handful of about a million people floating in front of him. Kilometers, the golden axe with endless sharpness, the time and space around the axe is distorted.

"What a strong breath, it is estimated that it is really the Xeon treasure, it is worthwhile that I rushed over with all my strength." A smile appeared on the face of the founder of the giant axe.

He glanced at it, "But it seems that this treasure shouldn't be born yet, so let's go ahead and talk about it."

The giant axe gave a low drink, and the majestic giant axe gleamed with golden light and flew out with terrifying aura, bursting through time and space, and impacting in the dark water at a terrifying speed,

soaring into the sky at super high speed and flying towards Inside, all the surrounding laws receded, and the speed of the creator of the giant axe continued to increase, flying to the dark core area...After the endless black hole of the abyss appeared, the giant axe immediately began to slow down.

"Great axe? Are you here too?" A sharp, high-pitched sound was heard from a distance, full of gunpowder.

The huge wings of the surging golden flame broke through the darkness. It was a majestic giant with a body that burned like a blazing fire like a brilliant golden silver diamond. He had three heads, each with three eyes, but no nose, mouth and ears. Watching the giant axe flying over.

"Fire Demon God? I didn't expect you to be here." The giant axe's rough voice sounded, "but it seems that you haven't got this treasure yet."

"Hmph, I can't get it, and you can't get it either." The God of Fire looked at the giant axe solemnly. Although the creator of the giant axe was low-key, according to his vague understanding, the strongest human race in the primitive universe was not strong enough. weak.

The strongest people in the universe are generally at the top of the seventh to the top of the eighth level. Although the giant axe has not been shot very much, but the few battles have proved that the giant axe has at least the eighth level of combat power, and this Still the strongest person in the universe without Xeon Treasure.

Although a little afraid, the Fire Demon God is not afraid.

With the Xeon Supreme Weapon, he can display the top combat power of Tier 8, even he feels that he can suppress the giant axe.

The giant axe looked at the black square that was slowly emerging, understood in his heart, and glanced at the Fire Demon God.

"It turns out that this treasure hasn't been born yet, so it's no wonder that the old fellow, Fire Demon God, didn't succeed." The creator of the giant axe secretly said.

Controlling the golden giant axe to fly over, the Fire Demon God looked at it coldly, without making a sound or paying attention.

The Xeon Supreme Treasure has not yet been completely born, even if it is impossible to recognize the Lord, it has not yet reached the time to fight for real.

The creator of the giant axe controlled a divine power to fall on the black square, but it was directly shaken away by a powerful force before it penetrated.

"Haha, Giant Axe, don't waste your efforts. If this treasure can directly recognize the Lord, will I be watching it by the side." The Fire Demon couldn't help but sneered.

He also murmured in his heart, "The giant axe is here. I don't know if there is any other strongest in the universe. The giant axe, if there are too many strongest in the universe, this treasure may not fall into my hands. NS."

Fire Demon God's worries soon came true.

Seventeenth day after the arrival of the giant axe.

The area on the edge of the Magic Light Cavern suddenly, boom! A dazzling and powerful aura suddenly tore through the time and space, coming directly through the air, and violently crashing into the endless black water stream without stopping.

"The Magic Light Cavern has finally arrived."

The Northern True Star Lord looked at the flowing darkness outside and instructed a group of cosmic masters behind him: "Sure enough, as I expected, the Xeon Supreme Treasure hasn't really been born yet, and it's not too late for us to come. This time, you listen to it. I gave an order to win another supreme treasure for my holy land."

"Yes." The dozens of masters of the universe in the East Emperor Holy Land were full of confidence.

The giant axe and Fire Demon who were waiting for the black square to come out suddenly changed their expressions. Fire Demon looked at it from a distance: "What a strong aura, this, this, which is the strongest in the universe? I have never seen it?"

The creator of the giant axe also showed a trace of caution.

The strongest person in the universe that comes is strange and very strong.

He couldn't help squeezing the axe tightly, a hint of warfare emerged in his heart.

Soon, bang! ! A stream of light rushed out of the darkness and directly rushed to the front, accompanied by a rumbling sound, a powerful aura permeated.

"Xeon Supreme Palace!" The faces of the founder of the giant axe and the fire demon **** suddenly changed.

"call!"

An old man with a white robe and body surrounded by some vines and green leaves appeared. He glanced around, first glanced at the huge black cube that was trembling out of the world, and then glanced at the giant axe and the **** of fire.

"I, Beizhen, have not been in the universe for more than 10 times of reincarnation."

"You are..." Fire Demon God frowned, "East Emperor Holy Land Universe?"

"Yes." said the North True Star Lord, "Are you the Fire Demon God of the First Reincarnation Era and the Great Axe of the Primitive Universe? You also want to seize this supreme treasure?" The North True Star Lord's tone reveals a trace of contempt.

Although his Northern True Star Lord lost the small universe and had no original blessing, his strength was weaker than some of the strongest in the universe, but he did not know how many times of reincarnation he practiced. The strength definitely exceeds the eighth rank.

Not to mention, he also took a full fifty masters of the universe, all staying in the palace.

With the protection of the Xeon Supreme Palace and the Northern True Star Master, these fifty universe masters can exert one or two of the strongest combat power in the universe.

No matter how you look at it, Dongdi Holy Land is full of advantages here.

"The Fire Demon God, there is only one Xeon Supreme Weapon, the Great Axe of the Primitive Universe, and even a Xeon Supreme Treasure, there is nothing to worry about." Northern True Star Lord said inwardly.

...

Inside the purple dragon boat palace, Wang Yi, who was advancing at "turtle speed" in the dark, also learned about the current situation from the giant axe.

"The Fire Demon God of the First Reincarnation Era?"

"East Emperor Holy Land Universe?"

"Suddenly ran over to both sides at once."

Wang Yi sat on the throne of the palace control room, wearing a red robe with long black hair scattered.
U U Reading www.uukanshu.com

"It seems that this time my human race wants to get this supreme treasure, it's not easy."

But listening to the tone of the giant axe is full of confidence.

It's not.

The giant axe without the Xeon Supreme Treasure was already terrifying, and it was also the top among the strongest in the eighth-order universe.

There is a great axe of the strongest treasure, but it can exert the top combat power of the ninth rank.

In today's universe, the giant axe should be considered the top three in terms of single combat power, and the first God of the God Eye Clan can crush him.

What's more, there is more than one Xeon on the giant axe, as well as the domain type Xeon.

This combat power is absolutely sturdy enough to explode.

[Chapter 590: "Black"](#)

Dream Demon Ancestor finally arrived at the 'Magic Light Cavern'.

She looked at the calm and restless 'North True Star Lord', and then at the fierce face of the 'Fire Demon God', and she thought about it, and finally spoke with the 'Giant Axe'.

"Great Axe, how about our two joint efforts."

"As for who the precious treasure belongs to, we will have a better chance when we work together."

There are four parties on the scene, except for the obviously most powerful East Emperor Holy Land, the strength of the other three parties is almost half a catty.

The reason why they joined forces with the giant axe is because they are all from the primitive universe and are the most familiar with each other.

"Good." Giant Axe agreed without hesitation.

In the face of interests, hatred can be put aside.

Knowing to each other, this union is only temporary, and even if there is a chance, they don't mind falling into trouble.

"Boom..."

And the birth of the huge black Rubik's Cube is close to the last moment.

That pressure is overwhelming, and the entire Magic Light Cavern area of 10,000 light-years is full of turbulent waves, and the momentum is huge, even if the Lord of the fifth-order universe wants to get close to the black Rubik's Cube.

This is not only the power of the Black Rubik's Cube, but more importantly, the eruption of the "black hole abyss" that has been silent for countless epochs.

Of course the four strongest in the universe present can withstand the impact, their eyes are hot, and they are always ready to do it.

I knew in my heart that Xeon Zhibao was about to be born.

When that momentum climbed to its zenith--

The square black Rubik's Cube with a diameter of more than four light-years finally left the abyss black hole completely, and stopped firmly in the void. The coercion also converged, and if looming, the golden secret patterns on it flowed into mysterious brilliance.

The endless dark rushing water of the entire Magic Light Cave suddenly quieted down.

Afterwards!

boom!

That amazing binding force suddenly changed, and the endless dark water rushed past the abyss black hole from all directions like a dragon sucking water.

And Wang Yi, who was in the dark water, and many other masters of the universe were also carried by this amazing force and rushed to the abyss black hole, a hundred times faster than before!

If you change the angle of view, from a high altitude, you can see that the darkness that diverges to the entire magic light cave begins to shrink sharply, and the surroundings are like fading, and the color quickly changes from thick to light.

Wang Yi who was in the palace also noticed this change.

"The Xeon Treasure is finally born?" Wang Yi frowned and tried his best to control the palace that was about to run away, but it was a little futile. The suction was so strong that the palace kept trembling, like a leaf drawn into a deep sea whirlpool. Can go with the flow.

Wang Yi had already felt that the flight speed had exceeded ten thousand times the speed of light, and the palace had completely lost control, as if a wild horse was running towards the abyss and black hole.

"Such a terrifying speed, it is estimated that it will not take long to reach the core area." Wang Yi felt incredible.

And the strongest men in the universe surrounding the black Rubik's Cube shot at the same time.

Although the surrounding dark water currents have an astonishing impact on the overall restraint, no one controls them. They just spread out and spread to tens of thousands of light years. They are not aimed at a certain strong person, so the strongest in the universe can easily get rid of this influence.

For the first time, the four strongest people in the universe all coincided with each other, and they separated their divine power to try to penetrate into the black square to try to recognize the Lord.

In fact, Xeon Zhibao's master recognition is not that simple, the process is much more complicated than ordinary Zhibao master recognition, and some have harsh conditions, which can't be done in a short time.

But what if it succeeds?

The four divine powers flew directly to the black object, trying to imprint the mark of life in it.

However, the branding mark must be a single mark and must not be disturbed. After all, Zhibao can only have one owner.

Want to take it away? Even if the strongest person in the universe wants to take away the Xeon Supreme Treasure, which is light-years away, it is impossible to recognize the Lord.

Four different imprints of divine power infiltrated the black square at the same time, interfering with each other, and of course no one could recognize the master.

The only way at the moment is to repel other competitors, force them back, and create a separate environment for recognizing the master.

"Go away! The Xeon is mine!" The giant giant wing behind the towering diamond giant surrounded by golden flames spread out, and there was a simple spear in his hand, making a sky-shaking roar.

"It's a joke, if you have the ability to take it yourself." The white-robed old man Bei Zhenxing sneered. He was surrounded by a dazzling polygonal black sphere, and dozens of cosmic masters in the East Emperor Holy Land were waiting in it to erupt at any time.

The Northern True Star Lord is full of confidence, even if the three parties add up, he is not afraid.

"Great axe, let's do it together." In the dark wave, the body of a huge looming silver serpent gradually emerged. This silver serpent stretched for 100,000 kilometers at this moment, and her eyes shone cold.

She looked at the giant axe hand. The axe above her eyes narrowed slightly, and she was a little confused. The axe of the creator of the giant axe was different from the one she remembered.

"Okay." The giant axe is still concise and concise, carrying the axe, stepping out in one step, and stepping out of infinite time and space.

Meng Yaozu didn't think too much anymore. With a swing of her tail, she rushed out. She has the strongest treasure "Dreamscale" armor, armored body, and strong defense, so she didn't worry about it in her heart.

Only in this situation, the master of the universe of a group of monster races she brought is not good.

"Heh!" The two acted together, and the Lord Beizhen star saw it clearly, and a sneer evoked from the corner of his mouth. "Sure enough, it's united, do you think it's useful to unite?"

Behind the Northern True Star Lord, a green giant tree suddenly appeared, crystal clear, as if carved from jade, with strips of streamer winding on it, which was so beautiful.

boom! A cloud of blue light, centered on the Northern True Star Lord, quickly diffused towards the distance, and soon covered an area of a light-year radius.

The supreme treasure displayed by the North True Star Lord is the supreme treasure of the domain class! Named "The Tree of the Blue Sky."

And the founder of the giant axe, the fire demon god, and the dream demon ancestor who fell into the blue light realm immediately felt the powerful binding force in the surrounding space.

"No, it's the strongest treasure of the domain category!" Meng Yaozu exclaimed.

"Just one area wants to stop me and break me!" The founder of the giant axe roared, the divine axe burst into front with a dazzling light, and its momentum was magnificent.

"Moyu Vine!" Meng Yaozu also launched his own attack at the same time. Suddenly, black vines shot out from the whole body, and for a moment, there were 81 black vines that covered the sky and covered the earth. They instantly traversed the sky, spanning hundreds of millions of kilometers, and directly besieged the true star to the north.

Moyu Vine is one of the signature treasures of the dream demon ancestor~www.mtlnovel.com~ It is the peak attack treasure of the spiritual teacher genre!

The Peak Attack Weapon Treasure is logically the lowest value among the Peak Weapon Treasures, but even if it is the Peak Weapon Treasure, there will still be a big gap between them.

Like "Jia Jia", it belongs to the best of the pinnacle armor! And the worse armor of the pinnacle can only be weakened to one ten thousandth.

The same is true for Moyu Vine.

Its value is extremely high, it can be condensed into one, used like a whip, or it can be completely dispersed to restrain the enemy, although it can be broken, but those broken can quickly be reunited again.

"Melting the fire to the sea!" The fire demon *** turned into flames, striking the blue light, but his main purpose was to quietly float in the black square there.

A fierce battle dominated by the strongest in the universe unfolded here.
